3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.
- Si no es correcta:
- Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.

## Eliminación de asignaciones de tarea

Siga el procedimiento para eliminar las fichas de trabajo de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Est. Trab.** programado. Continúe con el paso [paso 4](#)
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Fichas de trabajo.  
Pulse  para seleccionar.

- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.

- 4 Pulse  o  para acceder a la carpeta Todas.  
Pulse  para seleccionar.

- 5 Pulse  o  para seleccionar la ficha de trabajo que desee. Pulse  para seleccionar.

- 6 Pulse  de nuevo mientras visualiza la Ficha de trabajo.

- 7 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

- 8 Espere a que se produzca la confirmación.  
Si es correcta:
  - Suena un tono indicador positivo.
  - La pantalla muestra un pequeño aviso positivo.
 Si no es correcta:
  - Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.

## Eliminación de todas las asignaciones de tarea

Siga el procedimiento para eliminar todas las fichas de trabajo de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Est. Trab.** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Fichas de trabajo. Pulse  para seleccionar.
- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.

- 4 Pulse  o  para acceder a la carpeta Todas. Pulse  para seleccionar.

- 5 Pulse  o  para ir a Eliminar todo. Pulse  para seleccionar.

- 6 Lleve a cabo una de las siguientes acciones:
  - Pulse  o  para elegir Sí. Pulse  para seleccionar. La pantalla muestra un pequeño aviso positivo.
  - Pulse  o  para seleccionar No. Pulse  para seleccionar. La radio vuelve a la pantalla anterior.

## Privacidad

Esta función ayuda a evitar que los usuarios no autorizados escuchen conversaciones en un canal mediante el uso de una solución de cifrado basada en software. Las partes de señalización e identificación de usuario de una transmisión no se mezclan.

La radio debe tener la privacidad habilitada en el canal para enviar una transmisión con la privacidad habilitada, aunque no es un requisito necesario para recibir una transmisión. Mientras se encuentra en un canal con la privacidad habilitada, la radio puede recibir transmisiones claras o descodificadas.

La radio solo es compatible con la privacidad mejorada. Para descodificar una llamada o transmisión de datos que tiene la privacidad activada, la radio debe estar programada para tener el mismo valor de clave e ID de clave (para la privacidad mejorada) que la radio que transmite.

Si la radio recibe una llamada codificada que tenga un valor de clave e ID de clave distintos, no oirá nada en absoluto (privacidad mejorada).

En un canal con la privacidad activada, la radio puede recibir llamadas claras o descodificadas, en función de cómo se haya programado. Además, puede reproducir un tono de aviso o no, en función de cómo se haya programado.

**NOTA:**

Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

El indicador LED se ilumina en color verde cuando la radio transmite y parpadea rápidamente cuando recibe una transmisión con la función de privacidad activada.

**NOTA:**

Es posible que algunos modelos de radio no ofrezcan esta función de privacidad o la configuración sea diferente. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación o desactivación de la privacidad

Siga el procedimiento para activar o desactivar la privacidad en la radio.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón **Privacidad** programado. Omite los pasos que se indican a continuación.
    - Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
-

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Privacidad. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.
  - Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.
- 

## Inhibic. respuesta

Esta función ayuda a prevenir que la radio responda a cualquier transmisión entrante.

### NOTA:

Se trata de una función adquirible. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Si se activa, la radio no genera ninguna transmisión saliente en respuesta a transmisiones entrantes, tales como Verificación de radio, Alerta de llamada, Desactivación de radio, Monitorización remota, Servicio de registro automático (ARS), Respuesta a mensajes privados y envío de informes de ubicación GNSS. La radio no puede recibir llamadas privadas confirmadas cuando se activa esta función. Sin embargo, la radio puede enviar transmisiones manualmente.

## Activación/desactivación de la inhibición de respuesta

Siga el procedimiento para activar o desactivar la inhibición de respuesta en la radio.

Pulse el botón de **Inhib. resp.** programado.

---

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra un aviso pequeño positivo momentáneamente.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo momentáneamente.

## Desactivar/reactivar

Esta función puede habilitar o deshabilitar cualquier radio del sistema. Por ejemplo, puede que el distribuidor o administrador del sistema quiera deshabilitar una radio robada para evitar que una persona no autorizada la utilice y luego activarla cuando la recupere.

Es posible desactivar o activar una radio mediante la consola o un comando iniciado por otra radio.

Cuando se desactiva una radio, esta emitirá un tono indicador negativo y la pantalla de inicio muestra **Canal denegado**.

Cuando la radio está bloqueada, no puede solicitar ni recibir ningún servicio de iniciativa del usuario en el sistema donde se está realizando el procedimiento Bloquear. Sin embargo, la radio puede cambiar a otro sistema. La radio continua enviando informes de ubicación

de GNSS y puede controlarse de forma remota cuando está bloqueada.

### NOTA:

Puede que el distribuidor o administrador del sistema quiera desactivar una radio de forma permanente. Consulte [Anulación de la radio en la página 198](#) para obtener más información.

## Desactivación de una radio

Siga el procedimiento para desactivar una radio.

- 1 Pulse el botón **Deshab. radio** programado.

- 2 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.

- 3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

---

## Desactivación de una radio mediante la lista de contactos

Siga el procedimiento para desactivar una radio mediante la lista de contactos.

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

4 Pulse  o  para ir a Desactivación radio. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.

---

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

---

## Desactivación de una radio mediante marcación manual

Siga el procedimiento para desactivar una radio mediante marcación manual.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Marcdo. manual. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.  
La primera línea de texto muestra Núm. radio:.

---

- 5 Introduzca el ID de suscriptor y pulse  para continuar.

---

- 6 Pulse  o  para ir a Deshab. radio. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.

---

- 7 Espere a que se produzca la confirmación.  
Si es correcta:
    - Suena un tono indicador positivo.
    - La pantalla muestra un pequeño aviso positivo.
 Si no es correcta:
    - Suena un tono indicador negativo.
    - La pantalla muestra un aviso pequeño negativo.
- 

## Activación de una radio

Siga el procedimiento para activar una radio.

- 1 Pulse el botón **Habilitar radio** programado.
-

2 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.  
La pantalla muestra `Habilitar radio` y el alias o ID del suscriptor. El indicador LED verde se ilumina.

---

3 Espere a que se produzca la confirmación.  
Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

---

## Activación de una radio mediante la lista de contactos

Siga el procedimiento para activar una radio mediante la lista de contactos.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a `Contactos`. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse  o  para ir a `Habilitar radio`.  
Pulse  para seleccionar.  
El indicador LED verde parpadea.  
La pantalla muestra `Habilitar radio` y el alias o ID del suscriptor. El indicador LED verde se ilumina.

---

5 Espere a que se produzca la confirmación.  
Si es correcta:

- Suena un tono.
- La pantalla muestra `Habilitar radio correcto`.

Si no es correcta:

- Suena un tono.
- La pantalla muestra `Error habilitar radio.`

## Activación de una radio mediante marcación manual

Siga el procedimiento para activar una radio mediante marcación manual.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a `Contactos`. Pulse  para seleccionar.
- 3 Pulse  o  para ir a `Marcado. manual.`  
Pulse  para seleccionar.

- 4 Pulse  o  para ir a `Llamada privada.`  
Pulse  para seleccionar.  
La primera línea de texto muestra `Núm. radio!.`

- 5 Introduzca el ID de suscriptor y pulse  para continuar.

- 6 Pulse  o  para ir a `Habilitar radio.`  
Pulse  para seleccionar.  
El indicador LED verde parpadea.  
La pantalla muestra `Habilitar radio` y el alias o ID del suscriptor. El indicador LED verde se ilumina.

- 7 Espere a que se produzca la confirmación.  
Si es correcta:
  - Suena un tono.
  - La pantalla muestra `Habilitar radio correcto.`
 Si no es correcta:

- Suena un tono.
- La pantalla muestra `Error habilitar radio`.

---

## Anulación de la radio

Esta función es una medida de seguridad mejorada que restringe el acceso no autorizado a la radio.

Anulación de la radio hace que la radio deje de funcionar. Por ejemplo, el distribuidor o el administrador del sistema querría desactivar una radio robada o extraviada para evitar un uso no autorizado.

Cuando se enciende, una radio desactivada muestra momentáneamente `Radio desactivado` en la pantalla para indicar el estado de desactivación.

### NOTA:

Solo se puede volver a activar una radio anulada en un depósito de servicio de Motorola Solutions. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Operario aislado

Esta función solicita que se envíe un mensaje de emergencia si no hay actividad del usuario durante un periodo de tiempo predefinido, como cualquier pulsación de un botón de la radio o activación del selector de canales.

Tras un periodo programado de tiempo de inactividad por parte del usuario, la radio avisa de antemano mediante un indicador de audio cuando el temporizador de inactividad se agota.

Si el usuario todavía no ha confirmado la recepción antes de que finalice el recordatorio predefinido del temporizador, la radio iniciará una condición de emergencia en función de cómo la haya configurado el distribuidor o el administrador del sistema.

Consulte [Funcionamiento de emergencia en la página 145](#) para obtener más información.

### NOTA:

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Funciones de bloqueo por contraseña

Esta función le permite restringir el acceso a la radio al solicitar una contraseña cuando el dispositivo está activado.

Puede usar un micrófono con teclado o los botones de **desplazamiento hacia arriba/abajo** para introducir la contraseña.

## Acceso a las radios mediante el uso de contraseñas

Siga el procedimiento para acceder a la radio mediante el uso de una contraseña.

- 1 Introduzca la contraseña de cuatro dígitos actual.

### NOTA:

El uso del pedal de **Emergencia** cancela la introducción de la contraseña para acceder a la radio.

- Utilice un micrófono con teclado.

- Pulse  o  para editar el valor numérico de cada dígito y, a continuación, pulse  para acceder y avanzar hasta el siguiente dígito.

2

Pulse  para introducir la contraseña.

Si es correcta, se encenderá la radio.

Si no es correcta:

- Tras el primer y segundo intento, la pantalla mostrará *Contraseña incorr.* Repita [paso 1](#).
- Tras el tercer intento, en la pantalla aparecerá *Contraseña incorr.* y, a continuación, *Radio bloqueada*. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La radio entrará en estado de bloqueo durante 15 minutos.

### NOTA:

En estado bloqueado, la radio solo responde a las entradas del **botón de volumen/encendido/apagado** y del botón **Luz fondo**.

## Desbloqueo de radios en estado de bloqueo

En estado bloqueado, la radio no puede recibir ninguna llamada. Siga el procedimiento para desbloquear la radio en estado bloqueado.

Lleve a cabo una de las siguientes acciones:

- Si la radio está encendida, espere 15 minutos y, a continuación, repita los pasos de la sección [Acceso a los radios mediante el uso de contraseñas en la página 199](#) para acceder a la radio.
- Si la radio está apagada, enciéndala. La radio reinicia el temporizador de 15 minutos del estado bloqueado. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La pantalla muestra **Radio bloqueada**.  
Espere 15 minutos y, a continuación, repita los pasos de la sección [Acceso a los radios mediante el uso de contraseñas en la página 199](#) para acceder a la radio.

## Activación o desactivación del bloqueo por contraseña

Siga el procedimiento para activar o desactivar el bloqueo por contraseña en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Bloq. contras. Pulse  para seleccionar.

---

- 5 Introduzca la contraseña de cuatro dígitos actual.
  - Utilice un micrófono con teclado.
  - Pulse  o  para editar el valor numérico de cada dígito y, a continuación, pulse  para acceder y avanzar hasta el siguiente dígito. Se oirá un tono indicador positivo cada vez que se introduce un dígito.

- 6 Pulse  para introducir la contraseña.
- Si la contraseña es incorrecta, la pantalla mostrará *Contraseña incorr.* y volverá automáticamente al menú anterior.
- 

7 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Activar. Pulse  para seleccionar. La pantalla muestra  junto a Activar.
  - Pulse  o  para ir a Desactivar. Pulse  para seleccionar. La pantalla muestra  junto a Desactivar.
- 

## Cambio de contraseñas

Siga el procedimiento para cambiar las contraseñas de la radio.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Bloq. contras. Pulse  para seleccionar.
- 

- 5 Introduzca la contraseña de cuatro dígitos actual y pulse  para continuar.
- Si la contraseña es incorrecta, la pantalla mostrará *Contraseña incorr.* y volverá automáticamente al menú anterior.
- 

- 6 Pulse  o  para ir a Camb. contras. Pulse  para seleccionar.
-

7 Introduzca una contraseña de cuatro dígitos nueva y pulse  para continuar.

---

8 Vuelva a introducir la nueva contraseña de cuatro dígitos y pulse  para continuar.

Si el cambio se realiza correctamente, en la pantalla aparecerá el mensaje `Contraseña cambiada`.

Si el cambio no se realiza correctamente, en la pantalla aparecerá el mensaje `Contraseñas no coinciden`.

La pantalla vuelve automáticamente al menú anterior.

---

## Lista de notificaciones

La radio dispone de una lista de notificaciones que incluye todos los eventos sin leer del canal, como por ejemplo, mensajes de texto sin leer, mensajes de telemetría, llamadas perdidas y alertas de llamadas.

La pantalla muestra el icono de **notificación** si la lista de notificaciones tiene uno o más eventos.

La lista admite un máximo de 40 eventos sin leer. Cuando la lista está completa, el siguiente evento reemplaza automáticamente al evento más antiguo. Una vez leídos los eventos, se eliminan de la lista de notificaciones.

Para mensajes de texto, eventos de llamada y alerta de llamada perdida, el número máximo son 30 mensajes de texto y 10 llamadas o alertas de llamadas perdidas. El número máximo depende de la capacidad de la lista de funciones individual (fichas de trabajo, mensajes de texto o llamadas o alertas de llamadas perdidas).

## Acceso a la lista de notificaciones

Siga el procedimiento para acceder a la lista de notificaciones de la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a `Notificación`. Pulse  para seleccionar.

---

3 Pulse  o  para seleccionar el evento que desee. Pulse  para seleccionar.

Pulse de forma prolongada  para volver a la pantalla de inicio.

## Programación a través del interfaz aire

El distribuidor puede actualizar la radio de forma remota mediante la programación inalámbrica (OTAP) sin ninguna conexión física. Además, algunos ajustes también se pueden configurar con OTAP.

Cuando la radio ejecuta OTAP, el LED verde parpadea.

Cuando la radio recibe datos de gran volumen:

- La pantalla muestra el icono de **datos de gran volumen**.
- El canal está ocupado.
- Suena un tono negativo si se pulsa el **PTT**.

Cuando OTAP finaliza, según la configuración:

- Suena un tono. La pantalla muestra `Actualizando Reiniciando`. La radio se reinicia apagándose y encendiéndose de nuevo.

- Puede seleccionar `Reiniciar ahora` o `Posponer`. Si selecciona `Posponer`, la radio vuelve a la pantalla anterior. La pantalla muestra el icono de **temporizador de retardo OTAP** hasta que se produzca el reinicio automático.

Cuando la radio se enciende tras el reinicio automático:

- Si se realiza correctamente, la pantalla muestra `Actual. soft. completada`.
- Si no se realiza correctamente, la pantalla muestra `Actual. soft. fallida`.

Consulte [Verificación de la información sobre actualización de software en la página 231](#) para la versión actualizada del software.

## Selección de modos de conexión de periféricos de terceros

Siga el procedimiento para seleccionar uno de los siguientes modos de conexión de periféricos de terceros:

- Motorola Solutions
- PC y audio
- Accesorio de datos

- Telemetría
- Genérico

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tipo de cable. Pulse  para seleccionar.

---

5 Pulse  o  para ir al modo de conexión que desee. Pulse  para seleccionar.

La pantalla muestra el modo de conexión seleccionado. La pantalla vuelve al menú anterior.

---

## Indicador de intensidad de la señal recibida

Esta función permite ver los valores del indicador de intensidad de la señal recibida (RSSI).

La pantalla muestra el icono de **RSSI** en la esquina superior derecha. Consulte [Iconos de pantalla](#) para obtener más información sobre el icono de **RSSI**.

## Visualización de valores de RSSI

Siga el procedimiento para ver los valores de RSSI en la radio.

Cuando se encuentre en la pantalla de inicio:

1 Pulse  tres veces y pulse inmediatamente  tres veces, todo ello en cinco segundos.

La pantalla muestra los valores de RSSI actuales.

---

2 Pulse de forma prolongada  para volver a la pantalla de inicio.

---

## Configuración del panel frontal

Puede personalizar determinados parámetros de función en Configuración del panel frontal (FPC) para mejorar el uso de la radio.

### Acceso al modo Configuración del panel frontal

Siga el procedimiento para entrar al modo de programación del panel frontal en la radio.

mantenga pulsado , en cualquier momento, para volver a la pantalla de inicio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Programar radio. Pulse  para seleccionar.

---

[Enviar comentarios](#)

## Edición de los parámetros del modo FPP

Utilice los siguientes botones según sea necesario mientras navega por los parámetros de función.

-  ,  : desplácese por las opciones, aumente o disminuya valores, o navegue verticalmente.
-  : seleccione la opción o acceda a un submenú.
-  : pulse brevemente para volver al menú anterior o para salir de la pantalla de selección. Manténgalo pulsado para volver a la pantalla de inicio.

## Funcionamiento de Wi-Fi

Wi-Fi® es una marca comercial registrada de Wi-Fi Alliance®.

### NOTA:

Esta función solo se aplica a DM4601e only.

Esta función le permite configurar y conectarse a una red Wi-Fi. Wi-Fi es compatible con las actualizaciones de firmware de la radio, el Codeplug y recursos, como paquetes de idiomas o de anuncio de voz.

## Activación o desactivación del Wi-Fi

El botón **Activar o desactivar Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema.

Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Los anuncios de voz para el botón programado **Activar o desactivar Wi-Fi** se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Realice una de las siguientes acciones para activar o desactivar el Wi-Fi.

- Pulse el botón programado **Activar o desactivar Wi-Fi**. El anuncio de voz emite un sonido de activación o desactivación del Wi-Fi.
- Acceda a esta función en el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

c. Pulse  o  para acceder a Wi-Fi activ. y pulse  para seleccionar.

Pulse  para activar el Wi-Fi. La pantalla muestra  junto a **Activado**.

Pulse  para apagar el Wi-Fi. Desaparece  junto a **Habilitado**.

## Conexión a un punto de acceso a la red

Cuando activa el Wi-Fi, la radio busca y se conecta a un punto de acceso a la red.

También puede conectarse a un punto de acceso a la red a través del menú.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

3 Pulse  o  para acceder a **Redes** y pulse  para seleccionar.

4 Pulse  o  para acceder a un punto de acceso a la red y pulse  para seleccionar.

5 Pulse  o  para **Conectar** y pulse  para seleccionar.

6 Ingrese la contraseña y pulse .

Si la conexión se realiza correctamente, la radio muestra un aviso y se guarda el punto de acceso a la red en la lista de perfiles.

## Comprobación del estado de conexión Wi-Fi

Siga el procedimiento para comprobar el estado de conexión Wi-Fi.

Pulse el botón programado **Consulta del estado de la conexión Wi-Fi** para consultar el estado de conexión

mediante el Anuncio de voz. El Anuncio de voz emite un sonido cuando el Wi-Fi está desactivado, si el Wi-Fi está activado pero no está conectado o si el Wi-Fi está activado y conectado.

- La pantalla muestra **Wi-Fi desact.** cuando el Wi-Fi está desactivado.
- La pantalla muestra **Wi-Fi activ., conectado** cuando la radio está conectada a la red.
- La pantalla muestra **Wi-Fi activ., desconectado** cuando el Wi-Fi está activado pero la radio no está conectada a ninguna red.

Los anuncios de voz para los resultados de la consulta del estado de la conexión Wi-Fi se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

### NOTA:

El botón **Consulta del estado de la conexión Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

## Actualización de la lista de redes

Siga el procedimiento para actualizar la lista de redes.

- Realice las siguientes acciones para actualizar la lista de redes con el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.
  - c. Pulse  o  para acceder a Redes y pulse  para seleccionar.

Al acceder al menú Redes, la radio actualiza automáticamente la lista de redes.

- Si ya se encuentra en el menú Redes, lleve a cabo la siguiente acción para actualizar la lista de redes.

Pulse  o  para Actualizar y pulse  para seleccionar.

La radio se actualiza y muestra la lista de redes más actualizada.

## Adición de una red

Si una red preferida no está en la lista de redes disponibles, realice las siguientes acciones para añadir una red.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

- 4 Pulse  o  para Añadir red y pulse  para seleccionar.

---

- 5 Introduzca el identificador de conjuntos de servicios (SSID) y pulse .

---

6 Pulse  o  para **Abrir** y pulse  para seleccionar.

---

7 Ingrese la contraseña y pulse  .  
La radio muestra un miniaviso positivo para indicar que la red se ha guardado correctamente.

---

## Visualización de los detalles de los puntos de acceso a la red

Siga el procedimiento para ver los detalles de los puntos de acceso a la red.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para acceder a **Wi-Fi** y pulse  para seleccionar.

---

3 Pulse  o  para acceder a **Redes** y pulse  para seleccionar.

---

4 Pulse  o  para acceder a un punto de acceso a la red y pulse  para seleccionar.

---

5 Pulse  o  para acceder a **Ver detalles** y pulse  para seleccionar.

En los puntos de acceso conectados a la red se muestra el identificador de conjunto de servicios (SSID), el modo de seguridad, la dirección de control de acceso a los medios (MAC) y el protocolo de Internet (IP).

En los puntos de acceso no conectados a la red se muestra solo el identificador de conjunto de servicios (SSID) y el modo de seguridad.

---

## Eliminación de los puntos de acceso a la red

Realice las siguientes acciones para eliminar los puntos de acceso a la red de la lista de perfiles.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder al punto de acceso a la red seleccionada y pulse  para seleccionar.

---

- 5 Pulse  o  para Eliminar y pulse  para seleccionar.

---

- 6 Pulse  o  para seleccionar Sí y pulse  para seleccionar.

La radio muestra un miniaviso positivo para indicar que el punto de acceso a la red seleccionada se ha eliminado correctamente.

## Herramientas

En este capítulo se explican cómo se utilizan las herramientas disponibles en la radio.

### Niveles de potencia

Puede personalizar el nivel de potencia de cada canal de la radio en alto o bajo.

#### Alta

Permite la comunicación con radios situadas a una distancia considerable de usted.

#### Baja

Permite la comunicación con radios más cercanas.

#### NOTA:

Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

## Configuración de los niveles de potencia

Siga el procedimiento para definir los niveles de potencia en la radio.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón de **nivel de potencia** programado. Omita los pasos que se indican a continuación.
  - Pulse  para acceder al menú.

- Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- Pulse  o  para ir a Potencia. Pulse  para seleccionar.

- Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Alta. Pulse  para seleccionar.  
La pantalla muestra  junto a Alta.
- Pulse  o  para ir a Baja. Pulse  para seleccionar.  
La pantalla muestra  junto a Baja.

- Pulse de forma prolongada  para volver a la pantalla de inicio.

## Encendido y apagado de tonos/alertas de la radio

Puede habilitar y deshabilitar todos los tonos y todas las alertas de la radio, siempre que lo necesite, excepto el tono de alerta de emergencia entrante. . Siga el procedimiento para activar o desactivar los tonos y las alertas en la radio.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Tonos/alertas** programado. Omita los pasos siguientes.

- Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

5 Pulse  o  para ir a Todos los tonos. Pulse  para seleccionar.

6 Pulse  para activar o desactivar todos los tonos y alertas. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

## Encendido y apagado de los tonos del teclado

Siga el procedimiento para activar o desactivar los tonos del teclado en la radio.

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

5 Pulse  o  para ir a Tonos teclado. Pulse  para seleccionar.

- 6 Pulse  para habilitar o deshabilitar los tonos del teclado. La pantalla muestra uno de los siguientes resultados:
- Si está activado, ✓ aparece junto a Activado.
  - Si se desactiva, ✓ junto a Activado desaparece.

## Configuración de los niveles de diferencia de volumen de tonos y alertas

Esta función ajusta el volumen de los tonos o las alertas, permitiendo que sea más alto o más bajo que el volumen de voz. Siga el procedimiento para definir los niveles de diferencia de volumen tonos y alertas de la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

- 5 Pulse  o  para ir a Dif. volumen. Pulse  para seleccionar.

- 6 Pulse  o  para ir al nivel de diferencia de volumen que desee.
- Con cada nivel de diferencia de volumen correspondiente, suena un tono de confirmación.

- 7 Lleve a cabo una de las siguientes acciones:
- Pulse  para seleccionar. Se guarda el nivel de diferencia de volumen necesario.
  - Pulse  para salir. Los cambios se descartan.

## Activación o desactivación del tono Permiso para hablar

Siga el procedimiento para activar o desactivar el tono Permiso para hablar en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Permitir hablar. Pulse  para seleccionar.

---

- 6 Pulse  para activar o desactivar el tono de Permitir hablar.

La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

## Activación o desactivación del tono de encendido

Siga el procedimiento para activar o desactivar el tono de encendido en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Encendido. Pulse  para seleccionar.

---

6 Pulse  para activar o desactivar el tono de encendido. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

---

## Configuración de los tonos de alerta de mensaje de texto

Puede personalizar el tono de alerta de mensaje de texto de cada entrada de la lista de contactos para que sea

momentáneo o repetitivo. Siga el procedimiento para definir los tonos de alerta de mensaje de texto en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Alerta mensaje. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Momentáneo. Pulse  para seleccionar. La pantalla muestra  junto a Momentáneo.

- Pulse  o  para ir a Repetitivo. Pulse  para seleccionar.  
La pantalla muestra  junto a Repetitivo.
- 

## Cambio de los modos de pantalla

Es posible cambiar el modo de pantalla de la radio entre Día o Noche, según sea necesario. Esto afecta a la gama de colores de la pantalla. Siga el procedimiento para cambiar el modo de pantalla de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón **Modo de pantalla** programado. Omita los pasos siguientes.
    - Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Pantalla. Pulse  para seleccionar.  
La pantalla muestra Modo día y Modo noche.
- 

- 5 Pulse  o  para ir al ajuste que desee.  
Pulse  para seleccionar.  
La pantalla muestra  junto al ajuste seleccionado.
- 

## Ajuste del brillo de la pantalla

Siga el procedimiento para ajustar el brillo de la pantalla de la radio. Si la opción Brillo automático está activada, no se podrá ajustar el brillo de la pantalla.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Brillo** programado. Omita los pasos siguientes.

- Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Brillo. Pulse  para seleccionar.

La pantalla muestra una barra de progreso.

- 5 Pulse  o  para aumentar o reducir el brillo de la pantalla. Pulse  para seleccionar.  
El rango de valores va desde 1 a 8.

## Encendido y apagado de bocina y luces

La radio puede notificarle una llamada entrante mediante la función de bocinas y luces. Cuando esta función está activada, una llamada entrante hará que suene la bocina y que se enciendan las luces del vehículo. Esta función deberá instalarse el distribuidor a través del conector de accesorios posterior de la radio. Siga el procedimiento para activar o desactivar todas las bocinas y luces de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Bocina/Luces** programado. Omita los pasos que se indican a continuación.

- Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Bocina/Luces. Pulse  para seleccionar.

---

5 Pulse  para habilitar o deshabilitar Bocina/Luces. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

---

## Encendido y apagado de los indicadores LED

Siga el procedimiento para activar o desactivar los indicadores LED en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Indicador LED. Pulse  para seleccionar.

---

5 Pulse  para habilitar o deshabilitar el indicador LED.

La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.
- 

## Activación o desactivación del sistema de dirección pública

Siga el procedimiento para activar o desactivar el sistema de dirección pública (DP) interna de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Dirección pública** programado. Omite los pasos siguientes.
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Dirección pública. Pulse  para seleccionar.

- 5 Pulse  para activar o desactivar la dirección pública.
- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.

## Activación o desactivación del sistema de dirección pública

Siga el procedimiento para activar o desactivar el sistema de dirección pública (DP) externa de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón de **dirección pública externa** programado. Omite los pasos siguientes.
  - Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Dirección pública externa. Pulse  para seleccionar.

- 5 Pulse  para habilitar o deshabilitar la dirección pública externa.
    - Si está activado, ✓ aparece junto a Activado.
    - Si se desactiva, ✓ junto a Activado desaparece.
- 

## Encendido y apagado de la pantalla inicial

Puede habilitar y deshabilitar la pantalla inicial siguiendo el procedimiento.

- 1 Pulse  para acceder al menú.

---

  - 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

  - 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Pantalla. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a la pantalla inicial. Pulse  para seleccionar.
- 

- 6 Pulse  para habilitar o deshabilitar la pantalla de introducción.

La pantalla muestra uno de los siguientes resultados:

- Si está activado, ✓ aparece junto a Activado.
  - Si se desactiva, ✓ junto a Activado desaparece.
- 

## Configuración de idiomas

Siga el procedimiento para definir los idiomas en la radio.

- 1 Pulse  para acceder al menú.
-

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Idiomas. Pulse  para seleccionar.

---

5 Pulse  o  para ir al idioma que desee.  
Pulse  para seleccionar.  
La pantalla muestra  junto al idioma seleccionado.

---

## Identificación del tipo de cable

Realice los siguientes pasos para seleccionar el tipo de cable que utiliza la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tipo de cable. Pulse  para seleccionar.

---

5 El tipo de cable actual aparece con un símbolo .

---

## Activación o desactivación del indicador de voz

Esta función permite a la radio indicar de forma sonora o mediante la pulsación de botón programable la zona o el canal que el usuario acaba de presionar.

Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

Este indicador de audio puede personalizarse según los requisitos del cliente. Siga el procedimiento para activar o desactivar el indicador de voz.

## Activación o desactivación de la tarjeta opcional

Se pueden asignar capacidades para tarjetas opcionales dentro de cada canal a botones programables. Un canal puede soportar un máximo de 6 funciones de la tarjeta opcional. Siga el procedimiento para activar o desactivar la tarjeta opcional en la radio.

Pulse el botón programable **Tarjeta opcional**.

---

## Reconocimiento de voz

La función de reconocimiento de voz solo puede activarla su distribuidor o administrador del sistema. Si la función de reconocimiento de voz está activada, la función de anuncio de voz se desactiva automáticamente. Si la función de anuncio de voz está activada, la función de reconocimiento de voz se desactiva automáticamente.

Esta función permite que la radio indique acústicamente lo siguiente:

- Canal actual
- Zona actual
- Función de botón programable activada o desactivada
- Contenido de los mensajes de texto recibidos
- Contenido de las asignaciones de tarea recibidas

Este indicador de audio puede personalizarse según los requisitos del cliente. Esta función es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

## Configurar reconocimiento de voz

Siga el procedimiento para definir la función de reconocimiento de voz.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
-

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Anuncio de voz. Pulse  para seleccionar.

---

5 Pulse  o  para ir a una de las siguientes funciones: Pulse  para seleccionar.

Las funciones disponibles son las siguientes:

- Todo
- Mensajes
- Asignaciones de tarea
- Separación
- Zona
- Botón programable

Aparece  junto a la configuración seleccionada.

---

## Configuración del temporizador del menú

Puede definir el periodo de tiempo que su radio permanecerá en el menú antes de cambiar automáticamente a la pantalla de inicio. Siga el procedimiento para configurar el temporizador del menú.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Pantalla. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Tempor. menú. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir al ajuste que desee.  
Pulse  para seleccionar.

- 4 Pulse  o  para ir a AGC mic digital.  
Pulse  para seleccionar.

## Activación o desactivación del AGC del micrófono digital

El control automático de ganancia (AGC) del micrófono digital controla automáticamente la ganancia del micrófono de la radio durante la transmisión en un sistema digital. Esta función elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante. Siga el procedimiento para activar o desactivar el AGC del micrófono digital en la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 5 Pulse  para activar o desactivar el AGC del micrófono digital.

La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

## Activación o desactivación del audio inteligente

La radio ajusta automáticamente el volumen de audio para superar el ruido de fondo actual del entorno, incluidas las fuentes de ruido estacionarias y no estacionarias. Esta función es de solo recepción y no afecta a la transmisión de audio. Siga el procedimiento para activar o desactivar el audio inteligente en la radio.

**NOTA:**

Esta función no está disponible durante una sesión Bluetooth.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programado **Audio inteligente**. Omita los pasos que se indican a continuación.
  - Pulse para acceder al menú.

- Pulse o para ir a Herramientas. Pulse para seleccionar.

- Pulse o para ir a Config. radio. Pulse para seleccionar.

- Pulse o para ir a Audio inteligente. Pulse para seleccionar.

- Lleve a cabo una de las siguientes acciones:

- Pulse o para ir a Encendido. Pulse para seleccionar. La pantalla muestra junto a Enc.
- Pulse o para ir a Apagado. Pulse para seleccionar. La pantalla muestra junto a Apagado.

## Activación y desactivación del supresor de respuesta acústica

Esta función le permite minimizar la respuesta acústica de las llamadas recibidas.

- pulse para acceder al menú.
- Pulse o para acceder a Utilidades y pulse para seleccionar.

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para ir a Supresor de AF y pulse  para seleccionar.

También puede utilizar los botones  o  para cambiar la opción seleccionada.

---

5 Lleve a cabo una de las siguientes acciones.

- Pulse  para activar el supresor de respuesta acústica. La pantalla muestra  junto a Activado.
  - Pulse  para desactivar el supresor de respuesta acústica. Desaparece  junto a Habilitado.
- 

## Activación o desactivación de la mejora de la vibración del habla

Puede activar esta función cuando esté hablando en un idioma que contenga muchas palabras con pronunciación alveolar (R vibrante). Siga el procedimiento para activar o desactivar la mejora de la vibración del habla en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mejora de la vibración del habla** programado. Omita los pasos que se indican a continuación.
  - Pulse  para acceder al menú.
- 

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Mejora de trino.  
Pulse  para seleccionar.
- 

- 5 Lleve a cabo una de las siguientes acciones:
- Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.
  - Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.
- 

## Entorno audio

Puede personalizar el entorno de audio de la radio según el ambiente.

### Predeterminado

Este es el ajuste predeterminado.

### Alto

Este ajuste activa la función de supresión de ruido y aumenta el volumen de los altavoces para el uso de la radio en entornos ruidosos.

### Grupo de trabajo

Este ajuste activa el supresor de respuesta acústica y desactiva el control automático de ganancia (AGC) para el uso cuando un grupo de radios están cerca las unas de las otras.

## Configuración del entorno de audio

Siga el procedimiento para definir el entorno de audio en la radio según el ambiente.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
-

4 Pulse  o  para ir a Entorno audio. Pulse  para seleccionar.

5 Pulse  o  para ir al ajuste que desee. Pulse  para seleccionar.

La configuración es la siguiente:

- Elija Predeterminado para restablecer la configuración predeterminada de fábrica.
- Elija Alto para aumentar el nivel de sonoridad del altavoz cuando se utiliza en entornos ruidosos.
- Elija Grupo de Trabajo para reducir la respuesta acústica cuando se utiliza con un grupo de radios que están cerca las unas de las otras.

La pantalla muestra  junto al ajuste seleccionado.

## Perfiles de audio

Puede personalizar los perfiles de audio de la radio según sus preferencias.

### Predeterminado

Este es el ajuste predeterminado.

### Nivel 1, Nivel 2 y Nivel 3

Estos ajustes están pensados para compensar la pérdida auditiva provocada por el ruido, algo típico en adultos de 40, 50, 60 o más años.

### Mejora de agudos, Mejora de medios y Mejora de graves

Estos ajustes están pensados para un sonido más metálico, un sonido más nasal y un sonido más profundo, respectivamente.

## Configuración de perfiles de audio

Siga el procedimiento para definir los perfiles de audio en la radio.

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Perfiles de audio. Pulse  para seleccionar.

5 Pulse  o  para ir al ajuste que desee. Pulse  para seleccionar.

La configuración es la siguiente:

- Elija Predeterminado para desactivar el perfil de audio seleccionado anteriormente y volver a la configuración predeterminada de fábrica.
- Elija Nivel 1, Nivel 2 o Nivel 3 para perfiles de audio destinados a compensar pérdida auditiva provocada por el ruido, algo típico en adultos mayores de 40 años.
- Elija Aumento de agudos, Aumento de medios o Aumento de graves para perfiles de audio

que se ajustan a su preferencia de sonidos más metálicos, más nasales o más profundos.

La pantalla muestra  junto al ajuste seleccionado.

## Activación o desactivación del sistema global de navegación por satélite

El sistema global de navegación por satélite (GNSS) es un sistema de navegación vía satélite que determina la ubicación exacta de la radio. GNSS incluye el sistema de posicionamiento global (GPS) y el sistema de navegación por satélite global (GLONASS).

### NOTA:

Los modelos de radio seleccionados pueden ofrecer GPS y GLONASS. La constelación de GNSS se configura a través de CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

- 1 Realice el siguiente paso para activar o desactivar el GNSS en la radio.
  - Pulse el botón **GNSS** programado.

- Pulse  para acceder al menú. Continúe con el paso siguiente.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir GNSS. Pulse  para seleccionar.

5 Pulse  para habilitar o deshabilitar el GNSS.  
Si está activado,  aparece junto a Activado.  
Si se desactiva,  junto a Activado desaparece.

## Información general de la radio

La radio contiene información sobre varios parámetros generales.

La información general de la radio es la siguiente:

- Alias e ID de radio.
- Versiones de firmware y codeplug.
- Actualización del software.
- Información de GNSS.
- Información del sitio.

### NOTA:

Pulse  para volver a la pantalla anterior. Pulse de forma prolongada  para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

## Verificación de alias e ID de radio

Siga el procedimiento para comprobar el ID y alias de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programado **Alias e ID de radio**. Omite los pasos siguientes. Suena un tono indicador positivo.

También puede pulsar el botón programado **Alias e ID de radio** para volver a la pantalla anterior.

- Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Mi ID. Pulse  para seleccionar.

La primera línea de texto muestra el alias de radio.  
La segunda línea de texto muestra el ID de radio.

## Verificación de las versiones de firmware y de Codeplug

Siga el procedimiento para comprobar las versiones de firmware y de Codeplug de la radio.

[Enviar comentarios](#)

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Versiones. Pulse  para seleccionar.

La pantalla muestra las versiones de firmware y de Codeplug actuales.

## Verificación de la información sobre actualización de software

Esta función muestra la fecha y la hora de la última actualización de software llevada a cabo mediante OTAP o Wi-Fi. Siga el procedimiento para comprobar la información sobre actualización de software de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Actualiz. SW. Pulse  para seleccionar.

La pantalla muestra la fecha y la hora de la última actualización de software.

El menú de actualización del software solo está disponible después de que se haya producido al menos una sesión de OTAP o Wi-Fi correcta. Consulte [Programación a través del interfaz de aire en la página 498](#) para obtener más información.

## Verificación de la información de GNSS

Muestra la información de GNSS de la radio, como los valores de:

- Latitud
- Longitud
- Altitud
- Dirección
- Velocidad
- Dilución de precisión horizontal (HDOP)
- Satélites
- Versión

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Info. del radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Información de GNSS. Pulse  para seleccionar.

---

5 Pulse  o  para ir al elemento deseado. Pulse  para seleccionar. La pantalla muestra la información de GNSS solicitada.

---

4 Pulse  o  para ir a Info. sitio. Pulse  para seleccionar.

---

La pantalla muestra el nombre de sitio actual.

## Mostrar la información del sitio

Siga el procedimiento para mostrar el nombre del sitio en el que está encendida la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

Esta página se ha dejado en blanco intencionadamente.

## Operaciones Connect Plus

Connect Plus es una completa solución de trunking basada en tecnología DMR. Connect Plus utiliza un canal de control dedicado para canalizar las solicitudes y asignaciones. Las funciones disponibles para los usuarios de radio en virtud de este sistema están disponibles en este capítulo.

## Controles de radio adicionales en el modo Connect Plus

En este capítulo se explican los controles de radio adicionales disponibles para el usuario de radio a través de opciones preprogramadas, es decir, botones programables y asignable a funciones de la radio.

### Botón PTT (pulsar para hablar)

El botón PTT situado en un lateral de la radio tiene dos funciones principales:

- En el transcurso de una llamada, el botón **PTT** permite que la radio transmita a las demás radios de la llamada.

Mantenga pulsado el botón **PTT** para hablar. Suelte el botón **PTT** para escuchar.

El micrófono se activa cuando se pulsa el botón **PTT**.

- Cuando no hay ninguna llamada en curso, el botón **PTT** se utiliza para realizar una nueva llamada (consulte [Realización de una llamada de radio en la página 253](#)).

Si el tono Permiso para hablar está habilitado, espere a que finalice el breve tono de alerta antes de empezar a hablar.

## Botones programables

Su distribuidor puede definir los botones programables como accesos directos a funciones de la radio según la duración de la pulsación del botón:

### Pulsación corta

Pulsar y soltar el botón rápidamente.

### Pulsación larga

Mantener pulsado el botón durante la duración programada.

## NOTA:

La duración programada de pulsación de botones se puede aplicar a todas las funciones o configuraciones de la radio o herramientas asignables. Consulte [Funcionamiento de emergencia en la página 290](#) para obtener más información sobre la duración programada del botón de *Emergencia*.

## Funciones asignables de la radio

### **Camb. audio Bluetooth®**

Alterna el direccionamiento de audio entre el altavoz interno de la radio y el accesorio externo con tecnología Bluetooth.

### **Conexión de Bluetooth**

Inicia una operación de detección y conexión de Bluetooth.

### **Desconexión de Bluetooth**

Finaliza todas las conexiones Bluetooth en curso entre dispositivos habilitados para Bluetooth y la radio.

### **Bluetooth visible**

Permite que la radio entre en el modo de Bluetooth visible.

### **Cancelar cola de ocupado**

Sale del modo Ocupado tras iniciar una llamada de no emergencia en la Cola de espera. Las llamadas de emergencia, una vez aceptadas en la Cola de espera, no se pueden cancelar.

### **Registro de llamadas**

Selecciona la lista del registro de llamadas.

### **Anuncio de canal**

Reproduce mensajes de voz de anuncio de canal y de zona para el canal actual.

### **Contactos**

Proporciona acceso directo a la lista de contactos.

### **Emergencia en./ap.**

Dependiendo de la programación, inicia o cancela una llamada o una alarma de emergencia.

### **Bocina/luces**

Activa o desactiva la función bocina y luces.

### **Ubicación en interiores**

Activa o desactiva la ubicación en interiores.

### **Audio inteligente**

Permite activar o desactivar el Audio inteligente.

**Marcación manual**

Dependiendo de la programación, inicia una llamada privada o telefónica al teclear cualquier ID de suscriptor o número de teléfono.

**Acceso de marcación rápida**

Inicia directamente una llamada privada, una alerta de llamada o un mensaje de texto rápido o la función Retorno a inicio predefinidos.

**Privacidad**

Activa o desactiva la privacidad.

**Verificación de radio**

Determina si una radio se encuentra activa en un sistema.

**Habilitar radio**

Permite activar de forma remota una radio de destino.

**Desactivación de la radio**

Permite desactivar de forma remota una radio de destino.

**Monitorización remota**

Enciende el micrófono de una radio de destino sin que proporcione ningún indicador.

**Restablecer canal base**

Configura un nuevo canal base.

**Tipo de timbre de alerta**

Ofrece al usuario acceso directo a la configuración del tono de alerta.

**Solicitud de itinerancia**

Permite buscar un emplazamiento diferente.

**Rastreo**

Permite activar o desactivar el rastreo.

**Silenciar recordatorio de canal base**

Silencia el recordatorio de canal de inicio.

**Activar/desactivar bloqueo de sitio**

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

**Mensaje de texto**

Selecciona el menú de mensajes de texto.

**Activar/Desactivar indicador de voz**

Activa o desactiva el indicador de voz.

**Wi-Fi**

Activa o desactiva el Wi-Fi.

**Zona**

Permite seleccionar en una lista de zonas.

## Funciones asignables de configuración o herramientas

### Supresor AF

Activa o desactiva el supresor de respuesta acústica.

### Todos los tonos/alertas.

Activa y desactiva todos los tonos y alertas.

### Brillo de luz de fondo

Ajusta el nivel de brillo.

### Subir/bajar canal

En función de la programación, cambia el canal al canal anterior o al siguiente.

### Modo de pantalla

Activa o desactiva el modo de pantalla día/noche.

### Sistema de satélite de navegación global (GNSS)

Activa o desactiva el sistema de navegación vía satélite.

### Nivel de potencia

Alterna entre los niveles de potencia de transmisión alto y bajo.

### Sin asignar

Indica que aún no se ha asignado una función al botón.

## Identificación de los indicadores de estado en el modo Connect Plus

### Iconos de pantalla

Los elementos siguientes son iconos que aparecen en la pantalla de la radio.

	<p><b>Indicador de intensidad de la señal recibida (RSSI)</b></p> <p>El número de barras mostradas representa la intensidad de la señal de la radio. Cuatro barras indican la señal más intensa. Este icono solo se muestra durante la recepción.</p>
	<p><b>Bluetooth no conectado</b></p> <p>La función Bluetooth está activada, pero no hay conectado ningún dispositivo Bluetooth remoto.</p>
	<p><b>Bluetooth conectado</b></p>

Tabla (continuación)...

	La función Bluetooth está activada. El icono permanece iluminado cuando hay un dispositivo Bluetooth remoto conectado.
	<b>Datos de gran volumen</b> La radio está recibiendo datos de gran volumen y el canal está ocupado.
	<b>Ubicación en interiores disponible</b> <sup>3</sup> El estado de ubicación en interiores está activado y disponible.
	<b>Función de ubicación en interiores no disponible</b> <sup>3</sup> El estado de ubicación en interiores está activado pero no está disponible debido a que el Bluetooth está desactivado o a que el Bluetooth ha suspendido el rastreo de las balizas.
	<b>Modo Silenciar</b>

Tabla (continuación)...

	El modo Silenciar está activado y el altavoz está silenciado.
	<b>Notificación</b> La Lista de notificaciones tiene elementos que debe revisar.
	<b>Nivel de potencia</b> La radio está configurada a potencia baja o la radio está configurada a potencia alta.
	<b>Desactivar tonos</b> Los tonos están desactivados.
	<b>Tarjeta opcional</b> La tarjeta opcional está habilitada.
	<b>La tarjeta opcional no funciona</b> La tarjeta opcional está deshabilitada.
	<b>GNSS disponible</b>

Tabla (continuación)...

<sup>3</sup> Solo se aplica a los modelos que cuentan con la última versión de software y hardware

	La función GPS/GNSS está activada. El icono permanece encendido cuando existe una posición definida disponible.
	<b>GNSS no disponible/Fuera del rango</b> La función GPS/GNSS está activada pero no recibe datos del satélite.
	<b>Rastreo</b> La función de rastreo está habilitada.
	<b>Emergencia</b> La radio está en modo Emergencia.
	<b>Seguro</b> La función Privacidad está habilitada.
	<b>Inseguro</b> La función Privacidad está deshabilitada.
	<b>Roaming entre sitios</b> La función de roaming entre sitios está habilitada.

Tabla (continuación)...

	<b>Contacto</b> El contacto por radio está disponible.
	<b>Registro de llamadas</b> Registro de llamadas de radio.
	<b>Mensaje</b> Mensaje entrante.
	<b>Solo timbre</b> El modo de tono de llamada está habilitado.
	<b>Tono de silencio</b> El modo de tono de silencio está habilitado.
	<b>Vibración</b> El modo de vibración está habilitado.
	<b>Vibración y tono</b> El modo de vibración y tono está habilitado.

Tabla (continuación)...

	<b>Wi-Fi: excelente</b> <sup>4</sup> La señal de la red Wi-Fi es excelente.
	<b>Wi-Fi: buena</b> <sup>4</sup> La señal de la red Wi-Fi es buena.
	<b>Wi-Fi: regular</b> <sup>4</sup> La señal de la red Wi-Fi es regular.

## Iconos de llamada

Los siguientes iconos aparecen en la pantalla de la radio en el transcurso de una llamada. Estos iconos también aparecen en la lista Contactos para indicar el tipo de ID.

	<b>Llamada privada</b> Indica que hay una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.
	<b>Llamada a grupo/a todos en sitio</b> Indica que hay en curso una llamada a grupo o una llamada a todos en sitio. En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	<b>Llamada telefónica como una llamada privada</b> Indica que hay una llamada telefónica como una llamada privada en curso.
	<b>Llamada de PC con Bluetooth</b> Indica que hay una llamada de PC con Bluetooth en curso.

*Tabla (continuación)...*

<sup>4</sup> Solo se aplica a DM4601e

<sup>5</sup>

En la lista de contactos, indica un alias (nombre) o ID (número) de llamada de PC con Bluetooth.

### Llamada de despacho

El tipo de contacto Llamada de despacho se utiliza para enviar un mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.

### Casilla de verificación (marcada)

Indica que la opción está seleccionada.

### Recuadro negro sólido

Indica la opción seleccionada para el elemento de menú con un submenú.

## Iconos del menú avanzado

Los siguientes iconos aparecen junto a los elementos de menú que ofrecen una elección entre dos opciones o como indicación de que hay un submenú que ofrece dos opciones.

### Casilla de verificación (vacía)

Indica que la opción no está seleccionada.

## Iconos de Enviados

Los iconos que se indican a continuación aparecen en la esquina superior derecha de la pantalla de la radio en la carpeta de elementos enviados.

### Enviado correctamente

El mensaje de texto se ha enviado correctamente.

*Tabla (continuación)...*

*Tabla (continuación)...*

 	<p><b>En curso</b></p> <ul style="list-style-type: none"> <li>• El mensaje de texto para un alias o ID de grupo está pendiente de transmisión.</li> <li>• El mensaje de texto para un alias o ID de suscriptor está pendiente de transmisión y, a continuación, se espera confirmación.</li> </ul>

Los siguientes iconos también aparecen junto a los elementos en la lista de dispositivos habilitados para Bluetooth disponibles para indicar el tipo de dispositivo.

	<p><b>Dispositivo de datos Bluetooth</b></p> <p>Dispositivo de datos habilitado para Bluetooth, por ejemplo, un escáner.</p>
	<p><b>Dispositivo de audio Bluetooth</b></p> <p>Dispositivo de audio habilitado para Bluetooth, por ejemplo, unos auriculares.</p>
	<p><b>Dispositivo PTT Bluetooth</b></p> <p>Dispositivo PTT habilitado para Bluetooth, por ejemplo, un dispositivo de PTT solo (POD).</p>

## Indicador LED

El indicador LED muestra el estado de funcionamiento de la radio.

<b>Rojo intermitente</b>	La radio está transmitiendo con la batería baja, está recibiendo una transmisión de emergencia o ha fallado la autocomprobación al encenderse, o bien está fuera del rango si la radio está configurada con un sistema de repetición de rango automático. El modo Silenciar está activado.
<b>Rojo intermitente rápido</b>	La radio está recibiendo una transferencia de archivos a través del interfaz aire (archivo de firmware de tarjeta opcional, archivo de frecuencia de red o archivo de Codeplug de tarjeta opcional) o está actualizándose con un nuevo archivo de firmware de tarjeta opcional.
<b>Verde y amarillo</b>	La radio está recibiendo una alerta de llamada, ha recibido un mensaje de

*Tabla (continuación)...*

<b>intermitente s</b>	texto o el rastreo está activado y recibe de forma activa.
<b>Amarillo fijo</b>	La radio está en modo de Bluetooth visible.
<b>Parpadeo doble en amarillo</b>	La radio está buscando de forma activa un nuevo sitio.
<b>Amarillo intermitente</b>	La radio está recibiendo una alerta de llamada o el rastreo está habilitado pero inactivo (la radio permanecerá en silencio para cualquier actividad).
<b>Verde fijo</b>	La radio está encendiéndose o transmitiendo.
<b>Verde intermitente</b>	La radio se está encendiendo y está recibiendo una llamada o datos.
<b>Parpadeo verde doble</b>	La radio está recibiendo una llamada con la privacidad habilitada.

## Tonos de indicador

A continuación se describen los tonos que suenan a través del altavoz de la radio.

Tono agudo  Tono grave

Los tonos de indicador proporcionan indicaciones audibles del estado después de realizar una acción para llevar a cabo una tarea.

	Tono indicador positivo
	Tono indicador negativo

## Tono de alerta

Los tonos de alerta le proporcionan indicaciones sonoras del estado de la radio o de la respuesta de la radio a los datos recibidos.

<b>Tono continuo</b> 	Un sonido monótono. Suena continuamente hasta que finaliza.
---	--

*Tabla (continuación)...*

### Tono periódico

Suena periódicamente dependiendo de la duración que haya establecido la radio. El tono empieza, se para y se repite.

### Tono repetitivo

Suena un único tono que se repite hasta que lo apaga el usuario.

### Tono momentáneo

Suena solo una vez durante un breve periodo de tiempo establecido por la radio.

## Cambio entre los modos de Connect Plus y no de Connect Plus

Para cambiar a un modo que no sea de Connect Plus, si el distribuidor o el administrador del sistema lo ha programado, tendrá que cambiar a otra zona. Consulte a su distribuidor o administrador del sistema para comprobar si se ha programado la radio con zonas no de Connect Plus y qué funciones hay disponibles en dichas zonas.

## Realización y recepción de llamadas en modo Connect Plus

En esta sección se explican las operaciones generales de la radio y las funciones de llamada de las que dispone.

### Selección de un emplazamiento

Un emplazamiento ofrece cobertura para un área específica. Los emplazamientos de Connect Plus disponen de un controlador de emplazamiento y un máximo de 15 repetidores. En una red multiemplazamiento, la radio de Connect Plus buscará automáticamente un nuevo emplazamiento cuando el nivel de señal del emplazamiento en que esté registrada se reduzca hasta ser inaceptable.

### Solicitud de itinerancia

Una solicitud de itinerancia ordena a la radio buscar un emplazamiento diferente, aunque la señal que reciba del emplazamiento actual sea aceptable.

Si no se encuentran sitios disponibles:

- La radio muestra **Búsqueda** y el alias del canal seleccionado y continúa buscando por la lista de sitios.
- La radio vuelve al sitio anterior si este sigue estando disponible.

#### **NOTA:**

es algo que programa el distribuidor.

Pulse el botón programado de **Solicitud de itinerancia**.

Escuchará un tono que indica que la radio ha cambiado a un nuevo emplazamiento. En la pantalla aparecerá **ID del sitio** <Número de sitio>.

---

### Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.
- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).

## Restricción de sitios

El administrador del sistema de la radio de Connect Plus tiene la capacidad de decidir los emplazamientos de red que puede utilizar o no la radio. Para cambiar la lista de emplazamientos permitidos o restringidos, no es necesario reprogramar la radio. Si la radio intenta registrarse en un emplazamiento restringido, verá un breve mensaje con esta información: `Sitio <número determinado> no permitido`. A continuación, la radio buscará otro emplazamiento de red.

## Selección de una Zona

La radio se puede programar con un máximo de 16 zonas de Connect Plus, cada una de las cuales admite un máximo de 16 posiciones asignables en el mando del selector de canales.

Cada posición asignable del mando puede emplearse para iniciar uno de estos tipos de llamada de voz:

- Llamada de grupo
- Llamada multigrupo
- Llamada a todos en el emplazamiento
- Llamada privada

- 1 Realice la siguiente acción para acceder a la función Zona:

Controles de la radio	Pasos
<b>Botón Selección de zona programado</b>	Pulse el botón <b>Selección de zona</b> programado.

Controles de la radio	Pasos
<b>Menú de la radio</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para acceder a Zona y pulse  para seleccionar.</p>

La zona actual se muestra y aparece con un .

## 2 Seleccione la zona deseada.

Control de radio	Pasos
 o 	Pulse  o  y desplácese a la zona deseada.

## 3 Pulse para seleccionar.

La pantalla muestra <Zona> seleccionada momentáneamente y vuelve a la pantalla de la zona seleccionada.

## Uso de varias redes

Si la radio se ha programado para utilizar varias redes de Connect Plus, puede seleccionar una red diferente cambiando a la zona de Connect Plus que esté asignada a la red deseada. Estas asignaciones de zona-red las configura el distribuidor mediante programación de la radio.

## Selección de un tipo de llamada

Utilice el mando selector de canales para seleccionar el tipo de llamada. Puede tratarse de una llamada de grupo, llamada multigrupo, llamada a todos en sitio o llamada privada, en función de la programación de la radio. Si cambia el selector de canales a una posición diferente (que tenga un tipo de llamada asignada), la radio volverá a registrarse en el emplazamiento de Connect Plus. La radio se registrará con el ID de grupo de registro que se haya

programado para la nueva posición del selector de canales el nuevo tipo de llamada.

Si selecciona una posición que no tiene ningún tipo de llamada asignada, la radio emitirá un tono continuo y en la pantalla aparecerá Sin programar. Dado que la radio no funciona cuando se selecciona un canal no programado, utilice el selector de canales para elegir en su lugar un canal programado.

Una vez se muestre la zona (si tiene varias zonas en la radio), gire el mando selector de canales programado para seleccionar el tipo de llamada.

## Recepción y respuesta a llamadas de radios

Una vez que se haya mostrado el canal, el ID de suscriptor o el tipo de llamada, podrá recibir y responder llamadas.

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea en verde cuando está recibiendo.

### NOTA:

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea dos veces en verde cuando la radio está recibiendo una llamada que tiene la privacidad habilitada. Para descodificar una llamada que tiene la privacidad habilitada, la radio debe tener la misma clave de privacidad O BIEN la misma clave e ID de clave (programadas por el distribuidor) que la radio transmisora (la radio desde la que recibe la llamada).

Consulte [Privacidad en la página 310](#) para obtener más información.

## Recepción y respuesta a llamadas a grupo

Para recibir una llamada de un grupo de usuarios, la radio debe estar configurada como parte de ese grupo.

Si recibe una llamada a grupo (desde la pantalla de inicio), el indicador LED parpadea en verde. El icono de llamada a grupo aparece en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante. La segunda línea de texto muestra el alias de la llamada a grupo. La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz de la radio.

- 1 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.

El indicador LED se ilumina en color verde fijo.

- 
- 2 Espere hasta que acabe uno de los tonos Permitir hablar (si está habilitado) y hable con claridad al micrófono.

- 3 Suelte el botón **PTT** para escuchar.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

---

### NOTA:

Consulte [Realización de llamadas a grupo en la página 254](#) para obtener más información sobre cómo realizar una llamada a grupo.

## Recepción y respuesta a llamadas privadas

Una llamada privada es una llamada de una radio individual a otra radio individual.

Cuando reciba una llamada privada, el LED parpadea en verde. La primera línea de la pantalla muestra el ID o alias del suscriptor y el icono de RSSI. La segunda línea muestra el mensaje `Llamada privada` y el icono de llamada privada. La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz de la radio.

- 1 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.

- 
- 2 Pulse el botón **PTT** para responder la llamada.

El indicador LED se ilumina en color verde fijo.

---

- 3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

- 4 Suelte el botón **PTT** para escuchar.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

La pantalla muestra `Llamada finalizada`.

Consulte [Realización de llamadas privadas en la página 255](#) para obtener detalles sobre la realización de una llamada privada.

## Recepción de una llamada a todos en sitio

Una llamada a todos en sitio es la que procede de una radio concreta y va dirigida a todas las radios de tal emplazamiento. Se utiliza para realizar anuncios importantes que requieren la atención total del usuario.

Cuando recibe una llamada a todos en el emplazamiento, suena un tono y el indicador LED parpadea en verde.

El icono de llamada de grupo aparece en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante. La segunda línea de texto

muestra `Llamada a todos` en el emplazamiento. La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz de la radio.

Una vez que la llamada a todos en sitio finaliza, la radio vuelve a la pantalla en la que estaba antes de recibir la llamada. Una llamada a todos en sitio no espera un periodo de tiempo predeterminado antes de finalizar.

Las llamadas a todos en el emplazamiento no admiten respuesta.

### NOTA:

Consulte [Realización de una llamada a todos en sitio en la página 256](#) para obtener más detalles sobre cómo realizar llamadas a todos en sitio.

La radio deja de recibir la llamada a todos en sitio si cambia a un canal distinto mientras está recibiendo la llamada. Durante una llamada a todos en el emplazamiento, no podrá utilizar ninguna función de los botones programables hasta que termine la llamada.

## Recepción de una llamada telefónica privada

Cuando reciba una llamada telefónica privada, aparecerá el icono de llamada telefónica como una llamada privada en la esquina superior derecha. En la primera línea de texto se muestra Llmda. telef.

- 1 Mantenga pulsado el botón **PTT** para contestar y hablar. Suelte el botón **PTT** para escuchar.

- 2 Mantenga pulsado  para terminar la llamada.

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Llmda. telef... La pantalla vuelve a la pantalla de llamada telefónica. La pantalla muestra Llamada finalizada.

## Realización de una marcación en búfer en una llamada telefónica privada entrante

Durante la llamada, aparecerá en la esquina superior derecha el icono de llamada telefónica como una llamada

privada. La primera línea de texto de la pantalla muestra Llmda. telef.

- 1 Utilice el teclado para introducir los dígitos y pulse el botón  .

Pulse  y, a continuación,  en dos segundos para introducir una pausa. La P sustituye a \* y # en la pantalla.

El icono de llamada telefónica como una llamada privada aparece en la esquina superior derecha. La primera línea de la pantalla muestra los dígitos que ha introducido.

- 2 Para finalizar la llamada, pulse  .

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Llmda. telef... La pantalla vuelve a la pantalla de llamada telefónica.

La pantalla muestra Llamada finalizada.

## Realización de una marcación en directo en una llamada telefónica privada entrante

Durante la llamada, aparecerá en la esquina superior derecha el icono de llamada telefónica como una llamada privada. La primera línea de texto de la pantalla muestra Lmda. teléf.

- 1 Pulse el botón **PTT** y utilice el teclado para introducir los dígitos.

El icono de llamada telefónica como una llamada privada aparece en la esquina superior derecha. La primera línea de texto de la pantalla muestra los dígitos de marcación en directo.

- 2 Para finalizar la llamada, pulse  .

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Lmda. teléf... La pantalla vuelve a la pantalla de llamada telefónica.

La pantalla muestra Llamada finalizada.

## Recepción de una llamada telefónica de grupo de conversación

Cuando reciba una llamada telefónica de grupo de conversación, aparecerá el icono de llamada de grupo en la esquina superior derecha. La primera línea de texto muestra Llamada1.

Pulse el botón **PTT** para hablar y suéltelo para escuchar.

## Llamada telefónica multigrupo entrante

Cuando reciba una llamada telefónica multigrupo, aparecerá el icono de llamada a grupo en la esquina superior derecha. En la primera línea de texto se muestra Llamada multigrupo. La radio desactiva el silencio y las llamadas a grupo entrantes suenan a través del altavoz de la radio.

## Realización de una llamada de radio

Después de seleccionar el canal, puede seleccionar un ID o alias de suscriptor, o el ID o alias de grupo, mediante el uso de:

- El mando del selector de canales.
- Un botón de **acceso instantáneo** programado: la función de acceso instantáneo permite realizar fácilmente una llamada privada a un ID predefinido. Esta función se puede asignar a la pulsación breve o prolongada de un botón programable. Solo puede asignar un ID a un botón de **acceso instantáneo**. La radio puede tener varios botones de **acceso instantáneo** programados.
- La lista de contactos (consulte [Configuración de contactos en la página 278](#)).

### NOTA:

La radio debe tener la función de privacidad activada en el canal para enviar una transmisión con la privacidad activada. Solo las radios de destino que dispongan del mismo valor de clave e ID de clave podrán descifrar la transmisión.

Consulte [Privacidad en la página 310](#) para obtener más información.

## Realización de una llamada con el mando selector de canales

Esta función permite a los usuarios de la radio realizar diferentes tipos de llamadas: llamada grupal, llamada privada, llamada a todos en el sitio, llamada de multigrupo.

## Realización de llamadas a grupo

Para llamar a un grupo de usuarios, la radio deberá estar configurada como parte de ese grupo.

- 1 Seleccione el canal con el ID o alias de grupo activo. Consulte [Selección de un tipo de llamada en la página 248](#).

---

- 2 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.

---

- 3 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED se ilumina en verde fijo. El icono de llamada a grupo aparece en la esquina superior derecha. La primera línea del texto muestra el alias de la llamada a grupo.

4 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

---

5 Suelte el botón **PTT** para escuchar.

Cuando la radio de destino responda, el indicador LED parpadeará en verde, se activará el sonido de la radio y la respuesta se oír a través del altavoz de la radio. Se muestra en la pantalla el icono de llamada a grupo, el ID o alias de grupo y el ID o alias de la radio transmisora.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

---

## Realización de llamadas privadas

Aunque puede recibir o responder a una llamada privada iniciada a través de una radio individual autorizada, su radio deberá estar programada para que pueda iniciar una llamada privada.

Oír un tono indicador negativo cuando realice una llamada privada a través de el botón de **acceso de marcación rápida**, o el botón selector de canales, si esta función no está activada.

[Enviar comentarios](#)

1 Lleve a cabo una de las siguientes acciones.

- Seleccione el canal con el alias o ID de suscriptor activo. Consulte [Selección de un tipo de llamada en la página 248](#).
  - Pulse el botón de **acceso de marcación rápida** programado.
- 

2 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.

---

3 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. El icono de Llamada privada aparece en la esquina superior derecha. La primera línea de texto muestra el alias del suscriptor de destino. La segunda línea de texto muestra el estado de la llamada.

---

4 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

---

5 Suelte el botón **PTT** para escuchar.

Cuando la radio de destino responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará. Se oye un tono breve. La pantalla muestra **Llamada finalizada**.

---

Puede que la radio esté programada para realizar una verificación de presencia de radio antes de configurar la llamada privada. Si la radio de destino no está disponible, oirá un tono breve y verá un aviso pequeño negativo en la pantalla.

### Realización de una llamada a todos en sitio

Esta función permite transmitir a todos los usuarios del emplazamiento que no estén realizando otra llamada en ese momento. La radio debe estar programada para que pueda utilizarse esta función.

Los usuarios del canal/sitio no pueden responder a una llamada a todos en el emplazamiento.

- 1 Seleccione el canal con el alias de grupo de llamada a todos en el emplazamiento activo. Consulte [Selección de un tipo de llamada en la página 248](#).
- 

- 2 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.
- 

- 3 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. El icono de llamada de grupo aparece en la esquina superior derecha. La primera línea de texto muestra el mensaje **Site All Call** (Llamada a todos en el emplazamiento).

---

- 4 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.
- 

### Realización de una llamada multigrupo

Esta función permite transmitir a todos los usuarios de varios grupos. La radio debe estar programada para que pueda utilizarse esta función.

#### **NOTA:**

los usuarios de los grupos no pueden responder a una llamada multigrupo.

- 1 Gire el selector de canales para elegir el ID o alias de grupo.
-

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. La pantalla mostrará el ID o alias de multigrupo.

Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

## Realización de llamadas privadas con el botón de Llamada por marcación rápida

### NOTA:

la pulsación de los botones programables debe efectuarse desde la pantalla de inicio.

La función Llamada por marcación rápida permite realizar fácilmente una llamada privada a un ID o alias de llamada privada predefinido. Esta función se puede asignar a la pulsación breve o prolongada de un botón programable.

SOLO puede tener un alias o ID asignado a un botón de Llamada por marcación rápida. La radio puede tener varios botones programados de Llamada por marcación rápida.

- 1 Pulse el botón programado de **Llamada instantánea** para efectuar una llamada privada al ID o alias de llamada privada predefinido.
- 2 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.
- 3 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED se ilumina en color verde fijo.  
La pantalla mostrará el ID o alias de llamada privada.
- 4 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.
- 5 Suelte el botón **PTT** para escuchar.  
Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.  
Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

## Realización de llamadas telefónicas con el botón de marcado manual programable

Esta función permite que los usuarios de la radio realicen llamadas privadas mediante el botón programable de marcación manual.

### Realización de llamadas privadas

- 1 Pulse el botón de **Marcación manual** para acceder a la pantalla de marcado manual.

La pantalla muestra **Número:**.

---

- 2 Utilice el teclado para introducir un alias o ID privado.
- 

- 3 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.
- 

- 4 Pulse el botón **PTT** para realizar la llamada.

El indicador LED se ilumina en color verde fijo. El icono de llamada privada aparece en la esquina superior derecha. La primera línea de texto muestra

el alias de suscriptor. La segunda línea de texto muestra el estado de la llamada.

---

- 5 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.
- 

- 6 Suelte el botón **PTT** para escuchar.

Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará. Se oye un tono breve. La pantalla muestra **Llamada finalizada**.

---

## Realización de llamadas telefónicas privadas con el botón de marcado manual programable

- 1 Pulse el botón de **Marcdo. manual** para acceder a la pantalla de marcado manual.

La pantalla muestra **Núm. :**.

---

2 Utilice el teclado para introducir un número de teléfono y pulse  para realizar una llamada al número introducido.

Pulse  para borrar los caracteres no deseados.

Pulse  y, a continuación,  en dos segundos para introducir una pausa. La P sustituye a \* y # en la pantalla.

Si se realiza correctamente, la primera línea de la pantalla muestra Llmda. teléf. La segunda línea de la pantalla muestra el número de teléfono marcado.

Si se selecciona un número de teléfono no válido, en la pantalla se mostrará un aviso pequeño negativo: Llamada tel. fallida, Recurso no disponible o Permisos no válidos.

Si pulsa  sin haber introducido ningún número de teléfono, la radio emite un tono indicador positivo y, a continuación, uno negativo. La pantalla no cambia.

3 Para finalizar la llamada, pulse .

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Llmda. teléf...

La pantalla muestra Llamada finalizada.

---

## Realización de una llamada telefónica privada saliente mediante el menú del teléfono

1 pulse  para acceder al menú.

2 Pulse  o  para ir a Teléfono y pulse  para seleccionar.

3 Pulse  para seleccionar Marcación manual.

La primera línea de la pantalla muestra Número, la segunda línea de la pantalla muestra un cursor parpadeante.

---

- 4 Utilice el teclado para introducir un número telefónico y pulse  para realizar una llamada al número introducido.

Pulse  para borrar los caracteres no deseados.

Pulse  y, a continuación,  en dos segundos para introducir una pausa. La P sustituye a \* y # en la pantalla.

Si se realiza correctamente, la primera línea de la pantalla muestra Llamada telefónica. La segunda línea de la pantalla muestra el número de teléfono marcado.

Si se selecciona un número telefónico no válido, en la pantalla se mostrará un miniaviso negativo: Llamada telefónica fallida, Recurso no disponible o Permisos no válidos.

Si pulsa  sin haber introducido ningún número telefónico, la radio emite un tono indicador positivo y, a continuación, uno negativo. La pantalla no cambia.

- 5 Para finalizar la llamada, pulse de forma prolongada

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Llamada telefónica...

La pantalla muestra Llamada telefónica finalizada.

---

## Realización de una llamada telefónica privada saliente desde Contactos

### NOTA:

Si la función de marcación manual del teléfono está desactivada en el MOTOTRBO Connect Plus Option Board CPS, el elemento Número telefónico **no** se mostrará en el menú.

- 1 pulse  para acceder al menú.
  - 2 Pulse  o  para ir a Contactos y pulse  para seleccionar.
-

3 Pulse  o  para ir a Marcación manual y pulse  para seleccionar.

---

4 Pulse  o  para ir a Número telefónico y pulse  para seleccionar.

La primera línea de la pantalla muestra Número, la segunda línea de la pantalla muestra un cursor parpadeante.

---

5 Utilice el teclado para introducir un número telefónico y pulse  para realizar una llamada al número introducido.

Si pulsa el botón **PTT**, la pantalla muestra un pequeño aviso negativo, Pulse Aceptar para enviar y vuelve a la pantalla anterior.

Pulse  para borrar los caracteres no deseados.

Pulse  y, a continuación,  en dos

segundos para introducir una pausa. La P sustituye a \* y # en la pantalla.

Si se realiza correctamente, la primera línea de la pantalla muestra Llamada telefónica. La segunda línea de la pantalla muestra el número de teléfono marcado.

Si pulsa  sin haber introducido ningún número telefónico, la radio emite un tono indicador positivo y, a continuación, uno negativo. La pantalla no cambia.

---

6 Para finalizar la llamada, pulse de forma prolongada  .

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Llamada telefónica...

La pantalla muestra Llamada telefónica finalizada.

---

## Espera de la concesión de canal en una llamada telefónica privada saliente

Al realizar una llamada telefónica privada, en la primera línea de la pantalla se muestra Llmada. teléf.. La segunda línea de la pantalla muestra el número de teléfono marcado.

Cuando se conecte la llamada, aparecerá en la esquina superior derecha el icono de llamada telefónica como una llamada privada. La primera línea de la pantalla muestra el número de teléfono.

Si no se ha realizado correctamente, en la pantalla se mostrará un aviso pequeño negativo: Llamada tel. fallida, Recurso no disponible o Permisos no válidos.

Para finalizar la llamada, pulse  .

Se muestra de nuevo la pantalla anterior.

## Realización de una marcación en búfer en una llamada telefónica privada saliente conectada

Durante la llamada, aparecerá en la esquina superior derecha el icono de llamada telefónica como una llamada privada. La primera línea de texto de la pantalla muestra el número de teléfono.

- 1 Utilice el teclado para introducir los dígitos.

Pulse  para borrar los caracteres no deseados.

Pulse  y, a continuación,  en dos segundos para introducir una pausa. La P sustituye a \* y # en la pantalla.

La primera línea de texto de la pantalla muestra Dígitos extra, la segunda línea de texto de la pantalla muestra los dígitos adicionales introducidos.

- 2 Pulse el botón  .

Si pulsa el botón **PTT**, la pantalla muestra un pequeño aviso negativo, Presione OK para enviar y vuelve a la pantalla anterior.

El icono de llamada telefónica como una llamada privada aparece en la esquina superior derecha. La primera línea de texto de la pantalla muestra el número de teléfono y se añaden los dígitos marcados.

---

**3** Lleve a cabo una de las siguientes acciones.

- Pulse  para volver a la pantalla de llamada telefónica.
  - Para finalizar la llamada, pulse  .
- 

## Realización de una marcación en directo en una llamada telefónica privada saliente conectada

Durante la llamada, aparecerá en la esquina superior derecha el icono de llamada telefónica como una llamada

privada. La primera línea de texto de la pantalla muestra el número de teléfono.

**1** Pulse el botón **PTT** y utilice el teclado para introducir los dígitos.

El icono de llamada telefónica como una llamada privada aparece en la esquina superior derecha. La primera línea de texto de la pantalla muestra el número de teléfono y se añaden los dígitos marcados.

---

**2** Para finalizar la llamada, pulse  .

La primera línea de la pantalla muestra Finalizando. La segunda línea de la pantalla muestra Llmda. telef...

La pantalla muestra Llamada finalizada.

---

## Funciones avanzadas en modo Connect Plus

En este capítulo se explican cómo se utilizan las funciones disponibles en la radio.

## Recordatorio de canal de inicio

Esta función activa un recordatorio cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Si esta función está activada a través del CPS, el tono de recordatorio de canal de inicio y el anuncio suenan, la primera línea de la pantalla muestra **Si** y la segunda línea muestra **canal principal** periódicamente cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Puede responder al recordatorio realizando una de las acciones siguientes:

- Volver al canal de inicio.
- Silenciar el recordatorio temporalmente con el botón programable.
- Establecer un nuevo canal principal con el botón programable.

## Repliegue auto

Repliegue auto es una función del sistema que permite seguir realizando y recibiendo llamadas que no sean de emergencia en el contacto de grupo seleccionado cuando

se producen determinados tipos de fallo del sistema Connect Plus.

Si se presenta uno de estos fallos, la radio prueba a itinerar a otro emplazamiento diferente de Connect Plus. Este proceso de búsqueda puede dar lugar a que la radio localice un emplazamiento de Connect Plus que funcione o un "canal de repliegue" (si la radio tiene habilitada la función de repliegue automático). Un canal de repliegue es un repetidor que normalmente forma parte de un emplazamiento de Connect Plus que funciona, pero que no puede comunicar en ese momento con su controlador de emplazamiento o con la red de Connect Plus. En el modo de seguridad, el repetidor funciona como un repetidor digital independiente. El modo de seguridad automática solo da soporte a las llamadas de grupo no de emergencia. Ningún otro tipo de llamada tiene soporte en el modo de seguridad.

## Indicaciones del modo Repliegue auto

Cuando la radio utilice un canal de repliegue escuchará el "tono de repliegue" intermitente aproximadamente cada 15 segundos (excepto al transmitir). La pantalla muestra periódicamente el mensaje "Canal de repliegue". La radio solo permite el uso de PTT en el grupo de contacto seleccionado (llamada de grupo, llamada multigrupo o

llamada a todos en sitio). No podrá realizar ningún otro tipo de llamada.

## Realización/recepción de llamadas en modo de seguridad

### NOTA:

únicamente escuchan las llamadas los radios que controlan el mismo canal de seguridad y que están seleccionadas en el mismo grupo. Las llamadas no se conectan a otros emplazamientos o repetidores. En el modo de seguridad no están disponibles las llamadas de voz de emergencia ni las alertas de emergencia. Si se pulsa el botón de emergencia en el modo de seguridad, la radio emitirá un tono de pulsación de tecla no válida. Los radios con pantalla también presentarán el mensaje "Función no disponible".

Las llamadas privadas (de radio a radio) y telefónicas no están disponibles en el modo de repliegue. Si se intenta realizar una llamada a un contacto privado, se recibe un tono de denegación. En este punto, deberá seleccionar el contacto de grupo que le interese. Además, tampoco hay soporte para las llamadas de monitor remoto, alerta de llamada, verificación de radio, habilitación de radio, deshabilitación de radio, mensajería de texto, actualizaciones de ubicación y datos de paquete.

Ni hay soporte de acceso de canal de tráfico mejorado (ETCA, Enhanced Traffic Channel Access) en el modo Repliegue auto. Si dos usuarios (o más) pulsán el botón **PTT** al mismo tiempo (o casi al mismo tiempo), es posible que ambas radios transmitan hasta que se suelte el botón **PTT**. En tal caso, cabe la posibilidad de que ninguna de las transmisiones sea comprensible para las radios receptoras.

La realización de llamadas en el modo de seguridad es similar al funcionamiento normal. Basta con seleccionar el contacto de grupo que se desee utilizar (mediante el método de selección de canal normal de la radio) y, a continuación, pulsar el botón **PTT** para iniciar la llamada. Es posible que otro grupo ya esté utilizando el canal. En tal caso, se recibe un tono de ocupado y en la pantalla aparece “Canal ocupado”. Puede seleccionar los contactos de grupo, multigrupo o llamada a todos en sitio con el método normal de selección de canal de la radio. Mientras la radio funciona en el canal de seguridad, el funcionamiento de multigrupo es idéntico al de los demás grupos. Solo las radios seleccionadas en ese momento en el mismo multigrupo pueden escucharlo.

## Reanudación del funcionamiento normal

Cuando el emplazamiento vuelva al funcionamiento normal mientras la radio esté dentro del alcance del repetidor de seguridad, la radio saldrá automáticamente del modo Repliegue auto. Se oye un “beep” de registro cuando la radio se registra correctamente. Si cree que se encuentra dentro del alcance de un emplazamiento que funciona (que no está en modo Repliegue auto), puede pulsar el botón de solicitud de itinerancia (si está programado en su radio) para forzar que la radio busque un emplazamiento disponible y se registre en él. Si ningún otro emplazamiento está disponible, la radio volverá al modo de seguridad automática una vez finalizada la búsqueda. Si pierde la cobertura del repetidor de seguridad, la radio entrará en el modo de búsqueda (en la pantalla aparecerá *Buscando*).

## Verificación de radio

Si está activada, esta función le permite determinar si hay otra radio activa en un sistema sin tener que molestar al usuario de dicha radio. No se muestran notificaciones visuales ni sonoras en la radio de destino.

Esta función solo se aplica a los ID o alias de suscriptor.

## Envío de una verificación de radio

- 1 Acceso a la función de verificación de radio.

Control de radio	Pasos
<b>Botón Verificación de radio programado</b>	<p><b>a</b> Pulse el botón programable <b>Verificación de radio.</b></p> <p><b>b</b> Pulse  o  hasta llegar al alias o ID de suscriptor que desee y pulse  para seleccionar.</p>
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para ir a <b>Contactos</b> y pulse  para seleccionar.</p>

Control de radio	Pasos
	<p><b>c</b> Pulse  o  hasta llegar al alias o ID de suscriptor que desee y pulse  para seleccionar.</p> <p><b>d</b> Pulse  o  para acceder a <b>Verificar radio</b> y pulse  para seleccionar.</p>

La pantalla muestra el alias de destino, lo que indica que la solicitud está en curso. El indicador LED se ilumina en color verde fijo.

- 2 Espere a que se produzca la confirmación.

Si la radio de destino está activa en el sistema, se reproducirá un tono y en la pantalla aparecerá **Radio objet. disponible.**

Si la radio de destino no está activa en el sistema, se reproducirá un tono y la pantalla mostrará Radio objet. no disponible.

La radio vuelve a la pantalla de alias o ID de suscriptor cuando se inicia a través del menú.

La radio vuelve a la pantalla de inicio si se inicia a través del botón programable.

## Monitorización remota

Utilice la función Monitor remoto para encender el micrófono de una radio de destino (solo el alias o ID de suscriptor). El LED verde parpadeará una vez en el suscriptor de destino. Se puede utilizar esta función para supervisar de manera remota toda la actividad audible alrededor de la radio de destino.

La radio debe estar programada para que pueda utilizarse esta función.

## Iniciación del monitor remoto

### NOTA:

El monitor remoto se detiene automáticamente después de la duración programada o cuando se intenta iniciar una transmisión, cambiar los canales o apagar la radio.

- 1 Acceder a la función Monitor remoto.

Control de radio	Pasos
<b>Botón Monitor remoto programado</b>	<p><b>a</b> Pulse el botón <b>Monitor remoto</b> programado.</p> <p><b>b</b> Pulse  o  hasta llegar al alias o ID de suscriptor que desee y pulse  para seleccionar.</p>
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p>

Control de radio	Pasos
	<p><b>b</b> Pulse  o  para ir a Contactos y pulse  para seleccionar.</p> <p><b>c</b> Pulse  o  hasta llegar al alias o ID de suscriptor que desee y pulse  para seleccionar.</p> <p><b>d</b> Pulse  o  para ir a Marcación manual y pulse  para seleccionar.</p> <p><b>e</b> Pulse  o  para ir a Mon. remoto y pulse  para seleccionar.</p>

La primera línea de texto muestra el mensaje `Monitor remot.`. La segunda línea de texto

muestra el alias de destino, lo que indica que la solicitud está en curso. El indicador LED se ilumina en color verde intermitente.

## 2 Espere a que se produzca la confirmación.

Si es correcto, suena un tono indicador positivo y en la pantalla aparece `Mon. remot. correcto`. La radio comienza a reproducir el audio de la radio que se supervisa durante la duración programada y la pantalla muestra `Monitor remot.`, seguido del alias de destino. Cuando el temporizador indica que se ha agotado el tiempo, la radio emite un tono de alerta y el indicador LED se apaga.

Si no es correcto, la radio emite un tono indicador negativo y en la pantalla aparece `Error mon. remot.`

## Escaneo

Esta función permite que la radio busque y se una a llamadas de grupos definidos en una lista de rastreo preprogramada. Cuando se activa el rastreo, el icono que lo indica aparece en la barra de estado y el indicador LED parpadea en amarillo cuando esté inactivo.

## Inicio y detención del rastreo

### NOTA:

Este procedimiento activa o desactiva la función de Rastreo para todas las zonas de Connect Plus con el mismo ID de red que la zona seleccionada actualmente. Es importante tener en cuenta que incluso cuando la función de rastreo se activa mediante este procedimiento ésta puede estar desactivada para algunos grupos (o todos) de la lista de rastreo. Consulte [Edición de la lista de rastreo en la página 272](#) para obtener más información.

Puede encender y apagar el rastreo pulsando el botón **Rastreo** programado **O** siguiendo el procedimiento que se describe a continuación.

1 pulse  para acceder al menú.

2 Pulse  o  para ir a Rastrear y pulse  para seleccionar.

3 Pulse  o  para ir a Encender o Apagar y pulse  para seleccionar.

- La pantalla muestra **Rastreo activado** si el rastreo está activado.
- El menú Rastreo muestra **Apagar** si el rastreo está activado.
- La pantalla muestra **Rastreo desactivado** si el rastreo está desactivado.
- El menú Rastreo muestra **Encender** si el rastreo está desactivado.

## Respuesta a una transmisión durante un rastreo

Durante el rastreo, la radio se detiene en un grupo en el que detecte actividad. La radio busca continuamente a cualquier miembro de la lista de rastreo cuando está inactivo en el canal de control.

- 1 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.

- 2 Pulse el botón **PTT** durante el tiempo muerto.  
El indicador LED se ilumina en color verde fijo.

- 
- 3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

- 
- 4 Suelte el botón **PTT** para escuchar.  
Si no responde dentro del periodo de tiempo muerto, la radio vuelve a realizar el rastreo de otros grupos.

## Rastreo configurable por el usuario

Si el menú Editar lista está activado, el usuario puede agregar y eliminar los miembros del menú Añadir miembro. Un miembro de la lista de rastreo debe ser un contacto de grupo habitual (p. ej., no llamada a todos en sitio o multigrupo/llamada a todos por toda la red) que esté asignado a una posición del selector de canales en una zona de Connect Plus con el mismo ID de red que la zona seleccionada actualmente. El alias del grupo de conversación no debe coincidir con ningún grupo de conversación que se haya incluido en la actual lista de rastreo de la zona.

El rastreo se puede habilitar o deshabilitar desde el menú o con la pulsación del botón programado de **Activar/desactivar rastreo**.

Esta función solo se admite cuando no hay una llamada en curso en la radio. Cuando se está escuchando una llamada, no se puede escanear la existencia de otras llamadas a grupo, por lo que no podrá saber si hay alguna en progreso. Una vez finalizada su llamada, la radio volverá al intervalo de tiempo del canal de control y podrá escanear los grupos de la lista de rastreo.

## Activación o desactivación del rastreo

### NOTA:

Este procedimiento activa o desactiva la función de rastreo para todas las zonas con el mismo ID de red que la zona seleccionada actualmente. Es importante tener en cuenta que incluso cuando la función de rastreo se activa mediante este procedimiento ésta puede estar desactivada para algunos grupos (o todos) de la lista de rastreo. Para obtener más información, consulte la sección siguiente.

Si el rastreo está activado, en la pantalla aparece el icono Rastreo. Cuando el rastreo está activado y mientras la radio no participa en una llamada, el indicador LED parpadea en verde y amarillo.

El procedimiento para activar o desactivar el rastreo dependerá de la forma en la que se haya programado la radio. Si se ha programado con un botón de Activar/desactivar rastreo, utilícelo para habilitar o deshabilitar la función. Si la radio se ha programado para activar o desactivar el rastreo a través del menú, use el procedimiento que se describe a continuación.

1 pulse  para acceder al menú.

2 Pulse  o  para ir a Rastrear y pulse  para seleccionar.

3 Pulse  o  para ir a Encender o Apagar y pulse  para seleccionar.

- La pantalla muestra Rastreo activado si el rastreo está desactivado.

- La pantalla muestra Rastreo desactivado si el rastreo está activado.

## Edición de la lista de rastreo

### NOTA:

Si la entrada de la lista de rastreo corresponde al grupo seleccionado en ese momento, escuchará la actividad de ese grupo con independencia de que en la lista aparezca o no una marca de verificación. Siempre que una radio no esté ocupada con una llamada, escuchará la actividad de su grupo seleccionado, multigrupo y llamada a todos en sitio, así como el grupo de reversión de emergencia predeterminado (si está configurada para uno). Esta operación no se puede desactivar. Si se activa el Rastreo, la radio también escuchará la actividad de los miembros activos de la lista de rastreo de zona.

La lista de rastreo determina qué grupos se pueden escanear. Se crea al programar la radio. Si la radio se programa para permitir que se edite la lista de rastreo, podrá:

- Habilitar/deshabilitar el rastreo para los grupos concretos de la lista.

- Agregar y borrar miembros desde el menú Agregar miembro. Consulte la [Añadir o borrar un grupo a través del menú Añadir miembros en la página 274](#).

**NOTA:**

Un miembro de la lista de rastreo debe ser un contacto de grupo habitual (no llamada a todos en sitio o multigrupo/llamada a todos por toda la red) que esté asignado a una posición del selector de canales en una zona de Connect Plus con el mismo ID de red que la zona seleccionada actualmente. El alias del grupo de conversación no debe coincidir con ningún grupo de conversación que se haya incluido en la actual lista de rastreo de la zona.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Ver/editar lista y pulse  para seleccionar.

---

- 3 Pulse  o  hasta el nombre de grupo que desee.

Si hay una marca de verificación delante del nombre del grupo, el rastreo está habilitado para ese grupo.

Si no hay ninguna marca de verificación delante del nombre del grupo, el rastreo está deshabilitado para ese grupo.

- 4  para seleccionar el grupo que desee.

La pantalla muestra *Activar* si el rastreo está desactivado actualmente para el grupo.

La pantalla muestra *Desactivar* si el rastreo está activado actualmente para el grupo.

- 5 Seleccione la opción mostrada (*Activar* o *Desactivar*) y pulse  para seleccionar.

En función de la opción seleccionada, la radio muestra de forma momentánea *Rastreo activado* o *Rastreo desactivado* como confirmación.

La radio muestra la lista de rastreo de zonas de nuevo. Si el rastreo está activado para el grupo, la marca de verificación se muestra delante el nombre del grupo. Si el rastreo está deshabilitado para el grupo, la marca de verificación se borra de delante del nombre del grupo.

## Añadir o borrar un grupo a través del menú Añadir miembros

La radio Connect Plus no permite colocar un número de grupo duplicado o un alias de grupo duplicado en una lista de rastreo de zona (o mostrarlo como “candidato de rastreo”). Por lo tanto, la lista de “candidatos de rastreo” descrita en [paso 6](#) y [paso 7](#) cambia en ocasiones después de agregar o borrar un grupo de la lista de rastreo de zona.

Si la radio se ha programado para permitirle editar la lista de rastreo, puede usar el menú Añadir miembros para agregar un grupo a la lista de rastreo de la zona seleccionada en ese momento o eliminar un grupo de la lista de rastreo de la zona seleccionada en ese momento.

1 pulse  para acceder al menú.

---

2 Pulse  o  para ir a la opción de rastreo y pulse  para seleccionar.

---

3 Pulse  o  para ir a <Añadir miembros> y pulse  para seleccionar.

La pantalla muestra Añadir miembros de zona n (n = número de zona de Connect Plus de la primera zona de Connect Plus de la radio con el mismo ID de red que la zona seleccionada actualmente).

---

- 4 Lleve a cabo una de las siguientes acciones.
- Si el grupo que desea agregar a la lista de rastreo está asignado a una posición del selector de canales en dicha zona, vaya a [paso 6](#).
  - Si el grupo que desea agregar a la lista de rastreo está asignado a una posición del selector de canales en una zona de Connect Plus distinta, vaya a [paso 5](#).
- 

5 Pulse  o  para desplazarse por una lista de zonas de Connect Plus que tienen el mismo ID de red que la zona seleccionada actualmente.

---

- 6 Después de localizar la zona de Connect Plus donde el grupo deseado está asignado a una posición en el selector de canales, pulse  para seleccionar.

La radio muestra la primera entrada de una lista de grupos asignados a una posición del canal en dicha zona. Los grupos de la lista se denominan “candidatos de rastreo” porque se pueden agregar a la lista de rastreo de la zona seleccionada en ese momento (o ya se encuentran en la lista de rastreo de la zona).

Si la zona no tiene ningún grupo que se pueda agregar a la lista de rastreo, la radio indica *Sin candidatos*.

- 7 Pulse  o  para desplazarse por la lista de grupos de candidatos.

Si aparece un signo más (+) justo antes del alias de grupo, indica que el grupo está ya en la lista de rastreo de la zona seleccionada.

Si no aparece el signo más (+) justo antes del alias, el grupo no se encuentra en la lista de rastreo, pero es posible agregarlo.

- 8 Pulse  cuando aparezca el alias de grupo deseado.

Si este grupo no figura en la lista de rastreo de la zona que está seleccionada, aparece el mensaje *Agregar* (alias de grupo).

Si este grupo ya figura en la lista de rastreo de la zona que está seleccionada, aparece el mensaje *Borrar* (alias de grupo).

- 9 Pulse  para aceptar el mensaje que se muestra (*Agregar* o *Borrar*).

Si borra un grupo de la lista, sabrá que la operación se ha llevado a cabo correctamente porque el signo más (+) ya no aparecerá justo antes del alias.

Si añade un grupo a la lista, sabrá que la operación se ha llevado a cabo correctamente porque el signo más (+) aparecerá antes del alias.

Si intenta agregar un grupo y la lista ya está llena, la radio muestra *Lista llena*. Si esto sucede, será necesario suprimir un grupo de la lista de rastreo antes de añadir uno nuevo.

- 10 Cuando haya terminado, pulse  tantas veces como sea necesario para volver al menú que desee.
- 

## Descripción de la operación de rastreo

### NOTA:

si la radio se une a una llamada de un miembro de la lista de rastreo de zona de una zona distinta y el temporizador de colgado de llamada expira antes de que haya podido responder, tiene que navegar a la zona y al canal de la lista de miembros de rastreo y comenzar una nueva llamada.

Hay algunas circunstancias en las que puede perder llamadas de los grupos de su lista de rastreo. Es algo normal por los motivos que se indican a continuación; la radio no tendrá ningún problema en estos casos. Se trata del funcionamiento normal del rastreo con Connect Plus.

- La función de rastreo no está activada (compruebe que el icono de rastreo aparece en pantalla).
- El miembro de la lista de rastreo se ha desactivado desde el menú (consulte [Edición de la lista de rastreo en la página 272](#)).

- Ya está participando en una llamada.
- No hay ningún miembro del grupo de rastreo registrado en su emplazamiento (solo para sistemas multiemplazamiento).

## Escaneo de contestaciones

Si la radio escanea una llamada de la lista de rastreo de grupo seleccionable y pulsa el botón **PTT** durante una llamada escaneada, el funcionamiento de la radio dependerá de si el escaneo de contestaciones estaba habilitado o deshabilitado durante la programación de la radio. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

### Escaneo de contestaciones deshabilitado

La radio abandona la llamada escaneada e intenta transmitir el contacto para la posición de canal seleccionada en ese momento. Cuando finalice el tiempo muerto de llamada al contacto seleccionado actualmente, la radio regresa al canal de inicio y se inicia el temporizador de tiempo muerto de escaneo. La radio reanudará el escaneo de grupo una vez finalice el temporizador de tiempo muerto de escaneo.

### Escaneo de contestaciones habilitado

Si pulsa el botón **PTT** durante el tiempo muerto de grupo de la llamada escaneada, la radio intentará transmitir al grupo escaneado.

#### NOTA:

Si escanea una llamada para un grupo que no está asignado a una posición de canal en la zona que esté seleccionada en ese momento y supera el tiempo muerto de la llamada, tendrá que cambiar a la zona correspondiente y seleccionar a continuación la posición de canal del grupo para poder hablar con ese grupo.

## Edición de la prioridad en un grupo de conversación

La función de monitor prioritario permite a la radio recibir las transmisiones del grupo de conversación con mayor prioridad automáticamente cuando está en otra llamada. Suena un tono cuando la radio cambia a la llamada con mayor prioridad.

Hay dos niveles de prioridad para los grupos de conversación: P1 y P2. P1 tiene mayor prioridad que P2.

#### NOTA:

Si se configura el ID del grupo de revisión de emergencia en el CPS de la tarjeta opcional MOTOTRBO Connect Plus, habrá tres niveles de prioridad para los grupos de conversación: P0, P1 y P2. P0 es el ID del grupo de revisión de emergencia permanente y cuenta con prioridad máxima. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a *Rastrear* y pulse  para seleccionar.

---

- 3 Pulse  o  para ir a *Ver/editar lista* y pulse  para seleccionar.

---

- 4 Pulse  o  para ir al grupo de conversación deseado y pulse  para seleccionar.

---

5 Pulse  o  para ir a **Editar prioridad** y pulse  para seleccionar.

---

6 Pulse  o  para ir al nivel de prioridad que desee y pulse  para seleccionar.

La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla anterior. El icono de prioridad aparecerá a la izquierda del grupo de conversación.

---

## Configuración de contactos

### NOTA:

Puede agregar o editar los ID de suscriptor para los contactos de Connect Plus. La eliminación de los ID de suscriptor solo la puede realizar su distribuidor. Si la función Privacidad está activada en un canal, puede realizar llamadas de voz privadas en ese canal. Únicamente las radios de destino que posean la misma clave de privacidad o bien el mismo valor de clave e ID de clave que su radio podrán descodificar la transmisión.

El acceso a listas de contactos depende de la configuración de zona:

- Si solo tiene una zona configurada en la radio, la lista de contactos muestra directamente la lista de la zona actual seleccionada.
- Si hay varias zonas configuradas en la radio, la carpeta de contactos de zona muestra todas las zonas que tienen el ID de red idéntico a la zona actual seleccionada. El usuario puede acceder a los contactos en estas zonas.

La función Contactos proporciona a la radio una "agenda". Cada entrada corresponde a un alias o ID que utiliza para realizar una llamada.

Cada zona proporciona una lista de contactos con hasta 100 contactos. Están disponibles los siguientes tipos de contactos:

- Llamada privada
- Llamada de grupo
- Llamada multigrupo
- Llamada de voz All call en sitio
- Mensaje de texto All call en sitio
- Llamada de despacho

El tipo de contacto Llamada de despacho se utiliza para enviar un mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.

## Realización de una llamada privada desde Contactos

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos y pulse  para seleccionar.  
Las entradas están ordenadas alfabéticamente.

---

- 3 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.

---

- 4 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED se ilumina en color verde fijo.

---

- 5 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

---

- 6 Suelte el botón **PTT** para escuchar.

Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde y la pantalla mostrará el ID del usuario que transmite.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

Se oye un tono breve. La pantalla muestra Llamada finalizada.

## Realización de una búsqueda de alias de llamada

También puede utilizar la búsqueda de alias o alfanumérica para recuperar el alias de suscriptor que desee.

Esta función solo se puede aplicar si se encuentra en Contactos.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a **Contactos** y pulse  para seleccionar.

Las entradas están ordenadas alfabéticamente.

---

- 3 Introduzca el primer carácter del alias que desee y, a continuación, pulse el botón  o  para localizarlo.
- 

- 4 Sostenga el micrófono a 2,5-5 cm (1-2 pulgadas) de la boca.
- 

- 5 Pulse el botón **PTT** para realizar la llamada. El indicador LED se ilumina en color verde fijo. La pantalla muestra el alias del destino.
- 

- 6 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.
- 

- 7 Suelte el botón **PTT** para escuchar. Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.

Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

La pantalla muestra **Llam. final.**

---

## Adición de un nuevo contacto

- 1 pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a **Contactos** y pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a **Nuevo contacto** y pulse  para seleccionar.
- 

- 4 Utilice el teclado para introducir el número de contacto y pulse  para confirmar.
- 

- 5 Utilice el teclado para introducir el nombre del contacto y pulse  para confirmar.
-

- 6 Al añadir un contacto de radio, pulse  o  hasta el tipo de timbre que desee y pulse  para seleccionar.
- La radio emite un tono indicador positivo y la pantalla muestra `Contacto guardado`.
- 

## Configuración del indicador de llamada

Esta función permite que los usuario de la radio configuren los tono de timbre de llamada y de mensaje de texto.

## Activación y desactivación de Timbres de llamada para Alertas de llamada

Puede seleccionar, activar o desactivar los tonos de timbre para una alerta de llamada recibida.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para acceder a `Utilidades` y pulse  para seleccionar.
- 

- 3 Pulse  o  para acceder a `Configuración de la radio` y pulse  para seleccionar.
- 

- 4 Pulse  o  para acceder a `Tonos/Alertas` y pulse  para seleccionar.
- 

- 5 Pulse  o  para acceder a `Timbres llamd.` y pulse  para seleccionar.
- 

- 6 Pulse  o  para acceder a `Alerta llamd.` y pulse  para seleccionar.
- El tono actual queda indicado por un .
- 

- 7 Pulse  o  para ir al tono deseado y pulse  para seleccionar.

Aparece  junto al tono seleccionado.

---

## Activación y desactivación de timbres de llamada para llamadas privadas

Puede activar o desactivar los tonos de timbre de una llamada privada recibida.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Tonos/Alertas y pulse  para seleccionar.

---

- 5 Pulse  o  para acceder a Timbres llamada y pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Llamada privada y pulse  para seleccionar.

---

- 7 Pulse  para habilitar/deshabilitar los Timbres de llamada privada.

La pantalla muestra  junto a Activado si los Timbres de llamada privada están activados.

 no se muestra cuando los Timbres de llamada privada están desactivados.

---

## Activación y desactivación de timbres de llamada para los mensajes de texto

Puede activar o desactivar los tonos de timbre para un mensaje de texto recibido.

- 1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Tonos/Alertas y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Timbres llamada y pulse  para seleccionar.

---

6 Pulse  o  para ir a Mensajes de texto y pulse  para seleccionar.  
El tono actual queda indicado por un .

---

7 Pulse  o  para ir al tono deseado y pulse  para seleccionar.

Aparece  junto al tono seleccionado.

---

## Selección de un tipo de tono de alerta

### NOTA:

El botón **Tono de alerta** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Puede programar las llamadas de radio para una única llamada de vibración predeterminada. Si el estado Todos tonos está deshabilitado, la radio mostrará el icono de Silencio de Todos tonos. Si el estado Todos tonos está habilitado, se mostrará el tipo de tono de alerta relacionado.

La radio vibra una vez si se trata de un estilo de timbre momentáneo. La radio vibra repetidamente si se trata de un estilo de timbre repetitivo. Cuando se ajuste en Tono y vibración, la radio emitirá un tono de llamada específico si hay una transacción de radio entrante (por ejemplo, Alerta

de llamada o Mensaje). Suena como un tono indicador positivo o una llamada perdida.

## Aumento del volumen del tono de alarma

Puede programar su radio para que le avise continuamente cada vez que una llamada de radio se quede sin responder. Esto se realiza mediante un aumento automático y progresivo del volumen del tono de alarma. Esta función se conoce como Escalart.

## Funciones del registro de llamadas

La radio realiza el seguimiento de todas las llamadas privadas recientes: salientes, respondidas y perdidas. Utilice la función de registro de llamada para visualizar y gestionar las llamadas recientes.

Puede realizar las siguientes tareas en cada una de las listas de llamadas:

- Eliminar
- Ver detalles

## Visualización de llamadas recientes

Las listas son Perdidos, Respondidas y Salientes.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Registro de llamadas y pulse  para seleccionar.

---

- 3 Pulse  o  para ir a la lista que desee y pulse  para seleccionar.

La pantalla muestra la entrada más reciente en la parte superior de la lista.

- 4 Pulse  o  para ver la lista.  
Pulse el botón **PTT** para iniciar una llamada privada con el ID o alias seleccionado actualmente.

## Eliminación de una llamada de la lista de llamadas

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Registro de llamadas y pulse  para seleccionar.

---

3 Pulse  o  para ir a la lista deseada y pulse  para seleccionar.

Si selecciona una lista de llamadas y no contiene entradas, en la pantalla aparece *Lista vacía* y suena un tono bajo si los tonos del teclado están activados.

---

4 Pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.

---

5 Pulse  o  para Eliminar y pulse  para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para seleccionar *Sí* y eliminar la entrada. La pantalla muestra *Entrada eliminada*.
  - Pulse  o  para ir a *No* y pulse el botón  para volver a la pantalla anterior.
- 

## Visualización de detalles desde una lista de llamadas

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Registro de llamadas y pulse  para seleccionar.

---

3 Pulse  o  para ir a la lista deseada y pulse  para seleccionar.

---

4 Pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.

5 Pulse  o  para acceder a Ver detalles y pulse  para seleccionar.

La pantalla muestra los detalles de la lista de llamadas.

## Funcionamiento de las alertas de llamada

Los avisos de alertas de llamada le permiten avisar a un usuario determinado de radio para que vuelva a llamarle cuando pueda.

A esta función se accede a través del menú mediante contactos, marcación manual o un botón de **acceso instantáneo** programado.

## Respuesta a alertas de llamada

Siga el procedimiento para responder a alertas de llamada con la radio.

Cuando se recibe una alerta de llamada:

- Se oye un tono repetitivo.
- El indicador LED parpadea en amarillo.
- La pantalla muestra la lista de notificaciones y aparece una alerta de llamada con el alias o ID de la radio que realiza la llamada.

En función de la configuración de su distribuidor o administrador del sistema, puede responder a una alerta de llamada realizando una de las siguientes opciones:

- Pulse el botón **PTT** para responder con una llamada privada directamente a la persona que llama.
- Pulse el botón **PTT** para continuar la comunicación normal con el grupo de conversación.

La alerta de llamada se mueve a la opción de llamadas perdidas en el menú Registro de llamadas. Puede responder al autor de la

llamada perdida desde el registro de llamadas perdidas.

Consulte [Lista de notificaciones en la página 202](#) y [Funciones del registro de llamadas en la página 137](#) para obtener más información.

## Realización de una alerta de llamada desde la lista de contactos

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos y pulse  para seleccionar.

---

- 3 Siga uno de los pasos que se describe a continuación para seleccionar el alias o ID de suscriptor:
  - seleccione el alias de suscriptor directamente
    - Pulse  o  hasta el alias del suscriptor requerido y pulse  para seleccionar.

[Enviar comentarios](#)

- utilice el menú Marcación manual
  - Pulse  o  para ir a Marcación manual y pulse  para seleccionar.
  - Debe mostrarse la pantalla de introducción de texto de marcado manual. Introduzca el ID del suscriptor y pulse .

- 4 Pulse  o  para acceder a Alerta de llamada y pulse  para seleccionar.

La pantalla muestra Alerta de llamada: <alias o ID del suscriptor>Alerta llamd. y el alias o ID del suscriptor, lo cual indica que la alerta de llamada se ha enviado.

El indicador LED se ilumina en color verde fijo cuando la radio envía la alerta de llamada.

Si se recibe la confirmación de la alerta de llamada, la pantalla muestra Alerta de llamada correcta.

Si no se recibe la confirmación de la alerta de llamada, la pantalla muestra Error alerta de llamada.

## Realización de una alerta de llamada con el botón de acceso de marcación rápida

Pulse el botón de **acceso de marcación rápida** programado para realizar una alerta de llamada a un alias predefinido.

La pantalla muestra `Alerta llamd.` y el alias o ID de suscriptor, lo cual indica que la alerta de llamada se ha enviado.

El indicador LED se ilumina en color verde fijo cuando la radio envía la alerta de llamada.

Si se recibe la confirmación de la alerta de llamada, la pantalla muestra `Alerta llamd. correcta.`

Si se recibe la confirmación de la alerta de llamada, la pantalla muestra `Error alerta llamd..`

## Modo Silenciar

El modo Silenciar ofrece al usuario la opción de silenciar todos los indicadores de audio de la radio.

Cuando se inicia el modo Silenciar, se silencian todos los indicadores de audio de la radio, con excepción de las funciones con mayor prioridad como las operaciones de emergencia.

Cuando se sale del modo Silenciar, la radio vuelve a utilizar tonos y transmisiones de audio.

### NOTA:

Se trata de una función adquirible. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación del modo Silenciar

Siga el procedimiento para activar el modo Silenciar.

Acceda a esta función a través del botón programable **Modo Silenciar**.

Cuando se activa el modo Silenciar ocurre lo siguiente:

- Suena un tono indicador positivo.
- La pantalla muestra `Modo de silenciado activado.`
- La luz LED roja empieza a parpadear y sigue haciéndolo hasta que se sale del modo Silenciar.

- Se muestra el icono del **Modo Silenciar** en la pantalla de inicio.
- La radio está silenciada.
- El temporizador del modo Silenciar comienza la cuenta atrás que tiene configurada.

## Configuración del temporizador del modo Silenciar

Es posible activar la función modo Silenciar durante un periodo preconfigurado de tiempo mediante la configuración del temporizador del modo Silenciar. La duración del temporizador se configura en el menú de la radio y puede variar de 30 minutos a 6 horas. Cuando el temporizador expira, se sale del modo Silenciar.

Si el temporizador se queda en 0, la radio se queda en el modo Silenciar durante un periodo de tiempo indefinido hasta que se pulsa el botón programado **Modo Silenciar**.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

[Enviar comentarios](#)

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Temp. silenc.. Pulse  para seleccionar.

---

- 5 Pulse  o  para editar el valor numérico de cada dígito y pulse .

## Salida del modo Silenciar

Se puede salir de esta función automáticamente cuando expira el temporizador del modo Silenciar.

Lleve a cabo una de las siguientes operaciones para salir del modo Silenciar manualmente:

- Pulse el botón programado **Modo Silenciar**.
- Pulse el botón **PTT** en cualquier entrada.

Cuando se desactiva el modo Silenciar ocurre lo siguiente:

- Suena el tono indicador negativo.

- La pantalla muestra el Modo de silenciado apagado.
- El LED que parpadea en rojo se apaga.
- El icono del **modo Silenciar** desaparece de la pantalla de inicio.
- La radio desactiva el silencio y se restaura el estado del altavoz.
- Si el temporizador del modo Silenciar no ha expirado, se detiene.

### NOTA:

También se sale del modo Silenciar si el usuario transmite voz o cambia a un canal sin programar.

## Funcionamiento de emergencia

### NOTA:

Si la radio se programa para iniciar una emergencia de tipo "Silencio" o "Silencio con voz", en la mayoría de los casos sale automáticamente del funcionamiento silencioso una vez concluida la llamada de emergencia o alerta de emergencia. Una excepción a esta regla se presenta cuando se configura "Alerta emerg." como modo de emergencia y "Silencio" como tipo de emergencia. Si la radio se programa de este modo, el funcionamiento silencioso continúa hasta que se cancela mediante la pulsación del botón **PTT** o del botón que se haya configurado para desactivar la emergencia.

En el modo Repliegue auto de Connect Plus, no se admiten las llamadas de voz de emergencia ni la alertas de emergencia. Si desea obtener información adicional, consulte [Repliegue auto en la página 264](#).

Una llamada de emergencia se utiliza para indicar una situación crítica. Se pueden iniciar en cualquier momento y desde cualquier pantalla, incluso si hay actividad en el canal actual. La pulsación del botón de **Emergencia** inicia el modo de emergencia programado. Dicho modo de

emergencia programado también se puede iniciar con la activación de la función opcional de hombre caído. La función de emergencia se puede desactivar en la radio.

Su distribuidor puede establecer la duración de la pulsación del botón **Emergencia** programado, excepto para la presión prolongada, que es similar a la del resto de botones:

#### **Pulsación corta**

Entre 0,05 y 0,75 segundos.

#### **Pulsación larga**

Entre 1,00 y 3,75 segundos.

El botón **Emergencia** se asigna junto con la función Emergencia activada/desactivada. Póngase en contacto con su distribuidor para obtener información acerca del funcionamiento asignado al botón **Emergencia**.

- Si la pulsación corta del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación larga del botón **Emergencia** se asignará a la salida del modo de emergencia.
- Si la pulsación larga del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación corta del botón **Emergencia** se asignará a la salida del modo de emergencia.

Cuando se selecciona la radio para una zona de Connect Plus, da soporte a tres modos de emergencia:

#### **Llamada de emergencia**

Será necesario pulsar el botón **PTT** para hablar en el timeslot de emergencia asignado.

#### **Llamada de emergencia con transmisión de voz posterior**

Para la primera transmisión en la ranura de tiempo de emergencia asignada, el micrófono se activa automáticamente y se puede hablar sin pulsar el botón **PTT**. El micrófono permanece activo así durante el periodo de tiempo que se ha programado en la radio. En las transmisiones siguientes de la misma llamada de emergencia será necesario pulsar el botón **PTT**.

#### **Alerta de emergencia**

Una alerta de emergencia no es una llamada de voz. Se trata de una notificación de emergencia que se envía a las radios que están configuradas para recibir estas alertas. La radio envía una alerta de emergencia a través del canal de control del emplazamiento en que esté registrada en ese momento. Las radios de la red de Connect Plus que estén programadas a tal fin recibirán la alerta de emergencia (con independencia del emplazamiento de red en que estén registradas).

Solo se puede asignar uno de los modos de emergencia al botón de emergencia por zona. Además, cada modo de emergencia presenta los siguientes tipos:

### **Normal**

La radio transmite una señal de alarma y utiliza un indicador visual o sonoro.

### **Silencio**

La radio transmite una señal de alarma sin utilizar ningún indicador sonoro ni visual. La radio suprime todo sonido o indicación visual de la emergencia hasta que se pulse el botón **PTT** para comenzar a transmitir voz.

### **Silencio con voz**

Tiene el mismo funcionamiento que el modo Silencio, excepto en que la radio activa algunas transmisiones de voz.

## **Recepción de una emergencia entrante**

La radio se puede programar para que emita un tono de alerta y también muestre información sobre la emergencia entrante. Si así se ha programado, al recibir la emergencia entrante, la pantalla muestra la pantalla de detalles de la emergencia, con el icono de emergencia, el alias o ID de la radio que ha solicitado la emergencia, el contacto de grupo que se usa para la emergencia y una línea de información

adicional. La información adicional es el nombre de la zona que contiene el contacto de grupo.

En la actualidad, la radio solo muestra las emergencias descodificadas más recientes. Si se recibe una nueva emergencia antes de borrar la anterior, los detalles de la nueva emergencia sustituyen a los de la emergencia anterior.

En función de la programación de la radio, la pantalla de detalles de emergencia (o pantalla de lista de alarmas) permanecerá en la pantalla de la radio incluso después de finalizada la emergencia. Puede guardar los detalles de la emergencia en la lista de alarmas o puede borrarlos según se describe en las siguientes secciones.

## Almacenamiento de los detalles de emergencia en la lista de alarmas

Guardar los detalles de emergencia en la lista de alarmas le permite ver nuevamente los detalles más adelante seleccionando la lista de alarmas en el menú principal.

- 1 Mientras se muestra la pantalla de detalles de emergencia (o la lista de alarmas), pulse  . Aparece la pantalla de **salida de la lista de alarmas**.

- 2 Realice una de las siguientes acciones:
  - Seleccione **Sí** y pulse  para guardar los detalles de emergencia en la lista de alarmas y para salir de la pantalla de detalles de emergencia (o lista de alarmas).
  - Seleccione **No** y pulse  para volver a la pantalla de detalles de emergencia (o lista de alarmas).

## Eliminación de Detalles de emergencia

- 1 Mientras se muestra la pantalla de detalles de emergencia, pulse  . Se muestra la pantalla **Borrar**.
- 
- 2 Realice una de las siguientes acciones:
    - Seleccione **Sí** y pulse  para borrar los detalles de emergencia.
    - Seleccione **No** y pulse  para volver a la pantalla de detalles de emergencia.

## Respuesta a una llamada de emergencia

### NOTA:

Si no responde a la llamada de emergencia dentro del tiempo de colgado de llamada de emergencia, esta finalizará. Si desea hablar con el grupo después de que se haya superado el tiempo de colgado de llamada de emergencia, debe seleccionar primero la posición del canal asignada al grupo (si no está ya seleccionada). A continuación, pulse **PTT** para iniciar una llamada de no emergencia al grupo.

- 1 Al recibir una llamada de emergencia, pulse cualquier botón para detener todas las indicaciones de llamada de emergencia recibidas.

- 2 Pulse el botón **PTT** para iniciar una transmisión de voz en el grupo de emergencia.

Todas las radios que supervisen este grupo escucharán su transmisión.

- 3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

El indicador LED verde se iluminará.

- 4 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde, el indicador LED parpadea en verde. Se muestra en la pantalla el icono de llamada a grupo, el ID de grupo y el ID de la radio transmisora.

## Respuesta a una alerta de emergencia

### NOTA:

El contacto de grupo que se usa para la alerta de emergencia no debe usarse para la comunicación de voz. Esto podría evitar que otras radios envíen y reciban alertas de emergencia en el mismo grupo.

Una alerta de emergencia desde un radio indica que el usuario se encuentra en una situación de urgencia. Para responder a la alerta, inicie una llamada privada a la radio que ha declarado la emergencia, inicie una llamada de grupo al grupo de conversación designado, envíe una alerta de llamada a la radio, inicie una solicitud de monitorización remota de esa radio, etc. La respuesta

adecuada la determinará su organización y la situación concreta.

## Ignorar llamada de emergencia de retorno

Esta función mejorada proporciona una opción para que la radio ignore una llamada de emergencia de retorno activa.

Para activar Omitir llamada de emergencia de retorno, la radio debe configurarse en el software de programación del cliente Connect Plus (CPCPS).

Cuando la función está activada, la radio no muestra las indicaciones de llamada de emergencia y no recibe el audio del ID del grupo de reversión de emergencia predeterminado.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Inicio de una llamada de emergencia

### NOTA:

Si la radio se establece en Silencio, no ofrecerá ningún sonido o indicador visual durante el modo de emergencia hasta que se pulse el botón **PTT** para iniciar una transmisión de voz.

Si la radio se establece en Silencio con voz, inicialmente no emite ningún sonido o indicador visual de estar en el modo de emergencia. Sin embargo, la radio se activa para las transmisiones de las radios que respondan a la emergencia. Los indicadores de emergencia solo aparecen después de pulsar el botón **PTT** para iniciar una transmisión de voz desde la radio.

En los modos "Silencio" y "Silencio con voz", la radio sale automáticamente del funcionamiento silencioso cuando termina la llamada de emergencia.

- 1 Pulse el botón programado de **Emergencia**.
- 2 Pulse el botón **PTT** para iniciar una transmisión de voz en el grupo de emergencia.

Cuando suelte el botón **PTT**, la llamada de emergencia continuará durante el periodo

establecido como Tiempo de colgado de llamada de emergencia.

Si pulsa el botón **PTT** durante este tiempo, la llamada de emergencia proseguirá.

---

### Inicio de una llamada de emergencia con transmisión de voz posterior

La radio se debe programar para este tipo de funcionamiento.

Cuando tiene habilitada esta operación, si se pulsa el botón programado de **Emergencia** y la radio recibe la asignación de timeslot, el micrófono se activa automáticamente sin pulsar el botón **PTT**. El estado de micrófono activado también se conoce como "micrófono activo". El micrófono activo funciona con la primera transmisión de la radio durante la llamada de emergencia. En las transmisiones siguientes de la misma llamada de emergencia será necesario pulsar el botón **PTT**.

- 1 Pulse el botón programado de **Emergencia**.
- 

- 2 El micrófono permanece activo como micrófono activo durante el tiempo que especifique la programación del Codeplug de la radio.

Mientras tanto, el LED se iluminará en verde.

---

- 3 Mantenga pulsado el botón **PTT** para hablar durante más tiempo del programado.
- 

### Inicio de una alerta de emergencia

#### NOTA:

Si la radio se programa para "Silencio" o "Silencio con voz", no proporcionará ningún sonido o indicación visual de que envía una alerta de emergencia. Si se programa para "Silencio", el funcionamiento silencioso continuará indefinidamente hasta que se pulse el botón PTT o el botón programado de "Emergencia desactivada". Si se programa para "Silencio con voz", la radio cancelará automáticamente el funcionamiento silencioso cuando el controlador de emplazamiento difunda la alerta de emergencia.

Pulse el botón naranja de **Emergencia**.

Al transmitir la alerta de emergencia al controlador del emplazamiento, la pantalla de la radio muestra el icono de Emergencia, el contacto de grupo utilizado para la alerta de emergencia y la Alarma de transmisión.

---

Cuando la alerta de emergencia se haya enviado correctamente y se esté emitiendo para que la escuchen otros radios, se reproducirá un tono indicador positivo y en la pantalla de la radio aparecerá *Alarma enviada*. Si la alerta de emergencia no se envía correctamente, se reproducirá un tono indicador negativo y en la pantalla de la radio aparecerá *Error alarma*.

## Salida del modo de emergencia

### NOTA:

Si la llamada de emergencia finaliza por expiración del tiempo de colgado de llamada de emergencia, pero la condición de emergencia sigue presente, pulse nuevamente el botón de **Emergencia** para reiniciar el proceso.

Si inicia una alerta de emergencia presionando el botón **Emergencia** programado, la radio sale automáticamente

del modo de emergencia tras recibir una respuesta del sistema Connect Plus.

Después de iniciar una llamada de emergencia mediante la pulsación del botón **Emergencia** programado, se asigna automáticamente un canal a la radio en cuanto queda disponible. Una vez transmitido el mensaje que indica la emergencia, no se puede cancelar la llamada de emergencia. No obstante, si el botón se ha pulsado accidentalmente o la emergencia ya ha pasado, puede que quiera comunicarlo por el canal asignado. Cuando suelte el botón **PTT**, la llamada de emergencia se cancela una vez expira el tiempo de colgado de llamada de emergencia.

Si la radio se ha configurado para emergencia con transmisión de voz posterior, utilice el tiempo asignado al micrófono de emergencia para explicar el error y, a continuación, pulse y suelte el botón **PTT** para interrumpir la transmisión. La llamada de emergencia se interrumpe cuando se agota el tiempo de colgado de llamada de emergencia.

## Mensajes de texto

La radio puede recibir datos como, por ejemplo, un mensaje de texto, de otra radio o una aplicación de mensajes de texto.

Existen dos tipos de mensajes de texto: mensajes de texto y mensajes de texto breves DMR (Radio móvil digital). La longitud máxima de un mensaje de texto breve DMR es de 23 caracteres. La longitud máxima de un mensaje de texto es de 280 caracteres, incluida la línea de asunto. La línea de asunto solo aparece al recibir mensajes desde las aplicaciones de correo electrónico.

#### NOTA:

La longitud máxima de caracteres se aplica solo a los modelos con la última versión de software y hardware. Para modelos de radio con software y hardware más antiguo, la longitud máxima de un mensaje de texto es de 140 caracteres. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Para el árabe, la orientación de la entrada de texto es de derecha a izquierda.

## Envío de mensajes de texto rápidos

La radio admite un máximo de 10 mensajes de texto rápidos, que es la configuración programada por el distribuidor.

Mientras se predefinen los mensajes de texto rápido, puede editar cada mensaje antes de enviarlo.

Si está enviando el mensaje, realice las siguientes acciones para seleccionar un destinatario:

- Pulse  o  hasta llegar al alias que desee y pulse  para seleccionar.
- Pulse  o  para ir a `Marcación manual` y pulse  para seleccionar. La primera línea de la pantalla muestra `Núm. :`. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el ID o alias del suscriptor y pulse .

La pantalla mostrará `Enviando mensaje` para confirmar que se está enviando el mensaje.

Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá `Mensaje enviado`.

Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará `Envío de mensaje fallido`.

Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción **Reenviar** (consulte [Gestión de mensajes de texto que no se han podido enviar en la página 302](#)).

Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción **Volver a enviar** (consulte [Gestión de mensajes de texto que no se han podido enviar en la página 302](#)).

---

## Envío de un mensaje de texto rápido con el botón de acceso de marcación rápida

Puede enviar mensajes de texto rápidos mediante el botón programable programado por el distribuidor.

Pulse el botón de **acceso de marcación rápida** programado para enviar un mensaje de texto rápido predefinido a un alias predefinido.

La pantalla mostrará **Enviando mensaje para confirmar** que se está enviando el mensaje.

---

Si el mensaje se envía, se reproducirá un tono y en la pantalla aparecerá **Mensaje enviado**.

Si el mensaje no se puede enviar, se reproducirá un tono bajo y en la pantalla aparecerá **Envío de mensaje fallido**.

[Enviar comentarios](#)

## Acceso a la carpeta Borrador

La carpeta Borrador almacena los diez (10) últimos mensajes guardados como máximo. Cuando la carpeta está llena, el siguiente mensaje de texto que se guarde sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

### NOTA:

Puede editar un mensaje de texto guardado antes de enviarlo. Solo está disponible para un micrófono con teclado (consulte [Edición y envío de mensajes de texto guardados en la página 300](#). mantenga

pulsado , en cualquier momento, para volver a la pantalla de inicio.

## Visualización de mensajes de texto guardados

- 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt programado</b> .
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

2 Pulse  o  para Borradores y pulse  para seleccionar.

3 Pulse  o  para ir al mensaje deseado y pulse  para seleccionar.

## Edición y envío de mensajes de texto guardados

1 Vuelva a pulsar  mientras visualiza el mensaje.

2 Pulse  o  para acceder a Editar y pulse  para seleccionar.  
Aparece un cursor intermitente.

3 Utilice el teclado para escribir el mensaje.

Pulse  para desplazarse un espacio hacia la izquierda. Pulse  o la tecla  para desplazarse un espacio hacia la derecha. Pulse la tecla  para borrar cualquier carácter no deseado.

Mantenga pulsado  para cambiar el método de introducción de texto.

4 Pulse  cuando termine de redactar el mensaje.

5 Seleccione el destinatario del mensaje mediante:

[Enviar comentarios](#)

- Pulse  o  hasta llegar al alias que desee y pulse  para seleccionar.
- Pulse  o  para ir a Marcación manual y pulse  para seleccionar. La primera línea de la pantalla muestra Núm. : . La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el ID o alias del suscriptor y pulse .

La pantalla mostrará Enviando mensaje para confirmar que se está enviando el mensaje.

Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá Mensaje enviado.

Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará Envío de mensaje fallido.

Si no se puede enviar el mensaje de texto, se moverá a la carpeta de elementos enviados y se marcará con un icono de error de envío.

## Eliminación de un mensaje de texto guardado desde la carpeta Borrador

- 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt programado</b> .
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

- 2 Pulse  o  para Borradores y pulse  para seleccionar.
- 3 Pulse  o  para ir al mensaje deseado y pulse  para seleccionar.

- 4 Pulse  o  para ir a Eliminar y pulse  para eliminar el mensaje de texto.
- 

## Gestión de mensajes de texto que no se han podido enviar

Puede seleccionar una de las siguientes opciones mientras se encuentra en la pantalla de la opción Volver a enviar:

- Volver a enviar
- Adelante
- Editar

## Reenvío de mensajes de texto

Pulse  para volver a enviar el mismo mensaje al mismo alias o ID de grupo/suscriptor.

Si el mensaje se ha enviado correctamente, suena un tono y la pantalla muestra un aviso pequeño positivo.

Si no se puede enviar el mensaje, la pantalla mostrará un aviso pequeño negativo.

---

## Transferencia de mensajes de texto

Seleccione Transferir para remitir el mensaje a otro ID o alias de suscriptor/grupo.

- 1 Pulse  o  para acceder a Reenviar y pulse  para seleccionar.
  - 2 Para seleccionar el destinatario del mensaje, pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.
- 

La pantalla mostrará Enviando mensaje para confirmar que se está enviando el mensaje.

Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá Mensaje enviado.

Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará Envío de mensaje fallido.

## Gestión de mensajes de texto enviados

Cuando se envía un mensaje a otra radio, este se guarda en Enviados. El último mensaje de texto enviado se añade al principio de la lista de Enviados.

La carpeta Enviados es capaz de almacenar los 30 últimos mensajes enviados como máximo. Cuando esté llena, el siguiente mensaje de texto que se envíe sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

### NOTA:

mantenga pulsado  , en cualquier momento, para volver a la pantalla de inicio.

## Visualización de mensajes de texto enviados

- 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt</b> programado.
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

- 2 Pulse  o  para ir a Elementos enviados y pulse  para seleccionar.
- 3 Pulse  o  para ir al mensaje requerido y pulse  para seleccionar.

El icono situado en la esquina superior derecha de la pantalla indica el estado del mensaje (consulte [Iconos de Enviados en la página 242](#)).

## Envío de un mensaje de texto enviado

Puede seleccionar una de las siguientes opciones mientras visualiza un mensaje de texto enviado:

- Reenviar
- Adelante
- Editar
- Eliminar

**1** Vuelva a pulsar  mientras visualiza el mensaje.

**2**  o  para ir a una de las siguientes funciones y pulse  para seleccionar.

Opción	Pasos
Adelante	Seleccione Transferir para enviar el mensaje de texto seleccionado a otro alias o ID de grupo/suscriptor

Opción	Pasos
	(consulte <a href="#">Transferencia de mensajes de texto en la página 302</a> ).
Eliminar	Seleccione Borrar para borrar el mensaje de texto.
Reenviar	<p>Seleccione Reenviar para reenviar el mensaje de texto seleccionado al mismo ID o alias de grupo/suscriptor.</p> <p>En la pantalla aparecerá Enviando mensaje para confirmar que se está enviando el mismo mensaje a la misma radio de destino.</p> <p>Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá Mensaje enviado.</p> <p>Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará Envío de mensaje fallido.</p>

Opción	Pasos
	<p>Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción Reenviar.</p> <p>Pulse  para volver a enviar el mensaje al mismo alias o ID de grupo/suscriptor.</p>

Si sale de la pantalla de envío de mensajes mientras se envía el mensaje, la radio actualiza el estado del mensaje en la carpeta Enviados sin realizar ninguna indicación visual ni de audio.

Si la radio cambia de modo o se apaga antes de que se actualice el estado del mensaje en la carpeta Enviados, la radio no puede terminar de enviar los mensajes en curso y los marca automáticamente con un icono de **error de envío**.

La radio admite un máximo de cinco mensajes en curso al mismo tiempo. En este tiempo, la radio no puede enviar mensajes nuevos y los marca automáticamente con un icono de **error de envío**.

## Eliminación de todos los mensajes de texto enviados de la carpeta Enviados

### 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt</b> programado.
<b>Menú</b>	<p><b>a</b> Pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

### 2 Pulse o para ir a Elementos enviados y pulse para seleccionar.

Si selecciona Enviados y no contiene ningún mensaje de texto, en la pantalla aparece Lista

vacía y suena un tono bajo si los tonos de teclas están activados.

---

3 Pulse  o  para ir a Eliminar todo y pulse  para seleccionar.

---

4 Seleccione una de las siguientes.

- Pulse  o  para ir a Sí y pulse  para seleccionar. La pantalla muestra un aviso pequeño positivo.
- Pulse  o  para ir a No y pulse  para volver a la pantalla anterior.

## Recepción de mensajes de texto

Cuando la radio recibe un mensaje, la pantalla muestra la lista de notificaciones con el alias o ID del remitente y el icono de mensaje.

Puede seleccionar una de las siguientes opciones cuando reciba un mensaje de texto:

- Leer

- Leer luego
- Eliminar

## Lectura de mensajes de texto

1 Pulse  o  para ir a ¿Desea leer? y pulse  para seleccionar.

Se abre el mensaje seleccionado en el buzón.

---

2 Lleve a cabo una de las siguientes acciones:

- Pulse  para volver a la bandeja de entrada.
- Pulse  por segunda vez para responder, reenviar o eliminar el mensaje de texto.

## Gestión de mensajes de texto recibidos

Utilice el buzón para gestionar sus mensajes de texto. El buzón puede almacenar un máximo de 30 mensajes.

Los mensajes de texto del buzón se ordenan por antigüedad.

La radio admite las siguientes opciones para los mensajes de texto:

- Responder (mediante mensajes de texto rápidos)
- Adelante
- Eliminar
- Eliminar todo

**NOTA:**

Si el tipo de canal no coincide, solo podrá transferir, borrar o borrar todos los mensajes recibidos.

mantenga pulsado , en cualquier momento, para volver a la pantalla de inicio.

## Visualización de mensajes de texto desde el buzón

- 1 pulse  para acceder al menú.
- 2 Pulse  o  para Mensajes y pulse  para seleccionar.

- 3 Pulse  o  para Bandeja de entrada y pulse  para seleccionar.

- 4 Pulse  o  para ver los mensajes.

- 5 Lleve a cabo una de las siguientes acciones:

- Pulse  para seleccionar el mensaje actual y pulse  de nuevo para responder, transferir o borrar el mensaje.
- Pulse de forma prolongada  para volver a la pantalla de inicio.

## Respuesta a los mensajes de texto desde el buzón

- 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt</b> programado.
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

2 Pulse  o  para Bandeja de entrada y pulse  para seleccionar.

3 Pulse  o  para ir al mensaje deseado y pulse  para seleccionar.

4 Pulse  una vez más para acceder al submenú.

5 Utilice el teclado para escribir/editar el mensaje.

6 Pulse  cuando termine de redactar el mensaje.

La pantalla mostrará `Enviando mensaje` para confirmar que se está enviando el mensaje.

Si el mensaje se envía correctamente, se reproducirá un tono y en la pantalla aparecerá `Mensaje enviado`.

Si el mensaje no se puede enviar, se reproducirá un tono grave y la pantalla mostrará `Envío de mensaje fallido`.

Si no se ha podido enviar el mensaje, la radio regresa a la pantalla de la opción `Reenviar` (consulte [Gestión de mensajes de texto que no se han podido enviar en la página 302](#)).

## Eliminación de mensajes de texto desde el buzón

- 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt programado</b> .
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

- 2 Pulse  o  para Bandeja de entrada y pulse  para seleccionar.

- 3 Pulse  o  para ir al mensaje deseado y pulse  para seleccionar.

- 4 Pulse  una vez más para acceder al submenú.

- 5 Pulse  o  para Eliminar y pulse  para seleccionar.

- 6 Pulse  o  para ir a Sí y pulse  para seleccionar.

La pantalla muestra Mensaje eliminado y la pantalla vuelve al Buzón.

## Eliminación de todos los mensajes de texto desde el buzón

- 1 Acceder a la función **Mensaje de texto**.

Controles de la radio	Pasos
<b>Botón Mensaje txt. programado</b>	Pulse el botón <b>Mensaje txt</b> programado.
<b>Menú</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para Mensajes y pulse  para seleccionar.</p>

- 2 Pulse  o  para Bandeja de entrada y pulse  para seleccionar.

Si selecciona Bandeja de entrada y no contiene ningún mensaje de texto, en la pantalla aparece Lista vacía y suena un tono bajo si los tonos de teclas están activados (consulte [Encendido y apagado de los tonos del teclado en la página 212](#)).

- 3 Pulse  o  para ir a Eliminar todo y pulse  para seleccionar.

- 4 Pulse  o  para ir a Sí y pulse  para seleccionar.

En la pantalla aparecerá Buzón vacío.

## Privacidad

Si está habilitada, esta función ayuda a evitar que los usuarios no autorizados escuchen conversaciones en un canal mediante el uso de una solución de cifrado basada en software. Las partes de señalización e identificación de usuario de una transmisión no se mezclan.

La radio debe tener la privacidad activada en la posición del selector de canales actual para enviar una transmisión con la privacidad activada, aunque no es un requisito necesario para recibir una transmisión. Mientras se encuentra en una posición del selector de canales con la privacidad activada, la radio puede recibir transmisiones claras (descodificadas).

La radio es compatible con la privacidad mejorada.

Para decodificar una transmisión de datos que tiene la privacidad activada, la radio debe estar programada para tener el mismo valor de clave e ID de clave (para la privacidad mejorada) que la radio que transmite.

Si la radio recibe una llamada codificada que tenga un valor de clave e ID de clave distintos, no oirá nada en absoluto (privacidad mejorada).

Si la radio tiene un tipo de privacidad asignado, la pantalla inicial muestra el icono de seguridad activada o el de seguridad desactivada, excepto cuando la radio envíe o reciba una llamada o alarma de emergencia.

El indicador LED se ilumina en color verde fijo mientras la radio transmite y parpadea rápidamente cuando recibe una transmisión con la función de privacidad habilitada.

Puede acceder a esta función mediante alguna de las acciones siguientes:

- Pulse el botón programable **Privacidad** para activar o desactivar esta función.
- El uso del menú de la radio, como se describe en los pasos que aparecen a continuación.

#### NOTA:

Puede que algunos modelos de radio no ofrezcan esta función de privacidad. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Configuración de la radio o  o  para ir a Connect Plus y pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Privacidad mejorada.

Si la pantalla muestra Encender, pulse  para activar la privacidad. La radio muestra un mensaje para confirmar la selección.

Si la pantalla muestra **Apagar**, pulse  para desactivar la privacidad. La radio muestra un mensaje para confirmar la selección.

Si la radio tiene un tipo de privacidad asignado, aparecen el icono de seguridad activada o el de seguridad desactivada en la barra de estado, excepto cuando la radio envíe o reciba una alerta de emergencia.

---

## Realización de una llamada con la privacidad (codificación) activada

Active la privacidad con el botón de privacidad programado o mediante el menú. La radio debe tener la función Privacidad habilitada para la posición de canal seleccionada en ese momento para que pueda enviar transmisiones con la privacidad activada. Si la posición de canal seleccionada en el momento tiene activada la privacidad, todas las transmisiones de voz que realice la radio estarán codificadas. Esto incluye la llamada de grupo, la llamada multigrupo, la respuesta a las llamadas escaneadas, la llamada a todos en sitio, la llamada de emergencia y la llamada privada. Solo las radios que

dispongan del mismo valor de clave e ID de clave podrán descifrar la transmisión.

## Seguridad

Puede habilitar o deshabilitar cualquier radio del sistema. Por ejemplo, puede que quiera deshabilitar una radio robada para evitar que el ladrón la utilice y luego activarla cuando la recupere.

### NOTA:

las funciones Deshabilitar radio y Habilitar radio están restringidas a las radios que tengan activadas estas funciones. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Desactivación de la radio

- 1 Para acceder a esta función lleve a cabo alguna de las acciones siguientes:

Controles de la radio	Pasos
<b>Botón Desactivación radio</b>	<p><b>a</b> Pulse el botón <b>Desactivación radio</b> programado.</p> <p><b>b</b> Pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.</p>
<b>Menú de la radio</b>	<p><b>a</b> pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para ir a <b>Contactos</b> y pulse  para seleccionar. Las entradas están ordenadas alfabéticamente.</p> <p><b>c</b> Siga uno de los pasos que se describe a continuación para seleccionar el alias o ID de suscriptor:</p>

Controles de la radio	Pasos
	<ul style="list-style-type: none"> <li>• Seleccione el alias o ID que desee directamente.</li> <li>• Pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.</li> <li>• Utilice el menú <b>Marcación manual</b>. <ul style="list-style-type: none"> <li>• Pulse  o  para ir a <b>Marcación manual</b> y pulse  para seleccionar.</li> <li>• Pulse  o  para acceder a <b>Número de</b></li> </ul> </li> </ul>

Controles de la radio	Pasos
	<p>radio y pulse  para seleccionar.</p> <ul style="list-style-type: none"> <li>La primera línea de la pantalla muestra Número de radio:. La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para introducir el alias de suscriptor o ID y pulse  .</li> </ul> <p>d Pulse  o  para acceder a Desactivación radio y pulse  para seleccionar.</p>

La pantalla muestra Desactivación radio: <<ID o alias de destino> y el indicador LED parpadea en verde.

## 2 Espere la confirmación.

Si se realiza correctamente, se reproducirá un tono y la pantalla mostrará Desh. radio correcto.

Si hay algún problema, se emitirá un tono grave y en la pantalla aparecerá Error desh. radio.

## Habilitar radio

### 1 Para acceder a esta función lleve a cabo alguna de las acciones siguientes:

Controles de la radio	Pasos
<p><b>Botón Habilitar radio</b></p>	<p>a Pulse el botón <b>Habilitar radio</b> programado.</p> <p>b Pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.</p>

Controles de la radio	Pasos
<b>Menú de la radio</b>	<p><b>a</b> Pulse  para acceder al menú.</p> <p><b>b</b> Pulse  o  para ir a <b>Contactos</b> y pulse  para seleccionar. Las entradas están ordenadas alfabéticamente.</p> <p><b>c</b> Siga uno de los pasos que se describe a continuación para seleccionar el alias o ID de suscriptor</p> <ul style="list-style-type: none"> <li>• Seleccione el alias o ID que desee directamente.</li> <li>• Pulse  o  hasta llegar al alias o ID que desee y pulse  para seleccionar.</li> </ul>

Controles de la radio	Pasos
	<ul style="list-style-type: none"> <li>• Utilice el menú <b>Marcación manual</b>.</li> <li>• Pulse  o  para ir a <b>Marcación manual</b> y pulse  para seleccionar.</li> <li>• Pulse  o  para acceder a <b>Número de radio</b> y pulse  para seleccionar.</li> <li>• La primera línea de la pantalla muestra <b>Número de radio</b>:. La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para</li> </ul>

Controles de la radio	Pasos
	<p>introducir el alias de suscriptor o ID y pulse  .</p> <p><b>d</b> Pulse  o  para acceder a <code>Activar radio</code> y pulse  para seleccionar.</p>

La pantalla muestra `Activar radio: <<ID o alias de suscriptor>` y el indicador LED se ilumina en verde fijo.

## 2 Espere la confirmación.

Si se realiza correctamente, suena un tono indicador positivo y la pantalla muestra `Habilitar radio correcto`.

Si hay algún problema, suena un tono indicador negativo y en la pantalla aparecerá `Error habilitar radio`.

## Funcionamiento de Bluetooth

### NOTA:

Si se desactiva a través de CPS, se deshabilitarán todas las funciones relacionadas con Bluetooth y se eliminará la base de datos del dispositivo Bluetooth.

Esta función permite utilizar la radio con un dispositivo habilitado para Bluetooth (accesorio) mediante una conexión Bluetooth. La radio soporta dispositivos activados para Bluetooth de Motorola Solutions y disponibles en el mercado (COTS).

La conexión Bluetooth funciona dentro de un rango de 10 metros (32 pies) de la línea de visión. Esta es una línea sin obstáculos entre la radio y el dispositivo habilitado para Bluetooth.

No es aconsejable dejar la radio lejos y esperar que el dispositivo habilitado para Bluetooth funcione con un alto grado de fiabilidad cuando están separados.

En las zonas periféricas de recepción, la calidad tanto del tono como de la voz comenzará a sonar "distorsionada" o "entrecortada". Para corregir este problema, basta con acercarse más a la radio y el dispositivo habilitado para Bluetooth entre sí (dentro del alcance definido de 10 metros/32 pies) para volver a recibir el audio con claridad. La función Bluetooth de la radio cuenta con una potencia

máxima de 2,5 mW (4 dBm) en el alcance de 10 metros (32 pies).

La radio puede soportar hasta 4 conexiones Bluetooth simultáneas con dispositivos con Bluetooth de distinto tipo. Por ejemplo, unos auriculares y un dispositivo de PTT solo (POD). Las múltiples conexiones con dispositivos habilitados para Bluetooth del mismo tipo no están soportadas.

Consulte el manual de usuario del dispositivo activado para Bluetooth correspondiente para obtener más información sobre todas sus capacidades.

## Encendido y apagado de la función Bluetooth

1 pulse  para acceder al menú.

---

2 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Mi estado y pulse  para seleccionar.

La pantalla muestra Activado y Desactivado. El estado actual se indica mediante .

---

4 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Activado y pulse  para seleccionar. La pantalla muestra Activado y aparece  a la izquierda del estado seleccionado.
  - Pulse  o  para ir a Desactivado y pulse  para seleccionar. La pantalla muestra Desactivado y aparece  a la izquierda del estado seleccionado.
-

## Búsqueda y conexión con un dispositivo Bluetooth

No apague el dispositivo habilitado para Bluetooth ni pulse

 durante las operaciones de búsqueda y conexión, ya que la operación se cancelaría.

- 1 Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento. Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

- 2 En la radio, pulse  para acceder al menú.

- 3 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

- 4 Pulse  o  para ir a Dispositivos y pulse  para seleccionar.

- 5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir al dispositivo deseado y pulse  para seleccionar.
- Pulse  o  para ir a *Buscar dispositivos* y encontrar los dispositivos disponibles. Pulse  o  para ir al dispositivo deseado y pulse  para seleccionar.

- 6 Pulse  o  para *Conectar* y pulse  para seleccionar.

La pantalla muestra *Conectando a <nombre dis>*. Su dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete el acoplamiento. Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

Si se realiza correctamente, la pantalla de la radio muestra *<dispositivo> conectado*. Suena un tono y aparece  junto al dispositivo conectado. El icono de Bluetooth conectado aparece en la barra de estado.

Si no se realizó correctamente, la pantalla de radio mostrará Error conexión.

## Búsqueda y conexión desde un dispositivo Bluetooth (modo visible)

No desactive el Bluetooth ni apague la radio durante la búsqueda y conexión, ya que podría cancelar la operación.

- 1 Active Bluetooth.

Consulte [Encendido y apagado de la función Bluetooth en la página 317](#).

- 2 pulse  para acceder al menú.

- 3 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

- 4 Pulse  o  para Encontrarme y pulse  para seleccionar.

Otros dispositivos habilitados para Bluetooth pueden detectar ahora la radio durante un tiempo programado. Esto se denomina modo visible.

- 5 Encienda el dispositivo habilitado para Bluetooth y acóplelo con la radio.

Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

## Desconexión de un dispositivo Bluetooth

- 1 En la radio, pulse  para acceder al menú.

- 2 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

3 Pulse  o  para ir a **Dispositivos** y pulse  para seleccionar.

---

4 Pulse  o  para ir al dispositivo deseado y pulse  para seleccionar.

---

5 Pulse  o  para acceder a **Desconectar** y pulse  para seleccionar.

La pantalla muestra **Descon. de <dispositivo>**. El dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete la desconexión. Consulte el manual del usuario del dispositivo habilitado para Bluetooth correspondiente.

---

La pantalla de radio muestra **<Dispositivo> desconectado**. Suena un tono indicador positivo y  desaparece junto al dispositivo conectado. Desaparece el icono de Bluetooth conectado de la barra de estado

## Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth

Puede alternar la salida de audio entre el altavoz interno de la radio y el accesorio externo habilitado para Bluetooth.

Pulse el botón programado **Camb. audio BT**.

---

- Suena un tono y la pantalla muestra **Redirig. audio a radio**.
- Suena un tono y la pantalla muestra **Redirig. audio a Bluetooth**.

## Visualización de detalles del dispositivo

1 pulse  para acceder al menú.

---

2 Pulse  o  para ir a **Bluetooth** y pulse  para seleccionar.

---

3 Pulse  o  para ir a Dispositivos y pulse  para seleccionar.

---

4 Pulse  o  para ir al dispositivo deseado y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Ver detalles y pulse  para seleccionar.

---

## Eliminación del nombre del dispositivo

Puede eliminar un dispositivo desconectado de la lista de dispositivos habilitados para Bluetooth.

1 pulse  para acceder al menú.

---

2 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

---

3 Pulse  o  para ir a Dispositivos y pulse  para seleccionar.

---

4 Pulse  o  para ir al dispositivo deseado y pulse  para seleccionar.

---

5 Pulse  o  para Eliminar y pulse  para seleccionar.

La pantalla muestra Disposit. eliminado.

---

## Ganancia de micrófono Bluetooth

Permite controlar el valor de ganancia del micrófono del dispositivo habilitado para Bluetooth conectado.

1 pulse  para acceder al menú.

---

2 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Ganancia de micrófono BT y pulse  para seleccionar.

4 Pulse  o  para ir al tipo Ganancia de micrófono BT y los valores actuales.

Para editar los valores, pulse  para seleccionar.

5 Pulse  o  para aumentar o disminuir los valores y pulse  para seleccionar.

## Ubicación en interiores

### NOTA:

La función de ubicación en interiores solo se aplica a los modelos que cuentan con la última versión de software y hardware. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La ubicación en áreas interiores puede utilizarse para realizar un seguimiento de la ubicación de los usuarios de la radio. Cuando Ubicación en interiores está activada, la

radio se encuentra en un modo de detección limitado. Las balizas limitadas se utilizan para ubicar la radio y determinar su posición.

## Activación o desactivación de la ubicación en interiores

Realice una de las siguientes acciones para activar o desactivar la ubicación en interiores.

- Acceda a esta función mediante el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para ir a Bluetooth y pulse  para seleccionar.
  - c. Pulse  o  para ir a Ubicación en interiores y pulse  para seleccionar.

- d. Pulse  para activar la ubicación en interiores.

La pantalla mostrará *Ubicación en interiores activada*. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono *Ubicación en interiores* disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra *Activación errónea*. Oirá un tono indicador negativo.

- e. Pulse  para apagar la ubicación en áreas interiores.

La pantalla mostrará *Ubicación en interiores desactivada*. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono *Ubicación en interiores* disponible en la pantalla de inicio.

- Si no se realiza correctamente, la pantalla muestra *Desactivación errónea*. Oirá un tono indicador negativo.

- Acceda a esta función con el botón programable.
  - a. Pulse de manera prolongada el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará *Ubicación en interiores activada*. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono *Ubicación en interiores* disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra *Activación errónea*. Si no se realiza correctamente, oirá un tono indicador negativo.

- b. Pulse el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará **Ubicación en interiores desactivada**. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono **Ubicación en interiores** disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra **Desactivación errónea**. Si no se realiza correctamente, oirá un tono indicador negativo.

## Acceso a la información de balizas de ubicación en interiores

Siga el procedimiento para acceder la información de las señales periódicas de la ubicación en áreas interiores.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a **Bluetooth** y pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a **Ubicación en interiores** y pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a **Balizas** y pulse  para seleccionar.
- 

En la pantalla aparece la información de las balizas.

## Lista de notificaciones

La radio dispone de una lista de notificaciones que incluye todos los eventos "sin leer" del canal, como por ejemplo, mensajes de texto sin leer, llamadas perdidas y alertas de llamadas.

El icono de notificación aparece en la barra de estado cuando la lista de notificaciones tiene uno o más eventos.

La lista admite un máximo de 40 eventos sin leer. Cuando está completa, el siguiente evento reemplaza automáticamente al evento más antiguo.

**NOTA:**

Una vez leídos los eventos, se eliminan de la lista de notificaciones.

## Acceso a la lista de notificaciones

Siga el procedimiento para acceder a la lista de notificaciones de la radio.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Notificación y pulse  para seleccionar.

---

- 3 Pulse  o  para ir al evento deseado y pulse  para seleccionar.

Mantenga pulsado  para volver a la pantalla de inicio.

---

## Funcionamiento de Wi-Fi

Wi-Fi® es una marca comercial registrada de Wi-Fi Alliance®.

**NOTA:**

Esta función solo se aplica a DM4601e only.

Esta función le permite configurar y conectarse a una red Wi-Fi. Wi-Fi es compatible con las actualizaciones de firmware de la radio, el Codeplug y recursos, como paquetes de idiomas o de anuncio de voz.

## Activación o desactivación del Wi-Fi

El botón **Activar o desactivar Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Los anuncios de voz para el botón programado **Activar o desactivar Wi-Fi** se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Realice una de las siguientes acciones para activar o desactivar el Wi-Fi.

- Pulse el botón programado **Activar o desactivar Wi-Fi**. El anuncio de voz emite un sonido de activación o desactivación del Wi-Fi.
- Acceda a esta función en el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.
  - c. Pulse  o  para acceder a Wi-Fi activ. y pulse  para seleccionar.

Pulse  para activar el Wi-Fi. La pantalla muestra  junto a **Activado**.

Pulse  para apagar el Wi-Fi. Desaparece  junto a **Habilitado**.

## Conexión a un punto de acceso a la red

Cuando activa el Wi-Fi, la radio busca y se conecta a un punto de acceso a la red.

También puede conectarse a un punto de acceso a la red a través del menú.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a un punto de acceso a la red y pulse  para seleccionar.

---

- 5 Pulse  o  para Conectar y pulse  para seleccionar.

---

- 6 Ingrese la contraseña y pulse  .

Si la conexión se realiza correctamente, la radio muestra un aviso y se guarda el punto de acceso a la red en la lista de perfiles.

## Comprobación del estado de conexión Wi-Fi

Siga el procedimiento para comprobar el estado de conexión Wi-Fi.

Pulse el botón programado **Consulta del estado de la conexión Wi-Fi** para consultar el estado de conexión mediante el Anuncio de voz. El Anuncio de voz emite un sonido cuando el Wi-Fi está desactivado, si el Wi-Fi está activado pero no está conectado o si el Wi-Fi está activado y conectado.

- La pantalla muestra *Wi-Fi desact.* cuando el Wi-Fi está desactivado.
- La pantalla muestra *Wi-Fi activ., conectado* cuando la radio está conectada a la red.

- La pantalla muestra *Wi-Fi activ., desconectado* cuando el Wi-Fi está activado pero la radio no está conectada a ninguna red.

Los anuncios de voz para los resultados de la consulta del estado de la conexión Wi-Fi se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

### NOTA:

El botón **Consulta del estado de la conexión Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

## Actualización de la lista de redes

Siga el procedimiento para actualizar la lista de redes.

- Realice las siguientes acciones para actualizar la lista de redes con el menú.
  - a. Pulse  para acceder al menú.

b. Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

c. Pulse  o  para acceder a Redes y pulse  para seleccionar.

Al acceder al menú Redes, la radio actualiza automáticamente la lista de redes.

- Si ya se encuentra en el menú Redes, lleve a cabo la siguiente acción para actualizar la lista de redes.

Pulse  o  para Actualizar y pulse  para seleccionar.

La radio se actualiza y muestra la lista de redes más actualizada.

## Adición de una red

Si una red preferida no está en la lista de redes disponibles, realice las siguientes acciones para añadir una red.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

4 Pulse  o  para Añadir red y pulse  para seleccionar.

---

5 Introduzca el identificador de conjuntos de servicios (SSID) y pulse  .

---

6 Pulse  o  para **Abrir** y pulse  para seleccionar.

---

7 Ingrese la contraseña y pulse  .  
La radio muestra un miniaviso positivo para indicar que la red se ha guardado correctamente.

---

## Visualización de los detalles de los puntos de acceso a la red

Siga el procedimiento para ver los detalles de los puntos de acceso a la red.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para acceder a **Wi-Fi** y pulse  para seleccionar.

---

3 Pulse  o  para acceder a **Redes** y pulse  para seleccionar.

---

4 Pulse  o  para acceder a un punto de acceso a la red y pulse  para seleccionar.

---

5 Pulse  o  para acceder a **Ver detalles** y pulse  para seleccionar.

En los puntos de acceso conectados a la red se muestra el identificador de conjunto de servicios (SSID), el modo de seguridad, la dirección de control de acceso a los medios (MAC) y el protocolo de Internet (IP).

En los puntos de acceso no conectados a la red se muestra solo el identificador de conjunto de servicios (SSID) y el modo de seguridad.

---

## Eliminación de los puntos de acceso a la red

Realice las siguientes acciones para eliminar los puntos de acceso a la red de la lista de perfiles.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder al punto de acceso a la red seleccionada y pulse  para seleccionar.

---

- 5 Pulse  o  para Eliminar y pulse  para seleccionar.

---

- 6 Pulse  o  para seleccionar Sí y pulse  para seleccionar.

La radio muestra un miniaviso positivo para indicar que el punto de acceso a la red seleccionada se ha eliminado correctamente.

## Herramientas

En este capítulo se explican cómo se utilizan las herramientas disponibles en la radio.

## Encendido y apagado de tonos/alertas de la radio

Puede habilitar y deshabilitar los tonos y alertas de la radio (excepto el tono de alerta de emergencia entrante) siempre que lo necesite.

Pulse el botón programable **Todos los tonos/alertas** para activar o desactivar todos los tonos o siga el procedimiento

que se describe a continuación para acceder a esta función a través del menú de la radio.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Herramientas y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Tonos/Alertas y pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Todos los tonos y pulse  para seleccionar.

---

- 6 Pulse  para habilitar/deshabilitar todos los tonos y alertas.  
La pantalla muestra  junto a Activado.

[Enviar comentarios](#)

Desaparece  junto a Habilitado.

## Configuración del nivel de diferencia de volumen del tono de alerta

Si es necesario, puede ajustar el nivel de diferencia de volumen del tono de alerta. Esta función ajusta el volumen de los tonos/alertas, permitiendo que sea más alto o más bajo que el volumen de voz.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Tonos/Alertas y pulse  para seleccionar.

5 Pulse  o  para ir a Compensación volumen y pulse  para seleccionar.

---

6 Pulse  o  hasta llegar al valor de volumen que desee.  
La radio emite un tono de respuesta con cada valor de volumen correspondiente.

---

7 Lleve a cabo una de las siguientes acciones:

- Pulse  para mantener el valor de volumen que desee que aparezca.
  - Pulse  para salir sin cambiar la configuración actual de diferencia de volumen.
- 

## Activación o desactivación del tono Permiso para hablar

Puede activar y desactivar el tono Permiso para hablar siempre que sea necesario.

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Tonos/Alertas y pulse  para seleccionar.

---

5 Pulse  o  para ir a Permitir hablar y pulse  para seleccionar.

---

- 6 Pulse  para habilitar/deshabilitar el tono de Permitir hablar.

La pantalla muestra  junto a Activado.

Desaparece  junto a Habilitado.

---

- 4 Pulse  o  para acceder a Tonos/Alertas y pulse  para seleccionar.
- 

- 5 Pulse  o  para Encendido y pulse  para seleccionar.
- 

- 6 Pulse  para habilitar/deshabilitar el tono de alerta de encendido.

La pantalla muestra  junto a Activado.

Desaparece  junto a Habilitado.

---

## Activación o desactivación del tono de alerta de encendido

Puede activar y desactivar el tono de alerta de encendido si es necesario.

- 1 pulse  para acceder al menú.
- 

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.
- 

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.
- 

## Configuración del nivel de potencia

Puede personalizar el nivel de potencia de la radio a alto o bajo en cada zona de Connect Plus.

Alto permite la comunicación con los sitios de torre en modo Connect Plus ubicados a una distancia considerable de usted. Bajo permite la comunicación con sitios de torre en modo Connect Plus más cercanos.

Pulse el botón **Nivel potencia** programado para alternar entre los niveles de potencia de transmisión alta y baja.

Siga el procedimiento que se describe a continuación para acceder a esta función a través del menú de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Herramientas y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para Potencia y pulse  para seleccionar.

---

- 5 Pulse  o  para ir a la configuración que desee y pulse  para seleccionar.

✓ aparece junto al ajuste seleccionado. Mantenga pulsado  en cualquier momento, para volver a la pantalla de inicio.

La pantalla vuelve al menú anterior.

## Cambio del modo de pantalla

Es posible cambiar el modo de pantalla de la radio entre Día o Noche, según sea necesario. Esto afecta a la gama de colores de la pantalla.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Herramientas y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

- 4 Pulse  o  para acceder a Pantalla y pulse  para seleccionar.  
La pantalla muestra Modo día y Modo noche.
- 

- 5 Pulse  o  hasta la configuración que desee y  para activar. ✓ aparece junto al ajuste seleccionado.
- 

## Ajuste del brillo de la pantalla

Puede ajustar el brillo de la pantalla de la radio según sea necesario.

### NOTA:

Si la opción Brillo automático está activada, no se podrá ajustar el brillo de la pantalla.

- 1 pulse  para acceder al menú.
- 
- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.
- 

[Enviar comentarios](#)

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.
- 

- 4 Pulse  o  para acceder a Pantalla y pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Brillo y pulse  para seleccionar.  
La pantalla muestra una barra de progreso.
- 

- 6 Pulse  para disminuir el brillo de la pantalla o pulse  para aumentar el brillo de la pantalla. Seleccione desde la configuración 1 a la 8. Pulse  para confirmar la selección.
-

## Encendido y apagado de la pantalla inicial

Puede habilitar y deshabilitar la pantalla inicial siempre que sea necesario.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Herramientas y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Pantalla y pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Pantalla inicial y pulse  para seleccionar.

---

- 6 Pulse  para activar/desactivar la pantalla de inicio.

La pantalla muestra  junto a Activado.

Desaparece  junto a Habilitado.

## Idioma

Puede configurar la pantalla de la radio para que aparezca en el idioma que desee.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para ir a Idiomas y pulse  para seleccionar.

---

5 Pulse  o  hasta el idioma que desee y pulse  para activar. Aparece  junto al idioma seleccionado.

---

## Encendido y apagado del indicador LED

Puede habilitar y deshabilitar el indicador LED siempre que sea necesario.

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

[Enviar comentarios](#)

4 Pulse  o  para ir a Indicador LED y pulse  para seleccionar.

---

5 Pulse  para activar/desactivar los indicadores LED.  
La pantalla muestra  junto a Activado.  
Desaparece  junto a Habilitado.

---

## Identificación del tipo de cable

Puede seleccionar el tipo de cable que utiliza la radio.

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para ir a Tipo de cable y pulse  para seleccionar.

---

5 El tipo de cable actual aparece con un símbolo ✓.

---

## Anuncio de voz

Esta función permite a la radio indicar de forma sonora o mediante la pulsación de botón programable la zona o el canal que el usuario acaba de asignar. Este indicador de audio puede personalizarse según los requisitos del cliente. Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para ir a Anuncio de voz y pulse  para seleccionar.

También puede utilizar  o  para cambiar la opción seleccionada.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  para activar Anuncio de voz. La pantalla muestra ✓ junto a Activado.
  - Pulse  para desactivar Anuncio de voz. Desaparece ✓ junto a Activado.
-

## Temporizador de menú

Defina el periodo de tiempo que su radio permanecerá en el menú antes de cambiar automáticamente a la pantalla de inicio.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Pantalla y pulse  para seleccionar.

---

- 5 Pulse  o  para acceder a Temporizador del menú y pulse  para seleccionar.

---

[Enviar comentarios](#)

- 6 Pulse  o  hasta llegar a la configuración que desee y pulse  para seleccionar.
- 

## Encendido y apagado de bocina y luces

Esta función deberá instalarla el distribuidor a través del conector de accesorios posterior de la radio.

La radio puede notificarle una llamada entrante mediante la función de bocinas y luces. Cuando esté activada, una llamada entrante hará que suene la bocina del vehículo y que se enciendan las luces.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón programado de **bocina y luces** para activar o desactivar dicha función. Omita los pasos siguientes.
    - Pulse  para acceder al menú.

---

  - 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.
-

3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

4 Pulse  o  para ir a Bocina y luces y pulse  para seleccionar.

---

5 Pulse  para habilitar/deshabilitar el Horns/Lights.

La pantalla muestra  junto a Activado.

Desaparece  junto a Habilitado.

---

## Configuración de las preferencias de funcionamiento del botón doble

La radio dispone de un botón con doble función, el **selector de volumen/canales**. Si se desactiva la opción de doble función, el botón funciona únicamente como selector de volumen.

1  para acceder al menú .

---

2  o  para ir a Herramientas y pulse  para seleccionar.

---

3  o  para ir a Config. radio y pulse  para seleccionar.

---

4  o  para ir a Botón doble y pulse  para seleccionar.

---

5 La pantalla muestra Volum. solo y Volum. y can.

 o  hasta llegar a la configuración que desee y pulse  para seleccionar.

Aparece  junto a la configuración seleccionada.

La pantalla vuelve al menú anterior.

---

## Micrófono AGC digital (Mic AGC-D)

Esta función controla automáticamente la ganancia del micrófono de la radio mientras transmite en un sistema digital. Elimina el audio alto o mejora el audio claro para un

valor predeterminado con el fin de ofrecer un nivel de audio constante.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Herramientas y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Mic AGC-D y pulse  para seleccionar.

---

- 5 Lleve a cabo una de las siguientes acciones:
  - Pulse  para activar **Mic AGC-D** . La pantalla muestra  junto a **Activado** .
  - Pulse  para deshabilitar **Mic AGC-D** (Mic AGC digital). La marca  desaparece junto a **Activado**

[Enviar comentarios](#)

## Audio inteligente

La radio puede ajustar automáticamente el volumen de audio para superar el ruido de fondo del entorno, incluidas todas las fuentes de ruido estacionario y no estacionario. Esta función es de solo recepción y no afecta a la transmisión de audio.

- 1 pulse  para acceder al menú.

Control de radio	Pasos
Menú	<ol style="list-style-type: none"> <li>a pulse  para acceder al menú.</li> <li>b Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.</li> <li>c Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.</li> </ol>

## Control de radio Pasos

- d** Pulse  o  para ir a Audio inteligente y pulse  para seleccionar.
-  **NOTA:** También puede utilizar  o  para cambiar la opción seleccionada.
- e** Lleve a cabo una de las siguientes acciones:
- Pulse  para activar el Audio inteligente. La pantalla muestra  junto a Activado.
  - Pulse  para desactivar el Audio inteligente. Desaparece  junto a Habilitado.

- 2** Pulse  o  para acceder a Utilidades y pulse  para seleccionar.
- 
- 3** Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.
- 
- 4** Pulse  o  para ir a Audio inteligente y pulse  para seleccionar.

  - Pulse  para desactivar el Audio inteligente. Desaparece  junto a Habilitado.
-

## Activación y desactivación del supresor de respuesta acústica

Esta función le permite minimizar la respuesta acústica de las llamadas recibidas.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Configuración de la radio y pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Supresor de AF y pulse  para seleccionar.  
También puede utilizar  o  para cambiar la opción seleccionada.

---

- 5 Lleve a cabo una de las siguientes acciones.

- Pulse  para activar el supresor de respuesta acústica. La pantalla muestra  junto a Activado.
- Pulse  para desactivar el supresor de respuesta acústica. Desaparece  junto a Habilitado.

## Activación o desactivación del GNSS

El sistema global de navegación por satélite (GNSS) es un sistema de navegación vía satélite que determina la ubicación exacta de la radio. GNSS incluye el sistema de posicionamiento global (GPS) y el sistema de navegación por satélite global (GLONASS).

### NOTA:

Los modelos de radio seleccionados pueden ofrecer GPS y GLONASS. La constelación de GNSS se configura a través de CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

- 1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **GNSS** programado para activar o desactivar la función. Omita los pasos siguientes.
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a GNSS. Pulse  para seleccionar.

5 Pulse  para habilitar/deshabilitar el GNSS.  
Si está activado,  aparece junto a Activado.  
Si se desactiva,  junto a Activado desaparece.

Consulte la sección [Verificación de la información de GNSS en la página 356](#) para obtener más detalles sobre la recuperación de información de GNSS.

## Acceso a la información general de la radio

La radio contiene información sobre lo siguiente:

- Batería
- Grado de inclinación (acelerómetro)
- Índice numérico del modelo de radio
- CRC del Codeplug de la tarjeta opcional a través del aire (OTA)
- Número de sitio
- Información del sitio
- Alias e ID de radio
- Versiones de firmware y Codeplug
- Información de GNSS

Pulse  en cualquier momento para volver a la pantalla anterior o pulse  durante unos segundos para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

## Comprobación del índice de número de modelo de radio

Este número de índice identifica el hardware específico del modelo de radio. Quizás se lo pida el administrador del sistema cuando prepare un nuevo Codeplug de tarjeta opcional para la radio.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Herramientas y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Índice modelo y pulse  para seleccionar.

En la pantalla aparecerá el índice de número de modelo.

## Comprobación del elemento CRC del archivo de Codeplug de tarjeta opcional OTA

Siga las instrucciones que se indican a continuación cuando el administrador del sistema le pida que consulte el elemento CRC (comprobación de redundancia cíclica) del archivo de Codeplug de tarjeta opcional OTA. Esta opción solo aparece si la tarjeta opcional ha recibido OTA la última actualización del Codeplug.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

- 4 Pulse  o  para ir a OB OTA CPerc y pulse  para seleccionar.

En la pantalla aparecerán algunas letras y números. Comunique esta información al administrador del sistema de radio exactamente como aparece.

---

## Presentación del ID de sitio (número de sitio)

### NOTA:

Si en ese momento la radio no está registrada en ningún emplazamiento, la pantalla mostrará No registrado.

Cuando se registra con un emplazamiento de Connect Plus, la radio muestra brevemente el ID de emplazamiento. Tras registrarse, en general no presenta este número. Para visualizar el número de sitio registrado, actúe como se indica a continuación:

- 1 pulse  para acceder al menú.
- 

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.
- 

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Número del sitio y pulse  para seleccionar.

En la pantalla aparecerán el ID de red y el número de sitio.

---

## Comprobación de la información del sitio

### NOTA:

Si en ese momento la radio no está registrada en ningún emplazamiento, la pantalla mostrará No registrado.

La función de información del sitio proporciona información que puede resultarle útil al técnico de servicio. Consta de la siguiente información:

- Número del repetidor del canal de control actual.
- RSSI: el último valor de intensidad de la señal medido desde el repetidor del canal de control.
- Lista de vecinos enviada por el repetidor del canal de control (cinco números separados por comas).

Si se le pide que use esta función, indique la información mostrada exactamente como aparece en la pantalla.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Información del sitio y pulse  para seleccionar.  
La pantalla muestra la información del sitio.

---

## Comprobación del ID de la radio

Esta función muestra el ID de la radio.

Siga el procedimiento que se describe a continuación para acceder a esta función a través de la pantalla de la radio.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

- 4 Pulse  o  para acceder a Mi ID y pulse  para seleccionar.  
En la pantalla aparecerá el ID de radio.

---

## Verificación de la versión de firmware y de Codeplug

Muestra la versión del firmware de la radio.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Versiones y pulse  para seleccionar.

La pantalla muestra una lista con la siguiente información:

- Versión de firmware (radio)
- Versión de Codeplug (radio)
- Versión de firmware de tarjeta opcional

- Versión de frecuencia de tarjeta opcional
- Versión de hardware de tarjeta opcional
- Versión de Codeplug de tarjeta opcional

## Comprobación de actualizaciones

Connect Plus proporciona la capacidad de actualizar determinados archivos (Codeplug de tarjeta opcional, archivo de frecuencia de red y archivo de firmware de tarjeta opcional) a través del interfaz aire (OTA).

### NOTA:

Póngase en contacto con el distribuidor o el administrador de red para determinar si esta característica se ha activado en la radio.

Cualquier radio con pantalla de Connect Plus tiene la capacidad de mostrar el elemento CRC del archivo de Codeplug de tarjeta opcional OTA, la versión de archivo de frecuencia o la versión de archivo de firmware de tarjeta opcional actuales a través de una opción del menú. Además, las radios con pantalla que tienen activada la transferencia de archivos a través de la interfaz aire pueden mostrar la versión de un "archivo pendiente". Un "archivo pendiente" es un archivo de frecuencia o de firmware de tarjeta opcional cuya existencia conoce la

radio de Connect Plus a través de los mensajes del sistema, pero del que aún no ha recopilado todos los paquetes. En el caso de las radios con pantalla de Connect Plus, el menú presenta opciones para:

- Ver el número de versión del archivo pendiente.
- Ver el porcentaje de paquetes recopilados hasta el momento.
- Solicitar que la radio de Connect Plus reanude la recopilación de paquetes de archivo.

Cuando la radio tiene habilitada la transferencia de archivos de Connect Plus a través del interfaz aire, en ocasiones puede unirse automáticamente a una transferencia de archivos sin que el usuario de la radio reciba una notificación previa. Mientras la radio está recopilando paquetes del archivo, el LED parpadea con rapidez en rojo y la radio muestra el icono de datos de gran volumen en la barra de estado de la pantalla de inicio.

#### NOTA:

La radio de Connect Plus no puede recopilar paquetes de archivo y recibir llamadas al mismo tiempo. Si desea cancelar la transferencia de archivos, pulse y suelte el botón **PTT**. Así, la radio solicitará una llamada al nombre de contacto seleccionado y cancelará la transferencia de archivos hasta que el proceso se reanude más tarde.

El proceso de transferencia de archivos puede volver a empezar por diversos motivos. El primer ejemplo se aplica a todos los tipos de archivo a través del interfaz aire. Los demás solo se aplican al archivo de frecuencia de red y al archivo de firmware de tarjeta opcional:

- El administrador del sistema de radio reinicia la transferencia de archivos a través del interfaz aire.
- El tiempo predefinido de la tarjeta opcional se agota, lo que provoca que esta reanude automáticamente el proceso de recopilar paquetes.
- Sin que se haya agotado el tiempo establecido, el usuario de la radio solicita que se reanude la transferencia de archivos a través de la opción del menú.

Cuando la radio de Connect Plus termina de descargar todos los paquetes de archivo, debe actualizarse con ese archivo recién adquirido. En lo que se refiere al archivo de frecuencia de red, se trata de un proceso automático que no precisa el reinicio de la radio. En el caso del archivo de Codeplug de tarjeta opcional, es un proceso automático que provoca una breve interrupción del servicio mientras la tarjeta opcional carga la información del Codeplug nuevo y vuelve a adquirir un emplazamiento de red. El tiempo que tarde en actualizarse la radio con el archivo de firmware de tarjeta opcional nuevo dependerá de la configuración que haya establecido el distribuidor o administrador del sistema. O bien lo hará inmediatamente tras recopilar todos los paquetes de archivo, o bien esperará hasta la próxima vez en que el usuario active la radio.

### NOTA:

Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

El proceso de actualización a un nuevo archivo de firmware de tarjeta opcional tarda unos segundos y es necesario que la tarjeta opcional de Connect Plus reinicie la radio. Una vez que comience la actualización, el usuario de la radio no podrá realizar o recibir llamadas hasta que el proceso finalice. Durante el proceso, la pantalla de la radio le indica al usuario que no debe apagar la radio.

## Archivo de firmware

La siguiente sección proporciona información sobre el firmware de la radio.

### Firmware actualizado

#### NOTA:

Si el firmware de tarjeta opcional no está actualizado (y si la radio ha recopilado parcialmente una versión más reciente del firmware de tarjeta opcional), la radio muestra una lista con opciones adicionales; Versión, %recibido y Descarga.

- 1 pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Firmware y pulse  para seleccionar.  
En la pantalla aparecerá Firmware actualizado.

---

## Versión de firmware pendiente

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Firmware y pulse  para seleccionar.

---

6 Pulse  o  para ir a Versión y pulse  para seleccionar.

Si hay un archivo de firmware de tarjeta opcional pendiente, la pantalla muestra el número de la versión de firmware pendiente.

Si hay un archivo de firmware de tarjeta opcional pendiente, la pantalla muestra Firmware actualizado.

---

## Porcentaje recibido de firmware pendiente

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Firmware y pulse  para seleccionar.

---

6 Pulse  o  para acceder a %Recibido y pulse  para seleccionar.

La pantalla mostrará el porcentaje de paquetes de archivo de firmware recibidos hasta ese momento.

**NOTA:**

Cuando sea del 100%, habrá que apagar y encender la radio para que comience la actualización del firmware.

---

## Descarga de firmware pendiente

Si la radio de Connect Plus dispone de un archivo parcial por una transferencia OTA de archivo de firmware de tarjeta opcional inconclusa, la unidad reanudará automáticamente la transferencia (si aún está vigente) cuando se agote el tiempo establecido en un temporizador interno. Si desea que la unidad continúe con la transferencia del archivo de firmware de tarjeta opcional en curso antes de que se agote dicho tiempo, utilice la opción Descarga descrita anteriormente.

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

5 Pulse  o  para acceder a Firmware y pulse  para seleccionar.

6 Pulse  o  para acceder a Descargar y pulse  para seleccionar.

La pantalla muestra lo siguiente:

Descarga disponible	Iniciar descarga
Sin descargas disponibles	Descarga no disponible

7 Lleve a cabo una de las siguientes acciones:

- Seleccione Sí y pulse  para iniciar la descarga.
- Seleccione No y pulse  para volver al menú anterior.

## Archivo de frecuencia

La siguiente sección proporciona información sobre el archivo de frecuencia de la radio.

### Archivo de frecuencia actualizado

#### NOTA:

Si el archivo de frecuencia no está actualizado (y si la radio ha recopilado parcialmente una versión más reciente del archivo de frecuencia) la radio muestra una lista con opciones adicionales; Versión, %recibido y Descarga.

- 1 pulse  para acceder al menú.

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Frecuencia y pulse  para seleccionar.

La pantalla mostrará Archivo frec. actualizado.

---

## ***Versión de archivo de frecuencia pendiente***

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Frecuencia y pulse  para seleccionar.

---

6 Pulse  o  para ir a Versión y pulse  para seleccionar.

Si hay un archivo de frecuencia pendiente, la pantalla muestra el número de versión del archivo de frecuencia pendiente.

---

## ***Porcentaje recibido de archivo de frecuencia pendiente***

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

---

5 Pulse  o  para acceder a %Recibido y pulse  para seleccionar.

La pantalla mostrará el porcentaje de paquetes de archivo de frecuencia recibidos hasta ese momento.

---

### **Descarga de archivo de frecuencia pendiente**

Si la radio de Connect Plus dispone de un archivo parcial por una transferencia OTA de archivo de frecuencia de red inconclusa, la unidad reanudará automáticamente la transferencia (si aún está vigente) cuando se agote el

tiempo establecido en un temporizador interno. Si desea que la unidad continúe con la transferencia del archivo de frecuencia de red en curso antes de que se agote dicho tiempo, utilice la opción Descarga descrita a continuación.

1 pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

---

4 Pulse  o  para acceder a Actualizaciones y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Frecuencia y pulse  para seleccionar.

---

- 6 Pulse  o  para acceder a Descargar y pulse  para seleccionar.

Descarga no disponible en este momento	Descarga no disponible
Descarga disponible en este momento	Iniciar descarga

- 7 Lleve a cabo una de las siguientes acciones:
- Seleccione Sí y pulse para iniciar la descarga.
  - Seleccione No y pulse para volver al menú anterior.

## Verificación de la información de GNSS

Muestra la información de GNSS de la radio, como los valores de:

- Latitud
- Longitud

- Altitud
- Dirección
- Velocidad
- Dilución de precisión horizontal (HDOP)
- Satélites
- Versión

- 1 pulse  para acceder al menú.

- 2 Pulse  o  para acceder a Utilidades y pulse  para seleccionar.

- 3 Pulse  o  para acceder a Info. del radio y pulse  para seleccionar.

- 4 Pulse  o  para acceder a Información de GNSS y pulse  para seleccionar.

- 5 Pulse  o  para ir al elemento deseado y pulse  para seleccionar.

La pantalla muestra la información de GNSS solicitada.

---

Consulte [Activación o desactivación del GNSS en la página 343](#) para obtener más información sobre GNSS.

Esta página se ha dejado en blanco intencionadamente.

## Otros sistemas

Las funciones disponibles para los usuarios de radio en virtud de este sistema están disponibles en este capítulo.

### Botón PTT (Pulsar para hablar)

El botón Pulsar para hablar (**PTT**) tiene dos funciones básicas:

- En el transcurso de una llamada, el botón **PTT** permite que la radio transmita a las demás radios de la llamada. El micrófono se activa cuando se pulsa el botón **PTT**.
- Cuando no hay ninguna llamada en curso, el botón **PTT** se utiliza para realizar una nueva llamada.

Para hablar, pulse de forma prolongada el botón **PTT**. Suelte el botón **PTT** para escuchar.

Si están activados el tono de permiso para hablar o el tono lateral PTT , espere a que finalice el breve tono de alerta antes de hablar.

 Si la función Indicación de canal libre está activada en la radio (la cual ha programado el distribuidor), oír un breve tono de alerta en el momento en que la radio de destino (la

radio que recibe la llamada) libere el botón **PTT**, lo que indica que el canal está disponible para contestar.

 Escuchará un tono de prohibido hablar si se interrumpe la llamada. Debe soltar el botón **PTT** si se oye tono de prohibición para hablar continuo.

## Botones programables

En función de la duración de la pulsación de un botón, el distribuidor puede programar los botones programables como accesos directos a las funciones de la radio.

### Pulsación corta

Pulsar y soltar el botón rápidamente.

### Pulsación larga

Mantener pulsado el botón durante la duración programada.

### NOTA:

Consulte [Funcionamiento de emergencia en la página 439](#) para obtener más información sobre la duración programada del botón de **Emergencia**.

## Funciones asignables de la radio

Las siguientes funciones de radio se pueden asignar a los botones programables.

## Entorno audio

Permite que el usuario seleccione el entorno de funcionamiento de la radio.

## Perfiles de audio

Permite al usuario seleccionar el perfil de audio preferido.

## Camb. audio Bluetooth®

Alterna el direccionamiento de audio entre el altavoz interno de la radio y el accesorio externo con tecnología Bluetooth.

## Conexión de Bluetooth

Inicia una operación de detección y conexión de Bluetooth.

## Desconexión de Bluetooth

Finaliza todas las conexiones Bluetooth en curso entre dispositivos habilitados para Bluetooth y la radio.

## Bluetooth visible

Permite que la radio entre en el modo de Bluetooth visible.

## Alerta de llamada

Permite acceder directamente a la lista de contactos para que pueda seleccionar un contacto al que enviarle una alerta de llamada.

## Reenvío de llamadas

Activa o desactiva la transferencia de llamadas.

## Registro de llamadas

Selecciona la lista del registro de llamadas.

## Anuncio de canal

Reproduce mensajes de voz de anuncio de canal y de zona para el canal actual.

## Contactos

Proporciona acceso directo a la lista de contactos.

## Emergencia

Dependiendo de la programación, inicia o cancela una llamada o una alarma de emergencia.

## Dirección pública (PA) externa

Alterna el direccionamiento de audio entre el amplificador del altavoz de PA conectado y el sistema de PA interno de la radio.

## Ubicación en interiores

Activa o desactiva la ubicación en interiores.

## Audio inteligente

Permite activar o desactivar el Audio inteligente.

## Marcación manual

Inicia una llamada privada al teclear cualquier ID de suscriptor.

**Itinerancia manual del sitio<sup>6</sup>** 

Inicia la búsqueda de sitio manual.

**Mic AGC**

Activa o desactiva el control automático de ganancia (AGC) del micrófono interno.

**Monitor**

Monitoriza un canal seleccionado en busca de actividad.

**Notificaciones**

Proporciona acceso directo a la lista de notificaciones.

**Eliminación de canal con ruido<sup>6</sup>**

Elimina temporalmente de la lista de rastreo un canal no deseado, exceptuando el canal seleccionado. El canal seleccionado se refiere a la combinación de zona/canal seleccionada por el usuario desde la que se inicia el rastreo.

**Acceso de marcación rápida** 

Inicia directamente una llamada privada, telefónica o a grupo, una alerta de llamada, un mensaje de texto rápido o la función Retorno a inicio predefinidos.

**Función de tarjeta opcional**

Activa o desactiva las funciones de la tarjeta opcional para los canales compatibles con dicha tarjeta.

**Monitorización permanente<sup>6</sup>**

Monitoriza un canal seleccionado por todo el tráfico de radios hasta que se desactiva la función.

**Teléfono** 

Proporciona acceso directo a la lista de contactos del teléfono.

**Privacidad** 

Activa o desactiva la privacidad.

**Dirección pública (PA)**

Activa o desactiva el sistema de PA interno de la radio.

**Alias e ID de radio**

Proporciona el ID y alias de radio.

**Verificación de radio** 

Determina si una radio se encuentra activa en un sistema.

**Desactivación de la radio** 

Permite desactivar de forma remota una radio de destino.

---

<sup>6</sup> No aplicable a Capacity Plus.

## Habilitar radio

Permite activar de forma remota una radio de destino.

## Monitorización remota

Enciende el micrófono de una radio de destino sin que proporcione ningún indicador.

## Repetidor/modo directo<sup>6</sup>

Alterna entre el uso de un repetidor y la comunicación directa con otra radio.

## Restablecer canal base

Configura un nuevo canal base.

## Silenciar recordatorio de canal base

Silencia el recordatorio de canal de inicio.

## Rastreo<sup>7</sup>

Permite activar o desactivar el rastreo.

## Información del sitio

Muestra el nombre y el ID de Capacity Plus-Varios sitios del sitio actual.

Reproduce los mensajes de voz de indicador del sitio actual si el indicador de voz está activado.

## Bloqueo del sitio<sup>6</sup>

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

## Control de telemetría

Controla el pin de salida en una radio local o remota.

## Mensaje de texto

Selecciona el menú de mensajes de texto.

## Desactivación remota de la interrupción de transmisión

Detiene una llamada en curso que se puede interrumpir para liberar el canal.

## Mejora de la vibración del habla

Permite activar o desactivar esta función.

## Activar/Desactivar indicador de voz

Activa o desactiva el indicador de voz.

## Transmisión activada por voz (VOX)

Activa o desactiva VOX.

## Wi-Fi

Activa o desactiva el Wi-Fi.

---

<sup>7</sup> No aplicable a Capacity Plus - Sitio único.

**Selección de zona**

Permite seleccionar en una lista de zonas.

## Funciones asignables de configuración o herramientas

Los siguientes ajustes o funciones de la radio se pueden asignar a los botones programables.

**Tonos/alertas**

Activa y desactiva todos los tonos y alertas.

**Retroiluminación**

Activa o desactiva la luz de fondo de la pantalla.

**Subir/bajar canal**

En función de la programación, cambia el canal al canal anterior o al siguiente.

**Modo de pantalla**

Activa o desactiva el modo de pantalla día/noche.

**Nivel de potencia**

Alternar entre los niveles de potencia de transmisión alto y bajo.

## Acceso a las funciones programadas

Siga el procedimiento para acceder a las funciones programadas de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.

---
- 2 Pulse  o  para ir a la función de menú y, a continuación, pulse  para seleccionar una función o acceder a un submenú.

---

- 3 Lleve a cabo una de las siguientes acciones:
  - Pulse  para volver a la pantalla anterior.
  - Pulse de forma prolongada  para volver a la pantalla de inicio.

Tras un periodo de inactividad, la radio sale automáticamente del menú y vuelve a la pantalla de inicio.

Los botones de navegación por el menú también están disponibles en un micrófono con teclado. Consulte [Botones del micrófono con teclado en la página 46](#).

## Indicadores de estado

En este capítulo se explican los indicadores de audio y los tonos de audio que se utilizan en la radio.

## Iconos

La pantalla de cristal líquido (LCD) de la radio muestra el estado de la radio, las entradas de texto y las entradas del menú.

### Tabla 9: Iconos de pantalla

Los siguientes iconos aparecen en la barra de estado ubicada en la parte superior de la pantalla de la radio. Los iconos se organizan de izquierda a derecha según orden de aparición o uso, y son específicos del canal.

	<p><b>Bluetooth conectado</b></p> <p>La función Bluetooth está activada. El icono permanece iluminado cuando hay un dispositivo Bluetooth remoto conectado.</p>
	<p><b>Bluetooth no conectado</b></p> <p>La función Bluetooth está activada, pero no hay conectado ningún dispositivo Bluetooth remoto.</p>
	<p><b>Registro de llamadas</b></p> <p>Registro de llamadas de radio.</p>
	<p><b>Contacto</b></p> <p>El contacto por radio está disponible.</p>
	<p><b>Emergencia</b></p> <p>La radio está en modo Emergencia.</p>
	<p><b>Lista de recepción flexible</b></p> <p>La lista de recepción flexible está habilitada.</p>

*Tabla (continuación)...*

	<p><b>GNSS disponible</b> </p> <p>La función GNSS está activada. El icono permanece encendido cuando existe una posición definida disponible.</p>
	<p><b>GNSS no disponible</b> </p> <p>La función GNSS está activada pero no recibe datos del satélite.</p>
	<p><b>Datos de gran volumen</b></p> <p>La radio está recibiendo datos de gran volumen y el canal está ocupado.</p>
	<p><b>Función de ubicación en interiores</b> <sup>8</sup></p> <p>El estado de ubicación en interiores está activado y disponible.</p>
	<p><b>Ubicación en interiores no disponible</b><sup>8</sup></p> <p>El estado de ubicación en interiores está activado pero no está disponible debido a que el Bluetooth está</p>

Tabla (continuación)...

	<p>desactivado o a que el Bluetooth ha suspendido el rastreo de las balizas.</p>
	<p><b>Mensaje</b></p> <p>Mensaje entrante.</p>
	<p><b>Monitor</b></p> <p>Se está monitorizando el canal seleccionado.</p>
	<p><b>Modo Silenciar</b></p> <p>El modo Silenciar está activado y el altavoz está silenciado.</p>
	<p><b>Notificación</b></p> <p>Faltan uno o varios eventos en la lista de notificaciones.</p>
	<p><b>Tarjeta opcional</b></p> <p>La tarjeta opcional está habilitada. (Solo en modelos activados para la tarjeta opcional.)</p>
	<p><b>La tarjeta opcional no funciona</b></p> <p>La tarjeta opcional está deshabilitada.</p>

Tabla (continuación)...

<sup>8</sup> Solo se aplica a los modelos que cuentan con la última versión de software y hardware.

	<p><b>Temporizador de retardo de programación a través del interfaz aire</b></p> <p>Indica el tiempo que queda hasta el reinicio automático de la radio.</p>
	<p><b>Indicador de intensidad de la señal recibida (RSSI)</b></p> <p>El número de barras mostradas representa la intensidad de la señal de la radio. Cuatro barras indican la señal más intensa. Este icono solo se muestra durante la recepción.</p>
	<p><b>Inhibic. respuesta</b></p> <p>La inhibición de respuesta está activada.</p>
	<p><b>Solo timbre</b></p> <p>El modo de tono de llamada está habilitado.</p>
	<p><b>Rastreo<sup>9</sup></b></p> <p>La función de rastreo está habilitada.</p>

*Tabla (continuación)...*

	<p><b>Rastreo: Prioridad 1<sup>9</sup></b></p> <p>La radio detecta actividad en el canal/grupo designado como Prioridad 1.</p>
	<p><b>Rastreo: Prioridad 2<sup>9</sup></b></p> <p>La radio detecta actividad en el canal/grupo designado como Prioridad 2.</p>
	<p><b>Seguro</b></p> <p>La función Privacidad está habilitada.</p>
	<p><b>Inicio de sesión</b></p> <p>Se ha iniciado la sesión de la radio en el servidor remoto.</p>
	<p><b>Cerrar sesión</b></p> <p>Se ha cerrado la sesión de la radio en el servidor remoto.</p>
	<p><b>Tono de silencio</b></p> <p>El modo de tono de silencio está habilitado.</p>

*Tabla (continuación)...*

<sup>9</sup> No disponible en Capacity Plus.

	<b>Roaming entre sitios</b> <sup>10</sup> La función de roaming entre sitios está habilitada.
	<b>Modo directo</b> <sup>9</sup> Si no hay un repetidor, la radio está configurada para establecer comunicación directa de radio a radio.
	<b>Desactivar tonos</b> Los tonos están desactivados.
	<b>Inseguro</b> La función Privacidad está deshabilitada.
	<b>Rastreo de aceptación</b> La función de rastreo de aceptación está habilitada.
	<b>Wi-Fi: excelente</b> <sup>11</sup> La señal de la red Wi-Fi es excelente.

Tabla (continuación)...

	<b>Wi-Fi: buena</b> <sup>11</sup> La señal de la red Wi-Fi es buena.
	<b>Wi-Fi: regular</b> <sup>11</sup> La señal de la red Wi-Fi es regular.
	<b>Wi-Fi: deficiente</b> <sup>11</sup> La señal de la red Wi-Fi es deficiente.
	<b>Wi-Fi: no disponible</b> <sup>11</sup> La señal de la red Wi-Fi no está disponible.

**Tabla 10: Iconos del menú avanzado**

Los siguientes iconos aparecen junto a los elementos de menú que ofrecen una elección entre dos opciones o como

<sup>10</sup> No aplicable a Capacity Plus - Sitio único.

<sup>11</sup> Solo se aplica aDM4601e.

indicación de que hay un submenú que ofrece dos opciones.

	<b>Casilla de verificación (marcada)</b> Indica que la opción está seleccionada.
	<b>Casilla de verificación (vacía)</b> Indica que la opción no está seleccionada.
	<b>Recuadro negro sólido</b> Indica la opción seleccionada para el elemento de menú con un submenú.

### Tabla 11: Iconos del dispositivo Bluetooth

Los siguientes iconos aparecen junto a los elementos en la lista de dispositivos habilitados para Bluetooth disponibles para indicar el tipo de dispositivo.

	<b>Dispositivo de audio Bluetooth</b> Dispositivo de audio habilitado para Bluetooth, por ejemplo, unos auriculares.
---	---

*Tabla (continuación)...*

	<b>Dispositivo de datos Bluetooth</b> Dispositivo de datos habilitado para Bluetooth, por ejemplo, un escáner.
	<b>Dispositivo PTT Bluetooth</b> Dispositivo PTT habilitado para Bluetooth, por ejemplo, un dispositivo de PTT solo (POD).

### Tabla 12: Iconos de llamada

Los siguientes iconos aparecen en la pantalla en el transcurso de una llamada. Estos iconos también aparecen en la lista de contactos para indicar el tipo de ID o de alias.

	<b>Llamada de PC con Bluetooth</b> Indica que hay una llamada de PC con Bluetooth en curso.  En la lista de contactos, indica un alias (nombre) o ID (número) de llamada de PC con Bluetooth.
	<b>Llamada de despacho</b> El tipo de contacto Llamada de despacho se utiliza para enviar un

*Tabla (continuación)...*

	mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.
	<p><b>Llamada a grupo/a todos</b></p> <p>Indica que hay una llamada a grupo o una llamada a todos en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.</p>
	<p><b>Llamada privada</b></p> <p>Indica que hay una llamada privada en curso. En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.</p>
	<p><b>Llamada telefónica como una llamada de grupo/llamada a todos</b></p> <p>Indica que hay una llamada telefónica como, por ejemplo, una llamada a grupo o una llamada a todos en curso.</p>

Tabla (continuación)...

	En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.
	<p><b>Llamada telefónica como una llamada privada</b></p> <p>Indica que hay una llamada telefónica como una llamada privada en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de teléfono.</p>

### Tabla 13: Iconos de fichas de trabajo

Los siguientes iconos aparecen momentáneamente en la pantalla en la carpeta Fichas de trabajo.

	<p><b>Todas las tareas</b></p> <p>Indica todos los trabajos enumerados en la lista.</p>
	<p><b>Nuevos trabajos</b></p> <p>Indica los nuevos trabajos.</p>

Tabla (continuación)...

	<p><b>En curso</b></p> <p>Los trabajos están transmitiendo. Este icono se ve antes de la indicación "El envío de fichas de trabajo ha fallado" o "Se han enviado correctamente".</p>
	<p><b>Error de envío</b></p> <p>Los trabajos no pueden enviarse.</p>
	<p><b>Enviado correctamente</b></p> <p>Los trabajos se han enviado correctamente.</p>
	<p><b>Prioridad 1</b></p> <p>Indica el nivel de prioridad 1 para los trabajos.</p>
	<p><b>Prioridad 2</b></p> <p>Indica el nivel de prioridad 2 para los trabajos.</p>
	<p><b>Prioridad 3</b></p> <p>Indica el nivel de prioridad 3 para los trabajos.</p>

**Tabla 14: Iconos pequeños de aviso**

Los siguientes iconos aparecen momentáneamente en la pantalla después de que se lleve a cabo una acción para realizar una tarea.

	<p><b>Transmisión fallida (negativo)</b></p> <p>Error al realizar la acción.</p>
	<p><b>Transmisión correcta (positivo)</b></p> <p>La acción se ha realizado correctamente.</p>
	<p><b>Transmisión en progreso (transición)</b></p> <p>Transmitiendo. Este icono se ve antes de la indicación de Transmisión correcta o Transmisión fallida.</p>

**Tabla 15: Iconos de elementos enviados**

Los iconos que se indican a continuación aparecen en la esquina superior derecha de la pantalla en la carpeta Enviados.

 	<p><b>en curso</b></p> <p>El mensaje de texto para un alias o ID de suscriptor está pendiente de transmisión y, a continuación, se espera confirmación.</p> <p>El mensaje de texto para un alias o ID de grupo está pendiente de transmisión.</p>
 	<p><b>Mensaje individual o de grupo leído</b></p> <p>El mensaje de texto se ha leído.</p>
 	<p><b>Mensaje individual o de grupo no leído</b></p> <p>El mensaje de texto no se ha leído.</p>

Tabla (continuación)...

 	<p><b>Error de envío</b></p> <p>No se ha podido enviar el mensaje de texto.</p>
 	<p><b>Enviado correctamente</b></p> <p>El mensaje de texto se ha enviado correctamente.</p>

## Indicadores LED

Los indicadores LED muestran el estado de funcionamiento de la radio.

### Rojo intermitente

La radio no ha superado la autocomprobación durante el encendido.

La radio está recibiendo una transmisión de emergencia.

La radio está transmitiendo con estado de batería baja.

La radio está fuera del rango de alcance, si se ha configurado un sistema de repetición de rango automático.

El modo Silenciar está activado.

### **Verde fijo**

La radio se está encendiendo.

La radio está transmitiendo.

La radio está enviando una alerta de llamada o una transmisión de emergencia.

### **Verde intermitente**

La radio está recibiendo una llamada o datos.

La radio está recuperando transmisiones de programación inalámbrica.

La radio está detectando actividad a través del interfaz aire.

#### **NOTA:**

Esta actividad puede afectar o no al canal programado de la radio debido a la naturaleza del protocolo digital.

En Capacity Plus, no hay indicación LED cuando la radio está detectando actividad a través del interfaz aire.

### **Verde intermitente doble**

La radio está recibiendo una llamada o datos con la función de privacidad habilitada.

### **Amarillo fijo**

La radio está supervisando un canal convencional.

La radio está en modo de Bluetooth visible.

### **Amarillo intermitente**

La radio está rastreando actividad.

La radio aún tiene que responder a una alerta de llamada.

La radio tiene la lista de recepción flexible activada.

Toda los canales Capacity Plus-Varios sitios están ocupados.

### **Parpadeo doble en amarillo**

La radio tiene la navegación automática activada.

La radio está buscando de forma activa un nuevo sitio.

La radio aún tiene que responder a una alerta de llamada a grupo.

La radio está bloqueada.

La radio no está conectada al repetidor mientras está en Capacity Plus.

Todos los canales de Capacity Plus están ocupados.

## Tonos

A continuación se describen los tonos que suenan a través del altavoz de la radio.

Tono agudo

Tono grave

## Tonos de indicador

Los tonos de indicador proporcionan indicaciones audibles del estado después de realizar una acción para llevar a cabo una tarea.

Tono indicador positivo

Tono indicador negativo

## Tonos de audio

Los tonos de audio le proporcionan indicaciones sonoras del estado de la radio o de la respuesta de la radio a los datos recibidos.

[Enviar comentarios](#)

### Tono continuo

Un sonido monótono. Suena continuamente hasta que finaliza.

### Tono periódico

Suena periódicamente dependiendo de la duración que haya establecido la radio. El tono empieza, se para y se repite.

### Tono repetitivo

Suena un único tono que se repite hasta que lo apaga el usuario.

### Tono momentáneo

Suena una vez por un periodo corto establecido por la radio.

## Modos analógico y digital convencionales

Cada canal de la radio se puede configurar como un canal analógico convencional o un canal digital convencional.

Utilice el **selector de canales** para cambiar entre un canal analógico o uno digital.

Algunas de las funciones no estarán disponibles al cambiar de modo digital a analógico. Los iconos de las funciones digitales reflejan este cambio mostrándose "atenuados". Las funciones deshabilitadas aparecen ocultas en el menú.

La radio también tiene funciones disponibles para los modos analógico y digital. Las pequeñas diferencias en la forma en que funciona cada función **no** afectan al funcionamiento de la radio.

### NOTA:

La radio también cambia entre los modos analógico y digital durante un rastreo de modo doble. Consulte [Rastreo en la página 418](#) para obtener más información.

## Información sobre los iconos

A lo largo de este documento, los iconos que se describen se utilizan para indicar las funciones admitidas con el modo analógico convencional o en el modo digital convencional, o están disponibles con un micrófono que tenga activado un teclado.

Indica una función disponible **solo en modo analógico** convencional.

Indica una función disponible **solo en modo digital** convencional.

**No** se muestran iconos para las funciones que están disponibles en **ambos** modos convencionales (analógico y digital).

## IP Site Connect™

Esta función permite que la radio amplíe la comunicación convencional más allá del alcance de un solo sitio mediante la conexión a diferentes sitios disponibles a través de una red IP (Protocolo de Internet). Se trata de un modo multisitio convencional.

Si la radio está fuera de alcance con respecto a un sitio y entra en el alcance de otro, la radio se conectará al repetidor del nuevo sitio para enviar o recibir transmisiones de datos o llamadas. Esto se puede realizar manual o automáticamente en función de los ajustes definidos.

Durante una búsqueda de sitios automática, la radio rastrea todos los sitios disponibles cuando la señal del sitio actual es débil o cuando la radio no puede detectar ninguna señal procedente del sitio actual. A continuación, la radio se ajusta al repetidor con el indicador de intensidad de la señal recibida (RSSI) más elevado.

Durante una búsqueda de sitios manual, la radio busca el siguiente sitio de la lista de navegación que tenga cobertura en ese momento (aunque tal vez no sea la señal más intensa) y se acopla al repetidor.

**NOTA:**

Cada canal solo puede tener activado el rastreo o el desplazamiento, pero no ambas opciones al mismo tiempo.

Los canales que tengan esta función activada pueden añadirse a una lista de navegación particular. La radio busca los canales en la lista de navegación durante la operación de navegación automática para localizar el mejor sitio. Una lista de navegación soporta un máximo de 16 canales, incluido el canal seleccionado.

**NOTA:**

No puede añadir ni eliminar manualmente una entrada de la lista de navegación. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Capacity Plus – Sitio único

Capacity Plus-Sitio único es una configuración troncal de un solo sitio del sistema de radio MOTOTRBO, que utiliza un conjunto de canales para que soporte cientos de usuarios y hasta 254 grupos. Esta función permite que la radio utilice de forma eficaz el número disponible de canales programados mientras se encuentra en el Modo Repetidor.

Oirá un tono indicador negativo si intenta acceder a una función que no esté disponible en Capacity Plus - Single Site al pulsar un botón programable.

La radio también tiene funciones que están disponibles en el modo digital convencional, IP Site Connect y Capacity Plus. Sin embargo, las pequeñas diferencias en la forma de funcionar de cada función no afectan al funcionamiento de la radio.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información sobre esta configuración.

## Capacity Plus - Varios sitios

Capacity Plus-Varios sitios es una configuración troncal de varios canales del sistema de radio MOTOTRBO que combina lo mejor de las configuraciones Capacity Plus e IP Site Connect.

Capacity Plus-Varios sitios permite que su radio amplíe la comunicación troncal más allá del alcance de un solo sitio mediante la conexión a diferentes sitios disponibles conectados a través de una red IP. También proporciona una capacidad superior gracias al uso eficiente del número disponible de canales programados combinados que soporta cada uno de los sitios disponibles.

Si la radio está fuera de rango con respecto a un sitio y entra en el alcance de otro, se conectará al repetidor del nuevo sitio para enviar o recibir transmisiones de datos o llamadas. Según la configuración, esto se realiza de forma automática o manual.

Si la radio se ha configurado para hacerlo de forma automática, rastrea todos los sitios disponibles cuando la señal del sitio actual sea débil o cuando la radio no pueda detectar ninguna señal del sitio actual. A continuación se ajusta al repetidor con el valor de RSSI más elevado.

En una búsqueda manual de sitio, la radio busca el siguiente sitio de la lista de navegación que tenga cobertura en ese momento (aunque tal vez no sea la señal más intensa) y se acopla a él.

Cualquier canal con Capacity Plus-Varios sitios activado puede añadirse a una lista de navegación particular. La radio busca esos canales durante la operación de navegación automática para localizar los mejores sitios.

### **NOTA:**

No puede añadir ni eliminar manualmente una entrada de la lista de navegación. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

De forma similar a Capacity Plus-Varios sitios, los iconos de las funciones que no son aplicables a Capacity Plus-Varios sitios no están disponibles en el menú. Oirá un tono indicador negativo si accede a una función que no esté disponible en Capacity Plus-Varios sitios al pulsar un botón programable.

## Selecciones de canales y zonas

En este capítulo se explican las operaciones para seleccionar una zona o un canal en la radio. Una zona es un conjunto de canales.

La radio es compatible con un máximo de 99 canales y 2 zonas, con un máximo de 99 canales por zona.

Cada canal puede programarse con diferentes funciones y/o admitir grupos diferentes de usuarios.

### Selección de zonas

Siga el procedimiento para seleccionar la zona que desee en la radio.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón **Selección de zona** programado. Continúe con el paso [paso 3](#).
    - Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Zona. Pulse  para seleccionar.

En la pantalla aparece  y la zona actual.

---

- 3 Pulse  o  hasta llegar a la zona deseada. Pulse  para seleccionar.

La pantalla muestra <Zona> seleccionada momentáneamente y vuelve a la pantalla de la zona seleccionada.

---

### Selección zonas mediante la búsqueda de alias

Siga el procedimiento para seleccionar la zona que desee en la radio mediante la búsqueda de alias.

- 1 Pulse  para acceder al menú.
-

- 2 Pulse  o  para ir a Zona. Pulse  para seleccionar.

En la pantalla aparece  y la zona actual.

---

- 3 Introduzca el primer carácter del alias que desee.

La pantalla muestra un cursor intermitente.

---

- 4 Introduzca el resto de caracteres del alias que desee.

la búsqueda de alias no distingue entre mayúsculas y minúsculas. Si hay dos entradas o más con el mismo nombre, la radio mostrará la entrada que figure primero en la lista.

La primera línea de texto muestra los caracteres introducidos por el usuario. Las siguientes líneas de texto muestran los resultados de la búsqueda preseleccionados.

---

- 5 Pulse  para seleccionar.

La pantalla muestra <Zona> seleccionada momentáneamente y vuelve a la pantalla de la zona seleccionada.

---

## Selección de canales

Siga el procedimiento para seleccionar el canal deseado en la radio después de haber seleccionado una zona.

Lleve a cabo una de las siguientes acciones:

- Pulse los botones **Desplazar hacia arriba/abajo**.
  - Utilice el **selector de volumen/canales**.
  - Pulse los botones programados **Subir canal/ Bajar canal**.
- 

## Llamadas

En este capítulo se explican las operaciones para recibir, responder, realizar y finalizar llamadas.

Puede seleccionar un ID o alias de suscriptor, o un ID o alias de grupo después de haber seleccionado un canal mediante una de estas funciones:

#### **Búsqueda de alias**

Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

#### **Lista de contactos**

Este método proporciona acceso directo a la lista de contactos.

#### **Marcación manual (a través de Contactos)**

Este método se utiliza solo para llamadas telefónicas y llamadas privadas con un micrófono con teclado.

#### **Teclas numéricas programadas**

Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

#### **NOTA:**

Solo puede tener un ID o alias asignado a una tecla numérica, pero puede tener más de una tecla numérica asociada a un ID o alias. Se pueden asignar todas las teclas numéricas de un micrófono con teclado. Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

#### **Botón de acceso de marcación rápida programado**

Este método se utiliza solo para , llamadas de grupo, llamadas privadas y llamadas telefónicas.

Solo puede asignar un ID a un botón de **acceso de marcación rápida** mediante una pulsación larga o breve de un botón programable. La radio puede tener varios botones de **acceso de marcación rápida** programados.

#### **Botón programable**

Este método solo se utiliza para llamadas telefónicas.

#### **Selector de volumen/canales**

Este método permite seleccionar manualmente un alias o ID de suscriptor, o un alias o ID de grupo.

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea en verde cuando está recibiendo.

**NOTA:**

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea rápido en verde cuando está recibiendo una llamada que tiene la privacidad activada.

Para descodificar una llamada que tiene la privacidad activada, la radio debe tener la misma clave de privacidad o bien la misma clave e ID de clave (programadas por el distribuidor) que la radio transmisora (la radio desde la que recibe la llamada).

Consulte [Privacidad en la página 478](#) para obtener más información.

## Llamadas de grupo

La radio debe estar configurada como parte de un grupo para recibir una llamada del grupo de usuarios o realizar una llamada al mismo.

## Realización de llamadas a grupo

Siga el procedimiento para realizar llamadas a grupo con la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Seleccione un canal con el ID o alias de grupo activo.
  - Pulse el botón de **acceso de marcación rápida** programado.

---
- 2 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada a grupo y el** alias de llamada a grupo.  

---
- 3 Suelte el botón **PTT** para escuchar.  
El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el icono de **Llamada a grupo** y el alias o ID de grupo, y el alias o ID de la radio transmisora.  

---
- 4  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

## Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de grupo con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 4 Pulse el botón **PTT** para realizar la llamada. El indicador LED verde se ilumina.

- 5 Suelte el botón **PTT** para escuchar.

El LED verde parpadea cuando cualquier usuario del grupo responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

- 6  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

## Realización de llamadas a grupo mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas a grupo con la radio mediante la tecla numérica programable.

- 1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada a un ID o alias predefinido.

Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.

Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

- 
- 2** Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina.

- 
- 3** Suelte el botón **PTT** para escuchar.

El LED verde parpadea cuando cualquier usuario del grupo responde.

- 
- 4**  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

## Respuesta a llamadas a grupo

Para recibir una llamada de un grupo de usuarios, la radio debe estar configurada como parte de ese grupo. Siga el procedimiento para responder a llamadas a grupo con la radio.

Al recibir una llamada a grupo:

- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada a grupo** en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.
- La segunda línea de texto muestra el alias de la llamada a grupo.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

- 1** Lleve a cabo una de las siguientes acciones:

-  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.
-  Si la función de Interrupción de voz está activada, pulse el botón **PTT** para interrumpir el audio de la radio transmisora y liberar el canal para responder.

El indicador LED verde se ilumina.

---

## 2 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
-  Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

---

## 3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

---

Si la radio recibe una Llamada a grupo mientras no se encuentra en la pantalla de Inicio, permanece en la pantalla actual antes de responder la llamada.

Mantenga pulsado  para volver a la pantalla de inicio y ver el alias de autor de llamada antes de responder.

## Llamadas privadas

Una llamada privada es una llamada de una radio individual a otra radio individual.

Existen dos formas de realizar una llamada privada. El primer tipo realiza la llamada después de realizar una verificación de presencia de radio, mientras que el segundo tipo inicia la llamada inmediatamente. Su distribuidor solo puede programar uno de estos tipos de llamada en la radio.

## Realizar llamadas privadas

La radio debe programarse para poder iniciar una llamada privada. Si esta función no está activada, sonará un tono indicador negativo cuando inicie la llamada. Siga el procedimiento para realizar llamadas privadas con la radio.

Utilice las funciones Mensaje txt. o Alerta llamd. para contactar con una radio individual. Si desea obtener información adicional, consulte [Mensajes de texto en la página 160](#) o [Funcionamiento de las alertas de llamada en la página 435](#).

- 1 Lleve a cabo una de las siguientes acciones:
  - Seleccione un canal con el ID o alias de suscriptor activo.
  - Pulse el botón de **acceso de marcación rápida** programado.

- 
- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada**, el alias de suscriptor y el estado de llamada.

- 
- 3 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- 4 Suelte el botón **PTT** para escuchar.

El indicador LED verde parpadea cuando la radio de destino responde.

- 
- 5  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra **Llamada finalizada**.

---

## Realización de llamadas privadas mediante la lista de contactos

Siga el procedimiento para realizar llamadas privadas con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED verde se ilumina. La pantalla muestra el alias del destino.

---

5 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

---

6 Suelte el botón **PTT** para escuchar.  
El indicador LED verde parpadea cuando la radio de destino responde. La pantalla muestra el ID o alias del usuario transmisor.

---

7  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el

usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra **Llamada finalizada**.

---

## Realización de llamadas privadas mediante marcado manual

Siga el procedimiento para realizar llamadas privadas con la radio mediante marcado manual.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

3 Pulse  o  para ir a **Marcado manual**.  
Pulse  para seleccionar.

---

4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Introduzca el ID de suscriptor y pulse  para continuar.
  - Edite el ID de suscriptor marcado previamente y pulse  para continuar.
- 

6 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el alias del destino.

---

7 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

---

8 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el ID o alias del usuario transmisor.

---

9  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra *Llamada finalizada*.

---

## Realización de llamadas privadas mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas privadas con la radio mediante la tecla numérica programable.

1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada a un ID o alias predefinido.

Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.

Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

## 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada** en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante. La segunda línea de texto muestra el estado de la llamada.

## 3 Suelte el botón **PTT** para escuchar.

El indicador LED verde parpadea cuando la radio de destino responde. La pantalla muestra el alias del destino.

## 4 Si la función de indicación de canal libre está activada, oírás un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La radio regresa a la

pantalla en la que se encontraba antes de iniciar la llamada.

Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

## Respuesta a llamadas privadas

Siga el procedimiento para responder a llamadas privadas con la radio.

Al recibir una llamada privada:

- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

### 1 Lleve a cabo una de las siguientes acciones:

-  Si la función de indicación de canal libre está activada, oírás un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

-  Si la función Desconexión remota de Interrupción/Transmisión está activada, pulse el botón **PTT** para detener una llamada en curso que se puede interrumpir y liberar el canal para responder.

El indicador LED verde se ilumina.

---

**2** Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

---

**3** Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

---

## Llamadas a todos

Una llamada a todos es una llamada de una radio individual a todas las radios del canal. Se utiliza para realizar anuncios importantes, que requieren una especial atención por parte del usuario. Los usuarios del canal no pueden responder a una llamada a todos.

## Recepción de llamadas a todos

Al recibir una llamada a todos:

- Suena un tono.
- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el ID o alias del autor de la llamada.
- La segunda línea de texto muestra `Llamada general`.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

La radio vuelve a la pantalla antes de recibir la llamada a todos cuando la llamada finaliza.

Una llamada a todos no espera un periodo predeterminado antes de finalizar.

 Si la función de indicación de canal libre está activada, oírás un breve tono de alerta cuando la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para su uso.

No puede responder a una llamada a todos.

**NOTA:**

La radio deja de recibir la llamada a todos si cambia a un canal distinto mientras está recibiendo la llamada. Durante una llamada general, no podrá realizar ningún movimiento de navegación ni edición en el menú hasta que la llamada finalice.

-  Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

Los usuarios del canal no pueden responder a una llamada a todos.

---

## Realización de llamadas a todos

La radio debe estar programada para poder realizar una llamada a todos. Siga el procedimiento para realizar llamadas a todos con la radio.

- 1 Seleccione un canal con el ID o alias de grupo de llamada a todos activo.
- 

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada a grupo** y **Llamada a todos**.

---

- 3 Lleve a cabo una de las siguientes acciones:
  - Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

## Realización de llamadas a todos mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas a todos con la radio mediante la tecla numérica programable.

- 1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada que se ha asignado a un ID o alias predefinido.

Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.

Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

---

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina.

---

- 3 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. No puede responder a una llamada a todos en este momento.

---

- 4  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

Para las llamadas privadas, oirá un tono breve cuando finalice la llamada.

---

Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

## Llamadas selectivas

Una llamada selectiva es una llamada de una radio individual a otra radio individual. Se trata de una llamada privada en un sistema analógico.

## Realización de llamadas selectivas

La radio debe estar programada para poder iniciar una llamada selectiva. Siga el procedimiento para realizar llamadas selectivas con la radio.

- 1 Seleccione un canal con el ID o alias de suscriptor activo.
- 

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada**, el alias de suscriptor y el estado de llamada.

---

- 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

-  Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

#### 4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde.

- 5  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

#### 6 La pantalla muestra `Llamada finalizada`.

- La primera línea de texto muestra el icono de **llamada privada** y el alias de autor de llamada o `Llamd. select. O Ale. con llam.`
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

#### 1 Pulse el botón **PTT** para responder la llamada.

El indicador LED verde se ilumina.

#### 2 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

#### 3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra `Llamada finalizada`.

## Respuesta a llamadas selectivas

Siga el procedimiento para responder a llamadas selectivas con la radio.

Cuando recibe una llamada selectiva:

- El indicador LED verde parpadea.

[Enviar comentarios](#)

## Llamadas telefónicas

Una llamada telefónica es una llamada de una radio individual a un teléfono.

Si la función de llamada telefónica no está activada en la radio:

- La pantalla muestra `No disponible`.
- La radio silencia la llamada.
- La radio vuelve a la pantalla anterior al finalizar la llamada.

Durante una llamada telefónica, la radio intenta finalizar la llamada cuando:

- Se pulsa el botón de **acceso de marcación rápida** con el código de salida configurado previamente.
- Se introduce el código de salida como la entrada de dígitos adicionales.

Durante el acceso al canal, el código de salida o de acceso, o la transmisión de dígitos adicionales, la radio solo responde a los botones o mandos de **encendido/apagado**, **control de volumen** y **selector de canales**. Se oye un tono en cada entrada no válida.

Durante el acceso al canal, pulse  para descartar el intento de llamada. Suena un tono.

### NOTA:

el código de acceso o no acceso no puede tener más de 10 caracteres.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Realización de llamadas telefónicas

Siga el procedimiento para realizar llamadas telefónicas con la radio.

- 1 Pulse el botón de **acceso de marcación rápida** programado para el ID o alias predefinido.

Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo. Si el código de acceso no está preconfigurado en la lista de contactos, la pantalla muestra `Código de acceso:`.

- 2 Introduzca el código de acceso y pulse  para continuar.

el código de acceso o de finalización de acceso no puede tener más de 10 caracteres.

3 Pulse el botón **PTT** para responder la llamada. Suelte el botón **PTT** para escuchar.

---

4 Introduzca dígitos adicionales con el teclado si lo requiere la llamada y pulse  para continuar.

Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

Suena el doble tono de multifrecuencia (DTMF). La radio vuelve a la pantalla anterior.

---

5 Para finalizar la llamada, pulse .

---

6 Lleve a cabo una de las siguientes acciones:

- Si el código de finalización de acceso no se ha configurado previamente, introduzca el código de finalización de acceso cuando la pantalla muestre `Código de finalización de acceso:` y, a continuación, pulse para  continuar. La radio vuelve a la pantalla anterior.

- Pulse el botón de **acceso de marcación rápida** programado. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.

Se oye el tono DTMF y la pantalla muestra `Finalizando llamada.`

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada.`

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita los últimos dos pasos o espere a que el usuario del teléfono finalice la llamada.

---

## Realización de llamadas telefónicas mediante la lista de contactos

Siga el procedimiento para realizar llamadas telefónicas con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.
-

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

La pantalla muestra las entradas en orden alfabético.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

Si pulsa el botón **PTT** mientras se encuentra en la pantalla de contactos del teléfono:

- La primera línea de la pantalla muestra Núm. teléfono:.
- La segunda línea de la pantalla muestra un cursor intermitente.

Si la entrada seleccionada está vacía:

- Suena un tono indicador negativo.
  - La pantalla muestra Número de llamada de teléfono no válido.
- 

4 Pulse  o  para ir a Llamada telefónica. Pulse  para seleccionar.

La pantalla muestra Código de acceso: si el código de acceso no se ha configurado previamente.

---

5 Introduzca el código de acceso y pulse  para continuar.

el código de acceso o no acceso no puede tener más de 10 caracteres.

La primera línea de texto muestra el mensaje Llamando. La segunda línea de texto muestra el ID o alias de suscriptor y el icono de **llamada telefónica**.

Si la llamada se realiza correctamente:

- Se oye el tono DTMF.
- Se oye el tono de llamada del usuario del teléfono.
- La primera línea de texto muestra el ID o alias de suscriptor y el icono de **RSSI**.
- La segunda línea de texto muestra LImda. teléf. y el icono de **llamada telefónica**.

Si la llamada no se realiza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada telf. y, a continuación, Código de acceso:`.
- La radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada si el código de acceso se ha configurado previamente en la lista de contactos.

---

**6** Pulse el botón **PTT** para responder la llamada.  
Desaparece el icono de **RSSI**.

---

**7** Suelte el botón **PTT** para escuchar.

---

**8** Introduzca dígitos adicionales con el teclado si lo requiere la llamada y pulse  para continuar.  
Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la

llamada, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

Se oye el tono DTMF. La radio vuelve a la pantalla anterior.

---

**9** Para finalizar la llamada, pulse  .

---

**10** Si el código de salida no se ha configurado previamente, introduzca el código de salida cuando la pantalla muestre `Código de salida:` y, a continuación, pulse para  continuar.

La radio vuelve a la pantalla anterior. Se oye el tono DTMF y la pantalla muestra `Finalizando llamada`. Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita [paso 9](#) y [paso 10](#) o espere a que el usuario del teléfono finalice la llamada. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra `Pulse OK para realizar llmda`.

Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra **Llam. final.**

Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

#### NOTA:

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código no acceso preconfigurado o introduce el código no acceso como dígitos adicionales, la radio intentará finalizar la llamada.

Durante el acceso al canal, la introducción del código de acceso/salida o la transmisión de dígitos adicionales, la radio solo responde al botón de **encendido/apagado, perilla de volumen y selector de canales**. Se oye un tono en cada entrada no válida.

## Realización de llamadas telefónicas mediante marcación manual

Siga el procedimiento para realizar llamadas telefónicas con la radio mediante marcación manual.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a **Marcación manual**. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a **Número de teléfono**. Pulse  para seleccionar.  
La pantalla muestra **Número:** y un cursor intermitente.

---

5 Introduzca el número telefónico y pulse  para continuar.

La pantalla muestra `Código de acceso:` y un cursor intermitente si el código de acceso no se ha configurado previamente.

---

6 Introduzca el código de acceso y pulse  para continuar.

el código de acceso o no acceso no puede tener más de 10 caracteres.

---

7 El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha. La primera línea de texto muestra el alias de suscriptor. La segunda línea de texto muestra el estado de la llamada.

Si la llamada se realiza correctamente:

- Se oye el tono DTMF.
- Se oye el tono de llamada del usuario del teléfono.
- La primera línea de texto muestra el alias de suscriptor.

- La pantalla continúa mostrando el icono de **llamada telefónica** en la esquina superior derecha.

Si la llamada no se realiza correctamente:

- Suena un tono.
  - La pantalla muestra `Llamada telf. y, a continuación, Código de acceso:.`
  - La radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada si el código de acceso se ha configurado previamente en la lista de contactos.
- 

8 Para finalizar la llamada, pulse  .

---

9 Lleve a cabo una de las siguientes acciones:

- Si el código de salida no se ha configurado previamente, introduzca el código de salida cuando la pantalla muestre `Código de salida:` y, a continuación, pulse para  continuar. La radio vuelve a la pantalla anterior.
- Pulse el botón de **acceso de marcación rápida** programado.

Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.

Se oye el tono DTMF y la pantalla muestra Finalizando llamada.

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra Llamada finalizada.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita [paso 8](#) o espere a que el usuario del teléfono finalice la llamada.

## NOTA:

Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra Pulse OK para realizar llmda.

Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra Llam. final.

Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código no acceso preconfigurado o introduce el código no acceso como dígitos adicionales, la radio intentará finalizar la llamada.

Durante el acceso al canal, la introducción del código de acceso/no acceso o la transmisión de dígitos adicionales, la radio

solo responde al botón de **encendido/apagado, mando del volumen y selector de canales**. Se oye un tono en cada entrada no válida.

## Realización de una llamada de grupo, privada, telefónica o a todos mediante la búsqueda del alias

Siga el procedimiento para realizar llamadas mediante la búsqueda de alias.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.  
La pantalla muestra las entradas en orden alfabético.

---

- 3 Pulse  o  para ir al ID o alias de suscriptor que desee. La primera línea de la pantalla muestra

[Enviar comentarios](#)

Número de teléfono: La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para introducir un número de teléfono.

- 4 Pulse  para seleccionar. Si la entrada seleccionada está vacía, se oye un tono indicador negativo y la pantalla muestra Número de llamada de teléfono no válido.

---

- 5 Pulse  o  para ir a Llamada telefónica y Pulse  para seleccionar. Si el código de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de acceso: La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de acceso y pulse el botón  para continuar. Si es correcta: se oye el tono DTMF. Se oye el tono de llamada del usuario del teléfono. La primera línea de la pantalla muestra el ID o alias del suscriptor y el icono de RSSI. La segunda línea de la pantalla muestra Llamada telefónica y el icono de llamada telefónica. Si no es correcta, se oye un tono y la pantalla muestra Llamada telefónica fallida. La radio vuelve a la pantalla de

introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

- 
- 6 Pulse el botón **PTT** para hablar y suéltelo para escuchar. el icono de RSSI desaparece durante la transmisión.
- 
- 7 Si la llamada telefónica requiere introducir dígitos adicionales, lleve a cabo una de las siguientes acciones.
- Pulse cualquier tecla del teclado para iniciar la introducción de dígitos adicionales. La primera línea de la pantalla muestra **Dígitos extra:**. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca los dígitos adicionales y pulse el botón  para continuar. se oye el tono DTMF y la radio vuelve a la pantalla anterior.
  - Pulse el botón de **acceso de marcación rápida**. se oye el tono DTMF. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.
- 

- 8 Para finalizar la llamada, pulse . Si el código de finalización de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra **Código de finalización de acceso:**. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de finalización de acceso y pulse  para continuar. La radio vuelve a la pantalla anterior. Se oye el tono DTMF y la pantalla muestra **Finalizando llamada**. Si es correcta, se oye un tono y la pantalla muestra **Llam. final**. La radio vuelve a la pantalla de llamada telefónica. Si no es correcta, la radio vuelve a la pantalla de llamada telefónica. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra **Pulse OK para realizar llmda**. Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra **Llam. final**. Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.
-

**NOTA:**

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

Pulse  o  para salir de la búsqueda de alias. Durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código de finalización de acceso preconfigurado o introduce el código de finalización de acceso como dígitos adicionales, la radio intentará finalizar la llamada. Durante el acceso al canal, la introducción del código de acceso/de finalización de acceso o la transmisión de dígitos adicionales, la radio solo responde al botón de encendido/apagado, mando del volumen y selector de canales. Se oye un tono en cada entrada no válida.

## Multifrecuencia de doble tono

La función Multifrecuencia de doble tono (DTMF) permite que la radio funcione en el marco del sistema de radiofrecuencia con un interfaz al sistema telefónico.

El tono DTMF puede desactivarse inhabilitando todos los tonos y todas las alertas del radioteléfono. Consulte [Encendido y apagado de tonos/alertas de la radio en la página 211](#) para obtener más información.

[Enviar comentarios](#)

## Inicio de llamadas DTMF

Siga el procedimiento para iniciar llamadas DTMF en la radio.

- 1 Mantenga pulsado el botón **PTT**.
- 
- 2 Lleve a cabo una de las siguientes acciones:
    - Introduzca el número deseado para iniciar una llamada DTMF.
    - Pulse  desea iniciar una llamada DTMF.
    - Pulse  desea iniciar una llamada DTMF.
- 

## Respuesta a llamadas telefónicas como llamadas de grupo

Siga el procedimiento para responder a llamadas telefónicas como llamadas de grupo con la radio.

Al recibir una llamada telefónica como una llamada de grupo:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.

- La pantalla muestra el alias de grupo y Llamada telf..

Si la función de llamada telefónica no está activada en la radio, la primera línea de la pantalla muestra No disponible y la radio silencia la llamada. La radio vuelve a la pantalla anterior al finalizar la llamada.

- 1 Pulse el botón **PTT** para responder la llamada. Suelte el botón **PTT** para escuchar.
- 

- 2 Para finalizar la llamada, pulse  .

La pantalla muestra Finalizando llamada.  
Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra Llamada finalizada.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita este paso o espere a que el usuario del teléfono finalice la llamada.

---

## Respuesta a llamadas telefónicas como llamadas a todos

Al recibir una llamada telefónica como una llamada a todos, puede responder a la llamada o finalizarla únicamente si se asigna un tipo de llamada a todos al canal. Siga el procedimiento para responder a llamadas telefónicas como llamadas a todos con la radio.

Al recibir una llamada telefónica como una llamada a todos:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra Llmda. a todos y Llamada telf.

Si la función de llamada telefónica no está activada en la radio, la primera línea de la pantalla muestra No disponible y la radio silencia la llamada.

La radio vuelve a la pantalla anterior al finalizar la llamada.

- 1 Pulse el botón **PTT** para responder la llamada.
- 

- 2 Suelte el botón **PTT** para escuchar.
-

3 Para finalizar la llamada, pulse  .

La pantalla muestra Finalizando llamada.

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra Llmda. a todos y Llam. final.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica.

Repita [paso 3](#) o espere a que el usuario del teléfono finalice la llamada.

- La pantalla muestra el alias de la llamada entrante o Llamada telf..

Si la función de llamada telefónica no está activada en la radio, la primera línea de la pantalla muestra No disponible y la radio silencia la llamada. La radio vuelve a la pantalla anterior al finalizar la llamada.

1 Pulse el botón **PTT** para responder la llamada. Suelte el botón **PTT** para escuchar.

---

2 Para finalizar la llamada, pulse  .

La pantalla muestra Finalizando llamada.

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra Llamada finalizada.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica.

Repita este paso o espere a que el usuario del teléfono finalice la llamada.

---

## Respuesta a llamadas telefónicas como llamadas privadas

Siga el procedimiento para responder a llamadas telefónicas como llamadas privada con la radio.

Al recibir una llamada telefónica como una llamada privada:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.

## Interrupción de llamadas de radio

Esta función permite detener una llamada privada o de grupo con el fin de liberar el canal para la transmisión. Por ejemplo, si una radio experimenta un problema de "micrófono atascado" cuando el usuario pulsa accidentalmente el botón **PTT**. La radio debe estar programada para que pueda utilizarse esta función. Siga el procedimiento para detener las llamadas en la radio.

- 1 Pulse el botón **Desactivación remota de la interrupción de transmisión** programado.

En la pantalla aparece `Descon. remota.`

- 
- 2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- En la pantalla aparece `Desc. rem. correcta.`

Si no es correcta:

- Suena un tono indicador negativo.
  - En la pantalla aparece `Error desc. rem.`
- 

### NOTA:

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Modo directo

Esta función permite al usuario de la radio seguir comunicándose cuando el repetidor no esté operativo, o cuando la radio esté fuera del alcance del repetidor pero dentro de la cobertura de otras radios.

La configuración del modo Directo se mantiene incluso después de haber apagado la radio.

### NOTA:

Esta función no se aplica a Capacity Plus-Sitio único, Capacity Plus-Varios sitios y canales de Banda Ciudadana que estén en la misma frecuencia.

## Alternancia entre los modos Repetidor y Directo

Siga el procedimiento para alternar entre los modos Repetidor y Directo en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Repetidor/Talkaround** programado. Omita los pasos siguientes.
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Modo directo. Pulse  para seleccionar.

Si está activado, ✓ aparece junto a Activado.

Si se desactiva, ✓ junto a Activado desaparece.

La pantalla vuelve automáticamente a la pantalla anterior.

## Funciones avanzadas

En este capítulo se explican cómo se utilizan las funciones disponibles en la radio.

Es posible que el distribuidor o el administrador del sistema hayan personalizado la radio para satisfacer sus necesidades específicas. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Recordatorio de canal de inicio

Esta función activa un recordatorio cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Si esta función está activada a través del CPS, cuando la radio no está configurada en el canal de inicio durante un período de tiempo, ocurrirá lo siguiente:

- El tono de recordatorio de canal de inicio y el anuncio suenan.
- La primera línea de la pantalla muestra Sin.
- La segunda línea muestra Canal de inicio.

Puede responder al recordatorio realizando una de las acciones siguientes:

- Volver al canal de inicio.
- Silenciar el recordatorio temporalmente con el botón programable.
- Establecer un nuevo canal principal con el botón programable.

## Silenciar el recordatorio de canal de inicio

Cuando suena el recordatorio del canal de inicio, puede silenciarlo temporalmente.

Pulse el botón programable **Silenciar recordatorio del canal de inicio**.

La primera línea de la pantalla muestra HCR y la segunda línea muestra `silenciado`.

---

## Configuración de nuevos canales de inicio

Cuando se activa el recordatorio del canal de inicio, puede configurar un nuevo canal de inicio.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón programable **Restablecer canal de inicio** para establecer el canal actual como nuevo canal de inicio. Omita los pasos siguientes.  
La primera línea de la pantalla muestra el alias del canal y la segunda línea muestra `Nuevo canal principal`.
    - Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
-

4 Pulse  o  para ir a Canal de inicio.

Pulse  para seleccionar.

5 Pulse  o  para ir al nuevo alias de canal de inicio que desee. Pulse  para seleccionar.

La pantalla muestra  junto al alias de canal de inicio seleccionado.

## Verificación de radio

Esta función le permite determinar si hay otra radio activa en un sistema sin tener que molestar al usuario de la radio. No se muestran notificaciones visuales ni sonoras en la radio de destino. Esta función solo se aplica a los ID o alias de suscriptor. La radio debe estar programada para que pueda utilizarse esta función.

## Envío de verificaciones de radio

Siga el procedimiento para enviar verificaciones de radio con la radio.

1 Pulse el botón programable **Verificar radio**.

2 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

Espera a que se produzca la confirmación.

Si pulsa  mientras la radio espera la confirmación, se oirá un tono, la radio finalizará todos los reintentos y saldrá del modo de verificación de radio.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

La radio volverá a la pantalla de alias o ID de suscriptor.

## Envío de verificaciones de radio mediante marcado manual

Siga el procedimiento para enviar verificaciones de radio con la radio mediante marcado manual.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Marcado. manual. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.

---

- 5 Lleve a cabo una de las siguientes acciones:
  - Introduzca el ID o alias de suscriptor y pulse  para continuar.

- Edite el ID marcado previamente y pulse  para continuar.

- 6 Pulse  o  para ir a Verificación de radio. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

- 7 Espere a que se produzca la confirmación.

Si se pulsa  mientras la radio espera la confirmación, sonará un tono, la radio finalizará todos los reintentos y saldrá del modo de verificación de radio.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

La radio volverá a la pantalla de alias o ID de suscriptor.

---

## Monitorización remota

Esta función se utiliza para encender el micrófono de una radio de destino con un ID o alias de suscriptor. Se puede utilizar esta función para supervisar de manera remota toda la actividad audible alrededor de la radio de destino.

Hay dos tipos de monitorización remota:

- Monitorización remota sin autenticación
- Monitorización remota con autenticación.

La monitorización remota autenticada es una función adquirible. En la monitorización remota autenticada, se necesita una verificación cuando la radio enciende el micrófono de una radio de destino.

Cuando la radio inicia esta función en una radio de destino con autenticación de usuarios, se necesita una frase de paso. La frase de paso se preprograma en la radio de destino mediante CPS.

La radio y la radio de destino deben estar programadas para que pueda utilizarse esta función.

Esta función se detiene después de la duración programada o cuando se esté realizando cualquier operación en la radio de destino.

## Iniciación del monitor remoto

Siga el procedimiento para iniciar el monitor remoto en la radio.

1 Pulse el botón **Monitor remoto** programado.

---

2 Pulse  o  para ir al ID o alias que desee.

---

3 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que

indica que la solicitud está en curso. El indicador LED verde se ilumina.

- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

---

#### 4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra *Monitor remot..* Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.
- 

## Inicio del monitor remoto mediante la lista de contactos

Siga el procedimiento para iniciar el monitor remoto en la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a *Contactos*. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a *Monitor remoto*.

---

- 5 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:
  - La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

## 6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra Monitor remot.. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.

## Inicio del monitor remoto mediante el marcado manual

Siga el procedimiento para iniciar el monitor remoto en la radio mediante el marcado manual.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Marcado. manual. Pulse  para seleccionar.
- 4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.
- 5 Lleve a cabo una de las siguientes acciones:

- Introduzca el ID o alias de suscriptor y pulse  para continuar.

- Edite el ID marcado previamente y pulse  para continuar.

---

6 Pulse  o  para ir a Monitor remoto.

---

7 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

---

8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra Monitor remot.. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

---

## Listas de rastreo

Las listas de rastreo se crean y asignan a canales o grupos individuales. La radio rastrea actividad de voz alternando

entre la secuencia canal o grupo especificada en la lista de rastreo del canal o grupo actual.

La radio soporta hasta 250 listas de rastreo, con un máximo de 16 miembros por lista.

Cada lista de rastreo soporta una combinación de entradas analógicas y digitales.

Puede añadir, eliminar o dar prioridad a los canales al editar la lista de rastreo.

Puede adjuntar una nueva lista de rastreo a su radio a través de la Programación del panel frontal. Consulte [Configuración del panel frontal en la página 205](#) para obtener más información.

Si está configurado, el icono de **prioridad** aparecerá a la izquierda del alias de miembro para indicar si el miembro se encuentra en una lista de canal de Prioridad 1 o de Prioridad 2. No puede tener varios canales de Prioridad 1 o Prioridad 2 en una lista de rastreo. No se muestra ningún icono de **prioridad** si la prioridad se define como **Ninguno**.

**NOTA:**

esta función no se aplica a Capacity Plus.

## Visualización de entradas de la lista de rastreo

Siga el procedimiento para ver las entradas de la lista de rastreo en la radio.

- 1 Pulse para acceder al menú.

---

- 2 Pulse o para ir a Rastreo. Pulse para seleccionar.

---

- 3 Pulse o para ir a Lista de rastreo. Pulse para seleccionar.

---

- 4 Pulse o para ver cada miembro de la lista.

---

## Visualización de entradas de la lista de rastreo mediante la búsqueda de alias

Siga el procedimiento para ver las entradas de la lista de rastreo de la radio mediante la búsqueda de alias.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Lista de rastreo. Pulse  para seleccionar.

---

- 4 Introduzca el primer carácter del alias que desee. La pantalla muestra un cursor intermitente.

---

- 5 Introduzca el resto de caracteres del alias que desee.  
 la búsqueda de alias no distingue entre mayúsculas y minúsculas. Si hay dos entradas o más con el mismo nombre, la radio mostrará la entrada que figure primero en la lista.  
 La primera línea de texto muestra los caracteres introducidos por el usuario. Las siguientes líneas de texto muestran los resultados de la búsqueda preseleccionados.

---

## Adición de nuevas entradas a la lista de rastreo

Siga el procedimiento para añadir nuevas entradas a la lista de rastreo en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Lista de rastreo. Pulse  para seleccionar.

---

- 4 Pulse  o  para Añadir miembro. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 6 Pulse  o  para seleccionar el nivel de prioridad que desee. Pulse  para seleccionar. La pantalla mostrará un pequeño aviso positivo y, a continuación, ¿Añadir otros?.

7 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Sí y añadir otra entrada. Pulse  para seleccionar. Repita [paso 5](#) y [paso 6](#).
- Pulse  o  para ir a No y guardar la lista actual. Pulse  para seleccionar.

## Adición de nuevas entradas a la lista de rastreo mediante la búsqueda de alias

Siga el procedimiento para añadir nuevas entradas a la lista de rastreo mediante la búsqueda de alias en la radio.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Lista de rastreo. Pulse  para seleccionar.

- 4 Pulse  o  para Añadir miembro. Pulse  para seleccionar.

- 5 Introduzca el primer carácter del alias que desee. La pantalla muestra un cursor intermitente.

- 6 Introduzca el resto de caracteres del alias que desee.  
la búsqueda de alias no distingue entre mayúsculas y minúsculas. Si hay dos entradas o más con el

mismo nombre, la radio mostrará la entrada que figure primero en la lista.

La primera línea de texto muestra los caracteres introducidos por el usuario. Las siguientes líneas de texto muestran los resultados de la búsqueda preseleccionados.

---

7 Pulse  para seleccionar.

---

8 Pulse  o  para seleccionar el nivel de prioridad que desee. Pulse  para seleccionar.

La pantalla mostrará un pequeño aviso positivo y, a continuación, ¿Añadir otros?.

---

9 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Sí y añadir otra entrada. Pulse  para seleccionar. Repita los pasos del [paso 5](#) al [paso 8](#).

- Pulse  o  para ir a No y guardar la lista actual. Pulse  para seleccionar.
- 

## Eliminación de entradas desde la lista de rastreo

Siga el procedimiento para eliminar entradas desde la lista de rastreo.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Lista de rastreo. Pulse  para seleccionar.

---

4 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

La pantalla muestra ¿Eliminar entrada?.

---

- 6 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para elegir Sí y eliminar la entrada. Pulse  para seleccionar. La pantalla muestra un pequeño aviso positivo.
  - Pulse  o  para elegir No y volver a la pantalla anterior. Pulse  para seleccionar.
- 

- 7 Repita de [paso 4](#) a [paso 6](#) para borrar otras entradas.
- 

- 8 Mantenga pulsado  para volver a la pantalla de inicio después de eliminar todos los ID o alias que desee.
- 

## Configuración de la prioridad de las entradas de la lista de rastreo

Siga el procedimiento para definir prioridades para las entradas de la lista de rastreo de la radio.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Lista de rastreo. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Edit. prioridad. Pulse  para seleccionar.
-

- 6 Pulse  o  para seleccionar el nivel de prioridad que desee. Pulse  para seleccionar.

La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla anterior. El icono de **prioridad** aparece a la izquierda del alias de miembro.

## Rastreo

La radio se desplaza por la lista de rastreo programada para el canal actual en busca de actividad de voz cuando comienza el proceso de rastreo.

### NOTA:

esta función no se aplica a Capacity Plus.

Durante un rastreo de modo doble, si se encuentra en un canal digital y la radio se acopla a un canal analógico, cambiará automáticamente del modo digital al analógico durante la llamada. Esto también sucede en la situación inversa.

Hay dos formas de iniciar el rastreo:

### Rastreo de canal principal (manual)

La radio rastrea todos los canales o grupos de la lista de rastreo. Al iniciar el rastreo, la radio puede (según la configuración) empezar automáticamente en el canal o grupo activo en el que se realizó el último rastreo o en el canal en el que se inició el rastreo.

### Rastreo automático (automático)

La radio empieza el rastreo automáticamente al seleccionar un canal o grupo que tiene activado el rastreo automático.

### NOTA:

Cuando configure **Recibir mensaje de grupo en el rastreo**, la radio podrá recibir mensajes de grupo de canales que no son base. La radio puede responder los mensajes de grupo en canales base pero no puede responder en canales que no son base. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación o desactivación del rastreo

Siga el procedimiento para activar o desactivar la función de rastreo en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Estad. rastreo. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir al estado de rastreo que desee y pulse  para realizar la selección.

Si la función de rastreo está activada:

- La pantalla muestra Exploración activada y el icono de **exploración**.
- El indicador LED parpadea en amarillo.

Si la función de rastreo está desactivada:

- La pantalla muestra Exploración desactivada.
- El icono de **exploración** desaparece.
- El indicador LED se apaga.

## Respuesta a transmisiones durante el rastreo

Durante el rastreo, la radio se detiene en un canal o grupo en el que detecte actividad. La radio se mantiene en ese canal durante el tiempo programado, conocido como "tiempo muerto". Siga el procedimiento para responder a transmisiones durante el rastreo.

- 1  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** durante el tiempo muerto.

El indicador LED verde se ilumina.

- 2 Suelte el botón **PTT** para escuchar.

Si no responde durante el tiempo muerto, la radio volverá a explorar otros canales o grupos.

## Eliminación de canales con ruido

Si un canal produce llamadas no deseadas o ruidos de forma continua (lo que se llama un canal "con ruido"), se puede eliminar temporalmente de la lista de rastreo. Esta posibilidad no se aplica al canal designado como canal seleccionado. Siga el procedimiento para eliminar canales con ruido de la radio.

- 1 Si la radio "se acopla" a un canal no deseado o con ruido, pulse el botón **Eliminar canal no deseado** programado hasta que escuche un tono.

- 2 Suelte el botón programado **Eliminar canal no deseado**.

El canal con ruido se elimina.

## Restauración de canales con ruido

Siga el procedimiento para restaurar canales con ruido en la radio.

Lleve a cabo una de las siguientes acciones:

- Apague la radio y vuelva a encenderla.

- Detenga y reinicie el rastreo mediante el menú o el botón programado **Rastreo**.
- Cambie el canal mediante el botón **Subir canal/ Bajar canal**.

## Rastreo de aceptación

El rastreo de aceptación le proporciona un área amplia de cobertura en zonas donde hay múltiples estaciones base transmitiendo información idéntica en distintos canales analógicos.

La radio rastrea canales analógicos de múltiples estaciones base y lleva a cabo un proceso de votación para seleccionar la señal de mayor intensidad recibida. Una vez establecida la señal, la radio recibe las transmisiones desde la estación base.

Durante un rastreo de aceptación, el indicador LED amarillo parpadea y la pantalla muestra el icono de **rastreo de aceptación**.

Siga el mismo procedimiento descrito en [Respuesta a transmisiones durante el rastreo en la página 419](#) para responder a una transmisión durante un rastreo de aceptación.

## Configuración de contactos

La función Contactos proporciona a la radio una "agenda". Cada entrada corresponde a un alias o ID que utiliza para realizar una llamada. Las entradas están ordenadas alfabéticamente.

Cada entrada, según el contexto, se asocia con los diferentes tipos de llamadas: Llamada a grupo, llamada privada, llamada a todos, llamada de PC o llamada de despacho.

La llamada de PC o la llamada de despacho están relacionadas con los datos. Solo están disponibles con las aplicaciones. Consulte la documentación de aplicaciones de datos para obtener más información.

 Además, el menú Contactos le permite asignar a cada entrada una o más teclas numéricas programadas en el micrófono con teclado. Si una entrada está asignada a una tecla numérica, la radio puede realizar un marcado rápido de la entrada.

### NOTA:

Verá una marca de verificación delante de cada tecla numérica que esté asignada a una entrada. Si la marca se encuentra delante de Vacío, no se ha asignado una tecla numérica a la entrada.

Cada entrada dentro de Contactos muestra la siguiente información:

- Tipo de llamada
- Alias de la llamada
- ID de llamada

### NOTA:

Si la función Privacidad está activada en un canal, puede realizar llamadas a grupo con privacidad activa, llamadas privadas y llamadas a todos en dicho canal. Solo las radios de destino con la misma clave de privacidad o con el mismo valor de clave e ID de clave que su radio podrán descifrar la transmisión.

## Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de grupo con la radio mediante la lista de contactos.

1

Pulse  para acceder al menú.

2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED verde se ilumina.

---

5 Suelte el botón **PTT** para escuchar.  
El LED verde parpadea cuando cualquier usuario del grupo responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

---

6  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

---

## Realización de llamadas privadas mediante la lista de contactos

Siga el procedimiento para realizar llamadas privadas con la radio mediante la lista de contactos.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED verde se ilumina. La pantalla muestra el alias del destino.

---

5 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

---

6 Suelte el botón **PTT** para escuchar.

El indicador LED verde parpadea cuando la radio de destino responde. La pantalla muestra el ID o alias del usuario transmisor.

---

7  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra Llamada finalizada.

---

## Asignación de entradas a teclas numéricas programadas

Siga el procedimiento para asignar entradas a teclas numéricas programables en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Clave del programa. Pulse  para seleccionar.

---

- 5 Lleve a cabo una de las siguientes acciones:
  - Si la tecla numérica deseada no se ha asignado a una entrada, pulse  o  para

seleccionar la tecla numérica que desee. Pulse

 para seleccionar.

- Si la tecla numérica ya se ha asignado a una entrada, la pantalla mostrará el mensaje `La tecla ya está asignada` y, a continuación, en la primera línea de texto de la pantalla aparecerá el mensaje `¿Reemplazar?` Lleve a cabo una de las siguientes acciones:

Pulse  o  para elegir `Sí`. Pulse  para seleccionar.

La radio emite un tono indicador positivo y la pantalla muestra `Contacto guardado` y un aviso pequeño positivo.

Pulse  o  para elegir `No` y volver al paso anterior.

Cada entrada puede asociarse a distintas teclas numéricas. Verá  delante de cada tecla numérica que esté asignada a una entrada. Si aparece  delante de `Vacio`, esa tecla numérica no está asignada.

Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará

soportada cuando mantenga pulsada la tecla numérica en otro modo.

La pantalla vuelve automáticamente al menú anterior.

---

## Eliminación de asociaciones entre entradas y teclas numéricas programadas

Siga el procedimiento para eliminar las asociaciones entre las entradas y las teclas numéricas programables en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Mantenga pulsada la tecla numérica programada del ID o el alias que desee. Continúe con el paso [paso 4](#).
- Pulse  para acceder al menú.

---

2 Pulse  o  para ir a `Contactos`. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee.

Pulse  para seleccionar.

---

4 Pulse  o  para ir a Clave del programa.

Pulse  para seleccionar.

---

5 Pulse  o  para ir a Vacío. Pulse  para seleccionar.

La primera línea de texto muestra ¿Borrar todas las teclas?.

---

6 Pulse  o  para elegir Sí. Pulse  para seleccionar.

**NOTA:**

Cuando se elimina una entrada, la asociación entre esta y sus teclas numéricas programadas también se elimina.

Suena un tono indicador positivo. En la pantalla aparecerá Contacto guardado.

La pantalla vuelve automáticamente al menú anterior.

---

## Adición de nuevos contactos

Siga el procedimiento para añadir nuevos contactos a la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para Contacto nuevo. Pulse  para seleccionar.

---

4 Pulse  o  para seleccionar el tipo de contacto Contacto radio o Contacto tel. Pulse  para seleccionar.

---

5 Introduzca el número de contacto con el teclado y pulse  para continuar.

---

6 Introduzca el nombre del contacto con el teclado y pulse  para continuar.

---

7 Pulse  o  para el tipo de timbre que desee. Pulse  para seleccionar.  
Suenan un tono indicador positivo. La pantalla muestra un pequeño aviso positivo.

---

## Configuración de contacto predeterminado

Siga el procedimiento para definir el contacto predeterminado en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Estab. predet. Pulse  para seleccionar.

Suenan un tono indicador positivo. La pantalla muestra un pequeño aviso positivo. La pantalla muestra  junto al ID o alias predeterminado seleccionado.

---

## Configuración del indicador de llamada

Esta función permite que los usuario de la radio configuren los tono de timbre de llamada y de mensaje de texto.

### Activación o desactivación de los timbres de llamada para las alertas de llamada

Siga el procedimiento para activar o desactivar los timbres de llamada para las alerta de llamada en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alerta. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Alerta de llamada. Pulse  para seleccionar.

---

- 7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar. La pantalla muestra  junto al tono seleccionado.

---

### Activación o desactivación de los timbres de llamada para las llamadas privadas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas privadas en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Llamada privada. Pulse  para seleccionar.  
La pantalla muestra  junto a Activado si los timbres de llamada privada están activados.

La pantalla muestra  junto a Apagado si los Timbres de llamada privada están desactivados.

- 7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar.  
Si está activado,  aparece junto a Activado. Si se desactiva,  junto a Activado desaparece.

## Activación o desactivación de los timbres de llamada para las llamadas selectivas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas selectivas en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

6 Pulse  o  para ir a Llamada selectiva. Pulse  para seleccionar. La pantalla mostrará  y el tono actual.

---

7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar. La pantalla muestra  junto al tono seleccionado.

---

## Activación o desactivación de los timbres de llamada para los mensajes de texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los mensajes de texto en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Mensaje de texto. Pulse  para seleccionar. La pantalla mostrará  y el tono actual.
- 

- 7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar. La pantalla muestra  junto al nuevo tono seleccionado.
- 

## Activación o desactivación de los timbres de llamada para el estado de telemetría con texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los estados de telemetría en la radio.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Tonos/alerta. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.
- 

- 6 Pulse  o  para ir a Telemetría. Pulse  para seleccionar. El tono actual queda indicado por un .
-

## Asignación de tipos de timbre

La radio puede programarse para que utilice el sonido de uno de los diez tonos de llamada predefinidos cuando reciba una alerta de llamada o un mensaje de texto de un contacto determinado. La radio reproducirá todos los tipos de timbre al ir desplazándose por la lista. Siga el procedimiento para asignar estilos de tono de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.  
Las entradas están ordenadas alfabéticamente.

---

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Editar. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Edit. tono. Pulse  para seleccionar.

---

- 6 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar.  
✓ aparece junto al tono seleccionado.

---

## Aumento del volumen del tono de alarma

La radio puede programarse para que le avise continuamente cada vez que una llamada de radio se quede sin responder. Esto se realiza mediante un aumento automático y progresivo del volumen del tono de alarma. Esta función se conoce como Escalart.

## Funciones del registro de llamadas

La radio realiza el seguimiento de todas las llamadas privadas recientes: salientes, respondidas y perdidas. El

registro de llamada se utiliza para visualizar y gestionar las llamadas recientes.

Puede que las alertas de llamadas perdidas se incluyan en los registros de llamadas, en función de la configuración del sistema de la radio. Puede realizar las siguientes tareas en cada una de las listas de llamadas:

- Guardar un alias o un ID en los contactos
- Eliminar llamada
- Eliminar todas las llamadas
- Ver detalles

## Visualización de llamadas recientes

Siga el procedimiento para ver las llamadas recientes en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a la lista de preferidos. Las opciones son Perdidas, Respondidas y Salientes.

Pulse  para seleccionar.

La pantalla muestra la entrada más reciente.

---

4 Pulse  o  para ver la lista.

Puede iniciar una llamada privada con el alias o ID que aparece en pantalla en ese momento. Para ello, pulse el botón **PTT**.

---

## Eliminación de llamadas desde la lista de llamadas

Siga el procedimiento para eliminar llamadas desde la lista de llamadas.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a la lista que desee. Pulse  para seleccionar.

Si la lista está vacía:

- Suena un tono.
  - La pantalla muestra Lista vacía.
- 

4 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

5 Pulse  o  para ir a ¿Eliminar entrada? Pulse  para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para seleccionar Sí y eliminar la entrada.

La pantalla muestra Entrada eliminada.

- Pulse  o  para seleccionar No. Pulse  para seleccionar.

La radio vuelve a la pantalla anterior.

---

## Visualización de los detalles de la lista de llamadas

Siga el procedimiento para ver los detalles de las llamadas en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a la lista que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir al ID o alias que desee.  
Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Ver detalles. Pulse  para seleccionar.  
La pantalla muestra los detalles de las llamadas.
- 

## Almacenamiento de ID o alias desde la lista de llamadas

Siga el procedimiento para almacenar ID o alias en la radio desde la lista de llamadas.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a la lista que desee.  
Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Store (Guardar). Pulse  para seleccionar.  
La pantalla muestra un cursor intermitente.
- 

- 6 Introduzca el resto de caracteres del alias que desee. Pulse  para seleccionar.  
Puede almacenar un ID sin alias.  
La pantalla muestra un pequeño aviso positivo.
-

## Funcionamiento de las alertas de llamada

La localización por alerta de llamada permite avisar al usuario de una radio en particular de que debe responder la llamada.

Esta función solamente se aplica a los alias o ID de suscriptor y se puede acceder a ella a través del menú mediante Contactos, la marcación manual o un botón programado de **acceso instantáneo**.

### Realización de alertas de llamada

Siga el procedimiento para realizar alertas de llamada con la radio.

- 1 Pulse el botón de **acceso de marcación rápida** programado.

La pantalla muestra Alerta de llamada y el ID o alias de suscriptor. El indicador LED verde se ilumina.

- 2 Espere a que se produzca la confirmación.

Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.

Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

### Realización de alertas de llamada mediante la lista de contactos

Siga el procedimiento para realizar alertas de llamada con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

4 Pulse  o  para ir a Alerta de llamada.

Pulse  para seleccionar.

La pantalla muestra Alerta de llamada y el ID o alias de suscriptor. El indicador LED verde se ilumina.

---

5 Espere a que se produzca la confirmación.

- Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.
  - Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.
- 

## Realización de alertas de llamada mediante marcación manual

Siga el procedimiento para realizar alertas de llamada con la radio mediante marcación manual.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Marcación manual. Pulse  para seleccionar. La pantalla muestra un cursor intermitente.

---

4 Introduzca el ID de suscriptor y pulse  para continuar.

---

5 Pulse  o  para ir a Alerta de llamada. Pulse  para seleccionar. La pantalla muestra Alerta de llamada y el ID o alias de suscriptor. El indicador LED verde se ilumina.

---

6 Espere a que se produzca la confirmación.

- Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.

- Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

---

## Respuesta a alertas de llamada

Siga el procedimiento para responder a alertas de llamada con la radio.

Cuando se recibe una alerta de llamada:

- Se oye un tono repetitivo.
- El indicador LED parpadea en amarillo.
- La pantalla muestra la lista de notificaciones y aparece una alerta de llamada con el alias o ID de la radio que realiza la llamada.

En función de la configuración de su distribuidor o administrador del sistema, puede responder a una alerta de llamada realizando una de las siguientes opciones:

- Pulse el botón **PTT** para responder con una llamada privada directamente a la persona que llama.

- Pulse el botón **PTT** para continuar la comunicación normal con el grupo de conversación.

La alerta de llamada se mueve a la opción de llamadas perdidas en el menú Registro de llamadas. Puede responder al autor de la llamada perdida desde el registro de llamadas perdidas.

---

Consulte [Lista de notificaciones en la página 202](#) y [Funciones del registro de llamadas en la página 137](#) para obtener más información.

## Modo Silenciar

El modo Silenciar ofrece al usuario la opción de silenciar todos los indicadores de audio de la radio.

Cuando se inicia el modo Silenciar, se silencian todos los indicadores de audio de la radio, con excepción de las funciones de mayor prioridad como las operaciones de emergencia.

Cuando se sale del modo Silenciar, la radio vuelve a utilizar tonos y transmisiones de audio.

**NOTA:**

Se trata de una función adquirible. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación del modo Silenciar

Siga el procedimiento para activar el modo Silenciar.

Acceda a esta función a través del botón programable **Modo Silenciar**.

Cuando se activa el modo Silenciar ocurre lo siguiente:

- Suena un tono indicador positivo.
- La pantalla muestra `Modo de silenciado activado`.
- La luz LED roja empieza a parpadear y sigue haciéndolo hasta que se sale del modo Silenciar.
- Se muestra el icono del **Modo Silenciar** en la pantalla de inicio.
- La radio está silenciada.
- El temporizador del modo Silenciar comienza la cuenta atrás que tiene configurada.

## Configuración del temporizador del modo Silenciar

Es posible activar la función modo Silenciar durante un periodo preconfigurado de tiempo mediante la configuración del temporizador del modo Silenciar. La duración del temporizador se configura en el menú de la radio y puede variar de 30 minutos a 6 horas. Cuando el temporizador expira, se sale del modo Silenciar.

Si el temporizador se queda en 0, la radio se queda en el modo Silenciar durante un periodo de tiempo indefinido hasta que se pulsa el botón programado **Modo Silenciar**.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Temp. silenc.. Pulse  para seleccionar.

5 Pulse  o  para editar el valor numérico de cada dígito y pulse .

- El icono del **modo Silenciar** desaparece de la pantalla de inicio.
- La radio desactiva el silencio y se restaura el estado del altavoz.
- Si el temporizador del modo Silenciar no ha expirado, se detiene.

#### NOTA:

También se sale del modo Silenciar si el usuario transmite voz o cambia a un canal sin programar.

## Salida del modo Silenciar

Se puede salir de esta función automáticamente cuando expira el temporizador del modo Silenciar.

Lleve a cabo una de las siguientes operaciones para salir del modo Silenciar manualmente:

- Pulse el botón programado **Modo Silenciar**.
- Pulse el botón **PTT** en cualquier entrada.

Cuando se desactiva el modo Silenciar ocurre lo siguiente:

- Suena el tono indicador negativo.
- La pantalla muestra el Modo de silenciado apagado.
- El LED que parpadea en rojo se apaga.

## Funcionamiento de emergencia

Una alarma de emergencia se utiliza para indicar una situación crítica. Es posible iniciar una alarma de emergencia en cualquier momento, incluso cuando haya actividad en el canal actual.

Su distribuidor puede establecer la duración de la pulsación del botón **Emergencia** programado, excepto para la presión prolongada, que es similar a la del resto de botones:

#### Pulsación corta

Duración entre 0,05 y 0,75 segundos.

#### Pulsación larga

Duración entre 1 y 3,75 segundos.

El botón **Emergencia** se asigna junto con la función Emergencia activada/desactivada. Póngase en contacto con su distribuidor para obtener información acerca del funcionamiento asignado al botón **Emergencia**.

### NOTA:

Si se pulsa brevemente el botón **Emergencia** se inicia el modo de emergencia, a continuación, una presión prolongada permite que la radio salga del modo de emergencia.

Si una presión prolongada del botón **Emergencia** inicia el modo de emergencia, a continuación, una pulsación breve permite que la radio salga del modo de emergencia.

La radio soporta tres alarmas de emergencia:

- Alarma de emergencia
- Alarma de emergencia con llamada
- Alarma de emergencia con transmisión de voz posterior

### NOTA:

Solo se puede asignar una de las alarmas de emergencia anteriores al botón que ha programado previamente como **Emergencia** o al pedal de Emergencia.

Además, todas las alarmas tienen los siguientes tipos:

### Normal

La radio transmite una señal de alarma y utiliza un indicador visual o sonoro.

### Silencio

La radio transmite una señal de alarma sin utilizar ningún indicador sonoro ni visual. La radio recibe llamadas sin ningún sonido a través del altavoz, hasta que el periodo programado de transmisión con el *micrófono activo* finaliza o se pulsa el botón **PTT**.

### Silencio con voz

La radio transmite una señal de alarma sin ningún indicador sonoro ni visual, pero permite que las llamadas entrantes suenen a través del altavoz.

## Recepción de alarmas de emergencia

Siga el procedimiento para recibir alarmas de emergencia en la radio.

Cuando se recibe una alarma de emergencia:

- Suena un tono.
- El LED rojo parpadea.

- La pantalla muestra el icono **Emergencia** y el alias de la persona que llama de emergencia o, si hay más de una alarma, se muestran todos los alias de autor de llamada de emergencia en la lista de alarmas.

1 Lleve a cabo una de las siguientes acciones:

- Si solo hay una alarma, pulse  para ver más detalles.
- Si hay más de una alarma, pulse  o  para ir al alias deseado y, a continuación, pulse  para ver más detalles.

2 Pulse  para ver las opciones de acción.

3 Pulse  y seleccione **Sí** para salir de la lista de alarmas.

4 Pulse  para acceder al menú.

5 Seleccione **Lista de alarmas** para volver a ver la lista de alarmas.

6 El tono suena y el indicador LED parpadea en rojo hasta que salga del modo de emergencia. No obstante, se puede silenciar el tono. Lleve a cabo una de las siguientes acciones:

- Pulse el botón **PTT** para llamar al grupo de radios que recibió la alarma de emergencia.
- Pulse cualquier botón programable.
- Salga del modo de emergencia. Consulte [Salida del modo de emergencia tras recibir la alarma de emergencia en la página 442](#).

## Respuesta a alarmas de emergencia

Siga el procedimiento para responder a alertas de emergencia con la radio.

1 Asegúrese de que en la pantalla se muestra la lista de alarmas. Pulse  o  para ir al ID o alias que desee.

2  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el

usuario responda. Pulse el botón **PTT** para transmitir el mensaje de voz de no emergencia al mismo grupo al que se envió la alarma de emergencia.

El indicador LED verde se ilumina. La radio se mantiene en el modo de emergencia.

---

### 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
-  Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

---

### 4 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde:

- El indicador LED verde parpadea.
- La pantalla muestra el icono **Llamd. grupo**, el ID de la radio transmisora y la lista de alarmas.

---

El mensaje de voz de emergencia solo puede transmitirse mediante la radio que inicia la emergencia. Todas las demás radios, incluida la radio que recibe la emergencia, transmiten mensajes de voz de no emergencia.

## Salida del modo de emergencia tras recibir la alarma de emergencia

Realice alguna de estas acciones para salir del modo de emergencia tras recibir la alarma de emergencia:

- Elimine los elementos de alarma.
- Apague la radio.

## Envío de alarmas de emergencia

Esta función permite enviar una alarma de emergencia, una señal sin voz, que activa una indicación de alerta en un grupo de radios. La radio no muestra ningún indicador sonoro o visual durante el modo de emergencia cuando está configurada en Silencio.

Siga el procedimiento para enviar alarmas de emergencia con la radio.

### 1 Pulse el botón **Emergen. enc.** programado.

Verá uno de estos resultados:

- La pantalla muestra **Alarma Tx** y el alias de destino.

-  La pantalla muestra Telegrama Tx y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

#### NOTA:

Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia. El tono de búsqueda de emergencia se puede programar a través del CPS.

## 2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena el tono de emergencia.
- El LED rojo parpadea.
- La pantalla muestra Alarma enviada.

Si no se realiza correctamente tras agotar todos los reintentos:

- Suena un tono.
- La pantalla muestra Alarma fallida.

[Enviar comentarios](#)

La radio sale del modo de alarma de emergencia y vuelve a la pantalla de inicio.

## Envío de alarmas de emergencia con llamada

Esta función permite enviar una alarma de emergencia con llamada a un grupo de radios. Tras el reconocimiento de una radio que esté dentro del grupo, el grupo de radios puede comunicarse a través de un canal de emergencia programado.

Siga el procedimiento para enviar alarmas de emergencia mediante llamada con la radio.

- 1 Pulse el botón **Emergencia activada** programado o el pedal de **emergencia**. La pantalla muestra Enviando Alarma, que se alterna con el ID de la radio.

Verá lo siguiente:

- La pantalla muestra Telegrama Tx y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

**NOTA:**

Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia. El distribuidor o administrador del sistema pueden programar el tono de búsqueda de emergencia.

---

**2** Espere a que se produzca la confirmación.

Si es correcta:

- Suena el tono de emergencia.
- El LED rojo parpadea.
- La pantalla muestra **Alarma enviada**.
- La radio entra en el modo de llamada de emergencia cuando la pantalla muestra **Emergencia** y el alias del grupo de destino.

---

**3** Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada grupal**.

---

**4** Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
  -  Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.
- 

**5** Suelte el botón **PTT** para escuchar.

La pantalla muestra los alias de grupo y de autor de llamada.

---

**6**  Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

---

**7** Para salir del modo de emergencia cuando finaliza la llamada, pulse el botón **Emergencia desactivada** .

La radio volverá a la pantalla de inicio.

---

## Alarmas de emergencia con transmisión de voz posterior

Esta función permite enviar una alarma de emergencia con transmisión de voz posterior a un grupo de radios. El micrófono de la radio se activa de manera automática y le permite comunicarse con el grupo de radios sin tener que pulsar el botón **PTT**. El estado de micrófono activado también se conoce como *micrófono activo*.

### NOTA:

la radio no detecta el micrófono no IMPRES conectado al conector para accesorios trasero. Si la radio no detecta ningún micrófono en el conector programado especificado, comprueba el conector alternativo y da prioridad al micrófono encontrado.

Si la radio tiene el modo de ciclo de emergencias activado, las repeticiones de *micrófono activo* y el periodo de recepción se realizan con una duración programada. Durante el modo de ciclo de emergencias, las llamadas recibidas suenan a través del altavoz.

Si pulsa el botón **PTT** durante el periodo de recepción programado, escuchará un tono de prohibición que indica que debe soltar el botón **PTT**. La radio ignora que se ha

pulsado el botón **PTT** y permanece en modo de emergencia.

Si pulsa el botón **PTT** mientras el *micrófono activo* está conectado y lo mantiene pulsado después de que haya terminado esta conexión, la radio seguirá transmitiendo hasta que suelte el botón **PTT**.

si se produce un error en la solicitud de la alarma de emergencia, la radio no intenta enviar de nuevo la solicitud y entra directamente en el estado de *micrófono activo*.

### NOTA:

Puede que ciertos accesorios no admitan el *micrófono activo*. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Envío de alarmas de emergencia con transmisión de voz posterior

Siga el procedimiento para enviar alarmas de emergencia mediante voz con la radio.

- 1 Pulse el botón **Emergencia activada** programado o el pedal de **emergencia**.

Verá uno de estos resultados:

- La pantalla muestra **Alarma Tx** y el alias de destino.
- La pantalla muestra **Telegrama Tx** y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

- 
- 2** Cuando la pantalla muestre **Alarma enviada**, hable con claridad al micrófono.

La radio detiene automáticamente la transmisión:

- Cuando el tiempo de duración del ciclo entre el *micrófono de emergencia* y las llamadas recibidas se agota, si el modo de ciclo de emergencia está activado.
- La conexión del *micrófono activo* termina si el modo de ciclo de emergencia está desactivado.

- 
- 3** Pulse el botón **Emergencia desactivada** programado para salir del modo de emergencia.

La radio volverá a la pantalla de inicio.

---

## Reinicio del modo de emergencia

Esta función solo se aplica a la radio que envía la alarma de emergencia. Siga el procedimiento para reiniciar el modo de emergencia en la radio.

Lleve a cabo una de las siguientes acciones:

- Cambia el canal mientras la radio se encuentra en modo de emergencia. Si la alarma de emergencia está habilitada en el nuevo canal, la radio sale del modo de emergencia y reinicia la emergencia.
- Pulse el botón **Emergencia activada** programado durante un estado de transmisión/ inicio de emergencia. Esto provoca que la radio salga de este estado y reinicie la emergencia.

---

## Salida del modo de emergencia tras enviar la alarma de emergencia

Esta función solo se aplica a la radio que envía la alarma de emergencia.

La radio sale del modo de emergencia:

- Si se recibe una confirmación (solo para alarma de emergencia).
- Si se han agotado todos los intentos de enviar la alarma.

**NOTA:**

Si la radio se apaga, saldrá del modo de emergencia. La radio no volverá a iniciar automáticamente el modo de emergencia cuando se vuelva a encender.

Siga el procedimiento para salir del modo de emergencia de la radio.

Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Emergencia desactivada** programado.
- Cambie el canal a un canal nuevo que no tiene el sistema de emergencia configurado.  
La pantalla muestra Sin emergencia.

## Eliminación de un elemento de alarma de la lista de alarmas

Siga el procedimiento para eliminar los elementos de alarma de la lista de alarmas, para salir del modo de emergencia.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Lista alar. Pulse  para seleccionar.

---

- 3 Pulse  o  para seleccionar el elemento de alarma que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

---

## Mensajes de texto

La radio puede recibir datos como, por ejemplo, un mensaje de texto, de otra radio o una aplicación de mensajes de texto.

Existen dos tipos de mensajes de texto: mensajes de texto y mensajes de texto breves DMR (Radio móvil digital). La longitud máxima de un mensaje de texto breve DMR es de 23 caracteres. La longitud máxima de un mensaje de texto es de 280 caracteres, incluida la línea de asunto. La línea de asunto solo aparece al recibir mensajes desde las aplicaciones de correo electrónico.

### NOTA:

La longitud máxima de caracteres se aplica solo a los modelos con la última versión de software y hardware. Para modelos de radio con software y hardware más antiguo, la longitud máxima de un mensaje de texto es de 140 caracteres. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Para el árabe, la orientación de la entrada de texto es de derecha a izquierda.

## Mensajes de texto

Los mensajes de texto se guardan en un buzón y se ordenan según el mensaje recibido más recientemente.

### Visualización de los mensajes de texto

Siga el procedimiento para ver los mensajes de texto en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.  
Si el buzón está vacío:
  - La pantalla muestra `Lista vacía`.
  - Si el tono de teclado está activado, sonará un tono.

---

4 Pulse  o  para ir al mensaje que desee.

Pulse  para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

## Visualización de mensajes de texto de estado de telemetría

Siga el procedimiento para ver un mensaje de texto de estado de telemetría desde el buzón de entrada.

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

4 Pulse  o  para ir al mensaje que desee.

Pulse  para seleccionar.

No puede responder a un mensaje de texto de estado de telemetría.

La pantalla muestra Telemetría: <Mensaje de texto de estado>.

5 Mantenga pulsado  para volver a la pantalla de inicio.

## Respuesta a mensajes de texto

Siga el procedimiento para responder a mensajes de texto con la radio.

Al recibir un mensaje de texto:

- La pantalla muestra la lista de notificaciones con el alias o ID del remitente.
- La pantalla muestra el icono de **mensaje**.

**NOTA:**

La radio sale de la pantalla de alerta de mensaje de texto y realiza una llamada privada o de grupo al remitente del mensaje si se pulsa el botón **PTT**.

**1** Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a **Leer**. Pulse  para seleccionar.  
La pantalla muestra el mensaje de texto. Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.
- Pulse  o  para ir a **Leer luego**. Pulse  para seleccionar.  
La radio vuelve a la pantalla en la que se encontraba antes de recibir el mensaje de texto.
- Pulse  o  para ir a **Eliminar**. Pulse  para seleccionar.

**2** Lleve a cabo una de las siguientes acciones:

- Pulse  para volver al buzón.

- Pulse  por segunda vez para responder, reenviar o eliminar el mensaje de texto.

## Respuesta a mensajes de texto con mensajes de texto rápido

Siga el procedimiento para responder a los mensajes de texto mediante mensajes de texto rápido en la radio.

**1** Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado.  
Continúe en el paso [paso 3](#).
- Pulse  para acceder al menú.

**2** Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.**3** Pulse  o  para ir a **Buzón**. Pulse  para seleccionar.

4 Pulse  o  para ir al mensaje que desee.

Pulse  para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

---

5 Pulse  para acceder al submenú.

---

6 Pulse  o  para ir a Responder. Pulse  para seleccionar.

---

7 Pulse  o  para ir a Resp. ráp. Pulse  para seleccionar.

---

8 Pulse  o  para ir al mensaje que desee.  
Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

---

9 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
  - La pantalla muestra un aviso pequeño negativo.
  - La radio vuelve a la pantalla de la opción Reenviar.
- 

## Reenvío de mensajes de texto

Siga el procedimiento para reenviar mensajes de texto con la radio.

En la pantalla de la opción *Volver a enviar*:

Pulse  para volver a enviar el mismo mensaje al mismo alias o ID de grupo o suscriptor.

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve a la pantalla de la opción *Volver a enviar*.

---

### Transferencia de mensajes de texto

Siga el procedimiento para transferir mensajes de texto con la radio.

En la pantalla de la opción *Volver a enviar*:

- 1 Pulse  o  para ir a *Transferir* y, a continuación, pulse  para enviar el mismo mensaje a otro suscriptor, o ID o alias de grupo.

- 2 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

- 
- 3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

#### NOTA:

También puede seleccionar manualmente la dirección de una radio de destino (consulte [Transferencia de mensajes de texto mediante marcación manual en la página 453](#)).

## Transferencia de mensajes de texto mediante marcación manual

Siga el procedimiento para transferir mensajes de texto con la radio mediante marcación manual.

- 1 Pulse  o  para Reenviar. Pulse  para seleccionar.

---

- 2 Pulse  para enviar el mismo mensaje a otro suscriptor o ID de grupo o suscriptor.

---

- 3 Pulse  o  para ir a Marcación manual. Pulse  para seleccionar. La pantalla muestra Núm. radio!.

---

- 4 Introduzca el ID de suscriptor y pulse  para continuar. La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

---

[Enviar comentarios](#)

- 5 Espere a que se produzca la confirmación. Si es correcta:
    - Suena un tono.
    - La pantalla muestra un pequeño aviso positivo.
 Si no es correcta:
    - Suena un tono.
    - La pantalla muestra un aviso pequeño negativo.
- 

## Edición de mensajes de texto

Seleccione **Editar** para editar el mensaje.

### NOTA:

si existe una línea de asunto (para los mensajes recibidos desde una aplicación de correo electrónico), no podrá editarla.

- 1 Pulse  o  para ir a **Editar**. Pulse  para seleccionar. La pantalla muestra un cursor intermitente.

---

- 2 Utilice el teclado para editar el mensaje.

- Pulse  para desplazarse un espacio hacia la izquierda.
- Pulse  o  para desplazarse un espacio hacia la derecha.
- Pulse  para borrar los caracteres no deseados.
- Mantenga pulsado  para cambiar el método de introducción de texto.

---

**3** Pulse  cuando termine de redactar el mensaje.

---

**4** Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a **Enviar** y pulse  para enviar el mensaje.
- Pulse  o  para ir a **Guardar** y pulse  para guardar el mensaje en la carpeta **Borrador**.
- Pulse  para editar el mensaje.

- Pulse  para elegir entre borrar el mensaje o guardarlo en la carpeta **Borrador**.
- 

## Redacción de mensajes de texto

Siga el procedimiento para escribir mensajes de texto con la radio.

**1** Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje de texto** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.
- 

**2** Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.

---

**3** Pulse  o  para ir a **Redac.** Pulse  para seleccionar.

Aparece un cursor intermitente.

---

**4** Utilice el teclado para escribir el mensaje.

Pulse  para desplazarse un espacio hacia la izquierda.

Pulse  o  para desplazarse un espacio hacia la derecha.

Pulse  para borrar los caracteres no deseados.

Mantenga pulsado  para cambiar el método de introducción de texto.

**5** Pulse  cuando termine de redactar el mensaje. Lleve a cabo una de las siguientes acciones:

- Pulse  para enviar el mensaje.
- Pulse . Pulse  o  para elegir entre editar, eliminar o guardar el mensaje. Pulse  para seleccionar.

## Envío de mensajes de texto

Siga el procedimiento para enviar mensajes de texto con la radio.

[Enviar comentarios](#)

Se asume que tiene un nuevo mensaje de texto escrito o un mensaje de texto guardado.

Seleccione el destinatario del mensaje. Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- Pulse  o  para ir a *Marcado. manual.*

Pulse  para seleccionar. Introduzca el ID de suscriptor. La primera línea de la pantalla muestra *Núm. radio:*. La segunda línea de la pantalla muestra un cursor intermitente.

Introduzca el ID o alias de suscriptor. Pulse .

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando su mensaje.

Si es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño positivo.

Si no es correcta:

- Se oye un tono grave.

- La pantalla muestra un aviso pequeño negativo.
- El mensaje se mueve a la carpeta Enviados.
- El mensaje se marca con un icono de error de envío.

## NOTA:

Para un mensaje de texto nuevo, la radio regresa a la pantalla de la opción Reenviar.

## Eliminación de mensajes de texto desde el buzón

Siga el procedimiento para eliminar mensajes de texto desde el buzón de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

2 Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.

3 Pulse  o  para ir a **Buzón**. Pulse  para seleccionar.

Si el buzón está vacío:

- La pantalla muestra **Lista vacía**.
- Suena un tono.

4 Pulse  o  para ir al mensaje que desee. Pulse  para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5 Pulse  para acceder al submenú.

6 Pulse  o  para ir a **Eliminar**. Pulse  para seleccionar.

- 7 Pulse  o  para elegir **Sí**. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso positivo. La pantalla vuelve al buzón.

## Eliminación de todos los mensajes de texto desde el buzón

Siga el procedimiento para eliminar todos los mensajes de texto desde el buzón de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.

- 3 Pulse  o  para ir a **Buzón**. Pulse  para seleccionar.

Si el buzón está vacío:

- La pantalla muestra **Lista vacía**.
- Suenan un tono.

- 4 Pulse  o  para ir a **Eliminar todo**. Pulse  para seleccionar.

- 5 Pulse  o  para elegir **Sí**. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso positivo.

## Envío de mensajes de texto

Cuando se envía un mensaje a otra radio, este se guarda en la carpeta **Enviados**. El último mensaje de texto enviado siempre se añade al principio de la carpeta **Enviados**. Puede enviar, transmitir, editar o eliminar un mensaje de texto enviado.

La carpeta **Enviados** es capaz de almacenar los 30 últimos mensajes enviados como máximo. Cuando esté llena, el siguiente mensaje de texto que se envíe sustituirá

automáticamente al mensaje de texto más antiguo de la carpeta.

Si sale de la pantalla de envío de mensajes mientras se envía el mensaje, la radio actualiza el estado del mensaje en la carpeta Enviados sin realizar ninguna indicación en la pantalla ni mediante un sonido.

Si la radio cambia de modo o se apaga antes de que se actualice el estado del mensaje en la carpeta Enviados, la radio no puede terminar de enviar los mensajes en curso y los marca automáticamente con un icono de **error de envío**.

La radio admite un máximo de cinco mensajes en curso al mismo tiempo. En este tiempo, la radio no puede enviar mensajes nuevos y los marca automáticamente con un icono de **error de envío**.

Si mantiene pulsado  en cualquier momento, la radio volverá a la pantalla de inicio.

**NOTA:**

Si el tipo de canal (por ejemplo, un canal digital convencional o Capacity Plus) no coincide, solo podrá editar, transferir o borrar un mensaje enviado.

## Visualización de mensajes de texto enviados

Siga el procedimiento para ver los mensajes de texto enviados en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Enviados. Pulse  para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra *Lista vacía*.
  - Si el tono de teclado está activado, sonará un tono bajo.
-

4 Pulse  o  para ir al mensaje que desee.

Pulse  para seleccionar.

El icono situado en la esquina superior derecha de la pantalla indica el estado del mensaje. Consulte [Iconos de Enviados](#).

---

## Envío de mensajes de texto enviados

Siga el procedimiento para enviar mensajes de texto enviados con la radio.

Si está viendo un mensaje enviado:

1 Pulse  mientras visualiza el mensaje.

---

2 Puede reenviar o transferir el mensaje de texto enviado. Lleve a cabo una de las siguientes acciones:

-  para ir a Volver a enviar. Pulse  para seleccionar.

-  para ir a Transferir. Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

---

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.
  - La radio accede a la pantalla de la opción Volver a enviar. Consulte [Reenvío de mensajes de texto en la página 164](#) para obtener más información.
-

## Eliminación de los mensajes de texto enviados desde la carpeta Enviados

Siga el procedimiento para eliminar los mensajes de texto enviados de la radio desde la carpeta Enviados.

Si está viendo un mensaje enviado:

1 Pulse  .

---

2 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

---

## Eliminación de todos los mensajes de texto enviados desde la carpeta Enviados

Siga el procedimiento para eliminar todos los mensajes de texto enviados de la radio desde la carpeta Enviados.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.
- 

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Enviados. Pulse  para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra Lista vacía.
  - Suena un tono.
- 

4 Pulse  o  para ir a Eliminar todo. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para elegir Sí. Pulse  para seleccionar. La pantalla muestra un pequeño aviso positivo.
  - Pulse  o  para seleccionar No. Pulse  para seleccionar. La radio vuelve a la pantalla anterior.
-

## Mensajes de texto guardados

Puede guardar un mensaje de texto para enviarlo más adelante.

Si al pulsar el botón **PTT** o cambiar de modo, la radio sale de la pantalla de escritura/edición de mensajes de texto mientras está escribiendo o editando un mensaje de texto, el mensaje de texto actual se guardará automáticamente en la carpeta Borrador.

El último mensaje de texto guardado se añade siempre al principio de la lista Borrador.

La carpeta Borrador almacena los diez últimos mensajes guardados como máximo. Cuando la carpeta está llena, el siguiente mensaje de texto que se guarde sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

## Visualización de mensajes de texto guardados

Siga el procedimiento para ver los mensajes de texto guardados en la radio.

- 1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

- 
- 2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

- 
- 3 Pulse  o  para ir a Borradores. Pulse  para seleccionar.

- 
- 4 Pulse  o  para ir al mensaje que desee. Pulse  para seleccionar.

## Edición de mensajes de texto guardados

Siga el procedimiento para editar los mensajes de texto guardados en la radio.

- 1 Pulse  mientras visualiza el mensaje.

- 2 Pulse  o  para ir a **Editar**. Pulse  para seleccionar.

Aparece un cursor intermitente.

- 3 Utilice el teclado para escribir el mensaje.

Pulse  para desplazarse un espacio hacia la izquierda.

Pulse  o  para desplazarse un espacio hacia la derecha.

Pulse  para borrar los caracteres no deseados.

Mantenga pulsado  para cambiar el método de introducción de texto.

- 4 Pulse  cuando termine de redactar el mensaje.

Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a **Enviar**. Pulse  para enviar el mensaje.

- Pulse . Pulse  o  para elegir entre guardar o borrar el mensaje. Pulse  para seleccionar.

## Eliminación de mensajes de texto guardados desde la carpeta Borrador

Siga el procedimiento para eliminar los mensajes de texto guardados del borrador de la radio.

- 1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

- 2 Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.

- 3 Pulse  o  para ir a **Borradores**. Pulse  para seleccionar.

4 Pulse  o  para ir al mensaje que desee.

Pulse  para seleccionar.

---

5 Pulse  o  para ir a Eliminar. Pulse  para eliminar el mensaje de texto.

---

## Mensajes de texto rápidos

La radio admite un máximo de 50 mensajes de texto rápidos, que es la configuración programada por el distribuidor.

Mientras se predefinen los mensajes de texto rápido, puede editar cada mensaje antes de enviarlo.

## Envío de mensajes de texto rápidos

Siga el procedimiento para enviar mensajes de texto rápidos predefinidos de la radio a alias predefinidos.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 6](#).

- Pulse el botón de **acceso de marcación rápida** programado.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

Continúe con el paso [paso 6](#).

- Pulse  para acceder al menú.
- 

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Texto rápido. Pulse  para seleccionar.

---

4 Pulse  o  para ir al mensaje de texto rápido que desee. Pulse  para seleccionar.

---

5 Realice el siguiente procedimiento para seleccionar el destinatario y enviar el mensaje.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

---

### 6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio accede a la pantalla de la opción Reenviar. Consulte [Reenvío de mensajes de texto en la página 164](#) para obtener más información.

---

## Configuración de la introducción de texto

La radio le permite configurar texto diferente.

Puede configurar los siguientes ajustes para introducir texto en la radio:

- Predicción de palabras
- Palabra correcta

- Frase en mayúscula

- Mis palabras

La radio es compatible con los siguientes métodos de introducción de texto:

- Números
- Simbología
- Predictivo o multipulsación
- Idioma (si está programado)

### NOTA:

Pulse  en cualquier momento para volver a la pantalla anterior o mantenga pulsado  unos segundos para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

## Activación o desactivación de la corrección de palabras

Ofrece opciones de palabras alternativas cuando el diccionario integrado no reconoce la palabra introducida en el editor de texto.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Palabra Co. Pulse  para seleccionar.

---

- 6 Lleve a cabo una de las siguientes acciones:
  - Pulse  o  para ir a Palabra Co. Pulse  para seleccionar.
  - Pulse para activar Palabra Co. Si está activado,  aparece junto a Activado.

[Enviar comentarios](#)

- Pulse para desactivar Palabra Co. Si se desactiva,  junto a Activado desaparece.

## Activación o desactivación de la predicción de palabras

**Predicción de palabras:** La radio puede aprender secuencias de palabras comunes que introduce con frecuencia. A continuación, predice la siguiente palabra que quizás desee utilizar después de introducir la primera letra de una secuencia de palabras comunes en el editor de texto.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Pred. palabras. Pulse  para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para activar la predicción de palabras. Si está activado,  aparece junto a Activado.
  - Pulse  para deshabilitar el control de distorsión dinámica del micrófono. Si se desactiva,  junto a Activado desaparece.
- 

## Frase en mayúscula

Esta función se utiliza para activar automáticamente el uso de mayúscula en la primera letra de la primera palabra de cada frase nueva.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada de texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Frase mayús. Pulse  para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para activar la frase en mayúscula. Si está activado,  aparece junto a Activado.

- Pulse  para desactivar la frase mayúscula. Si se desactiva,  junto a Activado desaparece.
- 

## Visualización de palabras personalizadas

Puede agregar sus propias palabras personalizadas al diccionario integrado de la radio. La radio mantiene una lista que contiene estas palabras.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Entrada de texto. Pulse  para seleccionar.

---

[Enviar comentarios](#)

- 5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Lista de palabras. Pulse  para seleccionar.  
La pantalla muestra la lista de palabras personalizadas.

---

## Edición de palabras personalizadas

Puede editar las palabras personalizadas guardadas en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.

---

6 Pulse  o  para ir a Lista de palabras. Pulse  para seleccionar.

La pantalla muestra la lista de palabras personalizadas.

---

7 Pulse  o  para seleccionar la palabra deseada. Pulse  para seleccionar.

---

8 Pulse  o  para ir a Editar. Pulse  para seleccionar.

---

9 Utilice el teclado para editar la palabra personalizada.

- Pulse  para desplazarse un espacio hacia la izquierda.
  - Pulse la tecla  para desplazarse un espacio hacia la derecha.
  - Pulse la tecla  para borrar cualquier carácter no deseado.
  - Mantenga pulsado  para cambiar el método de introducción de texto.
- 

10 Pulse  cuando haya terminado la palabra personalizada.

---

La pantalla muestra un pequeño aviso de transición, que confirma que se ha guardado la palabra personalizada.

- Si se guarda la palabra personalizada, suena un tono y la pantalla muestra un pequeño aviso positivo.

- Si no se guarda la palabra personalizada, suena un tono bajo y la pantalla muestra un aviso pequeño negativo.

## Adición de palabras personalizadas

Puede agregar palabras personalizadas al diccionario integrado de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Nueva palabra. Pulse  para seleccionar.

La pantalla muestra la lista de palabras personalizadas.

---

- 7 Utilice el teclado para editar la palabra personalizada.
  - Pulse  para desplazarse un espacio hacia la izquierda.
  - Pulse la tecla  para desplazarse un espacio hacia la derecha.
  - Pulse la tecla  para borrar cualquier carácter no deseado.
  - Mantenga pulsado  para cambiar el método de introducción de texto.

---

- 8 Pulse  cuando haya terminado la palabra personalizada.
- 

La pantalla muestra un pequeño aviso de transición, que confirma que se ha guardado la palabra personalizada.

- Si se guarda la palabra personalizada, suena un tono y la pantalla muestra un aviso pequeño positivo.
- Si no se guarda la palabra personalizada, suena un tono bajo y la pantalla muestra un aviso pequeño negativo.

## Eliminación de una palabra personalizada

Siga el procedimiento para eliminar las palabras personalizadas guardadas en la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.
- 

- 6 Pulse  o  para seleccionar la palabra deseada. Pulse  para seleccionar.
- 

- 7 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.
- 

- 8 Seleccione una de las siguientes.
- En ¿Borrar entrada?, pulse  para seleccionar Sí. La pantalla muestra Entrada eliminada.

- Pulse  o  para seleccionar No. Pulse  para volver a la pantalla anterior.
- 

## Eliminación de todas las palabras personalizadas

Siga el procedimiento para eliminar todas las palabras personalizadas del diccionario integrado de la radio.

- 1 Pulse  para acceder al menú.
  - 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
  - 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
  - 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.
- 

- 6 Pulse  o  para ir a Eliminar todo. Pulse  para seleccionar.
- 

- 7 Lleve a cabo una de las siguientes acciones:

- En ¿Borrar entrada?, pulse  para seleccionar Sí. La pantalla muestra Todas las entradas eliminadas.
  - Pulse  o  para elegir No y volver a la pantalla anterior. Pulse  para seleccionar.
- 

## Asignaciones de tarea

Esta función permite que la radio reciba mensajes del despachador que enumeran las tareas que se deben realizar.

### NOTA:

Esta función se puede personalizar a través de CPS de acuerdo con los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Hay dos carpetas que contienen diferentes fichas de trabajo:

### Mis tareas

Contiene fichas de trabajo personalizadas asignadas al ID de usuario con el que ha iniciado sesión.

### Tareas compartida

Contiene fichas de trabajo compartidas asignadas a un grupo de personas.

Puede responder a las Fichas de trabajo con el fin de ordenarlas en las carpetas de Fichas de trabajo. De forma predeterminada, las carpetas son **Todas**, **Nueva**, **Empezada** y **Completada**. Consulte con su distribuidor o administrador del sistema para obtener 10 carpetas más.

### NOTA:

Las fichas de trabajo se conservan incluso después de apagar y volver a encender la radio.

Todas las fichas de trabajo se encuentra en la carpeta **Todas**. En función de cómo esté programada la radio, las fichas de trabajo se ordenan por su nivel de prioridad

seguido de la hora de recepción. En primer lugar aparecen las fichas de trabajo nuevas, las fichas de trabajo con un cambio reciente de estado y las fichas de trabajo con prioridad alta. Tras alcanzar el número máximo de Fichas de trabajo, la siguiente Ficha de trabajo sustituirá automáticamente a la última Ficha de trabajo de la radio. La radio admite un máximo de 100 o 500 fichas de trabajo, dependiendo del modelo. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información. La radio detecta y descarta automáticamente las fichas de trabajo duplicadas con el mismo ID.

Según la importancia de las fichas de trabajo, el despachador les añade un nivel de prioridad. Hay tres niveles de prioridad: Prioridad 1, Prioridad 2 y Prioridad 3. El nivel de prioridad más alto es 1 y el más bajo, 3. También hay fichas de trabajo que no tienen prioridad.

La radio se actualiza en consecuencia cuando el despachador realiza los siguientes cambios:

- Modificar el contenido de las fichas de trabajo.
- Agregar o editar el nivel de prioridad de las fichas de trabajo.
- Mover las fichas de trabajo de una carpeta a otra.
- Cancelar las fichas de trabajo.

## Acceso a la carpeta de Fichas de trabajo

Siga el procedimiento para acceder a la carpeta Fichas trab.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Est. Trab.** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Fichas trab. Pulse  para seleccionar.

---

- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para seleccionar la ficha de trabajo deseada. Pulse  para seleccionar.

---

## Inicio o cierre de sesión en el servidor remoto

Esta función le permite iniciar y cerrar sesión en el servidor remoto utilizando su ID de usuario.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para Iniciar sesión. Pulse  para seleccionar.
 

Si ya ha iniciado sesión, el menú muestra Cerrar sesión.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

---

- 3 Espere a que se produzca la confirmación.
 

Si es correcta:

  - Suena un tono indicador positivo.
  - La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

  - Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.

## Creación de fichas de trabajo

La radio puede crear fichas de trabajo, basadas en una plantilla de ficha de trabajo, y enviar las tareas que deben realizarse.

Es necesario un software de programación de CPS para configurar la plantilla de la ficha de trabajo.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Fichas de trabajo. Pulse  para seleccionar.
- 3 Pulse  o  para Crear ficha. Pulse  para seleccionar.

## Respuesta a las asignaciones de tarea

Siga el procedimiento para responder a las asignaciones de tareas con la radio.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Fichas de trabajo. Pulse  para seleccionar.
- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.
- 4 Pulse  o  para seleccionar la ficha de trabajo que desee. Pulse  para seleccionar.
- 5 Pulse  una vez más para acceder al submenú. También puede pulsar la tecla del número correspondiente (1-9) para dar una **respuesta rápida**.

- 6 Pulse  o  para seleccionar la ficha de trabajo que desee. Pulse  para seleccionar.
- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

- 7 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

## Envío de asignaciones de tarea utilizando una plantilla de asignaciones de tarea

Si la radio está configurada con una plantilla de fichas de trabajo, lleve a cabo las siguientes acciones para enviar la ficha de trabajo.

[Enviar comentarios](#)

- 1 Utilice el teclado para escribir el número de habitación que desee. Pulse  para seleccionar.

- 2 Pulse  o  para ir a Estado habitación. Pulse  para seleccionar.

- 3 Pulse  o  hasta llegar a la opción deseada. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Enviar. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

- 5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.

---

## Envío de asignaciones de tarea utilizando más de una plantilla de asignaciones de tarea

Si la radio está configurada con más de una plantilla de fichas de trabajo, lleve a cabo las siguientes acciones para enviar las fichas de trabajo.

- 1 Pulse  o  hasta llegar a la opción deseada. Pulse  para seleccionar.

- 2 Pulse  o  para ir a **Enviar**. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

- 3 Espere a que se produzca la confirmación.  
Si es correcta:
  - Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

---

## Eliminación de asignaciones de tarea

Siga el procedimiento para eliminar las fichas de trabajo de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Est. Trab.** programado. Continúe con el paso [paso 4](#)
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a **Fichas de trabajo**. Pulse  para seleccionar.

- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.

4 Pulse  o  para acceder a la carpeta Todas.

Pulse  para seleccionar.

5 Pulse  o  para seleccionar la ficha de

trabajo que desee. Pulse  para seleccionar.

6 Pulse  de nuevo mientras visualiza la Ficha de trabajo.

7 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.

[Enviar comentarios](#)

- La pantalla muestra un aviso pequeño negativo.

## Eliminación de todas las asignaciones de tarea

Siga el procedimiento para eliminar todas las fichas de trabajo de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Est. Trab.** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Fichas de trabajo.

Pulse  para seleccionar.

3 Pulse  o  hasta llegar a la carpeta que

desea. Pulse  para seleccionar.

4 Pulse  o  para acceder a la carpeta **Todas**.

Pulse  para seleccionar.

---

5 Pulse  o  para ir a **Eliminar todo**. Pulse

 para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para elegir **Sí**. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso positivo.

- Pulse  o  para seleccionar **No**. Pulse

 para seleccionar.

La radio vuelve a la pantalla anterior.

---

## Privacidad

Esta función ayuda a evitar que los usuarios no autorizados escuchen conversaciones en un canal mediante el uso de una solución de cifrado basada en software. Las partes de señalización e identificación de usuario de una transmisión no se mezclan.

La radio debe tener la privacidad habilitada en el canal para enviar una transmisión con la privacidad habilitada, aunque no es un requisito necesario para recibir una transmisión. Mientras se encuentra en un canal con la privacidad habilitada, la radio puede recibir transmisiones claras o descodificadas.

Es posible que algunos modelos de radio no ofrezcan la función de privacidad o la configuración sea diferente. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La radio admite dos tipos de privacidad, pero solo se puede asignar una a la radio. Los tipos de privacidad son los siguientes:

- Privacidad básica
- Privacidad mejorada

Para descodificar una llamada o una transmisión de datos que tiene la privacidad activada, la radio debe estar programada para tener la misma clave de privacidad (para Privacidad básica) o, el mismo valor de clave e ID de clave (para Privacidad mejorada) que la radio transmisora.

Si la radio recibe una llamada codificada con una clave de privacidad distinta o bien, un valor de clave e ID de clave distintos, el usuario oye una transmisión distorsionada

(Privacidad básica) o nada en absoluto (Privacidad mejorada).

En un canal con la privacidad activada, la radio puede recibir llamadas claras o descodificadas, en función de cómo se haya programado. Además, puede reproducir un tono de aviso o no, en función de cómo se haya programado.

El indicador LED se ilumina en color verde cuando la radio transmite y parpadea rápidamente cuando recibe una transmisión con la función de privacidad activada.

#### NOTA:

Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

## Activación o desactivación de la privacidad

Siga el procedimiento para activar o desactivar la privacidad en la radio.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Privacidad** programado. Omita los pasos que se indican a continuación.

- Pulse  para acceder al menú.

- Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- Pulse  o  para ir a Privacidad. Pulse  para seleccionar.

- Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.
- Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.

## Inhibic. respuesta

Esta función ayuda a prevenir que la radio responda a cualquier transmisión entrante.

### NOTA:

Se trata de una función adquirible. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Si se activa, la radio no genera ninguna transmisión saliente en respuesta a transmisiones entrantes, tales como Verificación de radio, Alerta de llamada, Desactivación de radio, Monitorización remota, Servicio de registro automático (ARS), Respuesta a mensajes privados y envío de informes de ubicación GNSS. La radio no puede recibir llamadas privadas confirmadas cuando se activa esta función. Sin embargo, la radio puede enviar transmisiones manualmente.

## Activación/desactivación de la inhibición de respuesta

Siga el procedimiento para activar o desactivar la inhibición de respuesta en la radio.

Pulse el botón de **Inhib. resp.** programado.

---

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un aviso pequeño positivo momentáneamente.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo momentáneamente.

## Controles de varios sitios

Estas funciones están disponibles cuando el canal actual de la radio forma parte de una conexión del sitio IP o Capacity Plus-Varios sitios.

## Inicio de una búsqueda de sitio manual

Siga el procedimiento para iniciar una búsqueda de sitio manual cuando la intensidad de la señal recibida sea débil para intentar encontrar un sitio con mejor señal.

Si la radio encuentra un nuevo sitio:

- Suena un tono indicador positivo.

Si la radio no logra encontrar un nuevo sitio:

- Suena un tono indicador negativo.

## Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.
- En la pantalla aparecerá Site Locked (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá Site Unlocked (Sitio desbloq.).

## Acceso a lista de sitios cercanos

Esta función permite al usuario comprobar la lista de sitios adyacentes del sitio de inicio actual. Siga el procedimiento para acceder a la lista de sitios vecinos:

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Sitios vecinos. Pulse  para seleccionar.

---

## Seguridad

Esta función puede habilitar o deshabilitar cualquier radio del sistema.

Por ejemplo, puede que quiera deshabilitar una radio robada para evitar que una persona no autorizada la utilice y luego activarla cuando la recupere.

Hay dos maneras de activar o desactivar una radio, con autenticación o sin autenticación.

La desactivación de radio autenticada es una función adquirible. Con la desactivación de radio autenticada, se necesita una verificación para activar o desactivar una radio. Cuando la radio inicia esta función en una radio de destino con autenticación de usuarios, se necesita una frase de paso. La frase de paso se preprograma en la radio de destino mediante CPS.

No recibirá ninguna confirmación si pulsa  durante las operaciones de activar radio o desactivar radio.

### NOTA:

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Desactivando las radios

Siga el procedimiento para desactivar la radio.

- 1 Pulse el botón **Desactivar radio** programado.
- 

- 2 Pulse  o  para ir al ID o alias que desee.
- 

- 3 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un aviso pequeño de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.
- 

- 4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

## Desactivación de las radios mediante la lista de contactos

Siga el procedimiento para desactivar la radio mediante la lista de contactos.

**1** Pulse  para acceder al menú.

**2** Pulse  o  para ir a Contactos. Pulse  para seleccionar.

**3** Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

**4** Pulse  o  para ir a Desactivación radio.

**5** Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

**6** Espere a que se produzca la confirmación.  
Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

## Desactivación de las radios mediante marcación manual

Siga el procedimiento para desactivar la radio mediante marcación manual.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Marcado. manual.  
Pulse  para seleccionar.

---

4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.

La primera línea de texto muestra Núm. radio!.

---

5 Introduzca el ID de suscriptor y pulse  para continuar.

---

6 Pulse  o  para ir a Deshab. radio.

---

7 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde parpadea.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que

indica que la solicitud está en curso. El indicador LED verde se ilumina.

- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

#### 8 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

## Activación de las radios

Siga el procedimiento para activar la radio.

#### 1 Pulse el botón **Habilitar radio** programado.

#### 2 Pulse o para ir al ID o alias que desee.

#### 3 Pulse para seleccionar. Ocurrirá una de las siguientes situaciones:

- La pantalla muestra **Activar radio** y el ID o alias del suscriptor. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
- Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

#### 4 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.
- 

## Activación de las radios mediante la lista de contactos

Siga el procedimiento para activar la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.
- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- 4 Pulse  o  para ir a Habilitar radio.
- 5 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:

- El indicador LED verde parpadea. La pantalla muestra Activar radio y el ID o alias del suscriptor. El indicador LED verde se ilumina.
- Aparece una pantalla de frase de paso.

Introduzca la frase de paso. Pulse  para continuar.

- Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
  - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.
- 

### 6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.
-

## Activación de las radios mediante marcación manual

Siga el procedimiento para activar la radio mediante marcación manual.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a `Contactos`. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a `Marcación manual`.  
Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a `Llamada privada`.  
Pulse  para seleccionar.  
La primera línea de texto muestra `Núm. radio:`.

---

- 5 Introduzca el ID de suscriptor y pulse  para continuar.

---

- 6 Pulse  o  para ir a `Habilitar radio`.

---

- 7 Pulse  para seleccionar. Ocurrirá una de las siguientes situaciones:
  - El indicador LED verde parpadea. La pantalla muestra `Activar radio` y el ID o alias del suscriptor. El indicador LED verde se ilumina.
  - Aparece una pantalla de frase de paso.  
  
Introduzca la frase de paso. Pulse  para continuar.
    - Si la frase de paso es correcta, la pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.
    - Si la frase de paso no es correcta, la pantalla muestra un pequeño aviso negativo y vuelve a la pantalla anterior.

---

- 8 Espere a que se produzca la confirmación.  
Si es correcta:
  - Suena un tono indicador positivo.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

---

## Operario aislado

Esta función solicita que se envíe un mensaje de emergencia si no hay actividad del usuario durante un periodo de tiempo predefinido, como cualquier pulsación de un botón de la radio o la selección de canales.

Tras un periodo programado de tiempo de inactividad por parte del usuario, la radio avisa de antemano mediante un indicador de audio cuando el temporizador de inactividad se agota.

Si el usuario sigue sin confirmarlo antes de que se agote el temporizador de recordatorio predefinido, la radio inicia una alarma de emergencia.

Únicamente se asigna a esta función una de las siguientes alarmas de emergencia:

- Alarma de emergencia
- Alarma de emergencia con llamada

- Alarma de emergencia con transmisión de voz posterior

La radio permanece en el estado de emergencia, lo que permite que se emitan mensajes de voz hasta que se realice una acción. Consulte [Funcionamiento de emergencia en la página 439](#) para obtener más información sobre las formas para salir del modo de emergencia.

### NOTA:

Esta función se limita a las radios con esta función activada. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Bluetooth

Esta función permite utilizar la radio con un dispositivo activado para Bluetooth (accesorio) mediante una conexión Bluetooth. La radio soporta dispositivos activados para Bluetooth de Motorola Solutions y disponibles en el mercado (COTS).

La conexión Bluetooth funciona dentro de un rango de 10 m (32 pies) de la línea de visión. Esta es una línea sin obstáculos entre la radio y el dispositivo habilitado para Bluetooth. Para que funcione con un alto grado de

fiabilidad, Motorola Solutions recomienda no separar la radio y el accesorio.

En las zonas periféricas de recepción, la calidad tanto del tono como de la voz comenzará a sonar "distorsionada" o "entrecortada". Para corregir este problema, debe colocar la radio y el dispositivo habilitado para Bluetooth más cerca el uno del otro (dentro del rango de 10 metros [32 pies] definido) para volver a recibir el audio con claridad. La función Bluetooth de la radio tiene una potencia máxima de 2,5 mW (4 dBm) dentro del rango de 10 m (32 pies).

La radio puede soportar hasta tres conexiones Bluetooth simultáneas con dispositivos habilitados para Bluetooth de tipos únicos. Por ejemplo, un auricular, un escáner y un dispositivo de PTT solo (POD). Las múltiples conexiones con dispositivos habilitados para Bluetooth del mismo tipo no están soportadas.

Consulte el manual del usuario de su dispositivo Bluetooth para obtener más detalles sobre todas las capacidades del mismo.

#### NOTA:

Si se desactiva a través de CPS, se desactivarán todas las funciones relacionadas con Bluetooth y se eliminará la base de datos del dispositivo Bluetooth.

[Enviar comentarios](#)

## Encendido y apagado de la función Bluetooth

Siga el procedimiento para encender y apagar el Bluetooth.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Mi estado. Pulse  para seleccionar.

La pantalla muestra Enc. y Apaga.. El estado actual se indica mediante .

- 4 Lleve a cabo una de las siguientes acciones:
  - Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.

- Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.
- 

## Conexión a dispositivos Bluetooth

Siga el procedimiento para conectarse a dispositivos Bluetooth.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Dispositivos. Pulse  para seleccionar.

---

- 4 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.
  - Pulse  o  para ir a Buscar dispositivos y encontrar los dispositivos disponibles. Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.
- 

- 5 Pulse  o  para Conectar. Pulse  para seleccionar.

Su dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete el acoplamiento. Consulte el manual de usuario de su dispositivo habilitado para Bluetooth.

La pantalla muestra Conectando a <dispositivo>.

---

Espere a que se produzca la confirmación. Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra <Dispositivo> conectado y el icono de **Bluetooth conectado**.
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra Error conexión.

#### NOTA:

Si se necesita un código PIN, consulte [Acceso a las radios mediante el uso de contraseñas en la página 199](#).

## Conexión a dispositivos Bluetooth en el modo de detección

Siga el procedimiento para conectarse a dispositivos Bluetooth en modo de detección.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Encontrarme. Pulse  para seleccionar. Otros dispositivos habilitados para Bluetooth pueden detectar ahora la radio durante un tiempo programado. Esto se denomina modo visible.

Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra <Dispositivo> conectado y el icono de **Bluetooth conectado**.
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra Error conexión.

## Desconexión de dispositivos Bluetooth

Siga el procedimiento para desconectarse de dispositivos Bluetooth.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Disposit. Pulse  para seleccionar.

---

- 4 Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Desconectar. Pulse  para seleccionar.  
La pantalla muestra Descon. de <dispositivo>.

### NOTA:

El dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete la desconexión. Consulte los respectivos manuales de usuario de los dispositivos habilitados para Bluetooth.

Espera a que se produzca la confirmación.

- Suena un tono.
- La pantalla muestra <Dispositivo> desconectado y desaparece el icono de **Bluetooth conectado**.
-  desaparece junto al dispositivo conectado.

## Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth

Siga el procedimiento para alternar la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth externo.

Pulse el botón programado **Camb. audio BT**.

La pantalla muestra uno de los siguientes resultados:

- Suena un tono. La pantalla muestra Redirig. audio a radio.
- Suena un tono. La pantalla muestra Redirig. audio a Bluetooth.

## Visualización de detalles del dispositivo

Siga el procedimiento para ver los detalles del dispositivo en la radio.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Disposit. Pulse  para seleccionar.
- 4 Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

- 5 Pulse  o  para ir a Ver detalles. Pulse  para seleccionar.

## Eliminación del nombre del dispositivo

Puede eliminar un dispositivo desconectado de la lista de dispositivos habilitados para Bluetooth.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Disposit. Pulse  para seleccionar.
- 4 Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

- 5 Pulse  o  para ir a Eliminar. Pulse  para seleccionar. La pantalla muestra Disposit. eliminado.
- 

## Ganancia de micrófono Bluetooth

Esta función permite al usuario controlar el valor de la ganancia del micrófono dispositivo habilitado para Bluetooth conectado.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.
- 
- 3 Pulse  o  para ir a Gan. micro BT. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir al tipo Gan. micro BT y los valores actuales. Pulse  para seleccionar. Puede editar los valores aquí.
- 

- 5 Pulse  o  para aumentar o reducir los valores. Pulse  para seleccionar.
- 

## Ubicación en interiores

### NOTA:

La función de ubicación en interiores solo se aplica a los modelos que cuentan con la última versión de software y hardware. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La ubicación en áreas interiores puede utilizarse para realizar un seguimiento de la ubicación de los usuarios de la radio. Cuando Ubicación en interiores está activada, la radio se encuentra en un modo de detección limitado. Las balizas limitadas se utilizan para ubicar la radio y determinar su posición.

## Activación o desactivación de la ubicación en interiores

Realice una de las siguientes acciones para activar o desactivar la ubicación en interiores.

- Acceda a esta función mediante el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para ir a Bluetooth y pulse  para seleccionar.
  - c. Pulse  o  para ir a Ubicación en interiores y pulse  para seleccionar.
  - d. Pulse  para activar la ubicación en interiores.

La pantalla mostrará Ubicación en interiores activada. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
  - Si no se realiza correctamente, la pantalla muestra Activación errónea. Oirá un tono indicador negativo.
- e. Pulse  para apagar la ubicación en áreas interiores.

La pantalla mostrará Ubicación en interiores desactivada. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
  - Si no se realiza correctamente, la pantalla muestra Desactivación errónea. Oirá un tono indicador negativo.
- Acceda a esta función con el botón programable.

- a. Pulse de manera prolongada el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará **Ubicación en interiores activada**. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono **Ubicación en interiores** disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra **Activación errónea**. Si no se realiza correctamente, oirá un tono indicador negativo.

- b. Pulse el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará **Ubicación en interiores desactivada**. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono **Ubicación en interiores** disponible en la pantalla de inicio.

- Si no se realiza correctamente, la pantalla muestra **Desactivación errónea**. Si no se realiza correctamente, oirá un tono indicador negativo.

## Acceso a la información de balizas de ubicación en interiores

Siga el procedimiento para acceder la información de las señales periódicas de la ubicación en áreas interiores.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Ubicación en interiores y pulse  para seleccionar.

---

- 4 Pulse  o  para ir a **Balizas** y pulse  para seleccionar.

En la pantalla aparece la información de las balizas.

## Lista de notificaciones

La radio dispone de una lista de notificaciones que incluye todos los eventos sin leer del canal, como por ejemplo, mensajes de texto sin leer, mensajes de telemetría, llamadas perdidas y alertas de llamadas.

La pantalla muestra el icono de **notificación** si la lista de notificaciones tiene uno o más eventos.

La lista admite un máximo de 40 eventos sin leer. Cuando la lista está completa, el siguiente evento reemplaza automáticamente al evento más antiguo. Una vez leídos los eventos, se eliminan de la lista de notificaciones.

Para mensajes de texto, eventos de llamada y alerta de llamada perdida, el número máximo son 30 mensajes de texto y 10 llamadas o alertas de llamadas perdidas. El número máximo depende de la capacidad de la lista de funciones individual (fichas de trabajo, mensajes de texto o llamadas o alertas de llamadas perdidas).

## Acceso a la lista de notificaciones

Siga el procedimiento para acceder a la lista de notificaciones de la radio.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a **Notificación**. Pulse  para seleccionar.
- 3 Pulse  o  para seleccionar el evento que desee. Pulse  para seleccionar.  
  
Pulse de forma prolongada  para volver a la pantalla de inicio.

## Sistema de repetición de rango automático

El sistema de repetición de rango automático (ARTS) es una función solo analógica diseñada para informarle de

que la radio está fuera de cobertura de otras radios equipadas con ARTS.

Las radios equipadas con ARTS transmiten o reciben señales periódicamente para confirmar que se encuentran dentro del alcance de las otras.

La radio proporciona las siguientes indicaciones de estado:

### **Alerta de primera conexión**

Suena un tono.

La pantalla muestra `En alcance` tras el alias de canal.

### **Alerta dentro de cobertura de ARTS**

Suena un tono, si está programado.

La pantalla muestra `En alcance` tras el alias de canal.

### **Alerta fuera de cobertura de ARTS**

Suena un tono. El LED rojo parpadea rápidamente.

En la pantalla se alterna el mensaje `Fuera de alcance` y la pantalla de inicio.

#### **NOTA:**

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Programación a través del interfaz de aire

El distribuidor puede actualizar la radio de forma remota mediante la programación inalámbrica (OTAP) sin ninguna conexión física. Además, algunos ajustes también se pueden configurar con OTAP.

Cuando la radio ejecuta OTAP, el LED verde parpadea.

Cuando la radio recibe datos de gran volumen:

- La pantalla muestra el icono de **datos de gran volumen**.
- El canal está ocupado.
- Suena un tono negativo si se pulsa el **PTT**.

Cuando OTAP finaliza, según la configuración:

- Suena un tono. La pantalla muestra `Actualizando` `Reiniciando`. La radio se reinicia apagándose y encendiéndose de nuevo.
- Puede seleccionar `Reiniciar ahora` o `Posponer`. Si selecciona `Posponer`, la radio vuelve a la pantalla anterior. La pantalla muestra el icono de **temporizador de retardo OTAP** hasta que se produzca el reinicio automático.

Cuando la radio se enciende tras el reinicio automático:

- Si se realiza correctamente, la pantalla muestra Actual. soft. completada.
- Si no se realiza correctamente, la pantalla muestra Actual. soft. fallida.

Consulte [Verificación de la información sobre actualización de software en la página 231](#) para la versión actualizada del software.

## Bloqueo de transmisión

La función de bloqueo de transmisión permite a los usuarios bloquear todas las transmisiones de la radio.

### NOTA:

Las funciones de Bluetooth y Wi-Fi están disponibles en el modo de bloqueo de transmisión.

## Activación de la inhibición de transmisión

Siga el procedimiento para activar la inhibición de transmisión.

Realice una de las siguientes acciones:

[Enviar comentarios](#)

- Pulse  o  para ir a Inhib. Tx y pulse  para seleccionar.
- Pulse el botón programable **Bloq. transmis.**

- Suena un tono indicador positivo.
- La pantalla muestra Inhibición de Tx activado.

### NOTA:

El estado de la inhibición de transmisión no cambia una vez que la radio se enciende.

## Desactivación de la inhibición de transmisión

Siga el procedimiento para desactivar la inhibición de transmisión.

Realice una de las siguientes acciones:

- Pulse  o  para ir a Inhib. Tx y pulse  para seleccionar.

- Pulse el botón programable **Bloq. transmis.**
- 
- Suena un tono indicador negativo. La transmisión vuelve a funcionar con normalidad.
  - La pantalla muestra Inhibición de Tx desactivado.

## Selección de modos de conexión de periféricos de terceros

Siga el procedimiento para seleccionar uno de los siguientes modos de conexión de periféricos de terceros:

- Motorola Solutions
- PC y audio
- Accesorio de datos
- Telemetría
- Genérico

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tipo de cable. Pulse  para seleccionar.

---

5 Pulse  o  para ir al modo de conexión que desee. Pulse  para seleccionar.

La pantalla muestra el modo de conexión seleccionado. La pantalla vuelve al menú anterior.

---

## Indicador de intensidad de la señal recibida

Esta función permite ver los valores del indicador de intensidad de la señal recibida (RSSI).

La pantalla muestra el icono de **RSSI** en la esquina superior derecha. Consulte [Iconos de pantalla](#) para obtener más información sobre el icono de **RSSI**.

## Visualización de valores de RSSI

Siga el procedimiento para ver los valores de RSSI en la radio.

Cuando se encuentre en la pantalla de inicio:

- 1 Pulse  tres veces y pulse inmediatamente  tres veces, todo ello en cinco segundos. La pantalla muestra los valores de RSSI actuales.

- 2 Pulse de forma prolongada  para volver a la pantalla de inicio.

## Funciones de bloqueo por contraseña

Esta función le permite restringir el acceso a la radio al solicitar una contraseña cuando el dispositivo está activado.

Puede usar un micrófono con teclado o los botones de **desplazamiento hacia arriba/abajo** para introducir la contraseña.

[Enviar comentarios](#)

## Acceso a las radios mediante el uso de contraseñas

Siga el procedimiento para acceder a la radio mediante el uso de una contraseña.

- 1 Introduzca la contraseña de cuatro dígitos actual.

### NOTA:

El uso del pedal de **Emergencia** cancela la introducción de la contraseña para acceder a la radio.

- Utilice un micrófono con teclado.
- Pulse  o  para editar el valor numérico de cada dígito y, a continuación, pulse  para acceder y avanzar hasta el siguiente dígito.

- 2 Pulse  para introducir la contraseña.

Si es correcta, se encenderá la radio.

Si no es correcta:

- Tras el primer y segundo intento, la pantalla mostrará **Contraseña incorr.** Repita [paso 1](#).

- Tras el tercer intento, en la pantalla aparecerá `Contraseña incorr.` y, a continuación, `Radio bloqueada`. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La radio entrará en estado de bloqueo durante 15 minutos.

**NOTA:**

En estado bloqueado, la radio solo responde a las entradas del **botón de volumen/encendido/apagado** y del botón **Luz fondo**.

## Desbloqueo de radios en estado de bloqueo

En estado bloqueado, la radio no puede recibir ninguna llamada. Siga el procedimiento para desbloquear la radio en estado bloqueado.

Lleve a cabo una de las siguientes acciones:

- Si la radio está encendida, espere 15 minutos y, a continuación, repita los pasos de la sección [Acceso a las radios mediante el uso de contraseñas en la página 199](#) para acceder a la radio.

- Si la radio está apagada, enciéndala. La radio reinicia el temporizador de 15 minutos del estado bloqueado. Suena un tono. El indicador LED parpadeará dos veces en amarillo. La pantalla muestra `Radio bloqueada`.

Espere 15 minutos y, a continuación, repita los pasos de la sección [Acceso a las radios mediante el uso de contraseñas en la página 199](#) para acceder a la radio.

## Activación o desactivación del bloqueo por contraseña

Siga el procedimiento para activar o desactivar el bloqueo por contraseña en la radio.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Bloq. contras.  
Pulse  para seleccionar.

- 5 Introduzca la contraseña de cuatro dígitos actual.
- Utilice un micrófono con teclado.
  - Pulse  o  para editar el valor numérico de cada dígito y, a continuación, pulse  para acceder y avanzar hasta el siguiente dígito. Se oirá un tono indicador positivo cada vez que se introduce un dígito.

- 6 Pulse  para introducir la contraseña.  
Si la contraseña es incorrecta, la pantalla mostrará Contraseña incorr. y volverá automáticamente al menú anterior.

- 7 Lleve a cabo una de las siguientes acciones:
- Pulse  o  para ir a Activar. Pulse  para seleccionar. La pantalla muestra  junto a Activar.

- Pulse  o  para ir a Desactivar. Pulse  para seleccionar. La pantalla muestra  junto a Desactivar.

## Cambio de contraseñas

Siga el procedimiento para cambiar las contraseñas de la radio.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 4 Pulse  o  para ir a Bloq. contras. Pulse  para seleccionar.

- 5 Introduzca la contraseña de cuatro dígitos actual y pulse  para continuar.

Si la contraseña es incorrecta, la pantalla mostrará *Contraseña incorr.* y volverá automáticamente al menú anterior.

---

- 6 Pulse  o  para ir a *Camb. contras.*

Pulse  para seleccionar.

---

- 7 Introduzca una contraseña de cuatro dígitos nueva y pulse  para continuar.
- 

- 8 Vuelva a introducir la nueva contraseña de cuatro dígitos y pulse  para continuar.

Si el cambio se realiza correctamente, en la pantalla aparecerá el mensaje *Contraseña cambiada*. Si el cambio no se realiza correctamente, en la pantalla aparecerá el mensaje *Contraseñas no coinciden*.

La pantalla vuelve automáticamente al menú anterior.

---

## Configuración del panel frontal

Puede personalizar determinados parámetros de función en Configuración del panel frontal (FPC) para mejorar el uso de la radio.

## Acceso al modo Configuración del panel frontal

Siga el procedimiento para entrar al modo de programación del panel frontal en la radio.

mantenga pulsado  , en cualquier momento, para volver a la pantalla de inicio.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a *Herramientas*. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a *Programar radio*. Pulse  para seleccionar.
-

## Edición de los parámetros del modo FPP

Utilice los siguientes botones según sea necesario mientras navega por los parámetros de función.

-  ,  : desplácese por las opciones, aumente o disminuya valores, o navegue verticalmente.
-  : seleccione la opción o acceda a un submenú.
-  : pulse brevemente para volver al menú anterior o para salir de la pantalla de selección. Manténgalo pulsado para volver a la pantalla de inicio.

## Funcionamiento de Wi-Fi

Wi-Fi® es una marca comercial registrada de Wi-Fi Alliance®.

### NOTA:

Esta función solo se aplica a DM4601e only.

Esta función le permite configurar y conectarse a una red Wi-Fi. Wi-Fi es compatible con las actualizaciones de firmware de la radio, el Codeplug y recursos, como paquetes de idiomas o de anuncio de voz.

## Activación o desactivación del Wi-Fi

El botón **Activar o desactivar Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

Los anuncios de voz para el botón programado **Activar o desactivar Wi-Fi** se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Realice una de las siguientes acciones para activar o desactivar el Wi-Fi.

- Pulse el botón programado **Activar o desactivar Wi-Fi**. El anuncio de voz emite un sonido de activación o desactivación del Wi-Fi.
- Acceda a esta función en el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

- c. Pulse  o  para acceder a Wi-Fi activ. y pulse  para seleccionar.

Pulse  para activar el Wi-Fi. La pantalla muestra  junto a **Activado**.

Pulse  para apagar el Wi-Fi. Desaparece  junto a **Habilitado**.

## Conexión a un punto de acceso a la red

Cuando activa el Wi-Fi, la radio busca y se conecta a un punto de acceso a la red.

También puede conectarse a un punto de acceso a la red a través del menú.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

- 3 Pulse  o  para acceder a **Redes** y pulse  para seleccionar.

- 4 Pulse  o  para acceder a un punto de acceso a la red y pulse  para seleccionar.

- 5 Pulse  o  para **Conectar** y pulse  para seleccionar.

- 6 Ingrese la contraseña y pulse  .

Si la conexión se realiza correctamente, la radio muestra un aviso y se guarda el punto de acceso a la red en la lista de perfiles.

## Comprobación del estado de conexión Wi-Fi

Siga el procedimiento para comprobar el estado de conexión Wi-Fi.

Pulse el botón programado **Consulta del estado de la conexión Wi-Fi** para consultar el estado de conexión

mediante el Anuncio de voz. El Anuncio de voz emite un sonido cuando el Wi-Fi está desactivado, si el Wi-Fi está activado pero no está conectado o si el Wi-Fi está activado y conectado.

- La pantalla muestra **Wi-Fi desact.** cuando el Wi-Fi está desactivado.
- La pantalla muestra **Wi-Fi activ., conectado** cuando la radio está conectada a la red.
- La pantalla muestra **Wi-Fi activ., desconectado** cuando el Wi-Fi está activado pero la radio no está conectada a ninguna red.

Los anuncios de voz para los resultados de la consulta del estado de la conexión Wi-Fi se pueden personalizar mediante CPS en función de los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

**NOTA:**

El botón **Consulta del estado de la conexión Wi-Fi** programado se lo asigna su distribuidor o administrador del sistema. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

## Actualización de la lista de redes

Siga el procedimiento para actualizar la lista de redes.

- Realice las siguientes acciones para actualizar la lista de redes con el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para acceder a **Wi-Fi** y pulse  para seleccionar.
  - c. Pulse  o  para acceder a **Redes** y pulse  para seleccionar.

Al acceder al menú **Redes**, la radio actualiza automáticamente la lista de redes.

- Si ya se encuentra en el menú **Redes**, lleve a cabo la siguiente acción para actualizar la lista de redes.

Pulse  o  para **Actualizar** y pulse  para seleccionar.

La radio se actualiza y muestra la lista de redes más actualizada.

## Adición de una red

Si una red preferida no está en la lista de redes disponibles, realice las siguientes acciones para añadir una red.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

- 4 Pulse  o  para Añadir red y pulse  para seleccionar.

---

- 5 Introduzca el identificador de conjuntos de servicios (SSID) y pulse .

---

- 6 Pulse  o  para Abrir y pulse  para seleccionar.

---

- 7 Ingrese la contraseña y pulse  .  
La radio muestra un miniaviso positivo para indicar que la red se ha guardado correctamente.

---

## Visualización de los detalles de los puntos de acceso a la red

Siga el procedimiento para ver los detalles de los puntos de acceso a la red.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

- 3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

4 Pulse  o  para acceder a un punto de acceso a la red y pulse  para seleccionar.

---

5 Pulse  o  para acceder a Ver detalles y pulse  para seleccionar.

En los puntos de acceso conectados a la red se muestra el identificador de conjunto de servicios (SSID), el modo de seguridad, la dirección de control de acceso a los medios (MAC) y el protocolo de Internet (IP).

En los puntos de acceso no conectados a la red se muestra solo el identificador de conjunto de servicios (SSID) y el modo de seguridad.

---

## Eliminación de los puntos de acceso a la red

Realice las siguientes acciones para eliminar los puntos de acceso a la red de la lista de perfiles.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para acceder a Wi-Fi y pulse  para seleccionar.

---

3 Pulse  o  para acceder a Redes y pulse  para seleccionar.

---

4 Pulse  o  para acceder al punto de acceso a la red seleccionada y pulse  para seleccionar.

---

5 Pulse  o  para Eliminar y pulse  para seleccionar.

---

- 6 Pulse  o  para seleccionar Sí y pulse  para seleccionar.

La radio muestra un miniaviso positivo para indicar que el punto de acceso a la red seleccionada se ha eliminado correctamente.

#### NOTA:

Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

## Herramientas

En este capítulo se explican cómo se utilizan las herramientas disponibles en la radio.

### Niveles del silenciador

Puede ajustar el nivel del silenciador para eliminar llamadas no deseadas con señales de baja intensidad o canales que tengan un ruido de fondo más alto de lo normal.

#### Normal

Este es el ajuste predeterminado.

#### Fuerte

Este ajuste elimina las llamadas no deseadas y el ruido de fondo. Las llamadas desde ubicaciones remotas también pueden eliminarse.

## Configuración de los niveles del silenciador

Siga el procedimiento para definir los niveles del silenciador en la radio.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Silenciad.** programado. Omita los pasos siguientes.
  - Pulse  para acceder al menú.

- Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Silenciad. Pulse  para seleccionar.
- 

- 5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Normal. Pulse  para seleccionar.  
La pantalla muestra  junto a Normal.

- Pulse  o  para ir a Señal fuerte.  
Pulse  para seleccionar.  
La pantalla muestra  junto a Señal fuerte.

La pantalla vuelve automáticamente al menú anterior.

---

## Niveles de potencia

Puede personalizar el nivel de potencia de cada canal de la radio en alto o bajo.

### Alta

Permite la comunicación con radios situadas a una distancia considerable de usted.

### Baja

Permite la comunicación con radios más cercanas.

#### NOTA:

Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

## Configuración de los niveles de potencia

Siga el procedimiento para definir los niveles de potencia en la radio.

- 1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón de **nivel de potencia** programado. Omita los pasos que se indican a continuación.
  - Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
-

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Potencia. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Alta. Pulse  para seleccionar.  
La pantalla muestra  junto a Alta.
  - Pulse  o  para ir a Baja. Pulse  para seleccionar.  
La pantalla muestra  junto a Baja.
- 

6 Pulse de forma prolongada  para volver a la pantalla de inicio.

---

## Encendido y apagado de tonos/ alertas de la radio

Puede habilitar y deshabilitar todos los tonos y todas las alertas de la radio, siempre que lo necesite, excepto el tono de alerta de emergencia entrante. . Siga el procedimiento para activar o desactivar los tonos y las alertas en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Tonos/alertas** programado. Omita los pasos siguientes.
  - Pulse  para acceder al menú.
- 

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Todos los tonos. Pulse  para seleccionar.

---

6 Pulse  para activar o desactivar todos los tonos y alertas. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.
- 

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Tonos teclado. Pulse  para seleccionar.

---

6 Pulse  para habilitar o deshabilitar los tonos del teclado. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.
- 

## Encendido y apagado de los tonos del teclado

Siga el procedimiento para activar o desactivar los tonos del teclado en la radio.

1 Pulse  para acceder al menú.

---

## Configuración de los niveles de diferencia de volumen de tonos y alertas

Esta función ajusta el volumen de los tonos o las alertas, permitiendo que sea más alto o más bajo que el volumen de voz. Siga el procedimiento para definir los niveles de diferencia de volumen tonos y alertas de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Dif. volumen. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir al nivel de diferencia de volumen que desee.  
Con cada nivel de diferencia de volumen correspondiente, suena un tono de confirmación.

---

- 7 Lleve a cabo una de las siguientes acciones:
  - Pulse  para seleccionar. Se guarda el nivel de diferencia de volumen necesario.
  - Pulse  para salir. Los cambios se descartan.

---

## Activación o desactivación del tono Permiso para hablar

Siga el procedimiento para activar o desactivar el tono Permiso para hablar en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Permitir hablar. Pulse  para seleccionar.

---

- 6 Pulse  para activar o desactivar el tono de Permitir hablar.  
La pantalla muestra uno de los siguientes resultados:
  - Si está activado,  aparece junto a Activado.

- Si se desactiva,  junto a Activado desaparece.

## Activación o desactivación del tono de encendido

Siga el procedimiento para activar o desactivar el tono de encendido en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

5 Pulse  o  para ir a Encendido. Pulse  para seleccionar.

---

6 Pulse  para activar o desactivar el tono de encendido. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

---

## Configuración de los tonos de alerta de mensaje de texto

Puede personalizar el tono de alerta de mensaje de texto de cada entrada de la lista de contactos para que sea momentáneo o repetitivo. Siga el procedimiento para definir los tonos de alerta de mensaje de texto en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Alerta mensaje. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Momentáneo. Pulse  para seleccionar. La pantalla muestra  junto a Momentáneo.
- Pulse  o  para ir a Repetitivo. Pulse  para seleccionar. La pantalla muestra  junto a Repetitivo.

---

## Cambio de los modos de pantalla

Es posible cambiar el modo de pantalla de la radio entre Día o Noche, según sea necesario. Esto afecta a la gama de colores de la pantalla. Siga el procedimiento para cambiar el modo de pantalla de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Modo de pantalla** programado. Omite los pasos siguientes.
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Pantalla. Pulse  para seleccionar.  
La pantalla muestra Modo día y Modo noche.

- 5 Pulse  o  para ir al ajuste que desee.

Pulse  para seleccionar.

La pantalla muestra  junto al ajuste seleccionado.

## Ajuste del brillo de la pantalla

Siga el procedimiento para ajustar el brillo de la pantalla de la radio. Si la opción Brillo automático está activada, no se podrá ajustar el brillo de la pantalla.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Brillo** programado. Omite los pasos siguientes.
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Brillo. Pulse  para seleccionar.  
La pantalla muestra una barra de progreso.

---

5 Pulse  o  para aumentar o reducir el brillo de la pantalla. Pulse  para seleccionar.  
El rango de valores va desde 1 a 8.

---

## Encendido y apagado de bocina y luces

La radio puede notificarle una llamada entrante mediante la función de bocinas y luces. Cuando esta función está activada, una llamada entrante hará que suene la bocina y que se enciendan las luces del vehículo. Esta función deberá instalarla el distribuidor a través del conector de accesorios posterior de la radio. Siga el procedimiento para activar o desactivar todas las bocinas y luces de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Bocina/Luces** programado. Omita los pasos que se indican a continuación.

- Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Bocina/Luces. Pulse  para seleccionar.

---

5 Pulse  para habilitar o deshabilitar Bocina/Luces. La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.
-

## Encendido y apagado de los indicadores LED

Siga el procedimiento para activar o desactivar los indicadores LED en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Indicador LED. Pulse  para seleccionar.

---

- 5 Pulse  para habilitar o deshabilitar el indicador LED.

La pantalla muestra uno de los siguientes resultados:

[Enviar comentarios](#)

- Si está activado, ✓ aparece junto a Activado.
- Si se desactiva, ✓ junto a Activado desaparece.

## Activación o desactivación del sistema de dirección pública

Siga el procedimiento para activar o desactivar el sistema de dirección pública (DP) interna de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Dirección pública** programado. Omita los pasos siguientes.
  - Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Dirección pública.  
Pulse  para seleccionar.

---

5 Pulse  para activar o desactivar la dirección pública.

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

---

## Activación o desactivación del sistema de dirección pública

Siga el procedimiento para activar o desactivar el sistema de dirección pública (DP) externa de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón de **dirección pública externa** programado. Omita los pasos siguientes.
- Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Dirección pública externa. Pulse  para seleccionar.

---

5 Pulse  para habilitar o deshabilitar la dirección pública externa.

- Si está activado,  aparece junto a Activado.
- Si se desactiva,  junto a Activado desaparece.

---

## Encendido y apagado de la pantalla inicial

Puede habilitar y deshabilitar la pantalla inicial siguiendo el procedimiento.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Pantalla. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a la pantalla inicial. Pulse  para seleccionar.

---

- 6 Pulse  para habilitar o deshabilitar la pantalla de introducción.

La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.

- Si se desactiva,  junto a Activado desaparece.

## Configuración de idiomas

Siga el procedimiento para definir los idiomas en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Idiomas. Pulse  para seleccionar.

- 5 Pulse  o  para ir al idioma que desee.  
Pulse  para seleccionar.  
La pantalla muestra  junto al idioma seleccionado.

## Identificación del tipo de cable

Realice los siguientes pasos para seleccionar el tipo de cable que utiliza la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 
- 4 Pulse  o  para ir a Tipo de cable. Pulse  para seleccionar.

- 5 El tipo de cable actual aparece con un símbolo .

## Transmisión activada por voz

La función de transmisión activada por voz (VOX) permite iniciar una llamada de manos libres en un canal programado. La radio transmite automáticamente, durante un periodo de tiempo programado, cuando el micrófono del accesorio VOX detecta la voz.

### NOTA:

Esta función no se aplica a canales de Banda Ciudadana que estén en la misma frecuencia.

Para activar o desactivar la función VOX, elija una de las opciones siguientes:

- Apagar la radio y encenderla de nuevo para activar la función VOX.
- Cambiar el canal mediante los botones de **desplazamiento hacia arriba/abajo** para activar la función VOX.
- Cambiar el canal mediante el **selector de volumen/canales** para activar la función VOX.

- Activar o desactivar la función VOX a través del botón programado **VOX** o el menú para activar o desactivar la función VOX.
- Pulsar el botón **PTT** mientras la radio está en funcionamiento para desactivar la función VOX.

**NOTA:**

La activación y desactivación de esta función está limitada a las radios que tengan esta función activada. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación o desactivación de la transmisión activada por voz

Siga el procedimiento para activar o desactivar el VOX en la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **VOX** programado. Omita los pasos que se indican a continuación.
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a VOX. Pulse  para seleccionar.

- 5 Pulse  para activar o desactivar **VOX**.

**NOTA:**

Si el tono de Permitir hablar está activado, utilice una palabra de activación que inicie la llamada. Espere hasta que acabe el tono de Permitir hablar antes de empezar a hablar con claridad al micrófono. Consulte [Activación o desactivación del tono Permiso para hablar en la página 214](#) para obtener más información.

## Activación o desactivación del indicador de voz

Esta función permite a la radio indicar de forma sonora o mediante la pulsación de botón programable la zona o el canal que el usuario acaba de presionar.

Esto es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

Este indicador de audio puede personalizarse según los requisitos del cliente. Siga el procedimiento para activar o desactivar el indicador de voz.

## Activación o desactivación de la tarjeta opcional

Se pueden asignar capacidades para tarjetas opcionales dentro de cada canal a botones programables. Un canal puede soportar un máximo de 6 funciones de la tarjeta opcional. Siga el procedimiento para activar o desactivar la tarjeta opcional en la radio.

Pulse el botón programable **Tarjeta opcional**.

---

## Reconocimiento de voz

La función de reconocimiento de voz solo puede activarla su distribuidor o administrador del sistema. Si la función de reconocimiento de voz está activada, la función de anuncio de voz se desactiva automáticamente. Si la función de anuncio de voz está activada, la función de reconocimiento de voz se desactiva automáticamente.

Esta función permite que la radio indique acústicamente lo siguiente:

- Canal actual
- Zona actual
- Función de botón programable activada o desactivada
- Contenido de los mensajes de texto recibidos
- Contenido de las asignaciones de tarea recibidas

Este indicador de audio puede personalizarse según los requisitos del cliente. Esta función es especialmente útil cuando el usuario tiene dificultades para leer el contenido que se muestra en la pantalla.

## Configurar reconocimiento de voz

Siga el procedimiento para definir la función de reconocimiento de voz.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Anuncio de voz. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a una de las siguientes funciones: Pulse  para seleccionar. Las funciones disponibles son las siguientes:
  - Todo
  - Mensajes
  - Asignaciones de tarea
  - Separación

- Zona
- Botón programable

Aparece  junto a la configuración seleccionada.

## Activación o desactivación de la transferencia de llamadas automática

Puede habilitar la radio para que transfiera automáticamente llamadas de voz a otra radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

4 Pulse  o  para ir a Reenvío de llamadas. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para activar el reenvío de llamadas. Si está activado,  aparece junto a Activado.
  - Pulse  o  para desactivar el reenvío de llamadas. Si se desactiva,  junto a Activado desaparece.
- 

## Configuración del temporizador del menú

Puede definir el periodo de tiempo que su radio permanecerá en el menú antes de cambiar automáticamente a la pantalla de inicio. Siga el procedimiento para configurar el temporizador del menú.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Pantalla. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Tempor. menú. Pulse  para seleccionar.

---

6 Pulse  o  para ir al ajuste que desee. Pulse  para seleccionar.

---

## Activación o desactivación del AGC del micrófono analógico

El control automático de ganancia (AGC) del micrófono analógico controla automáticamente la ganancia del

micrófono de la radio durante la transmisión en un sistema analógico.

Esta función elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante. Siga el procedimiento para activar o desactivar el AGC del micrófono analógico en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a AGC mic analógico. Pulse  para seleccionar.

---

5 Pulse  para activar o desactivar el AGC del micrófono analógico.

La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.
- 

## Activación o desactivación del AGC del micrófono digital

El control automático de ganancia (AGC) del micrófono digital controla automáticamente la ganancia del micrófono de la radio durante la transmisión en un sistema digital. Esta función elimina el audio alto o mejora el audio claro para un valor predeterminado con el fin de ofrecer un nivel de audio constante. Siga el procedimiento para activar o desactivar el AGC del micrófono digital en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a AGC mic digital. Pulse  para seleccionar.

---

5 Pulse  para activar o desactivar el AGC del micrófono digital.

La pantalla muestra uno de los siguientes resultados:

- Si está activado,  aparece junto a Activado.
  - Si se desactiva,  junto a Activado desaparece.
- 

## Activación o desactivación del audio inteligente

La radio ajusta automáticamente el volumen de audio para superar el ruido de fondo actual del entorno, incluidas las fuentes de ruido estacionarias y no estacionarias. Esta función es de solo recepción y no afecta a la transmisión de audio. Siga el procedimiento para activar o desactivar el audio inteligente en la radio.

### NOTA:

Esta función no está disponible durante una sesión Bluetooth.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón programado **Audio inteligente**. Omita los pasos que se indican a continuación.
    - Pulse  para acceder al menú.

---
  - 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
-

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Audio inteligente. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.
  - Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.
- 

## Activación y desactivación del supresor de respuesta acústica

Esta función le permite minimizar el supresor de respuesta acústica en las llamadas recibidas. Siga el procedimiento

para activar o desactivar el supresor de respuesta acústica en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar..

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Supresor de AF. Pulse  para seleccionar.

---

5 Lleve a cabo una de las siguientes acciones:

- Pulse para activar el supresor de respuesta acústica. Si está activado,  aparece junto a Activado.
  - Pulse para desactivar el supresor de respuesta acústica. Si se desactiva,  junto a Activado desaparece.
-

## Activación o desactivación de la mejora de la vibración del habla

Puede activar esta función cuando esté hablando en un idioma que contenga muchas palabras con pronunciación alveolar (R vibrante). Siga el procedimiento para activar o desactivar la mejora de la vibración del habla en la radio.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Mejora de la vibración del habla** programado. Omita los pasos que se indican a continuación.
  - Pulse  para acceder al menú.

- Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- Pulse  o  para ir a Mejora de trino. Pulse  para seleccionar.

- Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.
- Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.

## Entorno audio

Puede personalizar el entorno de audio de la radio según el ambiente.

### Predeterminado

Este es el ajuste predeterminado.

**Alto**

Este ajuste activa la función de supresión de ruido y aumenta el volumen de los altavoces para el uso de la radio en entornos ruidosos.

**Grupo de trabajo**

Este ajuste activa el supresor de respuesta acústica y desactiva el control automático de ganancia (AGC) para el uso cuando un grupo de radios están cerca las unas de las otras.

## Configuración del entorno de audio

Siga el procedimiento para definir el entorno de audio en la radio según el ambiente.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

[Enviar comentarios](#)

- 4 Pulse  o  para ir a Entorno audio. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir al ajuste que desee. Pulse  para seleccionar.

La configuración es la siguiente:

- Elija Predeterminado para restablecer la configuración predeterminada de fábrica.
- Elija Alto para aumentar el nivel de sonoridad del altavoz cuando se utiliza en entornos ruidosos.
- Elija Grupo de Trabajo para reducir la respuesta acústica cuando se utiliza con un grupo de radios que están cerca las unas de las otras.

La pantalla muestra  junto al ajuste seleccionado.

---

## Perfiles de audio

Puede personalizar los perfiles de audio de la radio según sus preferencias.

## Predeterminado

Este es el ajuste predeterminado.

## Nivel 1, Nivel 2 y Nivel 3

Estos ajustes están pensados para compensar la pérdida auditiva provocada por el ruido, algo típico en adultos de 40, 50, 60 o más años.

## Mejora de agudos, Mejora de medios y Mejora de graves

Estos ajustes están pensados para un sonido más metálico, un sonido más nasal y un sonido más profundo, respectivamente.

## Configuración de perfiles de audio

Siga el procedimiento para definir los perfiles de audio en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Perfiles de audio. Pulse  para seleccionar.

---

5 Pulse  o  para ir al ajuste que desee. Pulse  para seleccionar.

La configuración es la siguiente:

- Elija Predeterminado para desactivar el perfil de audio seleccionado anteriormente y volver a la configuración predeterminada de fábrica.
- Elija Nivel 1, Nivel 2 o Nivel 3 para perfiles de audio destinados a compensar pérdida auditiva provocada por el ruido, algo típico en adultos mayores de 40 años.
- Elija Aumento de agudos, Aumento de medios o Aumento de graves para perfiles de audio

que se ajustan a su preferencia de sonidos más metálicos, más nasales o más profundos.

La pantalla muestra  junto al ajuste seleccionado.

## Activación o desactivación del sistema global de navegación por satélite

El sistema global de navegación por satélite (GNSS) es un sistema de navegación vía satélite que determina la ubicación exacta de la radio. GNSS incluye el sistema de posicionamiento global (GPS) y el sistema de navegación por satélite global (GLONASS).

### NOTA:

Los modelos de radio seleccionados pueden ofrecer GPS y GLONASS. La constelación de GNSS se configura a través de CPS. Consulte con el distribuidor o administrador del sistema cómo se ha programado la radio.

- 1 Realice el siguiente paso para activar o desactivar el GNSS en la radio.
  - Pulse el botón **GNSS** programado.

- Pulse  para acceder al menú. Continúe con el paso siguiente.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir GNSS. Pulse  para seleccionar.

- 5 Pulse  para habilitar o deshabilitar el GNSS.
 

Si está activado,  aparece junto a Activado.  
Si se desactiva,  junto a Activado desaparece.

## Lista de recepción flexible

La lista de recepción flexible es una función que le permite crear y asignar miembros en la lista del grupo de

conversación de recepción. La radio puede admitir un máximo de 16 miembros en la lista. Esta función es compatible en Capacity Plus.

## Activación o desactivación de la lista de recepción flexible

Siga el procedimiento para activar o desactivar la lista de recepción flexible.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Lista de recepción flexible** programado. Omita los pasos siguientes.
- Pulse  para acceder al menú.

2 Pulse  o  para ir a **Lista Flex Rx**. Pulse  para seleccionar.

3 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a **Activar**. Pulse  para seleccionar. Suena un tono indicador positivo.

La pantalla muestra un pequeño aviso positivo.

- Pulse  o  para ir a **Desactivar**. Pulse  para seleccionar. Suena un tono indicador negativo.

La pantalla muestra un aviso pequeño negativo.

## Información general de la radio

La radio contiene información sobre varios parámetros generales.

La información general de la radio es la siguiente:

- Alias e ID de radio.
- Versiones de firmware y codeplug.
- Actualización del software.
- Información de GNSS.
- Información del sitio.

**NOTA:**

Pulse  para volver a la pantalla anterior. Pulse de forma prolongada  para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

## Verificación de alias e ID de radio

Siga el procedimiento para comprobar el ID y alias de la radio.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programado **Alias e ID de radio**. Omita los pasos siguientes. Suena un tono indicador positivo.

También puede pulsar el botón programado **Alias e ID de radio** para volver a la pantalla anterior.

- Pulse  para acceder al menú.

- Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

- Pulse  o  para ir a Mi ID. Pulse  para seleccionar.

La primera línea de texto muestra el alias de radio. La segunda línea de texto muestra el ID de radio.

## Verificación de las versiones de firmware y de Codeplug

Siga el procedimiento para comprobar las versiones de firmware y de Codeplug de la radio.

- Pulse  para acceder al menú.

- Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Versiones. Pulse  para seleccionar.

La pantalla muestra las versiones de firmware y de Codeplug actuales.

---

3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Actualiz. SW. Pulse  para seleccionar.

La pantalla muestra la fecha y la hora de la última actualización de software.

---

El menú de actualización del software solo está disponible después de que se haya producido al menos una sesión de OTAP o Wi-Fi correcta. Consulte [Programación a través del interfaz de aire en la página 498](#) para obtener más información.

## Verificación de la información sobre actualización de software

Esta función muestra la fecha y la hora de la última actualización de software llevada a cabo mediante OTAP o Wi-Fi. Siga el procedimiento para comprobar la información sobre actualización de software de la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

## Verificación de la información de GNSS

Muestra la información de GNSS de la radio, como los valores de:

- Latitud
- Longitud
- Altitud

- Dirección
- Velocidad
- Dilución de precisión horizontal (HDOP)
- Satélites
- Versión

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Info. del radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Información de GNSS. Pulse  para seleccionar.

---

5 Pulse  o  para ir al elemento deseado.

Pulse  para seleccionar. La pantalla muestra la información de GNSS solicitada.

---

## Mostrar la información del sitio

Siga el procedimiento para mostrar el nombre del sitio en el que está encendida la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Info. sitio. Pulse  para seleccionar.
- 

La pantalla muestra el nombre de sitio actual.

# Garantía limitada

## PRODUCTOS DE COMUNICACIÓN DE MOTOROLA SOLUTIONS

### I. COBERTURAS Y DURACIÓN DE LA GARANTÍA:

Motorola Solutions Inc. (en adelante, “Motorola Solutions”) garantiza los productos de comunicación fabricados por Motorola Solutions que se indican a continuación (en adelante, el “Producto”) contra defectos de materiales y de fabricación con un uso y servicio normales durante un período a contar a partir de la fecha de compra de acuerdo con las especificaciones siguientes:

Serie DM Radios Digitales Móviles	24 meses
Accesorios del producto	12 meses

Según lo considere oportuno y sin coste adicional, Motorola Solutions reparará el Producto (con piezas nuevas o reacondicionadas), lo sustituirá (por un Producto

nuevo o reacondicionado), o bien reembolsará el precio de compra del mismo durante el periodo de garantía siempre que el producto se devuelva de acuerdo con los términos de esta garantía. Las piezas o tarjetas sustituidas quedan garantizadas durante el periodo restante de garantía original pertinente. Todas las piezas sustituidas del Producto pasarán a ser propiedad de Motorola Solutions.

Motorola Solutions otorga la presente garantía limitada única y expresamente al comprador final y, por lo tanto, no se puede asignar o transferir a ninguna otra parte. Esta es la garantía completa del Producto fabricado por Motorola Solutions. Motorola Solutions no asume ninguna obligación o responsabilidad por las adiciones o modificaciones a la presente garantía a menos que una persona responsable de Motorola Solutions así lo establezca en un documento por escrito y debidamente firmado.

Salvo acuerdo por separado entre Motorola Solutions y el comprador final, Motorola Solutions no garantiza la instalación, el mantenimiento ni el servicio del Producto.

Motorola Solutions no puede responsabilizarse en ningún caso de los equipos auxiliares que no hayan sido suministrados por Motorola Solutions, que estén conectados o se utilicen en conexión con el Producto, ni del funcionamiento del Producto con cualquier equipo auxiliar y, en consecuencia, se excluyen expresamente de

la presente garantía todos los equipos mencionados. Puesto que todos los sistemas que pueden utilizar el Producto son exclusivos, Motorola Solutions renuncia a cualquier responsabilidad relativa al alcance, la cobertura o el funcionamiento del sistema en su conjunto en el marco de la presente garantía.

## II. DISPOSICIONES GENERALES

Esta garantía establece el alcance total de la responsabilidad de Motorola Solutions con respecto al Producto. La reparación, la sustitución o el reembolso del precio de compra, a discreción de Motorola Solutions, constituyen las únicas soluciones. LA PRESENTE GARANTÍA PREVALECE DE FORMA EXCLUSIVA SOBRE TODAS LAS DEMÁS GARANTÍAS EXPRESAS. LAS GARANTÍAS IMPLÍCITAS, INCLUIDAS, SIN LIMITACIÓN ALGUNA, LAS GARANTÍAS IMPLÍCITAS DE COMERCIABILIDAD Y ADECUACIÓN PARA CUALQUIER PROPÓSITO EN PARTICULAR SE LIMITAN A LA DURACIÓN DE LA PRESENTE GARANTÍA LIMITADA. EN NINGÚN CASO, MOTOROLA SOLUTIONS SERÁ RESPONSABLE POR DAÑOS QUE EXCEDAN EL IMPORTE DE COMPRA DEL PRODUCTO, PÉRDIDA DE USO, PÉRDIDA DE TIEMPO, MOLESTIAS, PÉRDIDA COMERCIAL, PÉRDIDA DE BENEFICIOS O AHORROS,

O CUALQUIER OTRO DAÑO INCIDENTAL, ESPECIAL O CONSECUENTE DERIVADO DEL USO O LA INCAPACIDAD DE UTILIZAR DICHO PRODUCTO, EN LA MEDIDA EN QUE LA LEY PERMITA EXONERAR DICHA RESPONSABILIDAD.

## III. DERECHOS DE LEYES ESTATALES:

DETERMINADOS ESTADOS NO PERMITEN LA EXCLUSIÓN O LA LIMITACIÓN POR DAÑOS INCIDENTALES O CONSECUENTES, O LA LIMITACIÓN SOBRE LA DURACIÓN DE UNA GARANTÍA IMPLÍCITA Y, EN CONSECUENCIA, ES POSIBLE QUE NO SE APLIQUEN LA LIMITACIÓN O LAS EXCLUSIONES DESCRITAS ANTERIORMENTE.

La presente garantía proporciona derechos legales específicos y, asimismo, existen otros derechos que pueden variar según el estado.

## IV. OBTENCIÓN DEL SERVICIO DE GARANTÍA

Para recibir el servicio de garantía, debe presentar una prueba de compra (que incluya la fecha de compra y el

número de serie del componente del Producto), así como remitir o enviar el componente del Producto, el transporte y el seguro prepagado a un centro de servicio de garantía autorizado. Motorola Solutions proporcionará el servicio de garantía mediante uno de sus servicios de garantía autorizados. Para obtener su servicio de garantía, primero puede ponerse en contacto con la empresa a la que adquirió el Producto (por ejemplo, el distribuidor o el proveedor de servicios de comunicación). También puede llamar a Motorola Solutions al 1-800-927-2744 EE. UU./ Canadá.

## V. ELEMENTOS NO CUBIERTOS POR LA GARANTÍA

- 1 Defectos o daños resultantes de la utilización del Producto de forma distinta a su uso normal y habitual.
- 2 Defectos o daños producidos por un uso incorrecto, accidente, agua o negligencia.
- 3 Defectos o daños producidos por una prueba, funcionamiento, mantenimiento, instalación, alteración, modificación o ajuste inadecuados.
- 4 Rotura o daños a las antenas a menos que hayan sido producidos directamente por defectos en el material o mano de obra.
- 5 Un Producto sujeto a modificaciones, operaciones de desmontaje o reparaciones (incluidas, sin limitaciones, la adición al Producto de equipos no suministrados por Motorola Solutions) que puedan afectar negativamente al rendimiento del Producto o interferir con la inspección y pruebas habituales de la garantía que realiza Motorola Solutions para verificar todas las reclamaciones de garantía.
- 6 Los productos en los que se haya eliminado el número de serie o este no sea legible.
- 7 Baterías recargables si:
  - alguno de los sellos de la carcasa de la batería está roto o muestra signos de manipulación.
  - el daño o defecto está producido por la carga o utilización de la batería en un equipo o servicio distinto al del Producto para el que se ha especificado.
- 8 Costes de transporte al departamento de reparaciones.
- 9 Los productos que, debido a una alteración ilegal o no autorizada del software/firmware del Producto, no funcionen de acuerdo con las especificaciones publicadas por Motorola Solutions o al etiquetado de certificado FCC vigente para el Producto en el momento

en que Motorola Solutions realizó la distribución inicial del mismo.

- 10 Los arañazos u otros daños cosméticos en la superficie del producto que no afecten al funcionamiento del mismo.
- 11 El desgaste normal derivado del uso.

## VI. DISPOSICIONES DE PATENTES Y SOFTWARE

Motorola Solutions defenderá, por cuenta propia, cualquier disputa legal en contra del comprador final en la medida en que se fundamente en la reclamación de que el Producto o sus piezas infringen una patente estadounidense; además, Motorola Solutions compensará los costes y daños finalmente imputados al comprador final en el marco de cualquier disputa legal que se pueda atribuir a cualquiera de esas reclamaciones. No obstante, la defensa y los pagos están condicionados a los casos siguientes:

- 1 El comprador notificará de inmediato a Motorola Solutions de cualquier aviso relacionado con dicha demanda;

- 2 Motorola Solutions tendrá el control único de la defensa de dicho juicio y todas las negociaciones para su resolución o compromiso; y
- 3 En caso de que el producto o sus piezas se conviertan, o según Motorola Solutions, puedan convertirse en objeto de alegación de incumplimiento de una patente estadounidense, el comprador permitirá a Motorola Solutions, a su discreción y por cuenta propia, lograr que el comprador ostente el derecho de seguir utilizando el producto o las piezas para su sustitución o modificación de modo que se convierta en no ilegítima, u otorgar al comprador un crédito por el producto o sus piezas en concepto de depreciación y aceptar su restitución. La depreciación corresponderá a una cantidad anual invariable durante la vida útil del Producto o sus piezas, según establezca Motorola Solutions.

Motorola Solutions no será responsable de reclamaciones por el incumplimiento de patentes derivado de la combinación del Producto o piezas suministrados de acuerdo con la presente licencia con software, aparatos o dispositivos que no haya suministrado Motorola Solutions. Motorola Solutions tampoco acepta ninguna responsabilidad por el uso de equipos auxiliares o software que no haya sido suministrado por Motorola Solutions y que esté conectado o se utilice en conexión con el

Producto. Las disposiciones anteriores establecen la plena responsabilidad de Motorola Solutions en relación con el incumplimiento de patentes por el Producto o cualquiera de sus partes.

Las leyes de los Estados Unidos y otros países conceden a Motorola Solutions determinados derechos exclusivos del software con copyright de Motorola Solutions, como los derechos exclusivos para reproducir y distribuir copias de dicho software de Motorola Solutions. El software de Motorola Solutions se puede utilizar exclusivamente en el Producto en el que el software se incluyó originalmente y, por lo tanto, se prohíbe la sustitución, la copia, la distribución y la modificación de cualquier forma de dicho software en ese Producto, así como el uso destinado a producir cualquier Producto derivado. Asimismo, se prohíbe cualquier otro uso, incluidos, sin limitación alguna, la alteración, la modificación, la reproducción, la distribución o la ingeniería inversa del software de Motorola Solutions o el ejercicio de derechos en el software de Motorola Solutions. No se concede ninguna licencia implícitamente, ni por impedimento legal ni de cualquier otra forma, por los derechos de patente o copyright de Motorola Solutions.

## VII. LEGISLACIÓN APLICABLE

La presente garantía se rige por las leyes del Estado de Illinois (EE. UU).

# Informations de sécurité importantes

## Sécurité des produits et exposition aux fréquences radio pour les radios professionnelles mobiles

### ATTENTION !

**Cette radio est réservée à un usage professionnel exclusivement.** Avant d'utiliser la radio, lisez le guide Sécurité des produits et exposition aux fréquences radio pour les radios professionnelles mobiles. Il contient d'importantes instructions de fonctionnement relatives à la sécurité et à l'exposition aux fréquences radio, ainsi que des informations sur le contrôle de conformité aux normes et réglementations applicables.

Pour consulter la liste des antennes et autres accessoires agréés par Motorola Solutions, visitez le site Web :

<http://www.motorolasolutions.com>

Cette page a été laissée vide de manière intentionnelle.

## Version logicielle

Toutes les fonctions décrites dans les sections suivantes sont prises en charge par les versions **R02.08.05.0000** ou ultérieures du logiciel.

Consultez la section [Vérification des versions de micrologiciel \(firmware\) et de codeplug à la page 241](#) pour identifier la version logicielle de votre radio.

Consultez votre fournisseur ou administrateur système pour en savoir plus.

Cette page a été laissée vide de manière intentionnelle.

## Copyright

Les produits Motorola Solutions décrits dans ce document peuvent inclure des programmes informatiques Motorola Solutions protégés par un copyright. Les lois des États-Unis et d'autres pays garantissent certains droits exclusifs à Motorola Solutions pour ces programmes informatiques protégés par un copyright. En conséquence, il est interdit de copier ou de reproduire, de quelque manière que ce soit, les programmes informatiques Motorola Solutions protégés par un copyright contenus dans les produits Motorola Solutions décrits dans ce document sans l'autorisation expresse et écrite de Motorola Solutions.

Aucune partie du présent document ne peut être reproduite, transmise, stockée dans un système de récupération ou traduite dans toute autre langue ou langage informatique, sous quelque forme ou par quelque moyen que ce soit, sans l'autorisation écrite préalable de Motorola Solutions, Inc.

En outre, l'acquisition de ces produits Motorola Solutions ne saurait en aucun cas conférer, directement, indirectement ou de toute autre manière, aucune licence, aucun droit d'auteur, brevet ou demande de brevet appartenant à Motorola Solutions, autres que la licence

habituelle d'utilisation non exclusive et libre de droit qui découle légalement de la vente du produit.

### Limitation de responsabilité

Veuillez noter que certaines fonctionnalités, fonctions et possibilités décrites dans ce document peuvent ne pas être applicables à ou placées sous licence pour une utilisation sur un système spécifique, ou peuvent dépendre des caractéristiques d'un appareil radio mobile en particulier ou de la configuration de certains paramètres. Consultez votre contact Motorola Solutions pour de plus amples informations.

### Marques

MOTOROLA, MOTO, MOTOROLA SOLUTIONS et le logo stylisé M sont des marques commerciales ou des marques déposées de Motorola Trademark Holdings, LLC et font l'objet d'une licence. Toutes les autres marques appartiennent à leurs propriétaires respectifs.

## Directive relative aux déchets d'équipements électriques et électroniques (DEEE) pour l'Union européenne

■ La directive DEEE de l'Union européenne stipule que les produits vendus au sein de l'UE doivent présenter le symbole d'une poubelle barrée sur l'étiquette du produit (ou sur l'emballage dans certains cas).

Comme indiqué par la directive DEEE, l'étiquette de la poubelle barrée signifie que les clients et les utilisateurs finaux dans les pays de l'UE ne doivent pas mettre au rebut les équipements et les accessoires électriques et électroniques avec les déchets ménagers.

Les clients ou les utilisateurs finaux des pays de l'UE doivent prendre contact avec le représentant local du fournisseur de leur équipement ou le centre de service pour obtenir des informations sur le système de collecte des déchets dans leur pays.

## Copyrights relatifs aux logiciels informatiques

Les produits Motorola Solutions décrits dans ce manuel peuvent inclure des programmes informatiques protégés par copyright de Motorola Solutions et stockés dans des mémoires à semi-conducteurs ou sur tout autre support. La législation des États-Unis, ainsi que celle d'autres pays, réserve à Motorola Solutions certains droits de copyright exclusifs concernant les programmes ainsi protégés, incluant sans limitations, le droit exclusif de copier ou de reproduire, sous quelque forme que ce soit, lesdits programmes. En conséquence, il est interdit de copier, reproduire, modifier, faire de l'ingénierie inverse ou distribuer, de quelque manière que ce soit, les programmes informatiques de Motorola Solutions protégés par copyright contenus dans les produits Motorola Solutions décrits dans ce manuel sans l'autorisation expresse et écrite de Motorola Solutions. ## Précautions d'utilisation

Les radios portatives numériques MOTOTRBO sont conformes aux spécifications IP67 et peuvent donc résister à des conditions d'utilisation exigeantes, incluant l'immersion dans l'eau. Cette section décrit quelques précautions de manipulation de base.

### ATTENTION:

Ne tentez jamais de démonter la radio. Toute tentative d'ouverture de la radio peut endommager les joints et compromettre son étanchéité. Toute opération de maintenance doit uniquement être réalisée dans un centre technique qualifié et équipé pour tester et remplacer les joints d'étanchéité de la radio.

- Si la radio a été immergée dans de l'eau, secouez-la suffisamment pour éliminer l'eau piégée dans la grille du haut-parleur et le port du microphone. L'eau piégée peut perturber les performances audio.
- Si des bornes de contact ont été mouillées, elles doivent être nettoyées et séchées sur la radio et sur la batterie avant de remettre une batterie dans la radio. Toute trace d'eau pourrait court-circuiter la radio.

- Si la radio est tombée dans une substance corrosive (par exemple, de l'eau de mer), rincez la radio et la batterie avec de l'eau douce, puis séchez-les.
- Pour nettoyer les surfaces extérieures de la radio, utilisez une solution d'eau douce et de nettoyant vaisselle (par exemple, une cuillère à café de détergent pour 4 litres d'eau).
- N'introduisez jamais rien dans l'orifice situé sous le contact de la batterie sur le châssis de la radio. Il sert à équilibrer la pression atmosphérique dans la radio. En introduisant quelque chose dans cet orifice, vous pourriez créer une fuite qui compromettrait l'étanchéité de la radio.
- Cet orifice ne doit jamais être obstrué ni couvert, même avec une étiquette.
- Il ne doit jamais être mis en contact avec une substance grasse.
- La radio avec une antenne correctement installée est conçue pour résister à une immersion dans l'eau à 1 m de profondeur pendant 30 minutes. Tout dépassement d'une de ces deux limites ou l'absence d'antenne peut sérieusement endommager la radio.
- N'utilisez jamais de l'eau sous pression pour nettoyer une radio. Cette pression sera supérieure à celle d'une

immersion à 1 m de profondeur et peut provoquer l'infiltration d'eau dans la radio.

## Fonctionnement de base

Ce chapitre présente les opérations de base pour commencer à utiliser la radio.

### Mise sous tension de la radio

Suivez la procédure ci-après pour mettre votre radio sous tension.

---

Appuyez sur le bouton **Marche/Arrêt**.

---

Si l'opération réussit :

- Une tonalité est émise.
- La LED passe au vert.
- L'écran affiche le texte MOTOTRBO (TM), suivi d'un message ou d'une image d'accueil.
- L'écran d'accueil apparaît.

Si la fonction Tntés/Avert. est désactivée, aucune tonalité n'est émise lors de la mise sous tension.

Si votre radio ne s'allume pas, vérifiez la batterie. Vérifiez qu'elle est chargée et correctement installée. Si votre radio ne s'allume toujours pas, contactez votre fournisseur.

[Envoyer un commentaire](#)

### Mise hors tension de la radio

Suivez la procédure ci-après pour mettre votre radio hors tension.

Appuyez sur le bouton **Marche/Arrêt** et maintenez-le enfoncé.

La procédure de mise hors tension de votre radio peut prendre jusqu'à sept secondes.

L'écran affiche `Mise hors tension`.

---

### Réglage du volume

Suivez la procédure ci-après pour régler le volume de votre radio.

Effectuez l'une des opérations suivantes :

- Tournez le **bouton Marche/Arrêt - Volume** dans le sens horaire pour augmenter le volume.
- Tournez le **bouton Marche/Arrêt - Volume** dans le sens antihoraire pour diminuer le volume.

**REMARQUE:**

Votre radio peut être programmée sur un écart de volume minimal. Dans ce cas, le niveau sonore ne peut pas être baissé au-delà du niveau programmé. Consultez votre fournisseur ou administrateur système pour en savoir plus.

---

## Commandes radio

Ce chapitre présente les boutons et fonctions permettant de contrôler la radio.

- 1 Bouton Marche/Arrêt/Information
- 2 Sélecteur Volume/Canal
- 3 Écran
- 4 Bouton OK/Menu
- 5 Boutons de défilement Haut/Bas
- 6 Haut-parleur

- 7 Bouton Retour/Accueil
- 8 Boutons programmables avant
- 9 Connecteur d'accessoire
- 10 Indicateurs LED

## Sélecteur Volume/Canal

Le **sélecteur Volume/Canal** peut être programmé pour contrôler à la fois le volume et le canal ou uniquement pour régler le volume sonore.

Pour régler le volume, reportez-vous à la section [Réglage du volume à la page 41](#).

Pour changer de canal, appuyez de manière prolongée sur le **sélecteur Volume/Canal** jusqu'à ce que l'état de sélection du canal s'affiche. Tournez le **sélecteur Volume/Canal** pour sélectionner le canal. Effectuez l'une des opérations suivantes pour quitter l'état de sélection du canal :

- Appuyez sur le **sélecteur Volume/Canal**.
- Appuyez sur  .
- Appuyez sur  .

- Attendez que le délai d'ouverture du menu expire.

## Configuration du sélecteur à double fonction

Suivez la procédure ci-après pour configurer le sélecteur à double fonction de la radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

## Boutons du microphone à clavier

Vous pouvez utiliser le clavier alphanumérique 3 x 4 du microphone à clavier de navigation 4 directions (référence Motorola Solutions RMN5127\_) pour accéder aux fonctions de votre radio. Selon le caractère requis, vous devez appuyer

- 4 Appuyez sur  ou  pour accéder à l'option Double sélect. Appuyez sur  pour valider la sélection.  
L'écran affiche les mentions Volume uniq. et Volume&Canal.

- 5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.  
Le symbole ✓ apparaît en regard des paramètres sélectionnés. L'écran revient au menu précédent.

plusieurs fois sur une même touche. Le tableau ci-dessous indique le nombre de pressions nécessaires sur une touche pour obtenir le caractère souhaité.

Touche	Nombre de pressions												
	1	2	3	4	5	6	7	8	9	10	11	12	13
1 .,?	1	.	,	?	!	@	&	'	%	—	:	*	#
2 ABC	A	B	C	2									
3 DEF	D	E	F	3									
4 GHI	G	H	I	4									
5 JKL	J	K	L	5									
6 MNO	M	N	O	6									

Tableau (suite)...

Touche	Nombre de pressions												
	1	2	3	4	5	6	7	8	9	10	11	12	13
 7 PARS	P	Q	R	S	7								
 8 TUV	T	U	V	8									
 WXYZ 9	W	X	Y	Z	9								
 0	0		<b>REMARQUE:</b> Appuyez sur cette touche pour saisir « 0 » et exercez une pression longue dessus pour activer le verrouillage des majuscules. Une deuxième pression longue déverrouille la touche des majuscules.										
 * ←	* ou Supp r		<b>REMARQUE:</b> Appuyez sur cette touche pendant la saisie de texte pour supprimer le caractère. Pendant la saisie de caractères numériques, appuyez sur cette touche pour saisir l'astérisque « * ».										
 #	# ou espa ce		<b>REMARQUE:</b> Appuyez sur cette touche pendant la saisie de texte pour insérer un espace. Pendant la saisie de caractères numériques, appuyez sur cette touche pour saisir le signe dièse « # ».										

## WAVE

WAVE™ (Wide Area Voice Environment) offre une nouvelle méthode pour passer des appels entre deux radios.

Cette fonction prend également en charge les appels entre des radios et d'autres appareils dotés de fonctionnalités WAVE. Cependant, un canal WAVE doit être configuré pour utiliser cette fonction.

Si la radio est dans un canal WAVE, elle ne peut pas recevoir d'appels provenant d'autres systèmes et peut uniquement recevoir des appels WAVE.

Si la radio est dans un canal WAVE, elle active automatiquement le Wi-Fi et poursuit la procédure de connexion au serveur WAVE. Les appels WAVE sont passés lorsque la radio est connectée à un réseau IP via le Wi-Fi.

### REMARQUE:

Cette fonctionnalité s'applique uniquement aux modèles DM4601e.

### Tableau 1: Icônes de l'écran WAVE

Les icônes suivantes apparaissent momentanément sur l'écran lorsque WAVE est activé.

	<b>WAVE connecté</b> WAVE est connecté.
	<b>WAVE déconnecté</b> WAVE est déconnecté.

## Définition d'un canal WAVE actif

Les canaux WAVE sont configurés via CPS. Suivez la procédure ci-après pour sélectionner le canal WAVE souhaité.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Canaux WAVE. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder au canal WAVE souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Définir actif. Appuyez sur  pour valider la sélection.
- 

L'écran affiche le symbole  en regard du canal sélectionné.

## Affichage des informations relatives aux canaux WAVE

Suivez la procédure ci-après pour afficher les informations relatives aux canaux WAVE.

- 1 Effectuez l'une des opérations suivantes :
    - Appuyez sur le bouton programmé **Liste des canaux WAVE**. Ignorez les étapes suivantes.
    - Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou  pour accéder à l'option Canaux WAVE. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou  pour accéder au canal WAVE souhaité. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option Voir détails. Appuyez sur  pour valider la sélection.
- 

L'écran affiche les détails du canal WAVE.

## Affichage des informations relatives aux terminaux WAVE

Suivez la procédure ci-après pour afficher les informations relatives aux terminaux WAVE.

- 1 Effectuez l'une des opérations suivantes :
    - Appuyez sur le bouton **Contact** programmé. Passez à l'[étape 3](#).
    - Appuyez sur  pour accéder au menu.
-

2 Appuyez sur  ou  pour accéder à l'option Terminaux. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou  pour accéder au terminal WAVE souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  pour sélectionner Voir détails.

---

L'écran affiche les détails du terminal WAVE.

## Modification de la configuration WAVE

Suivez la procédure ci-après pour définir le mot de passe, l'ID d'utilisateur et l'adresse IP du serveur WAVE.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option WAVE. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  pour sélectionner l'option Adresse serveur. Appuyez sur  pour modifier l'adresse du serveur. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  pour accéder à l'option ID utilisateur. Appuyez sur  pour modifier l'ID

d'utilisateur. Appuyez sur  pour valider la sélection.

---

- 7 Appuyez sur  pour accéder à l'option **Mot de passe**. Appuyez sur  pour afficher ou modifier le mot de passe WAVE. Appuyez sur  pour valider la sélection.
- 

- 8 Appuyez sur  pour accéder à l'option **Appliquer**. Appuyez sur  pour appliquer toutes les modifications apportées.
- 

L'écran affiche brièvement un mini-avis positif avant de revenir à l'écran **Paramètres radio**.

## Émission d'appels de groupe

Suivez la procédure ci-après pour passer des appels de groupe sur un canal WAVE.

- 1 Sélectionnez le canal WAVE correspondant à l'ID ou à l'alias de groupe requis.
- 

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel. La LED passe au vert. La première ligne affiche l'icône **Appel de groupe** et l'alias correspondant. La deuxième ligne affiche l'alias du groupe WAVE.
- 

- 3 Effectuez l'une des opérations suivantes :
- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  - Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.
- 

- 4 Relâchez le bouton **PTT** pour écouter. La LED passe au vert lorsque la radio cible répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.
- 

- 5 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre

et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. La radio revient à l'écran affiché avant l'émission de l'appel.

---

Cette page a été laissée vide de manière intentionnelle.

## Fonctionnement de Capacity Max

Capacity Max est un système radio à ressources partagées basé sur un canal de contrôle. Les fonctionnalités à disposition des utilisateurs radio dans ce système sont abordées dans ce chapitre.

### Bouton PTT (Push-to-Talk)

Le bouton **PTT** comprend deux fonctions principales.

- Pendant un appel, le bouton **PTT** permet d'émettre vers d'autres radios ciblées par cet appel. Appuyez sur le bouton **PTT** pour ouvrir le microphone.
- Lorsqu'il n'y a pas d'appel en cours, le bouton **PTT** sert à effectuer un nouvel appel.

Maintenez le bouton **PTT** enfoncé pour parler. Relâchez le bouton **PTT** pour écouter.

Si la tonalité Parler autorisé ou la tonalité locale **PTT** est activée, attendez la fin de la tonalité d'alerte courte avant de parler.

Si la fonction d'indication de canal libre est activée sur votre radio (programmée par votre revendeur), une brève

tonalité d'alerte sera émise lorsque le bouton **PTT** sera relâché par le destinataire. Cette tonalité confirme que le canal est libre et que vous pouvez parler.

Une tonalité d'interdiction de parler est émise en continu en cas d'interruption de votre appel, par exemple si la radio reçoit un appel d'urgence. Vous devez alors relâcher le bouton **PTT**.

### Boutons programmables

Votre fournisseur peut programmer les boutons programmables en fonction de la durée de pression, pour vous permettre d'accéder directement à des fonctions radio.

#### Pression courte

Vous appuyez sur le bouton et relâchez rapidement.

#### Pression longue

Vous appuyez sur le bouton et vous le maintenez enfoncé pendant la durée programmée.

#### REMARQUE:

Reportez-vous à [Gestion de l'urgence à la page 457](#) pour plus d'informations sur la durée programmée du bouton **Urgence**.

## Fonctions radio attribuables

Les fonctions radio suivantes peuvent être attribuées à des boutons programmables par votre revendeur ou par l'administrateur système.

### **Ambiance audio**

Permet à l'utilisateur de choisir un environnement de fonctionnement pour la radio.

### **Profils audio**

Permet à l'utilisateur de choisir le profil audio.

### **Commutateur<sup>®</sup> audio Bluetooth**

Bascule le routage audio entre le haut-parleur interne de la radio et l'accessoire externe Bluetooth.

### **Connexion Bluetooth**

Lance une recherche et établit la connexion Bluetooth.

### **Déconnexion Bluetooth**

Met fin à toutes les connexions Bluetooth établies entre la radio et les périphériques compatibles Bluetooth.

### **Détection Bluetooth**

Active le mode découverte Bluetooth pour votre radio.

### **Contacts**

Fournit un accès direct au répertoire.

### **Alerte d'appel**

Vous donne un accès direct au répertoire pour sélectionner un contact à qui vous souhaitez envoyer un avertissement d'appel.

### **Journal d'appels**

Sélectionne le journal d'appels.

### **Urgence**

Selon la programmation, cette fonction lance ou annule une alarme ou un appel d'urgence.

### **Audio public externe (AP)**

Permet de basculer le routage audio entre la sonorisation AP connectée et le système AP interne de la radio.

### **Réinitialiser le canal d'accueil**

Définit un nouveau canal d'accueil.

### **Éteindre le rappel de canal d'accueil**

Désactive le rappel de canal d'accueil.

### **Localisation en intérieur**

Active ou désactive la localisation en intérieur.

### **Audio intelligent**

Active ou désactive l'audio intelligent.

**Numérotation manuelle**

Lance un appel individuel en saisissant un ID de terminal.

**Itinérance de site manuelle**

Lance la recherche manuelle de site.

**CGA micro**

Active ou désactive la commande de gain automatique (CGA) du microphone interne.

**Notifications**

Permet d'accéder directement à la liste des notifications.

**Accès par numérotation rapide**

Lance directement un appel de diffusion, individuel, téléphonique ou de groupe prédéfini, un avertissement d'appel prédéfini ou un message texte rapide prédéfini.

**Fonction de carte d'option**

Active ou désactive les fonctions de la carte d'option sur les canaux qui les utilisent.

**Téléphone**

Permet d'accéder directement au répertoire téléphonique.

**Confidentialité**

Active ou désactive la fonction de cryptage.

**Audio public (AP)**

Active ou désactive le système AP interne de la radio.

**ID et alias de la radio**

Fournit l'ID et l'alias de la radio.

**Écoute ambiance**

Active le microphone d'une radio sans activer d'indicateur.

**Informations du site**

Affiche l'ID et le nom du site Capacity Max actuel.

Lit des messages vocaux d'annonce de site pour le site actuel lorsque le mode Annonce vocale est activé.

**Verrouillage site**

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

**Contrôle de télémétrie**

Contrôle la broche de sortie sur une radio locale ou distante.

**Text Message**

Sélectionne le menu de message texte.

**Amélioration trille**

Active ou désactive l'amélioration des sons vibrants.

### Act./désact. Annonce vocale

Active ou désactive l'annonce vocale.

### Annonce vocale de canal

Émet les messages d'annonce vocale de zone et de canal pour le canal courant. Cette fonction n'est pas disponible lorsque l'annonce vocale est désactivée.

### Wi-Fi

Active et désactive le Wi-Fi.

### Zone Selection

Permet d'effectuer une sélection dans une liste de zones.

## Fonctions utilitaires ou paramètres attribuables

Les fonctions utilitaires ou paramètres radio suivants peuvent être attribués à des boutons programmables.

### Tones/Alerts

Active ou désactive l'ensemble des tonalités et avertissements.

### Rétroéclairage

Active/désactive le rétro-éclairage.

### Canal Haut/Bas

Selon la programmation, le canal précédent ou suivant est sélectionné.

### Mode Affichage

Active ou désactive le mode Jour/Nuit de l'écran.

### Niveau de puissance

Passes du niveau d'émission élevé à faible et vice-versa.

## Accès aux fonctions préprogrammées

Suivez la procédure ci-après pour accéder aux fonctions préprogrammées de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmé. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à la fonction de menu, puis appuyez sur  pour sélectionner une fonction ou ouvrir un sous-menu.

3 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour revenir à l'écran précédent.
- Exercez une pression longue sur  pour revenir à l'écran d'accueil.

Après une période d'inactivité prédéterminée, votre radio ferme automatiquement le menu et revient à l'écran d'accueil.

Les boutons de navigation du menu sont aussi disponibles sur le microphone à clavier. Voir [Boutons du microphone à clavier à la page 44](#).

## Indicateurs d'état

Ce chapitre présente les indicateurs d'état et les tonalités audio utilisés sur la radio.

### Icônes

L'écran à cristaux liquides (LCD) affiche l'état de votre radio, les entrées textuelles et les entrées du menu.

### Tableau 2: Icônes de l'affichage

Les icônes suivantes apparaissent sur la barre d'état, en haut de l'écran de la radio. Les icônes sont classées sur la gauche par ordre d'apparition ou d'utilisation et sont spécifiques à chaque canal.

	<p><b>Bluetooth connecté</b> La fonction Bluetooth est activée. L'icône reste affichée lorsqu'un appareil Bluetooth distant est connecté.</p>
	<p><b>Bluetooth Non connecté</b> La fonction Bluetooth est activée, mais aucun appareil Bluetooth distant n'est connecté.</p>
	<p><b>L'appel d'urgence</b> La radio est en mode Urgence.</p>
	<p><b>GNSS disponible</b> La fonctionnalité GNSS est activée. L'icône reste allumée lorsqu'une position peut être déterminée.</p>

Tableau (suite)...

	<p><b>GNSS non disponible</b> La fonctionnalité GNSS est activée, mais votre radio ne reçoit pas de données du satellite.</p>
	<p><b>Données en volume élevé</b> La radio reçoit des données en volume élevé et le canal est occupé.</p>
	<p><b>Localisation en intérieur disponible<sup>1</sup></b> L'état Localisation en intérieur est activé et disponible.</p>
	<p><b>Localisation en intérieur non disponible<sup>1</sup></b> L'état Localisation en intérieur est activé, mais il n'est pas disponible en raison de la désactivation du Bluetooth ou d'un balayage de balises suspendu par Bluetooth.</p>
	<p><b>Mode Muet</b> Le mode Muet est activé et le haut-parleur est désactivé.</p>

Tableau (suite)...

	<p><b>Notification</b> La liste des notifications contient au moins un événement manqué.</p>
	<p><b>Carte d'options</b> La carte d'option est activée. (Modèles avec carte d'option uniquement)</p>
	<p><b>Carte d'option non fonctionnelle</b> La carte d'option est désactivée.</p>
	<p><b>Compteur de programmation par liaison radio (OTAP, Over-the-Air Programming)</b> Indique le temps restant avant le redémarrage automatique de la radio.</p>
	<p><b>Priorité 1</b> Indique le groupe de parole de priorité 1.</p>

Tableau (suite)...

<sup>1</sup> Applicable uniquement aux modèles dotés de la dernière version du logiciel et du matériel.

	<p><b>Priorité 2</b> Indique le groupe de parole de priorité 2.</p>
	<p><b>Indication de la puissance du signal reçu (RSSI)</b> Le nombre de barres affichées représente l'intensité du signal de réception. Quatre barres indiquent le niveau maximal du signal. Cette icône est uniquement affichée pendant la réception.</p>
	<p><b>Suppr. réponse</b> La fonctionnalité Suppr. réponse est activée.</p>
	<p><b>Sonnerie seulement</b> Le mode Sonnerie est activé.</p>
	<p><b>Crypté</b> La fonction de cryptage est activée.</p>

Tableau (suite)...

	<p><b>Silencieux</b> Le mode Silencieux est activé.</p>
	<p><b>Itinérance de site</b> La fonction d'itinérance de site est activée.</p>
	<p><b>État</b> Indique un nouveau message d'état.</p>
	<p><b>Désactivation des tonalités</b> Les tonalités sont désactivées.</p>
	<p><b>Non crypté</b> La fonction de cryptage est désactivée.</p>
	<p><b>Wi-Fi excellent<sup>2</sup></b> Le signal Wi-Fi est excellent.</p>
	<p><b>Wi-Fi bon<sup>2</sup></b> Le signal Wi-Fi est bon.</p>

Tableau (suite)...

<sup>2</sup> Applicable uniquement aux modèles DM4601e.

	<b>Wi-Fi moyen<sup>2</sup></b> Le signal Wi-Fi est moyen.
	<b>Wi-Fi faible<sup>2</sup></b> Le signal Wi-Fi est faible.
	<b>Wi-Fi indisponible<sup>2</sup></b> Le signal Wi-Fi est indisponible.

**Tableau 3: Icônes avancées du menu**

Les icônes suivantes sont affichées à côté des éléments du menu qui permettent de choisir entre deux options ou pour signaler l'existence d'un sous-menu contenant deux options.

	<b>Case à cocher (cochée)</b> Indique que l'option correspondante est activée.
	<b>Case à cocher (non cochée)</b> Indique que l'option correspondante n'est pas activée.

*Tableau (suite)...*

	<b>Case noire</b> Indique le sous-menu de l'option sélectionnée dans le menu.
---	--

**Tableau 4: Icônes des appareils Bluetooth**

Les icônes suivantes s'affichent en regard des éléments de la liste des dispositifs Bluetooth disponibles pour indiquer leur type.

	<b>Dispositif audio Bluetooth</b> Un dispositif d'écoute par connexion Bluetooth, par exemple une oreillette.
	<b>Dispositif de données Bluetooth</b> Un dispositif de transmission de données par connexion Bluetooth, par exemple un scanner.
	<b>Dispositif PTT Bluetooth</b> Un dispositif PTT compatible Bluetooth, par exemple un POD.

**Tableau 5: Icônes d'appel**

En cours d'appel, les icônes suivantes peuvent apparaître sur l'écran de votre radio. Elles peuvent également

s'afficher dans le répertoire pour indiquer le type d'alias ou d'ID.

	<p><b>Appel PC Bluetooth</b> Indique un appel PC Bluetooth en cours.</p> <p>Dans la liste des Contacts, il indique l'alias (nom) ou l'ID (numéro) d'un appel PC Bluetooth.</p>
	<p><b>Appel de répartition</b> Le type de contact Appel de répartition permet d'envoyer un message texte à un PC répartiteur via un serveur de messagerie texte tiers.</p>
	<p><b>Appel de groupe/Appel général</b> Signale un appel de groupe ou un appel général en cours.</p> <p>Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.</p>
	<p><b>Appel individuel</b> Signale un appel individuel en cours.</p>

Tableau (suite)...

	<p>Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de terminal radio.</p>
	<p><b>Appel téléphonique de groupe/Appel général</b> Indique un appel téléphonique en appel de groupe/général en cours.</p> <p>Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.</p>
	<p><b>Appel téléphonique en appel individuel</b> Indique un appel téléphonique en appel individuel en cours.</p> <p>Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de téléphone.</p>

### Tableau 6: Icônes de ticket de tâche

Les icônes suivantes apparaissent momentanément sur l'écran dans le dossier Ticket de tâche.

	<b>Toutes les tâches</b> Désigne toutes les tâches listées.
	<b>Nouvelles tâches</b> Indique les nouvelles tâches.
	<b>En cours</b> Les tâches sont en cours d'émission. Ceci s'affiche avant l'indication Échec envoi ou Envoi réussi des tickets de tâche.
	<b>Échec envoi</b> Impossible d'envoyer les tâches.
	<b>Envoi réussi</b> Les tâches ont été envoyées avec succès.

Tableau (suite)...

	<b>Priorité 1</b> Indique le niveau de priorité 1 pour les tâches.
	<b>Priorité 2</b> Indique le niveau de priorité 2 pour les tâches.
	<b>Priorité 3</b> Indique le niveau de priorité 3 pour les tâches.

### Tableau 7: Icônes des mini-avis

Les icônes suivantes peuvent apparaître momentanément sur l'écran après le déclenchement d'une tâche par l'utilisateur.

	<b>Échec de transmission (négatif)</b> La tâche n'a pas pu être exécutée correctement.
	<b>Transmission réussie (positif)</b> La tâche a été correctement exécutée.

Tableau (suite)...

### Transmission en cours (transition)

La radio émet. Ceci s'affiche avant l'indication Transmission réussie ou Échec de transmission.

ou

### Message individuel ou de groupe lu

Le message texte a été lu.

ou

### Message individuel ou de groupe non lu

Le message texte n'a pas été lu.

ou

### Échec envoi

Le message texte ne peut pas être envoyé.

ou

### Envoi réussi

Le message texte a été envoyé avec succès.

## Tableau 8: Icônes des éléments envoyés

Les icônes suivantes apparaissent dans le coin supérieur droit de l'écran de la radio, dans le dossier Messages envoyés.

ou

### En cours

Le message texte envoyé à un ID ou un alias de terminal radio est en attente de transmission, qui sera suivie par l'attente de l'accusé de réception.

Le message texte envoyé à un ID ou un alias de groupe est en attente de transmission.

Tableau (suite)...

## Indicateur LED

Le voyant LED signale le statut opérationnel de votre radio.

### Rouge clignotant

La radio a échoué à l'auto-test au moment de l'allumage.

La radio reçoit une émission d'urgence.

La radio émet alors que son état de batterie est faible.

La radio est hors de portée si elle est configurée avec le système de transpondeur à portée automatique (ARTS, Auto-Range Transponder System).

Le mode Muet est activé.

### Vert fixe

La radio est en cours d'allumage.

La radio est en cours d'émission.

La radio envoie un avertissement d'appel ou une transmission urgente.

### Vert clignotant

La radio reçoit un appel ou des données.

La radio détecte une activité ou récupère des transmissions en programmation par liaison radio.

La radio détecte une activité en liaison radio.

### REMARQUE:

Cette activité peut affecter ou non le canal programmé de la radio, en raison de la nature du protocole numérique.

### Vert clignotant double

La radio reçoit un appel ou des données cryptés.

### Jaune fixe

La radio est en mode Détection Bluetooth.

### Jaune clignotant

La radio doit encore répondre à une alerte d'appel.

### Jaune clignotant double

L'itinérance automatique est activée sur la radio.

La radio recherche activement un nouveau site.

La radio doit encore répondre à un avertissement d'appel de groupe.

La radio est verrouillée.

## Tonalités

Les tonalités émises sur le haut-parleur de la radio sont décrites ci-après.

Tonalité aiguë

Tonalité grave

## Tonalités audio

Les tonalités audio vous informent de l'état de la radio ou vous avertissent en cas de réception de données sur celle-ci.

### Tonalité continue

Son uniforme. Émise en continu jusqu'à la fin de l'état.

### Tonalité périodique

Tonalité périodique selon la durée programmée. La tonalité est répétée à intervalles réguliers.

### Tonalité répétitive

Un seul son est répété jusqu'à ce que l'utilisateur le désactive.

### Tonalité momentanée

Tonalité émise une fois pendant une courte durée définie par la radio.

## Tonalités d'indication

Les tonalités d'indication fournissent des indications sonores relatives à l'état de la radio après le déclenchement d'une tâche par l'utilisateur.

Tonalité d'indication positive

Tonalité d'indication négative

## Enregistrement

Vous pouvez recevoir un certain nombre de messages liés à l'enregistrement.

### Enregistr.

L'enregistrement est généralement envoyé au système lors de la mise sous tension, de la modification du groupe de parole ou en itinérance. Si l'enregistrement de la radio sur un site échoue, la radio tente automatiquement de se déplacer vers un autre site. La radio supprime temporairement le site où l'enregistrement a échoué de la liste d'itinérance.

Cette indication signifie que la radio est occupée et à la recherche d'un site vers lequel se déplacer ou que la radio a trouvé un site, mais qu'elle est en attente d'une réponse aux messages d'enregistrement de la radio.

Lorsque `Enregistr.` s'affiche sur la radio, une tonalité retentit et l'indicateur LED jaune clignote deux fois pour indiquer une recherche de site.

Si les indications restent affichées, l'utilisateur doit changer d'emplacement ou se déplacer sur un autre site manuellement, s'il y est autorisé.

### Hors de portée

Une radio est considérée hors de portée lorsqu'elle ne parvient pas à détecter un signal provenant du système ou du site actuel. En général, cette indication signifie que la radio est en dehors de zone de couverture géographique de radiofréquence (RF) sortante.

Lorsque `Hors de portée` s'affiche sur la radio, une tonalité répétitive est émise et l'indicateur LED rouge clignote.

Contactez votre revendeur ou votre administrateur système si la radio indique hors de portée dans une zone bénéficiant d'une bonne couverture de RF.

### Échec de l'affiliation au groupe de parole

Une radio tente une affiliation au groupe de parole spécifié dans les canaux ou l'UKP (Unified Knob Position) au cours de l'enregistrement.

Une radio en échec d'affiliation ne peut pas émettre ni recevoir d'appels dans le groupe de parole avec lequel elle tente une affiliation.

En cas d'échec de l'affiliation d'une radio à un groupe de parole, `Alias UKP` s'affiche sur l'écran d'accueil avec un arrière-plan en surbrillance.

Contactez votre revendeur ou votre administrateur système si la radio reçoit des indications d'échec d'affiliation.

### Enregistrement refusé

Des indicateurs d'enregistrement refusé s'affichent lorsque l'enregistrement au système n'est pas accepté.

La radio n'indique pas à son utilisateur la raison spécifique du refus de l'enregistrement. En général, un enregistrement est refusé lorsque l'opérateur système a désactivé l'accès de la radio au système.

Lorsque l'enregistrement d'une radio est refusé, `Refus enregistr.` s'affiche sur la radio et l'indicateur LED jaune clignote deux fois pour indiquer une recherche de site.

## Sélection des zones et des canaux

Ce chapitre présente la procédure de sélection d'une zone ou d'un canal sur votre radio.

La radio peut être programmée avec un maximum de 250 zones Capacity Max et un maximum de 160 canaux par zone. Chaque zone Capacity Max contient un maximum de 16 positions attribuables.

### Sélection des zones

Suivez la procédure ci-après pour sélectionner une zone sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Sélection de zone** préprogrammé. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Zone. Appuyez sur  pour valider la sélection.

L'écran affiche le symbole ✓ ainsi que la zone actuelle.

- 3 Appuyez sur  ou sur  pour accéder à la zone souhaitée. Appuyez sur  pour valider la sélection.

L'écran affiche momentanément <Zone> sélectionnée avant de revenir à l'écran de la zone sélectionnée.

### Sélection des zones à l'aide de la recherche d'alias

Suivez la procédure ci-après pour sélectionner une zone sur votre radio à l'aide de la recherche d'alias.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option *Zone*. Appuyez sur  pour valider la sélection.
- L'écran affiche le symbole  ainsi que la zone actuelle.
- 

- 3 Saisissez le premier caractère de l'alias souhaité.
- L'écran affiche un curseur clignotant.
- 

- 4 Saisissez le reste des caractères de l'alias souhaité.
- La recherche d'alias n'est pas sensible à la casse. Si plusieurs entrées portent le même nom, l'écran affiche l'entrée figurant en tête de liste.
- La première ligne affiche les caractères saisis. Les lignes suivantes de l'écran affichent les autres résultats de la recherche.
- 

- 5 Appuyez sur  pour valider la sélection.

L'écran affiche *<Zone> Activé* pendant quelques instants puis revient à l'écran de la zone sélectionnée.

---

## Sélection d'un type d'appel

Utilisez le bouton de sélection de canal pour sélectionner un type d'appel. Il peut s'agir d'un appel de groupe, d'un appel de diffusion, d'un appel général ou d'un appel individuel, en fonction de la programmation de la radio. Si vous placez le bouton de sélection de canal sur une autre position (affectée à un type de canal), la radio s'enregistre de nouveau sur le système Capacity Max. La radio s'enregistre avec l'ID du groupe de parole programmé pour la nouvelle position du sélecteur de canal le nouveau type d'appel.

Comme la radio ne fonctionne pas lorsque vous sélectionnez un canal non programmé, utilisez le sélecteur de canal pour sélectionner un canal programmé.

Une fois que la zone requise est affichée (si plusieurs zones sont définies sur la radio), tournez le

sélecteur de canal programmé pour sélectionner le type d'appel.

---

## Sélection d'un site

Un site offre une couverture pour une zone spécifique. Dans un réseau multisite, la radio Capacity Max recherche automatiquement un nouveau site lorsque le niveau du signal provenant du site en cours tombe en dessous d'un seuil acceptable.

Le système Capacity Max peut prendre en charge jusqu'à 250 sites.

## Demande d'itinérance

Une demande d'itinérance demande à la radio de rechercher un site différent, même si le signal du site en cours est acceptable.

Si aucun site n'est disponible :

- L'écran de la radio affiche Recherche et continue à chercher dans la liste de sites.
- La radio revient au site précédent s'il est toujours disponible.

### REMARQUE:

cette fonction est programmée par votre revendeur.

Appuyez sur le bouton programmé d'**itinérance de site manuelle**.

Un signal sonore est émis pour indiquer que la radio a changé de site. L'écran affiche ID du site <numéro du site>.

---

## Site Lock On/Off

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

Appuyez sur le bouton programmé **Verrouillage site**.

Si la fonction **Verrou. site** est activée :

- Un signal sonore positif indique que la radio est verrouillée sur le site en cours.
- L'écran indique que le site est verrouillé.

Si la fonction **Verrou. site** est désactivée :

- Un signal sonore négatif indique que la radio n'est pas verrouillée.
- L'écran indique que le site est déverrouillé.

---

## Restriction sur un site

Dans un système Capacity Max, l'administrateur système de la radio peut sélectionner les canaux que la radio est autorisée à utiliser.

Il n'est pas nécessaire de reprogrammer la radio pour modifier la liste des sites autorisés et non autorisés. Si votre radio tente de s'enregistrer sur un site non autorisé, elle reçoit une indication spécifiant que l'accès au site est refusé. Dans ce cas, la radio recherche un autre site du réseau.

Lorsque vous rencontrez des restrictions sur un site, votre radio affiche `Refus enregist.` et l'indicateur LED jaune clignote deux fois pour indiquer une recherche de site.

## Ressources partagées du site

Un site doit pouvoir communiquer avec le contrôleur à ressources partagées pour être considéré comme un système isolé.

Si le site ne peut pas communiquer avec le contrôleur à ressources partagées du système, la radio passe en mode site isolé. Sur un site isolé, la radio fournit une indication sonore et visuelle périodique à l'utilisateur pour l'informer des fonctionnalités limitées.

Lorsqu'une radio se trouve dans un site isolé, elle affiche `Site isolé` et une tonalité répétitive retentit.

Les radios des sites isolés peuvent toujours passer des appels vocaux individuels et de groupe et envoyer des messages texte à d'autres radios au sein du même site. Les consoles voix, les enregistreurs, les passerelles de téléphone et les applications de données ne peuvent pas communiquer avec les radios sur le site.

Lorsqu'elle se trouve dans un site isolé, une radio impliquée dans des appels sur plusieurs sites pourra uniquement communiquer avec d'autres radios au sein du même site. Les communications en provenance et vers d'autres sites seront perdues.

### REMARQUE:

S'il existe plusieurs sites couvrant la position actuelle de la radio et que l'un de ces sites devient site isolé, la radio se déplace vers un autre site disponible dans la zone de couverture.

# Appels

Ce chapitre présente les opérations permettant de recevoir, prendre, passer et arrêter des appels.

Vous pouvez sélectionner un alias ou un ID de terminal radio/de groupe une fois que vous avez sélectionné un canal à l'aide de l'une des fonctions suivantes :

## Recherche d'alias

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels de groupe, les appels individuels et les appels généraux.

## Liste des contacts

Cette méthode offre un accès direct au répertoire.

## Numérotation manuelle (à l'aide du répertoire)

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels individuels et téléphoniques.

## Touches numériques programmées

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels de groupe, les appels individuels et les appels généraux.

## REMARQUE:

Vous pouvez attribuer un seul alias ou ID à une touche numérique, mais vous pouvez attribuer plus d'une touche numérique à un alias ou ID. Toutes les touches numériques d'un microphone à clavier peuvent être attribuées. Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

## Bouton programmé Accès par numérotation rapide

Cette méthode est employée pour les appels de groupe, individuels et téléphoniques uniquement.

Vous ne pouvez attribuer qu'un seul ID à un bouton d'**accès par numérotation rapide** avec une pression courte ou longue sur un bouton programmable. Plusieurs boutons d'**accès par numérotation rapide** peuvent être programmés sur votre radio.

## Bouton programmable

Cette méthode est employée pour les appels téléphoniques uniquement.

## Sélecteur de volume/canal

Cette méthode sélectionne manuellement un ID ou alias du terminal ou un ID ou alias du groupe.

La LED s'allume en vert fixe lorsque la radio émet et clignote en vert lorsque la radio reçoit.

### REMARQUE:

la LED est vert fixe lorsque la radio émet. Elle clignote double en vert lorsque la radio reçoit un appel utilisant la fonction Secret.

Pour décrypter un appel crypté, votre radio doit avoir la même clé privée ou la même valeur de clé et le même ID de clé (programmés par votre fournisseur) que la radio en émission (la radio qui vous appelle).

Reportez-vous à la section [Confidentialité à la page 499](#) pour plus d'informations.

## Appels de groupe

Votre radio doit avoir été configurée pour faire partie d'un groupe afin de pouvoir échanger des appels avec un groupe d'utilisateurs.

## Émission d'appels de groupe

Pour lancer un appel destiné à un groupe d'utilisateurs, votre radio doit être configurée comme membre de ce

groupe. Suivez la procédure ci-après pour passer des appels de groupe sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Sélectionnez un canal correspondant à l'alias ou à l'ID du groupe actif. Voir [Sélection d'un type d'appel à la page 68](#).
- Appuyez sur le bouton **Accès direct** préprogrammé.

---

2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. La première ligne affiche l'icône **Appel de groupe** et l'alias correspondant.

---

3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  - Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.
-

#### 4 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

---

#### 5 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

L'appelant peut appuyer sur  pour mettre fin à un appel de groupe.

---

## Émission d'appels de groupe à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio à l'aide du répertoire.

#### 1 Appuyez sur pour accéder au menu.

---

[Envoyer un commentaire](#)

#### 2 Appuyez sur ou sur pour accéder au répertoire. Appuyez sur pour valider la sélection.

---

#### 3 Appuyez sur ou sur pour accéder à l'alias ou à l'ID souhaité. Appuyez sur pour valider la sélection.

---

#### 4 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert.  
La première ligne de texte affiche l'alias ou l'ID du terminal. La seconde ligne affiche Appel de groupe et l'icône **Appel de groupe**.

---

#### 5 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  - Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.
-

- 6 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsqu'un utilisateur du groupe répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

---

- 7 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

L'appelant peut appuyer sur  pour mettre fin à l'appel de groupe.

Vous entendez une courte tonalité. L'écran affiche Appel terminé.

---

## Émission d'appels de groupe à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio à l'aide de la touche numérique programmable.

- 1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

---

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel. La LED passe au vert.
-

### 3 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsqu'un utilisateur du groupe répond.

### 4 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. La radio revient à l'écran affiché avant l'émission de l'appel.

L'appelant peut appuyer sur  pour mettre fin à l'appel de groupe.

Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

## Émission d'appels de groupe à l'aide de la recherche d'alias

Vous pouvez aussi utiliser la recherche d'alias ou alphanumérique pour rechercher un alias de terminal. Cette fonction n'est disponible que dans les contacts. Suivez la procédure ci-après pour passer des appels à l'aide de la recherche d'alias.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

L'écran affiche les entrées par ordre alphabétique.

3 Appuyez sur  ou  pour accéder à l'alias ou à l'ID du terminal souhaité. La première ligne de l'écran affiche Numéro de téléphone :. La deuxième ligne de l'écran affiche un curseur clignotant. Utilisez le pavé numérique pour saisir un numéro de téléphone.

- 4 Appuyez sur  pour valider la sélection. Si l'entrée sélectionnée est vide, une tonalité d'indication négative est émise et l'écran affiche le message No. Tél. invalide.
- 
- 5 Appuyez sur  ou  pour accéder à l'option Appeler tél. et Appuyez sur  pour valider la sélection. Si le code d'accès n'a pas été préconfiguré dans le répertoire, la première ligne de l'écran indique Code d'accès:. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez le code d'accès, puis appuyez sur le bouton  pour continuer. En cas de réussite, la tonalité DTMF est émise. Vous entendez la tonalité de numérotation de l'utilisateur du téléphone. La première ligne de l'écran affiche l'alias ou l'ID de terminal ainsi que l'icône RSSI. La deuxième ligne de l'écran affiche Appel tél. ainsi que l'icône Appel téléphonique. En cas d'échec, une tonalité est émise et l'écran affiche Appel tél. échoué. Votre radio revient à l'écran de saisie du code d'accès. Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant de lancer l'appel.
- 
- 6 Appuyez sur le bouton **PTT** pour parler et relâchez-le pour écouter. L'icône **RSSI** disparaît lors de l'émission.
- 
- 7 Pour entrer des chiffres supplémentaires, si nécessaire au cours de l'appel, effectuez l'une des opérations suivantes :
- Appuyez sur n'importe quelle touche du clavier pour commencer la saisie de chiffres supplémentaires. La première ligne de l'écran affiche Chiffres supplémentaires :. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez les chiffres supplémentaires, puis appuyez sur le bouton  pour continuer. La tonalité DTMF est émise et la radio revient à l'écran précédent.
  - Appuyez sur le bouton **Accès par numérotation rapide**. la tonalité DTMF est émise. Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.
- 
- 8 Appuyez sur  pour mettre fin à l'appel. Si le code de libération n'a pas été préconfiguré dans le répertoire, la première ligne de l'écran indique Code

de libération: La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez le code de

libération, puis appuyez sur  pour continuer. La radio revient à l'écran précédent. La tonalité DTMF est émise et l'écran affiche Fin Appel tél.. En cas de réussite, une tonalité est émise et l'écran affiche Appel tél. terminé. Votre radio revient à l'écran Appel téléphonique. En cas d'échec, la radio revient à l'écran Appel téléphonique. Si vous appuyez sur le bouton **PTT** lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche OK pour appeler. lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche Appel terminé. Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

- 9 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. L'écran affiche Appel terminé.

L'appelant peut appuyer sur  pour mettre fin à l'appel de groupe.

#### REMARQUE:

Pendant l'accès au canal, appuyez sur  pour rejeter la tentative d'appel. Une tonalité est émise.

Appuyez sur le bouton  ou sur  pour quitter la recherche d'alias. pendant l'appel, si vous appuyez sur la touche **Accès direct** à laquelle est attribué le code de libération ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel. Pendant l'accès au canal et la transmission du code d'accès/de libération ou des chiffres supplémentaires, votre radio répond uniquement au bouton Marche/Arrêt, au bouton de volume et au sélecteur de canal. Une tonalité est émise pour chaque entrée non valide.

## Réponse aux appels de groupe

Suivez la procédure ci-après pour répondre aux appels de groupe sur votre radio.

Lorsque vous recevez un appel de groupe :

- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'alias de l'appelant.
- La deuxième ligne affiche l'alias de l'appel de groupe.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

1 Effectuez l'une des opérations suivantes :

- Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.
- Si la fonction Interruption vocale est activée, appuyez sur le bouton **PTT** pour couper le son de

la radio en émission afin de libérer le canal pour pouvoir répondre.

La LED passe au vert.

---

2 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  - Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.
- 

3 Relâchez le bouton **PTT** pour écouter.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

---

## Appel de diffusion

Un appel de diffusion est un appel vocal unidirectionnel provenant d'un utilisateur et destiné à l'ensemble d'un groupe de parole.

La fonctionnalité d'appel de diffusion permet uniquement à l'utilisateur à l'origine de l'appel de transmettre au groupe

de parole, tandis que les destinataires de l'appel ne peuvent pas répondre.

L'appelant peut également mettre fin à l'appel de diffusion. Pour recevoir un appel provenant d'un groupe d'utilisateurs ou appeler un groupe d'utilisateurs, la radio doit être configurée comme membre de ce groupe.

## Émission d'appels de diffusion

Suivez la procédure ci-après pour passer des appels de diffusion sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Sélectionnez un canal correspondant à l'alias ou à l'ID du groupe actif. Voir [Sélection d'un type d'appel à la page 68](#).
  - Appuyez sur le bouton **Accès direct** préprogrammé.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel. La LED passe au vert. L'écran affiche l'icône **Appel de groupe** et l'alias correspondant.

- 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

L'appelant peut appuyer sur  pour mettre fin à l'appel de diffusion.

## Émission d'appels de diffusion à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels de diffusion sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED clignote en vert.  
La première ligne de texte affiche l'alias ou l'ID du terminal. La seconde ligne affiche Appel de groupe et l'icône **Appel de groupe**.

---

5 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

L'appelant peut appuyer sur  pour mettre fin à l'appel de diffusion.

---

## Émission d'appels de diffusion à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels de diffusion sur votre radio à l'aide de la touche numérique programmable.

1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

---

2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran. La première ligne affiche l'alias de l'appelant.

---

3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

L'appelant peut appuyer sur  pour mettre fin à l'appel de diffusion.

#### REMARQUE:

Les utilisateurs destinataires ne sont pas autorisés à répondre pendant un appel de diffusion. L'écran affiche *Réponse interdite*. La tonalité d'interdiction de réponse retentit momentanément si vous appuyez sur le bouton **PTT** pendant un appel de diffusion.

## Appel individuel

Un appel individuel est un appel provenant d'une radio individuelle communiquant avec une autre radio individuelle.

Il existe deux façons d'établir un appel individuel.

- Le premier type d'appel est appelé appel OACSU (Off Air Call Set Up, connexion sans émission). L'appel OACSU permet de configurer l'appel après l'exécution d'une vérification de présence et met automatiquement fin à l'appel.
- Le second type d'appel est appelé appel FOACSU (Full Off Air Call Set Up, connexion avec émission). L'appel FOACSU définit également l'appel après l'exécution d'une vérification de présence. Cependant, les appels FOACSU nécessitent un accusé de réception de

## Réception d'appels de diffusion

Suivez la procédure ci-après pour recevoir un appel de diffusion sur votre radio.

Lorsque vous recevez un appel de diffusion :

- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'alias de l'appelant.
- La deuxième ligne affiche l'alias de l'appel de groupe.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

l'utilisateur pour mettre fin à l'appel et permet à l'utilisateur d'accepter ou de refuser un appel.

Le type d'appel est configuré par l'administrateur système.

### REMARQUE:

L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

## Émission d'appels individuels

Votre radio doit être programmée pour que vous puissiez passer un appel individuel. Si cette fonction n'est pas activée, une tonalité d'indication négative est émise lorsque vous lancez l'appel. Suivez la procédure ci-après pour passer des appels individuels sur votre radio. Si la radio cible n'est pas disponible, une courte tonalité est émise et l'écran affiche `Appelé Non disponible`.

- 1 Effectuez l'une des opérations suivantes :
  - Sélectionnez un canal correspondant à l'alias ou à l'ID du terminal radio actif. Voir [Sélection d'un type d'appel à la page 68](#).
  - Appuyez sur le bouton **Accès direct** préprogrammé.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'écran affiche l'icône **Appel individuel** ainsi que l'alias du terminal et l'état de l'appel.

- 3 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

- 4 Relâchez le bouton **PTT** pour écouter.  
La LED passe au vert lorsque la radio cible répond.

- 5 L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une brève tonalité est émise. L'écran affiche `Appel terminé`.  
L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

## Émission d'appels individuels à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels individuels sur votre radio à l'aide de la touche numérique programmable.

- 1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'icône **Appel individuel** s'affiche dans le coin supérieur droit de l'écran. La première ligne affiche l'alias de l'appelant. La deuxième ligne affiche l'état de l'appel.

- 3 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsque la radio cible répond. L'écran affiche l'alias de la destination.

- 4 L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une brève tonalité est émise. L'écran affiche Appel terminé.  
L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

**REMARQUE:**

L'appelant et le destinataire peuvent mettre fin à un appel individuel en cours en appuyant sur .

## Refus d'un appel individuel

Lorsque vous recevez des appels individuels configurés comme FOACSU (Full Off Air Call) :

- La LED clignote en vert.
- Pour refuser un appel individuel configuré comme FOACSU, effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option Rejeter et appuyez sur  pour refuser un appel individuel.
- Appuyez sur  pour refuser un appel individuel.

## Appels généraux

Un appel général est un appel passé par une radio individuelle à toutes les radios du site ou toutes les radios d'un groupe de sites, selon la configuration du système.

Un appel général permet de diffuser des annonces importantes dont les utilisateurs doivent tenir compte. Les utilisateurs du système ne peuvent pas répondre à un appel général.

Capacity Max prend en charge l'appel général de site et l'appel général multisite. L'administrateur système peut configurer un ou les deux types d'appels sur votre radio.

### REMARQUE:

Les terminaux radio peuvent prendre en charge les appels généraux système, mais l'infrastructure Motorola Solutions ne prend pas en charge les appels généraux système.

## Émission d'appels généraux

Votre radio doit être programmée pour que vous puissiez lancer un appel général. Suivez la procédure ci-après pour passer des appels généraux sur votre radio.

- 1 Sélectionnez un canal avec l'alias ou l'ID du groupe Appel général actif. Voir [Sélection d'un type d'appel à la page 68](#).
- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'écran affiche l'icône **Appel de groupe** et la mention Appel général, Appel général de site ou Appel multi-site en fonction du type de configuration.
- 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

Les utilisateurs du canal ne peuvent pas répondre à un appel général.

L'appelant peut appuyer sur  pour mettre fin à l'appel général.

## Émission d'appels généraux à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels généraux sur votre radio à l'aide de la touche numérique programmable.

- 1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est

pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'écran affiche l'icône **Appel de groupe** et la mention Appel général, Appel général de site ou Appel multi-site en fonction du type de configuration.

- 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

L'appelant peut appuyer sur  pour mettre fin à l'appel général.

Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

## Émission d'appels généraux à l'aide de la recherche d'alias

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.  
L'écran affiche les entrées par ordre alphabétique.

---

- 3 Appuyez sur  ou  pour accéder à l'alias ou à l'ID du terminal souhaité. La première ligne de l'écran affiche Numéro de téléphone :. La deuxième ligne de l'écran affiche un curseur clignotant. Utilisez le pavé numérique pour saisir un numéro de téléphone.

---

- 4 Appuyez sur  pour valider la sélection. Si l'entrée sélectionnée est vide, un indicateur sonore négatif est émis et l'écran affiche le message No. Tél. invalide.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Appeler tél. Appuyez sur  pour valider la sélection. Si le code d'accès n'a pas été préconfiguré dans la liste des Contacts, la première ligne de l'écran indique Code d'accès:. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez le code d'accès, puis appuyez sur le bouton  pour continuer. En cas de réussite, la tonalité DTMF est émise. Vous entendez la tonalité de numérotation de l'utilisateur du téléphone. La première ligne de l'écran affiche l'alias ou l'ID de terminal ainsi que l'icône RSSI. La deuxième ligne de l'écran affiche Appel tél. ainsi que l'icône Appel téléphonique. En cas d'échec, une tonalité est émise et l'écran affiche Appel tél. échoué. Votre radio revient à l'écran de saisie du code d'accès. Si le code d'accès a été préconfiguré

dans le répertoire, la radio revient à l'écran affiché avant de lancer l'appel.

- 
- 6 Appuyez sur le bouton **PTT** pour parler et relâchez-le pour écouter. l'icône RSSI disparaît pendant la transmission.
- 
- 7 Pour entrer des chiffres supplémentaires, si nécessaire au cours de l'appel, effectuez l'une des opérations suivantes :
- Appuyez sur n'importe quelle touche du clavier pour commencer la saisie de chiffres supplémentaires. La première ligne de l'écran affiche *Chiffres supplémentaires :*. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez les chiffres supplémentaires, puis appuyez sur le bouton  pour continuer. La tonalité DTMF est émise et la radio revient à l'écran précédent.
  - Appuyez sur le bouton **Accès par numérotation rapide**. la tonalité DTMF est émise. Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.
- 

- 8 Appuyez sur  pour mettre fin à l'appel. Si le code de libération n'a pas été préconfiguré dans le répertoire, la première ligne de l'écran indique *Code de libération:*. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez le code de libération, puis appuyez sur  pour continuer. La radio revient à l'écran précédent. La tonalité DTMF est émise et l'écran affiche *Fin Appel tél.*. En cas de réussite, une tonalité est émise et l'écran affiche *Appel tél. terminé*. Votre radio revient à l'écran *Appel téléphonique*. En cas d'échec, la radio revient à l'écran *Appel téléphonique*. Si vous appuyez sur le bouton **PTT** lorsque l'écran *Contacts téléphonique* est affiché, une tonalité est émise et l'écran affiche *OK pour appeler*. lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche *Appel terminé*. Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

#### REMARQUE:

L'appelant peut appuyer sur  pour mettre fin à l'appel général.

## Réception d'appels généraux

Lorsque vous recevez un appel général, les événements suivants se produisent :

- Une tonalité est émise.
- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'ID de l'alias de l'appelant.
- La deuxième ligne affiche la mention Appel général, Appel général de site ou Appel multi-site en fonction du type de configuration.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

Une fois l'appel général terminé, la radio revient au menu affiché avant sa réception.

Si la fonction d'indication de canal libre est activée, vous entendrez une brève tonalité d'alerte au moment où le bouton **PTT** de la radio en émission sera relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Vous ne pouvez pas répondre à un appel général.

### REMARQUE:

Si vous changez de canal pendant la réception d'un appel général, il sera interrompu. Vous ne pouvez pas naviguer dans les menus, ni apporter de modification, avant la fin d'un appel général.

## Appels téléphoniques

Un appel téléphonique est un appel émis depuis une radio individuelle vers un téléphone.

Dans Capacity Max, votre radio est capable de recevoir des appels et des réponses, même si la fonction Appel téléphonique est désactivée.

La fonction Appel téléphonique peut être activée en attribuant et en configurant des numéros de téléphone sur le système. Consultez votre administrateur système pour déterminer comment la radio a été programmée.

## Émission d'appels téléphoniques

Suivez la procédure ci-après pour passer des appels téléphoniques sur votre radio.

- 1 Appuyez sur le bouton programmé **Accès par numérotation rapide** pour accéder à l'alias ou l'ID prédéfini.

Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.

Si le code d'accès n'a pas été préconfiguré dans le répertoire, l'écran affiche Code d'accès :.

- 2 Saisissez le code d'accès, puis appuyez sur  pour continuer.

Le code d'accès ou de libération ne peut pas contenir plus de 10 caractères.

- 3 Appuyez sur le bouton **PTT** pour répondre à l'appel.

- 4 Relâchez le bouton **PTT** pour écouter.

- 5 Saisissez des chiffres supplémentaires à l'aide du clavier si cela s'avère nécessaire au cours de l'appel, puis appuyez sur  pour continuer.

Si l'appel se termine tandis que vous entrez les chiffres supplémentaires requis pour l'appel, vous revenez à l'écran affiché avant l'émission de l'appel.

La tonalité DTMF est émise. Votre radio revient à l'écran précédent.

- 6 Appuyez sur  pour mettre fin à l'appel.

- 7 Effectuez l'une des opérations suivantes :

- Si le code de libération n'a pas été préconfiguré, saisissez-le lorsque l'écran affiche Code de libération:, puis appuyez sur  pour continuer. La radio revient à l'écran précédent.
- Appuyez sur le bouton **Accès direct** préprogrammé. Si le champ du bouton **Accès direct** est vide, une tonalité d'indication négative est émise.

La tonalité DTMF est émise et l'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les deux dernières étapes ou attendez que l'utilisateur du téléphone mette fin à l'appel.

## Émission d'appels téléphoniques à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels téléphoniques sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.  
L'écran affiche les entrées par ordre alphabétique.

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.  
Si vous appuyez sur le bouton **PTT** lorsque l'écran Répertoire tél. est affiché :
  - La première ligne de l'écran affiche No. téléphone :.
  - La deuxième ligne de l'écran affiche un curseur clignotant.
 Si l'entrée sélectionnée est vide°:
  - Une tonalité d'indication négative est émise.
  - L'écran affiche No. Tél. invalide.

- 4 Appuyez sur  ou  pour accéder à l'option Appeler tél. Appuyez sur  pour valider la sélection.  
L'écran affiche Code d'accès: si le code d'accès n'a pas été préconfiguré.

- 5 Saisissez le code d'accès, puis appuyez sur  pour continuer.

Le code d'accès ou de libération ne peut pas contenir plus de 10 caractères.

La première ligne affiche `Appels`. La deuxième ligne affiche l'icône **Appel téléphonique**, ainsi que l'alias ou l'ID du terminal radio.

Si l'appel est émis avec succès :

- La tonalité DTMF est émise.
- Vous entendez la tonalité de numérotation de l'utilisateur du téléphone.
- La première ligne affiche l'icône **RSSI**, ainsi que l'alias ou l'ID du terminal radio.
- La deuxième ligne affiche `Appel tél`, ainsi que l'icône **Appel téléphonique**.

Si l'appel n'aboutit pas :

- Une tonalité est émise.
- L'écran affiche `Appel tél. échoué`, puis `Code d'accès`.

- Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant l'émission de l'appel.

- 
- 6 Appuyez sur le bouton **PTT** pour répondre à l'appel. L'icône **RSSI** disparaît.

- 
- 7 Relâchez le bouton **PTT** pour écouter.

- 
- 8 Saisissez des chiffres supplémentaires à l'aide du clavier si cela s'avère nécessaire au cours de l'appel, puis appuyez sur  pour continuer. Si l'appel se termine tandis que vous entrez les chiffres supplémentaires requis pour l'appel, vous revenez à l'écran affiché avant l'émission de l'appel. La tonalité DTMF est émise. Votre radio revient à l'écran précédent.

- 
- 9 Appuyez sur  pour mettre fin à l'appel.

- 
- 10 Si le code de libération n'a pas été préconfiguré, saisissez-le lorsque l'écran affiche `Code de`

libération:, puis appuyez sur  pour continuer.

La radio revient à l'écran précédent. La tonalité DTMF est émise et l'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez l'[étape 9](#) et l'[étape 10](#) ou attendez que l'utilisateur du téléphone mette fin à l'appel. Si vous appuyez sur le bouton PTT lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche OK pour appeler.

lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche Appel terminé.

Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

#### REMARQUE:

Pendant l'accès au canal, appuyez sur le bouton

pour rejeter la tentative d'appel. Une tonalité est émise.

pendant l'appel, si vous appuyez sur la touche **Accès direct** à laquelle est attribué le code de libération ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel.

Pendant l'accès au canal et la transmission du code d'accès/de libération ou des chiffres supplémentaires, votre radio répond uniquement au bouton de commande **Marche/Arrêt**, au **bouton de volume** et au **sélecteur de canal**. Une tonalité est émise pour chaque entrée non valide.

## Émission d'appels téléphoniques à l'aide de la recherche d'alias

Vous pouvez aussi utiliser la recherche d'alias ou alphanumérique pour rechercher un alias de terminal. Cette fonction n'est disponible que dans les contacts. Suivez la procédure ci-après pour passer des appels

téléphoniques sur votre radio à l'aide de la recherche d'alias.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

Si l'appel n'aboutit pas :

- Une tonalité est émise.
- L'écran affiche Appel tél. échoué, puis Code d'accès:.

- Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant l'émission de l'appel.

- 
- 7 Appuyez sur  pour mettre fin à l'appel.
- 

- 8 Effectuez l'une des opérations suivantes :

- Si le code de libération n'a pas été préconfiguré, saisissez-le lorsque l'écran affiche Code de libération:, puis appuyez sur  pour continuer. La radio revient à l'écran précédent.
- Appuyez sur le bouton **Accès direct** préprogrammé. Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.

La tonalité DTMF est émise et l'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les [étape 7](#) ou attendez que l'utilisateur du téléphone mette fin à l'appel.

### REMARQUE:

Si vous appuyez sur le bouton **PTT** lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche Appuyer sur OK pour appeler.

Lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche Appel terminé.

Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

Pendant l'accès au canal, appuyez sur  pour rejeter la tentative d'appel. Une tonalité est émise.

pendant l'appel, si vous appuyez sur la touche **Accès direct** à laquelle est attribué le code de libération ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel.

Pendant l'accès au canal et la transmission du code d'accès/de libération ou des chiffres supplémentaires, votre radio répond

uniquement au bouton de commande **Marche/Arrêt**, au **bouton de volume** et au **sélecteur de canal**. Une tonalité est émise pour chaque entrée non valide.

- Entrez le numéro souhaité pour lancer un appel DTMF.
- Appuyez sur  pour lancer un appel DTMF.
- Appuyez sur  pour lancer un appel DTMF.

## Multifréquence à deux tonalités

La fonction de multifréquence à deux tonalités (DTMF) permet à la radio de fonctionner dans un système radio, tout en offrant une interface vers les systèmes téléphoniques.

Il est possible de couper la tonalité DTMF en désactivant l'ensemble des tonalités et alertes radio. Reportez-vous à la section [Activation/désactivation des tonalités/avertissements à la page 219](#) pour plus d'informations.

## Lancement d'appels DTMF

Suivez la procédure ci-après pour passer des appels DTMF sur votre radio.

- 1 Maintenez le bouton **PTT** enfoncé.
- 2 Effectuez l'une des opérations suivantes :

## Réponse aux appels téléphoniques en appels de groupe

Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels de groupe sur votre radio.

Lorsque vous recevez un appel téléphonique en appel de groupe :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche Appel.
- La LED clignote en vert.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

- 1 Appuyez sur le bouton **PTT** pour répondre à l'appel.

2 Relâchez le bouton **PTT** pour écouter.

---

3 Appuyez sur  pour mettre fin à l'appel.

L'écran affiche `Fin Appel tél.`

**REMARQUE:**

Si la fonction Appel téléphonique n'est pas activée sur votre radio, la radio ne parvient pas à terminer un appel téléphonique en appel de groupe. L'utilisateur du téléphone doit mettre fin à l'appel. L'utilisateur destinataire est uniquement autorisé à répondre pendant l'appel.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche `Appel terminé.`

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les [étape 3](#) ou attendez que l'utilisateur du téléphone mette fin à l'appel.

---

## Réponse aux appels téléphoniques en appels généraux

Lorsque vous recevez un appel téléphonique en appel général, la radio réceptrice ne parvient pas à émettre ni à répondre. L'utilisateur destinataire n'est également pas autorisé à mettre fin à l'appel général.

Lorsque vous recevez un appel téléphonique en appel général :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche la mention `Appel général`, `Appel général de site` ou `Appel multi-site` en fonction du type de configuration, ainsi que `Appel tél.`
- La LED clignote en vert.

- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

## Réponse aux appels téléphoniques en appels individuels

Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels individuels sur votre radio.

Lorsque vous recevez un appel téléphonique en appel individuel :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche Appel.
- La LED clignote en vert.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

**1** Appuyez sur le bouton **PTT** pour répondre à l'appel.

---

**2** Relâchez le bouton **PTT** pour écouter.

---

**3** Appuyez sur  pour mettre fin à l'appel.

L'écran affiche Fin Appel tél.

### REMARQUE:

Si la fonction Appel téléphonique n'est pas activée sur votre radio, la radio ne parvient pas à terminer un appel téléphonique en appel individuel. L'utilisateur du téléphone doit mettre fin à l'appel. L'utilisateur destinataire est uniquement autorisé à répondre pendant l'appel.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les [étape 3](#) ou attendez que l'utilisateur du téléphone mette fin à l'appel.

---

## Préemption des appels

La préemption des appels permet à une radio de cesser toute transmission vocale en cours et de lancer une transmission prioritaire.

Avec la fonctionnalité Préemption des appels, le système interrompt et préempte les appels en cours dans les cas où les canaux à ressources partagées sont indisponibles.

Les appels de priorité supérieure comme les appels d'urgence ou les appels généraux préemptent la radio en émission afin de répondre à l'appel de priorité supérieure. Si aucun autre canal de radiofréquence (RF) n'est disponible, un appel d'urgence préempte un appel général également.

## Interruption vocale

L'interruption vocale permet à l'utilisateur d'arrêter une transmission vocale en cours.

Cette fonctionnalité utilise la signalisation de canal de retour pour arrêter la transmission vocale en cours d'une radio, si la radio à l'origine de l'interruption est configurée pour l'interruption vocale et si la radio en émission est configurée pour être interrompue en appel vocal. La radio à l'origine de l'interruption est ensuite autorisée à émettre

une transmission vocale vers le participant dont l'appel a été arrêté.

La fonctionnalité d'interruption vocale améliore de façon significative la probabilité de réussite d'une nouvelle transmission aux parties concernées lorsqu'un appel est en cours.

L'interruption vocale est accessible à l'utilisateur uniquement si cette fonctionnalité a été configurée sur la radio. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation de l'interruption vocale

Suivez la procédure ci-après pour lancer l'interruption vocale sur votre radio.

Vous devez programmer votre radio pour pouvoir utiliser cette fonction. Consultez votre fournisseur ou administrateur système pour en savoir plus.

- 1 Pour interrompre la transmission lors d'un appel en cours, appuyez sur le bouton **PTT**.

L'écran de la radio interrompue affiche le texte Appel interrompu. La radio émet une tonalité

d'indication négative jusqu'à ce que le bouton **PTT** soit relâché.

---

## 2 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- 

## 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  - Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.
- 

# Fonctions avancées

Ce chapitre indique comment utiliser les fonctions disponibles sur votre radio.

Votre revendeur ou administrateur système peut avoir adapté votre radio à vos besoins spécifiques. Consultez

[Envoyer un commentaire](#)

votre fournisseur ou administrateur système pour en savoir plus.

## File d'attente des appels

Lorsqu'aucune ressource n'est disponible pour traiter un appel, la file d'attente des appels permet de placer la demande d'appel dans la file d'attente du système, pour les prochaines ressources disponibles.

Si vous appuyez sur le bouton **PTT**, vous entendez une tonalité de file d'attente des appels indiquant que la radio est passé à l'état File d'attente des appels. Vous pouvez relâcher le bouton **PTT** lorsque vous entendez la tonalité de file d'attente des appels.

Si la configuration s'est effectuée correctement, la situation suivante se produit :

- La LED clignote en vert.
- Si cette option est activée, la tonalité Parler autorisé retentit.
- L'écran affiche l'icône, l'ID ou l'alias du type d'appel.
- L'utilisateur radio dispose de 4 secondes pour appuyer sur le bouton **PTT** et lancer la transmission vocale.

Si la configuration échoue, la situation suivante se produit :

- Si cette option est activée, la tonalité de rejet retentit.
- L'écran affiche momentanément une notification d'échec.
- L'appel est interrompu et la radio quitte la configuration d'appel.

## Balayage de groupe de parole

Cette fonctionnalité permet à votre radio de surveiller et de rejoindre les appels des groupes définis dans une liste de groupes de réception.

Lorsque le balayage est activé, l'icône de balayage apparaît dans la barre d'état et la LED clignote en jaune. Votre radio active le son pour les membres figurant dans sa liste de groupes de réception.

Lorsque le balayage est désactivé, votre radio ne reçoit aucune transmission des membres de la liste de groupes de réception, à l'exception des appels généraux et du groupe de parole sélectionné.

### REMARQUE:

Il est possible de configurer le balayage de groupe de parole à l'aide de CPS. Consultez votre administrateur système pour déterminer comment la radio a été programmée.

## Activation ou désactivation du balayage de groupe de parole

Pour activer ou désactiver le balayage de groupe de parole sur votre radio, procédez comme suit.

- 1 Appuyez sur  OK pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  OK pour valider la sélection.

---

- 3 Effectuez l'une des opérations suivantes :
  - Appuyez sur  ou sur  pour accéder à l'option Activer. Appuyez sur  OK pour valider la sélection.
  - Appuyez sur  ou sur  pour accéder à l'option Désactiver. Appuyez sur  OK pour valider la sélection.

Si le balayage est activé :

- L'écran affiche `Scan Activé` ainsi que l'icône **Balayage**.
- La LED clignote en jaune.
- Une tonalité d'indication positive est émise.

Si le balayage est désactivé :

- L'écran affiche `Scan Désactivé`.
- L'icône **Balayage** disparaît.
- La LED s'éteint.
- Une tonalité d'indication négative est émise.

## Liste de groupes de réception

La fonctionnalité Liste de groupes de réception vous permet de créer et d'attribuer des membres dans la liste de balayage de groupe de parole.

Cette liste est créée lorsque vous radio est programmée. Elle détermine les groupes pouvant faire l'objet d'un balayage. Votre radio peut prendre en charge un maximum de 16 membres dans cette liste.

Si votre radio a été programmée pour modifier la liste de balayage, vous pouvez :

- Ajouter/supprimer des groupes de parole.

- Ajouter, supprimer et/ou modifier la priorité des groupes de parole. Reportez-vous au [Modification de la priorité pour un groupe de discussion à la page 110](#).
- Ajouter, supprimer et/ou modifier les groupes de parole d'affiliation. Reportez-vous à la [Ajout d'une affiliation à un groupe de parole à la page 112](#) et à la [Suppression de l'affiliation d'un groupe de parole à la page 113](#).
- Remplacer la liste de balayage existante par une autre.

### IMPORTANT:

Pour que vous puissiez ajouter un membre à la liste, le groupe de parole doit avoir été configuré dans la radio.

### REMARQUE:

La liste de groupes de réception est programmée par l'administrateur système. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Écoute prioritaire

La fonctionnalité Écoute prioritaire permet à la radio de recevoir automatiquement les transmissions des groupes

de parole de priorité supérieure, même lorsqu'elle participe à un appel de groupe de parole.

La radio quitte un appel de groupe de parole de priorité inférieure pour un appel de groupe de parole de priorité supérieure.

### REMARQUE:

Il est possible d'accéder à cette fonctionnalité uniquement lorsque la fonction Balayage de groupe de parole est activée.

La fonctionnalité Écoute prioritaire s'applique uniquement aux membres de la liste de groupes de réception. Il existe deux groupes de parole prioritaires : Priorité 1 (P1) et Priorité 2 (P2). P1 est prioritaire sur P2. Dans un système Capacity Max, la radio reçoit les transmissions en fonction de l'ordre de priorité ci-dessous :

- 1 Appel d'urgence pour le groupe de parole P1
- 2 Appel d'urgence pour le groupe de parole P2
- 3 Appel d'urgence pour les groupes de parole non prioritaires de la liste de groupes de réception
- 4 Appel général
- 5 Appel du groupe de parole P1
- 6 Appel du groupe de parole P2

7 Groupes de parole non prioritaires de la liste de groupes de réception

Pour plus d'informations sur la procédure à suivre pour ajouter, supprimer et/ou modifier la priorité des groupes de parole de la liste de balayage, reportez-vous à la section [Modification de la priorité pour un groupe de discussion à la page 110](#).

### REMARQUE:

Cette fonctionnalité est programmée par l'administrateur système. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Modification de la priorité pour un groupe de discussion

Dans le menu Balayage de groupe de parole, vous pouvez afficher ou modifier la priorité d'un groupe de parole.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Voir/Modif liste. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au groupe de parole souhaité. Appuyez sur  pour valider la sélection.

La priorité actuelle est indiquée par une icône **Priorité 1** ou **Priorité 2** en regard du groupe de parole.

---

5 Appuyez sur  ou sur  pour accéder à l'option Modif. priorité. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder au niveau de priorité souhaité. Appuyez sur  pour valider la sélection.

Si l'icône Priorité 1 ou Priorité 2 a été attribuée à un autre groupe de parole, vous pouvez choisir de remplacer la priorité actuelle. Lorsque l'écran affiche

Remplacer existant ?, appuyez sur  ou sur

 pour accéder aux options suivantes :

- Non pour revenir à l'étape précédente.
- Oui pour confirmer le remplacement.

L'écran affiche un mini-avis positif, puis revient à l'écran précédent. L'icône de priorité apparaît en regard du groupe de parole.

---

## Affiliation à plusieurs groupes de parole

Dans un système Capacity Max, votre radio peut être configurée pour prendre en charge jusqu'à sept groupes de parole sur un site.

Parmi les 16 groupes de parole figurant dans la liste de groupes de réception, il est possible d'attribuer jusqu'à sept groupes de parole comme groupes de parole d'affiliation. Le groupe de parole sélectionné et les groupes de parole prioritaires sont automatiquement affiliés.

### REMARQUE:

Cette fonctionnalité est programmée par l'administrateur système. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Ajout d'une affiliation à un groupe de parole

Pour ajouter une affiliation à un groupe de parole, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Voir/Modif liste. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID de groupe de parole souhaité. Appuyez sur  pour valider la sélection. L'état d'affiliation s'affiche lorsque vous sélectionnez Voir/Modif liste. ■ apparaît en regard de l'alias ou de l'ID de groupe de parole sélectionné.

- 5 Appuyez sur  ou sur  pour accéder à l'option Modifier l'affiliation. Appuyez sur  pour valider la sélection.

- 6 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option **Activé**. Appuyez sur  pour valider la sélection.
- Appuyez sur  ou sur  pour accéder à l'option **Désactivé**. Appuyez sur  pour valider la sélection.

Lorsque l'option **Activé** est sélectionnée,  apparaît en regard de l'alias ou de l'ID de groupe de parole.

---

En cas de réussite de l'affiliation,  apparaît en regard de l'alias ou de l'ID de groupe de parole sélectionné.

En cas d'échec de l'affiliation,  reste affiché en regard de l'alias ou de l'ID de groupe de parole.

#### REMARQUE:

La radio affiche **Liste pleine** lorsque sept groupes de parole au maximum sont sélectionnés pour l'affiliation dans la liste de balayage. Pour sélectionner un nouveau groupe de parole pour l'affiliation, supprimez un groupe de parole affilié existant afin de libérer de la place pour le nouveau groupe. Reportez-vous à la section [Suppression de l'affiliation d'un groupe de parole à la page 113](#) pour plus d'informations.

## Suppression de l'affiliation d'un groupe de parole

Lorsque la liste d'affiliation est pleine et que vous souhaitez sélectionner un nouveau groupe de parole à affilier, supprimez un groupe de parole affilié existant pour libérer de la place pour le nouveau groupe. Pour supprimer l'affiliation d'un groupe de parole, procédez comme suit.

1

Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Voir/Modif liste. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID de groupe de parole souhaité. Appuyez sur  pour valider la sélection. L'état d'affiliation s'affiche lorsque vous sélectionnez Voir/Modif liste.  apparaît en regard de l'alias ou de l'ID de groupe de parole sélectionné.

---

5 Appuyez sur  ou sur  pour accéder à l'option Modifier l'affiliation. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour valider la sélection.

Lorsque l'option Désactivé est sélectionnée,  n'apparaît plus en regard de l'alias ou de l'ID de groupe de parole.

---

## Réponse

La fonctionnalité Réponse vous permet de répondre à une émission pendant un balayage.

Si votre radio balaie un appel à partir de la liste de balayage de groupe sélectionnable et si vous appuyez sur le bouton **PTT** pendant le balayage de l'appel, le fonctionnement de la radio varie selon si la fonctionnalité Réponse a été activée ou désactivée pendant la programmation de la radio. Consultez votre fournisseur ou administrateur système pour en savoir plus.

### Réponse désactivée

La radio quitte l'appel balayé et tente d'émettre au contact pour la position de canal actuellement sélectionnée. Une fois que le temps de maintien sur le contact actuellement sélectionné expire, la radio revient

au canal d'accueil et démarre le compteur de temps de maintien du balayage. La radio reprend le balayage de groupe après l'expiration du compteur de temps de maintien du balayage.

### Réponse activée

Si vous appuyez sur le bouton **PTT** pendant le temps de maintien de groupe de l'appel balayé, la radio tente d'émettre au groupe balayé.

#### REMARQUE:

Si vous balayez un appel pour un groupe qui n'est pas attribué à une position de canal dans la zone actuellement sélectionnée, et si l'appel se termine, basculez vers la zone appropriée, puis sélectionnez la position de canal du groupe pour répondre à ce groupe.

## Bluetooth

Cette fonction vous permet d'utiliser votre radio avec un appareil (accessoire) Bluetooth par le biais d'une connexion Bluetooth. Votre radio prend en charge les dispositifs Bluetooth de marque Motorola Solutions et d'autres marques disponibles sur le marché.

Le Bluetooth offre une portée de 10 m avec une visibilité directe. Pour bénéficier de cette portée, aucun obstacle ne

doit gêner la communication entre votre radio et votre appareil Bluetooth. Pour assurer une fiabilité optimale, Motorola Solutions recommande de ne pas séparer la radio et l'accessoire.

Lorsque la limite de réception approche, la voix et la qualité sonore se détériorent et les hachures sont de plus en plus fréquentes. Pour corriger ce problème, rapprochez votre radio et votre appareil Bluetooth (à moins de 10 m) afin de retrouver une bonne réception. La fonction Bluetooth de votre radio présente une puissance maximale de 2,5 mW (4 dBm) sur 10 m.

Votre radio peut prendre en charge jusqu'à trois connexions Bluetooth simultanées avec différents types d'appareils Bluetooth. Par exemple, une oreillette, un scanner et un dispositif PTT. Des connexions avec plusieurs appareils Bluetooth d'un même type ne sont pas possibles.

Reportez-vous au manuel d'utilisation de votre appareil Bluetooth pour obtenir plus de détails sur toutes ses fonctionnalités.

#### REMARQUE:

Si cette option est désactivée via CPS, toutes les fonctionnalités associées au Bluetooth sont désactivées et la base de données de l'appareil Bluetooth est effacée.

## Activation et désactivation de la radio Bluetooth

Pour activer et désactiver le Bluetooth, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Mon état. Appuyez sur  pour valider la sélection.  
L'écran affiche Activé et Désactivé. L'état actuel est indiqué par un symbole .

---

- 4 Sélectionnez l'une des options suivantes :
  - Appuyez sur  ou sur  pour accéder à l'option Activé. Appuyez sur  pour valider la

sélection. L'écran affiche  en regard de l'option Activé.

- Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de l'option Désactivé.

## Connexion à des appareils Bluetooth

Pour vous connecter à des appareils Bluetooth, procédez comme suit.

Allumez votre appareil Bluetooth et mettez-le en mode Appariement.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

4 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.
- Appuyez sur  ou  pour accéder à l'option Trouver des appareils et localiser les appareils disponibles. Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou  pour accéder à l'option Connecter. Appuyez sur  pour valider la sélection.

D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour terminer l'appariement avec

votre radio. Reportez-vous au manuel d'utilisation de votre appareil Bluetooth.

L'écran affiche Connexion à <appareil>.

Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche <Appareil> connecté ainsi que l'icône **Connexion Bluetooth**.
- L'écran affiche  en regard de l'appareil connecté.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche Connexion échouée.

**REMARQUE:**

Si un code PIN est requis, voir [Accès par mot de passe aux radios à la page 205](#).

## Connexion à des appareils Bluetooth en mode Détectable

Pour vous connecter à des appareils Bluetooth en mode Détectable, procédez comme suit.

Allumez votre appareil Bluetooth et mettez-le en mode Appariement.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Trouvez-moi. Appuyez sur  pour valider la sélection. Votre radio est détectable par d'autres appareils Bluetooth compatibles pour une durée programmée. Il s'agit du mode Détectable.

Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche <Appareil> connecté et l'icône **Bluetooth connecté**.
- L'écran affiche  en regard de l'appareil connecté.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche Connexion échouée.

## Déconnexion d'appareils Bluetooth

Pour vous déconnecter d'appareils Bluetooth, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou  pour accéder à l'option Déconnecter. Appuyez sur  pour valider la sélection.

L'écran affiche Déconnexion... <Appareil>.

#### REMARQUE:

D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour le déconnecter. Reportez-vous aux manuels d'utilisation respectifs des appareils compatibles Bluetooth.

Attendez l'accusé de réception.

- Une tonalité est émise.

[Envoyer un commentaire](#)

- L'écran affiche <Appareil> déconnecté et l'icône **Bluetooth connecté** disparaît.
- Le symbole ✓ disparaît en regard de l'appareil connecté.

## Basculement du routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth

Suivez la procédure ci-après pour basculer le routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth externe.

Appuyez sur le bouton programmé **Commutateur audio Bluetooth**.

L'écran affiche l'un des résultats suivants :

- Une tonalité est émise. L'écran affiche Acheminer l'audio vers la radio.
- Une tonalité est émise. L'écran affiche Acheminer l'audio vers le Bluetooth.

## Affichage des détails de l'appareil

Pour afficher les détails de l'appareil sur votre radio, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'option Voir détails. Appuyez sur  pour valider la sélection.
- 

## Suppression du nom de l'appareil

Vous pouvez supprimer un appareil déconnecté de la liste des appareils Bluetooth.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection. L'écran affiche Appareil supprimé.

---

## Gain micro Bluetooth

Cette fonction permet à l'utilisateur de contrôler la valeur de gain du microphone de l'appareil Bluetooth connecté.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou  pour accéder à l'option Gain micro BT. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder au type de gain micro BT et aux valeurs actuelles. Appuyez sur  pour valider la sélection. Vous pouvez modifier les valeurs ici.

---

5 Appuyez sur  ou  pour augmenter ou réduire des valeurs. Appuyez sur  pour valider la sélection.

---

## Localisation en intérieur

### REMARQUE:

La fonctionnalité Localisation en intérieur s'applique pour les modèles dotés de la dernière version du logiciel et du matériel. Consultez votre fournisseur ou administrateur système pour en savoir plus.

La localisation en intérieur permet d'effectuer un suivi de la localisation des utilisateurs radio. Lorsque la localisation en

intérieur est activée, la radio est en mode détectable limité. Des balises dédiées sont utilisées pour localiser la radio et déterminer sa position.

### Activation ou désactivation de la localisation en intérieur

Vous pouvez activer ou désactiver la localisation en intérieur en procédant de l'une des manières suivantes.

- Accédez à cette fonction via le menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.
  - c. Appuyez sur  ou  pour accéder à l'option Localisation en intérieur et appuyez sur  pour sélectionner.

- d. Appuyez sur  pour activer la localisation en intérieur.

L'écran affiche Localis. intér. activée. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
- En cas d'échec, l'écran affiche Échec activation. Une tonalité d'indication positive retentit.

- e. Appuyez sur  pour désactiver la localisation en intérieur.

L'écran affiche Localis. intér. désactivée. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.

- En cas d'échec, l'écran affiche **Échec désactivation**. Une tonalité d'indication positive retentit.
- Accédez à cette fonctionnalité à l'aide du bouton programmable.
  - a. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour activer la localisation en intérieur.

L'écran affiche **Localis. intér. activée**. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
- En cas d'échec, l'écran affiche **Échec activation**. En cas d'échec, une tonalité d'indication négative retentit.
- b. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour désactiver la localisation en intérieur.

L'écran affiche **Localis. intér. désactivée**. Vous entendez une tonalité d'indication positive.

L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.
- En cas d'échec, l'écran affiche **Échec désactivation**. En cas d'échec, une tonalité d'indication négative retentit.

## Accès aux informations sur les balises de localisation en intérieur

Suivez la procédure ci-après pour accéder aux informations sur les balises de localisation en intérieur.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Localisation en intérieur et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Balises et appuyez sur  pour sélectionner.

---

L'écran affiche les informations relatives aux balises.

## Commandes multisites

Ces fonctionnalités s'appliquent lorsque votre canal radio actuel est configuré sur un système Capacity Max.

### Lancement d'une recherche de site manuelle

Suivez la procédure ci-après pour lancer une recherche manuelle de site lorsque la puissance du signal reçu est faible, afin d'essayer de trouver un site avec un meilleur signal.

Si la radio détecte un nouveau site :

- Une tonalité d'indication positive est émise.  
Si la radio ne parvient pas à trouver un nouveau site :
- Une tonalité d'indication négative est émise.

### Site Lock On/Off

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

Appuyez sur le bouton programmé **Verrouillage site**.

Si la fonction **Verrou. site** est activée :

- Un signal sonore positif indique que la radio est verrouillée sur le site en cours.
- L'écran indique que le site est verrouillé.

Si la fonction **Verrou. site** est désactivée :

- Un signal sonore négatif indique que la radio n'est pas verrouillée.
- L'écran indique que le site est déverrouillé.

## Accès à la liste des sites voisins

Cette fonctionnalité permet à l'utilisateur de vérifier la liste des sites adjacents du site d'accueil actuel. Suivez la procédure ci-après pour accéder à la liste des sites voisins :

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Sites voisins. Appuyez sur  pour valider la sélection.

---

## Rappel de canal d'accueil

Cette fonctionnalité fournit un rappel lorsque la radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps.

Si cette fonctionnalité est activée, lorsque votre radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps, les événements suivants se produisent régulièrement :

- L'annonce et la tonalité de rappel de canal d'accueil sont émises.
- La première ligne de l'écran affiche Non.
- La deuxième ligne indique Canal d'accueil.

## Désactivation du rappel de canal d'accueil

Lorsque le rappel du canal d'accueil se déclenche, vous pouvez le désactiver temporairement.

Appuyez sur le bouton programmable **Couper le rappel du canal d'accueil**.

La première ligne de l'écran indique HCR et la seconde ligne affiche en sourdine.

## Définition de nouveaux canaux d'accueil

Lorsque le rappel de canal d'accueil se déclenche, vous pouvez définir un nouveau canal d'accueil.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmable **Réinitialiser le canal d'accueil** pour définir le canal actuel en tant que nouveau canal d'accueil. Ignorez les étapes suivantes.

La première ligne de l'écran indique l'alias du canal et la seconde ligne affiche Nouv. canal acc.

- Appuyez sur  pour accéder au menu.

- 
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 
- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 
- 4 Appuyez sur  ou  pour accéder à l'option Canal d'accueil. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'alias du nouveau canal d'accueil. Appuyez sur  pour valider la sélection.
- L'écran affiche  en regard de l'alias du canal d'accueil sélectionné.

## Remote Monitor

Cette fonctionnalité est utilisée pour mettre sous tension le microphone d'une radio cible avec un ID ou un alias de terminal. Vous pouvez utiliser cette fonction pour écouter à distance l'activité dans l'environnement de la radio cible.

La radio et la radio cible doivent être programmées pour pouvoir utiliser cette fonctionnalité.

Si elle est lancée, la LED verte clignote une fois sur la radio cible. L'écoute à distance s'arrête automatiquement après une durée préprogrammée ou lorsque la radio écoutée est utilisée.

## Déclenchement de l'Écoute ambiance

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio.

[Envoyer un commentaire](#)

- 1 Appuyez sur le bouton préprogrammé **Écoute ambiance**.

- 2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

- 3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche **Écoute amb.** Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.

- L'écran affiche un mini-avis négatif.

---

## Déclenchement de l'écoute d'ambiance à l'aide du répertoire

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.
- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option `Écoute amb.` Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

- 
- 5 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche `Écoute amb.` Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
-

## Déclenchement d'écoutes à distance à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio à l'aide de la numérotation manuelle.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.

---

- 5 Effectuez l'une des opérations suivantes :

- Saisissez l'alias ou l'ID du terminal radio, puis appuyez sur  pour continuer.
- Modifiez le dernier ID appelé, puis appuyez sur  pour continuer.

- 6 Appuyez sur  ou sur  pour accéder à l'option Écoute amb. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

- 7 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche Écoute amb. Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

---

## Paramètres des contacts

Le menu Contacts fournit une fonction d'annuaire sur votre radio. Chaque entrée correspond à un alias ou ID que vous pouvez utiliser pour lancer un appel. Les entrées sont classées par ordre alphabétique.

Chaque entrée, selon le contexte, est associée aux différents types d'appels suivants : appel de groupe, appel individuel, appel de diffusion, appel général de site, appel général multisite, appel PC ou appel console opérateur.

Les appels PC et dispatch sont des appels de données. Ils sont uniquement disponibles avec certaines applications. Veuillez consulter la documentation concernant les applications de données.

En outre, le menu Contacts vous permet d'associer chaque entrée à une ou plusieurs touches numériques programmables sur un microphone à clavier. Si une entrée est associée à une touche numérique, votre radio peut appliquer la numérotation rapide à cette entrée.

### REMARQUE:

Une coche est affichée devant chaque touche numérique attribuée à une entrée. Si la coche est placée devant une position `Wide`, cela signifie qu'aucune touche numérique n'a été attribuée à cette entrée.

Chaque entrée de chaque liste affiche les informations suivantes :

- Type d'appel
- Alias d'appel
- ID d'appel

### REMARQUE:

Si la fonctionnalité Secret est activée sur un canal, vous pouvez utiliser cette fonction pour réaliser un appel de groupe crypté, un appel individuel, un appel général ou un appel téléphonique sur ce canal. Seules les radios cibles disposant de la même clé de confidentialité ou des mêmes valeur et ID de clé que ceux de votre radio sont en mesure de déchiffrer la transmission.

## Attribution d'entrées aux touches numériques programmables

Suivez la procédure ci-après pour attribuer des entrées aux touches numériques programmables de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Touche progr. Appuyez sur  pour valider la sélection.

---

- 5 Effectuez l'une des opérations suivantes :

- Si la touche numérique souhaitée n'a encore été attribuée à aucune entrée, appuyez sur  ou sur  pour y accéder. Appuyez sur  pour valider la sélection.
- Si la touche numérique en question est actuellement attribuée à une entrée, le message La clé est déjà attribuée apparaît, tandis que la première ligne affiche la question Remplacer ?. Effectuez l'une des opérations suivantes :

Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection.

Une tonalité d'indication positive est émise et l'écran affiche Contact enregistré et un mini-avis positif.

Appuyez sur  ou  pour atteindre Non et revenir à l'étape précédente.

Chaque entrée peut être associée à une touche numérique différente. Un signe ✓ est affiché devant chaque touche numérique attribuée à une entrée. Si ✓ apparaît devant Vide, cette touche numérique n'est pas attribuée.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

L'écran revient automatiquement au menu précédent.

## Annulation de l'attribution d'entrées aux touches numériques programmables

Suivez la procédure ci-après pour annuler l'attribution d'entrées aux touches numériques programmables de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID souhaité. Passez à [étape 4](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Touche progr. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour atteindre Vide. Appuyez sur  pour valider la sélection. La première ligne affiche le message Effacer toutes clés.

- 6 Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection.

**REMARQUE:**

Lorsque vous supprimez une entrée, toute association de cette entrée avec une ou plusieurs touches numériques programmées est également supprimée.

Une tonalité d'indication positive est émise. L'écran indique `Contact enregistré`. L'écran revient automatiquement au menu précédent.

## Ajout de nouveaux contacts

Suivez la procédure ci-après pour ajouter de nouveaux contacts sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option `Niveau contact`. Appuyez sur  pour valider la sélection.

---

  - 4 Appuyez sur  ou sur  pour sélectionner le type de contact `Contacts radio` ou `Contacts téléphoniques`. Appuyez sur  pour valider la sélection.

---

  - 5 Entrez le numéro du contact à l'aide du pavé numérique, puis appuyez sur  pour continuer.

---

  - 6 Entrez le nom du contact à l'aide du clavier, puis appuyez sur  pour continuer.

---

  - 7 Appuyez sur  ou sur  pour accéder au type de sonnerie souhaité. Appuyez sur  pour valider la sélection.
- Une tonalité d'indication positive est émise. L'écran affiche un mini-avis positif.

## Paramètres des indicateurs d'appel

Cette fonction permet aux utilisateurs radio de configurer les sonneries des appels et ou des messages texte.

### Activation/désactivation des sonneries des appels individuels

Suivez la procédure ci-après pour activer ou désactiver les sonneries des appels individuels sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Trltés/Avert. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option Appel indiv. Appuyez sur  pour valider la sélection.

---

7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection.

Si cette option est activée, le symbole  apparaît en regard de la mention Activé. Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

---

## Activation/désactivation des sonneries des messages texte

Suivez la procédure ci-après pour activer ou désactiver les sonneries des messages texte sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option TnItés/Avert. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option Message texte. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole  ainsi que la tonalité actuelle.

---

7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de la tonalité sélectionnée.

---

## Activation/désactivation des sonneries d'avertissements d'appel

Suivez la procédure ci-après pour activer ou désactiver les sonneries d'avertissement d'appel sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Tonalités/Alertes. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  ou sur  pour accéder à l'option Avert. d'appel. Appuyez sur  pour valider la sélection.

- 7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de la tonalité sélectionnée.

## Activation/désactivation des sonneries des appels sélectifs

Suivez la procédure ci-après pour activer ou désactiver les sonneries des appels sélectifs sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Tntés/Avert. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option Appel sélectif. Appuyez sur  pour valider la sélection.

L'écran affiche le symbole  ainsi que la tonalité actuelle.

---

7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de la tonalité sélectionnée.

---

## Activation/Désactivation des sonneries des États de télémétrie avec texte

Suivez la procédure ci-après pour activer ou désactiver les sonneries d'appel de l'état de télémétrie avec texte sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Tonalités/Alertes. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou  pour accéder à l'option Télémessure. Appuyez sur  pour valider la sélection.

La tonalité actuelle est indiquée par le symbole .

---

## Attribution de types de sonnerie

La radio peut être programmée pour émettre l'une des dix sonneries disponibles lorsqu'elle reçoit un avertissement d'appel ou un message texte d'un utilisateur identifié. En faisant défiler la liste, vous entendez successivement chaque sonnerie. Suivez la procédure ci-après pour attribuer des styles de sonneries à votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

Les entrées sont classées par ordre alphabétique.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou  pour accéder à l'option Modifier. Appuyez sur  pour valider la sélection.
- 
- 5 Appuyez sur  ou  pour accéder à l'option Modifier la sonnerie. Appuyez sur  pour valider la sélection.
- 
- 6 Appuyez sur  ou  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection.
- ✓ apparaît en regard de la tonalité sélectionnée.
- 

## Volume croissant de la tonalité des alarmes

La radio peut être programmée pour vous avertir en permanence lorsqu'un appel radio reste sans réponse. Votre radio augmente automatiquement le volume de la tonalité pendant une période prédéterminée. Cette fonction est appelée Avert. croissant.

## Caractéristiques du journal des appels

Votre radio génère un journal de tous les appels individuels entrants et sortants, répondus ou en absence. Ce journal vous permet d'afficher et de gérer les appels récents.

Les avertissements d'appels manqués peuvent être inclus dans les journaux d'appels, selon la configuration du système de votre radio. Les listes d'appels vous permettent d'effectuer les tâches suivantes :

- Enregistrer les alias ou les ID dans le répertoire
- Supprimer l'appel
- Supprimer tous les appels
- Voir les détails

## Affichage des appels récents

Suivez la procédure ci-après pour afficher les appels récents sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Les options sont les suivantes : **Manqués**, **Répondus** et **Sortants**.  
  
Appuyez sur  pour valider la sélection.  
L'écran affiche l'entrée la plus récente.

---

- 4 Appuyez sur  ou sur  pour afficher la liste.  
Appuyez sur le bouton **PTT** pour lancer un appel individuel à partir de l'alias ou de l'ID actuellement affiché à l'écran.

## Enregistrement des alias/ID de la liste d'appels

Suivez la procédure ci-après pour enregistrer sur votre radio des alias ou des ID contenus dans la liste d'appels.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou sur  pour accéder à l'option **Stocker**. Appuyez sur  pour valider la sélection.  
L'écran affiche un curseur clignotant.

---

6 Saisissez le reste des caractères de l'alias souhaité.  
Appuyez sur  pour valider la sélection.  
Vous pouvez également enregistrer un ID sans alias.  
L'écran affiche un mini-avis positif.

---

## Suppression d'appels de la liste d'appels

Suivez la procédure ci-après pour supprimer les appels contenus dans la liste d'appels de votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.  
Si la liste est vide :

- Une tonalité est émise.
- L'écran affiche **Liste Vide**.

---

4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option **Supprimer l'entrée ?**. Appuyez sur  pour valider la sélection.

---

6 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour sélectionner Oui et supprimer l'entrée.  
L'écran affiche Entrée supprimée.
- Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour valider la sélection.  
La radio revient à l'écran précédent.

## Suppression de tous les appels de la liste d'appels

Suivez la procédure ci-après pour supprimer tous les appels contenus dans la liste d'appels de votre radio.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Appels. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

6 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour sélectionner Oui et supprimer toutes les entrées.  
L'écran affiche un mini-avis positif.
- Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour valider la sélection.  
La radio revient à l'écran précédent.

## Affichage des détails dans la liste d'appels

Suivez la procédure ci-après pour afficher des informations relatives à votre radio dans la liste d'appels.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option **Voir détails**. Appuyez sur  pour valider la sélection.  
L'écran affiche les détails correspondants.

## Fonctionnement de l'avertissement d'appel

La fonction d'avertissement d'appel vous permet de demander à un utilisateur de vous rappeler dès que cela lui sera possible.

Cette fonction est réservée aux alias ou ID de terminaux et est accessible par le menu via **Contacts**, par numérotation manuelle ou via un bouton programmé d'**accès par numérotation rapide**.

Dans Capacity Max, la fonctionnalité d'avertissement d'appel permet à un utilisateur radio ou une console opérateur d'envoyer une alerte à un autre utilisateur radio pour demander à celui-ci de rappeler l'appelant lorsqu'il est disponible. Aucune communication vocale n'est impliquée dans cette fonctionnalité.

L'avertissement d'appel peut être configuré par le revendeur ou l'administrateur système de deux manières :

- La radio est configurée pour permettre à l'utilisateur d'appuyer sur le bouton **PTT** pour répondre directement à l'appelant en réalisant un appel individuel.
- La radio est configurée pour permettre à l'utilisateur d'appuyer sur le bouton **PTT** et de poursuivre d'autres communications avec le groupe de parole. Appuyer sur le bouton **PTT** lors d'un avertissement d'appel ne permet pas à l'utilisateur de répondre à l'appelant. L'utilisateur doit accéder à l'option Journal d'appels manqués du menu Journal d'appels et répondre à l'avertissement d'appel à partir de cette option.

Un appel individuel OACSU permet à l'utilisateur de répondre immédiatement, tandis qu'un appel individuel FOACSU requiert un accusé de réception de l'utilisateur pour l'appel. Les appels de type OACSU sont par conséquent recommandés pour la fonctionnalité d'avertissement d'appel. Voir [Appel individuel à la page 81](#).

## Émission d'avertissements d'appel

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio.

- 1 Appuyez sur le bouton **Accès direct** préprogrammé.

L'écran affiche **Avert. d'appel**, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

---

- 2 Attendez l'accusé de réception.

Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.

Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, un mini-avis négatif est affiché.

---

## Émission d'avertissements d'appel à l'aide du répertoire

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
-

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Avert. d'appel. Appuyez sur  pour valider la sélection.

L'écran affiche Avert. d'appel, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

---

5 Attendez l'accusé de réception.

- Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.
- Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, un mini-avis négatif est affiché.

---

## Réponse aux avertissements d'appels

Suivez la procédure ci-après pour répondre aux avertissements d'appel sur votre radio.

Lorsque vous recevez un avertissement d'appel :

- Une tonalité répétitive est émise.
- La LED clignote en jaune.
- L'écran affiche la liste des notifications, laquelle répertorie un avertissement d'appel en indiquant l'alias ou l'ID de la radio appelante.

En fonction de la configuration effectuée par votre revendeur ou votre administrateur système, vous pouvez répondre à un avertissement d'appel en procédant de l'une des manières suivantes :

- Appuyez sur le bouton **PTT** et répondez par un appel individuel directement avec l'appelant.
  - Appuyez sur le bouton **PTT** pour continuer une communication de groupe de parole normale. L'avertissement d'appel est déplacé dans l'option Appels manqués du menu Journal d'appels. Vous pouvez répondre à l'appelant à partir du journal des appels manqués.
-

Reportez-vous aux sections [Liste des notifications à la page 208](#) et [Caractéristiques du journal des appels à la page 139](#) pour plus d'informations.

## Mode Muet

Le mode Muet permet à l'utilisateur de couper le son de tous les indicateurs sonores de la radio.

Une fois la fonctionnalité Mode Muet activée, le son de tous les indicateurs sonores est coupé, à l'exception des fonctionnalités de priorité supérieure telles que les opérations d'urgence.

Lorsque l'utilisateur quitte le mode Muet, la radio recommence à émettre les transmissions audio et les tonalités en cours.

### REMARQUE:

Il s'agit d'une fonction disponible à l'achat. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation du mode Muet

Pour activer le mode Muet, procédez comme suit.

Accédez à cette fonctionnalité via le bouton **Mode Muet** programmé.

---

Les événements suivants se produisent lorsque le mode Muet est activé :

- Une tonalité d'indication positive est émise.
- L'écran affiche `Mode Muet Activé`.
- La LED rouge commence à clignoter et cesse de clignoter une fois que l'utilisateur quitte le mode Muet.
- L'icône **Mode Muet** apparaît sur l'écran d'accueil.
- Le son de la radio est désactivé.
- Le compte à rebours de la durée configurée pour le délai du mode Muet commence.

## Définition du délai du mode Muet

Il est possible d'activer la fonctionnalité Mode Muet pour une période préconfigurée en définissant le délai du mode Muet. La durée du délai est configurée dans le menu de la radio et est comprise entre 0,5 heure et 6 heures. Une fois le délai expiré, la radio quitte le mode Muet.

Si le délai est laissé sur 0, la radio reste en mode Muet pendant une période indéfinie, jusqu'à ce que l'utilisateur appuie sur le bouton **Mode Muet** programmé.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Délai avt muet. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur .

## Sortie du mode Muet

Le mode Muet prend fin automatiquement une fois le délai défini pour cette fonctionnalité expiré.

Pour quitter manuellement le mode Muet, effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Mode Muet** préprogrammé.
- Appuyez sur le bouton **PTT** d'une entrée.

Les événements suivants se produisent lorsque le mode Muet est désactivé :

- Une tonalité d'indication négative est émise.
- L'écran affiche Mode Muet Désactivé.
- La LED rouge clignotante s'éteint.
- L'icône **Mode Muet** disparaît de l'écran d'accueil.
- Votre radio active le son et l'état du haut-parleur est restauré.
- Si le délai du mode Muet n'a pas expiré, il est interrompu.

## REMARQUE:

L'utilisateur quitte également le mode Muet s'il transmet un signal vocal ou passe sur un canal non programmé.

## Gestion de l'urgence

Une alarme d'urgence sert à signaler une situation critique. Vous pouvez déclencher une urgence à tout moment, même en cas d'activité sur le canal actuel.

Dans Capacity Max, la radio réceptrice peut prendre en charge une seule alarme d'urgence à la fois. Si une seconde alarme d'urgence est lancée, elle supprimera la première alarme.

Lorsqu'il reçoit une alarme d'urgence, le destinataire peut choisir de supprimer l'alarme et de quitter la liste des alarmes ou de répondre à l'alarme d'urgence en appuyant sur le bouton **PTT** et en transmettant en mode vocal sans urgence.

Votre revendeur ou administrateur système peut régler la durée de la pression sur le bouton **Urgence** programmé, sauf pour la pression longue qui est similaire à tous les autres boutons :

### Pression courte

Entre 0,05 seconde et 0,75 seconde.

### Pression longue

Entre 1,00 seconde et 3,75 secondes.

Le bouton **Urgence** est attribué à la fonction Urgence activée/désactivée. Pour plus d'informations sur les fonctions attribuées au bouton **Urgence**, consultez votre fournisseur local.

## REMARQUE:

Si la pression courte sur le bouton **Urgence** est attribuée à l'activation du mode Urgence, la pression longue sur ce bouton **Urgence** est attribuée à la désactivation de ce mode.

Si la pression longue sur le bouton **Urgence** est attribuée à l'activation du mode Urgence, la pression courte sur ce bouton **Urgence** est attribuée à la désactivation de ce mode.

Votre radio prend en charge trois modes d'alarme d'urgence :

- Alarme d'urgence
- Alarme d'urgence avec appel
- Alarme d'urgence suivie d'un appel vocal

De plus, chaque alarme comporte les options suivantes :

## Regular

La radio transmet un signal d'alarme et fournit des indications audio et/ou visuelles.

## Silencieux

La radio transmet un signal d'alarme sans indications audio ni visuelles. La radio reçoit des appels sans qu'aucun son ne soit émis par le haut-parleur, jusqu'à ce que vous appuyiez sur le bouton *PTT* et/ou que la période d'émission en mode **Micro ouvert** expire.

## Silencieux avec voix

La radio transmet un signal d'alarme sans indication sonore ou visuelle, mais fait sonner les appels entrants dans le haut-parleur.

### REMARQUE:

Seule l'une des alarmes d'urgence ci-dessus peut être attribuée au bouton préprogrammé **Urgence** ou à la **pédale d'urgence**.

## Envoi d'alarmes d'urgence

Cette fonction permet d'envoyer une alarme d'urgence, un signal non vocal, qui déclenche un avertissement sur un groupe de radios. Suivez la procédure ci-après pour envoyer des alarmes d'urgence sur votre radio.

Votre radio n'affiche aucune indication audio ni visuelle en mode Urgence lorsqu'elle est définie sur silencieux.

### 1 Appuyez sur le bouton programmé **Urgence activée**.

L'un des éléments suivants s'affiche :

- L'écran affiche **Alarmes Tx** ainsi que l'alias de destination.
- L'écran affiche **Télégram Tx** ainsi que l'alias de destination.

La LED passe au vert. L'icône **Urgence** apparaît.

### REMARQUE:

Si elle est programmée, la tonalité de recherche d'urgence est émise. Cette tonalité est désactivée lorsque la radio transmet ou reçoit des messages vocaux, et s'arrête lorsque la radio quitte le mode Urgence. La tonalité de recherche d'urgence peut être programmée par le revendeur ou l'administrateur système.

### 2 Attendez l'accusé de réception.

Si l'opération réussit :

- La tonalité d'urgence est émise.
- La LED clignote en vert.
- L'écran affiche `Alarme envoy.`

Si toutes les tentatives ont échoué :

- Une tonalité est émise.
- L'écran affiche `Échec Alarme.`

La radio quitte le mode Alarme d'urgence et revient à l'écran d'accueil.

### REMARQUE:

Lorsque la fonction d'alarme d'urgence seulement est configurée, le processus d'urgence ne prend en compte que l'alarme d'urgence. L'urgence se termine à la réception d'un accusé de réception en provenance du système ou lorsque toutes les tentatives d'accès au canal ont échoué.

Aucun appel vocal n'est associé à l'envoi d'une alarme d'urgence lorsque la fonction d'alarme d'urgence uniquement est configurée.

## Envoi d'alarmes d'urgence avec un appel

Cette fonctionnalité permet d'envoyer une alarme d'urgence avec appel à un groupe de radios ou une console opérateur. Après accusé de réception par l'infrastructure du groupe, un groupe de radios peut communiquer sur un canal d'urgence programmé.

La radio doit être configurée pour que l'alarme et l'appel d'urgence exécutent un appel d'urgence après le processus d'alarme.

- 1 Appuyez sur le bouton programmé **Urgence activée**.

L'écran affiche `Alarme Tx` ainsi que l'alias de destination. L'icône **Urgence** s'affiche. La LED passe au vert.

### REMARQUE:

Si elle est programmée, la tonalité de recherche d'urgence est émise. Cette tonalité est désactivée lorsque la radio transmet ou reçoit des messages vocaux, et s'arrête lorsque la radio quitte le mode Urgence.

Si un accusé de réception d'alarme d'urgence est reçu avec succès :

- La tonalité d'urgence est émise.
- La LED clignote en vert.
- L'écran affiche `Alarme envoy.`
- Votre radio passe en mode Appel d'urgence lorsque l'écran affiche `Urgence` et l'alias du groupe destinataire.

Si aucun accusé de réception d'alarme d'urgence n'est pas reçu :

- toutes les tentatives sont épuisées
- Une tonalité grave est émise.
- L'écran affiche `Échec Alarme.`
- La radio quitte le mode Alarme d'urgence.

- 
- 2** Appuyez sur le bouton **PTT** pour lancer une transmission vocale.

La LED passe au vert. L'écran affiche l'icône **Appel de groupe**.

- 
- 3** Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

- 
- 4** Relâchez le bouton **PTT** pour écouter.

L'écran affiche les alias d'appelant et de groupe.

- 
- 5** Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

- 
- 6** Appuyez sur le bouton **Urgence désact.** pour quitter le mode Urgence.

La radio revient à l'écran d'accueil.

**REMARQUE:**

Selon la programmation de votre radio, la tonalité Parler autorisé peut être émise. Le revendeur de la radio ou votre administrateur système peut vous fournir d'autres informations sur la manière dont la radio est programmée pour les urgences.

L'initiateur de l'appel d'urgence peut appuyer

sur  pour mettre fin à un appel d'urgence en cours. La radio revient à un état d'appel inactif, mais l'écran d'appel d'urgence reste ouvert.

**REMARQUE:**

A l'exception du microphone IMPRES, votre radio ne peut détecter aucun autre microphone relié au connecteur arrière.

Lorsqu'aucun microphone n'est détecté sur le connecteur programmé, votre radio effectue une recherche sur l'autre connecteur. Ici, votre radio donne la priorité au microphone détecté.

Si le mode Cycle d'urgence est activé sur votre radio, le cycle alternatif entre le *Micro ouvert* et la réception d'appel est activé pendant une durée programmée. En mode Cycle d'urgence, les appels reçus sont entendus dans le haut-parleur.

Si vous appuyez sur le bouton **PTT** pendant la période de réception programmée, vous entendrez la tonalité d'interdiction, indiquant que le bouton **PTT** doit être relâché. La radio ignore le bouton **PTT** et reste en mode Urgence.

Si vous appuyez sur le bouton **PTT** pendant que le micro est *ouvert* et le maintenez enfoncé après expiration de la période *Micro ouvert*, la radio continue d'émettre jusqu'à ce que vous relâchiez le bouton **PTT**.

Si la demande d'alarme d'urgence échoue, la radio ne tente pas de renvoyer la demande et passe directement en mode d'émission *Micro ouvert*.

## Envoi d'un message d'alarme d'urgence suivi d'un appel vocal

Cette fonctionnalité permet d'envoyer une alarme d'urgence suivie d'un appel vocal à un groupe de radios. Le microphone de votre radio est automatiquement ouvert et vous n'avez plus besoin d'appuyer sur le bouton **PTT** pour communiquer avec le groupe de radios. Cet état activé du microphone est également appelé « *Micro ouvert* ».

**REMARQUE:**

Il est possible que certains accessoires ne prennent pas en charge le mode *Micro ouvert*. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Suivez la procédure ci-après pour envoyer des alarmes d'urgence suivies d'un appel vocal sur votre radio.

- 1 Appuyez sur le bouton programmé **Urgence activée** ou sur la **pédale d'urgence**.

Vous obtenez l'un des résultats suivants :

- L'écran affiche **Alarme Tx** ainsi que l'alias de destination.
- L'écran affiche **Télégram Tx** ainsi que l'alias de destination.

La LED passe au vert. L'icône **Urgence** s'affiche.

- 2 Lorsque l'écran affiche **Alarme envoy.**, parlez distinctement dans le microphone.

La radio arrête automatiquement l'émission dans les cas suivants :

- Si le mode Cycle d'urgence est activé, la durée du cycle alternatif entre le *Micro ouvert* et la réception d'appel expire.
- Si le mode Cycle d'urgence est désactivé, la période *Micro ouvert* expire.

- 3 Appuyez sur le bouton **Urgence désact.** pour quitter le mode Urgence.

La radio revient à l'écran d'accueil.

## Réception d'alarmes d'urgence

La radio réceptrice peut prendre en charge une seule alarme d'urgence à la fois. Si une seconde alarme d'urgence est lancée, elle supprimera la première alarme. Suivez la procédure ci-après pour recevoir et afficher des alarmes d'urgence sur votre radio.

Lorsque vous recevez une alarme d'urgence :

- Une tonalité est émise.
- La LED clignote en rouge.

- L'écran affiche la liste des alarmes d'urgence, l'ID ou l'alias du groupe de parole d'urgence et l'ID ou l'alias de la radio en émission.

1 Appuyez sur  pour afficher l'alarme.

---

2 Appuyez sur  pour afficher les options et les détails de l'entrée de la liste d'alarmes.

---

3 Appuyez sur  et sélectionnez **Oui** pour fermer la liste des alarmes.

La radio revient à l'écran d'accueil et une **icône d'urgence** s'affiche en haut de l'écran, indiquant l'alarme d'urgence non résolue. L'icône **Urgence** disparaît une fois l'entrée de la liste d'alarme supprimée.

---

4 Appuyez sur  pour accéder au menu.

---

5 Sélectionnez **Liste Alarmes** pour accéder de nouveau à cette liste.

---

6 La tonalité retentit et la LED rouge clignote jusqu'à ce que vous quittiez le mode d'urgence. Cependant, la tonalité peut être désactivée. Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **PTT** pour appeler le groupe de radios ayant reçu l'alarme d'urgence.
  - Appuyez sur n'importe quel bouton programmable.
- 

## Réponse aux alarmes d'urgence

Lorsqu'il reçoit une alarme d'urgence, le destinataire peut choisir de supprimer l'alarme et de quitter la liste des alarmes ou de répondre à l'alarme d'urgence en appuyant sur le bouton **PTT** et en transmettant en mode vocal sans urgence. Suivez la procédure ci-après pour répondre aux alarmes d'urgence sur votre radio.

- 1 Si l'indication de l'alarme d'urgence est activée, la liste des alarmes d'urgence s'affiche lorsque la radio reçoit une alarme d'urgence. Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité.
-

- 2 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour émettre en mode vocal sans urgence sur le groupe ciblé par l'alarme d'urgence.

La LED passe au vert.

- 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

- 4 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio à l'origine de l'urgence répond :

- La LED clignote en rouge.
- L'écran affiche l'icône **Appel d'urgence**, l'ID ou l'alias du groupe de parole d'urgence et l'ID ou l'alias de la radio en émission.

#### REMARQUE:

Si l'indication d'appel d'urgence n'est pas activée, l'écran affiche l'icône **Appel d'urgence**, l'ID ou l'alias du groupe de parole d'urgence et l'ID ou l'alias de la radio en émission.

## Réponse à des alarmes d'urgence avec appel

Suivez la procédure ci-après pour répondre aux alarmes d'urgence avec appel sur votre radio.

Lorsque vous recevez un appel d'urgence :

- La tonalité d'appel d'urgence retentit si l'indication d'appel d'urgence et la tonalité de décodage d'appel d'urgence sont activées. La tonalité d'appel d'urgence ne retentira pas si seule l'indication d'appel d'urgence est activée.
- L'icône **Appel d'urgence** s'affiche dans le coin supérieur droit de l'écran.
- La ligne de texte affiche l'ID ou l'alias du groupe de parole d'urgence et l'ID ou l'alias de la radio en émission.

- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

- 1 Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

La LED passe au vert.

- 2 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

- 3 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio à l'origine de l'urgence répond :

- La LED clignote en rouge.
- L'écran affiche l'icône **Appel d'urgence**, l'ID ou l'alias du groupe de parole d'urgence et l'ID ou l'alias de la radio en émission.

### REMARQUE:

Si l'indication d'appel d'urgence n'est pas activée, l'écran affiche l'icône **Appel d'urgence**, l'ID ou l'alias du groupe de parole d'urgence et l'ID ou l'alias de la radio en émission.

---

## Messages d'état

Cette fonctionnalité permet à l'utilisateur d'envoyer des messages d'état à d'autres radios.

La liste État rapide est configurée par le biais de CPS-RM et comprend jusqu'à 99 états.

La longueur maximale de chaque message d'état est de 16 caractères.

### REMARQUE:

Chaque état dispose d'une valeur numérique correspondante, comprise entre 0 et 99. Il est possible de spécifier un alias pour chaque état par souci de commodité.

## Envoi de messages d'état

Pour envoyer un message d'état, procédez comme suit.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Accès direct** préprogrammé. Ignorez les étapes suivantes.
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option État. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option État rapide. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou sur  pour accéder à l'ID ou à l'alias du groupe ou du terminal souhaité.

Appuyez sur  pour valider la sélection.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- La LED s'éteint.
- L'écran affiche un mini-avis positif juste avant de revenir à l'écran État rapide.
- ✓ apparaît en regard du message d'état envoyé.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- La LED s'éteint.
- L'écran affiche un avis d'échec juste avant de revenir à l'écran État rapide.

## Envoi d'un message d'état à l'aide du bouton programmable

Pour envoyer un message d'état à l'aide du bouton programmable, procédez comme suit.

- 1 Appuyez sur le bouton **Message d'état** préprogrammé.

---

- 2 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection. Le répertoire s'affiche.

---

- 3 Appuyez sur  ou sur  pour accéder à l'ID ou à l'alias du groupe ou du terminal souhaité.  
Appuyez sur  pour valider la sélection.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- La LED s'éteint.
- L'écran affiche un mini-avis positif juste avant de revenir à l'écran `État rapide`.

-  apparaît en regard du message d'état envoyé.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- La LED s'éteint.
- L'écran affiche un avis d'échec juste avant de revenir à l'écran `État rapide`.

## Envoi d'un message d'état à l'aide du répertoire

Pour envoyer un message d'état à l'aide du répertoire, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'ID ou à l'alias du groupe ou du terminal souhaité.

Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Envoyer état. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

---

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- La LED s'éteint.
- L'écran affiche un mini-avis positif juste avant de revenir à l'écran État rapide.
- ✓ apparaît en regard du message d'état envoyé.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.

- La LED s'éteint.
- L'écran affiche un avis d'échec juste avant de revenir à l'écran État rapide.

## Envoi d'un message d'état à l'aide de la numérotation manuelle

Pour envoyer un message d'état à l'aide de la numérotation manuelle, procédez comme suit.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.

---

5 Saisissez l'alias ou l'ID du terminal ou du groupe souhaité, puis appuyez sur  pour continuer.

---

6 Appuyez sur  ou  pour accéder à l'option Envoyer état. Appuyez sur  pour valider la sélection.

---

7 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

---

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- La LED s'éteint.
- L'écran affiche un mini-avis positif juste avant de revenir à l'écran État rapide.

-  apparaît en regard du message d'état envoyé.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- La LED s'éteint.
- L'écran affiche un avis d'échec juste avant de revenir à l'écran État rapide.

## Affichage des messages d'état

Pour afficher les messages d'état, procédez comme suit.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option État. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Boîte de réception. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

Le contenu du message d'état s'affiche.

Il est également possible d'afficher les messages d'état reçus en accédant à la liste des notifications. Reportez-vous à la section [Liste des notifications à la page 208](#) pour plus d'informations.

## Réponse aux messages d'état

Pour répondre aux messages d'état, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou sur  pour accéder à l'option État. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

- 5 Le contenu du message d'état s'affiche. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  ou sur  pour accéder à l'option Répondre. Appuyez sur  pour valider la sélection.

- 7 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.

- La LED s'éteint.
- L'écran affiche un mini-avis positif, puis revient à l'écran Boîte de réception.
- ✓ apparaît en regard du message d'état envoyé.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- La LED s'éteint.
- L'écran affiche un avis d'échec juste avant de revenir à l'écran Boîte de réception.

## Suppression d'un message d'état

Pour supprimer un message d'état de votre radio, procédez comme suit.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option État. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au message d'état souhaité. Appuyez sur  pour valider la sélection.

---

5 Le contenu du message d'état s'affiche. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

---

7 Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection.

---

- L'écran affiche un mini-avis positif, puis revient à l'écran Boîte de réception.

## Suppression de tous les messages d'état

Pour supprimer tous les messages d'état de votre radio, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option État. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour atteindre Oui.  
Appuyez sur  pour valider la sélection.

- L'écran affiche Liste Vide.

## Message texte

Votre radio vous permet de recevoir des données, par exemple sous forme de message texte, depuis une autre radio ou une application de messages textes.

Il existe deux types de messages texte : les messages texte DMR courts et les messages texte. La longueur maximale d'un message texte DMR court est de 23 caractères. La longueur maximale d'un message texte est de 280 caractères, ligne d'objet comprise. La ligne d'objet s'affiche uniquement lorsque vous recevez des messages provenant d'une application de messagerie.

### REMARQUE:

Cette longueur maximale s'applique uniquement aux modèles dotés de la dernière version du logiciel et du matériel. Pour les modèles de radio dotés de versions plus anciennes, la longueur maximale d'un message texte est de 140 caractères. Consultez votre fournisseur ou administrateur système pour en savoir plus.

pour la langue arabe, la saisie de texte s'effectue de droite à gauche.

## Messages texte

Les messages texte sont stockés dans une boîte de réception et classés dans l'ordre chronologique de leur arrivée, le plus récent étant affiché en premier.

La radio ferme l'écran actif dès que le compteur d'inactivité

expire. exercez une pression longue sur le bouton  pour revenir à l'écran d'accueil quand vous le voulez.

## Affichage des messages texte

Suivez la procédure ci-après pour afficher des messages texte sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept.. Appuyez sur  pour valider la sélection.  
 Si la boîte de réception est vide :
  - L'écran affiche Liste Vide.
  - Si la tonalité du clavier est activée, une tonalité est émise.

---

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.  
 L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.

---

## Affichage des messages texte d'état de télémessure

Suivez la procédure ci-après pour afficher un message texte d'état de télémessure à partir de la boîte de réception.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

Vous ne pouvez pas répondre à un message texte État de télémessure.

L'écran affiche Télémessure : <Message texte d'état>.

- 5 Appuyez de manière prolongée sur  pour revenir à l'écran d'accueil.

## Réponse aux messages texte

Suivez la procédure ci-après pour répondre aux messages texte sur votre radio.

Lorsque vous recevez un message texte :

- L'écran affiche la liste des notifications en indiquant l'alias ou l'ID de l'expéditeur.
- L'icône **Message** s'affiche à l'écran.

### REMARQUE:

Appuyez sur le bouton **PTT** et la radio ferme l'écran d'avertissement de message texte avant d'établir un appel individuel ou de groupe vers l'expéditeur du message.

- 1 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Lire. Appuyez sur  pour valider la sélection. L'écran affiche le message texte. L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.

- Appuyez sur  ou sur  pour accéder à l'option Lire+tard. Appuyez sur  pour valider la sélection. La radio revient à l'écran affiché avant la réception du message texte.

- Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

---

## 2 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour revenir à la boîte de réception.

- Appuyez une seconde fois sur  pour répondre à un message texte, le transférer ou le supprimer.
- 

## Réponse aux messages texte par un message rapide

Suivez la procédure ci-après pour répondre aux messages texte par des messages rapides sur votre radio.

### 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à l'étape 3.
  - Appuyez sur  pour accéder au menu.
- 

### 2 Appuyez sur ou sur pour accéder à

l'option Messages. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.

---

5 Appuyez sur  pour accéder au sous-menu.

---

6 Appuyez sur  ou sur  pour accéder à l'option Répondre. Appuyez sur  pour valider la sélection.

---

7 Appuyez sur  ou sur  pour accéder à l'option Réponse rapide. Appuyez sur  pour valider la sélection.

---

8 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

---

9 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité est émise.
  - L'écran affiche un mini-avis négatif.
  - L'écran Renvoyer s'affiche de nouveau.
-

## Renvoi de messages texte

Suivez la procédure ci-après pour renvoyer des messages texte sur votre radio.

Lorsque l'écran **Renvoyer** est affiché :

Appuyez sur  pour renvoyer le message au même alias ou ID de terminal radio/de groupe.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.
- L'écran **Renvoyer** s'affiche de nouveau.

## Transfert de messages texte

Suivez la procédure ci-après pour transférer des messages texte sur votre radio.

Lorsque l'écran **Renvoyer** est affiché :

- 1 Appuyez sur  ou sur  pour accéder à l'option **Transférer**, puis appuyez sur  pour renvoyer le message à un autre alias ou ID de terminal radio/groupe.

---

- 2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.  
L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

---

- 3 Attendez l'accusé de réception.  
Si l'opération réussit :
  - Une tonalité est émise.
  - L'écran affiche un mini-avis positif.
 Si l'opération échoue :
  - Une tonalité est émise.
  - L'écran affiche un mini-avis négatif.

**REMARQUE:**

Vous pouvez aussi sélectionner manuellement l'adresse d'une radio cible (voir [Transfert de messages texte à l'aide de la numérotation manuelle à la page 471](#)).

## Transfert de messages texte à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour transférer des messages texte sur votre radio à l'aide de la numérotation manuelle.

- 1 Appuyez sur  ou sur  pour accéder à l'option Transférer. Appuyez sur  pour valider la sélection.
- 2 Appuyez sur  pour envoyer le message à un autre alias ou ID de terminal radio/de groupe.

- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.  
L'écran affiche Numéro de radio :.

- 4 Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.  
L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

- 5 Attendez l'accusé de réception.
  - Si l'opération réussit :
    - Une tonalité est émise.
    - L'écran affiche un mini-avis positif.
  - Si l'opération échoue :
    - Une tonalité est émise.
    - L'écran affiche un mini-avis négatif.

## Modification de messages texte

Sélectionnez **Modifier** pour modifier le message.

### REMARQUE:

si une ligne **Objet** s'affiche (pour les messages provenant d'une application e-mail), il n'est pas possible de la modifier.

- 1 Appuyez sur  ou  pour accéder à l'option **Modifier**. Appuyez sur  pour valider la sélection.  
L'écran affiche un curseur clignotant.

- 2 Utilisez le clavier pour modifier le message.

- Appuyez sur  pour vous décaler d'un espace vers la gauche.
- Appuyez sur  ou  pour vous déplacer d'un espace vers la droite.
- Appuyez sur  pour supprimer tous les caractères indésirables.

- Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

- 3 Appuyez sur  lorsque vous avez terminé de composer votre message.

- 4 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option **Envoyer** et appuyez sur  pour envoyer le message.
- Appuyez sur  ou  pour accéder à l'option **Enregistrer** et appuyez sur  pour enregistrer le message dans le dossier **Brouillons**.
- Appuyez sur  pour modifier le message.
- Appuyez sur  pour choisir de supprimer le message ou de l'enregistrer dans le dossier **Brouillons**.

## Envoi de messages texte

Suivez la procédure ci-après pour rédiger des messages texte sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option **Messages**. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  pour accéder à l'option **Composer**. Appuyez sur  pour valider la sélection.  
Un curseur clignotant apparaît.

4 Saisissez votre message à l'aide du clavier.

Appuyez sur  pour vous décaler d'un espace vers la gauche.

Appuyez sur  ou  pour vous déplacer d'un espace vers la droite.

Appuyez sur  pour supprimer tous les caractères indésirables.

Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

5 Appuyez sur  lorsque vous avez terminé de composer votre message.

Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton  pour envoyer le message.
- Appuyez sur . Appuyez sur  ou  pour choisir de modifier, de supprimer ou d'enregistrer le message. Appuyez sur  pour valider la sélection.

## Envoi de messages texte

Suivez la procédure ci-après pour envoyer des messages texte sur votre radio.

Supposons que vous avez récemment écrit ou enregistré un message texte.

Sélectionnez le destinataire du message. Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.
- Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection. Saisissez l'ID de terminal. La première ligne de l'écran affiche Numéro radio :. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez l'ID ou l'alias du terminal. Appuyez sur .

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

Si l'opération réussit :

- Une tonalité est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité grave est émise.
- L'écran affiche un mini-avis négatif.
- Le message est déplacé vers le dossier Éléments envoyés.
- Le message est signalé par l'icône Échec envoi.

### REMARQUE:

Pour un message texte récemment écrit, la radio revient à l'écran Renvoyer.

## Suppression des messages texte de la boîte de réception

Suivez la procédure ci-après pour supprimer les messages texte contenus dans la boîte de réception de votre radio.

- 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).

- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

Si la boîte de réception est vide :

- L'écran affiche Liste Vide.
- Une tonalité est émise.

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.

5 Appuyez sur  pour accéder au sous-menu.

6 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

7 Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection. L'écran affiche un mini-avis positif. La Boîte de réception est à nouveau affichée.

## Suppression de tous les messages texte de la boîte de réception

Suivez la procédure ci-après pour supprimer tous les messages texte contenus dans la boîte de réception de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).

- Appuyez sur  pour accéder au menu.
- 

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

Si la boîte de réception est vide :

- L'écran affiche Liste Vide.
  - Une tonalité est émise.
- 

4 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour atteindre Oui.

Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis positif.

---

## Messages texte envoyés

Dès qu'un message a été envoyé à une autre radio, il est archivé dans le dossier Messages envoyés. Le dernier message texte envoyé est toujours ajouté à la première ligne de la liste des messages envoyés. Vous pouvez renvoyer, transférer, modifier ou supprimer un message texte envoyé.

Le dossier Messages envoyés contient les 30 derniers messages envoyés au maximum. Lorsque que le dossier est plein, le dernier message envoyé remplace le plus ancien figurant dans ce dossier.

Si vous fermez l'écran d'envoi des messages pendant l'envoi d'un message, la radio met à jour l'état du message dans le dossier Messages envoyés sans fournir d'indication visuelle ni sonore.

Si la radio change de mode ou s'éteint avant que l'état d'un message ne soit mis à jour dans le dossier Messages envoyés, la radio ne pourra pas terminer la mise à jour des

messages en cours et une icône **Échec envoi message** signalera le message.

La radio peut mettre à jour jusqu'à cinq messages en cours. Pendant cette procédure, la radio affiche automatiquement une icône **Échec envoi message** pour indiquer qu'elle ne peut pas envoyer d'autre message.

Exercez une pression longue sur  à tout moment pour revenir à l'écran d'accueil.

#### REMARQUE:

Si le type de canal, par exemple numérique conventionnel ou Capacity Plus ne correspond pas, vous pouvez uniquement modifier, transférer ou supprimer un message envoyé.

## Affichage des messages texte envoyés

Suivez la procédure ci-après pour afficher les messages texte envoyés sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option **Messages**. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option **Msges envoyés**. Appuyez sur  pour valider la sélection.

Si le dossier **Messages envoyés** est vide :

- L'écran affiche **Liste Vide**.
- Si la tonalité du clavier est activée, une tonalité basse est émise.

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'icône affichée en haut à droite de l'écran indique l'état du message. Voir [Icônes Messages envoyés](#).

## Envoi de messages texte envoyés

Suivez la procédure ci-après pour envoyer des messages texte envoyés sur votre radio.

Lorsqu'un message envoyé est affiché :

- 1 Appuyez sur  .

---

- 2 Vous pouvez soit renvoyer ou transférer un message texte envoyé. Effectuez l'une des opérations suivantes :

-  pour accéder à l'option Renvoyer. Appuyez sur  pour valider la sélection.
-  pour accéder à l'option Transférer. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

- 3 Attendez l'accusé de réception. Si l'opération réussit :
  - Une tonalité est émise.

- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité est émise.
- L'écran affiche un mini-avis négatif.
- L'écran Renvoyer s'ouvre sur la radio. Reportez-vous à la section [Renvoi de messages texte à la page 168](#) pour plus d'informations.

## Suppression de messages texte envoyés du dossier Messages envoyés

Suivez la procédure ci-après pour supprimer tous les messages texte envoyés contenus dans le dossier Messages envoyés de votre radio.

Lorsqu'un message envoyé est affiché :

- 1 Appuyez sur  .

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

## Suppression de tous les messages texte envoyés du dossier Messages envoyés

Suivez la procédure ci-après pour supprimer tous les messages texte envoyés contenus dans le dossier Messages envoyés de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Msges envoyés. Appuyez sur  pour valider la sélection.
 

Si le dossier Messages envoyés est vide :

  - L'écran affiche Liste Vide.

- Une tonalité est émise.

- 
- 4 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

---

  - 5 Effectuez l'une des opérations suivantes :
    - Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection. L'écran affiche un mini-avis positif.
    - Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour valider la sélection. La radio revient à l'écran précédent.
- 

## Messages texte enregistrés

Les messages texte peuvent être enregistrés et envoyés plus tard.

Si une pression sur le bouton **PTT** ou un changement de mode ferme l'écran Écrire/modifier message pendant que

vous écrivez ou modifiez un message, celui-ci est automatiquement enregistré dans le dossier Brouillons.

Le message texte le plus récemment enregistré est toujours ajouté à la première ligne de la liste des Brouillons.

Le dossier Brouillons peut contenir 10 messages au maximum. Dès qu'il contient dix messages, le message suivant enregistré remplace automatiquement le plus ancien figurant dans ce dossier.

### Affichage des messages texte enregistrés

Suivez la procédure ci-après pour afficher les messages texte enregistrés sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Brouillons. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

### Modification des messages texte enregistrés

Suivez la procédure ci-après pour modifier les messages texte enregistrés sur votre radio.

1 Appuyez sur  pendant que le message est affiché.

2 Appuyez sur  ou  pour accéder à l'option Modif.. Appuyez sur  pour valider la sélection. Un curseur clignotant apparaît.

### 3 Saisissez votre message à l'aide du clavier.

Appuyez sur  pour vous décaler d'un espace vers la gauche.

Appuyez sur  ou  pour vous déplacer d'un espace vers la droite.

Appuyez sur  pour supprimer tous les caractères indésirables.

Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

### 4 Appuyez sur lorsque vous avez terminé de composer votre message.

Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option Envoyer. Appuyez sur le bouton  pour envoyer le message.
- Appuyez sur . Appuyez sur  ou  pour choisir d'enregistrer ou de supprimer le

message. Appuyez sur  pour valider la sélection.

## Suppression des messages texte enregistrés dans le dossier Brouillons

Suivez la procédure ci-après pour supprimer un message texte enregistré des brouillons de votre radio.

### 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

### 2 Appuyez sur ou sur pour accéder à l'option Messages. Appuyez sur pour valider la sélection.

### 3 Appuyez sur ou sur pour accéder à l'option Brouillons. Appuyez sur pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour supprimer le message texte.

---

## Messages texte rapides

Votre radio prend en charge un maximum de 50 messages texte rapides programmés par votre fournisseur.

Bien que les messages texte rapides soient préprogrammés, vous pouvez les modifier avant de les envoyer.

## Envoi de messages texte rapides

Suivez la procédure ci-après pour envoyer des messages texte rapides prédéfinis de votre radio vers un alias prédéfini.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
  - Appuyez sur le bouton **Accès direct** préprogrammé. Passez à [étape 6](#). L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.
  - Appuyez sur  pour accéder au menu.
- 

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Txt rapide. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au message texte rapide souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Procédez comme suit pour sélectionner le destinataire et envoyer le message.

L'écran affiche un mini-avis de transition, confirmant que l'envoi du message est en cours.

- 6 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.
- L'écran Renvoyer s'ouvre sur la radio. Reportez-vous à la section [Renvoi de messages texte à la page 168](#) pour plus d'informations.

Vous pouvez configurer les paramètres suivants pour saisir du texte sur votre radio :

- Texte prédictif
- Correction orthographique
- Maj. phrase
- Mes mots

Votre radio prend en charge les méthodes de saisie de texte suivantes :

- Numéros
- Symboles
- Prédictif ou multi-frappe
- Langue (le cas échéant)

#### REMARQUE:

Appuyez sur  à tout moment pour revenir à l'écran précédent ou appuyez de manière prolongée

sur  pour revenir à l'écran d'accueil. La radio ferme l'écran actif dès que le compteur d'inactivité expire.

## Configuration de la saisie de texte

Votre radio vous permet de configurer différents textes.

## Activation ou désactivation de la correction orthographique

Propose d'autres choix disponibles lorsque le mot entré dans l'éditeur de texte n'est pas reconnu par le dictionnaire intégré.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option Correction ortho. Appuyez sur  pour valider la sélection.

- 6 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option Correction ortho. Appuyez sur  pour valider la sélection.
- Appuyez sur  pour activer l'option Correction ortho. Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Appuyez sur  pour désactiver l'option Correction ortho. Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation ou désactivation du texte prédictif

**Texte prédictif** : Votre radio peut apprendre des séquences de texte courantes que vous utilisez souvent. Une fois que vous avez entré le premier mot d'une

séquence de texte courante dans l'éditeur de texte, votre radio propose le mot suivant que vous pourriez vouloir utiliser.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'option Texte prédictif. Appuyez sur  pour valider la sélection.

---

[Envoyer un commentaire](#)

6 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour activer l'option Texte prédictif. Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Appuyez sur  pour désactiver le contrôle de distorsion dynamique du microphone. Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Maj. phrase

Cette fonction active automatiquement les majuscules pour la première lettre du premier mot de chaque nouvelle phrase.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option Saisie texte. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou sur  pour accéder à l'option Majuscules des phrases. Appuyez sur  pour valider la sélection.

- 6 Effectuez l'une des opérations suivantes :
- Appuyez sur  pour activer l'option Maj. Phrase. Si cette option est activée, le symbole ✓ apparaît en regard de la mention Activé.
  - Appuyez sur  pour désactiver l'option Maj. Phrase. Si cette option est désactivée, le

symbole ✓ n'est plus affiché en regard de la mention Activé.

## Affichage des mots personnalisés

Vous pouvez ajouter vos propres mots personnalisés dans le dictionnaire intégré de votre radio. Votre radio conserve une liste de ces mots.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Saisie texte. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou  pour accéder à l'option Liste de mots. Appuyez sur  pour valider la sélection.  
L'écran affiche la liste des mots personnalisés.

---

## Modification des mots personnalisés

Vous pouvez modifier les mots personnalisés enregistrés sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou  pour accéder à l'option

Liste de mots. Appuyez sur  pour valider la sélection.

L'écran affiche la liste des mots personnalisés.

7 Appuyez sur  ou  pour accéder au mot

souhaité. Appuyez sur  pour valider la sélection.

8 Appuyez sur  ou  pour accéder à l'option

Modifier. Appuyez sur  pour valider la sélection.

9 Modifiez votre mot personnalisé à l'aide du clavier.

- Appuyez sur  pour vous décaler d'un espace vers la gauche.
- Appuyez sur la touche  pour vous déplacer d'un espace vers la droite.

- Appuyez sur  pour supprimer des caractères indésirables.

- Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

10 Appuyez sur  une fois que votre mot personnalisé est complet.

L'écran affiche un mini-avis de transition vous confirmant que votre mot personnalisé est en cours d'enregistrement.

- Si le mot personnalisé est enregistré, une tonalité est émise et l'écran affiche un mini-avis positif.
- Si le mot personnalisé n'est pas enregistré, une tonalité grave est émise et l'écran affiche un mini-avis négatif.

## Ajout de mots personnalisés

Vous pouvez ajouter des mots personnalisés dans le dictionnaire intégré de la radio.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou  pour accéder à l'option Ajouter un nouveau mot. Appuyez sur  pour valider la sélection.  
L'écran affiche la liste des mots personnalisés.

---

7 Modifiez votre mot personnalisé à l'aide du clavier.

- Appuyez sur  pour vous décaler d'un espace vers la gauche.
  - Appuyez sur la touche  pour vous déplacer d'un espace vers la droite.
  - Appuyez sur  pour supprimer des caractères indésirables.
  - Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.
- 

8 Appuyez sur  une fois que votre mot personnalisé est complet.

---

L'écran affiche un mini-avis de transition vous confirmant que votre mot personnalisé est en cours d'enregistrement.

- Si le mot personnalisé est enregistré, une tonalité est émise et l'écran affiche un mini-avis positif.
- Si le mot personnalisé n'est pas enregistré, une tonalité grave est émise et l'écran affiche un mini-avis négatif.

### Suppression d'un mot personnalisé

Suivez la procédure ci-après pour supprimer les mots personnalisés enregistrés dans votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou  pour accéder au mot souhaité. Appuyez sur  pour valider la sélection.

---

- 7 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

---

- 8 Sélectionnez l'une des options suivantes :
  - À l'affichage du message Supprimer entrée ?, appuyez sur  pour sélectionner Oui. L'écran affiche Entrée supprimée.

- Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour revenir à l'écran précédent.
- 

## Suppression de tous les mots personnalisés

Suivez la procédure ci-après pour supprimer tous les mots personnalisés dans le dictionnaire intégré de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

  - 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

  - 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

  - 5 Appuyez sur  ou sur  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

  - 6 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

---

  - 7 Effectuez l'une des opérations suivantes :
    - À l'affichage du message Supprimer entrée ?, appuyez sur  pour sélectionner Oui. L'écran affiche Toutes les entrées supprimées.
    - Appuyez sur  ou sur  pour atteindre Non afin de revenir à l'écran précédent. Appuyez sur  pour valider la sélection.
-

## Tickets de tâches

Cette fonctionnalité permet à votre radio de recevoir des messages envoyés par la console opérateur, qui indiquent les tâches à effectuer.

### REMARQUE:

Il est possible de personnaliser cette fonctionnalité via le CPS selon les besoins des utilisateurs. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Il existe deux dossiers contenant différents tickets de tâche :

#### Dossier Mes tâches

Tickets de tâche personnalisés attribués à votre ID utilisateur connecté.

#### Dossier Tâches partg.

Tickets de tâche partagés attribués à plusieurs individus.

Vous pouvez répondre à ces tickets de tâche afin de les trier dans des dossiers. Par défaut, les dossiers sont **Tous**, **Nouveau**, **Commencé** et **Terminé**. Consultez votre revendeur ou votre administrateur système pour bénéficier de 10 dossiers supplémentaires.

### REMARQUE:

Les tickets de tâche sont conservés même lorsque la radio est éteinte, puis rallumée.

Tous les tickets de tâche se trouvent dans le dossier **Tous**. Selon la façon dont votre radio est programmée, les tickets de tâche sont triés en fonction de leur niveau de priorité, puis de leur heure de réception. Les nouveaux tickets de tâche, ceux dont l'état a récemment changé et ceux disposant du niveau de priorité le plus élevé apparaissent en premier. Une fois le nombre maximum de tickets de tâche atteint, tout nouveau ticket remplace automatiquement le dernier ticket de tâche de la radio. Votre radio prend en charge un maximum de 100 ou 500 tickets de tâche, selon le modèle. Consultez votre fournisseur ou administrateur système pour en savoir plus. Votre radio détecte et rejette automatiquement les tickets de tâche dupliqués ayant le même ID.

En fonction de l'importance des tickets de tâche, la console opérateur y ajoute un niveau de priorité. Il existe trois niveaux de priorité : Priorité 1, Priorité 2 et Priorité 3. Priorité 1 est le plus haut niveau de priorité. Priorité 3 est le plus bas. Il existe également des tickets de tâche auxquels aucun niveau de priorité n'est attribué.

Votre radio se met à jour en conséquence lorsque la console opérateur effectue les modifications suivantes :

- Modification du contenu de tickets de tâche
- Ajout ou modification du niveau de priorité de tickets de tâche
- Transfert de tickets de tâche d'un dossier à un autre
- Annulation de tickets de tâche

## Accès au dossier Tickets de tâche

Suivez la procédure ci-après pour accéder au dossier Tickets de tâche.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton préprogrammé **Tickets de tâche**. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou  pour accéder à l'option Tickets de tâche. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou  accéder au dossier souhaité. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.

## Connexion et déconnexion au serveur distant

Cette fonction vous permet de vous connecter et de vous déconnecter du serveur distant en utilisant votre ID utilisateur.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou  pour accéder à l'option Se connecter. Appuyez sur  pour valider la sélection.

Si vous êtes déjà connecté, le menu affiche  
Déconnexion.

L'écran affiche un mini-avis de transition, indiquant  
que la requête est en cours.

### 3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Création de tickets de tâches

Votre radio peut créer des tickets de tâches en fonction  
d'un modèle de ticket de tâche et envoyer les tâches à  
effectuer.

Un logiciel de programmation CPS est nécessaire pour  
configurer le modèle de ticket de tâche.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option  
Tickets tâches. Appuyez sur  pour valider la  
sélection.

3 Appuyez sur  ou  pour accéder à l'option  
Créer un ticket. Appuyez sur  pour valider  
la sélection.

## Réponse à des tickets de tâches

Suivez la procédure ci-après pour répondre aux tickets de  
tâche sur votre radio.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option  
Tickets tâches. Appuyez sur  pour valider la  
sélection.

3 Appuyez sur  ou  pour accéder au dossier souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez une fois de plus sur  pour ouvrir le sous-menu.

Vous pouvez également appuyer sur la touche numérique correspondante (1 à 9) pour accéder à **Réponse rapide**.

---

6 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

---

7 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
- 

## Envoi de tickets de tâches à l'aide d'un modèle de ticket de tâche

Si votre radio est configurée avec un modèle de ticket de tâche, effectuez les actions suivantes pour envoyer le ticket de tâche.

1 Utilisez le clavier pour saisir le numéro de salle requis. Appuyez sur  pour valider la sélection.

---

2 Appuyez sur  ou  pour accéder à l'option État de salle. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou  pour accéder à l'option souhaitée. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Envoyer. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

---

5 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.

- L'écran affiche un mini-avis négatif.
- 

## Envoi de tickets de tâches à l'aide de plus d'un modèle de ticket de tâche

Si votre radio est configurée avec plus d'un modèle de ticket de tâche, effectuez les actions suivantes pour envoyer les tickets de tâches.

1 Appuyez sur  ou  pour accéder à l'option souhaitée. Appuyez sur  pour valider la sélection.

---

2 Appuyez sur  ou  pour accéder à l'option Envoyer. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

---

3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Suppression de tickets de tâches

Suivez la procédure ci-après pour supprimer des tickets de tâches sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton préprogrammé **Tickets de tâche**. Passez à [étape 4](#)
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Tickets tâches. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  accéder au dossier souhaité. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder au dossier Tout. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.

6 Appuyez à nouveau sur  alors que le ticket de tâche est affiché.

7 Appuyez sur  ou  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

### 8 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

---

## Suppression de tous les tickets de tâches

Suivez la procédure ci-après pour supprimer tous les tickets de tâche sur votre radio.

### 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton préprogrammé **Tickets de tâche**. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Tickets tâches. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou  accéder au dossier souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder au dossier Tout. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

### 6 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection. L'écran affiche un mini-avis positif.

- Appuyez sur  ou sur  pour atteindre  
Non. Appuyez sur  pour valider la sélection.  
La radio revient à l'écran précédent.
- 

## Confidentialité

Cette fonction protège les utilisateurs contre les possibilités d'écoute sur un canal par des personnes non autorisées grâce à une solution de brouillage logicielle. Les éléments de signalisation et d'identification des utilisateurs ne sont pas cryptés.

La fonction de cryptage doit être activée sur le canal pour que la radio puisse émettre en utilisant le cryptage, mais cela n'est pas nécessaire pour recevoir une communication. Lorsque la radio est sur un canal programmé pour utiliser la fonction de cryptage, elle peut toujours recevoir des transmissions en clair.

Votre radio prend en charge uniquement la fonction Cryptage amélioré. Pour décrypter une transmission de données ou un appel crypté, votre radio doit avoir la même valeur de clé et le même ID de clé (pour la fonction Cryptage amélioré) que la radio en émission.

Si votre radio reçoit un appel brouillé d'une autre valeur de clé et d'ID, vous n'entendez rien (pour la fonction Confidentialité améliorée).

Sur un canal programmé pour utiliser la fonction de cryptage, votre radio peut recevoir des appels en clair ou décryptés, en fonction de sa programmation. De plus, toujours selon sa programmation, votre radio peut émettre ou non une tonalité d'avertissement.

### REMARQUE:

Cette fonction n'est pas applicable dans les canaux de fréquences publiques qui sont dans une même fréquence.

La LED est allumée en vert lorsque la radio émet. Elle clignote rapidement lorsque la radio reçoit une transmission cryptée.

### REMARQUE:

Certains modèles de radio ne disposent pas de cette fonction de cryptage, ou proposent une configuration alternative. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation/désactivation du cryptage

Suivez la procédure ci-après pour activer ou désactiver le cryptage sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Cryptage** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

---
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Crypt. Appuyez sur  pour valider la sélection.

---

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activé. Appuyez sur  pour valider la sélection. L'écran affiche ✓ en regard de l'option Activé.
  - Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour valider la sélection. L'écran affiche ✓ en regard de l'option Désactivé.
- 

## Suppr. réponse

Cette fonctionnalité empêche votre radio de répondre aux émissions entrantes.

### REMARQUE:

Il s'agit d'une fonction disponible à l'achat. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Si cette fonctionnalité est activée, votre radio ne génère aucune émission sortante en réponse aux émissions entrantes (Vérification radio, Alerte d'appel, Désactiver

radio, Écoute déportée, Service d'enregistrement automatique (SEA), Réponse aux messages privés et Signalement de localisation GNSS, par exemple). Votre radio ne peut pas recevoir d'appels individuels confirmés lorsque cette fonctionnalité est activée. Toutefois, votre radio peut envoyer des émissions manuellement.

## Activation ou désactivation de la suppression réponse

Pour activer ou désactiver la suppression réponse sur votre radio, procédez comme suit.

Appuyez sur le bouton **Suppr. réponse** préprogrammé.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche brièvement un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche brièvement un mini-avis négatif.

## Blocage à distance/Réactivation

Cette fonction permet d'activer ou de désactiver toute radio du système. Par exemple, le revendeur ou l'administrateur système peut avoir besoin de désactiver une radio volée pour rendre impossible son utilisation, et la réactiver lorsqu'elle aura été récupérée.

Il est possible de désactiver (bloquer à distance) ou d'activer (réactiver) une radio via la console ou via une commande initiée par une autre radio.

Une fois désactivée, la radio émet une tonalité d'indication négative et `Canal refusé` apparaît sur l'écran d'accueil.

Lorsqu'une radio est bloquée, la radio ne peut pas faire la demande ni recevoir des services autonomes d'utilisateurs sur le système qui exécute la procédure de blocage. Cependant, la radio peut basculer vers un autre système. La radio continue à envoyer des rapports de position GNSS et peut être contrôlée à distance lorsqu'elle a été bloquée.

### REMARQUE:

Le revendeur ou l'administrateur système peut désactiver une radio de manière permanente. Reportez-vous à la section [Désactivation d'une radio à la page 204](#) pour plus d'informations.

## Blocage à distance d'une radio

Pour désactiver une radio, procédez comme suit.

- 1 Appuyez sur le bouton **Désactiver radio** préprogrammé.

---

- 2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.  
L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED clignote en vert.

---

- 3 Attendez l'accusé de réception.  
Si l'opération réussit :
  - Une tonalité d'indication positive est émise.
  - L'écran affiche un mini-avis positif.
 Si l'opération échoue :
  - Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.

## Blocage à distance d'une radio à l'aide du répertoire

Pour désactiver une radio à l'aide du répertoire, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option **Désac radio**. Appuyez sur  pour valider la sélection.  
L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED clignote en vert.

**5** Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
- 

## Blocage à distance d'une radio à l'aide de la numérotation manuelle

Pour désactiver une radio à l'aide de la numérotation manuelle, procédez comme suit.

**1** Appuyez sur  pour accéder au menu.

---

**2** Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

**3** Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

---

**4** Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.

La première ligne affiche Numéro radio :.

---

**5** Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.

---

**6** Appuyez sur  ou sur  pour accéder à l'option Désac radio. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED clignote en vert.

---

**7** Attendez l'accusé de réception.  
Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

---

## Réactivation d'une radio

Pour activer une radio, procédez comme suit.

1 Appuyez sur le bouton **Activer radio** préprogrammé.

2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche **Activer radio** et l'ID ou l'alias du terminal. La LED passe au vert.

3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.

---

## Réactivation d'une radio à l'aide du répertoire

Pour activer une radio à l'aide du répertoire, procédez comme suit.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Activer radio. Appuyez sur  pour valider la sélection.
- La LED clignote en vert.  
L'écran affiche Activer radio et l'ID ou l'alias du terminal. La LED passe au vert.
- 

- 5 Attendez l'accusé de réception.
- Si l'opération réussit :
- Une tonalité est émise.
  - L'écran affiche Activer radio réussi.
- Si l'opération échoue :
- Une tonalité est émise.
  - L'écran affiche Activer radio échoué.
- 

## Réactivation d'une radio à l'aide de la numérotation manuelle

Pour activer une radio à l'aide de la numérotation manuelle, procédez comme suit.

[Envoyer un commentaire](#)

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.
- 
- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou sur  pour accéder à l'option Appel indiv. Appuyez sur  pour valider la sélection.
- La première ligne affiche Numéro radio :.
- 
- 5 Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.
-

- 6 Appuyez sur  ou sur  pour accéder à l'option Activer radio. Appuyez sur  pour valider la sélection.
- La LED clignote en vert.  
L'écran affiche Activer radio et l'ID ou l'alias du terminal. La LED passe au vert.

- 
- 7 Attendez l'accusé de réception.
- Si l'opération réussit :
- Une tonalité est émise.
  - L'écran affiche Activer radio réussi.
- Si l'opération échoue :
- Une tonalité est émise.
  - L'écran affiche Activer radio échoué.

## Désactivation d'une radio

Cette fonctionnalité est une mesure de sécurité améliorée permettant de limiter l'accès non autorisé à une radio.

Cette fonctionnalité permet de rendre la radio inutilisable. Par exemple, le revendeur ou l'administrateur système peut vouloir désactiver une radio volée ou égarée afin d'éviter toute utilisation non autorisée.

Lorsqu'une radio désactivée est mise sous tension, Radio désactivée apparaît brièvement à l'écran pour indiquer l'état désactivé de la radio.

### REMARQUE:

Il est possible de réactiver une radio désactivée uniquement au dépôt de service Motorola Solutions. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Lone Worker

Cette fonction envoie une alarme d'urgence lorsque la radio reste inutilisée, par exemple si l'utilisateur n'appuie pas sur un bouton ou ne tourne pas le sélecteur de canal avant l'expiration d'une durée prédéterminée.

Après expiration de ce délai, la radio vous avertit en émettant une tonalité d'indication sonore.

Si vous ne confirmez pas avoir entendu cette tonalité en appuyant sur l'une des touches avant expiration du délai de rappel, la radio envoie une situation d'urgence, selon la

programmation du revendeur ou de l'administrateur système.

Reportez-vous à la section [Gestion de l'urgence à la page 148](#) pour plus d'informations.

#### REMARQUE:

Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Fonctions de verrouillage par mot de passe

Cette fonctionnalité vous permet de restreindre l'accès à la radio en demandant un mot de passe lorsque l'appareil est sous tension.

Vous pouvez utiliser le microphone à clavier ou les boutons **Défilement Haut/Bas** pour entrer le mot de passe.

### Accès par mot de passe aux radios

Suivez la procédure ci-après pour accéder à votre radio en utilisant un mot de passe.

- 1 Saisissez votre mot de passe à quatre chiffres.

#### REMARQUE:

L'utilisation de la **pédale d'urgence** annule la saisie du mot de passe pour accéder à la radio.

- Utilisez un microphone à clavier.
- Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur  pour saisir le chiffre sélectionné et placer le curseur sur le chiffre suivant.

- 
- 2 Appuyez sur  pour saisir le mot de passe.

Si l'opération réussit, la radio se met sous tension.  
Si l'opération échoue :

- À l'issue de la première et de la deuxième tentative, l'écran affiche **Mot de passe Erroné**. Répétez [étape 1](#).
- À l'issue de la troisième tentative, l'écran affiche **Mot de passe Erroné**, puis **Radio Verrouillée**. Une tonalité est émise. La LED jaune clignote double. Votre radio passe à l'état verrouillé pendant 15 minutes.

**REMARQUE:**

En mode verrouillé, votre radio répond uniquement aux commandes du **bouton Marche/Arrêt - Volume** et du bouton programmé **Rétro-éclairage**.

---

## Déverrouillage des radios

Lorsqu'elle est verrouillée, votre radio ne peut recevoir aucun appel. Suivez la procédure ci-après pour déverrouiller votre radio.

Effectuez l'une des opérations suivantes :

- Si la radio est allumée, patientez 15 minutes, puis répétez les étapes de la section [Accès par mot de passe aux radios à la page 205](#) pour accéder à la radio.
- Si la radio est éteinte, allumez-la. Votre radio relance le délai de 15 minutes d'attente en mode verrouillé. Une tonalité est émise. La LED jaune clignote double. L'écran affiche Radio Verrouillée.

Patientez 15 minutes, puis répétez les étapes de la section [Accès par mot de passe aux radios à la page 205](#) pour accéder à la radio.

## Activation/désactivation de la fonction de verrouillage par mot de passe

Suivez la procédure ci-après pour activer ou désactiver la fonction de verrouillage par mot de passe sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Verrou MdP. Appuyez sur  pour valider la sélection.

---

5 Saisissez votre mot de passe à quatre chiffres.

- Utilisez un microphone à clavier.
  - Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur  pour saisir le chiffre sélectionné et placer le curseur sur le chiffre suivant.  
Une tonalité d'indication positive est émise pour chaque chiffre.
- 

6 Appuyez sur  pour saisir le mot de passe.

Si le mot de passe est incorrect, l'écran affiche Mot de passe Erroné et revient automatiquement au menu précédent.

---

7 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activer. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole ✓ en regard de l'option Activer.
  - Appuyez sur  ou sur  pour accéder à l'option Désactiver. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole ✓ en regard de l'option Désactiver.
- 

## Modification des mots de passe

Suivez la procédure ci-après pour modifier les mots de passe utilisés sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou sur  pour accéder à l'option Verrou MdP. Appuyez sur  pour valider la sélection.
- 
- 5 Saisissez votre mot de passe à quatre chiffres, puis appuyez sur  pour continuer.  
Si le mot de passe est incorrect, l'écran affiche Mot de passe Erroné et revient automatiquement au menu précédent.
- 
- 6 Appuyez sur  ou sur  pour accéder à l'option Changer MdP. Appuyez sur  pour valider la sélection.
- 
- 7 Saisissez un nouveau mot de passe à quatre chiffres, puis appuyez sur  pour continuer.
- 

- 8 Saisissez le nouveau mot de passe à quatre chiffres une nouvelle fois, puis appuyez sur  pour continuer.  
Si l'opération réussit, l'écran affiche Mot de passe changé.  
Si l'opération échoue, l'écran affiche Mots de passe incorrects.  
L'écran revient automatiquement au menu précédent.
- 

## Liste des notifications

Votre radio gère une liste des notifications qui indique les éléments non lus sur le canal, tels que les messages textes, télégrammes de télémétrie, appels manqués, alertes d'appels.

L'icône **Notification** s'affiche à l'écran lorsque la liste des notifications comprend un ou plusieurs éléments.

Elle peut contenir jusqu'à 40 événements non lus. Lorsque la liste est pleine, le prochain événement remplace automatiquement le plus ancien. Après leur lecture, les événements sont supprimés de la liste des notifications.

La liste des notifications peut contenir un nombre maximal de 30 messages texte et 10 avertissements d'appels ou appels manqués. Ce nombre dépend de la capacité des listes de fonctions individuelles (tickets de tâches, messages texte, avertissements d'appel ou appels manqués).

## Accès à la liste des notifications

Suivez la procédure ci-après pour accéder à la liste des notifications de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Notification. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'événement souhaité. Appuyez sur  pour valider la sélection.

Exercez une pression longue sur  pour revenir à l'écran d'accueil.

---

## Programmation par liaison radio

Votre fournisseur peut procéder à la mise à jour à distance, soit sans connexion physique, de votre radio à l'aide de la programmation par liaison radio (OTAP). En outre, certains paramètres peuvent également être configurés par programmation OTAP.

Lorsque votre radio passe en mode OTAP, la LED verte clignote.

Lorsque votre radio reçoit des volumes de données élevés :

- L'icône **Données en volume élevé** s'affiche à l'écran.
- Le canal devient occupé.
- Le fait d'appuyer sur le bouton **PTT** déclenche une tonalité négative.

Une fois la programmation OTAP terminée, selon le type de configuration :

- Une tonalité est émise. L'écran affiche Actualisation Redémarrage. Votre radio redémarre en se mettant hors tension puis de nouveau sous tension.
- Vous avez le choix entre Redémarrer et Retarder. Si vous sélectionnez Retarder, votre radio revient à l'écran précédent. L'écran affiche l'icône **Retardateur OTAP** jusqu'au redémarrage.

Lorsque votre radio se met sous tension après le redémarrage automatique :

- En cas de réussite, l'écran affiche MàJ logiciel terminée.
- En cas d'échec, l'écran affiche MàJ logiciel échouée.

Consultez la section [Vérification des informations de mise à jour logicielle à la page 242](#) pour en savoir plus sur la version logicielle mise à jour.

## Sélection des modes de connexion aux appareils tiers

Suivez la procédure ci-après pour sélectionner l'un des modes de connexion aux appareils tiers suivants :

- Motorola Solutions

- PC et audio
- Accessoire de données
- Télémétrie
- Générique

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Type de câble. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder au mode de connexion souhaité. Appuyez sur  pour valider la sélection.
- L'écran affiche le mode de connexion sélectionné.  
L'écran revient au menu précédent.
- 

## Indicateur de puissance du signal reçu (RSSI)

Cette fonction permet d'afficher les valeurs de l'indicateur de puissance du signal reçu (RSSI).

L'icône **RSSI** s'affiche dans le coin supérieur droit de l'écran. Consultez la section [Icônes de l'écran](#) pour en savoir plus sur l'icône **RSSI**.

## Affichage des valeurs RSSI

Suivez la procédure ci-après pour afficher des valeurs RSSI sur votre radio.

Lorsque vous vous trouvez sur l'écran d'accueil :

- 1 Appuyez trois fois sur  et appuyez immédiatement sur  à trois reprises, le tout en moins de 5 secondes.
- L'écran affiche les valeurs RSSI actuelles.
- 
- 2 Exercez une pression longue sur  pour revenir à l'écran d'accueil.
- 

## Configuration par face avant

Vous pouvez personnaliser certains paramètres à l'aide de la Configuration par face avant (FPC, Front Panel Configuration) afin d'améliorer l'utilisation de votre radio selon vos préférences.

## Activation du mode Configuration par face avant

Suivez la procédure ci-après pour activer le mode Programmation par face avant sur votre radio.

exercez une pression longue sur le bouton  pour revenir à l'écran d'accueil quand vous le voulez.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Program. Radio. Appuyez sur  pour valider la sélection.

## Modification des paramètres du mode FPP

Vous pouvez utiliser les boutons suivants pour parcourir les paramètres.

-  ,  : pour faire défiler les options, augmenter/diminuer les valeurs, naviguer verticalement.
-  : pour sélectionner l'option ou ouvrir un sous-menu.
-  : une pression courte pour revenir au menu précédent ou fermer l'écran de sélection. Exercez une pression longue pour revenir à l'écran d'accueil.

## Fonctionnement Wi-Fi

Wi-Fi® est une marque déposée de Wi-Fi Alliance®.

### REMARQUE:

Cette fonctionnalité s'applique uniquement aux modèles DM4601e .

Cette fonction vous permet de configurer un réseau Wi-Fi et de vous y connecter. Wi-Fi prend en charge les mises à jour du micrologiciel (firmware), du codeplug et des

ressources de la radio, par exemple les packs linguistiques et annonces vocales.

## Activation/désactivation du Wi-Fi

Le bouton programmé **Wi-Fi activé ou désactivé** est attribué par votre revendeur ou administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Selon les besoins de l'utilisateur, il est possible de personnaliser les annonces vocales pour le bouton **Wi-Fi activé ou désactivé** programmé via CPS. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Vous pouvez activer ou désactiver le Wi-Fi en procédant de l'une des manières suivantes.

- Appuyez sur le bouton programmé **Wi-Fi activé ou désactivé**. Une annonce vocale indique l'activation du Wi-Fi ou la désactivation du Wi-Fi.
- Accédez à cette fonction par le biais du menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

- c. Appuyez sur  ou  pour accéder à Wi-Fi On et appuyez sur  pour sélectionner.

Appuyez sur  pour activer le Wi-Fi. L'écran affiche ✓ en regard de l'option Activé.

Appuyez sur  pour désactiver le Wi-Fi. ✓ ne s'affiche plus en regard d'Activé.

## Connexion à un point d'accès réseau

Lorsque vous activez le Wi-Fi, la radio effectue un balayage et se connecte à un point d'accès réseau.

Vous pouvez également vous connecter à un point d'accès réseau à l'aide du menu.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à un point d'accès réseau et appuyez sur  pour sélectionner.

5 Appuyez sur  ou  pour accéder à Connecter et appuyez sur  pour sélectionner.

6 Saisissez le mot de passe et appuyez sur  .

Une fois la connexion établie, un avis s'affiche sur la radio et le point d'accès réseau est enregistré dans la liste des profils.

## Vérification de l'état de la connexion Wi-Fi

Pour vérifier l'état de la connexion Wi-Fi, procédez comme suit.

Appuyez sur le bouton programmé **Requête d'état Wi-Fi** pour être informé de l'état de la connexion par le biais d'une annonce vocale. Une annonce vocale indique Wi-Fi désactivé, Wi-Fi activé sans connexion ou Wi-Fi activé avec connexion.

- L'écran affiche **Wi-Fi Off** lorsque le Wi-Fi est désactivé.
- L'écran affiche **Wi-Fi On, Connecté** lorsque la radio est connectée à un réseau.
- L'écran affiche **Wi-Fi On, Déconnecté** lorsque le Wi-Fi est activé et que la radio n'est connectée à aucun réseau.

Selon les besoins de l'utilisateur, il est possible de personnaliser les annonces vocales des résultats des requêtes d'état Wi-Fi via CPS. Consultez votre fournisseur ou administrateur système pour en savoir plus.

### REMARQUE:

Le bouton préprogrammé **Requête d'état Wi-Fi** est attribué par votre revendeur ou administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

## Actualisation de la liste de réseaux

Suivez la procédure ci-après pour actualiser la liste des réseaux.

- Effectuez les opérations suivantes pour actualiser la liste des réseaux par le biais du menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.
  - c. Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.  
Lorsque vous entrez dans le menu Réseaux, la radio actualise automatiquement la liste des réseaux.
- Si vous êtes déjà dans le menu Réseaux, effectuez l'action suivante pour actualiser la liste des réseaux.

Appuyez sur  ou  pour accéder à Actualiser et appuyez sur  pour sélectionner.  
La radio s'actualise et affiche la liste des réseaux la plus récente.

## Ajout d'un réseau

Si un réseau préféré n'apparaît pas dans la liste des réseaux disponibles, procédez de la manière suivante pour ajouter un réseau.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à Ajouter réseau et appuyez sur  pour sélectionner.

---

5 Saisissez l'identifiant SSID (Service Set Identifier) et appuyez sur .

---

6 Appuyez sur  ou  pour accéder à Ouvrir et appuyez sur  pour sélectionner.

---

7 Saisissez le mot de passe et appuyez sur .

La radio affiche un mini-avis positif pour indiquer que le réseau est correctement enregistré.

---

## Affichage des détails des points d'accès réseau

Procédez comme suit pour afficher les détails des points d'accès réseau.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à un point d'accès réseau et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à Voir détails et appuyez sur  pour sélectionner.

Pour un point d'accès réseau connecté, les informations suivantes s'affichent : identifiant SSID (Service Set Identifier), mode de sécurité, adresse MAC (Media Access Control) et adresse IP (Internet Protocol).

Pour un point d'accès réseau non connecté, les informations suivantes s'affichent : identifiant SSID (Service Set Identifier) et mode de sécurité.

## Suppression de points d'accès réseau

Effectuez les opérations suivantes pour supprimer les points d'accès réseau de la liste des profils.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder au point d'accès réseau sélectionné et appuyez sur  pour sélectionner.

- 5 Appuyez sur  ou  pour accéder à Supprimer et appuyez sur  pour sélectionner.

- 6 Appuyez sur  ou  pour accéder à Oui et appuyez sur  pour sélectionner.

La radio affiche un mini-avis positif pour indiquer que le point d'accès réseau sélectionné est bien supprimé.

## Fonctions utilitaires

Ce chapitre présente les fonctions de configuration/infos disponibles sur votre radio.

### Niveaux de puissance

Vous pouvez personnaliser le niveau de puissance en sélectionnant l'option Haute ou Basse pour chaque canal.

#### Élevé

Ce niveau prend en charge la communication avec des radios qui peuvent être considérablement éloignées de vous.

## Faible

Ce niveau prend en charge la communication avec des radios qui se trouvent à proximité.

### REMARQUE:

Cette fonction n'est pas applicable dans les canaux de fréquences publiques qui sont dans une même fréquence.

## Définition des niveaux de puissance

Suivez la procédure ci-après pour définir les niveaux de puissance utilisés sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Niveau de puissance** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config./Infos**. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option **Puissance**. Appuyez sur  pour valider la sélection.

- 5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option **Haute**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard de l'option **Haute**.
- Appuyez sur  ou sur  pour accéder à l'option **Basse**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard de l'option **Basse**.

- 6 Exercez une pression longue sur  pour revenir à l'écran d'accueil.
- 

## Activation/désactivation des tonalités/avertissements

Vous pouvez activer et désactiver toutes les tonalités et alertes radio, le cas échéant, sauf pour les tonalités d'alerte d'urgence . Suivez la procédure ci-après pour activer ou désactiver les tonalités et avertissements sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
- Appuyez sur le bouton **Tnlés/Avert.** préprogrammé. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option **Tnlés/Avert.** Appuyez sur  pour valider la sélection.
- 

- 5 Appuyez sur  ou sur  pour accéder à l'option **Toutes Tnlés.** Appuyez sur  pour valider la sélection.
- 

- 6 Appuyez sur  pour activer ou désactiver toutes les tonalités et avertissements. L'écran affiche l'un des résultats suivants :
- Si cette option est activée, le symbole  apparaît en regard de la mention **Activé**.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention **Activé**.
-

## Activation/désactivation des tonalités du clavier

Suivez la procédure ci-après pour activer ou désactiver les tonalités du clavier de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Tnlités/Avert. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Tnlités clavier. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  pour activer ou désactiver les tonalités du clavier. L'écran affiche l'un des résultats suivants :
  - Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Réglage de l'écart du volume des tonalités/avertissements

Cette fonction permet de régler le volume des tonalités ou avertissements à un niveau supérieur ou inférieur à celui du volume de la voix. Suivez la procédure ci-après pour

définir l'écart du volume des tonalités et avertissements sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Tnlés/Avert. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'option Écart Vol.. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  ou sur  pour accéder à l'écart du volume souhaité.  
Une tonalité est émise pour chaque écart du volume correspondant.

---

- 7 Effectuez l'une des opérations suivantes :
  - Appuyez sur  pour valider la sélection. Le niveau d'écart de volume est enregistré.
  - Appuyez sur  pour quitter. Les modifications sont supprimées.

## Activation/désactivation de la tonalité d'autorisation de parler

Suivez la procédure ci-après pour activer ou désactiver la tonalité d'autorisation de parler sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Tntés/Avert. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Tnté Autoris. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  pour activer ou désactiver la tonalité Parler autorisé.  
L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation de la tonalité de mise sous tension

Suivez la procédure ci-après pour activer ou désactiver la tonalité de mise sous tension sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option **Tnlités/Avert.** Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option **Mise sous tension.** Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  pour activer ou désactiver la tonalité de mise sous tension. L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention **Activé.**
- Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention **Activé.**

---

## Définition des tonalités d'avertissement des messages texte

Vous pouvez personnaliser la tonalité d'alerte des messages texte sur les modes Momentané ou Répétitif

pour chaque entrée du répertoire. Suivez la procédure ci-après pour définir les tonalités d'avertissement de message texte utilisées sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option **Avert. Message.** Appuyez sur  pour valider la sélection.

---

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Momentané. Appuyez sur  pour valider la sélection. L'écran affiche le symbole ✓ en regard de l'option Momentané.
- Appuyez sur  ou sur  pour accéder à l'option Répétitive. Appuyez sur  pour valider la sélection. L'écran affiche le symbole ✓ en regard de l'option Répétitive.

## Changement de mode d'affichage

Vous pouvez alterner entre les modes d'affichage Jour et Nuit de la radio, si nécessaire. Cette fonction modifie la gamme des couleurs affichées. Suivez la procédure ci-après pour choisir le mode d'affichage de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmé **Mode Affichage**. Ignorez les étapes suivantes.

- Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'option Écran. Appuyez sur  pour valider la sélection. L'écran affiche Mode Jour et Mode Nuit.

- 5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection. L'écran affiche le symbole ✓ en regard du paramètre sélectionné.

## Réglage de la luminosité de l'écran

Suivez la procédure ci-après pour ajuster la luminosité de l'écran de votre radio. La luminosité ne peut pas être ajustée lorsque la fonctionnalité Luminosité auto est activée.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Luminosité** programmé. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Luminosité. Appuyez sur  pour valider la sélection.  
L'écran affiche la barre de progression.

- 5 Appuyez sur  ou sur  pour réduire ou augmenter la luminosité de l'écran à votre convenance. Appuyez sur  pour valider la sélection.  
La valeur du paramètre peut être comprise entre 1 et 8.

## Activation/désactivation de l'avertisseur/des phares

Votre radio peut vous avertir de la réception d'un appel entrant avec la fonction d'avertisseurs/de phares. Si vous activez cette fonction, un appel entrant déclenchera l'avertisseur sonore et les phares de votre véhicule. Cette fonction doit être installée par votre fournisseur à l'aide du connecteur d'accessoire arrière de votre radio. Suivez la

procédure ci-après pour activer ou désactiver sur votre radio l'ensemble des avertisseurs et des phares.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Avertisseur/phares** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Avert./phares. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver les avertisseurs et les phares. L'écran affiche l'un des résultats suivants :
  - Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation des indicateurs LED

Suivez la procédure ci-après pour activer ou désactiver les indicateurs LED de votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Voyant LED. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  pour activer ou désactiver l'indicateur LED.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.
- 

## Activation/désactivation du système Audio Public

Suivez la procédure ci-après pour activer ou désactiver le système de sonorisation publique (SONO) interne de votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Audio Public** préprogrammé. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.
- 

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Adresse publique. Appuyez sur  pour valider la sélection.

5 Appuyez sur  pour activer ou désactiver le système Audio Public.

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation du système Audio Public externe

Suivez la procédure ci-après pour activer ou désactiver le système Audio Public (AP) externe de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Audio Public externe** préprogrammé. Ignorez les étapes suivantes.

- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Adresse publique externe. Appuyez sur  pour valider la sélection.

5 Appuyez sur  pour activer ou désactiver le système Audio Public externe.

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation de l'écran Introduction

Si nécessaire, vous pouvez activer et désactiver l'écran Introduction, en procédant comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Afficheur. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option Écran intro. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur la touche  pour activer ou désactiver l'écran Introduction.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Définition des langues

Suivez la procédure ci-après pour définir les langues utilisées sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Langues. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à la langue souhaitée. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole  en regard de la langue sélectionnée.

## Identification du type de câble

Procédez comme suit pour choisir le type de câble connecté à votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Type de câble. Appuyez sur  pour valider la sélection.

---

- 5 Le type de câble actuel est indiqué par un symbole .

## Activation/désactivation de l'annonce vocale

Cette fonction permet à la radio d'énoncer par audio la zone ou le canal attribué par l'utilisateur, ou le bouton programmable sur lequel il vient d'appuyer. Cela s'avère particulièrement utile lorsque l'utilisateur a du mal à lire l'écran de la radio.

L'utilisateur peut personnaliser l'indication audio en fonction de ses besoins. Suivez la procédure ci-après pour activer ou désactiver l'annonce vocale sur votre radio.

## Activation/désactivation de la carte d'option

Les fonctions de la carte d'option peuvent être activées pour chaque canal et attribuées à des boutons programmables. Chaque canal peut prendre en charge jusqu'à 6 fonctions de carte d'option. Suivez la procédure ci-après pour activer ou désactiver la carte d'option de votre radio.

Appuyez sur le bouton **Carte d'option** préprogrammé.

---

## Synthèse vocale

La fonctionnalité de synthèse vocale peut uniquement être activée par votre revendeur ou votre administrateur système. Si la synthèse vocale est activée, la fonctionnalité d'annonce vocale est automatiquement désactivée. Si l'annonce vocale est activée, la fonctionnalité de synthèse vocale est automatiquement désactivée.

Cette fonction permet à la radio d'énoncer distinctement les fonctionnalités suivantes :

- Canal actuel
- Zone actuelle
- Fonctionnalité de bouton programmé activée ou désactivée
- Contenu des messages texte reçus
- Contenu des tickets de tâches reçus

L'indication audio peut être personnalisée par l'utilisateur. Cette fonctionnalité s'avère particulièrement utile lorsque l'utilisateur ne peut pas lire aisément l'écran de la radio.

## Définition de la synthèse vocale

Suivez la procédure ci-après pour définir la fonctionnalité de synthèse vocale.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Annonce vocale. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'une des fonctionnalités suivantes. Appuyez sur  pour valider la sélection.

Les fonctionnalités disponibles sont les suivantes :

- Toutes
  - Messages
  - Tickets de tâches
  - Channel
  - Zone
  - Bouton program
- ✓ s'affiche en regard du paramètre sélectionné.

## Réglage du minuteur du menu

Vous pouvez régler la durée d'ouverture du menu sur la radio avant son retour automatique à l'écran d'accueil.

Suivez la procédure ci-après pour régler le minuteur du menu.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Écran. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Délai Menu. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.

## Activation/désactivation de la commande de gain automatique (CGA) du microphone numérique

La commande de gain automatique (CGA) du microphone numérique contrôle automatiquement le gain du microphone de la radio lors de la l'émission sur un système numérique.

Cette fonction réduit les sons trop forts et augmente les sons faibles selon une valeur prédéfinie de façon à offrir un niveau de son constant. Suivez la procédure ci-après pour activer ou désactiver sur votre radio la commande de gain automatique (CGA) du microphone numérique.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Mic CGA-D. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  pour activer ou désactiver CGA micro numérique.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.
- 

## Activation/désactivation de l'audio intelligent.

Votre radio ajuste automatiquement le volume audio en fonction du bruit de l'environnement, incluant les sources de bruit mobiles et fixes. Cette fonction est uniquement dédiée à la réception et ne concerne pas l'émission audio. Suivez la procédure ci-après pour activer ou désactiver l'audio intelligent sur votre radio.

### REMARQUE:

Cette fonctionnalité n'est pas disponible pendant une session Bluetooth.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Audio intelligent** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.
- 

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Audio intelligent. Appuyez sur  pour valider la sélection.

---

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activé. Appuyez sur  pour valider la sélection. L'écran affiche ✓ en regard de l'option Activé.
  - Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour valider la sélection. L'écran affiche ✓ en regard de l'option Désactivé.
- 

## Activation/Désactivation de la fonction du filtre anti-effet Larsen

Cette fonction permet de réduire l'effet Larsen dans les appels reçus.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Réduction bruit et appuyez sur  pour sélectionner.

Vous pouvez également utiliser les boutons  ou  pour modifier l'option sélectionnée.

---

5 Sélectionnez l'une des options suivantes :

- Appuyez sur  pour activer le supprimeur de réaction acoustique. L'écran affiche ✓ en regard de l'option Activé.
- Appuyez sur  pour désactiver le supprimeur de réaction acoustique. ✓ ne s'affiche plus en regard d'Activé.

## Activation/désactivation de l'amélioration des trilles

Vous pouvez activer cette fonction lorsque vous parlez dans une langue dont de nombreux mots contiennent des trilles alvéolaires (« R » roulé). Suivez la procédure ci-après pour activer ou désactiver la fonction d'amélioration des sons vibrants sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Amélioration trille** préprogrammé. Ignorez les étapes ci-dessous.
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option Amél. trille. Appuyez sur  pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activé. Appuyez sur  pour valider la sélection. L'écran affiche ✓ en regard de l'option Activé.
- Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour

valider la sélection. L'écran affiche ✓ en regard de l'option Désactivé.

## Ambiance audio

Vous pouvez personnaliser l'ambiance audio de la radio en fonction de votre environnement.

### Par défaut

Réglage par défaut.

### Fort

Ce paramètre active la suppression du bruit et augmente le volume du haut-parleur pour une utilisation dans des environnements bruyants.

### Groupe de travail

Ce paramètre active le supprimeur de réaction acoustique (AF) et désactive la commande automatique de gain (CAG) pour une utilisation à proximité d'un autre groupe de radios.

## Réglage de l'ambiance audio

Suivez la procédure ci-après pour définir l'ambiance audio de la radio en fonction de votre environnement.

- 1 Appuyez sur  pour accéder au menu.

---

  - 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

  - 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

  - 4 Appuyez sur  ou sur  pour accéder à l'option Ambiance audio. Appuyez sur  pour valider la sélection.

---

  - 5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.
- Les paramètres sont les suivants :
- Choisissez Par défaut pour les paramètres usine par défaut.

- Choisissez **Fort** pour augmenter le volume du haut-parleur lors d'une utilisation dans des environnements bruyants.
- Choisissez **Groupe de travail** pour réduire la réaction acoustique lors d'une utilisation avec un groupe de radios à proximité.

L'écran affiche le symbole  en regard du paramètre sélectionné.

## Profils audio

Vous pouvez personnaliser les profils audio de votre radio en fonction de vos préférences.

### Par défaut

Réglage par défaut.

### Niveau 1, Niveau 2 et Niveau 3

Ces paramètres sont conçus pour compenser la perte auditive due au bruit intervenant généralement chez les adultes de 40, 50, 60 ans ou plus.

### Augmentation des aigus, Augmentation des fréquences moyennes et Augmentation des basses.

Ces paramètres offrent respectivement un son plus métallique, plus nasal ou plus grave.

## Définition des profils audio

Suivez la procédure ci-après pour définir des profils audio sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option **Profils audio**. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.

Les paramètres sont les suivants :

- Choisissez **Par défaut** pour désactiver le profil audio sélectionné précédemment et revenir aux paramètres usine par défaut.
- Sélectionnez **Niveau 1**, **Niveau 2** ou **Niveau 3** pour des profils audio conçus pour compenser la perte auditive due au bruit, qui est typique pour les adultes de plus de 40 ans.
- Choisissez **Augmentation des aigus**, **Augmentation des fréquences moyennes** ou **Augmentation des basses** pour des profils audio adaptés à votre préférence pour un son plus métallique, nasal ou grave.

L'écran affiche le symbole  en regard du paramètre sélectionné.

## Activation/désactivation du système mondial de navigation par satellite

Le système GNSS (Global Navigation Satellite System, système mondial de navigation par satellite) est un système de navigation par satellite qui détermine la position exacte d'une radio. Le GNSS inclut le GPS (Global Positioning System) et le GLONASS (Global Navigation Satellite System).

### REMARQUE:

Certains modèles de radio peuvent proposer les fonctions GPS et GLONASS. La constellation GNSS est configurée à l'aide du CPS. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

- 1 Effectuez l'une des opérations suivantes pour activer ou désactiver la fonction GNSS sur votre radio.
  - Appuyez sur le bouton **GNSS** programmé.
  - Appuyez sur  pour accéder au menu. Passez à l'étape suivante.

2 Appuyez sur  ou sur  pour accéder à l'option `Config/Infos`. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option `Config. radio`. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option `GNSS`. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  pour activer ou désactiver la fonction `GNSS`.

Si cette option est activée, le symbole  apparaît en regard de la mention `Activé`.

Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention `Activé`.

---

## Informations générales de la radio

Votre radio contient des informations sur les différents paramètres généraux.

Les informations générales de votre radio sont les suivantes :

- ID et alias de la radio.
- Versions du micrologiciel (firmware) et du codeplug.
- Mise à jour logicielle.
- Informations GNSS
- Informations du site.

### REMARQUE:

Appuyez sur  pour revenir à l'écran précédent.

Exercez une pression longue sur  pour revenir à l'écran d'accueil. La radio ferme l'écran actif dès que le compteur d'inactivité expire.

## Vérification de l'alias et de l'ID de la radio

Suivez la procédure ci-après pour afficher l'alias et l'ID de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **ID et alias radio** programmé. Ignorez les étapes suivantes. Une tonalité d'indication positive est émise.  
Vous pouvez appuyer sur le bouton programmé **ID et alias radio** pour revenir à l'écran précédent.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option **Infos radio**. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'option **Mon ID**. Appuyez sur  pour valider la sélection.  
La première ligne affiche l'alias de la radio. La deuxième ligne affiche l'ID de la radio.

## Vérification des versions de micrologiciel (firmware) et de codeplug

Suivez la procédure ci-après pour afficher les versions de micrologiciel (firmware) et de codeplug de votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.
- 3 Appuyez sur  ou sur  pour accéder à l'option **Infos radio**. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Versions. Appuyez sur  pour valider la sélection.
- L'écran affiche les versions actuelles du micrologiciel (firmware) et du codeplug.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option MàJ logiciel. Appuyez sur  pour valider la sélection.
- L'écran affiche la date et l'heure de la dernière mise à jour logicielle.
- 

## Vérification des informations de mise à jour logicielle

Cette fonctionnalité affiche la date et l'heure de la dernière mise à jour logicielle effectuée au moyen de la programmation par liaison radio (OTAP) ou par Wi-Fi. Suivez la procédure ci-après pour consulter les informations de mise à jour logicielle de votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.
- 

Le menu de mise à jour logicielle est uniquement disponible après au moins une session OTAP ou Wi-Fi réussie. Reportez-vous à la section [Programmation par liaison radio à la page 521](#) pour plus d'informations.

## Vérification des informations GNSS

Cette fonction affiche les informations GNSS de votre radio, et inclut les valeurs suivantes :

- Latitude
- Longitude
- Altitude

- Direction
- Vitesse
- Coefficient d'affaiblissement de la précision sur la composante horizontale du positionnement (HDOP)
- Satellites
- Version

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Infos GNSS. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'élément demandé. Appuyez sur  pour valider la sélection. L'écran affiche les informations GNSS demandées.

---

## Affichage des informations sur le site

Suivez la procédure ci-après pour afficher le nom du site sur lequel se trouve actuellement votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Info site. Appuyez sur  pour valider la sélection.
- 

L'écran affiche le nom de site actuel.

## Opérations Connect Plus

Connect Plus est une solution à ressources partagées complète basée sur la technologie DMR. Connect Plus s'appuie sur un canal de contrôle dédié pour traiter les demandes et les affectations de canaux. Les fonctionnalités à disposition des utilisateurs radio dans ce système sont abordées dans ce chapitre.

## Commandes supplémentaires de la radio en mode Connect Plus

Ce chapitre décrit les commandes supplémentaires de la radio à disposition de l'utilisateur par le biais de moyens préprogrammés, tels que des boutons programmables et des fonctions attribuables.

### Bouton PTT (Push-to-Talk)

Le bouton **PTT** est situé sur le côté de la radio et a deux fonctions principales :

- Pendant un appel, le bouton **PTT** permet d'émettre vers d'autres radios ciblées par cet appel.

Maintenez le bouton **PTT** enfoncé pour parler. Relâchez le bouton **PTT** pour écouter.

Appuyez sur le bouton **PTT** pour ouvrir le microphone.

- Lorsqu'il n'y a pas d'appel en cours, le bouton **PTT** sert à effectuer un nouvel appel (voir [Passage d'un appel radio à la page 263](#)).

Si la tonalité Autorisation est activée, attendez la fin de la brève tonalité d'alerte avant de parler.

## boutons programmables

Votre fournisseur peut programmer les boutons programmables comme raccourcis pour accéder directement aux fonctions radio, en fonction de la durée de la pression que vous exercez sur un bouton :

### Pression courte

Vous appuyez sur le bouton et relâchez rapidement.

### Exercez une pression longue

Vous appuyez sur le bouton et vous le maintenez enfoncé pendant la durée programmée.

## REMARQUE:

la durée programmée d'une pression s'applique à tous les paramètres et toutes les fonctions radio/utilitaires attribuables. Reportez-vous à [Gestion de l'urgence à la page 301](#) pour plus d'informations sur la durée programmée du bouton *Urgence*.

## Fonctions radio attribuables

### Commutateur® audio Bluetooth

Bascule le routage audio entre le haut-parleur interne de la radio et l'accessoire externe Bluetooth.

### Connexion Bluetooth

Lance une recherche et établit la connexion Bluetooth.

### Déconnexion Bluetooth

Met fin à toutes les connexions Bluetooth établies entre votre radio et les terminaux compatibles Bluetooth.

### Détection Bluetooth

Active le mode découverte Bluetooth pour votre radio.

### Busy Queue Cancellation

Quitte le mode d'occupation lorsqu'un appel non urgent est émis dans la file d'attente. Les appels d'urgence ne peuvent pas être annulés une fois placés dans la file d'attente.

### Journal d'appels

Sélectionne le journal d'appels.

### Annnonce de canal

Émet les messages d'annonce vocale de zone et de canal pour le canal courant.

### Contacts

Fournit un accès direct au répertoire.

### Emergency On/Off

Selon la programmation, cette fonction lance ou annule une alarme ou un appel d'urgence.

### Avertisseurs/phares

Active ou désactive les avertisseurs et les phares.

### Localisation en intérieur

Active ou désactive la localisation en intérieur.

### Audio intelligent

Active ou désactive l'audio intelligent.

### Numérotation manuelle

Selon la programmation, lance un appel téléphonique ou individuel en composant l'ID ou le numéro de téléphone d'un terminal radio.

**Accès par numérotation rapide**

Lance directement un appel individuel prédéfini, une alerte d'appel prédéfinie, un message texte rapide prédéfini ou un canal désigné.

**Confidentialité**

Active ou désactive la fonction de cryptage.

**Vérifier radio**

Détermine si une radio est active dans un système.

**Radio Enable**

Permet l'activation à distance d'une radio cible.

**Radio Disable**

Permet la désactivation à distance d'une radio cible.

**Écoute ambiance**

Active le microphone d'une radio sans activer d'indicateur.

**Réinitialiser le canal d'accueil**

Définit un nouveau canal d'accueil.

**Type de sonnerie d'alerte**

Fournit un accès direct au menu Type avertissement sonnerie.

**Roam Request**

Demande à rechercher un site différent.

**Balayage**

Active ou désactive le balayage.

**Éteindre le rappel de canal d'accueil**

Désactive le rappel de canal d'accueil.

**Site Lock On/Off**

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

**Text Message**

Sélectionne le menu de message texte.

**Act./désact. Annonce vocale**

Active ou désactive l'annonce vocale.

**Wi-Fi**

Active et désactive le Wi-Fi.

**Zone**

Permet d'effectuer une sélection dans une liste de zones.

## Fonctions utilitaires ou paramètres attribuables

### Suppresseur de réaction acoustique

Active ou désactive la fonction du filtre anti-effet Larsen.

### Toutes tonalités/avertissements

Active ou désactive l'ensemble des tonalités et avertissements.

### Luminosité rétro-éclairage

Règle le niveau de luminosité.

### Canal Haut/Bas

Selon la programmation, le canal précédent ou suivant est sélectionné.

### Mode Affichage

Active ou désactive le mode Jour/Nuit de l'écran.

### GNSS (Global Navigation Satellite System, système mondial de navigation par satellite)

Active ou désactive le système de navigation par satellites.

### Niveau de puissance

Passé du niveau d'émission élevé à faible et vice-versa.

### Non affecté

Indique que la fonction du bouton n'a pas encore été affectée.

## Identification des indicateurs d'état en mode Connect Plus

### Icônes de l'écran

Les icônes suivantes s'affichent sur l'écran de la radio.

	<b>Indication de la puissance du signal reçu (RSSI)</b>  Le nombre de barres affichées représente l'intensité du signal de réception. Quatre barres indiquent le niveau maximal du signal. Cette icône est uniquement affichée pendant la réception.
	<b>Bluetooth Non connecté</b>

Tableau (suite)...

	La fonction Bluetooth est activée, mais aucun appareil Bluetooth distant n'est connecté.
	<b>Bluetooth connecté</b> La fonction Bluetooth est activée. L'icône reste affichée lorsqu'un appareil Bluetooth distant est connecté.
	<b>Données en volume élevé</b> La radio reçoit des données en volume élevé et le canal est occupé.
	<b>Localisation en intérieur disponible</b> <sup>3</sup> L'état Localisation en intérieur est activé et disponible.
	<b>Localisation en intérieur non disponible</b> <sup>3</sup> L'état Localisation en intérieur est activé, mais il n'est pas disponible en raison de la désactivation du Bluetooth ou d'un

Tableau (suite)...

	balayage de balises suspendu par Bluetooth.
	<b>Mode Muet</b> Le mode Muet est activé et le haut-parleur est désactivé.
	<b>Notification</b> La liste des notifications comporte des éléments à consulter.
	<b>Niveau de puissance</b> La radio est réglée sur un niveau de puissance Bas ou la radio est réglée sur un niveau de puissance Haut.
	<b>Désactivation des tonalités</b> Les tonalités sont désactivées.
	<b>Carte d'options</b> La carte d'option est activée.

Tableau (suite)...

<sup>3</sup> Applicable uniquement aux modèles dotés de la dernière version du logiciel et du matériel.

	<b>Carte d'option non fonctionnelle</b> La carte d'option est désactivée.
	<b>GNSS disponible</b> La fonction GPS/GNSS est activée. L'icône reste allumée lorsqu'une position peut être déterminée.
	<b>GNSS non disponible/hors de portée</b> La fonction GPS/GNSS est activée, mais votre radio ne reçoit pas de données du satellite.
	<b>Balayage</b> La fonction de balayage est activée.
	<b>Urgence</b> La radio est en mode Urgence.
	<b>Crypté</b> La fonction de cryptage est activée.
	<b>Non crypté</b> La fonction de cryptage est désactivée.

Tableau (suite)...

	<b>Itinérance de site</b> La fonction d'itinérance de site est activée.
	<b>Contact</b> Le contact radio est disponible.
	<b>Journal d'appels</b> Journal des appels radio.
	<b>Message</b> Message entrant.
	<b>Sonnerie seulement</b> Le mode Sonnerie est activé.
	<b>Silencieux</b> Le mode Silencieux est activé.
	<b>Vibreur</b> Le mode Vibreur est activé.
	<b>Vibreur et sonnerie</b> Le mode Vibreur et sonnerie est activé.

Tableau (suite)...

	<b>Wi-Fi excellent<sup>4</sup></b> Le signal Wi-Fi est excellent.
	<b>Wi-Fi bon<sup>4</sup></b> Le signal Wi-Fi est bon.
	<b>Wi-Fi moyen<sup>4</sup></b> Le signal Wi-Fi est moyen.
	<b>Wi-Fi faible<sup>4</sup></b> Le signal Wi-Fi est faible.
	<b>Wi-Fi non disponible<sup>4</sup></b> Le signal Wi-Fi est indisponible.

## Icônes d'appel

Les icônes suivantes s'affichent sur l'écran de votre radio pendant un appel. Elles peuvent aussi être affichées dans la liste des Contacts pour indiquer le type d'ID.

	<b>Appel individuel</b> Signale un appel individuel en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de terminal radio.
	<b>Appel de groupe/Appel général de site</b> Signale un appel de groupe ou un appel général de site en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.
	<b>Appel téléphonique en appel individuel</b> Indique un appel téléphonique en appel individuel en cours.
	<b>Appel PC Bluetooth</b> Indique un appel PC Bluetooth en cours.

Tableau (suite)...

<sup>4</sup> Applicable uniquement aux modèles DM4601e

Dans la liste des Contacts, il indique l'alias (nom) ou l'ID (numéro) d'un appel PC Bluetooth.

### Dispatch Call

Le type de contact Appel de répartition permet d'envoyer un message texte à un PC répartiteur via un serveur de messagerie texte tiers.

## Icônes avancées du menu

Les icônes suivantes sont affichées à côté des éléments du menu qui permettent de choisir entre deux options ou pour signaler l'existence d'un sous-menu contenant deux options.

### Case à cocher (non cochée)

Indique que l'option correspondante n'est pas activée.

### Case à cocher (cochée)

Tableau (suite)...

Indique que l'option correspondante est activée.

### Case noire

Indique le sous-menu de l'option sélectionnée dans le menu.

## Icônes Messages envoyés

Les icônes suivantes apparaissent dans l'angle supérieur droit de l'écran de la radio dans le dossier des éléments envoyés.

### Envoi réussi

Le message texte a été correctement envoyé.

OU

Tableau (suite)...

**En cours**

OU

- Le message texte envoyé à un ID ou un alias de groupe est en attente de transmission.
- Le message texte envoyé à un ID ou un alias de terminal radio est en attente de transmission, qui sera suivie par l'attente de l'accusé de réception.

**Message individuel ou de groupe lu**

Le message texte a été lu.

OU

OU

**Message individuel ou de groupe non lu**

Le message texte n'a pas été lu.

**Échec envoi**

Le message texte n'a pas été envoyé.

## Icônes des appareils Bluetooth

Les icônes suivantes sont également affichées en regard des éléments de la liste des appareils Bluetooth disponibles pour indiquer leur type.

**Dispositif de données Bluetooth**

Un dispositif de transmission de données par connexion Bluetooth, par exemple un scanner.

**Dispositif audio Bluetooth**

Un dispositif d'écoute par connexion Bluetooth, par exemple une oreillette.

**Dispositif PTT Bluetooth**

Un dispositif PTT compatible Bluetooth, par exemple un POD.

## Indicateur LED

Le voyant LED signale le statut opérationnel de votre radio.

<b>Rouge clignotant</b>	La batterie de la radio est faible, la radio reçoit une transmission d'urgence, ou a échoué à l'autotest au moment de son allumage ou, si elle est configurée avec le système de transpondeur à portée automatique (Auto-Range Transponder System, ARTS), est hors de portée. Le mode Muet est activé.
<b>Rouge clignotant rapidement</b>	La radio reçoit un fichier de firmware de la carte d'option, un fichier de fréquence réseau, un fichier de codeplug de la carte d'option par liaison radio, ou est en cours de mise à niveau vers un nouveau fichier de firmware de la carte d'option.
<b>Clignotant vert et jaune</b>	La radio est en cours de réception d'un Avert. d'appel, a reçu un message texte, ou le balayage est activé et reçoit de l'activité.

Tableau (suite)...

<b>Jaune fixe</b>	La radio est en mode Détection Bluetooth.
<b>Jaune clignotant double</b>	La radio recherche activement un nouveau site.
<b>Jaune clignotant</b>	La radio reçoit un Avertissement d'appel ou le balayage est activé et en veille (le silencieux n'est pas désactivé).
<b>Vert fixe</b>	La radio est en cours d'allumage ou de transmission.
<b>Vert clignotant</b>	La radio se met sous tension, reçoit un appel ou des données.
<b>Vert clignotant double</b>	La radio reçoit un appel protégé par la fonction Secret.

## Tonalités d'indication

Les tonalités émises sur le haut-parleur de la radio sont décrites ci-après.

Tonalité aiguë

Tonalité grave

Les tonalités d'indication fournissent des indications sonores relatives à l'état de la radio après le déclenchement d'une tâche par l'utilisateur.

	Tonalité d'indication positive
	Tonalité d'indication négative

## Tonalités d'alerte

Les tonalités d'alerte vous informent de l'état de la radio ou vous avertissent en cas de réception de données sur celle-ci.

<b>Tonalité continue</b> 	Son uniforme. Émise en continu jusqu'à la fin de l'état.
<b>Tonalité périodique</b> 	Tonalité périodique selon la durée programmée. La tonalité est répétée à intervalles réguliers.

Tableau (suite)...

### Tonalité répétitive

Un seul son est répété jusqu'à ce que l'utilisateur le désactive.

### Tonalité momentanée

Un son est émis une fois pendant une courte période programmée.

## Basculement entre les modes Connect Plus et non Connect Plus

Pour passer à un mode non Connect Plus, vous devez changer de zone (si votre revendeur ou administrateur système a programmé la radio en conséquence). Contactez votre revendeur ou administrateur système pour déterminer si la radio a été programmée avec des zones non Connect Plus et identifier les fonctions disponibles lors du fonctionnement dans des zones non Connect Plus.

## Passage/réception d'appels en mode Connect Plus

Cette section explique le fonctionnement général de votre radio ainsi que les fonctions d'appel qu'elle propose.

### Sélection d'un site

Un site offre une couverture pour une zone spécifique. Un site Connect Plus dispose d'un contrôleur et de 15 relais maximum. Dans un réseau multi-sites, la radio Connect Plus recherche automatiquement un nouveau site lorsque le niveau du signal émanant du site en cours tombe en dessous d'un seuil acceptable.

### Demande d'itinérance

Une demande d'itinérance demande à la radio de rechercher un site différent, même si le signal du site en cours est acceptable.

Si aucun site n'est disponible :

- La radio affiche Recherche et Alias du canal sélectionné, puis continue à chercher dans la liste de sites.

- La radio revient au site précédent s'il est toujours disponible.

#### REMARQUE:

cette fonction est programmée par votre revendeur.

Appuyez sur le bouton **Demande d'itinérance** programmé.

Un signal sonore est émis pour indiquer que la radio a changé de site. L'écran affiche ID du site <numéro du site>.

---

### Site Lock On/Off

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

Appuyez sur le bouton programmé **Verrouillage site**.

Si la fonction **Verrou. site** est activée :

- Un signal sonore positif indique que la radio est verrouillée sur le site en cours.

- L'écran indique que le site est verrouillé.

Si la fonction **Verrou. site** est désactivée :

- Un signal sonore négatif indique que la radio n'est pas verrouillée.
- L'écran indique que le site est déverrouillé.

Chaque position attribuable du bouton peut être utilisée pour activer l'un des types d'appels vocaux suivants :

- Group Call
- Multi-group Call
- Site All Call
- Appel individuel

- 1 Pour accéder à la fonctionnalité Zone, procédez comme suit :

## Restriction sur un site

L'administrateur système de la radio Connect Plus peut définir les sites du réseau que la radio est autorisée à utiliser. Il n'est pas nécessaire de reprogrammer la radio pour modifier la liste des sites autorisés et non autorisés. Si la radio tente de s'enregistrer sur un site non autorisé, un message bref s'affiche indiquant : Site <numéro donné> non autorisé. Dans ce cas, la radio recherche un autre site du réseau.

## Sélection d'une zone

La radio peut être programmée avec 16 zones Connect Plus maximum et chacune de ces zones contient jusqu'à 16 positions attribuables sur le bouton sélecteur de canal.

Commandes radio	Étapes
<b>Bouton Sélection de zone préprogrammé</b>	Appuyez sur le bouton <b>Sélection de zone</b> préprogrammé.
<b>Menu de la radio</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option Zone et</p>

Commandes radio	Étapes
	appuyez sur  pour sélectionner.

La zone actuelle est affichée et indiquée par un .

- Sélectionnez la zone souhaitée.

Commandes de la radio	Étapes
 ou 	Appuyez sur  ou  et faites défiler jusqu'à la zone souhaitée.

- Appuyez sur  pour valider la sélection.  
L'écran affiche <Zone> sélectionnée pendant quelques instants puis revient à l'écran de la zone sélectionnée.

## Utilisation de plusieurs réseaux

Si la radio est programmée pour utiliser plusieurs réseaux Connect Plus, vous pouvez sélectionner un autre réseau en basculant vers la zone Connect Plus affectée au réseau approprié. Ces affectations de réseaux à des zones sont définies par votre revendeur en programmant la radio.

## Sélection d'un type d'appel

Utilisez le bouton de sélection de canal pour sélectionner un type d'appel. Il peut s'agir d'un appel de groupe, d'un appel multi-groupe, d'un appel général ou d'un appel individuel, en fonction de la programmation de la radio. Si vous placez le bouton de sélection de canal sur une autre position (affectée à un type de canal), la radio s'enregistre de nouveau sur le site Connect Plus. La radio s'enregistre avec l'ID de groupe d'enregistrement programmé pour la nouvelle position du sélecteur de canal le nouveau type d'appel.

Si vous sélectionnez une position à laquelle aucun type d'appel n'a été attribué, votre radio émet une tonalité continue et l'écran affiche Non programmé. Comme la radio ne fonctionne pas lorsque vous sélectionnez un canal

non programmé, utilisez le sélecteur de canal pour sélectionner un canal programmé.

Une fois que la zone requise est affichée (si plusieurs zones sont définies sur la radio), tournez le sélecteur de canal programmé pour sélectionner le type d'appel.

## Réception et prise d'un appel radio

Lorsque le canal, l'ID du terminal ou le type d'appel est affiché, vous pouvez recevoir des appels et y répondre.

La LED s'allume en vert fixe lorsque la radio émet et clignote en vert lorsque la radio reçoit.

### REMARQUE:

La LED s'allume en vert fixe lorsque la radio émet, clignote double en vert lorsque la radio reçoit un appel confidentiel. Pour décrypter un appel protégé par la fonction Secret, votre radio doit avoir la même clé privée OU la même valeur de clé et le même ID de clé (programmés par votre fournisseur) que la radio émettrice (la radio qui vous appelle).

Reportez-vous à la section [Confidentialité à la page 322](#) pour plus d'informations.

## Réception et réponse à un appel de groupe

Pour recevoir un appel provenant d'un groupe d'utilisateurs, votre radio doit être configurée comme membre de ce groupe.

Lorsque vous recevez un appel de groupe (alors que l'écran d'accueil est affiché), la LED clignote en vert. L'icône Appel de groupe s'affiche dans le coin supérieur droit. La première ligne affiche l'alias de l'appelant. La deuxième ligne affiche l'alias de l'appel de groupe. Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

- 1 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

La LED s'allume en vert fixe.

- 2 Attendez la fin d'une des tonalités Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

- 3 Relâchez le bouton **PTT** pour écouter.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue.

### REMARQUE:

Pour obtenir des informations sur comment lancer un appel de groupe, reportez-vous à [Passage d'un appel de groupe à la page 264](#).

## Réception et réponse à un appel individuel

Un appel individuel est un appel provenant d'une radio individuelle communiquant avec une autre radio individuelle.

Lorsque vous recevez un appel individuel, la LED clignote en vert. La première ligne de l'écran affiche l'alias ou l'ID de terminal ainsi que l'icône RSSI. La seconde ligne affiche Appel indiv. et l'icône correspondante. Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur de la radio.

- 1 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

- 2 Appuyez sur le bouton **PTT** pour répondre à l'appel. La LED s'allume en vert fixe.

- 3 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

- 4 Relâchez le bouton **PTT** pour écouter.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue.

L'écran affiche Appel terminé.

Pour plus d'informations sur la procédure d'appel individuel, reportez-vous à [Passage d'un appel individuel à la page 264](#).

## Réception d'un appel général de site

Un appel général de site est un appel lancé par une radio individuelle à toutes les radios de ce site. Il permet de diffuser des annonces importantes, dont les utilisateurs doivent tenir compte.

Lorsque vous recevez un appel général de site, une tonalité retentit et la LED clignote en vert.

L'icône Appel de groupe s'affiche dans le coin supérieur droit. La première ligne affiche l'alias de l'appelant. La deuxième ligne affiche Appel général de site. Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

Lorsque l'appel général de site se termine, la radio affiche de nouveau le menu précédent avant de recevoir l'appel. Il n'y a aucun délai d'attente prédéterminé avant la fin d'un appel général de site.

Vous ne pouvez pas répondre à un appel général de site.

#### REMARQUE:

Pour plus d'informations sur la réalisation d'un appel général de site, voir [Passer un appel général de site à la page 265](#).

si vous changez de canal pendant la réception d'un appel général de site, il sera interrompu. Vous ne pouvez utiliser aucun des boutons préprogrammés avant la fin d'un appel général de site.

## Réception d'un appel téléphonique individuel entrant

Lorsque vous recevez un appel téléphonique individuel entrant, l'icône d'appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de texte affiche Appel téléphonique.

1 Maintenez le bouton **PTT** enfoncé pour répondre et parler. Relâchez le bouton **PTT** pour écouter.

2 Exercez une pression prolongée  pour mettre fin à l'appel.

La première ligne de l'écran affiche Fin. La deuxième ligne de l'écran affiche Ressource non disponible... L'écran de l'appel téléphonique réapparaît.

L'écran affiche Appel tél. Terminé.

## Surnumérotation en mémoire tampon lors d'un appel téléphonique individuel entrant

Pendant l'appel, l'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de l'écran affiche Appel téléphonique.

- 1 Utilisez le clavier pour saisir les chiffres et appuyez sur le bouton  .

Appuyez sur  puis sur  dans les 2 secondes pour insérer une pause. Le P remplace \* et # à l'écran.

L'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de l'écran affiche les chiffres saisis.

- 
- 2 Exercez une pression prolongée sur  pour mettre fin à l'appel.  
La première ligne de l'écran affiche Fin. La deuxième ligne de l'écran affiche Ressource non disponible.... L'écran de l'appel téléphonique réapparaît.

L'écran affiche Appel tél. Terminé.

## Surnumérotation en direct lors d'un appel téléphonique individuel entrant

Pendant l'appel, l'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de l'écran affiche Appel téléphonique.

- 1 Appuyez sur le bouton **PTT** et utilisez le clavier pour saisir les chiffres.

L'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de texte de l'écran affiche les chiffres de numérotation en direct.

- 
- 2 Exercez une pression prolongée sur  pour mettre fin à l'appel.  
La première ligne de l'écran affiche Fin. La deuxième ligne de l'écran affiche Ressource non disponible.... L'écran de l'appel téléphonique réapparaît.

L'écran affiche Appel tél. Terminé.

## Réception d'un appel téléphonique entrant de groupe de parole

Lorsque vous recevez un appel téléphonique entrant de groupe de parole, l'icône d'appel de groupe s'affiche dans le coin supérieur droit. La première ligne de texte affiche `Call11 (Appel1)`.

Appuyez sur le bouton **PTT** pour parler et relâchez-le pour écouter.

## Appel téléphonique multi-groupe entrant

Lorsque vous recevez un appel téléphonique multi-groupe entrant, l'icône d'appel de groupe s'affiche dans le coin supérieur droit. La première ligne de texte affiche `Multigroup Call (Appel multi-groupe)`. Le silencieux de la radio est désactivé et l'appel multi groupe entrant se fait entendre dans le haut-parleur de la radio.

[Envoyer un commentaire](#)

## Passage d'un appel radio

Après avoir sélectionné un canal, vous pouvez sélectionner l'alias ou ID d'un terminal ou d'un groupe avec les boutons suivants :

- Le bouton du sélecteur de canal.
- Un bouton programmé **Accès direct** : la fonction Accès direct vous permet de passer très facilement un appel individuel vers un ID spécifique. Cette fonction peut être attribuée à une pression brève ou prolongée d'un bouton programmable. Vous pouvez attribuer un seul ID à un bouton **Accès par numérotation rapide**. Plusieurs boutons **Accès par numérotation rapide** peuvent être programmés sur votre radio.
- La liste des contacts (voir [Paramètres des contacts à la page 288](#)).

### REMARQUE:

la fonction Secret doit être activée sur le canal pour que votre radio puisse émettre en utilisant le cryptage. Seules les radios cibles ayant la même valeur de clé et le même ID de clé que votre radio peuvent déchiffrer la transmission.

Reportez-vous à la section [Confidentialité à la page 322](#) pour plus d'informations.

## Passage d'un appel avec le bouton du sélecteur de canal

Cette fonctionnalité permet aux utilisateurs radio de passer différents types d'appel : appel de groupe, appel individuel, appel général de site, appel multi-groupe.

## Passage d'un appel de groupe

Pour lancer un appel destiné à un groupe d'utilisateurs, votre radio doit être configurée comme membre de ce groupe.

- 1 Sélectionnez le canal correspondant à l'ID ou à l'alias de groupe actif. Voir [Sélection d'un type d'appel à la page 258](#).
- 2 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.
- 3 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED s'affiche en vert fixe. L'icône Appel de groupe est affichée dans le coin supérieur droit. La première ligne de texte affiche l'alias de l'appel de groupe.

- 4 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

- 5 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio cible répond, la LED clignote en vert, le silencieux de la radio est désactivé et la réponse se fait entendre dans le haut-parleur de la radio. L'icône Appel de groupe, l'alias ou ID de groupe, et l'alias ou ID de la radio émettrice s'affichent.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue. La radio revient à l'écran où vous étiez avant de lancer l'appel.

## Passage d'un appel individuel

Vous pouvez recevoir et/ou répondre à un appel individuel provenant d'un poste autorisé, mais votre radio doit être programmée pour que vous puissiez lancer un Appel individuel.

Une tonalité d'indication négative est émise si vous effectuez un appel individuel via la touche **Accès par**

**numérotation rapide**, ou le sélecteur de canal, si cette fonction n'est pas activée.

- 1 Sélectionnez l'une des options suivantes :
    - Sélectionnez le canal correspondant à l'ID ou à l'alias de terminal actif. Voir [Sélection d'un type d'appel à la page 258](#).
    - Appuyez sur le bouton **Accès direct** préprogrammé.
- 

- 2 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.
- 

- 3 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED s'allume en vert fixe. L'icône d'appel individuel s'affiche dans le coin supérieur droit. La première ligne affiche l'alias du terminal cible. La deuxième ligne de texte affiche l'état de l'appel.
- 

- 4 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.
- 

- 5 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio cible répond, la LED clignote en vert.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue. Vous entendez une courte tonalité. L'écran affiche Appel terminé.

---

Votre radio peut être programmée pour vérifier la présence de la radio cible avant d'établir un appel individuel. Si la radio cible n'est pas disponible, vous entendez une courte tonalité et un mini-avis négatif est affiché.

## Passer un appel général de site

Cette fonction permet de lancer un appel vers tous les utilisateurs du site qui ne sont pas engagés dans un autre appel. Vous devez programmer votre radio pour pouvoir utiliser cette fonction.

Les utilisateurs du canal/site ne peuvent pas répondre à un appel général de site.

- 1 Sélectionnez le canal avec l'alias du groupe d'appel général de site. Voir [Sélection d'un type d'appel à la page 258](#).
-

2 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

---

3 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED s'allume en vert fixe. L'icône Appel de groupe est affichée dans le coin supérieur droit. La première ligne affiche Appel général de site.

---

4 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

---

### Passage d'un appel multi-groupe

Cette fonction permet de lancer un appel vers tous les utilisateurs de plusieurs groupes. Vous devez programmer votre radio pour pouvoir utiliser cette fonction.

#### REMARQUE:

les utilisateurs des groupes ne peuvent pas répondre à un appel multi-groupe.

1 Tournez le sélecteur de canal pour sélectionner l'alias ou l'ID multi-groupe.

---

2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED s'allume en vert fixe. L'écran affiche l'alias ou l'ID du multi-groupe.

Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

---

### Lancement d'un appel individuel avec un bouton d'accès direct

#### REMARQUE:

vous devez appuyer sur les boutons programmables depuis l'écran d'accueil.

La fonction Appel en accès direct permet de lancer aisément un appel individuel vers un alias ou un ID d'appel individuel. Cette fonction peut être attribuée à une pression brève ou prolongée d'un bouton programmable.

Vous ne pouvez affecter qu'UN SEUL alias ou ID à un bouton d'accès direct. Plusieurs boutons peuvent être

programmés pour utiliser les boutons Appel en accès direct via une seule touche.

1 Appuyer sur le bouton d'**accès direct** programmé pour lancer un appel individuel vers l'alias ou l'ID d'appel individuel.

---

2 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

---

3 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED s'allume en vert fixe.

L'écran affiche l'alias ou l'ID d'appel individuel.

---

4 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

---

5 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio cible répond, la LED clignote en vert.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue.

---

## Passage d'un appel téléphonique à l'aide du bouton programmable Numérotation manuelle

Cette fonction permet aux utilisateurs radio de passer des appels individuels à l'aide du bouton programmable de numérotation manuelle.

### Passage d'un appel individuel

1 Appuyez sur le bouton **Num. manuelle** programmé pour accéder à l'écran Numérotation manuelle.

L'écran affiche Numéro : .

---

2 Utilisez le clavier pour saisir un alias/ID privé de terminal.

---

3 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

---

4 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED s'allume en vert fixe. L'icône Appel individuel est affichée dans le coin supérieur droit. La première

ligne affiche l'alias du terminal radio. La deuxième ligne affiche l'état de l'appel.

---

- 5 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.
- 

- 6 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio cible répond, la LED clignote en vert.

En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue. Vous entendez une courte tonalité. L'écran affiche Appel terminé.

---

## Passage d'un appel téléphonique sortant à l'aide du bouton programmable Numérotation manuelle

- 1 Appuyez sur le bouton **Num. manuelle** programmé pour accéder à l'écran Numérotation manuelle.

L'écran indique Numéro:.

---

- 2 Utilisez le clavier pour saisir un numéro de téléphone, puis appuyez sur  pour appeler le numéro saisi.

Appuyez sur  pour supprimer tous les caractères indésirables. Appuyez sur  puis sur  dans les 2 secondes pour insérer une pause. Le P remplace \* et # à l'écran.

En cas de réussite, la première ligne de l'écran affiche Appel téléphonique. La deuxième ligne de l'écran indique le numéro de téléphone composé.

Si un numéro de téléphone non valide est sélectionné, l'écran affiche un mini-avis négatif, Appel tél. échoué, Ressource non disponible ou Invalid Permissions (Autorisations non valides).

Si vous appuyez sur  avec aucun numéro de téléphone saisi, la radio émet une tonalité d'indication positive puis une tonalité négative. Les informations affichées à l'écran restent inchangées.

---

- 3 Exercez une pression prolongée sur  pour mettre fin à l'appel.

La première ligne de l'écran affiche Fin. La deuxième ligne de l'écran affiche Ressource non disponible....

L'écran affiche Appel tél. Terminé.

## Passage d'un appel téléphonique individuel sortant via le menu du téléphone

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou  pour accéder à l'option Tél et appuyez sur  pour sélectionner.
- 

- 3 Appuyez sur  pour sélectionner Num. manuelle.

La première ligne de l'écran affiche Numéro et la deuxième ligne affiche un curseur clignotant.

- 4 Utilisez le clavier pour saisir un numéro de téléphone, puis appuyez sur  pour appeler le numéro saisi.

Appuyez sur  pour supprimer tous les caractères indésirables. Appuyez sur  puis sur  dans les 2 secondes pour insérer une pause. Le P remplace \* et # à l'écran.

En cas de réussite, la première ligne de l'écran affiche Appel tél. La deuxième ligne de l'écran indique le numéro de téléphone composé.

Si un numéro de téléphone non valide est sélectionné, l'écran affiche un mini-avis négatif, Appel tél. échoué, Ressource non disponible ou Autorisations non valides.

Si vous appuyez sur  avec aucun numéro de téléphone saisi, la radio émet une tonalité

d'indication positive puis une tonalité négative. Les informations affichées à l'écran restent inchangées.

- 5 Exercez une pression longue sur  pour mettre fin à l'appel.

La première ligne de l'écran affiche Fin. La deuxième ligne de l'écran affiche Appel tél...

L'écran affiche Appel tél. Terminé.

## Passage d'un appel téléphonique individuel sortant depuis la liste de contacts

### REMARQUE:

Si la fonction de numérotation manuelle téléphonique est désactivée dans MOTOTRBO Connect Plus Option Board CPS, l'option No. téléphone n'apparaît **pas** dans le menu.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou  pour accéder à l'option Contacts et appuyez sur  pour sélectionner.

- 3 Appuyez sur  ou  pour accéder à l'option Num. manuelle et appuyez sur  pour sélectionner.

- 4 Appuyez sur  ou  pour accéder à l'option No. téléphone et appuyez sur  pour sélectionner.

La première ligne de l'écran affiche Numéro et la deuxième ligne affiche un curseur clignotant.

- 5 Utilisez le clavier pour saisir un numéro de téléphone, puis appuyez sur  pour appeler le numéro saisi.
- Si vous appuyez sur le bouton **PTT**, l'écran affiche un mini-avis négatif, Appuyez OK pour envoyer et l'écran précédent s'affiche.

Appuyez sur  pour supprimer tous les caractères indésirables. Appuyez sur  puis sur  dans les 2 secondes pour insérer une pause. Le P remplace \* et # à l'écran.

En cas de réussite, la première ligne de l'écran affiche Appel tél. La deuxième ligne de l'écran indique le numéro de téléphone composé.

Si vous appuyez sur  avec aucun numéro de téléphone saisi, la radio émet une tonalité d'indication positive puis une tonalité négative. Les informations affichées à l'écran restent inchangées.

---

6 Exercez une pression longue sur  pour mettre fin à l'appel.

La première ligne de l'écran affiche Fin. La deuxième ligne de l'écran affiche Appel tél...

L'écran affiche Appel tél. Terminé.

---

## Attente d'attribution de canal lors d'un appel téléphonique individuel sortant

Lorsque vous effectuez un appel téléphonique individuel, la première ligne de l'écran indique Appel téléphonique. La deuxième ligne de l'écran indique le numéro de téléphone composé.

Lorsque l'appel est connecté, l'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de l'écran affiche le numéro de téléphone.

En cas d'échec, l'écran affiche un mini-avis négatif, Appel tél. échoué), Ressource non disponible ou Invalid Permissions (Autorisations non valides).

Exercez une pression prolongée sur  pour mettre fin à l'appel.

L'écran de l'appel téléphonique réapparaît.

---

## Surnumérotation en mémoire tampon lors d'un appel téléphonique individuel sortant connecté

Pendant l'appel, l'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de l'écran affiche le numéro de téléphone.

- 1 Utilisez le clavier pour saisir les chiffres.

Appuyez sur  pour supprimer tous les caractères indésirables. Appuyez sur  puis sur  dans les 2 secondes pour insérer une pause. Le P remplace \* et # à l'écran.

La première ligne de texte de l'écran affiche Chiffres suppl., la deuxième ligne de texte de l'écran affiche les chiffres supplémentaires saisis.

- 2 Appuyez sur le bouton  .

Si vous appuyez sur le bouton **PTT**, l'écran affiche un mini-avis négatif, Appuyez OK pour envoyer et revient à l'écran précédent.

L'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de texte de l'écran affiche le numéro de téléphone suivi des chiffres de surnumérotation.

- 3 Sélectionnez l'une des options suivantes :

- Appuyez sur  pour revenir à l'écran de l'appel téléphonique.
- Exercez une pression prolongée sur  pour mettre fin à l'appel.

## Surnumérotation en direct lors d'un appel téléphonique individuel sortant connecté

Pendant l'appel, l'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de l'écran affiche le numéro de téléphone.

- 1 Appuyez sur le bouton **PTT** et utilisez le clavier pour saisir les chiffres.

L'icône Appel téléphonique en appel individuel s'affiche dans le coin supérieur droit. La première ligne de texte de l'écran affiche le numéro de téléphone suivi des chiffres de surnumérotation.

- 
- 2 Exercez une pression prolongée sur  pour mettre fin à l'appel.

La première ligne de l'écran affiche `Fin`. La deuxième ligne de l'écran affiche `Ressource non disponible...`

L'écran affiche `Appel tél. Terminé`.

---

## Fonctionnalités avancées en mode Connect Plus

Ce chapitre indique comment utiliser les fonctions disponibles sur votre radio.

### Rappel de canal d'accueil

Cette fonctionnalité fournit un rappel lorsque la radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps.

Si cette fonction est activée via le CPS, l'annonce et la tonalité de rappel de canal d'accueil retentissent, la première ligne de l'écran indique `Non` et la seconde ligne affiche `Canal d'accueil` régulièrement lorsque la radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps.

Vous pouvez répondre au rappel en effectuant l'une des actions suivantes :

- Retournez au canal d'accueil.
- Désactivez temporairement le rappel en utilisant le bouton programmable.

- Définissez un nouveau canal d'accueil via le bouton programmable.

### Reprise d'appel automatique

Le mode reprise d'appel automatique est une fonction du système qui permet de continuer à émettre et à recevoir des appels, hors urgence, vers le contact de groupe sélectionné, en cas d'apparition de certains types de dysfonctionnements du système Connect Plus.

Lorsque l'un de ces dysfonctionnements se produit, la radio tente de changer de site Connect Plus. Ce processus de recherche permet à votre radio de trouver un site Connect Plus fonctionnel, ou bien un « canal en reprise d'appel » (si la reprise d'appel automatique est activée sur votre radio). Un canal en reprise d'appel est un relais faisant partie en principe d'un site Connect Plus fonctionnel, mais qui n'est actuellement pas en mesure de communiquer avec son contrôleur de sites ou le réseau Connect Plus. En mode reprise d'appel, le relais agit en tant que relais numérique unique. Le mode reprise d'appel automatique prend en charge uniquement les appels de groupe hors urgence. Aucun autre type d'appel n'est pris en charge en mode reprise d'appel.

### Indications du mode reprise d'appel automatique

Lorsque votre radio utilise un canal de reprise d'appel, vous entendez la tonalité de la reprise d'appel par intermittence environ toutes les 15 secondes (sauf lors de la transmission). L'écran affiche périodiquement un bref message « Canal de reprise d'appel ». Votre radio n'autorise les appels PTT que sur le contact de groupe sélectionné (appel de groupe, appel multi-groupe ou appel général de site). Vous ne pouvez lancer aucun autre type d'appel.

## Passage/réception d'appels en mode reprise d'appel

### REMARQUE:

les appels sont audibles uniquement par les radios qui surveillent le même canal en reprise d'appel et qui sont sélectionnées sur le même groupe. Les appels ne sont pas envoyés vers les autres sites et relais.

Les appels vocaux d'urgence ou les avertissements d'urgence ne sont pas disponibles en mode reprise d'appel. Si vous appuyez sur le bouton Urgence en mode reprise d'appel, la radio émet une tonalité qui indique qu'il s'agit d'un bouton non valide. Les radios dotées d'un écran affichent également le message « Fonction non disponible ».

Les appels individuels (de radio à radio) et téléphoniques ne sont pas disponibles en mode reprise d'appel. Si vous appelez un contact privé, le signal sonore de refus est généré. Dans ce cas, vous devez sélectionner un contact de groupe. Parmi les autres appels non pris en charge, citons l'écoute ambiance, l'Avertissement d'appel, la vérification de la radio, l'activation de radio, la désactivation de radio, les messages texte, les

misés à jour d'emplacement et les appels de données par paquet.

La fonctionnalité ETCA (Enhanced Traffic Channel Access) n'est pas prise en charge en mode reprise d'appel automatique. Si au moins deux utilisateurs de radio appuient sur le bouton **PTT** simultanément (ou presque au même moment), il est possible que les deux radios transmettent jusqu'à ce qu'ils relâchent le bouton **PTT**. Dans ce cas, il est possible qu'aucune des transmissions ne soient comprises par les radios réceptrices.

La procédure qui permet de lancer des appels en mode reprise d'appel est similaire au fonctionnement normal. Il suffit de sélectionner le contact de groupe approprié (en utilisant la méthode normale de sélection de canal de la radio), puis d'appuyer sur le bouton **PTT** pour lancer l'appel. Il se peut que le canal soit déjà utilisé par un autre groupe. Dans ce cas, un signal sonore d'occupation est émis et l'écran indique Canal occupé. Vous pouvez sélectionner des contacts Groupe, Multi-groupe ou Appel général de site en utilisant la méthode normale de sélection de canal de la radio. Lorsque la radio fonctionne sur le canal en reprise d'appel, le multi-groupe fonctionne comme les autres groupes. L'appel est émis uniquement sur les radios sélectionnées dans le même multi-groupe.

## Retour au fonctionnement normal

Si le site revient au fonctionnement à ressources partagées normal lorsque vous êtes à portée de votre relais en reprise d'appel, votre radio quitte automatiquement le mode reprise d'appel. Un « bip » d'enregistrement est émis lorsque la radio s'enregistre avec succès. Si vous êtes à portée d'un site fonctionnel (c'est-à-dire qu'il n'est pas en mode reprise d'appel), appuyez sur le bouton Demande d'itinérance (s'il a été programmé sur votre radio) pour forcer votre radio à rechercher un site disponible et à s'y enregistrer. Si aucun autre site n'est disponible, votre radio repasse en mode reprise d'appel automatique une fois sa recherche terminée. Si vous sortez de la zone de couverture du relais en reprise d'appel, la radio passe en mode de recherche (l'écran indique Recherche en cours).

## Radio Check

Lorsqu'elle est activée, cette fonction vous permet de déterminer si une radio est active sur le système sans avoir à déranger son utilisateur. La radio cible ne fournit aucune indication sonore ou visuelle de cette opération.

Cette fonction est uniquement applicable à un alias ou ID de terminal radio.

## Envoi d'une vérification de la radio

- 1 Accédez à la fonction de vérification de la radio

Commandes de la radio	Étapes
<b>Bouton programmé de vérification de la radio</b>	<ol style="list-style-type: none"> <li>Appuyez sur le bouton <b>Vérif. radio</b> programmé.</li> <li>Appuyez sur  ou  pour accéder à l'alias ou l'ID de terminal souhaité et appuyez sur  pour sélectionner.</li> </ol>
<b>Menu</b>	<ol style="list-style-type: none"> <li>Appuyez sur  pour accéder au menu.</li> <li>Appuyez sur  ou  pour accéder à l'option <b>Contacts</b> et appuyez sur  pour sélectionner.</li> </ol>

Commandes de la radio	Étapes
	<p><b>c</b> Appuyez sur  ou  pour accéder à l'alias ou l'ID de terminal souhaité et appuyez sur  pour sélectionner.</p> <p><b>d</b> Appuyez sur  ou  pour accéder à l'option Vérif. radio et appuyez sur  pour sélectionner.</p>

L'écran affiche l'alias cible pour indiquer que la requête est en cours. La LED s'allume en vert fixe.

## 2 Attendez l'accusé de réception.

Si la radio cible est active dans le système, une tonalité est émise et l'écran affiche brièvement Radio cible Disponible.

Si la radio cible n'est pas active dans le système, une tonalité est émise et l'écran affiche brièvement Radio cible Non disponible.

La radio revient à l'écran de l'alias ou de l'ID de terminal si elle est lancée via le menu.

La radio revient à l'écran d'accueil si elle est lancée via le bouton programmable.

## Remote Monitor

La fonction d'écoute à distance vous permet d'activer le microphone d'une radio cible (alias ou ID de terminal uniquement). La LED verte clignote une fois sur le terminal cible. Vous pouvez ainsi écouter à distance ce qui se passe dans l'environnement de la radio cible.

Vous devez programmer votre radio pour pouvoir utiliser cette fonction.

## Déclenchement de l'Écoute ambiance

### REMARQUE:

l'Écoute ambiance s'arrête automatiquement après une durée programmée ou lorsqu'une tentative de lancement de transmission, de changement de canal ou d'éteindre la radio a lieu.

- 1 Accédez à la fonction Écoute ambiance.

Commandes de la radio	Étapes
<b>Bouton programmé Écoute ambiance</b>	<p><b>a</b> Appuyez sur le bouton préprogrammé <b>Écoute ambiance</b>.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'alias ou l'ID de terminal souhaité et appuyez sur  pour sélectionner.</p>
<b>Menu</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p>

Commandes de la radio	Étapes
	<p><b>b</b> Appuyez sur  ou  pour accéder à l'option <b>Contacts</b> et appuyez sur  pour sélectionner.</p> <p><b>c</b> Appuyez sur  ou  pour accéder à l'alias ou l'ID de terminal souhaité et appuyez sur  pour sélectionner.</p> <p><b>d</b> Appuyez sur  ou  pour accéder à l'option <b>Num. manuelle</b> et appuyez sur  pour sélectionner.</p> <p><b>e</b> Appuyez sur  ou  pour accéder à l'option</p>

Commandes de la radio	Étapes
	Écoute amb. et appuyez sur  pour sélectionner.

La première ligne affiche Écoute amb. La deuxième ligne de texte affiche l'alias cible pour indiquer que la demande est en cours. La LED clignote en vert.

## 2 Attendez l'accusé de réception.

En cas de réussite, une tonalité d'indication positive est émise et l'écran affiche Écoute amb. réussi. La radio commence à recevoir les signaux audio de la radio écoutée pendant une durée programmée et affiche la mention Écoute amb., suivie de l'alias cible. Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

En cas d'échec, une tonalité d'indication négative est émise et l'écran affiche le message Écoute amb. échoué.

## Scan

Cette fonction permet à votre radio de surveiller et de se joindre aux appels des groupes définis dans une liste de balayage préprogrammée. Lorsque le balayage est activé, l'icône de balayage apparaît dans la barre d'état et la LED clignote en jaune lorsqu'il est inactif.

## Lancement et arrêt du balayage

### REMARQUE:

cette procédure a pour effet d'activer ou de désactiver la fonction balayage pour toutes les zones Connect Plus ayant le même ID de réseau que la zone actuellement sélectionnée. Il est important de noter que, même si la fonction de balayage est activée en suivant cette procédure, le balayage peut encore être désactivé pour certains ou l'intégralité des groupes présents dans votre liste de balayage. Reportez-vous à la section [Modification de la liste de balayage à la page 282](#) pour plus d'informations.

Vous pouvez démarrer et arrêter le balayage en appuyant sur le bouton programmé **Balayage OU** en suivant la procédure décrite ci-après.

- 1 Appuyez sur  pour accéder au menu.

---

  - 2 Appuyez sur  ou  pour accéder à l'option Balayage et appuyez sur  pour sélectionner.

---

  - 3 Appuyez sur  ou  pour accéder à l'option Allumer ou Éteindre et appuyez sur  pour sélectionner.
    - L'écran affiche Balayage act si le balayage est activé.
    - Le menu Balayage affiche Éteindre si le balayage est activé.
    - L'écran affiche Balayage désac lorsque le balayage est désactivé.
    - Le menu Balayage affiche Allumer si le balayage est désactivé.
- 

## Réponse à une transmission pendant un balayage

Pendant le balayage, votre radio s'arrête sur un groupe où elle détecte de l'activité. La radio écoute continuellement les membres de la liste de balayage lorsque l'appareil est inactif sur le canal de contrôle.

- 1 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

---

  - 2 Appuyez sur le bouton **PTT** pendant le délai de maintien.  
La LED s'allume en vert fixe.

---

  - 3 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

---

  - 4 Relâchez le bouton **PTT** pour écouter.  
Si vous ne répondez pas pendant le délai de maintien, le balayage se poursuit sur d'autres groupes.
-

## Balayage configurable par l'utilisateur

Si le menu Modifier la liste est activé, un utilisateur peut ajouter ou supprimer les membres du balayage à partir du menu Ajouter un membre. Un membre de la liste de balayage doit être un contact de groupe normal (c'est-à-dire, ni multi-groupe, ni appel général de site/appel général sur le réseau) qui est actuellement affecté à une position du sélecteur de canaux dans une zone Connect Plus avec le même ID de réseau que la zone actuellement sélectionnée. L'alias groupe de parole ne doit pas non plus correspondre à un groupe de parole déjà inclus dans la liste de balayage de zone.

Vous pouvez activer ou désactiver le balayage depuis le menu ou en appuyant sur un bouton programmé **d'activation/désactivation du balayage**.

Cette fonction est disponible uniquement lorsque la radio ne participe pas à un appel. Si vous écoutez un appel, la radio ne peut pas rechercher d'autres appels de groupe et elle ne sait donc pas qu'ils sont en cours. À la fin de l'appel, la radio revient dans la plage de temps du canal de contrôle et elle peut rechercher les autres groupes qui se trouvent dans la liste de balayage.

## Activation/désactivation du balayage

### REMARQUE:

cette procédure a pour effet d'activer ou de désactiver la fonction de balayage pour toutes les zones ayant le même ID de réseau que la zone actuellement sélectionnée. Il est important de noter que, même si la fonction de balayage est activée en suivant cette procédure, le balayage peut encore être désactivé pour certains ou l'intégralité des groupes présents dans votre liste de balayage. Reportez-vous à la section suivante pour plus d'informations.

Si le balayage est activé, l'icône correspondante s'affiche. Si le balayage est activé et que vous ne participez pas à un appel, la LED clignote en vert et jaune.

La procédure d'activation ou de désactivation du balayage dépend de la programmation de la radio. Si un bouton de la radio est programmé pour activer/désactiver le balayage, utilisez ce bouton pour activer ou désactiver la fonction. Si la radio est programmée pour activer ou désactiver le balayage via le menu, suivez la procédure ci-dessous.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Balayage et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Allumer ou Éteindre et appuyez sur  pour sélectionner.

- L'écran affiche momentanément Scan act si le balayage est désactivé.
  - L'écran affiche momentanément Scan désac si le balayage est activé.
- 

## Modification de la liste de balayage

### REMARQUE:

si l'entrée de la liste de balayage correspond au groupe actuellement sélectionné, la radio écoute l'activité du groupe, que l'entrée de la liste soit cochée ou non. Lorsque la radio ne traite pas d'appel, elle écoute l'activité de son groupe sélectionné, du multi-groupe, de l'appel général de site et de son groupe d'annulation d'urgence par défaut (si un tel groupe a été configuré). Cette opération ne peut pas être désactivée. Si l'option Balayage est activée, la radio écouterait également s'il y a une activité sur les membres de la liste de balayage de zone activés.

La liste de balayage détermine les groupes qui peuvent être balayés. Elle est créée lors de la programmation de la radio. Si votre radio a été programmée pour pouvoir modifier la liste de balayage, vous pouvez :

- activer/désactiver le balayage pour des groupes individuels de la liste.
- ajouter et supprimer les membres du balayage à partir du menu Ajouter un membre. Reportez-vous au [Ajout ou suppression d'un groupe depuis le menu Aj. membre à la page 284.](#)

**REMARQUE:**

Un membre de la liste de balayage doit être un contact de groupe normal (ni multi-groupe, ni appel général de site/appel général sur le réseau) qui est actuellement affecté à une position du sélecteur de canaux dans une zone Connect Plus avec le même ID de réseau que la zone actuellement sélectionnée.

L'alias du groupe de parole ne doit pas correspondre à un groupe de parole déjà inclus dans la liste de balayage de la zone actuelle.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Voir/Modif liste et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder au nom du groupe souhaité.  
La présence d'une coche précédant le nom du groupe indique que le balayage est activé pour ce groupe.

L'absence de coche précédant le nom du groupe indique que le balayage est désactivé pour ce groupe.

---

- 4  pour sélectionner le groupe souhaité.  
L'écran affiche Allumer si le balayage est désactivé pour le groupe.  
L'écran affiche Eteindre si le balayage est activé pour le groupe.

---

  - 5 Sélectionnez l'option affichée (Activer ou Désactiver) et appuyez sur  pour sélectionner.  
En fonction de l'option sélectionnée, la radio affiche brièvement Balayage activé ou Balayage désactivé pour confirmer.
- 

La radio affiche à nouveau la liste de balayage de la zone. Si le balayage a été activé pour le groupe, la coche apparaît devant le nom du groupe. Si le balayage a été désactivé pour le groupe, la coche n'apparaît pas devant le nom du groupe.

## Ajout ou suppression d'un groupe depuis le menu Aj. membre

La radio Connect Plus ne permet pas de placer deux numéros ou alias de groupe identiques dans une liste de balayage de zone, ni de les afficher en tant que « candidats au balayage ». Ainsi, la liste de « candidats au balayage » décrite dans [étape 6](#) et [étape 7](#) est parfois modifiée après l'ajout ou la suppression d'un groupe de la liste de balayage de zone.

Si votre radio a été programmée pour vous permettre de modifier la liste de balayage, vous pouvez utiliser le menu Aj. membres pour ajouter ou supprimer un groupe dans la liste de balayage de la zone actuellement sélectionnée.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Balayage et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à <Ajout membres> et appuyez sur  pour sélectionner.  
L'écran affiche le message Ajout de membres de la Zone n (n = le numéro de zone Connect Plus de la première zone Connect Plus dans votre radio ayant le même ID de réseau que la zone actuellement sélectionnée).

---

- 4 Sélectionnez l'une des options suivantes :
  - Si le groupe que vous souhaitez ajouter à la liste de balayage est attribué à une position du sélecteur de canaux dans cette zone, passez à [étape 6](#).
  - Si le groupe que vous souhaitez ajouter à la liste de balayage est attribué à une position du sélecteur de canaux dans une autre zone Connect Plus, passez à [étape 5](#).

---

- 5 Appuyez sur  ou  pour faire défiler une liste de zones Connect Plus ayant le même ID de réseau que la zone actuellement sélectionnée.

---

- 6 Après avoir localisé la zone Connect Plus dans laquelle le groupe souhaité est affecté à une position du sélecteur de canal, appuyez sur  pour sélectionner.

Votre radio affiche la première entrée de la liste des groupes affectés à une position du sélecteur de canaux dans cette zone. Les groupes de la liste sont appelés des « candidats au balayage », car ils peuvent être ajoutés à la liste de balayage de la zone actuellement sélectionnée (s'ils ne le sont pas déjà).

Si la zone ne comporte aucun groupe pouvant être ajouté à la liste de balayage, la radio affiche le message `Aucun candidat`.

- 7 Appuyez sur  ou  pour faire défiler la liste des groupes candidats.

La présence d'un signe plus (+) devant l'alias d'un groupe indique que ce dernier est actuellement dans la liste de balayage de la zone actuellement sélectionnée.

Si aucun signe plus (+) ne s'affiche pas devant l'alias, le groupe ne figure pas actuellement dans la liste de balayage, mais peut y être ajouté.

- 8 Appuyez sur  lorsque l'alias du groupe souhaité s'affiche.

Si ce groupe ne figure pas actuellement dans la liste de balayage de la zone sélectionnée, le message `Ajouter` (alias du groupe) s'affiche.

Si ce groupe figure déjà dans la liste de balayage de la zone actuellement sélectionnée, le message `Supprimer` (alias de groupe) s'affiche.

- 9 Appuyez sur  pour accepter le message affiché (`Ajouter` ou `Supprimer`).

Si vous supprimez un groupe de la liste, vous saurez que l'opération a fonctionné en constatant que le signe plus (+) n'est plus affiché devant l'alias.

Si vous ajoutez un groupe à la liste, vous saurez que l'opération a fonctionné en constatant que le signe plus (+) s'affiche devant l'alias.

Si vous essayez d'ajouter un groupe et que la liste est déjà pleine, la radio affiche le message `Liste`

Plaine. Dans ce cas, il est nécessaire de supprimer un groupe de la liste de balayage avant d'en ajouter un nouveau.

- 
- 10 Lorsque vous avez terminé, appuyez sur  autant de fois que nécessaire pour revenir au menu souhaité.
- 

## Comprendre le fonctionnement du balayage

### REMARQUE:

Si la radio rejoint un appel pour le membre d'une liste de balayage de zone à partir d'une zone différente et que le temps de maintien de l'appel expire avant que vous ne soyez en mesure de répondre, vous devez, pour pouvoir répondre, accéder à la zone et au canal du membre de la liste de balayage et démarrer un nouvel appel.

Dans certains cas, vous pouvez manquer des appels pour les groupes qui figurent dans votre liste de balayage. Lorsque vous manquez un appel pour l'une des raisons suivantes, cela n'implique pas que la radio ne fonctionne

pas correctement. Il s'agit d'une opération de balayage normale pour Connect Plus.

- La fonction de balayage n'est pas activée (cherchez l'icône Balayage sur l'écran).
- Le membre de la liste de balayage a été désactivé via le menu (voir [Modification de la liste de balayage à la page 282](#)).
- Vous participez déjà à un appel.
- Aucun membre du groupe balayé n'est enregistré sur le site (systèmes multisites uniquement).

## Réponse de balayage

Si votre radio balaie un appel à partir de la liste de balayage de groupe sélectionnable et que vous appuyez sur le bouton **PTT** pendant le balayage de l'appel, le fonctionnement de la radio varie selon que la réponse de balayage a été activée ou désactivée pendant la programmation de la radio. Consultez votre fournisseur ou administrateur système pour en savoir plus.

### Réponse de balayage désactivée

La radio quitte l'appel balayé et tente d'émettre au contact pour la position de canal actuellement sélectionnée. Une fois que le temps de maintien sur le

contact actuellement sélectionné expire, la radio revient au canal d'accueil et démarre le compteur de temps de maintien du balayage. La radio reprend le balayage de groupe après l'expiration du compteur de temps de maintien du balayage.

### Réponse de balayage activée

Si vous appuyez sur le bouton **PTT** pendant le temps de maintien de groupe de l'appel balayé, la radio tente d'émettre au groupe balayé.

#### REMARQUE:

Si vous balayez un appel pour un groupe qui n'est pas affecté à une position du canal dans la zone actuellement sélectionnée et que vous manquez le temps de maintien de l'appel, basculez vers la zone correcte, puis sélectionnez la position de canal du groupe pour répondre à ce groupe.

## Modification de la priorité pour un groupe de discussion

La fonction Moniteur prioritaire permet à la radio de recevoir automatiquement la transmission du groupe de discussion possédant une priorité plus élevée lorsqu'elle se trouve dans un autre appel. Une tonalité retentit lorsque la radio passe à l'appel possédant une priorité plus élevée.

Il existe deux niveaux de priorité pour les différents groupes de parole : P1 et P2. P1 est prioritaire sur P2.

#### REMARQUE:

Si l'ID de groupe d'annulation d'urgence par défaut est configuré dans le CPS de la carte d'option MOTOTRBO Connect Plus, il existe trois niveaux de priorité pour les groupes de parole : P0, P1 et P2. P0 est l'ID de groupe d'annulation d'urgence permanent et possède la priorité la plus élevée. Consultez votre fournisseur ou administrateur système pour en savoir plus.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Scan et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Voir/Modif liste et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder au groupe de parole souhaité et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option Modif. priorité et appuyez sur  pour sélectionner.

---

6 Appuyez sur  ou  pour accéder au niveau de priorité souhaité et appuyez sur  pour sélectionner.

L'écran affiche un mini-avis positif, puis revient à l'écran précédent. L'icône de priorité s'affiche sur la gauche du groupe de discussion.

---

## Paramètres des contacts

### REMARQUE:

vous pouvez ajouter ou modifier les ID de terminaux pour les contacts Connect Plus. Seul votre fournisseur peut supprimer un ID de terminal radio. Si la fonction Secret est activée sur un canal, vous pouvez utiliser cette fonction pour réaliser un appel sur ce canal. Seules les radios cibles disposant de la même clé de confidentialité ou des mêmes valeur et ID de clé que ceux de votre radio sont en mesure de décrypter la transmission.

L'accès aux listes de contacts dépend de la configuration de zone :

- Si une seule zone est configurée dans la radio, la liste de contacts affiche directement la liste de la zone actuellement sélectionnée.
- Si plusieurs zones sont configurées dans la radio, le dossier Contacts de zone affiche toutes les zones disposant du même ID de réseau que la zone actuellement sélectionnée. L'utilisateur peut accéder aux contacts dans ces zones.

Contacts est le « carnet d'adresses » de la radio. Chaque entrée correspond à un alias ou ID que vous pouvez utiliser pour lancer un appel.

Chaque zone fournit une liste des contacts pouvant contenir jusqu'à 100 contacts. Les types de contacts suivants sont disponibles :

- Appel individuel
- Appel de groupe
- Appel multi groupe
- Appel vocal général de site
- Appel texte général de site
- Appel de répartition

Le type de contact Appel de répartition permet d'envoyer un message texte à un PC répartiteur via un serveur de messagerie texte tiers.

## Passage d'un appel individuel depuis la liste des contacts

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Contacts et appuyez sur  pour sélectionner.

Les entrées sont classées par ordre alphabétique.

---

- 3 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

---

- 4 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED s'allume en vert fixe.

---

- 5 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

---

- 6 Relâchez le bouton **PTT** pour écouter.  
Lorsque la radio appelée répond, la LED clignote en vert et l'écran affiche l'ID de son utilisateur.  
En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue.  
Vous entendez une courte tonalité. L'écran affiche Appel terminé.

---

## Recherche d'un alias d'appel

Vous pouvez aussi utiliser la recherche d'alias ou alphanumérique pour rechercher un alias de terminal.

Cette fonction n'est disponible que dans les contacts.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option `Contacts` et appuyez sur  pour sélectionner. Les entrées sont classées par ordre alphabétique.

---

- 3 Saisissez le premier caractère de l'alias requis, puis appuyez sur le bouton  ou  pour accéder à l'alias.

---

- 4 Tenez le microphone à une distance de 2,5 à 5 cm de votre bouche.

---

- 5 Appuyez sur le bouton **PTT** pour lancer l'appel. La LED s'allume en vert fixe. L'écran affiche l'alias de la destination.

---

- 6 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.
- 

- 7 Relâchez le bouton **PTT** pour écouter. Lorsque la radio cible répond, la LED clignote en vert. En l'absence d'activité vocale pendant une durée prédéterminée, la communication est automatiquement interrompue. L'écran affiche `Appel terminé`.
- 

## Ajout d'un nouveau contact

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option `Contacts` et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option

Niveau `contact` et appuyez sur  pour sélectionner.

---

4 Utilisez les touches du clavier pour entrer le numéro du contact et appuyez sur  pour confirmer.

---

5 Utilisez les touches du clavier pour entrer le nom du contact et appuyez sur  pour confirmer.

---

6 Si vous ajoutez un contact radio, appuyez sur  ou  pour accéder au type de sonnerie souhaité et appuyez sur  pour sélectionner.

La radio émet une tonalité d'indication positive et l'écran affiche `Contact enregistré`.

---

## Paramètres des indicateurs d'appel

Cette fonction permet aux utilisateurs radio de configurer les sonneries des appels ou des messages texte.

[Envoyer un commentaire](#)

## Activation et désactivation des sonneries des Avertissements d'appel

Vous pouvez sélectionner, activer ou désactiver les sonneries d'avertissement d'appel reçu.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à `Config/Infos` et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option `Config. radio` et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option `Tntés/Avert.` et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option

Sonn. d'appels et appuyez sur  pour sélectionner.

---

6 Appuyez sur  ou  pour accéder à l'option

Avert. d'appel et appuyez sur  pour sélectionner.

La tonalité actuelle est indiquée par le symbole ✓.

---

7 Appuyez sur  ou  pour accéder à la

tonalité souhaitée et appuyez sur  pour sélectionner.

✓ s'affiche en regard de la tonalité sélectionnée.

---

## Activation et désactivation des sonneries des appels individuels

Vous pouvez activer ou désactiver les sonneries des appels individuels reçus.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Tnlés/Avert. et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option

Sonn. d'appels et appuyez sur  pour sélectionner.

---

6 Appuyez sur  ou  pour accéder à l'option

Appel indiv. et appuyez sur  pour sélectionner.

---

7 Appuyez sur  pour activer/désactiver les sonneries d'appel individuel.

L'écran affiche  en regard de l'option Activé, si l'option Sonneries d'appel individuel est activée.

 ne s'affiche pas lorsque l'option Sonneries d'appel individuel est désactivée.

---

## Activation et désactivation des sonneries des messages texte

Vous pouvez activer ou désactiver les sonneries des messages texte reçus.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Intés/Avert. et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option **Sonn. d'appels** et appuyez sur  pour sélectionner.

---

6 Appuyez sur  ou  pour accéder à l'option **Message texte** et appuyez sur  pour sélectionner.  
La tonalité actuelle est indiquée par le symbole .

---

7 Appuyez sur  ou  pour accéder à la tonalité souhaitée et appuyez sur  pour sélectionner.  
 s'affiche en regard de la tonalité sélectionnée.

---

## Sélection d'un type d'alerte sonore

### REMARQUE:

Le bouton préprogrammé **Type avert.son.** est attribué par votre revendeur ou par l'administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Vous pouvez programmer votre radio pour qu'elle vibre lors de la réception d'appels. Si l'option Toutes tonalités est désactivée, la radio affiche l'icône Silencieux. Si l'option Toutes tonalités est activée, le type d'alerte par sonnerie associé s'affiche.

La radio vibre une fois s'il s'agit d'un style de sonnerie momentané. La radio vibre plusieurs fois s'il s'agit d'un mode de sonnerie répétitif. Lorsqu'elle est réglée sur Sonnerie & Vibration, la radio émet une tonalité spécifique en cas de transaction radio entrante (par exemple : alerte d'appel ou message). Cette tonalité ressemble à la tonalité d'indication positive ou à celle d'un appel manqué.

## Volume croissant de la tonalité des alarmes

Vous pouvez programmer votre radio pour qu'elle vous avertisse en continu qu'un appel reçu attend une réponse. Votre radio augmente automatiquement le volume de la

tonalité pendant une période prédéterminée. Cette fonction est appelée Avert. croissant.

## Caractéristiques du journal des appels

Votre radio génère un journal de tous les appels individuels entrants et sortants, répondus ou en absence. Ce journal vous permet de voir et de gérer les appels récents.

Les listes d'appels vous permettent d'effectuer les tâches suivantes :

- Delete
- Voir les détails

## Affichage des appels récents

Les listes sont les suivantes : Manqués, Répondus et Sortants.

- 1 Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou  pour accéder à l'option Appels et appuyez sur  pour sélectionner.
- 

- 3 Appuyez sur  ou  pour accéder à la liste souhaitée et appuyez sur  pour sélectionner. L'écran affiche l'entrée la plus récente en haut de la liste.
- 

- 4 Appuyez sur  ou  pour afficher la liste. Appuyez sur le bouton **PTT** pour lancer un appel individuel à partir de l'alias ou de l'ID sélectionné.
- 

## Suppression d'un appel de la liste des appels

- 1 Appuyez sur  pour accéder au menu.
-

2 Appuyez sur  ou  pour accéder à l'option Appels et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à la liste souhaitée et appuyez sur  pour sélectionner.

Lorsque vous sélectionnez une liste d'appels et qu'elle ne contient aucune entrée, l'écran affiche la mention Liste vide et une tonalité grave est émise si les tonalités du clavier sont activées.

---

4 Appuyez sur  ou  pour accéder à l'alias ou l'ID souhaité et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option Supprimer et appuyez sur  pour sélectionner.

---

6 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour sélectionner Oui et supprimer l'entrée. L'écran affiche Entrée supprimée.

- Appuyez sur  ou  pour accéder à l'option Non, puis sur appuyez sur le bouton  pour revenir à l'écran précédent.

---

## Affichage des détails dans une liste d'appels

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Appels et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à la liste souhaitée et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'alias ou l'ID souhaité et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option

Voir détails et appuyez sur  pour sélectionner.

L'écran affiche les détails de la liste des appels.

- La LED clignote en jaune.
- L'écran affiche la liste des notifications, laquelle répertorie un avertissement d'appel en indiquant l'alias ou l'ID de la radio appelante.

En fonction de la configuration effectuée par votre revendeur ou votre administrateur système, vous pouvez répondre à un avertissement d'appel en procédant de l'une des manières suivantes :

- Appuyez sur le bouton **PTT** et répondez par un appel individuel directement avec l'appelant.
- Appuyez sur le bouton **PTT** pour continuer une communication de groupe de parole normale. L'avertissement d'appel est déplacé dans l'option Appels manqués du menu Journal d'appels. Vous pouvez répondre à l'appelant à partir du journal des appels manqués.

## Fonctionnement de l'avertissement d'appel

La fonction d'avertissement d'appel vous permet de demander à un utilisateur de vous rappeler dès que cela lui sera possible.

Cette fonction est accessible dans le menu via Contacts, Num. manuelle ou un bouton **d'accès par numérotation rapide** programmé.

## Réponse aux avertissements d'appels

Suivez la procédure ci-après pour répondre aux avertissements d'appel sur votre radio.

Lorsque vous recevez un avertissement d'appel :

- Une tonalité répétitive est émise.

Reportez-vous aux sections [Liste des notifications à la page 208](#) et [Caractéristiques du journal des appels à la page 139](#) pour plus d'informations.

## Passage d'un avertissement d'appel depuis la liste des contacts

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Contacts et appuyez sur  pour sélectionner.

---

- 3 Suivez l'une des procédures ci-dessous pour sélectionner l'alias ou l'ID du terminal souhaité :
  - sélectionnez l'alias de terminal directement
    - Appuyez sur  ou  pour accéder à l'alias de terminal souhaité et appuyez sur  pour sélectionner.
  - utilisez le menu Num. manuelle
    - Appuyez sur  ou  pour accéder à l'option Num. manuelle et appuyez sur  pour sélectionner.

- L'écran d'entrée Numérotation manuelle s'affiche. Saisissez l'ID du terminal radio, puis appuyez sur  .

- 4 Appuyez sur  ou  pour accéder à l'option Avert. d'appel et appuyez sur  pour sélectionner.

L'écran affiche Avert. d'appel : <Alias ou ID du terminal>Avert. d'appel et l'alias ou l'ID du terminal, confirmant que l'avertissement d'appel a été envoyé.

La LED s'allume en vert fixe pendant que votre radio envoie l'avertissement d'appel.

Lorsque l'accusé de réception de l'avertissement d'appel est reçu, l'écran affiche Avert. appel réussi.

Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, l'écran affiche Avert. appel échoué.

## Passage d'un avertissement d'appel avec le bouton Accès direct

Appuyez sur le bouton **Accès direct** préprogrammé pour lancer un avertissement d'appel à un alias prédéfini.

L'écran affiche Avert. d'appel et l'alias ou l'ID de terminal, confirmant que l'avertissement d'appel a été envoyé.

La LED s'allume en vert fixe pendant que votre radio envoie l'avertissement d'appel.

Si l'accusé de réception d'avertissement d'appel est reçu, l'écran affiche Avert. appel réussi.

Si l'accusé de réception d'avertissement d'appel n'est pas reçu, l'écran affiche Avert. appel échoué.

## Mode Muet

Le mode Muet permet à l'utilisateur de couper le son de tous les indicateurs sonores de la radio.

Une fois la fonctionnalité Mode Muet activée, le son de tous les indicateurs sonores est coupé, à l'exception des

fonctionnalités de priorité supérieure telles que les opérations d'urgence.

Lorsque l'utilisateur quitte le mode Muet, la radio recommence à émettre les transmissions audio et les tonalités en cours.

### REMARQUE:

Il s'agit d'une fonction disponible à l'achat. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation du mode Muet

Pour activer le mode Muet, procédez comme suit.

Accédez à cette fonctionnalité via le bouton **Mode Muet** programmé.

Les événements suivants se produisent lorsque le mode Muet est activé :

- Une tonalité d'indication positive est émise.
- L'écran affiche Mode Muet Activé.
- La LED rouge commence à clignoter et cesse de clignoter une fois que l'utilisateur quitte le mode Muet.
- L'icône **Mode Muet** apparaît sur l'écran d'accueil.

- Le son de la radio est désactivé.
- Le compte à rebours de la durée configurée pour le délai du mode Muet commence.

### Définition du délai du mode Muet

Il est possible d'activer la fonctionnalité Mode Muet pour une période préconfigurée en définissant le délai du mode Muet. La durée du délai est configurée dans le menu de la radio et est comprise entre 0,5 heure et 6 heures. Une fois le délai expiré, la radio quitte le mode Muet.

Si le délai est laissé sur 0, la radio reste en mode Muet pendant une période indéfinie, jusqu'à ce que l'utilisateur appuie sur le bouton **Mode Muet** programmé.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Délai avt muet. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur .

### Sortie du mode Muet

Le mode Muet prend fin automatiquement une fois le délai défini pour cette fonctionnalité expiré.

Pour quitter manuellement le mode Muet, effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Mode Muet** préprogrammé.

- Appuyez sur le bouton **PTT** d'une entrée.

Les événements suivants se produisent lorsque le mode Muet est désactivé :

- Une tonalité d'indication négative est émise.
- L'écran affiche Mode Muet Désactivé.
- La LED rouge clignotante s'éteint.
- L'icône **Mode Muet** disparaît de l'écran d'accueil.
- Votre radio active le son et l'état du haut-parleur est restauré.
- Si le délai du mode Muet n'a pas expiré, il est interrompu.

#### REMARQUE:

L'utilisateur quitte également le mode Muet s'il transmet un signal vocal ou passe sur un canal non programmé.

## Gestion de l'urgence

#### REMARQUE:

Si votre radio est préprogrammée pour un lancement d'urgence Silencieux ou Silencieux avec voix, dans la plupart des cas, elle quitte automatiquement le mode silencieux une fois l'appel d'urgence ou l'alerte d'urgence terminé(e). Néanmoins, il existe une exception à cette règle lorsque Alerte d'urgence est le mode d'urgence défini et que Silencieux est le type d'urgence défini. Si la radio est programmée de cette manière, le mode silencieux reste actif jusqu'à ce que vous le désactiviez en appuyant sur le bouton **PTT** ou sur le bouton configuré pour Urgence désact.

Les appels vocaux d'urgence et les alertes d'urgence ne sont pas pris en charge en mode reprise d'appel automatique Connect Plus. Pour plus d'informations, reportez-vous à la section [Reprise d'appel automatique à la page 274](#).

Une alarme d'urgence sert à signaler une situation critique. Vous pouvez lancer un appel d'urgence à tout moment dans n'importe quel écran, même lorsqu'il existe une activité sur le canal en cours. Appuyez sur le bouton **Urgence** pour passer en mode Urgence programmé. Vous pouvez également lancer le mode d'urgence

préprogrammé en activant la fonctionnalité Man Down facultative. Il se peut que la fonction Urgence soit désactivée sur votre radio.

Votre fournisseur peut régler la durée de la pression sur le bouton **Urgence** préprogrammé, sauf pour la pression longue qui est similaire à tous les autres boutons :

### Pression courte

Entre 0,05 seconde et 0,75 seconde.

### Exercez une pression longue

Entre 1,00 seconde et 3,75 secondes.

Le bouton **Urgence** est attribué à la fonction Urgence activée/désactivée. Pour plus d'informations sur les fonctions attribuées au bouton **Urgence**, consultez votre fournisseur local.

- Si la pression courte sur le bouton **Urgence** est attribuée à l'activation du mode Urgence, la pression longue sur ce bouton **Urgence** est attribuée à la désactivation de ce mode.
- Si la pression longue sur le bouton **Urgence** est attribuée à l'activation du mode Urgence, la pression courte sur ce bouton **Urgence** est attribuée à la désactivation de ce mode.

Lorsque votre radio est sélectionnée dans une zone Connect Plus, elle prend en charge trois modes d'urgence :

### Appel d'urgence

Vous devez appuyer sur le bouton **PTT** pour parler pendant l'intervalle d'urgence défini.

### Appel d'urgence avec suivi vocal

Pour la première transmission sur l'intervalle d'urgence défini, le microphone est automatiquement rétabli et vous pouvez parler sans appuyer sur le bouton **PTT**. Le microphone reste activé de cette manière pour une durée préprogrammée dans la radio. Pour les transmissions suivantes dans le même appel d'urgence, vous devez appuyer sur le bouton **PTT**.

### Alerte d'urgence

Une alerte d'urgence n'est pas un appel vocal. Il s'agit d'une notification d'urgence envoyée aux radios configurées pour recevoir ces alertes. La radio envoie une alerte d'urgence via le canal de contrôle du site actuellement enregistré. L'alerte d'urgence est reçue par les radios du réseau Connect Plus programmées pour les recevoir (quel que soit le site du réseau où elles sont enregistrées).

Un seul mode d'urgence par zone peut être affecté au bouton Urgence. De plus, chaque mode d'urgence correspond à l'un des types suivants :

**Regular**

La radio lance un appel d'urgence et présente des indications audio et/ou visuelles.

**Silencieux**

La radio lance un appel d'urgence sans indications audio ou visuelles. La radio supprime toutes les indications audio et visuelles de l'urgence jusqu'à ce que vous appuyiez sur le bouton **PTT** pour démarrer une transmission vocale.

**Silencieux avec voix**

Identique à Silencieux, mais la radio rétablit le microphone pour certaines transmissions vocales.

**Réception d'une urgence entrante**

Il est possible que la radio soit programmée pour émettre un signal sonore d'alerte et afficher des informations sur l'urgence entrante. Dans ce cas, lors de la réception d'une urgence entrante, l'écran affiche les détails de l'urgence avec l'icône d'urgence, l'alias ou l'ID de la radio à l'origine de l'urgence, le contact de groupe utilisé pour l'urgence ainsi qu'une ligne supplémentaire d'informations. L'information supplémentaire est le nom de la zone contenant le contact de groupe.

À l'heure actuelle, la radio affiche seulement la dernière urgence décodée. Si une nouvelle urgence est reçue avant que la précédente urgence ne soit effacée, les détails de cette nouvelle urgence remplacent ceux de la précédente urgence.

Selon la programmation de la radio, les détails de l'urgence (ou la liste des alarmes) continuent de s'afficher sur l'écran de la radio même une fois l'urgence terminée. Vous pouvez enregistrer les détails de l'urgence dans la liste des alarmes ou les supprimer comme indiqué dans les sections suivantes.

**Enregistrement des détails de l'urgence dans la liste des alarmes**

L'enregistrement des détails de l'urgence dans la liste des alarmes vous permet de réafficher ces détails ultérieurement en sélectionnant la liste des alarmes dans le menu principal.

- 1 Lorsque l'écran des détails de l'urgence (ou de la liste des alarmes) s'affiche, appuyez sur  . L'écran **Fermer Liste Alarmes** s'affiche.

2 Effectuez l'une des opérations suivantes :

- Sélectionnez **Oui** et appuyez sur  pour enregistrer les détails de l'urgence dans la liste des alarmes et quitter l'écran des détails de l'urgence (ou de la liste des alarmes).
- Sélectionnez **Non** et appuyez sur  pour revenir à l'écran des détails de l'urgence (ou de la liste des alarmes).

---

## Suppression des détails de l'urgence

1 Lorsque l'écran des détails de l'urgence s'affiche, appuyez sur  .  
L'écran **Supprimer** s'affiche.

---

2 Effectuez l'une des opérations suivantes :

- Sélectionnez **Oui** et appuyez sur  pour supprimer les détails de l'urgence.

- Sélectionnez **Non** et appuyez sur  pour revenir à l'écran des détails de l'urgence.

---

## Répondre à un appel d'urgence

### REMARQUE:

si vous ne répondez pas à l'appel d'urgence dans le délai défini pour la durée de mise en attente d'un appel d'urgence, l'appel d'urgence prend fin. Si vous souhaitez parler au groupe à l'expiration du délai Durée de mise en attente d'appel d'urgence, vous devez d'abord sélectionner la position de canal attribuée au groupe (si ce n'est pas déjà fait). Ensuite, appuyez sur **PTT** pour passer un appel non urgent au groupe.

- 1 Lorsque vous recevez un appel d'urgence, appuyez sur n'importe quel bouton pour arrêter toutes les indications reçues de l'appel d'urgence.
- 2 Appuyez sur le bouton **PTT** pour lancer une transmission vocale sur le groupe d'urgence.  
Toutes les radios qui surveillent ce groupe reçoivent votre transmission.

- 3 Attendez la fin de la tonalité Parler autorisé (si cette option est activée) et parlez distinctement dans le microphone.

La LED passe au vert.

- 4 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio à l'origine de l'urgence répond, la LED clignote en vert. L'icône Appel de groupe, l'ID de groupe et l'ID de la radio appelante sont affichées à l'écran.

## Réponse à une alerte d'urgence

### REMARQUE:

le contact de groupe utilisé pour l'alerte d'urgence (Emergency Alert) ne doit pas être utilisé pour les communications vocales. Et ce, pour éviter à d'autres radios d'envoyer et de recevoir des alertes d'urgence sur le même groupe.

Une alerte d'urgence d'une radio indique que l'utilisateur se trouve dans une situation d'urgence. Vous pouvez répondre à l'alerte en lançant un appel individuel vers la radio ayant envoyée l'alerte d'urgence ou un appel de groupe vers un groupe de parole désigné, en envoyant à la

radio un Avertissement d'appel, en activant l'écoute d'ambiance de la radio, etc. La réponse correcte est déterminée par votre entreprise et la situation.

## Ignorer un appel d'annulation d'urgence

Cette fonctionnalité améliorée permet à la radio d'ignorer un appel d'annulation d'urgence.

Pour activer la fonctionnalité Ignorer un appel d'annulation d'urgence, la radio doit être configurée à partir du logiciel Connect Plus Customer Programming Software (CPCPS).

Lorsque cette fonctionnalité est activée, la radio n'affiche pas les indications d'appel d'urgence et ne reçoit pas de signaux audio sur l'ID de groupe d'annulation d'urgence par défaut.

Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Lancer un appel d'urgence

### REMARQUE:

Si le mode Silencieux est activé, votre radio ne donnera aucune indication sonore ou visuelle pendant l'utilisation du mode Urgence jusqu'à ce que vous appuyiez sur le bouton **PTT** pour effectuer une transmission vocale.

Si la radio est réglée sur Silencieux avec voix, elle n'affiche pas d'indications sonores ou visuelles pour signaler qu'elle fonctionne en mode d'urgence. Cependant, elle rétablit le microphone pour les transmissions des radios qui répondent à votre appel d'urgence. Les indicateurs d'urgence n'apparaissent que lorsque vous appuyez sur le bouton **PTT** pour lancer une transmission vocale depuis la radio.

Pour le fonctionnement en mode « Silencieux » et en mode « Silencieux avec voix », la radio quitte automatiquement le mode Silencieux à la fin de l'appel d'urgence.

- 1 Appuyez sur le bouton **Urgence** programmé.
- 
- 2 Appuyez sur le bouton **PTT** pour lancer une transmission vocale sur le groupe d'urgence.

Lorsque vous relâchez le bouton **PTT**, l'appel d'urgence se poursuit pendant le délai défini pour la fonction Durée de mise en attente d'appel d'urgence.

Si vous appuyez sur le bouton **PTT** pendant ce délai, l'appel d'urgence se poursuit.

## Lancer un appel d'urgence avec suivi vocal

La radio doit être programmée pour ce type de fonctionnement.

Lorsque cette fonction est activée, que vous appuyez sur le bouton **Urgence** programmé et que la radio reçoit l'affectation d'intervalle, le microphone est activé automatiquement sans avoir à appuyer sur le bouton **PTT**. Cet état activé du microphone est également appelé "microphone ouvert". Celui-ci s'applique à la première émission vocale effectuée depuis votre radio au cours de l'appel d'urgence. Pour les transmissions suivantes dans le même appel d'urgence, vous devez appuyer sur le bouton **PTT**.

- 1 Appuyez sur le bouton **Urgence** programmé.

- 2 Le microphone reste actif pendant la période « Micro ouvert » définie dans la programmation Codeplug de la radio.

Pendant ce temps, la LED passe au vert.

- 3 Appuyez sur le bouton **PTT** et maintenez-le enfoncé pour prolonger la période programmée.

Appuyez sur le bouton **Urgence** orange.

Lors de l'émission d'une alerte d'urgence à destination du contrôleur de site, la radio affiche l'icône Urgence, le contact de groupe utilisé pour l'alerte d'urgence et `Alarme Tx`.

Une fois l'alerte d'urgence envoyée et diffusée aux autres radios, une tonalité d'indication positive est émise et l'écran de la radio affiche `Alarme envoy.`. Si l'alerte d'urgence échoue, une tonalité d'indication négative est émise et la radio affiche `Échec Alarme`.

## Lancer une alerte d'urgence

### REMARQUE:

si la radio est programmée pour le mode « Silencieux » ou « Silencieux avec voix », elle ne génère aucune indication sonore ou visuelle pour signaler qu'elle envoie une alerte d'urgence. Si elle est programmée pour le mode « Silencieux », le fonctionnement silencieux se poursuit indéfiniment jusqu'à ce que vous appuyiez sur le bouton PTT ou le bouton configuré pour « Urgence désactivée ». Si elle est programmée pour le mode « Silencieux avec voix », la radio annule automatiquement le mode silencieux lorsque le contrôleur de site diffuse l'alerte d'urgence.

## Sortie du mode d'urgence

### REMARQUE:

Si l'appel d'urgence prend fin suite à l'expiration du délai `Durée de mise en attente d'appel d'urgence` et que la condition d'urgence persiste, appuyez de nouveau sur le bouton **Urgence** pour recommencer le processus.

Si vous lancez une alerte d'urgence en appuyant sur le bouton **Urgence** programmé, la radio quitte automatiquement le mode Urgence après avoir reçu une réponse du système Connect Plus.

Si vous lancez un appel d'urgence en appuyant sur le bouton **Urgence** programmé, la radio est affectée automatiquement à un canal lorsqu'un canal devient disponible. Une fois que la radio a transmis un message indiquant l'urgence, vous ne pouvez pas annuler l'appel d'urgence. Cependant, si vous avez appuyé sur le bouton par accident ou que l'urgence n'existe plus, vous pouvez l'indiquer sur le canal affecté. Lorsque vous relâchez le bouton **PTT**, l'appel d'urgence prend fin à l'expiration du délai Durée de mise en attente d'appel d'urgence.

Si votre radio a été configurée avec la fonction Appel d'urgence avec suivi vocal, utilisez la période « Micro ouvert » pour expliquer votre erreur, puis appuyez sur le bouton **PTT** pour interrompre la transmission. L'appel d'urgence prend fin à l'expiration du délai Durée de mise en attente d'appel d'urgence.

## Message texte

Votre radio vous permet de recevoir des données, par exemple sous forme de message texte, depuis une autre radio ou une application de messages textes.

Il existe deux types de messages texte : les messages texte DMR courts et les messages texte. La longueur maximale d'un message texte DMR court est de 23 caractères. La longueur maximale d'un message texte

est de 280 caractères, ligne d'objet comprise. La ligne d'objet s'affiche uniquement lorsque vous recevez des messages provenant d'une application de messagerie.

### REMARQUE:

Cette longueur maximale s'applique uniquement aux modèles dotés de la dernière version du logiciel et du matériel. Pour les modèles de radio dotés de versions plus anciennes, la longueur maximale d'un message texte est de 140 caractères. Consultez votre fournisseur ou administrateur système pour en savoir plus.

pour la langue arabe, la saisie de texte s'effectue de droite à gauche.

## Envoi d'un message texte rapide

Votre radio prend en charge un maximum de 10 messages texte rapides programmés par votre fournisseur.

Bien que les messages texte rapides soient préprogrammés, vous pouvez les modifier avant de les envoyer.

Si vous envoyez le message, effectuez les opérations suivantes pour sélectionner un destinataire :

- Appuyez sur  ou  pour accéder à l'alias souhaité et appuyez sur  pour sélectionner.
- Appuyez sur  ou  pour accéder à l'option Num. manuelle et appuyez sur  pour sélectionner. La première ligne de l'écran affiche Numéro :. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez l'alias ou l'ID du terminal, puis appuyez sur .

L'écran affiche Envoi du message, pour confirmer l'envoi du message.

Si l'envoi du message aboutit, une tonalité est émise et l'écran affiche Message envoyé.

Si le message ne peut pas être envoyé, une tonalité basse est émise et l'écran affiche Échec de l'envoi du message.

Si le message ne peut pas être envoyé, la radio affiche l'écran d'option Renvoyer (voir [Gestion des messages texte non envoyés à la page 313](#)).

## Envoi d'un message texte rapide à l'aide du bouton Accès direct

Vous pouvez envoyer des messages texte rapides à l'aide du bouton programmable programmé par votre revendeur.

Appuyez sur le bouton programmé **Accès par numérotation rapide** pour envoyer un message texte rapide prédéfini à un alias prédéfini.

L'écran affiche Envoi du message, pour confirmer l'envoi du message.

---

Si le message est envoyé, une tonalité est émise et l'écran affiche Message envoyé.

Si le message ne peut pas être envoyé, une tonalité basse est émise et l'écran affiche Échec de l'envoi du message.

Si le message ne peut pas être envoyé, la radio affiche l'écran d'option Renvoyer (voir [Gestion des messages texte non envoyés à la page 313](#)).

## Accès au dossier Brouillons

Le dossier Brouillons peut contenir dix (10) messages au maximum. Dès qu'il contient dix messages, le message suivant enregistré remplace automatiquement le plus ancien figurant dans ce dossier.

### REMARQUE:

avant d'envoyer un message texte enregistré, vous pouvez le modifier. Cette fonction est uniquement disponible avec un microphone à clavier (voir [Modification et envoi d'un message texte enregistré à la page 311](#). exercez une pression longue sur le

bouton  pour revenir à l'écran d'accueil quand vous le voulez.

## Affichage d'un message texte enregistré

- 1 Accédez à l'option **Message texte**.

Commandes radio	Étapes
<b>Bouton préprogrammé Message texte</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.

Commandes radio	Étapes
<b>Menu</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option Messages et appuyez sur  pour sélectionner.</p>

- 2 Appuyez sur  ou  pour accéder à l'option Brouillons et appuyez sur  pour sélectionner.

- 3 Appuyez sur  ou  pour accéder au message souhaité et appuyez sur  pour sélectionner.

## Modification et envoi d'un message texte enregistré

1 Appuyez à nouveau sur  pendant que le message est affiché.

---

2 Appuyez sur  ou  pour accéder à l'option `Modif.` et appuyez sur  pour sélectionner. Un curseur clignotant apparaît.

---

3 Saisissez votre message à l'aide du clavier.

Appuyez sur  pour vous décaler d'un espace vers la gauche. Appuyez sur  ou sur  pour vous décaler d'un espace vers la droite. Appuyez sur  pour supprimer des caractères indésirables.

Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

---

4 Appuyez sur  lorsque vous avez terminé de composer votre message.

---

5 Sélectionnez le destinataire du message :

- Appuyez sur  ou  pour accéder à l'alias souhaité et appuyez sur  pour sélectionner.
- Appuyez sur  ou  pour accéder à l'option `Num. manuelle` et appuyez sur  pour sélectionner. La première ligne de l'écran affiche `Numéro :`. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez l'alias ou l'ID du terminal, puis appuyez sur .

L'écran affiche `Envoi du message`, pour confirmer l'envoi du message.

Si l'envoi du message aboutit, une tonalité est émise et l'écran affiche `Message envoyé`.

Si le message ne peut pas être envoyé, une tonalité basse est émise et l'écran affiche `Échec de l'envoi du message`.

Si le message ne peut pas être envoyé, il est placé dans le dossier Messages envoyés et marqué par une icône Échec envoi message.

## Suppression d'un message texte enregistré dans Brouillons

- 1 Accédez à l'option **Message texte**.

Commandes radio	Étapes
<b>Bouton préprogrammé Message texte</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.
<b>Menu</b>	<ol style="list-style-type: none"> <li>a Appuyez sur  pour accéder au menu.</li> <li>b Appuyez sur  ou  pour accéder à l'option Messages et</li> </ol>

Commandes radio	Étapes
	appuyez sur  pour sélectionner.

- 2 Appuyez sur  ou  pour accéder à l'option Brouillons et appuyez sur  pour sélectionner.
- 3 Appuyez sur  ou  pour accéder au message souhaité et appuyez sur  pour sélectionner.
- 4 Appuyez sur  ou  pour accéder à l'option Supprimer et appuyez sur  pour supprimer le message texte.

## Gestion des messages texte non envoyés

L'écran `Renvoyer` vous permet de sélectionner l'une des options suivantes :

- Renvoyer
- Avancer
- Modifier liste

## Renvoi d'un message texte

Appuyez sur  pour renvoyer le même message au même alias ou ID de terminal ou de groupe.

Si le message a bien été envoyé, une tonalité est émise et l'écran affiche un mini-avis positif.

Si le message ne peut pas être envoyé, l'écran affiche un mini-avis négatif.

## Transfert d'un message texte

Sélectionnez `Transférer` pour envoyer un message à un autre ID ou alias de terminal ou de groupe.

- 1 Appuyez sur  ou  pour accéder à l'option `Transférer` et appuyez sur  pour sélectionner.
- 2 Pour sélectionner le destinataire du message, appuyez sur  ou  pour accéder à l'alias ou l'ID souhaité et appuyez sur  pour sélectionner.

L'écran affiche `Envoi du message`, pour confirmer l'envoi du message.

Si l'envoi du message aboutit, une tonalité est émise et l'écran affiche `Message envoyé`.

Si le message ne peut pas être envoyé, une tonalité basse est émise et l'écran affiche `Échec de l'envoi du message`.

## Gestion des messages texte envoyés

Dès qu'un message a été envoyé à une autre radio, il est archivé dans le dossier Messages envoyés. Le dernier message texte envoyé est toujours ajouté à la première ligne de la liste des messages envoyés.

Le dossier Messages envoyés contient les 30 derniers messages envoyés au maximum. Lorsque que le dossier est plein, le dernier message envoyé remplace le plus ancien figurant dans ce dossier.

### REMARQUE:

exercez une pression longue sur le bouton  pour revenir à l'écran d'accueil quand vous le voulez.

## Affichage d'un message texte envoyé

- 1 Accédez à l'option **Message texte**.

Comman des radio	Étapes
<b>Bouton préprogr</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.

Comman des radio	Étapes
<b>ammé Message texte</b>	
<b>Menu</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option Messages et appuyez sur  pour sélectionner.</p>

- 2 Appuyez sur  ou  pour accéder à l'option **Msg envoyés** et appuyez sur  pour sélectionner.
- 3 Appuyez sur  ou  pour accéder au message souhaité et appuyez sur  pour sélectionner.

L'icône située dans l'angle supérieur droit de l'écran indique l'état du message (voir [Icônes Messages envoyés à la page 252](#)).

## Envoi d'un message texte envoyé

Lorsque vous visualisez un message texte envoyé, vous pouvez choisir l'une des options suivantes :

- Renvoyer
- Avancer
- Modifier liste
- Supprimer

1 Appuyez à nouveau sur  pendant que le message est affiché.

2  ou  pour accéder à l'une des options suivantes et appuyez sur  pour sélectionner.

Option	Étapes
Avancer	Sélectionnez Transférer pour envoyer le message texte

Option	Étapes
	sélectionné à un autre alias ou ID de terminal/de groupe (voir <a href="#">Transfert d'un message texte à la page 313</a> ).
Supprimer	Sélectionnez Supprimer pour supprimer le message texte.
Renvoyer	<p>Sélectionnez Renvoyer pour renvoyer le message texte sélectionné au même alias ou ID de terminal ou de groupe.</p> <p>L'écran affiche Envoi de Message pour confirmer l'envoi du message à la même radio cible.</p> <p>Si l'envoi du message aboutit, une tonalité est émise et l'écran affiche Message envoyé.</p> <p>Si le message ne peut pas être envoyé, une tonalité basse est émise et l'écran affiche Échec de l'envoi du message.</p>

Option	Étapes
	<p>Si le message n'a pas pu être envoyé, la radio revient à l'écran Renvoyer. Appuyez sur  pour renvoyer le message au même alias ou ID de terminal ou de groupe.</p>

Si vous fermez l'écran d'envoi des messages pendant l'envoi d'un message, la radio met à jour l'état du message dans le dossier Messages envoyés sans aucune indication visuelle ni sonore.

Si la radio change de mode ou s'éteint avant que l'état d'un message ne soit mis à jour dans le dossier Messages envoyés, la radio ne pourra pas terminer la mise à jour des messages en cours et le message sera automatiquement signalé par une icône **Échec envoi**.

La radio peut mettre à jour jusqu'à cinq messages en cours. Pendant cette procédure, la radio affiche automatiquement une icône **Échec envoi message** pour indiquer qu'elle ne peut pas envoyer d'autre message.

## Suppression de tous les messages texte envoyés du dossier Messages envoyés

- 1 Accédez à l'option **Message texte**.

Commandes radio	Étapes
<b>Bouton préprogrammé Message texte</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.
<b>Menu</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option Messages et appuyez sur  pour sélectionner.</p>

- 2 Appuyez sur  ou  pour accéder à l'option **Msg envoyés** et appuyez sur  pour sélectionner.
- Lorsque vous sélectionnez **Msgs envoyés** et que ce dossier ne contient aucun message texte, l'écran affiche **Liste vide**. Une tonalité basse est alors émise si les tonalités du clavier sont activées.
- 

- 3 Appuyez sur  ou  pour accéder à l'option **Supprimer tout** et appuyez sur  pour sélectionner.
- 

- 4 Sélectionnez l'une des options suivantes :
- Appuyez sur  ou  pour accéder à l'option **Oui** et appuyez sur  pour sélectionner. L'écran affiche un mini-avis positif.
  - Appuyez sur  ou  pour accéder à l'option **Non** et appuyez sur  pour revenir à l'écran précédent.
- 

## Réception d'un message texte

Lorsque votre radio reçoit un message, l'écran affiche la liste des notifications avec l'alias ou l'ID de l'expéditeur ainsi que l'icône **Message**.

Vous pouvez alors choisir l'une des options suivantes :

- Lire
- Read Later (Lire plus tard)
- Delete

## Lecture d'un message texte

- 1 Appuyez sur  ou  pour accéder à l'option **Lire ?** et appuyez sur  pour sélectionner.
- Le message sélectionné dans la Boîte de réception est affiché.
- 

- 2 Effectuez l'une des opérations suivantes :
- Appuyez sur  pour revenir à la boîte de réception.

- Appuyez une seconde fois sur  pour répondre à un message texte, le transférer ou le supprimer.
- 

## Gestion des messages texte reçus

Utilisez la Boîte de réception pour gérer vos messages texte. La boîte de réception peut contenir jusqu'à 30 messages.

Les messages texte de la Boîte de réception sont classés dans l'ordre chronologique de leur arrivée, le plus récent étant affiché en premier.

Votre radio offre les options de messages texte suivantes :

- Répondre (via Texte rapide)
- Avancer
- Supprimer
- Supprimer tout

### REMARQUE:

Si le type de canal ne correspond pas, vous pouvez uniquement transférer, supprimer ou supprimer tous les messages Reçus.

exercez une pression longue sur le bouton  pour revenir à l'écran d'accueil quand vous le voulez.

## Affichage d'un message texte dans la Boîte de réception

- 1 Appuyez sur  pour accéder au menu.

---

  - 2 Appuyez sur  ou  pour accéder à l'option Messages et appuyez sur  pour sélectionner.

---

  - 3 Appuyez sur  ou  pour accéder à l'option Boîte de réception et appuyez sur  pour sélectionner.
-

4 Appuyez sur  ou  pour afficher les messages.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour sélectionner le message actuel, puis appuyez à nouveau sur  pour répondre au message, le transférer ou le supprimer.
- Exercez une pression longue sur  pour revenir à l'écran d'accueil.

## Réponse à un message texte dans la Boîte de réception

1 Accédez à l'option **Message texte**.

Comman des radio	Étapes
<b>Bouton préprogr ammé Message texte</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.
<b>Menu</b>	<p>a Appuyez sur  pour accéder au menu.</p> <p>b Appuyez sur  ou  pour accéder à l'option Messages et appuyez sur  pour sélectionner.</p>

2 Appuyez sur  ou  pour accéder à l'option Boîte de réception et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder au message souhaité et appuyez sur  pour sélectionner.

4 Appuyez une fois de plus sur  pour ouvrir le sous-menu.

5 Utilisez le clavier pour écrire ou modifier votre message.

6 Appuyez sur  lorsque vous avez terminé de composer votre message.

L'écran affiche *Envoi du message*, pour confirmer l'envoi du message.

Si l'envoi du message aboutit, un signal sonore est émis et l'écran affiche *Message envoyé*.

Si le message ne peut pas être envoyé, une tonalité grave est émise et l'écran affiche *Échec de l'envoi du message*.

Si le message ne peut pas être envoyé, la radio vous renvoie à l'écran d'option *Renvoyer* (voir

Gestion des messages texte non envoyés à la page 313).

## Suppression d'un message texte dans la Boîte de réception

1 Accédez à l'option **Message texte**.

Commandes radio	Étapes
<b>Bouton préprogrammé Message texte</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.
<b>Menu</b>	<p>a Appuyez sur  pour accéder au menu.</p> <p>b Appuyez sur  ou  pour accéder à l'option <i>Messages</i> et</p>

Commandes radio	Étapes
	appuyez sur  pour sélectionner.

2 Appuyez sur  ou  pour accéder à l'option Boîte de réception et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder au message souhaité et appuyez sur  pour sélectionner.

4 Appuyez une fois de plus sur  pour ouvrir le sous-menu.

5 Appuyez sur  ou  pour accéder à l'option Supprimer et appuyez sur  pour sélectionner.

6 Appuyez sur  ou  pour accéder à l'option Oui et appuyez sur  pour sélectionner.  
L'écran affiche Message supprimé et la boîte de réception s'affiche à nouveau.

## Suppression de tous les messages texte de la boîte de réception

1 Accédez à l'option **Message texte**.

Commandes radio	Étapes
<b>Bouton préprogrammé Message texte</b>	Appuyez sur le bouton <b>Message texte</b> préprogrammé.
<b>Menu</b>	a Appuyez sur  pour accéder au menu.

Commandes radio	Étapes
	<p><b>b</b> Appuyez sur  ou  pour accéder à l'option Messages et appuyez sur  pour sélectionner.</p>

- 2 Appuyez sur  ou  pour accéder à l'option Boîte de réception et appuyez sur  pour sélectionner.

Lorsque vous sélectionnez Boîte de réception et que ce dossier ne contient aucun message texte, l'écran affiche Liste vide et émet une tonalité basse si les tonalités du clavier sont activées (voir [Activation/désactivation des tonalités du clavier à la page 220](#)).

- 3 Appuyez sur  ou  pour accéder à l'option Supprimer tout et appuyez sur  pour sélectionner.

- 4 Appuyez sur  ou  pour accéder à l'option Oui et appuyez sur  pour sélectionner. L'écran affiche Boîte récept. Vidée.

## Confidentialité

Lorsque cette fonction est activée, elle protège les utilisateurs contre les possibilités d'écoute sur un canal par des personnes non autorisées grâce à une solution de brouillage logicielle. Les éléments de signalisation et d'identification des utilisateurs ne sont pas cryptés.

La fonction Secret doit être activée sur la position du sélecteur de canal sélectionnée pour que la radio puisse émettre en utilisant le cryptage, mais cela n'est pas nécessaire pour recevoir une communication. Lorsque vous sélectionnez une position du sélecteur de canal dont les transmissions sont protégées, la radio peut toujours recevoir des transmissions en clair (non brouillées).

Votre radio prend en charge le cryptage amélioré.

Pour décrypter un appel voix protégé par la fonction Secret, votre radio doit avoir la même valeur de clé et le même ID de clé (pour la fonction Crypt. amél.) que la radio émettrice.

Si votre radio reçoit un appel brouillé d'une autre valeur de clé et d'ID, vous n'entendrez rien (Crypt. amél.).

Lorsqu'une des options de la fonction Secret est attribuée, l'écran d'accueil affiche l'icône Sécurisé ou Non sécurisé, sauf lorsque la radio envoie ou reçoit un appel d'urgence ou une alarme.

La LED s'allume en vert fixe lorsque la radio émet. Elle clignote rapidement lorsqu'elle reçoit une transmission cryptée.

Vous pouvez accéder à cette fonction en effectuant l'une des opérations suivantes :

- Appuyez sur le bouton **Secret** programmé pour activer ou désactiver cette fonction.
- Utilisez le menu de la radio, comme décrit dans les étapes suivantes.

#### REMARQUE:

la fonction Secret n'est pas disponible sur certains modèles. Consultez votre fournisseur ou administrateur système pour en savoir plus.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio ou  ou  à l'option Connect Plus et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Crypt. amél.

Si l'écran affiche Allumer, appuyez sur  pour activer la fonction Cryptage. La radio affiche un message pour confirmer votre sélection.

Si l'écran affiche **Eteindre**, appuyez sur  pour désactiver la fonction Cryptage. La radio affiche un message pour confirmer votre sélection.

Lorsqu'une des options de la fonction Secret est attribuée, l'icône Sécurisé ou Non sécurisé est affichée sur la barre d'état, sauf si la radio envoie ou reçoit une alerte d'urgence.

## Passage d'un appel crypté (brouillé)

Activez la confidentialité en utilisant le bouton de confidentialité programmé ou le menu. La fonction Secret doit être activée sur la radio pour la position de canal sélectionnée afin de pouvoir lancer un appel confidentiel. Dans ce cas, tous les appels vocaux lancés sur la radio sont brouillés. Cela s'applique aux appels de groupe, aux appels multi-groupe, aux appels de réponse en cours de balayage, aux appels généraux de site, aux appels d'urgence et aux appels individuels. Seules les radios réceptrices ayant la même valeur de clé et le même ID de clé que votre radio peuvent déchiffrer la transmission.

## Security

Vous pouvez activer ou désactiver toute radio du système. Par exemple, vous pourriez avoir besoin de désactiver une radio volée pour rendre impossible son utilisation, et la réactiver lorsqu'elle aura été récupérée.

### REMARQUE:

pour pouvoir activer ou désactiver une radio, cette fonction doit être préalablement programmée sur cette radio. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Radio Disable

- 1 Accédez à cette fonction en effectuant l'une des opérations suivantes :

Comman des de la radio	Étapes
<b>Bouton Désactiv er radio</b>	a Appuyez sur le bouton <b>Désactiver radio</b> programmé.

Comman des de la radio	Étapes
	<p><b>b</b> Appuyez sur  ou  pour accéder à l'alias ou l'ID souhaité et appuyez sur  pour sélectionner.</p>
<b>Menu de la radio</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option Contacts et appuyez sur  pour sélectionner. Les entrées sont classées par ordre alphabétique.</p> <p><b>c</b> Suivez l'une des procédures ci-dessous pour sélectionner l'alias ou l'ID du terminal souhaité :</p>

Comman des de la radio	Étapes
	<ul style="list-style-type: none"> <li>• Sélectionnez directement l'alias ou l'ID souhaité.</li> <li>• Appuyez sur  ou  pour accéder à l'alias ou l'ID souhaité et appuyez sur  pour sélectionner.</li> <li>• Utilisez le menu Numérotation manuelle.</li> <li>• Appuyez sur  ou  pour accéder à l'option Num. manuelle et appuyez sur  pour sélectionner.</li> </ul>

Comman des de la radio	Étapes
	<ul style="list-style-type: none"> <li>Appuyez sur  ou  pour accéder à l'option Numéro radio et appuyez sur  pour sélectionner.</li> <li>La première ligne de l'écran affiche Numéro radio :. La deuxième ligne de l'écran affiche un curseur clignotant. Utilisez le clavier pour saisir l'alias ou l'ID du terminal, puis appuyez sur .</li> </ul> <p><b>d</b> Appuyez sur  ou  pour accéder à l'option Désactiver</p>

Comman des de la radio	Étapes
	<p>radio et appuyez sur  pour sélectionner.</p>

L'écran affiche Désactiver radio : <alias ou ID cible> et la LED clignote en vert.

## 2 Attendez l'accusé de réception.

Si l'opération réussit, une tonalité d'indication positive est émise et l'écran affiche Désact. radio réussi.

Si l'opération échoue, une tonalité d'indication négative est émise et l'écran affiche Désact. radio échoué.

## Radio Enable

- 1 Accédez à cette fonction en effectuant l'une des opérations suivantes :

Commandes de la radio	Étapes
<b>Bouton Activer radio</b>	<p><b>a</b> Appuyez sur le bouton <b>Activer radio</b> programmé.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'alias ou l'ID souhaité et appuyez sur  pour sélectionner.</p>
<b>Menu de la radio</b>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option <b>Contacts</b> et appuyez sur  pour sélectionner. Les entrées sont classées par ordre alphabétique.</p> <p><b>c</b> Suivez l'une des procédures ci-dessous pour</p>

Commandes de la radio	Étapes
	<p>saisir l'alias ou l'ID du terminal, puis appuyez sur .</p> <p><b>d</b> Appuyez sur  ou  pour accéder à l'option Activer radio et appuyez sur  pour sélectionner.</p>

L'écran affiche Activer radio : <alias ou ID de terminal et la LED s'allume en vert fixe.

## 2 Attendez l'accusé de réception.

Si l'opération réussit, une tonalité d'indication positive est émise et l'écran affiche Activer radio réussi.

Si l'opération échoue, une tonalité d'indication négative est émise et l'écran affiche Activer radio échoué.

## Fonctionnement Bluetooth

### REMARQUE:

Si cette option est désactivée via CPS, toutes les fonctionnalités associées au Bluetooth sont désactivées et la base de données de l'appareil Bluetooth est effacée.

Cette fonction vous permet d'utiliser votre radio avec un appareil (accessoire) Bluetooth par le biais d'une connexion Bluetooth sans fil. Votre radio prend en charge les dispositifs Bluetooth de marque Motorola Solutions et d'autres marques disponibles sur le marché.

Le Bluetooth offre une portée de 10 mètres avec une visibilité directe. Pour bénéficier de cette portée, aucun obstacle ne doit gêner la communication entre votre radio et votre appareil Bluetooth.

Il est déconseillé de trop séparer votre radio de votre appareil Bluetooth : celui-ci ne fonctionnerait pas normalement.

Lorsque la limite de réception approche, la voix et la qualité sonore se détériorent et les hachures sont de plus en plus fréquentes. Pour corriger ce problème, rapprochez tout simplement la radio et l'appareil Bluetooth (à moins de 10 mètres) afin de retrouver une bonne réception. La

fonction Bluetooth de votre radio présente une puissance maximale de 2,5 mW (4 dBm) sur 10 mètres.

Votre radio peut prendre en charge jusqu'à 4 connexions Bluetooth simultanées avec différents types de dispositifs Bluetooth. Par exemple, un casque et un boîtier PTT (POD). Des connexions avec plusieurs appareils Bluetooth d'un même type ne sont pas possibles.

Veillez consulter le manuel d'utilisation de votre appareil Bluetooth pour connaître ses capacités intégrales.

## Activation et désactivation de la radio Bluetooth

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

- 3 Appuyez sur  ou  pour accéder à l'option Mon État et appuyez sur  pour sélectionner. L'écran affiche Activé et Désactivé. L'état actuel est indiqué par un symbole .

4 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option Activé et appuyez sur  pour sélectionner. L'écran affiche Activé et un symbole  apparaît à gauche de l'état sélectionné.
- Appuyez sur  ou  pour accéder à l'option Désactivé et appuyez sur  pour sélectionner. L'écran affiche Désactivé et un symbole  apparaît à gauche de l'état sélectionné.

## Recherche et connexion à un appareil Bluetooth

Vous ne devez pas éteindre votre appareil Bluetooth ou appuyer sur  pendant l'opération de recherche et de connexion, sinon l'opération sera annulée.

- 1 Allumez votre appareil Bluetooth et mettez-le en mode Appariement. Consultez le manuel d'utilisation de l'appareil Bluetooth.
- 2 Sur votre radio, appuyez sur  pour accéder au menu.
- 3 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.
- 4 Appuyez sur  ou  pour accéder à l'option Appareils et appuyez sur  pour sélectionner.
- 5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'appareil souhaité et appuyez sur  pour sélectionner.
- Appuyez sur  ou  pour accéder à l'option Recherche et localiser les appareils disponibles. Appuyez sur  ou  pour accéder à l'appareil souhaité et appuyez sur  pour sélectionner.

- 
- 6 Appuyez sur  ou  pour accéder à l'option Connecter et appuyez sur  pour sélectionner.
- L'écran affiche Connexion à <appareil>. D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour terminer l'appariement avec votre radio. Consultez le manuel d'utilisation de l'appareil Bluetooth.

---

Si l'opération réussit, l'écran de la radio affiche <Appareil>connecté. Une tonalité est émise et le symbole ✓ apparaît en regard de l'appareil connecté. L'icône Bluetooth connecté s'affiche sur la barre d'état.

En cas d'échec, l'écran de la radio affiche Connexion échouée.

## Recherche et connexion d'un appareil Bluetooth (mode Détectable)

N'éteignez pas votre Bluetooth ou votre radio durant la recherche et la connexion, car cela risque d'annuler l'opération.

- 1 Activez le Bluetooth.

Voir [Activation et désactivation de la radio Bluetooth à la page 329](#).

- 
- 2 Appuyez sur  pour accéder au menu.

- 
- 3 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.
-

- 4 Appuyez sur  ou  pour accéder à l'option **Me chercher** et appuyez sur  pour sélectionner. Votre radio est détectable par d'autres appareils Bluetooth compatibles pour une durée programmée. Il s'agit du mode Détectable.
- 

- 5 Activez votre appareil Bluetooth compatible et coupez-le à votre radio. Consultez le manuel d'utilisation de l'appareil Bluetooth.
- 

## Déconnexion d'un appareil Bluetooth

- 1 Sur votre radio, appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou  pour accéder à l'option **Bluetooth** et appuyez sur  pour sélectionner.
- 

- 3 Appuyez sur  ou  pour accéder à l'option **Appareils** et appuyez sur  pour sélectionner.
- 

- 4 Appuyez sur  ou  pour accéder à l'appareil souhaité et appuyez sur  pour sélectionner.
- 

- 5 Appuyez sur  ou  pour accéder à l'option **Déconnecter** et appuyez sur  pour sélectionner. L'écran affiche **Déconnexion... <appareil>**. D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour le déconnecter. Consultez le manuel d'utilisation de l'appareil Bluetooth.
- 

La radio affiche **<appareil> déconnecté**. Une tonalité d'indication positive est émise et le symbole  disparaît en regard de l'appareil connecté. L'icône Bluetooth connecté n'est plus affichée sur la barre d'état.

## Basculement du routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth

Vous pouvez faire basculer le routage audio entre le haut-parleur interne de la radio et l'accessoire externe Bluetooth.

Appuyez sur le bouton programmé **Commutateur audio Bluetooth**.

- Une tonalité est émise et l'écran affiche Rout. Audio vers Radio.
- Une tonalité est émise et l'écran affiche Rout. Audio vers Bluetooth.

## Affichage des détails de l'appareil

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

- 3 Appuyez sur  ou  pour accéder à l'option Appareils et appuyez sur  pour sélectionner.
- 4 Appuyez sur  ou  pour accéder à l'appareil souhaité et appuyez sur  pour sélectionner.
- 5 Appuyez sur  ou  pour accéder à l'option Voir détails et appuyez sur  pour sélectionner.

## Suppression du nom de l'appareil

Vous pouvez supprimer un appareil déconnecté de la liste des appareils Bluetooth.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Appareils et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'appareil souhaité et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option Supprimer et appuyez sur  pour sélectionner. L'écran affiche Appareil supprimé.

---

## Gain micro Bluetooth

Permet de contrôler la valeur de gain du microphone de l'appareil Bluetooth connecté.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Gain mic. BT et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder au type de gain micro BT et aux valeurs actuelles.

Pour modifier les valeurs, appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour augmenter ou diminuer les valeurs et appuyez sur  pour sélectionner.

---

## Localisation en intérieur

### REMARQUE:

La fonctionnalité Localisation en intérieur s'applique pour les modèles dotés de la dernière version du logiciel et du matériel. Consultez votre fournisseur ou administrateur système pour en savoir plus.

La localisation en intérieur permet d'effectuer un suivi de la localisation des utilisateurs radio. Lorsque la localisation en intérieur est activée, la radio est en mode détectable limité. Des balises dédiées sont utilisées pour localiser la radio et déterminer sa position.

## Activation ou désactivation de la localisation en intérieur

Vous pouvez activer ou désactiver la localisation en intérieur en procédant de l'une des manières suivantes.

- Accédez à cette fonction via le menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.
  - c. Appuyez sur  ou  pour accéder à l'option Localisation en intérieur et appuyez sur  pour sélectionner.

- d. Appuyez sur  pour activer la localisation en intérieur.

L'écran affiche *Localis. intér. activée*. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
- En cas d'échec, l'écran affiche *Échec activation*. Une tonalité d'indication positive retentit.

- e. Appuyez sur  pour désactiver la localisation en intérieur.

L'écran affiche *Localis. intér. désactivée*. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.

- En cas d'échec, l'écran affiche **Échec désactivation**. Une tonalité d'indication positive retentit.
- Accédez à cette fonctionnalité à l'aide du bouton programmable.
  - a. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour activer la localisation en intérieur.

L'écran affiche **Localis. intér. activée**. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
  - En cas d'échec, l'écran affiche **Échec activation**. En cas d'échec, une tonalité d'indication négative retentit.
- b. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour désactiver la localisation en intérieur.

L'écran affiche **Localis. intér. désactivée**. Vous entendez une tonalité d'indication positive.

L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.
- En cas d'échec, l'écran affiche **Échec désactivation**. En cas d'échec, une tonalité d'indication négative retentit.

## Accès aux informations sur les balises de localisation en intérieur

Suivez la procédure ci-après pour accéder aux informations sur les balises de localisation en intérieur.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Localisation en intérieur et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Balises et appuyez sur  pour sélectionner.

L'écran affiche les informations relatives aux balises.

## Liste des notifications

Votre radio gère une liste des notifications qui indique les éléments « non lus » sur le canal, tels que les messages texte, les appels manqués et les avertissements d'appel.

L'icône Notification est affichée sur la barre d'état lorsque la liste des notifications contient un ou plusieurs événements.

Elle peut contenir jusqu'à 40 événements non lus. Lorsque la liste est pleine, le prochain événement remplace automatiquement le plus ancien.

### REMARQUE:

après leur lecture, les événements sont supprimés de la liste des notifications.

[Envoyer un commentaire](#)

## Accès à la liste des notifications

Suivez la procédure ci-après pour accéder à la liste des notifications.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Notification et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'événement souhaité et appuyez sur  pour sélectionner.

Exercez une pression longue sur  pour revenir à l'écran d'accueil.

## Fonctionnement Wi-Fi

Wi-Fi® est une marque déposée de Wi-Fi Alliance®.

### REMARQUE:

Cette fonctionnalité s'applique uniquement aux modèles DM4601e .

Cette fonction vous permet de configurer un réseau Wi-Fi et de vous y connecter. Wi-Fi prend en charge les mises à jour du micrologiciel (firmware), du codeplug et des ressources de la radio, par exemple les packs linguistiques et annonces vocales.

## Activation/désactivation du Wi-Fi

Le bouton programmé **Wi-Fi activé ou désactivé** est attribué par votre revendeur ou administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Selon les besoins de l'utilisateur, il est possible de personnaliser les annonces vocales pour le bouton **Wi-Fi activé ou désactivé** programmé via CPS. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Vous pouvez activer ou désactiver le Wi-Fi en procédant de l'une des manières suivantes.

- Appuyez sur le bouton programmé **Wi-Fi activé ou désactivé**. Une annonce vocale indique l'activation du Wi-Fi ou la désactivation du Wi-Fi.

- Accédez à cette fonction par le biais du menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à Wi-Fi et appuyez sur  pour sélectionner.
  - c. Appuyez sur  ou  pour accéder à Wi-Fi On et appuyez sur  pour sélectionner.

Appuyez sur  pour activer le Wi-Fi. L'écran affiche ✓ en regard de l'option **Activé**.

Appuyez sur  pour désactiver le Wi-Fi. ✓ ne s'affiche plus en regard d'**Activé**.

## Connexion à un point d'accès réseau

Lorsque vous activez le Wi-Fi, la radio effectue un balayage et se connecte à un point d'accès réseau.

Vous pouvez également vous connecter à un point d'accès réseau à l'aide du menu.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à Wi-Fi et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à un point d'accès réseau et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à `Connecter` et appuyez sur  pour sélectionner.

---

- 6 Saisissez le mot de passe et appuyez sur  .

Une fois la connexion établie, un avis s'affiche sur la radio et le point d'accès réseau est enregistré dans la liste des profils.

## Vérification de l'état de la connexion Wi-Fi

Pour vérifier l'état de la connexion Wi-Fi, procédez comme suit.

Appuyez sur le bouton programmé **Requête d'état Wi-Fi** pour être informé de l'état de la connexion par le biais d'une annonce vocale. Une annonce vocale indique Wi-Fi désactivé, Wi-Fi activé sans connexion ou Wi-Fi activé avec connexion.

- L'écran affiche `Wi-Fi Off` lorsque le Wi-Fi est désactivé.
- L'écran affiche `Wi-Fi On, Connecté` lorsque la radio est connectée à un réseau.
- L'écran affiche `Wi-Fi On, Déconnecté` lorsque le Wi-Fi est activé et que la radio n'est connectée à aucun réseau.

Selon les besoins de l'utilisateur, il est possible de personnaliser les annonces vocales des résultats des requêtes d'état Wi-Fi via CPS. Consultez votre fournisseur ou administrateur système pour en savoir plus.

**REMARQUE:**

Le bouton préprogrammé **Requête d'état Wi-Fi** est attribué par votre revendeur ou administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

## Actualisation de la liste de réseaux

Suivez la procédure ci-après pour actualiser la liste des réseaux.

- Effectuez les opérations suivantes pour actualiser la liste des réseaux par le biais du menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

c. Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

Lorsque vous entrez dans le menu Réseaux, la radio actualise automatiquement la liste des réseaux.

- Si vous êtes déjà dans le menu Réseaux, effectuez l'action suivante pour actualiser la liste des réseaux.

Appuyez sur  ou  pour accéder à Actualiser et appuyez sur  pour sélectionner.

La radio s'actualise et affiche la liste des réseaux la plus récente.

## Ajout d'un réseau

Si un réseau préféré n'apparaît pas dans la liste des réseaux disponibles, procédez de la manière suivante pour ajouter un réseau.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à Ajouter réseau et appuyez sur  pour sélectionner.

---

5 Saisissez l'identifiant SSID (Service Set Identifier) et appuyez sur  .

---

6 Appuyez sur  ou  pour accéder à Ouvrir et appuyez sur  pour sélectionner.

---

7 Saisissez le mot de passe et appuyez sur  .  
La radio affiche un mini-avis positif pour indiquer que le réseau est correctement enregistré.

---

## Affichage des détails des points d'accès réseau

Procédez comme suit pour afficher les détails des points d'accès réseau.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à un point d'accès réseau et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à Voir détails et appuyez sur  pour sélectionner.

Pour un point d'accès réseau connecté, les informations suivantes s'affichent : identifiant SSID (Service Set Identifier), mode de sécurité, adresse MAC (Media Access Control) et adresse IP (Internet Protocol).

Pour un point d'accès réseau non connecté, les informations suivantes s'affichent : identifiant SSID (Service Set Identifier) et mode de sécurité.

- 3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

- 4 Appuyez sur  ou  pour accéder au point d'accès réseau sélectionné et appuyez sur  pour sélectionner.

- 5 Appuyez sur  ou  pour accéder à Supprimer et appuyez sur  pour sélectionner.

- 6 Appuyez sur  ou  pour accéder à Oui et appuyez sur  pour sélectionner.

La radio affiche un mini-avis positif pour indiquer que le point d'accès réseau sélectionné est bien supprimé.

## Suppression de points d'accès réseau

Effectuez les opérations suivantes pour supprimer les points d'accès réseau de la liste des profils.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

## Fonctions utilitaires

Ce chapitre présente les fonctions de configuration/infos disponibles sur votre radio.

### Activation/Désactivation des tonalités/avertissements

Si nécessaire, vous pouvez activer/désactiver toutes les tonalités et tous les avertissements de votre radio (sauf l'avertissement d'urgence entrant).

Appuyez sur le bouton **Toutes tonalités/avertissements** programmé pour activer ou désactiver toutes les tonalités, ou suivez la procédure décrite ci-dessous pour accéder à cette fonction via le menu de la radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Tnlés/Avert. et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à l'option Toutes Tnlés et appuyez sur  pour sélectionner.

---

- 6 Appuyez sur  pour activer/désactiver toutes les tonalités et tous les avertissements.  
L'écran affiche ✓ en regard de l'option Activé.  
✓ ne s'affiche plus en regard d'Activé.

---

## Réglage de l'écart du volume de la tonalité d'avertissement

Si nécessaire, vous pouvez régler l'Écart du volume de la tonalité d'avertissement. Cette fonction permet de régler le volume des tonalités/avertissements à un niveau supérieur ou inférieur à celui du volume voix.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Tnlés/Avvert. et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à l'option Écart Vol. et appuyez sur  pour sélectionner.

---

- 6 Appuyez sur  ou  pour accéder à la valeur de volume souhaitée.  
Vous entendez une tonalité correspondant à chaque niveau du volume.

---

- 7 Effectuez l'une des opérations suivantes :
  - Appuyez sur  pour confirmer la valeur de volume affichée.
  - Appuyez sur  pour quitter sans faire de modification.

---

## Activation/Désactivation de la tonalité Parler autorisé

Si nécessaire, vous pouvez activer et désactiver la tonalité Parler autorisé.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Tnlés./Avert. et appuyez sur  pour sélectionner.

- 5 Appuyez sur  ou  pour accéder à l'option Tnlé Autoris. et appuyez sur  pour sélectionner.

- 6 Appuyez sur  pour activer/désactiver la tonalité d'autorisation.  
L'écran affiche  en regard de l'option Activé.  
 ne s'affiche plus en regard d'Activé.

## Activation/désactivation de la tonalité de mise sous tension

Vous pouvez activer ou désactiver la tonalité de mise sous tension si nécessaire.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

- 3 Appuyez sur  ou  pour accéder à l'option

Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option

Tntés/Avert. et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à Mise s.

tension et appuyez sur  pour sélectionner.

---

- 6 Appuyez sur  pour activer/désactiver la tonalité d'alerte de mise sous tension.

L'écran affiche  en regard de l'option Activé.

 ne s'affiche plus en regard d'Activé.

---

## Réglage du niveau de puissance

Vous pouvez personnaliser le niveau de puissance de votre radio en sélectionnant Élevé ou Faible pour chaque zone Connect Plus.

Haute permet la communication avec des sites de tours en mode Connect Plus pouvant être considérablement éloignés de vous. Basse permet de communiquer avec des sites de tours à proximité en mode Connect Plus.

Appuyez sur le bouton **Niv. puissance** préprogrammé pour passer du niveau d'émission élevé à faible et vice-versa.

Suivez la procédure décrite ci-dessous pour accéder à cette fonction via le menu de la radio.

- 1 Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou  pour accéder à Config/Infos et appuyez sur  pour sélectionner.
- 

- 3 Appuyez sur  ou  pour accéder à Config. radio et appuyez sur  pour sélectionner.
-

4 Appuyez sur  ou  pour accéder à Puissance et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option au paramètre souhaité et appuyez sur  pour sélectionner.

✓ s'affiche en regard du paramètre sélectionné. À tout moment, appuyez de manière prolongée sur

 pour revenir à l'écran d'accueil.

L'écran affiche automatiquement le menu précédent.

---

## Modification du mode Jour/Nuit

Vous pouvez changer le mode d'affichage entre Jour ou Nuit, si nécessaire. Ce mode modifie la gamme des couleurs affichées.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Afficheur et appuyez sur  pour sélectionner. L'écran affiche Mode Jour et Mode Nuit.

---

5 Appuyez sur  ou  pour accéder au réglage souhaité et appuyez sur  pour l'activer. ✓ s'affiche en regard du paramètre sélectionné.

---

## Réglage de la luminosité de l'écran

Selon vos besoins, vous pouvez ajuster la luminosité de l'écran de la radio.

### REMARQUE:

La luminosité ne peut pas être ajustée lorsque la fonctionnalité Luminosité auto est activée.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Afficheur et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à l'option Luminosité et appuyez sur  pour sélectionner. L'écran affiche une barre de progression.

- 6 Diminuez ou augmentez la luminosité de l'écran en appuyant, respectivement, sur  ou . Sélectionnez un paramètre de 1 à 8. Appuyez sur  pour confirmer votre sélection.

## Activation/Désactivation de l'écran Introduction

Si nécessaire, vous pouvez activer et désactiver l'écran Introduction.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Afficheur et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option Écran intro. et appuyez sur  pour sélectionner.

---

6 Appuyez sur  pour activer/désactiver l'écran d'introduction.  
L'écran affiche  en regard de l'option Activé.  
 ne s'affiche plus en regard d'Activé.

---

## Langue

Vous pouvez choisir la langue d'affichage de votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config./Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Langue et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à la langue souhaitée et appuyez sur  pour l'activer.  s'affiche en regard de la langue sélectionnée.

---

## Activation/Désactivation de l'indicateur LED

Si nécessaire, vous pouvez activer et désactiver l'indicateur LED de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Voyant LED et appuyez sur  pour sélectionner.

- 5 Appuyez sur  pour activer/désactiver l'indicateur LED.  
L'écran affiche  en regard de l'option Activé.  
 ne s'affiche plus en regard d'Activé.

## Identification du type de câble

Vous pouvez choisir le type de câble connecté à votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Type câble et appuyez sur  pour sélectionner.

5 Le type de câble actuel est indiqué par un symbole ✓.

## Annonce vocale

Cette fonction permet à la radio d'indiquer oralement le canal ou la zone attribuée par l'utilisateur ou une pression sur un bouton programmable. L'indication audio peut être personnalisée par l'utilisateur. Cela s'avère particulièrement utile lorsque l'utilisateur ne peut pas aisément lire l'écran de la radio.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Annonce vocale et appuyez sur  pour sélectionner.

Vous pouvez également utiliser  ou  pour modifier l'option sélectionnée.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour activer la fonction Annonce vocale. L'écran affiche ✓ en regard de l'option Activé.
- Appuyez sur  pour désactiver la fonction Annonce vocale. ✓ ne s'affiche plus en regard d'Activé.

## Délai menu

Permet de régler la durée d'ouverture du menu avant le retour automatique à l'écran de base.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Afficheur et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à l'option Délai Menu et appuyez sur  pour sélectionner.

- 6 Appuyez sur  ou  pour accéder au paramètre souhaité et appuyez sur  pour sélectionner.

## Activation/désactivation de l'avertisseur/des phares

Cette fonction doit être installée par votre fournisseur à l'aide du connecteur d'accessoire arrière de votre radio.

Votre radio peut vous avertir de la réception d'un appel avec la fonction d'avertisseurs/éclairage. Si vous activez cette fonction, un appel entrant déclenchera l'avertisseur et les phares de votre véhicule.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmé **Avert./phares** pour activer et désactiver cette fonction. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Avert. et phares et appuyez sur  pour sélectionner.

---

5 Appuyez sur  pour activer/désactiver l'option Avert./phares.  
L'écran affiche  en regard de l'option Activé.  
 ne s'affiche plus en regard d'Activé.

---

## Configuration du sélecteur à double fonction

Votre radio dispose d'un **sélecteur Volume/Canal** à double fonction. Lorsque la double fonction est désactivée, ce bouton sert uniquement à régler le volume sonore.

1  pour accéder au menu.

---

2  ou  pour accéder à Config/Infos et appuyez sur  pour sélectionner.

---

3  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4  ou  pour accéder à l'option Double sélect. et appuyez sur  pour sélectionner.

---

5 L'écran affiche **Volume uniq.** et **Volume&Canal**.

 ou  jusqu'au paramètre souhaité et

appuyez sur  pour sélectionner.

✓ s'affiche en regard du paramètre sélectionné.

L'écran affiche automatiquement le menu précédent.

---

## Micro AGC numérique (Mic AGC-D)

Cette fonctionnalité contrôle automatiquement le gain du microphone de votre radio lors de la transmission sur un système numérique. Elle réduit les sons trop forts et augmente les sons faibles selon une valeur prédéfinie de façon à offrir un niveau sonore constant.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option **Config/Infos** et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option **Config. radio** et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option **Mic CGA-D** et appuyez sur  pour sélectionner.

---

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour activer **Mic CGA-D**. L'écran affiche ✓ en regard de l'option **Activé**.
  - Appuyez sur  pour désactiver **Mic CGA-D**. La coche ✓ n'apparaît plus en regard de l'option **Activé**.
- 

## Audio intelligent

Votre radio peut automatiquement ajuster son volume de façon à couvrir un bruit de fond, notamment des sources sonores stationnaires et non stationnaires. Cette fonction

est uniquement dédiée à la réception et ne concerne pas l'émission audio.

- 1 Appuyez sur  pour accéder au menu.

Commandes de la radio	Étapes
<p><b>Menu</b></p>	<p><b>a</b> Appuyez sur  pour accéder au menu.</p> <p><b>b</b> Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.</p> <p><b>c</b> Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.</p>

## Commandes de la radio

## Étapes

- d** Appuyez sur  ou  pour accéder à l'option Audio intelligent et appuyez sur  pour sélectionner.
-  **REMARQUE:** Vous pouvez également utiliser  ou  pour modifier l'option sélectionnée.
- e** Effectuez l'une des opérations suivantes :
- Appuyez sur  pour activer l'option Audio intelligent. L'écran affiche  en regard de l'option Activé.

Commandes de la radio	Étapes
	<ul style="list-style-type: none"> <li>Appuyez sur  pour désactiver l'option Audio intelligent. ✓ ne s'affiche plus en regard d'Activé.</li> </ul>

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Audio intelligent et appuyez sur  pour sélectionner.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour activer l'option Audio intelligent. L'écran affiche ✓ en regard de l'option Activé.
- Appuyez sur  pour désactiver l'option Audio intelligent. ✓ ne s'affiche plus en regard d'Activé.

## Activation/Désactivation de la fonction du filtre anti-effet Larsen

Cette fonction permet de réduire l'effet Larsen dans les appels reçus.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Config. radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Réduction bruit et appuyez sur  pour sélectionner.

Vous pouvez également utiliser  pour modifier l'option sélectionnée.

---

5 Sélectionnez l'une des options suivantes :

- Appuyez sur  pour activer le supprimeur de réaction acoustique. L'écran affiche  en regard de l'option Activé.
  - Appuyez sur  pour désactiver le supprimeur de réaction acoustique.  ne s'affiche plus en regard d'Activé.
- 

## Activation/désactivation du GNSS

Le système GNSS (Global Navigation Satellite System, système mondial de navigation par satellite) est un système de navigation par satellite qui détermine la position exacte d'une radio. Le GNSS inclut le GPS (Global Positioning System) et le GLONASS (Global Navigation Satellite System).

### REMARQUE:

Certains modèles de radio peuvent proposer les fonctions GPS et GLONASS. La constellation GNSS est configurée à l'aide du CPS. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton programmé **GNSS** pour activer ou désactiver cette fonction. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.
-

2 Appuyez sur  ou sur  pour accéder à l'option `Config/Infos`. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option `Config. radio`. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option `GNSS`. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  pour activer/désactiver la fonction GNSS.

Si cette option est activée, le symbole  apparaît en regard de la mention `Activé`.

Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention `Activé`.

---

Consultez [Vérification des informations GNSS à la page 370](#) pour plus de détails sur la récupération des informations GNSS.

## Accès aux informations générales de la radio

Votre radio contient les données suivantes :

- Batterie
- Degré d'inclinaison (accéléromètre)
- Radio Model Number Index
- Contrôle de redondance cyclique du codeplug OTA (Over-the-Air) de la carte d'option
- Numéro du site
- Informations du site
- ID et alias de la radio
- Versions du firmware et du codeplug
- Informations GNSS

Appuyez sur  à tout moment pour revenir à l'écran précédent ou appuyez de manière prolongée sur .

pour revenir à l'écran d'accueil. La radio ferme l'écran actif dès que le compteur d'inactivité expire.

## Vérification du numéro d'index du modèle de la radio

Ce numéro d'index identifie le matériel du modèle de la radio. L'administrateur système de la radio peut demander ce numéro pour préparer un nouveau codeplug de carte d'option pour la radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option `Config/Infos` et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option `Infos radio` et appuyez sur  pour sélectionner.

- 4 Appuyez sur  ou  pour accéder à l'option `Index modèle` et appuyez sur  pour sélectionner.  
L'écran affiche le numéro d'index du modèle.

## Vérification du contrôle de redondance cyclique du fichier de codeplug OTA de la carte d'option

Suivez les instructions ci-dessous si l'administrateur système de la radio demande d'afficher le CRC (contrôle de redondance cyclique) du fichier de codeplug OTA (Over-The-Air) de la carte d'option. Cette option de menu s'affiche uniquement si la carte d'option a reçu sa dernière mise à jour du codeplug par liaison radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option `Config/Infos` et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option  
Infos radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option  
crcCP OTA OB et appuyez sur  pour  
sélectionner.

L'écran affiche des lettres et des chiffres.  
Communiquez exactement ces informations à  
l'administrateur système de la radio.

---

## Affichage de l'ID de site (numéro de site)

### REMARQUE:

Si vous n'êtes pas encore enregistré sur un site,  
l'écran affiche Non enregistré.

La radio affiche brièvement l'ID de site enregistré dans un  
site Connect Plus. Après l'enregistrement, la radio  
n'indique généralement pas le numéro de site. Pour

afficher le numéro de site enregistré, procédez comme  
suit :

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option  
Config/Infos et appuyez sur  pour  
sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option  
Infos radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option  
Numéro du site et appuyez sur  pour  
sélectionner.

L'écran affiche l'ID de réseau et le numéro du site.

---

## Vérification des informations du site

### REMARQUE:

Si vous n'êtes pas encore enregistré sur un site, l'écran affiche Non enregistré.

La fonction Info site fournit des informations pouvant être utiles à un technicien de maintenance. Elle comprend les informations suivantes :

- Numéro du relais de canal de contrôle actuel.
- RSSI : dernière valeur de puissance de signal mesurée à partir du relais de canal de contrôle.
- Liste des sites voisins envoyée par le relais de canal de contrôle (cinq chiffres séparés par des virgules).

S'il vous faut utiliser cette fonction, veuillez indiquer les informations telles qu'elles s'affichent à l'écran.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

- 3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Info site et appuyez sur  pour sélectionner. L'écran affiche les informations du site.

## Vérification de l'ID de la radio

Cette fonction affiche l'ID de votre radio.

Suivez la procédure décrite ci-dessous pour accéder à cette fonction via l'écran de la radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Mon ID et appuyez sur  pour sélectionner.  
L'écran affiche l'ID de radio.

---

## Vérification de la version du firmware et du codeplug

Affiche la version du firmware de la radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Versions et appuyez sur  pour sélectionner.  
L'écran affiche une liste contenant les informations suivantes :

- Version du firmware (radio)
  - Version du codeplug (radio)
  - Version du firmware de la carte d'option
  - Version de fréquence de la carte d'option
  - Version matérielle de la carte d'option
  - Version du codeplug de la carte d'option
- 

## Recherche des mises à jour

Connect Plus permet de mettre à jour certains fichiers (codeplug de la carte d'option, fichier de fréquence réseau et fichier de firmware de carte d'option) par liaison radio (OTA).

**REMARQUE:**

contactez le revendeur ou l'administrateur réseau pour déterminer si cette fonction est activée sur la radio.

Une radio Connect Plus avec écran peut afficher son contrôle CRC OTA Codeplug de carte d'option, la version du fichier de fréquence ou la version du fichier de firmware de carte d'option à l'aide d'une option de menu. En outre, les radios à écran sur lesquelles le transfert de fichier par liaison radio est activé peuvent afficher la version d'un « fichier en attente ». Un « fichier en attente » est un fichier de fréquence ou un fichier de micrologiciel (firmware) de carte d'option dont la radio Connect Plus a connaissance via la messagerie système, mais dont elle n'a pas collecté tous les paquets. S'il existe un fichier en attente pour une radio Connect Plus à écran, le menu contient des options permettant :

- d'afficher le numéro de version du fichier en attente ;
- d'afficher le pourcentage de paquets collectés jusqu'à présent ;
- de demander à la radio Connect Plus de poursuivre la collecte des paquets.

Si le transfert de fichier par liaison radio Connect Plus est activé sur la radio, il arrive que la radio effectue

automatiquement un transfert de fichier sans avertir l'utilisateur. Lorsque la radio collecte les paquets d'un fichier, l'indicateur LED rouge clignote rapidement et la radio affiche l'icône Données en volume élevé sur la barre d'état de l'écran de base.

**REMARQUE:**

la radio Connect Plus ne peut pas collecter les paquets d'un fichier et recevoir simultanément des appels. Si vous voulez annuler le transfert de fichier, appuyez sur le bouton **PTT** et relâchez-le. Dans ce cas, la radio demande d'appeler le contact sélectionné et elle annule le transfert de fichier temporairement avant de le reprendre.

Un transfert de fichier peut recommencer pour plusieurs raisons. Le premier exemple s'applique aux types de transferts de fichier par liaison radio. Les autres exemples ne s'appliquent qu'au network frequency file et au fichier de firmware de carte d'option :

- L'administrateur système de la radio relance le transfert de fichier par liaison radio.
- Le délai prédéfini de la carte d'option expire, ce qui amène la carte d'option à reprendre automatiquement la collecte des paquets.

- Le délai n'a pas encore expiré, mais l'utilisateur de la radio demande la reprise du transfert de fichier par le biais de l'option de menu.

Après que la radio Connect Plus a téléchargé tous les paquets du fichier, elle doit être mise à niveau vers le nouveau fichier obtenu. Pour le network frequency file, il s'agit d'un processus automatique qui ne nécessite pas de réinitialiser la radio. Pour le fichier de codeplug de carte d'option, il s'agit d'un processus automatique qui interrompt brièvement le service lorsque la carte d'option charge les nouvelles informations Codeplug et obtient de nouveau un site réseau. La durée de mise à niveau de la radio vers le nouveau fichier de firmware de carte d'option dépend de la manière dont la radio a été configurée par le revendeur ou l'administrateur système. La radio est mise à niveau dès la fin de la collecte des paquets ou lorsque vous la remettez sous tension.

### REMARQUE:

Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

La mise à niveau vers un nouveau fichier de firmware de carte d'option dure quelques secondes et la carte d'option Connect doit réinitialiser la radio. Lorsque la mise à niveau démarre, vous ne pouvez pas exécuter des appels ni en

recevoir tant qu'elle n'est pas terminée. Lors du processus, l'utilisateur est invité à ne pas éteindre la radio.

## Fichier de firmware

La section suivante fournit des informations sur le firmware de la radio.

### Micrologiciel à jour

#### REMARQUE:

si le fichier de firmware de la carte d'option n'est pas à jour (et si la radio a partiellement récupéré une version plus récente du fichier de firmware de carte d'option), la radio affiche une liste d'options supplémentaires : Version, Reçu et Télécharger.

1

Appuyez sur  pour accéder au menu.

---

2

Appuyez sur  ou  pour accéder à l'option

Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Mises à jour et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option Firmware et appuyez sur  pour sélectionner. L'écran affiche Firmware à jour.

---

## Micrologiciel en attente - Version

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option Mises à jour et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option Firmware et appuyez sur  pour sélectionner.

---

6 Appuyez sur  ou  pour accéder à l'option Version et appuyez sur  pour sélectionner.

Si un fichier de firmware de carte d'option est en attente, l'écran affiche le numéro de version de firmware en attente.

Si un fichier de firmware de carte d'option est en attente, l'écran affiche Firmware à jour.

---

## Micrologiciel en attente : % reçu

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option `Config/Infos` et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option `Infos radio` et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option `Mises à jour` et appuyez sur  pour sélectionner.

---

- 5 Appuyez sur  ou  pour accéder à l'option `Firmware` et appuyez sur  pour sélectionner.

---

- 6 Appuyez sur  ou  pour accéder à l'option `%reçu` et appuyez sur  pour sélectionner.  
L'écran affiche le pourcentage de paquets du fichier de firmware collectés jusqu'à présent.

### REMARQUE:

lorsque 100 % s'affiche, la radio doit être mise hors tension, puis sous tension pour mettre à niveau le firmware.

## Firmware en attente - Télécharger

Si la radio Connect Plus a téléchargé partiellement un fichier de firmware de carte d'option par liaison radio, la radio poursuit automatiquement le transfert de fichier (s'il est toujours en cours) lorsqu'un délai interne expire. Pour que la radio poursuive un transfert de fichier de firmware de carte d'option en cours avant l'expiration du délai interne, utilisez l'option de téléchargement, comme indiqué ci-dessous.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Mises à jour et appuyez sur  pour sélectionner.

5 Appuyez sur  ou  pour accéder à l'option Firmware et appuyez sur  pour sélectionner.

6 Appuyez sur  ou  pour accéder à l'option Télécharger et appuyez sur  pour sélectionner.  
L'écran affiche les données suivantes :

Téléchargement disponible	Lancer téléchargement
Aucun téléchargement disponible	Téléchargement indisponible

7 Effectuez l'une des opérations suivantes :

- Sélectionnez Oui et appuyez sur  pour lancer le téléchargement.
- Sélectionnez Non et appuyez sur  pour revenir au menu précédent.

## Fichier de fréquence

La section suivante fournit des informations sur le fichier de fréquence de la radio.

### Fichier de fréquence à jour

#### REMARQUE:

si le fichier de fréquence n'est pas à jour (et si la radio a partiellement récupéré une version plus récente du fichier de fréquence), la radio affiche une liste d'options supplémentaires : Version, Xregu et Télécharger.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

- 4 Appuyez sur  ou  pour accéder à l'option Fréquence et appuyez sur  pour sélectionner. L'écran affiche Fichier de fréq. à jour.

### Fichier de fréquence en attente - Version

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Mises à jour et appuyez sur  pour sélectionner.

5 Appuyez sur  ou  pour accéder à l'option Fréquence et appuyez sur  pour sélectionner.

---

6 Appuyez sur  ou  pour accéder à l'option Version et appuyez sur  pour sélectionner.

Si un fichier de fréquence est en attente, l'écran affiche le numéro de version du fichier de fréquence en attente.

---

4 Appuyez sur  ou  pour accéder à l'option Mises à jour et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'option %reçu et appuyez sur  pour sélectionner.

L'écran affiche le pourcentage de paquets collectés du fichier de fréquence jusqu'à présent.

---

### Fichier fréquence en attente - % reçu

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

---

### Fichier fréquence en attente - Télécharger

Si la radio Connect Plus a téléchargé partiellement un fichier de fréquence réseau par liaison radio, la radio poursuit automatiquement le transfert de fichier (s'il est toujours en cours) lorsqu'un délai interne expire. Pour que la radio poursuive un transfert de fichier de fréquence réseau en cours avant l'expiration du délai interne, utilisez l'option de téléchargement, comme indiqué ci-dessous.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Config/Infos et appuyez sur  pour sélectionner.

3 Appuyez sur  ou  pour accéder à l'option Infos radio et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à l'option Mises à jour et appuyez sur  pour sélectionner.

5 Appuyez sur  ou  pour accéder à l'option Fréquence et appuyez sur  pour sélectionner.

6 Appuyez sur  ou  pour accéder à l'option Télécharger et appuyez sur  pour sélectionner.

7 Effectuez l'une des opérations suivantes :

- Sélectionnez Oui pour lancer le téléchargement.
- Sélectionnez Non pour revenir au menu précédent.

## Vérification des informations GNSS

Cette fonction affiche les informations GNSS de votre radio, et inclut les valeurs suivantes :

- Latitude
- Longitude

- Altitude
- Direction
- Vitesse
- Coefficient d'affaiblissement de la précision sur la composante horizontale du positionnement (HDOP)
- Satellites
- Version

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option `Config/Infos` et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à l'option `Infos radio` et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à l'option `Infos GNSS` et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à l'élément souhaité et appuyez sur  pour sélectionner. L'écran affiche les informations GNSS demandées.

---

Pour plus d'informations sur la fonction GNSS, reportez-vous à la section [Activation/désactivation du GNSS à la page 357](#).

Cette page a été laissée vide de manière intentionnelle.

## Autres systèmes

Les fonctionnalités à disposition des utilisateurs radio dans ce système sont abordées dans ce chapitre.

### Bouton Push-to-Talk

Le bouton **PTT** (Push-to-talk) comprend deux fonctions de base :

- Pendant un appel, le bouton **PTT** permet à la radio d'émettre vers d'autres radios participant à cet appel. Le microphone est activé lorsque vous appuyez sur le bouton **PTT**.
- Lorsqu'il n'y a pas d'appel en cours, le bouton **PTT** sert à effectuer un nouvel appel.

Exercez une pression longue sur le bouton **PTT** pour parler. Relâchez le bouton **PTT** pour écouter.

Si la tonalité d'autorisation ou la tonalité locale PTT  est activée, attendez la fin de la tonalité d'alerte courte avant de parler.

 Si la fonction d'indication de canal libre est activée sur votre radio (programmée par votre revendeur), une brève tonalité d'alerte est émise lorsque le bouton **PTT** est

relâché par le destinataire. Cette tonalité confirme que le canal est libre et que vous pouvez parler.

 Vous entendez une tonalité Interdiction continue si votre appel est interrompu. Vous devez relâcher le bouton **PTT** si vous entendez une tonalité d'interdiction continue.

### Boutons programmables

Votre fournisseur peut programmer les boutons programmables en fonction de la durée de pression, pour vous permettre d'accéder directement à des fonctions radio.

#### Pression courte

Vous appuyez sur le bouton et relâchez rapidement.

#### Pression longue

Vous appuyez sur le bouton et vous le maintenez enfoncé pendant la durée programmée.

#### REMARQUE:

Reportez-vous à [Gestion de l'urgence à la page 457](#) pour plus d'informations sur la durée programmée du bouton **Urgence**.

## Fonctions radio attribuables

Les fonctions radio suivantes peuvent être attribuées à des boutons programmables.

### Ambiance audio

Permet à l'utilisateur de choisir un environnement de fonctionnement pour la radio.

### Profils audio

Permet à l'utilisateur de choisir le profil audio.

### Commutateur® audio Bluetooth

Bascule le routage audio entre le haut-parleur interne de la radio et l'accessoire externe Bluetooth.

### Connexion Bluetooth

Lance une recherche et établit la connexion Bluetooth.

### Déconnexion Bluetooth

Met fin à toutes les connexions Bluetooth établies entre la radio et les périphériques compatibles Bluetooth.

### Détection Bluetooth

Active le mode découverte Bluetooth pour votre radio.

### Alerte d'appel

Vous donne un accès direct au répertoire pour sélectionner un contact à qui vous souhaitez envoyer un avertissement d'appel.

### Transfert d'appel

Active ou désactive le transfert d'appel.

### Journal d'appels

Sélectionne le journal d'appels.

### Annonce de canal

Émet les messages d'annonce vocale de zone et de canal pour le canal courant.

### Contacts

Fournit un accès direct au répertoire.

### Urgence

Selon la programmation, cette fonction lance ou annule une alarme ou un appel d'urgence.

### Audio public externe (AP)

Permet de basculer le routage audio entre la sonorisation AP connectée et le système AP interne de la radio.

### Localisation en intérieur

Active ou désactive la localisation en intérieur.

### Audio intelligent

Active ou désactive l'audio intelligent.

### Numérotation manuelle

Lance un appel individuel en saisissant un ID de terminal.

**Itinérance de site manuelle<sup>5</sup>** 

Lance la recherche manuelle de site.

**CGA micro**

Active ou désactive la commande de gain automatique (CGA) du microphone interne.

**Écoute**

Écoute l'activité sur un canal sélectionné.

**Notifications**

Permet d'accéder directement à la liste des notifications.

**Suppression d'un canal nuisible<sup>5</sup>**

Supprime temporairement un canal indésirable dans la liste de balayage, sauf le canal sélectionné. Le canal sélectionné correspond à la combinaison de zone ou canal sélectionnée par l'utilisateur à partir de laquelle le balayage a débuté.

**Accès par numérotation rapide** 

Lance directement un appel individuel, téléphonique ou de groupe prédéfini, un avertissement d'appel prédéfini, un message texte rapide prédéfini ou un canal désigné prédéfini.

**Fonction de carte d'option**

Active ou désactive les fonctions de la carte d'option sur les canaux qui les utilisent.

**Surveillance permanente<sup>5</sup>**

Écoute le trafic sur un canal sélectionné jusqu'à ce que la fonction soit désactivée.

**Téléphone** 

Permet d'accéder directement au répertoire téléphonique.

**Confidentialité** 

Active ou désactive la fonction de cryptage.

**Audio public (AP)**

Active ou désactive le système AP interne de la radio.

**ID et alias de la radio**

Fournit l'ID et l'alias de la radio.

**Vérifier radio** 

Détermine si une radio est active dans un système.

**Radio Disable** 

Permet la désactivation à distance d'une radio cible.

**Radio Enable** 

Permet l'activation à distance d'une radio cible.

---

<sup>5</sup> Non applicable à Capacity Plus.

### Écoute ambiance

Active le microphone d'une radio sans activer d'indicateur.

### Relais/Direct<sup>5</sup>

Permet de basculer entre l'utilisation d'un relais et la communication directe avec une autre radio.

### Réinitialiser le canal d'accueil

Définit un nouveau canal d'accueil.

### Éteindre le rappel de canal d'accueil

Désactive le rappel de canal d'accueil.

### Balayage<sup>6</sup>

Active ou désactive le balayage.

### Informations du site

Affiche l'ID et le nom du site actuel de Capacity Plus-Multisite.

Lit des messages vocaux d'annonce de site pour le site actuel lorsque le mode Annonce vocale est activé.

### Verrouillage site<sup>5</sup>

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle

est désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

### Contrôle de télémétrie

Contrôle la broche de sortie sur une radio locale ou distante.

### Text Message

Sélectionne le menu de message texte.

### Transmettre la clé d'interruption à distance

Met fin à un appel interruptible en cours pour libérer le canal.

### Amélioration trille

Active ou désactive l'amélioration des sons vibrants.

### Act./désact. Annonce vocale

Active ou désactive l'annonce vocale.

### Émission activée par la voix (VOX)

Active ou désactive la voix (VOX).

### Wi-Fi

Active et désactive le Wi-Fi.

### Zone Selection

Permet d'effectuer une sélection dans une liste de zones.

---

<sup>6</sup> Non applicable à Capacity Plus - Site unique.

## Fonctions utilitaires ou paramètres attribuables

Les fonctions utilitaires ou paramètres radio suivants peuvent être attribués à des boutons programmables.

### Tones/Alerts

Active ou désactive l'ensemble des tonalités et avertissements.

### Rétroéclairage

Active/désactive le rétro-éclairage.

### Canal Haut/Bas

Selon la programmation, le canal précédent ou suivant est sélectionné.

### Mode Affichage

Active ou désactive le mode Jour/Nuit de l'écran.

### Niveau de puissance

Passe du niveau d'émission élevé à faible et vice-versa.

## Accès aux fonctions préprogrammées

Suivez la procédure ci-après pour accéder aux fonctions préprogrammées de votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton programmé. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

2

Appuyez sur  ou sur  pour accéder à la fonction de menu, puis appuyez sur  pour sélectionner une fonction ou ouvrir un sous-menu.

3 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour revenir à l'écran précédent.
- Exercez une pression longue sur  pour revenir à l'écran d'accueil.

Après une période d'inactivité prédéterminée, votre radio ferme automatiquement le menu et revient à l'écran d'accueil.

Les boutons de navigation du menu sont aussi disponibles sur le microphone à clavier. Voir [Boutons du microphone à clavier à la page 44](#).

## Indicateurs d'état

Ce chapitre présente les indicateurs d'état et les tonalités audio utilisés sur la radio.

### Icônes

L'écran à cristaux liquides (LCD) affiche l'état de votre radio, les entrées textuelles et les entrées du menu.

#### Tableau 9: Icônes de l'écran

Les icônes suivantes apparaissent sur la barre d'état, en haut de l'écran de la radio. Les icônes sont classées sur la gauche par ordre d'apparition ou d'utilisation et sont spécifiques à chaque canal.

	<p><b>Bluetooth connecté</b> La fonction Bluetooth est activée. L'icône reste affichée lorsqu'un appareil Bluetooth distant est connecté.</p>
	<p><b>Bluetooth Non connecté</b> La fonction Bluetooth est activée, mais aucun appareil Bluetooth distant n'est connecté.</p>
	<p><b>Journal d'appels</b> Journal des appels radio.</p>
	<p><b>Contact</b> Le contact radio est disponible.</p>
	<p><b>Urgence</b> La radio est en mode Urgence.</p>
	<p><b>Liste de réception flexible</b> La liste de réception flexible est activée.</p>

Tableau (suite)...

	<b>GNSS disponible</b>  La fonctionnalité GNSS est activée. L'icône reste allumée lorsqu'une position peut être déterminée.
	<b>GNSS non disponible</b>  La fonctionnalité GNSS est activée, mais votre radio ne reçoit pas de données du satellite.
	<b>Données en volume élevé</b> La radio reçoit des données en volume élevé et le canal est occupé.
	<b>Localisation en intérieur disponible</b> <sup>7</sup> L'état Localisation en intérieur est activé et disponible.
	<b>Localisation en intérieur non disponible</b> <sup>7</sup> L'état Localisation en intérieur est activé, mais il n'est pas disponible en raison de la désactivation du

Tableau (suite)...

	Bluetooth ou d'un balayage de balises suspendu par Bluetooth.
	<b>Message</b> Message entrant.
	<b>Écoute</b> La radio écoute le canal sélectionné.
	<b>Mode Muet</b> Le mode Muet est activé et le haut-parleur est désactivé.
	<b>Notification</b> La liste des notifications contient au moins un événement manqué.
	<b>Carte d'option</b> La carte d'option est activée. (Modèles avec carte d'option uniquement.)
	<b>Carte d'option non fonctionnelle</b> La carte d'option est désactivée.

Tableau (suite)...

<sup>7</sup> Applicable uniquement aux modèles dotés de la dernière version du logiciel et du matériel.

	<p><b>Compteur de programmation par liaison radio (OTAP, Over-the-Air Programming)</b></p> <p>Indique le temps restant avant le redémarrage automatique de la radio.</p>
	<p><b>Indication de la puissance du signal reçu (RSSI)</b></p> <p>Le nombre de barres affichées représente l'intensité du signal de réception. Quatre barres indiquent le niveau maximal du signal. Cette icône est uniquement affichée pendant la réception.</p>
	<p><b>Suppr. réponse</b></p> <p>La fonctionnalité Suppr. réponse est activée.</p>
	<p><b>Sonnerie seulement</b></p> <p>Le mode Sonnerie est activé.</p>
	<p><b>Balayage<sup>8</sup></b></p> <p>La fonction de balayage est activée.</p>

Tableau (suite)...

	<p><b>Balayage - Priorité 1<sup>8</sup></b></p> <p>La radio détecte l'activité sur le canal/groupe désigné comme Priorité 1.</p>
	<p><b>Balayage - Priorité 2<sup>8</sup></b></p> <p>La radio détecte l'activité sur le canal/groupe désigné comme Priorité 2.</p>
	<p><b>Crypté</b></p> <p>La fonction de cryptage est activée.</p>
	<p><b>Connexion</b></p> <p>La radio est connectée au serveur distant.</p>
	<p><b>Déconnexion</b></p> <p>La radio est déconnectée du serveur distant.</p>
	<p><b>Silencieux</b></p> <p>Le mode Silencieux est activé.</p>

Tableau (suite)...

<sup>8</sup> Non applicable à Capacity Plus.

	<b>Itinérance de site<sup>9</sup></b> La fonction d'itinérance de site est activée.
	<b><sup>8</sup>Mode direct</b> En l'absence de relais, la radio est configurée pour assurer des communications en mode Direct de radio à radio.
	<b>Désactivation des tonalités</b> Les tonalités sont désactivées.
	<b>Non crypté</b> La fonction de cryptage est désactivée.
	<b>Balayage avec sélection automatique</b> La fonction de balayage avec sélection automatique est activée.
	<b>Wi-Fi excellent<sup>10</sup></b> Le signal Wi-Fi est excellent.

Tableau (suite)...

	<b>Wi-Fi bon<sup>10</sup></b> Le signal Wi-Fi est bon.
	<b>Wi-Fi moyen<sup>10</sup></b> Le signal Wi-Fi est moyen.
	<b>Wi-Fi faible<sup>10</sup></b> Le signal Wi-Fi est faible.
	<b>Wi-Fi indisponible<sup>10</sup></b> Le signal Wi-Fi est indisponible.

**Tableau 10: Icônes avancées du menu**

Les icônes suivantes sont affichées à côté des éléments du menu qui permettent de choisir entre deux options ou pour

<sup>9</sup> Non applicable à Capacity Plus - Site unique

<sup>10</sup> Applicable uniquement aux modèles DM4601e.

signaler l'existence d'un sous-menu contenant deux options.

	<p><b>Case à cocher (cochée)</b> Indique que l'option correspondante est activée.</p>
	<p><b>Case à cocher (non cochée)</b> Indique que l'option correspondante n'est pas activée.</p>
	<p><b>Case noire</b> Indique le sous-menu de l'option sélectionnée dans le menu.</p>

### Tableau 11: Icônes des appareils Bluetooth

Les icônes suivantes s'affichent en regard des éléments de la liste des dispositifs Bluetooth disponibles pour indiquer leur type.

	<p><b>Dispositif audio Bluetooth</b> Un dispositif d'écoute par connexion Bluetooth, par exemple une oreillette.</p>
--	--

Tableau (suite)...

	<p><b>Dispositif de données Bluetooth</b> Un dispositif de transmission de données par connexion Bluetooth, par exemple un scanner.</p>
	<p><b>Dispositif PTT Bluetooth</b> Un dispositif PTT compatible Bluetooth, par exemple un POD.</p>

### Tableau 12: Icônes d'appel

En cours d'appel, les icônes suivantes peuvent apparaître sur l'écran de votre radio. Elles peuvent également s'afficher dans le répertoire pour indiquer le type d'alias ou d'ID.

	<p><b>Appel PC Bluetooth</b> Indique un appel PC Bluetooth en cours.  Dans la liste des Contacts, il indique l'alias (nom) ou l'ID (numéro) d'un appel PC Bluetooth.</p>
--	--

Tableau (suite)...

	<p><b>Dispatch Call</b> Le type de contact Appel de répartition permet d'envoyer un message texte à un PC répartiteur via un serveur de messagerie texte tiers.</p>
	<p><b>Appel de groupe/Appel général</b> Signale un appel de groupe ou un appel général en cours.  Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.</p>
	<p><b>Appel individuel</b> Signale un appel individuel en cours. Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de terminal radio.</p>
	<p><b>Appel téléphonique de groupe/Appel général</b> Indique un appel téléphonique en appel de groupe/général en cours.</p>

Tableau (suite)...

	<p>Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de groupe.</p> <p><b>Appel téléphonique en appel individuel</b> Indique un appel téléphonique en appel individuel en cours.  Dans le répertoire, cette icône indique un ID (numéro) ou un alias (nom) de téléphone.</p>
--	---

### Tableau 13: Icônes de ticket de tâche

Les icônes suivantes apparaissent momentanément sur l'écran dans le dossier Ticket de tâche.

	<p><b>Toutes les tâches</b> Désigne toutes les tâches listées.</p>
	<p><b>Nouvelles tâches</b> Indique les nouvelles tâches.</p>

Tableau (suite)...

	<p><b>En cours</b> Les tâches sont en cours d'émission. Ceci s'affiche avant l'indication Échec envoi ou Envoi réussi des tickets de tâche.</p>
	<p><b>Échec envoi</b> Impossible d'envoyer les tâches.</p>
	<p><b>Envoi réussi</b> Les tâches ont été envoyées avec succès.</p>
	<p><b>Priorité 1</b> Indique le niveau de priorité 1 pour les tâches.</p>
	<p><b>Priorité 2</b> Indique le niveau de priorité 2 pour les tâches.</p>
	<p><b>Priorité 3</b> Indique le niveau de priorité 3 pour les tâches.</p>

**Tableau 14: Icônes des mini-avis**

Les icônes suivantes peuvent apparaître momentanément sur l'écran après le déclenchement d'une tâche par l'utilisateur.

	<p><b>Échec de transmission (négatif)</b> La tâche n'a pas pu être exécutée correctement.</p>
	<p><b>Transmission réussie (positif)</b> La tâche a été correctement exécutée.</p>
	<p><b>Transmission en cours (transition)</b> La radio émet. Ceci s'affiche avant l'indication Transmission réussie ou Échec de transmission.</p>

## Tableau 15: Icônes Messages envoyés

Les icônes suivantes apparaissent dans le coin supérieur droit de l'écran de la radio, dans le dossier Messages envoyés.

 ou 	<p><b>En cours</b></p> <p>Le message texte envoyé à un ID ou un alias de terminal radio est en attente de transmission, qui sera suivie par l'attente de l'accusé de réception.</p> <p>Le message texte envoyé à un ID ou un alias de groupe est en attente de transmission.</p>
 ou 	<p><b>Message individuel ou de groupe lu</b></p> <p>Le message texte a été lu.</p>
 ou 	<p><b>Message individuel ou de groupe non lu</b></p> <p>Le message texte n'a pas été lu.</p>

Tableau (suite)...

 ou 	<p><b>Échec envoi</b></p> <p>Le message texte ne peut pas être envoyé.</p>
 ou 	<p><b>Envoi réussi</b></p> <p>Le message texte a été envoyé avec succès.</p>

## Indicateurs LED

Les indicateurs LED signalent l'état opérationnel de votre radio.

### Rouge clignotant

La radio a échoué à l'auto-test au moment de l'allumage.

La radio reçoit une émission d'urgence.

La radio émet alors que son état de batterie est faible.

La radio est hors de portée si elle est configurée avec le système de transpondeur à portée automatique (ARTS, Auto-Range Transponder System).

Le mode Muet est activé.

### **Vert fixe**

La radio est en cours d'allumage.

La radio est en cours d'émission.

La radio envoie un avertissement d'appel ou une transmission urgente.

### **Vert clignotant**

La radio reçoit un appel ou des données.

La radio récupère des transmissions par programmation par liaison radio.

La radio détecte une activité en liaison radio.

#### **REMARQUE:**

Cette activité peut affecter ou non le canal programmé de la radio, en raison de la nature du protocole numérique.

Aucun indicateur LED ne s'allume lorsque la radio détecte une activité en liaison radio dans Capacity Plus.

### **Vert clignotant double**

La radio reçoit un appel ou des données cryptés.

### **Jaune fixe**

La radio surveille un canal conventionnel.

La radio est en mode Détection Bluetooth.

### **Jaune clignotant**

La radio procède à un balayage d'activité.

La radio doit encore répondre à une alerte d'appel.

La liste de réception flexible de la radio est activée.

Tous les canaux Capacity Plus Multisite sont occupés.

### **Jaune clignotant double**

L'itinérance automatique est activée sur la radio.

La radio recherche activement un nouveau site.

La radio doit encore répondre à un avertissement d'appel de groupe.

La radio est verrouillée.

La radio n'est plus connectée au relais en mode Capacity Plus.

Tous les canaux Capacity Plus sont occupés.

## Tonalités

Les tonalités émises sur le haut-parleur de la radio sont décrites ci-après.

Tonalité aiguë

Tonalité grave

## Tonalités d'indication

Les tonalités d'indication fournissent des indications sonores relatives à l'état de la radio après le déclenchement d'une tâche par l'utilisateur.

Tonalité d'indication positive

Tonalité d'indication négative

## Tonalités audio

Les tonalités audio vous informent de l'état de la radio ou vous avertissent en cas de réception de données sur celle-ci.

[Envoyer un commentaire](#)

### Tonalité continue

Son uniforme. Émise en continu jusqu'à la fin de l'état.

### Tonalité périodique

Tonalité périodique selon la durée programmée. La tonalité est répétée à intervalles réguliers.

### Tonalité répétitive

Un seul son est répété jusqu'à ce que l'utilisateur le désactive.

### Tonalité momentanée

Tonalité émise une fois pendant une courte durée définie par la radio.

## Modes conventionnels Numérique et Analogique

Chaque canal de votre radio peut être configuré comme canal analogique conventionnel ou canal numérique conventionnel.

Le **commutateur de canal** permet de basculer entre un canal analogique et un canal numérique.

Certaines fonctionnalités ne sont plus disponibles lorsque vous passez du mode numérique au mode analogique. Les icônes des fonctions numériques sont grisées pour refléter ces changements. Les fonctions désactivées ne sont plus affichées dans le menu.

Votre radio offre des fonctions disponibles aussi bien en mode analogique qu'en mode numérique. Les petites différences de fonctionnement entre ces deux modes n'ont **aucune** incidence sur les performances de votre radio.

### REMARQUE:

Votre radio bascule entre les modes numérique et analogique pendant un balayage en mode double. Reportez-vous à la section [Balayage à la page 433](#) pour plus d'informations.

## Informations relatives aux icônes

Dans ce document, les icônes décrites différencient les fonctions disponibles en mode analogique ou numérique conventionnel ou accessibles à l'aide d'un microphone à clavier.

Identifie une fonction uniquement disponible en **mode analogique** conventionnel.

Identifie une fonction uniquement disponible en **mode numérique** conventionnel.

Lorsqu'une fonction est disponible dans les **deux** modes (analogique conventionnel et numérique conventionnel), **aucune** icône n'est affichée.

## IP Site Connect™

Grâce à cette fonction, votre radio peut étendre ses communications conventionnelles au-delà de la couverture

assurée par un seul site en lui permettant de se connecter à différents sites disponibles au moyen d'un réseau IP (Internet Protocol). Il s'agit du mode multisite conventionnel.

Lorsque la radio passe de la zone de couverture d'un site à celle d'un autre site, elle se connecte au relais du nouveau site pour envoyer et recevoir des appels ou des données. Cette opération peut s'effectuer automatiquement ou manuellement en fonction de vos paramètres.

Lorsque la recherche de site est configurée en mode automatique, la radio recherche tous les sites disponibles dès que le signal qu'elle reçoit est faible ou lorsqu'elle ne peut plus détecter le signal émis par le site actuel. La radio se connecte alors sur le relais qui fournit la meilleure valeur RSSI (Indicateur de niveau de signal reçu).

Si cette fonction est configurée en mode Manuel, la radio cherche à se connecter au prochain site figurant dans la liste d'itinérance et qui est à sa portée (mais dont le signal n'aura pas nécessairement la valeur la plus élevée) et se verrouille sur ce relais.

**REMARQUE:**

Le balayage et l'itinérance ne peuvent jamais être activés simultanément sur un même canal.

Les canaux qui utilisent cette fonction peuvent être ajoutés à une liste d'itinérance spécifique. La radio cherche les canaux de la liste d'itinérance pendant l'opération d'itinérance automatique pour identifier le site présentant la plus forte valeur RSSI. Une liste d'itinérance peut contenir jusqu'à 16 canaux, le canal sélectionné compris.

**REMARQUE:**

Vous ne pouvez pas ajouter ou supprimer manuellement une entrée à la liste d'itinérance. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Capacity Plus - Monosite

Capacity Plus - Monosite est une configuration en mode Ressources partagées monosite du système radio MOTOTRBO. Elle utilise un groupe de canaux pour prendre en charge des centaines d'utilisateurs et jusqu'à 254 groupes. Capacity Plus permet à votre radio d'utiliser efficacement les canaux programmés disponibles en mode Relais.

Vous entendrez une tonalité d'indication négative si vous tentez d'utiliser une fonctionnalité non applicable à Capacity Plus - Site unique en appuyant sur un bouton programmable.

Votre radio dispose également de fonctionnalités disponibles à la fois en mode numérique conventionnel et avec IP Site Connect et Capacity Plus. Les petites différences de fonctionnement entre ces deux modes n'ont aucun effet sur les performances de votre radio.

Pour plus d'informations, veuillez consulter votre fournisseur ou votre administrateur système.

### Capacity Plus - Multisite

Capacity Plus - Multisite est une configuration multi-canal à ressources partagées du système radio MOTOTRBO, qui combine les meilleures configurations Capacity Plus et IP Site Connect.

Grâce à Capacity Plus - Multisite, votre radio peut étendre ses communications à ressources partagées au-delà de la couverture assurée par un seul site en lui permettant de se connecter à différents sites disponibles connectés à un réseau IP. Cette configuration apporte en outre une augmentation de la capacité en combinant et en utilisant efficacement les canaux programmés disponibles sur les différents sites accessibles.

Lorsque la radio passe de la zone de couverture d'un site à celle d'un autre site, elle se connecte au relais du nouveau site pour envoyer et recevoir des appels/données. Selon la

programmation, cette transition est automatique ou manuelle.

Si cette fonction est configurée en mode automatique, la radio recherche tous les sites disponibles dès que le signal qu'elle reçoit est faible ou lorsqu'elle ne peut plus détecter le signal émis par le site actuel. Elle se verrouille alors sur le relais qui fournit la meilleure valeur RSSI.

Si cette fonction est configurée en mode manuel, la radio cherche à se connecter au prochain site figurant dans la liste d'itinérance et qui est à sa portée (mais dont le signal n'aura pas nécessairement la valeur la plus élevée) et se verrouille sur ce site.

Les canaux qui utilisent Capacity Plus - Multisite peuvent être ajoutés à une liste d'itinérance spécifique. La radio explore ces canaux pendant l'opération d'itinérance automatique pour identifier le site ayant la plus forte valeur RSSI.

#### REMARQUE:

vous ne pouvez pas ajouter ou supprimer manuellement une entrée à la liste d'itinérance. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Comme avec Capacity Plus - Monosite, les icônes des caractéristiques non utilisables avec Capacity Plus -

Multisite ne sont pas accessibles dans le menu. Vous entendrez une tonalité d'indication négative si vous tentez d'utiliser une fonctionnalité non applicable à Capacity Plus - Multisite en appuyant sur un bouton programmable.

## Sélection des zones et des canaux

Ce chapitre présente la procédure de sélection d'une zone ou d'un canal sur votre radio. Une zone correspond à un groupe de canaux.

Votre radio prend en charge jusqu'à 99 canaux et 2 zones, avec un maximum de 99 canaux par zone.

Chaque canal peut être programmé avec des fonctionnalités différentes et/ou prendre en charge différents groupes d'utilisateurs.

### Sélection des zones

Suivez la procédure ci-après pour sélectionner une zone sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Sélection de zone** préprogrammé. Passez à [étape 3](#).

[Envoyer un commentaire](#)

- Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Zone. Appuyez sur  pour valider la sélection.

L'écran affiche le symbole ✓ ainsi que la zone actuelle.

- 3 Appuyez sur  ou sur  pour accéder à la zone souhaitée. Appuyez sur  pour valider la sélection.

L'écran affiche momentanément <Zone> sélectionnée avant de revenir à l'écran de la zone sélectionnée.

## Sélection des zones à l'aide de la recherche d'alias

Suivez la procédure ci-après pour sélectionner une zone sur votre radio à l'aide de la recherche d'alias.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Zone. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole  ainsi que la zone actuelle.

---

- 3 Saisissez le premier caractère de l'alias souhaité.  
L'écran affiche un curseur clignotant.

---

- 4 Saisissez le reste des caractères de l'alias souhaité.

La recherche d'alias n'est pas sensible à la casse. Si plusieurs entrées portent le même nom, l'écran affiche l'entrée figurant en tête de liste.

La première ligne affiche les caractères saisis. Les lignes suivantes de l'écran affichent les autres résultats de la recherche.

- 5 Appuyez sur  pour valider la sélection.  
L'écran affiche <Zone> Activé pendant quelques instants puis revient à l'écran de la zone sélectionnée.

## Sélection des canaux

Suivez la procédure ci-après pour sélectionner un canal sur votre radio une fois que vous avez sélectionné une zone.

Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Défilement Haut/Bas**.
- Utilisez le **sélecteur Volume/Canal**.
- Appuyez sur les boutons **Canal Haut/Canal Bas** programmés.

# Appels

Ce chapitre présente les opérations permettant de recevoir, prendre, passer et arrêter des appels.

Vous pouvez sélectionner un alias ou un ID de terminal radio/de groupe une fois que vous avez sélectionné un canal à l'aide de l'une des fonctions suivantes :

## Recherche d'alias

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels de groupe, les appels individuels et les appels généraux.

## Liste des contacts

Cette méthode offre un accès direct au répertoire.

## Numérotation manuelle (à l'aide du répertoire)

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels individuels et téléphoniques.

## Touches numériques programmées

Cette méthode, uniquement disponible avec un microphone à clavier, est employée pour les appels de groupe, les appels individuels et les appels généraux.

## REMARQUE:

Vous pouvez attribuer un seul alias ou ID à une touche numérique, mais vous pouvez attribuer plus d'une touche numérique à un alias ou ID. Toutes les touches numériques d'un microphone à clavier peuvent être attribuées. Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

## Bouton programmé Accès par numérotation rapide

Cette méthode est employée pour les appels de groupe, individuels et téléphoniques uniquement.

Vous ne pouvez attribuer qu'un seul ID à un bouton d'**accès par numérotation rapide** avec une pression courte ou longue sur un bouton programmable. Plusieurs boutons d'**accès par numérotation rapide** peuvent être programmés sur votre radio.

## Bouton programmable

Cette méthode est employée pour les appels téléphoniques uniquement.

## Sélecteur de volume/canal

Cette méthode sélectionne manuellement un ID ou alias du terminal ou un ID ou alias du groupe.

La LED s'allume en vert fixe lorsque la radio émet et clignote en vert lorsque la radio reçoit.

### REMARQUE:

la LED est vert fixe lorsque la radio émet. Elle clignote double en vert lorsque la radio reçoit un appel utilisant la fonction Secret.

Pour décrypter un appel crypté, votre radio doit avoir la même clé privée ou la même valeur de clé et le même ID de clé (programmés par votre fournisseur) que la radio en émission (la radio qui vous appelle).

Reportez-vous à la section [Confidentialité à la page 499](#) pour plus d'informations.

## Appels de groupe

Votre radio doit avoir été configurée pour faire partie d'un groupe afin de pouvoir échanger des appels avec un groupe d'utilisateurs.

## Émission d'appels de groupe

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Sélectionnez un canal correspondant à l'alias ou à l'ID du groupe actif.
  - Appuyez sur le bouton **Accès direct** préprogrammé.

---
- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'écran affiche l'icône **Appel de groupe** ainsi que l'alias de l'appel de groupe.

---
- 3 Relâchez le bouton **PTT** pour écouter.  
La LED passe au vert lorsque la radio cible répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

---
- 4  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. La radio revient à l'écran affiché avant l'émission de l'appel.

---

## Émission d'appels de groupe à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert.

---

- 5 Relâchez le bouton **PTT** pour écouter.  
La LED verte clignote lorsqu'un utilisateur du groupe répond. L'écran affiche l'icône **Appel de groupe**, ainsi que l'alias ou l'ID du groupe et de la radio en émission.

---

- 6  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.  
L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

---

## Émission d'appels de groupe à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio à l'aide de la touche numérique programmable.

- 1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert.

- 3 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsqu'un utilisateur du groupe répond.

- 4  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. La radio revient à l'écran affiché avant l'émission de l'appel.

Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

## Réponse aux appels de groupe

Pour recevoir un appel provenant d'un groupe d'utilisateurs, votre radio doit être configurée comme membre de ce

groupe. Suivez la procédure ci-après pour répondre aux appels de groupe sur votre radio.

Lorsque vous recevez un appel de groupe :

- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.
- La première ligne affiche l'alias de l'appelant.
- La deuxième ligne affiche l'alias de l'appel de groupe.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

#### 1 Effectuez l'une des opérations suivantes :

-  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.
-  Si la fonction Interruption vocale est activée, appuyez sur le bouton **PTT** pour couper le son de

la radio en émission afin de libérer le canal pour pouvoir répondre.

La LED passe au vert.

---

#### 2 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
-  Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

---

#### 3 Relâchez le bouton **PTT** pour écouter.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

si la radio reçoit un appel de groupe alors que l'écran d'accueil n'est pas affiché, elle reste sur l'écran en cours avant de répondre à l'appel.

Exercez une pression longue sur  pour revenir à l'écran d'accueil et afficher l'alias de l'appelant avant de répondre.

## Appels individuels

Un appel individuel est un appel provenant d'une radio individuelle communiquant avec une autre radio individuelle.

Il existe deux façons d'établir un appel individuel. La première consiste à établir l'appel après l'exécution d'une vérification de présence, tandis que la deuxième établit l'appel immédiatement. Votre fournisseur ne peut programmer qu'un seul de ces deux types d'établissement d'appel sur votre radio.

### Émission d'appels individuels

Votre radio doit être programmée pour passer un appel individuel. Si cette fonction n'est pas activée, une tonalité d'indication négative est émise lorsque vous lancez l'appel. Suivez la procédure ci-après pour passer des appels individuels sur votre radio.

Pour contacter un autre poste du système, vous pouvez envoyer un message texte ou une alerte d'appel. Pour plus d'informations, reportez-vous à la section [Message texte à la page 163](#) ou [Fonctionnement de l'avertissement d'appel à la page 452](#).

- 1 Effectuez l'une des opérations suivantes :

- Sélectionnez un canal correspondant à l'alias ou à l'ID du terminal radio actif.
- Appuyez sur le bouton **Accès direct** préprogrammé.

- 
- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'écran affiche l'icône **Appel individuel**, ainsi que l'alias du terminal et l'état de l'appel.

- 
- 3 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  - 4 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsque la radio cible répond.

- 
- 5  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. L'écran affiche Appel terminé.

---

## Émission d'appels individuels à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels individuels sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'écran affiche l'alias de la destination.

---

- 5 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- 

- 6 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsque la radio cible répond. L'écran affiche l'alias ou l'ID de l'utilisateur émetteur.

---

- 7  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. L'écran affiche Appel terminé.

---

## Émission d'appels individuels à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour passer des appels individuels sur votre radio à l'aide de la numérotation manuelle.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.

---

- 5 Effectuez l'une des opérations suivantes :

- Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.
- Modifiez l'ID du dernier terminal radio appelé, puis appuyez sur  pour continuer.

- 6 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'écran affiche l'alias de destination.

---

- 7 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

---

- 8 Relâchez le bouton **PTT** pour écouter.  
La LED passe au vert lorsque la radio cible répond. L'écran affiche l'alias ou l'ID de l'utilisateur émetteur.

---

- 9  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. L'écran affiche Appel terminé.

---

## Émission d'appels individuels à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels individuels sur votre radio à l'aide de la touche numérique programmable.

- 1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

---

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'icône **Appel individuel** s'affiche dans le coin supérieur droit de l'écran. La première ligne affiche l'alias de l'appelant. La deuxième ligne affiche l'état de l'appel.

---

- 3 Relâchez le bouton **PTT** pour écouter.

La LED verte clignote lorsque la radio cible répond. L'écran affiche l'alias de la destination.

---

- 4  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. La radio revient à l'écran affiché avant l'émission de l'appel.

---

Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables](#) à la page 439 pour plus d'informations.

## Réponse aux appels individuels

Suivez la procédure ci-après pour répondre aux appels individuels sur votre radio.

Lorsque vous recevez un appel individuel :

- La LED clignote en vert.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

1 Effectuez l'une des opérations suivantes :

-  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.
-  Si la fonction Interrupt. émission PTT désactivé déporté est activée, appuyez sur le bouton **PTT** pour arrêter un appel en cours pouvant être interrompu et libérer le canal pour que vous puissiez répondre.

La LED passe au vert.

- 
- 2 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- 

- 3 Relâchez le bouton **PTT** pour écouter.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

---

## Appels généraux

Un appel général est un appel émis par une radio individuelle à destination de toutes les radios présentes sur le canal sélectionné. Un appel général permet de diffuser des annonces importantes dont les utilisateurs doivent tenir compte. Les utilisateurs du canal ne peuvent pas répondre à un appel général.

## Réception d'appels généraux

Lorsque vous recevez un appel général :

- Une tonalité est émise.
- La LED clignote en vert.
- L'icône **Appel de groupe** s'affiche dans le coin supérieur droit de l'écran.

- La première ligne affiche l'ID de l'alias de l'appelant.
- La deuxième ligne affiche Appel général.
- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

Une fois l'appel général terminé, la radio revient au menu affiché avant sa réception.

Il n'y a aucun délai prédéterminé avant la fin d'un appel général.

 Si la fonction d'indication de canal libre est activée, vous entendrez une brève tonalité d'alerte au moment où le bouton **PTT** de la radio en émission sera relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler.

Vous ne pouvez pas répondre à un appel général.

#### REMARQUE:

Si vous changez de canal pendant la réception d'un appel général, il sera interrompu. Vous ne pouvez pas naviguer dans les menus, ni apporter de modification, avant la fin d'un appel général.

## Émission d'appels généraux

Votre radio doit être programmée pour que vous puissiez lancer un appel général. Suivez la procédure ci-après pour passer des appels généraux sur votre radio.

**1** Sélectionnez un canal avec l'alias ou l'ID du groupe Appel général actif.

---

**2** Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'écran affiche l'icône **Appel de groupe** et la mention Appel général.

---

**3** Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
-  Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

Les utilisateurs du canal ne peuvent pas répondre à un appel général.

---

## Émission d'appels généraux à l'aide de la touche numérique programmable

Suivez la procédure ci-après pour passer des appels généraux sur votre radio à l'aide de la touche numérique programmable.

- 1 Lorsque vous êtes sur l'écran d'accueil, exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID prédéfini.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

Une tonalité négative est émise si la touche numérique n'est associée à aucune entrée.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert.

- 3 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond. Vous ne pouvez pas répondre à un appel général pour le moment.

- 4  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. La radio revient à l'écran affiché avant l'émission de l'appel. Dans le cas d'un appel individuel, vous entendrez une courte tonalité à la fin de la communication.

Reportez-vous à la section [Attribution d'entrées aux touches numériques programmables à la page 439](#) pour plus d'informations.

## Appels sélectifs

Un appel sélectif est un appel provenant d'une radio individuelle communiquant avec une autre radio

individuelle. Il s'agit d'un appel individuel sur un système analogique.

## Émission d'appels sélectifs

Votre radio doit être programmée pour que vous puissiez lancer un appel sélectif. Suivez la procédure ci-après pour passer des appels sélectifs sur votre radio.

- 1 Sélectionnez un canal correspondant à l'alias ou à l'ID du terminal radio actif.

- 2 Appuyez sur le bouton **PTT** pour lancer l'appel.

La LED passe au vert. L'écran affiche l'icône **Appel individuel**, ainsi que l'alias du terminal et l'état de l'appel.

- 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
-  Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

- 4 Relâchez le bouton **PTT** pour écouter.

La LED passe au vert lorsque la radio cible répond.

- 5  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

- 6 L'écran affiche Appel terminé.

## Réponse aux appels sélectifs

Suivez la procédure ci-après pour répondre aux appels sélectifs sur votre radio.

Lorsque vous recevez un appel sélectif :

- La LED clignote en vert.
- La première ligne affiche l'icône **Appel individuel** et l'alias de l'appelant ou Appel sélectif ou Avert.& appel.

- Votre radio active le son à nouveau et l'appel entrant est audible dans le haut-parleur.

1 Appuyez sur le bouton **PTT** pour répondre à l'appel.  
La LED passe au vert.

---

2 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.

---

3 Relâchez le bouton **PTT** pour écouter.  
L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. L'écran affiche Appel terminé.

---

## Appels téléphoniques

Un appel téléphonique est un appel émis depuis une radio individuelle vers un téléphone.

Si la fonction d'appel téléphonique n'est pas activée sur votre radio :

- L'écran affiche Non disponible.
- Votre radio désactive le son de l'appel.

- Votre radio revient à l'écran précédent une fois votre appel terminé.

Lors de l'appel téléphonique, votre radio tentera de mettre fin à l'appel dans les cas suivants :

- Vous appuyez sur le bouton **Accès par numérotation rapide** avec le code de libération préconfiguré.
- Vous entrez le code de libération en tant que chiffres supplémentaires.

Pendant l'accès au canal et la transmission du code d'accès/de libération ou des chiffres supplémentaires, votre radio répond uniquement au bouton de commande **Marche/Arrêt, au bouton de volume** et au **sélecteur de canal**. Une tonalité est émise pour chaque entrée non valide.

Pendant l'accès au canal, appuyez sur  pour rejeter la tentative d'appel. Une tonalité est émise.

### REMARQUE:

Le code d'accès ou de libération ne peut pas contenir plus de 10 caractères.

Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Émission d'appels téléphoniques

Suivez la procédure ci-après pour passer des appels téléphoniques sur votre radio.

- 1 Appuyez sur le bouton programmé **Accès par numérotation rapide** pour accéder à l'alias ou l'ID prédéfini.

Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise. Si le code d'accès n'a pas été préconfiguré dans le répertoire, l'écran affiche Code d'accès :.

- 2 Saisissez le code d'accès, puis appuyez sur  pour continuer.

Le code d'accès ou de libération ne peut pas contenir plus de 10 caractères.

- 3 Appuyez sur le bouton **PTT** pour répondre à l'appel. Relâchez le bouton **PTT** pour écouter.

- 4 Saisissez des chiffres supplémentaires à l'aide du clavier si cela s'avère nécessaire au cours de l'appel, puis appuyez sur  pour continuer.

Si l'appel se termine tandis que vous entrez les chiffres supplémentaires requis pour l'appel, vous revenez à l'écran affiché avant l'émission de l'appel.

La tonalité multifréquence à deux tonalités (DTMF) est émise. Votre radio revient à l'écran précédent.

- 5 Appuyez sur  pour mettre fin à l'appel.

- 6 Effectuez l'une des opérations suivantes :

- Si le code de libération n'a pas été préconfiguré, saisissez-le lorsque l'écran affiche Code de libération:, puis appuyez sur  pour continuer.  
La radio revient à l'écran précédent.
- Appuyez sur le bouton **Accès direct** préprogrammé.  
Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.

La tonalité DTMF est émise et l'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.

- L'écran affiche Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les deux dernières étapes ou attendez que l'utilisateur du téléphone mette fin à l'appel.

---

## Émission d'appels téléphoniques à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels téléphoniques sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
  - 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.  
L'écran affiche les entrées par ordre alphabétique.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

Si vous appuyez sur le bouton **PTT** lorsque l'écran Répertoire tél. est affiché :

- La première ligne de l'écran affiche No. téléphone :.
- La deuxième ligne de l'écran affiche un curseur clignotant.

Si l'entrée sélectionnée est vide° :

- Une tonalité d'indication négative est émise.
  - L'écran affiche No. Tél. invalide.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option Appeler tél. Appuyez sur  pour valider la sélection.

L'écran affiche Code d'accès: si le code d'accès n'a pas été préconfiguré.

---

- 5 Saisissez le code d'accès, puis appuyez sur  pour continuer.

Le code d'accès ou de libération ne peut pas contenir plus de 10 caractères.

La première ligne affiche `Appels`. La deuxième ligne affiche l'icône **Appel téléphonique**, ainsi que l'alias ou l'ID du terminal radio.

Si l'appel est émis avec succès :

- La tonalité DTMF est émise.
- Vous entendez la tonalité de numérotation de l'utilisateur du téléphone.
- La première ligne affiche l'icône **RSSI**, ainsi que l'alias ou l'ID du terminal radio.
- La deuxième ligne affiche `Appel tél`, ainsi que l'icône **Appel téléphonique**.

Si l'appel n'aboutit pas :

- Une tonalité est émise.
- L'écran affiche `Appel tél. échoué`, puis `Code d'accès`.

- Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant l'émission de l'appel.

- 
- 6 Appuyez sur le bouton **PTT** pour répondre à l'appel. L'icône **RSSI** disparaît.
- 

- 7 Relâchez le bouton **PTT** pour écouter.
- 

- 8 Saisissez des chiffres supplémentaires à l'aide du clavier si cela s'avère nécessaire au cours de l'appel, puis appuyez sur  pour continuer. Si l'appel se termine tandis que vous entrez les chiffres supplémentaires requis pour l'appel, vous revenez à l'écran affiché avant l'émission de l'appel. La tonalité DTMF est émise. Votre radio revient à l'écran précédent.
- 

- 9 Appuyez sur  pour mettre fin à l'appel.
- 

- 10 Si le code de libération n'a pas été préconfiguré, saisissez-le lorsque l'écran affiche `Code de`

libération:, puis appuyez sur  pour continuer.

La radio revient à l'écran précédent. La tonalité DTMF est émise et l'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez l'**étape 9** et l'**étape 10** ou attendez que l'utilisateur du téléphone mette fin à l'appel. Si vous appuyez sur le bouton **PTT** lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche OK pour appeler.

lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche Appel terminé.

Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

#### REMARQUE:

Pendant l'accès au canal, appuyez sur le bouton

 pour rejeter la tentative d'appel. Une tonalité est émise.

pendant l'appel, si vous appuyez sur la touche **Accès direct** à laquelle est attribué le code de libération ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel.

Pendant l'accès au canal et la transmission du code d'accès/de libération ou des chiffres supplémentaires, votre radio répond uniquement au bouton de commande **Marche/Arrêt**, au **bouton de volume** et au **sélecteur de canal**. Une tonalité est émise pour chaque entrée non valide.

## Émission d'appels téléphoniques à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour passer des appels téléphoniques sur votre radio à l'aide de la numérotation manuelle.

1

Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.
- 
- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou sur  pour accéder à l'option No. téléphone. Appuyez sur  pour valider la sélection.
- L'écran affiche Numéro : ainsi qu'un curseur clignotant.
- 
- 5 Composez le numéro de téléphone, puis appuyez sur  pour continuer.
- Si le code d'accès n'a pas été préconfiguré, l'écran affiche Code d'accès: ainsi qu'un curseur clignotant.
- 

- 6 Saisissez le code d'accès, puis appuyez sur  pour continuer.

Le code d'accès ou de libération ne peut pas contenir plus de 10 caractères.

---

- 7 La LED passe au vert. L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran. La première ligne affiche l'alias du terminal radio. La deuxième ligne affiche l'état de l'appel.

Si l'appel est émis avec succès :

- La tonalité DTMF est émise.
- Vous entendez la tonalité de numérotation de l'utilisateur du téléphone.
- La première ligne affiche l'alias du terminal radio.
- L'icône **Appel téléphonique** reste affichée dans le coin supérieur droit de l'écran.

Si l'appel n'aboutit pas :

- Une tonalité est émise.
- L'écran affiche Appel tél. échoué, puis Code d'accès:.

- Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant l'émission de l'appel.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les [étape 8](#) ou attendez que l'utilisateur du téléphone mette fin à l'appel.

---

8 Appuyez sur  pour mettre fin à l'appel.

---

9 Effectuez l'une des opérations suivantes :

- Si le code de libération n'a pas été préconfiguré, saisissez-le lorsque l'écran affiche Code de libération:, puis appuyez sur  pour continuer.  
La radio revient à l'écran précédent.
- Appuyez sur le bouton **Accès direct** préprogrammé.  
Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.

La tonalité DTMF est émise et l'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche Appel terminé.

**REMARQUE:**

Si vous appuyez sur le bouton **PTT** lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche Appuyer sur OK pour appeler.

Lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche Appel terminé.

Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

Pendant l'accès au canal, appuyez sur le

bouton  pour rejeter la tentative d'appel. Une tonalité est émise.

pendant l'appel, si vous appuyez sur la touche **Accès direct** à laquelle est attribué le code de libération ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel.

Pendant l'accès au canal et la transmission du code d'accès/de libération ou des chiffres supplémentaires, votre radio répond

uniquement au bouton de commande **Marche/Arrêt**, au **bouton de volume** et au **sélecteur de canal**. Une tonalité est émise pour chaque entrée non valide.

## Émission d'un appel de groupe, individuel, téléphonique ou général à l'aide de la recherche d'alias

Suivez la procédure ci-après pour passer des appels à l'aide de la recherche d'alias.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.  
L'écran affiche les entrées par ordre alphabétique.

---

- 3 Appuyez sur  ou  pour accéder à l'alias ou à l'ID du terminal souhaité. La première ligne de

l'écran affiche Numéro de téléphone :. La deuxième ligne de l'écran affiche un curseur clignotant. Utilisez le pavé numérique pour saisir un numéro de téléphone.

---

- 4 Appuyez sur  pour valider la sélection. Si l'entrée sélectionnée est vide, un indicateur sonore négatif est émis et l'écran affiche le message No. Tél. invalide.
- 
- 5 Appuyez sur  ou  pour accéder à l'option Appeler tél. et Appuyez sur  pour valider la sélection. Si le code d'accès n'a pas été préconfiguré dans le répertoire, la première ligne de l'écran indique Code d'accès: . La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez le code d'accès, puis appuyez sur le bouton  pour continuer. En cas de réussite, la tonalité DTMF est émise. Vous entendez la tonalité de numérotation de l'utilisateur du téléphone. La première ligne de l'écran affiche l'alias ou l'ID de terminal ainsi que l'icône RSSI. La deuxième ligne de l'écran affiche Appel tél. ainsi que l'icône Appel téléphonique. En cas d'échec, une tonalité est émise et l'écran

affiche Appel tél. échoué. Votre radio revient à l'écran de saisie du code d'accès. Si le code d'accès a été préconfiguré dans le répertoire, la radio revient à l'écran affiché avant de lancer l'appel.

---

- 6 Appuyez sur le bouton **PTT** pour parler et relâchez-le pour écouter. l'icône RSSI disparaît pendant la transmission.
- 
- 7 Pour entrer des chiffres supplémentaires, si nécessaire au cours de l'appel, effectuez l'une des opérations suivantes :
- Appuyez sur n'importe quelle touche du clavier pour commencer la saisie de chiffres supplémentaires. La première ligne de l'écran affiche Chiffres suppl.:. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez les chiffres supplémentaires, puis appuyez sur le bouton  pour continuer. La tonalité DTMF est émise et la radio revient à l'écran précédent.
  - Appuyez sur le bouton **Accès par numérotation rapide**. la tonalité DTMF est émise. Si le champ du bouton **Accès par numérotation rapide** est vide, une tonalité d'indication négative est émise.
-

- 8 Appuyez sur  pour mettre fin à l'appel. Si le code de libération n'a pas été préconfiguré dans le répertoire, la première ligne de l'écran indique Code de libération:. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez le code de libération, puis appuyez sur  pour continuer. La radio revient à l'écran précédent. La tonalité DTMF est émise et l'écran affiche Fin Appel tél.. En cas de réussite, une tonalité est émise et l'écran affiche Appel tél. terminé. Votre radio revient à l'écran Appel téléphonique. En cas d'échec, la radio revient à l'écran Appel téléphonique. Si vous appuyez sur le bouton **PTT** lorsque l'écran Contacts téléphonique est affiché, une tonalité est émise et l'écran affiche OK pour appeler. lorsque l'utilisateur met fin à l'appel, une tonalité est émise et l'écran affiche Appel terminé. Si l'appel se termine tandis que vous entrez des chiffres supplémentaires demandés par l'appel téléphonique, votre radio revient à l'écran affiché avant de lancer l'appel.

#### REMARQUE:

Pendant l'accès au canal, appuyez sur  pour rejeter la tentative d'appel et le bouton de tonalité ou pour quitter la recherche d'alias. Appuyez sur  ou  quitter la recherche d'alias. Pendant l'appel, si vous appuyez sur la touche **Accès par numérotation rapide** à laquelle est attribué le code de libération, ou si vous entrez le code de libération comme chiffres supplémentaires, votre radio tente de mettre fin à l'appel. Pendant l'accès au canal et la transmission du code d'accès/aliénation ou des chiffres supplémentaires, votre radio répond uniquement au bouton de commande marche/arrêt/ volume et au sélecteur de canal. Une tonalité est émise pour chaque entrée non valide.

## Multifréquence à deux tonalités

La fonction de multifréquence à deux tonalités (DTMF) permet à la radio de fonctionner dans un système radio, tout en offrant une interface vers les systèmes téléphoniques.

Il est possible de couper la tonalité DTMF en désactivant l'ensemble des tonalités et alertes radio. Reportez-vous à

la section [Activation/désactivation des tonalités/avertissements à la page 219](#) pour plus d'informations.

## Lancement d'appels DTMF

Suivez la procédure ci-après pour passer des appels DTMF sur votre radio.

- 1 Maintenez le bouton **PTT** enfoncé.
- 
- 2 Effectuez l'une des opérations suivantes :
    - Entrez le numéro souhaité pour lancer un appel DTMF.
    - Appuyez sur  pour lancer un appel DTMF.
    - Appuyez sur  pour lancer un appel DTMF.

## Réponse aux appels téléphoniques en appels de groupe

Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels de groupe sur votre radio.

Lorsque vous recevez un appel téléphonique en appel de groupe :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran indique l'alias du groupe et Appel tél.

Si la fonction Appel téléphonique n'est pas activée sur votre radio, la première ligne de l'écran affiche **Indisponible** et votre radio désactive le son de l'appel. Votre radio revient à l'écran précédent une fois votre appel terminé.

- 1 Appuyez sur le bouton **PTT** pour répondre à l'appel. Relâchez le bouton **PTT** pour écouter.

- 2 Appuyez sur  pour mettre fin à l'appel.

L'écran affiche **Fin Appel tél.**

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche **Appel terminé.**

Si la fin d'appel échoue, votre radio revient à l'écran **Appel téléphonique**. Répétez cette étape ou attendez que l'utilisateur du téléphone mette fin à l'appel.

## Réponse aux appels téléphoniques en appels généraux

Lorsque vous recevez un appel téléphonique en appel général, vous pouvez répondre à l'appel ou y mettre fin uniquement si un type Appel général a été attribué au canal. Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels généraux sur votre radio.

Lorsque vous recevez un appel téléphonique en appel général :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran indique Appel général et Appel tél.

Si la fonction Appel téléphonique n'est pas activée sur votre radio, la première ligne de l'écran affiche Indisponible et votre radio désactive le son de l'appel.

Votre radio revient à l'écran précédent une fois votre appel terminé.

**1** Appuyez sur le bouton **PTT** pour répondre à l'appel.

**2** Relâchez le bouton **PTT** pour écouter.

**3** Appuyez sur  pour mettre fin à l'appel.

L'écran affiche Fin Appel tél.

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran indique Appel général et Appel terminé.

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez les [étape 3](#) ou attendez que l'utilisateur du téléphone mette fin à l'appel.

---

## Réponse aux appels téléphoniques en appels individuels

Suivez la procédure ci-après pour répondre aux appels téléphoniques en appels individuels sur votre radio.

Lorsque vous recevez un appel téléphonique en appel individuel :

- L'icône **Appel téléphonique** s'affiche dans le coin supérieur droit de l'écran.
- L'écran affiche l'alias de l'appelant ou Appel tél.

Si la fonction Appel téléphonique n'est pas activée sur votre radio, la première ligne de l'écran affiche `Indisponible` et votre radio désactive le son de l'appel. Votre radio revient à l'écran précédent une fois votre appel terminé.

1 Appuyez sur le bouton **PTT** pour répondre à l'appel. Relâchez le bouton **PTT** pour écouter.

---

2 Appuyez sur  pour mettre fin à l'appel.

L'écran affiche `Fin Appel tél.`

Si l'appel se termine correctement :

- Une tonalité est émise.
- L'écran affiche `Appel terminé.`

Si la fin d'appel échoue, votre radio revient à l'écran Appel téléphonique. Répétez cette étape ou attendez que l'utilisateur du téléphone mette fin à l'appel.

---

## Arrêt des appels radio

Cette fonction permet de mettre fin à un appel de groupe ou à un appel individuel entrant et donc de libérer le canal

pour l'émission. Cela peut se produire lorsque l'utilisateur appuie par mégarde sur le bouton **PTT** et que la radio détecte le « blocage du microphone ». Vous devez programmer votre radio pour pouvoir utiliser cette fonction. Suivez la procédure ci-après pour arrêter des appels sur votre radio.

1 Appuyez sur le bouton **Transmettre la clé d'interruption à distance** préprogrammé.

L'écran affiche `Interruption.`

---

2 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche `Interruption réussie.`

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche `Interruption échouée.`
- 

### REMARQUE:

Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Mode Direct

Cette fonction vous permet de continuer à communiquer lorsque votre relais ne fonctionne pas ou que votre radio se trouve hors de portée du relais, mais uniquement dans les limites de la portée d'appel des autres radios.

Le paramètre Mode Direct est maintenu même après la mise hors tension.

### REMARQUE:

Cette fonction ne s'applique pas dans Capacity Plus - Monosite, Capacity Plus - Multisite, ni dans les canaux de fréquences publiques qui sont dans une même fréquence.

## Basculement entre les modes Relais et Direct

Suivez la procédure ci-après pour passer du mode Relais au mode Direct et inversement sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Relais/Direct** programmé. Ignorez les étapes suivantes.

- Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option **Mode Direct**. Appuyez sur  pour valider la sélection.

Si cette option est activée, le symbole  apparaît en regard de la mention **Activé**.

Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention **Activé**.

L'écran revient automatiquement au menu précédent.

## Fonctions avancées

Ce chapitre indique comment utiliser les fonctions disponibles sur votre radio.

Votre revendeur ou administrateur système peut avoir adapté votre radio à vos besoins spécifiques. Consultez votre fournisseur ou administrateur système pour en savoir plus.

### Rappel de canal d'accueil

Cette fonctionnalité fournit un rappel lorsque la radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps.

Si cette fonction est activée via le CPS, lorsque votre radio n'est pas définie sur le canal d'accueil pendant un certain laps de temps, les événements suivants se produisent régulièrement :

- L'annonce et la tonalité de rappel de canal d'accueil sont émises.
- La première ligne de l'écran affiche Non.
- La deuxième ligne indique Canal d'accueil.

Vous pouvez répondre au rappel en effectuant l'une des actions suivantes :

- Retournez au canal d'accueil.
- Désactivez temporairement le rappel en utilisant le bouton programmable.
- Définissez un nouveau canal d'accueil à l'aide du bouton programmable.

### Désactivation du rappel de canal d'accueil

Lorsque le rappel du canal d'accueil se déclenche, vous pouvez le désactiver temporairement.

Appuyez sur le bouton programmable **Couper le rappel du canal d'accueil**.

La première ligne de l'écran indique HCR et la seconde ligne affiche en sourdine.

---

## Définition de nouveaux canaux d'accueil

Lorsque le rappel de canal d'accueil se déclenche, vous pouvez définir un nouveau canal d'accueil.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmable **Réinitialiser le canal d'accueil** pour définir le canal actuel en tant que nouveau canal d'accueil. Ignorez les étapes suivantes. La première ligne de l'écran indique l'alias du canal et la seconde ligne affiche Nouv. canal acc.
  - Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Canal d'accueil. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'alias du nouveau canal d'accueil. Appuyez sur  pour valider la sélection.  
L'écran affiche ✓ en regard de l'alias du canal d'accueil sélectionné.

---

## Vérification radio

Cette fonction permet de déterminer si une radio est active sur un système sans avoir à déranger son utilisateur. La radio cible ne fournit aucune indication sonore ou visuelle de cette opération. Cette fonction est uniquement

applicable à un alias ou ID de terminal radio. Vous devez programmer votre radio pour pouvoir utiliser cette fonction.

### Envoi de vérifications radio

Suivez la procédure ci-après pour envoyer des vérifications radio sur votre radio.

1 Appuyez sur le bouton **Vérif. radio** programmé.

---

2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

---

Attendez l'accusé de réception.

Si vous appuyez sur  lorsque la radio est en attente d'un accusé de réception, une tonalité est émise, la radio annule toutes les nouvelles tentatives et quitte le mode de vérification radio.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.

- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

La radio revient à l'écran d'alias ou d'ID du terminal radio.

### Envoi de vérifications radio à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour envoyer des vérifications radio sur votre radio à l'aide de la numérotation manuelle.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.

- 5 Effectuez l'une des opérations suivantes :
- Saisissez l'alias ou l'ID du terminal radio, puis appuyez sur  pour continuer.
  - Modifiez le dernier ID appelé, puis appuyez sur  pour continuer.

6 Appuyez sur  ou sur  pour accéder à l'option Vérif. radio. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

7 Attendez l'accusé de réception.

Si vous appuyez sur  pendant que votre radio attend l'accusé de réception, une tonalité est émise

et la radio annule toutes les tentatives avant de quitter le mode Vérif. radio.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

La radio revient à l'écran d'alias ou d'ID du terminal radio.

## Écoute ambiance

Cette fonction permet de mettre sous tension le microphone d'une radio cible par le biais d'un alias ou d'un ID de terminal. Vous pouvez utiliser cette fonction pour écouter à distance l'activité dans l'environnement de la radio cible.

Il existe deux types d'écoute d'ambiance :

- Écoute ambiance sans authentification
- Écoute ambiance avec authentification

L'écoute d'ambiance authentifiée est une fonctionnalité disponible à l'achat. En mode d'écoute d'ambiance authentifiée, une vérification est requise lorsque votre radio allume le microphone d'une radio cible.

Lorsque votre radio active cette fonctionnalité sur une radio cible disposant de l'authentification utilisateur, une phrase de passe est requise. La phrase de passe est préprogrammée dans la radio cible via CPS.

La radio et la radio cible doivent être programmées pour pouvoir utiliser cette fonctionnalité.

Cette fonctionnalité s'arrête après une durée programmée ou lorsque la radio cible est utilisée.

## Déclenchement de l'Écoute ambiance

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio.

**1** Appuyez sur le bouton préprogrammé **Écoute ambiance**.

---

**2** Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité.

---

**3** Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
- Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.

---

**4** Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée programmée, tandis que l'écran affiche *Écoute amb.* Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Déclenchement de l'écoute déportée à l'aide du répertoire

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option *Écoute amb.*

- 5 Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

- Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.

## 6 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche Écoute amb. Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Déclenchement de l'écoute d'ambiance à l'aide de la numérotation manuelle 🗣️

Suivez la procédure ci-après pour déclencher une écoute à distance sur votre radio à l'aide de la numérotation manuelle.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.
- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.
- 4 Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.
- 5 Effectuez l'une des opérations suivantes :

- Saisissez l'alias ou l'ID du terminal radio, puis appuyez sur  pour continuer.
- Modifiez le dernier ID appelé, puis appuyez sur  pour continuer.

6 Appuyez sur  ou sur  pour accéder à l'option `Écoute amb.`

7 Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

- Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.

8 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.
- Des signaux audio sont émis sur la radio écoutée à distance pendant une durée préprogrammée, tandis que l'écran affiche `Écoute amb.` Lorsque le délai programmé expire, une tonalité d'avertissement est émise et la LED s'éteint.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Listes de balayage

Les listes de balayage sont créées et attribuées à des canaux ou groupes spécifiques. Votre radio recherche une

activité vocale en balayant la séquence des canaux ou groupes spécifiée dans la liste de balayage.

Votre radio peut prendre en charge jusqu'à 250 listes de balayage, chacune comptant au maximum 16 membres.

Chaque liste de balayage peut contenir des entrées analogiques et numériques.

Vous pouvez ajouter, supprimer ou classer des canaux par ordre de priorité en modifiant la liste de balayage.

Vous pouvez joindre une nouvelle liste de balayage sur votre radio en utilisant la programmation par face avant. Reportez-vous à la section [Configuration par face avant à la page 211](#) pour plus d'informations.

L'icône **Priorité** est affichée à gauche de l'alias du membre (si cette fonction est activée). Elle indique si le membre correspond à une liste de canal de Priorité 1 ou 2. Une liste de balayage ne peut pas contenir plusieurs canaux de Priorité 1 ou 2. L'icône **Priorité** n'est pas affichée lorsque la priorité est définie sur **Aucune**.

### REMARQUE:

cette fonction ne s'applique pas dans Capacity Plus.

## Affichage des entrées de la liste de balayage

Suivez la procédure ci-après pour afficher les entrées contenues dans la liste de balayage de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Liste de balayage. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour afficher les différents membres de la liste.

---

## Affichage des entrées contenues dans la liste de balayage à l'aide de la recherche d'alias

Suivez la procédure ci-après pour afficher les entrées contenues dans la liste de balayage de votre radio à l'aide de la recherche d'alias.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Liste de balayage. Appuyez sur  pour valider la sélection.

---

- 4 Saisissez le premier caractère de l'alias souhaité. L'écran affiche un curseur clignotant.

---

- 5 Saisissez le reste des caractères de l'alias souhaité.

La recherche d'alias n'est pas sensible à la casse. Si plusieurs entrées portent le même nom, l'écran affiche l'entrée figurant en tête de liste.

La première ligne affiche les caractères saisis. Les lignes suivantes de l'écran affichent les autres résultats de la recherche.

## Ajout d'entrées à la liste de balayage

Suivez la procédure ci-après pour ajouter des entrées à la liste de balayage de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Liste de balayage. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option Aj. membre. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder au niveau de priorité souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis positif, puis immédiatement après : Ajouter autre ?.

---

7 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour atteindre Oui afin d'ajouter une nouvelle entrée. Appuyez sur  pour valider la sélection. Répétez l'étape 5 et l'étape 6.

- Appuyez sur  ou sur  pour atteindre Non afin d'enregistrer la liste actuelle. Appuyez sur  pour valider la sélection.
- 

## Ajout d'entrées à la liste de balayage à l'aide de la recherche d'alias

Suivez la procédure ci-après pour ajouter des entrées à la liste de balayage de votre radio à l'aide de la recherche d'alias.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou  pour accéder à l'option Liste de balayage. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Aj. membre. Appuyez sur  pour valider la sélection.

---

5 Saisissez le premier caractère de l'alias souhaité. L'écran affiche un curseur clignotant.

---

6 Saisissez le reste des caractères de l'alias souhaité. La recherche d'alias n'est pas sensible à la casse. Si plusieurs entrées portent le même nom, l'écran affiche l'entrée figurant en tête de liste. La première ligne affiche les caractères saisis. Les lignes suivantes de l'écran affichent les autres résultats de la recherche.

---

7 Appuyez sur  pour valider la sélection.

---

8 Appuyez sur  ou sur  pour accéder au niveau de priorité souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis positif, puis immédiatement après : Ajouter autre ?.

---

9 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour atteindre Oui afin d'ajouter une nouvelle entrée. Appuyez sur  pour valider la sélection. Répétez les étapes [étape 5](#) à [étape 8](#).
  - Appuyez sur  ou sur  pour atteindre Non afin d'enregistrer la liste actuelle. Appuyez sur  pour valider la sélection.
-

## Suppression des entrées de la liste de balayage

Suivez la procédure ci-après pour supprimer des entrées de la liste de balayage.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Liste de balayage. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.  
L'écran affiche Supprimer entrée ?.

---

- 6 Effectuez l'une des opérations suivantes :
  - Appuyez sur  ou sur  pour atteindre Oui afin de supprimer l'entrée. Appuyez sur  pour valider la sélection.  
L'écran affiche un mini-avis positif.
  - Appuyez sur  ou sur  pour atteindre Non afin de revenir à l'écran précédent. Appuyez sur  pour valider la sélection.

---

- 7 Répétez [étape 4](#) à [étape 6](#) pour supprimer d'autres entrées.

---

- 8 Exercez une pression longue sur  pour revenir à l'écran d'accueil après avoir supprimé les alias ou ID souhaités.

---

## Définition des priorités des entrées de la liste de balayage

Suivez la procédure ci-après pour attribuer des priorités aux entrées contenues dans la liste de balayage de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Balayage. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Liste de balayage. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Modif. priorité. Appuyez sur  pour valider la sélection.
- 

- 6 Appuyez sur  ou sur  pour accéder au niveau de priorité souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis positif, puis revient à l'écran précédent. L'icône **Priorité** s'affiche sur la gauche de l'alias de membre.

---

## Balayage

Lorsque vous exécutez un balayage, votre radio fait défiler la liste de balayage programmé du canal actuel à la recherche d'activité vocale.

### REMARQUE:

cette fonction ne s'applique pas dans Capacity Plus.

Pendant un balayage en mode double (analogique et numérique), si vous êtes en train de communiquer sur un canal numérique, et que votre radio détecte et s'arrête sur

un canal analogique, elle passe automatiquement du mode numérique au mode analogique pendant la durée de l'appel. Elle effectue cette opération en sens inverse.

Vous pouvez lancer un balayage de deux manières différentes :

### Balayage du canal principal (manuel)

Votre radio balaie tous les canaux ou groupes de la liste. Lorsque votre radio passe en mode de balayage, elle peut, selon sa configuration, commencer automatiquement par le dernier canal/groupe actif balayé ou par le canal sur lequel le balayage a démarré.

### Balayage auto (automatique)

Votre radio lance automatiquement le balayage dès que vous sélectionnez un canal ou groupe sur lequel la fonction de balayage automatique est activée.

#### REMARQUE:

Lorsque vous configurez l'option de **réception des messages de groupe pendant le balayage**, votre radio peut recevoir des messages de groupe depuis des canaux non accueil. Votre radio peut répondre aux messages de groupe sur le canal d'accueil mais pas répondre sur les canaux non accueil. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation/désactivation du balayage

Suivez la procédure ci-après pour activer ou désactiver le balayage sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Balayage**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option **État du balayage**. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'état de balayage requis, puis appuyez sur  pour effectuer la sélection.

Si le balayage est activé :

- L'écran affiche **Scan Activé** ainsi que l'icône **Balayage**.

- La LED clignote en jaune.

Si le balayage est désactivé :

- L'écran affiche `Scan Désactivé`.
- L'icône **Balayage** disparaît.
- La LED s'éteint.

## Réponse aux transmissions pendant un balayage

Pendant le balayage, votre radio s'arrête sur un canal/ groupe sur lequel elle détecte de l'activité. Elle reste sur ce canal pendant une durée programmée appelée « temps de maintien ». Suivez la procédure ci-après pour répondre à des transmissions pendant un balayage.

- 1  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pendant le délai de maintien.

La LED passe au vert.

- 2 Relâchez le bouton **PTT** pour écouter.

La radio reprend le balayage d'autres canaux ou groupes si vous ne répondez pas pendant le temps de maintien.

## Suppression des canaux nuisibles

Si un canal génère constamment du bruit ou des appels indésirables (pouvant donc être qualifié de « canal nuisible »), vous pouvez temporairement le supprimer de la liste de balayage. Cette fonction ne peut pas être appliquée au canal désigné comme canal sélectionné. Suivez la procédure ci-après pour supprimer des canaux nuisibles sur votre radio.

- 1 Lorsque votre radio se verrouille sur un canal indésirable ou nuisible, appuyez sur le bouton programmé de **suppression de canal nuisible** jusqu'à ce qu'une tonalité soit émise.
- 2 Relâchez le bouton programmé **Suppression de canal nuisible**.  
Le canal nuisible est supprimé.

## Restauration des canaux nuisibles

Suivez la procédure ci-après pour restaurer des canaux nuisibles sur votre radio.

Effectuez l'une des opérations suivantes :

- Mettez la radio hors tension, puis de nouveau sous tension.
- Arrêtez et redémarrez le balayage à l'aide du menu ou du bouton programmé **Balayage**.
- Changez de canal à l'aide du bouton **Canal Haut/ Canal Bas**.

---

## Balayage avec sélection automatique

La fonction de balayage avec sélection automatique vous procure une couverture remarquablement étendue dans les zones où plusieurs stations de base émettent des informations identiques sur différents canaux analogiques.

Votre radio balaie les canaux analogiques de ces stations de base et applique un processus de sélection automatique (voting) pour sélectionner le signal le plus puissant.

Ensuite, votre radio reçoit les transmissions de cette station de base.

Pendant un balayage avec sélection automatique, l'écran affiche l'icône **Balayage avec sélection automatique** tandis que la LED clignote en jaune.

Suivez les procédures de la section [Réponse aux transmissions pendant un balayage à la page 435](#) pour répondre à une émission pendant un balayage avec sélection automatique.

## Paramètres des contacts

Le menu Contacts fournit une fonction d'annuaire sur votre radio. Chaque entrée correspond à un alias ou ID que vous pouvez utiliser pour lancer un appel. Les entrées sont classées par ordre alphabétique.

Chaque entrée, selon le contexte, est associée aux différents types d'appels suivants : appel de groupe, appel individuel, appel général, appel PC ou appel console opérateur.

Les appels PC et dispatch sont des appels de données. Ils sont uniquement disponibles avec certaines applications. Veuillez consulter la documentation concernant les applications de données.

En outre, le menu Contacts vous permet d'associer chaque entrée à une ou plusieurs touches numériques programmables sur un microphone à clavier. Si une entrée est associée à une touche numérique, votre radio peut appliquer la numérotation rapide à cette entrée.

#### REMARQUE:

Une coche est affichée devant chaque touche numérique attribuée à une entrée. Si la coche est placée devant une position **Wide**, cela signifie qu'aucune touche numérique n'a été attribuée à cette entrée.

Chaque entrée de chaque liste affiche les informations suivantes :

- Type d'appel
- Alias d'appel
- ID d'appel

#### REMARQUE:

Si la fonction Secret est activée sur un canal, vous pouvez utiliser cette fonctionnalité pour réaliser un appel de groupe crypté, un appel individuel ou un appel général sur ce canal. Seules les radios cibles disposant de la même clé de confidentialité ou des mêmes valeur et ID de clé que ceux de votre radio sont en mesure de déchiffrer la transmission.

## Émission d'appels de groupe à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels de groupe sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur le bouton **PTT** pour lancer l'appel. La LED passe au vert.

---

- 5 Relâchez le bouton **PTT** pour écouter. La LED verte clignote lorsqu'un utilisateur du groupe répond. L'écran affiche l'icône **Appel de groupe**,

ainsi que l'alias ou l'ID du groupe et de la radio en émission.

- 
- 6  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée.

---

## Émission d'appels individuels à l'aide du répertoire

Suivez la procédure ci-après pour passer des appels individuels sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur le bouton **PTT** pour lancer l'appel. La LED passe au vert. L'écran affiche l'alias de la destination.
- 

- 5 Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
- 

- 6 Relâchez le bouton **PTT** pour écouter. La LED verte clignote lorsque la radio cible répond. L'écran affiche l'alias ou l'ID de l'utilisateur émetteur.
- 

- 7  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement

lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.

L'appel se termine en l'absence d'activité vocale pendant une période prédéterminée. Une tonalité est émise. L'écran affiche Appel terminé.

## Attribution d'entrées aux touches numériques programmables

Suivez la procédure ci-après pour attribuer des entrées aux touches numériques programmables de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Touche progr. Appuyez sur  pour valider la sélection.

---

- 5 Effectuez l'une des opérations suivantes :
  - Si la touche numérique souhaitée n'a encore été attribuée à aucune entrée, appuyez sur  ou sur  pour y accéder. Appuyez sur  pour valider la sélection.
  - Si la touche numérique en question est actuellement attribuée à une entrée, le message La clé est déjà attribuée apparaît, tandis que la première ligne affiche la question Remplacer ?. Effectuez l'une des opérations suivantes :

Appuyez sur  ou sur  pour atteindre

Oui. Appuyez sur  pour valider la sélection.

Une tonalité d'indication positive est émise et l'écran affiche **Contact enregistré** et un mini-avis positif.

Appuyez sur  ou  pour atteindre **Non** et revenir à l'étape précédente.

Chaque entrée peut être associée à une touche numérique différente. Un signe ✓ est affiché devant chaque touche numérique attribuée à une entrée. Si ✓ apparaît devant **Vide**, cette touche numérique n'est pas attribuée.

Lorsqu'une touche numérique est attribuée à une entrée dans un mode spécifique, cette fonction n'est pas disponible lorsque vous appuyez de manière prolongée sur cette touche numérique dans un autre mode.

L'écran revient automatiquement au menu précédent.

## Annulation de l'attribution d'entrées aux touches numériques programmables

Suivez la procédure ci-après pour annuler l'attribution d'entrées aux touches numériques programmables de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Exercez une pression longue sur la touche numérique programmée pour accéder à l'alias ou à l'ID souhaité. Passez à [étape 4](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option Touche progr. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour atteindre Vide. Appuyez sur  pour valider la sélection. La première ligne affiche le message Effacer toutes clés.

---

6 Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection.

**REMARQUE:**

Lorsque vous supprimez une entrée, toute association de cette entrée avec une ou plusieurs touches numériques programmées est également supprimée.

Une tonalité d'indication positive est émise. L'écran indique Contact enregistré.

L'écran revient automatiquement au menu précédent.

---

## Ajout de nouveaux contacts

Suivez la procédure ci-après pour ajouter de nouveaux contacts sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Nveau contact. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour sélectionner le type de contact Contacts radio ou Contacts téléphoniques. Appuyez sur  pour valider la sélection.

---

5 Entrez le numéro du contact à l'aide du pavé numérique, puis appuyez sur  pour continuer.

---

6 Entrez le nom du contact à l'aide du clavier, puis appuyez sur  pour continuer.

---

7 Appuyez sur  ou sur  pour accéder au type de sonnerie souhaité. Appuyez sur  pour valider la sélection.

Une tonalité d'indication positive est émise. L'écran affiche un mini-avis positif.

---

### Définition du contact par défaut

Suivez la procédure ci-après pour définir le contact par défaut utilisé sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Définir défaut. Appuyez sur  pour valider la sélection.

Une tonalité d'indication positive est émise. L'écran affiche un mini-avis positif. L'écran affiche le symbole  en regard de l'alias ou de l'ID sélectionné par défaut.

---

## Paramètres des indicateurs d'appel

Cette fonction permet aux utilisateurs radio de configurer les sonneries des appels et ou des messages texte.

### Activation/désactivation des sonneries d'avertissements d'appel

Suivez la procédure ci-après pour activer ou désactiver les sonneries d'avertissement d'appel sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Tonalités/Alertes. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou sur  pour accéder à l'option Avert. d'appel. Appuyez sur  pour valider la sélection.

---

- 7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de la tonalité sélectionnée.

---

## Activation/désactivation des sonneries des appels individuels

Suivez la procédure ci-après pour activer ou désactiver les sonneries des appels individuels sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option TnItés/Avert. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  ou sur  pour accéder à l'option Appel indiv. Appuyez sur  pour valider la sélection.

L'écran affiche  en regard de l'option Activé, si l'option des sonneries d'appel individuel est activée.

L'écran affiche  en regard de l'option Désactivé, si l'option des sonneries d'appel individuel est désactivée.

- 7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection.

Si cette option est activée, le symbole  apparaît en regard de la mention Activé. Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation des sonneries des appels sélectifs

Suivez la procédure ci-après pour activer ou désactiver les sonneries des appels sélectifs sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option TnItés/Avert. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou sur  pour accéder à l'option Appel sélectif. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole  ainsi que la tonalité actuelle.

---

- 7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de la tonalité sélectionnée.

## Activation/désactivation des sonneries des messages texte

Suivez la procédure ci-après pour activer ou désactiver les sonneries des messages texte sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option TnItés/Avert. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou  pour accéder à l'option Message texte. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole  ainsi que la tonalité actuelle.

---

- 7 Appuyez sur  ou sur  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection.  
L'écran affiche  en regard de la nouvelle tonalité sélectionnée.

---

## Activation/Désactivation des sonneries des États de télémétrie avec texte

Suivez la procédure ci-après pour activer ou désactiver les sonneries d'appel de l'état de télémétrie avec texte sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Tonalités/Alertes. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Sonn. d'appels. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou sur  pour accéder à l'option Télémétrie. Appuyez sur  pour valider la sélection.  
La tonalité actuelle est indiquée par le symbole ✓.

---

## Attribution de types de sonnerie

La radio peut être programmée pour émettre l'une des dix sonneries disponibles lorsqu'elle reçoit un avertissement d'appel ou un message texte d'un utilisateur identifié. En faisant défiler la liste, vous entendez successivement chaque sonnerie. Suivez la procédure ci-après pour attribuer des styles de sonneries à votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.
- Les entrées sont classées par ordre alphabétique.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou  pour accéder à l'option Modifier. Appuyez sur  pour valider la sélection.
- 

- 5 Appuyez sur  ou  pour accéder à l'option Modifier la sonnerie. Appuyez sur  pour valider la sélection.
- 

- 6 Appuyez sur  ou  pour accéder à la tonalité souhaitée. Appuyez sur  pour valider la sélection.
- ✓ apparaît en regard de la tonalité sélectionnée.
- 

## Volume croissant de la tonalité des alarmes

La radio peut être programmée pour vous avertir en permanence lorsqu'un appel radio reste sans réponse. Votre radio augmente automatiquement le volume de la tonalité pendant une période prédéterminée. Cette fonction est appelée Avert. croissant.

## Caractéristiques du journal des appels

Votre radio génère un journal de tous les appels individuels entrants et sortants, répondus ou en absence. Ce journal vous permet d'afficher et de gérer les appels récents.

Les avertissements d'appels manqués peuvent être inclus dans les journaux d'appels, selon la configuration du système de votre radio. Les listes d'appels vous permettent d'effectuer les tâches suivantes :

- Enregistrer les alias ou les ID dans le répertoire
- Supprimer l'appel
- Supprimer tous les appels
- Voir les détails

### Affichage des appels récents

Suivez la procédure ci-après pour afficher les appels récents sur votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Les options sont les suivantes : **Manqués**, **Répondus** et **Sortants**.

Appuyez sur  pour valider la sélection.  
L'écran affiche l'entrée la plus récente.

---

- 4 Appuyez sur  ou sur  pour afficher la liste. Appuyez sur le bouton **PTT** pour lancer un appel individuel à partir de l'alias ou de l'ID actuellement affiché à l'écran.
-

## Suppression d'appels de la liste d'appels

Suivez la procédure ci-après pour supprimer des appels de la liste des appels.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option `Appels`. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.

Si la liste est vide :

- Une tonalité est émise.
  - L'écran affiche `Liste Vide`.
- 

4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option `Supprimer l'entrée ?`. Appuyez sur  pour valider la sélection.

---

6 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour sélectionner `Oui` et supprimer l'entrée. L'écran affiche `Entrée supprimée`.
  - Appuyez sur  ou sur  pour atteindre `Non`. Appuyez sur  pour valider la sélection. La radio revient à l'écran précédent.
-

## Affichage des détails de la liste des appels

Pour afficher les détails des appels sur votre radio, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option **Voir détails**. Appuyez sur  pour valider la sélection.  
L'écran affiche les détails des appels.

## Enregistrement des alias ou des ID de la liste d'appels

Suivez la procédure ci-après pour enregistrer sur votre radio des alias ou des ID contenus dans la liste d'appels.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Appels**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à la liste souhaitée. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Stocker. Appuyez sur  pour valider la sélection.

L'écran affiche un curseur clignotant.

---

6 Saisissez le reste des caractères de l'alias souhaité. Appuyez sur  pour valider la sélection. Vous pouvez également enregistrer un ID sans alias. L'écran affiche un mini-avis positif.

---

## Fonctionnement de l'avertissement d'appel

La fonction d'avertissement d'appel vous permet de demander à un utilisateur de vous rappeler.

Cette fonction est réservée aux alias ou ID de terminaux et est accessible par le menu via Contacts, par numérotation manuelle ou via un bouton programmé d'**accès par numérotation rapide**.

## Émission d'avertissements d'appel

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio.

1 Appuyez sur le bouton **Accès direct** préprogrammé.

L'écran affiche Avert. d'appel, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

---

2 Attendez l'accusé de réception.

Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.

Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, un mini-avis négatif est affiché.

---

## Émission d'avertissements d'appel à l'aide du répertoire

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio à l'aide du répertoire.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Avert. d'appel. Appuyez sur  pour valider la sélection.  
L'écran affiche Avert. d'appel, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

---

- 5 Attendez l'accusé de réception.
  - Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.
  - Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, un mini-avis négatif est affiché.

---

## Émission d'avertissements d'appel à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour émettre des avertissements d'appel sur votre radio à l'aide de la numérotation manuelle.

- 1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

L'écran affiche un curseur clignotant.

---

4 Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.

---

5 Appuyez sur  ou sur  pour accéder à l'option Avert. d'appel. Appuyez sur  pour valider la sélection.

L'écran affiche Avert. d'appel, ainsi que l'alias ou l'ID du terminal radio. La LED passe au vert.

---

6 Attendez l'accusé de réception.

- Lorsque l'accusé de réception de l'avertissement d'appel est reçu, un mini-avis positif est affiché.
  - Si l'accusé de réception de l'avertissement d'appel n'est pas reçu, un mini-avis négatif est affiché.
- 

## Réponse aux avertissements d'appels

Suivez la procédure ci-après pour répondre aux avertissements d'appel sur votre radio.

Lorsque vous recevez un avertissement d'appel :

- Une tonalité répétitive est émise.
- La LED clignote en jaune.
- L'écran affiche la liste des notifications, laquelle répertorie un avertissement d'appel en indiquant l'alias ou l'ID de la radio appelante.

En fonction de la configuration effectuée par votre revendeur ou votre administrateur système, vous pouvez répondre à un avertissement d'appel en procédant de l'une des manières suivantes :

- Appuyez sur le bouton **PTT** et répondez par un appel individuel directement avec l'appelant.
- Appuyez sur le bouton **PTT** pour continuer une communication de groupe de parole normale. L'avertissement d'appel est déplacé dans l'option Appels manqués du menu Journal d'appels. Vous pouvez répondre à l'appelant à partir du journal des appels manqués.

Reportez-vous aux sections [Liste des notifications à la page 208](#) et [Caractéristiques du journal des appels à la page 139](#) pour plus d'informations.

## Mode Muet

Le mode Muet permet à l'utilisateur de couper le son de tous les indicateurs sonores de la radio.

Une fois la fonctionnalité Mode Muet activée, le son de tous les indicateurs sonores est coupé, à l'exception des fonctionnalités de priorité supérieure telles que les opérations d'urgence.

Lorsque l'utilisateur quitte le mode Muet, la radio recommence à émettre les transmissions audio et les tonalités en cours.

### REMARQUE:

Il s'agit d'une fonction disponible à l'achat. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation du mode Muet

Pour activer le mode Muet, procédez comme suit.

Accédez à cette fonctionnalité via le bouton **Mode Muet** programmé.

Les événements suivants se produisent lorsque le mode Muet est activé :

- Une tonalité d'indication positive est émise.
- L'écran affiche `Mode Muet Activé`.
- La LED rouge commence à clignoter et cesse de clignoter une fois que l'utilisateur quitte le mode Muet.
- L'icône **Mode Muet** apparaît sur l'écran d'accueil.
- Le son de la radio est désactivé.
- Le compte à rebours de la durée configurée pour le délai du mode Muet commence.

## Définition du délai du mode Muet

Il est possible d'activer la fonctionnalité Mode Muet pour une période préconfigurée en définissant le délai du mode Muet. La durée du délai est configurée dans le menu de la radio et est comprise entre 0,5 heure et 6 heures. Une fois le délai expiré, la radio quitte le mode Muet.

Si le délai est laissé sur 0, la radio reste en mode Muet pendant une période indéfinie, jusqu'à ce que l'utilisateur appuie sur le bouton **Mode Muet** programmé.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Délai avt muet. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur .

## Sortie du mode Muet

Le mode Muet prend fin automatiquement une fois le délai défini pour cette fonctionnalité expiré.

Pour quitter manuellement le mode Muet, effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Mode Muet** préprogrammé.
- Appuyez sur le bouton **PTT** d'une entrée.

Les événements suivants se produisent lorsque le mode Muet est désactivé :

- Une tonalité d'indication négative est émise.

- L'écran affiche Mode Muet Désactivé.
- La LED rouge clignotante s'éteint.
- L'icône **Mode Muet** disparaît de l'écran d'accueil.
- Votre radio active le son et l'état du haut-parleur est restauré.
- Si le délai du mode Muet n'a pas expiré, il est interrompu.

**REMARQUE:**

L'utilisateur quitte également le mode Muet s'il transmet un signal vocal ou passe sur un canal non programmé.

## Gestion de l'urgence

Une alarme d'urgence sert à signaler une situation critique. Vous pouvez déclencher une urgence à tout moment, même en cas d'activité sur le canal actuel.

Votre fournisseur peut régler la durée de la pression sur le bouton **Urgence** programmé, sauf pour la pression longue qui est similaire à tous les autres boutons :

**Pression courte**

Entre 0,05 seconde et 0,75 seconde.

**Pression longue**

Entre 1,00 seconde et 3,75 secondes.

Le bouton **Urgence** est attribué à la fonction Urgence activée/désactivée. Pour plus d'informations sur les fonctions attribuées au bouton **Urgence**, consultez votre fournisseur local.

**REMARQUE:**

Si une pression courte sur le bouton **Urgence** active le mode Urgence, alors une pression longue le désactive.

Si une pression longue sur le bouton **Urgence** active le mode Urgence, alors une pression courte le désactive.

Votre radio prend en charge trois modes d'alarme d'urgence :

- Alarme d'urgence
- Alarme d'urgence avec appel
- Alarme d'urgence suivie d'un appel vocal 

**REMARQUE:**

Seule l'une des alarmes d'urgence ci-dessus peut être attribuée au bouton préprogrammé **Urgence** ou à la pédale d'urgence.

De plus, chaque alarme comporte les options suivantes :

## Regular

La radio transmet un signal d'alarme et fournit des indications audio et/ou visuelles.

## Silent

La radio transmet un signal d'alarme sans indications audio ni visuelles. La radio reçoit des appels sans qu'aucun son ne soit émis par le haut-parleur, jusqu'à ce que vous appuyiez sur le bouton *PTT* et/ou que la période d'émission en mode **Micro ouvert** expire.

## Silencieux avec voix

La radio transmet un signal d'alarme sans indications audio ni visuelles, mais permet l'écoute d'appels entrants dans le haut-parleur.

## Réception d'alarmes d'urgence

Suivez la procédure ci-après pour recevoir des alarmes d'urgence sur votre radio.

Lorsque vous recevez une alarme d'urgence :

- Une tonalité est émise.
- La LED clignote en rouge.
- L'écran affiche l'icône **Urgence** ainsi que l'alias de l'appelant d'urgence. Si plusieurs alarmes sont

référéncées, tous les alias des appelants d'urgence s'affichent dans la liste des alarmes.

1 Effectuez l'une des opérations suivantes :

- En présence d'une seule alarme, appuyez sur  pour afficher plus d'informations.
- En présence de plusieurs alarmes, appuyez sur  ou sur  pour accéder à l'alias souhaité, puis appuyez sur  pour afficher plus d'informations.

---

2 Appuyez sur  pour afficher les options d'action.

---

3 Appuyez sur  et sélectionnez **Oui** pour fermer la liste des alarmes.

---

4 Appuyez sur  pour accéder au menu.

---

5 Sélectionnez **Liste Alarmes** pour accéder de nouveau à cette liste.

---

- 6 La tonalité retentit et la LED clignote en rouge jusqu'à ce que vous quittiez le mode d'urgence. Cependant, la tonalité peut être désactivée. Effectuez l'une des opérations suivantes :
- Appuyez sur le bouton **PTT** pour appeler le groupe de radios ayant reçu l'alarme d'urgence.
  - Appuyez sur n'importe quel bouton programmable.
  - Quittez le mode d'urgence. Voir [Sortie du mode d'urgence après réception d'une alarme d'urgence à la page 460](#).

## Réponse aux alarmes d'urgence

Suivez la procédure ci-après pour répondre aux alarmes d'urgence sur votre radio.

- 1 Assurez-vous que l'écran affiche la liste des alarmes. Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité.
- 2  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est

relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour émettre en mode vocal sans urgence sur le groupe ciblé par l'alarme d'urgence.

La LED passe au vert. Votre radio reste en mode Urgence.

- 
- 3 Effectuez l'une des opérations suivantes :

- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
-  Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.

- 
- 4 Relâchez le bouton **PTT** pour écouter.

Lorsque la radio à l'origine de l'urgence répond :

- La LED clignote en vert.
  - L'écran affiche l'icône **Appel de groupe** ainsi que l'ID du groupe, l'ID de la radio en émission et la liste des alarmes.
-

Un appel vocal d'urgence peut uniquement être émis par la radio qui a déclenché le mode Urgence. Toutes les autres radios (dont la radio réceptrice de l'urgence) émettent en mode vocal sans urgence.

### Sortie du mode d'urgence après réception d'une alarme d'urgence

Pour quitter le mode Urgence après réception d'une alarme d'urgence, effectuez l'une des opérations suivantes :

- Supprimez les alarmes.
- Éteignez la radio.

### Envoi d'alarmes d'urgence

Cette fonction permet d'envoyer une alarme d'urgence, un signal non vocal, qui déclenche un avertissement sur un groupe de radios. Votre radio n'affiche aucune indication audio ni visuelle en mode Urgence lorsqu'elle est définie sur silencieux.

Suivez la procédure ci-après pour envoyer des alarmes d'urgence sur votre radio.

#### 1 Appuyez sur le bouton programmé **Urgence activée**.

Vous obtenez l'un des résultats suivants :

- L'écran affiche Alarmes Tx ainsi que l'alias de destination.
-  L'écran affiche Télégram Tx ainsi que l'alias de destination.

La LED passe au vert. L'icône **Urgence** s'affiche.

#### **REMARQUE:**

Si elle est programmée, la tonalité de recherche d'urgence est émise. Cette tonalité est désactivée lorsque la radio transmet ou reçoit des messages vocaux, et s'arrête lorsque la radio quitte le mode Urgence. La tonalité de recherche d'urgence peut être programmée via CPS.

---

#### 2 Attendez l'accusé de réception.

Si l'opération réussit :

- La tonalité d'urgence est émise.
- La LED clignote en rouge.

- L'écran affiche `Alarme envoy.`

Si toutes les tentatives ont échoué :

- Une tonalité est émise.
- L'écran affiche `Échec Alarme.`

La radio quitte le mode Alarme d'urgence et revient à l'écran d'accueil.

- L'écran affiche `Télégram Tx` ainsi que l'alias de destination.

La LED passe au vert. L'icône **Urgence** s'affiche.

#### REMARQUE:

Si elle est programmée, la tonalité de recherche d'urgence est émise. Cette tonalité est désactivée lorsque la radio transmet ou reçoit des messages vocaux, et s'arrête lorsque la radio quitte le mode Urgence. La tonalité de recherche d'urgence peut être programmée par le revendeur ou l'administrateur système.

## Envoi d'alarmes d'urgence avec un appel

Cette fonctionnalité permet d'envoyer une alarme d'urgence avec appel à un groupe de radios. Après accusé de réception par l'une des radios du groupe, le groupe de radios peut communiquer sur un canal d'urgence programmé.

Suivez la procédure ci-après pour envoyer des alarmes d'urgence avec un appel sur votre radio.

- 1 Appuyez sur le bouton programmé **Urgence activée** ou sur la **pédale d'urgence**. L'écran affiche Envoi de l'alarme, en alternance avec votre ID de radio.

Les éléments suivants s'affichent :

- 2 Attendez l'accusé de réception.

Si l'opération réussit :

- La tonalité d'urgence est émise.
- La LED clignote en rouge.
- L'écran affiche `Alarme envoy.`
- Votre radio passe en mode Appel d'urgence lorsque l'écran affiche `Urgence` et l'alias du groupe destinataire.

- 3 Appuyez sur le bouton **PTT** pour lancer l'appel.  
La LED passe au vert. L'écran affiche l'icône **Appel de groupe**.
- 

- 4 Effectuez l'une des opérations suivantes :
- Attendez la fin de la tonalité d'autorisation de parler (si cette fonction est activée) et parlez distinctement dans le microphone.
  -  Attendez la fin de la tonalité locale **PTT** (si cette option est activée) et parlez distinctement dans le microphone.
- 

- 5 Relâchez le bouton **PTT** pour écouter.  
L'écran affiche les alias d'appelant et de groupe.
- 

- 6  Si la fonction d'indication Canal libre est activée, vous entendrez une brève tonalité d'avertissement lorsque le bouton **PTT** de la radio émettrice est relâché. Cette tonalité confirme que le canal est libre et que vous pouvez parler. Appuyez sur le bouton **PTT** pour répondre à l'appel.
- 

- 7 Pour quitter le mode Urgence une fois l'appel terminé, appuyez sur le bouton **Urgence désact.**  
La radio revient à l'écran d'accueil.
- 

## Alarmes d'urgence suivies d'un appel vocal

Cette fonctionnalité permet d'envoyer une alarme d'urgence suivie d'un appel vocal à un groupe de radios. Le microphone de votre radio est automatiquement ouvert et vous n'avez plus besoin d'appuyer sur le bouton **PTT** pour communiquer avec le groupe de radios. Cet état activé du microphone est également appelé « *Micro ouvert* ».

### REMARQUE:

A l'exception du microphone IMPRES, votre radio ne peut détecter aucun autre microphone relié au connecteur arrière.

Lorsqu'aucun microphone n'est détecté sur le connecteur programmé, votre radio effectue une recherche sur l'autre connecteur. Ici, votre radio donne la priorité au microphone détecté.

Si le mode Cycle d'urgence est activé sur votre radio, le cycle alternatif entre le *Micro ouvert* et la réception d'appel est activé pendant une durée programmée. En mode Cycle

d'urgence, les appels reçus sont entendus dans le haut-parleur.

Si vous appuyez sur le bouton **PTT** pendant la période de réception programmée, vous entendrez la tonalité d'interdiction, indiquant que le bouton **PTT** doit être relâché. La radio ignore le bouton **PTT** et reste en mode Urgence.

Si vous appuyez sur le bouton **PTT** pendant que le micro est *ouvert* et le maintenez enfoncé après expiration de la période *Micro ouvert*, la radio continue d'émettre jusqu'à ce que vous relâchiez le bouton **PTT**.

Si la demande d'alarme d'urgence échoue, la radio ne tente pas de renvoyer la demande et passe directement en mode d'émission *Micro ouvert*.

#### REMARQUE:

Il est possible que certains accessoires ne prennent pas en charge le mode *Micro ouvert*. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Envoi d'un message d'alarme d'urgence suivi d'un appel vocal

Suivez la procédure ci-après pour envoyer des alarmes d'urgence suivies d'un appel vocal sur votre radio.

- 1 Appuyez sur le bouton programmé **Urgence activée** ou sur la **pédale d'urgence**.

Vous obtenez l'un des résultats suivants :

- L'écran affiche `Alarme Tx` ainsi que l'alias de destination.
- L'écran affiche `Télégram Tx` ainsi que l'alias de destination.

La LED passe au vert. L'icône **Urgence** s'affiche.

- 
- 2 Lorsque l'écran affiche `Alarme envoy.`, parlez distinctement dans le microphone.

La radio arrête automatiquement l'émission dans les cas suivants :

- Si le mode Cycle d'urgence est activé, la durée du cycle alternatif entre le *Micro ouvert* et la réception d'appel expire.

- Si le mode Cycle d'urgence est désactivé, la période *Micro ouvert* expire.

---

**3** Appuyez sur le bouton **Urgence désact.** pour quitter le mode Urgence.

La radio revient à l'écran d'accueil.

---

## Relance d'un mode Urgence

Cette fonction concerne uniquement la radio qui envoie l'alarme d'urgence. Suivez la procédure ci-après pour relancer un mode Urgence sur votre radio.

Effectuez l'une des opérations suivantes :

- Changez de canal pendant que la radio est en mode Urgence. La radio quitte le mode Urgence avant de réinitialiser l'urgence si l'alarme d'urgence est activée sur le nouveau canal.
  - Appuyez sur le bouton programmé **Urgence activée** pendant que la radio est en train d'activer le mode Urgence ou d'émettre en mode Urgence. La radio annule alors l'état en cours avant de relancer le mode Urgence.
- 

## Sortie du mode Urgence après envoi d'une alarme d'urgence

Cette fonction concerne uniquement la radio qui envoie l'alarme d'urgence.

Votre radio sortira du mode Urgence dans les cas suivants :

- La radio reçoit un accusé de réception (alarme d'urgence uniquement).
- La radio a utilisé le nombre total de tentatives d'envoi d'une alarme.

### REMARQUE:

si votre radio s'éteint, le mode Urgence est annulé. Le mode Urgence ne sera pas automatiquement rétabli à la prochaine mise sous tension de la radio.

Suivez la procédure ci-après pour désactiver le mode Urgence sur votre radio.

Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Urgence désact.** programmé.
- Basculez vers un nouveau canal sur lequel aucun système d'urgence n'est configuré.

L'écran affiche alors Sans urgence.

---

## Suppression d'une alarme de la liste des alarmes

Suivez la procédure ci-après pour supprimer les alarmes à partir de la liste des alarmes pour quitter le mode d'urgence.

- 1 Appuyez sur  pour accéder au menu.
  - 2 Appuyez sur  ou  pour accéder à l'option Liste des alarmes. Appuyez sur  pour valider la sélection.
  - 3 Appuyez sur  ou  pour accéder à l'alarme souhaitée. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.
- 

## Message texte

Votre radio vous permet de recevoir des données, par exemple sous forme de message texte, depuis une autre radio ou une application de messages textes.

Il existe deux types de messages texte : les messages texte DMR courts et les messages texte. La longueur maximale d'un message texte DMR court est de 23 caractères. La longueur maximale d'un message texte est de 280 caractères, ligne d'objet comprise. La ligne d'objet s'affiche uniquement lorsque vous recevez des messages provenant d'une application de messagerie.

### REMARQUE:

Cette longueur maximale s'applique uniquement aux modèles dotés de la dernière version du logiciel et du matériel. Pour les modèles de radio dotés de versions plus anciennes, la longueur maximale d'un message texte est de 140 caractères. Consultez votre fournisseur ou administrateur système pour en savoir plus.

pour la langue arabe, la saisie de texte s'effectue de droite à gauche.

## Messages texte

Les messages texte sont stockés dans une boîte de réception et classés dans l'ordre chronologique de leur arrivée, le plus récent étant affiché en premier.

### Affichage des messages texte

Suivez la procédure ci-après pour afficher des messages texte sur votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou sur  pour accéder à l'option **Messages**. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'option **Boîte récept.** Appuyez sur  pour valider la sélection.

Si la boîte de réception est vide :

- L'écran affiche **Liste Vide**.
  - Si la tonalité du clavier est activée, une tonalité est émise.
- 

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.  
L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.
-

## Affichage des messages texte d'état de télémessure

Suivez la procédure ci-après pour afficher un message texte d'état de télémessure à partir de la boîte de réception.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

Vous ne pouvez pas répondre à un message texte État de télémessure.

L'écran affiche Télémessure : <Message texte d'état>.

- 5 Appuyez de manière prolongée sur  pour revenir à l'écran d'accueil.

## Réponse aux messages texte

Suivez la procédure ci-après pour répondre aux messages texte sur votre radio.

Lorsque vous recevez un message texte :

- L'écran affiche la liste des notifications en indiquant l'alias ou l'ID de l'expéditeur.
- L'icône **Message** s'affiche à l'écran.

### REMARQUE:

Appuyez sur le bouton **PTT** et la radio ferme l'écran d'avertissement de message texte avant d'établir un appel individuel ou de groupe vers l'expéditeur du message.

- 1 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Lire. Appuyez sur  pour valider la sélection. L'écran affiche le message texte. L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.
- Appuyez sur  ou sur  pour accéder à l'option Lire+tard. Appuyez sur  pour valider la sélection. La radio revient à l'écran affiché avant la réception du message texte.
- Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

**2** Effectuez l'une des opérations suivantes :

- Appuyez sur  pour revenir à la boîte de réception.

- Appuyez une seconde fois sur  pour répondre à un message texte, le transférer ou le supprimer.

## Réponse aux messages texte par un message rapide

Suivez la procédure ci-après pour répondre à des messages texte à l'aide de messages texte rapides sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à l'étape [étape 3](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.

---

5 Appuyez sur  pour accéder au sous-menu.

---

6 Appuyez sur  ou sur  pour accéder à l'option Répondre. Appuyez sur  pour valider la sélection.

---

7 Appuyez sur  ou sur  pour accéder à l'option Réponse rapide. Appuyez sur  pour valider la sélection.

---

8 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

---

9 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité est émise.
  - L'écran affiche un mini-avis négatif.
  - L'écran Renvoyer s'affiche de nouveau.
-

## Renvoi de messages texte

Suivez la procédure ci-après pour renvoyer des messages texte sur votre radio.

Lorsque l'écran **Renvoyer** est affiché :

Appuyez sur  pour renvoyer le message au même alias ou ID de terminal radio/de groupe.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.
- L'écran **Renvoyer** s'affiche de nouveau.

## Transfert de messages texte

Suivez la procédure ci-après pour transférer des messages texte sur votre radio.

Lorsque l'écran **Renvoyer** est affiché :

- 1 Appuyez sur  ou sur  pour accéder à l'option **Transférer**, puis appuyez sur  pour renvoyer le message à un autre alias ou ID de terminal radio/groupe.

---

- 2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.  
L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

---

- 3 Attendez l'accusé de réception.  
Si l'opération réussit :
  - Une tonalité d'indication positive est émise.
  - L'écran affiche un mini-avis positif.
 Si l'opération échoue :
  - Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.

**REMARQUE:**

Vous pouvez aussi sélectionner manuellement l'adresse d'une radio cible (voir [Transfert de messages texte à l'aide de la numérotation manuelle à la page 471](#)).

## Transfert de messages texte à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour transférer des messages texte sur votre radio à l'aide de la numérotation manuelle.

**1** Appuyez sur  ou sur  pour accéder à l'option Transférer. Appuyez sur  pour valider la sélection.

**2** Appuyez sur  pour envoyer le message à un autre alias ou ID de terminal radio/de groupe.

**3** Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

L'écran affiche Numéro radio :.

**4** Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

**5** Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité est émise.
- L'écran affiche un mini-avis négatif.

## Modification de messages texte

Sélectionnez **Modifier** pour modifier le message.

### REMARQUE:

si une ligne **Objet** s'affiche (pour les messages provenant d'une application e-mail), il n'est pas possible de la modifier.

- 1 Appuyez sur  ou  pour accéder à l'option **Modifier**. Appuyez sur  pour valider la sélection.  
L'écran affiche un curseur clignotant.

- 2 Utilisez le clavier pour modifier le message.

- Appuyez sur  pour vous décaler d'un espace vers la gauche.
- Appuyez sur  ou  pour vous déplacer d'un espace vers la droite.
- Appuyez sur  pour supprimer tous les caractères indésirables.

- Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

- 3 Appuyez sur  lorsque vous avez terminé de composer votre message.

- 4 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option **Envoyer** et appuyez sur  pour envoyer le message.
- Appuyez sur  ou  pour accéder à l'option **Enregistrer** et appuyez sur  pour enregistrer le message dans le dossier **Brouillons**.
- Appuyez sur  pour modifier le message.
- Appuyez sur  pour choisir de supprimer le message ou de l'enregistrer dans le dossier **Brouillons**.

## Envoi de messages texte

Suivez la procédure ci-après pour rédiger des messages texte sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option **Messages**. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  pour accéder à l'option **Composer**. Appuyez sur  pour valider la sélection.  
Un curseur clignotant apparaît.

4 Saisissez votre message à l'aide du clavier.

Appuyez sur  pour vous décaler d'un espace vers la gauche.

Appuyez sur  ou  pour vous déplacer d'un espace vers la droite.

Appuyez sur  pour supprimer tous les caractères indésirables.

Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

5 Appuyez sur  lorsque vous avez terminé de composer votre message.

Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton  pour envoyer le message.
- Appuyez sur . Appuyez sur  ou  pour choisir de modifier, de supprimer ou d'enregistrer le message. Appuyez sur  pour valider la sélection.

## Envoi de messages texte

Suivez la procédure ci-après pour envoyer des messages texte sur votre radio.

Supposons que vous avez récemment écrit ou enregistré un message texte.

Sélectionnez le destinataire du message. Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.
- Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection. Saisissez l'ID de terminal. La première ligne de l'écran affiche Numéro radio :. La deuxième ligne de l'écran affiche un curseur clignotant. Saisissez l'ID ou l'alias du terminal. Appuyez sur .

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

Si l'opération réussit :

- Une tonalité est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité grave est émise.
- L'écran affiche un mini-avis négatif.
- Le message est déplacé vers le dossier Éléments envoyés.
- Le message est signalé par l'icône Échec envoi.

### REMARQUE:

Pour un message texte récemment écrit, la radio revient à l'écran Renvoyer.

## Suppression des messages texte de la boîte de réception

Suivez la procédure ci-après pour supprimer les messages texte contenus dans la boîte de réception de votre radio.

- 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).

- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

Si la boîte de réception est vide :

- L'écran affiche Liste Vide.
- Une tonalité est émise.

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'écran affiche la ligne d'objet si le message provient d'une application de messagerie.

5 Appuyez sur  pour accéder au sous-menu.

6 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

7 Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection. L'écran affiche un mini-avis positif. La Boîte de réception est à nouveau affichée.

## Suppression de tous les messages texte de la boîte de réception

Suivez la procédure ci-après pour supprimer tous les messages texte contenus dans la boîte de réception de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).

- Appuyez sur  pour accéder au menu.
- 

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Boîte récept. Appuyez sur  pour valider la sélection.

Si la boîte de réception est vide :

- L'écran affiche Liste Vide.
  - Une tonalité est émise.
- 

4 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour atteindre Oui.

Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis positif.

---

## Messages texte envoyés

Dès qu'un message a été envoyé à une autre radio, il est archivé dans le dossier Messages envoyés. Le dernier message texte envoyé est toujours ajouté à la première ligne de la liste des messages envoyés. Vous pouvez renvoyer, transférer, modifier ou supprimer un message texte envoyé.

Le dossier Messages envoyés contient les 30 derniers messages envoyés au maximum. Lorsque que le dossier est plein, le dernier message envoyé remplace le plus ancien figurant dans ce dossier.

Si vous fermez l'écran d'envoi des messages pendant l'envoi d'un message, la radio met à jour l'état du message dans le dossier Messages envoyés sans fournir d'indication visuelle ni sonore.

Si la radio change de mode ou s'éteint avant que l'état d'un message ne soit mis à jour dans le dossier Messages envoyés, la radio ne pourra pas terminer la mise à jour des

messages en cours et une icône **Échec envoi** signalera le message.

La radio peut mettre à jour jusqu'à cinq messages en cours. Pendant cette procédure, la radio affiche automatiquement une icône **Échec envoi message** pour indiquer qu'elle ne peut pas envoyer d'autre message.

Exercez une pression longue sur  à tout moment pour revenir à l'écran d'accueil.

#### REMARQUE:

Si le type de canal, par exemple numérique conventionnel ou Capacity Plus ne correspond pas, vous pouvez uniquement modifier, transférer ou supprimer un message envoyé.

## Affichage des messages texte envoyés

Suivez la procédure ci-après pour afficher les messages texte envoyés sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Msges envoyés. Appuyez sur  pour valider la sélection.

Si le dossier Messages envoyés est vide :

- L'écran affiche Liste Vide.
- Si la tonalité du clavier est activée, une tonalité basse est émise.

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

L'icône dans l'angle supérieur droit de l'écran indique le statut du message. Voir [Icônes Messages envoyés](#).

## Envoi de messages texte envoyés

Suivez la procédure ci-après pour envoyer un message texte envoyé sur votre radio.

Lorsqu'un message envoyé est affiché :

- 1 Appuyez sur  pendant que le message est affiché.

---

- 2 Vous pouvez soit renvoyer ou transférer un message texte envoyé. Effectuez l'une des opérations suivantes :
  -  pour accéder à l'option Renvoyer. Appuyez sur  pour valider la sélection.
  -  pour accéder à l'option Transférer.  
Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.

- 3 Attendez l'accusé de réception.  
Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.
- L'écran Renvoyer s'ouvre sur la radio. Reportez-vous à la section [Renvoi de messages texte à la page 168](#) pour plus d'informations.

## Suppression des messages texte du dossier Messages envoyés

Suivez la procédure ci-après pour supprimer tous les messages texte envoyés contenus dans le dossier Messages envoyés de votre radio.

Lorsqu'un message envoyé est affiché :

- 1 Appuyez sur  .

- 2 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.
- 

## Suppression de tous les messages texte envoyés du dossier Messages envoyés

Suivez la procédure ci-après pour supprimer tous les messages texte envoyés contenus dans le dossier Messages envoyés de votre radio.

- 1 Effectuez l'une des opérations suivantes :
- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'option Msges envoyés. Appuyez sur  pour valider la sélection.

Si le dossier Messages envoyés est vide :

- L'écran affiche Liste Vide.
  - Une tonalité est émise.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.
- 

- 5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection. L'écran affiche un mini-avis positif.
  - Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour valider la sélection. La radio revient à l'écran précédent.
-

## Messages texte enregistrés

Les messages texte peuvent être enregistrés et envoyés plus tard.

Si une pression sur le bouton **PTT** ou un changement de mode ferme l'écran Écrire/modifier message pendant que vous écrivez ou modifiez un message, celui-ci est automatiquement enregistré dans le dossier Brouillons.

Le message texte le plus récemment enregistré est toujours ajouté à la première ligne de la liste des Brouillons.

Le dossier Brouillons peut contenir 10 messages au maximum. Dès qu'il contient dix messages, le message suivant enregistré remplace automatiquement le plus ancien figurant dans ce dossier.

## Affichage des messages texte enregistrés

Suivez la procédure ci-après pour afficher les messages texte enregistrés sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).

- Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Brouillons. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

## Modification des messages texte enregistrés

Suivez la procédure ci-après pour modifier les messages texte enregistrés sur votre radio.

- 1 Appuyez sur  pendant que le message est affiché.

---

- 2 Appuyez sur  ou  pour accéder à l'option **Modif.**. Appuyez sur  pour valider la sélection. Un curseur clignotant apparaît.

---

- 3 Saisissez votre message à l'aide du clavier.
 

Appuyez sur  pour vous décaler d'un espace vers la gauche.

Appuyez sur  ou  pour vous déplacer d'un espace vers la droite.

Appuyez sur  pour supprimer tous les caractères indésirables.

Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

- 4 Appuyez sur  lorsque vous avez terminé de composer votre message.
 

Effectuez l'une des opérations suivantes :

  - Appuyez sur  ou  pour accéder à l'option **Envoyer**. Appuyez sur le bouton  pour envoyer le message.
  - Appuyez sur . Appuyez sur  ou  pour choisir d'enregistrer ou de supprimer le message. Appuyez sur  pour valider la sélection.

## Suppression des messages texte enregistrés dans le dossier Brouillons

Suivez la procédure ci-après pour supprimer un message texte enregistré des brouillons de votre radio.

- 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 3](#).
- Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Messages. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Brouillons. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au message souhaité. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour supprimer le message texte.

---

## Messages texte rapides

Votre radio prend en charge un maximum de 50 messages texte rapides programmés par votre fournisseur.

Bien que les messages texte rapides soient préprogrammés, vous pouvez les modifier avant de les envoyer.

## Envoi de messages texte rapides

Suivez la procédure ci-après pour envoyer des messages texte rapides prédéfinis de votre radio vers un alias prédéfini.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Message texte** préprogrammé. Passez à [étape 6](#).
- Appuyez sur le bouton **Accès direct** préprogrammé.  
L'écran affiche un mini-avis de transition, indiquant que l'envoi du message est en cours.  
Passez à [étape 6](#).
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option **Messages**. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option **Txt rapide**. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder au message texte rapide souhaité. Appuyez sur  pour valider la sélection.

---

5 Procédez comme suit pour sélectionner le destinataire et envoyer le message.  
L'écran affiche un mini-avis de transition, confirmant que l'envoi du message est en cours.

---

6 Attendez l'accusé de réception.  
Si l'opération réussit :

- Une tonalité d'indication positive est émise.

- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
  - L'écran **Renvoyer** s'ouvre sur la radio. Reportez-vous à la section [Renvoi de messages texte à la page 168](#) pour plus d'informations.
- 

## Configuration de la saisie de texte

Votre radio vous permet de configurer différents textes.

Vous pouvez configurer les paramètres suivants pour saisir du texte sur votre radio :

- Texte prédictif
- Correction orthographique
- Maj. phrase
- Mes mots

Votre radio prend en charge les méthodes de saisie de texte suivantes :

- Numéros

- Symboles
- Prédicatif ou multi-frappe
- Langue (le cas échéant)

## REMARQUE:

Appuyez sur  à tout moment pour revenir à l'écran précédent ou appuyez de manière prolongée sur  pour revenir à l'écran d'accueil. La radio ferme l'écran actif dès que le compteur d'inactivité expire.

## Activation ou désactivation de la correction orthographique

Propose d'autres choix disponibles lorsque le mot entré dans l'éditeur de texte n'est pas reconnu par le dictionnaire intégré.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option Correction ortho. Appuyez sur  pour valider la sélection.

- 6 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option Correction ortho. Appuyez sur  pour valider la sélection.

- Appuyez sur  pour activer l'option Correction ortho. Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
- Appuyez sur  pour désactiver l'option Correction ortho. Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation ou désactivation du texte prédictif

**Texte prédictif** : Votre radio peut apprendre des séquences de texte courantes que vous utilisez souvent. Une fois que vous avez entré le premier mot d'une séquence de texte courante dans l'éditeur de texte, votre radio propose le mot suivant que vous pourriez vouloir utiliser.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.
- 4 Appuyez sur  ou sur  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.
- 5 Appuyez sur  ou sur  pour accéder à l'option Texte prédictif. Appuyez sur  pour valider la sélection.
- 6 Effectuez l'une des opérations suivantes :
  - Appuyez sur  pour activer l'option Texte prédictif. Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Appuyez sur  pour désactiver le contrôle de distorsion dynamique du microphone. Si cette

option est désactivée, le symbole ✓ n'est plus affiché en regard de la mention Activé.

---

## Maj. phrase

Cette fonction active automatiquement les majuscules pour la première lettre du premier mot de chaque nouvelle phrase.

- 1 Appuyez sur  pour accéder au menu.
  - 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.
  - 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou  pour accéder à l'option Saisie texte. Appuyez sur  pour valider la sélection.
- 

- 5 Appuyez sur  ou  pour accéder à l'option Majuscules des phrases. Appuyez sur  pour valider la sélection.
- 

- 6 Effectuez l'une des opérations suivantes :

- Appuyez sur  pour activer l'option Maj. Phrase. Si cette option est activée, le symbole ✓ apparaît en regard de la mention Activé.
  - Appuyez sur  pour désactiver l'option Maj. Phrase. Si cette option est désactivée, le symbole ✓ n'est plus affiché en regard de la mention Activé.
-

## Affichage des mots personnalisés

Vous pouvez ajouter vos propres mots personnalisés dans le dictionnaire intégré de votre radio. Votre radio conserve une liste de ces mots.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Saisie texte. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  ou sur  pour accéder à l'option Liste de mots. Appuyez sur  pour valider la sélection.  
L'écran affiche la liste des mots personnalisés.

---

## Modification des mots personnalisés

Vous pouvez modifier les mots personnalisés enregistrés sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Mes mots. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option Liste de mots. Appuyez sur  pour valider la sélection.  
L'écran affiche la liste des mots personnalisés.

---

7 Appuyez sur  ou sur  pour accéder au mot souhaité. Appuyez sur  pour valider la sélection.

---

8 Appuyez sur  ou sur  pour accéder à l'option Modifier. Appuyez sur  pour valider la sélection.

---

- 9 Modifiez votre mot personnalisé à l'aide du clavier.
- Appuyez sur  pour vous décaler d'un espace vers la gauche.
  - Appuyez sur la touche  pour vous déplacer d'un espace vers la droite.
  - Appuyez sur  pour supprimer des caractères indésirables.
  - Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.
-

- 10 Appuyez sur  une fois que votre mot personnalisé est complet.

L'écran affiche un mini-avis de transition vous confirmant que votre mot personnalisé est en cours d'enregistrement.

- Si le mot personnalisé est enregistré, une tonalité est émise et l'écran affiche un mini-avis positif.
- Si le mot personnalisé n'est pas enregistré, une tonalité grave est émise et l'écran affiche un mini-avis négatif.

## Ajout de mots personnalisés

Vous pouvez ajouter des mots personnalisés dans le dictionnaire intégré de la radio.

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'option **Saisie de texte**. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option **Mes mots**. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  ou  pour accéder à l'option **Ajouter un nouveau mot**. Appuyez sur  pour valider la sélection.
- L'écran affiche la liste des mots personnalisés.

- 7 Modifiez votre mot personnalisé à l'aide du clavier.

- Appuyez sur  pour vous décaler d'un espace vers la gauche.
- Appuyez sur la touche  pour vous déplacer d'un espace vers la droite.
- Appuyez sur  pour supprimer des caractères indésirables.
- Appuyez de manière prolongée sur  pour modifier la méthode de saisie de texte.

8 Appuyez sur  une fois que votre mot personnalisé est complet.

L'écran affiche un mini-avis de transition vous confirmant que votre mot personnalisé est en cours d'enregistrement.

- Si le mot personnalisé est enregistré, une tonalité est émise et l'écran affiche un mini-avis positif.
- Si le mot personnalisé n'est pas enregistré, une tonalité grave est émise et l'écran affiche un mini-avis négatif.

## Suppression d'un mot personnalisé

Suivez la procédure ci-après pour supprimer les mots personnalisés enregistrés dans votre radio.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou  pour accéder à l'option

Mes mots. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou  pour accéder au mot souhaité. Appuyez sur  pour valider la sélection.

---

7 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.

---

8 Sélectionnez l'une des options suivantes :

- À l'affichage du message Supprimer entrée ?, appuyez sur  pour sélectionner Oui. L'écran affiche Entrée supprimée.
  - Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour revenir à l'écran précédent.
- 

## Suppression de tous les mots personnalisés

Suivez la procédure ci-après pour supprimer tous les mots personnalisés dans le dictionnaire intégré de votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Saisie de texte. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option `Mes mots`. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder à l'option `Supprimer tout`. Appuyez sur  pour valider la sélection.

---

- 7 Effectuez l'une des opérations suivantes :
- À l'affichage du message `Supprimer entrée ?`, appuyez sur  pour sélectionner `Oui`. L'écran affiche `Toutes les entrées supprimées`.
  - Appuyez sur  ou sur  pour atteindre `Non` afin de revenir à l'écran précédent. Appuyez sur  pour valider la sélection.
- 

## Tickets de tâches

Cette fonctionnalité permet à votre radio de recevoir des messages envoyés par la console opérateur, qui indiquent les tâches à effectuer.

### REMARQUE:

Il est possible de personnaliser cette fonctionnalité via le CPS selon les besoins des utilisateurs. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Il existe deux dossiers contenant différents tickets de tâche :

#### Dossier **Mes tâches**

Tickets de tâche personnalisés attribués à votre ID utilisateur connecté.

#### Dossier **Tâches partg.**

Tickets de tâche partagés attribués à plusieurs individus.

Vous pouvez répondre à ces tickets de tâche afin de les trier dans des dossiers. Par défaut, les dossiers sont **Tous**, **Nouveau**, **Commencé** et **Terminé**. Consultez votre revendeur ou votre administrateur système pour bénéficier de 10 dossiers supplémentaires.

### REMARQUE:

Les tickets de tâche sont conservés même lorsque la radio est éteinte, puis rallumée.

Tous les tickets de tâche se trouvent dans le dossier **Tous**. Selon la façon dont votre radio est programmée, les tickets de tâche sont triés en fonction de leur niveau de priorité,

puis de leur heure de réception. Les nouveaux tickets de tâche, ceux dont l'état a récemment changé et ceux disposant du niveau de priorité le plus élevé apparaissent en premier. Une fois le nombre maximum de tickets de tâche atteint, tout nouveau ticket remplace automatiquement le dernier ticket de tâche de la radio. Votre radio prend en charge un maximum de 100 ou 500 tickets de tâche, selon le modèle. Consultez votre fournisseur ou administrateur système pour en savoir plus. Votre radio détecte et rejette automatiquement les tickets de tâche dupliqués ayant le même ID.

En fonction de l'importance des tickets de tâche, la console opérateur y ajoute un niveau de priorité. Il existe trois niveaux de priorité : Priorité 1, Priorité 2 et Priorité 3. Priorité 1 est le plus haut niveau de priorité. Priorité 3 est le plus bas. Il existe également des tickets de tâche auxquels aucun niveau de priorité n'est attribué.

Votre radio se met à jour en conséquence lorsque la console opérateur effectue les modifications suivantes :

- Modification du contenu de tickets de tâche
- Ajout ou modification du niveau de priorité de tickets de tâche
- Transfert de tickets de tâche d'un dossier à un autre
- Annulation de tickets de tâche

[Envoyer un commentaire](#)

## Accès au dossier Tickets de tâche

Suivez la procédure ci-après pour accéder au dossier Tickets de tâche.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton préprogrammé **Tickets de tâche**. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.

---
- 2 Appuyez sur  ou  pour accéder à l'option Tickets de tâche. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  accéder au dossier souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.

---

## Connexion et déconnexion au serveur distant

Cette fonction vous permet de vous connecter et de vous déconnecter du serveur distant en utilisant votre ID utilisateur.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Se connecter. Appuyez sur  pour valider la sélection.

Si vous êtes déjà connecté, le menu affiche Déconnexion.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

---

3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
- 

## Création de tickets de tâches

Votre radio peut créer des tickets de tâches en fonction d'un modèle de ticket de tâche et envoyer les tâches à effectuer.

Un logiciel de programmation CPS est nécessaire pour configurer le modèle de ticket de tâche.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à l'option Tickets tâches. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Créer un ticket. Appuyez sur  pour valider la sélection.
- 

## Réponse à des tickets de tâches

Suivez la procédure ci-après pour répondre aux tickets de tâche sur votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou  pour accéder à l'option Tickets tâches. Appuyez sur  pour valider la sélection.
- 
- 3 Appuyez sur  ou  pour accéder au dossier souhaité. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.
- 

- 5 Appuyez une fois de plus sur  pour ouvrir le sous-menu.  
Vous pouvez également appuyer sur la touche numérique correspondante (1 à 9) pour accéder à **Réponse rapide**.
- 

- 6 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.  
L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.
- 

- 7 Attendez l'accusé de réception.  
Si l'opération réussit :
- Une tonalité d'indication positive est émise.
  - L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

---

## Envoi de tickets de tâches à l'aide d'un modèle de ticket de tâche

Si votre radio est configurée avec un modèle de ticket de tâche, effectuez les actions suivantes pour envoyer le ticket de tâche.

1 Utilisez le clavier pour saisir le numéro de salle requis. Appuyez sur  pour valider la sélection.

2 Appuyez sur  ou  pour accéder à l'option État de salle. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  pour accéder à l'option souhaitée. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Envoyer. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

5 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Envoi de tickets de tâches à l'aide de plus d'un modèle de ticket de tâche

Si votre radio est configurée avec plus d'un modèle de ticket de tâche, effectuez les actions suivantes pour envoyer les tickets de tâches.

1 Appuyez sur  ou  pour accéder à l'option souhaitée. Appuyez sur  pour valider la sélection.

2 Appuyez sur  ou  pour accéder à l'option Envoyer. Appuyez sur  pour valider la sélection.

L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.

3 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

## Suppression de tickets de tâches

Suivez la procédure ci-après pour supprimer des tickets de tâches sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton préprogrammé **Tickets de tâche**. Passez à [étape 4](#)
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Tickets tâches. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou  accéder au dossier souhaité. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou  pour accéder au dossier Tout. Appuyez sur  pour valider la sélection.
- 
- 5 Appuyez sur  ou  pour accéder au ticket de tâche souhaité. Appuyez sur  pour valider la sélection.
- 
- 6 Appuyez à nouveau sur  alors que le ticket de tâche est affiché.
- 
- 7 Appuyez sur  ou  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection.
- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours.
- 

- 8 Attendez l'accusé de réception.
- Si l'opération réussit :
- Une tonalité d'indication positive est émise.
  - L'écran affiche un mini-avis positif.
- Si l'opération échoue :
- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
- 

## Suppression de tous les tickets de tâches

Suivez la procédure ci-après pour supprimer tous les tickets de tâche sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
- Appuyez sur le bouton préprogrammé **Tickets de tâche**. Passez à [étape 3](#).
  - Appuyez sur  pour accéder au menu.
-

2 Appuyez sur  ou  pour accéder à l'option Tickets tâches. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  accéder au dossier souhaité. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder au dossier Tout. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou  pour accéder à l'option Supprimer tout. Appuyez sur  pour valider la sélection.

6 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour atteindre Oui. Appuyez sur  pour valider la sélection. L'écran affiche un mini-avis positif.

- Appuyez sur  ou sur  pour atteindre Non. Appuyez sur  pour valider la sélection. La radio revient à l'écran précédent.

## Confidentialité

Cette fonction protège les utilisateurs contre les possibilités d'écoute sur un canal par des personnes non autorisées grâce à une solution de brouillage logicielle. Les éléments de signalisation et d'identification des utilisateurs ne sont pas cryptés.

La fonction de cryptage doit être activée sur le canal pour que la radio puisse émettre en utilisant le cryptage, mais cela n'est pas nécessaire pour recevoir une communication. Lorsque la radio est sur un canal programmé pour utiliser la fonction de cryptage, elle peut toujours recevoir des transmissions en clair.

Certains modèles de radio ne disposent pas de la fonction de cryptage ou proposent une autre configuration. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Votre radio prend en charge deux types de cryptage, mais un seul peut lui être attribué. Ce sont :

- Chiffrement de base
- Chiffrement amélioré

Pour décrypter un appel voix ou données protégé par la fonction de cryptage, votre radio doit avoir la même clé de cryptage (pour la fonction Cryptage basique) ou la même valeur de clé et le même ID de clé (pour la fonction Cryptage amélioré) que la radio en émission.

Si votre radio reçoit un appel crypté qui utilise une clé de confidentialité différente ou une valeur de clé et un ID de clé différents, vous entendez une émission brouillée (Confidentialité de base) ou aucun son (Confidentialité améliorée).

Sur un canal programmé pour utiliser la fonction de cryptage, votre radio peut recevoir des appels en clair ou décryptés, en fonction de sa programmation. De plus, toujours selon sa programmation, votre radio peut émettre ou non une tonalité d'avertissement.

La LED est allumée en vert lorsque la radio émet. Elle clignote rapidement lorsque la radio reçoit une transmission cryptée.

### REMARQUE:

Cette fonction n'est pas applicable dans les canaux de fréquences publiques qui sont dans une même fréquence.

## Activation/désactivation du cryptage

Suivez la procédure ci-après pour activer ou désactiver le cryptage sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Cryptage** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Crypt. Appuyez sur  pour valider la sélection.

---

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option **Activé**. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de l'option **Activé**.
- Appuyez sur  ou sur  pour accéder à l'option **Désactivé**. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de l'option **Désactivé**.

## Suppr. réponse

Cette fonctionnalité empêche votre radio de répondre aux émissions entrantes.

### REMARQUE:

Il s'agit d'une fonction disponible à l'achat. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Si cette fonctionnalité est activée, votre radio ne génère aucune émission sortante en réponse aux émissions entrantes (Vérification radio, Alerte d'appel, Désactiver

radio, Écoute déportée, Service d'enregistrement automatique (SEA), Réponse aux messages privés et Signalement de localisation GNSS, par exemple). Votre radio ne peut pas recevoir d'appels individuels confirmés lorsque cette fonctionnalité est activée. Toutefois, votre radio peut envoyer des émissions manuellement.

## Activation ou désactivation de la suppression réponse

Pour activer ou désactiver la suppression réponse sur votre radio, procédez comme suit.

Appuyez sur le bouton **Suppr. réponse** préprogrammé.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche brièvement un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche brièvement un mini-avis négatif.

## Commandes multisites

Ces fonctionnalités sont applicables lorsque le canal radio actuel fait partie d'une configuration IP Site Connect ou Capacity Plus - Multisite.

### Lancement d'une recherche de site manuelle

Suivez la procédure ci-après pour lancer une recherche manuelle de site lorsque la puissance du signal reçu est faible, afin d'essayer de trouver un site avec un meilleur signal.

Si la radio détecte un nouveau site :

- Une tonalité d'indication positive est émise.

Si la radio ne parvient pas à trouver un nouveau site :

- Une tonalité d'indication négative est émise.

### Site Lock On/Off

Lorsque cette fonction est activée, la radio effectue une recherche sur le site en cours uniquement. Lorsqu'elle est

désactivée, la radio effectue une recherche sur les autres sites en plus du site en cours.

Appuyez sur le bouton programmé **Verrouillage site**.

Si la fonction **Verrou. site** est activée :

- Un signal sonore positif indique que la radio est verrouillée sur le site en cours.
- L'écran indique que le site est verrouillé.

Si la fonction **Verrou. site** est désactivée :

- Un signal sonore négatif indique que la radio n'est pas verrouillée.
- L'écran indique que le site est déverrouillé.

---

## Accès à la liste des sites voisins

Cette fonctionnalité permet à l'utilisateur de vérifier la liste des sites adjacents du site d'accueil actuel. Suivez la procédure ci-après pour accéder à la liste des sites voisins :

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option **Infos radio**. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option **Sites voisins**. Appuyez sur  pour valider la sélection.

## Security

Cette fonction permet d'activer ou de désactiver toute radio du système.

Par exemple, vous pourriez avoir besoin de désactiver une radio volée pour rendre impossible son utilisation, et la réactiver lorsqu'elle aura été récupérée.

Il existe deux méthodes pour activer ou désactiver une radio : avec ou sans authentification.

La fonctionnalité Désactiver radio authentifiée est disponible à l'achat. En mode Désactiver radio authentifiée, une vérification est requise lorsque vous activez ou désactivez une radio. Lorsque votre radio active cette fonctionnalité sur une radio cible disposant de l'authentification utilisateur, une phrase de passe est requise. La phrase de passe est préprogrammée dans la radio cible via CPS.

Si vous appuyez sur  pendant l'opération d'activation ou de désactivation d'une radio, vous ne recevrez aucun accusé de réception.

### REMARQUE:

Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Désactivation des radios

Suivez la procédure ci-après pour désactiver votre radio.

- 1 Appuyez sur le bouton **Désactiver radio** programmé.

---

- 2 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité.

**3** Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED clignote en vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
- Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.

---

**4** Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

---

## Désactivation des radios à l'aide du répertoire

Suivez la procédure ci-après pour désactiver votre radio à l'aide du répertoire.

**1** Appuyez sur  pour accéder au menu.

**2** Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

**3** Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Désac radio.

---

5 Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED clignote en vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
  - Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.
- 

6 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
- 

## Désactivation des radios à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour désactiver votre radio à l'aide de la numérotation manuelle.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou sur  pour accéder à l'option Numéro radio. Appuyez sur  pour valider la sélection.
- La première ligne affiche Numéro radio :.
- 
- 5 Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.
- 
- 6 Appuyez sur  ou sur  pour accéder à l'option Désac radio.
- 
- 7 Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :
- L'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED clignote en vert.

- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
- Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.

- 
- 8 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
-

## Activation des radios

Suivez la procédure ci-après pour activer votre radio.

**1** Appuyez sur le bouton **Activer radio** programmé.

---

**2** Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité.

---

**3** Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- L'écran affiche **Activer radio** et l'ID ou l'alias du terminal. La LED passe au vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.

- Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.
- 

**4** Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
- 

## Activation des radios à l'aide du répertoire

Suivez la procédure ci-après pour activer votre radio à l'aide du répertoire.

**1** Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option `Activer radio`.

---

5 Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- La LED clignote en vert. L'écran affiche `Activer radio` et l'ID ou l'alias du terminal. La LED passe au vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
  - Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.
- 

6 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
  - L'écran affiche un mini-avis négatif.
-

## Activation des radios à l'aide de la numérotation manuelle

Suivez la procédure ci-après pour activer votre radio à l'aide de la numérotation manuelle.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Num. manuelle. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Appel indiv. Appuyez sur  pour valider la sélection.  
La première ligne affiche Numéro radio :.

---

- 5 Saisissez l'ID du terminal radio, puis appuyez sur  pour continuer.

---

- 6 Appuyez sur  ou sur  pour accéder à l'option Activer radio.

---

- 7 Appuyez sur  pour valider la sélection. L'un des événements suivants se produit :

- La LED clignote en vert. L'écran affiche Activer radio et l'ID ou l'alias du terminal. La LED passe au vert.
- Un écran de phrase de passe s'affiche.

Saisissez la phrase de passe. Appuyez sur  pour continuer.

- Si la phrase de passe est correcte, l'écran affiche un mini-avis de transition, indiquant que la requête est en cours. La LED passe au vert.
  - Si la phrase de passe est incorrecte, l'écran affiche un mini-avis négatif et revient à l'écran précédent.
-

### 8 Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche un mini-avis positif.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche un mini-avis négatif.

---

## Lone Worker

Cette fonction envoie une alarme d'urgence lorsque la radio reste inutilisée, par exemple si l'utilisateur n'appuie pas sur un bouton ou ne sélectionne pas de canal pendant une durée prédéterminée.

Après expiration de ce délai, la radio vous avertit en émettant une tonalité d'indication sonore.

Si vous ne confirmez pas avoir entendu cette tonalité en appuyant sur l'une des touches avant l'expiration du délai de rappel, la radio envoie une alarme d'urgence.

Une seule alarme d'urgence peut être associée à cette fonction :

- Alarme d'urgence
- Alarme d'urgence avec appel
- Alarme d'urgence suivie d'un appel vocal 

La radio reste en mode Urgence et autorise les messages vocaux jusqu'à la prochaine action de l'utilisateur.

Consultez la section [Gestion de l'urgence à la page 457](#) pour en savoir plus sur la désactivation du mode Urgence.

### REMARQUE:

cette fonction est uniquement disponible sur les radios programmées à cet effet. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Bluetooth

Cette fonction vous permet d'utiliser votre radio avec un appareil (accessoire) Bluetooth par le biais d'une connexion Bluetooth. Votre radio prend en charge les dispositifs Bluetooth de marque Motorola Solutions et d'autres marques disponibles sur le marché.

Le Bluetooth offre une portée de 10 m avec une visibilité directe. Pour bénéficier de cette portée, aucun obstacle ne doit gêner la communication entre votre radio et votre appareil Bluetooth. Pour assurer une fiabilité optimale,

Motorola Solutions recommande de ne pas séparer la radio et l'accessoire.

Lorsque la limite de réception approche, la voix et la qualité sonore se détériorent et les hachures sont de plus en plus fréquentes. Pour corriger ce problème, rapprochez votre radio et votre appareil Bluetooth (à moins de 10 m) afin de retrouver une bonne réception. La fonction Bluetooth de votre radio présente une puissance maximale de 2,5 mW (4 dBm) sur 10 m.

Votre radio peut prendre en charge jusqu'à trois connexions Bluetooth simultanées avec différents types d'appareils Bluetooth. Par exemple, une oreillette, un scanner et un dispositif PTT. Des connexions avec plusieurs appareils Bluetooth d'un même type ne sont pas possibles.

Reportez-vous au manuel d'utilisation de votre appareil Bluetooth pour obtenir plus de détails sur toutes ses fonctionnalités.

#### REMARQUE:

Si cette option est désactivée via CPS, toutes les fonctionnalités associées au Bluetooth sont désactivées et la base de données de l'appareil Bluetooth est effacée.

## Activation et désactivation de la radio Bluetooth

Pour activer et désactiver le Bluetooth, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Mon état. Appuyez sur  pour valider la sélection.  
L'écran affiche *Activé et Désactivé*. L'état actuel est indiqué par un symbole .

---

- 4 Sélectionnez l'une des options suivantes :
  - Appuyez sur  ou sur  pour accéder à l'option *Activé*. Appuyez sur  pour valider la

sélection. L'écran affiche ✓ en regard de l'option Activé.

- Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour valider la sélection. L'écran affiche ✓ en regard de l'option Désactivé.

## Connexion à des appareils Bluetooth

Pour vous connecter à des appareils Bluetooth, procédez comme suit.

Allumez votre appareil Bluetooth et mettez-le en mode Appariement.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

- 4 Effectuez l'une des opérations suivantes :
  - Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.
  - Appuyez sur  ou  pour accéder à l'option Trouver des appareils et localiser les appareils disponibles. Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option Connecter. Appuyez sur  pour valider la sélection.

D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour terminer l'appariement avec

vosre radio. Reportez-vous au manuel d'utilisation de votre appareil Bluetooth.

L'écran affiche Connexion à <appareil>.

Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche <Appareil> connecté ainsi que l'icône **Connexion Bluetooth**.
- L'écran affiche ✓ en regard de l'appareil connecté.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche Connexion échouée.

#### REMARQUE:

Si un code PIN est requis, voir [Accès par mot de passe aux radios à la page 205](#).

## Connexion à des appareils Bluetooth en mode Détectable

Pour vous connecter à des appareils Bluetooth en mode Détectable, procédez comme suit.

[Envoyer un commentaire](#)

Allumez votre appareil Bluetooth et mettez-le en mode Appariement.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou  pour accéder à l'option Trouvez-moi. Appuyez sur  pour valider la sélection. Votre radio est détectable par d'autres appareils Bluetooth compatibles pour une durée programmée. Il s'agit du mode Détectable.

Attendez l'accusé de réception.

Si l'opération réussit :

- Une tonalité d'indication positive est émise.
- L'écran affiche <Appareil> connecté et l'icône **Bluetooth connecté**.
- L'écran affiche ✓ en regard de l'appareil connecté.

Si l'opération échoue :

- Une tonalité d'indication négative est émise.
- L'écran affiche Connexion échouée.

## Déconnexion d'appareils Bluetooth

Pour vous déconnecter d'appareils Bluetooth, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'option Déconnecter. Appuyez sur  pour valider la sélection.

L'écran affiche Déconnexion... <Appareil>.

### REMARQUE:

D'autres étapes peuvent être nécessaires sur votre appareil Bluetooth pour le déconnecter. Reportez-vous aux manuels d'utilisation respectifs des appareils compatibles Bluetooth.

Attendez l'accusé de réception.

- Une tonalité est émise.
- L'écran affiche <Appareil> déconnecté et l'icône **Bluetooth connecté** disparaît.
- Le symbole  disparaît en regard de l'appareil connecté.

## Basculement du routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth

Suivez la procédure ci-après pour basculer le routage audio entre le haut-parleur interne de la radio et l'appareil Bluetooth externe.

Appuyez sur le bouton programmé **Commutateur audio Bluetooth**.

L'écran affiche l'un des résultats suivants :

- Une tonalité est émise. L'écran affiche Acheminer l'audio vers la radio.
- Une tonalité est émise. L'écran affiche Acheminer l'audio vers le Bluetooth.

### Affichage des détails de l'appareil

Pour afficher les détails de l'appareil sur votre radio, procédez comme suit.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option Voir détails. Appuyez sur  pour valider la sélection.

## Suppression du nom de l'appareil

Vous pouvez supprimer un appareil déconnecté de la liste des appareils Bluetooth.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Appareils. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'appareil souhaité. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Supprimer. Appuyez sur  pour valider la sélection. L'écran affiche Appareil supprimé.
- 

## Gain micro Bluetooth

Cette fonction permet à l'utilisateur de contrôler la valeur de gain du microphone de l'appareil Bluetooth connecté.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Bluetooth. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Gain micro BT. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder au type de gain micro BT et aux valeurs actuelles. Appuyez sur

 pour valider la sélection. Vous pouvez modifier les valeurs ici.

- 5 Appuyez sur  ou  pour augmenter ou réduire des valeurs. Appuyez sur  pour valider la sélection.

## Localisation en intérieur

### REMARQUE:

La fonctionnalité Localisation en intérieur s'applique pour les modèles dotés de la dernière version du logiciel et du matériel. Consultez votre fournisseur ou administrateur système pour en savoir plus.

La localisation en intérieur permet d'effectuer un suivi de la localisation des utilisateurs radio. Lorsque la localisation en intérieur est activée, la radio est en mode détectable limité. Des balises dédiées sont utilisées pour localiser la radio et déterminer sa position.

## Activation ou désactivation de la localisation en intérieur

Vous pouvez activer ou désactiver la localisation en intérieur en procédant de l'une des manières suivantes.

- Accédez à cette fonction via le menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.
  - c. Appuyez sur  ou  pour accéder à l'option Localisation en intérieur et appuyez sur  pour sélectionner.
  - d. Appuyez sur  pour activer la localisation en intérieur.
 

L'écran affiche Localis. intér. activée. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
- En cas d'échec, l'écran affiche Échec activation. Une tonalité d'indication positive retentit.

e. Appuyez sur  pour désactiver la localisation en intérieur.

L'écran affiche Localis. intér. désactivée. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.
  - En cas d'échec, l'écran affiche Échec désactivation. Une tonalité d'indication positive retentit.
- Accédez à cette fonctionnalité à l'aide du bouton programmable.

a. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour activer la localisation en intérieur.

L'écran affiche Localis. intér. activée. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible s'affiche sur l'écran d'accueil.
- En cas d'échec, l'écran affiche Échec activation. En cas d'échec, une tonalité d'indication négative retentit.

b. Exercez une pression longue sur le bouton programmé **Localis. intér.** pour désactiver la localisation en intérieur.

L'écran affiche Localis. intér. désactivée. Vous entendez une tonalité d'indication positive. L'un des événements suivants se produit.

- En cas de réussite, l'icône Localisation en intérieur disponible disparaît de l'écran d'accueil.

- En cas d'échec, l'écran affiche Échec désactivation. En cas d'échec, une tonalité d'indication négative retentit.

## Accès aux informations sur les balises de localisation en intérieur

Suivez la procédure ci-après pour accéder aux informations sur les balises de localisation en intérieur.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à l'option Bluetooth et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à l'option Localisation en intérieur et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder à l'option Balises et appuyez sur  pour sélectionner.

L'écran affiche les informations relatives aux balises.

## Liste des notifications

Votre radio gère une liste des notifications qui indique les éléments non lus sur le canal, tels que les messages textes, télégrammes de télémétrie, appels manqués, alertes d'appels.

L'icône **Notification** s'affiche à l'écran lorsque la liste des notifications comprend un ou plusieurs éléments.

Elle peut contenir jusqu'à 40 événements non lus. Lorsque la liste est pleine, le prochain événement remplace automatiquement le plus ancien. Après leur lecture, les événements sont supprimés de la liste des notifications.

La liste des notifications peut contenir un nombre maximal de 30 messages texte et 10 avertissements d'appels ou appels manqués. Ce nombre dépend de la capacité des listes de fonctions individuelles (tickets de tâches, messages texte, avertissements d'appel ou appels manqués).

## Accès à la liste des notifications

Suivez la procédure ci-après pour accéder à la liste des notifications de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Notification. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'événement souhaité. Appuyez sur  pour valider la sélection.

Exercez une pression longue sur  pour revenir à l'écran d'accueil.

---

## Système de transpondeur à portée automatique

Le système de transpondeur à portée automatique (ARTS, Auto-Range Transponder System) est une fonction analogique conçue pour vous informer lorsque votre radio est hors de portée d'autres radios équipées de la fonction ARTS.

Les radios équipées de la fonction ARTS transmettent ou reçoivent des signaux régulièrement pour confirmer qu'elles sont à portée les unes des autres.

Votre radio assure l'indication des états comme suit :

### Première alerte

Une tonalité est émise.

L'écran affiche *À portée* après l'alias de canal.

### Alerte ARTS à portée

Si ce type d'avertissement est programmé, une tonalité est émise.

L'écran affiche *À portée* après l'alias de canal.

### Alerte ARTS hors portée

Une tonalité est émise. La LED clignote rapidement en rouge.

Le message **Hors de portée** et l'écran d'accueil s'affichent en alternance.

**REMARQUE:**

Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Programmation par liaison radio

Votre fournisseur peut procéder à la mise à jour à distance, soit sans connexion physique, de votre radio à l'aide de la programmation par liaison radio (OTAP). En outre, certains paramètres peuvent également être configurés par programmation OTAP.

Lorsque votre radio passe en mode OTAP, la LED verte clignote.

Lorsque votre radio reçoit des volumes de données élevés :

- L'icône **Données en volume élevé** s'affiche à l'écran.
- Le canal devient occupé.
- Le fait d'appuyer sur le bouton **PTT** déclenche une tonalité négative.

Une fois la programmation OTAP terminée, selon le type de configuration :

- Une tonalité est émise. L'écran affiche **Actualisation Redémarrage**. Votre radio redémarre en se mettant hors tension puis de nouveau sous tension.
- Vous avez le choix entre **Redémarrer** et **Retarder**. Si vous sélectionnez **Retarder**, votre radio revient à l'écran précédent. L'écran affiche l'icône **Retardateur OTAP** jusqu'au redémarrage.

Lorsque votre radio se met sous tension après le redémarrage automatique :

- En cas de réussite, l'écran affiche **MàJ logiciel terminée**.
- En cas d'échec, l'écran affiche **MàJ logiciel échouée**.

Consultez la section [Vérification des informations de mise à jour logicielle à la page 242](#) pour en savoir plus sur la version logicielle mise à jour.

## Suppression Tx

La fonctionnalité Suppression d'émission permet aux utilisateurs de bloquer toutes les émissions de la radio.

**REMARQUE:**

Les fonctionnalités Bluetooth et Wi-Fi sont disponibles en mode Suppression d'émission.

## Activation de la suppression d'émission

Pour activer la suppression d'émission, procédez comme suit.

Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option **Suppression Tx** et appuyez sur  pour sélectionner.
- Appuyez sur le bouton programmable **Suppression Tx**.

- 
- Une tonalité d'indication positive est émise.
  - L'écran affiche **Suppression d'émission activée**.

### REMARQUE:

L'état de la suppression d'émission ne change pas après la mise sous tension de la radio.

## Désactivation de la suppression d'émission

Pour désactiver la suppression d'émission, procédez comme suit.

Effectuez l'une des opérations suivantes :

- Appuyez sur  ou  pour accéder à l'option **Suppression Tx** et appuyez sur  pour sélectionner.
- Appuyez sur le bouton programmable **Suppression d'émission**.

- 
- Une tonalité d'indication négative est émise. L'émission fonctionne normalement.
  - L'écran affiche **Suppression d'émission désactivée**.

## Sélection des modes de connexion aux appareils tiers

Suivez la procédure ci-après pour sélectionner l'un des modes de connexion aux appareils tiers suivants :

- Motorola Solutions
- PC et audio
- Accessoire de données
- Télémétrie
- Générique

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Type de câble. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder au mode de connexion souhaité. Appuyez sur  pour valider la sélection.
- L'écran affiche le mode de connexion sélectionné.  
L'écran revient au menu précédent.
- 

## Indicateur de puissance du signal reçu (RSSI)

Cette fonction permet d'afficher les valeurs de l'indicateur de puissance du signal reçu (RSSI).

L'icône **RSSI** s'affiche dans le coin supérieur droit de l'écran. Consultez la section [Icônes de l'écran](#) pour en savoir plus sur l'icône **RSSI**.

## Affichage des valeurs RSSI

Suivez la procédure ci-après pour afficher des valeurs RSSI sur votre radio.

Lorsque vous vous trouvez sur l'écran d'accueil :

- 1 Appuyez trois fois sur  et appuyez immédiatement sur  à trois reprises, le tout en moins de 5 secondes.

L'écran affiche les valeurs RSSI actuelles.

- 
- 2 Exercez une pression longue sur  pour revenir à l'écran d'accueil.
- 

## Fonctions de verrouillage par mot de passe

Cette fonctionnalité vous permet de restreindre l'accès à la radio en demandant un mot de passe lorsque l'appareil est sous tension.

Vous pouvez utiliser le microphone à clavier ou les boutons **Défilement Haut/Bas** pour entrer le mot de passe.

## Accès par mot de passe aux radios

Suivez la procédure ci-après pour accéder à votre radio en utilisant un mot de passe.

- 1 Saisissez votre mot de passe à quatre chiffres.

### REMARQUE:

L'utilisation de la **pédale d'urgence** annule la saisie du mot de passe pour accéder à la radio.

- Utilisez un microphone à clavier.
- Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur  pour saisir le chiffre sélectionné et placer le curseur sur le chiffre suivant.

- 
- 2 Appuyez sur  pour saisir le mot de passe.

Si l'opération réussit, la radio se met sous tension.  
Si l'opération échoue :

- À l'issue de la première et de la deuxième tentative, l'écran affiche **Mot de passe Erroné**. Répétez [étape 1](#).

- À l'issue de la troisième tentative, l'écran affiche Mot de passe Erroné, puis Radio Verrouillée. Une tonalité est émise. La LED jaune clignote double. Votre radio passe à l'état verrouillé pendant 15 minutes.

**REMARQUE:**

En mode verrouillé, votre radio répond uniquement aux commandes du **bouton Marche/Arrêt - Volume** et du bouton programmé **Rétro-éclairage**.

Une tonalité est émise. La LED jaune clignote double. L'écran affiche Radio Verrouillée.

Patientez 15 minutes, puis répétez les étapes de la section [Accès par mot de passe aux radios à la page 205](#) pour accéder à la radio.

## Activation/désactivation de la fonction de verrouillage par mot de passe

Suivez la procédure ci-après pour activer ou désactiver la fonction de verrouillage par mot de passe sur votre radio.

### Déverrouillage des radios

Lorsqu'elle est verrouillée, votre radio ne peut recevoir aucun appel. Suivez la procédure ci-après pour déverrouiller votre radio.

Effectuez l'une des opérations suivantes :

- Si la radio est allumée, patientez 15 minutes, puis répétez les étapes de la section [Accès par mot de passe aux radios à la page 205](#) pour accéder à la radio.
- Si la radio est éteinte, allumez-la. Votre radio relance le délai de 15 minutes d'attente en mode verrouillé.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option Verrou MdP. Appuyez sur  pour valider la sélection.

---

5 Saisissez votre mot de passe à quatre chiffres.

- Utilisez un microphone à clavier.
  - Appuyez sur  ou sur  pour modifier la valeur numérique de chaque chiffre, puis appuyez sur  pour saisir le chiffre sélectionné et placer le curseur sur le chiffre suivant.  
Une tonalité d'indication positive est émise pour chaque chiffre.
- 

6 Appuyez sur  pour saisir le mot de passe.  
Si le mot de passe est incorrect, l'écran affiche Mot de passe Erroné et revient automatiquement au menu précédent.

---

7 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activer. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole ✓ en regard de l'option Activer.
  - Appuyez sur  ou sur  pour accéder à l'option Désactiver. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole ✓ en regard de l'option Désactiver.
- 

## Modification des mots de passe

Suivez la procédure ci-après pour modifier les mots de passe utilisés sur votre radio.

- 1 Appuyez sur  pour accéder au menu.
  - 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.
-

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.
- 
- 4 Appuyez sur  ou sur  pour accéder à l'option Verrou MdP. Appuyez sur  pour valider la sélection.
- 
- 5 Saisissez votre mot de passe à quatre chiffres, puis appuyez sur  pour continuer.
- Si le mot de passe est incorrect, l'écran affiche Mot de passe Erroné et revient automatiquement au menu précédent.
- 
- 6 Appuyez sur  ou sur  pour accéder à l'option Changer MdP. Appuyez sur  pour valider la sélection.
- 
- 7 Saisissez un nouveau mot de passe à quatre chiffres, puis appuyez sur  pour continuer.
- 

- 8 Saisissez le nouveau mot de passe à quatre chiffres une nouvelle fois, puis appuyez sur  pour continuer.
- Si l'opération réussit, l'écran affiche Mot de passe changé.
- Si l'opération échoue, l'écran affiche Mots de passe incorrects.
- L'écran revient automatiquement au menu précédent.
- 

## Configuration par face avant

Vous pouvez personnaliser certains paramètres à l'aide de la Configuration par face avant (FPC, Front Panel Configuration) afin d'améliorer l'utilisation de votre radio selon vos préférences.

## Activation du mode Configuration par face avant

Suivez la procédure ci-après pour activer le mode Programmation par face avant sur votre radio.

exercez une pression longue sur le bouton  pour revenir à l'écran d'accueil quand vous le voulez.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Program. Radio. Appuyez sur  pour valider la sélection.

## Modification des paramètres du mode FPP

Vous pouvez utiliser les boutons suivants pour parcourir les paramètres.

-  ,  : pour faire défiler les options, augmenter/diminuer les valeurs, naviguer verticalement.
-  : pour sélectionner l'option ou ouvrir un sous-menu.
-  : une pression courte pour revenir au menu précédent ou fermer l'écran de sélection. Exercez une pression longue pour revenir à l'écran d'accueil.

## Fonctionnement Wi-Fi

Wi-Fi® est une marque déposée de Wi-Fi Alliance®.

### REMARQUE:

Cette fonctionnalité s'applique uniquement aux modèles DM4601e .

Cette fonction vous permet de configurer un réseau Wi-Fi et de vous y connecter. Wi-Fi prend en charge les mises à jour du micrologiciel (firmware), du codeplug et des

ressources de la radio, par exemple les packs linguistiques et annonces vocales.

## Activation/désactivation du Wi-Fi

Le bouton programmé **Wi-Fi activé ou désactivé** est attribué par votre revendeur ou administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

Selon les besoins de l'utilisateur, il est possible de personnaliser les annonces vocales pour le bouton **Wi-Fi activé ou désactivé** programmé via CPS. Consultez votre fournisseur ou administrateur système pour en savoir plus.

Vous pouvez activer ou désactiver le Wi-Fi en procédant de l'une des manières suivantes.

- Appuyez sur le bouton programmé **Wi-Fi activé ou désactivé**. Une annonce vocale indique l'activation du Wi-Fi ou la désactivation du Wi-Fi.
- Accédez à cette fonction par le biais du menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

- c. Appuyez sur  ou  pour accéder à Wi-Fi On et appuyez sur  pour sélectionner.

Appuyez sur  pour activer le Wi-Fi. L'écran affiche ✓ en regard de l'option Activé.

Appuyez sur  pour désactiver le Wi-Fi. ✓ ne s'affiche plus en regard d'Activé.

## Connexion à un point d'accès réseau

Lorsque vous activez le Wi-Fi, la radio effectue un balayage et se connecte à un point d'accès réseau.

Vous pouvez également vous connecter à un point d'accès réseau à l'aide du menu.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

4 Appuyez sur  ou  pour accéder à un point d'accès réseau et appuyez sur  pour sélectionner.

5 Appuyez sur  ou  pour accéder à Connecter et appuyez sur  pour sélectionner.

6 Saisissez le mot de passe et appuyez sur  .

Une fois la connexion établie, un avis s'affiche sur la radio et le point d'accès réseau est enregistré dans la liste des profils.

## Vérification de l'état de la connexion Wi-Fi

Pour vérifier l'état de la connexion Wi-Fi, procédez comme suit.

Appuyez sur le bouton programmé **Requête d'état Wi-Fi** pour être informé de l'état de la connexion par le biais d'une annonce vocale. Une annonce vocale indique Wi-Fi désactivé, Wi-Fi activé sans connexion ou Wi-Fi activé avec connexion.

- L'écran affiche Wi-Fi Off lorsque le Wi-Fi est désactivé.
- L'écran affiche Wi-Fi On, Connecté lorsque la radio est connectée à un réseau.
- L'écran affiche Wi-Fi On, Déconnecté lorsque le Wi-Fi est activé et que la radio n'est connectée à aucun réseau.

Selon les besoins de l'utilisateur, il est possible de personnaliser les annonces vocales des résultats des requêtes d'état Wi-Fi via CPS. Consultez votre fournisseur ou administrateur système pour en savoir plus.

### REMARQUE:

Le bouton préprogrammé **Requête d'état Wi-Fi** est attribué par votre revendeur ou administrateur système. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

## Actualisation de la liste de réseaux

Suivez la procédure ci-après pour actualiser la liste des réseaux.

- Effectuez les opérations suivantes pour actualiser la liste des réseaux par le biais du menu.
  - a. Appuyez sur  pour accéder au menu.
  - b. Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.
  - c. Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.  
Lorsque vous entrez dans le menu Réseaux, la radio actualise automatiquement la liste des réseaux.
- Si vous êtes déjà dans le menu Réseaux, effectuez l'action suivante pour actualiser la liste des réseaux.

Appuyez sur  ou  pour accéder à Actualiser et appuyez sur  pour sélectionner.  
La radio s'actualise et affiche la liste des réseaux la plus récente.

## Ajout d'un réseau

Si un réseau préféré n'apparaît pas dans la liste des réseaux disponibles, procédez de la manière suivante pour ajouter un réseau.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à Ajouter réseau et appuyez sur  pour sélectionner.

---

5 Saisissez l'identifiant SSID (Service Set Identifier) et appuyez sur  .

---

6 Appuyez sur  ou  pour accéder à Ouvrir et appuyez sur  pour sélectionner.

---

7 Saisissez le mot de passe et appuyez sur  .  
La radio affiche un mini-avis positif pour indiquer que le réseau est correctement enregistré.

---

## Affichage des détails des points d'accès réseau

Procédez comme suit pour afficher les détails des points d'accès réseau.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

4 Appuyez sur  ou  pour accéder à un point d'accès réseau et appuyez sur  pour sélectionner.

---

5 Appuyez sur  ou  pour accéder à Voir détails et appuyez sur  pour sélectionner.  
Pour un point d'accès réseau connecté, les informations suivantes s'affichent : identifiant SSID (Service Set Identifier), mode de sécurité, adresse MAC (Media Access Control) et adresse IP (Internet Protocol).

Pour un point d'accès réseau non connecté, les informations suivantes s'affichent : identifiant SSID (Service Set Identifier) et mode de sécurité.

## Suppression de points d'accès réseau

Effectuez les opérations suivantes pour supprimer les points d'accès réseau de la liste des profils.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou  pour accéder à WiFi et appuyez sur  pour sélectionner.

---

- 3 Appuyez sur  ou  pour accéder à Réseaux et appuyez sur  pour sélectionner.

---

- 4 Appuyez sur  ou  pour accéder au point d'accès réseau sélectionné et appuyez sur  pour sélectionner.

- 5 Appuyez sur  ou  pour accéder à Supprimer et appuyez sur  pour sélectionner.

- 6 Appuyez sur  ou  pour accéder à Oui et appuyez sur  pour sélectionner.

La radio affiche un mini-avis positif pour indiquer que le point d'accès réseau sélectionné est bien supprimé.

## Fonctions utilitaires

Ce chapitre présente les fonctions de configuration/infos disponibles sur votre radio.

### Niveaux de squelch

Vous pouvez régler le niveau de squelch pour filtrer les appels indésirables ayant un signal insuffisant ou des canaux dont le bruit de fond est supérieur à la normale.

#### Normal

Réglage par défaut.

## Filtré

Ce paramètre permet de filtrer les appels indésirables et/ou le bruit de fond. Certains appels émis par des sites éloignés peuvent également être exclus.

### REMARQUE:

Cette fonction n'est pas applicable dans les canaux de fréquences publiques qui sont dans une même fréquence.

## Réglage des niveaux Squelch

Suivez la procédure ci-après pour définir les niveaux de squelch utilisés sur votre radio.

### 1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Squelch** préprogrammé. Ignorez les étapes suivantes.
- Appuyez sur  pour accéder au menu.

- 
- ### 2
- Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.
- 

- ### 3
- Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.
- 

- ### 4
- Appuyez sur  ou sur  pour accéder à l'option **Squelch**. Appuyez sur  pour valider la sélection.
- 

### 5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder au niveau **Normal**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard du niveau **Normal**.
- Appuyez sur  ou sur  pour accéder au niveau **Filtré**. Appuyez sur  pour valider la sélection.

L'écran affiche le symbole ✓ en regard du niveau Filtré.

L'écran revient automatiquement au menu précédent.

## Niveaux de puissance

Vous pouvez personnaliser le niveau de puissance en sélectionnant l'option Haute ou Basse pour chaque canal.

### Élevé

Ce niveau prend en charge la communication avec des radios qui peuvent être considérablement éloignées de vous.

### Faible

Ce niveau prend en charge la communication avec des radios qui se trouvent à proximité.

#### REMARQUE:

Cette fonction n'est pas applicable dans les canaux de fréquences publiques qui sont dans une même fréquence.

## Définition des niveaux de puissance

Suivez la procédure ci-après pour définir les niveaux de puissance utilisés sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Niveau de puissance** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Puissance. Appuyez sur  pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option **Haute**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard de l'option **Haute**.
- Appuyez sur  ou sur  pour accéder à l'option **Basse**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard de l'option **Basse**.

6 Exercez une pression longue sur  pour revenir à l'écran d'accueil.

## Activation/désactivation des tonalités/avertissements

Vous pouvez activer et désactiver toutes les tonalités et alertes radio, le cas échéant, sauf pour les tonalités d'alerte

d'urgence . Suivez la procédure ci-après pour activer ou désactiver les tonalités et avertissements sur votre radio.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Tnlés/Avert.** préprogrammé. Ignorez les étapes suivantes.
- Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option **Tnlés/Avert.** Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Toutes Tnlés. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  pour activer ou désactiver toutes les tonalités et avertissements. L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.
- 

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Tnlés/Avert. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à l'option Tnlés clavier. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  pour activer ou désactiver les tonalités du clavier. L'écran affiche l'un des résultats suivants :

## Activation/désactivation des tonalités du clavier

Suivez la procédure ci-après pour activer ou désactiver les tonalités du clavier de votre radio.

1 Appuyez sur  pour accéder au menu.

---

- Si cette option est activée, le symbole ✓ apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole ✓ n'est plus affiché en regard de la mention Activé.

## Réglage de l'écart du volume des tonalités/avertissements

Cette fonction permet de régler le volume des tonalités ou avertissements à un niveau supérieur ou inférieur à celui du volume de la voix. Suivez la procédure ci-après pour définir l'écart du volume des tonalités et avertissements sur votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Tnlés/Avert. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou  pour accéder à l'option Écart Vol.. Appuyez sur  pour valider la sélection.

- 6 Appuyez sur  ou sur  pour accéder à l'écart du volume souhaité.  
Une tonalité est émise pour chaque écart du volume correspondant.

- 7 Effectuez l'une des opérations suivantes :
  - Appuyez sur  pour valider la sélection. Le niveau d'écart de volume est enregistré.

- Appuyez sur  pour quitter. Les modifications sont supprimées.
- 

## Activation/désactivation de la tonalité d'autorisation de parler

Suivez la procédure ci-après pour activer ou désactiver la tonalité d'autorisation de parler sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Tnlés/Avert. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Tnlé Autoris. Appuyez sur  pour valider la sélection.

---

- 6 Appuyez sur  pour activer ou désactiver la tonalité Parler autorisé.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.
-

## Activation/désactivation de la tonalité de mise sous tension

Suivez la procédure ci-après pour activer ou désactiver la tonalité de mise sous tension sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Tnlités/Avert. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder à l'option Mise sous tension. Appuyez sur  pour valider la sélection.
- 

- 6 Appuyez sur  pour activer ou désactiver la tonalité de mise sous tension. L'écran affiche l'un des résultats suivants :
    - Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
    - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.
- 

## Définition des tonalités d'avertissement des messages texte

Vous pouvez personnaliser la tonalité d'alerte des messages texte sur les modes Momentané ou Répétitif pour chaque entrée du répertoire. Suivez la procédure ci-

après pour définir les tonalités d'avertissement de message texte utilisées sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder au répertoire. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'alias ou à l'ID souhaité. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option **Avert. Message**. Appuyez sur  pour valider la sélection.

---

- 5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option **Momentané**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard de l'option **Momentané**.
- Appuyez sur  ou sur  pour accéder à l'option **Répétitive**. Appuyez sur  pour valider la sélection. L'écran affiche le symbole  en regard de l'option **Répétitive**.

## Changement de mode d'affichage

Vous pouvez alterner entre les modes d'affichage Jour et Nuit de la radio, si nécessaire. Cette fonction modifie la gamme des couleurs affichées. Suivez la procédure ci-après pour choisir le mode d'affichage de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmé **Mode Affichage**. Ignorez les étapes suivantes.

- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Écran. Appuyez sur  pour valider la sélection. L'écran affiche Mode Jour et Mode Nuit.

5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.  
L'écran affiche le symbole ✓ en regard du paramètre sélectionné.

## Réglage de la luminosité de l'écran

Suivez la procédure ci-après pour ajuster la luminosité de l'écran de votre radio. La luminosité ne peut pas être ajustée lorsque la fonctionnalité Luminosité auto est activée.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Luminosité** programmé. Ignorez les étapes suivantes.
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Luminosité. Appuyez sur  pour valider la sélection.
- L'écran affiche la barre de progression.

- 5 Appuyez sur  ou sur  pour réduire ou augmenter la luminosité de l'écran à votre convenance. Appuyez sur  pour valider la sélection.
- La valeur du paramètre peut être comprise entre 1 et 8.

## Activation/désactivation de l'avertisseur/des phares

Votre radio peut vous avertir de la réception d'un appel entrant avec la fonction d'avertisseurs/de phares. Si vous activez cette fonction, un appel entrant déclenchera l'avertisseur sonore et les phares de votre véhicule. Cette fonction doit être installée par votre fournisseur à l'aide du connecteur d'accessoire arrière de votre radio. Suivez la

procédure ci-après pour activer ou désactiver sur votre radio l'ensemble des avertisseurs et des phares.

- Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Avertisseur/phares** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.
- Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.
- Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.
- Appuyez sur  ou sur  pour accéder à l'option Avert./phares. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver les avertisseurs et les phares. L'écran affiche l'un des résultats suivants :
- Si cette option est activée, le symbole  apparaît en regard de la mention **Activé**.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention **Activé**.
- 

## Activation/désactivation des indicateurs LED

Suivez la procédure ci-après pour activer ou désactiver les indicateurs LED de votre radio.

- 1 Appuyez sur  pour accéder au menu.
- 
- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou sur  pour accéder à l'option **Voyant LED**. Appuyez sur  pour valider la sélection.
- 

- 5 Appuyez sur  pour activer ou désactiver l'indicateur LED.
- L'écran affiche l'un des résultats suivants :
- Si cette option est activée, le symbole  apparaît en regard de la mention **Activé**.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention **Activé**.
-

## Activation/désactivation du système Audio Public

Suivez la procédure ci-après pour activer ou désactiver le système de sonorisation publique (SONO) interne de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Audio Public** préprogrammé. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'option Adresse publique. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver le système Audio Public.
  - Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation du système Audio Public externe

Suivez la procédure ci-après pour activer ou désactiver le système Audio Public (AP) externe de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Audio Public externe** préprogrammé. Ignorez les étapes suivantes.

- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Adresse publique externe. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver le système Audio Public externe.
- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation de l'écran Introduction

Si nécessaire, vous pouvez activer et désactiver l'écran Introduction, en procédant comme suit.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Afficheur. Appuyez sur  pour valider la sélection.

5 Appuyez sur  ou sur  pour accéder à l'option Écran intro. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur la touche  pour activer ou désactiver l'écran Introduction.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.
- 

## Définition des langues

Suivez la procédure ci-après pour définir les langues utilisées sur votre radio.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou  pour accéder à l'option Langues. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou sur  pour accéder à la langue souhaitée. Appuyez sur  pour valider la sélection.

L'écran affiche le symbole  en regard de la langue sélectionnée.

---

## Identification du type de câble

Procédez comme suit pour choisir le type de câble connecté à votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Type de câble. Appuyez sur  pour valider la sélection.

---

- 5 Le type de câble actuel est indiqué par un symbole .

## Émission activée par la voix

L'émission activée par la voix (VOX) permet de passer des appels commandés par la voix en mode mains libres sur un canal programmé. La radio émet automatiquement pendant une durée programmée, chaque fois que le microphone de l'accessoire VOX détecte la voix d'un utilisateur.

### REMARQUE:

Cette fonction n'est pas applicable dans les canaux de fréquences publiques qui sont dans une même fréquence.

Vous pouvez activer ou désactiver la fonction VOX en réalisant l'une des opérations suivantes :

- Pour activer la fonction VOX, éteignez et rallumez votre radio.
- Changez de canal à l'aide des boutons **Défilement Haut/Bas** pour activer la fonction VOX.
- Changez de canal à l'aide du **sélecteur Volume/canal** pour activer la fonction VOX.
- Pour activer ou désactiver la fonction VOX, utilisez le bouton programmé **VOX** ou le menu correspondant.
- Appuyez sur le bouton **PTT** pendant que la radio émet pour désactiver la fonction VOX.

**REMARQUE:**

seuls certains modèles permettent d'activer et de désactiver cette fonction. Consultez votre fournisseur ou administrateur système pour en savoir plus.

## Activation/désactivation de l'émission activée par la voix (VOX)

Suivez la procédure ci-après pour activer ou désactiver la fonction VOX sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmé **VOX**. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option **VOX**. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver la fonction **VOX**.

**REMARQUE:**

Si la tonalité d'autorisation de parler est activée, utilisez un mot clé pour émettre l'appel. Attendez la fin de la tonalité d'autorisation de parler, puis parlez distinctement dans le microphone. Reportez-vous à la section [Activation/désactivation de la tonalité d'autorisation de parler à la page 221](#) pour plus d'informations.

## Activation/désactivation de l'annonce vocale

Cette fonction permet à la radio d'énoncer par audio la zone ou le canal attribué par l'utilisateur, ou le bouton programmable sur lequel il vient d'appuyer. Cela s'avère particulièrement utile lorsque l'utilisateur a du mal à lire l'écran de la radio.

L'utilisateur peut personnaliser l'indication audio en fonction de ses besoins. Suivez la procédure ci-après pour activer ou désactiver l'annonce vocale sur votre radio.

## Activation/désactivation de la carte d'option

Les fonctions de la carte d'option peuvent être activées pour chaque canal et attribuées à des boutons programmables. Chaque canal peut prendre en charge jusqu'à 6 fonctions de carte d'option. Suivez la procédure ci-après pour activer ou désactiver la carte d'option de votre radio.

Appuyez sur le bouton **Carte d'option** préprogrammé.

---

## Synthèse vocale

La fonctionnalité de synthèse vocale peut uniquement être activée par votre revendeur ou votre administrateur système. Si la synthèse vocale est activée, la fonctionnalité d'annonce vocale est automatiquement désactivée. Si l'annonce vocale est activée, la fonctionnalité de synthèse vocale est automatiquement désactivée.

Cette fonction permet à la radio d'énoncer distinctement les fonctionnalités suivantes :

- Canal actuel
- Zone actuelle
- Fonctionnalité de bouton programmé activée ou désactivée
- Contenu des messages texte reçus
- Contenu des tickets de tâches reçus

L'indication audio peut être personnalisée par l'utilisateur. Cette fonctionnalité s'avère particulièrement utile lorsque l'utilisateur ne peut pas lire aisément l'écran de la radio.

## Définition de la synthèse vocale

Suivez la procédure ci-après pour définir la fonctionnalité de synthèse vocale.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Annonce vocale. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou  pour accéder à l'une des fonctionnalités suivantes. Appuyez sur  pour valider la sélection.

Les fonctionnalités disponibles sont les suivantes :

- Toutes
  - Messages
  - Tickets de tâches
  - Channel
  - Zone
  - Bouton program
- ✓ s'affiche en regard du paramètre sélectionné.

## Activation/désactivation du transfert d'appel

Vous pouvez transférer tous les appels reçus par votre radio vers une autre radio.

- 1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Renvoi d'appel. Appuyez sur  pour valider la sélection.

- 5 Effectuez l'une des opérations suivantes :
- Appuyez sur  ou  pour activer le transfert d'appel. Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Appuyez sur  ou  pour désactiver le transfert d'appel. Si cette option est désactivée, le

symbole  n'est plus affiché en regard de la mention Activé.

## Réglage du minuteur du menu

Vous pouvez régler la durée d'ouverture du menu sur la radio avant son retour automatique à l'écran d'accueil. Suivez la procédure ci-après pour régler le minuteur du menu.

1 Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou  pour accéder à l'option Écran. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  ou  pour accéder à l'option Délai Menu. Appuyez sur  pour valider la sélection.

---

6 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.

---

## Activation/désactivation de la commande de gain automatique (CGA) du microphone analogique

La commande de gain automatique (CGA) du microphone analogique contrôle automatiquement le gain du microphone de la radio lors de l'émission sur un système analogique.

Cette fonction réduit les sons trop forts et augmente les sons faibles selon une valeur prédéfinie de façon à offrir un

niveau de son constant. Suivez la procédure ci-après pour activer ou désactiver sur votre radio la commande de gain automatique (CGA) du microphone analogique.

1 Appuyez sur  pour accéder au menu.

---

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

4 Appuyez sur  ou sur  pour accéder à l'option Mic CGA-A. Appuyez sur  pour valider la sélection.

---

5 Appuyez sur  pour activer ou désactiver CGA micro analogique.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole ✓ apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole ✓ n'est plus affiché en regard de la mention Activé.

### Activation/désactivation de la commande de gain automatique (CGA) du microphone numérique

La commande de gain automatique (CGA) du microphone numérique contrôle automatiquement le gain du microphone de la radio lors de la l'émission sur un système numérique.

Cette fonction réduit les sons trop forts et augmente les sons faibles selon une valeur prédéfinie de façon à offrir un niveau de son constant. Suivez la procédure ci-après pour activer ou désactiver sur votre radio la commande de gain automatique (CGA) du microphone numérique.

- 1 Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option Mic CGA-D. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver CGA micro numérique.

L'écran affiche l'un des résultats suivants :

- Si cette option est activée, le symbole ✓ apparaît en regard de la mention Activé.
- Si cette option est désactivée, le symbole ✓ n'est plus affiché en regard de la mention Activé.

## Activation/désactivation de l'audio intelligent.

Votre radio ajuste automatiquement le volume audio en fonction du bruit de l'environnement, incluant les sources de bruit mobiles et fixes. Cette fonction est uniquement dédiée à la réception et ne concerne pas l'émission audio. Suivez la procédure ci-après pour activer ou désactiver l'audio intelligent sur votre radio.

### REMARQUE:

Cette fonctionnalité n'est pas disponible pendant une session Bluetooth.

1 Effectuez l'une des opérations suivantes :

- Appuyez sur le bouton **Audio intelligent** préprogrammé. Ignorez les étapes ci-dessous.
- Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option **Config./Infos**. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option **Audio intelligent**. Appuyez sur  pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option **Activé**. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de l'option **Activé**.
- Appuyez sur  ou sur  pour accéder à l'option **Désactivé**. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de l'option **Désactivé**.

## Activation/Désactivation de la fonction du filtre anti-effet Larsen

Cette fonction permet de réduire la réaction acoustique des appels reçus. Suivez la procédure ci-après pour activer ou désactiver le supprimeur de réaction acoustique sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection..

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou  pour accéder à l'option Supprimeur de réaction acoustique. Appuyez sur  pour valider la sélection.

- 5 Effectuez l'une des opérations suivantes :
  - Appuyez sur  pour activer le supprimeur de réaction acoustique. Si cette option est activée, le symbole  apparaît en regard de la mention Activé.
  - Appuyez sur  pour désactiver le supprimeur de réaction acoustique. Si cette option est désactivée, le symbole  n'est plus affiché en regard de la mention Activé.

## Activation/désactivation de l'amélioration des trilles

Vous pouvez activer cette fonction lorsque vous parlez dans une langue dont de nombreux mots contiennent des trilles alvéolaires (« R » roulé). Suivez la procédure ci-après pour activer ou désactiver la fonction d'amélioration des sons vibrants sur votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **Amélioration trille** préprogrammé. Ignorez les étapes ci-dessous.
  - Appuyez sur  pour accéder au menu.

2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

4 Appuyez sur  ou sur  pour accéder à l'option Amél. trille. Appuyez sur  pour valider la sélection.

5 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activé. Appuyez sur  pour valider la sélection. L'écran affiche  en regard de l'option Activé.
- Appuyez sur  ou sur  pour accéder à l'option Désactivé. Appuyez sur  pour

valider la sélection. L'écran affiche  en regard de l'option Désactivé.

## Ambiance audio

Vous pouvez personnaliser l'ambiance audio de la radio en fonction de votre environnement.

### Par défaut

Réglage par défaut.

### Fort

Ce paramètre active la suppression du bruit et augmente le volume du haut-parleur pour une utilisation dans des environnements bruyants.

### Groupe de travail

Ce paramètre active le supprimeur de réaction acoustique (AF) et désactive la commande automatique de gain (CAG) pour une utilisation à proximité d'un autre groupe de radios.

## Réglage de l'ambiance audio

Suivez la procédure ci-après pour définir l'ambiance audio de la radio en fonction de votre environnement.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option **Config. radio**. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option **Ambiance audio**. Appuyez sur  pour valider la sélection.

---

- 5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.

Les paramètres sont les suivants :

- Choisissez **Par défaut** pour les paramètres usine par défaut.
- Choisissez **Fort** pour augmenter le volume du haut-parleur lors d'une utilisation dans des environnements bruyants.
- Choisissez **Groupe de travail** pour réduire la réaction acoustique lors d'une utilisation avec un groupe de radios à proximité.

L'écran affiche le symbole  en regard du paramètre sélectionné.

## Profils audio

Vous pouvez personnaliser les profils audio de votre radio en fonction de vos préférences.

### Par défaut

Réglage par défaut.

### Niveau 1, Niveau 2 et Niveau 3

Ces paramètres sont conçus pour compenser la perte auditive due au bruit intervenant généralement chez les adultes de 40, 50, 60 ans ou plus.

### Augmentation des aigus, Augmentation des fréquences moyennes et Augmentation des basses.

Ces paramètres offrent respectivement un son plus métallique, plus nasal ou plus grave.

## Définition des profils audio

Suivez la procédure ci-après pour définir des profils audio sur votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Profils audio. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  ou sur  pour accéder au paramètre souhaité. Appuyez sur  pour valider la sélection.

Les paramètres sont les suivants :

- Choisissez Par défaut pour désactiver le profil audio sélectionné précédemment et revenir aux paramètres usine par défaut.
- Sélectionnez Niveau 1, Niveau 2 ou Niveau 3 pour des profils audio conçus pour compenser la perte auditive due au bruit, qui est typique pour les adultes de plus de 40 ans.
- Choisissez Augmentation des aigus, Augmentation des fréquences moyennes ou Augmentation des basses pour des profils

audio adaptés à votre préférence pour un son plus métallique, nasal ou grave.

L'écran affiche le symbole ✓ en regard du paramètre sélectionné.

## Activation/désactivation du système mondial de navigation par satellite

Le système GNSS (Global Navigation Satellite System, système mondial de navigation par satellite) est un système de navigation par satellite qui détermine la position exacte d'une radio. Le GNSS inclut le GPS (Global Positioning System) et le GLONASS (Global Navigation Satellite System).

### REMARQUE:

Certains modèles de radio peuvent proposer les fonctions GPS et GLONASS. La constellation GNSS est configurée à l'aide du CPS. Consultez votre revendeur ou administrateur système pour déterminer comment la radio a été programmée.

- 1 Effectuez l'une des opérations suivantes pour activer ou désactiver la fonction GNSS sur votre radio.
  - Appuyez sur le bouton **GNSS** programmé.

- Appuyez sur  pour accéder au menu. Passez à l'étape suivante.

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

- 3 Appuyez sur  ou sur  pour accéder à l'option Config. radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou  pour accéder à l'option GNSS. Appuyez sur  pour valider la sélection.

- 5 Appuyez sur  pour activer ou désactiver la fonction GNSS.  
Si cette option est activée, le symbole ✓ apparaît en regard de la mention **Activé**.  
Si cette option est désactivée, le symbole ✓ n'est plus affiché en regard de la mention **Activé**.

## Liste de réception flexible

La liste de réception flexible est une fonctionnalité qui vous permet de créer et d'attribuer des membres dans la liste du groupe de parole de réception. Votre radio peut prendre en charge un maximum de 16 membres dans la liste. Cette fonctionnalité est prise en charge dans Capacity Plus.

### Activation/désactivation de la liste de réception flexible

Suivez la procédure ci-après pour activer ou désactiver la liste de réception flexible.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton programmé **Liste de réception flexible**. Ignorez les étapes suivantes.
  - Appuyez sur  pour accéder au menu.

- 2 Appuyez sur  ou  pour accéder à l'option Liste Rx Flexible. Appuyez sur  pour valider la sélection.

- 3 Effectuez l'une des opérations suivantes :

- Appuyez sur  ou sur  pour accéder à l'option Activer. Appuyez sur  pour valider la sélection.  
Une tonalité d'indication positive est émise.  
L'écran affiche un mini-avis positif.
- Appuyez sur  ou sur  pour accéder à l'option Désactiver. Appuyez sur  pour valider la sélection.  
Une tonalité d'indication négative est émise.  
L'écran affiche un mini-avis négatif.

## Informations générales de la radio

Votre radio contient des informations sur les différents paramètres généraux.

Les informations générales de votre radio sont les suivantes :

- ID et alias de la radio.
- Versions du micrologiciel (firmware) et du codeplug.

- Mise à jour logicielle.
- Informations GNSS
- Informations du site.

## REMARQUE:

Appuyez sur  pour revenir à l'écran précédent.

Exercez une pression longue sur  pour revenir à l'écran d'accueil. La radio ferme l'écran actif dès que le compteur d'inactivité expire.

## Vérification de l'alias et de l'ID de la radio

Suivez la procédure ci-après pour afficher l'alias et l'ID de votre radio.

- 1 Effectuez l'une des opérations suivantes :
  - Appuyez sur le bouton **ID et alias radio** programmé. Ignorez les étapes suivantes. Une tonalité d'indication positive est émise.  
Vous pouvez appuyer sur le bouton programmé **ID et alias radio** pour revenir à l'écran précédent.

- Appuyez sur  pour accéder au menu.

- 
- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.

- 
- 3 Appuyez sur  ou sur  pour accéder à l'option **Infos radio**. Appuyez sur  pour valider la sélection.

- 
- 4 Appuyez sur  ou  pour accéder à l'option **Mon ID**. Appuyez sur  pour valider la sélection.  
La première ligne affiche l'alias de la radio. La deuxième ligne affiche l'ID de la radio.

## Vérification des versions de micrologiciel (firmware) et de codeplug

Suivez la procédure ci-après pour afficher les versions de micrologiciel (firmware) et de codeplug de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.

---

- 4 Appuyez sur  ou sur  pour accéder à l'option Versions. Appuyez sur  pour valider la sélection.  
  
L'écran affiche les versions actuelles du micrologiciel (firmware) et du codeplug.

## Vérification des informations de mise à jour logicielle

Cette fonctionnalité affiche la date et l'heure de la dernière mise à jour logicielle effectuée au moyen de la programmation par liaison radio (OTAP) ou par Wi-Fi. Suivez la procédure ci-après pour consulter les informations de mise à jour logicielle de votre radio.

- 1 Appuyez sur  pour accéder au menu.

---

- 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.

---

- 3 Appuyez sur  ou sur  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.

- 4 Appuyez sur  ou sur  pour accéder à l'option **MàJ logiciel**. Appuyez sur  pour valider la sélection.
- L'écran affiche la date et l'heure de la dernière mise à jour logicielle.
- 

Le menu de mise à jour logicielle est uniquement disponible après au moins une session OTAP ou Wi-Fi réussie. Reportez-vous à la section [Programmation par liaison radio à la page 521](#) pour plus d'informations.

## Vérification des informations GNSS

Cette fonction affiche les informations GNSS de votre radio, et inclut les valeurs suivantes :

- Latitude
- Longitude
- Altitude
- Direction
- Vitesse
- Coefficient d'affaiblissement de la précision sur la composante horizontale du positionnement (HDOP)

- Satellites
- Version

- 1 Appuyez sur  pour accéder au menu.
- 

- 2 Appuyez sur  ou sur  pour accéder à l'option **Config/Infos**. Appuyez sur  pour valider la sélection.
- 

- 3 Appuyez sur  ou  pour accéder à l'option **Infos radio**. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou  pour accéder à l'option **Infos GNSS**. Appuyez sur  pour valider la sélection.
- 

- 5 Appuyez sur  ou  pour accéder à l'élément demandé. Appuyez sur  pour valider la

sélection. L'écran affiche les informations GNSS demandées.

---

## Affichage des informations sur le site

Suivez la procédure ci-après pour afficher le nom du site sur lequel se trouve actuellement votre radio.

- 1 Appuyez sur  pour accéder au menu.
  - 2 Appuyez sur  ou sur  pour accéder à l'option Config/Infos. Appuyez sur  pour valider la sélection.
  - 3 Appuyez sur  ou sur  pour accéder à l'option Infos radio. Appuyez sur  pour valider la sélection.
- 

- 4 Appuyez sur  ou  pour accéder à l'option Info site. Appuyez sur  pour valider la sélection.
- 

L'écran affiche le nom de site actuel.

Cette page a été laissée vide de manière intentionnelle.

# Garantie limitée

## PRODUITS DE COMMUNICATION MOTOROLA SOLUTIONS

### I. CONDITIONS ET DURÉE DE CETTE GARANTIE :

Motorola Solutions, Inc. (« Motorola Solutions ») garantit les Produits de communication fabriqués par Motorola Solutions figurant dans la liste ci-dessous (ci-après dénommés « Produit ») contre les défauts concernant les matériaux et la fabrication dans des conditions d'utilisation et de service normales pour la durée à compter de la date d'achat telle que définie ci-dessous :

Radios Série DM numériques mobiles	Douze (24) mois
Accessoires	Douze (12) mois

Motorola Solutions, à sa discrétion et gratuitement, réparera (avec des composants neufs ou reconditionnés) ou remplacera (avec un produit neuf ou reconditionné) ou

remboursera le prix d'achat du Produit pendant la période de garantie s'il a été retourné conformément aux conditions de la présente garantie. Les pièces ou cartes remplacées sont garanties pour le restant de la période de garantie applicable d'origine. Toutes les pièces remplacées du Produit deviennent la propriété de Motorola Solutions.

Cette garantie limitée expresse est étendue par Motorola Solutions à l'acheteur/utilisateur final d'origine uniquement et n'est ni cessible, ni transférable à aucune autre partie. Il s'agit de la garantie complète du Produit fabriqué par Motorola Solutions. Motorola Solutions n'accepte aucune obligation ni responsabilité quant à tout ajout ou modification apporté à cette garantie, à moins que cet ajout ou modification ne soit effectué par écrit et signé par un responsable de Motorola Solutions.

Sauf stipulation contraire figurant dans un accord séparé établi entre Motorola Solutions et l'acheteur/utilisateur final d'origine, Motorola Solutions ne garantit en aucune manière l'installation, la maintenance ou la réparation du Produit.

Motorola Solutions ne peut en aucune façon être tenu responsable pour tout équipement auxiliaire non fourni par Motorola Solutions associé ou utilisé avec le Produit ou pour toute utilisation du Produit avec n'importe quel appareil auxiliaire. Tous ces appareils sont expressément

exclus de cette garantie. Étant donné que chaque système susceptible d'utiliser le Produit est unique, dans le cadre de cette garantie, Motorola Solutions décline toute responsabilité concernant la portée, la couverture ou le fonctionnement de l'ensemble du système.

## II. DISPOSITIONS GÉNÉRALES

Cette garantie établit l'étendue complète des responsabilités de Motorola Solutions concernant le Produit. Le recours exclusif en vertu de cette garantie, à l'entière discrétion de Motorola Solutions, est limité à la réparation, au remplacement ou au remboursement du prix d'achat. CETTE GARANTIE SE SUBSTITUE À TOUTE AUTRE GARANTIE EXPRESSE. LES GARANTIES IMPLICITES, INCLUANT SANS LIMITATION LES GARANTIES IMPLICITES DE QUALITÉ MARCHANDE ET D'ADAPTATION À UN USAGE PARTICULIER, SONT LIMITÉES À LA DURÉE DE CETTE GARANTIE LIMITÉE. LA RESPONSABILITÉ DE MOTOROLA SOLUTIONS NE SAURAIT EN AUCUN CAS EXCÉDER LE PRIX D'ACHAT DU PRODUIT ET NE SAURAIT ÊTRE ENGAGÉE EN CAS DE DOMMAGES, DE PERTE D'UTILISATION, DE PERTE DE TEMPS, DE DÉRANGEMENT, DE PERTE COMMERCIALE, DE MANQUE À GAGNER, D'ÉCONOMIES NON RÉALISÉES OU TOUT AUTRE

DOMMAGE INDIRECT, SPÉCIAL OU ACCESSOIRE RÉSULTANT DE L'UTILISATION OU DE L'IMPOSSIBILITÉ D'UTILISER LE PRODUIT, DANS LES LIMITES DES DISPOSITIONS PRÉVUES PAR LA LOI.

## III. DROITS ACCORDÉS PAR LA LÉGISLATION NATIONALE :

CERTAINS ÉTATS N'AUTORISENT PAS L'EXCLUSION OU LA LIMITATION DES DOMMAGES ACCESSOIRES OU INDIRECTS, OU UNE LIMITATION DE LA DURÉE D'APPLICATION D'UNE GARANTIE IMPLICITE, AUQUEL CAS LA LIMITATION OU EXCLUSION CI-DESSUS RISQUE DE NE PAS ÊTRE APPLICABLE.

Cette garantie vous donne des droits légaux spécifiques ; vous pouvez également avoir d'autres droits, qui varient d'un État à l'autre.

## IV. UTILISER LE SERVICE DE GARANTIE

Pour obtenir un service sous garantie, vous devez fournir un justificatif d'achat (mentionnant la date d'achat et le numéro de série du Produit) et apporter ou envoyer le Produit (transport et assurance préparés à votre charge) à

un centre de garantie homologué. Le service sous garantie sera fourni par Motorola Solutions via l'un de ses centres de services sous garantie agréés. Pour obtenir le service sous garantie, vous pouvez contacter en premier lieu le fournisseur qui vous a vendu le Produit (par exemple, le revendeur ou le fournisseur de services de communication). Vous pouvez également appeler Motorola Solutions au 1-800-927-2744 aux États-Unis et au Canada.

## V. ÉLÉMENTS NON COUVERTS PAR LA GARANTIE

- 1 Les défauts ou dommages résultant de l'utilisation du Produit en dehors de son utilisation normale et habituelle.
- 2 Les défauts ou dommages liés à un mauvais usage, à un accident, à de l'eau ou à une négligence.
- 3 Les défauts ou dommages résultant d'essais, d'une utilisation, d'une maintenance, d'une installation, d'une altération, d'une modification ou d'un ajustement inappropriés.
- 4 La détérioration ou les dommages d'antennes, à moins qu'ils n'aient été directement causés par des défauts du matériel ou des défauts de fabrication.
- 5 Un Produit ayant subi des modifications, des démontages ou des réparations non autorisés (y compris, sans limitation, l'ajout au Produit d'appareils non fournis par Motorola Solutions) qui, en conséquence, affectent les performances du Produit ou interfèrent avec l'inspection ou les tests entrant dans le cadre d'une garantie normale du Produit pour vérifier la justification de la demande de prise en charge sous garantie.
- 6 Un Produit dont le numéro de série a été enlevé ou rendu illisible.
- 7 Les batteries rechargeables si :
  - l'enveloppe de protection de la batterie est cassée ou montre des signes évidents d'altération ;
  - les dommages ou défauts sont dus au chargement ou à l'utilisation de la batterie dans un appareil ou service autre que le Produit pour lequel elle est conçue.
- 8 Les frais de port encourus pour l'expédition du Produit au dépôt de réparation.
- 9 Un Produit qui, suite à l'altération illégale ou non autorisée de son logiciel/micrologiciel (firmware), ne fonctionne pas conformément aux spécifications publiées par Motorola Solutions ou à l'étiquetage de

certification de la FCC en vigueur pour le Produit à sa date de distribution initiale par Motorola Solutions.

- 10** Les rayures ou autres dommages esthétiques sur les surfaces du Produit n'affectant pas le bon fonctionnement du Produit.
- 11** L'usure normale et habituelle.

## VI. DISPOSITIONS RELATIVES AU BREVET ET AU LOGICIEL

Motorola Solutions défendra à ses frais tout acheteur/utilisateur final contre toute poursuite basée sur une prétendue violation par le Produit ou ses composants d'un brevet déposé aux États-Unis. Motorola Solutions prendra à sa charge les coûts et les dédommagements imposés à l'acquéreur utilisateur final dans tous les cas de poursuite associés à de telles demandes, mais cette défense et ces paiements seront uniquement possibles si les conditions suivantes sont respectées :

- 1** Motorola Solutions est averti rapidement et par écrit par l'acheteur en cas d'une telle réclamation.
- 2** Motorola Solutions détient un contrôle exclusif sur la défense face à la poursuite et sur toutes les

négociations pour son règlement ou l'adoption d'un compromis.

- 3** Si le Produit ou certains de ses composants deviennent l'objet, ou peuvent devenir l'objet selon le jugement de Motorola Solutions, de poursuite pour violation d'un brevet déposé aux États-Unis, l'acquéreur doit autoriser Motorola Solutions, à sa discrétion et à ses frais, de prendre les mesures nécessaires pour que l'acquéreur continue d'avoir le droit d'utiliser le Produit ou ses composants ou de les remplacer ou de les modifier afin d'éliminer les risques de violation de brevet ou d'accorder à l'acquéreur un crédit correspondant à la valeur dépréciée du Produit ou de ses composants avec retour du Produit/des composants. La dépréciation correspond à un même montant par année pendant toute la durée de vie du Produit ou de ses composants, tel que défini par Motorola Solutions.

Motorola Solutions décline toute responsabilité concernant toute réclamation portant sur une violation de brevet basée sur l'association du Produit ou des composants fournis dans le cadre de la présente garantie avec des logiciels, équipements ou appareils non fournis par Motorola Solutions. Motorola Solutions décline également toute responsabilité concernant l'utilisation de logiciels ou d'équipements auxiliaires non fournis par Motorola Solutions et connectés ou utilisés avec le Produit. Les

dispositions ci-dessus présentent l'entière responsabilité de Motorola Solutions concernant toute atteinte à un brevet du Produit ou des composants du produit.

Les lois des États-Unis et d'autres pays garantissent à Motorola Solutions certains droits à l'égard des logiciels appartenant à Motorola Solutions, notamment les droits exclusifs de reproduction et de distribution des logiciels Motorola Solutions. Le logiciel Motorola Solutions peut être utilisé uniquement dans le Produit dans lequel il a été intégré à l'origine, sans qu'il puisse être remplacé, copié, distribué, modifié d'aucune façon, ni utilisé pour produire des dérivés de ce logiciel. Aucune autre utilisation, y compris, sans limitation, l'altération, la modification, la reproduction, la distribution ou l'ingénierie inverse du logiciel Motorola Solutions ou l'exercice de droits sur le logiciel Motorola Solutions n'est autorisé. Les droits d'auteur ou les brevets de Motorola Solutions ne constituent ni ne donnent droit à aucune licence directement ou indirectement, par préclusion ou autrement.

## VII. LÉGISLATION APPLICABLE

Cette garantie est régie par la législation de l'Illinois, États-Unis.

Cette page a été laissée vide de manière intentionnelle.

# Sommario

# Informazioni importanti sulla sicurezza

## Guida sull'esposizione a sorgenti di energia RF e sulla sicurezza del prodotto per radiomobili ricetrasmittenti

### ATTENZIONE!

**L'uso di questa radio è limitato esclusivamente a scopi professionali.** Prima di utilizzare la radio, leggere la Guida sull'esposizione a sorgenti di energia RF e sulla sicurezza del prodotto per radiomobili ricetrasmittenti, che contiene importanti istruzioni di funzionamento per utilizzare con sicurezza il dispositivo, nonché informazioni sull'esposizione all'energia RF e sul controllo nel rispetto delle norme e dei regolamenti vigenti in materia.

L'elenco delle antenne e degli altri accessori approvati da Motorola Solutions è reperibile nel seguente sito Web:

<http://www.motorolasolutions.com>

Pagina lasciata intenzionalmente vuota.

## Versione del software

Tutte le funzioni descritte nelle sezioni seguenti sono supportate dalla versione software **R02.08.05.0000** o successiva.

Vedere [Controllo della versione del firmware e del codeplug a pagina 234](#) per determinare la versione del software della radio.

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

Pagina lasciata intenzionalmente vuota.

## Copyright

I prodotti Motorola Solutions descritti in questo documento possono includere programmi Motorola Solutions per computer coperti da copyright. Le leggi in vigore negli Stati Uniti e in altri Paesi garantiscono a Motorola Solutions alcuni diritti esclusivi per i programmi per computer protetti da copyright. Pertanto, tutti i programmi per computer Motorola Solutions protetti da copyright e inclusi nei prodotti Motorola Solutions descritti nel presente documento non possono essere copiati o riprodotti in alcun modo senza l'espresso consenso scritto di Motorola Solutions.

© 2017 Motorola Solutions, Inc. Tutti i diritti riservati

Nessuna parte di questo documento può essere riprodotta, trasmessa, trascritta, memorizzata in un sistema di riproduzione o tradotta in qualunque lingua, in qualsiasi forma e con qualsiasi mezzo, senza il permesso scritto di Motorola Solutions, Inc.

Inoltre, l'acquisto di prodotti Motorola Solutions non garantirà in modo diretto o per implicazione, per eccezione o in altro modo nessuna licenza sotto copyright, brevetto o richiesta di brevetto di Motorola Solutions, tranne la normale licenza d'uso non esclusiva ed esente da royalty,

derivante dall'applicazione della legge nella vendita del prodotto.

### Esclusione di responsabilità

Tenere presente che determinate funzioni, strutture e funzionalità descritte nel presente documento potrebbero non essere applicabili o non possedere la licenza per l'utilizzo su un determinato sistema oppure potrebbero dipendere dalle caratteristiche di una specifica configurazione di determinati parametri o unità del terminale radio mobile. Per maggiori informazioni, contattare il proprio referente Motorola Solutions.

### Marchi registrati

MOTOROLA, MOTO, MOTOROLA SOLUTIONS e il logo della M stilizzata sono marchi o marchi registrati di Motorola Trademark Holdings, LLC, utilizzati su licenza. Tutti gli altri marchi appartengono ai rispettivi proprietari.

### Direttiva WEEE (Waste of Electrical and Electronic Equipment) dell'Unione Europea

■ In base alla direttiva RAEE dell'Unione Europea, sui prodotti venduti nei paesi dell'Unione Europea (o, in alcuni

casi, sulla relativa confezione) deve essere presente il simbolo del cassonetto mobile barrato.

Come stabilito dalla direttiva RAEE, il simbolo del cassonetto mobile barrato indica che i clienti e gli utenti finali dei paesi dell'Unione Europea non devono smaltire gli apparecchi elettronici ed elettrici o gli accessori insieme ai rifiuti domestici.

I clienti o gli utenti finali dei paesi dell'Unione Europea devono contattare il rappresentante locale o il centro assistenza del fornitore dell'apparecchiatura per ottenere informazioni sul sistema di raccolta dei rifiuti nel proprio paese.

## Copyright del software per computer

I prodotti Motorola Solutions descritti nel presente manuale possono includere programmi per computer Motorola Solutions protetti da copyright salvati in memorie a semiconduttore o altri mezzi. Le leggi degli Stati Uniti d'America e di altri Paesi garantiscono a Motorola Solutions alcuni diritti esclusivi per i programmi per computer protetti da copyright, incluso, senza limitazioni, il diritto esclusivo di copiare o riprodurre in qualsiasi forma il programma. Di conseguenza, nessuno dei programmi per computer Motorola Solutions protetti da copyright contenuti nei prodotti descritti in questo manuale può essere copiato, riprodotto, modificato, decodificato o distribuito in qualsiasi modo senza l'esplicito permesso scritto di Motorola Solutions. Inoltre, l'acquisto di prodotti Motorola Solutions non garantirà in modo diretto o per implicazione, per eccezione o in altro modo nessuna licenza sotto copyright, brevetto o richiesta di brevetto di Motorola, tranne la normale licenza d'uso non esclusiva derivante dall'applicazione della legge nella vendita del prodotto.

La tecnologia di codifica vocale AMBE+2™ incorporata in questo prodotto è protetta da diritti di proprietà intellettuale,

ivi compresi i diritti di brevetto, copyright e i segreti commerciali di Digital Voice Systems, Inc.

La tecnologia di codifica vocale è concessa in licenza esclusivamente per l'uso in questa apparecchiatura di comunicazione. È esplicitamente proibito all'utente di questa tecnologia cercare di decompilare, decodificare o disassemblare il codice oggetto o di convertirlo in una forma leggibile dall'uomo.

Pagina lasciata intenzionalmente vuota.

## Precauzioni per l'utilizzo

La serie di radio portatili digitali MOTOTRBO è conforme alla norma IP67, che garantisce la resistenza della radio in condizioni avverse sul campo, quali l'immersione in acqua. Questa sezione descrive alcune semplici precauzioni per l'utilizzo.

### AVVERTENZA:

Non disassemblare la radio, onde evitare che vengano danneggiate le guarnizioni e si formino infiltrazioni all'interno della radio. La manutenzione della radio deve essere eseguita solo in centri di assistenza attrezzati per testare e sostituire le guarnizioni di tenuta della radio.

- Se la radio è stata immersa in acqua, scuotere la radio per eliminare qualsiasi residuo di acqua intrappolata nella griglia dell'altoparlante o nella porta del microfono. È possibile che la presenza di acqua intrappolata diminuisca le prestazioni audio.
- Se l'area dei contatti della batteria è stata esposta all'acqua, pulire e asciugare i contatti della batteria sia sulla radio che sulla batteria, prima di inserire la batteria nella radio. È possibile che l'acqua residua provochi un corto circuito nella radio.
- Se la radio è stata immersa in una sostanza corrosiva, ad esempio acqua salmastra, sciacquare la radio e la batteria con acqua dolce, quindi asciugarle.
- Per pulire la superficie esterna della radio, utilizzare una soluzione diluita a base di detergente per piatti delicato e acqua dolce (ad esempio, un cucchiaino di detergente in circa 4 l di acqua).
- Non ostruire il foro di ventilazione situato sul telaio della radio sotto i contatti della batteria. Questo foro mantiene il livellamento della pressione nella radio. In questo modo, si possono verificare infiltrazioni e compromettere la tenuta stagna della radio.
- Non ostruire o coprire il foro di ventilazione, neppure con un'etichetta.
- Assicurarsi che nessuna sostanza oleosa venga a contatto con il foro di ventilazione.
- La radio, con l'antenna fissata correttamente, è progettata per essere immersa a una profondità massima di 1 m e un periodo massimo di immersione di 30 minuti. È possibile che il superamento di tale limite massimo o l'utilizzo senza antenna danneggino la radio.
- Quando si pulisce la radio, non utilizzare un getto diretto ad alta pressione, in quanto supera il limite di pressione

a 1 m di profondità e potrebbe causare infiltrazioni di acqua nella radio.

## Operazioni di base

Questo capitolo descrive le operazioni per iniziare a utilizzare la radio.

### Accensione della radio

Seguire la procedura per accendere la radio.

Premere il pulsante **On/Off**.

---

In caso di esito positivo:

- Viene emesso un tono.
- Il LED verde si accende.
- Sul display viene visualizzato MOTOTRBO (TM) seguito da un messaggio o da un'immagine di benvenuto.
- La schermata principale si illumina.

Se la funzione Toni/avvisi è disattivata, non viene emesso alcun tono all'accensione.

Controllare la batteria se la radio non si accende.  
Assicurarsi che sia carica e inserita correttamente.  
Contattare il rivenditore se la radio continua a non accendersi.

[Invia feedback](#)

## Spegnimento della radio

Seguire la procedura per spegnere la radio.

Premere e tenere premuto il pulsante **On/Off**.

Lo spegnimento totale della radio può richiedere fino a sette secondi.

Sul display viene visualizzato il messaggio  
Spegnimento in corso.

---

## Regolazione del volume

Seguire la procedura per cambiare il livello del volume della radio.

Eseguire una delle seguenti operazioni:

- Ruotare la **manopola On/Off/Controllo volume** in senso orario per aumentare il volume.
- Ruotare la **manopola On/Off/Controllo volume** in senso antiorario per diminuire il volume.

**NOTA:**

È possibile programmare la radio in modo che abbia un offset del volume minimo. In tal caso, il livello del volume non può essere abbassato oltre quello minimo programmato. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

---

## Controlli della radio

Questo capitolo descrive i pulsanti e funzioni per controllare la radio.

- 1 Pulsante On/Off/Informazioni
- 2 Manopola volume/canali
- 3 Display
- 4 Pulsante Menu/OK
- 5 Pulsanti di scorrimento su/giù
- 6 Altoparlante

- 7 Pulsante Restituisci/Home
- 8 Pulsanti programmabili anteriori
- 9 Connettore per accessori
- 10 Indicatori LED

## Manopola volume/canali

La **manopola volume/canali** può essere programmata per il doppio controllo di volume e canali o solo per controllo del volume.

Per regolare il volume, vedere [Regolazione del volume a pagina 41](#).

Per cambiare i canali, premere e tenere premuta la **manopola volume/canali** fino a quando non viene visualizzato lo stato di selezione del canale. Ruotare la **manopola volume/canale** per selezionare il canale. Effettuare una delle seguenti operazioni per uscire dallo stato di selezione del canale:

- Premere la **manopola volume/canale**.
- Premere  .
- Premere  .

- Attendere fino allo scadere del timer del menu.

## Impostazione delle preferenze per la manopola con duplice funzionalità

Seguire la procedura per impostare la preferenza per la manopola con duplice funzionalità della radio.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare *Impost.*  
*radio*. Premere  per effettuare la selezione.

## Pulsanti sul microfono della tastiera

È possibile utilizzare la tastiera alfanumerica 3 x 4 del microfono della tastiera con navigazione a 4 direzioni (part number Motorola Solutions RMN5127\_) per accedere alle funzioni della radio. Per immettere diversi caratteri è necessario

- 4 Premere  o  fino a visualizzare *Doppia manop.* Premere  per effettuare la selezione.  
Sul display vengono visualizzate le opzioni *Solo volume* e *Volume e can.*

- 5 Premere  o  fino a visualizzare l'impostazione desiderata. Premere  per effettuare la selezione.  
Accanto alle impostazioni selezionate viene visualizzato . Il display torna al menu precedente.

premere più volte il tasto corrispondente. Nella tabella seguente è riportato il numero di pressioni di un tasto necessarie per immettere il carattere specifico.

Tast o	Numero di pressioni del tasto												
	1	2	3	4	5	6	7	8	9	10	11	12	13
1 . , ? ! @ & ' % — : * #	1	.	,	?	!	@	&	'	%	—	:	*	#

4 GHI	G	H	I	4									
5 JKL	J	K	L	5									
6 MNO	M	N	O	6									

Continuazione tabella...

Tast o	Numero di pressioni del tasto												
	1	2	3	4	5	6	7	8	9	10	11	12	13
	P	Q	R	S	7								
	T	U	V	8									
	W	X	Y	Z	9								
	0		<b>NOTA:</b> Premere per immettere "0" e premere a lungo per attivare il blocco MAIUSC. Un'altra pressione prolungata ripristina la composizione in lettere minuscole.										
	* o canc		<b>NOTA:</b> Durante l'inserimento del testo, consente di eliminare il carattere. premere durante l'inserimento dei numeri per immettere il simbolo "*".										
	# o spazi o		<b>NOTA:</b> Durante l'inserimento del testo, consente di immettere uno spazio. premere durante l'inserimento dei numeri per immettere il simbolo "#".										

## WAVE

WAVE™ (Wide Area Voice Environment) offre un nuovo modo per effettuare chiamate tra due radio.

Questa funzione supporta anche le chiamate tra radio e altri dispositivi con funzionalità WAVE. Tuttavia, per utilizzare questa funzione, è necessario configurare un canale WAVE.

Su un canale WAVE la radio non è in grado di ricevere chiamate da altri sistemi e può solo ricevere chiamate WAVE.

Se la radio si trova su un canale WAVE, attiva automaticamente il Wi-Fi e accede al server WAVE. Le chiamate WAVE vengono effettuate quando la radio è connessa a una rete IP tramite Wi-Fi.

### NOTA:

Questa funzione è disponibile solo per DM4601e.

### Tabella 1: Icone del display WAVE

Le seguenti icone vengono visualizzate temporaneamente sul display quando WAVE è attivato.

	<b>WAVE collegato</b> WAVE è collegato.
	<b>WAVE scollegato</b> WAVE è scollegato.

## Impostazione del canale WAVE attivo

I canali WAVE vengono configurati mediante CPS. Seguire la procedura per selezionare il canale WAVE desiderato.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare **Canali WAVE**. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare il canale WAVE desiderato. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **Attiva**.  
Premere  per effettuare la selezione.

Sul display viene visualizzato  accanto al canale selezionato.

## Visualizzazione delle informazioni sul canale WAVE

Seguire la procedura per visualizzare le informazioni sul canale WAVE.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Lista canali WAVE**. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Canali WAVE**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare il canale WAVE desiderato. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **Vis. dettagli**, Premere  per effettuare la selezione.

Sul display vengono visualizzati i dettagli dei canali WAVE.

## Visualizzazione delle informazioni sugli endpoint WAVE

Seguire la procedura per visualizzare le informazioni sugli endpoint WAVE.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Contatto**. Passare a [passaggio 3](#).
  - Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Endpoint.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare l'endpoint WAVE desiderato. Premere  per effettuare la selezione.

---

4 Premere  per selezionare Vis. dettagli.

---

Sul display vengono visualizzati i dettagli dell'endpoint WAVE.

## Modifica della configurazione WAVE

Seguire la procedura per impostare l'indirizzo IP del server WAVE, l'ID utente e la password.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare WAVE.  
Premere  per effettuare la selezione.

---

5 Premere  per selezionare Indirizzo server.  
Premere  per modificare l'indirizzo server.  
Premere  per effettuare la selezione.

---

6 Premere  fino a visualizzare ID utente.  
Premere  per modificare l'ID utente. Premere  per effettuare la selezione.

---

7 Premere  fino a visualizzare Password.  
Premere  visualizzare o modificare la password WAVE. Premere  per effettuare la selezione.

---

- 8 Premere  fino a visualizzare **Applica**. Premere  per applicare tutte le modifiche apportate.

Prima di tornare alla schermata **Impostazioni radio**, sul display viene visualizzata momentaneamente una mini notifica positiva.

## Effettuazione di chiamate di gruppo

Seguire la procedura per effettuare chiamate di gruppo su un canale WAVE.

- 1 Selezionare il canale WAVE con l'alias o l'ID del gruppo desiderato.
- 2 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED verde si accende. Sulla prima riga di testo vengono visualizzati l'icona **Chiam. gruppo** e l'alias. Sulla seconda riga di testo viene visualizzato l'alias del gruppo WAVE.
- 3 Eseguire una delle seguenti operazioni:
  - Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato
- 4 Rilasciare il pulsante **PTT** per ascoltare.  
Il LED verde si illumina quando la radio di destinazione risponde. Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'alias o l'ID e l'alias o l'ID della radio trasmittente.
- 5 Se la funzione **Indicazione canale libero** è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.  
La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

## Operazioni di Capacity Max

Capacity Max è un sistema radio trunking di controllo basato sui canali. Le funzioni disponibili per gli utenti della radio in questo sistema sono descritte in questo capitolo.

### Pulsante PTT (Push-To-Talk)

Il pulsante **PTT** serve a due scopi principali.

- Durante una chiamata, il pulsante **PTT** consente alla radio di trasmettere ad altre radio nell'ambito della chiamata. Il microfono viene attivato premendo il pulsante **PTT**.
- Se non è in corso alcuna chiamata, il pulsante **PTT** viene utilizzato per effettuare una nuova chiamata .

Tenere premuto il pulsante **PTT** per parlare. Rilasciare il pulsante **PTT** per ascoltare.

Se è attivato il tono che indica il permesso di parlare o il sidetone **PTT**, attendere la fine del breve tono di avviso prima di parlare.

Se sulla radio è abilitata la funzione Indicazione canale libero (programmata dal rivenditore), verrà emesso un breve tono di avviso quando l'utente della radio di destinazione (ovvero, quella che riceve la chiamata)

rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere.

Se la chiamata si interrompe, ad esempio quando la radio riceve una chiamata di emergenza, viene emesso un tono continuo di operazione non consentita. È necessario rilasciare il pulsante **PTT**.

### Tasto programmabile

A seconda della durata della pressione sul pulsante, il rivenditore può programmare i pulsanti programmabili come tasti di scelta rapida per le funzioni della radio.

#### Premere brevemente

Premere e rilasciare rapidamente il pulsante.

#### Premere a lungo

Tenere premuto il pulsante per un periodo di tempo programmato.

#### NOTA:

Vedere [Funzionamento in emergenza a pagina 445](#) per ulteriori informazioni sulla durata programmata del pulsante di **emergenza**.

## Funzioni della radio assegnabili

Le seguenti funzioni della radio possono essere assegnate ai tasti programmabili dal rivenditore o dall'amministratore di sistema.

### **Ambiente audio**

Consente all'utente di selezionare l'ambiente d'uso della radio.

### **Profili audio**

Consente all'utente di selezionare il profilo audio preferito.

### **Comm. audio Bluetooth®**

Consente di alternare l'instradamento audio tra l'altoparlante interno della radio e l'accessorio Bluetooth esterno.

### **Connessione Bluetooth**

Consente di avviare un'operazione di ricerca e connessione Bluetooth.

### **Disconnessione Bluetooth**

Consente di terminare tutte le connessioni Bluetooth esistenti tra la radio e i dispositivi Bluetooth.

### **Rilevamento Bluetooth**

Consente alla radio di accedere alla modalità di rilevamento Bluetooth.

### **Contatti**

Consente di accedere direttamente alla lista dei contatti.

### **Call Alert**

Consente di accedere direttamente alla lista dei contatti, che permette di selezionare il destinatario di un avviso di chiamata.

### **Registro chiamate**

Consente di selezionare la lista del registro chiamate.

### **Emergenza**

In base alla programmazione, consente di attivare o annullare un segnale di emergenza.

### **PA esterno**

Consente di alternare l'instradamento dell'audio tra l'amplificatore dell'altoparlante PA collegato e il sistema PA interno della radio.

### **Reimposta canale principale**

Consente di impostare un nuovo canale principale.

### **Silenza promemoria canale principale**

Consente di disattivare l'audio del promemoria del canale principale.

**Posiz. interna**

Consente di attivare e disattivare la funzione Posizione interna.

**Audio intelligente**

Consente di attivare o disattivare l'audio intelligente.

**Manual Dial**

Consente di avviare una chiamata privata immettendo l'ID dell'utente.

**Roaming siti manuale**

Consente di avviare la ricerca manuale del sito.

**AGC mic**

Consente di attivare o disattivare il controllo automatico del guadagno (AGC) del microfono interno.

**Notifiche**

Consente di accedere direttamente alla lista delle notifiche.

**Accesso rapido**

Consente di avviare direttamente una chiamata broadcast, privata, telefonica o di gruppo predefinita, un avviso di chiamata o un messaggio di testo rapido predefiniti.

**Funzione Option Board**

Consente di attivare o disattivare le funzioni Option Board dei canali abilitati per la Option Board.

**Telefono**

Consente di accedere direttamente alla lista dei contatti telefonici.

**Privacy**

Consente di attivare o disattivare la privacy.

**PA (Public Address)**

Consente di attivare o disattivare il sistema PA interno della radio.

**ID e alias della radio**

Fornisce l'ID e l'alias della radio.

**Monitoraggio remoto**

Consente di accendere il microfono di una radio di destinazione senza fornire alcuna indicazione.

**Info sito**

Consente di visualizzare l'ID e il nome sito di Capacity Max corrente.

Riproduce i messaggi vocali di annuncio per il sito corrente quando la funzione di annuncio vocale è attivata.

**Blocco sito**

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

### **Controllo telemetria**

Consente di controllare il pin di output in una radio locale o remota.

### **Messaggio di testo**

Consente di selezionare il menu dei messaggi di testo.

### **Ottimizzazione trillo**

Consente di attivare o disattivare la funzione di ottimizzazione del trillo.

### **Annuncio vocale attivo/disattivo**

Consente di attivare o disattivare gli annunci vocali.

### **Annuncio vocale per canale**

Consente di riprodurre messaggi vocali di annuncio di zone e canali per il canale corrente. Questa funzione non è disponibile se la funzione Annuncio vocale è disattivata.

### **Wi-Fi**

Consente di attivare o disattivare la funzionalità Wi-Fi.

### **Selezione zona**

Consente di effettuare una selezione da una lista di zone.

## **Funzioni di utilità o impostazioni assegnabili**

Le seguenti impostazioni o funzioni di utilità della radio possono essere assegnate ai pulsanti programmabili.

### **Tones/Alerts**

Consente di attivare o disattivare tutti i toni e gli avvisi.

### **Retroilluminazione**

Consente di attivare o disattivare la retroilluminazione.

### **Canale su/giù**

In base alla programmazione, consente di passare al canale precedente o successivo.

### **Modalità display**

Consente di attivare o disattivare la modalità di visualizzazione Giorno/notte.

### **Livello potenza**

Consente di aumentare o ridurre la potenza di trasmissione.

# Accesso alle funzioni programmate

Seguire la procedura per accedere alle funzioni programmate sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare la funzione di menu, quindi premere  per selezionare una funzione o accedere a un sottomenu.
- 
- 3 Eseguire una delle seguenti operazioni:
    - Premere  per tornare alla schermata precedente.
    - Premere a lungo  per tornare alla schermata principale.

Dopo un periodo di inattività, la radio esce automaticamente dal menu e torna alla schermata principale.

I tasti di navigazione del menu sono disponibili anche sul microfono della tastiera. Vedere la [Pulsanti sul microfono della tastiera a pagina 44](#).

## Indicatori di stato

Questo capitolo descrive gli indicatori di stato e i toni audio utilizzati nella radio.

## Icone

Sul display a cristalli liquidi (LCD) della radio vengono visualizzati lo stato della radio, le voci di testo e quelle dei menu.

### Tabella 2: Icone del display

Sulla barra di stato, situata nella parte superiore del display della radio, vengono visualizzate le icone riportate di

seguito. Le icone sono presentate in ordine di apparizione da sinistra a destra e sono specifiche per canale.

	<p><b>Bluetooth collegato</b></p> <p>La funzione Bluetooth è abilitata. L'icona resta accesa quando è collegato un dispositivo Bluetooth remoto.</p>
	<p><b>Bluetooth non collegato</b></p> <p>La funzione Bluetooth è attivata, ma non è collegato alcun dispositivo Bluetooth remoto.</p>
	<p><b>Emergenza</b></p> <p>La radio è in modalità di emergenza.</p>
	<p><b>GNSS disponibile</b></p> <p>La funzione GNSS è attivata. L'icona rimane accesa quando è possibile effettuare il fix della posizione.</p>
	<p><b>GNSS non disponibile</b></p> <p>La funzione GNSS è attivata, ma la radio non riceve dati dal satellite.</p>

*Continuazione tabella...*

	<p><b>Volume di dati elevato</b></p> <p>La radio riceve un volume elevato di dati e il canale risulta occupato.</p>
	<p><b>Posizione interna disponibile<sup>1</sup></b></p> <p>Lo stato della posizione interna è attivata e disponibile.</p>
	<p><b>Posizione interna non disponibile<sup>1</sup></b></p> <p>Lo stato della posizione interna è "attivata ma non è disponibile" perché il Bluetooth è disattivato o la scansione beacon è sospesa dal Bluetooth.</p>
	<p><b>Modalità Disattiva audio</b></p> <p>La Modalità audio disattivato è attivata e l'altoparlante è disattivato.</p>
	<p><b>Notifica</b></p> <p>Nella lista delle notifiche sono inclusi gli eventi senza risposta.</p>

*Continuazione tabella...*

<sup>1</sup> Disponibile solo per i modelli con l'ultima versione software e hardware.

	<b>Scheda opzionale</b> La Option Board è abilitata. (Solo modelli con la scheda opzionale)
	<b>Option Board non funzionante</b> La Option Board è disabilitata.
	<b>Timer ritardo programmazione Over-the-Air</b> Indica il tempo restante prima del riavvio automatico della radio.
	<b>Priorità 1</b> Indica il talkgroup con priorità 1.
	<b>Priorità 2</b> Indica il talkgroup con priorità 2.
	<b>RSSI (Received Signal Strength Indicator)</b> Il numero di barre visualizzato rappresenta la potenza del segnale radio. Quattro barre indicano il segnale più potente. L'icona viene visualizzata solo durante la ricezione.

Continuazione tabella...

	<b>Inibizione risp.</b> L'inibizione risposta è attivata.
	<b>Solo suoneria</b> È attivata la modalità della suoneria.
	<b>Sicuro</b> La funzione Privacy è attiva.
	<b>Suoneria silenziosa</b> È attivata la modalità della suoneria silenziosa.
	<b>Roaming tra i siti</b> La funzione Roaming è abilitata.
	<b>Stato</b> Indica un nuovo messaggio di stato.
	<b>Toni disattivati</b> I toni sono disabilitati.
	<b>Protezione disabilitata</b> La funzione Privacy non è attiva.

Continuazione tabella...

	<b>Wi-Fi eccellente<sup>2</sup></b> Il segnale Wi-Fi è eccellente.
	<b>Wi-Fi buono<sup>2</sup></b> Il segnale Wi-Fi è buono.
	<b>Wi-Fi medio<sup>2</sup></b> Il segnale Wi-Fi è nella media.
	<b>Wi-Fi scarso<sup>2</sup></b> Il segnale Wi-Fi è scarso.
	<b>Wi-Fi non disponibile<sup>2</sup></b> Il segnale Wi-Fi è disponibile.

**Tabella 3: Icone di menu avanzate**

Le icone riportate di seguito vengono visualizzate accanto alle voci di menu che permettono la selezione tra due opzioni o per indicare l'esistenza di un sottomenu con due opzioni.

<sup>2</sup> Disponibile solo per DM4601e.

	<b>Casella di controllo (selezionata)</b> Indica che l'opzione è selezionata.
	<b>Casella di controllo (vuota)</b> Indica che l'opzione non è selezionata.
	<b>Casella nera</b> Indica l'opzione selezionata per la voce di menu con un sottomenu.

**Tabella 4: Icone del dispositivo Bluetooth**

Le icone riportate di seguito vengono visualizzate accanto alle voci dei dispositivi Bluetooth disponibili, indicandone il tipo.

	<b>Dispositivo audio Bluetooth</b> Dispositivo audio Bluetooth, ad esempio una cuffia.
	<b>Dispositivo dati Bluetooth</b> Dispositivo dati Bluetooth, ad esempio uno scanner.

*Continuazione tabella...*

### Dispositivo PTT Bluetooth

Dispositivo PTT Bluetooth, ad esempio un dispositivo POD (solo PTT).

### Chiamata di gruppo/generale

Indica che è in corso una chiamata di gruppo o generale.

Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del gruppo.

### Chiamata privata

Indica che la radio è impegnata in una chiamata privata.

Nella lista Contatti, indica l'alias (nome) o l'ID (numero) dell'utente.

### Chiamata telefonica come chiamata di gruppo/generale

Indica che è in corso una chiamata telefonica come chiamata di gruppo o generale.

Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del gruppo.

### Chiamata telefonica come chiamata privata

Indica che è in corso una chiamata telefonica come chiamata privata.

## Tabella 5: Icone di chiamata

Le icone riportate di seguito vengono visualizzate sul display durante una chiamata. Vengono visualizzate anche nella lista Contatti per indicare il tipo di alias o ID.

### Chiamata PC Bluetooth

Indica che è in corso una chiamata PC Bluetooth.

Nella lista Contatti, indica l'ID (numero) o l'alias (nome) di una chiamata PC Bluetooth.

### Chiamata dispatch

Il tipo di contatto Chiamata dispatch serve a inviare un messaggio di testo a un PC dispatcher tramite un server di messaggistica di terze parti.

*Continuazione tabella...*

Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del telefono.

### Tabella 6: Icone Job Ticket

Le seguenti icone vengono visualizzate temporaneamente sul display nella cartella Job Ticket.

	<b>Tutti i job</b> Indica tutti i job in elenco.
	<b>Nuovi job</b> Indica i nuovi job.
	<b>In corso</b> È in corso la trasmissione dei processi. Questa icona viene visualizzata prima dell'indicazione di invio Job Ticket non riuscito o riuscito.
	<b>Non inviato</b> Non è possibile inviare i processi.

Continuazione tabella...

	<b>Inviato</b> I processi sono stati inviati correttamente.
	<b>Priorità 1</b> Indica il livello di priorità 1 per i processi.
	<b>Priorità 2</b> Indica il livello di priorità 2 per i processi.
	<b>Priorità 3</b> Indica il livello di priorità 3 per i processi.

### Tabella 7: Mini icone di notifica

Le icone riportate di seguito vengono visualizzate temporaneamente sul display dopo aver effettuato un'operazione per lo svolgimento di un'attività.

	<b>Trasmissione non riuscita (negativo)</b> L'azione effettuata ha avuto esito negativo.
---	---

Continuazione tabella...

	<p><b>Trasmissione riuscita (positivo)</b> L'azione effettuata ha avuto esito positivo.</p>
	<p><b>Trasmissione in corso (transitorio)</b> La radio sta trasmettendo. Viene visualizzata prima dell'indicazione di trasmissione riuscita o non riuscita.</p>

**Tabella 8: Icone della cartella Msg inviati**

Le seguenti icone compaiono nell'angolo in alto a destra del display nella cartella Msg inviati.

 	<p><b>In corso</b> Il messaggio di testo per un alias o un ID dell'utente è in attesa di essere trasmesso e di successiva conferma di ricezione.</p> <p>Il messaggio di testo per un alias o un ID del gruppo è in attesa di essere trasmesso.</p>
--	--

*Continuazione tabella...*

 	<p><b>Message singolo o di gruppo letto</b> Il messaggio di testo è stato letto.</p>
 	<p><b>Message singolo o di gruppo non letto</b> Il messaggio di testo non è stato letto.</p>
 	<p><b>Non inviato</b> Il messaggio di testo non può essere inviato.</p>
 	<p><b>Inviato</b> Il messaggio di testo è stato inviato.</p>

## Indicatore LED

L'indicatore LED segnala lo stato operativo della radio.

### **Rosso lampeggiante**

La radio non ha superato il test di autodiagnostica all'accensione,

La radio sta ricevendo una trasmissione di emergenza.

La radio trasmette con la batteria in esaurimento.

La radio si trova al di fuori della portata del segnale, se è configurato il sistema transponder per il rilevamento automatico della portata.

È attivata la Modalità Muto.

### **Verde fisso**

La radio si sta accendendo.

La radio sta trasmettendo.

La radio sta inviando un avviso chiamata o una trasmissione di emergenza.

### **Verde lampeggiante**

La radio sta ricevendo una chiamata o dati.

La radio sta recuperando trasmissioni con programmazione Over-the-Air.

La radio sta rilevando attività Over-the-Air.

### **NOTA:**

Questa attività può o meno influire sul canale programmato della radio a causa della natura del protocollo digitale.

### **Verde con doppio lampeggio**

La radio sta ricevendo dati o una chiamata con funzione Privacy attivata.

### **Giallo fisso**

La radio si trova in modalità Rilevamento Bluetooth.

### **Giallo lampeggiante**

La radio non ha ancora risposto a un avviso di chiamata.

### **Giallo con doppio lampeggio**

Sulla radio è attivato il roaming automatico.

La radio esegue la ricerca attiva di un nuovo sito.

La radio non ha ancora risposto a un avviso di chiamata di gruppo.

La radio è bloccata.

## **Tones**

Di seguito sono elencati i toni riprodotti dall'altoparlante della radio.

Tono alto

Tono basso

## Toni audio

I toni audio segnalano acusticamente lo stato della radio o la risposta ai dati ricevuti.

### Tono continuo

Viene emesso un singolo tono, che continua fino al termine della trasmissione.

### Tono periodico

Viene emesso un tono intervallato, a seconda della durata impostata dalla radio. Il tono inizia, finisce e quindi si ripete.

### Tono ripetitivo

Viene emesso un singolo tono, che si ripete finché non viene annullato dall'utente.

### Tono momentaneo

Viene emesso un singolo tono per un breve durata impostata dalla radio.

## Toni indicatori

I toni indicatori segnalano acusticamente lo stato dopo aver effettuato un'operazione per eseguire un'attività.

Tono indicatore positivo

Tono indicatore negativo

## Registrazione

L'utente può ricevere diversi messaggi relativi alla registrazione.

### Registrazione

In genere, la registrazione viene inviata al sistema durante l'accensione, la modifica di un talkgroup o il roaming del sito. Se non completa la registrazione in un sito, la radio tenta automaticamente di eseguire il roaming in un altro

sito. La radio rimuove temporaneamente il sito in cui ha tentato la registrazione dall'elenco di roaming.

L'indicazione significa che la radio è occupata nella ricerca di un sito al quale eseguire il roaming o che ha trovato un sito, ma è in attesa di risposta ai messaggi di registrazione dalla radio.

Quando sulla radio viene visualizzato il messaggio **Registrazione**, viene emesso un tono e il LED giallo lampeggia due volte per indicare la ricerca del sito.

Se le indicazioni persistono, l'utente deve modificare le posizioni o, se consentito, eseguire il roaming manuale a un altro sito.

### **Fuori campo**

Una radio è da considerarsi fuori campo quando non è in grado di rilevare un segnale dal sistema o dal sito corrente. In genere, questa indicazione significa che la radio si trova fuori dalla copertura RF (frequenza radio) nell'area geografica.

Quando sulla radio viene visualizzato il messaggio **Fuori campo**, viene emesso un tono ripetitivo e il LED rosso lampeggia.

Contattare il rivenditore o l'amministratore di sistema se la radio continua a ricevere indicazioni di fuori campo mentre si trova in una zona con una buona copertura RF.

### **Affiliazione al talkgroup non riuscita**

Una radio tenta di affiliarsi al talkgroup specificato nei canali o nella chiamata UKP (Unified Knob Position) durante la registrazione.

Una radio che non è riuscita ad affiliarsi non è in grado di effettuare o ricevere chiamate dal talkgroup al quale sta tentando di affiliarsi.

Quando una radio non riesce ad affiliarsi a un talkgroup, nella schermata principale viene visualizzato **Alias UKP** con uno sfondo evidenziato.

Contattare il rivenditore o l'amministratore di sistema se la radio riceve indicazioni di affiliazioni non riuscite.

### **Registrazione rifiutata**

Quando la registrazione con il sistema non viene accettata, si ricevono indicatori di registrazione rifiutata.

La radio non indica al relativo utente il motivo specifico per il quale la registrazione è stata rifiutata. Generalmente, una

registrazione viene rifiutata se l'operatore del sistema ha disattivato l'accesso della radio al sistema.

Quando la registrazione viene rifiutata per una radio, sulla radio viene visualizzato il messaggio Registr. negata e il LED giallo lampeggia due volte per indicare la ricerca del sito.

## Selezioni di canale e zona

Questo capitolo descrive le operazioni per selezionare una zona o un canale sulla radio.

È possibile programmare la radio con un massimo di 250 zone Capacity Max e un massimo di 160 canali per zona. Ogni zona Capacity Max può contenere fino a 16 posizioni assegnabili.

### Selezione delle zone

Seguire la procedura per selezionare la zona richiesta sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Selezione zona**. Continuare con [passaggio 3](#).

- Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Zona.

Premere  per effettuare la selezione.

Sul display vengono visualizzati ✓ e la zona corrente.

- 3 Premere  o  fino a visualizzare la zona

desiderata. Premere  per effettuare la selezione.

Sul display viene visualizzato <Zona> Selezionata per pochi secondi, quindi compare di nuovo la schermata della zona selezionata.

### Selezione delle zone utilizzando la ricerca per alias

Seguire la procedura per selezionare la zona richiesta sulla radio utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Zona.  
Premere  per effettuare la selezione.  
Il display mostra  e la zona corrente.

---

- 3 Digitare il primo carattere dell'alias desiderato.  
Sul display viene visualizzato un cursore lampeggiante.

---

- 4 Inserire il resto dei caratteri dell'alias desiderato.  
la ricerca dell'alias non fa distinzione tra maiuscole e minuscole. Se due o più voci hanno lo stesso nome, il display visualizza la voce elencata per prima nella lista.  
La prima riga di testo visualizza i caratteri immessi.  
Le righe di testo successive mostrano i risultati della ricerca abbreviati.

---

- 5 Premere  per effettuare la selezione.

Sul display viene visualizzato <Zona> Selected (<Zona> selezionata) per pochi secondi, quindi compare di nuovo la schermata della zona selezionata.

---

## Selezione di un tipo di chiamata

Il selettore di canale viene utilizzato per selezionare un tipo di chiamata. A seconda di come è stata programmata la radio, può trattarsi di una chiamata di gruppo, una chiamata broadcast, una chiamata generale o una chiamata privata. Se si sposta il selettore di canale su un'altra posizione (a cui è stato assegnato un tipo di chiamata), la radio si registra nuovamente nel sistema Capacity Max. La radio si registra con l'ID del talkgroup programmato per la nuova posizione del selettore di canale il nuovo tipo di chiamata.

Poiché la radio non funziona se è selezionato un canale non programmato, utilizzare il selettore di canale per selezionare un canale programmato.

Quando la zona desiderata viene visualizzata (se si dispone di più zone della radio), ruotare il selettore di

canale programmato per selezionare il tipo di chiamata.

---

## Selezione di un sito

Un sito fornisce la copertura per un'area specifica. In una rete multisito, la radio Capacity Max cerca automaticamente un altro sito quando la qualità del segnale del sito corrente scende al di sotto di un livello accettabile.

Il sistema Capacity Max può supportare fino a 250 siti.

## Richiesta roaming

Una richiesta di roaming indica alla radio di cercare un altro sito, anche se la qualità del segnale nel sito corrente è accettabile.

Se non sono presenti siti disponibili:

- La radio mostra sul display *Ricerca* e continua a cercare nell'elenco dei siti.
- La radio torna al sito precedente, se è ancora disponibile.

### NOTA:

questa funzione viene programmata dal rivenditore.

Premere il pulsante programmato **Roaming siti manuale**.

Viene emesso un tono che indica che la radio è passata a un altro sito. Sul display viene visualizzato `ID sito <numero sito>`.

---

## Blocco sito on/off

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

Premere il pulsante programmato **Blocco sito**.

Se la funzione **Blocco sito** è attivata:

- Viene emesso un tono indicatore positivo, che indica che la radio è stata bloccata nel sito corrente.
- Sul display compare `Sito bloccato`.

Se la funzione **Blocco sito** è disattivata:

- Viene emesso un tono indicatore negativo, che indica che la radio è stata sbloccata.
  - Sul display compare `Sito sbloccato`.
- 

## Siti vietati

Nel sistema Capacity Max, l'amministratore della radio può decidere quali siti della rete una radio è autorizzata o non è autorizzata a utilizzare.

Non è necessario riprogrammare la radio per modificare l'elenco dei siti ammessi e non ammessi. Se la radio tenta di registrarsi a un sito non ammesso, riceve un'indicazione che il sito non è ammesso. La radio inizia a cercare un altro sito della rete.

In presenza di restrizioni dei siti, sulla radio viene visualizzato `Registr. negata` e il LED giallo lampeggia due volte per indicare una ricerca del sito.

## Trunking sito

Per essere considerato un sito di trunking del sistema, un sito deve essere in grado di comunicare con il controller di trunking.

Se il sito non è in grado di comunicare con il controller di trunking, una radio entra in modalità Trunking sito. In modalità Trunking sito, la radio non fornisce periodicamente un'indicazione acustica e visiva all'utente per informarlo della funzionalità limitata.

Quando la radio è in modalità Trunking sito, viene visualizzato il messaggio `Trunking sito` e viene emesso un tono ripetitivo.

Le radio in modalità Trunking sito sono ancora in grado di effettuare chiamate vocali di gruppo e individuali, nonché di inviare messaggi di testo ad altre radio all'interno dello stesso sito. Console di fonìa, registratori, gateway telefono e applicazioni dati non possono comunicare con le radio nel sito.

Una volta attivata la modalità Trunking sito, una radio coinvolta in chiamate su diversi siti potrà solo comunicare con le altre radio nello stesso sito. Le comunicazioni verso e da altri siti vengono interrotte.

### NOTA:

Se sono presenti più siti che coprono la posizione corrente della radio e uno dei siti entra in modalità Trunking sito, le radio eseguono il roaming a un altro sito nel raggio di copertura.

# Chiamate

Questo capitolo descrive le operazioni per ricevere, rispondere, effettuare e interrompere le chiamate.

È possibile selezionare un ID o un alias dell'utente o del gruppo dopo aver selezionato un canale mediante una di queste funzioni:

## Ricerca per alias

Questo metodo viene utilizzato esclusivamente per le chiamate di gruppo, private e generali con un microfono con tastiera.

## Elenco Contatti

Questo metodo consente di accedere direttamente alla lista Contatti.

## Comp. man. (tramite Contatti)

Questo metodo viene utilizzato solo per le chiamate private e telefoniche con un microfono con tastiera.

## Tasti numerici programmati

Questo metodo viene utilizzato esclusivamente per le chiamate di gruppo, private e generali con un microfono con tastiera.

### NOTA:

È possibile assegnare solo un alias o un ID a un tasto numerico, ma è possibile associare più tasti numerici a un alias o un ID. Tutti i tasti numerici sul microfono con tastiera possono essere assegnati. Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Pulsante di accesso rapido programmato

Questo metodo viene utilizzato solo per le chiamate di gruppo, private e telefoniche.

È possibile assegnare un solo ID a un pulsante di **accesso rapido** con una pressione breve o prolungata di un pulsante programmabile. Sulla radio è possibile programmare più pulsanti di **accesso rapido**.

## Pulsante programmabile

Questo metodo è utilizzato solo per le chiamate telefoniche.

## Manopola del selettore di canale/volume

Questo metodo consente di selezionare manualmente un ID o alias dell'utente o un ID o alias del gruppo.

Il LED diventa verde fisso durante la trasmissione e lampeggia in verde durante la ricezione.

**NOTA:**

il LED diventa verde fisso durante la trasmissione, mentre il doppio lampeggio indica la ricezione di una chiamata con funzione Privacy attivata.

Per decodificare una chiamata con funzione Privacy attivata, la radio deve avere la stessa chiave di privacy o lo stesso valore e ID della chiave (programmati dal rivenditore) della radio trasmittente (la radio dalla quale si riceve la chiamata).

Per ulteriori informazioni, vedere [Privacy a pagina 486](#).

## Chiamate di gruppo

La radio deve essere configurata come parte di un gruppo per ricevere o effettuare una chiamata al gruppo di utenti.

### Effettuazione di chiamate di gruppo

Per effettuare una chiamata a un gruppo di utenti, la radio deve essere configurata come appartenente a quel gruppo. Seguire la procedura per effettuare chiamate di gruppo sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Selezionare un canale con l'alias o l'ID del gruppo attivo. Vedere la [Selezione di un tipo di chiamata a pagina 66](#).
  - Premere il pulsante di **accesso rapido** programmato.

---
- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sulla prima riga di testo sono visualizzati l'icona **Chiam. gruppo** e l'alias.
 

---
- 3 Eseguire una delle seguenti operazioni:
  - Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

---
- 4 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde si illumina quando la radio di destinazione risponde. Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'alias o l'ID e l'alias o l'ID della radio trasmittente.
 

---

- 5 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

L'utente che avvia la chiamata può premere  per terminare una chiamata di gruppo.

## Effettuazione di chiamate di gruppo dalla lista Contatti

Seguire la procedura per effettuare chiamate di gruppo sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare `Contatti`.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

- 4 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Nella prima riga viene visualizzato l'alias o l'ID dell'utente. Sulla seconda riga viene visualizzato `Chiam. gruppo` con l'icona **Chiam. gruppo**.

- 5 Eseguire una delle seguenti operazioni:
- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

- 6 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde lampeggia quando un utente del gruppo risponde. Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'alias o l'ID e l'alias o l'ID della radio trasmittente.

- 7 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

L'utente che avvia la chiamata può premere  per terminare la chiamata di gruppo.

La radio emette un breve tono. Sul display viene visualizzato *Chiam. term.*

## Effettuazione di chiamate di gruppo utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate di gruppo sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende.

- 3 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde lampeggia quando un utente del gruppo risponde.

- 4 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

L'utente che avvia la chiamata può premere  per terminare la chiamata di gruppo.

Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Effettuazione di chiamate di gruppo utilizzando la ricerca per alias

È possibile trovare l'alias dell'utente desiderato anche eseguendo la ricerca alfanumerica o degli alias. Questa funzione è disponibile soltanto in Contatti. Seguire la procedura per effettuare le chiamate utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Contatti**.  
Premere  per effettuare la selezione.  
Il display mostra le voci in ordine alfabetico.

---

- 3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato. Sulla prima riga del display, viene visualizzato **Numero tel.:**. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Utilizzare la tastiera per immettere un numero telefonico.

---

- 4 Premere  per effettuare la selezione. Se la voce selezionata è vuota, viene emesso un tono indicatore negativo e sul display viene visualizzato **Chiamata telefonica non valida #**.

---

- 5 Premere  o  per effettuare una chiamata telefonica e Premere  per effettuare la selezione. Se il codice di accesso non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato **Codice accesso:**. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di accesso e premere il pulsante  per continuare. In caso di esito positivo, viene emesso il tono DTMF. Si sente quindi il tono di composizione dell'utente del telefono. Sulla prima riga del display vengono

visualizzati l'alias o l'ID dell'utente e l'icona RSSI. Sulla seconda riga compaiono *Chiamata tel.* e l'icona della chiamata telefonica. In caso di esito negativo, viene emesso un tono e sul display viene visualizzata l'opzione *Chiam tel fallita*. La radio ritorna alla schermata di immissione del codice di accesso. Se il codice di accesso è stato preconfigurato nella lista *Contatti*, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

---

6 Premere il pulsante **PTT** per parlare e rilasciarlo per ascoltare. L'icona **RSSI** non viene visualizzata durante la trasmissione.

---

7 Per immettere altri numeri, se richiesto dalla chiamata, effettuare una delle seguenti operazioni:

- Premere qualsiasi tasto della tastiera per immettere gli altri numeri. Sulla prima riga del display, viene visualizzato *Cifre supp.:*. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere le cifre aggiuntive e premere il pulsante  per continuare. Viene emesso il tono DTMF e la radio ritorna alla schermata precedente.

- Premere il pulsante **Accesso rapido**. Viene emesso il tono DTMF. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

---

8 Premere  per terminare la chiamata. Se il codice di disconnessione non è stato preconfigurato nella lista *Contatti*, sulla prima riga del display viene visualizzato *Codice disconnesi:*. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di disconnessione e premere  per continuare. La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzata l'opzione *Fine chiam. tel.* In caso di esito positivo viene emesso un tono e sul display viene visualizzata l'opzione *Chiam. tel. finita*. La radio ritorna alla schermata della chiamata telefonica. In caso di esito negativo, la radio ritorna alla schermata della chiamata telefonica. Se si preme il pulsante **PTT** nella schermata *Contatti del telefono*, viene emesso un tono e sul display viene visualizzata l'opzione *OK per inviare chiam.* Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione *Chiam. tel. finita*. Se la

chiamata termina mentre si stanno digitando le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

- 9 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato Chiam. term.

L'utente che avvia la chiamata può premere  per terminare la chiamata di gruppo.

#### NOTA:

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata (viene emesso un tono) o per uscire dalla ricerca dell'alias. Premere il pulsante  o  per uscire dalla ricerca dell'alias. Durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata. Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/disconnessione, la radio risponde solamente al pulsante On/Off, alla manopola del volume e alla leva canali. Per ogni immissione non valida viene emesso un tono.

## Risposta alle chiamate di gruppo

Seguire la procedura per rispondere alle chiamate di gruppo sulla radio.

Quando si riceve una chiamata di gruppo:

- Il LED verde lampeggia.
- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. gruppo**.

- La prima riga di testo visualizza l'alias del chiamante.
- La seconda riga di testo visualizza l'alias della chiamata di gruppo.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

**1** Eseguire una delle seguenti operazioni:

- Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.
- Se la funzione Interruzione voce è abilitata, premere il pulsante **PTT** per interrompere l'audio della radio trasmittente e liberare il canale per rispondere.

Il LED verde si accende.

---

**2** Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

- Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

---

**3** Rilasciare il pulsante **PTT** per ascoltare.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

---

## Chiamata broadcast

Una chiamata broadcast è una chiamata vocale monodirezionale effettuata da un utente qualsiasi a un intero talkgroup.

La funzione Chiamata broadcast consente solo all'utente che avvia la chiamata di trasmettere al talkgroup, mentre i destinatari della chiamata non possono rispondere.

L'utente che avvia la chiamata broadcast può anche terminare la chiamata broadcast. Per ricevere una chiamata da un gruppo di utenti o per chiamare un gruppo di utenti, è necessario configurare la radio come parte di un gruppo.

## Esecuzione di chiamate broadcast

Seguire la procedura per effettuare chiamate broadcast sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Selezionare un canale con l'alias o l'ID del gruppo attivo. Vedere [Selezione di un tipo di chiamata a pagina 66](#).
  - Premere il pulsante di **accesso rapido** programmato.

- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'alias.

- 3 Eseguire una delle seguenti operazioni:
  - Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

L'utente che avvia la chiamata può premere  per terminare la chiamata broadcast.

## Esecuzione di chiamate broadcast dalla lista Contatti

Seguire la procedura per effettuare chiamate broadcast sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.
- 
- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- 
- 4 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde lampeggia. Nella prima riga viene visualizzato l'alias o l'ID dell'utente. Sulla seconda riga viene visualizzato Chiam. gruppo con l'icona **Chiam. gruppo**.
- 
- 5 Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
- Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

L'utente che avvia la chiamata può premere  per terminare la chiamata broadcast.

## Esecuzione di chiamate broadcast utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate broadcast sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. gruppo**. La prima riga di testo visualizza l'alias del chiamante.

- 3 Eseguire una delle seguenti operazioni:
  - Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

L'utente che avvia la chiamata può premere  per terminare la chiamata broadcast.

## Ricezione di chiamate broadcast

Seguire la procedura per ricevere una chiamata broadcast sulla radio.

Alla ricezione di una chiamata broadcast:

- Il LED verde lampeggia.
- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. gruppo**.
- La prima riga di testo visualizza l'alias del chiamante.
- La seconda riga di testo visualizza l'alias della chiamata di gruppo.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

**NOTA:**

I destinatari non possano trasmettere durante una chiamata broadcast. Sul display viene visualizzato `Talkback non autorizz.` Temporaneamente viene emesso il tono di talkback non autorizzato se si preme il pulsante **PTT** durante una chiamata broadcast.

## Chiamata privata

Per chiamata privata si intende una chiamata da una singola radio a un'altra.

Esistono due modi per impostare una chiamata privata.

- Il primo tipo si chiama OACSU (Off Air Call Set-Up). Il tipo OACSU imposta la chiamata dopo aver eseguito un

controllo della disponibilità della radio e completa la chiamata automaticamente.

- Il secondo tipo si chiama FOACSU (Full Off Air Call Set-Up). Anche il tipo FOACSU imposta la chiamata dopo aver eseguito un controllo della disponibilità della radio. Tuttavia, le chiamate FOACSU richiedono che l'utente confermi il completamento della chiamata e consentono all'utente di accettare o rifiutare la chiamata.

Il tipo di chiamata viene configurato dall'amministratore di sistema.

**NOTA:**

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

## Effettuazione di chiamate private

La radio deve essere stata programmata per eseguire una chiamata privata. Se questa funzione non è attivata, viene emesso un tono indicatore negativo quando si effettua la chiamata. Seguire la procedura per effettuare chiamate private sulla radio. Se la radio di destinazione non è

disponibile, viene emesso un breve tono e sul display viene visualizzato `Utente non disponib..`

- 1 Eseguire una delle seguenti operazioni:
  - Selezionare un canale con l'ID o l'alias dell'utente attivo. Vedere la [Selezione di un tipo di chiamata a pagina 66](#).
  - Premere il pulsante di **accesso rapido** programmato.

- 
- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display vengono visualizzati l'icona **Chiam. privata**, l'alias dell'utente e lo stato della chiamata.

- 
- 3 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

- 
- 4 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde si illumina quando la radio di destinazione risponde.
- 

- 5 La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio emette un breve tono. Sul display viene visualizzato `Chiam. term.`

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

---

## Effettuazione di chiamate private utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate private sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

- 2 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED verde si accende. Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. privata**. La prima riga di testo visualizza l'alias del chiamante. Nella seconda riga di testo è visualizzato lo stato della chiamata.

- 3 Rilasciare il pulsante **PTT** per ascoltare.  
Il LED verde lampeggia quando la radio di destinazione risponde. Sul display, viene visualizzato l'alias di destinazione.

- 4 La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio emette un breve tono. Sul display viene visualizzato **Chiam. term.**

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Effettuazione di chiamate private utilizzando la ricerca per alias

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare **Contatti**.  
Premere  per effettuare la selezione.  
Il display mostra le voci in ordine alfabetico.
- 3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato. Sulla prima riga del display, viene visualizzato **Numero tel.:**. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Utilizzare la tastiera per immettere un numero telefonico.
- 4 Premere  per effettuare la selezione. Se la voce selezionata è vuota, viene emesso un tono

indicatore negativo e sul display viene visualizzato  
Chiamata telefonica non valida #.

---

- 5 Premere  o  per effettuare una chiamata telefonica e Premere  per effettuare la selezione. Se il codice di accesso non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato Codice accesso:. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di accesso e premere il pulsante  per continuare. In caso di esito positivo, viene emesso il tono DTMF. Si sente quindi il tono di composizione dell'utente del telefono. Sulla prima riga del display vengono visualizzati l'alias o l'ID dell'utente e l'icona **RSSI**. Sulla seconda riga del display vengono visualizzati Chiamata telefonica e l'icona **Chiamata telefonica**. In caso di esito negativo, viene emesso un tono e sul display viene visualizzata l'opzione Chiam tel fallita. La radio ritorna alla schermata di immissione del codice di accesso. Se il codice di accesso è stato preconfigurato nella lista Contatti, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.
- 

- 6 Premere il pulsante **PTT** per parlare e rilasciarlo per ascoltare. L'icona **RSSI** non viene visualizzata durante la trasmissione.
- 

- 7 Per immettere altri numeri, se richiesto dalla chiamata, effettuare una delle seguenti operazioni:
- Premere qualsiasi tasto della tastiera per immettere gli altri numeri. Sulla prima riga del display, viene visualizzato Cifre supp.:. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere le cifre aggiuntive e premere il pulsante  per continuare. Viene emesso il tono DTMF e la radio ritorna alla schermata precedente.
  - Premere il pulsante **Accesso rapido**. Viene emesso il tono DTMF. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.
- 

- 8 Premere  per terminare la chiamata. Se il codice di disconnessione non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato Codice disconnesi:. Sulla seconda riga, viene visualizzato un cursore lampeggiante.

Immettere il codice di disconnessione e premere  per continuare. La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzata l'opzione Fine chiam. tel. In caso di esito positivo viene emesso un tono e sul display viene visualizzata l'opzione Chiam. tel. finita. La radio ritorna alla schermata della chiamata telefonica. In caso di esito negativo, la radio ritorna alla schermata della chiamata telefonica. Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione OK per inviare chiam. Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione Chiam. tel. finita. Se la chiamata termina mentre si stanno immettendo le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

- 9 La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio emette un breve tono. Sul display viene visualizzato Chiam. term.

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

#### NOTA:

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata (viene emesso un tono) o per uscire dalla ricerca dell'alias. Premere il pulsante  o  per uscire dalla ricerca dell'alias. Durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata.

## Esecuzione di una chiamata privata con un pulsante di chiamata rapida

La funzione di chiamata rapida consente di effettuare velocemente una chiamata privata a un alias o ID privato predefinito. È possibile assegnare questa funzione a una pressione lunga o breve del tasto programmabile.

Al pulsante di chiamata rapida è possibile assegnare un solo alias o ID. Sulla radio è possibile programmare più pulsanti di chiamata rapida.

1 Premere il pulsante **Chiamata rapida** programmato per effettuare una chiamata privata all'alias o all'ID privato predefinito.

2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED diventa verde fisso. Sul display compare l'alias o l'ID della chiamata privata.

3 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

4 Rilasciare il pulsante **PTT** per ascoltare. Quando la radio di destinazione risponde, il LED verde inizia a lampeggiare. Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata.

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

## Effettuazione di chiamate private utilizzando la composizione manuale

Seguire la procedura per effettuare chiamate private sulla radio utilizzando la composizione manuale.

1 Premere  **OK** per accedere al menu.

2 Premere  o  fino a visualizzare **Contatti**. Premere  **OK** per effettuare la selezione.

3 Premere  o  fino a visualizzare **Comp. man.** Premere  **OK** per effettuare la selezione.

4 Premere  o  fino a visualizzare **Numero radio**. Premere  **OK** per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:
- Inserire l'ID dell'utente, quindi premere  per continuare.
  - Modificare l'ID dell'utente composto precedentemente, quindi premere  per continuare.

- 6 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display viene visualizzato l'alias della destinazione.

- 7 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

- 8 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde si illumina quando la radio di destinazione risponde. Sul display viene visualizzato l'ID o l'alias dell'utente che effettua la trasmissione.

- 9 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante

**PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato Chiam. term.

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

## Ricezione di chiamate private

Quando si ricevono chiamate private configurate come OACSU (Off Air Call Set-Up):

- Il LED verde lampeggia.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

**NOTA:**

A seconda della configurazione della radio, OACSU (Off Air Call Set-Up) o FOACSU (Full Off Air Call Set-Up), per rispondere alle chiamate private potrebbe o non potrebbe essere necessaria la conferma dell'utente.

Per la configurazione OACSU, la radio riattiva l'audio e la chiamata si connette automaticamente.

## Accettazione delle chiamate private

Quando si ricevono chiamate private configurate come FOACSU (Full Off Air Call Set-Up):

- Il LED verde lampeggia.
- 1 Per accettare una chiamata privata configurata come FOACSU (Full Off Air Call Set-Up), effettuare una delle seguenti operazioni:
    - Premere  o  fino a visualizzare  e premere  per rispondere a una chiamata privata.

- Premere il pulsante **PTT** su qualsiasi voce. Il LED verde si accende.

- 
- 2 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

- 
- 3 Rilasciare il pulsante **PTT** per ascoltare.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato Chiam. term.

**NOTA:**

Sia l'utente che avvia la chiamata sia il destinatario sono in grado di terminare una chiamata privata in corso premendo .

## Rifiuto delle chiamate private

Quando si ricevono chiamate private configurate come FOACSU (Full Off Air Call Set-Up):

- Il LED verde lampeggia.

Per rifiutare una chiamata privata configurata come FOACSU (Full Off Air Call Set-Up), effettuare una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Rifiuta** e premere  per rifiutare una chiamata privata.
- Premere  per rifiutare una chiamata privata.

## Chiamate generali

Una chiamata generale è una chiamata effettuata da una singola radio a tutte le radio del sito o a ogni radio in un gruppo di siti, in base alla configurazione del sistema.

Una chiamata generale viene utilizzata per effettuare annunci importanti, che richiedono la massima attenzione da parte dell'utente. Gli utenti del sistema non possono rispondere a una chiamata generale.

Capacity Max supporta le chiamate generali sito e le chiamate generali multisito. L'amministratore di sistema

può configurare uno o entrambi i tipi di chiamata nella radio.

### NOTA:

I terminali radio supportano le chiamate generali a livello di sistema, ma l'infrastruttura Motorola Solutions non supporta questo tipo di chiamate.

## Effettuazione di chiamate generali

La radio deve essere programmata per poter effettuare una chiamata generale. Seguire la procedura per effettuare chiamate generali sulla radio.

- 1 Selezionare un canale con l'alias o l'ID del gruppo di chiamata generale attivo. Vedere la [Selezione di un tipo di chiamata a pagina 66](#).
- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display vengono visualizzati l'icona **Chiam. gruppo** e Chiam. gen., Chiam. gen. sito o Chiam. multis. a seconda del tipo di configurazione.
- 3 Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
- Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

Gli utenti del canale non possono rispondere a una chiamata generale.

L'utente che avvia la chiamata può premere  per terminare la chiamata generale.

## Effettuazione di chiamate generali utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate generali sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato assegnato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata

quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

- 2 Premere il pulsante **PTT** per effettuare la chiamata.

Il LED verde si accende. Sul display vengono visualizzati l'icona **Chiam. gruppo** e Chiam. gen., Chiam. gen. sito o Chiam. multis. a seconda del tipo di configurazione.

- 3 Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
- Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

L'utente che avvia la chiamata può premere  per terminare la chiamata generale.

Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Effettuazione di chiamate generali utilizzando la ricerca per alias

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Contatti`.  
Premere  per effettuare la selezione.  
Il display mostra le voci in ordine alfabetico.

---

- 3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato. Sulla prima riga del display, viene visualizzato `Numero tel.:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Utilizzare la tastiera per immettere un numero telefonico.

---

- 4 Premere  per effettuare la selezione. Se la voce selezionata è vuota, viene emesso un tono indicatore negativo e sul display viene visualizzato `Chiamata telefonica non valida #`.

---

- 5 Premere  o  fino a visualizzare `Chiama tel.` Premere  per effettuare la selezione. Se il codice di accesso non è stato preconfigurato nella lista `Contatti`, sulla prima riga del display viene visualizzato `Codice accesso:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di accesso e premere il pulsante  per continuare. In caso di esito positivo, viene emesso il tono DTMF. Si sente quindi il tono di composizione dell'utente del telefono. Sulla prima riga del display vengono visualizzati l'alias o l'ID dell'utente e l'icona RSSI. Sulla seconda riga compaiono `Chiamata tel.` e l'icona della chiamata telefonica. In caso di esito negativo, viene emesso un tono e sul display viene visualizzata l'opzione `Chiam tel fallita`. La radio ritorna alla schermata di immissione del codice di accesso. Se il codice di accesso è stato preconfigurato nella lista `Contatti`, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

---

- 6 Premere il pulsante **PTT** per parlare e rilasciarlo per ascoltare. L'icona RSSI non viene visualizzata durante la trasmissione.

---

7 Per immettere altri numeri, se richiesto dalla chiamata, effettuare una delle seguenti operazioni:

- Premere qualsiasi tasto della tastiera per immettere gli altri numeri. Sulla prima riga del display, viene visualizzato `Cifre supp.:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere le cifre aggiuntive e premere il pulsante  per continuare. Viene emesso il tono DTMF e la radio ritorna alla schermata precedente.
- Premere il pulsante **Accesso rapido**. Viene emesso il tono DTMF. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

8 Premere  per terminare la chiamata. Se il codice di disconnessione non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato `Codice disconnes:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di disconnessione e premere  per continuare. La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzata l'opzione `Fine chiam.`

`tel.` In caso di esito positivo viene emesso un tono e sul display viene visualizzata l'opzione `Chiam. tel. finita`. La radio ritorna alla schermata della chiamata telefonica. In caso di esito negativo, la radio ritorna alla schermata della chiamata telefonica. Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione `OK per inviare chiam.` Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione `Chiam. tel. finita`. Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

#### NOTA:

L'utente che avvia la chiamata può premere  per terminare la chiamata generale.

## Ricezione di chiamate generali

Quando si riceve una chiamata generale, si verifica quanto segue:

- Viene emesso un tono.
- Il LED verde lampeggia.

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. gruppo**.
- Sulla prima riga di testo viene visualizzato l'ID o l'alias del chiamante.
- Sulla seconda riga di testo viene visualizzato Chiam. gen., Chiam. gen. sito o Chiam. multis. a seconda del tipo di configurazione.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

Al termine della chiamata la radio ritorna alla schermata visualizzata prima di ricevere la chiamata generale.

Se la funzione di indicazione canale libero è attivata, quando sulla radio trasmittente viene rilasciato il pulsante **PTT** verrà emesso un breve tono di avviso per indicare che il canale è libero per l'uso. Non si può rispondere a una chiamata generale.

#### **NOTA:**

Se si cambia canale durante la ricezione, la chiamata generale viene terminata dalla radio. Non è possibile continuare con la navigazione del menu né effettuare alcuna modifica fino al termine della chiamata generale.

## Chiamate telefoniche

Per chiamata telefonica si intende una chiamata da una singola radio a un telefono.

In Capacity Max, la radio è in grado di ricevere chiamate e trasmettere anche se la funzionalità di chiamata telefonica è disattivata.

La funzionalità di chiamata telefonica può essere attivata tramite l'assegnazione e l'impostazione di numeri di telefono sul sistema. Rivolgersi all'amministratore di sistema per sapere come è stata programmata la radio.

## Effettuazione di chiamate telefoniche

Seguire la procedura per effettuare chiamate telefoniche sulla radio.

- 1 Premere il pulsante di **accesso rapido** programmato fino a visualizzare l'ID o l'alias predefinito.

Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

Se il codice di accesso non è stato preconfigurato nella lista Contatti, sul display viene visualizzato  
Codice accesso:.

2 Inserire il codice di accesso e premere  per continuare.

Il codice di accesso o di disconnessione non può contenere più di 10 caratteri.

---

3 Premere il pulsante **PTT** per rispondere alla chiamata.

---

4 Rilasciare il pulsante **PTT** per ascoltare.

---

5 Inserire le cifre aggiuntive con la tastiera, se richiesto dalla chiamata, quindi premere  per continuare.

Se la chiamata termina mentre si stanno immettendo le cifre aggiuntive richieste dalla chiamata, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

Viene emesso il tono DTMF. La radio ritorna alla schermata precedente.

---

6 Premere  per terminare la chiamata.

---

7 Eseguire una delle seguenti operazioni:

- Se il codice di uscita non è stato preconfigurato, inserirlo quando sul display viene visualizzato

Codice disconnes:, quindi premere  per continuare. La radio ritorna alla schermata precedente.

- Premere il pulsante di **accesso rapido** programmato. Se la voce per il pulsante **Accesso rapido** è vuota, viene generato un tono indicatore negativo.

Viene emesso il tono DTMF e sul display viene visualizzato `Fine chiam. tel.`

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere i due passaggi precedenti o attendere che l'utente del telefono termini la chiamata.

---

## Effettuazione di chiamate telefoniche dalla lista Contatti

Seguire la procedura per effettuare chiamate telefoniche sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione. Il display mostra le voci in ordine alfabetico.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione. Quando si preme il pulsante **PTT** nella schermata dei contatti del telefono:
  - Sulla prima riga del display viene visualizzato Numero tel.:

- Sulla seconda riga, viene visualizzato un cursore lampeggiante.

Se la voce selezionata è vuota:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato Chiamata telefonica non valida #.

- 4 Premere  o  fino a visualizzare Chiamata tel. Premere  per effettuare la selezione. Sul display viene visualizzato Codice accesso: se il codice di accesso non è stato preconfigurato.

---

- 5 Inserire il codice di accesso e premere  per continuare. Il codice di accesso o di disconnessione non può contenere più di 10 caratteri. Sulla prima riga di testo viene visualizzato Chiamata. Sulla seconda riga di testo vengono visualizzati l'ID o l'alias dell'utente e l'icona **Chiamata telefonica**. Se la chiamata ha esito positivo:

- Viene emesso il tono DTMF.
- Si sente quindi il tono di composizione dell'utente del telefono.
- Sulla prima riga di testo vengono visualizzati l'ID o l'alias dell'utente e l'icona **RSSI**.
- Sulla seconda riga vengono visualizzati `Chiamata telefonica` e l'icona **Chiamata telefonica**.

Se la chiamata ha esito negativo:

- Viene emesso un tono.
- Sul display viene visualizzato prima `Chiam tel fallita` e quindi `Codice accesso:`.
- La radio ritorna alla schermata in uso prima dell'inizio della chiamata se il codice di accesso è stato preconfigurato nella lista Contatti.

---

**6** Premere il pulsante **PTT** per rispondere alla chiamata.

L'icona **RSSI** scompare.

---

**7** Rilasciare il pulsante **PTT** per ascoltare.

---

**8** Inserire le cifre aggiuntive con la tastiera, se richiesto dalla chiamata, quindi premere  per continuare.

Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste dalla chiamata, la radio ritorna alla schermata in uso prima dell'inizio della chiamata.

Viene emesso il tono DTMF. La radio ritorna alla schermata precedente.

---

**9** Premere  per terminare la chiamata.

---

**10** Se il codice di uscita non è stato preconfigurato, inserirlo quando sul display viene visualizzato

`Codice disconnes:`, quindi premere  per continuare.

La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzato `Fine chiam. tel.`

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere il [passaggio 9](#) e il [passaggio 10](#) o attendere che l'utente del telefono termini la chiamata. Se si preme il pulsante PTT nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione OK per inviare chiam.

Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione Chiam. tel. finita.

Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

#### NOTA:

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata. Viene emesso un tono.

durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata.

Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/disconnessione, la radio risponde solamente al pulsante **On/Off**, alla **manopola del volume** e alla **leva canali**. Per ogni immissione non valida viene emesso un tono.

## Effettuazione di chiamate telefoniche utilizzando la ricerca per alias

È possibile trovare l'alias dell'utente desiderato anche eseguendo la ricerca alfanumerica o degli alias. Questa funzione è disponibile soltanto in Contatti. Seguire la procedura per effettuare chiamate telefoniche sulla radio utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Contatti`.  
Premere  per effettuare la selezione.  
Il display mostra le voci in ordine alfabetico.

---

- 3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato. Sulla prima riga del display, viene visualizzato `Numero tel.:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Utilizzare la tastiera per immettere un numero telefonico.

---

- 4 Premere  per effettuare la selezione. Se la voce selezionata è vuota, viene emesso un tono indicatore negativo e sul display viene visualizzato `Chiamata telefonica non valida #`.

---

- 5 Premere  o  per effettuare una chiamata telefonica e Premere  per effettuare la selezione. Se il codice di accesso non è stato

preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato `Codice accesso:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di accesso e

premere il pulsante  per continuare. In caso di esito positivo, viene emesso il tono DTMF. Si sente quindi il tono di composizione dell'utente del telefono. Sulla prima riga del display vengono visualizzati l'alias o l'ID dell'utente e l'icona **RSSI**. Sulla seconda riga del display vengono visualizzati `Chiamata telefonica` e l'icona **Chiamata telefonica**. In caso di esito negativo, viene emesso un tono e sul display viene visualizzata l'opzione `Chiam tel fallita`. La radio ritorna alla schermata di immissione del codice di accesso. Se il codice di accesso è stato preconfigurato nella lista Contatti, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

- 6 Premere il pulsante **PTT** per parlare e rilasciarlo per ascoltare. L'icona **RSSI** non viene visualizzata durante la trasmissione.

---

- 7 Per immettere altri numeri, se richiesto dalla chiamata, effettuare una delle seguenti operazioni:

- Premere qualsiasi tasto della tastiera per immettere gli altri numeri. Sulla prima riga del display, viene visualizzato *Cifre supp.:*. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere le cifre aggiuntive e premere il pulsante  per continuare. Viene emesso il tono DTMF e la radio ritorna alla schermata precedente.
- Premere il pulsante **Accesso rapido**. Viene emesso il tono DTMF. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

finita. La radio ritorna alla schermata della chiamata telefonica. In caso di esito negativo, la radio ritorna alla schermata della chiamata telefonica. Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione *OK per inviare chiam.* Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione *Chiam. tel. finita*. Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

- 8 Premere  per terminare la chiamata. Se il codice di disconnessione non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato *Codice disconnesi:*. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di disconnessione e premere  per continuare. La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzata l'opzione *Fine chiam. tel.* In caso di esito positivo viene emesso un tono e sul display viene visualizzata l'opzione *Chiam. tel.*

**NOTA:**

Durante l'accesso al canale, premere per annullare il tentativo di chiamata (viene emesso un tono) o per uscire dalla ricerca dell'alias. Premere il

pulsante o per uscire dalla ricerca dell'alias. Durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata. Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/disconnessione, la radio risponde solamente al pulsante On/Off, alla manopola del volume e alla leva canali. Per ogni immissione non valida viene emesso un tono.

## Effettuazione di chiamate telefoniche utilizzando la composizione manuale

Seguire la procedura per effettuare chiamate telefoniche sulla radio utilizzando la composizione manuale.

1 Premere per accedere al menu.

---

2 Premere o fino a visualizzare `Contatti`.  
Premere per effettuare la selezione.

---

3 Premere o fino a visualizzare `Comp. man.`. Premere per effettuare la selezione.

---

4 Premere o fino a visualizzare `Numero tel.`. Premere per effettuare la selezione.  
Sul display vengono visualizzati `Numero:` e un cursore lampeggiante.

---

5 Inserire il numero di telefono, quindi premere per continuare.  
Sul display vengono visualizzati `Codice accesso:` e un cursore lampeggiante se il codice di accesso non è stato preconfigurato.

---

- 6 Inserire il codice di accesso e premere  per continuare. Il codice di accesso o di disconnessione non può contenere più di 10 caratteri.

Il LED verde si accende. Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**. Nella prima riga di testo è visualizzato l'alias dell'utente. Nella seconda riga di testo è visualizzato lo stato della chiamata.

Se la chiamata ha esito positivo:

- Viene emesso un tono DTMF (segnalazione multifrequenza DTMF).
- Si sente quindi il tono di composizione dell'utente del telefono.
- Nella prima riga di testo è visualizzato l'alias dell'utente.
- Il display continua a visualizzare l'icona **Chiamata telefonica** nell'angolo superiore destro.

Se la chiamata ha esito negativo:

- Viene emesso un tono.
- Sul display viene visualizzato prima `Chiam tel fallita` e quindi `Codice accesso:.`

- La radio ritorna alla schermata in uso prima dell'inizio della chiamata se il codice di accesso è stato preconfigurato nella lista Contatti.

- 
- 7 Premere  per terminare la chiamata.
- 

- 8 Eseguire una delle seguenti operazioni:

- Se il codice di uscita non è stato preconfigurato, inserirlo quando sul display viene visualizzato `Codice disconnesi:`, quindi premere  per continuare. La radio ritorna alla schermata precedente.
- Premere il pulsante di **accesso rapido** programmato. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

Viene emesso il tono DTMF e sul display viene visualizzato `Fine chiam. tel.`

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere [passaggio 7](#) o attendere che l'utente del telefono termini la chiamata.

**NOTA:**

Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione OK per inviare chiam.

Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione Chiam. term.

Se la chiamata termina mentre si stanno immettendo le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata. Viene emesso un tono.

durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata.

Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/disconnessione, la radio risponde solamente

al pulsante **On/Off**, alla **manopola del volume** e alla **leva canali**. Per ogni immissione non valida viene emesso un tono.

- Immettere il numero desiderato per avviare una chiamata DTMF.
- Premere  per avviare una chiamata DTMF.
- Premere  per avviare una chiamata DTMF.

## Segnalazione multifrequenza DTMF (Dual Tone Multi Frequency)

La segnalazione multifrequenza DTMF consente alla radio di operare in un sistema radio che si interfaccia con i sistemi telefonici.

È possibile disabilitare il tono DTMF disattivando tutti i toni e gli avvisi della radio. Per ulteriori informazioni, vedere [Attivazione o disattivazione di avvisi e toni della radio a pagina 213](#).

### Avvio di chiamate DTMF

Seguire la procedura per avviare chiamate DTMF sulla radio.

- 1 Premere e tenere premuto il pulsante **PTT**.
- 2 Eseguire una delle seguenti operazioni:

## Risposta alle chiamate telefoniche come chiamate di gruppo

Seguire la procedura per rispondere alle chiamate telefoniche come chiamate di gruppo sulla radio.

Quando si riceve una chiamata telefonica come chiamata di gruppo:

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**.
- Sul display viene visualizzato `Chiamata telefonica`.
- Il LED verde lampeggia.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

- 1 Premere il pulsante **PTT** per rispondere alla chiamata.

2 Rilasciare il pulsante **PTT** per ascoltare.

---

3 Premere  per terminare la chiamata.

Sul display viene visualizzato `Fine chiam. tel.`

**NOTA:**

Se la funzione Chiamata privata non è attiva nella radio, la radio non è in grado di terminare una chiamata telefonica come chiamata di gruppo. L'utente del telefono deve terminare la chiamata. Il destinatario può solo rispondere durante la chiamata.

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere il [passaggio 3](#) o attendere che l'utente del telefono termini la chiamata.

---

## Risposta alle chiamate telefoniche come chiamate generali

Quando si riceve una chiamata telefonica come chiamata generale, la radio ricevente non è in grado di trasmettere o rispondere. Inoltre, il destinatario non può terminare la chiamata generale.

Quando si riceve una chiamata telefonica come chiamata generale:

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**.
- Sul display viene visualizzato `Chiam. gen.`, `Chiam. gen. sito` o `Chiam. multis.` a seconda del tipo di configurazione e `Chiamata telefonica`.
- Il LED verde lampeggia.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

## Risposta alle chiamate telefoniche come chiamate private

Seguire la procedura per rispondere alle chiamate telefoniche come chiamate private sulla radio.

Quando si riceve una chiamata telefonica come chiamata privata:

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**.
- Sul display viene visualizzato `Chiamata telefonica`.
- Il LED verde lampeggia.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

1 Premere il pulsante **PTT** per rispondere alla chiamata.

2 Rilasciare il pulsante **PTT** per ascoltare.

3 Premere  per terminare la chiamata.

Sul display viene visualizzato `Fine chiam. tel.`

**NOTA:**

Se la funzione Chiamata privata non è attiva nella radio, la radio non è in grado di terminare una chiamata telefonica come chiamata privata. L'utente del telefono deve terminare la chiamata. Il destinatario può solo rispondere durante la chiamata.

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere il [passaggio 3](#) o attendere che l'utente del telefono termini la chiamata.

## Chiusura delle chiamate

La funzione Chiusura delle chiamate consente a una radio di interrompere la trasmissione voce in corso e avviare una trasmissione con priorità.

Con la funzione Chiusura delle chiamate, il sistema interrompe e chiude le chiamate in corso se non sono disponibili canali trunked.

Le chiamate con priorità più elevata, come ad esempio una chiamata di emergenza o una chiamata generale, chiudono la radio trasmittente per consentire la chiamata con priorità più elevata. In assenza di altri canali RF (Radio Frequency) disponibili, una chiamata di emergenza chiude anche una chiamata generale.

## Interruzione voce

Interruzione voce consente all'utente di chiudere una trasmissione vocale in corso.

Questa funzione utilizza la segnalazione inversa a canale per interrompere la trasmissione vocale in corso di una radio, se la radio che avvia l'interruzione è configurata per la funzione Interruzione voce e la radio trasmittente è configurata per essere idonea all'interruzione della chiamata voce. La radio che avvia l'interruzione viene quindi autorizzata a effettuare una trasmissione vocale al partecipante nella chiamata interrotta.

La funzione Interruzione voce migliora notevolmente la probabilità di garantire una nuova trasmissione alle parti coinvolte quando è in corso una chiamata.

La funzione Interruzione voce è accessibile all'utente solo se è stata configurata nella radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione di Interruzione voce

Seguire la procedura per avviare la funzione Interruzione voce sulla radio.

È necessario programmare la radio per consentire l'utilizzo di questa funzione. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

- 1 Per interrompere la trasmissione durante una chiamata in corso, premere il pulsante **PTT**.

Sul display della radio interrotta viene visualizzato `Chiamata interrotta`. Viene emesso un tono indicatore negativo finché non viene rilasciato il pulsante **PTT**.

---

- 2 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- 

- 3 Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

- Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

## Funzioni avanzate

Questo capitolo descrive le funzioni disponibili nella radio.

È possibile che il rivenditore o l'amministratore del sistema abbia personalizzato la radio in base alle esigenze specifiche dell'utente. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

### Coda chiamate

Quando non vi sono risorse disponibili per elaborare una chiamata, la funzione Coda chiamate consente di mettere la richiesta nella coda del sistema per la successive risorse disponibili.

Dopo aver premuto il pulsante **PTT** viene emesso un tono coda chiamata per indicare che la radio è entrata in stato Coda chiamate. Una volta udito il tono di Coda chiamate, è possibile rilasciare il pulsante **PTT**.

In caso di impostazione corretta della chiamata, si verifica quanto segue:

- Il LED verde lampeggia.

- Se questa opzione è attivata, viene emesso il tono Perm parlare.

- Sul display viene visualizzata l'icona del tipo di chiamata, l'ID o l'alias.

- L'utente della radio ha fino a 4 secondi per premere il pulsante **PTT** per iniziare la trasmissione voce.

In caso di impostazione errata della chiamata, si verifica quanto segue:

- Se questa opzione è attivata, viene emesso il tono Rifiuta.
- Sul display viene visualizzata momentaneamente una schermata con una notifica di errore.
- La chiamata viene terminata e la radio chiude l'impostazione della chiamata.

### Scansione talkgroup

Questa funzione consente alla radio di monitorare e unirsi alle chiamate per gruppi definiti in una Lista gruppi di ricezione.

Quando la scansione è attivata, sulla barra di stato viene visualizzata un'apposita icona e il LED lampeggia in giallo.

L'audio della radio viene riattivato per tutti i membri della Lista gruppi di ricezione.

Quando la scansione è disattivata, la radio non riceve la trasmissione dai membri della Lista gruppi di ricezione, ad eccezione della chiamata generale e del talkgroup selezionato.

#### NOTA:

La funzione Scansione talkgroup può essere configurata tramite CPS. Rivolgersi all'amministratore di sistema per sapere come è stata programmata la radio.

## Attivazione o disattivazione della scansione talkgroup

Seguire la procedura per attivare o disattivare la scansione dei talkgroup sulla radio.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Scan.  
Premere  per effettuare la selezione.

3 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Accendi. Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare Spegni. Premere  per effettuare la selezione.

Se la scansione è attivata:

- Sul display vengono visualizzati Scan. attivata e l'icona **Scansione**.
- Il LED giallo lampeggia.
- Viene emesso un tono indicatore positivo.

Se la scansione è disattivata:

- Sul display viene visualizzato Scansione disattivata
- L'icona **Scansione** scompare.
- Il LED si spegne.
- Viene emesso un tono indicatore negativo.

## Lista gruppi di ricezione

Lista gruppi di ricezione è una funzione che consente di creare e assegnare membri nell'elenco di scansione dei talkgroup.

Questa lista viene creata quando la radio viene programmata e stabilisce i gruppi da sottoporre a scansione. La radio può supportare un massimo di 16 membri in questa lista.

Se la radio è stata programmata per consentire la modifica della lista di scansione, è possibile:

- Aggiungere/rimuovere talkgroup.
- Aggiungere, rimuovere e/o modificare la priorità per i talkgroup. Fare riferimento alla [Modifica della priorità di un talkgroup a pagina 108](#).
- Aggiungere, rimuovere e/o modificare i talkgroup di affiliazione. Fare riferimento a [Aggiunta di un'affiliazione al talkgroup a pagina 109](#) e [Rimozione di un'affiliazione al talkgroup a pagina 110](#).
- Sostituire la lista di scansione esistente con una nuova.

### IMPORTANTE:

Per aggiungere un membro alla lista, è necessario prima configurare il talkgroup nella radio.

### NOTA:

La Lista di gruppi di ricezione è programmata dall'amministratore di sistema. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Monitoraggio delle priorità

La funzione Monitoraggio priorità consente alla radio di ricevere automaticamente la trasmissione dai talkgroup con una priorità più alta quando si trova in una chiamata talkgroup.

La radio abbandona la chiamata talkgroup con priorità inferiore per la chiamata talkgroup con priorità superiore.

### NOTA:

Questa funzione è accessibile solo quando è attivata la funzione Scansione talkgroup.

La funzione Monitoraggio priorità è disponibile solo per i membri della lista di gruppi di ricezione. Sono disponibili due talkgroup con priorità: Priorità 1 (P1) e Priorità 2 (P2). P1 ha una priorità più alta rispetto a P2. Nel sistema Capacity Max, la radio riceve la trasmissione in base alla priorità nel seguente ordine:

- 1 Chiamata di emergenza per talkgroup P1

- 2 Chiamata di emergenza per talkgroup P2
- 3 Chiamata di emergenza per i talkgroup senza priorità nella lista di gruppi di ricezione
- 4 Chiamata generale
- 5 Chiamata talkgroup P1
- 6 Chiamata talkgroup P2
- 7 Talkgroup senza priorità nella lista di gruppi di ricezione

Vedere [Modifica della priorità di un talkgroup a pagina 108](#) per ulteriori informazioni su come aggiungere, rimuovere e/o modificare la priorità dei talkgroup nella lista di scansione.

#### NOTA:

Questa funzione è programmata dall'amministratore di sistema. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Modifica della priorità di un talkgroup

Nel menu Scansione talkgroup è possibile visualizzare o modificare la priorità di un talkgroup.

- 1 Premere  per accedere al menu.
- 

- 2 Premere  o  fino a visualizzare Scan.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare Vis/mod lista. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare il talkgroup desiderato. Premere  per effettuare la selezione.

La priorità corrente viene indicata da un'icona **Priorità 1** o **Priorità 2** accanto al talkgroup.

---

- 5 Premere  o  fino a visualizzare Mod. priorità. Premere  per effettuare la selezione.
- 

- 6 Premere  o  fino a visualizzare il livello di priorità richiesto. Premere  per effettuare la selezione.

Se a un altro talkgroup è stata assegnata la Priorità 1 o la Priorità 2, è possibile scegliere di sovrascrivere la priorità corrente. Quando sul display viene visualizzato il messaggio *Sovrascrivere?*,

premere  o  fino a visualizzare le seguenti opzioni:

- No per tornare al passaggio precedente.
- Sì per sovrascrivere.

Prima di tornare alla schermata precedente, sul display viene visualizzata una mini notifica positiva. L'icona della priorità viene visualizzata accanto al talkgroup.

## Affiliazione a più talkgroup

In un sistema Capacity Max, la radio può essere configurata per un massimo di sette talkgroup per ciascun sito.

Dei 16 talkgroup della Lista gruppi di ricezione, fino a sette talkgroup possono essere assegnati come affiliazione. Il talkgroup selezionato e i talkgroup con priorità vengono affiliati automaticamente.

### NOTA:

Questa funzione è programmata dall'amministratore di sistema. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Aggiunta di un'affiliazione al talkgroup

Seguire la procedura per aggiungere un'affiliazione al talkgroup.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Scansione. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Vis/mod lista*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare l'ID o l'alias del talkgroup desiderato. Premere  per effettuare la selezione.

Lo stato di affiliazione viene visualizzato in `Vis/mod` lista. Sul display viene visualizzato  accanto all'alias o all'ID del talkgroup selezionato.

---

5 Premere  o  fino a visualizzare `Modifica` `affiliaz.` Premere  per effettuare la selezione.

---

6 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare `Attivo.` Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare `Disattivo.` Premere  per effettuare la selezione.

Quando è selezionato `On`,  viene visualizzato accanto all'alias o all'ID del talkgroup.

---

Se l'affiliazione ha esito positivo, sul display viene visualizzato  accanto all'alias o all'ID del talkgroup selezionato.

Se l'affiliazione non riesce,  resta visualizzato accanto all'alias o all'ID del talkgroup.

#### NOTA:

Sulla radio viene visualizzato `Lista piena` quando vengono selezionati fino a sette talkgroup per l'affiliazione nella lista di scansione. Per selezionare un nuovo talkgroup per l'affiliazione, rimuovere un talkgroup affiliato esistente per fare spazio. Per ulteriori informazioni, vedere [Rimozione di un'affiliazione al talkgroup a pagina 110](#).

## Rimozione di un'affiliazione al talkgroup

Quando la lista di affiliazione è piena e si desidera selezionare un nuovo talkgroup da affiliare, è necessario rimuovere un talkgroup affiliato esistente per fare spazio. Seguire la procedura per rimuovere un talkgroup affiliato.

---

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Scansione. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare `Vis/mod` lista. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare l'ID o l'alias del talkgroup desiderato. Premere  per effettuare la selezione.

Lo stato di affiliazione viene visualizzato in `Vis/mod` lista. Sul display viene visualizzato  accanto all'alias o all'ID del talkgroup selezionato.

5 Premere  o  fino a visualizzare `Modifica` affiliaz. Premere  per effettuare la selezione.

6 Premere  o  fino a visualizzare Disattivo. Premere  per effettuare la selezione.

Quando è selezionato Off,  non viene visualizzato più accanto all'alias o all'ID del talkgroup.

## Talkback

La funzione Talkback consente di rispondere a una trasmissione mentre è in corso la scansione.

Se la radio esegue una scansione durante una chiamata dalla lista scansione di un gruppo selezionabile e se il pulsante **PTT** viene premuto durante la chiamata sottoposta a scansione, il funzionamento della radio dipende dall'attivazione o dalla disattivazione dell'opzione Talkback durante la programmazione della radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

### Talkback disattivata

La radio abbandona la chiamata di cui si sta eseguendo la scansione e tenta di trasmettere al contatto disponibile per la posizione del canale attualmente selezionato. Dopo la scadenza del tempo di

permanenza chiamata per il contatto attualmente selezionato, la radio torna al canale iniziale e avvia il timer tempo di permanenza scansione. La radio riprende la scansione del gruppo dopo la scadenza del timer del tempo di permanenza scansione.

### Talkback attivata

Se si preme il pulsante **PTT** durante il tempo di chiusura del gruppo della chiamata di cui si sta eseguendo la scansione, la radio tenta di trasmettere al gruppo di scansione.

#### **NOTA:**

Se si cerca in una chiamata un gruppo che non è stato assegnato a una posizione del canale nella zona attualmente selezionata e la chiamata termina, è necessario spostarsi alla zona corretta, quindi selezionare la posizione del canale del gruppo per parlare con il gruppo.

## Bluetooth

Questa funzione consente di utilizzare la radio con un dispositivo Bluetooth (accessorio) tramite una connessione Bluetooth. La radio supporta i dispositivi Bluetooth Motorola Solutions e COTS (disponibili in commercio).

La tecnologia Bluetooth ha una copertura di 10 m in linea visiva, ossia un percorso senza ostacoli tra la radio e il dispositivo Bluetooth. Per la massima affidabilità, Motorola Solutions consiglia di non separare la radio dall'accessorio.

Nelle aree al limite della ricezione, la voce e la qualità del tono cominceranno a essere "incomprensibili" o "interrotte". Per risolvere questo problema, avvicinare la radio e il dispositivo Bluetooth entro un raggio di 10 m, per ripristinare la nitidezza della ricezione audio. La funzione Bluetooth della radio ha una potenza massima di 2,5 mW (4 dBm) nel raggio di 10 m.

La radio può supportare fino a tre connessioni Bluetooth simultanee con dispositivi Bluetooth di tipo diverso, ad esempio, un paio di cuffie, uno scanner e un dispositivo POD (solo PTT). Non sono supportate più connessioni con dispositivi Bluetooth dello stesso tipo.

Per ulteriori informazioni sulle funzionalità complete del dispositivo Bluetooth, consultare il relativo manuale per l'utente del dispositivo.

#### **NOTA:**

Se questa opzione è disattivata tramite CPS, tutte le funzioni relative alla connessione Bluetooth vengono disattivate e il database del dispositivo Bluetooth viene cancellato.

## Accensione e spegnimento del Bluetooth

Seguire la procedura per accendere e spegnere il Bluetooth.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Stato utente. Premere  per effettuare la selezione. Sul display vengono visualizzate le opzioni On e Off. Lo stato corrente è indicato da .

---

- 4 Eseguire una delle seguenti operazioni:
  - Premere  o  fino a visualizzare Attivo. Premere  per effettuare la

selezione. Sul display viene visualizzato  accanto a On.

- Premere  o  fino a visualizzare Disattivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a Off.

## Connessione ai dispositivi Bluetooth

Seguire la procedura per connettersi ai dispositivi Bluetooth.

Accendere il dispositivo Bluetooth e impostarlo sulla modalità di accoppiamento.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Dispositivi**. Premere  per effettuare la selezione.

4 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare **Trova dispos.** per individuare i dispositivi disponibili. Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare **Connetti**. Premere  per effettuare la selezione.
- È possibile che, per completare l'accoppiamento, il dispositivo Bluetooth richieda l'esecuzione di ulteriori

operazioni. Fare riferimento al manuale dell'utente del dispositivo Bluetooth.

Sul display viene visualizzato **Connesso a <dispositivo>**.

Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display vengono visualizzati il messaggio **<Dispositivo> connesso** e l'icona **Bluetooth collegato**.
- Sul display viene visualizzato  accanto al dispositivo connesso.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato il messaggio **Connessione non riuscita**.

**NOTA:**

Se è richiesto il codice pin, vedere [Accesso alle radio tramite password a pagina 200](#).

## Collegamento a dispositivi Bluetooth in modalità rilevabile

Seguire la procedura per connettersi ai dispositivi Bluetooth in modalità rilevabile.

Accendere il dispositivo Bluetooth e impostarlo sulla modalità di accoppiamento.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Trovami. Premere  per effettuare la selezione. La radio può essere rilevata da altri dispositivi Bluetooth per un tempo programmato. Questa modalità è denominata Rilevamento.

Attendere la conferma.  
In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display vengono visualizzati il messaggio <Dispositivo> connesso e l'icona **Bluetooth collegato**.
- Sul display viene visualizzato  accanto al dispositivo connesso.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato il messaggio Connessione non riuscita.

## Disconnessione dai dispositivi Bluetooth

Seguire la procedura per disconnettersi dai dispositivi Bluetooth.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare Disconnetti. Premere  per effettuare la selezione.

Sul display viene visualizzato il messaggio Disconnessione da <Nome dispositivo>.

**NOTA:**

È possibile che per disconnettere il dispositivo Bluetooth si debbano eseguire ulteriori operazioni. Fare riferimento ai manuali per l'utente dei dispositivi Bluetooth corrispondenti.

- Viene emesso un tono.
- Sul display viene visualizzato <Dispositivo> disconnesso e l'icona **Bluetooth collegato** scompare.
- ✓ accanto al dispositivo connesso scompare.

## Commutazione dell'instradamento dell'audio tra l'altoparlante interno della radio e il dispositivo Bluetooth

Attenersi alla procedura descritta di seguito per alternare l'instradamento dell'audio tra l'altoparlante interno della radio e il dispositivo Bluetooth esterno.

Premere il pulsante programmato **Commutazione audio Bluetooth**.

Sul display viene visualizzato uno dei seguenti risultati:

- Viene emesso un tono. Sul display viene visualizzato Invia audio alla radio.
- Viene emesso un tono. Sul display viene visualizzato Invia audio a Bluetooth.

Attendere la conferma.

## Visualizzazione dei dettagli del dispositivo

Seguire la procedura per visualizzare i dettagli del dispositivo sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Vis. dettagli. Premere  per effettuare la selezione.
- 

## Eliminazione del nome del dispositivo

È possibile rimuovere un dispositivo scollegato dall'elenco dei dispositivi Bluetooth.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Elimina. Premere  per effettuare la selezione. Sul display viene visualizzato Dispositivo eliminato.

---

## Amplificazione microfono Bluetooth

Questa funzione consente all'utente di controllare il valore di guadagno del microfono del dispositivo Bluetooth collegato.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Guad mic BT. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il tipo Guad mic BT e i valori correnti. Premere  per effettuare la selezione. Qui è possibile modificare i valori.

---

5 Premere  o  per aumentare o ridurre i valori. Premere  per effettuare la selezione.

---

## Posiz. interna

### NOTA:

La funzione Posizione interna è disponibile per i modelli con l'ultima versione software e hardware. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

La funzione Posiz. interna viene utilizzata per tenere traccia della posizione in cui si trovano gli utenti della radio. Quando la funzione Posizione interna è attivata, la radio è

in modalità Rilevamento limitata. Per individuare la radio e stabilirne la posizione, vengono utilizzati beacon dedicati.

## Attivazione o disattivazione della funzione Posizione interna

È possibile attivare o disattivare la funzionalità Posizione interna effettuando una delle operazioni descritte di seguito.

- Accedere a questa funzione tramite il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.
  - c. Premere  oppure  fino a visualizzare Posiz. interna e premere  per selezionare.

- d. Premere  per attivare Posiz. interna.

Sul display viene visualizzato Posiz. interna Attiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale viene visualizzata l'icona Posizione disponibile.
- Se l'operazione ha esito negativo, sul display viene visualizzato Attivazione non riuscita. Viene emesso un tono indicatore negativo.

- e. Premere  per disattivare Posiz. interna.

Sul display viene visualizzato Posiz. interna Disattiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale scompare l'icona Posizione disponibile.

- Se l'operazione ha esito negativo, sul display viene visualizzato `Disattivazione non riuscita`. Viene emesso un tono indicatore negativo.
- Accedere a questa funzione utilizzando il pulsante programmato.
  - a. Premere a lungo il pulsante programmato **Posiz. interna** per accedere alla funzione.  
 Sul display viene visualizzato `Posiz. interna Attiva`. Viene emesso un tono indicatore positivo.  
 Si verifica uno dei seguenti scenari.
    - Se l'operazione ha esito positivo, sulla schermata principale viene visualizzata l'icona `Posizione disponibile`.
    - Se l'operazione ha esito negativo, sul display viene visualizzato `Attivazione non riuscita`. Se l'operazione ha esito negativo, viene emesso un tono indicatore negativo.

- b. Premere il pulsante programmato **Posiz. interna** per disattivare la funzione.

Sul display viene visualizzato `Posiz. interna Disattiva`. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale scompare l'icona `Posizione disponibile`.
- Se l'operazione ha esito negativo, sul display viene visualizzato `Disattivazione non riuscita`. Se l'operazione ha esito negativo, viene emesso un tono indicatore negativo.

## Accesso alle informazioni sui beacon della posizione interna

Seguire la procedura per accedere alle informazioni sui beacon della posizione interna.

- 1 Premere  per accedere al menu.

2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Posiz. interna e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Beacon e premere  per selezionare.

---

Sul display vengono visualizzate le informazioni sui beacon.

## Controlli multisito

Queste funzioni sono disponibili se il canale radio corrente è configurato per un sistema Capacity Max.

## Inizio della ricerca manuale del sito

Seguire la procedura per avviare la ricerca manuale del sito quando la potenza del segnale ricevuto è scarsa e trovare un sito con segnale migliore.

Se la radio trova un nuovo sito:

- Viene emesso un tono indicatore positivo.

Se la radio non trova un nuovo sito:

- Viene emesso un tono indicatore negativo.

## Blocco sito on/off

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

Premere il pulsante programmato **Blocco sito**.

Se la funzione **Blocco sito** è attivata:

- Viene emesso un tono indicatore positivo, che indica che la radio è stata bloccata nel sito corrente.
- Sul display compare `Sito bloccato`.

Se la funzione **Blocco sito** è disattivata:

- Viene emesso un tono indicatore negativo, che indica che la radio è stata sbloccata.
- Sul display compare `Sito sbloccato`.

## Accesso all'elenco Siti adiacenti

Questa funzione consente all'utente di verificare l'elenco dei siti adiacenti del sito principale corrente. Seguire la procedura per accedere all'elenco Siti adiacenti:

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Info radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Siti adiacenti. Premere  per effettuare la selezione.

---

## Promemoria canale principale

Questa funzione fornisce un promemoria quando la radio non è impostata sul canale principale per un certo periodo di tempo.

Se questa funzione è attivata, quando la radio non è impostata sul canale principale per un certo periodo di tempo, si verifica periodicamente quanto segue:

- Si sentono l'annuncio e il tono del promemoria del canale principale.
- Sulla prima riga del display viene visualizzato Canale
- Sulla seconda riga viene visualizzato non principale.

## Disattivazione dell'audio del promemoria del canale principale

Quando si riceve il promemoria del canale principale, è possibile disattivare temporaneamente l'audio del promemoria.

Premere il tasto programmabile **Silenzia promemoria canale principale**.

Sulla prima riga del display viene visualizzato HCR mentre sulla seconda riga viene visualizzato disattivato.

## Impostazione di nuovi canale principali

Quando si riceve il promemoria del canale principale, è possibile impostare un nuovo canale principale.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmabile **Reimposta canale principale** per impostare il canale corrente come nuovo canale principale. Saltare i passaggi seguenti.  
Sulla prima riga del display viene visualizzato l'alias del canale e Nuovo canale principale.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino all'opzione Canale princ.. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare l'alias del nuovo canale principale desiderato. Premere  per effettuare la selezione.  
Sul display viene visualizzato ✓ accanto all'alias del canale principale selezionato.

## Monitoraggio remoto

Questa funzione viene utilizzata per attivare il microfono di una radio di destinazione con ID o alias dell'utente. Questa funzione è utile per controllare a distanza la presenza di attività nelle vicinanze della radio monitorata.

È necessario programmare sia la radio in uso sia la radio di destinazione per consentire l'utilizzo di questa funzione.

Se la funzione viene avviata, il LED verde lampeggia una volta sulla radio di destinazione. Questa funzione remoto si arresta automaticamente dopo un periodo di tempo programmato o se l'utente della radio di destinazione esegue un'azione qualsiasi.

## Avvio di Monitor remoto

Seguire la procedura per avviare il monitor remoto sulla radio.

**1** Premere il pulsante programmato **Monitor rem..**

---

**2** Premere  o  fino a visualizzare l'alias o

l'ID desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.

---

**3** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.

- Sul display viene visualizzata una mini notifica positiva.
- L'audio della radio monitorata viene riprodotto per la durata programmata; sul display viene visualizzato **Monitor rem..** Allo scadere del timer, viene emesso un tono di avviso e il LED verde si spegne.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Avvio del monitor remoto dalla lista Contatti

Seguire la procedura per avviare il monitor remoto sulla radio dalla lista Contatti.

**1** Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Monitor rem.. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.

---

5 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.
- L'audio della radio monitorata viene riprodotto per la durata programmata; sul display viene

visualizzato Monitor rem.. Allo scadere del timer, viene emesso un tono di avviso e il LED verde si spegne.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Avvio dei monitor remoti utilizzando la composizione manuale

Seguire la procedura per avviare il monitor remoto sulla radio utilizzando la composizione manuale.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Comp. man.**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Numero radio**. Premere  per effettuare la selezione.

---

5 Eseguire una delle seguenti operazioni:

- Inserire l'ID o l'alias dell'utente, quindi premere  per continuare.
  - Modificare l'ID composto in precedenza, quindi premere  per continuare.
- 

6 Premere  o  fino a visualizzare **Monitor rem.**. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.

---

7 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.
- L'audio della radio monitorata viene riprodotto per la durata programmata; sul display viene visualizzato **Monitor rem.**. Allo scadere del timer, viene emesso un tono di avviso e il LED verde si spegne.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Impostazioni dei contatti

I contatti compongono la rubrica della radio. Ogni voce corrisponde a un alias o un ID da utilizzare per inviare una chiamata. Le voci sono elencate in ordine alfabetico.

A seconda del contesto, ogni voce è associata con i diversi tipi di chiamata: Chiamata di gruppo, chiamata privata,

chiamata broadcast, chiamata generale sito, chiamata generale multisito, chiamata PC o chiamata dispatch.

Le chiamate PC e dispatch sono chiamate dati, disponibili solo con le rispettive applicazioni. Per informazioni più particolareggiate, consultare la documentazione che accompagna le applicazioni dati.

Inoltre, il menu Contatti consente di assegnare ciascuna voce a uno o più tasti numerici programmabili del microfono della tastiera. Se una voce è assegnata a un tasto numerico, la radio può comporre automaticamente il numero associato alla voce.

**NOTA:**

Ogni tasto numerico già assegnato a una voce è preceduto da un segno di spunta. Se il segno di spunta è visualizzato prima di **Uoto**, non è stato assegnato alla voce alcun tasto numerico.

Ogni voce della lista Contatti riporta le seguenti informazioni:

- Tipo di chiamata
- Alias chiamata
- ID della chiamata

**NOTA:**

Se la funzione Privacy è attivata su un canale, è possibile effettuare chiamate di gruppo, private, generali e telefoniche con l'opzione Privacy attivata su quel canale. Solo le radio di destinazione che hanno la stessa chiave di privacy o lo stesso valore della chiave e ID della chiave possono decodificare la trasmissione.

## Assegnazione di voci ai tasti numerici programmabili

Seguire la procedura per assegnare voci ai tasti numerici programmabili sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Contatti**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare `Tasto program`. Premere  per effettuare la selezione.

5 Eseguire una delle seguenti operazioni:

- Se il tasto numerico desiderato non è stato associato a una voce, premere  o  fino a visualizzare il tasto numerico desiderato. Premere  per effettuare la selezione.
- Se il tasto numerico desiderato è stato assegnato a una voce, sul display viene visualizzato `Tasto già assegnato` e sulla prima riga di testo viene visualizzato `Sovrascrivere?`. Eseguire una delle seguenti operazioni:

Premere  o  fino a visualizzare `Sì`.

Premere  per effettuare la selezione.

La radio emette un tono indicatore positivo e sul display vengono visualizzati `Contatto salvato` e una mini notifica positiva.

Premere  o  fino a visualizzare `No` per tornare al passaggio precedente.

È possibile assegnare ogni voce a un tasto numerico diverso. Ogni tasto numerico già assegnato a una voce è preceduto da . Se  viene visualizzato prima di `Vuoto`, non è stato assegnato alla voce alcun tasto numerico.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Il display torna automaticamente al menu precedente.

## Rimozione delle associazioni tra voci e tasti numerici programmabili

Seguire la procedura per rimuovere le associazioni tra le voci e i tasti numerici programmabili sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere a lungo il tasto numerico programmato fino a visualizzare l'alias o l'ID desiderato. Continuare con [passaggio 4](#).
- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Contatti**.

Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare l'alias o

l'ID desiderato. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Tasto**

**program**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Vuoto**.

Premere  per effettuare la selezione.

La prima riga di testo visualizza **Cancella tasti?**.

---

6 Premere  o  fino a visualizzare **Sì**.

Premere  per effettuare la selezione.

#### NOTA:

Dopo aver cancellato una voce, viene cancellata anche l'associazione tra la voce e il rispettivo tasto numerico programmato.

Viene emesso un tono indicatore positivo. Sul display viene visualizzato il messaggio **Contatto salvato**.

Il display torna automaticamente al menu precedente.

---

## Aggiunta di nuovi contatti

Seguire la procedura per aggiungere nuovi contatti sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Contatti**. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Nuovo cont. Premere  per effettuare la selezione.

---

- 4 Premere  o  per selezionare il tipo di contatto tra Contatto radio o Contatto tel. Premere  per effettuare la selezione.

---

- 5 Immettere il numero del contatto con la tastiera, quindi premere  per continuare.

---

- 6 Immettere il nome del contatto con la tastiera, quindi premere  per continuare.

---

- 7 Premere  o  fino a visualizzare il tipo di suoneria desiderato. Premere  per effettuare la selezione.  
Viene emesso un tono indicatore positivo. Sul display viene visualizzata una mini notifica positiva.

## Impostazioni degli indicatori di chiamata

Questa funzione consente agli utenti della radio di configurare le suonerie per le chiamate o i messaggi di testo.

## Attivazione o disattivazione della suoneria per le chiamate private

Seguire la procedura per attivare o disattivare la suoneria per le chiamate private sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Toni/avvisi**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Suonerie**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare **Chiam. privata**. Premere  per effettuare la selezione.

---

7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione.

Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

---

## Attivazione o disattivazione della suoneria per i messaggi di testo

Seguire la procedura per attivare o disattivare la suoneria per i messaggi di testo sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Toni/avvisi**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Suonerie**. Premere  per effettuare la selezione.

---

- 6 Premere  o  fino a visualizzare Msg testo. Premere  per effettuare la selezione. Il display mostra  e il tono corrente.
- 

- 7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto al tono selezionato.
- 

## Attivazione o disattivazione della suoneria per l'avviso di chiamata

Seguire la procedura per attivare o disattivare le suonerie per gli avvisi di chiamata sulla radio.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare Tono/avvisi. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare Suonerie. Premere  per effettuare la selezione.
- 

- 6 Premere  o  fino a visualizzare Avviso di chiamata. Premere  per effettuare la selezione.
- 

- 7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto al tono selezionato.
-

## Attivazione o disattivazione della suoneria per le chiamate selettive

Seguire la procedura per attivare o disattivare la suoneria per le chiamate selettive sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Toni/avvisi*. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare *Suonerie*. Premere  per effettuare la selezione.

---

- 6 Premere  o  fino a visualizzare *Chiamata sel.* Premere  per effettuare la selezione. Il display mostra  e il tono corrente.
- 

- 7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto al tono selezionato.
- 

## Attivazione e disattivazione della suoneria per un messaggio telemetrico di stato con testo

Seguire la procedura per attivare o disattivare le suonerie per i messaggi telemetrici di stato con testo sulla radio.

- 1 Premere  per accedere al menu.
-

2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare `Toni/ avvisi`. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare `Suonerie`.  
Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare `Telemetria`. Premere  per effettuare la selezione.  
Il tono attualmente selezionato è contrassegnato da .

---

## Assegnazione di suonerie

È possibile programmare la radio in modo che emetta uno dei dieci toni di suonerie predefiniti alla ricezione di un avviso di chiamata o messaggio di testo da un determinato contatto. La radio emette i vari tipi di suonerie durante lo scorrimento della lista. Seguire la procedura per assegnare le suonerie alla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare `Contatti`.  
Premere  per effettuare la selezione.  
Le voci sono elencate in ordine alfabetico.

---

3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare `Modifica`.  
Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Modifica suoneria**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione.  
Accanto al tono selezionato viene visualizzato .

---

## Volume del tono per gli allarmi progressivi

La radio può essere programmata in modo da emettere un avviso costante circa l'arrivo di una chiamata radio a cui non ha dato risposta. Questo avviso consiste in un tono il cui volume aumenta automaticamente nel tempo. Questa funzione è detta segnalazione allarmi progressiva.

## Funzioni del registro chiamate

La radio memorizza i dettagli di tutte le chiamate private recentemente effettuate, ricevute o perse. Questo registro

chiamate consente di visualizzare e gestire le chiamate recenti.

Gli avvisi di chiamata persa possono essere inclusi nei registri chiamate, a seconda della configurazione del sistema sulla radio. In ciascuna lista delle chiamate è possibile svolgere le seguenti attività:

- Memorizzare gli alias o gli ID nella lista Contatti
- Eliminare la chiamata
- Eliminare tutte le chiamate
- Visualizzare i dettagli

## Visualizzazione delle chiamate recenti

Seguire la procedura per visualizzare le chiamate recenti sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Registro chiamate**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare la lista dei preferiti. Le opzioni disponibili sono le liste *Perse*, *Risposte* e *Effettuate*.

Premere  per effettuare la selezione.

Sul display viene visualizzata la chiamata più recente.

---

4 Premere  o  fino a visualizzare la lista. È possibile avviare una chiamata privata con l'alias o l'ID attualmente visualizzato sul display premendo il pulsante **PTT**.

---

## Memorizzazione di alias o ID dalla lista delle chiamate

Seguire la procedura per memorizzare gli alias o gli ID sulla radio dalla lista delle chiamate.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare la lista richiesta. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Memorizza. Premere  per effettuare la selezione.

Sul display viene visualizzato un cursore lampeggiante.

---

6 Inserire il resto dei caratteri dell'alias desiderato. Premere  per effettuare la selezione.

È possibile memorizzare un ID senza un alias.

Sul display viene visualizzata una mini notifica positiva.

## Eliminazione di chiamate dalla lista delle chiamate

Seguire la procedura per eliminare le chiamate sulla radio dalla lista delle chiamate.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare la lista richiesta. Premere  per effettuare la selezione.  
Se l'elenco è vuoto:
  - Viene emesso un tono.

- Sul display viene visualizzato Lista vuota.

- 
- 4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

- 
- 5 Premere  o  fino a visualizzare Eliminare voce?. Premere  per effettuare la selezione.

- 
- 6 Eseguire una delle seguenti operazioni:

- Premere  per selezionare Sì ed eliminare la voce.  
Sul display viene visualizzato Entry Deleted (Voce eliminata).
  - Premere  o  fino a visualizzare No.  
Premere  per effettuare la selezione.  
La radio ritorna alla schermata precedente.
-

## Eliminazione di tutte le chiamate dalla lista delle chiamate

Seguire la procedura per eliminare tutte le chiamate sulla radio dalla lista delle chiamate.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare la lista richiesta. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Elimina tutto. Premere  per effettuare la selezione.

---

6 Eseguire una delle seguenti operazioni:

- Premere  per selezionare Sì ed eliminare tutte le voci.  
Sul display viene visualizzata una mini notifica positiva.
- Premere  o  fino a visualizzare No.  
Premere  per effettuare la selezione.  
La radio ritorna alla schermata precedente.

## Visualizzazione dei dettagli dalla lista delle chiamate

Seguire la procedura per visualizzare i dettagli sulla radio dalla lista delle chiamate.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare la lista richiesta. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare *Vis.* dettagli, Premere  per effettuare la selezione. Il display mostra i dettagli.

---

## Funzionamento dell'avviso di chiamata

Gli avvisi di chiamata consentono di avvisare un utente di radio specifico di richiamare non appena è disponibile.

Questa funzione è disponibile solo per gli alias o gli ID degli utenti ed è accessibile dal menu mediante Contatti, composizione manuale o un pulsante programmato

**Accesso rapido.**

In Capacity Max, la funzione Avviso di chiamata consente a un utente della radio o dispatcher di inviare un avviso a un altro utente della radio per chiedergli di richiamare l'utente della radio che ha avviato la chiamata quando questi è disponibile. In questa funzione non viene utilizzata alcuna comunicazione vocale.

Il funzionamento dell'opzione Avviso di chiamata può essere configurato dal rivenditore o dall'amministratore di sistema in due modi:

- La radio è configurata per consentire all'utente di premere il pulsante **PTT** per rispondere direttamente all'utente che ha avviato la chiamata effettuando una chiamata privata.
- La radio è configurata per consentire all'utente di premere il pulsante **PTT** e continuare la comunicazione con un altro talkgroup. Premere il pulsante **PTT** quando viene emesso l'avviso di chiamata non consente all'utente di rispondere a chi ha avviato la chiamata. L'utente deve accedere all'opzione Registro chiamate perse nel menu Reg. chiamate e rispondere all'avviso di chiamata da qui.

Una chiamata privata OACSU (Off Air Call Set-Up) consente all'utente di rispondere immediatamente, mentre una chiamata privata FOACSU (Full Off Air Call Set-Up) richiede la conferma da parte dell'utente. Le chiamate di

tipo OACSU sono, pertanto, consigliate per la funzione Avviso di chiamata. Vedere [Chiamata privata a pagina 79](#).

## Effettuazione di avvisi di chiamata

Seguire la procedura per effettuare avvisi di chiamata sulla radio.

- 1 Premere il pulsante di **accesso rapido** programmato.

Sul display viene visualizzato Avviso di chiamata e l'alias o l'ID dell'utente. Il LED verde si accende.

- 2 Attendere la conferma.

Se si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica positiva.

Se non si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica negativa.

## Effettuazione di avvisi di chiamata dalla lista Contatti

Seguire la procedura per effettuare avvisi di chiamata sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Avviso di chiamata. Premere  per effettuare la selezione.  
Sul display viene visualizzato Avviso di chiamata e l'alias o l'ID dell'utente. Il LED verde si accende.

## 5 Attendere la conferma.

- Se si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica positiva.
- Se non si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica negativa.

possibile rispondere a un avviso di chiamata effettuando una delle seguenti operazioni:

- Premere il pulsante **PTT** e rispondere con una chiamata privata direttamente al chiamante.
- Premere il pulsante **PTT** per continuare le normali comunicazioni del talkgroup. L'avviso di chiamata passa all'opzione Chiamata persa nel Registro chiamate. È possibile rispondere al chiamante dal registro delle chiamate perse.

## Risposta agli avvisi di chiamata

Seguire la procedura per rispondere agli avvisi di chiamata sulla radio.

Alla ricezione di un avviso di chiamata:

- Viene emesso un tono ripetitivo.
- Il LED giallo lampeggia.
- Sul display viene visualizzata la lista delle notifiche, contenente un avviso di chiamata e l'alias o l'ID della radio chiamante.

A seconda della configurazione effettuata dal rivenditore o dall'amministratore di sistema, è

Per ulteriori informazioni, vedere [Lista delle notifiche a pagina 203](#) e [Funzioni del registro chiamate a pagina 135](#).

## Modalità Disattiva audio

La Modalità Muto fornisce all'utente la possibilità di disattivare tutti gli indicatori audio della radio.

Una volta avviata la funzione Modalità Muto, tutti gli indicatori audio sono vengono disattivati ad eccezione delle funzioni con priorità superiore, ad esempio le operazioni di emergenza.

Quando si esce dalla Modalità Muto, nella radio vengono riattivati i toni e le trasmissioni audio in corso.

**NOTA:**

Si tratta di un'opzione acquistabile. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione della Modalità Muto

Seguire la procedura per attivare la Modalità Muto.

Accedere a questa funzione utilizzando il pulsante programmato **Modalità Muto**.

Quando la Modalità Muto è attivata, si verifica quanto segue:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzato Modalità Muto on.
- Il LED rosso inizia a lampeggiare finché la Modalità Muto non viene disattivata.
- Sul display viene visualizzata l'icona **Modalità Muto** nella schermata iniziale.
- L'audio della radio viene disattivato.
- Il Timer modalità Muto inizia il conto alla rovescia della durata configurata.

## Impostazione del Timer modalità Muto

È possibile attivare la Modalità Muto per un periodo prestabilito di tempo impostando il Timer modalità Muto. La durata del timer viene configurata nel menu della radio e va da 0,5 a 6 ore. La Modalità Muto viene disattivata quando il timer scade.

Se il timer viene lasciato sul valore 0, la radio resta in Modalità Muto per un periodo di tempo indefinito finché il pulsante **Modalità Muto** non viene premuto.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.
- 4 Premere  o  fino a visualizzare Timer modalità Muto. Premere  per effettuare la selezione.

- 5 Premere  o  per modificare il valore numerico di ciascuna cifra, quindi premere .

## Uscita dalla Modalità Muto

È possibile uscire automaticamente da questa funzione quando scade il Timer modalità Muto.

Per uscire manualmente dalla Modalità Muto, completare una delle seguenti operazioni:

- Premere il pulsante **Modalità Muto** programmato.
- Premere il pulsante **PTT** su qualsiasi voce.

Quando la Modalità Muto è disattivata, si verifica quanto segue:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato Modalità Muto off.
- Il LED rosso lampeggiante si spegne.
- L'icona **Modalità Muto** scompare dalla schermata iniziale.

- Sulla radio viene riattivato l'audio e ripristinato lo stato dell'altoparlante.
- Se il timer non è scaduto, il Timer modalità Muto viene arrestato.

### NOTA:

È anche possibile uscire dalla Modalità Muto se l'utente trasmette la voce o passa a un canale non programmato.

## Funzionamento in emergenza

L'allarme di emergenza viene utilizzato per indicare una situazione critica. È possibile avviare un'emergenza in qualsiasi momento, anche se è in corso un'attività sul canale corrente.

In Capacity Max, la radio ricevente può supportare solo un singolo allarme di emergenza alla volta. Se avviato, un secondo allarme di emergenza può sovrascrivere il primo.

Quando si riceve un allarme di emergenza, il destinatario può scegliere di eliminarlo e uscire dalla lista allarmi o rispondere premendo il pulsante **PTT** e trasmettendo una chiamata non Emergency Voice.

Il rivenditore o l'amministratore di sistema può impostare la durata della pressione del pulsante programmato

**Emergenza**, che, a differenza della pressione lunga, è simile per tutti gli altri pulsanti:

#### **Pressione breve**

Durata compresa tra 0,05 e 0,75 secondi.

#### **Pressione prolungata**

Durata compresa tra 1 e 3,75 secondi.

Il pulsante **Emergenza** viene assegnato tramite la funzione Emerg. att./Emerg. disatt. Per conoscere in che modo è stato programmato il pulsante **Emergenza**, rivolgersi al rivenditore.

#### **NOTA:**

Qualora, per attivare il Modo Emergenza sia necessaria una breve pressione del pulsante **Emergenza**, premere a lungo il pulsante **Emergenza** per uscire dalla suddetta modalità.

Qualora, per attivare il Modo Emergenza sia necessaria una pressione lunga del pulsante **Emergenza**, esercitare una breve pressione sul pulsante **Emergenza** per uscire dalla suddetta modalità.

La radio supporta tre tipi di allarmi di emergenza:

- Allarme di emergenza
- Allarme di emergenza con chiamata

- Allarme di emergenza con successiva trasmissione voce

Inoltre, ogni allarme dispone delle seguenti opzioni:

#### **Regular**

La radio trasmette un segnale di allarme e mostra indicatori visivi e/o acustici.

#### **Silent**

La radio trasmette un segnale di allarme ma non mostra alcun indicatore visivo e/o acustico. La radio riceve le chiamate senza emettere alcun suono dagli altoparlanti, fino a quando il periodo di trasmissione del *microfono acceso* programmato non è terminato e/o non si preme il pulsante **PTT**.

#### **Silenzioso c/ voce**

La radio trasmette un segnale di allarme senza emettere alcun indicatore visivo o acustico, ma viene emesso un tono attraverso gli altoparlanti in caso di chiamate in arrivo.

#### **NOTA:**

Al pedale di **emergenza** e al pulsante programmato di **emergenza** è possibile assegnare soltanto uno degli allarmi sopraindicati.

## Invio di allarmi di emergenza

Questa funzione consente di inviare un allarme di emergenza, ossia un segnale non vocale, che attiva un indicatore di avviso in un gruppo di radio. Seguire la procedura per inviare allarmi di emergenza sulla radio.

La radio non visualizza indicatori sonori o visivi in modalità di emergenza quando è impostata su Silenzioso.

### 1 Premere il pulsante programmato **Emerg. att.**.

Viene visualizzato uno dei seguenti risultati:

- Sul display vengono visualizzati `Allarmi Tx` e l'alias di destinazione.
- Sul display, vengono visualizzati `Telegr. Tx` e l'alias di destinazione.

Il LED verde si accende. Viene visualizzata l'icona **Emergenza**.

### NOTA:

Se la funzione è programmata, viene emesso un tono per la ricerca di emergenza. Il tono viene disattivato quando la radio trasmette o riceve chiamate vocali e si interrompe quando la radio esce dalla modalità di emergenza. Il Tono ricerca di emergenza può essere programmato dal rivenditore o dall'amministratore di sistema.

### 2 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono di emergenza.
- Il LED verde lampeggia.
- Sul display viene visualizzato `Allarme inviato`.

Se non si ottengono i risultati desiderati dopo aver esaurito tutti i tentativi disponibili:

- Viene emesso un tono.
- Sul display viene visualizzato `Allarme fallito`.

La radio esce dalla modalità Allarme di emergenza e torna alla schermata principale.

#### **NOTA:**

Quando è configurata solo per l'allarme di emergenza, la procedura di emergenza consiste solo nell'invio dell'allarme di emergenza. L'emergenza termina quando viene ricevuta la conferma di ricezione dal sistema o quando i tentativi di accesso al canale sono esauriti.

Durante il funzionamento in modalità di solo allarme di emergenza, all'invio di un allarme di emergenza non vengono associate chiamate vocali.

## Invio di allarmi di emergenza tramite chiamata

Questa funzione consente di inviare un allarme di emergenza tramite chiamata a un gruppo di radio o dispatcher. Alla ricezione della conferma da parte di un'infrastruttura del gruppo, un gruppo di radio può comunicare sul canale di emergenza programmato.

La radio deve essere configurata per gli allarmi di emergenza e le chiamate, al fine di effettuare una chiamata di emergenza in seguito all'allarme.

### 1 Premere il pulsante **Emerg. att.** programmato.

Sul display vengono visualizzati **Allarme TX** e l'alias di destinazione. Viene visualizzata l'icona **Emergenza**. Il LED verde si accende.

#### **NOTA:**

Se la funzione è programmata, viene emesso un tono per la ricerca di emergenza. Il tono viene disattivato quando la radio trasmette o riceve chiamate vocali e si interrompe quando la radio esce dalla modalità di emergenza.

Se si riceve conferma della ricezione dell'allarme di emergenza:

- Viene emesso un tono di emergenza.
- Il LED verde lampeggia.
- Sul display viene visualizzato **Allarme inviato**.
- La radio entra nella modalità di chiamata di emergenza quando sul display vengono visualizzati **Emergenza** e l'alias del gruppo di destinazione.

Se non si riceve conferma della ricezione dell'allarme di emergenza:

- Vengono esauriti tutti i tentativi.
- Viene emesso un tono basso.
- Sul display viene visualizzato `Allarme fallito`.
- La radio esce dalla modalità Allarme di emergenza.

- 
- 2** Premere il pulsante **PTT** per iniziare una trasmissione voce.

Il LED verde si accende. Sul display viene visualizzata l'icona **Chiam. gruppo**.

- 
- 3** Eseguire una delle seguenti operazioni:
- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

- 
- 4** Rilasciare il pulsante **PTT** per ascoltare.
- Il display mostra il chiamante e gli alias del gruppo.
- 

- 5** Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

- 
- 6** Premere il pulsante programmato **Emerg. disatt.** per uscire dal Modo Emergenza.

La radio torna alla schermata principale.

**NOTA:**

A seconda della programmazione della radio, potrebbe essere riprodotto il tono che indica quando è possibile iniziare a parlare. Rivolgersi al rivenditore della radio o all'amministratore di sistema per ulteriori informazioni sulla programmazione della radio per le emergenze.

L'utente che avvia la chiamata di emergenza

può premere  per terminare una chiamata di emergenza in corso. La radio torna allo stato di chiamata inattiva, ma la schermata della chiamata di emergenza resta aperta.

## Invio di allarmi di emergenza con successiva trasmissione della voce

Questa funzione consente di inviare un allarme di emergenza con successiva trasmissione della voce a un gruppo di radio. Il microfono della radio viene attivato automaticamente, consentendo di comunicare con il gruppo di radio senza premere il pulsante **PTT**. Questo

stato di microfono attivato è conosciuto come *microfono acceso*.

**NOTA:**

La radio non è in grado di rilevare un microfono non IMPRES collegato al connettore accessori posteriore.

Se non viene rilevato alcun microfono collegato al connettore programmato specificato, la radio controlla il connettore alternativo. In questo caso, la radio assegna la priorità al microfono rilevato.

Se la modalità Ciclo di emergenza è attivata sulla radio, *microfono acceso* e il periodo di ricezione vengono ripetuti per il tempo programmato. Nella modalità Ciclo di emergenza, le chiamate ricevute vengono emesse attraverso l'altoparlante.

Se si preme il pulsante **PTT** durante il periodo di ricezione programmato, viene emesso il tono di operazione non consentita, che segnala che si deve rilasciare il pulsante **PTT**. La radio ignora la pressione del pulsante **PTT** e resta nel Modo Emergenza.

Se si preme il pulsante **PTT** con il *microfono acceso* e lo si continua a premere anche al termine del periodo previsto per il *microfono acceso*, la radio continua a trasmettere fino a quando non viene rilasciato il pulsante **PTT**.

Se la richiesta di allarme di emergenza ha esito negativo, la radio non riprova a inviarla e attiva direttamente lo stato del *microfono acceso*.

#### NOTA:

Alcuni accessori potrebbero non supportare il *microfono acceso*. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

Seguire la procedura per inviare allarmi di emergenza con successiva trasmissione della voce sulla radio.

- 1 Premere il pulsante programmato **Emerg. att.** o il pedale **Emergenza**.

Viene visualizzato uno dei seguenti risultati:

- Sul display vengono visualizzati **Allarme TX** e l'alias di destinazione.
- Sul display, vengono visualizzati **Telegr. Tx** e l'alias di destinazione.

Il LED verde si accende. Viene visualizzata l'icona **Emergenza**.

- 2 Quando sul display viene visualizzato **Allarme** inviato, parlare chiaramente nel microfono.

La radio interrompe automaticamente la trasmissione:

- Allo scadere della durata della funzione *microfono acceso* e della ricezione delle chiamate, se la modalità Ciclo di emergenza è attivata.
- Allo scadere della durata della funzione *microfono acceso*, se la modalità Ciclo di emergenza è disattivata.

- 3 Premere il pulsante programmato **Emerg. disatt.** per uscire dal Modo Emergenza.

La radio torna alla schermata principale.

## Ricezione di allarmi di emergenza

La radio ricevente può supportare solo un singolo allarme di emergenza alla volta. Se avviato, un secondo allarme di emergenza può sovrascrivere il primo. Seguire la procedura per ricevere e visualizzare gli allarmi di emergenza sulla radio.

Quando si riceve un allarme di emergenza:

- Viene emesso un tono.
- Il LED rosso lampeggia.
- Sul display vengono visualizzati la lista di allarmi di emergenza, l'ID o l'alias del talkgroup di emergenza e l'ID o l'alias della radio trasmittente.

1 Premere  per visualizzare l'allarme.

2 Premere  per visualizzare le opzioni e i dettagli delle azioni della voce nella finestra Lista allarmi.

3 Premere  e selezionare Sì per uscire dalla Lista allarmi.

La radio torna alla schermata principale e viene visualizzata un'**icona di emergenza** nella parte superiore, per indicare l'allarme di emergenza non risolto. L'**icona di emergenza** scompare una volta che la voce nella Lista allarmi viene eliminata.

4 Premere  per accedere al menu.

5 Selezionare **Lista allarmi** per accedere nuovamente alla lista degli allarmi.

6 Viene emesso un tono e il LED rosso lampeggia fino a quando non si esce dalla modalità di emergenza. Tuttavia, è possibile disattivare il tono. Eseguire una delle seguenti operazioni:

- Premere il pulsante **PTT** per chiamare il gruppo delle radio che hanno ricevuto l'allarme di emergenza.
- Premere qualsiasi tasto programmabile.

## Risposta agli allarmi di emergenza

Quando si riceve l'allarme di emergenza, il destinatario può scegliere di eliminarlo e uscire dalla Lista allarmi o rispondere all'allarme di emergenza premendo il pulsante **PTT** e trasmettendo una chiamata non Emergency Voice. Seguire la procedura per rispondere agli allarmi di emergenza sulla radio.

1 Se la funzione Indicazione allarme emergenza è attivata, la lista di allarmi di emergenza viene visualizzata quando la radio riceve un allarme di

emergenza. Premere  o  fino a visualizzare l'alias o l'ID desiderato.

- 
- 2 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per trasmettere una chiamata vocale non Emergency Voice allo stesso gruppo a cui era destinato l'allarme di emergenza.

Il LED verde si accende.

- 
- 3 Eseguire una delle seguenti operazioni:
- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.
- 
- 4 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio che ha avviato l'emergenza risponde:

- Il LED rosso lampeggia.
- Sul display vengono visualizzati l'icona **Chiamata di emergenza**, l'ID o l'alias del talkgroup di emergenza e l'ID o l'alias della radio trasmittente.

**NOTA:**

Se la funzione Indicazione chiamata di emergenza non è attivata, sul display vengono visualizzati l'icona **Chiam. gruppo**, l'ID o l'alias del talkgroup di emergenza e l'ID o l'alias della radio trasmittente.

---

## Risposta agli allarmi di emergenza tramite chiamata

Seguire la procedura per rispondere agli allarmi di emergenza tramite chiamata sulla radio.

Alla ricezione di una chiamata di emergenza:

- Il tono della chiamata di emergenza viene emesso se la funzione Indicazione chiamata emergenza e il tono di decodifica della chiamata di emergenza sono attivati. Il tono della chiamata di emergenza non verrà emesso se è attivata solo la funzione Indicazione chiamata emergenza.

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata di emergenza**.
- Sulla riga di testo vengono visualizzati l'ID o l'alias del talkgroup di emergenza e l'ID o l'alias della radio trasmittente.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.
  - 1 Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

Il LED verde si accende.
  - 2 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
  - 3 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio che ha avviato l'emergenza risponde:

    - Il LED rosso lampeggia.

- Sul display vengono visualizzati l'icona **Chiamata di emergenza**, l'ID o l'alias del talkgroup di emergenza e l'ID o l'alias della radio trasmittente.

**NOTA:**

Se la funzione Indicazione chiamata di emergenza non è attivata, sul display vengono visualizzati l'icona **Chiam. gruppo**, l'ID o l'alias del talkgroup di emergenza e l'ID o l'alias della radio trasmittente.

---

## Messaggi di stato

Questa funzione consente all'utente di inviare messaggi di stato ad altre radio.

L'elenco Stato rapido viene configurato mediante CPS-RM e include fino a un massimo di 99 stati.

Ciascun messaggio di stato può contenere fino a 16 caratteri.

**NOTA:**

Ogni stato ha un valore digitale corrispondente compreso tra 0 e 99. Per ciascuno stato è possibile specificare un alias per farvi riferimento più facilmente.

## Invio di messaggi di stato

Completare la procedura descritta di seguito per inviare un messaggio di stato.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante di **accesso rapido** programmato. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Stato.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Stato rapido. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato o l'ID o l'alias di gruppo.  
Premere  per effettuare la selezione.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Il LED si spegne.
- Prima di tornare alla schermata Stato rapido sul display viene visualizzata momentaneamente una mini notifica positiva.
- Sul display viene visualizzato  accanto al messaggio di stato inviato.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Il LED si spegne.
- Prima di tornare alla schermata Stato rapido sul display viene visualizzata momentaneamente una notifica di errore.

## Invio di un messaggio di stato utilizzando un pulsante programmabile

Seguire la procedura per inviare un messaggio di stato utilizzando un pulsante programmabile.

1 Premere il pulsante programmato **Messaggio di stato**.

---

2 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione. Viene visualizzata la lista dei contatti.

---

3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato o l'ID o l'alias di gruppo. Premere  per effettuare la selezione.

---

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Il LED si spegne.

- Prima di tornare alla schermata *Stato rapido* sul display viene visualizzata momentaneamente una mini notifica positiva.
- Sul display viene visualizzato  accanto al messaggio di stato inviato.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Il LED si spegne.
- Prima di tornare alla schermata *Stato rapido* sul display viene visualizzata momentaneamente una notifica di errore.

## Invio di un messaggio di stato dalla lista Contatti

Seguire la procedura per inviare un messaggio di stato utilizzando la lista Contatti.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare *Contatti*. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato o l'ID o l'alias di gruppo.

Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare *Invia stato*. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.

---

- Viene emesso un tono indicatore positivo.
- Il LED si spegne.
- Prima di tornare alla schermata *Stato rapido* sul display viene visualizzata momentaneamente una mini notifica positiva.
- Sul display viene visualizzato  accanto al messaggio di stato inviato.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Il LED si spegne.
- Prima di tornare alla schermata *Stato rapido* sul display viene visualizzata momentaneamente una notifica di errore.

## Invio del messaggio di stato utilizzando la composizione manuale

Seguire la procedura per inviare un messaggio di stato utilizzando la composizione manuale.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare *Contatti*. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Comp. man.*. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Numero radio**. Premere  per effettuare la selezione.

---

5 Inserire l'ID o l'alias dell'utente richiesto, o l'ID e l'alias del gruppo, quindi premere  per continuare.

---

6 Premere  o  fino a visualizzare **Invia stato**. Premere  per effettuare la selezione.

---

7 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.

---

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Il LED si spegne.
- Prima di tornare alla schermata **Stato rapido** sul display viene visualizzata momentaneamente una mini notifica positiva.

- Sul display viene visualizzato  accanto al messaggio di stato inviato.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Il LED si spegne.
- Prima di tornare alla schermata **Stato rapido** sul display viene visualizzata momentaneamente una notifica di errore.

## Visualizzazione dei messaggi di stato

Seguire la procedura per visualizzare i messaggi di stato.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Stato**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Inbox**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.
- Il contenuto del messaggio di stato viene visualizzato all'utente della radio.
- 

I messaggi di stato ricevuti possono anche essere visualizzanti accedendo all'elenco delle notifiche. Per ulteriori informazioni, vedere [Lista delle notifiche a pagina 203](#).

## Risposta ai messaggi di stato

Seguire la procedura per rispondere ai messaggi di stato.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Stato. Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare Inbox. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.
- 

- 5 Viene visualizzato il contenuto dello stato. Premere  per effettuare la selezione.
- 

- 6 Premere  o  fino a visualizzare Rispondi. Premere  per effettuare la selezione.
- 

- 7 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.
- 

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Il LED si spegne.

- Prima di tornare alla schermata *Inbox* sul display viene visualizzata una mini notifica positiva.
- Sul display viene visualizzato ✓ accanto al messaggio di stato inviato.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Il LED si spegne.
- Prima di tornare alla schermata *Inbox* sul display viene visualizzata momentaneamente una notifica di errore.

## Eliminazione di un messaggio di stato

Seguire la procedura per eliminare un messaggio di stato dalla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare *Stato*.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Inbox*.  
Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il messaggio di stato desiderato. Premere  per effettuare la selezione.

---

5 Viene visualizzato il contenuto dello stato. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare *Elimina*.  
Premere  per effettuare la selezione.

---

7 Premere  o  fino a visualizzare *Sì*.  
Premere  per effettuare la selezione.

---

- Prima di tornare alla schermata *Inbox* sul display viene visualizzata una mini notifica positiva.

## Eliminazione di tutti i messaggi di stato

Seguire la procedura per eliminare tutti i messaggi di stato dalla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Stato.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Inbox.  
Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Elimina tutto. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Sì.  
Premere  per effettuare la selezione.

---

- Sul display viene visualizzato Lista vuota.

## Messaggistica di testo

La radio è in grado di ricevere dati, ad esempio un messaggio di testo, da un'altra radio o da un'applicazione messaggio di testo.

Sono disponibili due tipi di messaggi di testo: messaggi di testo brevi DMR (Digital Mobile Radio) e messaggi di testo. La lunghezza massima di un messaggio di testo breve DMR è di 23 caratteri. La lunghezza massima di un messaggio di testo è di 280 caratteri (compresa la riga dell'oggetto). La riga dell'oggetto viene visualizzata solo quando si ricevono messaggi da applicazioni e-mail.

### NOTA:

La lunghezza massima in caratteri è valida solo per i modelli con l'ultima versione del software e dell'hardware. Per i modelli di radio con versioni del software e dell'hardware precedenti, la lunghezza massima di un messaggio di testo è di 140 caratteri. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

per la lingua araba, la direzione dell'immissione del testo è da destra verso sinistra.

## Messaggi di testo

I messaggi di testo sono conservati in una casella di posta e vengono ordinati per data di ricezione a partire da quella più recente.

La schermata corrente viene chiusa alla scadenza del

tempo di inattività. la pressione prolungata di  consente di tornare in qualsiasi momento alla schermata principale.

## Visualizzazione dei messaggi di testo

Seguire la procedura per visualizzare i messaggi di testo sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.

Se la casella di posta in arrivo è vuota:

- Sul display viene visualizzato **Lista vuota**.
- Viene emesso un tono, se il tono della tastiera è attivato.

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

## Visualizzazione dei messaggi di testo con stato di telemetria

Seguire la procedura per visualizzare un messaggio di testo con stato di telemetria dalla Inbox.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Inbox.  
Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

È impossibile rispondere a un messaggio di testo con stato di telemetria.

Sul display viene visualizzato Telemetria:  
<Messaggio di testo con stato>.

- 5 Premere a lungo  per tornare alla schermata principale.

## Risposta ai messaggi di testo

Seguire la procedura per rispondere a un messaggio di testo sulla radio.

Quando si riceve un messaggio di testo:

- Sul display viene visualizzata la lista delle notifiche, con l'alias o l'ID del mittente.

Premere  per effettuare la selezione.  
Sul display viene visualizzato il messaggio di testo. Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.
- Premere  o  fino a visualizzare Leggi dopo. Premere  per effettuare la selezione.  
La radio torna alla schermata in cui si trovava prima della ricezione del messaggio di testo.
- Premere  o  fino a visualizzare Elimina. Premere  per effettuare la selezione.

2 Eseguire una delle seguenti operazioni:

- Premere  per tornare alla Inbox.
- Premere  una seconda volta per rispondere, inoltrare o eliminare il messaggio di testo.

## Risposta ai messaggi di testo con un testo predefinito

Seguire la procedura per rispondere ai messaggi di testo con messaggi di testo predefinito sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Msg testo**. Procedere al passaggio 3.
- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

5 Premere  per accedere al sottomenu.

6 Premere  o  fino a visualizzare **Rispondi**.  
Premere  per effettuare la selezione.

7 Premere  o  fino a visualizzare **Risposta rapida**. Premere  per effettuare la selezione.

8 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

---

9 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica negativa.
  - La radio torna alla schermata dell'opzione Reinvia.
- 

## Rinvio di messaggi di testo

Seguire la procedura per rinviare messaggi di testo sulla radio.

Quando ci si trova nella schermata dell'opzione Reinvia:

Premere  per rinviare lo stesso messaggio al medesimo alias o ID dell'utente o del gruppo.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
  - La radio torna alla schermata dell'opzione Reinvia.
-

## Inoltro di messaggi di testo

Seguire la procedura per inoltrare messaggi di testo sulla radio.

Quando ci si trova nella schermata dell'opzione **Reinvia:**

1 Premere  o  fino a visualizzare **Inoltra**, quindi premere  per inviare il messaggio all'alias o all'ID di un altro terminale radio o gruppo.

2 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono.
- Sul display viene visualizzata una mini notifica negativa.

### NOTA:

È anche possibile selezionare manualmente l'indirizzo della radio di destinazione (vedere [Inoltro di messaggi di testo utilizzando la composizione manuale a pagina 459](#)).

## Inoltro di messaggi di testo utilizzando la composizione manuale

Seguire la procedura per inoltrare messaggi di testo utilizzando la composizione manuale sulla radio.

1 Premere  o  fino a visualizzare **Inoltra**. Premere  per effettuare la selezione.

2 Premere  per rinviare lo stesso messaggio a un altro alias o ID dell'utente o del gruppo.

- 3 Premere  o  fino a visualizzare `Comp. man.`. Premere  per effettuare la selezione. Sul display viene visualizzato `Numero radio:`.

- 4 Inserire l'ID dell'utente, quindi premere  per continuare. Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

- 5 Attendere la conferma.
- In caso di esito positivo:
- Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica positiva.
- In caso di esito negativo:
- Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica negativa.

## Modifica dei messaggi di testo

Selezionare `Modifica` per modificare il messaggio.

### NOTA:

Se è presente una riga dell'oggetto (in caso di messaggi ricevuti da un'applicazione e-mail), non è possibile modificarla.

- 1 Premere  o  fino a visualizzare `Modifica`. Premere  per effettuare la selezione. Sul display viene visualizzato un cursore lampeggiante.
- 2 Modificare il messaggio utilizzando la tastiera.
- premere  per spostarsi di uno spazio a sinistra.
  - Premere  o  per spostarsi di uno spazio a destra.
  - Premere  per eliminare i caratteri indesiderati.

- Premere a lungo per modificare il metodo di immissione del testo.

**3** Premere al termine della composizione del messaggio.

**4** Eseguire una delle seguenti operazioni:

- Premere o fino a visualizzare **Invia** e premere per inviare il messaggio.
- Premere o fino a visualizzare **Salva** e premere per salvare il messaggio nella cartella Bozze.

**3** Premere o fino a visualizzare **Componi**. Premere per effettuare la selezione. Viene visualizzato un cursore lampeggiante.

**4** Digitare il messaggio utilizzando la tastiera.

Premere per spostarsi di uno spazio a sinistra.

Premere o per spostarsi di uno spazio a destra.

Premere per eliminare i caratteri indesiderati.

Premere a lungo  per modificare il metodo di immissione del testo.

- 5 Premere  al termine della composizione del messaggio.

Eseguire una delle seguenti operazioni:

- Premere  per inviare il messaggio.
- Premere . Premere  o  per scegliere se modificare, eliminare o salvare il messaggio. Premere  per effettuare la selezione.

## Invio di messaggi di testo

Seguire la procedura per inviare un messaggio di testo sulla radio.

Si presuppone che sia abbia pronto un messaggio di testo appena scritto o un messaggio di testo salvato.

Selezionare il destinatario del messaggio. Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare Comp. man. Premere  per effettuare la selezione. Immettere l'ID dell'utente. Sulla prima riga del display, viene visualizzata l'opzione Numero radio:. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere l'ID o l'alias dell'utente. Premere .

Sul display, viene visualizzata una mini notifica temporanea, per confermare che è in corso l'invio del messaggio.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display, viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono basso.

- Sul display viene visualizzata una mini notifica negativa.
- Il messaggio viene spostato nella cartella Msg inviati.
- Il messaggio viene contrassegnato con un'icona Non inviato.

**NOTA:**

Per un messaggio di testo appena scritto, la radio torna alla schermata con l'opzione Reinvia.

## Eliminazione di messaggi di testo dalla casella di posta

Seguire la procedura per eliminare i messaggi di testo dalla casella Inbox sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.

Se la casella di posta in arrivo è vuota:

- Sul display viene visualizzato **Lista vuota**.
- Viene emesso un tono.

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

- 5 Premere  per accedere al sottomenu.

- 6 Premere  o  fino a visualizzare **Elimina**.  
Premere  per effettuare la selezione.

7 Premere  o  fino a visualizzare Sì.

Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica positiva. La radio torna alla Inbox.

---

## Eliminazione di tutti i messaggi di testo dalla casella di posta

Seguire la procedura per eliminare tutti i messaggi di testo dalla casella Inbox sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.
- 

2 Premere  o  fino a visualizzare Messaggi.

Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Inbox.

Premere  per effettuare la selezione.

Se la casella di posta in arrivo è vuota:

- Sul display viene visualizzato *Lista vuota*.
  - Viene emesso un tono.
- 

4 Premere  o  fino a visualizzare *Elimina tutto*. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Sì.

Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica positiva.

---

## Messaggi di testo inviati

Quando un messaggio è stato inviato a un'altra radio, viene salvato nella cartella Msg inviati. Il messaggio di testo inviato per ultimo viene sempre aggiunto all'inizio della lista

Msg inviati. È possibile inviare, inoltrare, modificare o eliminare un messaggio di testo inviato.

Nella cartella Msg inviati vengono memorizzati gli ultimi 30 messaggi inviati. Quando la cartella è piena, il successivo messaggio inviato sostituirà automaticamente il messaggio di testo più vecchio della cartella.

se si esce dalla schermata di invio messaggi durante l'invio del messaggio, la radio aggiorna lo stato del messaggio nella cartella Msg inviati senza fornire alcuna indicazione audio o visiva.

Se la modalità operativa viene cambiata o la radio viene spenta prima che lo stato del messaggio sia stato aggiornato nella cartella Msg inviati, la radio non è in grado di inviare i messaggi in corso e li contrassegnerà automaticamente con l'icona **Non inviato**.

La radio supporta un numero massimo di cinque messaggi in corso alla volta. Durante l'invio dei messaggi, la radio non è in grado di inviarne altri e li contrassegna automaticamente con l'icona **Non inviato**.

Se si preme a lungo  in qualsiasi momento, la radio torna alla schermata principale.

#### NOTA:

Un messaggio inviato può essere solo modificato, inoltrato o eliminato se il tipo di canale (digitale convenzionale o Capacity Plus) non corrisponde.

## Visualizzazione dei messaggi di testo inviati

Seguire la procedura per visualizzare i messaggi di testo inviati sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare **Messaggi**. Premere  per effettuare la selezione.
- 
- 3 Premere  o  fino a visualizzare **Msg inviati**. Premere  per effettuare la selezione. Se la cartella Msg inviati è vuota:

- Sul display viene visualizzato *Lista vuota*.
- Viene emesso un tono basso, se il tono della tastiera è attivato.

- 
- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

L'icona nell'angolo superiore destro della schermata indica lo stato del messaggio. Vedere la [Icane dei messaggi inviati](#).

---

## Invio di messaggi di testo inviati

Seguire la procedura per inviare un messaggio di testo inviato sulla radio.

Durante la visualizzazione di un messaggio inviato:

- 1 Premere  .
- 
- 2 È possibile reinviare o inoltrare il messaggio di testo inviato. Eseguire una delle seguenti operazioni:

-  fino a visualizzare *Reinvia*. Premere  per effettuare la selezione.
-  fino a visualizzare *Inoltra*. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

---

- 3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica negativa.
  - La radio passa alla schermata dell'opzione *Reinvia*. Per ulteriori informazioni, vedere [Rinvio di messaggi di testo a pagina 163](#).
-

## Eliminazione di messaggi di testo inviati dalla cartella Msg inviati

Seguire la procedura per eliminare i messaggi di testo inviati dalla cartella Msg inviati sulla radio.

Durante la visualizzazione di un messaggio inviato:

- 1 Premere  .

---

- 2 Premere  o  fino a visualizzare **Elimina**.  
Premere  per effettuare la selezione.

## Eliminazione di tutti i messaggi di testo inviati dalla cartella Msg inviati

Seguire la procedura per eliminare tutti i messaggi di testo inviati dalla cartella Msg inviati sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Msg inviati**. Premere  per effettuare la selezione.  
Se la cartella Msg inviati è vuota:
  - Sul display viene visualizzato **Lista vuota**.
  - Viene emesso un tono.

- 4 Premere  o  fino a visualizzare **Elimina tutto**. Premere  per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:
  - Premere  o  fino a visualizzare **Sì**.  
Premere  per effettuare la selezione.  
Sul display viene visualizzata una mini notifica positiva.

- Premere  o  fino a visualizzare No.  
Premere  per effettuare la selezione.  
La radio ritorna alla schermata precedente.
- 

## Messaggi di testo salvati

È possibile salvare un messaggio di testo per inviarlo in un momento successivo.

Se, durante la scrittura/modifica di un messaggio di testo, si preme il pulsante **PTT** o si cambia modalità facendo sì che la radio esca dalla modalità di scrittura/modifica, il messaggio di testo verrà salvato automaticamente nella cartella Bozze.

Il messaggio di testo salvato per ultimo verrà sempre aggiunto all'inizio della lista Bozze.

Nella cartella Bozze è possibile salvare gli ultimi 10 messaggi. Quando la cartella è piena, al salvataggio del messaggio di testo successivo, quello meno recente verrà sostituito automaticamente.

## Visualizzazione dei messaggi di testo salvati

Seguire la procedura per visualizzare i messaggi di testo salvati sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
  - 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.
  - 3 Premere  o  fino a visualizzare **Bozze**.  
Premere  per effettuare la selezione.
  - 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.
-

## Modifica dei messaggi di testo salvati

Seguire la procedura per modificare il messaggio di testo salvato sulla radio.

- 1 Premere  durante la visualizzazione del messaggio.

---

- 2 Premere  o  fino a visualizzare *Modifica*.  
Premere  per effettuare la selezione.  
Viene visualizzato un cursore lampeggiante.

---

- 3 Digitare il messaggio utilizzando la tastiera.  
  
Premere  per spostarsi di uno spazio a sinistra.  
  
Premere  o  per spostarsi di uno spazio a destra.  
  
Premere  per eliminare i caratteri indesiderati.  
  
Premere a lungo  per modificare il metodo di immissione del testo.

---

- 4 Premere  al termine della composizione del messaggio.

Eeguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare *Invia*.  
Premere  per inviare il messaggio.
  - Premere . Premere  o  per scegliere se salvare o eliminare il messaggio.  
Premere  per effettuare la selezione.
- 

## Eliminazione dei messaggi di testo salvati nella cartella Bozze

Seguire la procedura per eliminare i messaggi di testo salvati nella cartella Bozze sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
-

2 Premere  o  fino a visualizzare **Messaggi**.

Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Bozze**.

Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Elimina**.

Premere  per eliminare il messaggio di testo.

---

## Messaggi di testo predefiniti

La radio supporta un massimo di 50 messaggi di testo predefiniti programmati dal rivenditore.

È possibile modificare un messaggio predefinito prima di inviarlo.

## Invio di messaggi di testo predefiniti

Seguire la procedura per inviare messaggi di testo predefiniti sulla radio a un alias predefinito.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere il pulsante di **accesso rapido** programmato. Continuare con [passaggio 6](#). Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.
  - Premere  per accedere al menu.
- 

2 Premere  o  fino a visualizzare **Messaggi**.

Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Testo**

predefinito. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il messaggio di testo predefinito desiderato. Premere  per effettuare la selezione.

5 Attenersi alla seguente procedura per selezionare il destinatario e inviare il messaggio.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

6 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

- La radio passa alla schermata dell'opzione **Reinvia**. Per ulteriori informazioni, vedere [Rinvio di messaggi di testo a pagina 163](#).

---

## Configurazione dell'immissione di testo

La radio consente di configurare testo differente.

Per l'immissione di testo è possibile configurare le impostazioni seguenti sulla radio:

- Prediz. parola
- Correttore ortografico
- Maiusc frase
- Diz. personale

La radio supporta i seguenti metodi di immissione di testo:

- Numeri
- Simboli
- Lingua predittiva o multipressione
- (se impostata)

**NOTA:**

Premere  in qualsiasi momento per tornare alla schermata precedente o premere a lungo  per tornare alla schermata iniziale. La schermata corrente viene chiusa alla scadenza del tempo di inattività.

## Attivazione o disattivazione di Corrett. ortogr.

Consente di scegliere parole alternative quando il dizionario integrato non riconosce il termine immesso nell'editor di testo.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost.**  
**radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Immetti**  
**testo**. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare **Corrett.**  
**ortogr.**. Premere  per effettuare la selezione.

---

- 6 Eseguire una delle seguenti operazioni:
  - Premere  o  fino a visualizzare **Corrett.**  
**ortogr.**. Premere  per effettuare la selezione.
  - Premere per abilitare **Corrett. ortogr.** Se questa opzione è attivata,  viene visualizzato accanto a **Abilitato**.
  - Premere per disabilitare **Corrett. ortogr.** Se questa opzione è disabilitata,  non viene più visualizzato accanto a **Abilitato**.

---

## Attivazione o disattivazione di Prediz. parola

**Prediz. parola** La radio è in grado di memorizzare le sequenze di parole utilizzate più spesso. Dopo che l'utente ha immesso la prima parola di una sequenza comune nell'editor di testo, viene suggerita la parola successiva da utilizzare.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Prediz. parola. Premere  per effettuare la selezione.

---

- 6 Eseguire una delle seguenti operazioni:
  - Premere  per attivare Prediz. parola. Se questa opzione è attivata, ✓ viene visualizzato accanto a Abilitato.
  - Premere  per disattivare il controllo dinamico della distorsione del microfono. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a Abilitato.

---

## Maiusc frase

Questa funzione viene utilizzata per inserire automaticamente l'iniziale maiuscola della prima parola di ogni frase.

- 1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Maiusc frase. Premere  per effettuare la selezione.

---

6 Eseguire una delle seguenti operazioni:

- Premere  per attivare la funzione Maiusc frase. Se questa opzione è attivata, ✓ viene visualizzato accanto a Abilitato.

- Premere  per disattivare la funzione Maiusc frase. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a Abilitato.
- 

## Visualizzazione delle parole personalizzate

È possibile aggiungere le proprie parole personalizzate nel dizionario integrato della radio. La radio le conserva in un elenco.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare Elenco parole. Premere  per effettuare la selezione.  
Sul display viene visualizzato l'elenco delle parole personalizzate.

---

## Modifica delle parole personalizzate

È possibile modificare le parole personalizzate salvate nella radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare Elenco parole. Premere  per effettuare la selezione.  
Sul display, vengono visualizzate le parole personalizzate.

---

7 Premere  o  fino a visualizzare la parola desiderata. Premere  per effettuare la selezione.

---

8 Premere  o  fino a visualizzare *Modifica*. Premere  per effettuare la selezione.

---

9 Per modificare la parola personalizzata, utilizzare la tastiera.

- Premere  per spostarsi di uno spazio a sinistra.
  - Premere  per spostarsi di uno spazio a destra.
  - Premere il tasto  per cancellare i caratteri indesiderati.
  - Premere a lungo  per modificare il metodo di immissione del testo.
- 

10 Premere  dopo l'inserimento della parola personalizzata.

---

Sul display, viene visualizzata una mini notifica temporanea che conferma il salvataggio della parola personalizzata.

- Se l'operazione va a buon fine, viene emesso un tono e sul display viene visualizzata una mini notifica positiva.
- Se l'operazione non riesce, viene emesso un tono a basso volume e sul display viene visualizzata una mini notifica negativa.

## Aggiunta di parole personalizzate

È possibile aggiungere parole personalizzate al dizionario della radio integrato.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare *Utilità*. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost.** radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Immetti** testo. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare **Diz.** personale. Premere  per effettuare la selezione.

6 Premere  o  fino a visualizzare **Aggiungi** nuova. Premere  per effettuare la selezione.  
Sul display, vengono visualizzate le parole personalizzate.

7 Per modificare la parola personalizzata, utilizzare la tastiera.

- Premere  per spostarsi di uno spazio a sinistra.

- Premere  per spostarsi di uno spazio a destra.
- Premere il tasto  per cancellare i caratteri indesiderati.
- Premere a lungo  per modificare il metodo di immissione del testo.

8 Premere  dopo l'inserimento della parola personalizzata.

Sul display, viene visualizzata una mini notifica temporanea che conferma il salvataggio della parola personalizzata.

- Se l'operazione va a buon fine, viene emesso un tono e sul display viene visualizzata una mini notifica positiva.
- Se l'operazione non riesce, viene emesso un tono a basso volume e sul display viene visualizzata una mini notifica negativa.

## Eliminazione di una parola personalizzata

Seguire la procedura per eliminare le parole personalizzate salvate nella radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.

---

- 6 Premere  o  fino a visualizzare la parola desiderata. Premere  per effettuare la selezione.

---

- 7 Premere  o  fino a visualizzare Elimina. Premere  per effettuare la selezione.

---

- 8 Scegliere una delle seguenti opzioni:
  - In Eliminare la voce?, premere  per selezionare Sì. Sul display viene visualizzato Entry Deleted (Voce eliminata).
  - Premere  o  fino a visualizzare No. Premere  per tornare alla schermata precedente.

---

## Eliminazione di tutte le parole personalizzate

Seguire la procedura per eliminare tutte le parole personalizzate dal dizionario integrato della radio.

- 1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare Elimina tutto. Premere  per effettuare la selezione.

---

7 Eseguire una delle seguenti operazioni:

- In Eliminare la voce?, premere  per selezionare Sì. Sul display viene visualizzato Tutte le voci eliminate.
  - Premere  o  fino a visualizzare No per tornare alla schermata precedente. Premere  per effettuare la selezione.
- 

## Job Ticket

Questa funzione consente alla radio di ricevere messaggi dal dispatcher che elencano le attività da eseguire.

### NOTA:

Questa funzione può essere personalizzata tramite CPS in base alle esigenze dell'utente. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

Vi sono due cartelle contenenti diversi Job Ticket:

### Cartella Attività

Job Ticket personalizzati assegnati all'ID utente che ha effettuato l'accesso.

### Cartella Attività cond.

Job Ticket condivisi assegnato a un gruppo di utenti.

È possibile rispondere ai Job Ticket in modo da ordinarli in cartelle Job Ticket. Per impostazione predefinita, le cartelle sono **Tutti**, **Nuovi**, **Avviati** e **Completati**. Per aggiungere 10 cartelle, contattare il rivenditore o l'amministratore di sistema.

#### NOTA:

I Job Ticket sono conservati anche dopo lo spegnimento e la successiva riaccensione della radio.

Tutti i Job Ticket si trovano nella cartella **Tutti**. A seconda di come è stata programmata la radio, i Job Ticket sono ordinati in base al livello di priorità, seguito dall'ora di ricezione. I Job Ticket nuovi, con modifiche recenti allo stato e con priorità più alta sono elencati per primi. Una volta raggiunto il numero massimo di Job Ticket, il Job Ticket successivo sostituisce automaticamente l'ultimo elencato nella radio. La radio supporta un massimo di 100 o 500 Job Ticket, a seconda del modello di radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema. La radio rileva ed elimina automaticamente i Job Ticket duplicati con lo stesso ID.

In base all'importanza dei Job Ticket, il dispatcher aggiunge loro un livello di priorità. Sono disponibili tre livelli di priorità: Priorità 1, Priorità 2 e Priorità 3. Il livello 1 è il più

alto e il livello 3 il più basso. Vi sono anche Job Ticket senza priorità.

La radio viene aggiornata di conseguenza quando il dispatcher effettua le seguenti operazioni:

- Modifica al contenuto dei Job Ticket.
- Aggiunta o modifica del livello di priorità dei Job Ticket.
- Spostamento dei Job Ticket da una cartella a un'altra.
- Annullamento dei Job Ticket.

## Accesso alla cartella Job Ticket

Seguire la procedura per accedere alla cartella Job Ticket.

### 1 Eseguire una delle seguenti operazioni:

- Premere il pulsante **Job Ticket** programmato. Continuare con [passaggio 3](#).
- Premere  per accedere al menu.

### 2

Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il job ticket desiderato. Premere  per effettuare la selezione.

---

## Accesso o disconnessione dal server remoto

Questa funzione consente di effettuare l'accesso e la disconnessione dal server remoto utilizzando l'ID utente.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Accedi**.  
Premere  per effettuare la selezione.

Se è stato già effettuato l'accesso, il menu visualizza **Disconnessione**.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

---

3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Creazione dei job ticket

La radio è in grado di creare Job Ticket, basati su un template e di inviare compiti da eseguire.

È necessario il software di programmazione CPS per configurare il template di Job Ticket.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Crea ticket. Premere  per effettuare la selezione.

## Risposta ai job ticket

Seguire la procedura per rispondere ai job ticket sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il job ticket desiderato. Premere  per effettuare la selezione.

---

- 5 Premere di nuovo  per accedere al sottomenu. È anche possibile premere il tasto numerico corrispondente (1-9) per attivare l'opzione **Risp. predef.**

---

- 6 Premere  o  fino a visualizzare il job ticket desiderato. Premere  per effettuare la selezione.  
  
Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

**7** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Invio di job ticket tramite un modello Job Ticket

Se la radio è configurata con un modello Job Ticket, attenersi alla seguente procedura per inviare il job ticket.

- 1** Utilizzare la tastiera per digitare il numero della stanza richiesto. Premere  per effettuare la selezione.
- 

- 2** Premere  o  fino a visualizzare Stato stanza. Premere  per effettuare la selezione.
- 

- 3** Premere  o  fino a visualizzare l'opzione desiderata. Premere  per effettuare la selezione.
- 

- 4** Premere  o  fino a visualizzare Invia. Premere  per effettuare la selezione.  
Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.
- 

- 5** Attendere la conferma.  
In caso di esito positivo:
  - Viene emesso un tono indicatore positivo.
  - Sul display viene visualizzata una mini notifica positiva.
 In caso di esito negativo:
  - Viene emesso un tono indicatore negativo.

- Sul display viene visualizzata una mini notifica negativa.

---

## Invio di job ticket tramite più modelli Job Ticket

Se la radio è configurata con più modelli Job Ticket, attenersi alla seguente procedura per inviare i job ticket.

- 1 Premere  o  fino a visualizzare l'opzione desiderata. Premere  per effettuare la selezione.

- 2 Premere  o  fino a visualizzare **Invia**. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

- 3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.

[Invia feedback](#)

- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

---

## Eliminazione dei job ticket

Seguire la procedura per eliminare i job ticket sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante **Job Ticket** programmato. Continuare con il [passaggio 4](#).
  - Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare **Job Ticket**. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare la cartella Tutti. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare il Job Ticket desiderato. Premere  per effettuare la selezione.

---

6 Premere di nuovo  durante la visualizzazione del Job Ticket.

---

7 Premere  o  fino a visualizzare **Elimina**. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

---

8 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Eliminazione di tutti i Job Ticket

Seguire la procedura per eliminare tutti i Job Ticket sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante **Job Ticket** programmato. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.
-

2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare la cartella Tutti. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare Elimina tutto. Premere  per effettuare la selezione.

6 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Sì. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica positiva.

- Premere  o  fino a visualizzare No. Premere  per effettuare la selezione. La radio ritorna alla schermata precedente.

## Privacy

Questa funzione utilizza una tecnica di scrambling basata su software e consente di evitare che utenti non autorizzati sintonizzati su un canale possano ascoltare le conversazioni. Lo scrambling non viene però effettuato sulle porzioni di segnalazione e identificazione utente di una trasmissione.

Per inviare una trasmissione con funzione Privacy attivata, tale funzione deve essere abilitata sul canale su cui si trasmette. Questo requisito non è tuttavia necessario per la ricezione di una trasmissione. Mentre è sintonizzata su un canale abilitato per la privacy, la radio è in grado di ricevere trasmissioni chiare (decodificate).

La radio supporta solo la funzione Privacy avanzata. Per decodificare una chiamata con funzione Privacy attivata o una trasmissione dati, la radio deve essere programmata in modo da avere lo stesso valore e ID della chiave (per la privacy avanzata) della radio trasmittente.

Se la radio riceve una chiamata codificata con diversi valori e ID della chiave, non si sentirà nulla per Privacy avanzata.

Su un canale abilitato per la privacy, la radio è in grado di ricevere chiamate chiare o decodificate, a seconda di come è stata programmata. Inoltre, la radio può riprodurre o meno un tono di attenzione a seconda di come è programmata.

**NOTA:**

Si tratta di una funzionalità non disponibile per i canali della banda cittadina che si trovano nella stessa frequenza.

Il LED si accende in verde durante la trasmissione e lampeggia rapidamente durante la ricezione di una trasmissione con funzione Privacy attivata da parte della radio.

**NOTA:**

Alcuni modelli di radio potrebbero non offrire la funzione Privacy o utilizzare una configurazione diversa. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione o disattivazione della privacy

Seguire la procedura per l'attivazione e disattivazione della privacy sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Privacy**. Saltare i passaggi riportati di seguito.
  - Premere  per accedere al menu.

---
- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Privacy**.  
Premere  per effettuare la selezione.

---

- 5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Attivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a On.
- Premere  o  fino a visualizzare Disattivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a Off.

## Inibizione risp.

Questa funzione consente di impedire alla radio di rispondere a eventuali trasmissioni in entrata.

### NOTA:

Si tratta di un'opzione acquistabile. Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

Se attivata, la radio non genera alcuna trasmissione in uscita in risposta a trasmissioni in entrata, ad esempio Controllo radio, Avviso chiamata, Disattivazione radio, Monitor remoto, Automatic Registration Service (ARS), la risposta a messaggi privati e l'invio di report sulla posizione

GNSS. La radio non è in grado di ricevere chiamate private confermate se questa funzione è attivata. Tuttavia, la radio è in grado di inviare manualmente la trasmissione.

## Attivazione o disattivazione di Inibizione risp.

Seguire la procedura per attivare o disattivare Inibizione risp. sulla radio.

Premere il pulsante programmato **Inibizione risp.**

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata momentaneamente una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata momentaneamente una mini notifica negativa.

## Disattiva temporaneamente/Riattiva

Questa funzione consente di abilitare o disabilitare una radio nel sistema. Ad esempio, il distributore o l'amministratore di sistema può disattivare una radio rubata per impedire agli utenti non autorizzati di utilizzarla, e riattivarla quando è stata recuperata.

È possibile disattivare o riattivare una radio attraverso la console o un comando avviato da un'altra radio.

Una volta disattivata, la radio emette un tono indicatore negativo e sulla schermata iniziale viene visualizzato il messaggio `Canale negato`.

Quando una radio viene disattivata, non può richiedere né ricevere qualsiasi servizio avviato dall'utente sul sistema che esegua la procedura di disattivazione. Tuttavia, la radio può passare a un altro sistema. La radio continua a inviare i rapporti sulla posizione GNSS e può essere controllata in remoto quando è disattivata temporaneamente.

### NOTA:

Il distributore o l'amministratore di sistema può disattivare la radio in modo permanente. Per ulteriori informazioni, vedere [Eliminazione radio a pagina 199](#).

## Disattivazione temporanea di una radio

Seguire la procedura per disattivare una radio.

**1** Premere il pulsante programmato **Disatt. radio**.

---

**2** Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde lampeggia.

---

**3** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.

- Sul display viene visualizzata una mini notifica negativa.

## Disattivazione temporanea di una radio dalla lista Contatti

Seguire la procedura per disattivare una radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare

Disattivazione radio. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde lampeggia.

- 5 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Disattivazione temporanea di una radio utilizzando la composizione manuale

Seguire la procedura per disattivare una radio utilizzando la composizione manuale.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Comp. man.. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Numero radio. Premere  per effettuare la selezione.  
Nella prima riga di testo viene visualizzato Numero radio?.

---

- 5 Inserire l'ID dell'utente, quindi premere  per continuare.

---

- 6 Premere  o  fino a visualizzare Disatt. radio. Premere  per effettuare la selezione.  
Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde lampeggia.

---

- 7 Attendere la conferma.  
In caso di esito positivo:
  - Viene emesso un tono indicatore positivo.
  - Sul display viene visualizzata una mini notifica positiva.
 In caso di esito negativo:
  - Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.

---

## Riattivazione di una radio

Seguire la procedura per attivare una radio.

- 1 Premere il pulsante programmato **Attiv. radio**.

---

- 2 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.  
Sul display vengono visualizzati **Attiv. radio** e l'ID o l'alias dell'utente. Il LED verde si accende.

- 3 Attendere la conferma.  
In caso di esito positivo:
  - Viene emesso un tono indicatore positivo.
  - Sul display viene visualizzata una mini notifica positiva.
 In caso di esito negativo:
  - Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.

## Riattivazione di una radio dalla lista Contatti

Seguire la procedura per riattivare una radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Contatti**. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Attiv. radio**. Premere  per effettuare la selezione.  
Il LED verde lampeggia.  
Sul display vengono visualizzati **Attiv. radio** e l'ID o l'alias dell'utente. Il LED verde si accende.

**5** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display compare l'indicazione `Attiv. radio riuscita.`

In caso di esito negativo:

- Viene emesso un tono.
- Sul display compare l'indicazione `Attiv. radio non riuscita.`

## Riattivazione di una radio utilizzando la composizione manuale

Seguire la procedura per attivare una radio utilizzando la composizione manuale.

**1** Premere  per accedere al menu.

**2** Premere  o  fino a visualizzare `Contatti`. Premere  per effettuare la selezione.

**3** Premere  o  fino a visualizzare `Comp. man.`. Premere  per effettuare la selezione.

**4** Premere  o  fino a visualizzare `Chiam. privata`. Premere  per effettuare la selezione. Nella prima riga di testo viene visualizzato `Numero radio:`.

**5** Inserire l'ID dell'utente, quindi premere  per continuare.

**6** Premere  o  fino a visualizzare `Attiv. radio`. Premere  per effettuare la selezione. Il LED verde lampeggia. Sul display vengono visualizzati `Attiv. radio` e l'ID o l'alias dell'utente. Il LED verde si accende.

**7** Attendere la conferma. In caso di esito positivo:

- Viene emesso un tono.
- Sul display compare l'indicazione `Attiv. radio riuscita`.

In caso di esito negativo:

- Viene emesso un tono.
- Sul display compare l'indicazione `Attiv. radio non riuscita`.

---

## Eliminazione radio

Questa funzione rappresenta una misura di sicurezza avanzata che consente di limitare l'accesso non autorizzato a una radio.

Eliminazione radio rende una radio inutilizzabile. Ad esempio, il distributore o l'amministratore di sistema possono eliminare una radio rubata o smarrita per impedirne l'uso non autorizzato.

Quando è accesa, una radio eliminata riporta momentaneamente sullo schermo il messaggio `Radio eliminata` per indicarne lo stato.

### NOTA:

Una radio eliminata può essere riattivata solo presso l'assistenza Motorola Solutions. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Lone Worker

Questa funzione consente di avviare una trasmissione di emergenza in assenza di attività da parte dell'utente, come, ad esempio, la pressione di un pulsante sulla radio o l'attivazione del selettore di canale, entro un periodo di tempo predefinito.

Se non viene rilevata alcuna attività per un periodo di tempo programmato, allo scadere del timer di inattività la radio avvisa l'utente con un indicatore audio.

Se l'utente non risponde prima dello scadere del tempo del promemoria predefinito, la radio avvia una condizione di emergenza in base alla programmazione del rivenditore o dell'amministratore di sistema.

Per ulteriori informazioni, vedere [Funzionamento in emergenza a pagina 143](#).

### NOTA:

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Funzioni di blocco password

Questa funzione consente di limitare l'accesso alla radio richiedendo una password quando il dispositivo è acceso.

È possibile utilizzare il microfono della tastiera o i pulsanti di **scorrimento su/giù** per immettere la password.

## Accesso alle radio tramite password

Seguire la procedura per accedere alla radio tramite una password.

- 1 Inserire la password corrente composta da quattro cifre.

### NOTA:

L'uso del pedale **Emergenza** elimina la necessità di immettere la password per accedere alla radio.

- Utilizzare un microfono con tastiera.
- Premere  o  per modificare il valore numerico di ciascuna cifra, quindi premere  per immettere e spostarsi alla cifra successiva.

- 2 Premere  per immettere la password.

Se l'operazione ha esito positivo, la radio si accende. In caso di esito negativo:

- Dopo il primo e il secondo tentativo, sul display viene visualizzato `Password errata`. Ripetere [passaggio 1](#).
- Al terzo tentativo, sul display viene visualizzato `Password errata` e quindi `Radio bloccata`. Viene emesso un tono. Il LED giallo lampeggia due volte. La radio entra nello stato di blocco per 15 minuti.

### NOTA:

Nello stato di blocco, la radio risponde solo alle immissioni effettuate tramite la **manopola On/Off/Controllo volume** e il pulsante programmato **Retroillum..**

## Sblocco delle radio nello stato bloccato

Nello stato bloccato, la radio non può ricevere chiamate. Seguire la procedura per sbloccare la radio nello stato bloccato.

Eeguire una delle seguenti operazioni:

- Se la radio è accesa, attendere 15 minuti, quindi ripetere i passaggi descritti in [Accesso alle radio tramite password a pagina 200](#) per accedere alla radio.
- Se la radio è spenta, accenderla. La radio riavvia il timer di 15 minuti per lo stato bloccato. Viene emesso un tono. Il LED giallo lampeggia due volte. Sul display viene visualizzato `Radio bloccata`.  
Attendere 15 minuti, quindi ripetere i passaggi descritti in [Accesso alle radio tramite password a pagina 200](#) per accedere alla radio.

## Attivazione o disattivazione del blocco mediante password

Seguire la procedura per l'attivazione e disattivazione del blocco mediante password sulla radio.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare `Blocco pswd`. Premere  per effettuare la selezione.

- 5 Inserire la password corrente composta da quattro cifre.
  - Utilizzare un microfono con tastiera.
  - Premere  o  per modificare il valore numerico di ciascuna cifra, quindi premere  per immettere la cifra selezionata e spostarsi alla cifra successiva. All'immissione di ogni cifra viene emesso un tono indicatore positivo.

- 6 Premere  per immettere la password. Se la password è errata, sul display viene visualizzato `Password errata` e la radio torna automaticamente al menu precedente.

## 7 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Accendi. Premere  per effettuare la selezione.  
Sul display viene visualizzato ✓ accanto ad Accendi.
- Premere  o  fino a visualizzare Spegni. Premere  per effettuare la selezione.  
Sul display viene visualizzato ✓ accanto a Spegni.

## Modifica delle password

Seguire la procedura per cambiare le password sulla radio.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Blocco pswd. Premere  per effettuare la selezione.

- 5 Immettere la password corrente di quattro cifre, quindi premere  per continuare.  
Se la password è errata, sul display viene visualizzato Password errata e la radio torna automaticamente al menu precedente.

- 6 Premere  o  fino a visualizzare Cambia pwd. Premere  per effettuare la selezione.

- 7 Immettere una nuova password di quattro cifre, quindi premere  per continuare.

- 8 Immettere nuovamente la nuova password di quattro cifre, quindi premere  per continuare.

Se l'operazione ha esito positivo, sul display viene visualizzato `Password cambiata.`

Se l'operazione ha esito negativo, sul display viene visualizzato `Password non corrisp.`

Il display torna automaticamente al menu precedente.

Il numero massimo consentito di notifiche per messaggi di testo, chiamate perse e avvisi di chiamata è di 30 per messaggi di testo e 10 per chiamate perse o avvisi di chiamata. Questo numero dipende dalla capacità individuale dell'elenco funzioni (Job Ticket o messaggi di testo o chiamate perse o avvisi di chiamata).

## Accesso alla lista delle notifiche

Seguire la procedura per accedere alla lista delle notifiche sulla radio.

## Lista delle notifiche

La radio dispone di una lista delle notifiche che raccoglie tutti gli eventi "non letti" sul canale, come i messaggi di testo non letti, i messaggi telemetrici, le chiamate perse e gli avvisi di chiamata.

Sul display viene visualizzata l'icona **Notifica** quando la lista delle notifiche contiene uno o più eventi.

La lista supporta un massimo di 40 eventi non letti. Quando la lista è piena, l'evento successivo sostituisce automaticamente l'evento meno recente. Una volta letti, gli eventi vengono rimossi dalla lista delle notifiche.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Notifica.`  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'evento desiderato. Premere  per effettuare la selezione.  
  
Premere a lungo  per tornare alla schermata principale.

## Programmazione via radio

Il rivenditore può aggiornare a distanza la radio tramite la programmazione Over-the-Air (OTAP, Over-the-Air Programming) senza un collegamento fisico. Utilizzando la funzione OTAP, è inoltre possibile configurare alcune impostazioni.

Quando la radio viene sottoposta a OTAP, il LED verde lampeggia.

Quando la radio riceve un volume di dati elevato:

- Sul display viene visualizzata l'icona **Volume di dati elevato**.
- Il canale risulta occupato.
- Se si preme il pulsante **PTT** viene riprodotto un tono negativo.

Al termine di OTAP, a seconda della configurazione:

- Viene emesso un tono. Sul display viene visualizzato `Riavvio aggiorn.to`. La radio si spegne e si riaccende.
- È possibile selezionare `Riavvia ora` o `Posticipa`. Se si seleziona `Posticipa`, la radio torna alla schermata precedente. Sul display viene visualizzata l'icona **Timer ritardo OTAP** fino al riavvio automatico.

Quando la radio si riaccende dopo il riavvio automatico:

- Se l'operazione ha avuto esito positivo, sul display viene visualizzato `Agg software completato`.
- Se l'operazione ha avuto esito negativo, sul display viene visualizzato `Agg software fallito`.

Vedere [Controllo delle informazioni sull'aggiornamento del software a pagina 234](#) per la versione aggiornata del software.

## Selezione delle modalità di connessione a periferiche di terze parti

Seguire la procedura per selezionare una delle seguenti modalità di connessione alle periferiche di terzi:

- Motorola Solutions
- PC e audio
- Accessori dati
- Telemetria

- Generica

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Tipo cavo. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare la modalità di connessione desiderata. Premere  per effettuare la selezione.  
  
Sul display, viene visualizza la modalità di connessione selezionata. Il display torna al menu precedente.

## RSSI (Received Signal Strength Indicator)

Questa funzione consente di visualizzare i valori RSSI (Received Signal Strength Indicator).

Nell'angolo superiore destro del display viene visualizzata l'icona **RSSI**. Vedere [Icane del display](#) per ulteriori informazioni sull'icona **RSSI**.

### Visualizzazione dei valori RSSI

Seguire la procedura per visualizzare i valori RSSI sulla radio.

Nella schermata principale:

- 1 Premere tre volte  e premere subito dopo  tre volte, il tutto in 5 secondi.  
  
Sul display compaiono i valori RSSI correnti.

---

- 2 Premere a lungo  per tornare alla schermata principale.

## Configurazione funzioni da pannello frontale

È possibile personalizzare determinati parametri delle funzioni da Configurazione funzioni da pannello frontale (FPC) per ottimizzare l'uso della radio.

### Attivazione della modalità Configurazione funzioni da pannello frontale

Seguire la procedura per accedere all'impostazione funzioni da pannello frontale sulla radio.

la pressione prolungata di  consente di tornare in qualsiasi momento alla schermata principale.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Prgm. radio. Premere  per effettuare la selezione.

---

## Modifica dei parametri della modalità FPP

I seguenti pulsanti consentono di visionare tutti i parametri delle funzioni.

-  ,  : consentono di scorrere le opzioni, aumentare/diminuire i valori o spostarsi verticalmente.
-  : consente di selezionare l'opzione o di accedere a un sottomenu.
-  : premere brevemente per tornare al menu precedente o per uscire dalla schermata di selezione. Premere a lungo per tornare alla schermata iniziale.

## Funzionamento Wi-Fi

Wi-Fi® è un marchio registrato di Wi-Fi Alliance®.

**NOTA:**

Questa funzione è disponibile per DM4601e .

Questa funzione consente di configurare e connettersi a una rete Wi-Fi. La funzionalità Wi-Fi supporta aggiornamenti per il firmware della radio, codeplug e risorse quali i pacchetti linguistici e gli annunci vocali.

## Attivazione o disattivazione della funzionalità Wi-Fi

Il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato** è assegnato dal rivenditore o dall'amministratore di sistema. rivolgersi al rivenditore o all'amministratore di sistema per sapere come è stata programmata la radio.

Gli Annunci vocali per il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato** possono essere personalizzati mediante CPS in base ai requisiti degli utenti. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

È possibile attivare o disattivare la funzionalità Wi-Fi effettuando una delle operazioni descritte di seguito.

- Premere il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato**. L'annuncio vocale emette un

messaggio sull'attivazione o disattivazione della funzionalità Wi-Fi.

- Accedere a questa funzione utilizzando il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.
  - c. Premere  oppure  fino a visualizzare Wi-Fi On e premere  per selezionare.

Premere  per attivare la funzionalità Wi-Fi. Sul display viene visualizzato  accanto ad **Abilitato**.

Premere  per disattivare la funzionalità Wi-Fi. Accanto alla voce **Abilitato**, non viene più visualizzato .

## Connessione a un Access Point di rete

Quando si attiva la funzionalità Wi-Fi, la radio esegue la scansione e si connette a un Access Point di rete.

È anche possibile connettersi a un access point di rete utilizzando il menu.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare l'Access Point di rete e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare Connetti e premere  per selezionare.

- 6 Immettere la password e premere  .

Quando la connessione è stata stabilita, sulla radio viene visualizzato un avviso e l'Access Point di rete viene salvato nell'elenco dei profili.

## Verifica dello stato della connessione Wi-Fi

Seguire la procedura per verificare lo stato della connessione Wi-Fi.

Premere il pulsante programmato **Query stato Wi-Fi** per verificare lo stato della connessione utilizzando l'annuncio vocale. L'annuncio vocale emette Wi-Fi disattivato, Wi-Fi attivato ma nessuna connessione o Wi-Fi attivato con connessione.

- Sul display viene visualizzato Wi-Fi Off quando il Wi-Fi è disattivato.
- Sul display viene visualizzato Wi-Fi On, Connesso quando la radio è connessa a una rete.
- Sul display viene visualizzato Wi-Fi On, Disconnesso quando il Wi-Fi è attivato ma la radio non è connessa a una rete.

Gli annunci vocali per i risultati della query sullo stato Wi-Fi possono essere personalizzati mediante CPS in base ai requisiti degli utenti. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

#### NOTA:

Il pulsante programmato **Query stato Wi-Fi** è assegnato dal rivenditore o dall'amministratore di sistema. Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

## Aggiornamento dell'elenco delle reti

Seguire la procedura per aggiornare l'elenco delle reti.

- Effettuare le seguenti operazioni per aggiornare l'elenco delle reti utilizzando il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare **Wi-Fi** e premere  per selezionare.

- c. Premere  oppure  fino a visualizzare **Reti** e premere  per selezionare.

Quando si accede al menu **Reti**, la radio aggiorna automaticamente l'elenco delle reti.

- Se si è già all'interno del menu **Reti**, effettuare le seguenti operazioni per aggiornare l'elenco delle reti.

- Premere  oppure  fino a visualizzare **Aggiorna** e premere  per selezionare.

La radio viene aggiornata e viene visualizzato l'elenco delle reti più recente.

## Aggiunta di una rete

Se la rete preferita non è nell'elenco delle reti disponibili, effettuare le operazioni riportate di seguito per aggiungere una rete.

- <sup>1</sup> Premere  per accedere al menu.

2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Aggiungi rete e premere  per selezionare.

---

5 Immettere l'SSID (Service Set Identifier) e premere  .

---

6 Premere  oppure  fino a visualizzare Apri e premere  per selezionare.

---

7 Immettere la password e premere  .

Sul display della radio viene visualizzata una mini notifica positiva per indicare che la rete è stata salvata.

---

## Visualizzazione dei dettagli degli Access Point di rete

Seguire la procedura per visualizzare i dettagli degli Access Point di rete.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare l'Access Point di rete e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare **Vis. dettagli** e premere  per selezionare.

Per un Access Point collegato, vengono visualizzati l'SSID (Service Set Identifier), la modalità di protezione, l'indirizzo MAC (Media Access Control) e l'indirizzo IP (Internet Protocol).

Per un Access Point non collegato, vengono visualizzati l'SSID (Service Set Identifier) e la modalità di protezione.

- 3 Premere  oppure  fino a visualizzare **Reti** e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare l'Access Point di rete selezionato e premere  per selezionare.

- 5 Premere  oppure  fino a visualizzare **Rimuovi** e premere  per selezionare.

- 6 Premere  oppure  fino a visualizzare **Sì** e premere  per selezionare.

Sul display della radio viene visualizzata una mini notifica positiva per indicare che l'Access Point di rete selezionato è stato rimosso.

## Rimozione degli Access Point di rete

Effettuare le seguenti operazioni per rimuovere gli Access Point di rete dall'elenco dei profili.

- 1 Premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare **Wi-Fi** e premere  per selezionare.

## Pubblica utilità

Questo capitolo descrive l'uso delle funzioni di utilità disponibili sulla radio.

## Livelli di potenza

È possibile personalizzare l'impostazione di potenza alta o bassa per ciascun canale.

### Alto

Consente la comunicazione tra radio che si trovano a notevole distanza.

### Basso

Consente la comunicazione tra radio che si trovano a breve distanza.

#### NOTA:

Si tratta di una funzionalità non disponibile per i canali della banda cittadina che si trovano nella stessa frequenza.

## Impostazione dei livelli di potenza

Seguire la procedura per impostare i livelli di potenza sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Livello potenza**. Saltare i passaggi riportati di seguito.

- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Potenza**. Premere  per effettuare la selezione.

5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Alta**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto alla voce **Alta**.
- Premere  o  fino a visualizzare **Bassa**. Premere  per effettuare la selezione.

Sul display viene visualizzato ✓ accanto alla voce Bassa.

- 
- 6 Premere a lungo  per tornare alla schermata principale.
- 

## Attivazione o disattivazione di avvisi e toni della radio

Se necessario, è possibile abilitare e disabilitare tutti i toni e gli avvisi della radio, ad eccezione del tono di avviso di emergenza. . Seguire la procedura per attivare o disattivare gli avvisi e i toni sulla radio.

- Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **Toni/avvisi**. Saltare i passaggi seguenti.
    - Premere  per accedere al menu.
- 

- Premere  o  fino a visualizzare Utilità.Premere  per effettuare la selezione.
- 

- Premere  o  fino a visualizzare Impost. radio.Premere  per effettuare la selezione.
- 

- Premere  o  fino a visualizzare TONI/avvisi. Premere  per effettuare la selezione.
- 

- Premere  o  fino a visualizzare Tutti i toni. Premere  per effettuare la selezione.
- 

- Premere  per attivare o disattivare tutti i toni e gli avvisi. Sul display viene visualizzato uno dei seguenti risultati:
    - Se questa opzione è attivata, ✓ viene visualizzato accanto a Abilitato.
    - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a Abilitato.
-

## Attivazione o disattivazione dei toni della tastiera

Seguire la procedura per l'attivazione e disattivazione dei toni della tastiera sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Toni/avvisi**. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare **Toni tastiera**. Premere  per effettuare la selezione.

---

- 6 Premere  per attivare o disattivare i toni della tastiera. Sul display viene visualizzato uno dei seguenti risultati:
    - Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
    - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.
- 

## Impostazione dei livelli di offset volume di avvisi e toni

Questa funzione consente di regolare il volume dei toni/avvisi a un livello più alto o più basso di quello della voce. Seguire la procedura per impostare i livelli di offset del volume di avvisi e toni sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Toni/Avvisi**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Offset vol.**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare il livello di offset del volume desiderato.

Viene riprodotto un tono di feedback con il livello di offset del volume corrispondente.

---

7 Eseguire una delle seguenti operazioni:

- Premere  per effettuare la selezione. Il livello di offset del volume richiesto viene salvato.
  - Premere  per uscire. Le modifiche vengono annullate.
- 

## Attivazione o disattivazione del tono Permesso di parlare

Seguire la procedura per attivare o disattivare il tono Permesso di parlare sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Toni/avvisi**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Tono perm.**. Premere  per effettuare la selezione.

---

- 6 Premere  per attivare o disattivare la funzione Tono perm..

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.

## Attivazione o disattivazione del tono di accensione

Seguire la procedura per attivare o disattivare il tono di accensione sulla radio.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare `Toni/avvisi`. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare `Accensione`. Premere  per effettuare la selezione.
- 

- 6 Premere  per attivare o disattivare il Tono acc.ne. Sul display viene visualizzato uno dei seguenti risultati:
- Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.
-

## Impostazione del tono di avviso per i messaggi di testo

È possibile personalizzare il tono di avviso dei messaggi di testo, impostandolo su Momentaneo o Ripetitivo, per ogni voce nella lista Contatti. Seguire la procedura per impostare i toni di avviso dei messaggi di testo sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Avviso msg. Premere  per effettuare la selezione.

---

- 5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Momentaneo. Premere  per effettuare la selezione.  
Sul display viene visualizzato  accanto alla voce Momentaneo.
- Premere  o  fino a visualizzare Ripetitivo. Premere  per effettuare la selezione.  
Sul display viene visualizzato  accanto alla voce Ripetitivo.

## Cambio di modo del display

È possibile modificare il modo del display per la radio tra Giorno e Notte, a seconda delle necessità. Questa funzione influisce sulla tavolozza colori del display. Seguire la procedura per cambiare il modo del display della radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante **Modo display** programmato. Saltare i passaggi seguenti.

- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare *Impost.*  
*radio*. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare *Display*.  
Premere  per effettuare la selezione.  
Sul display, vengono visualizzate le opzioni *Modo  
Giorno* e *Modo Notte*.

5 Premere  o  fino a visualizzare  
l'impostazione desiderata. Premere  per  
effettuare la selezione.  
Sul display viene visualizzato  accanto  
all'impostazione selezionata.

## Regolazione della luminosità del display

Seguire la procedura per regolare la luminosità del display sulla radio. La luminosità del display non può essere regolata quando è abilitata *Luminosità auto*.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Luminosità**. Saltare i passaggi seguenti.

- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare *Impost.*  
*radio*. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Luminosità. Premere  per effettuare la selezione.

Sul display viene visualizzata la barra di avanzamento.

- 5 Premere  o  per diminuire o aumentare la luminosità del display. Premere  per effettuare la selezione.

Il valore dell'impostazione va da 1 a 8.

## Attivazione o disattivazione della funzione Clacson/luci

La radio è in grado di avvisare l'utente dell'arrivo di una chiamata mediante la funzione Clacson/luci. Quando è attivata, all'arrivo di una chiamata viene suonato il clacson e si accendono le luci del veicolo. Questa funzione deve essere installata dal rivenditore utilizzando il connettore accessori sulla parte posteriore della radio. Seguire la procedura per attivare o disattivare la funzione Clacson/luci sulla radio.

[Invia feedback](#)

- 1 Eseguire una delle seguenti operazioni:
- Premere il pulsante programmato **Clacson/luci**. Saltare i passaggi riportati di seguito.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Clacson/luci. Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare Clacson/luci. Sul display viene visualizzato uno dei seguenti risultati:
- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.

- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

## Attivazione o disattivazione degli indicatori LED

Seguire la procedura per l'attivazione o la disattivazione degli indicatori LED sulla radio.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.
- 4 Premere  o  fino a visualizzare **Indicatore LED**. Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare l'indicatore LED.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

## Attivazione o disattivazione del sistema Public Address

Seguire la procedura per attivare o disattivare il sistema Public Address di diffusione audio non connesso della radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Public Address**. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare *Indirizzo pubblico*. Premere  per effettuare la selezione.

---

5 Premere  per attivare o disattivare la funzione *Public Address*.

- Se questa opzione è attivata,  viene visualizzato accanto a *Abilitato*.
- Se questa opzione è disabilitata,  non viene più visualizzato accanto a *Abilitato*.

---

## Attivazione o disattivazione del sistema Public Address esterno

Seguire la procedura per attivare o disattivare il sistema *Public Address* di diffusione audio connesso della radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante **PA esterno** programmato. Saltare i passaggi seguenti.
    - Premere  per accedere al menu.
- 

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare *PA esterno*. Premere  per effettuare la selezione.

---

- 5 Premere  per attivare o disattivare il sistema Public Address di diffusione audio non connesso.
- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.
- 

## Attivazione o disattivazione dello schermo iniziale

È possibile attivare e disattivare lo schermo iniziale completando la seguente procedura.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare **Display**. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare **Schermo iniz.**. Premere  per effettuare la selezione.
- 

- 6 Premere  per attivare o disattivare lo schermo iniziale.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.
-

## Impostazione delle lingue

Seguire la procedura per impostare le lingue sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Lingue*.  
Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare la lingua desiderata. Premere  per effettuare la selezione.  
  
Sul display viene visualizzato  accanto alla lingua selezionata.

[Invia feedback](#)

## Identificazione del tipo di cavo

Attenersi alla seguente procedura per selezionare il tipo di cavo utilizzato dalla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Tipo cavo*. Premere  per effettuare la selezione.

---

- 5 Il tipo di cavo attualmente selezionato è contrassegnato dal simbolo .

## Attivazione o disattivazione dell'annuncio vocale

Questa funzione consente alla radio di indicare con un messaggio audio la zona o il canale corrente appena assegnato dall'utente o il pulsante programmabile che l'utente ha appena premuto.

In genere, questa funzione è utile nel caso in cui un utente abbia difficoltà a leggere le informazioni visualizzate sul display.

È possibile personalizzare questo indicatore audio in base alle esigenze dei clienti. Seguire la procedura per attivare o disattivare gli annunci vocali sulla radio.

## Attivazione o disattivazione della scheda opzioni

Le funzionalità della scheda opzioni in ogni canale possono essere assegnate ai pulsanti programmabili. Un canale può supportare fino a 6 funzioni della scheda opzioni. Seguire la procedura per l'attivazione e disattivazione della scheda opzioni sulla radio.

Premere il pulsante **Scheda opzioni** programmato.

---

## Conversione da testo a voce

La funzione Sintesi vocale può essere attivata solo dal rivenditore o dall'amministratore di sistema. Se la funzione Sintesi vocale è attivata, la funzione Annun vocale viene disattivata automaticamente. Se la funzione Annun vocale è attivata, la funzione Sintesi vocale viene disattivata automaticamente.

Questa funzionalità consente alla radio di indicare attraverso un segnale acustico le seguenti funzioni:

- Canale corrente
- Zona corrente
- Attivazione o disattivazione della funzionalità del pulsante programmato
- Contenuto dei messaggi di testo ricevuti
- Contenuto dei job ticket ricevuti

È possibile personalizzare questo indicatore audio in base alle esigenze dei clienti. In genere, questa funzione è utile nel caso in cui un utente abbia difficoltà a leggere le informazioni visualizzate sul display.

## Impostazione della sintesi vocale

Seguire la procedura per impostare la funzione Sintesi vocale.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Annun vocale. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare una qualsiasi delle seguenti funzioni. Premere  per effettuare la selezione.  
Le funzioni disponibili sono le seguenti:

- Tutti
  - Messaggi
  - Job Tickets
  - Channel
  - Zona
  - Pulsante di programmazione
- ✓ viene visualizzato accanto all'impostazione selezionata.

## Impostazione del menu Timer

È possibile impostare per quanto tempo la radio resta nel menu prima di tornare automaticamente alla schermata iniziale. Seguire la procedura per impostare il menu Timer.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Display**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Menu Timer**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare l'impostazione desiderata. Premere  per effettuare la selezione.

---

## Attivazione o disattivazione del controllo automatico del guadagno per il microfono digitale

La funzione di controllo automatico del guadagno (AGC, Automatic Gain Control) del microfono digitale controlla

automaticamente il guadagno del microfono della radio durante la trasmissione su un sistema digitale. Questa funzione riduce il volume dell'audio o potenza l'audio a basso volume fino a un valore preimpostato per garantire un livello omogeneo dell'audio. Seguire la procedura per attivare o disattivare il controllo automatico del guadagno per il microfono digitale sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **AGC mic D**. Premere  per effettuare la selezione.

---

- 5 Premere  per attivare o disattivare AGC mic digitale.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.

---

## Attivazione o disattivazione dell'audio intelligente

La radio regola automaticamente il volume dell'audio in modo che superi il rumore di fondo dell'ambiente, comprese le origini del rumore stazionarie e non. Si tratta di una funzione di sola ricezione, che non influisce sull'audio di trasmissione. Seguire la procedura per attivare o disattivare l'audio intelligente sulla radio.

### NOTA:

Questa funzione non è disponibile durante le sessioni Bluetooth.

- Eseguire una delle seguenti operazioni:
  - Premere il pulsante **Audio intelligente** programmato. Saltare i passaggi riportati di seguito.
  - Premere  per accedere al menu.
- Premere  o  fino a visualizzare `Utilità`. Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare `Audio intell..` Premere  per effettuare la selezione.
- Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Attivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a On.
  - Premere  o  fino a visualizzare Disattivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a Off.
- 

## Attivazione e disattivazione della funzione Soppresore AF

Questa funzione consente di ridurre al minimo il feedback acustico nelle chiamate ricevute.

- 1 Premere  per accedere al menu.
  - 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.
- 

- 3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.
- 

- 4 Premere  oppure  fino a visualizzare Soppresore AF e premere  per selezionare. È anche possibile utilizzare i pulsanti o per modificare l'opzione selezionata.
- 

- 5 Eseguire una delle seguenti operazioni:

- Premere  per attivare la funzione Soppresore AF. Sul display viene visualizzato  accanto ad Abilitato.
  - Premere  per disattivare la funzione Soppresore AF. Accanto alla voce Abilitato, non viene più visualizzato .
-

## Attivazione o disattivazione della funzione di ottimizzazione del trillo

È possibile attivare questa funzionalità quando si parla in una lingua che contiene molte parole pronunciate con trillo alveolare (noto anche come "consonante vibrante").

Seguire la procedura per attivare o disattivare la funzione di ottimizzazione del trillo sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Ottim. trilli**. Saltare i passaggi riportati di seguito.
- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Ottim. trilli**. Premere  per effettuare la selezione.

5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Attivo**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a **On**.
- Premere  o  fino a visualizzare **Disattivo**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a **Off**.

## Ambiente audio

È possibile personalizzare l'ambiente audio della radio in base all'ambiente di utilizzo.

### Predefinito

È l'impostazione predefinita.

**Forte**

Questa impostazione consente di attivare la funzione di soppressione del rumore e di incrementare il volume dell'altoparlante per l'uso in ambienti rumorosi.

**Gruppo di lav.**

Questa impostazione consente di attivare il soppressore AF e di disattivare AGC quando le radio di un gruppo sono vicine l'una all'altra.

**Impostazione dell'ambiente audio**

Seguire la procedura per impostare l'ambiente audio sulla radio in base al proprio ambiente.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Ambiente audio**. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare l'impostazione desiderata. Premere  per effettuare la selezione.

Le impostazioni sono le seguenti.

- Scegliere **Predefinito** per le impostazioni predefinite di fabbrica.
- Scegliere **Forte** per aumentare il volume dell'altoparlante per l'uso in ambienti rumorosi.
- Scegliere **Gruppo di lavoro** per ridurre il feedback acustico quando si utilizza con un gruppo di radio che si trovano una vicina all'altra.

Sul display viene visualizzato  accanto all'impostazione selezionata.

---

**Profili audio**

È possibile personalizzare i profili audio della radio in base alle proprie preferenze.

**Predefinito**

È l'impostazione predefinita.

**Livello 1, Livello 2 e Livello 3**

Queste impostazioni sono progettate per compensare la riduzione dell'udito dovuta al rumore, tipica negli adulti intorno ai 40, 50, 60 anni e oltre.

**Aumento alti, Aumento medi e Aumento bassi**

Queste impostazioni sono progettate per garantire un suono maggiormente metallico, un suono più nasale e un suono più profondo.

**Impostazione dei profili audio**

Seguire la procedura per impostare i profili audio sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Profili audio**. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare l'impostazione desiderata. Premere  per effettuare la selezione.

Le impostazioni sono le seguenti.

- Scegliere **Predefinito** per disattivare il profilo audio selezionato in precedenza e tornare alle impostazioni predefinite di fabbrica.
- Scegliere **Livello 1**, **Livello 2** o **Livello 3** per i profili audio progettati per compensare la riduzione dell'udito dovuta al rumore, tipica degli adulti oltre i 40 anni.
- Scegliere **Aumento alti**, **Aumento medi** o **Aumento bassi** per i profili audio che si allineano

con le preferenze per garantire suoni più metallici, più nasali o più profondi.

Sul display viene visualizzato ✓ accanto all'impostazione selezionata.

## Attivazione o disattivazione del sistema GNSS (Global Navigation Satellite System)

Il sistema GNSS (Global Navigation Satellite System) è un sistema di navigazione satellitare, utilizzato per determinare l'esatta posizione della radio. GNSS include GPS (Global Positioning System) e GLONASS (Global Navigation Satellite System).

### NOTA:

I modelli di radio selezionati possono includere i sistemi GPS e GLONASS. La serie GNSS viene configurata tramite CPS. rivolgersi al rivenditore o all'amministratore di sistema per sapere come è stata programmata la radio.

- 1 Completare uno dei passaggi riportati di seguito per attivare o disattivare il sistema GNSS sulla radio.

- Premere il pulsante programmato **GNSS**.
- Premere  per accedere al menu. Andare al passaggio successivo.

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **GNSS**. Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare il sistema GNSS.

Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.

Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

## Informazioni generali sulla radio

La radio contiene informazioni su diversi parametri generali.

Le informazioni generali della radio vengono riportate di seguito:

- ID e alias della radio.
- Versioni del firmware e del codeplug.
- Aggiornamento del software.
- Informazioni sul sistema GNSS.
- Informazioni sul sito.

### NOTA:

Premere  per tornare alla schermata precedente. Premere a lungo  per tornare alla schermata principale. La schermata corrente viene chiusa alla scadenza del tempo di inattività.

## Controllo dell'ID e dell'alias della radio

Seguire la procedura per verificare l'ID e l'alias della radio.

- 1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **ID e alias della radio**. Saltare i passaggi seguenti. Viene emesso un tono indicatore positivo.

È possibile premere il pulsante programmato **ID e alias della radio** per tornare alla schermata precedente.

- Premere  per accedere al menu.

- 
- 2 Premere  o  fino a visualizzare *Utilità*. Premere  per effettuare la selezione.

- 
- 3 Premere  o  fino a visualizzare *Info radio*. Premere  per effettuare la selezione.

- 
- 4 Premere  o  fino a visualizzare *ID personale*. Premere  per effettuare la selezione.

Nella prima riga di testo viene visualizzato l'alias della radio. Nella seconda riga di testo viene visualizzato l'ID della radio.

## Controllo della versione del firmware e del codeplug

Seguire la procedura per verificare la versione del firmware e del codeplug sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Info radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Versioni*.  
Premere  per effettuare la selezione.  
Sul display viene visualizzata la versione corrente del firmware e del codeplug.

---

## Controllo delle informazioni sull'aggiornamento del software

Questa funzione mostra l'ora e la data dell'ultimo aggiornamento del software eseguito tramite OTAP o Wi-Fi. Seguire la procedura per verificare le informazioni sull'aggiornamento del software sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Info radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Agg. to sw.*. Premere  per effettuare la selezione.  
Sul display vengono visualizzate l'ora e la data dell'aggiornamento software più recente.

---

Il menu per l'aggiornamento software è disponibile solo dopo il completamento di almeno una sessione OTAP o Wi-Fi. Per ulteriori informazioni, vedere [Programmazione Over-the-Air](#) a pagina 507.

## Controllo delle informazioni GNSS

Visualizza le informazioni GNSS sulla radio, come i valori:

- Latitudine
- Longitudine
- Altitudine
- Direzione
- Velocità
- Diluizione della precisione orizzontale (HDOP)
- Satelliti
- Versione

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Info radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Info GNSS**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare la voce desiderata. Premere  per effettuare la selezione. Sul display vengono visualizzate le informazioni GNSS richieste.

---

## Visualizzazione delle informazioni sul sito

Seguire la procedura per visualizzare il nome del sito corrente al quale è collegata la radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Info radio*. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare *Info sito*. Premere  per effettuare la selezione.

---

Sul display viene visualizzato il nome del sito corrente.

## Operazioni di Connect Plus

Connect Plus è una soluzione trunking completa basata sulla tecnologia DMR. Connect Plus utilizza un canale di controllo dedicato per le richieste di canale e le assegnazioni. Le funzioni disponibili per gli utenti della radio in questo sistema sono descritte in questo capitolo.

## Altri controlli della radio in modalità Connect Plus

Nel presente capitolo vengono descritti i controlli della radio aggiuntivi disponibili all'utente della radio attraverso metodi preprogrammati, quali i pulsanti programmabili e le funzioni radio assegnabili.

### Pulsante PTT (Push-To-Talk)

Il pulsante **PTT**, situato sul lato della radio, ha due funzioni fondamentali:

- Durante una chiamata, il pulsante **PTT** consente alla radio di trasmettere ad altre radio nell'ambito della chiamata.

Tenere premuto il pulsante **PTT** per parlare. Rilasciare il pulsante **PTT** per ascoltare.

Il microfono viene attivato premendo il pulsante **PTT**.

- Se non è in corso alcuna chiamata, il pulsante **PTT** viene utilizzato per effettuare una nuova chiamata (vedere [Esecuzione di una chiamata radio a pagina 255](#)).

Se è attivato il Tono permesso di parlare, , attendere il tono breve di avviso prima di parlare.

### Pulsanti programmabili

Il rivenditore può programmare tali pulsanti come collegamenti rapidi alle funzioni della radio, in base alla durata della pressione sul pulsante:

#### Pressione breve

Premere e rilasciare rapidamente il pulsante.

#### Premere a lungo

Tenere premuto il pulsante per un periodo di tempo programmato.

**NOTA:**

La durata programmata della pressione su un pulsante è disponibile per tutte le funzioni o le impostazioni assegnabili della radio e delle utilità. Vedere [Funzionamento in emergenza a pagina 293](#) per ulteriori informazioni sulla durata programmata del pulsante di *emergenza*.

## Funzioni della radio assegnabili

### Comm. audio Bluetooth®

Consente di alternare l'instradamento audio tra l'altoparlante interno della radio e l'accessorio Bluetooth esterno.

### Connessione Bluetooth

Consente di avviare un'operazione di ricerca e connessione Bluetooth.

### Disconnessione Bluetooth

Consente di terminare tutte le connessioni Bluetooth esistenti tra la radio e i dispositivi Bluetooth.

### Rilevamento Bluetooth

Consente alla radio di attivare la modalità di rilevamento Bluetooth.

### Busy Queue Cancellation

Consente di uscire dalla modalità Occupato quando è stata iniziata una chiamata non di emergenza nella coda Occupato. Una volta accettate nella coda Occupato, le chiamate di emergenza non possono più essere annullate.

### Registro chiamate

Consente di selezionare la lista del registro chiamate.

### Annuncio canale

Consente di riprodurre messaggi vocali di annuncio di zone e canali per il canale corrente.

### Contatti

Consente di accedere direttamente alla lista dei contatti.

### Emergency On/Off

In base alla programmazione, consente di attivare o annullare un segnale di emergenza.

### Clacson/luci

Consente di attivare o disattivare la funzionalità Clacson/luci.

### Posiz. interna

Consente di attivare e disattivare la funzione Posizione interna.

### Audio intelligente

Consente di attivare o disattivare l'audio intelligente.

**Manual Dial**

In base alla programmazione, consente di avviare una chiamata telefonica o privata immettendo un numero di telefono o un ID dell'utente.

**Accesso rapido**

Consente di avviare direttamente una chiamata privata predefinita, un avviso chiamata, un messaggio di testo predefinito o un Revert iniziale.

**Privacy**

Consente di attivare o disattivare la privacy.

**Radio Check**

Consente di stabilire se una radio è attiva nel sistema.

**Radio Enable**

Consente di attivare a distanza una radio di destinazione.

**Radio Disable**

Consente di disattivare a distanza una radio di destinazione.

**Monitoraggio remoto**

Consente di accendere il microfono di una radio di destinazione senza fornire alcuna indicazione.

**Reimposta canale principale**

Consente di impostare un nuovo canale principale.

**Tipo suoneria avviso**

Consente di accedere direttamente all'impostazione Suon. Allarme.

**Roam Request**

Invia la richiesta di cercare un altro sito.

**Scansione**

Consente di attivare o disattivare la scansione.

**Silenza promemoria canale principale**

Consente di disattivare l'audio del promemoria del canale principale.

**Blocco sito on/off**

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

**Messaggio di testo**

Consente di selezionare il menu dei messaggi di testo.

**Annuncio vocale attivo/disattivo**

Consente di attivare o disattivare gli annunci vocali.

**Wi-Fi**

Consente di attivare o disattivare la funzionalità Wi-Fi.

**Zona**

Consente di effettuare una selezione da una lista di zone.

## Funzioni di utilità o impostazioni assegnabili

### AF Suppressor

Consente di attivare o disattivare la funzionalità Soppressore AF.

### Tutti i toni/avvisi

Consente di attivare o disattivare tutti i toni e gli avvisi.

### Luminosità retroilluminazione

Consente di regolare il livello di luminosità.

### Canale su/giù

In base alla programmazione, consente di passare al canale precedente o successivo.

### Modalità display

Consente di attivare o disattivare la modalità di visualizzazione Giorno/notte.

### Global Navigation Satellite System (GNSS)

Consente di attivare o disattivare il sistema di navigazione satellitare.

### Livello potenza

Consente di aumentare o ridurre la potenza di trasmissione.

### Non assegnato

Indica che la funzione del pulsante non è ancora stata assegnata.

## Identificazione degli indicatori di stato in modalità Connect Plus

### Icone del display

Di seguito sono mostrate le icone visualizzate sul display della radio.

	<p><b>RSSI (Received Signal Strength Indicator)</b></p> <p>Il numero di barre visualizzato rappresenta la potenza del segnale radio. Quattro barre indicano il segnale più potente. L'icona viene visualizzata solo durante la ricezione.</p>
	<p><b>Bluetooth non collegato</b></p>

*Continuazione tabella...*

	La funzione Bluetooth è attivata, ma non è collegato alcun dispositivo Bluetooth remoto.
	<b>Bluetooth collegato</b> La funzione Bluetooth è abilitata. L'icona resta accesa quando è collegato un dispositivo Bluetooth remoto.
	<b>Volume di dati elevato</b> La radio riceve un volume elevato di dati e il canale risulta occupato.
	<b>Posizione interna disponibile</b> <sup>3</sup> Lo stato della posizione interna è attivata e disponibile.
	<b>Posizione interna non disponibile</b> <sup>3</sup> Lo stato della posizione interna è "attivata ma non è disponibile" perché il Bluetooth è disattivato o la scansione beacon è sospesa dal Bluetooth.

Continuazione tabella...

	<b>Modalità audio disattivato</b> La Modalità audio disattivato è attivata e l'altoparlante è disattivato.
	<b>Notifica</b> Nella lista delle notifiche sono presenti voci da controllare.
	<b>Livello potenza</b> La radio è attualmente impostata su un livello di potenza basso o alto.
	<b>Toni disattivati</b> I toni sono disabilitati.
	<b>Scheda opzioni</b> La Option Board è abilitata.
	<b>Option Board non funzionante</b> La Option Board è disabilitata.
	<b>GNSS disponibile</b>

Continuazione tabella...

<sup>3</sup> Disponibile solo per i modelli con l'ultima versione software e hardware

	La funzionalità GPS/GNSS è attivata. L'icona rimane accesa quando è possibile effettuare il fix della posizione.
	<b>GNSS non disponibile/fuori campo</b> La funzionalità GPS/GNSS è attivata, ma non riceve dati dal satellite.
	<b>Scansione</b> La funzione di scansione è abilitata.
	<b>Emergenza</b> La radio è in modalità di emergenza.
	<b>Sicuro</b> La funzione Privacy è attiva.
	<b>Protezione disabilitata</b> La funzione Privacy non è attiva.
	<b>Roaming</b> La funzione Roaming è abilitata.
	<b>Contatto</b>

Continuazione tabella...

	È disponibile il contatto radio.
	<b>Registro chiamate</b> Registro chiamate radio.
	<b>Messaggio</b> Messaggio in arrivo.
	<b>Solo suoneria</b> È attivata la modalità della suoneria.
	<b>Suoneria silenziosa</b> È attivata la modalità della suoneria silenziosa.
	<b>Vibrazione</b> È attivata la modalità Vibrazione.
	<b>Vibrazione e suoneria</b> Sono attivate la modalità Vibrazione e Suoneria.
	<b>Wi-Fi eccellente</b> <sup>4</sup> Il segnale Wi-Fi è eccellente.

Continuazione tabella...

	<b>Wi-Fi buono</b> <sup>4</sup> Il segnale Wi-Fi è buono.
	<b>Wi-Fi medio</b> <sup>4</sup> Il segnale Wi-Fi è nella media.
	<b>Wi-Fi scarso</b> <sup>4</sup> Il segnale Wi-Fi è scarso.
	<b>Wi-Fi non disponibile</b> <sup>4</sup> Il segnale Wi-Fi è disponibile.

## Icone di chiamata

Le icone riportate di seguito vengono visualizzate sul display della radio quando si riceve una chiamata. Queste icone vengono visualizzate anche nella lista Contatti per indicare il tipo di ID.

	<b>Chiamata privata</b>
---	-------------------------

*Continuazione tabella...*

	Indica che la radio è impegnata in una chiamata privata. Nella lista Contatti, indica l'alias (nome) o l'ID (numero) dell'utente.
	<b>Chiam. gruppo/Chiamata generale sito</b> Indica che è in corso una chiamata di gruppo o una chiamata generale sito. Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del gruppo.
	<b>Chiamata telefonica come chiamata privata</b> Indica che è in corso una chiamata telefonica come chiamata privata.
	<b>Chiamata PC Bluetooth</b> Indica che è in corso una chiamata PC Bluetooth.

*Continuazione tabella...*

<sup>4</sup> Disponibile solo per DM4601e

Nella lista Contatti, indica l'ID (numero) o l'alias (nome) di una chiamata PC Bluetooth.

### Chiamata dispatch

Il tipo di contatto Chiamata dispatch serve a inviare un messaggio di testo a un PC dispatcher tramite un server di messaggistica di terze parti.

## Icone di menu avanzate

Le icone riportate di seguito vengono visualizzate accanto alle voci di menu che permettono la selezione tra due opzioni o per indicare l'esistenza di un sottomenu con due opzioni.

### Casella di controllo (vuota)

Indica che l'opzione non è selezionata.

### Casella di controllo (selezionata)

Indica che l'opzione è selezionata.

*Continuazione tabella...*

### Casella nera

Indica l'opzione selezionata per la voce di menu con un sottomenu.

## Icone dei messaggi inviati

Le seguenti icone compaiono nell'angolo in alto a destra del display della radio nella cartella Msg inviati.

### Inviato

Il messaggio di testo è stato inviato.

OPP  
URE

OPP

### In corso

- Il messaggio di testo per un alias o un ID del gruppo è in attesa di essere trasmesso.

*Continuazione tabella...*

<p>URE</p> 	<ul style="list-style-type: none"> <li>Il messaggio di testo per un alias o un ID dell'utente è in attesa di essere trasmesso e di successiva conferma di ricezione.</li> </ul>
	<p><b>Messaggio singolo o di gruppo letto</b></p> <p>Il messaggio di testo è stato letto.</p>
<p>OPP URE</p> 	<p><b>Messaggio singolo o di gruppo non letto</b></p> <p>Il messaggio di testo non è stato letto.</p>
<p>OPP URE</p> 	<p><b>Non inviato</b></p> <p>Il messaggio di testo non è stato inviato.</p>
<p>OPP URE</p> 	

## Icone del dispositivo Bluetooth

Le icone riportate di seguito vengono visualizzate accanto alle voci dei dispositivi Bluetooth disponibili, indicandone il tipo.

	<p><b>Dispositivo dati Bluetooth</b></p> <p>Dispositivo dati Bluetooth, ad esempio uno scanner.</p>
	<p><b>Dispositivo audio Bluetooth</b></p> <p>Dispositivo audio Bluetooth, ad esempio una cuffia.</p>
	<p><b>Dispositivo PTT Bluetooth</b></p> <p>Dispositivo PTT Bluetooth, ad esempio un dispositivo POD (solo PTT).</p>

## Indicatore LED

L'indicatore LED segnala lo stato operativo della radio.

<b>Rosso lampeggiant e</b>	La radio trasmette con batteria in esaurimento, riceve una trasmissione di emergenza o non è riuscita a eseguire il test automatico dell'accensione o si trova fuori dalla portata del segnale (se configurata con il sistema transponder per il rilevamento automatico della portata) . È attivata la Modalità Muto.
<b>Rosso lampeggiant e veloce</b>	La radio sta ricevendo il trasferimento di un file over-the-air (file del firmware della scheda opzionale, Network Frequency File o file codeplug della scheda opzionale) o sta aggiornando il firmware della scheda opzionale.
<b>Verde e giallo lampeggiant e</b>	La radio sta ricevendo un avviso di chiamata, ha ricevuto un messaggio di testo o è attiva la modalità di ricerca.

*Continuazione tabella...*

<b>Giallo fisso</b>	La radio si trova in modalità Rilevamento Bluetooth.
<b>Doppio lampeggio giallo</b>	La radio esegue la ricerca attiva di un nuovo sito.
<b>Giallo lampeggiant e</b>	La radio sta ricevendo un avviso di chiamata o è abilitata la modalità di scansione ed è inattiva (resta silenziosa anche se viene rilevata un'attività).
<b>Verde fisso</b>	La radio è in fase di accensione o trasmissione.
<b>Verde lampeggiant e</b>	La radio è in fase di accensione, sta ricevendo una chiamata o dati.
<b>Verde lampeggiant e doppio</b>	La radio sta ricevendo una chiamata con funzione di privacy attivata.

## Toni indicatori

Di seguito sono elencati i toni riprodotti dall'altoparlante della radio.

Tono alto  Tono basso

I toni indicatori segnalano acusticamente lo stato dopo aver effettuato un'operazione per eseguire un'attività.

	Tono indicatore positivo
	Tono indicatore negativo

## Toni di avviso

I toni di avviso segnalano acusticamente lo stato della radio o la risposta ai dati ricevuti sulla radio.

<b>Tono continuo</b> 	Viene emesso un singolo tono, che continua fino al termine della trasmissione.
---	--

*Continuazione tabella...*

### Tono periodico

Viene emesso un tono intervallato, a seconda della durata impostata dalla radio. Il tono inizia, finisce e quindi si ripete.

### Tono ripetitivo

Viene emesso un singolo tono, che si ripete finché non viene annullato dall'utente.

### Tono momentaneo

Viene emesso un solo tono per un breve periodo di tempo definito dalle impostazioni della radio.

## Passaggio tra le modalità Connect Plus e Non-Connect Plus

Per passare a una modalità Non-Connect Plus, è necessario cambiare zona, se tale possibilità è stata prevista dal rivenditore o dall'amministratore di sistema che ha programmato la radio. Rivolgersi al rivenditore o all'amministratore di sistema per verificare se la radio è stata programmata per utilizzare zone Non-Connect Plus e

quali funzioni sono disponibili mentre la radio utilizza una di queste zone.

## Esecuzione e ricezione di chiamate in modalità Connect Plus

In questa sezione vengono spiegati l'utilizzo generale della radio e le funzioni di chiamata disponibili nella radio.

### Selezione di un sito

Un sito fornisce la copertura per un'area specifica. In un sito Connect Plus, sono presenti un'unità di controllo del sito e fino a 15 ripetitori. In una rete multisito, la radio Connect Plus cerca automaticamente un altro sito quando la qualità del segnale del sito corrente scende al di sotto di un livello accettabile.

### Richiesta roaming

Una richiesta di roaming indica alla radio di cercare un altro sito, anche se la qualità del segnale nel sito corrente è accettabile.

Se non sono presenti siti disponibili:

- La radio mostra **Ricerca e Alias** canale selezionato e continua a cercare nell'elenco dei siti.
- La radio torna al sito precedente, se è ancora disponibile.

#### NOTA:

questa funzione viene programmata dal rivenditore.

Premere il pulsante programmato **Richiesta roaming**.

Viene emesso un tono che indica che la radio è passata a un altro sito. Sul display viene visualizzato `ID sito <numero sito>`.

---

### Blocco sito on/off

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

Premere il pulsante programmato **Blocco sito**.

Se la funzione **Blocco sito** è attivata:

- Viene emesso un tono indicatore positivo, che indica che la radio è stata bloccata nel sito corrente.
- Sul display compare `Sito bloccato`.

Se la funzione **Blocco sito** è disattivata:

- Viene emesso un tono indicatore negativo, che indica che la radio è stata sbloccata.
- Sul display compare `Sito sbloccato`.

## Siti vietati

L'amministratore di sistema della radio Connect Plus può decidere quali siti della rete una radio è autorizzata o non è autorizzata a utilizzare. Non è necessario riprogrammare la radio per modificare l'elenco dei siti ammessi e non ammessi. Se la radio tenta di registrarsi in un sito non ammesso, sul display compare un breve messaggio: `Sito <numero del sito> non consentito`. La radio inizia a cercare un altro sito della rete.

## Selezione di una zona

È possibile programmare sulla radio un massimo di 16 zone Connect Plus e ciascuna zona Connect Plus può contenere fino a 16 posizioni assegnabili sul selettore di canale.

Ogni posizione assegnabile della manopola può essere utilizzata per iniziare uno dei seguenti tipi di chiamata vocale:

- Chiamata di gruppo
- Multi-group Call
- Site All Call
- Chiamata privata

- 1 Accedere alla funzione Zona effettuando le seguenti operazioni:

Controlli della radio	Operazioni
<b>Pulsante programmato Selezione zona</b>	Premere il pulsante programmato <b>Selezione zona</b> .

Controlli della radio	Operazioni
<b>Menu radio</b>	<p><b>a</b> Premere  per accedere al menu.</p> <p><b>b</b> Premere  oppure  fino a visualizzare Zona e premere  per selezionare.</p>

La zona corrente viene visualizzata e indicata da .

## 2 Selezionare la zona desiderata.

Controllo della radio	Operazioni
 oppure 	Premere  oppure  e scorrere fino alla zona desiderata.

## 3 Premere per effettuare la selezione.

Sul display viene visualizzato <Zona> Selected (<Zona> selezionata) per pochi secondi, quindi compare di nuovo la schermata della zona selezionata.

## Utilizzo di reti diverse

Se la radio è stata programmata per utilizzare diverse reti Connect Plus, è possibile selezionare un'altra rete passando alla zona Connect Plus assegnata alla rete desiderata. Le assegnazioni rete-zona sono configurate dal rivenditore che programma la radio.

## Selezione di un tipo di chiamata

Il selettore di canale viene utilizzato per selezionare un tipo di chiamata. A seconda di come è stata programmata la radio, può trattarsi di una chiamata di gruppo, una chiamata multigruppo, una Site All Call o una chiamata privata. Se si sposta il selettore di canale su un'altra posizione (a cui è stato assegnato un tipo di chiamata), la radio si registra nuovamente nel sito Connect Plus. La radio si registra con l'ID del gruppo di registrazione

programmato per la nuova posizione del selettore di canale il nuovo tipo di chiamata.

Se si seleziona una posizione a cui non è stato assegnato un tipo di chiamata, la radio emette un tono continuo e sul display compare `Non program.`. Poiché la radio non funziona se è selezionato un canale non programmato, utilizzare il selettore di canale per selezionare un canale programmato.

Quando la zona desiderata viene visualizzata (se si dispone di più zone della radio), ruotare il selettore di canale programmato per selezionare il tipo di chiamata.

---

## Ricezione e risposta a una chiamata radio

Una volta che il canale, l'ID dell'utente o il tipo di chiamata vengono visualizzati, è possibile ricevere e rispondere alle chiamate.

Il LED diventa verde fisso durante la trasmissione e lampeggia in verde durante la ricezione.

### NOTA:

Il LED diventa verde fisso durante la trasmissione, lampeggia rapidamente in verde durante la ricezione di una chiamata con funzione Privacy attivata. Per decodificare una chiamata con funzione Privacy attivata, la radio ricevente deve avere la stessa chiave di privacy o lo stesso valore e ID della chiave (programmati dal rivenditore) della radio trasmittente (la radio che ha inviato la chiamata).

Per ulteriori informazioni, vedere [Privacy a pagina 314](#).

## Ricezione e risposta di una chiamata di gruppo

Per ricevere una chiamata da un gruppo di utenti, la radio deve essere configurata come appartenente a quel gruppo.

Quando si riceve una chiamata di gruppo (nella schermata principale), il LED lampeggia in verde. Nell'angolo superiore destro, viene visualizzata l'icona della chiamata di gruppo. La prima riga di testo visualizza l'alias del chiamante. La seconda riga di testo visualizza l'alias della chiamata di

gruppo. La radio si attiva e l'altoparlante radio emette il tono della chiamata in arrivo.

- 1 Tenere il microfono a circa 2,5/5 cm dalla bocca.  
Il LED diventa verde fisso.

- 
- 2 Attendere il termine di un tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

- 
- 3 Rilasciare il pulsante **PTT** per ascoltare.  
Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata.

**NOTA:**

Vedere [Esecuzione di una chiamata di gruppo a pagina 256](#) per informazioni più dettagliate sull'esecuzione di una chiamata di gruppo.

## Ricezione e risposta di una chiamata privata

Per chiamata privata si intende una chiamata da una singola radio a un'altra.

Quando si riceve una chiamata privata, il LED lampeggia in verde. Sulla prima riga del display vengono visualizzati l'alias o l'ID dell'utente e l'icona RSSI. Nella seconda riga viene visualizzato il messaggio *Chiam. privata* accompagnato dalla relativa icona. La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo della radio.

- 1 Tenere il microfono a circa 2,5/5 cm dalla bocca.

- 
- 2 Premere il pulsante **PTT** per rispondere alla chiamata.  
Il LED diventa verde fisso.

- 
- 3 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

- 
- 4 Rilasciare il pulsante **PTT** per ascoltare.

Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata.

Sul display viene visualizzato *Chiam. term.*

Vedere [Esecuzione di una chiamata privata a pagina 257](#) per informazioni più dettagliate sull'esecuzione di una chiamata privata.

## Ricezione di una chiamata generale sito

Una chiamata generale sito è una chiamata effettuata da una singola radio a tutte le radio di un sito. Si rivela utile per trasmettere comunicazioni importanti che richiedono l'immediata attenzione dell'utente.

Quando si riceve una chiamata generale sito, viene emesso un tono e il LED lampeggia in verde.

Nell'angolo superiore destro viene visualizzata l'icona della chiamata di gruppo. La prima riga di testo visualizza l'alias del chiamante. La seconda riga di testo visualizza `Chiamata generale sito`. La radio si attiva e l'altoparlante radio emette il tono della chiamata in arrivo.

Alla fine della chiamata generale sito, la radio torna alla schermata attiva prima della ricezione della chiamata. Prima di essere conclusa, una chiamata generale sito non attende lo scadere del periodo di tempo predeterminato.

Non è possibile rispondere a una chiamata generale sito.

### NOTA:

Per ulteriori informazioni sull'esecuzione di una chiamata generale sito, vedere [Esecuzione di una chiamata generale sito a pagina 258](#).

Se si cambia canale durante la ricezione della chiamata, la chiamata generale sito viene terminata dalla radio. nel corso di una chiamata generale, non sarà possibile utilizzare le funzioni dei pulsanti programmati. Sarà necessario attendere la conclusione della chiamata.

## Ricezione di una chiamata telefonica privata in entrata

Quando si riceve una chiamata telefonica privata in entrata, l'icona della chiamata telefonica come chiamata privata viene visualizzata nell'angolo superiore destro. Nella prima riga di testo viene visualizzata l'opzione `Chiamata tel.`

- 1 Per rispondere e parlare, tenere premuto il pulsante **PTT**. Rilasciare il pulsante **PTT** per ascoltare.

- 2 Premere a lungo  per terminare la chiamata.

Sulla prima riga del display, viene visualizzata l'opzione Fine. Sulla seconda riga del display, viene visualizzata l'opzione Chiam. tel. Il display ritorna alla schermata della chiamata telefonica.

Sul display compare Chiam. tel. finita.

---

## Composizione di cifre aggiuntive memorizzate nel buffer in una chiamata privata in entrata

La chiamata telefonica in corso viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. Sulla prima riga del display, viene visualizzata l'opzione Chiamata tel.:

- 1 Utilizzare la tastiera per immettere le cifre e premere il pulsante  .

Premere  , quindi  entro 2 secondi per inserire una pausa. La P sostituisce \* e # sul display.

La chiamata telefonica viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. Le cifre immesse vengono visualizzate nella prima riga del display.

- 
- 2 Premere a lungo  per terminare la chiamata.

Sulla prima riga del display, viene visualizzata l'opzione Fine. Sulla seconda riga del display, viene visualizzata l'opzione Chiam. tel. Il display ritorna alla schermata della chiamata telefonica.

Sul display compare Chiam. tel. finita.

---

## Composizione di cifre aggiuntive live in una chiamata privata in entrata

La chiamata telefonica in corso viene visualizzata nell'angolo in alto a destra sotto forma di icona della

chiamata privata. Sulla prima riga del display, viene visualizzata l'opzione `Chiamata tel.:`.

- 1 Premere il pulsante **PTT** e utilizzare la tastiera per immettere le cifre.

La chiamata telefonica viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. Le cifre della composizione live vengono visualizzate nella prima riga del display.

- 2 Premere a lungo  per terminare la chiamata.

Sulla prima riga del display, viene visualizzata l'opzione `Fine`. Sulla seconda riga del display, viene visualizzata l'opzione `Chiam. tel.` Il display ritorna alla schermata della chiamata telefonica.

Sul display compare `Chiam. tel. finita`.

## Ricezione di una chiamata telefonica a talkgroup in entrata

Quando si riceve una chiamata telefonica a talkgroup in entrata, viene visualizzata l'icona della chiamata di gruppo

nell'angolo superiore destro. Nella prima riga di testo viene visualizzato `Call111` (Chiamata1).

Premere il pulsante **PTT** per parlare e rilasciarlo per ascoltare.

## Chiamata telefonica multigruppo in entrata

Quando si riceve una chiamata telefonica multigruppo in entrata, viene visualizzata l'icona della chiamata di gruppo nell'angolo superiore destro. Nella prima riga di testo viene visualizzata l'opzione `Chiamata multigruppo`. La radio si attiva e dall'altoparlante viene emesso il tono di chiamata multigruppo in arrivo.

## Esecuzione di una chiamata radio

Dopo aver selezionato il canale, è possibile selezionare un alias o un ID dell'utente o del gruppo, tramite:

- Il selettore di canale.
- Un pulsante programmato **Accesso rapido** - La funzione Accesso rapido consente di effettuare con facilità una chiamata privata a un ID predefinito. È possibile assegnare questa funzione a una pressione

lunga o breve del tasto programmabile. È possibile assegnare un solo ID a un pulsante **Accesso rapido**. Sulla radio è possibile programmare più pulsanti di **accesso rapido**.

- La lista Contatti (vedere [Impostazioni dei contatti a pagina 280](#)).

#### NOTA:

Per inviare una trasmissione con funzione Privacy attivata, tale funzione deve essere abilitata sul canale. Solo le radio di destinazione con lo stesso valore e ID della chiave della radio trasmittente saranno in grado di decodificare la trasmissione.

Per ulteriori informazioni, vedere [Privacy a pagina 314](#).

## Esecuzione di una chiamata con il selettore di canale

Questa funzione consente agli utenti della radio di effettuare diversi tipi di chiamata: chiamata di gruppo, chiamata privata, chiamata generale sito, chiamata multigruppo.

## Esecuzione di una chiamata di gruppo

Per effettuare una chiamata a un gruppo di utenti, la radio deve essere configurata come appartenente a quel gruppo.

- 1 Selezionare il canale con l'alias o l'ID del gruppo attivo. Vedere [Selezione di un tipo di chiamata a pagina 250](#).

---

- 2 Tenere il microfono a circa 2,5/5 cm dalla bocca.

---

- 3 Premere il pulsante **PTT** per effettuare la chiamata. Il LED diventa verde fisso. Nell'angolo superiore destro, viene visualizzata l'icona della chiamata di gruppo. Nella prima riga di testo compare l'alias chiamata di gruppo.

---

- 4 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

---

- 5 Rilasciare il pulsante **PTT** per ascoltare. Quando la radio di destinazione risponde, il LED verde lampeggia, la radio si attiva e l'altoparlante emette il tono di risposta. Sul display, vengono

visualizzati l'icona della chiamata di gruppo, l'ID o l'alias del gruppo e l'ID o l'alias della radio trasmittente.

Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata. La radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

## Esecuzione di una chiamata privata

Benché sia possibile ricevere e/o rispondere a una chiamata privata effettuata da una singola radio autorizzata, la radio dell'utente deve essere programmata per poter effettuare una chiamata privata.

Se questa funzionalità non è attivata, verrà emesso un tono indicatore negativo quando si effettua una chiamata privata utilizzando il pulsante **Accesso rapido**, il selettore di canale.

- 1 Eseguire una delle seguenti operazioni:
  - Selezionare il canale con l'alias o l'ID dell'utente attivo. Vedere [Selezione di un tipo di chiamata a pagina 250](#).

- Premere il pulsante di **accesso rapido** programmato.

---

2 Tenere il microfono a circa 2,5/5 cm dalla bocca.

---

3 Premere il pulsante **PTT** per effettuare la chiamata. Il LED diventa verde fisso. Nell'angolo in alto a destra viene visualizzata l'icona della chiamata privata. Nella prima riga di testo, viene visualizzato l'alias dell'utente di destinazione. Sulla seconda riga di testo viene visualizzato lo stato della chiamata.

---

4 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

---

5 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio di destinazione risponde, il LED verde lampeggia.

Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata. La radio emette un breve tono. Sul display viene visualizzato Chiam. term.

---

È possibile programmare la radio in modo che controlli la presenza di attività nella radio di destinazione prima di instradare la chiamata privata. Se la radio di destinazione non è disponibile, verrà emesso un breve tono e sul display verrà visualizzata una mini notifica negativa.

## Esecuzione di una chiamata generale sito

Questa funzione consente di trasmettere a tutti gli utenti del sito che non sono attualmente già impegnati in una chiamata. È necessario programmare la radio per consentire l'utilizzo di questa funzione.

Gli utenti del canale o del sito non possono rispondere a una chiamata generale sito.

- 1 Selezionare il canale con l'alias del gruppo della chiamata generale sito attivo. Vedere la [Selezione di un tipo di chiamata a pagina 250](#).
- 2 Tenere il microfono a circa 2,5/5 cm dalla bocca.
- 3 Premere il pulsante **PTT** per effettuare la chiamata. Il LED diventa verde fisso. Nell'angolo superiore destro, viene visualizzata l'icona della chiamata di

gruppo. La prima riga di testo visualizza `Chiamata generale sito`.

- 4 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

## Esecuzione di una chiamata multigruppo

Questa funzione consente di trasmettere a tutti gli utenti di una serie di gruppi. È necessario programmare la radio per consentire l'utilizzo di questa funzione.

### NOTA:

Gli utenti dei gruppi non possono rispondere a una chiamata multigruppo.

- 1 Ruotare il selettore di canale per selezionare l'alias o l'ID del multigruppo.
- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED diventa verde fisso. Sul display compare l'alias o l'ID del multigruppo.

Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

---

## Esecuzione di una chiamata privata con un pulsante di chiamata rapida

### NOTA:

La pressione dei pulsanti programmabili deve essere eseguita dalla schermata iniziale.

La funzione di chiamata rapida consente di effettuare velocemente una chiamata privata a un alias o ID privato predefinito. È possibile assegnare questa funzione a una pressione lunga o breve del tasto programmabile.

Al pulsante di chiamata rapida è possibile assegnare UN SOLO alias o ID. Sulla radio è possibile programmare più pulsanti di chiamata rapida.

- 1 Premere il pulsante **Chiamata rapida** programmato per effettuare una chiamata privata all'alias o all'ID privato predefinito.

---

- 2 Tenere il microfono a circa 2,5/5 cm dalla bocca.

---

- 3 Premere il pulsante **PTT** per effettuare la chiamata. Il LED diventa verde fisso. Sul display compare l'alias o l'ID della chiamata privata.

---

- 4 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

---

- 5 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio di destinazione risponde, il LED verde inizia a lampeggiare.

Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata.

---

## Esecuzione di una chiamata tramite il pulsante Comp. man. programmabile

Questa funzione consente agli utenti della radio di effettuare chiamate private utilizzando il pulsante Comp. man. programmabile.

## Esecuzione di una chiamata privata

- 1 Premere il pulsante programmabile **Comp. man.** per accedere alla schermata della composizione manuale.

Sul display viene visualizzato Numero:.

---

- 2 Utilizzare la tastiera per immettere un alias o un ID privato dell'utente.
- 

- 3 Tenere il microfono a circa 2,5/5 cm dalla bocca.
- 

- 4 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED diventa verde fisso. Nell'angolo superiore destro, viene visualizzata l'icona della chiamata privata. Nella prima riga di testo è visualizzato l'alias dell'utente. Nella seconda riga compare invece lo stato della chiamata.
- 

- 5 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.
- 

- 6 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio di destinazione risponde, il LED verde inizia a lampeggiare.

Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata. La radio emette un breve tono. Sul display viene visualizzato Chiam. term.

---

## Esecuzione di una chiamata telefonica in uscita con il pulsante di composizione manuale programmabile

- 1 Premere il pulsante **Comp. man.** programmabile per accedere alla schermata della composizione manuale.

Sul display viene visualizzata l'opzione Numero:.

---

- 2 Utilizzare la tastiera per immettere un numero di telefono e premere  per far partire la chiamata al numero immesso.

Premere  per eliminare i caratteri indesiderati.

Premere , quindi  entro 2 secondi per inserire una pausa. La P sostituisce \* e # sul display.

Se l'operazione ha esito positivo, sulla prima riga del display viene visualizzato `Chiamata tel.` Sulla seconda riga del display viene visualizzato il numero di telefono composto.

Se si seleziona un numero di telefono non valido, sul display compare una mini notifica negativa, `Chiamata tel. fallita`, `Risorsa non disponibile` o `Autorizzazioni non valide`.

Se viene premuto  senza numero di telefono, la radio emette un tono indicatore positivo, quindi un tono indicatore negativo. Il display non cambia.

---

**3** Premere a lungo  per terminare la chiamata.

Sulla prima riga del display, viene visualizzata l'opzione `Fine`. Sulla seconda riga del display, viene visualizzata l'opzione `Chiam. tel.`

Sul display compare `Chiam. tel. finita`.

---

## Esecuzione di una chiamata telefonica privata in uscita tramite il menu del telefono

**1** Premere  per accedere al menu.

---

**2** Premere  oppure  fino a visualizzare `Telefono` e premere  per selezionare.

---

**3** Premere  per selezionare `Comp. man..`

Sulla prima riga del display viene visualizzato `Numero`, mentre sulla seconda viene visualizzato un cursore lampeggiante.

---

**4** Utilizzare la tastiera per immettere un numero di telefono e premere  per effettuare la chiamata al numero immesso.

Premere  per eliminare i caratteri indesiderati.

Premere , quindi  entro 2 secondi per inserire una pausa. La P sostituisce \* e # sul display.

Se l'operazione ha esito positivo, sulla prima riga del display viene visualizzato `Chiamata telefonica`. Sulla seconda riga del display viene visualizzato il numero di telefono composto.

Se si seleziona un numero di telefono non valido, sul display compare una mini notifica negativa, `Chiamata telefonica fallita`, `Risorsa non disponibile` o `Autorizzazioni non valide`.

Se viene premuto  senza immettere il numero di telefono, la radio emette un tono indicatore positivo, quindi un tono indicatore negativo. Il display non cambia.

**5** Premere a lungo  per terminare la chiamata.

Sulla prima riga del display viene visualizzata `Chiusura`. Sulla seconda riga del display, viene visualizzata l'opzione `Chiamata telefonica`.

Sul display viene visualizzato `Chiamata telefonica finita`.

## Esecuzione di una chiamata telefonica privata in uscita dalla lista Contatti

### NOTA:

Se la funzione Composizione manuale telefono è disattivata in Connect Plus Option Board CPS MOTOTRBO, la voce `Numero telefonico` **non** viene visualizzata nel menu.

- 1** Premere  per accedere al menu.
- 2** Premere  oppure  fino a visualizzare `Contatti` e premere  per selezionare.
- 3** Premere  oppure  fino a visualizzare `Composizione manuale` e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare Numero tel. e premere  per selezionare. Sulla prima riga del display viene visualizzato Numero, mentre sulla seconda viene visualizzato un cursore lampeggiante.

- 5 Utilizzare la tastiera per immettere un numero di telefono e premere  per effettuare la chiamata al numero immesso.

Se viene premuto il pulsante **PTT**, sul display viene visualizzata una mini notifica negativa, Premi OK per inviare e si torna alla schermata precedente.

Premere  per eliminare i caratteri indesiderati.

Premere  , quindi  entro 2 secondi per inserire una pausa. La P sostituisce \* e # sul display.

Se l'operazione ha esito positivo, sulla prima riga del display viene visualizzato Chiamata telefonica. Sulla seconda riga del display viene visualizzato il numero di telefono composto.

Se viene premuto  senza immettere il numero di telefono, la radio emette un tono indicatore positivo, quindi un tono indicatore negativo. Il display non cambia.

- 6 Premere a lungo  per terminare la chiamata.

Sulla prima riga del display viene visualizzata Chiusura. Sulla seconda riga del display, viene visualizzata l'opzione Chiam. tel.

Sul display viene visualizzato Chiam. tel. finita.

## In attesa dell'autorizzazione del canale in una chiamata telefonica privata in uscita

Quando si effettua una chiamata telefonica privata, sulla prima riga del display viene visualizzato Chiamata tel. Sulla seconda riga del display viene visualizzato il numero di telefono composto.

La chiamata telefonica attiva viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata.

Il numero di telefono viene visualizzato nella prima riga del display.

In caso di esito negativo, sul display compare una mini notifica negativa, Chiam tel fallita, Risorsa non disponibile o Autorizzazioni non valide.

Premere a lungo  per terminare la chiamata.

Il display torna alla schermata precedente.

## Composizione di cifre aggiuntive memorizzate nel buffer in una chiamata privata in uscita connessa

La chiamata telefonica in corso viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. Il numero di telefono viene visualizzato nella prima riga del display.

- 1 Immettere le cifre utilizzando la tastiera.

Premere  per eliminare i caratteri indesiderati.

Premere , quindi  entro 2 secondi per inserire una pausa. La P sostituisce \* e # sul display.

Sulla prima riga di testo del display viene visualizzato Cifre supp., sulla seconda riga di testo del display, invece, le cifre supplementari immesse.

- 2 Premere il pulsante .

Se viene premuto il pulsante **PTT**, sul display viene visualizzata una mini notifica negativa, Premi OK per inviare e si torna alla schermata precedente.

La chiamata telefonica viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. La prima riga di testo del display visualizza il numero di telefono con la composizione delle cifre aggiuntive.

- 3 Eseguire una delle seguenti operazioni:
  - Premere  per tornare alla schermata della chiamata telefonica.

- Premere a lungo  per terminare la chiamata.

## Composizione di cifre aggiuntive live in una chiamata privata in uscita connessa

La chiamata telefonica in corso viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. Il numero di telefono viene visualizzato nella prima riga del display.

- 1 Premere il pulsante **PTT** e utilizzare la tastiera per immettere le cifre.

La chiamata telefonica viene visualizzata nell'angolo in alto a destra sotto forma di icona della chiamata privata. La prima riga di testo del display visualizza il numero di telefono con la composizione delle cifre aggiuntive.

- 2 Premere a lungo  per terminare la chiamata.

Sulla prima riga del display, viene visualizzata l'opzione **Fine**. Sulla seconda riga del display, viene visualizzata l'opzione **Chiam. tel.**

[Invia feedback](#)

Sul display compare **Chiam. tel. finita.**

## Funzionalità avanzate in modalità Connect Plus

Questo capitolo descrive le funzioni disponibili nella radio.

### Promemoria canale principale

Questa funzione fornisce un promemoria quando la radio non è impostata sul canale principale per un certo periodo di tempo.

Se questa funzione è attivata tramite CPS, vengono emessi l'annuncio e il tono del promemoria del canale principale, sulla prima riga del display viene visualizzato **Canale** mentre sulla seconda riga viene visualizzato **non principale** periodicamente quando la radio non è impostata sul canale principale per un certo periodo di tempo.

È possibile rispondere al promemoria eseguendo una delle operazioni descritte di seguito:

- Tornare al canale principale.

- Disattivare temporaneamente l'audio del promemoria utilizzando il pulsante programmabile.
- Impostare un nuovo canale principale utilizzando il pulsante programmabile.

## Fallback automatico

Il fallback automatico è una funzione di sistema che consente di continuare ad effettuare e ricevere chiamate (eccetto quelle di emergenza) nel contatto di gruppo selezionato in caso di determinati tipi di guasti del sistema Connect Plus.

Se si verifica uno di questi guasti, la radio dell'utente tenta di spostarsi in un diverso sito Connect Plus. La ricerca può portare la radio a trovare un sito Connect Plus funzionante o un "canale di fallback" (se la radio è abilitata per il fallback automatico). Un canale di fallback è un ripetitore che normalmente fa parte di un sito Connect Plus funzionante, ma che momentaneamente non è in grado di comunicare con l'unità di controllo del sito o con la rete Connect Plus. In modalità di fallback, il ripetitore agisce da singolo ripetitore digitale. Nella modalità di fallback automatico, sono supportate solo chiamate di gruppo non di emergenza. Non sono supportati altri tipi di chiamata.

## Indicazioni della modalità di fallback automatico

Quando la radio utilizza un canale di fallback, viene emesso un "tono di fallback" intermittente all'incirca ogni 15 secondi (tranne durante la trasmissione). Il display visualizza periodicamente il breve messaggio "Canale di fallback". La radio, inoltre, consente di utilizzare il PTT solo nel contatto di gruppo selezionato (chiamata di gruppo, chiamata multigruppo o Site All Call) e non consente di effettuare chiamate di altro tipo.

## Esecuzione e ricezione di chiamate in modalità di fallback

### NOTA:

Le chiamate possono essere ascoltate solo dalle radio che stanno monitorando lo stesso canale di fallback e che sono selezionate per lo stesso gruppo. Le chiamate non vengono collegate in rete ad altri siti o ripetitori.

Le chiamate Emergency Voice e Emergency Alert non sono disponibili in modalità di fallback. Se si preme il pulsante di emergenza in modalità di fallback, la radio emette un tono che segnala la pressione di un tasto non valido. Le radio dotate di display mostrano anche il messaggio "Funzione non disponibile".

Le chiamate private (da radio a radio) e le chiamate telefoniche non sono disponibili in modalità di fallback. Se si tenta di effettuare una chiamata a un contatto privato, si riceve un tono di chiamata rifiutata. A questo punto, occorre selezionare il contatto di gruppo desiderato. Altre chiamate non supportate includono il monitor remoto, l'avviso di chiamata, il controllo radio, l'attivazione e la disattivazione della radio, i messaggi di testo, gli

aggiornamenti sulla posizione e le chiamate dati a pacchetto.

La funzione ETCA (Enhanced Traffic Channel Access) non è supportata in modalità di fallback automatico. Se due o più utenti della radio premono contemporaneamente (o quasi contemporaneamente) il pulsante **PTT**, è possibile che entrambe le radio trasmettano finché il pulsante **PTT** non viene rilasciato. In tal caso, è possibile che nessuna delle trasmissioni risulti comprensibile alle radio che le ricevono.

L'esecuzione delle chiamate in modalità di fallback è simile a quella delle chiamate normali. È sufficiente selezionare il contatto di gruppo da utilizzare (seguendo il normale metodo di selezione del canale della radio), quindi premere il pulsante **PTT** per iniziare la chiamata. È possibile che il canale sia già utilizzato da un altro gruppo. In tal caso, si riceve un tono di occupato e sul display viene visualizzato "Canale occupato". È possibile selezionare i contatti di un gruppo, un multigruppo o una Site All Call seguendo il normale metodo di selezione del canale della radio. Mentre la radio utilizza il canale di fallback, il multigruppo si comporta come qualsiasi altro gruppo, ovvero può essere ascoltato solo dalle radio attualmente selezionate per lo stesso multigruppo.

## Ripristino del normale funzionamento

Se si ripristina il normale funzionamento del trunking del sito mentre la radio si trova nel raggio d'azione del ripetitore di fallback, la radio abbandona automaticamente la modalità di fallback automatico. Viene emesso un segnale acustico quando la radio esegue la registrazione. Se ci si trova nel raggio d'azione di un sito utilizzabile (in cui non è attiva la modalità di fallback), è possibile premere il pulsante Richiesta roaming (se questo pulsante è stato programmato sulla propria radio) per cercare e registrarsi in un sito disponibile. Se non è disponibile nessun altro sito, al termine della ricerca la radio torna in modalità di fallback automatico. Se si esce dall'area di copertura del ripetitore di fallback, la radio entra in modalità di ricerca (sul display viene indicato `Ricerca in corso`).

## Radio Check

L'abilitazione di questa funzione consente di determinare se un'altra radio è operativa nel sistema, senza disturbare l'utente. La radio di destinazione non emette segnali acustici né notifiche.

Questa funzione è disponibile solo per gli ID o gli alias dell'utente.

## Invio di un controllo radio

- 1 Accedere alla funzione Controllo radio.

Controllo della radio	Operazioni
<b>Pulsante Controllo radio programmato</b>	<p><b>a</b> Premere il pulsante programmato <b>Controllo radio</b>.</p> <p><b>b</b> Premere  oppure  fino a visualizzare l'ID o l'alias dell'utente desiderato e premere  per selezionare.</p>
<b>Menu</b>	<p><b>a</b> Premere  per accedere al menu.</p> <p><b>b</b> Premere  oppure  fino a visualizzare</p>

Controllo della radio	Operazioni
	<p>Contatti e premere  per selezionare.</p> <p><b>c</b> Premere  oppure  fino a visualizzare l'ID o l'alias dell'utente desiderato e premere  per selezionare.</p> <p><b>d</b> Premere  oppure  fino a visualizzare Controllo radio e premere  per selezionare.</p>

Sul display, viene visualizzato l'alias di destinazione indicante che la richiesta è in corso. Il LED diventa verde fisso.

## 2 Attendere la conferma.

Se la radio di destinazione è attiva nel sistema, viene emesso un tono e sul display viene visualizzato per qualche istante Radio dest. disponibile.

Se la radio di destinazione non è attiva nel sistema, viene emesso un tono e sul display viene visualizzato per qualche istante Radio dest. non disponib..

La radio torna alla schermata dell'alias o dell'ID dell'utente quando viene avviata tramite il menu.

La radio torna alla schermata iniziale se viene avviata tramite il tasto programmabile.

---

## Monitoraggio remoto

La funzione Monitor remoto consente di attivare il microfono della radio di destinazione (solo l'alias o gli ID dell'utente). Il LED verde lampeggerà una volta sul terminale radio di destinazione. Questa funzione è utile per controllare a distanza la presenza di attività udibili nelle vicinanze della radio di destinazione.

È necessario programmare la radio per consentire l'utilizzo di questa funzione.

## Avvio del monitoraggio remoto

### NOTA:

Monitor remoto si arresta automaticamente dopo un periodo di tempo programmato oppure quando vengono effettuati tentativi per avviare la trasmissione, cambiare canale o spegnere la radio.

- 1 Accedere alla funzione Monitor rem.

Controllo della radio	Operazioni
<b>Pulsante Monitor rem. programmato</b>	<p><b>a</b> Premere il pulsante programmato <b>Monitor remoto</b>.</p> <p><b>b</b> Premere  oppure  fino a visualizzare l'ID o l'alias dell'utente desiderato e premere  per selezionare.</p>

## Controllo della radio Operazioni

### Menu

- a** Premere  per accedere al menu.
- b** Premere  oppure  fino a visualizzare Contatti e premere  per selezionare.
- c** Premere  oppure  fino a visualizzare l'ID o l'alias dell'utente desiderato e premere  per selezionare.
- d** Premere  oppure  fino a visualizzare Comp. man. e premere  per selezionare.

Controllo della radio	Operazioni
	<p>e Premere  oppure  fino a visualizzare Mon remoto e premere  per selezionare.</p>

Sulla prima riga di testo viene visualizzato Mon remoto. Nella seconda riga di testo viene visualizzato l'alias di destinazione, indicante che la richiesta è in corso. Il LED si illumina e lampeggia in verde.

## 2 Attendere la conferma.

Se l'operazione viene completata correttamente, viene emesso un tono indicatore positivo e sul display viene visualizzato temporaneamente Monitor rem. riuscito. La radio riproduce l'audio dalla radio monitorata per un periodo di tempo programmato e sul display viene visualizzato Mon rem., seguito dall'alias di destinazione. Allo scadere del timer, la radio emette un tono di avviso e il LED verde si spegne.

[Invia feedback](#)

Se l'operazione non viene completata correttamente, la radio emette un tono indicatore negativo e sul display viene visualizzato Monitor rem. non riuscito.

## Scan

Questa funzione consente alla radio di monitorare e unirsi alle chiamate di gruppi definiti in una lista scansione programmata. Quando la scansione è attivata, sulla barra di stato viene visualizzata un'apposita icona e il LED lampeggia in giallo in caso di inattività.

## Inizio e fine della scansione

### NOTA:

Questa procedura attiva o disattiva la funzione di scansione per tutte le zone Connect Plus con lo stesso ID di rete della zona attualmente selezionata. È importante notare che pur attivando la funzione di scansione mediante questa procedura, la scansione potrebbe risultare ancora disattivata per alcuni (o per tutti i) gruppi della lista scansione. Per ulteriori informazioni, vedere [Modifica della lista scansione a pagina 274](#).

È possibile avviare e interrompere una scansione premendo il pulsante programmato **Scansione OPPURE** seguendo la procedura descritta di seguito.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Scansione e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Accendi o Spegni e premere  per selezionare.
  - Sul display viene visualizzato Scan. attiva se la scansione è attivata.
  - Sul menu di scansione viene visualizzato Spegni se la scansione è attivata.
  - Sul display viene visualizzato Scan. disat. se la scansione è disattivata.
  - Sul menu di scansione, viene visualizzato Accendi se la scansione è disattivata.

## Risposta a una trasmissione durante la scansione

Durante la scansione, la radio si sintonizza sul gruppo sul quale ha rilevato la presenza di attività. La radio è in ascolto continuo di un membro qualsiasi della lista scansione quando è inattiva sul canale di controllo.

- 1 Tenere il microfono a circa 2,5/5 cm dalla bocca.

---

- 2 Premere il pulsante **PTT** durante il tempo di chiusura.  
Il LED diventa verde fisso.

---

- 3 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

---

- 4 Rilasciare il pulsante **PTT** per ascoltare.  
Se non si risponde entro il tempo di permanenza, la radio riprende la scansione di altri gruppi.

## Scansione configurabile dall'utente

Se il menu Mod. lista è abilitato, l'utente è in grado di aggiungere e rimuovere membri di scansione dal menu Aggiungi mem. Un membro della lista di scansione deve essere un normale contatto di gruppo (ad esempio, non può essere una chiamata multigruppo o una chiamata generale sito/chiamata generale su tutta la rete (NWAC)) attualmente assegnato a una posizione del selettore canale in una zona Connect Plus con lo stesso ID rete della zona selezionata. L'alias del talkgroup non deve corrispondere a nessun talkgroup incluso nella lista scansione della zona.

La scansione può essere attivata e disattivata dal menu o premendo un pulsante **Ricerca attivata/disattivata** programmato.

Questa funzione è utilizzabile solo quando la radio non è impegnata in una chiamata. Se si sta ascoltando una chiamata, la radio non può cercare altre chiamate di gruppo e pertanto non può rilevare le chiamate in corso. Al termine della chiamata, la radio torna nel time slot del canale di controllo e può cercare i gruppi inclusi nella lista scansione.

## Attivazione o disattivazione della scansione

### NOTA:

Questa procedura attiva o disattiva la funzione di scansione per tutte le zone con lo stesso ID rete della zona attualmente selezionata. È importante notare che pur attivando la funzione di scansione mediante questa procedura, la scansione potrebbe risultare ancora disattivata per alcuni (o per tutti i) gruppi della lista scansione. Vedere la sezione successiva per ulteriori informazioni.

Quando si attiva la scansione, la relativa icona compare sul display. Quando la scansione è attiva e non si sta partecipando a una chiamata, il LED lampeggia in verde e giallo.

La procedura per attivare o disattivare la scansione dipende da come è stata programmata la radio. Se la radio è stata programmata con un pulsante Scan att./dis., utilizzare questo pulsante per attivare o disattivare la funzione. Se la radio è stata programmata in modo che sia

possibile attivare o disattivare la scansione dal menu, attenersi alla procedura descritta di seguito.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Scansione e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Accendi o Spegni e premere  per selezionare.
  - Sul display viene visualizzato temporaneamente Scansione attivata se la scansione è disattivata.
  - Sul display viene visualizzato temporaneamente Scansione disattivata se la scansione è attivata.

## Modifica della lista scansione

### NOTA:

Se la voce nella lista scansione corrisponde al gruppo attualmente selezionato, la radio rileva l'attività del gruppo a prescindere dal fatto che in quel momento un segno di spunta compaia o meno accanto al nome del gruppo. Quando una radio non è impegnata in una chiamata, rileva l'attività del gruppo, il multigruppo, la chiamata generale sito e il relativo Default Emergency Revert Group (se configurato) selezionati. Questa operazione non può essere disattivata. Se è attivata la scansione, la radio ascolta anche l'attività dei membri della lista scansione della zona abilitati.

La lista scansione specifica i gruppi da cercare. Questo elenco viene creato durante la programmazione della radio. Se la radio è stata programmata per consentire la modifica della lista scansione, è possibile:

- Attivare/disattivare la scansione per singoli gruppi della lista.
- Aggiungere e rimuovere membri di scansione dal menu Aggiungi mem. Fare riferimento alla [Aggiunta o eliminazione di un gruppo tramite il menu Aggiungi mem. a pagina 276](#).

**NOTA:**

Un membro della lista scansione deve essere un normale contatto di gruppo (non può essere una chiamata multigruppo o una chiamata generale sito/ chiamata generale su tutta la rete (NWAC)) attualmente assegnato a una posizione del selettore canale in una zona Connect Plus con lo stesso ID rete della zona selezionata.

L'alias del talkgroup non deve corrispondere a nessun talkgroup incluso nella lista scansione della zona.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare `Vis/mod lista` e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare il nome del gruppo desiderato.  
Un segno di spunta davanti al nome del gruppo indica che la scansione è attualmente attiva per quel gruppo.

Se non è presente un segno di spunta davanti al nome del gruppo, la scansione non è attualmente attiva per quel gruppo.

---

- 4  per selezionare il gruppo desiderato.  
Sul display viene visualizzato `Abilita` se la scansione non è attualmente attiva per il gruppo.  
Sul display viene visualizzato `Disabilita` se la scansione è attualmente attiva per il gruppo.

---

  - 5 Selezionare l'opzione visualizzata (`Abilita` o `Disabilita`) e premere  per selezionare.  
In base all'opzione selezionata, sulla radio viene visualizzato per qualche istante `Scansione abilitata` o `Scansione disabilitata` per confermare l'operazione.
- 

Sul display della radio viene nuovamente visualizzata la lista scansione della zona. Davanti al nome del gruppo per il quale è stata attivata la scansione compare un segno di spunta. Se la scansione è stata disattivata per il gruppo, il segno di spunta davanti al nome del gruppo viene rimosso.

## Aggiunta o eliminazione di un gruppo tramite il menu Aggiungi mem.

La radio Connect Plus non consente il posizionamento (o la visualizzazione come "candidato di scansione") di un numero del gruppo o di un alias del gruppo duplicato in una lista scansione di una zona. A causa di questa regola, l'elenco dei "contatti di scansione" descritto in [passaggio 6](#) e [passaggio 7](#) cambia talvolta dopo l'aggiunta o l'eliminazione di un gruppo alla/dalla lista scansione di una zona.

Se la radio è stata programmata per consentire la modifica della lista scansione, è possibile utilizzare il menu Aggiungi mem. per aggiungere o eliminare un gruppo alla/dalla lista scansione della zona attualmente selezionata.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare l'opzione Scansione e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare <Aggiungi membri> e premere  per selezionare.

Sul display viene visualizzato Aggiungi membri da n zona (n = numero di zona Connect Plus della prima zona Connect Plus nella radio con lo stesso ID radio della zona attualmente selezionata).

---

4 Eseguire una delle seguenti operazioni:

- Se il gruppo che si desidera aggiungere alla lista scansione è assegnato a una posizione del selettore di canale in quella zona, andare al [passaggio 6](#).
  - Se il gruppo che si desidera aggiungere alla lista scansione è assegnato a una posizione del selettore di canale in una zona Connect Plus differente, andare al [passaggio 5](#).
- 

5 Premere  oppure  per scorrere un elenco delle zone Connect Plus che presentano lo stesso ID rete della zona attualmente selezionata.

---

- 6 Dopo avere individuato la zona Connect Plus in cui il gruppo selezionato è assegnato a una posizione del selettore di canale, premere  per selezionare.

Sulla radio viene visualizzata la prima voce in un elenco di gruppi assegnati a una posizione del canale in quella zona. I gruppi nell'elenco sono denominati "candidati di scansione", perché possono essere aggiunti alla lista scansione della zona attualmente selezionata (o sono già sulla lista scansione della zona).

Se la zona non presenta gruppi che possono essere aggiunti alla lista scansione, sulla radio viene visualizzata l'indicazione `Nessun candidato`.

- 7 Premere  oppure  per scorrere l'elenco dei gruppi candidati.

La visualizzazione di un segno più (+) immediatamente prima dell'alias del gruppo indica che il gruppo si trova attualmente nella lista scansione per la zona selezionata.

La mancata visualizzazione del segno più (+) immediatamente prima dell'alias indica che il gruppo

non si trova attualmente nella lista scansione, ma può essere aggiunto.

- 8 Premere  una volta visualizzato l'alias del gruppo desiderato.

Se il gruppo non si trova nella lista scansione per la zona attualmente selezionata, viene visualizzato il messaggio `Aggiungi` (alias del gruppo).

Se il gruppo si trova già nella lista scansione per la zona attualmente selezionata, viene visualizzato il messaggio `Elimina` (alias del gruppo).

- 9 Premere  per accettare il messaggio visualizzato (`Aggiungi` o `Elimina`).

Quando si elimina un gruppo dall'elenco, è possibile scoprire se l'operazione è riuscita se il segno più (+) non viene più visualizzato immediatamente prima dell'alias.

Quando si aggiunge un gruppo all'elenco, è possibile scoprire se l'operazione è riuscita se il segno più (+) viene visualizzato prima dell'alias.

Se durante il tentativo di aggiunta di un gruppo, l'elenco risulta già pieno, sulla radio viene

visualizzato *Lista piena*. In tal caso, sarà necessario eliminare un gruppo dalla lista scansione prima di aggiungerne uno nuovo.

- 10** Al termine, premere  il numero di volte necessario per tornare al menu desiderato.

## Funzionamento della scansione

### NOTA:

Se la radio prende parte a una chiamata di un membro della lista scansione della zona da una zona diversa e il timer di chiusura chiamata scade prima che l'utente riesca a rispondere, per poter rispondere è necessario accedere alla zona e al canale del membro della lista scansione e avviare una nuova chiamata.

Esistono particolari circostanze in cui è possibile che vengano perse chiamate relative ai gruppi inclusi nella propria lista scansione. Quando viene persa una chiamata per uno dei motivi descritti di seguito, ciò non indica che la radio ha un problema. Si tratta del normale funzionamento della funzionalità di scansione di Connect Plus.

- La funzione di scansione non è attiva (controllare se sul display è presente l'icona della scansione).

- Il membro della lista scansione è stato disattivato dal menu (vedere [Modifica della lista scansione a pagina 274](#)).
- La radio è già impegnata in una chiamata.
- Nessun membro del gruppo che si sta cercando è registrato nel sito dell'utente (solo sistemi Multisite).

## Scansione talkback

Se la radio esegue una scansione durante una chiamata dalla lista scansione di un gruppo selezionabile e se il pulsante **PTT** viene premuto durante la chiamata sottoposta a scansione, il funzionamento della radio dipende dall'attivazione o dalla disattivazione dell'opzione Scansione talkback durante la programmazione della radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

### Talkback durante scansione disattivato

La radio abbandona la chiamata di cui si sta eseguendo la scansione e tenta di trasmettere al contatto disponibile per la posizione del canale attualmente selezionato. Dopo la scadenza del tempo di permanenza chiamata per il contatto attualmente selezionato, la radio torna al canale iniziale e avvia il timer tempo di permanenza scansione. La radio

riprende la scansione del gruppo dopo la scadenza del timer del tempo di permanenza scansione.

### Talkback durante scansione attivato

Se si preme il pulsante **PTT** durante il tempo di chiusura del gruppo della chiamata di cui si sta eseguendo la scansione, la radio tenta di trasmettere al gruppo di scansione.

#### NOTA:

Se si cerca in una chiamata un gruppo che non è stato assegnato a una posizione del canale nella zona attualmente selezionata e si perde il tempo di permanenza della chiamata, è necessario spostarsi alla zona corretta, quindi selezionare la posizione del canale del gruppo per parlare con il gruppo.

## Modifica della priorità di un talkgroup

La funzione Monitoraggio priorità consente alla radio di ricevere automaticamente la trasmissione dal talkgroup con una priorità più alta quando si trova in un'altra chiamata. Quando la radio passa alla chiamata con priorità più alta viene emesso un tono.

Sono disponibili due livelli di priorità per i talkgroup: P1 e P2. P1 ha una priorità più alta rispetto a P2.

[Invia feedback](#)

#### NOTA:

Se è stato configurato l'ID Default Emergency Revert Group in MOTOTRBO Connect Plus Option Board CPS, sono disponibili tre livelli di priorità per i talkgroup: P0, P1 e P2. P0 è l'ID permanente del gruppo di ripristino d'emergenza e ha la massima priorità. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Scansione e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Vis/mod lista e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare il talkgroup desiderato e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Mod. priorità e premere  per selezionare.

---

6 Premere  oppure  fino a visualizzare il livello di priorità desiderato e premere  per selezionare.

Prima di tornare alla schermata precedente, sul display viene visualizzata una mini notifica positiva. L'icona della priorità viene visualizzata a sinistra del talkgroup.

---

## Impostazioni dei contatti

### NOTA:

È possibile aggiungere o modificare gli ID degli utenti relativi ai contatti di Connect Plus. Gli ID dei terminali radio possono essere eliminati solo dal rivenditore.

Se la funzione Privacy è abilitata su un canale, è possibile effettuare chiamate vocali con privacy abilitata su quel canale. Solo le radio di destinazione che hanno la stessa chiave di privacy oppure lo stesso valore e ID della chiave della radio trasmittente sono in grado di decodificare la trasmissione.

L'accesso agli elenchi di contatti dipende dalla configurazione della zona:

- Se nella radio è configurata una sola zona, l'elenco dei contatti mostra direttamente l'elenco della zona attualmente selezionata.
- Se nella radio sono configurate più zone, la Cart. Cont. zona mostra tutte le zone con ID rete uguali alla zona attualmente selezionata. L'utente può accedere ai contatti in queste zone.

La lista Contatti della radio svolge le funzioni di una rubrica telefonica. Ogni voce corrisponde a un alias o un ID da utilizzare per inviare una chiamata.

Ogni zona fornisce una lista contatti contenente fino a 100 contatti. Sono disponibili i seguenti tipi di contatto:

- Chiamata privata
- Chiamata di gruppo
- Chiamata multigruppo
- Site All Call Voice
- Site All Call Text
- Chiamata dispatch

Il tipo di contatto Chiamata dispatch serve a inviare un messaggio di testo a un PC dispatcher tramite un server di messaggistica di terze parti.

## Esecuzione di una chiamata privata dalla lista Contatti

- 1 Premere  per accedere al menu.
- 

- 2 Premere  oppure  fino a visualizzare Contatti e premere  per selezionare.  
Le voci sono elencate in ordine alfabetico.
- 

- 3 Tenere il microfono a circa 2,5/5 cm dalla bocca.
- 

- 4 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED diventa verde fisso.
- 

- 5 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.
- 

- 6 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio di destinazione risponde, il LED lampeggia in verde e sul display viene visualizzato l'ID dell'utente che effettua la chiamata.

Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata.

La radio emette un breve tono. Sul display viene visualizzato Chiam. term.

---

## Esecuzione di una chiamata attraverso la ricerca per alias

È possibile trovare l'alias dell'utente desiderato anche eseguendo la ricerca alfanumerica o degli alias.

Questa funzione è disponibile soltanto in Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Contatti e premere  per selezionare.  
Le voci sono elencate in ordine alfabetico.

---

- 3 Immettere il primo carattere dell'alias desiderato, quindi premere  oppure  per individuare l'alias desiderato.

---

- 4 Tenere il microfono a circa 2,5/5 cm dalla bocca.

---

- 5 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED diventa verde fisso. Sul display, viene visualizzato l'alias di destinazione.

- 6 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.
- 

- 7 Rilasciare il pulsante **PTT** per ascoltare.  
Quando la radio di destinazione risponde, il LED verde inizia a lampeggiare.  
Se non si verifica alcuna attività vocale per un periodo prestabilito, la chiamata viene terminata.  
Sul display viene visualizzato Chiam. term.
- 

## Aggiunta di un nuovo contatto

- 1 Premere  per accedere al menu.

---

  - 2 Premere  oppure  fino a visualizzare Contatti e premere  per selezionare.

---

  - 3 Premere  oppure  fino a visualizzare Nuovo cont. e premere  per selezionare.
-

4 Utilizzare la tastiera per immettere il numero del contatto e premere  per confermare.

5 Utilizzare la tastiera per immettere il nome del contatto e premere  per confermare.

6 Se si aggiunge un contatto radio, premere  oppure  fino a visualizzare il tipo di suoneria desiderato e premere  per selezionare.

La radio emette un tono indicatore positivo e sul display viene visualizzato *Contatto salvato*.

## Impostazioni degli indicatori di chiamata

Questa funzione consente agli utenti della radio di configurare le suonerie per le chiamate o i messaggi di testo.

## Attivazione e disattivazione delle suonerie per l'avviso di chiamata

È possibile selezionare o attivare e disattivare la suoneria che segnala la ricezione di un avviso di chiamata.

1 Premere  per accedere al menu.

2 Premere  oppure  fino a visualizzare *Utilità* e premere  per selezionare.

3 Premere  oppure  fino a visualizzare *Impost. radio* e premere  per selezionare.

4 Premere  oppure  fino a visualizzare *Toni/avvisi* e premere  per selezionare.

5 Premere  oppure  fino a visualizzare *Suonerie* e premere  per selezionare.

- 6 Premere  oppure  fino a visualizzare Avviso di chiamata e premere  per selezionare.
- Il tono attualmente selezionato è contrassegnato da .
- 

- 7 Premere  oppure  fino a visualizzare il tono desiderato e premere  per selezionare.
-  viene visualizzato accanto al tono selezionato.
- 

## Attivazione e disattivazione delle suonerie per le chiamate private

È possibile attivare e disattivare la suoneria che segnala la ricezione di una chiamata privata.

- 1 Premere  per accedere al menu.
- 

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.
- 

- 3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.
- 

- 4 Premere  oppure  fino a visualizzare Toni/avvisi e premere  per selezionare.
- 

- 5 Premere  oppure  fino a visualizzare Suonerie e premere  per selezionare.
- 

- 6 Premere  oppure  fino a visualizzare Chiam. privata e premere  per selezionare.
-

- 7 Premere  per attivare/disattivare i toni delle suonerie delle chiamate private.

Sul display viene visualizzato  accanto ad **Abilitato**, se i toni delle suonerie delle chiamate private sono attivati.

 non viene visualizzato quando i toni delle suonerie delle chiamate private sono disattivati.

## Attivazione e disattivazione delle suonerie per i messaggi di testo

È possibile attivare o disattivare i toni che segnalano la ricezione di un messaggio di testo.

- 1 Premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare **Toni/avvisi** e premere  per selezionare.

- 5 Premere  oppure  fino a visualizzare **Suonerie** e premere  per selezionare.

- 6 Premere  oppure  fino a visualizzare **Msg testo** e premere  per selezionare.  
Il tono attualmente selezionato è contrassegnato da .

- 7 Premere  oppure  fino a visualizzare il tono desiderato e premere  per selezionare.  
 viene visualizzato accanto al tono selezionato.

## Selezione di un tipo di avviso suoneria

### NOTA:

Il pulsante programmato **Suon. Allarme** è assegnato dal rivenditore o dall'amministratore di sistema. rivolgersi al rivenditore o all'amministratore di sistema per sapere come è stata programmata la radio.

È possibile impostare una vibrazione predefinita per le chiamate ricevute. Se l'impostazione Tutti i toni è disabilitata, sulla radio viene visualizzata l'icona Tutti i toni disattivati. Se l'impostazione Tutti i toni è abilitata, sulla radio viene visualizzato il tipo di suoneria avviso.

Nel caso di una suoneria temporanea, la radio vibra una volta. Nel caso di una suoneria continua, la radio vibra ripetutamente. Se si imposta Suoneria e vibrazione, la radio riproduce una particolare suoneria nel caso vi sia una trasmissione radio in entrata (ad es. avviso di chiamata, messaggio o messaggio). Questa suoneria assomiglia a un tono indicatore positivo o a una chiamata senza risposta.

## Volume del tono per gli allarmi progressivi

È possibile programmare la radio in modo da emettere un avviso per l'utente circa l'arrivo di una chiamata radio a cui non ha dato risposta. Questo avviso consiste in un tono il cui volume aumenta automaticamente nel tempo. Questa funzione è detta segnalazione allarmi progressiva.

## Funzioni del registro chiamate

La radio memorizza i dettagli di tutte le chiamate private recentemente effettuate, ricevute o perse. Questo registro chiamate consente di visualizzare e gestire le chiamate recenti.

In ciascuna lista delle chiamate è possibile svolgere le seguenti attività:

- Elimina
- Visualizzare i dettagli

## Visualizzazione delle chiamate recenti

Le liste sono Perse, Risposte e Effettuate.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Registro chiamate e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare la lista desiderata e premere  per selezionare.  
Sul display viene visualizzata la chiamata più recente all'inizio della lista.

---

- 4 Premere  oppure  fino a visualizzare la lista.  
Premere il pulsante **PTT** per effettuare una chiamata privata con l'alias o l'ID selezionato.

## Eliminazione di una chiamata dalla lista delle chiamate

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Registro chiamate e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare la lista desiderata e premere  per selezionare.  
Se la lista delle chiamate selezionata non contiene voci, sul display viene visualizzato *Lista vuota* e, se i toni della tastiera sono abilitati, viene emesso un tono basso.

---

- 4 Premere  oppure  fino a visualizzare l'alias o l'ID desiderato e premere  per selezionare.

5 Premere  oppure  fino a visualizzare Elimina e premere  per selezionare.

---

6 Eseguire una delle seguenti operazioni:

- Premere  per selezionare Sì ed eliminare la voce. Sul display viene visualizzato Entry Deleted (Voce eliminata).
  - Premere  oppure  fino a visualizzare No, quindi premere il pulsante  per tornare alla schermata precedente.
- 

3 Premere  oppure  fino a visualizzare la lista desiderata e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare l'alias o l'ID desiderato e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Vis. dettagli e premere  per selezionare. Sul display vengono visualizzati i dettagli della lista chiamate.

---

## Visualizzazione dei dettagli dalla lista delle chiamate

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Registro chiamate e premere  per selezionare.

---

## Funzionamento dell'avviso di chiamata

Gli avvisi di chiamata consentono di avvisare un utente di radio specifico di richiamare non appena è disponibile.

Questa funzione è accessibile dal menu mediante Contatti, composizione manuale oppure un pulsante programmato

**Accesso rapido.**

## Risposta agli avvisi di chiamata

Seguire la procedura per rispondere agli avvisi di chiamata sulla radio.

Alla ricezione di un avviso di chiamata:

- Viene emesso un tono ripetitivo.
- Il LED giallo lampeggia.
- Sul display viene visualizzata la lista delle notifiche, contenente un avviso di chiamata e l'alias o l'ID della radio chiamante.

A seconda della configurazione effettuata dal rivenditore o dall'amministratore di sistema, è possibile rispondere a un avviso di chiamata effettuando una delle seguenti operazioni:

- Premere il pulsante **PTT** e rispondere con una chiamata privata direttamente al chiamante.
- Premere il pulsante **PTT** per continuare le normali comunicazioni del talkgroup.  
L'avviso di chiamata passa all'opzione Chiamata persa nel Registro chiamate. È possibile rispondere al chiamante dal registro delle chiamate perse.

Per ulteriori informazioni, vedere [Lista delle notifiche a pagina 203](#) e [Funzioni del registro chiamate a pagina 135](#).

## Invio di un avviso di chiamata dalla lista Contatti

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare **Contatti** e premere  per selezionare.

---

- 3 Utilizzare uno dei passaggi descritti di seguito per selezionare l'alias o l'ID dell'utente richiesto:
  - Selezionare direttamente l'alias dell'utente
  - Premere  oppure  fino a visualizzare l'alias dell'utente desiderato e premere  per selezionare.
  - utilizzare il menu **Comp. man.**

- Premere  oppure  fino a visualizzare Comp. man. e premere  per selezionare.
- Verrà visualizzata la schermata di immissione del testo Composizione manuale. Immettere l'ID dell'utente e premere  .

- 4 Premere  oppure  fino a visualizzare Avviso di chiamata e premere  per selezionare.

Sul display viene visualizzato Avviso di chiamata: <ID o alias dell'utente>Avviso di chiamata e l'ID o l'alias dell'utente, ad indicare che l'avviso di chiamata è stato inviato.

Durante l'invio dell'avviso di chiamata, il LED diventa verde fisso.

Se si riceve una conferma della ricezione dell'avviso di chiamata, sul display viene visualizzato Avv chiam inviato.

Se non si riceve una conferma della ricezione dell'avviso di chiamata, sul display viene visualizzato Avv chiam non inviato.

## Invio di un avviso di chiamata con il pulsante di accesso rapido

Premere il pulsante di **accesso rapido** programmato per inviare un avviso di chiamata all'alias predefinito.

Sul display, vengono visualizzati l'opzione Avviso chiam. e l'alias o l'ID dell'utente, per indicare che l'avviso di chiamata è stato inviato.

Durante l'invio dell'avviso di chiamata, il LED diventa verde fisso.

Se si riceve una conferma dell'avviso di chiamata, sul display viene visualizzato Avv chiam inviato.

Se non si riceve una conferma dell'avviso di chiamata, sul display viene visualizzato Avv chiam non inviato.

## Modalità Disattiva audio

La Modalità Muto fornisce all'utente la possibilità di disattivare tutti gli indicatori audio della radio.

Una volta avviata la funzione Modalità Muto, tutti gli indicatori audio sono vengono disattivati ad eccezione delle funzioni con priorità superiore, ad esempio le operazioni di emergenza.

Quando si esce dalla Modalità Muto, nella radio vengono riattivati i toni e le trasmissioni audio in corso.

### NOTA:

Si tratta di un'opzione acquistabile. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione della Modalità Muto

Seguire la procedura per attivare la Modalità Muto.

Accedere a questa funzione utilizzando il pulsante programmato **Modalità Muto**.

Quando la Modalità Muto è attivata, si verifica quanto segue:

- Viene emesso un tono indicatore positivo.

- Sul display viene visualizzato Modalità Muto on.
- Il LED rosso inizia a lampeggiare finché la Modalità Muto non viene disattivata.
- Sul display viene visualizzata l'icona **Modalità Muto** nella schermata iniziale.
- L'audio della radio viene disattivato.
- Il Timer modalità Muto inizia il conto alla rovescia della durata configurata.

## Impostazione del Timer modalità Muto

È possibile attivare la Modalità Muto per un periodo prestabilito di tempo impostando il Timer modalità Muto. La durata del timer viene configurata nel menu della radio e va da 0,5 a 6 ore. La Modalità Muto viene disattivata quando il timer scade.

Se il timer viene lasciato sul valore 0, la radio resta in Modalità Muto per un periodo di tempo indefinito finché il pulsante **Modalità Muto** non viene premuto.

1

Premere  per accedere al menu.

2 Premere  o  fino a visualizzare  
Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Impost.  
radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Timer  
modalità Muto. Premere  per effettuare la  
selezione.

5 Premere  o  per modificare il valore  
numerico di ciascuna cifra, quindi premere .

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato Modalità Muto off.
- Il LED rosso lampeggiante si spegne.
- L'icona **Modalità Muto** scompare dalla schermata iniziale.
- Sulla radio viene riattivato l'audio e ripristinato lo stato dell'altoparlante.
- Se il timer non è scaduto, il Timer modalità Muto viene arrestato.

#### NOTA:

È anche possibile uscire dalla Modalità Muto se l'utente trasmette la voce o passa a un canale non programmato.

## Uscita dalla Modalità Muto

È possibile uscire automaticamente da questa funzione quando scade il Timer modalità Muto.

Per uscire manualmente dalla Modalità Muto, completare una delle seguenti operazioni:

## Funzionamento in emergenza

### NOTA:

Se la radio è programmata per iniziare un'emergenza silenziosa o silenziosa con voce, nella maggior parte dei casi abbandonerà automaticamente il funzionamento silenzioso una volta conclusa la chiamata di emergenza o l'Emergency Alert. L'eccezione a questa regola si verifica quando Emergency Alert è la modalità di emergenza configurata e il tipo di emergenza è impostato su Silenzioso. Se la radio è programmata in questo modo, il funzionamento silenzioso continua finché non viene annullato premendo il pulsante **PTT** o il pulsante configurato per terminare l'emergenza.

Le chiamate Emergency Voice e gli Emergency Alert non sono supportati nella modalità di fallback automatico di Connect Plus. Per ulteriori informazioni, vedere la sezione [Fallback automatico a pagina 266](#).

Un Emergency Alert viene utilizzato per segnalare una situazione critica. È possibile iniziare un'emergenza in qualsiasi momento da qualsiasi schermata, anche se sono in corso attività sul canale in uso. Premere il pulsante **Emergenza** per attivare il Modo Emergenza programmato.

[Invia feedback](#)

La modalità di emergenza programmata può essere iniziata anche attivando la funzione opzionale Man Down. La funzione Emergenza può essere disattivata sulla radio.
