Il rivenditore può impostare la durata della pressione del pulsante programmato **Emergenza**, che, a differenza della pressione lunga, è simile per tutti gli altri pulsanti:

### Pressione breve

Compresa tra 0,05 e 0,75 secondi.

### Premere a lungo

Compresa tra 1 e 3,75 secondi.

Il pulsante **Emergenza** viene assegnato tramite la funzione Emerg. att./Emerg. disatt. Per conoscere in che modo è stato programmato il pulsante **Emergenza**, rivolgersi al rivenditore.

- Qualora per attivare il Modo Emergenza sia necessaria una pressione breve del pulsante **Emergenza**, premere a lungo il pulsante **Emergenza** per uscire dalla suddetta modalità.
- Qualora per attivare il Modo Emergenza sia necessaria una pressione lunga del pulsante **Emergenza**, premere brevemente il pulsante **Emergenza** per uscire dalla suddetta modalità.

Quando è selezionata per una zona Connect Plus, la radio supporta tre modalità di emergenza:

### **Chiamata di emergenza**

Premere il pulsante **PTT** per parlare sul time slot assegnato per l'emergenza.

### **Chiamata di emergenza con successiva trasmissione voce**

Per la prima trasmissione sul time slot assegnato all'emergenza, il microfono viene automaticamente attivato e l'utente può parlare senza premere il pulsante **PTT**. Il microfono resta in questa condizione per un intervallo di tempo programmato sulla radio. Per le trasmissioni successive comprese nella stessa chiamata di emergenza occorre premere il pulsante **PTT**.

### **Avviso emergenza**

Un Emergency Alert non è una chiamata vocale ma la notifica di un'emergenza inviata alle radio configurate per ricevere questo tipo di avvisi. La radio invia un avviso di emergenza utilizzando il canale di controllo del sito attualmente registrato. L'Emergency Alert viene ricevuto dalle radio della rete Connect Plus programmate per ricevere questo tipo di avvisi (indipendentemente dal sito della rete in cui sono registrate).

È possibile assegnare al pulsante di emergenza una sola modalità di emergenza per ciascuna zona. Inoltre, ogni

modalità di emergenza può corrispondere a uno dei seguenti tipi:

#### **Regular**

La radio inizia un'emergenza e mostra indicatori visivi e/o acustici.

#### **Silent**

La radio inizia un'emergenza, ma non mostra alcun indicatore visivo e/o acustico. La radio nasconde tutte le indicazioni acustiche o visive dell'emergenza finché non viene premuto il pulsante **PTT** per iniziare una trasmissione voce.

#### **Silenzioso c/ voce**

Il funzionamento è identico a quello del tipo di emergenza Silenzioso, tranne per il fatto che la radio disattiva anche l'audio di alcune trasmissioni voce.

## **Ricezione di un'emergenza in arrivo**

La radio potrebbe essere programmata per emettere un tono di avviso e visualizzare informazioni sull'emergenza in arrivo. In tal caso, quando viene ricevuta l'emergenza, sul display viene visualizzata una schermata con i dettagli e un'icona che segnala che si tratta di un'emergenza, l'alias o l'ID della radio che ha richiesto l'emergenza, il contatto del gruppo utilizzato per inviare l'emergenza e un'altra riga di

informazioni. Le informazioni aggiuntive sono rappresentate dal nome della zona di cui fa parte il contatto del gruppo.

Al momento, viene mostrata solo l'ultima emergenza decodificata. Se viene ricevuta una nuova emergenza prima che quella precedente sia stata cancellata, i dettagli della nuova emergenza sostituiscono i dettagli dell'emergenza precedente.

A seconda di come è stata programmata la radio, la schermata con i dettagli dell'emergenza (o la schermata Lista allarmi) resta visualizzata sul display della radio anche dopo che l'emergenza è terminata. È possibile salvare i dettagli dell'emergenza nella Lista allarmi o eliminare i dettagli come descritto nelle seguenti sezioni.

## Salvataggio dei dettagli di un'emergenza nella Lista allarmi

Se si salvano i dettagli di un'emergenza nella Lista allarmi, è possibile visualizzarli successivamente selezionando Lista allarmi dal menu principale.

- 1 Mentre è visualizzata la schermata con i dettagli dell'emergenza (o la Lista allarmi), premere . Viene visualizzata la schermata **Esci lista allarmi**.

- 2 Eseguire una delle operazioni seguenti:

- Selezionare **Sì** e premere  per salvare i dettagli dell'emergenza nella Lista allarmi e chiudere la schermata con i dettagli dell'emergenza (o la Lista allarmi).
- Selezionare **No** e premere  per tornare alla schermata con i dettagli dell'emergenza (o la Lista allarmi).

## Eliminazione dei dettagli di un'emergenza

- 1 Mentre è visualizzata la schermata con i dettagli dell'emergenza, premere .

Viene visualizzata la schermata **Elimina**.

---

- 2 Eseguire una delle operazioni seguenti:

- Selezionare **Sì** e premere  per eliminare i dettagli dell'emergenza.
  - Selezionare **No** e premere  per tornare alla schermata con i dettagli di emergenza.
- 

## Risposta a una chiamata di emergenza

### NOTA:

Se non si risponde alla chiamata di emergenza entro il tempo di permanenza designato, la chiamata viene terminata. Per parlare con il gruppo una volta scaduto il tempo di permanenza della chiamata di emergenza, è necessario prima selezionare la posizione del canale assegnata al gruppo (se non è già selezionata). Quindi, premere **PTT** per iniziare una chiamata non di emergenza al gruppo.

- 1 Quando si riceve una chiamata di emergenza, premere un pulsante qualsiasi per arrestare tutti gli indicatori di emergenza ricevuti.
  - 2 Premere il pulsante **PTT** per iniziare una trasmissione voce nel gruppo di emergenza.  
La trasmissione verrà ascoltata da tutte le radio che stanno monitorando il gruppo.
-

- 3 Attendere il termine del tono che indica il permesso di parlare (se abilitato), quindi parlare chiaramente nel microfono.

Il LED si accende in verde.

- 4 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio che ha inviato l'emergenza risponde, il LED lampeggia in verde. Sul display vengono visualizzati l'icona della chiamata di gruppo, l'ID del gruppo e l'ID radio trasmittente.

## Risposta a un Emergency Alert

### NOTA:

Il contatto del gruppo adoperato per l'Emergency Alert non deve essere adoperato per comunicazioni voce, in quanto ciò potrebbe impedire ad altre radio dello stesso gruppo di inviare e ricevere Emergency Alert.

Un Emergency Alert trasmesso da una radio segnala che l'utente si trova in una situazione di urgenza. È possibile rispondere all'avviso iniziando una chiamata privata alla radio che ha dichiarato l'emergenza, iniziando una chiamata di gruppo a un talkgroup designato, inviando alla

radio un avviso di chiamata, iniziando il monitor remoto della radio e così via. La risposta più appropriata viene stabilita dall'azienda/organizzazione e dalla situazione specifica.

## Ignora chiamata di ripristino emergenza

Questa funzione fornisce un'opzione affinché la radio ignori una chiamata di ripristino emergenza attiva.

Per attivare la funzione Ignora chiamata di ripristino emergenza, la radio deve essere configurata in CPCPS (Connect Plus Customer Programming Software).

Quando la funzione è attiva, sulla radio non vengono visualizzate le indicazioni di Chiamata di emergenza e non viene ricevuto l'audio sull'ID del gruppo di ripristino emergenza predefinito.

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Inizio di una chiamata di emergenza

### NOTA:

Se la radio è impostata sul funzionamento Silenzioso, durante il Modo Emergenza non vengono emessi indicatori audio o visivi finché non si preme il pulsante **PTT** per iniziare una trasmissione vocale.

Se la radio è impostata sul funzionamento Silenzioso con voce, non vengono inizialmente visualizzati indicatori audio o visivi finché la radio si trova in modalità di emergenza. Viene tuttavia riattivato l'audio delle trasmissioni delle radio che rispondono all'emergenza. Gli indicatori di emergenza vengono visualizzati solo se si preme il pulsante **PTT** per iniziare una trasmissione vocale dalla propria radio.

Sia in "Silenzioso" che in "Silenzioso con voce" la radio abbandona automaticamente il funzionamento silenzioso al termine della chiamata di emergenza.

- 1 Premere il pulsante programmato **Emergenza**.
- 
- 2 Premere il pulsante **PTT** per iniziare una trasmissione voce nel gruppo di emergenza.

Quando il pulsante **PTT** viene rilasciato, la chiamata di emergenza continua per il tempo di permanenza della chiamata di emergenza.

Se si preme il pulsante **PTT** durante questo intervallo di tempo, la chiamata di emergenza prosegue.

## Inizio di una chiamata di emergenza con successiva trasmissione voce

La radio deve essere programmata per questo tipo di funzionamento.

Se questa modalità è attivata, quando si preme il pulsante programmato **Emergenza** e alla radio viene assegnato un time slot, il microfono viene automaticamente attivato senza premere il pulsante **PTT**. Questo stato di microfono attivato è conosciuto come "hot mic". L'attivazione del "microfono acceso" vale per la prima trasmissione voce effettuata dalla radio durante la chiamata di emergenza. Per le trasmissioni successive comprese nella stessa chiamata di emergenza occorre premere il pulsante **PTT**.

- 1 Premere il pulsante programmato **Emergenza**.

- 2 Il microfono resta attivo in modalità "microfono acceso" per il tempo programmato nel codeplug della radio.

Durante questo intervallo, il LED verde è acceso.

- 3 Tenere premuto il pulsante **PTT** per continuare a parlare una volta trascorso il tempo programmato.

## Inizio di un Emergency Alert

### NOTA:

Se la radio è programmata per il funzionamento "Silenzioso" o "Silenzioso con voce", non vengono visualizzati indicatori audio o visivi che segnalano l'invio di un avviso di emergenza. Se la radio è programmata per il funzionamento "Silenzioso", tale funzionamento resta attivo per un tempo indefinito finché non si preme il pulsante PTT o il pulsante configurato per disattivare l'emergenza. Se la radio è programmata per il funzionamento "Silenzioso con voce", il funzionamento silenzioso viene annullato automaticamente dalla radio quando l'unità di controllo del sito trasmette l'avviso di emergenza.

Premere il pulsante **Emergenza** arancione.

Quando l'avviso di emergenza viene trasmesso all'unità di controllo del sito, sul display della radio viene visualizzata l'icona dell'emergenza, il contatto del gruppo adoperato per inviare l'avviso di emergenza e l'indicazione `Allarme TX`.

Dopo che l'avviso di emergenza è stato inviato e trasmesso alle altre radio, viene emesso un tono indicatore positivo e sul display della radio compare il messaggio `Allarme inviato`. Se non è possibile inviare l'avviso di emergenza, viene emesso un tono indicatore negativo e sul display della radio compare il messaggio `Allarme fallito`.

## Uscita dalla modalità di emergenza

### NOTA:

Se la chiamata di emergenza termina in seguito allo scadere del tempo di permanenza della chiamata ma l'emergenza non si è conclusa, premere di nuovo il pulsante **Emergenza** per ricominciare la procedura.

Se si inizia un Emergency Alert premendo il pulsante **Emergenza** programmato, la radio esce automaticamente

dalla modalità di emergenza dopo aver ricevuto una risposta dal sistema Connect Plus.

Se si inizia una chiamata di emergenza premendo il pulsante **Emergenza** programmato, alla radio viene automaticamente assegnato un canale non appena ve n'è uno disponibile. Dopo che la radio ha trasmesso un messaggio che segnala l'emergenza, non è più possibile annullare la chiamata di emergenza. Tuttavia, se si preme il pulsante per sbaglio o se l'emergenza è cessata, è possibile segnalarlo trasmettendo sul canale assegnato. Quando il pulsante **PTT** viene rilasciato, la chiamata di emergenza viene terminata allo scadere del tempo di chiusura chiamata di emergenza.

Se la radio era stata configurata per la funzione Chiamata di emergenza con successiva trasmissione voce, utilizzare l'intervallo in cui il microfono è in modalità "microfono acceso" per comunicare l'errore, quindi premere e rilasciare il pulsante **PTT** per terminare la trasmissione. La chiamata di emergenza viene terminata allo scadere del tempo di chiusura chiamata di emergenza.

## Messaggistica di testo

La radio è in grado di ricevere dati, ad esempio un messaggio di testo, da un'altra radio o da un'applicazione messaggio di testo.

Sono disponibili due tipi di messaggi di testo: messaggi di testo brevi DMR (Digital Mobile Radio) e messaggi di testo. La lunghezza massima di un messaggio di testo breve DMR è di 23 caratteri. La lunghezza massima di un messaggio di testo è di 280 caratteri (compresa la riga dell'oggetto). La riga dell'oggetto viene visualizzata solo quando si ricevono messaggi da applicazioni e-mail.

### NOTA:

La lunghezza massima in caratteri è valida solo per i modelli con l'ultima versione del software e dell'hardware. Per i modelli di radio con versioni del software e dell'hardware precedenti, la lunghezza massima di un messaggio di testo è di 140 caratteri. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

per la lingua araba, la direzione dell'immissione del testo è da destra verso sinistra.

## Invio di un messaggio di testo predefinito

La radio supporta fino a 10 messaggi di testo predefiniti, programmati dal rivenditore.

È possibile modificare un messaggio predefinito prima di inviarlo.

Se si sta inviando il messaggio, completare le operazioni riportate di seguito per selezionare un destinatario:

- Premere  oppure  fino a visualizzare l'alias desiderato e premere  per selezionare.
- Premere  oppure  fino a visualizzare Comp. man. e premere  per selezionare. Sulla prima riga del display viene visualizzato Numero:1. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere l'alias o l'ID dell'utente, quindi premere .

Sul display viene visualizzato Invio messaggio a conferma che è in corso l'invio del messaggio.

Se il messaggio viene inviato, viene emesso un tono e sul display compare l'indicazione Messaggio inviato.

Se non è possibile inviare il messaggio, viene emesso un tono basso e sul display compare l'indicazione Invio mess. non riuscito.

Se l'invio del messaggio di testo non riesce, la radio torna alla schermata con l'opzione Reinvia (vedere [Gestione dei messaggi di testo non inviati a pagina 305](#)).

---

## Invio di un messaggio di testo predefinito con il pulsante di accesso rapido

È possibile inviare messaggi di testo rapidi utilizzando il pulsante programmabile programmato dal rivenditore.

Premere il pulsante programmato **Accesso rapido** per inviare un messaggio di testo predefinito a un alias predefinito.

Sul display viene visualizzato Invio messaggio a conferma che è in corso l'invio del messaggio.

---

Se il messaggio è stato inviato, viene emesso un tono e sul display viene visualizzato Messaggio inviato.

Se non è possibile inviare il messaggio, viene emesso un tono basso e sul display viene visualizzato `Invio messaggio non riuscito`.

Se l'invio del messaggio di testo non riesce, la radio torna alla schermata con l'opzione `Reinvia` (vedere [Gestione dei messaggi di testo non inviati a pagina 305](#)).

## Accesso alla cartella Bozze

Nella cartella Bozze è possibile salvare fino a dieci (10) messaggi. Quando la cartella è piena, al salvataggio del messaggio di testo successivo, quello meno recente verrà sostituito automaticamente.

### NOTA:

È possibile modificare un messaggio di testo salvato prima di inviarlo. Questa funzione è disponibile solo se la radio è dotata di microfono della tastiera (vedere [Modifica e invio di un messaggio di testo salvato a pagina 303](#). la pressione prolungata di

consente di tornare in qualsiasi momento alla schermata principale.

## Visualizzazione di un messaggio di testo salvato

### 1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .
<b>Menu</b>	<p><b>a</b> Premere  per accedere al menu.</p> <p><b>b</b> Premere  oppure  fino a visualizzare <b>Messaggi</b> e premere  per selezionare.</p>

### 2 Premere oppure fino a visualizzare **Bozze** e premere per selezionare.

- 3 Premere  oppure  fino a visualizzare il messaggio desiderato e premere  per selezionare.

## Modifica e invio di un messaggio di testo salvato

- 1 Premere di nuovo  durante la visualizzazione del messaggio.

- 2 Premere  oppure  fino a visualizzare Modifica e premere  per selezionare. Viene visualizzato un cursore lampeggiante.

- 3 Digitare il messaggio utilizzando la tastiera.

Premere  per spostarsi di uno spazio a sinistra.

Premere  o il tasto  per spostarsi di uno

spazio a destra. Premere il tasto  per cancellare i caratteri indesiderati. Premere a lungo

 per modificare il metodo di immissione del testo.

- 4 Premere  al termine della composizione del messaggio.

- 5 Selezionare il destinatario del messaggio nei seguenti modi:

- Premere  oppure  fino a visualizzare l'alias desiderato e premere  per selezionare.

- Premere  oppure  fino a visualizzare Comp. man. e premere  per selezionare. Sulla prima riga del display viene visualizzato Numero:. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere l'alias o l'ID dell'utente, quindi premere .

Sul display viene visualizzato Invio messaggio a conferma che è in corso l'invio del messaggio.

Se il messaggio viene inviato, viene emesso un tono e sul display compare l'indicazione **Messaggio inviato**.

Se non è possibile inviare il messaggio, viene emesso un tono basso e sul display compare l'indicazione **Invio mess. non riuscito**.

il messaggio di testo non inviato viene memorizzato nella cartella **Msg inviati**, contrassegnato dall'icona **Non inviato**.

## Eliminazione dalla cartella **Bozze di un messaggio di testo salvato**

- 1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .

Controlli della radio	Operazioni
<b>Menu</b>	<p><b>a</b> Premere  per accedere al menu.</p> <p><b>b</b> Premere  oppure  fino a visualizzare <b>Messaggi</b> e premere  per selezionare.</p>

- 2 Premere  oppure  fino a visualizzare **Bozze** e premere  per selezionare.
- 3 Premere  oppure  fino a visualizzare il messaggio desiderato e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare

Elimina, quindi  per eliminare il messaggio di testo.

Se non è possibile inviare il messaggio, sul display viene visualizzata una mini notifica negativa.

## Gestione dei messaggi di testo non inviati

Le seguenti opzioni sono disponibili nella schermata Reinvia:

- Reinvia
- Inoltra
- Edit

## Reinvio di un messaggio di testo

Premere  per inviare di nuovo il messaggio allo stesso alias o ID dell'utente o del gruppo.

Se il messaggio è stato inviato, viene emesso un tono e sul display viene visualizzata una mini notifica positiva.

## Inoltra di un messaggio di testo

Selezionare **Inoltra** per inviare il messaggio all'alias o all'ID di un altro utente o gruppo.

- 1 Premere  oppure  fino a visualizzare **Inoltra** e premere  per selezionare.

- 2 Per selezionare il destinatario del messaggio, premere  oppure  fino a visualizzare l'alias o l'ID desiderato e premere  per selezionare.

Sul display viene visualizzato `Invio messaggio a` conferma che è in corso l'invio del messaggio.

Se il messaggio viene inviato, viene emesso un tono e sul display compare l'indicazione `Messaggio inviato`.

Se non è possibile inviare il messaggio, viene emesso un tono basso e sul display compare l'indicazione `Invio mess. non riuscito`.

## Gestione dei messaggi di testo inviati

Quando il messaggio è stato inviato ad un'altra radio, viene salvato nella cartella Msg inviati. Il messaggio di testo inviato per ultimo viene sempre aggiunto all'inizio della lista Msg inviati.

Nella cartella Msg inviati vengono memorizzati gli ultimi 30 messaggi inviati. Quando la cartella è piena, il successivo messaggio inviato sostituirà automaticamente il messaggio di testo più vecchio della cartella.

### NOTA:

la pressione prolungata di  consente di tornare in qualsiasi momento alla schermata principale.

## Visualizzazione di un messaggio di testo inviato

- 1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .
<b>Menu</b>	<p><b>a</b> Premere  per accedere al menu.</p> <p><b>b</b> Premere  oppure  fino a visualizzare <b>Messaggi e</b> premere  per selezionare.</p>

- 2 Premere  oppure  fino a visualizzare **Msg inviati** e premere  per selezionare.
- 3 Premere  oppure  fino a visualizzare il messaggio desiderato e premere  per selezionare.

L'icona nell'angolo superiore destro della schermata indica lo stato del messaggio (vedere [Icane dei messaggi inviati a pagina 244](#)).

## Invio di un messaggio di testo inviato

Durante la visualizzazione di un messaggio di testo inviato, è possibile selezionare una delle seguenti opzioni:

- Reinvia
- Inoltra
- Edit
- Elimina

1 Premere di nuovo  durante la visualizzazione del messaggio.

2  oppure  a una delle seguenti opzioni e premere  per selezionare.

Opzione	Operazioni
Inoltra	Selezionare Inoltra per inviare il messaggio di testo selezionato a un

Opzione	Operazioni
	altro alias o ID del gruppo o dell'utente (vedere <a href="#">Inoltra di un messaggio di testo a pagina 305</a> ).
Elimina	Selezionare Elimina per eliminare il messaggio di testo.
Reinvia	<p>Selezionare Reinvia per inviare di nuovo il messaggio di testo selezionato allo stesso alias o ID dell'utente o del gruppo.</p> <p>Sul display viene visualizzato Invio messaggio, a conferma che è in corso l'invio dello stesso messaggio alla stessa radio di destinazione.</p> <p>Se il messaggio viene inviato, viene emesso un tono e sul display compare l'indicazione Messaggio inviato.</p> <p>Se non è possibile inviare il messaggio, viene emesso un tono basso e sul display compare l'indicazione Invio mess. non riuscito.</p>

Opzione	Operazioni
	Se l'invio del messaggio non riesce, la radio torna alla schermata con l'opzione Reinvia. Premere  per inviare di nuovo il messaggio allo stesso alias o ID dell'utente o del gruppo.

Se si esce dalla schermata di invio messaggi durante l'invio del messaggio, la radio aggiorna lo stato del messaggio nella cartella Msg inviati senza fornire alcuna indicazione audio o visiva.

Se la modalità operativa viene cambiata o la radio viene spenta prima che lo stato del messaggio sia stato aggiornato nella cartella Msg inviati, la radio non è in grado di inviare i messaggi in corso e li contrassegna automaticamente con l'icona **Non inviato**.

La radio supporta un numero massimo di cinque messaggi in corso alla volta. Durante l'invio dei messaggi, la radio non è in grado di inviarne altri e li contrassegna automaticamente con l'icona **Non inviato**.

## Eliminazione di tutti i messaggi di testo inviati dalla cartella Msg inviati

- 1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .
<b>Menu</b>	<p>a Premere  per accedere al menu.</p> <p>b Premere  oppure  fino a visualizzare Messaggi e premere  per selezionare.</p>

2 Premere  oppure  fino a visualizzare `Msg inviati` e premere  per selezionare.

Se la cartella `Msg inviati` selezionata non contiene messaggi di testo, sul display viene visualizzato `Lista vuota` e, se i toni della tastiera sono abilitati, viene emesso un tono basso.

3 Premere  oppure  fino a visualizzare `Elimina tutto` e premere  per selezionare.

4 Scegliere una delle seguenti opzioni:

- Premere  oppure  fino a visualizzare `Si` e premere  per selezionare. Sul display, viene visualizzata una mini notifica positiva.
- Premere  oppure  fino a visualizzare `No` e  per tornare alla schermata precedente.

## Ricezione di un messaggio di testo

Alla ricezione di un messaggio da parte della radio, sul display viene visualizzata la lista delle notifiche, con gli alias o l'ID del mittente e l'icona del messaggio.

Alla ricezione di un messaggio di testo, è possibile selezionare una delle seguenti opzioni:

- Read
- Leggi dopo
- Elimina

## Letture di un messaggio di testo

1 Premere  oppure  fino a visualizzare `Leggere?` e premere  per selezionare. Il messaggio selezionato nella Inbox si apre.

2 Eseguire una delle seguenti operazioni:

- Premere  per tornare alla Inbox.

- Premere  una seconda volta per rispondere, inoltrare o eliminare il messaggio di testo.

## Gestione dei messaggi di testo ricevuti

La Inbox consente di gestire i messaggi di testo. La casella di posta è in grado di memorizzare fino a 30 messaggi.

I messaggi di testo vengono memorizzati nella Inbox in ordine di data di ricezione, a partire da quella più recente.

Per i messaggi di testo, la radio supporta le seguenti opzioni:

- Rispondi (tramite messaggio predefinito)
- Inoltra
- Elimina
- Elimina tutto

### NOTA:

Se il tipo di canale non corrisponde, è possibile solo inoltrare o eliminare tutti i messaggi ricevuti.

la pressione prolungata di  consente di tornare in qualsiasi momento alla schermata principale.

## Visualizzazione di un messaggio di testo nella Inbox

- 1 Premere  per accedere al menu.
- 2 Premere  oppure  fino a visualizzare **Messaggi** e premere  per selezionare.
- 3 Premere  oppure  fino a visualizzare **Inbox** e premere  per selezionare.
- 4 Premere  oppure  per visualizzare i messaggi.
- 5 Eseguire una delle seguenti operazioni:
  - Premere  per selezionare il messaggio corrente, quindi premere nuovamente  per rispondere, inoltrare o eliminare il messaggio.

- Premere a lungo  per tornare alla schermata principale.

## Risposta a un messaggio di testo dalla Inbox

- 1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .
<b>Menu</b>	<b>a</b> Premere  per accedere al menu.

Controlli della radio	Operazioni
	<b>b</b> Premere  oppure  fino a visualizzare <b>Messaggi</b> e premere  per selezionare.

- 2 Premere  oppure  fino a visualizzare **Inbox** e premere  per selezionare.
- 3 Premere  oppure  fino a visualizzare il messaggio desiderato e premere  per selezionare.
- 4 Premere di nuovo  per accedere al sottomenu.
- 5 Utilizzare la tastiera per scrivere/modificare il messaggio.

- 6 Premere  al termine della composizione del messaggio.

Sul display viene visualizzato *Invio messaggio a conferma* che è in corso l'invio del messaggio.

Se il messaggio viene inviato, viene emesso un tono e sul display viene visualizzato *Messaggio inviato*.

Se non è possibile inviare il messaggio, viene emesso un tono basso e sul display viene visualizzato *Invio mess. non riuscito*.

Se non è possibile inviare il messaggio, la radio torna alla schermata con l'opzione *Reinvia* (vedere [Gestione dei messaggi di testo non inviati a pagina 305](#)).

## Eliminazione di un messaggio di testo dalla Inbox

- 1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .
<b>Menu</b>	<p>a Premere  per accedere al menu.</p> <p>b Premere  oppure  fino a visualizzare <i>Messaggi</i> e premere  per selezionare.</p>

- 2 Premere  oppure  fino a visualizzare *Inbox* e premere  per selezionare.

- 3 Premere  oppure  fino a visualizzare il messaggio desiderato e premere  per selezionare.

4 Premere di nuovo  per accedere al sottomenu.

5 Premere  oppure  fino a visualizzare Elimina e premere  per selezionare.

6 Premere  oppure  fino a visualizzare Sì e  per selezionare.

Sul display viene visualizzato **Messaggio eliminato** e la radio torna alla Inbox.

## Eliminazione di tutti i messaggi di testo dalla casella di posta

1 Accedere alla funzione **Msg testo**.

Controlli della radio	Operazioni
<b>Pulsante Msg testo programmato</b>	Premere il pulsante programmato <b>Msg testo</b> .

### Controlli della radio

### Operazioni

#### Menu

a Premere  per accedere al menu.

b Premere  oppure  fino a visualizzare **Messaggi** e premere  per selezionare.

2 Premere  oppure  fino a visualizzare **Inbox** e premere  per selezionare.

Se la cartella **Inbox** selezionata non contiene messaggi di testo, sul display viene visualizzato **Lista vuota** e, se i toni della tastiera sono abilitati, viene emesso un tono basso (vedere [Attivazione o disattivazione dei toni della tastiera a pagina 214](#)).

3 Premere  oppure  fino a visualizzare  
Elimina tutto e premere  per selezionare.

4 Premere  oppure  fino a visualizzare Sì e  
 per selezionare.  
Sul display viene visualizzato Inbox svuotata.

## Privacy

Questa funzione utilizza una tecnica di scrambling basata su software. Quando viene attivata, consente di evitare che utenti non autorizzati sintonizzati su un canale possano ascoltare le conversazioni. Lo scrambling non viene però effettuato sulle porzioni di segnalazione e identificazione utente di una trasmissione.

Per inviare una trasmissione con funzione Privacy attivata, tale funzione deve essere abilitata sulla posizione attualmente selezionata sul selettore di canale. Questo requisito non è tuttavia necessario per la ricezione di una trasmissione. Mentre è sintonizzata su una posizione del selettore di canale abilitata per la privacy, la radio è in grado di ricevere trasmissioni chiare (decodificate).

La radio supporta la funzione Privacy avanzata.

Per decodificare una chiamata con funzione Privacy attivata, la radio deve essere programmata in modo da avere lo stesso valore e ID della chiave (per la privacy avanzata) della radio trasmittente.

Se la radio riceve una chiamata codificata con diversi valori e ID della chiave, si sentirà una trasmissione confusa (privacy avanzata).

Se è stato assegnato un tipo di privacy, nella schermata iniziale viene visualizzata l'icona con la chiave di protezione o la chiave barrata, a meno che la radio non stia inviando o ricevendo una chiamata o un allarme di emergenza.

Il LED diventa verde fisso durante la trasmissione da parte della radio e lampeggia rapidamente in verde durante la ricezione di una trasmissione con funzione Privacy attivata.

È possibile accedere a questa funzionalità eseguendo una delle operazioni descritte di seguito:

- Premere il pulsante **Privacy** programmato per attivare o disattivare la funzione.
- Utilizzando il menu della radio come descritto nei seguenti passaggi.

**NOTA:**

La funzione Privacy non è disponibile in tutti i modelli di radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Impost. radio o  oppure  fino a visualizzare Connect Plus e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Privacy avanzata.  
 Se sul display viene visualizzato Accendi, premere  per attivare la privacy. Sul display della radio compare la conferma dell'opzione selezionata.

Se sul display viene visualizzato Spegni, premere

 per disattivare la privacy. Sul display della radio compare la conferma dell'opzione selezionata.

Se è stato assegnato un tipo di privacy, sulla barra di stato viene visualizzata l'icona con la chiave di protezione o la chiave barrata, a meno che la radio non stia inviando o ricevendo un Emergency Alert.

## Esecuzione di una chiamata con funzione di privacy attivata (codificata)

È possibile attivare o disattivare la funzione di privacy utilizzando l'apposito pulsante programmato o il menu corrispondente. Per inviare una trasmissione protetta, la funzione di privacy deve essere attiva sulla radio per la posizione del canale attualmente selezionata. Quando la funzione di privacy è attiva nella posizione del canale attualmente selezionata, tutte le trasmissioni vocali effettuate dalla radio verranno codificate, incluse le chiamate di gruppo e multigruppo, le risposte durante la ricerca di chiamate, Site All Call, chiamate di emergenza e private. Solo le radio riceventi con lo stesso valore e ID della chiave della radio trasmittente saranno in grado di decodificare la trasmissione.

## Security

È possibile abilitare o disabilitare una radio attiva nel sistema, ad esempio, disabilitare una radio rubata per impedire al ladro di utilizzarla, e riabilitarla in un momento successivo, se viene restituita o ritrovata.

### NOTA:

Una radio può essere attivata o disattivata solo se queste funzioni sono state attivate. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Radio Disable

- 1 Accedere a questa funzionalità eseguendo una delle operazioni descritte di seguito:

Controlli della radio	Operazioni
<b>Pulsante Disattivazione radio</b>	<b>a</b> Premere il pulsante programmato <b>Disatt. radio</b> .

Controlli della radio	Operazioni
	<p><b>b</b> Premere  oppure  fino a visualizzare l'alias o l'ID desiderato e premere  per selezionare.</p>
<b>Menu radio</b>	<p><b>a</b> Premere  per accedere al menu.</p> <p><b>b</b> Premere  oppure  fino a visualizzare <b>Contatti</b> e premere  per selezionare. Le voci sono elencate in ordine alfabetico.</p> <p><b>c</b> Utilizzare uno dei passaggi descritti di seguito per selezionare l'alias o l'ID dell'utente richiesto:</p>

Controlli della radio	Operazioni
	<ul style="list-style-type: none"> <li>• Selezionare direttamente l'alias o l'ID desiderato.</li> <li>• Premere  oppure  fino a visualizzare l'alias o l'ID desiderato e premere  per selezionare.</li> <li>• Utilizzare il menu <code>Comp. man.</code>.</li> <li>• Premere  oppure  fino a visualizzare <code>Comp. man.</code> e premere  per selezionare.</li> </ul>

## Operazioni

- visualizzare `Comp. man.` e premere  per selezionare.
- Premere  oppure  fino a visualizzare `Numero radio` e premere  per selezionare.
  - Sulla prima riga del display viene visualizzata l'opzione `Numero radio:1`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Utilizzare la tastiera per immettere l'alias o

Controlli della radio	Operazioni
	<p>l'ID dell'utente e premere  .</p> <p><b>d</b> Premere  oppure  fino a visualizzare Attivazione radio e premere  per selezionare.</p>

Sul display viene visualizzato Attivazione radio: <Alias o ID dell'utente> e il LED diventa verde fisso.

- 2 Aspettare la ricezione della conferma dalla radio di destinazione.

Se l'esito è positivo, viene emesso un tono indicatore positivo e sul display viene visualizzato il messaggio Attiv. radio riuscita.

Se l'esito è negativo, viene emesso un tono indicatore negativo e sul display viene visualizzato il messaggio Attiv. radio non riuscita.

## Funzionamento Bluetooth

### NOTA:

Se questa opzione è disattivata tramite CPS, tutte le funzioni relative alla connessione Bluetooth vengono disattivate e il database del dispositivo Bluetooth viene cancellato.

Questa funzionalità consente di utilizzare la radio con un dispositivo (accessorio) con abilitazione Bluetooth attraverso una connessione Bluetooth wireless. La radio supporta i dispositivi Bluetooth Motorola Solutions e COTS (disponibili in commercio).

La tecnologia Bluetooth ha una copertura di 10 metri (32 piedi) in linea visiva, ossia un percorso senza ostacoli tra la radio e il dispositivo Bluetooth.

Si sconsiglia di separare la radio dal dispositivo Bluetooth; se non si porta la radio con sé, il funzionamento del dispositivo Bluetooth risulterà meno affidabile.

Nelle aree al limite della ricezione, la voce e la qualità del tono cominceranno a essere "incomprensibili" o "interrotte".

Per correggere il problema, basta posizionare la radio e il dispositivo con abilitazione Bluetooth più vicini (entro il raggio di 10 metri/32 piedi) per ristabilire una ricezione audio chiara. La funzione Bluetooth della radio ha una potenza massima di 2,5 mW (4 dBm) nel raggio di 10 m.

La radio può supportare fino a 4 connessioni Bluetooth simultanee con dispositivi Bluetooth di tipo diverso, ad esempio, una cuffia e un dispositivo POD (solo PTT). Non sono supportate più connessioni con dispositivi Bluetooth dello stesso tipo.

Per ulteriori informazioni sulle funzionalità complete del dispositivo Bluetooth, consultare il manuale utente del dispositivo Bluetooth.

## Accensione e spegnimento del Bluetooth

- 1 Premere  per accedere al menu.
- 

- 2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.
- 

- 3 Premere  oppure  fino a visualizzare Stato utente e premere  per selezionare.

Sul display vengono visualizzate le opzioni On e Off. Lo stato corrente è indicato da .

---

- 4 Eseguire una delle seguenti operazioni:

- Premere  oppure  fino a visualizzare On e premere  per selezionare. Sul display viene visualizzato On e  a sinistra dello stato selezionato.
  - Premere  oppure  fino a visualizzare Off e premere  per selezionare. Sul display viene visualizzato Off e  a sinistra dello stato selezionato.
-

## Ricerca e connessione a un dispositivo Bluetooth

Non spegnere il dispositivo Bluetooth o premere  durante la ricerca e la connessione poiché questo annulla l'operazione.

1 Accendere il dispositivo Bluetooth e impostarlo sulla modalità di accoppiamento. Fare riferimento al manuale per l'utente fornito con il dispositivo Bluetooth.

2 Sulla radio, premere  per accedere al menu.

3 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

4 Premere  oppure  fino a visualizzare Dispositivi e premere  per selezionare.

5 Eseguire una delle seguenti operazioni:

- Premere  oppure  fino a visualizzare il dispositivo desiderato e premere  per selezionare.
- Premere  oppure  fino a visualizzare Trova dispos. per individuare i dispositivi disponibili. Premere  oppure  fino a visualizzare il dispositivo desiderato e premere  per selezionare.

6 Premere  oppure  fino a visualizzare Connetti e premere  per selezionare. Sul display viene visualizzato il messaggio Connesso a <dispositivo>. È possibile che, per completare l'accoppiamento, il dispositivo Bluetooth richieda l'esecuzione di ulteriori operazioni. Fare riferimento al manuale per l'utente fornito con il dispositivo Bluetooth.

Se l'operazione ha esito positivo, sul display della radio viene visualizzato <Dispositivo> connesso. Viene emesso un tono e  viene visualizzato accanto al nome del

dispositivo connesso. L'icona del dispositivo Bluetooth connesso viene visualizzata sulla barra di stato.

Se l'operazione non ha esito positivo, sul display della radio viene visualizzato `Connessione non riuscita`.

## Ricerca e connessione da un dispositivo Bluetooth (modalità Rilevamento)

Mentre è attiva la modalità di rilevamento, non spegnere la radio o la periferica Bluetooth per evitare che l'operazione venga annullata.

- 1 Attivare la funzionalità Bluetooth.  
Vedere [Accensione e spegnimento del Bluetooth a pagina 321](#).

- 2 Premere  per accedere al menu.

- 3 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare

Trovami e premere  per selezionare.

La radio può essere rilevata da altre periferiche Bluetooth per un tempo programmato. Questa modalità è denominata Rilevamento.

- 5 Accendere il dispositivo Bluetooth e connetterlo alla radio.

Fare riferimento al manuale per l'utente fornito con il dispositivo Bluetooth.

## Disconnessione da un dispositivo Bluetooth

- 1 Sulla radio, premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

3 Premere  oppure  fino a visualizzare Dispositivi e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare il dispositivo desiderato e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Disconnetti e premere  per selezionare. Sul display viene visualizzato Disconnessione da <Nome dispositivo>. È possibile che per disconnettere il dispositivo Bluetooth si debbano eseguire ulteriori operazioni. Fare riferimento al manuale per l'utente fornito con il dispositivo Bluetooth.

---

Sul display della radio viene visualizzato <Nome dispositivo> disconnesso. Viene emesso un tono indicatore positivo e  accanto al nome del dispositivo connesso non viene più visualizzato. L'icona del dispositivo Bluetooth collegato non viene più visualizzata nella barra di stato.

## Commutazione dell'instradamento dell'audio tra l'altoparlante interno della radio e il dispositivo Bluetooth

È possibile alternare l'instradamento dell'audio tra l'altoparlante radio interno e l'accessorio Bluetooth esterno.

Premere il pulsante programmato **Comm. audio BT**.

---

- Viene emesso un tono e sul display viene visualizzata l'opzione Invia audio alla radio.
- Viene emesso un tono e sul display viene visualizzata l'opzione Invia audio a Bluetooth.

## Visualizzazione dei dettagli del dispositivo

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Dispositivi e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare il dispositivo desiderato e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Vis. dettagli e premere  per selezionare.

---

## Eliminazione del nome del dispositivo

È possibile rimuovere un dispositivo scollegato dall'elenco dei dispositivi Bluetooth.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Dispositivi e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare il dispositivo desiderato e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Elimina e premere  per selezionare.  
Sul display, viene visualizzato Dispositivo eliminato.

---

## Amplificazione microfono Bluetooth

Consente di controllare l'amplificazione del microfono del dispositivo Bluetooth collegato.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Guad mic BT e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare il tipo Guad mic BT e i valori correnti.

Per modificare i valori, premere  per selezionare.

---

5 Premere  oppure  per aumentare o diminuire i valori e premere  per selezionare.

---

## Posiz. interna

### NOTA:

La funzione Posizione interna è disponibile per i modelli con l'ultima versione software e hardware. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

La funzione Posiz. interna viene utilizzata per tenere traccia della posizione in cui si trovano gli utenti della radio. Quando la funzione Posizione interna è attivata, la radio è in modalità Rilevamento limitata. Per individuare la radio e stabilirne la posizione, vengono utilizzati beacon dedicati.

## Attivazione o disattivazione della funzione Posizione interna

È possibile attivare o disattivare la funzionalità Posizione interna effettuando una delle operazioni descritte di seguito.

- Accedere a questa funzione tramite il menu.
  - a. Premere  per accedere al menu.

b. Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

c. Premere  oppure  fino a visualizzare Posiz. interna e premere  per selezionare.

d. Premere  per attivare Posiz. interna.

Sul display viene visualizzato Posiz. interna Attiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale viene visualizzata l'icona Posizione disponibile.
- Se l'operazione ha esito negativo, sul display viene visualizzato Attivazione non riuscita. Viene emesso un tono indicatore negativo.

e. Premere  per disattivare Posiz. interna.

Sul display viene visualizzato Posiz. interna Disattiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale scompare l'icona Posizione disponibile.
  - Se l'operazione ha esito negativo, sul display viene visualizzato Disattivazione non riuscita. Viene emesso un tono indicatore negativo.
- Accedere a questa funzione utilizzando il pulsante programmato.
- a. Premere a lungo il pulsante programmato **Posiz. interna** per accedere alla funzione.
- Sul display viene visualizzato Posiz. interna Attiva. Viene emesso un tono indicatore positivo.
- Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale viene visualizzata l'icona Posizione disponibile.
  - Se l'operazione ha esito negativo, sul display viene visualizzato Attivazione non riuscita. Se l'operazione ha esito negativo, viene emesso un tono indicatore negativo.
- b. Premere il pulsante programmato **Posiz. interna** per disattivare la funzione.

Sul display viene visualizzato Posiz. interna Disattiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale scompare l'icona Posizione disponibile.
- Se l'operazione ha esito negativo, sul display viene visualizzato Disattivazione non riuscita. Se l'operazione ha esito negativo, viene emesso un tono indicatore negativo.

## Accesso alle informazioni sui beacon della posizione interna

Seguire la procedura per accedere alle informazioni sui beacon della posizione interna.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Posiz. interna e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Beacon e premere  per selezionare.

---

Sul display vengono visualizzate le informazioni sui beacon.

## Lista delle notifiche

La radio dispone di una lista delle notifiche che raccoglie tutti gli eventi "non letti" sul canale, come i messaggi di testo non letti, le chiamate perse e gli avvisi di chiamata.

Se nella lista delle notifiche sono presenti uno o più eventi, sulla barra di stato viene visualizzata l'icona Notifica.

La lista supporta un massimo di 40 eventi non letti. Quando è piena, l'evento successivo sostituisce l'evento meno recente.

### NOTA:

Una volta letti, gli eventi vengono rimossi dalla lista delle notifiche.

## Accesso alla lista delle notifiche

Seguire la procedura per accedere alla lista delle notifiche.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare **Notifica** e premere  per selezionare.

- 3 Premere  oppure  fino a visualizzare l'evento desiderato e premere  per selezionare.

Premere a lungo  per tornare alla schermata principale.

## Funzionamento Wi-Fi

Wi-Fi® è un marchio registrato di Wi-Fi Alliance®.

### NOTA:

Questa funzione è disponibile per DM4601e .

Questa funzione consente di configurare e connettersi a una rete Wi-Fi. La funzionalità Wi-Fi supporta aggiornamenti per il firmware della radio, codeplug e risorse quali i pacchetti linguistici e gli annunci vocali.

## Attivazione o disattivazione della funzionalità Wi-Fi

Il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato** è assegnato dal rivenditore o dall'amministratore di sistema. rivolgersi al rivenditore o all'amministratore di sistema per sapere come è stata programmata la radio.

Gli Annunci vocali per il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato** possono essere personalizzati mediante CPS in base ai requisiti degli utenti. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

È possibile attivare o disattivare la funzionalità Wi-Fi effettuando una delle operazioni descritte di seguito.

- Premere il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato**. L'annuncio vocale emette un messaggio sull'attivazione o disattivazione della funzionalità Wi-Fi.
- Accedere a questa funzione utilizzando il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.
  - c. Premere  oppure  fino a visualizzare Wi-Fi On e premere  per selezionare.

Premere  per attivare la funzionalità Wi-Fi. Sul display viene visualizzato  accanto ad **Abilitato**.

Premere  per disattivare la funzionalità Wi-Fi. Accanto alla voce **Abilitato**, non viene più visualizzato .

## Connessione a un Access Point di rete

Quando si attiva la funzionalità Wi-Fi, la radio esegue la scansione e si connette a un Access Point di rete.

È anche possibile connettersi a un access point di rete utilizzando il menu.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare

l'Access Point di rete e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare

Connetti e premere  per selezionare.

---

6 Immettere la password e premere  .

---

Quando la connessione è stata stabilita, sulla radio viene visualizzato un avviso e l'Access Point di rete viene salvato nell'elenco dei profili.

## Verifica dello stato della connessione Wi-Fi

Seguire la procedura per verificare lo stato della connessione Wi-Fi.

Premere il pulsante programmato **Query stato Wi-Fi** per verificare lo stato della connessione utilizzando l'annuncio vocale. L'annuncio vocale emette Wi-Fi disattivato, Wi-Fi

attivato ma nessuna connessione o Wi-Fi attivato con connessione.

- Sul display viene visualizzato **Wi-Fi Off** quando il Wi-Fi è disattivato.
- Sul display viene visualizzato **Wi-Fi On, Connesso** quando la radio è connessa a una rete.
- Sul display viene visualizzato **Wi-Fi On, Disconnesso** quando il Wi-Fi è attivato ma la radio non è connessa a una rete.

Gli annunci vocali per i risultati della query sullo stato Wi-Fi possono essere personalizzati mediante CPS in base ai requisiti degli utenti. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

### NOTA:

Il pulsante programmato **Query stato Wi-Fi** è assegnato dal rivenditore o dall'amministratore di sistema. Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

## Aggiornamento dell'elenco delle reti

Seguire la procedura per aggiornare l'elenco delle reti.

- Effettuare le seguenti operazioni per aggiornare l'elenco delle reti utilizzando il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.
  - c. Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

Quando si accede al menu Reti, la radio aggiorna automaticamente l'elenco delle reti.
- Se si è già all'interno del menu Reti, effettuare le seguenti operazioni per aggiornare l'elenco delle reti.

Premere  oppure  fino a visualizzare Aggiorna e premere  per selezionare.

La radio viene aggiornata e viene visualizzato l'elenco delle reti più recente.

## Aggiunta di una rete

Se la rete preferita non è nell'elenco delle reti disponibili, effettuare le operazioni riportate di seguito per aggiungere una rete.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Aggiungi rete e premere  per selezionare.

---

- 5 Immettere l'SSID (Service Set Identifier) e premere .

---

6 Premere  oppure  fino a visualizzare **Apri** e premere  per selezionare.

---

7 Immettere la password e premere  .  
Sul display della radio viene visualizzata una mini notifica positiva per indicare che la rete è stata salvata.

---

## Visualizzazione dei dettagli degli Access Point di rete

Seguire la procedura per visualizzare i dettagli degli Access Point di rete.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare **Wi-Fi** e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare **Reti** e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare l'Access Point di rete e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare **Vis. dettagli** e premere  per selezionare.

Per un Access Point collegato, vengono visualizzati l'SSID (Service Set Identifier), la modalità di protezione, l'indirizzo MAC (Media Access Control) e l'indirizzo IP (Internet Protocol).

Per un Access Point non collegato, vengono visualizzati l'SSID (Service Set Identifier) e la modalità di protezione.

---

## Rimozione degli Access Point di rete

Effettuare le seguenti operazioni per rimuovere gli Access Point di rete dall'elenco dei profili.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare l'Access Point di rete selezionato e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare Rimuovi e premere  per selezionare.

---

- 6 Premere  oppure  fino a visualizzare Sì e premere  per selezionare.

Sul display della radio viene visualizzata una mini notifica positiva per indicare che l'Access Point di rete selezionato è stato rimosso.

## Pubblica utilità

Questo capitolo descrive l'uso delle funzioni di utilità disponibili sulla radio.

## Attivazione e disattivazione dei toni e degli avvisi della radio

Se necessario, è possibile abilitare e disabilitare tutti i toni e gli avvisi della radio, ad eccezione del tono di avviso relativo all'arrivo di un Emergency Alert.

Premere il pulsante **Tutti i toni/avvisi** programmato per attivare o disattivare tutti i toni o seguire la procedura

descritta di seguito per accedere a questa funzione tramite il menu della radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Toni/avvisi e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare Tutti i toni e premere  per selezionare.

---

- 6 Premere  per attivare/disattivare tutti i toni e gli avvisi.

Sul display viene visualizzato ✓ accanto ad **Abilitato**.

Accanto alla voce **Abilitato**, non viene più visualizzato ✓.

## Impostazione del livello di offset volume dei toni/avvisi

Se necessario, è possibile regolare il livello di offset del volume dei toni/avvisi. Questa funzione consente di regolare il volume dei toni/avvisi a un livello più alto o più basso di quello della voce.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare  
Impost. radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Toni/  
avvisi e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare  
Offset vol. e premere  per selezionare.

---

6 Premere  oppure  fino a visualizzare il  
valore del volume desiderato.  
Alla selezione di ogni valore, la radio emette il tono  
corrispondente.

---

7 Eseguire una delle seguenti operazioni:

- Premere  per mantenere il valore del volume  
visualizzato desiderato.
  - Premere  per uscire senza modificare le  
impostazioni correnti dell'offset del volume.
- 

## Attivazione o disattivazione del tono Permesso di parlare

In base alle esigenze, è possibile abilitare o disabilitare il  
tono che segnala il permesso di parlare.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare  
Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare  
Impost. radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Toni/  
avvisi e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Tono  
perm. e premere  per selezionare.

---

- 6 Premere  per attivare/disattivare il tono perm. parlare.

Sul display viene visualizzato  accanto ad **Abilitato**.

Accanto alla voce **Abilitato**, non viene più visualizzato .

- 4 Premere  oppure  fino a visualizzare **Toni/avvisi** e premere  per selezionare.

- 5 Premere  oppure  fino a visualizzare **Accensione** e premere  per selezionare.

- 6 Premere  per attivare/disattivare il tono di avviso dell'accensione.

Sul display viene visualizzato  accanto ad **Abilitato**.

Accanto alla voce **Abilitato**, non viene più visualizzato .

## Attivazione/Disattivazione del tono di avviso dell'accensione

In base alle esigenze è possibile abilitare o disabilitare il tono di avviso dell'accensione.

- 1 Premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

## Impostazione del livello di potenza

È possibile impostare il livello di potenza alto o basso sulla radio per ciascuna zona Connect Plus.

**Alta** abilita le comunicazioni con siti a torre in modalità Connect Plus che si trovano a notevole distanza. **Bassa** consente le comunicazioni con siti a torre in modalità Connect Plus nelle vicinanze.

Premere il pulsante **Livello potenza** programmato per selezionare alternativamente il livello di potenza della trasmissione alto o basso.

Seguire la procedura descritta di seguito per accedere a questa funzione tramite il menu della radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare **Potenza** e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare l'impostazione richiesta e premere  per selezionare.

✓ viene visualizzato accanto all'impostazione selezionata. La pressione prolungata del pulsante

 consente di tornare in qualsiasi momento alla schermata iniziale.

Riappare il menu precedente.

## Modifica della modalità del display

È possibile modificare la modalità del display tra Giorno e Notte, a seconda delle necessità. La selezione effettuata influisce sulla tavolozza colori del display.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare Display e premere  per selezionare.  
Sul display, vengono visualizzate le opzioni Modo Giorno e Modo Notte.
- 

- 5 Premere  oppure  fino a visualizzare l'impostazione desiderata, quindi  per attivarla.  
✓ viene visualizzato accanto all'impostazione selezionata.
- 

## Regolazione della luminosità del display

È possibile regolare la luminosità del display della radio, a seconda delle esigenze.

### NOTA:

La luminosità del display non può essere regolata quando è abilitata Luminosità auto.

- 1 Premere  per accedere al menu.
- 

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.
- 

- 3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.
- 

- 4 Premere  oppure  fino a visualizzare Display e premere  per selezionare.
- 

- 5 Premere  oppure  fino a visualizzare Luminosità e premere  per selezionare.  
Sul display, viene visualizzata la barra di avanzamento.
- 

- 6 Diminuire la luminosità del display premendo  o aumentarla premendo . Selezionare una delle impostazioni da 1 a 8. Premere  per confermare la scelta.
-

## Attivazione e disattivazione della schermata iniziale

Se necessario, è possibile abilitare e disabilitare la visualizzazione della schermata iniziale.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare **Display** e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare **Schermo iniz.** e premere  per selezionare.

- 6 Premere  per attivare/disattivare lo schermo iniziale.

Sul display viene visualizzato  accanto ad **Abilitato**.

Accanto alla voce **Abilitato**, non viene più visualizzato .

## Lingua

È possibile impostare la lingua in cui verrà visualizzato il testo sul display della radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

4 Premere  oppure  fino a visualizzare Lingue e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare la lingua desiderata e premere  per attivarla. ✓ viene visualizzato accanto alla lingua selezionata.

---

## Attivazione e disattivazione dell'indicatore LED

In base alle esigenze, è possibile abilitare e disabilitare l'indicatore LED.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Indicatore LED e premere  per selezionare.

---

5 Premere  per attivare/disattivare l'indicatore LED.

Sul display viene visualizzato ✓ accanto ad **Abilitato**.

Accanto alla voce **Abilitato**, non viene più visualizzato ✓.

---

## Identificazione del tipo di cavo

È possibile selezionare il tipo di cavo utilizzato dalla radio.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare  
Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare  
Impost. radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Tipo  
cavo e premere  per selezionare.

---

5 Il tipo di cavo attualmente selezionato è  
contrassegnato dal simbolo .

---

## Voice Announcement

Questa funzione consente alla radio di indicare con un messaggio audio la zona o il canale corrente appena assegnato dall'utente o la pressione del tasto programmabile. È possibile personalizzare questo indicatore audio in base alle esigenze dei clienti. In genere,

questa funzione è utile nel caso in cui un utente abbia difficoltà a leggere le informazioni visualizzate sul display.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare  
Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare  
Impost. radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare  
Annuncio vocale e premere  per selezionare.  
È anche possibile utilizzare  per modificare  
l'opzione selezionata.

---

5 Eseguire una delle seguenti operazioni:

- Premere  per attivare l'annuncio vocale. Sul display viene visualizzato  accanto ad Abilitato.

- Premere  per disattivare l'annuncio vocale. Accanto ad **Abilitato** non viene più visualizzato .

## Menu timer

Consente di definire per quanto tempo la radio resta nel menu prima di tornare automaticamente alla schermata iniziale.

- 1 Premere  per accedere al menu.
- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.
- 3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.
- 4 Premere  oppure  fino a visualizzare **Display** e premere  per selezionare.

- 5 Premere  oppure  fino a visualizzare **Menu Timer** e premere  per selezionare.

- 6 Premere  oppure  fino a visualizzare l'impostazione desiderata e premere  per selezionare.

## Attivazione o disattivazione della funzione Clacson/luci

Questa funzione deve essere installata dal rivenditore tramite il connettore accessori posteriore della radio.

La radio è in grado di avvisare l'utente dell'arrivo di una chiamata mediante la funzione Clacson/luci. Abilitando questa funzione, alla ricezione di una chiamata, verranno attivati il clacson e le luci del veicolo.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Clacson/luci** per attivare o disattivare la funzione. Saltare i passaggi seguenti.

- Premere  per accedere al menu.

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.

4 Premere  oppure  fino a visualizzare Clacson/luci e premere  per selezionare.

5 Premere  per attivare/disattivare la funzione Clacson/luci.

Sul display viene visualizzato  accanto ad Abilitato.

Accanto alla voce Abilitato, non viene più visualizzato .

## Impostazione delle preferenze per la manopola con duplice funzionalità

La radio è dotata di una **manopola volume/canali** con duplice funzionalità. Se si disattiva l'opzione della duplice funzionalità, la manopola funge solo da manopola di controllo del volume.

1  per accedere al menu .

2  oppure  fino a visualizzare Utilità e premere  per selezionare.

3  oppure  fino a visualizzare Impost. radio e premere  per selezionare.

4  oppure  fino a visualizzare Doppia manop. e premere  per selezionare.

5 Sul display, vengono visualizzate le opzioni Solo volume e Volume e can.  oppure  fino a

visualizzare l'impostazione desiderata e premere

 per selezionare.

✓ viene visualizzato accanto all'impostazione selezionata.

Riappare il menu precedente.

---

## AGC mic D (AGC mic digitale)

Questa funzionalità controlla automaticamente il guadagno del microfono della radio durante la trasmissione su un sistema digitale. Abbassa i volumi alti e aumenta quelli bassi fino a un valore preimpostato, per garantire una resa audio omogenea.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare **Impost. radio** e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare **AGC mic D** e premere  per selezionare.

---

5 Eseguire una delle seguenti operazioni:

- Premere  per attivare **AGC mic D**. Sul display viene visualizzato ✓ accanto a **Abilitato**.
  - Premere  per disattivare **AGC mic D**. ✓ non viene più visualizzato accanto ad **Abilitato**.
- 

## Audio intelligente

La radio può regolare automaticamente il volume audio per superare il rumore d'ambiente di sottofondo, comprese tutte le origini del rumore, variabili e non. Si tratta di una

funzione di sola ricezione, che non influisce sull'audio di trasmissione.

- 1 Premere  per accedere al menu.

- Premere  per disattivare la funzione Audio intell. Accanto alla voce Abilitato, non viene più visualizzato ✓.

## Attivazione e disattivazione della funzione Soppressore AF

Questa funzione consente di ridurre al minimo il feedback acustico nelle chiamate ricevute.

1 Premere  per accedere al menu.

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

3 Premere  oppure  fino a visualizzare Impost. radio e premere  per selezionare.

4 Premere  oppure  fino a visualizzare Soppressore AF e premere  per selezionare.

È anche possibile utilizzare o per modificare l'opzione selezionata.

---

**5** Eseguire una delle seguenti operazioni:

- Premere  per attivare la funzione Soppressore AF. Sul display viene visualizzato  accanto ad **Abilitato**.
  - Premere  per disattivare la funzione Soppressore AF. Accanto alla voce **Abilitato**, non viene più visualizzato .
- 

## Attivazione o disattivazione del sistema GNSS

Il sistema GNSS (Global Navigation Satellite System) è un sistema di navigazione satellitare, utilizzato per determinare l'esatta posizione della radio. Il sistema GNSS include i moduli GPS (Global Positioning System) e GLONASS (Global Navigation Satellite System).

**NOTA:**

I modelli di radio selezionati possono offrire GPS e GLONASS. La serie GNSS viene configurata tramite CPS. Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

**1** Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **GNSS** per attivare o disattivare la funzione. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.
- 

- 2** Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.
- 

- 3** Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.
- 

- 4** Premere  o  fino a visualizzare **GNSS**.  
Premere  per effettuare la selezione.
-

- 5 Premere  per attivare/disattivare il sistema GNSS.

Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.

Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

---

Vedere [Controllo delle informazioni GNSS a pagina 360](#) per i dettagli sul recupero delle informazioni GNSS.

## Accesso alle informazioni generali sulla radio

Nella radio sono memorizzate le seguenti informazioni:

- Batteria
- Angolo di inclinazione (accelerometro)
- Radio Model Number Index
- CRC del codeplug OTA (over-the-air) della scheda opzionale
- Numero sito
- Info sito

- ID e alias della radio
- Versioni del firmware e del codeplug
- Informazioni GNSS

Premere  in qualsiasi momento per tornare alla schermata precedente o premere a lungo  per tornare alla schermata iniziale. La schermata corrente viene chiusa alla scadenza del tempo di inattività.

## Controllo del Radio Model Number Index

Questo numero identifica l'hardware di un modello specifico di radio. L'amministratore di sistema della radio può avere bisogno di conoscere questo numero per preparare un nuovo codeplug della scheda opzionale della radio.

- 1 Premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare **Utilità** e premere  per selezionare.

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Indice modello e premere  per selezionare.  
Sul display compare il Model Index Number.

---

## Controllo del CRC del file OTA codeplug della scheda opzionale

Seguire le istruzioni riportate di seguito se l'amministratore di sistema della radio ha bisogno di conoscere il CRC (Controllo di ridondanza ciclico) del file OTA codeplug della scheda opzionale. Questa opzione di menu compare solo se la scheda opzionale ha ricevuto l'ultimo aggiornamento al codeplug in modalità OTA.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare **0B** OTA CPcrc e premere  per selezionare.  
Sul display compare una sequenza di lettere e numeri. Comunicare questa sequenza all'amministratore di sistema della radio esattamente come compare.

---

## Visualizzazione dell'ID sito (numero sito)

### NOTA:

Se la radio non è attualmente registrata in un sito, sul display viene visualizzato **Non registrato**.

Al momento della registrazione in un sito Connect Plus, la radio visualizza per qualche istante l'ID del sito. Dopo la registrazione, la radio in genere non indica il numero del

sito. Per visualizzare il numero del sito in cui la radio si è registrata, procedere nel modo seguente:

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Numero sito e premere  per selezionare.  
Sul display compaiono l'ID rete e il numero del sito.

---

## Controllo della funzione Info sito

### NOTA:

Se la radio non è attualmente registrata in un sito, sul display viene visualizzato Non registrato.

La funzione Informazioni sul sito fornisce informazioni che possono essere utili a un tecnico dell'assistenza. Si compone delle seguenti informazioni:

- Numero del ripetitore canale di controllo in uso.
- RSSI: l'ultimo valore della potenza del segnale misurato dal ripetitore canale di controllo.
- Elenco dei siti adiacenti inviato dal ripetitore canale di controllo (cinque numeri separati da virgole).

Se viene richiesto l'utilizzo di questa funzione, riportare esattamente le informazioni visualizzate sullo schermo.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Info sito e premere  per selezionare.  
Sul display vengono visualizzate le informazioni sul sito.
- 

## Controllo dell'ID della radio

Questa funzione consente di visualizzare l'ID della radio. Seguire la procedura descritta di seguito per accedere a questa funzione sullo schermo della radio.

- 1 Premere  per accedere al menu.

---

  - 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

  - 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.
- 

- 4 Premere  oppure  fino a visualizzare ID personale e premere  per selezionare.  
Sul display compare l'ID della radio.
- 

## Controllo della versione del firmware e del codeplug

Visualizza la versione firmware della radio.

- 1 Premere  per accedere al menu.

---

  - 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

  - 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.
-

- 4 Premere  oppure  fino a visualizzare Versioni e premere  per selezionare.

Sul display vengono visualizzate le seguenti informazioni:

- (Radio) Versione firmware
- (Radio) Versione codeplug
- Versione firmware scheda opzionale
- Versione frequenze scheda opzionale
- Versione hardware scheda opzionale
- Versione codeplug scheda opzionale

## Verifica della disponibilità di aggiornamenti

In Connect Plus è possibile aggiornare alcuni file (codeplug della scheda opzionale, Network Frequency File e file del firmware della scheda opzionale) in modalità OTA (Over-The-Air).

### NOTA:

rivolgersi al rivenditore o all'amministratore di rete per verificare se questa funzionalità è stata abilitata per la propria radio.

Su tutte le radio Connect Plus dotate di display è possibile visualizzare il CRC del file OTA codeplug della scheda opzioni, la versione del frequency file o la versione del file del firmware attualmente installati utilizzando un'opzione di menu. Inoltre, le radio con display abilitate al trasferimento di file over-the-air possono visualizzare anche la versione dei file il cui trasferimento non è stato ancora completato. Questi file possono essere file delle frequenze o file del firmware della scheda opzioni segnalati alla radio da un messaggio di sistema ma dei quali la radio non ha ancora ricevuto tutti i pacchetti. Se una radio Connect Plus deve completare il trasferimento di un file, nel menu saranno disponibili le opzioni per:

- Conoscere il numero di versione del file.
- Conoscere la percentuale di pacchetti già ricevuti.
- Indicare alla radio Connect Plus di riprendere il download dei pacchetti del file.

Se è abilitata al trasferimento di file Connect Plus OTA, in alcuni casi la radio potrebbe riprendere automaticamente il trasferimento di un file, senza avvisare l'utente della radio.

Mentre la radio riceve i pacchetti del file, il LED lampeggia velocemente e sulla barra di stato nella schermata principale della radio viene visualizzata l'icona Volume di dati elevato.

**NOTA:**

La radio Connect Plus non può ricevere chiamate mentre sta ricevendo i pacchetti di un file. Per annullare il trasferimento di file, premere e rilasciare il pulsante **PTT**. La radio richiede una chiamata per il nome del contatto selezionato e il trasferimento del file viene annullato fino a quando il processo non riparte.

Il trasferimento di un file viene riavviato nelle circostanze descritte di seguito. Il primo esempio si riferisce a tutti i tipi di file trasferiti OTA, mentre gli altri esempi valgono solo per i Network Frequency File e i file del firmware della scheda opzionale:

- L'amministratore del sistema radio riavvia il trasferimento OTA del file.
- Il timer predefinito della scheda opzioni scade e la scheda opzionale riprende automaticamente il processo di download dei pacchetti.

- Il timer non è ancora scaduto, ma l'utente della radio fa ripartire il trasferimento del file utilizzando l'apposita opzione del menu.

Al termine del download di tutti i pacchetti del file, la radio Connect Plus deve eseguire l'aggiornamento con il file appena ottenuto. Nel caso del Network Frequency File, si tratta di un processo automatico che non richiede la reimpostazione della radio. Anche per il file codeplug della scheda opzionale il processo è automatico e causa una breve interruzione del funzionamento della radio mentre vengono caricati i dati del nuovo codeplug e viene riacquisito il sito della rete. I tempi di aggiornamento della radio al nuovo firmware della scheda opzionale dipendono da come la radio è stata configurata dal rivenditore o dall'amministratore di sistema. La radio esegue l'aggiornamento immediatamente dopo aver scaricato tutti i pacchetti dei file o alla successiva accensione.

**NOTA:**

Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

Il processo di aggiornamento al nuovo firmware della scheda opzionale richiede alcuni secondi e, al termine, la scheda opzionale Connect Plus deve reimpostare la radio. Una volta avviato l'aggiornamento, l'utente della radio non

potrà effettuare o ricevere chiamate fino a che il processo non si è concluso. Durante il processo, sul display della radio viene chiesto all'utente di non spegnere la radio.

## File del firmware

La sezione seguente fornisce informazioni sul firmware della radio.

### Firmware aggiornato

#### NOTA:

Se il file del firmware della scheda opzioni non è aggiornato (e la radio ha già iniziato a scaricare una versione più recente del file del firmware della scheda opzioni), sulla radio viene visualizzato un elenco con ulteriori opzioni; Versione, %Ricevuto e Download.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Firmware e premere  per selezionare.  
Sul display viene visualizzato Il firmware è aggiornato.

---

### Firmware in attesa – Versione

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Firmware e premere  per selezionare.

---

6 Premere  oppure  fino a visualizzare Versione e premere  per selezionare.

Se è presente un file del firmware della scheda opzionale in attesa di essere scaricato, sul display compare il numero della versione del firmware.

Se è presente un file del firmware della scheda opzioni in attesa di essere scaricato, sul display viene visualizzato Il firmware è aggiornato.

---

## Firmware in attesa – %Ricevuto

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare Firmware e premere  per selezionare.

---

- 6 Premere  oppure  fino a visualizzare %Ricevuto e premere  per selezionare.
- Sul display viene indicata la percentuale di pacchetti del file del firmware finora scaricati.

**NOTA:**

Quando questo valore raggiunge il 100%, la radio deve essere spenta e riaccesa per avviare l'aggiornamento del firmware.

## Firmware in attesa – Download

Se la radio Connect Plus ha già avviato il trasferimento OTA del file del firmware della scheda opzionale senza completarlo, l'unità riprende automaticamente il trasferimento (se è stato lasciato in sospeso) alla scadenza di un timer interno. Per riprendere un trasferimento del file del firmware della scheda opzionale lasciato in sospeso prima della scadenza del timer interno, utilizzare l'opzione Scarica come descritto di seguito.

- 1 Premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

- 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

- 4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

- 5 Premere  oppure  fino a visualizzare Firmware e premere  per selezionare.

- 6 Premere  oppure  fino a visualizzare Download e premere  per selezionare.
- Sul display viene visualizzato quanto segue:

Download disponibile	Avvia download
----------------------	----------------

*Continuazione tabella...*

Nessun download disponibile	Download non disponibile
--------------------------------	-----------------------------

7 Eseguire una delle seguenti operazioni:

- Selezionare Sì e premere  per iniziare il download.
- Selezionare No e premere  per tornare al menu precedente.

## Frequency file

La sezione seguente fornisce informazioni sul file delle frequenze della radio.

### Frequency file aggiornato

#### NOTA:

Se il file delle frequenze non è aggiornato (e la radio non ha già iniziato a scaricare una versione più recente del file delle frequenze), sulla radio viene visualizzato un elenco con ulteriori opzioni: Versione, %Ricevuto e Download.

1 Premere  per accedere al menu.

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

4 Premere  oppure  fino a visualizzare Frequenza e premere  per selezionare.

Sul display viene visualizzato Il file freq. è aggiornato.

### Frequency file in attesa - Versione

1 Premere  per accedere al menu.

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare Frequenza e premere  per selezionare.

---

- 6 Premere  oppure  fino a visualizzare Versione e premere  per selezionare.  
Se è presente un frequency file in attesa di essere scaricato, sul display compare il numero della versione del file.

---

### File delle frequenze in attesa – %Ricevuto

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare %Ricevuto e premere  per selezionare.  
Sul display viene indicata la percentuale di pacchetti del frequency file finora scaricati.

---

## Frequency file in attesa - Download

Se la radio Connect Plus ha già avviato il trasferimento OTA del network frequency file senza completarlo, l'unità riprende automaticamente il trasferimento (se è stato lasciato in sospeso) alla scadenza di un timer interno. Per riprendere un trasferimento del network frequency file lasciato in sospeso prima della scadenza del timer interno, utilizzare l'opzione Download come descritto di seguito.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Aggiornamenti e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare Frequenza e premere  per selezionare.
- 

- 6 Premere  oppure  fino a visualizzare Download e premere  per selezionare.

Download attualmente non disponibile	Download non disponibile
Download attualmente disponibile	Avvia download

- 7 Eseguire una delle seguenti operazioni:
    - Selezionare Sì e premere per iniziare il download.
    - Selezionare No e premere per tornare al menu precedente.
- 

## Controllo delle informazioni GNSS

Visualizza le informazioni GNSS sulla radio, come i valori:

- Latitudine
- Longitudine
- Altitudine
- Direzione
- Velocità
- Diluizione della precisione orizzontale (HDOP)
- Satelliti
- Versione

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare Utilità e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare Info radio e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare Info GNSS e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare la voce desiderata e premere  per selezionare. Sul display vengono visualizzate le informazioni GNSS richieste.

---

Vedere [Attivazione o disattivazione del sistema GNSS a pagina 348](#) per i dettagli su GNSS.

Pagina lasciata intenzionalmente vuota.

## Altri sistemi

Le funzioni disponibili per gli utenti della radio in questo sistema sono descritte in questo capitolo.

## Pulsante PTT

Il pulsante PTT (**Push-To-Talk**) serve a due scopi principali:

- Durante una chiamata, il pulsante **PTT** consente alla radio di trasmettere ad altre radio nell'ambito della chiamata. Il microfono viene attivato premendo il pulsante **PTT**.
- Se non è in corso alcuna chiamata, il pulsante **PTT** viene utilizzato per effettuare una nuova chiamata .

Premere a lungo il pulsante **PTT** per parlare. Rilasciare il pulsante **PTT** per ascoltare.

Se è attivato il tono che indica il permesso di parlare o il sidetone PTT  attendere la fine del breve tono di avviso prima di parlare.

 Se sulla radio è abilitata la funzione Indicazione canale libero (programmata dal rivenditore), verrà emesso un breve tono di avviso quando l'utente della radio di destinazione (ovvero, quella che riceve la chiamata)

rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere.

 Se la chiamata viene interrotta, si sente un tono continuo di divieto di parlare. È necessario rilasciare il pulsante **PTT** se si sente un tono continuo di divieto di parlare.

## Tasto programmabile

A seconda della durata della pressione sul pulsante, il rivenditore può programmare i pulsanti programmabili come tasti di scelta rapida per le funzioni della radio.

### Premere brevemente

Premere e rilasciare rapidamente il pulsante.

### Premere a lungo

Tenere premuto il pulsante per un periodo di tempo programmato.

### NOTA:

Vedere [Funzionamento in emergenza a pagina 445](#) per ulteriori informazioni sulla durata programmata del pulsante di **emergenza**.

## Funzioni della radio assegnabili

Le seguenti funzioni radio possono essere assegnate ai pulsanti programmabili.

### **Ambiente audio**

Consente all'utente di selezionare l'ambiente d'uso della radio.

### **Profili audio**

Consente all'utente di selezionare il profilo audio preferito.

### **Comm. audio Bluetooth®**

Consente di alternare l'instradamento audio tra l'altoparlante interno della radio e l'accessorio Bluetooth esterno.

### **Connessione Bluetooth**

Consente di avviare un'operazione di ricerca e connessione Bluetooth.

### **Disconnessione Bluetooth**

Consente di terminare tutte le connessioni Bluetooth esistenti tra la radio e i dispositivi Bluetooth.

### **Rilevamento Bluetooth**

Consente alla radio di accedere alla modalità di rilevamento Bluetooth.

### **Call Alert**

Consente di accedere direttamente alla lista dei contatti, che permette di selezionare il destinatario di un avviso di chiamata.

### **Trasferimento di chiamata**

Consente di abilitare o disabilitare la funzionalità di trasferimento delle chiamate.

### **Registro chiamate**

Consente di selezionare la lista del registro chiamate.

### **Annuncio canale**

Consente di riprodurre messaggi vocali di annuncio di zone e canali per il canale corrente.

### **Contatti**

Consente di accedere direttamente alla lista dei contatti.

### **Emergenza**

In base alla programmazione, consente di attivare o annullare un segnale di emergenza.

### **PA esterno**

Consente di alternare l'instradamento dell'audio tra l'amplificatore dell'altoparlante PA collegato e il sistema PA interno della radio.

### **Posiz. interna**

Consente di attivare e disattivare la funzione Posizione interna.

### **Audio intelligente**

Consente di attivare o disattivare l'audio intelligente.

**Manual Dial** 

Consente di avviare una chiamata privata immettendo l'ID dell'utente.

**Roaming manuale sito**<sup>5</sup> 

Consente di avviare la ricerca manuale del sito.

**AGC mic**

Consente di attivare o disattivare il controllo automatico del guadagno (AGC) del microfono interno.

**Monitoraggio**

Consente di monitorare l'attività di un canale selezionato.

**Notifiche**

Consente di accedere direttamente alla lista delle notifiche.

**Eliminazione canale di disturbo**<sup>5</sup>

Consente di rimuovere temporaneamente un canale indesiderato, fatta eccezione per il canale selezionato, dalla lista scansione. Il canale selezionato fa riferimento alla combinazione selezionata di zone o canali dell'utente dalla quale viene avviata la scansione.

**Accesso rapido** 

Consente di avviare direttamente una chiamata privata, telefonica o di gruppo predefinita, un avviso di chiamata, un messaggio di testo rapido o un revert iniziale.

**Funzione Option Board**

Consente di attivare o disattivare le funzioni Option Board dei canali abilitati per la Option Board.

**Monitor permanente**<sup>5</sup>

Consente di monitorare tutto il traffico radio di un canale selezionato finché la funzione non viene disattivata.

**Telefono** 

Consente di accedere direttamente alla lista dei contatti telefonici.

**Privacy** 

Consente di attivare o disattivare la privacy.

**PA (Public Address)**

Consente di attivare o disattivare il sistema PA interno della radio.

**ID e alias della radio**

Fornisce l'ID e l'alias della radio.

<sup>5</sup> Non disponibile in Capacity Plus.

### Radio Check

Consente di stabilire se una radio è attiva nel sistema.

### Radio Disable

Consente di disattivare a distanza una radio di destinazione.

### Radio Enable

Consente di attivare a distanza una radio di destinazione.

### Monitoraggio remoto

Consente di accendere il microfono di una radio di destinazione senza fornire alcuna indicazione.

### Ripetitore/Comunicazione diretta<sup>5</sup>

Consente di alternare l'utilizzo di un ripetitore e della comunicazione diretta con un'altra radio.

### Reimposta canale principale

Consente di impostare un nuovo canale principale.

### Silenza promemoria canale principale

Consente di disattivare l'audio del promemoria del canale principale.

### Scansione<sup>6</sup>

Consente di attivare o disattivare la scansione.

### Info sito

Consente di visualizzare l'ID e il nome del sito Capacity Plus - Multisito corrente.

Riproduce i messaggi vocali di annuncio per il sito corrente quando la funzione di annuncio vocale è attivata.

### Blocco sito<sup>5</sup>

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

### Controllo telemetria

Consente di controllare il pin di output in una radio locale o remota.

### Messaggio di testo

Consente di selezionare il menu dei messaggi di testo.

### Disatt. remota trasmissioni

Consente di interrompere una chiamata interrompibile in corso per liberare il canale.

### Ottimizzazione trillo

Consente di attivare o disattivare la funzione di ottimizzazione del trillo.

---

<sup>6</sup> Non disponibile in Capacity Plus - Sito singolo.

**Annuncio vocale attivo/disattivo**

Consente di attivare o disattivare gli annunci vocali.

**Trasmissione attivata dalla voce (VOX, Voice Operating Transmission)**

Consente di attivare o disattivare VOX.

**Wi-Fi**

Consente di attivare o disattivare la funzionalità Wi-Fi.

**Selezione zona**

Consente di effettuare una selezione da una lista di zone.

## Funzioni di utilità o impostazioni assegnabili

Le seguenti impostazioni o funzioni di utilità della radio possono essere assegnate ai pulsanti programmabili.

**Tones/Alerts**

Consente di attivare o disattivare tutti i toni e gli avvisi.

**Retroilluminazione**

Consente di attivare o disattivare la retroilluminazione.

**Canale su/giù**

In base alla programmazione, consente di passare al canale precedente o successivo.

[Invia feedback](#)

**Modalità display**

Consente di attivare o disattivare la modalità di visualizzazione Giorno/notte.

**Livello potenza**

Consente di aumentare o ridurre la potenza di trasmissione.

## Accesso alle funzioni programmate

Seguire la procedura per accedere alle funzioni programmate sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

---
- 2 Premere  o  fino a visualizzare la funzione di menu, quindi premere  per selezionare una funzione o accedere a un sottomenu.
 

---
- 3 Eseguire una delle seguenti operazioni:

- Premere  per tornare alla schermata precedente.
- Premere a lungo  per tornare alla schermata principale.

Dopo un periodo di inattività, la radio esce automaticamente dal menu e torna alla schermata principale.

I tasti di navigazione del menu sono disponibili anche sul microfono della tastiera. Vedere la [Pulsanti sul microfono della tastiera a pagina 44](#).

## Indicatori di stato

Questo capitolo descrive gli indicatori di stato e i toni audio utilizzati nella radio.

### Icone

Sul display a cristalli liquidi (LCD) della radio vengono visualizzati lo stato della radio, le voci di testo e quelle dei menu.

### Tabella 9: Icone del display

Sulla barra di stato, situata nella parte superiore del display della radio, vengono visualizzate le icone riportate di seguito. Le icone sono presentate in ordine di apparizione da sinistra a destra e sono specifiche per canale.

	<p><b>Bluetooth collegato</b></p> <p>La funzione Bluetooth è abilitata. L'icona resta accesa quando è collegato un dispositivo Bluetooth remoto.</p>
	<p><b>Bluetooth non collegato</b></p> <p>La funzione Bluetooth è attivata, ma non è collegato alcun dispositivo Bluetooth remoto.</p>
	<p><b>Registro chiamate</b></p> <p>Registro chiamate radio.</p>
	<p><b>Contatto</b></p> <p>È disponibile il contatto radio.</p>
	<p><b>Emergenza</b></p> <p>La radio è in modalità di emergenza.</p>

*Continuazione tabella...*

	<b>Lista Rx fless.</b> L'opzione Lista Rx fless. è attivata.
	<b>GNSS disponibile</b>  La funzione GNSS è attivata. L'icona rimane accesa quando è possibile effettuare il fix della posizione.
	<b>GNSS non disponibile</b>  La funzione GNSS è attivata, ma la radio non riceve dati dal satellite.
	<b>Volume di dati elevato</b> La radio riceve un volume elevato di dati e il canale risulta occupato.
	<b>Posizione interna disponibile</b> <sup>7</sup> Lo stato della posizione interna è attivata e disponibile.
	<b>Posizione interna non disponibile</b> <sup>7</sup> Lo stato della posizione interna è "attivata ma non è disponibile" perché

Continuazione tabella...

	il Bluetooth è disattivato o la scansione beacon è sospesa dal Bluetooth.
	<b>Messaggio</b> Messaggio in arrivo.
	<b>Monitoraggio</b> Il canale selezionato viene monitorato.
	<b>Modalità audio disattivato</b> La Modalità audio disattivato è attivata e l'altoparlante è disattivato.
	<b>Notifica</b> Nella lista delle notifiche sono inclusi gli eventi senza risposta.
	<b>Scheda opzioni</b> La Option Board è abilitata. (solo modelli con la scheda opzioni).
	<b>Option Board non funzionante</b> La Option Board è disabilitata.

Continuazione tabella...

<sup>7</sup> Disponibile solo per i modelli con l'ultima versione software e hardware.

	<p><b>Timer ritardo programmazione Over-the-Air</b></p> <p>Indica il tempo restante prima del riavvio automatico della radio.</p>
	<p><b>RSSI (Received Signal Strength Indicator)</b></p> <p>Il numero di barre visualizzato rappresenta la potenza del segnale radio. Quattro barre indicano il segnale più potente. L'icona viene visualizzata solo durante la ricezione.</p>
	<p><b>Inibizione risp.</b></p> <p>L'inibizione risposta è attivata.</p>
	<p><b>Solo suoneria</b></p> <p>È attivata la modalità della suoneria.</p>
	<p><b>Scansione<sup>8</sup></b></p> <p>La funzione di scansione è abilitata.</p>

Continuazione tabella...

	<p><b>Scansione - Priorità 1<sup>8</sup></b></p> <p>La radio rileva l'attività sul canale/gruppo indicato con Priorità 1.</p>
	<p><b>Scansione - Priorità 2<sup>8</sup></b></p> <p>La radio rileva l'attività sul canale/gruppo indicato con Priorità 2.</p>
	<p><b>Sicuro</b></p> <p>La funzione Privacy è attiva.</p>
	<p><b>Accedi</b></p> <p>La radio viene collegata al server remoto.</p>
	<p><b>Disconnetti</b></p> <p>La radio viene scollegata dal server remoto.</p>
	<p><b>Suoneria silenziosa</b></p> <p>È attivata la modalità della suoneria silenziosa.</p>

Continuazione tabella...

<sup>8</sup> Non disponibile in Capacity Plus.

	<b>Roaming<sup>9</sup></b> La funzione Roaming è abilitata.
	<b>Comunicazione diretta<sup>8</sup></b> In assenza di un ripetitore, la radio è configurata per la comunicazione diretta fra radio.
	<b>Toni disattivati</b> I toni sono disabilitati.
	<b>Protezione disabilitata</b> La funzione Privacy non è attiva.
	<b>Scansione selettiva</b> La funzione Scansione selettiva è abilitata.
	<b>Wi-Fi eccellente<sup>10</sup></b> Il segnale Wi-Fi è eccellente.

Continuazione tabella...

	<b>Wi-Fi buono<sup>10</sup></b> Il segnale Wi-Fi è buono.
	<b>Wi-Fi medio<sup>10</sup></b> Il segnale Wi-Fi è nella media.
	<b>Wi-Fi scarso<sup>10</sup></b> Il segnale Wi-Fi è scarso.
	<b>Wi-Fi non disponibile<sup>10</sup></b> Il segnale Wi-Fi è disponibile.

**Tabella 10: Icone di menu avanzate**

Le icone riportate di seguito vengono visualizzate accanto alle voci di menu che permettono la selezione tra due opzioni o per indicare l'esistenza di un sottomenu con due opzioni.

	<b>Casella di controllo (selezionata)</b> Indica che l'opzione è selezionata.
---	--

Continuazione tabella...

<sup>9</sup> Non disponibile in Capacity Plus - Sito singolo

<sup>10</sup> Disponibile solo per DM4601e.

	<p><b>Casella di controllo (vuota)</b> Indica che l'opzione non è selezionata.</p>
	<p><b>Casella nera</b> Indica l'opzione selezionata per la voce di menu con un sottomenu.</p>

**Tabella 11: Icone del dispositivo Bluetooth**

Le icone riportate di seguito vengono visualizzate accanto alle voci dei dispositivi Bluetooth disponibili, indicandone il tipo.

	<p><b>Dispositivo audio Bluetooth</b> Dispositivo audio Bluetooth, ad esempio una cuffia.</p>
	<p><b>Dispositivo dati Bluetooth</b> Dispositivo dati Bluetooth, ad esempio uno scanner.</p>
	<p><b>Dispositivo PTT Bluetooth</b> Dispositivo PTT Bluetooth, ad esempio un dispositivo POD (solo PTT).</p>

**Tabella 12: Icone di chiamata**

Le icone riportate di seguito vengono visualizzate sul display durante una chiamata. Vengono visualizzate anche nella lista Contatti per indicare il tipo di alias o ID.

	<p><b>Chiamata PC Bluetooth</b> Indica che è in corso una chiamata PC Bluetooth.  Nella lista Contatti, indica l'ID (numero) o l'alias (nome) di una chiamata PC Bluetooth.</p>
	<p><b>Chiamata dispatch</b> Il tipo di contatto Chiamata dispatch serve a inviare un messaggio di testo a un PC dispatcher tramite un server di messaggistica di terze parti.</p>
	<p><b>Chiamata di gruppo/generale</b> Indica che è in corso una chiamata di gruppo o generale.  Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del gruppo.</p>

*Continuazione tabella...*

	<p><b>Chiamata privata</b> Indica che la radio è impegnata in una chiamata privata. Nella lista Contatti, indica l'alias (nome) o l'ID (numero) dell'utente.</p>
	<p><b>Chiamata telefonica come chiamata di gruppo/generale</b> Indica che è in corso una chiamata telefonica come chiamata di gruppo o generale.  Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del gruppo.</p>
	<p><b>Chiamata telefonica come chiamata privata</b> Indica che è in corso una chiamata telefonica come chiamata privata.  Nella lista Contatti, indica l'alias (nome) o l'ID (numero) del telefono.</p>

**Tabella 13: Icone Job Ticket**

Le seguenti icone vengono visualizzate temporaneamente sul display nella cartella Job Ticket.

	<p><b>Tutti i job</b> Indica tutti i job in elenco.</p>
	<p><b>Nuovi job</b> Indica i nuovi job.</p>
	<p><b>In corso</b> È in corso la trasmissione dei processi. Questa icona viene visualizzata prima dell'indicazione di invio riuscito o non riuscito dei Job Ticket.</p>
	<p><b>Non inviato</b> Non è possibile inviare i processi.</p>
	<p><b>Inviato</b> I processi sono stati inviati correttamente.</p>
	<p><b>Priorità 1</b> Indica il livello di priorità 1 per i processi.</p>

*Continuazione tabella...*

	<p><b>Priorità 2</b> Indica il livello di priorità 2 per i processi.</p>
	<p><b>Priorità 3</b> Indica il livello di priorità 3 per i processi.</p>

**Tabella 14: Mini icone di notifica**

Le icone riportate di seguito vengono visualizzate temporaneamente sul display dopo aver effettuato un'operazione per lo svolgimento di un'attività.

	<p><b>Trasmissione non riuscita (negativo)</b> L'azione effettuata ha avuto esito negativo.</p>
	<p><b>Trasmissione riuscita (positivo)</b> L'azione effettuata ha avuto esito positivo.</p>
	<p><b>Trasmissione in corso (transitorio)</b> La radio sta trasmettendo. Viene visualizzata prima dell'indicazione di trasmissione riuscita o non riuscita.</p>

**Tabella 15: Icone della cartella Msg inviati** 

Le seguenti icone compaiono nell'angolo in alto a destra del display nella cartella Msg inviati.

	<p><b>In corso</b> Il messaggio di testo per un alias o un ID dell'utente è in attesa di essere trasmesso e di successiva conferma di ricezione.  Il messaggio di testo per un alias o un ID del gruppo è in attesa di essere trasmesso.</p>
	<p><b>Message singolo o di gruppo letto</b> Il messaggio di testo è stato letto.</p>
	<p><b>Message singolo o di gruppo non letto</b> Il messaggio di testo non è stato letto.</p>

*Continuazione tabella...*

 	<p><b>Non inviato</b> Il messaggio di testo non può essere inviato.</p>
 	<p><b>Inviato</b> Il messaggio di testo è stato inviato.</p>

## Indicatori LED

Gli indicatori LED segnalano lo stato operativo della radio.

### Rosso lampeggiante

La radio non ha superato il test di autodiagnostica all'accensione,

La radio sta ricevendo una trasmissione di emergenza.

La radio trasmette con la batteria in esaurimento.

La radio si trova al di fuori della portata del segnale, se è configurato il sistema transponder per il rilevamento automatico della portata.

È attivata la Modalità Muto.

### Verde fisso

La radio si sta accendendo.

La radio sta trasmettendo.

La radio sta inviando un avviso chiamata o una trasmissione di emergenza.

### Verde lampeggiante

La radio sta ricevendo una chiamata o dati.

La radio sta recuperando trasmissioni con programmazione Over-the-Air.

La radio sta rilevando attività Over-the-Air.

#### NOTA:

Questa attività può o meno influire sul canale programmato della radio a causa della natura del protocollo digitale.

In modalità Capacity Plus, il rilevamento dell'attività Over-the-Air da parte della radio non è segnalato da alcun LED.

### Verde con doppio lampeggio

La radio sta ricevendo dati o una chiamata con funzione Privacy attivata.

### Giallo fisso

La radio sta monitorando un canale convenzionale.

La radio si trova in modalità Rilevamento Bluetooth.

### Giallo lampeggiante

Sulla radio è in corso la scansione di attività.

La radio non ha ancora risposto a un avviso di chiamata.

Sulla radio è attivata l'opzione Lista Rx fless.

Tutti i canali Capacity Plus - Multisito sono occupati.

### Giallo con doppio lampeggio

Sulla radio è attivato il roaming automatico.

La radio esegue la ricerca attiva di un nuovo sito.

La radio non ha ancora risposto a un avviso di chiamata di gruppo.

La radio è bloccata.

La radio non è connessa al ripetitore mentre si trova nella modalità Capacity Plus.

Tutti i canali Capacity Plus sono occupati.

## Tones

Di seguito sono elencati i toni riprodotti dall'altoparlante della radio.

Tono alto

Tono basso

## Toni indicatori

I toni indicatori segnalano acusticamente lo stato dopo aver effettuato un'operazione per eseguire un'attività.

Tono indicatore positivo

Tono indicatore negativo

## Toni audio

I toni audio segnalano acusticamente lo stato della radio o la risposta ai dati ricevuti.

Tono continuo

Viene emesso un singolo tono, che continua fino al termine della trasmissione.

### Tono periodico

Viene emesso un tono intervallato, a seconda della durata impostata dalla radio. Il tono inizia, finisce e quindi si ripete.

### Tono ripetitivo

Viene emesso un singolo tono, che si ripete finché non viene annullato dall'utente.

### Tono momentaneo

Viene emesso un singolo tono per un breve durata impostata dalla radio.

## Modalità analogica e digitale convenzionali

È possibile configurare ogni canale della radio come canale convenzionale analogico o digitale.

Utilizzare la **leva di selezione canale** per passare da un canale analogico ad uno digitale e viceversa.

Alcune funzioni non sono disponibili quando si passa dalla modalità digitale a quella analogica. Le icone per le

funzioni digitali appaiono "in grigio". Le funzioni disabilitate non vengono visualizzate nel menu.

Alcune funzioni della radio sono disponibili in entrambe le modalità. Le lievi differenze tra le funzioni **non** incidono sulle prestazioni della radio.

### NOTA:

La radio può passare alternativamente dalla modalità digitale a quella analogica anche durante la scansione dual mode. Per ulteriori informazioni, vedere [Scansione a pagina 423](#).

## Informazioni sulle icone

In questo manuale le icone descritte sono utilizzate per indicare le funzioni supportate nelle modalità convenzionali analogica o digitale o rese disponibili con un microfono con tastiera.

Indica una funzione disponibile **solo nella modalità analogica** convenzionale.

Indica una funzione disponibile **solo nella modalità digitale** convenzionale.

Per le funzioni disponibili in **entrambe** le modalità convenzionali analogica e digitale, **non** viene visualizzata nessuna delle due icone.

## IP Site Connect

Questa funzione consente di estendere le comunicazioni convenzionali sulla radio oltre la portata di un singolo sito, connettendosi ai diversi siti disponibili tramite una rete IP (Internet Protocol). Si tratta di una modalità multisito convenzionale.

Quando la radio si sposta fuori campo rispetto a un sito per entrare nel campo di un altro, si connette al ripetitore del nuovo sito per inviare o ricevere chiamate o trasmissioni dati. Questa operazione può essere eseguita automaticamente o manualmente in base alle impostazioni specificate.

Se è stata impostata la ricerca automatica del sito, la radio esegue la scansione di tutti i siti disponibili se rileva un segnale debole o nessun segnale dal sito corrente. La

radio quindi si connette al ripetitore con il valore RSSI (Received Signal Strength Indicator) maggiore.

Nella ricerca manuale del sito, la radio ricerca il successivo sito disponibile tra i membri della lista di roaming, anche se questo non è necessariamente quello con il segnale più forte, e si connette al ripetitore.

### NOTA:

È possibile abilitare solo la funzione di scansione o quella di roaming su ogni canale, ma non entrambe contemporaneamente.

A una lista di roaming specifica possono essere aggiunti solo i canali per i quali è stata abilitata questa funzione. Durante il roaming automatico, la radio esegue la ricerca tra i canali della lista di roaming per individuare il sito migliore. Una lista di roaming supporta fino a 16 canali, compreso il canale selezionato.

### NOTA:

Non è possibile aggiungere o eliminare manualmente una voce dalla lista di roaming. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Capacity Plus - Sito singolo

Capacity Plus - Sito singolo è una configurazione trunking singolo sito del sistema radio MOTOTRBO, in cui un pool di canali viene utilizzato per supportare centinaia di utenti e un numero massimo di 254 gruppi. Questa funzione consente alla radio di utilizzare in modo efficiente il numero disponibile di canali programmati durante la modalità operativa Ripetitore.

Se si tenta di accedere a una funzione non supportata in Capacity Plus - Sito singolo premendo un pulsante programmabile, verrà emesso un tono indicatore negativo.

La radio include anche funzioni disponibili nella modalità digitale convenzionale, IP Site Connect e Capacity Plus. Le lievi differenze tra le funzioni non incidono comunque sulle prestazioni della radio.

Per ulteriori informazioni su questa configurazione, contattare il rivenditore o l'amministratore di sistema.

## Capacity Plus - Multisito

Capacity Plus - Multisito è una configurazione trunking multicanale del sistema radio MOTOTRBO, che abbina le configurazioni ottimali di Capacity Plus ed IP Site Connect.

Capacity Plus - Multisito consente alla radio di estendere le comunicazioni trunking oltre la portata di un singolo sito, collegandosi ai diversi siti disponibili che sono connessi con una rete IP. Offre, inoltre, una maggiore capacità utilizzando in modo efficiente il numero complessivo di canali programmati supportati da ciascuno dei siti disponibili.

Quando la radio si sposta fuori campo rispetto a un sito per entrare nel campo di un altro, si connette al ripetitore del nuovo sito per inviare o ricevere chiamate/trasmissioni dati. A seconda delle impostazioni assegnate, la connessione viene effettuata automaticamente o manualmente.

Se è stata impostata la ricerca automatica del sito, la radio esegue la scansione di tutti i siti disponibili se rileva un segnale debole o nessun segnale dal sito corrente. Quindi si connette al ripetitore con il valore RSSI maggiore.

Nella ricerca manuale del sito, la radio ricerca il sito successivo disponibile tra i membri della lista roaming,

anche se questo non è necessariamente quello con il segnale più forte, e si collega ad esso.

È possibile aggiungere a una lista di roaming specifica qualsiasi canale sul quale è stata abilitata la modalità Capacity Plus - Multisito. Durante il roaming automatico, la radio esegue la ricerca tra questi canali per individuare il sito migliore.

#### NOTA:

È impossibile aggiungere o eliminare manualmente una voce dall'elenco di roaming. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

In modo analogo a Capacity Plus - Sito singolo, le icone delle funzioni non supportate nella modalità Capacity Plus - Multisito non sono disponibili nel menu. Se si tenta di accedere a una funzione non supportata in Capacity Plus - Multisito, premendo un pulsante programmabile, viene emesso un tono indicatore negativo.

## Selezioni di canale e zona

Questo capitolo descrive le operazioni per selezionare una zona o un canale sulla radio. Per zona si intende un gruppo di canali.

La radio supporta fino a 99 canali e 2 zone, con un massimo di 99 canali per zona.

Ogni canale può essere programmato con diverse funzioni e/o supportare gruppi di utenti diversi.

## Selezione delle zone

Seguire la procedura per selezionare la zona richiesta sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Selezione zona**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

- 
- 2 Premere  o  fino a visualizzare Zona. Premere  per effettuare la selezione. Sul display vengono visualizzati  e la zona corrente.
-

- 3 Premere  o  fino a visualizzare la zona desiderata. Premere  per effettuare la selezione.

Sul display viene visualizzato <Zona> Selezionata per pochi secondi, quindi compare di nuovo la schermata della zona selezionata.

## Selezione delle zone utilizzando la ricerca per alias

Seguire la procedura per selezionare la zona richiesta sulla radio utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Zona. Premere  per effettuare la selezione. Il display mostra  e la zona corrente.

- 3 Digitare il primo carattere dell'alias desiderato. Sul display viene visualizzato un cursore lampeggiante.

- 4 Inserire il resto dei caratteri dell'alias desiderato. La ricerca dell'alias non fa distinzione tra maiuscole e minuscole. Se due o più voci hanno lo stesso nome, il display visualizza la voce elencata per prima nella lista. La prima riga di testo visualizza i caratteri immessi. Le righe di testo successive mostrano i risultati della ricerca abbreviati.

- 5 Premere  per effettuare la selezione. Sul display viene visualizzato <Zone> Selected (<Zona> selezionata) per pochi secondi, quindi compare di nuovo la schermata della zona selezionata.

## Selezione dei canali

Seguire la procedura per selezionare il canale richiesto sulla radio dopo aver selezionato una zona.

Eeguire una delle seguenti operazioni:

- Premere il pulsante **Scorri su/giù**.
- Utilizzare la **manopola volume/canali**.
- Premere i pulsanti programmati **Canale su/Canale giù**.

---

## Chiamate

Questo capitolo descrive le operazioni per ricevere, rispondere, effettuare e interrompere le chiamate.

È possibile selezionare un ID o un alias dell'utente o del gruppo dopo aver selezionato un canale mediante una di queste funzioni:

### Ricerca per alias

Questo metodo viene utilizzato esclusivamente per le chiamate di gruppo, private e generali con un microfono con tastiera.

### Elenco Contatti

Questo metodo consente di accedere direttamente alla lista Contatti.

### Comp. man. (tramite Contatti)

Questo metodo viene utilizzato solo per le chiamate private e telefoniche con un microfono con tastiera.

### Tasti numerici programmati

Questo metodo viene utilizzato esclusivamente per le chiamate di gruppo, private e generali con un microfono con tastiera.

#### NOTA:

È possibile assegnare solo un alias o un ID a un tasto numerico, ma è possibile associare più tasti numerici a un alias o un ID. Tutti i tasti numerici sul microfono con tastiera possono essere assegnati. Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

### Pulsante di accesso rapido programmato

Questo metodo viene utilizzato solo per le chiamate di gruppo, private e telefoniche.

È possibile assegnare un solo ID a un pulsante di **accesso rapido** con una pressione breve o prolungata

di un pulsante programmabile. Sulla radio è possibile programmare più pulsanti di **accesso rapido**.

### Pulsante programmabile

Questo metodo è utilizzato solo per le chiamate telefoniche.

### Manopola del selettore di canale/volume

Questo metodo consente di selezionare manualmente un ID o alias dell'utente o un ID o alias del gruppo.

Il LED diventa verde fisso durante la trasmissione e lampeggia in verde durante la ricezione.

#### NOTA:

il LED diventa verde fisso durante la trasmissione, mentre il doppio lampeggio indica la ricezione di una chiamata con funzione Privacy attivata.

Per decodificare una chiamata con funzione Privacy attivata, la radio deve avere la stessa chiave di privacy o lo stesso valore e ID della chiave (programmati dal rivenditore) della radio trasmittente (la radio dalla quale si riceve la chiamata).

Per ulteriori informazioni, vedere [Privacy a pagina 486](#).

## Chiamate di gruppo

La radio deve essere configurata come parte di un gruppo per ricevere o effettuare una chiamata al gruppo di utenti.

## Effettuazione di chiamate di gruppo

Seguire la procedura per effettuare chiamate di gruppo sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Selezionare un canale con l'alias o l'ID del gruppo attivo.
  - Premere il pulsante di **accesso rapido** programmato.

---
- 2 Premere il pulsante **PTT** per effettuare la chiamata.
 

Il LED verde si accende. Sul display viene visualizzata l'icona **Chiam. gruppo** e l'alias della chiamata di gruppo.

---
- 3 Rilasciare il pulsante **PTT** per ascoltare.
 

Il LED verde si illumina quando la radio di destinazione risponde. Sul display vengono

visualizzati l'icona **Chiam. gruppo** e l'alias o l'ID del gruppo e l'alias o l'ID della radio trasmittente.

- 
- 4  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

## Effettuazione di chiamate di gruppo dalla lista Contatti

Seguire la procedura per effettuare chiamate di gruppo sulla radio utilizzando la lista Contatti.

- 
- 1 Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

- 
- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

- 
- 4 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende.

- 
- 5 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde lampeggia quando un utente del gruppo risponde. Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'alias o l'ID e l'alias o l'ID della radio trasmittente.

- 
- 6  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

---

## Effettuazione di chiamate di gruppo utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate di gruppo sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

---

- 2 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED verde si accende.
- 

- 3 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde lampeggia quando un utente del gruppo risponde.

---

- 4  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

---

Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Risposta alle chiamate di gruppo

Per ricevere una chiamata da un gruppo di utenti, la radio deve essere configurata come appartenente a quel gruppo. Seguire la procedura per rispondere alle chiamate di gruppo sulla radio.

Quando si riceve una chiamata di gruppo:

- Il LED verde lampeggia.
- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. gruppo**.
- La prima riga di testo visualizza l'alias del chiamante.
- La seconda riga di testo visualizza l'alias della chiamata di gruppo.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

#### 1 Eseguire una delle seguenti operazioni:

-  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.
-  Se la funzione Interruzione voce è abilitata, premere il pulsante **PTT** per interrompere l'audio della radio trasmittente e liberare il canale per rispondere.

Il LED verde si accende.

#### 2 Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
-  Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

#### 3 Rilasciare il pulsante **PTT** per ascoltare.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

se la radio riceve una chiamata di gruppo quando non è visualizzata la schermata iniziale, resta visualizzata quella corrente prima che si risponda alla chiamata.

Premere a lungo  per tornare alla schermata principale e visualizzare l'alias del chiamante prima di rispondere.

## Chiamate private

Per chiamata privata si intende una chiamata da una singola radio a un'altra.

Esistono due modi per impostare una chiamata privata. Il primo tipo configura la chiamata dopo aver eseguito il controllo della presenza della radio, mentre con il secondo tipo la chiamata viene avviata subito. Il rivenditore di fiducia può programmare solo uno di questi due tipi di chiamata sulla radio.

## Effettuazione di chiamate private

La radio deve essere stata programmata per eseguire una chiamata privata. Se questa funzione non è attivata, viene emesso un tono indicatore negativo quando si effettua la chiamata. Seguire la procedura per effettuare chiamate private sulla radio.

Per contattare una singola radio, utilizzare le funzioni Msg testo o Avviso chiamata. Per ulteriori informazioni, vedere [Messaggistica di testo a pagina 159](#) o [Funzionamento dell'avviso di chiamata a pagina 440](#).

- 1 Eseguire una delle seguenti operazioni:
  - Selezionare un canale con l'ID o l'alias dell'utente attivo.
  - Premere il pulsante di **accesso rapido** programmato.

- 2 Premere il pulsante **PTT** per effettuare la chiamata.

Il LED verde si accende. Sul display vengono visualizzati l'icona **Chiam. privata**, l'alias dell'utente e lo stato della chiamata.

- 3 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

- 4 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde lampeggia quando la radio di destinazione risponde.

- 5  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato **Chiam. term.**

## Effettuazione di chiamate private dalla lista Contatti

Seguire la procedura per effettuare chiamate private sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display, viene visualizzato l'alias di destinazione.

---

- 5 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

---

- 6 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde lampeggia quando la radio di destinazione risponde. Sul display viene visualizzato l'ID o l'alias dell'utente che effettua la trasmissione.

- 7  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato Chiam. term.

## Esecuzione di chiamate private utilizzando la composizione manuale

Seguire la procedura per effettuare chiamate private sulla radio utilizzando la composizione manuale.

- 1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Contatti**.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Comp. man.**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Numero radio**. Premere  per effettuare la selezione.

---

5 Eseguire una delle seguenti operazioni:

- Inserire l'ID dell'utente, quindi premere  per continuare.
  - Modificare l'ID dell'utente composto precedentemente, quindi premere  per continuare.
- 

6 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED verde si accende. Sul display viene visualizzato l'alias della destinazione.

---

7 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

---

8 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde si illumina quando la radio di destinazione risponde. Sul display viene visualizzato l'ID o l'alias dell'utente che effettua la trasmissione.

---

9  Se la funzione **Indicazione canale libero** è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato **Chiam. term.**

---

## Effettuazione di chiamate private utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate private sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

- 2 Premere il pulsante **PTT** per effettuare la chiamata.

Il LED verde si accende. Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. privata**. La prima riga di testo visualizza l'alias del chiamante. Nella seconda riga di testo è visualizzato lo stato della chiamata.

- 3 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde lampeggia quando la radio di destinazione risponde. Sul display, viene visualizzato l'alias di destinazione.

- 4  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. La radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Risposta alle chiamate private

Seguire la procedura per rispondere alle chiamate private sulla radio.

Alla ricezione di una chiamata privata:

- Il LED verde lampeggia.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

### 1 Eseguire una delle seguenti operazioni:

-  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.
-  Se la funzione Disatt. remota trasmissioni è abilitata, premere il pulsante **PTT** per interrompere una chiamata che può essere sospesa e liberare il canale per rispondere.

Il LED verde si accende.

- 
- ### 2 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
- 

- ### 3 Rilasciare il pulsante **PTT** per ascoltare.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

---

## Chiamate generali

Per chiamata generale si intende una chiamata avviata da una singola radio verso tutte le radio sintonizzate sullo stesso canale. Una chiamata generale viene utilizzata per effettuare annunci importanti, che richiedono la massima attenzione da parte dell'utente. Gli utenti del canale non possono rispondere a una chiamata generale.

## Ricezione di chiamate generali

Alla ricezione di una chiamata generale:

- Viene emesso un tono.
- Il LED verde lampeggia.
- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiam. gruppo**.
- Sulla prima riga di testo viene visualizzato l'ID o l'alias del chiamante.
- La seconda riga di testo visualizza Chiam. gen.

- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

Al termine della chiamata la radio ritorna alla schermata visualizzata prima di ricevere la chiamata generale.

Una chiamata generale non attende lo scadere del periodo di tempo predeterminato prima di essere conclusa.

 Se la funzione di indicazione canale libero è attivata, quando sulla radio trasmittente viene rilasciato il pulsante **PTT** verrà emesso un breve tono di avviso per indicare che il canale è libero per l'uso.

Non si può rispondere a una chiamata generale.

**NOTA:**

Se si cambia canale durante la ricezione, la chiamata generale viene terminata dalla radio. Non è possibile continuare con la navigazione del menu o effettuare alcuna modifica fino al termine della chiamata generale.

## Effettuazione di chiamate generali

La radio deve essere programmata per poter effettuare una chiamata generale. Seguire la procedura per effettuare chiamate generali sulla radio.

**1** Selezionare un canale con l'alias o l'ID del gruppo di chiamata generale attivo.

---

**2** Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display sono visualizzati l'icona **Chiamata di gruppo** e Chiam. generale.

---

**3** Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
-  Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

Gli utenti del canale non possono rispondere a una chiamata generale.

---

## Effettuazione di chiamate generali utilizzando il tasto numerico programmabile

Seguire la procedura per effettuare chiamate generali sulla radio utilizzando il tasto numerico programmabile.

- 1 Premere a lungo il tasto numerico programmato assegnato nella schermata principale fino a visualizzare l'ID o l'alias predefinito.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Viene emesso un tono indicatore negativo se il tasto numerico non è assegnato a una voce.

- 2 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende.

- 3 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde si illumina quando la radio di destinazione risponde. Al momento non è possibile rispondere a una chiamata generale.

- 4  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. La radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

Alla fine di una chiamata privata viene emesso un breve tono.

Per ulteriori informazioni, vedere [Assegnazione di voci ai tasti numerici programmabili a pagina 428](#).

## Chiamate selettive

Per chiamata selettiva si intende una chiamata tra due radio singole. In un sistema analogico è una chiamata privata.

### Effettuazione di chiamate selettive

La radio deve essere stata programmata per eseguire una chiamata selettiva. Seguire la procedura per effettuare chiamate selettive sulla radio.

- 1 Selezionare un canale con l'ID o l'alias dell'utente attivo.

---

- 2 Premere il pulsante **PTT** per effettuare la chiamata.  
Il LED verde si accende. Sul display vengono visualizzati l'icona **Chiam. privata**, l'alias dell'utente e lo stato della chiamata.

---

- 3 Eseguire una delle seguenti operazioni:
  - Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

-  Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

- 4 Rilasciare il pulsante **PTT** per ascoltare.

Il LED verde si illumina quando la radio di destinazione risponde.

- 5  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

- 6 Sul display viene visualizzato **Chiam. term.**

### Risposta alle chiamate selettive

Seguire la procedura per rispondere alle chiamate selettive sulla radio.

Quando la radio riceve una chiamata selettiva:

- Il LED verde lampeggia.
- Sulla prima riga di testo vengono visualizzati l'icona **Chiam. privata** e l'alias del chiamante o `Chiamata sel.` o `Avviso c/chiam.`.
- La radio si attiva e l'altoparlante emette il tono della chiamata in arrivo.

**1** Premere il pulsante **PTT** per rispondere alla chiamata.

Il LED verde si accende.

---

**2** Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

---

**3** Rilasciare il pulsante **PTT** per ascoltare.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato `Chiam. term.`

---

## Chiamate telefoniche

Per chiamata telefonica si intende una chiamata da una singola radio a un telefono.

Se la funzione relativa alle chiamate telefoniche non è attivata nella radio:

- Sul display viene visualizzato `Non disponibile.`
- L'audio della chiamata viene disattivato.
- Al termine della chiamata la radio ritorna alla schermata precedente.

Durante una chiamata telefonica, la radio tenta di terminare la chiamata quando:

- Si preme il pulsante **Accesso rapido** con il codice di uscita preconfigurato.
- Si inserisce il codice di uscita come input per le cifre aggiuntive.

Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/uscita, la radio risponde soltanto ai pulsanti o alle manopole **On/Off**, **Controllo volume** e **Selettore canale**. Per ogni immissione non valida viene emesso un tono.

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata. Viene emesso un tono.

**NOTA:**

Il codice di accesso o di disconnessione non può contenere più di 10 caratteri.

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Effettuazione di chiamate telefoniche

Seguire la procedura per effettuare chiamate telefoniche sulla radio.

- 1 Premere il pulsante di **accesso rapido** programmato fino a visualizzare l'ID o l'alias predefinito.

Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

Se il codice di accesso non è stato preconfigurato nella lista Contatti, sul display viene visualizzato

Codice accesso!.

- 2 Inserire il codice di accesso e premere  per continuare.

Il codice di accesso o di disconnessione non può contenere più di 10 caratteri.

- 3 Premere il pulsante **PTT** per rispondere alla chiamata. Rilasciare il pulsante **PTT** per ascoltare.

- 4 Inserire le cifre aggiuntive con la tastiera, se richiesto dalla chiamata, quindi premere  per continuare.

Se la chiamata termina mentre si stanno immettendo le cifre aggiuntive richieste dalla chiamata, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

Viene emesso un tono DTMF (segnalazione multifrequenza DTMF). La radio ritorna alla schermata precedente.

- 5 Premere  per terminare la chiamata.

- 6 Eseguire una delle seguenti operazioni:
  - Se il codice di uscita non è stato preconfigurato, inserirlo quando sul display viene visualizzato

Codice disconnessi:, quindi premere  per continuare.

La radio ritorna alla schermata precedente.

- Premere il pulsante di **accesso rapido** programmato.  
Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

Viene emesso il tono DTMF e sul display viene visualizzato `Fine chiam. tel.`

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere i due passaggi precedenti o attendere che l'utente del telefono termini la chiamata.

## Effettuazione di chiamate telefoniche dalla lista Contatti

Seguire la procedura per effettuare chiamate telefoniche sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.  
Il display mostra le voci in ordine alfabetico.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.  
Quando si preme il pulsante **PTT** nella schermata dei contatti del telefono:
  - Sulla prima riga del display viene visualizzato `Numero tel.:`.

- Sulla seconda riga, viene visualizzato un cursore lampeggiante.

Se la voce selezionata è vuota:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato `Chiamata telefonica non valida #`.

4 Premere  o  fino a visualizzare `Chiamata tel.` Premere  per effettuare la selezione.

Sul display viene visualizzato `Codice accesso:` se il codice di accesso non è stato preconfigurato.

5 Inserire il codice di accesso e premere  per continuare.

Il codice di accesso o di disconnessione non può contenere più di 10 caratteri.

Sulla prima riga di testo viene visualizzato `Chiamata`. Sulla seconda riga di testo vengono visualizzati l'ID o l'alias dell'utente e l'icona **Chiamata telefonica**.

Se la chiamata ha esito positivo:

- Viene emesso il tono DTMF.
- Si sente quindi il tono di composizione dell'utente del telefono.
- Sulla prima riga di testo vengono visualizzati l'ID o l'alias dell'utente e l'icona **RSSI**.
- Sulla seconda riga vengono visualizzati `Chiamata telefonica` e l'icona **Chiamata telefonica**.

Se la chiamata ha esito negativo:

- Viene emesso un tono.
- Sul display viene visualizzato prima `Chiamata fallita` e quindi `Codice accesso:`.
- La radio ritorna alla schermata in uso prima dell'inizio della chiamata se il codice di accesso è stato preconfigurato nella lista Contatti.

6 Premere il pulsante **PTT** per rispondere alla chiamata.

L'icona **RSSI** scompare.

7 Rilasciare il pulsante **PTT** per ascoltare.

**8** Inserire le cifre aggiuntive con la tastiera, se richiesto dalla chiamata, quindi premere  per continuare.

Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste dalla chiamata, la radio ritorna alla schermata in uso prima dell'inizio della chiamata.

Viene emesso il tono DTMF. La radio ritorna alla schermata precedente.

**9** Premere  per terminare la chiamata.

**10** Se il codice di uscita non è stato preconfigurato, inserirlo quando sul display viene visualizzato

Codice disconnes!, quindi premere  per continuare.

La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzato Fine chiam. tel.

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato Chiam. term.

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere il [passaggio 9](#) e il [passaggio 10](#) o attendere che l'utente del telefono termini la chiamata. Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione OK per inviare chiam.

Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione Chiam. tel. finita.

Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

**NOTA:**

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata. Viene emesso un tono.

durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata.

Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/disconnessione, la radio risponde solamente al pulsante **On/Off**, alla **manopola del volume** e alla **leva canali**. Per ogni immissione non valida viene emesso un tono.

## Effettuazione di chiamate telefoniche utilizzando la composizione manuale

Seguire la procedura per effettuare chiamate telefoniche sulla radio utilizzando la composizione manuale.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Contatti**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Comp. man.** Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Numero tel.** Premere  per effettuare la selezione.  
Sul display vengono visualizzati **Numero:** e un cursore lampeggiante.

---

5 Inserire il numero di telefono, quindi premere  per continuare.

Sul display vengono visualizzati **Codice accesso:** e un cursore lampeggiante se il codice di accesso non è stato preconfigurato.

---

6 Inserire il codice di accesso e premere  per continuare.

Il codice di accesso o di disconnessione non può contenere più di 10 caratteri.

- 7 Il LED verde si accende. Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**. Nella prima riga di testo è visualizzato l'alias dell'utente. Nella seconda riga di testo è visualizzato lo stato della chiamata. Se la chiamata ha esito positivo:
- Viene emesso il tono DTMF.
  - Si sente quindi il tono di composizione dell'utente del telefono.
  - Nella prima riga di testo è visualizzato l'alias dell'utente.
  - Il display continua a visualizzare l'icona **Chiamata telefonica** nell'angolo superiore destro.

Se la chiamata ha esito negativo:

- Viene emesso un tono.
- Sul display viene visualizzato prima `Chiam tel fallita` e quindi `Codice accesso:`.

- La radio ritorna alla schermata in uso prima dell'inizio della chiamata se il codice di accesso è stato preconfigurato nella lista Contatti.

- 8 Premere  per terminare la chiamata.

- 9 Eseguire una delle seguenti operazioni:

- Se il codice di uscita non è stato preconfigurato, inserirlo quando sul display viene visualizzato `Codice disconnesi:`, quindi premere  per continuare. La radio ritorna alla schermata precedente.
- Premere il pulsante di **accesso rapido** programmato. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.

Viene emesso il tono DTMF e sul display viene visualizzato `Fine chiam. tel.`

Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere [passaggio 8](#) o attendere che l'utente del telefono termini la chiamata.

**NOTA:**

Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione OK per inviare chiam.

Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione Chiam. term.

Se la chiamata termina mentre si stanno immettendo le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata. Viene emesso un tono.

durante la chiamata, se si preme il pulsante di **accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata.

Durante l'accesso al canale e la trasmissione delle cifre aggiuntive o del codice di accesso/disconnessione, la radio risponde solamente

al pulsante **On/Off**, alla **manopola del volume** e alla **leva canali**. Per ogni immissione non valida viene emesso un tono.

## Esecuzione di chiamate di gruppo, private, telefoniche o generali attraverso la ricerca per alias

Seguire la procedura per effettuare le chiamate utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Contatti`.  
Premere  per effettuare la selezione.  
Il display mostra le voci in ordine alfabetico.

---

- 3 Premere  o  fino a visualizzare l'ID o l'alias dell'utente desiderato. Sulla prima riga del display, viene visualizzato `Numero tel.:`. Sulla seconda riga, viene visualizzato un cursore

lampeggiante. Utilizzare la tastiera per immettere un numero telefonico.

- 4 Premere  per effettuare la selezione. Se la voce selezionata è vuota, viene emesso un tono indicatore negativo e sul display viene visualizzato `Chiamata telefonica non valida #`.

---

- 5 Premere  o  per effettuare una chiamata telefonica e Premere  per effettuare la selezione. Se il codice di accesso non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato `Codice accesso:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di accesso e premere il pulsante  per continuare. In caso di esito positivo, viene emesso il tono DTMF. Si sente quindi il tono di composizione dell'utente del telefono. Sulla prima riga del display vengono visualizzati l'alias o l'ID dell'utente e l'icona RSSI. Sulla seconda riga compaiono `Chiamata tel.` e l'icona della chiamata telefonica. In caso di esito negativo, viene emesso un tono e sul display viene visualizzata l'opzione `Chiam tel fallita`. La radio

ritorna alla schermata di immissione del codice di accesso. Se il codice di accesso è stato preconfigurato nella lista Contatti, la radio ritorna alla schermata visualizzata prima dell'inizio della chiamata.

---

6 Premere il pulsante **PTT** per parlare e rilasciarlo per ascoltare. L'icona RSSI non viene visualizzata durante la trasmissione.

---

7 Per immettere altri numeri, se richiesto dalla chiamata, effettuare una delle seguenti operazioni:

- Premere qualsiasi tasto della tastiera per immettere gli altri numeri. Sulla prima riga del display, viene visualizzata l'opzione `Cifre supp. :`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere le cifre

aggiuntive e premere il pulsante  per continuare. Viene emesso il tono DTMF e la radio ritorna alla schermata precedente.

- Premere il pulsante **Accesso rapido**. Viene emesso il tono DTMF. Se la voce per il pulsante di **Accesso rapido** è vuota, la radio emette un tono indicatore negativo.
- 

8 Premere  per terminare la chiamata. Se il codice di disconnessione non è stato preconfigurato nella lista Contatti, sulla prima riga del display viene visualizzato `Codice disconness.:`. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere il codice di disconnessione e premere  per continuare. La radio ritorna alla schermata precedente. Viene emesso il tono DTMF e sul display viene visualizzata l'opzione `Fine chiam. tel.` In caso di esito positivo viene emesso un tono e sul display viene visualizzata l'opzione `Chiam. tel. finita`. La radio ritorna alla schermata della chiamata telefonica. In caso di esito negativo, la radio ritorna alla schermata della chiamata telefonica. Se si preme il pulsante **PTT** nella schermata Contatti del telefono, viene emesso un tono e sul display viene visualizzata l'opzione `OK per inviare chiam.` Quando l'utente del telefono termina la chiamata, viene emesso un tono e sul display viene visualizzata l'opzione `Chiam. tel. finita`. Se la chiamata termina mentre si stanno digitando le cifre aggiuntive richieste, la radio ritorna alla schermata disponibile prima dell'inizio della chiamata.

---

**NOTA:**

Durante l'accesso al canale, premere  per annullare il tentativo di chiamata (viene emesso un tono) o per uscire dalla ricerca dell'alias. Premere

 o  per uscire dalla ricerca per alias.

Durante la chiamata, se si preme il pulsante **Accesso rapido** con il codice di disconnessione preconfigurato o si immette il codice di disconnessione come input per le cifre aggiuntive, la radio tenta di terminare la chiamata. Durante l'accesso al canale e la trasmissione dei numeri aggiuntivi o del codice di accesso/disconnessione, la radio risponde solamente al pulsante di accensione/spegnimento, alla manopola del volume e alla leva canali. Per ogni immissione non valida viene emesso un tono.

## Segnalazione multifrequenza DTMF (Dual Tone Multi Frequency)

La segnalazione multifrequenza DTMF consente alla radio di operare in un sistema radio che si interfaccia con i sistemi telefonici.

È possibile disabilitare il tono DTMF disattivando tutti i toni e gli avvisi della radio. Per ulteriori informazioni, vedere [Attivazione o disattivazione di avvisi e toni della radio a pagina 213](#).

## Avvio di chiamate DTMF

Seguire la procedura per avviare chiamate DTMF sulla radio.

- 1 Premere e tenere premuto il pulsante **PTT**.

---

- 2 Eseguire una delle seguenti operazioni:
  - Immettere il numero desiderato per avviare una chiamata DTMF.
  - Premere  per avviare una chiamata DTMF.
  - Premere  per avviare una chiamata DTMF.

## Risposta alle chiamate telefoniche come chiamate di gruppo

Seguire la procedura per rispondere alle chiamate telefoniche come chiamate di gruppo sulla radio.

Quando si riceve una chiamata telefonica come chiamata di gruppo:

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**.
- Sul display vengono visualizzati l'alias del gruppo e Chiamata telefonica.

Se non è attiva la funzionalità di chiamata telefonica sulla radio, sulla prima riga del display viene visualizzata l'opzione Non disponibile e l'audio della chiamata viene disattivato. Al termine della chiamata la radio ritorna alla schermata precedente.

**1** Premere il pulsante **PTT** per rispondere alla chiamata. Rilasciare il pulsante **PTT** per ascoltare.

**2** Premere  per terminare la chiamata.

Sul display viene visualizzato Fine chiam. tel.  
Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato Chiam. term.

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere questo passaggio o

attendere che l'utente del telefono termini la chiamata.

---

## Risposta alle chiamate telefoniche come chiamate generali

Quando si riceve una chiamata telefonica come chiamata generale, è possibile rispondere alla chiamata o terminarla, solo se al canale è stato assegnato il tipo Chiamata generale. Seguire la procedura per rispondere alle chiamate telefoniche come chiamate generali sulla radio.

Quando si riceve una chiamata telefonica come chiamata generale:

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**.
- Sul display vengono visualizzati Chiam. gen. e Chiamata telefonica.

Se non è attiva la funzionalità di chiamata telefonica sulla radio, sulla prima riga del display viene visualizzata l'opzione Non disponibile e l'audio della chiamata viene disattivato.

Al termine della chiamata la radio ritorna alla schermata precedente.

1 Premere il pulsante **PTT** per rispondere alla chiamata.

---

2 Rilasciare il pulsante **PTT** per ascoltare.

---

3 Premere  per terminare la chiamata.

Sul display viene visualizzato *Fine chiam. tel.*  
Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display vengono visualizzati *Chiam. gen. e Chiamata terminata.*

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere il [passaggio 3](#) o attendere che l'utente del telefono termini la chiamata.

---

## Risposta alle chiamate telefoniche come chiamate private

Seguire la procedura per rispondere alle chiamate telefoniche come chiamate private sulla radio.

Quando si riceve una chiamata telefonica come chiamata privata:

- Nell'angolo superiore destro del display viene visualizzata l'icona **Chiamata telefonica**.
- Sul display viene visualizzato l'alias del chiamante o *Chiamata telefonica*.

Se non è attiva la funzionalità di chiamata telefonica sulla radio, sulla prima riga del display viene visualizzata l'opzione *Non disponibile* e l'audio della chiamata viene disattivato. Al termine della chiamata la radio ritorna alla schermata precedente.

1 Premere il pulsante **PTT** per rispondere alla chiamata. Rilasciare il pulsante **PTT** per ascoltare.

---

2 Premere  per terminare la chiamata.

Sul display viene visualizzato *Fine chiam. tel.*  
Se la chiamata viene terminata correttamente:

- Viene emesso un tono.
- Sul display viene visualizzato `Chiam. term.`

Se la conclusione della chiamata non viene completata, la radio ritorna alla schermata della chiamata telefonica. Ripetere questo passaggio o attendere che l'utente del telefono termini la chiamata.

---

## Interruzione delle chiamate radio

Questa funzione consente di interrompere una chiamata privata o di gruppo in corso per liberare il canale e abilitare le trasmissioni. È utile se, ad esempio, si verifica un problema con il microfono dopo la pressione accidentale del pulsante **PTT**. È necessario programmare la radio per consentire l'utilizzo di questa funzione. Seguire la procedura per interrompere le chiamate sulla radio.

- 1 Premere il pulsante programmato **Disatt. remota trasmissioni**.

Sul display viene visualizzato `Disatt. remota`.

- 2 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzato `Disatt. rem. riuscita`.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato `Disatt. rem. non riuscita`.

### NOTA:

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Comunicazione diretta

Questa funzione consente di continuare la comunicazione quando il ripetitore non è in funzione oppure quando la radio si trova al di fuori della portata del ripetitore ma entro quella di altre radio.

L'impostazione di comunicazione diretta viene mantenuta anche dopo lo spegnimento della radio.

**NOTA:**

Si tratta di una funzionalità non disponibile in Capacity Plus - Sito singolo, Capacity Plus - Multisito e per i canali della banda cittadina che si trovano nella stessa frequenza.

## Passaggio tra le modalità ripetitore e comunicazione diretta

Seguire la procedura per passare tra le modalità ripetitore e comunicazione diretta sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Ripetitore/Comunicazione diretta**. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **Comun. diretta**. Premere  per effettuare la selezione.

Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.

Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

Il display torna automaticamente alla schermata precedente.

## Funzioni avanzate

Questo capitolo descrive le funzioni disponibili nella radio.

È possibile che il rivenditore o l'amministratore del sistema abbia personalizzato la radio in base alle esigenze specifiche dell'utente. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Promemoria canale principale

Questa funzione fornisce un promemoria quando la radio non è impostata sul canale principale per un certo periodo di tempo.

Se questa funzione è attivata tramite CPS, quando la radio non è impostata sul canale principale per un certo periodo di tempo, si verifica periodicamente quanto segue:

- Si sentono l'annuncio e il tono del promemoria del canale principale.
- Sulla prima riga del display viene visualizzato `Canale`
- Sulla seconda riga viene visualizzato `non principale`.

È possibile rispondere al promemoria eseguendo una delle operazioni descritte di seguito:

- Tornare al canale principale.
- Disattivare temporaneamente l'audio del promemoria utilizzando il pulsante programmabile.
- Impostare un nuovo canale principale utilizzando il pulsante programmabile.

## Disattivazione dell'audio del promemoria del canale principale

Quando si riceve il promemoria del canale principale, è possibile disattivare temporaneamente l'audio del promemoria.

Premere il tasto programmabile **Silenza promemoria canale principale**.

Sulla prima riga del display viene visualizzato `HCR` mentre sulla seconda riga viene visualizzato `disattivato`.

## Impostazione di nuovi canale principali

Quando si riceve il promemoria del canale principale, è possibile impostare un nuovo canale principale.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmabile **Reimposta canale principale** per impostare il canale corrente come nuovo canale principale. Saltare i passaggi seguenti.

Sulla prima riga del display viene visualizzato l'alias del canale e Nuovo canale principale.

- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

4 Premere  o  fino all'opzione Canale princ.. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare l'alias del nuovo canale principale desiderato. Premere  per effettuare la selezione.  
Sul display viene visualizzato ✓ accanto all'alias del canale principale selezionato.

## Controllo radio

Questa funzione consente di determinare se un'altra radio è attiva in un sistema senza disturbare l'utente della radio. La radio di destinazione non emette segnali acustici né notifiche. Questa funzione è disponibile solo per gli ID o gli alias dell'utente. È necessario programmare la radio per consentire l'utilizzo di questa funzione.

## Invio di controlli radio

Seguire la procedura per l'invio di controlli radio sulla radio.

1 Premere il pulsante programmato **Controllo radio**.

2 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.

Attendere la conferma.

Se si preme  mentre la radio è in attesa di conferma, viene emesso un tono e la radio interrompe i tentativi ed esce dalla modalità Controllo radio.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

La radio ritorna alla schermata dell'alias o dell'ID dell'utente.

## Invio di controlli radio utilizzando la composizione manuale

Seguire la procedura per inviare controlli radio sulla radio utilizzando la composizione manuale.

- 1 Premere  per accedere al menu.
- 

- 2 Premere  o  fino a visualizzare **Contatti**.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare **Comp. man.**. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare **Numero radio**. Premere  per effettuare la selezione.
- 

- 5 Eseguire una delle seguenti operazioni:
    - Inserire l'ID o l'alias dell'utente, quindi premere  per continuare.
    - Modificare l'ID composto in precedenza, quindi premere  per continuare.
-

6 Premere  o  fino a visualizzare

Controllo radio. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.

7 Attendere la conferma.

Se si preme  mentre la radio è in attesa di conferma, viene emesso un tono e la radio interrompe i tentativi ed esce dalla modalità Controllo radio.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

La radio ritorna alla schermata dell'alias o dell'ID dell'utente.

## Monitoraggio remoto

Questa funzione viene utilizzata per attivare il microfono di una radio di destinazione con alias o ID dell'utente. Questa funzione è utile per controllare a distanza la presenza di attività nelle vicinanze della radio monitorata.

Esistono due tipi di Monitor remoto:

- Monitor remoto senza autenticazione
- Monitor remoto con autenticazione.

Il Monitor remoto autenticato è una funzione acquistabile. In Monitor remoto autenticato, quando la radio attiva il microfono di una radio di destinazione, è necessaria la verifica.

Quando la radio avvia questa funzione su una radio di destinazione con Autenticazione utente, è richiesta una passphrase. La passphrase viene preprogrammata nella radio di destinazione mediante CPS.

È necessario programmare sia la radio in uso sia la radio di destinazione per consentire l'utilizzo di questa funzione.

Questa funzione si arresta dopo un periodo di tempo programmato o se l'utente della radio di destinazione esegue un'azione qualsiasi.

## Avvio del monitoraggio remoto

Seguire la procedura per avviare il monitor remoto sulla radio.

### 1 Premere il pulsante programmato **Monitor remoto**.

---

### 2 Premere o fino a visualizzare l'alias o l'ID desiderato.

---

### 3 Premere per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
  - Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.
- 

### 4 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.
- L'audio della radio monitorata viene riprodotto per la durata programmata; sul display viene visualizzato **Monitor remoto**. Allo scadere del timer, viene emesso un tono di avviso e il LED verde si spegne.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
-

## Avvio del monitor remoto dalla lista Contatti

Seguire la procedura per avviare il monitor remoto sulla radio dalla lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Monitor rem..

---

- 5 Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

### 6 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.
- L'audio della radio monitorata viene riprodotto per la durata programmata; sul display viene visualizzato Monitor rem.. Allo scadere del

timer, viene emesso un tono di avviso e il LED verde si spegne.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Avvio di Monitor remoto utilizzando la composizione manuale 📞

Seguire la procedura per avviare il monitor remoto sulla radio utilizzando la composizione manuale.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare Comp. man. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Numero radio. Premere  per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:
  - Inserire l'ID o l'alias dell'utente, quindi premere  per continuare.
  - Modificare l'ID composto in precedenza, quindi premere  per continuare.

- 6 Premere  o  fino a visualizzare Monitor rem. .

- 7 Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:
  - Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
  - Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

## 8 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.
- L'audio della radio monitorata viene riprodotto per la durata programmata; sul display viene visualizzato `Monitor rem.`. Allo scadere del timer, viene emesso un tono di avviso e il LED verde si spegne.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.

- Sul display viene visualizzata una mini notifica negativa.

## Liste di scansione

Le liste di scansione vengono create e assegnate a singoli canali o gruppi. La radio esegue la scansione per rilevare la presenza di traffico voce controllando sequenzialmente il canale/gruppo specificato nella lista scansione per il canale/gruppo corrente.

La radio può supportare fino a 250 liste di scansione, con un massimo di 16 membri per lista.

È possibile immettere nella lista scansione un insieme di voci analogiche e digitali.

È possibile modificare la lista scansione per aggiungere, eliminare o assegnare la priorità ai canali.

È possibile aggiungere una nuova lista scansione alla radio utilizzando l'Impostazione funzioni da pannello frontale.

Vedere [Configurazione funzioni da pannello frontale a pagina 206](#) per ulteriori informazioni.

Se impostata, l'icona **Priorità** viene visualizzata alla sinistra dell'alias del membro, per segnalare se è stato assegnato a una lista di canali di priorità 1 o 2. Una lista scansione può

contenere solo un canale di priorità 1 o 2. Se la priorità è impostata su **Nessuna**, l'icona **Priorità** non viene visualizzata.

**NOTA:**

Questa funzione non è disponibile in Capacity Plus.

## Visualizzazione delle voci nella lista di scansione

Seguire la procedura per visualizzare le voci presenti nella lista di scansione sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Scansione. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Lista scansione. Premere  per effettuare la selezione.

- 4 Premere  o  per visualizzare ciascun membro della lista.

## Visualizzazione delle voci nella lista di scansione utilizzando la ricerca per alias

Seguire la procedura per visualizzare le voci nella lista di scansione sulla radio utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Scansione. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Lista scansione. Premere  per effettuare la selezione.

- 4 Digitare il primo carattere dell'alias desiderato.

Sul display viene visualizzato un cursore lampeggiante.

---

- 5 Inserire il resto dei caratteri dell'alias desiderato.

la ricerca dell'alias non fa distinzione tra maiuscole e minuscole. Se due o più voci hanno lo stesso nome, il display visualizza la voce elencata per prima nella lista.

La prima riga di testo visualizza i caratteri immessi. Le righe di testo successive mostrano i risultati della ricerca abbreviati.

---

## Aggiunta di nuove voci alla lista di scansione

Seguire la procedura per aggiungere nuove voci alla lista di scansione sulla radio.

- 1 Premere  per accedere al menu.
- 

- 2 Premere  o  fino a visualizzare

Scansione. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Lista

scansione. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Aggiungi

mem.. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare l'alias o

l'ID desiderato. Premere  per effettuare la selezione.

---

- 6 Premere  o  fino a visualizzare il livello di priorità desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica positiva seguita da *Agg. altri?*.

- 7 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare *Sì* per aggiungere un'altra voce. Premere  per effettuare la selezione. Ripetere il [passaggio 5](#) e il [passaggio 6](#).
- Premere  o  fino a visualizzare *No* per salvare la lista corrente. Premere  per effettuare la selezione.

## Aggiunta di nuove voci alla lista di scansione utilizzando la ricerca dell'alias

Seguire la procedura per aggiungere nuove voci alla lista di scansione sulla radio utilizzando la ricerca per alias.

- 1 Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare *Scansione*. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare *Lista scansione*. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare *Aggiungi mem.*. Premere  per effettuare la selezione.

**5** Digitare il primo carattere dell'alias desiderato.

Sul display viene visualizzato un cursore lampeggiante.

---

**6** Inserire il resto dei caratteri dell'alias desiderato.

la ricerca dell'alias non fa distinzione tra maiuscole e minuscole. Se due o più voci hanno lo stesso nome, il display visualizza la voce elencata per prima nella lista.

La prima riga di testo visualizza i caratteri immessi. Le righe di testo successive mostrano i risultati della ricerca abbreviati.

---

**7** Premere  per effettuare la selezione.**8** Premere  o  fino a visualizzare il livello di priorità desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica positiva seguita da `Agg. altri?`.

---

**9** Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare `Si` per aggiungere un'altra voce. Premere  per effettuare la selezione. Ripetere dal passaggio [passaggio 5](#) al passaggio [passaggio 8](#).
  - Premere  o  fino a visualizzare `No` per salvare la lista corrente. Premere  per effettuare la selezione.
- 

## Eliminazione di voci dalla lista di scansione

Seguire la procedura per eliminare le voci dalla lista di scansione.

**1** Premere  per accedere al menu.**2** Premere  o  fino a visualizzare Scansione. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare `Lista scansione`. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare `Elimina`. Premere  per effettuare la selezione. Sul display viene visualizzato `Eliminare la voce?`.

6 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare `Sì` per eliminare la voce. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica positiva.

- Premere  o  fino a visualizzare `No` per tornare alla schermata precedente. Premere  per effettuare la selezione.

7 Ripetere i passaggi da [passaggio 4](#) e [passaggio 6](#) per eliminare altri elementi.

8 Premere a lungo  per tornare alla schermata principale dopo aver eliminato tutti gli alias o gli ID desiderati.

## Impostazione della priorità per le voci nella lista di scansione

Seguire la procedura per impostare le priorità per le voci nella lista di scansione sulla radio.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare `Scansione`. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Lista scansione**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Mod. priorità**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare il livello di priorità desiderato. Premere  per effettuare la selezione.

Prima di tornare alla schermata precedente sul display viene visualizzata una mini notifica positiva. L'icona **Priorità** viene visualizzata a sinistra dell'alias del membro.

---

## Scansione

All'avvio di una scansione, la radio esamina la lista scansione programmata per il canale in uso alla ricerca di attività vocale.

### NOTA:

Questa funzione non è disponibile in Capacity Plus.

Se, durante la scansione dual mode, la radio è sintonizzata su un canale digitale e si sintonizza su un canale analogico, passa automaticamente dalla modalità digitale a quella analogica per la durata della chiamata. Lo stesso avviene nel caso opposto.

La scansione può essere avviata in due modi:

### Scansione canale principale (manuale)

La radio esegue la scansione di tutti i canali o i gruppi nella lista scansione. Quando entra nella modalità di scansione, la radio, a seconda dell'impostazione, inizia automaticamente la scansione dall'ultimo canale o gruppo "attivo" controllato oppure dal canale dal quale era originariamente iniziata.

### Scansione automatica

La radio avvia automaticamente la scansione quando si seleziona un canale o un gruppo per il quale è stata abilitata la funzione Scansione automatica.

**NOTA:**

Quando si configura **Ricevi gruppi di messaggi nella scansione**, la radio è in grado di ricevere messaggi di gruppo dai canali non principali. La radio è in grado di rispondere ai messaggi di gruppo sul canale principale ma non è in grado di rispondere sui canali non principali. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione o disattivazione della scansione

Seguire la procedura per attivare o disattivare la scansione sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Scansione. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Stato scan. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare lo stato di scansione desiderato, quindi premere  per selezionarlo.

---

Se la scansione è attivata:

- Sul display vengono visualizzati Scan. attivata e l'icona **Scansione**.
- Il LED giallo lampeggia.

Se la scansione è disattivata:

- Sul display viene visualizzato Scansione disattivata
- L'icona **Scansione** scompare.
- Il LED si spegne.

## Risposta alle trasmissioni durante la scansione

Durante la scansione, la radio si sintonizza sul canale o sul gruppo nel quale ha rilevato la presenza di attività. La radio

rimane sul canale per un periodo di tempo programmato noto come tempo di permanenza. Seguire la procedura per rispondere alle trasmissioni durante la scansione.

- 1  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** durante il tempo di permanenza.

Il LED verde si accende.

- 2 Rilasciare il pulsante **PTT** per ascoltare.

La radio riprende la scansione di altri canali o gruppi se non si risponde entro il tempo di permanenza.

## Eliminazione dei canali di disturbo

È possibile rimuovere temporaneamente dalla lista di scansione un canale indesiderato se genera in continuazione chiamate o disturbi non graditi (canale di "disturbo"). Non è però possibile eliminare il canale designato come canale selezionato. Seguire la procedura per eliminare i canali di disturbo sulla radio.

- 1 Quando la radio si blocca su un canale indesiderato o di disturbo, premere il pulsante programmato **Elimin. disturbo** fino all'emissione di un tono.

- 2 Rilasciare il pulsante programmato **Elimin. disturbo**.

Il canale di disturbo viene eliminato.

## Ripristino dei canali di disturbo

Seguire la procedura per ripristinare i canali di disturbo sulla radio.

Eeguire una delle seguenti operazioni:

- Spegner e riaccendere la radio.
- Arrestare e riavviare una scansione utilizzando il menu o il pulsante programmato **Scansione**.
- Cambiare canale utilizzando il pulsante **Canale su/Canale giù**.

## Scansione selettiva

La scansione selettiva consente di ottenere una copertura più estesa nelle aree in cui sono operative più stazioni base che trasmettono le stesse informazioni su canali analogici diversi.

La radio esegue la scansione dei canali analogici delle diverse stazioni base ed effettua un processo di voting per selezionare il segnale più forte. Una volta rilevato il segnale, la radio riceve le trasmissioni da quella stazione base.

Durante la scansione selettiva, il LED giallo lampeggia e sul display viene visualizzata l'icona **Scansione selettiva**.

Seguire le stesse procedure di [Risposta alle trasmissioni durante la scansione a pagina 424](#) per rispondere a una trasmissione durante la scansione selettiva.

## Impostazioni dei contatti

I contatti compongono la rubrica della radio. Ogni voce corrisponde a un alias o un ID da utilizzare per inviare una chiamata. Le voci sono elencate in ordine alfabetico.

A seconda del contesto, ogni voce è associata con i diversi tipi di chiamata: chiamata di gruppo, chiamata privata, chiamata generale, chiamata PC o chiamata dispatch.

Le chiamate PC e dispatch sono chiamate dati, disponibili solo con le rispettive applicazioni. Per informazioni più particolareggiate, consultare la documentazione che accompagna le applicazioni dati.

 Inoltre, il menu Contatti consente di assegnare ciascuna voce a uno o più tasti numerici programmabili del microfono della tastiera. Se una voce è assegnata a un tasto numerico, la radio può comporre automaticamente il numero associato alla voce.

### NOTA:

Ogni tasto numerico già assegnato a una voce è preceduto da un segno di spunta. Se il segno di spunta è visualizzato prima di **Quota**, non è stato assegnato alla voce alcun tasto numerico.

Ogni voce della lista Contatti riporta le seguenti informazioni:

- Tipo di chiamata
- Alias chiamata
- ID della chiamata

**NOTA:**

Se la funzione Privacy è attivata su un canale, è possibile effettuare chiamate di gruppo, private e generali con Privacy attivata su quel canale. Solo le radio di destinazione che hanno la stessa chiave di privacy o lo stesso valore della chiave e ID della chiave possono decodificare la trasmissione.

## Effettuazione di chiamate di gruppo dalla lista Contatti

Seguire la procedura per effettuare chiamate di gruppo sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

- 4 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende.

- 5 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde lampeggia quando un utente del gruppo risponde. Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'alias o l'ID e l'alias o l'ID della radio trasmittente.

- 6  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata. La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito.

## Effettuazione di chiamate private dalla lista Contatti

Seguire la procedura per effettuare chiamate private sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere il pulsante **PTT** per effettuare la chiamata. Il LED verde si accende. Sul display, viene visualizzato l'alias di destinazione.

---

- 5 Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.

---

- 6 Rilasciare il pulsante **PTT** per ascoltare. Il LED verde lampeggia quando la radio di destinazione risponde. Sul display viene visualizzato l'ID o l'alias dell'utente che effettua la trasmissione.

---

- 7  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

La chiamata termina quando non si verifica alcuna attività vocale per un periodo prestabilito. Viene emesso un tono. Sul display viene visualizzato Chiam. term.

## Assegnazione di voci ai tasti numerici programmabili

Seguire la procedura per assegnare voci ai tasti numerici programmabili sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Tasto program.** Premere  per effettuare la selezione.

---

5 Eseguire una delle seguenti operazioni:

- Se il tasto numerico desiderato non è stato associato a una voce, premere  o  fino a visualizzare il tasto numerico desiderato. Premere  per effettuare la selezione.
- Se il tasto numerico desiderato è stato assegnato a una voce, sul display viene visualizzato **Tasto già assegnato** e sulla prima riga di testo viene visualizzato **Sovrascrivere?**. Eseguire una delle seguenti operazioni:  
Premere  o  fino a visualizzare **Sì**.  
Premere  per effettuare la selezione.

La radio emette un tono indicatore positivo e sul display vengono visualizzati **Contatto salvato** e una mini notifica positiva.

Premere  o  fino a visualizzare **No** per tornare al passaggio precedente.

È possibile assegnare ogni voce a un tasto numerico diverso. Ogni tasto numerico già assegnato a una voce è preceduto da . Se  viene visualizzato prima di **Vuoto**, non è stato assegnato alla voce alcun tasto numerico.

Se un tasto numerico è assegnato a una voce in una modalità specifica, questa funzione non è supportata quando si preme a lungo il tasto numerico in un'altra modalità.

Il display torna automaticamente al menu precedente.

---

## Rimozione delle associazioni tra voci e tasti numerici programmabili

Seguire la procedura per rimuovere le associazioni tra le voci e i tasti numerici programmabili sulla radio.

- 1 Eseguire una delle seguenti operazioni:
- Premere a lungo il tasto numerico programmato fino a visualizzare l'alias o l'ID desiderato. Continuare con [passaggio 4](#).

- Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Contatti`.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare `Tasto program`. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare `Vuoto`.  
Premere  per effettuare la selezione.  
La prima riga di testo visualizza `Cancella tasti?`.
- 

- 6 Premere  o  fino a visualizzare `Sì`.  
Premere  per effettuare la selezione.

**NOTA:**

Dopo aver cancellato una voce, viene cancellata anche l'associazione tra la voce e il rispettivo tasto numerico programmato.

Viene emesso un tono indicatore positivo. Sul display viene visualizzato il messaggio `Contatto salvato`.

Il display torna automaticamente al menu precedente.

---

## Aggiunta di nuovi contatti

Seguire la procedura per aggiungere nuovi contatti sulla radio.

- 1 Premere  per accedere al menu.
- 

- 2 Premere  o  fino a visualizzare `Contatti`. Premere  per effettuare la selezione.
-

- 3 Premere  o  fino a visualizzare Nuovo cont.. Premere  per effettuare la selezione.

---

- 4 Premere  o  per selezionare il tipo di contatto tra Contatto radio o Contatto tel.. Premere  per effettuare la selezione.

---

- 5 Immettere il numero del contatto con la tastiera, quindi premere  per continuare.

---

- 6 Immettere il nome del contatto con la tastiera, quindi premere  per continuare.

---

- 7 Premere  o  fino a visualizzare il tipo di suoneria desiderato. Premere  per effettuare la selezione.  
Viene emesso un tono indicatore positivo.Sul display viene visualizzata una mini notifica positiva.

---

## Impostazione del contatto predefinito

Seguire la procedura per impostare il contatto predefinito sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti.. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato.Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Imp. predef.. Premere  per effettuare la selezione.  
Viene emesso un tono indicatore positivo.Sul display viene visualizzata una mini notifica positiva. Sul display viene visualizzato  accanto all'alias o all'ID predefinito selezionato.

---

## Impostazioni degli indicatori di chiamata

Questa funzione consente agli utenti della radio di configurare le suonerie per le chiamate o i messaggi di testo.

### Attivazione o disattivazione della suoneria per l'avviso di chiamata

Seguire la procedura per attivare o disattivare le suonerie per gli avvisi di chiamata sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare *Toni/avvisi*. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare *Suonerie*. Premere  per effettuare la selezione.

- 6 Premere  o  fino a visualizzare *Avviso di chiamata*. Premere  per effettuare la selezione.

- 7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto al tono selezionato.

### Attivazione o disattivazione della suoneria per le chiamate private

Seguire la procedura per attivare o disattivare la suoneria per le chiamate private sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Toni/avvisi. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Suonerie. Premere  per effettuare la selezione.

---

- 6 Premere  o  fino a visualizzare Chiam. privata. Premere  per effettuare la selezione.  
Sul display viene visualizzato ✓ accanto a On, se i toni delle suonerie delle chiamate private sono attivati.

Sul display viene visualizzato ✓ accanto a Off, se i toni delle suonerie delle chiamate private sono disattivati.

- 7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione.  
Se questa opzione è attivata, ✓ viene visualizzato accanto a Abilitato. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a Abilitato.

## Attivazione o disattivazione della suoneria per le chiamate selettive

Seguire la procedura per attivare o disattivare la suoneria per le chiamate selettive sulla radio.

- 1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare  
Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Impost.  
radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Toni/  
avvisi. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare Suonerie.  
Premere  per effettuare la selezione.

6 Premere  o  fino a visualizzare Chiamata  
sel. Premere  per effettuare la selezione.  
Sul display vengono visualizzati  e il tono corrente.

7 Premere  o  fino a visualizzare il tono  
desiderato. Premere  per effettuare la

selezione. Sul display viene visualizzato  accanto  
al tono selezionato.

## Attivazione o disattivazione della suoneria per i messaggi di testo

Seguire la procedura per attivare o disattivare la suoneria  
per i messaggi di testo sulla radio.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Impost.  
radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Toni/  
avvisi. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare **Suonerie**.

Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare **Msg** testo. Premere  per effettuare la selezione.

Sul display vengono visualizzati  e il tono corrente.

---

7 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzato  accanto al nuovo tono selezionato.

---

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**.

Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost.**

radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Toni/**

avvisi. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Suonerie**.

Premere  per effettuare la selezione.

---

## Attivazione e disattivazione della suoneria per un messaggio telemetrico di stato con testo

Seguire la procedura per attivare o disattivare le suonerie per i messaggi telemetrici di stato con testo sulla radio.

- 6 Premere  o  fino a visualizzare **Telemetria**. Premere  per effettuare la selezione.
- Il tono attualmente selezionato è contrassegnato da .
- 

## Assegnazione di suonerie

È possibile programmare la radio in modo che emetta uno dei dieci toni di suonerie predefiniti alla ricezione di un avviso di chiamata o messaggio di testo da un determinato contatto. La radio emette i vari tipi di suonerie durante lo scorrimento della lista. Seguire la procedura per assegnare le suonerie alla radio.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare **Contatti**. Premere  per effettuare la selezione.
- Le voci sono elencate in ordine alfabetico.
- 

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare **Modifica**. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare **Modifica suoneria**. Premere  per effettuare la selezione.
- 

- 6 Premere  o  fino a visualizzare il tono desiderato. Premere  per effettuare la selezione.
- Accanto al tono selezionato viene visualizzato .
-

## Volume del tono per gli allarmi progressivi

La radio può essere programmata in modo da emettere un avviso costante circa l'arrivo di una chiamata radio a cui non ha dato risposta. Questo avviso consiste in un tono il cui volume aumenta automaticamente nel tempo. Questa funzione è detta segnalazione allarmi progressiva.

## Funzioni del registro chiamate

La radio memorizza i dettagli di tutte le chiamate private recentemente effettuate, ricevute o perse. Questo registro chiamate consente di visualizzare e gestire le chiamate recenti.

Gli avvisi di chiamata persa possono essere inclusi nei registri chiamate, a seconda della configurazione del sistema sulla radio. In ciascuna lista delle chiamate è possibile svolgere le seguenti attività:

- Memorizzare gli alias o gli ID nella lista Contatti
- Eliminare la chiamata
- Eliminare tutte le chiamate
- Visualizzare i dettagli

[Invia feedback](#)

## Visualizzazione delle chiamate recenti

Seguire la procedura per visualizzare le chiamate recenti sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare la lista dei preferiti. Le opzioni disponibili sono le liste Perse, Risposte e Effettuate.  
  
Premere  per effettuare la selezione.  
  
Sul display viene visualizzata la chiamata più recente.

---

- 4 Premere  o  fino a visualizzare la lista.  
  
È possibile avviare una chiamata privata con l'alias o l'ID attualmente visualizzato sul display premendo il pulsante **PTT**.

---

## Eliminazione di chiamate dalla lista delle chiamate

Seguire la procedura per eliminare le chiamate dalla lista delle chiamate.

- 1 Premere  per accedere al menu.

---

  - 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

  - 3 Premere  o  fino a visualizzare la lista desiderata. Premere  per effettuare la selezione.  
 Se l'elenco è vuoto:
    - Viene emesso un tono.
    - Sul display viene visualizzato Lista vuota.
- 

- 4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare Eliminare voce?. Premere  per effettuare la selezione.
- 

- 6 Eseguire una delle seguenti operazioni:
    - Premere  per selezionare Sì ed eliminare la voce.  
 Sul display viene visualizzato Entry Deleted (Voce eliminata).
    - Premere  o  fino a visualizzare No.  
 Premere  per effettuare la selezione.  
 La radio ritorna alla schermata precedente.
-

## Visualizzazione dei dettagli della lista chiamata

Seguire la procedura per visualizzare i dettagli delle chiamate sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare la lista desiderata. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Vis. dettagli, Premere  per effettuare la selezione. Sul display vengono visualizzati i dettagli delle chiamate.

## Memorizzazione di alias o ID dalla lista delle chiamate

Seguire la procedura per memorizzare gli alias o gli ID sulla radio dalla lista delle chiamate.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Registro chiamate. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare la lista richiesta. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Memorizza. Premere  per effettuare la selezione.

Sul display viene visualizzato un cursore lampeggiante.

---

6 Inserire il resto dei caratteri dell'alias desiderato.

Premere  per effettuare la selezione.

È possibile memorizzare un ID senza un alias.

Sul display viene visualizzata una mini notifica positiva.

---

## Funzionamento dell'avviso di chiamata

L'invio di un avviso di chiamata consente di avvisare un utente della radio specifico in modo che richiami.

Questa funzione è disponibile solo per gli alias o gli ID degli utenti ed è accessibile dal menu mediante Contatti, composizione manuale o un pulsante programmato

**Accesso rapido.**

## Effettuazione di avvisi di chiamata

Seguire la procedura per effettuare avvisi di chiamata sulla radio.

- 1 Premere il pulsante di **accesso rapido** programmato.

Sul display viene visualizzato Avviso di chiamata e l'alias o l'ID dell'utente. Il LED verde si accende.

---

- 2 Attendere la conferma.

Se si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica positiva.

Se non si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica negativa.

## Effettuazione di avvisi di chiamata dalla lista Contatti

Seguire la procedura per effettuare avvisi di chiamata sulla radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Avviso di chiamata. Premere  per effettuare la selezione.

Sul display viene visualizzato Avviso di chiamata e l'alias o l'ID dell'utente. Il LED verde si accende.

- 5 Attendere la conferma.
  - Se si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica positiva.
  - Se non si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica negativa.

## Effettuazione di avvisi di chiamata utilizzando la composizione manuale

Seguire la procedura per effettuare avvisi di chiamata sulla radio utilizzando la composizione manuale.

- 1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Contatti**.

Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Comp.**

**man.** Premere  per effettuare la selezione.

Sul display viene visualizzato un cursore lampeggiante.

---

4 Immettere l'ID dell'utente e premere  per continuare.

---

5 Premere  o  fino a visualizzare **Avviso di chiamata**. Premere  per effettuare la selezione.

Sul display viene visualizzato **Avviso di chiamata** e l'alias o l'ID dell'utente. Il LED verde si accende.

---

6 Attendere la conferma.

- Se si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica positiva.
  - Se non si riceve una conferma di ricezione dell'avviso di chiamata, sul display viene visualizzata una mini notifica negativa.
- 

## Risposta agli avvisi di chiamata

Seguire la procedura per rispondere agli avvisi di chiamata sulla radio.

Alla ricezione di un avviso di chiamata:

- Viene emesso un tono ripetitivo.
- Il LED giallo lampeggia.
- Sul display viene visualizzata la lista delle notifiche, contenente un avviso di chiamata e l'alias o l'ID della radio chiamante.

A seconda della configurazione effettuata dal rivenditore o dall'amministratore di sistema, è

possibile rispondere a un avviso di chiamata effettuando una delle seguenti operazioni:

- Premere il pulsante **PTT** e rispondere con una chiamata privata direttamente al chiamante.
- Premere il pulsante **PTT** per continuare le normali comunicazioni del talkgroup.  
L'avviso di chiamata passa all'opzione Chiamata persa nel Registro chiamate. È possibile rispondere al chiamante dal registro delle chiamate perse.

---

Per ulteriori informazioni, vedere [Lista delle notifiche a pagina 203](#) e [Funzioni del registro chiamate a pagina 135](#).

## Modalità Disattiva audio

La Modalità Muto fornisce all'utente la possibilità di disattivare tutti gli indicatori audio della radio.

Una volta avviata la funzione Modalità Muto, tutti gli indicatori audio sono vengono disattivati ad eccezione delle funzioni con priorità superiore, ad esempio le operazioni di emergenza.

Quando si esce dalla Modalità Muto, nella radio vengono riattivati i toni e le trasmissioni audio in corso.

### NOTA:

Si tratta di un'opzione acquistabile. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione della Modalità Muto

Seguire la procedura per attivare la Modalità Muto.

Accedere a questa funzione utilizzando il pulsante programmato **Modalità Muto**.

---

Quando la Modalità Muto è attivata, si verifica quanto segue:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzato Modalità Muto on.
- Il LED rosso inizia a lampeggiare finché la Modalità Muto non viene disattivata.
- Sul display viene visualizzata l'icona **Modalità Muto** nella schermata iniziale.
- L'audio della radio viene disattivato.
- Il Timer modalità Muto inizia il conto alla rovescia della durata configurata.

## Impostazione del Timer modalità Muto

È possibile attivare la Modalità Muto per un periodo prestabilito di tempo impostando il Timer modalità Muto. La durata del timer viene configurata nel menu della radio e va da 0,5 a 6 ore. La Modalità Muto viene disattivata quando il timer scade.

Se il timer viene lasciato sul valore 0, la radio resta in Modalità Muto per un periodo di tempo indefinito finché il pulsante **Modalità Muto** non viene premuto.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Timer modalità Muto. Premere  per effettuare la selezione.

---

- 5 Premere  o  per modificare il valore numerico di ciascuna cifra, quindi premere .
- 

## Uscita dalla Modalità Muto

È possibile uscire automaticamente da questa funzione quando scade il Timer modalità Muto.

Per uscire manualmente dalla Modalità Muto, completare una delle seguenti operazioni:

- Premere il pulsante **Modalità Muto** programmato.
  - Premere il pulsante **PTT** su qualsiasi voce.
- 

Quando la Modalità Muto è disattivata, si verifica quanto segue:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato Modalità Muto off.
- Il LED rosso lampeggiante si spegne.
- L'icona **Modalità Muto** scompare dalla schermata iniziale.

- Sulla radio viene riattivato l'audio e ripristinato lo stato dell'altoparlante.
- Se il timer non è scaduto, il Timer modalità Muto viene arrestato.

**NOTA:**

È anche possibile uscire dalla Modalità Muto se l'utente trasmette la voce o passa a un canale non programmato.

## Funzionamento in emergenza

L'allarme di emergenza viene utilizzato per indicare una situazione critica. È possibile avviare un'emergenza in qualsiasi momento, anche se è in corso un'attività sul canale corrente.

Il rivenditore può impostare la durata della pressione del pulsante programmato **Emergenza**, che, a differenza della pressione lunga, è simile per tutti gli altri pulsanti:

**Pressione breve**

Durata compresa tra 0,05 e 0,75 secondi.

**Pressione prolungata**

Durata compresa tra 1 e 3,75 secondi.

Il pulsante **Emergenza** viene assegnato tramite la funzione Emerg. att./Emerg. disatt. Per conoscere in che modo è

stato programmato il pulsante **Emergenza**, rivolgersi al rivenditore.

**NOTA:**

Se in seguito a una breve pressione del pulsante **Emergenza** viene attivato il Modo Emergenza, premendo a lungo lo stesso pulsante è possibile disattivare la suddetta modalità sulla radio.

Se in seguito a una lunga pressione del pulsante **Emergenza** viene attivato il Modo Emergenza, premendo brevemente lo stesso pulsante è possibile disattivare la suddetta modalità sulla radio.

La radio supporta tre tipi di allarmi di emergenza:

- Allarme di emergenza
- Allarme di emergenza con chiamata
- Allarme di emergenza con successiva trasmissione voce 

**NOTA:**

Al pedale di **emergenza** e al pulsante programmato di emergenza è possibile assegnare soltanto uno degli allarmi sopraindicati.

Inoltre, ogni allarme dispone delle seguenti opzioni:

**Regular**

La radio trasmette un segnale di allarme e mostra indicatori visivi e/o acustici.

**Silent**

La radio trasmette un segnale di allarme ma non mostra alcun indicatore visivo e/o acustico. La radio riceve le chiamate senza emettere alcun suono dagli altoparlanti, fino a quando il periodo di trasmissione del *microfono acceso* programmato non è terminato e/o non si preme il pulsante **PTT**.

**Silenzioso c/ voce**

La radio trasmette un segnale di allarme senza mostrare alcun indicatore visivo o acustico, ma viene emesso un tono attraverso gli altoparlanti in caso di chiamate in arrivo.

**Ricezione di allarmi di emergenza**

Seguire la procedura per ricevere gli allarmi di emergenza sulla radio.

Quando si riceve un allarme di emergenza:

- Viene emesso un tono.
- Il LED rosso lampeggia.

- Sul display vengono visualizzati l'icona **Emergenza** e l'alias del chiamante di emergenza o, se ci sono più allarmi, vengono visualizzati tutti gli alias del chiamante di emergenza in una lista allarmi.

1 Eseguire una delle seguenti operazioni:

- In presenza di un solo allarme, premere  per visualizzare ulteriori dettagli.
- In presenza di più allarmi, premere  o  fino a visualizzare l'alias desiderato, quindi premere  per visualizzare ulteriori dettagli.

---

2 Premere  per visualizzare le opzioni disponibili.

---

3 Premere  e selezionare **Sì** per uscire dalla Lista allarmi.

---

4 Premere  per accedere al menu.

---

5 Selezionare **Lista allarmi** per accedere nuovamente alla Lista allarmi.

---

- 6 Viene emesso un tono e il LED lampeggia in rosso fino a quando non si esce dalla modalità di emergenza. Tuttavia, è possibile disattivare il tono. Eseguire una delle seguenti operazioni:
- Premere il pulsante **PTT** per chiamare il gruppo delle radio che hanno ricevuto l'allarme di emergenza.
  - Premere qualsiasi tasto programmabile.
  - Uscire dalla modalità di emergenza. Vedere la [Uscita dalla modalità di emergenza dopo aver ricevuto l'allarme di emergenza a pagina 448](#).

## Risposta agli allarmi di emergenza

Seguire la procedura per rispondere agli allarmi di emergenza sulla radio.

- 1 Assicurarsi che sul display venga visualizzata la Lista allarmi. Premere  o  fino a visualizzare l'alias o l'ID desiderato.
- 2  Se la funzione Indicazione canale libero è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il

pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per trasmettere una chiamata vocale non Emergency Voice allo stesso gruppo a cui era destinato l'allarme di emergenza.

Il LED verde si accende. La radio rimane nel Modo Emergenza.

- 3 Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
-  Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

- 4 Rilasciare il pulsante **PTT** per ascoltare.

Quando la radio che ha avviato l'emergenza risponde:

- Il LED verde lampeggia.

- Sul display vengono visualizzati l'icona **Chiam. gruppo** e l'ID, l'ID della radio trasmittente e la lista degli allarmi.

La chiamata Emergency Voice può essere trasmessa solo dalla radio che ha avviato l'emergenza. Tutte le altre radio, compresa la radio che riceve la chiamata di emergenza, trasmettono una chiamata non Emergency Voice.

## Uscita dalla modalità di emergenza dopo aver ricevuto l'allarme di emergenza

Completare una delle seguenti operazioni per uscire dal Modo Emergenza dopo la ricezione dell'allarme di emergenza:

- Eliminare le voci dell'allarme.
- Spegnerne la radio.

## Invio di allarmi di emergenza

Questa funzione consente di inviare un allarme di emergenza, ossia un segnale non vocale, che attiva un indicatore di avviso in un gruppo di radio. La radio non

visualizza indicatori sonori o visivi in modalità di emergenza quando è impostata su Silenzioso.

Seguire la procedura per inviare allarmi di emergenza sulla radio.

- 1 Premere il pulsante **Emerg. att.** programmato.

Viene visualizzato uno dei seguenti risultati:

- Sul display vengono visualizzati Allarmi TX e l'alias di destinazione.
-  Sul display, vengono visualizzati Telegr. Tx e l'alias di destinazione.

Il LED verde si accende. Viene visualizzata l'icona **Emergenza**.

### NOTA:

Se la funzione è programmata, viene emesso un tono per la ricerca di emergenza. Il tono viene disattivato quando la radio trasmette o riceve chiamate vocali e si interrompe quando la radio esce dalla modalità di emergenza. Il Tono ricerca di emergenza può essere programmato tramite CPS.

## 2 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono di emergenza.
- Il LED rosso lampeggia.
- Sul display viene visualizzato `Allarme inviato`.

Se non si ottengono i risultati desiderati dopo aver esaurito tutti i tentativi disponibili:

- Viene emesso un tono.
- Sul display viene visualizzato `Allarme fallito`.

La radio esce dalla modalità Allarme di emergenza e torna alla schermata principale.

---

## Invio di allarmi di emergenza tramite chiamata

Questa funzione consente di inviare un allarme di emergenza tramite chiamata a un gruppo di radio. Alla ricezione della conferma da parte di una radio del gruppo, il gruppo di radio può comunicare sul canale di emergenza programmato.

[Invia feedback](#)

Seguire la procedura per inviare allarmi di emergenza con chiamata sulla radio.

- 1 Premere il pulsante programmato **Emerg. att.** o il pedale **Emergenza**. Sul display viene visualizzato `Invio allarme`, che si alterna con l'ID della radio.

Viene visualizzato quanto segue:

- Sul display, vengono visualizzati `Telegr. Tx` e l'alias di destinazione.

Il LED verde si accende. Viene visualizzata l'icona **Emergenza**.

### NOTA:

Se la funzione è programmata, viene emesso un tono per la ricerca di emergenza. Il tono viene disattivato quando la radio trasmette o riceve chiamate vocali e si interrompe quando la radio esce dalla modalità di emergenza. Il Tono ricerca di emergenza può essere programmato dal rivenditore o dall'amministratore del sistema.

- 
- 2 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono di emergenza.
- Il LED rosso lampeggia.
- Sul display viene visualizzato **Allarme inviato**.
- La radio entra nella modalità di chiamata di emergenza quando sul display vengono visualizzati **Emergenza** e l'alias del gruppo di destinazione.

---

**3** Premere il pulsante **PTT** per effettuare la chiamata.

Il LED verde si accende. Sul display viene visualizzata l'icona **Chiam. gruppo**.

---

**4** Eseguire una delle seguenti operazioni:

- Attendere il termine del tono che indica il permesso di parlare, quindi parlare chiaramente nel microfono, se abilitato.
-  Attendere la cessazione del sidetone **PTT**, quindi parlare chiaramente nel microfono, se abilitato.

---

**5** Rilasciare il pulsante **PTT** per ascoltare.

Il display mostra il chiamante e gli alias del gruppo.

---

**6**  Se la funzione **Indicazione canale libero** è abilitata, verrà emesso un breve tono di avviso quando l'utente della radio trasmittente rilascia il pulsante **PTT**, per indicare che il canale è libero per rispondere. Premere il pulsante **PTT** per rispondere alla chiamata.

---

**7** Per uscire dal **Modo Emergenza** una volta terminata la chiamata, premere il pulsante **Emergenza disattivata**.

La radio torna alla schermata principale.

---

## Allarmi di emergenza con successiva trasmissione voce

Questa funzione consente di inviare un allarme di emergenza con successiva trasmissione della voce a un gruppo di radio. Il microfono della radio viene attivato automaticamente, consentendo di comunicare con il gruppo di radio senza premere il pulsante **PTT**. Questo

stato di microfono attivato è conosciuto come *microfono acceso*.

**NOTA:**

La radio non è in grado di rilevare un microfono non IMPRES collegato al connettore accessori posteriore.

Se non viene rilevato alcun microfono collegato al connettore programmato specificato, la radio controlla il connettore alternativo. In questo caso, la radio assegna la priorità al microfono rilevato.

Se la modalità Ciclo di emergenza è attivata sulla radio, *microfono acceso* e il periodo di ricezione vengono ripetuti per il tempo programmato. Nella modalità Ciclo di emergenza, le chiamate ricevute vengono emesse attraverso l'altoparlante.

Se si preme il pulsante **PTT** durante il periodo di ricezione programmato, viene emesso il tono di operazione non consentita, che segnala che si deve rilasciare il pulsante **PTT**. La radio ignora la pressione del pulsante **PTT** e resta nel Modo Emergenza.

Se si preme il pulsante **PTT** con il *microfono acceso* e lo si continua a premere anche al termine del periodo previsto per il *microfono acceso*, la radio continua a trasmettere fino a quando non viene rilasciato il pulsante **PTT**.

Se la richiesta di allarme di emergenza ha esito negativo, la radio non riprova a inviarla e attiva direttamente lo stato del *microfono acceso*.

**NOTA:**

Alcuni accessori potrebbero non supportare il *microfono acceso*. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Invio di allarmi di emergenza con successiva trasmissione della voce

Seguire la procedura per inviare allarmi di emergenza con successiva trasmissione della voce sulla radio.

- 1 Premere il pulsante programmato **Emerg. att.** o il pedale **Emergenza**.

Viene visualizzato uno dei seguenti risultati:

- Sul display vengono visualizzati **Allarme TX** e l'alias di destinazione.
- Sul display, vengono visualizzati **Telegr. Tx** e l'alias di destinazione.

Il LED verde si accende. Viene visualizzata l'icona **Emergenza**.

---

- 2 Quando sul display viene visualizzato **Allarme** inviato, parlare chiaramente nel microfono.

La radio interrompe automaticamente la trasmissione:

- Allo scadere della durata della funzione *microfono acceso* e della ricezione delle chiamate, se la modalità Ciclo di emergenza è attivata.
  - Allo scadere della durata della funzione *microfono acceso*, se la modalità Ciclo di emergenza è disattivata.
- 

- 3 Premere il pulsante programmato **Emerg. disatt.** per uscire dal Modo Emergenza.

La radio torna alla schermata principale.

---

## Riavvio della modalità di emergenza

Questa funzione si riferisce solo alla radio che invia l'allarme di emergenza. Seguire la procedura per riavviare la modalità di emergenza della radio.

Eeguire una delle seguenti operazioni:

- Cambiare canale mentre la radio è nella modalità di emergenza. La radio esce dalla modalità di emergenza ed entra nuovamente nella modalità di emergenza, se la funzione Allarme di emergenza è attivata sul nuovo canale.
  - Premere il pulsante programmato **Emerg. att.** durante l'avvio o la trasmissione di un'emergenza. La radio esce dallo stato di emergenza ed entra nuovamente nella modalità di emergenza.
- 

## Uscita dalla modalità di emergenza dopo l'invio dell'allarme di emergenza

Questa funzione si riferisce solo alla radio che invia l'allarme di emergenza.

La radio esce dalla modalità di emergenza quando:

- Si riceve una conferma (solo per la funzione Allarme di emergenza).
- La radio ha effettuato il numero massimo di tentativi di inviare l'allarme.

**NOTA:**

Spegnendo la radio, si esce dalla modalità di emergenza. Dopo averla riaccesa, la radio non entra automaticamente nella modalità di emergenza.

Seguire la procedura per uscire dalla modalità di emergenza sulla radio.

Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Emerg. disatt..**
- Cambiare canale scegliendo un canale per cui non è configurato alcun sistema di emergenza. Sul display viene visualizzato **Ness. emergenza.**

## Eliminazione di un allarme dalla lista degli allarmi

Seguire la procedura per eliminare le voci dell'allarme dalla lista degli allarmi per uscire dalla modalità di emergenza.

[Invia feedback](#)

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Lista allarmi.** Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'allarme desiderato. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Elimina.** Premere  per effettuare la selezione.

## Messaggistica di testo

La radio è in grado di ricevere dati, ad esempio un messaggio di testo, da un'altra radio o da un'applicazione messaggio di testo.

Sono disponibili due tipi di messaggi di testo: messaggi di testo brevi DMR (Digital Mobile Radio) e messaggi di testo. La lunghezza massima di un messaggio di testo breve DMR è di 23 caratteri. La lunghezza massima di un

messaggio di testo è di 280 caratteri (compresa la riga dell'oggetto). La riga dell'oggetto viene visualizzata solo quando si ricevono messaggi da applicazioni e-mail.

#### NOTA:

La lunghezza massima in caratteri è valida solo per i modelli con l'ultima versione del software e dell'hardware. Per i modelli di radio con versioni del software e dell'hardware precedenti, la lunghezza massima di un messaggio di testo è di 140 caratteri. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

per la lingua araba, la direzione dell'immissione del testo è da destra verso sinistra.

## Messaggi di testo

I messaggi di testo sono conservati in una casella di posta e vengono ordinati per data di ricezione a partire da quella più recente.

### Visualizzazione dei messaggi di testo

Seguire la procedura per visualizzare i messaggi di testo sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.  
Se la casella di posta in arrivo è vuota:
  - Sul display viene visualizzato **Lista vuota**.
  - Viene emesso un tono, se il tono della tastiera è attivato.

---

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.  
Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

---

## Visualizzazione dei messaggi di testo con stato di telemetria

Seguire la procedura per visualizzare un messaggio di testo con stato di telemetria dalla Inbox.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

È impossibile rispondere a un messaggio di testo con stato di telemetria.

Sul display viene visualizzato Telemetria:  
<Messaggio di testo con stato>.

- 5 Premere a lungo  per tornare alla schermata principale.

## Risposta ai messaggi di testo

Seguire la procedura per rispondere a un messaggio di testo sulla radio.

Quando si riceve un messaggio di testo:

- Sul display viene visualizzata la lista delle notifiche, con l'alias o l'ID del mittente.
- Sul display viene visualizzata l'icona **Messaggio**.

### NOTA:

Se si preme il pulsante **PTT**, la radio esce dalla schermata di avviso dei messaggi di testo e instrada una chiamata privata o di gruppo al mittente del messaggio.

- 1 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Leggi**.

Premere  per effettuare la selezione. Sul display viene visualizzato il messaggio di testo. Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

- Premere  o  fino a visualizzare **Leggi**

dopo. Premere  per effettuare la selezione. La radio torna alla schermata in cui si trovava prima della ricezione del messaggio di testo.

- Premere  o  fino a visualizzare

**Elimina**. Premere  per effettuare la selezione.

---

## 2 Eseguire una delle seguenti operazioni:

- Premere  per tornare alla Inbox.
  - Premere  una seconda volta per rispondere, inoltrare o eliminare il messaggio di testo.
- 

## Risposta ai messaggi di testo con un testo predefinito.

Seguire la procedura per rispondere ai messaggi di testo con i messaggi predefiniti sulla radio.

### 1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Msg testo**. Procedere al passaggio [passaggio 3](#).
  - Premere  per accedere al menu.
- 

### 2

Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

### 3

Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

---

5 Premere  per accedere al sottomenu.

---

6 Premere  o  fino a visualizzare **Rispondi**. Premere  per effettuare la selezione.

---

7 Premere  o  fino a visualizzare **Risposta rapida**. Premere  per effettuare la selezione.

---

8 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

---

9 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica negativa.
  - La radio torna alla schermata dell'opzione **Reinvia**.
-

## Rinvio di messaggi di testo

Seguire la procedura per rinviare messaggi di testo sulla radio.

Quando ci si trova nella schermata dell'opzione **Reinvia**:

Premere  per rinviare lo stesso messaggio al medesimo alias o ID dell'utente o del gruppo.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
  - La radio torna alla schermata dell'opzione **Reinvia**.
- 

## Inoltro di messaggi di testo

Seguire la procedura per inoltrare messaggi di testo sulla radio.

Quando ci si trova nella schermata dell'opzione **Reinvia**:

**1** Premere  o  fino a visualizzare **Inoltra**, quindi premere  per inviare il messaggio all'alias o all'ID di un altro utente o gruppo.

---

**2** Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

---

**3** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

**NOTA:**

È anche possibile selezionare manualmente l'indirizzo della radio di destinazione (vedere [Inoltro di messaggi di testo utilizzando la composizione manuale a pagina 459](#)).

## Inoltro di messaggi di testo utilizzando la composizione manuale

Seguire la procedura per inoltrare messaggi di testo utilizzando la composizione manuale sulla radio.

- 1 Premere  o  fino a visualizzare **Inoltra**.  
Premere  per effettuare la selezione.

- 2 Premere  per rinviare lo stesso messaggio a un altro alias o ID dell'utente o del gruppo.

- 3 Premere  o  fino a visualizzare **Comp. man.** Premere  per effettuare la selezione.  
Sul display viene visualizzato **Numero radio:.**

- 4 Inserire l'ID dell'utente, quindi premere  per continuare.  
Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

- 5 Attendere la conferma.  
In caso di esito positivo:
  - Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica positiva.
 In caso di esito negativo:
  - Viene emesso un tono.
  - Sul display viene visualizzata una mini notifica negativa.

## Modifica dei messaggi di testo

Selezionare **Modifica** per modificare il messaggio.

### NOTA:

Se è presente una riga dell'oggetto (in caso di messaggi ricevuti da un'applicazione e-mail), non è possibile modificarla.

- 1 Premere  o  fino a visualizzare **Modifica**.

Premere  per effettuare la selezione.

Sul display viene visualizzato un cursore lampeggiante.

- 2 Modificare il messaggio utilizzando la tastiera.

- premere  per spostarsi di uno spazio a sinistra.
- Premere  o  per spostarsi di uno spazio a destra.
- Premere  per eliminare i caratteri indesiderati.

- Premere a lungo  per modificare il metodo di immissione del testo.

- 3 Premere  al termine della composizione del messaggio.

- 4 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Invia** e premere  per inviare il messaggio.
- Premere  o  fino a visualizzare **Salva** e premere  per salvare il messaggio nella cartella Bozze.
- Premere  per modificare il messaggio.
- Premere  per scegliere se eliminare il messaggio o salvarlo nella cartella Bozze.

## Scrittura di messaggi di testo

Seguire la procedura per scrivere un messaggio di testo sulla radio.

- 1 Eseguire una delle seguenti operazioni:
- Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).

- Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare **Componi**.  
Premere  per effettuare la selezione.  
Viene visualizzato un cursore lampeggiante.
- 

- 4 Digitare il messaggio utilizzando la tastiera.

Premere  per spostarsi di uno spazio a sinistra.

Premere  o  per spostarsi di uno spazio a destra.

Premere  per eliminare i caratteri indesiderati.

Premere a lungo  per modificare il metodo di immissione del testo.

---

- 5 Premere  al termine della composizione del messaggio.

Eseguire una delle seguenti operazioni:

- Premere  per inviare il messaggio.

- Premere . Premere  o  per scegliere se modificare, eliminare o salvare il messaggio. Premere  per effettuare la selezione.

---

## Invio di messaggi di testo

Seguire la procedura per inviare un messaggio di testo sulla radio.

Si presuppone che sia abbia pronto un messaggio di testo appena scritto o un messaggio di testo salvato.

Selezionare il destinatario del messaggio. Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- Premere  o  fino a visualizzare Comp. man. Premere  per effettuare la selezione. Immettere l'ID dell'utente. Sulla prima riga del display, viene visualizzata l'opzione Numero radio:. Sulla seconda riga, viene visualizzato un cursore lampeggiante. Immettere l'ID o l'alias dell'utente. Premere .

Sul display, viene visualizzata una mini notifica temporanea, per confermare che è in corso l'invio del messaggio.

In caso di esito positivo:

- Viene emesso un tono.
- Sul display, viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono basso.

- Sul display viene visualizzata una mini notifica negativa.
- Il messaggio viene spostato nella cartella Msg inviati.
- Il messaggio viene contrassegnato con un'icona Non inviato.

#### NOTA:

Per un messaggio di testo appena scritto, la radio torna alla schermata con l'opzione Reinvia.

---

## Eliminazione di messaggi di testo dalla casella di posta

Seguire la procedura per eliminare i messaggi di testo dalla casella Inbox sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
-

2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Inbox**.  
Premere  per effettuare la selezione.

Se la casella di posta in arrivo è vuota:

- Sul display viene visualizzato **Lista vuota**.
  - Viene emesso un tono.
- 

4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

Se il messaggio è stato inviato da un'applicazione e-mail, sul display è visualizzata la riga dell'oggetto.

---

5 Premere  per accedere al sottomenu.

---

6 Premere  o  fino a visualizzare **Elimina**.  
Premere  per effettuare la selezione.

---

7 Premere  o  fino a visualizzare **Sì**.  
Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica positiva. La radio torna alla Inbox.

---

## Eliminazione di tutti i messaggi di testo dalla casella di posta

Seguire la procedura per eliminare tutti i messaggi di testo dalla casella Inbox sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
- 

2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Inbox**.

Premere  per effettuare la selezione.

Se la casella di posta in arrivo è vuota:

- Sul display viene visualizzato **Lista vuota**.
- Viene emesso un tono.

4 Premere  o  fino a visualizzare **Elimina tutto**. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare **Sì**.

Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica positiva.

## Messaggi di testo inviati

Quando un messaggio è stato inviato a un'altra radio, viene salvato nella cartella **Msg inviati**. Il messaggio di testo inviato per ultimo viene sempre aggiunto all'inizio della lista

**Msg inviati**. È possibile inviare, inoltrare, modificare o eliminare un messaggio di testo inviato.

Nella cartella **Msg inviati** vengono memorizzati gli ultimi 30 messaggi inviati. Quando la cartella è piena, il successivo messaggio inviato sostituirà automaticamente il messaggio di testo più vecchio della cartella.

se si esce dalla schermata di invio messaggi durante l'invio del messaggio, la radio aggiorna lo stato del messaggio nella cartella **Msg inviati** senza fornire alcuna indicazione audio o visiva.

Se la modalità operativa viene cambiata o la radio viene spenta prima che lo stato del messaggio sia stato aggiornato nella cartella **Msg inviati**, la radio non è in grado di completare i messaggi in corso e li contrassegna automaticamente con l'icona **Non inviato**.

La radio supporta un numero massimo di cinque messaggi in corso alla volta. Durante l'invio dei messaggi, la radio non è in grado di inviarne altri e li contrassegna automaticamente con l'icona **Non inviato**.

Se si preme a lungo  in qualsiasi momento, la radio torna alla schermata principale.

**NOTA:**

Un messaggio inviato può essere solo modificato, inoltrato o eliminato se il tipo di canale (digitale convenzionale o Capacity Plus) non corrisponde.

## Visualizzazione dei messaggi di testo inviati

Seguire la procedura per visualizzare i messaggi di testo inviati sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Messaggi**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Msg inviati**. Premere  per effettuare la selezione. Se la cartella **Msg inviati** è vuota:

- Sul display viene visualizzato **Lista vuota**.
- Viene emesso un tono basso, se il tono della tastiera è attivato.

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

L'icona nell'angolo superiore destro della schermata indica lo stato del messaggio. Vedere [Icane dei messaggi inviati](#).

## Invio di messaggi di testo inviati

Seguire la procedura per inviare un messaggio di testo inviato sulla radio.

Durante la visualizzazione di un messaggio inviato:

- 1 Premere  durante la visualizzazione del messaggio.
- 2 È possibile reinviare o inoltrare il messaggio di testo inviato. Eseguire una delle seguenti operazioni:

-  fino a visualizzare **Reinvia**. Premere  per effettuare la selezione.
-  fino a visualizzare **Inoltra**. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

### 3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.
- La radio passa alla schermata dell'opzione **Reinvia**. Per ulteriori informazioni, vedere [Rinvio di messaggi di testo a pagina 163](#).

## Eliminazione di messaggi di testo inviati dalla cartella Msg inviati

Seguire la procedura per eliminare i messaggi di testo inviati dalla cartella Msg inviati sulla radio.

Durante la visualizzazione di un messaggio inviato:

- 1 Premere  .
- 2 Premere  o  fino a visualizzare **Elimina**.  
Premere  per effettuare la selezione.

## Eliminazione di tutti i messaggi di testo inviati dalla cartella Msg inviati

Seguire la procedura per eliminare tutti i messaggi di testo inviati dalla cartella Msg inviati sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Msg** inviati. Premere  per effettuare la selezione.

Se la cartella **Msg** inviati è vuota:

- Sul display viene visualizzato **Lista vuota**.
  - Viene emesso un tono.
- 

4 Premere  o  fino a visualizzare **Elimina tutto**. Premere  per effettuare la selezione.

---

5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Sì**.  
Premere  per effettuare la selezione.  
Sul display viene visualizzata una mini notifica positiva.

- Premere  o  fino a visualizzare **No**.  
Premere  per effettuare la selezione.  
La radio ritorna alla schermata precedente.
- 

## Messaggi di testo salvati

È possibile salvare un messaggio di testo per inviarlo in un momento successivo.

Se, durante la scrittura/modifica di un messaggio di testo, si preme il pulsante **PTT** o si cambia modalità facendo sì che la radio esca dalla modalità di scrittura/modifica, il messaggio di testo verrà salvato automaticamente nella cartella **Bozze**.

Il messaggio di testo salvato per ultimo verrà sempre aggiunto all'inizio della lista **Bozze**.

Nella cartella **Bozze** è possibile salvare gli ultimi 10 messaggi. Quando la cartella è piena, al salvataggio del messaggio di testo successivo, quello meno recente verrà sostituito automaticamente.

## Visualizzazione dei messaggi di testo salvati

Seguire la procedura per visualizzare i messaggi di testo salvati sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Bozze**.  
Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

## Modifica dei messaggi di testo salvati

Seguire la procedura per modificare il messaggio di testo salvato sulla radio.

- 1 Premere  durante la visualizzazione del messaggio.

---

- 2 Premere  o  fino a visualizzare **Modifica**.  
Premere  per effettuare la selezione.  
Viene visualizzato un cursore lampeggiante.

---

- 3 Digitare il messaggio utilizzando la tastiera.  
  
Premere  per spostarsi di uno spazio a sinistra.  
  
Premere  o  per spostarsi di uno spazio a destra.  
  
Premere  per eliminare i caratteri indesiderati.  
  
Premere a lungo  per modificare il metodo di immissione del testo.

- 4 Premere  al termine della composizione del messaggio.

Eeguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Invia**.  
Premere  per inviare il messaggio.
- Premere . Premere  o  per scegliere se salvare o eliminare il messaggio.  
Premere  per effettuare la selezione.

- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Bozze**.  
Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare il messaggio desiderato. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare **Elimina**.  
Premere  per eliminare il messaggio di testo.

## Eliminazione dei messaggi di testo salvati nella cartella Bozze

Seguire la procedura per eliminare i messaggi di testo salvati nella cartella Bozze sulla radio.

- 1 Eseguire una delle seguenti operazioni:
- Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 3](#).
  - Premere  per accedere al menu.

## Messaggi di testo predefiniti

La radio supporta fino a 50 messaggi di testo predefiniti, programmati dal rivenditore.

È possibile modificare un messaggio predefinito prima di inviarlo.

## Invio di messaggi di testo predefiniti

Seguire la procedura per inviare messaggi di testo predefiniti sulla radio a un alias predefinito.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Msg testo**. Continuare con [passaggio 6](#).
  - Premere il pulsante di **accesso rapido** programmato.  
Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

Continuare con [passaggio 6](#).

- Premere  per accedere al menu.

- 
- 2 Premere  o  fino a visualizzare **Messaggi**.  
Premere  per effettuare la selezione.

- 
- 3 Premere  o  per visualizzare **Msg. predef.** Premere  per effettuare la selezione.

- 
- 4 Premere  o  fino a visualizzare il messaggio di testo predefinito desiderato. Premere  per effettuare la selezione.

- 
- 5 Attenersi alla seguente procedura per selezionare il destinatario e inviare il messaggio.  
  
Sul display viene visualizzata una mini notifica temporanea per confermare che è in corso l'invio del messaggio.

- 
- 6 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

- La radio passa alla schermata dell'opzione **Reinvia**. Per ulteriori informazioni, vedere [Rinvio di messaggi di testo a pagina 163](#).

**NOTA:**

Premere  in qualsiasi momento per tornare alla schermata precedente o premere a lungo  per tornare alla schermata iniziale. La schermata corrente viene chiusa alla scadenza del tempo di inattività.

## Configurazione dell'immissione di testo

La radio consente di configurare testo differente.

Per l'immissione di testo è possibile configurare le impostazioni seguenti sulla radio:

- Prediz. parola
- Correttore ortografico
- Maiusc frase
- Diz. personale

La radio supporta i seguenti metodi di immissione di testo:

- Numeri
- Simboli
- Lingua predittiva o multipressione
- (se impostata)

## Attivazione o disattivazione di Corrett. ortogr.

Consente di scegliere parole alternative quando il dizionario integrato non riconosce il termine immesso nell'editor di testo.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare `Immetti testo`. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare `Corrett. ortogr.`. Premere  per effettuare la selezione.

---

6 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare `Corrett. ortogr.`. Premere  per effettuare la selezione.
  - Premere per abilitare `Corrett. ortogr.`. Se questa opzione è attivata,  viene visualizzato accanto a `Abilitato`.
  - Premere per disabilitare `Corrett. ortogr.`. Se questa opzione è disabilitata,  non viene più visualizzato accanto a `Abilitato`.
- 

## Attivazione o disattivazione di Prediz. parola

**Prediz. parola** La radio è in grado di memorizzare le sequenze di parole utilizzate più spesso. Dopo che l'utente ha immesso la prima parola di una sequenza comune nell'editor di testo, viene suggerita la parola successiva da utilizzare.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare `Utilità`. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare `Immetti testo`. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Prediz. parola**. Premere  per effettuare la selezione.

---

6 Eseguire una delle seguenti operazioni:

- Premere  per attivare **Prediz. parola**. Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
  - Premere  per disattivare il controllo dinamico della distorsione del microfono. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.
- 

## Maiusc frase

Questa funzione viene utilizzata per inserire automaticamente l'iniziale maiuscola della prima parola di ogni frase.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Immetti testo**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Maiusc frase**. Premere  per effettuare la selezione.

---

6 Eseguire una delle seguenti operazioni:

- Premere  per attivare la funzione **Maiusc frase**. Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.

- Premere  per disattivare la funzione Maiusc frase. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a Abilitato.

## Visualizzazione delle parole personalizzate

È possibile aggiungere le proprie parole personalizzate nel dizionario integrato della radio. La radio le conserva in un elenco.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.
- 5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.
- 6 Premere  o  fino a visualizzare Elenco parole. Premere  per effettuare la selezione. Sul display viene visualizzato l'elenco delle parole personalizzate.

## Modifica delle parole personalizzate

È possibile modificare le parole personalizzate salvate nella radio.

- 1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare Elenco parole. Premere  per effettuare la selezione. Sul display, vengono visualizzate le parole personalizzate.

---

7 Premere  o  fino a visualizzare la parola desiderata. Premere  per effettuare la selezione.

---

8 Premere  o  fino a visualizzare Modifica. Premere  per effettuare la selezione.

---

9 Per modificare la parola personalizzata, utilizzare la tastiera.

- Premere  per spostarsi di uno spazio a sinistra.
  - Premere  per spostarsi di uno spazio a destra.
  - Premere il tasto  per cancellare i caratteri indesiderati.
  - Premere a lungo  per modificare il metodo di immissione del testo.
-

- 10 Premere  dopo l'inserimento della parola personalizzata.

Sul display, viene visualizzata una mini notifica temporanea che conferma il salvataggio della parola personalizzata.

- Se l'operazione va a buon fine, viene emesso un tono e sul display viene visualizzata una mini notifica positiva.
- Se l'operazione non riesce, viene emesso un tono a basso volume e sul display viene visualizzata una mini notifica negativa.

## Aggiunta di parole personalizzate

È possibile aggiungere parole personalizzate al dizionario della radio integrato.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Impost.** radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **Immetti testo**. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare **Diz. personale**. Premere  per effettuare la selezione.

- 6 Premere  o  fino a visualizzare **Aggiungi nuova**. Premere  per effettuare la selezione.

Sul display, vengono visualizzate le parole personalizzate.

- 7 Per modificare la parola personalizzata, utilizzare la tastiera.
- Premere  per spostarsi di uno spazio a sinistra.

- Premere  per spostarsi di uno spazio a destra.
- Premere il tasto  per cancellare i caratteri indesiderati.
- Premere a lungo  per modificare il metodo di immissione del testo.

8 Premere  dopo l'inserimento della parola personalizzata.

Sul display, viene visualizzata una mini notifica temporanea che conferma il salvataggio della parola personalizzata.

- Se l'operazione va a buon fine, viene emesso un tono e sul display viene visualizzata una mini notifica positiva.
- Se l'operazione non riesce, viene emesso un tono a basso volume e sul display viene visualizzata una mini notifica negativa.

## Eliminazione di una parola personalizzata

Seguire la procedura per eliminare le parole personalizzate salvate nella radio.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Immetti testo. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare Diz. personale. Premere  per effettuare la selezione.

6 Premere  o  fino a visualizzare la parola desiderata. Premere  per effettuare la selezione.

7 Premere  o  fino a visualizzare **Elimina**.  
Premere  per effettuare la selezione.

---

8 Scegliere una delle seguenti opzioni:

- In **Eliminare la voce?**, premere  per selezionare **Sì**. Sul display viene visualizzato **Entry Deleted (Voce eliminata)**.
  - Premere  o  fino a visualizzare **No**.  
Premere  per tornare alla schermata precedente.
- 

## Eliminazione di tutte le parole personalizzate

Seguire la procedura per eliminare tutte le parole personalizzate dal dizionario integrato della radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Immetti testo**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Diz. personale**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare **Elimina tutto**. Premere  per effettuare la selezione.

---

7 Eseguire una delle seguenti operazioni:

- In **Eliminare la voce?**, premere  per selezionare **Sì**. Sul display viene visualizzato **Tutte le voci eliminate**.
- Premere  o  fino a visualizzare **No** per tornare alla schermata precedente. Premere  per effettuare la selezione.

## Job Ticket

Questa funzione consente alla radio di ricevere messaggi dal dispatcher che elencano le attività da eseguire.

### NOTA:

Questa funzione può essere personalizzata tramite CPS in base alle esigenze dell'utente. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

Vi sono due cartelle contenenti diversi Job Ticket:

### Cartella Attività

Job Ticket personalizzati assegnati all'ID utente che ha effettuato l'accesso.

### Cartella Attività cond.

Job Ticket condivisi assegnato a un gruppo di utenti.

È possibile rispondere ai Job Ticket in modo da ordinarli in cartelle Job Ticket. Per impostazione predefinita, le cartelle sono **Tutti**, **Nuovi**, **Avviati** e **Completati**. Per aggiungere 10 cartelle, contattare il rivenditore o l'amministratore di sistema.

### NOTA:

I Job Ticket sono conservati anche dopo lo spegnimento e la successiva riaccensione della radio.

Tutti i Job Ticket si trovano nella cartella **Tutti**. A seconda di come è stata programmata la radio, i Job Ticket sono ordinati in base al livello di priorità, seguito dall'ora di ricezione. I Job Ticket nuovi, con modifiche recenti allo stato e con priorità più alta sono elencati per primi. Una volta raggiunto il numero massimo di Job Ticket, il Job Ticket successivo sostituisce automaticamente l'ultimo elencato nella radio. La radio supporta un massimo di 100 o 500 Job Ticket, a seconda del modello di radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema. La radio rileva ed elimina automaticamente i Job Ticket duplicati con lo stesso ID.

In base all'importanza dei Job Ticket, il dispatcher aggiunge loro un livello di priorità. Sono disponibili tre livelli di priorità: Priorità 1, Priorità 2 e Priorità 3. Il livello 1 è il più

alto e il livello 3 il più basso. Vi sono anche Job Ticket senza priorità.

La radio viene aggiornata di conseguenza quando il dispatcher effettua le seguenti operazioni:

- Modifica al contenuto dei Job Ticket.
- Aggiunta o modifica del livello di priorità dei Job Ticket.
- Spostamento dei Job Ticket da una cartella a un'altra.
- Annullamento dei Job Ticket.

## Accesso alla cartella Job Ticket

Seguire la procedura per accedere alla cartella Job Ticket.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante **Job Ticket** programmato. Continuare con [passaggio 3](#).
    - Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare il job ticket desiderato. Premere  per effettuare la selezione.
- 

## Accesso o disconnessione dal server remoto

Questa funzione consente di effettuare l'accesso e la disconnessione dal server remoto utilizzando l'ID utente.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Accedi. Premere  per effettuare la selezione.

Se è stato già effettuato l'accesso, il menu visualizza Disconnessione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

### 3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Creazione dei job ticket

La radio è in grado di creare Job Ticket, basati su un template e di inviare compiti da eseguire.

È necessario il software di programmazione CPS per configurare il template di Job Ticket.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Crea ticket. Premere  per effettuare la selezione.

## Risposta ai job ticket

Seguire la procedura per rispondere ai job ticket sulla radio.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare il job ticket desiderato. Premere  per effettuare la selezione.

---

5 Premere di nuovo  per accedere al sottomenu.  
È anche possibile premere il tasto numerico corrispondente (1-9) per attivare l'opzione **Risp. predef..**

---

6 Premere  o  fino a visualizzare il job ticket desiderato. Premere  per effettuare la selezione.  
Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

---

7 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
  - Sul display viene visualizzata una mini notifica negativa.
- 

## Invio di job ticket tramite un modello Job Ticket

Se la radio è configurata con un modello Job Ticket, attenersi alla seguente procedura per inviare il job ticket.

- 1 Utilizzare la tastiera per digitare il numero della stanza richiesto. Premere  per effettuare la selezione.
-

2 Premere  o  fino a visualizzare Stato stanza. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare l'opzione desiderata. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Invia. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

5 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.

- Sul display viene visualizzata una mini notifica negativa.

## Invio di job ticket tramite più modelli Job Ticket

Se la radio è configurata con più modelli Job Ticket, attenersi alla seguente procedura per inviare i job ticket.

1 Premere  o  fino a visualizzare l'opzione desiderata. Premere  per effettuare la selezione.

2 Premere  o  fino a visualizzare Invia. Premere  per effettuare la selezione.

Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

3 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.

- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Eliminazione dei job ticket

Seguire la procedura per eliminare i job ticket sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante **Job Ticket** programmato. Continuare con il [passaggio 4](#).
- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare la cartella Tutti. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare il Job Ticket desiderato. Premere  per effettuare la selezione.

6 Premere di nuovo  durante la visualizzazione del Job Ticket.

7 Premere  o  fino a visualizzare Elimina. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso.

**8** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Eliminazione di tutti i Job Ticket

Seguire la procedura per eliminare tutti i Job Ticket sulla radio.

**1** Eseguire una delle seguenti operazioni:

- Premere il pulsante **Job Ticket** programmato. Continuare con [passaggio 3](#).
- Premere  per accedere al menu.

**2** Premere  o  fino a visualizzare Job Ticket. Premere  per effettuare la selezione.

**3** Premere  o  fino a visualizzare la cartella desiderata. Premere  per effettuare la selezione.

**4** Premere  o  fino a visualizzare la cartella Tutti. Premere  per effettuare la selezione.

**5** Premere  o  fino a visualizzare Elimina tutto. Premere  per effettuare la selezione.

**6** Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Sì. Premere  per effettuare la selezione. Sul display viene visualizzata una mini notifica positiva.

- Premere  o  fino a visualizzare No.

Premere  per effettuare la selezione.  
La radio ritorna alla schermata precedente.

## Privacy

Questa funzione utilizza una tecnica di scrambling basata su software e consente di evitare che utenti non autorizzati sintonizzati su un canale possano ascoltare le conversazioni. Lo scrambling non viene però effettuato sulle porzioni di segnalazione e identificazione utente di una trasmissione.

Per inviare una trasmissione con funzione Privacy attivata, tale funzione deve essere abilitata sul canale su cui si trasmette. Questo requisito non è tuttavia necessario per la ricezione di una trasmissione. Mentre è sintonizzata su un canale abilitato per la privacy, la radio è in grado di ricevere trasmissioni chiare (decodificate).

Alcuni modelli di radio potrebbero non offrire la funzione Privacy o utilizzare una configurazione diversa. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

La radio supporta due tipi di privacy, ma solo uno può essere assegnato alla radio. Questi sono:

- Privacy base
- Privacy avanzata

Per decodificare una trasmissione dati o una chiamata con funzione Privacy attivata, la radio deve essere programmata in modo da avere la stessa chiave di privacy (per la privacy base) oppure gli stessi valore e ID della chiave (per la privacy avanzata) della radio trasmittente.

Se la radio riceve una chiamata codificata con una diversa chiave di privacy oppure con valore e ID della chiave diversi, si sentirà una trasmissione confusa (privacy base) oppure assente (privacy avanzata).

Su un canale abilitato per la privacy, la radio è in grado di ricevere chiamate chiare o decodificate, a seconda di come è stata programmata. Inoltre, la radio può riprodurre o meno un tono di attenzione a seconda di come è programmata.

Il LED si accende in verde durante la trasmissione e lampeggia rapidamente durante la ricezione di una trasmissione con funzione Privacy attivata da parte della radio.

### NOTA:

Si tratta di una funzionalità non disponibile per i canali della banda cittadina che si trovano nella stessa frequenza.

## Attivazione o disattivazione della privacy

Seguire la procedura per l'attivazione e disattivazione della privacy sulla radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Privacy**. Saltare i passaggi riportati di seguito.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **Privacy**. Premere  per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare

**Attivo**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a **On**.

- Premere  o  fino a visualizzare

**Disattivo**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a **Off**.

## Inibizione risp.

Questa funzione consente di impedire alla radio di rispondere a eventuali trasmissioni in entrata.

### NOTA:

Si tratta di un'opzione acquistabile. Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

Se attivata, la radio non genera alcuna trasmissione in uscita in risposta a trasmissioni in entrata, ad esempio Controllo radio, Avviso chiamata, Disattivazione radio, Monitor remoto, Automatic Registration Service (ARS), la risposta a messaggi privati e l'invio di report sulla posizione

GNSS. La radio non è in grado di ricevere chiamate private confermate se questa funzione è attivata. Tuttavia, la radio è in grado di inviare manualmente la trasmissione.

## Attivazione o disattivazione di Inibizione risp.

Seguire la procedura per attivare o disattivare Inibizione risp. sulla radio.

Premere il pulsante programmato **Inibizione risp.**

---

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata momentaneamente una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata momentaneamente una mini notifica negativa.

## Controlli multisito

Queste funzioni sono disponibili se il canale radio corrente è parte di una configurazione IP Site Connect o Capacity Plus - Multisito.

## Inizio della ricerca manuale del sito

Seguire la procedura per avviare la ricerca manuale del sito quando la potenza del segnale ricevuto è scarsa e trovare un sito con segnale migliore.

Se la radio trova un nuovo sito:

- Viene emesso un tono indicatore positivo.

Se la radio non trova un nuovo sito:

- Viene emesso un tono indicatore negativo.

## Blocco sito on/off

Quando è attivato, la radio esegue la ricerca solo nel sito corrente. Quando è disattivato, la radio esegue la ricerca nel sito corrente e in altri siti.

Premere il pulsante programmato **Blocco sito**.

Se la funzione **Blocco sito** è attivata:

- Viene emesso un tono indicatore positivo, che indica che la radio è stata bloccata nel sito corrente.
- Sul display compare `Sito bloccato`.

Se la funzione **Blocco sito** è disattivata:

- Viene emesso un tono indicatore negativo, che indica che la radio è stata sbloccata.
- Sul display compare `Sito sbloccato`.

## Accesso all'elenco Siti adiacenti

Questa funzione consente all'utente di verificare l'elenco dei siti adiacenti del sito principale corrente. Seguire la procedura per accedere all'elenco Siti adiacenti:

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Info radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Siti adiacenti. Premere  per effettuare la selezione.

## Sicurezza

Questa funzione consente di abilitare o disabilitare una radio nel sistema.

Ad esempio, è possibile disabilitare una radio rubata per impedire agli utenti non autorizzati di utilizzarla, e riabilitarla quando è stata recuperata.

È possibile attivare o disattivare una radio in due modi: con e senza autenticazione.

Disattivazione radio autenticata è un'opzione acquistabile. In Disattivazione radio autenticata, quando si attiva o si disattiva una radio, è richiesta la verifica. Quando la radio avvia questa funzione su una radio di destinazione con Autenticazione utente, è richiesta una passphrase. La passphrase viene preprogrammata nella radio di destinazione mediante CPS.

Non si riceverà alcuna conferma se si preme  durante l'operazione per attivare o disattivare la radio.

**NOTA:**

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Disattivazione delle radio

Seguire la procedura per disattivare la radio.

- 1 Premere il pulsante programmato **Disatt. radio**.

---

- 2 Premere  o  fino a visualizzare l'alias o l'ID desiderato.

---

- 3 Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde lampeggia.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

### 4 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.

- Sul display viene visualizzata una mini notifica negativa.

## Disattivazione delle radio dalla lista Contatti

Seguire la procedura per disattivare la radio utilizzando la lista Contatti.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.
- 4 Premere  o  fino a visualizzare Disattivazione radio.

- 5 Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde lampeggia.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

- 6 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Disattivazione delle radio utilizzando la composizione manuale

Seguire la procedura per disattivare la radio utilizzando la composizione manuale.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare Comp. man.. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Numero radio. Premere  per effettuare la selezione. Nella prima riga di testo viene visualizzato Numero radio!.

- 5 Inserire l'ID dell'utente, quindi premere  per continuare.

- 6 Premere  o  fino a visualizzare Disatt. radio.

- 7 Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:
  - Sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde lampeggia.
  - Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

## 8 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Attivazione delle radio

Seguire la procedura per attivare la radio.

### 1 Premere il pulsante programmato **Attiv. radio**.

### 2 Premere o fino a visualizzare l'alias o l'ID desiderato.

### 3 Premere per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Sul display vengono visualizzati Attivazione radio e l'ID o l'alias dell'utente. Il LED verde si accende.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

**4** Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Attivazione delle radio dalla lista Contatti

Seguire la procedura per attivare la radio utilizzando la lista Contatti.

**1** Premere  per accedere al menu.

**2** Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

**3** Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

**4** Premere  o  fino a visualizzare Attivazione radio.

**5** Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Il LED verde lampeggia. Sul display vengono visualizzati Attivazione radio e l'ID o l'alias dell'utente. Il LED verde si accende.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.

- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

## 6 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzata una mini notifica negativa.

## Attivazione delle radio utilizzando la composizione manuale

Seguire la procedura per attivare la radio utilizzando la composizione manuale.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Contatti. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Comp. man. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Chiam. privata. Premere  per effettuare la selezione. Sulla prima riga di testo viene visualizzato Numero radio!.

5 Inserire l'ID dell'utente, quindi premere  per continuare.

6 Premere  o  fino a visualizzare Attivazione radio.

7 Premere  per effettuare la selezione. Si verifica uno dei seguenti scenari:

- Il LED verde lampeggia. Sul display vengono visualizzati Attivazione radio e l'ID o l'alias dell'utente. Il LED verde si accende.
- Viene visualizzata una schermata immettere la passphrase.

Immettere la passphrase. Premere  per continuare.

- Se la passphrase è corretta, sul display viene visualizzata una mini notifica temporanea indicante che la richiesta è in corso. Il LED verde si accende.
- Se la passphrase non è corretta, sul display viene visualizzata una mini notifica negativa e si torna alla schermata precedente.

## 8 Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzata una mini notifica positiva.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.

- Sul display viene visualizzata una mini notifica negativa.

## Lone Worker

Questa funzione consente di avviare una trasmissione di emergenza in assenza di attività da parte dell'utente, ad esempio la pressione di un pulsante sulla radio o la selezione di un canale, entro un periodo di tempo predefinito.

Se non viene rilevata alcuna attività per un periodo di tempo programmato, allo scadere del timer di inattività la radio avvisa l'utente con un indicatore audio.

Se l'utente non risponde prima dello scadere del tempo del promemoria predefinito, la radio avvia un allarme di emergenza.

A questa funzione è possibile assegnare solo uno dei seguenti allarmi di emergenza:

- Allarme di emergenza
- Allarme di emergenza con chiamata
- Allarme di emergenza con successiva trasmissione voce 

La radio resta in modalità di emergenza, consentendo la trasmissione di messaggi vocali, fino a quando non viene intrapresa un'azione. Vedere [Funzionamento in emergenza a pagina 445](#) per ulteriori informazioni sui modi per uscire dallo stato di emergenza.

**NOTA:**

Questa funzione è disponibile solo nelle radio in cui è stata abilitata. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Bluetooth

Questa funzione consente di utilizzare la radio con un dispositivo Bluetooth (accessorio) tramite una connessione Bluetooth. La radio supporta i dispositivi Bluetooth Motorola Solutions e COTS (disponibili in commercio).

La tecnologia Bluetooth ha una copertura di 10 m in linea visiva, ossia un percorso senza ostacoli tra la radio e il dispositivo Bluetooth. Per la massima affidabilità, Motorola Solutions consiglia di non separare la radio dall'accessorio.

Nelle aree al limite della ricezione, la voce e la qualità del tono cominceranno a essere "incomprensibili" o "interrotte". Per risolvere questo problema, avvicinare la radio e il dispositivo Bluetooth entro un raggio di 10 m, per ripristinare la nitidezza della ricezione audio. La funzione

Bluetooth della radio ha una potenza massima di 2,5 mW (4 dBm) nel raggio di 10 m.

La radio può supportare fino a tre connessioni Bluetooth simultanee con dispositivi Bluetooth di tipo diverso, ad esempio, un paio di cuffie, uno scanner e un dispositivo POD (solo PTT). Non sono supportate più connessioni con dispositivi Bluetooth dello stesso tipo.

Per ulteriori informazioni sulle funzionalità complete del dispositivo Bluetooth, consultare il relativo manuale per l'utente del dispositivo.

**NOTA:**

Se questa opzione è disattivata tramite CPS, tutte le funzioni relative alla connessione Bluetooth vengono disattivate e il database del dispositivo Bluetooth viene cancellato.

## Accensione e spegnimento del Bluetooth

Seguire la procedura per accendere e spegnere il Bluetooth.

1

Premere  per accedere al menu.

2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Stato utente. Premere  per effettuare la selezione. Sul display vengono visualizzate le opzioni On e Off. Lo stato corrente è indicato da .

---

4 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Attivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a On.
  - Premere  o  fino a visualizzare Disattivo. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a Off.
- 

## Connessione ai dispositivi Bluetooth

Seguire la procedura per connettersi ai dispositivi Bluetooth.

Accendere il dispositivo Bluetooth e impostarlo sulla modalità di accoppiamento.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

---

4 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

- Premere  o  fino a visualizzare `Trova dispos.` per individuare i dispositivi disponibili.

Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare `Connetti`. Premere  per effettuare la selezione.

È possibile che, per completare l'accoppiamento, il dispositivo Bluetooth richieda l'esecuzione di ulteriori operazioni. Fare riferimento al manuale dell'utente del dispositivo Bluetooth.

Sul display viene visualizzato `Connesso a <dispositivo>`.

Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display vengono visualizzati il messaggio `<Dispositivo> connesso` e l'icona **Bluetooth collegato**.

- Sul display viene visualizzato  accanto al dispositivo connesso.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.
- Sul display viene visualizzato il messaggio `Connessione non riuscita`.

#### NOTA:

Se è richiesto il codice pin, vedere [Accesso alle radio tramite password a pagina 200](#).

## Collegamento a dispositivi Bluetooth in modalità rilevabile

Seguire la procedura per connettersi ai dispositivi Bluetooth in modalità rilevabile.

Accendere il dispositivo Bluetooth e impostarlo sulla modalità di accoppiamento.

- 1 Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Trovami. Premere  per effettuare la selezione. La radio può essere rilevata da altri dispositivi Bluetooth per un tempo programmato. Questa modalità è denominata Rilevamento.

Attendere la conferma.

In caso di esito positivo:

- Viene emesso un tono indicatore positivo.
- Sul display vengono visualizzati il messaggio <Dispositivo> connesso e l'icona **Bluetooth collegato**.
- Sul display viene visualizzato  accanto al dispositivo connesso.

In caso di esito negativo:

- Viene emesso un tono indicatore negativo.

- Sul display viene visualizzato il messaggio Connessione non riuscita.

## Disconnessione dai dispositivi Bluetooth

Seguire la procedura per disconnettersi dai dispositivi Bluetooth.

- 1 Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare **Disconnetti**. Premere  per effettuare la selezione.

Sul display viene visualizzato il messaggio  
Disconnessione da <Nome dispositivo>.

**NOTA:**

È possibile che per disconnettere il dispositivo Bluetooth si debbano eseguire ulteriori operazioni. Fare riferimento ai manuali per l'utente dei dispositivi Bluetooth corrispondenti.

Attendere la conferma.

- Viene emesso un tono.
- Sul display viene visualizzato <Dispositivo> disconnesso e l'icona **Bluetooth collegato** scompare.
- ✓ accanto al dispositivo connesso scompare.

[Invia feedback](#)

## Commutazione dell'instradamento dell'audio tra l'altoparlante interno della radio e il dispositivo Bluetooth

Attenersi alla procedura descritta di seguito per alternare l'instradamento dell'audio tra l'altoparlante interno della radio e il dispositivo Bluetooth esterno.

Premere il pulsante programmato **Commutazione audio Bluetooth**.

Sul display viene visualizzato uno dei seguenti risultati:

- Viene emesso un tono. Sul display viene visualizzato `Invia audio alla radio`.
- Viene emesso un tono. Sul display viene visualizzato `Invia audio a Bluetooth`.

## Visualizzazione dei dettagli del dispositivo

Seguire la procedura per visualizzare i dettagli del dispositivo sulla radio.

1

Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Vis. dettagli. Premere  per effettuare la selezione.

## Eliminazione del nome del dispositivo

È possibile rimuovere un dispositivo scollegato dall'elenco dei dispositivi Bluetooth.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Dispositivi. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il dispositivo desiderato. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare Elimina. Premere  per effettuare la selezione. Sul display viene visualizzato Dispositivo eliminato.

## Amplificazione microfono Bluetooth

Questa funzione consente all'utente di controllare il valore di guadagno del microfono del dispositivo Bluetooth collegato.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Bluetooth. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Guad mic BT. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare il tipo Guad mic BT e i valori correnti. Premere  per effettuare la selezione. Qui è possibile modificare i valori.

---

[Invia feedback](#)

- 5 Premere  o  per aumentare o ridurre i valori. Premere  per effettuare la selezione.

## Posiz. interna

### NOTA:

La funzione Posizione interna è disponibile per i modelli con l'ultima versione software e hardware. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

La funzione Posiz. interna viene utilizzata per tenere traccia della posizione in cui si trovano gli utenti della radio. Quando la funzione Posizione interna è attivata, la radio è in modalità Rilevamento limitata. Per individuare la radio e stabilirne la posizione, vengono utilizzati beacon dedicati.

## Attivazione o disattivazione della funzione Posizione interna

È possibile attivare o disattivare la funzionalità Posizione interna effettuando una delle operazioni descritte di seguito.

- Accedere a questa funzione tramite il menu.

- a. Premere  per accedere al menu.
- b. Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.
- c. Premere  oppure  fino a visualizzare Posiz. interna e premere  per selezionare.
- d. Premere  per attivare Posiz. interna.

Sul display viene visualizzato Posiz. interna Attiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale viene visualizzata l'icona Posizione disponibile.
- Se l'operazione ha esito negativo, sul display viene visualizzato Attivazione non riuscita. Viene emesso un tono indicatore negativo.

- e. Premere  per disattivare Posiz. interna.

Sul display viene visualizzato Posiz. interna Disattiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale scompare l'icona Posizione disponibile.
  - Se l'operazione ha esito negativo, sul display viene visualizzato Disattivazione non riuscita. Viene emesso un tono indicatore negativo.
- Accedere a questa funzione utilizzando il pulsante programmato.
- a. Premere a lungo il pulsante programmato **Posiz. interna** per accedere alla funzione.

Sul display viene visualizzato Posiz. interna Attiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale viene visualizzata l'icona Posizione disponibile.
  - Se l'operazione ha esito negativo, sul display viene visualizzato Attivazione non riuscita. Se l'operazione ha esito negativo, viene emesso un tono indicatore negativo.
- b. Premere il pulsante programmato **Posiz. interna** per disattivare la funzione.

Sul display viene visualizzato Posiz. interna Disattiva. Viene emesso un tono indicatore positivo.

Si verifica uno dei seguenti scenari.

- Se l'operazione ha esito positivo, sulla schermata principale scompare l'icona Posizione disponibile.
- Se l'operazione ha esito negativo, sul display viene visualizzato Disattivazione non riuscita. Se l'operazione ha esito negativo, viene emesso un tono indicatore negativo.

## Accesso alle informazioni sui beacon della posizione interna

Seguire la procedura per accedere alle informazioni sui beacon della posizione interna.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Bluetooth e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Posiz. interna e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Beacon e premere  per selezionare.

---

Sul display vengono visualizzate le informazioni sui beacon.

## Lista delle notifiche

La radio dispone di una lista delle notifiche che raccoglie tutti gli eventi "non letti" sul canale, come i messaggi di testo non letti, i messaggi telemetrici, le chiamate perse e gli avvisi di chiamata.

Sul display viene visualizzata l'icona **Notifica** quando la lista delle notifiche contiene uno o più eventi.

La lista supporta un massimo di 40 eventi non letti. Quando la lista è piena, l'evento successivo sostituisce automaticamente l'evento meno recente. Una volta letti, gli eventi vengono rimossi dalla lista delle notifiche.

Il numero massimo consentito di notifiche per messaggi di testo, chiamate perse e avvisi di chiamata è di 30 per messaggi di testo e 10 per chiamate perse o avvisi di chiamata. Questo numero dipende dalla capacità individuale dell'elenco funzioni (Job Ticket o messaggi di testo o chiamate perse o avvisi di chiamata).

### Accesso alla lista delle notifiche

Seguire la procedura per accedere alla lista delle notifiche sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Notifica**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'evento desiderato. Premere  per effettuare la selezione.  
  
Premere a lungo  per tornare alla schermata principale.

---

## Sistema transponder per il rilevamento automatico della portata

Il sistema transponder per il rilevamento automatico della portata (ARTS, Auto-Range Transponder System) è una funzione analogica progettata per informare l'utente quando la radio si trova fuori dalla portata delle radio dotate di ARTS.

Le radio dotate di tecnologia ARTS trasmettono e ricevono segnali periodici che rilevano se i dispositivi si trovano entro la portata reciproca.

La radio fornisce le seguenti indicazioni sugli stati:

#### Avviso al primo passaggio

Viene emesso un tono.

Sul display viene visualizzato `Nel raggio dopo l'alias del canale`.

#### Avviso ARTS nel raggio

Viene emesso un tono, se programmato.

Sul display viene visualizzato `Nel raggio dopo l'alias del canale`.

#### Avviso ARTS fuori campo

Viene emesso un tono. Il LED rosso lampeggia velocemente.

Sul display viene visualizzato `Fuori campo` alternatamente alla schermata principale.

#### NOTA:

Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Programmazione Over-the-Air

Il rivenditore può aggiornare a distanza la radio tramite la programmazione Over-the-Air (OTAP, Over-the-Air Programming) senza un collegamento fisico. Utilizzando la funzione OTAP, è inoltre possibile configurare alcune impostazioni.

Quando la radio viene sottoposta a OTAP, il LED verde lampeggia.

Quando la radio riceve un volume di dati elevato:

- Sul display viene visualizzata l'icona **Volume di dati elevato**.
- Il canale risulta occupato.
- Se si preme il pulsante **PTT** viene riprodotto un tono negativo.

Al termine di OTAP, a seconda della configurazione:

- Viene emesso un tono. Sul display viene visualizzato `Riavvio aggiorn.to`. La radio si spegne e si riaccende.
- È possibile selezionare `Riavvia ora` o `Posticipa`. Se si seleziona `Posticipa`, la radio torna alla schermata precedente. Sul display viene visualizzata l'icona **Timer ritardo OTAP** fino al riavvio automatico.

Quando la radio si riaccende dopo il riavvio automatico:

- Se l'operazione ha avuto esito positivo, sul display viene visualizzato `Agg software completato`.
- Se l'operazione ha avuto esito negativo, sul display viene visualizzato `Agg software fallito`.

Vedere [Controllo delle informazioni sull'aggiornamento del software a pagina 234](#) per la versione aggiornata del software.

## Inibizione della trasmissione

La funzione Inibizione della trasmissione consente agli utenti di bloccare tutte trasmissioni dalla radio.

### NOTA:

Le funzioni Bluetooth e Wi-Fi sono disponibili in modalità Inibizione della trasmissione.

## Attivazione dell'inibizione della trasmissione

Seguire la procedura per attivare la funzione Inibiz. transmiss.

Eseguire una delle operazioni seguenti:

- Premere  oppure  fino a visualizzare `Inibizione Tx` e premere  per selezionare.
- Premere il pulsante programmabile **Inibiz. transmiss.**

- Viene emesso un tono indicatore positivo.
- Sul display viene visualizzato `Inibizione Tx attivata`.

### NOTA:

Lo stato dell'inibizione della trasmissione non cambia in seguito all'accensione della radio.

## Disattivazione dell'inibizione della trasmissione

Seguire la procedura per disattivare Inibizione trasmissione.

Eseguire una delle operazioni seguenti:

- Premere  oppure  fino a visualizzare `Inibiz. Tx` e premere  per selezionare.

- Premere il tasto programmabile **Inibiz. trasmiss.**
- 
- Viene emesso un tono indicatore negativo. La trasmissione torna al normale funzionamento.
  - Sul display viene visualizzato Inibizione Tx disattivata.

## Selezione delle modalità di connessione a periferiche di terze parti

Seguire la procedura per selezionare una delle seguenti modalità di connessione alle periferiche di terzi:

- Motorola Solutions
- PC e audio
- Accessori dati
- Telemetria
- Generica

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Tipo cavo. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare la modalità di connessione desiderata. Premere  per effettuare la selezione.

Sul display, viene visualizza la modalità di connessione selezionata. Il display torna al menu precedente.

---

## RSSI (Received Signal Strength Indicator)

Questa funzione consente di visualizzare i valori RSSI (Received Signal Strength Indicator).

Nell'angolo superiore destro del display viene visualizzata l'icona **RSSI**. Vedere [Icane del display](#) per ulteriori informazioni sull'icona **RSSI**.

### Visualizzazione dei valori RSSI

Seguire la procedura per visualizzare i valori RSSI sulla radio.

Nella schermata principale:

- 1 Premere tre volte  e premere subito dopo tre volte, il tutto in 5 secondi. 

Sul display compaiono i valori RSSI correnti.

- 
- 2 Premere a lungo  per tornare alla schermata principale.
- 

## Funzioni di blocco password

Questa funzione consente di limitare l'accesso alla radio richiedendo una password quando il dispositivo è acceso.

È possibile utilizzare il microfono della tastiera o i pulsanti di **scorrimento su/giù** per immettere la password.

### Accesso alle radio tramite password

Seguire la procedura per accedere alla radio tramite una password.

- 1 Inserire la password corrente composta da quattro cifre.

#### NOTA:

L'uso del pedale **Emergenza** elimina la necessità di immettere la password per accedere alla radio.

- Utilizzare un microfono con tastiera.
- Premere  o  per modificare il valore numerico di ciascuna cifra, quindi premere  per immettere e spostarsi alla cifra successiva.

2 Premere  per immettere la password.

Se l'operazione ha esito positivo, la radio si accende.  
In caso di esito negativo:

- Dopo il primo e il secondo tentativo, sul display viene visualizzato `Password errata`. Ripetere [passaggio 1](#).
- Al terzo tentativo, sul display viene visualizzato `Password errata` e quindi `Radio bloccata`. Viene emesso un tono. Il LED giallo lampeggia due volte. La radio entra nello stato di blocco per 15 minuti.

**NOTA:**

Nello stato di blocco, la radio risponde solo alle immissioni effettuate tramite la **manopola On/Off/Controllo volume** e il pulsante programmato **Retroillum..**

## Sblocco delle radio nello stato bloccato

Nello stato bloccato, la radio non può ricevere chiamate. Seguire la procedura per sbloccare la radio nello stato bloccato.

[Invia feedback](#)

Eseguire una delle seguenti operazioni:

- Se la radio è accesa, attendere 15 minuti, quindi ripetere i passaggi descritti in [Accesso alle radio tramite password a pagina 200](#) per accedere alla radio.
- Se la radio è spenta, accenderla. La radio riavvia il timer di 15 minuti per lo stato bloccato. Viene emesso un tono. Il LED giallo lampeggia due volte. Sul display viene visualizzato `Radio bloccata`.  
Attendere 15 minuti, quindi ripetere i passaggi descritti in [Accesso alle radio tramite password a pagina 200](#) per accedere alla radio.

## Attivazione o disattivazione del blocco mediante password

Seguire la procedura per l'attivazione e disattivazione del blocco mediante password sulla radio.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare `Impost.` radio. Premere  per effettuare la selezione.
- 
- 4 Premere  o  fino a visualizzare `Blocco` `pswd`. Premere  per effettuare la selezione.
- 
- 5 Inserire la password corrente composta da quattro cifre.
- Utilizzare un microfono con tastiera.
  - Premere  o  per modificare il valore numerico di ciascuna cifra, quindi premere  per immettere la cifra selezionata e spostarsi alla cifra successiva.  
All'immissione di ogni cifra viene emesso un tono indicatore positivo.
- 
- 6 Premere  per immettere la password.
- Se la password è errata, sul display viene visualizzato `Password errata` e la radio torna automaticamente al menu precedente.
- 

- 7 Eseguire una delle seguenti operazioni:
- Premere  o  fino a visualizzare `Accendi`. Premere  per effettuare la selezione.  
Sul display viene visualizzato  accanto ad `Accendi`.
  - Premere  o  fino a visualizzare `Spegni`. Premere  per effettuare la selezione.  
Sul display viene visualizzato  accanto a `Spegni`.
- 

## Modifica delle password

Seguire la procedura per cambiare le password sulla radio.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.
-

3 Premere  o  fino a visualizzare `Impost.` radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare `Blocco` pswd. Premere  per effettuare la selezione.

---

5 Immettere la password corrente di quattro cifre, quindi premere  per continuare.

Se la password è errata, sul display viene visualizzato `Password errata` e la radio torna automaticamente al menu precedente.

---

6 Premere  o  fino a visualizzare `Cambia` pswd. Premere  per effettuare la selezione.

---

7 Immettere una nuova password di quattro cifre, quindi premere  per continuare.

---

8 Immettere nuovamente la nuova password di quattro cifre, quindi premere  per continuare.

Se l'operazione ha esito positivo, sul display viene visualizzato `Password cambiata`.

Se l'operazione ha esito negativo, sul display viene visualizzato `Password non corrisp.`

Il display torna automaticamente al menu precedente.

---

## Configurazione funzioni da pannello frontale

È possibile personalizzare determinati parametri delle funzioni da Configurazione funzioni da pannello frontale (FPC) per ottimizzare l'uso della radio.

## Attivazione della modalità Configurazione funzioni da pannello frontale

Seguire la procedura per accedere all'impostazione funzioni da pannello frontale sulla radio.

la pressione prolungata di  consente di tornare in qualsiasi momento alla schermata principale.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Prog. radio**. Premere  per effettuare la selezione.

---

## Modifica dei parametri della modalità FPP

I seguenti pulsanti consentono di visionare tutti i parametri delle funzioni.

-  ,  : consentono di scorrere le opzioni, aumentare/diminuire i valori o spostarsi verticalmente.
-  : consente di selezionare l'opzione o di accedere a un sottomenu.

-  : premere brevemente per tornare al menu precedente o per uscire dalla schermata di selezione. Premere a lungo per tornare alla schermata iniziale.

## Funzionamento Wi-Fi

Wi-Fi® è un marchio registrato di Wi-Fi Alliance®.

### NOTA:

Questa funzione è disponibile per DM4601e .

Questa funzione consente di configurare e connettersi a una rete Wi-Fi. La funzionalità Wi-Fi supporta aggiornamenti per il firmware della radio, codeplug e risorse quali i pacchetti linguistici e gli annunci vocali.

## Attivazione o disattivazione della funzionalità Wi-Fi

Il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato** è assegnato dal rivenditore o dall'amministratore di sistema. rivolgersi al rivenditore o all'amministratore di sistema per sapere come è stata programmata la radio.

Gli Annunci vocali per il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato** possono essere personalizzati mediante CPS in base ai requisiti degli utenti. Per ulteriori

informazioni, contattare il rivenditore o l'amministratore di sistema.

È possibile attivare o disattivare la funzionalità Wi-Fi effettuando una delle operazioni descritte di seguito.

- Premere il pulsante programmato **Wi-Fi attivato/Wi-Fi disattivato**. L'annuncio vocale emette un messaggio sull'attivazione o disattivazione della funzionalità Wi-Fi.
- Accedere a questa funzione utilizzando il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.
  - c. Premere  oppure  fino a visualizzare Wi-Fi On e premere  per selezionare.

Premere  per attivare la funzionalità Wi-Fi. Sul display viene visualizzato  accanto ad Abilitato.

Premere  per disattivare la funzionalità Wi-Fi. Accanto alla voce **Abilitato**, non viene più visualizzato .

## Connessione a un Access Point di rete

Quando si attiva la funzionalità Wi-Fi, la radio esegue la scansione e si connette a un Access Point di rete.

È anche possibile connettersi a un access point di rete utilizzando il menu.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare

l'Access Point di rete e premere  per selezionare.

5 Premere  oppure  fino a visualizzare

Connetti e premere  per selezionare.

6 Immettere la password e premere  .

Quando la connessione è stata stabilita, sulla radio viene visualizzato un avviso e l'Access Point di rete viene salvato nell'elenco dei profili.

## Verifica dello stato della connessione Wi-Fi

Seguire la procedura per verificare lo stato della connessione Wi-Fi.

Premere il pulsante programmato **Query stato Wi-Fi** per verificare lo stato della connessione utilizzando l'annuncio vocale. L'annuncio vocale emette Wi-Fi disattivato, Wi-Fi

attivato ma nessuna connessione o Wi-Fi attivato con connessione.

- Sul display viene visualizzato **Wi-Fi Off** quando il Wi-Fi è disattivato.
- Sul display viene visualizzato **Wi-Fi On, Connesso** quando la radio è connessa a una rete.
- Sul display viene visualizzato **Wi-Fi On, Disconnesso** quando il Wi-Fi è attivato ma la radio non è connessa a una rete.

Gli annunci vocali per i risultati della query sullo stato Wi-Fi possono essere personalizzati mediante CPS in base ai requisiti degli utenti. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

### NOTA:

Il pulsante programmato **Query stato Wi-Fi** è assegnato dal rivenditore o dall'amministratore di sistema. Rivolgersi al rivenditore o all'amministratore di sistema per informazioni su come è stata programmata la radio.

## Aggiornamento dell'elenco delle reti

Seguire la procedura per aggiornare l'elenco delle reti.

- Effettuare le seguenti operazioni per aggiornare l'elenco delle reti utilizzando il menu.
  - a. Premere  per accedere al menu.
  - b. Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.
  - c. Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

Quando si accede al menu Reti, la radio aggiorna automaticamente l'elenco delle reti.
- Se si è già all'interno del menu Reti, effettuare le seguenti operazioni per aggiornare l'elenco delle reti.

Premere  oppure  fino a visualizzare Aggiorna e premere  per selezionare.

La radio viene aggiornata e viene visualizzato l'elenco delle reti più recente.

[Invia feedback](#)

## Aggiunta di una rete

Se la rete preferita non è nell'elenco delle reti disponibili, effettuare le operazioni riportate di seguito per aggiungere una rete.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare Aggiungi rete e premere  per selezionare.

---

- 5 Immettere l'SSID (Service Set Identifier) e premere  .

---

6 Premere  oppure  fino a visualizzare **Apri** e premere  per selezionare.

---

7 Immettere la password e premere  .  
Sul display della radio viene visualizzata una mini notifica positiva per indicare che la rete è stata salvata.

---

## Visualizzazione dei dettagli degli Access Point di rete

Seguire la procedura per visualizzare i dettagli degli Access Point di rete.

1 Premere  per accedere al menu.

---

2 Premere  oppure  fino a visualizzare **Wi-Fi** e premere  per selezionare.

---

3 Premere  oppure  fino a visualizzare **Reti** e premere  per selezionare.

---

4 Premere  oppure  fino a visualizzare l'Access Point di rete e premere  per selezionare.

---

5 Premere  oppure  fino a visualizzare **Vis. dettagli** e premere  per selezionare.

Per un Access Point collegato, vengono visualizzati l'SSID (Service Set Identifier), la modalità di protezione, l'indirizzo MAC (Media Access Control) e l'indirizzo IP (Internet Protocol).

Per un Access Point non collegato, vengono visualizzati l'SSID (Service Set Identifier) e la modalità di protezione.

---

## Rimozione degli Access Point di rete

Effettuare le seguenti operazioni per rimuovere gli Access Point di rete dall'elenco dei profili.

- 1 Premere  per accedere al menu.

---

- 2 Premere  oppure  fino a visualizzare Wi-Fi e premere  per selezionare.

---

- 3 Premere  oppure  fino a visualizzare Reti e premere  per selezionare.

---

- 4 Premere  oppure  fino a visualizzare l'Access Point di rete selezionato e premere  per selezionare.

---

- 5 Premere  oppure  fino a visualizzare Rimuovi e premere  per selezionare.

---

- 6 Premere  oppure  fino a visualizzare Sì e premere  per selezionare.

Sul display della radio viene visualizzata una mini notifica positiva per indicare che l'Access Point di rete selezionato è stato rimosso.

## Pubblica utilità

Questo capitolo descrive l'uso delle funzioni di utilità disponibili sulla radio.

## Livelli di squelch

È possibile regolare il livello di squelch per eliminare la ricezione di chiamate non gradite, la cui forza del segnale è bassa, oppure i canali che presentano un rumore di fondo più elevato del normale.

### Normale

È l'impostazione predefinita.

### Stretto

Questa impostazione consente di eliminare la ricezione di chiamate non gradite e/o i rumori di fondo. È

possibile che vengano filtrate anche le chiamate effettuate da posizioni remote.

**NOTA:**

Si tratta di una funzionalità non disponibile per i canali della banda cittadina che si trovano nella stessa frequenza.

## Impostazione dei livelli di squelch

Seguire la procedura per impostare i livelli di squelch sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Squelch**. Saltare i passaggi seguenti.
- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare

Utilità. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Impost.

radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare Squelch.

Premere  per effettuare la selezione.

5 Eseguire una delle seguenti operazioni:

• Premere  o  fino a visualizzare

Normale. Premere  per effettuare la selezione.

Sul display viene visualizzato  accanto alla voce Normale.

• Premere  o  fino a visualizzare

Stretto. Premere  per effettuare la selezione.

Sul display viene visualizzato  accanto alla voce Stretto.

Il display torna automaticamente al menu precedente.

## Livelli di potenza

È possibile personalizzare l'impostazione di potenza alta o bassa per ciascun canale.

### Alto

Consente la comunicazione tra radio che si trovano a notevole distanza.

### Basso

Consente la comunicazione tra radio che si trovano a breve distanza.

#### NOTA:

Si tratta di una funzionalità non disponibile per i canali della banda cittadina che si trovano nella stessa frequenza.

## Impostazione dei livelli di potenza

Seguire la procedura per impostare i livelli di potenza sulla radio.

1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Livello potenza**. Saltare i passaggi riportati di seguito.

- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Potenza**. Premere  per effettuare la selezione.

5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Alta**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto alla voce **Alta**.
- Premere  o  fino a visualizzare **Bassa**. Premere  per effettuare la selezione.

Sul display viene visualizzato ✓ accanto alla voce Bassa.

- 6 Premere a lungo  per tornare alla schermata principale.

## Attivazione o disattivazione di avvisi e toni della radio

Se necessario, è possibile abilitare e disabilitare tutti i toni e gli avvisi della radio, ad eccezione del tono di avviso di emergenza. . Seguire la procedura per attivare o disattivare gli avvisi e i toni sulla radio.

- 1 Eseguire una delle seguenti operazioni:
- Premere il pulsante programmato **Toni/avvisi**. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare TONI/avvisi. Premere  per effettuare la selezione.

- 5 Premere  o  fino a visualizzare Tutti i toni. Premere  per effettuare la selezione.

- 6 Premere  per attivare o disattivare tutti i toni e gli avvisi. Sul display viene visualizzato uno dei seguenti risultati:
- Se questa opzione è attivata, ✓ viene visualizzato accanto a Abilitato.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a Abilitato.

## Attivazione o disattivazione dei toni della tastiera

Seguire la procedura per l'attivazione e disattivazione dei toni della tastiera sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Utilità`. Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare `Toni/avvisi`. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare `Toni tastiera`. Premere  per effettuare la selezione.

---

- 6 Premere  per attivare o disattivare i toni della tastiera. Sul display viene visualizzato uno dei seguenti risultati:
    - Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
    - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.
- 

## Impostazione dei livelli di offset volume di avvisi e toni

Questa funzione consente di regolare il volume dei toni/avvisi a un livello più alto o più basso di quello della voce. Seguire la procedura per impostare i livelli di offset del volume di avvisi e toni sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare `Utilità`. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Toni/Avvisi**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Offset vol.**. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare il livello di offset del volume desiderato.  
Viene riprodotto un tono di feedback con il livello di offset del volume corrispondente.

---

7 Eseguire una delle seguenti operazioni:

- Premere  per effettuare la selezione. Il livello di offset del volume richiesto viene salvato.
  - Premere  per uscire. Le modifiche vengono annullate.
- 

## Attivazione o disattivazione del tono Permesso di parlare

Seguire la procedura per attivare o disattivare il tono Permesso di parlare sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **Toni/avvisi**. Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare **Tono perm.**. Premere  per effettuare la selezione.

---

- 6 Premere  per attivare o disattivare la funzione Tono perm..

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.

## Attivazione o disattivazione del tono di accensione

Seguire la procedura per attivare o disattivare il tono di accensione sulla radio.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare `Toni/avvisi`. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare `Accensione`. Premere  per effettuare la selezione.
- 

- 6 Premere  per attivare o disattivare il Tono acc.ne. Sul display viene visualizzato uno dei seguenti risultati:
- Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.
-

## Impostazione del tono di avviso per i messaggi di testo

È possibile personalizzare il tono di avviso dei messaggi di testo, impostandolo su Momentaneo o Ripetitivo, per ogni voce nella lista Contatti. Seguire la procedura per impostare i toni di avviso dei messaggi di testo sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Contatti.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare l'alias o l'ID desiderato. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Avviso msg. Premere  per effettuare la selezione.

---

- 5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare Momentaneo. Premere  per effettuare la selezione.  
Sul display viene visualizzato  accanto alla voce Momentaneo.
- Premere  o  fino a visualizzare Ripetitivo. Premere  per effettuare la selezione.  
Sul display viene visualizzato  accanto alla voce Ripetitivo.

## Cambio di modo del display

È possibile modificare il modo del display per la radio tra Giorno e Notte, a seconda delle necessità. Questa funzione influisce sulla tavolozza colori del display. Seguire la procedura per cambiare il modo del display della radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante **Modo display** programmato. Saltare i passaggi seguenti.

- Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare *Impost.*  
*radio*. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare *Display*.  
Premere  per effettuare la selezione.  
Sul display, vengono visualizzate le opzioni *Modo  
Giorno* e *Modo Notte*.

- 5 Premere  o  fino a visualizzare  
l'impostazione desiderata. Premere  per  
effettuare la selezione.  
Sul display viene visualizzato  accanto  
all'impostazione selezionata.

## Regolazione della luminosità del display

Seguire la procedura per regolare la luminosità del display sulla radio. La luminosità del display non può essere regolata quando è abilitata *Luminosità auto*.

- 1 Eseguire una delle seguenti operazioni:
- Premere il pulsante programmato **Luminosità**.  
Saltare i passaggi seguenti.

- Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare *Impost.*  
*radio*. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Luminosità. Premere  per effettuare la selezione.
- Sul display viene visualizzata la barra di avanzamento.

- 5 Premere  o  per diminuire o aumentare la luminosità del display. Premere  per effettuare la selezione.
- Il valore dell'impostazione va da 1 a 8.

## Attivazione o disattivazione della funzione Clacson/luci

La radio è in grado di avvisare l'utente dell'arrivo di una chiamata mediante la funzione Clacson/luci. Quando è attivata, all'arrivo di una chiamata viene suonato il clacson e si accendono le luci del veicolo. Questa funzione deve essere installata dal rivenditore utilizzando il connettore accessori sulla parte posteriore della radio. Seguire la procedura per attivare o disattivare la funzione Clacson/luci sulla radio.

- 1 Eseguire una delle seguenti operazioni:
- Premere il pulsante programmato **Clacson/luci**. Saltare i passaggi riportati di seguito.
  - Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.
- 
- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.
- 
- 4 Premere  o  fino a visualizzare Clacson/luci. Premere  per effettuare la selezione.
- 
- 5 Premere  per attivare o disattivare Clacson/luci. Sul display viene visualizzato uno dei seguenti risultati:
- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.

- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.

## Attivazione o disattivazione degli indicatori LED

Seguire la procedura per l'attivazione o la disattivazione degli indicatori LED sulla radio.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare `Utilità`.  
Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare `Impost. radio`. Premere  per effettuare la selezione.
- 4 Premere  o  fino a visualizzare `Indicatore LED`. Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare l'indicatore LED.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a `Abilitato`.
- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a `Abilitato`.

## Attivazione o disattivazione del sistema Public Address

Seguire la procedura per attivare o disattivare il sistema Public Address di diffusione audio non connesso della radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Public Address**. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare *Indirizzo pubblico*. Premere  per effettuare la selezione.

---

5 Premere  per attivare o disattivare la funzione Public Address.

- Se questa opzione è attivata,  viene visualizzato accanto a *Abilitato*.
- Se questa opzione è disabilitata,  non viene più visualizzato accanto a *Abilitato*.

---

## Attivazione o disattivazione del sistema Public Address esterno

Seguire la procedura per attivare o disattivare il sistema Public Address di diffusione audio connesso della radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante **PA esterno** programmato. Saltare i passaggi seguenti.
    - Premere  per accedere al menu.
- 

2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare *PA esterno*. Premere  per effettuare la selezione.

---

- 5 Premere  per attivare o disattivare il sistema Public Address di diffusione audio non connesso.
- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.
- 

## Attivazione o disattivazione dello schermo iniziale

È possibile attivare e disattivare lo schermo iniziale completando la seguente procedura.

- 1 Premere  per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.
- 

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.
- 

- 4 Premere  o  fino a visualizzare **Display**. Premere  per effettuare la selezione.
- 

- 5 Premere  o  fino a visualizzare **Schermo iniz.**. Premere  per effettuare la selezione.
- 

- 6 Premere  per attivare o disattivare lo schermo iniziale.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
  - Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.
-

## Impostazione delle lingue

Seguire la procedura per impostare le lingue sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Lingue*.  
Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare la lingua desiderata. Premere  per effettuare la selezione.  
  
Sul display viene visualizzato  accanto alla lingua selezionata.

## Identificazione del tipo di cavo

Attenersi alla seguente procedura per selezionare il tipo di cavo utilizzato dalla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare *Tipo cavo*. Premere  per effettuare la selezione.

---

- 5 Il tipo di cavo attualmente selezionato è contrassegnato dal simbolo .

## Trasmissione attivata dalla voce (VOX, Voice Operating Transmission)

VOX (Voice Operating Transmission) consente di avviare una chiamata in vivavoce ad attivazione vocale su un canale programmato. La radio trasmette automaticamente per un periodo di tempo programmato ogni volta che il microfono di un accessorio VOX rileva la voce.

### NOTA:

Si tratta di una funzionalità non disponibile per i canali della banda cittadina che si trovano nella stessa frequenza.

È possibile attivare o disattivare la funzione VOX effettuando una delle seguenti operazioni:

- Spegner e riaccendere la radio per abilitare VOX.
- Cambiare canale con i pulsanti di **scorrimento su/giù** per attivare la funzione VOX.
- Cambiare canale con la **manopola volume/canali** per attivare la funzione VOX.
- Attivare o disattivare la funzione VOX utilizzando il pulsante programmato **VOX** o il menu per attivare o disattivare la funzione.

- Premere il pulsante **PTT** durante il funzionamento della radio per disattivare la funzione VOX.

### NOTA:

Questa funzione può essere attivata o disattivata solo se è stata abilitata nella radio. Per ulteriori informazioni, contattare il rivenditore o l'amministratore di sistema.

## Attivazione o disattivazione della funzione VOX

Seguire la procedura per attivare o disattivare il VOX sulla radio.

- 1 Eseguire una delle seguenti operazioni:
    - Premere il pulsante programmato **VOX**. Saltare i passaggi riportati di seguito.
    - Premere  **OK** per accedere al menu.
- 
- 2 Premere  o  fino a visualizzare **Utilità**. Premere  **OK** per effettuare la selezione.
-

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare **VOX**. Premere  per effettuare la selezione.

---

5 Premere  per attivare o disattivare **VOX**.

---

#### NOTA:

Se è attivata la funzione Tono perm., utilizzare una parola di attivazione per iniziare la chiamata. Quindi, dopo aver ricevuto il tono che indica il permesso di parlare, parlare chiaramente nel microfono. Per ulteriori informazioni, vedere [Attivazione o disattivazione del tono Permesso di parlare a pagina 215](#).

## Attivazione o disattivazione dell'annuncio vocale

Questa funzione consente alla radio di indicare con un messaggio audio la zona o il canale corrente appena

assegnato dall'utente o il pulsante programmabile che l'utente ha appena premuto.

In genere, questa funzione è utile nel caso in cui un utente abbia difficoltà a leggere le informazioni visualizzate sul display.

È possibile personalizzare questo indicatore audio in base alle esigenze dei clienti. Seguire la procedura per attivare o disattivare gli annunci vocali sulla radio.

## Attivazione o disattivazione della scheda opzioni

Le funzionalità della scheda opzioni in ogni canale possono essere assegnate ai pulsanti programmabili. Un canale può supportare fino a 6 funzioni della scheda opzioni. Seguire la procedura per l'attivazione e disattivazione della scheda opzioni sulla radio.

---

Premere il pulsante **Scheda opzioni** programmato.

---

## Conversione da testo a voce

La funzione Sintesi vocale può essere attivata solo dal rivenditore o dall'amministratore di sistema. Se la funzione

Sintesi vocale è attivata, la funzione Annun vocale viene disattivata automaticamente. Se la funzione Annun vocale è attivata, la funzione Sintesi vocale viene disattivata automaticamente.

Questa funzionalità consente alla radio di indicare attraverso un segnale acustico le seguenti funzioni:

- Canale corrente
- Zona corrente
- Attivazione o disattivazione della funzionalità del pulsante programmato
- Contenuto dei messaggi di testo ricevuti
- Contenuto dei job ticket ricevuti

È possibile personalizzare questo indicatore audio in base alle esigenze dei clienti. In genere, questa funzione è utile nel caso in cui un utente abbia difficoltà a leggere le informazioni visualizzate sul display.

## Impostazione della sintesi vocale

Seguire la procedura per impostare la funzione Sintesi vocale.

1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Impost.** radio. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Annun vocale**. Premere  per effettuare la selezione.

5 Premere  o  fino a visualizzare una qualsiasi delle seguenti funzioni. Premere  per effettuare la selezione.

Le funzioni disponibili sono le seguenti:

- Tutti
- Messaggi
- Job Tickets
- Channel

- Zona
  - Pulsante di programmazione
- ✓ viene visualizzato accanto all'impostazione selezionata.

## Attivazione o disattivazione della funzionalità di trasferimento delle chiamate automatico.

È possibile impostare la radio in modo che trasferisca automaticamente le chiamate vocali a un'altra radio.

- 1 Premere  per accedere al menu.
- 2 Premere  o  fino a visualizzare *Utilità*.  
Premere  per effettuare la selezione.
- 3 Premere  o  fino a visualizzare *Impost. radio*. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare *Trasf. chiam.*. Premere  per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:

- Premere  o  per attivare la funzione *Trasf. chiam.*. Se questa opzione è attivata, ✓ viene visualizzato accanto a *Abilitato*.
- Premere  o  per disattivare la funzione *Trasf. chiam.*. Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a *Abilitato*.

## Impostazione del menu Timer

È possibile impostare per quanto tempo la radio resta nel menu prima di tornare automaticamente alla schermata iniziale. Seguire la procedura per impostare il menu Timer.

- 1 Premere  per accedere al menu.

2 Premere  o  fino a visualizzare  
Utilità. Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost.  
radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Display.  
Premere  per effettuare la selezione.

---

5 Premere  o  fino a visualizzare Menu  
Timer. Premere  per effettuare la selezione.

---

6 Premere  o  fino a visualizzare  
l'impostazione desiderata. Premere  per  
effettuare la selezione.

---

## Attivazione o disattivazione del controllo automatico del guadagno per il microfono analogico

La funzione di controllo automatico del guadagno (AGC, Automatic Gain Control) del microfono analogico controlla automaticamente il guadagno del microfono della radio durante la trasmissione su un sistema analogico.

Questa funzione riduce il volume dell'audio o potenza l'audio a basso volume fino a un valore preimpostato per garantire un livello omogeneo dell'audio. Seguire la procedura per attivare o disattivare il controllo automatico del guadagno per il microfono analogico sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

---

3 Premere  o  fino a visualizzare Impost.  
radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare AGC mic  
A. Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare AGC mic analogico.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata,  viene visualizzato accanto a Abilitato.
- Se questa opzione è disabilitata,  non viene più visualizzato accanto a Abilitato.

## Attivazione o disattivazione del controllo automatico del guadagno per il microfono digitale

La funzione di controllo automatico del guadagno (AGC, Automatic Gain Control) del microfono digitale controlla automaticamente il guadagno del microfono della radio durante la trasmissione su un sistema digitale.

Questa funzione riduce il volume dell'audio o potenzia l'audio a basso volume fino a un valore preimpostato per garantire un livello omogeneo dell'audio. Seguire la procedura per attivare o disattivare il controllo automatico del guadagno per il microfono digitale sulla radio.

- 1 Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare Impost. radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare AGC mic  
D. Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare AGC mic digitale.

Sul display viene visualizzato uno dei seguenti risultati:

- Se questa opzione è attivata, ✓ viene visualizzato accanto a **Abilitato**.
- Se questa opzione è disabilitata, ✓ non viene più visualizzato accanto a **Abilitato**.

## Attivazione o disattivazione dell'audio intelligente

La radio regola automaticamente il volume dell'audio in modo che superi il rumore di fondo dell'ambiente, comprese le origini del rumore stazionarie e non. Si tratta di una funzione di sola ricezione, che non influisce sull'audio di trasmissione. Seguire la procedura per attivare o disattivare l'audio intelligente sulla radio.

### NOTA:

Questa funzione non è disponibile durante le sessioni Bluetooth.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante **Audio intelligente** programmato. Saltare i passaggi riportati di seguito.

- Premere per accedere al menu.

- 2 Premere o fino a visualizzare **Utilità**. Premere per effettuare la selezione.

- 3 Premere o fino a visualizzare **Impost. radio**. Premere per effettuare la selezione.

- 4 Premere o fino a visualizzare **Audio intell.**. Premere per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:

- Premere o fino a visualizzare **Attivo**. Premere per effettuare la selezione. Sul display viene visualizzato ✓ accanto a **On**.
- Premere o fino a visualizzare **Disattivo**. Premere per effettuare la

selezione. Sul display viene visualizzato  accanto a Off.

## Attivazione e disattivazione della funzione Soppressore AF

Questa funzione consente di ridurre al minimo il valore di Soppressore AF nelle chiamate ricevute. Seguire la procedura per attivare o disattivare la funzione Soppressore AF sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione..

---

- 3 Premere  o  fino a visualizzare Impost.  
radio. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare Soppressore AF. Premere  per effettuare la selezione.

- 5 Eseguire una delle seguenti operazioni:
  - Premere per abilitare la funzione Soppressore AF. Se questa opzione è attivata,  viene visualizzato accanto a Abilitato.
  - Premere per disattivare la funzione Soppressore AF. Se questa opzione è disabilitata,  non viene più visualizzato accanto a Abilitato.

## Attivazione o disattivazione della funzione di ottimizzazione del trillo

È possibile attivare questa funzionalità quando si parla in una lingua che contiene molte parole pronunciate con trillo alveolare (noto anche come "consonante vibrante"). Seguire la procedura per attivare o disattivare la funzione di ottimizzazione del trillo sulla radio.

- 1 Eseguire una delle seguenti operazioni:

- Premere il pulsante programmato **Ottim. trilli**. Saltare i passaggi riportati di seguito.
- Premere  per accedere al menu.

2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

4 Premere  o  fino a visualizzare **Ottim. trilli**. Premere  per effettuare la selezione.

5 Eseguire una delle seguenti operazioni:

- Premere  o  fino a visualizzare **Attivo**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a **On**.

- Premere  o  fino a visualizzare **Disattivo**. Premere  per effettuare la selezione. Sul display viene visualizzato  accanto a **Off**.

## Ambiente audio

È possibile personalizzare l'ambiente audio della radio in base all'ambiente di utilizzo.

### Predefinito

È l'impostazione predefinita.

### Forte

Questa impostazione consente di attivare la funzione di soppressione del rumore e di incrementare il volume dell'altoparlante per l'uso in ambienti rumorosi.

### Gruppo di lav.

Questa impostazione consente di attivare il soppressore AF e di disattivare AGC quando le radio di un gruppo sono vicine l'una all'altra.

## Impostazione dell'ambiente audio

Seguire la procedura per impostare l'ambiente audio sulla radio in base al proprio ambiente.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Ambiente audio**. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare l'impostazione desiderata. Premere  per effettuare la selezione.  
Le impostazioni sono le seguenti.

- Scegliere **Predefinito** per le impostazioni predefinite di fabbrica.
- Scegliere **Forte** per aumentare il volume dell'altoparlante per l'uso in ambienti rumorosi.
- Scegliere **Gruppo di lavoro** per ridurre il feedback acustico quando si utilizza con un gruppo di radio che si trovano una vicina all'altra.

Sul display viene visualizzato  accanto all'impostazione selezionata.

## Profili audio

È possibile personalizzare i profili audio della radio in base alle proprie preferenze.

### Predefinito

È l'impostazione predefinita.

### Livello 1, Livello 2 e Livello 3

Queste impostazioni sono progettate per compensare la riduzione dell'udito dovuta al rumore, tipica negli adulti intorno ai 40, 50, 60 anni e oltre.

### Aumento alti, Aumento medi e Aumento bassi

Queste impostazioni sono progettate per garantire un suono maggiormente metallico, un suono più nasale e un suono più profondo.

## Impostazione dei profili audio

Seguire la procedura per impostare i profili audio sulla radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare **Profili audio**. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare l'impostazione desiderata. Premere  per effettuare la selezione.

Le impostazioni sono le seguenti.

- Scegliere **Predefinito** per disattivare il profilo audio selezionato in precedenza e tornare alle impostazioni predefinite di fabbrica.
- Scegliere **Livello 1**, **Livello 2** o **Livello 3** per i profili audio progettati per compensare la riduzione dell'udito dovuta al rumore, tipica degli adulti oltre i 40 anni.
- Scegliere **Aumento alti**, **Aumento medi** o **Aumento bassi** per i profili audio che si allineano con le preferenze per garantire suoni più metallici, più nasali o più profondi.

Sul display viene visualizzato  accanto all'impostazione selezionata.

## Attivazione o disattivazione del sistema GNSS (Global Navigation Satellite System)

Il sistema GNSS (Global Navigation Satellite System) è un sistema di navigazione satellitare, utilizzato per determinare l'esatta posizione della radio. GNSS include GPS (Global Positioning System) e GLONASS (Global Navigation Satellite System).

### NOTA:

I modelli di radio selezionati possono includere i sistemi GPS e GLONASS. La serie GNSS viene configurata tramite CPS. rivolgersi al rivenditore o all'amministratore di sistema per sapere come è stata programmata la radio.

- 1 Completare uno dei passaggi riportati di seguito per attivare o disattivare il sistema GNSS sulla radio.
  - Premere il pulsante programmato **GNSS**.
  - Premere  per accedere al menu. Andare al passaggio successivo.

- 2 Premere  o  fino a visualizzare **Utilità**.  
Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Impost. radio**. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **GNSS**.  
Premere  per effettuare la selezione.

- 5 Premere  per attivare o disattivare il sistema GNSS.

Se questa opzione è attivata,  viene visualizzato accanto a **Abilitato**.

Se questa opzione è disabilitata,  non viene più visualizzato accanto a **Abilitato**.

## Lista Rx fless.

Lista Rx fless. è una funzione che consente di creare e assegnare membri nell'elenco dei talkgroup Rx. La radio

può supportare un massimo di 16 membri nell'elenco. Questa funzionalità è supportata in Capacity Plus.

## Attivazione o disattivazione dell'opzione Lista Rx fless.

Seguire la procedura per attivare o disattivare l'opzione Lista Rx fless.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **Lista Rx fless.**. Saltare i passaggi seguenti.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Lista Rx fless.**. Premere  per effettuare la selezione.

- 3 Eseguire una delle seguenti operazioni:
  - Premere  o  fino a visualizzare **Accendi**. Premere  per effettuare la selezione. Viene emesso un tono indicatore positivo.

[Invia feedback](#)

Sul display viene visualizzata una mini notifica positiva.

- Premere  o  fino a visualizzare **Spegni**. Premere  per effettuare la selezione.

Viene emesso un tono indicatore negativo.

Sul display viene visualizzata una mini notifica negativa.

## Informazioni generali sulla radio

La radio contiene informazioni su diversi parametri generali.

Le informazioni generali della radio vengono riportate di seguito:

- ID e alias della radio.
- Versioni del firmware e del codeplug.
- Aggiornamento del software.
- Informazioni sul sistema GNSS.
- Informazioni sul sito.

**NOTA:**

Premere  per tornare alla schermata precedente. Premere a lungo  per tornare alla schermata principale. La schermata corrente viene chiusa alla scadenza del tempo di inattività.

## Controllo dell'ID e dell'alias della radio

Seguire la procedura per verificare l'ID e l'alias della radio.

- 1 Eseguire una delle seguenti operazioni:
  - Premere il pulsante programmato **ID e alias della radio**. Saltare i passaggi seguenti. Viene emesso un tono indicatore positivo. È possibile premere il pulsante programmato **ID e alias della radio** per tornare alla schermata precedente.
  - Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

- 3 Premere  o  fino a visualizzare **Info radio**. Premere  per effettuare la selezione.

- 4 Premere  o  fino a visualizzare **ID personale**. Premere  per effettuare la selezione.

Nella prima riga di testo viene visualizzato l'alias della radio. Nella seconda riga di testo viene visualizzato l'ID della radio.

## Controllo della versione del firmware e del codeplug

Seguire la procedura per verificare la versione del firmware e del codeplug sulla radio.

- 1 Premere  per accedere al menu.

- 2 Premere  o  fino a visualizzare **Utilità**. Premere  per effettuare la selezione.

3 Premere  o  fino a visualizzare Info radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Versioni. Premere  per effettuare la selezione.  
Sul display viene visualizzata la versione corrente del firmware e del codeplug.

---

## Controllo delle informazioni sull'aggiornamento del software

Questa funzione mostra l'ora e la data dell'ultimo aggiornamento del software eseguito tramite OTAP o Wi-Fi. Seguire la procedura per verificare le informazioni sull'aggiornamento del software sulla radio.

1 Premere  per accedere al menu.

---

2 Premere  o  fino a visualizzare Utilità. Premere  per effettuare la selezione.

---

[Invia feedback](#)

3 Premere  o  fino a visualizzare Info radio. Premere  per effettuare la selezione.

---

4 Premere  o  fino a visualizzare Agg. to sw. Premere  per effettuare la selezione.  
Sul display vengono visualizzate l'ora e la data dell'aggiornamento software più recente.

---

Il menu per l'aggiornamento software è disponibile solo dopo il completamento di almeno una sessione OTAP o Wi-Fi. Per ulteriori informazioni, vedere [Programmazione Over-the-Air a pagina 507](#).

## Controllo delle informazioni GNSS

Visualizza le informazioni GNSS sulla radio, come i valori:

- Latitudine
- Longitudine
- Altitudine
- Direzione
- Velocità

- Diluizione della precisione orizzontale (HDOP)
- Satelliti
- Versione

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Info radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Info GNSS. Premere  per effettuare la selezione.

---

- 5 Premere  o  fino a visualizzare la voce desiderata. Premere  per effettuare la selezione. Sul display vengono visualizzate le informazioni GNSS richieste.

---

## Visualizzazione delle informazioni sul sito

Seguire la procedura per visualizzare il nome del sito corrente al quale è collegata la radio.

- 1 Premere  per accedere al menu.

---

- 2 Premere  o  fino a visualizzare Utilità.  
Premere  per effettuare la selezione.

---

- 3 Premere  o  fino a visualizzare Info radio. Premere  per effettuare la selezione.

---

- 4 Premere  o  fino a visualizzare Info sito. Premere  per effettuare la selezione.

---

Sul display viene visualizzato il nome del sito corrente.

# Garanzia limitata

## PRODOTTI DI COMUNICAZIONE MOTOROLA SOLUTIONS.

### I. COPERTURA E DURATA DELLA GARANZIA:

Motorola Solutions, Inc. ("Motorola Solutions") garantisce l'assenza di difetti di materiali e di fabbricazione nei prodotti di comunicazione fabbricati da Motorola Solutions elencati di seguito ("Prodotto"), soggetti alle normali condizioni d'uso e di servizio per un periodo di tempo che decorre dalla data di acquisto, come riportato di seguito:

Radio serie DM digitali mobili	24 mesi
Accessori dei prodotti	12 mesi

Motorola Solutions, a propria discrezione, offre la riparazione (gratuita) del Prodotto (con componenti nuovi o rifabbricati), la sostituzione (gratuita) (con un Prodotto nuovo o rifabbricato) o il rimborso del prezzo di acquisto

del Prodotto durante il periodo di garanzia, sempre che questo venga restituito secondo quanto stabilito dai termini della presente garanzia. Le parti o le schede sostituite sono garantite per il periodo di validità restante della garanzia originale applicabile. Tutte le parti sostituite del Prodotto diventeranno proprietà di Motorola Solutions.

Motorola Solutions estende la presente garanzia limitata esplicita solo all'acquirente originale (utente finale). La presente garanzia non può essere né assegnata né trasferita a terzi. Questa è la garanzia completa del Prodotto fabbricato da Motorola Solutions. Motorola Solutions non si assume alcun obbligo o alcuna responsabilità per aggiunte o modifiche apportate alla presente garanzia senza il previo consenso scritto e firmato da un incaricato Motorola Solutions.

Fatto salvo un accordo separato tra Motorola Solutions e l'acquirente originale (utente finale) del Prodotto, Motorola Solutions non garantisce gli interventi di installazione, manutenzione o riparazione del Prodotto.

Motorola Solutions non può essere ritenuta responsabile in alcun modo delle apparecchiature accessorie non fornite da Motorola Solutions che sono collegate o altrimenti utilizzate assieme al Prodotto, né del funzionamento del Prodotto utilizzato unitamente alle suddette apparecchiature accessorie, che sono espressamente

escluse dalla presente garanzia. Alla luce dell'unicità di ogni sistema con il quale il Prodotto può essere utilizzato, Motorola Solutions declina ogni responsabilità per la portata, la copertura o il funzionamento dell'intero sistema entro i termini della presente garanzia.

## II. DISPOSIZIONI GENERALI

Questa garanzia illustra le responsabilità di Motorola Solutions in relazione al Prodotto. La riparazione, la sostituzione o il rimborso del prezzo di acquisto, a discrezione di Motorola Solutions, sono da considerarsi l'unico rimedio disponibile. LA PRESENTE GARANZIA SOSTITUISCE OGNI ALTRA GARANZIA ESPLICITA. LE GARANZIE IMPLICITE, COMPRESSE A SCOPO ESEMPLIFICATIVO LE GARANZIE IMPLICITE DI COMMERCIALIZZABILITÀ E IDONEITÀ PER UN PARTICOLARE SCOPO, SONO LIMITATE AL PERIODO DI VALIDITÀ DELLA PRESENTE GARANZIA LIMITATA. MOTOROLA SOLUTIONS NON SARÀ IN ALCUN CASO RESPONSABILE DEI DANNI ECCEDENTI IL PREZZO D'ACQUISTO DEL PRODOTTO, NÉ DI QUALSIVOGLIA MANCATO UTILIZZO DEL PRODOTTO O DI PERDITA DI TEMPO, INCONVENIENTE, PERDITA COMMERCIALE, LUCRO CESSANTE O PERDITA DI RISPARMI NÉ DI QUALSIASI ALTRO DANNO INCIDENTALE, SPECIALE O

CONSEQUENZIALE IMPUTABILE ALL'UTILIZZO O ALL'IMPOSSIBILITÀ DI UTILIZZARE TALE PRODOTTO, ENTRO I LIMITI CHE POSSONO ESSERE ESCLUSI DALLA PORTATA APPLICATIVA DELLA LEGGE.

## III. DIRITTI LEGATI ALLE LEGGI STATALI:

ALCUNI STATI NON AMMETTONO L'ESCLUSIONE O LA LIMITAZIONE DI DANNI DIRETTI O INDIRETTI NÉ LA LIMITAZIONE DEL PERIODO DI VALIDITÀ DI UNA GARANZIA IMPLICITA; PERTANTO, IN QUESTO CASO, LA SUDETTA LIMITAZIONE O LE SUDETTE ESCLUSIONI NON SONO APPLICABILI.

La presente garanzia conferisce diritti legali specifici. È possibile che altri diritti siano applicabili e che questi siano soggetti a variazioni da Stato a Stato.

## IV. RIPARAZIONE IN GARANZIA

Per usufruire della riparazione in garanzia, è richiesta la ricevuta d'acquisto recante la data dell'acquisto e il numero di serie del Prodotto; inoltre, il Prodotto deve essere consegnato o inviato a un centro di riparazione autorizzato (franco spese di spedizione ed assicurazione). Il servizio di

garanzia Motorola Solutions verrà effettuato in uno dei luoghi autorizzati per il servizio di garanzia. Per facilitare le procedure per la riparazione in garanzia, si consiglia di contattare prima l'azienda (ad esempio, service provider o rivenditore) presso la quale è stato acquistato il Prodotto. È inoltre possibile chiamare Motorola Solutions al numero 1-800-927-2744 (USA/Canada).

## V. COSA NON COPRE LA PRESENTE GARANZIA

- 1 Difetti o danni derivanti da un utilizzo del Prodotto diverso da quello normale e abituale.
- 2 Difetti o danni derivanti da un uso non appropriato, incidenti, contatto con liquidi o negligenza.
- 3 Difetti o danni derivanti da procedure improprie di test, funzionamento, manutenzione, installazione, alterazione, modifica o regolazione.
- 4 Rottura o danni alle antenne se non causati direttamente da difetti di fabbricazione e dei materiali.
- 5 Un Prodotto sottoposto a modifiche, disassemblaggi o riparazioni non autorizzati (inclusa, senza limitazioni, l'aggiunta di apparecchiatura non fornita da Motorola Solutions al Prodotto) che possono influire negativamente sulle prestazioni del Prodotto o interferire con l'ispezione e il collaudo del Prodotto previsti dalla garanzia standard di Motorola Solutions per la verifica di una richiesta di garanzia.
- 6 Un Prodotto il cui numero di serie è stato rimosso o reso illeggibile.
- 7 Batterie ricaricabili se:
  - i sigilli presenti sull'alloggiamento delle celle della batteria sono rotti o mostrano chiari segni di contraffazione.
  - i danni o i difetti sono imputabili al processo di ricarica o all'utilizzo della batteria in apparecchiature o servizi diversi da quelli esplicitamente previsti per il Prodotto.
- 8 Spese di trasporto fino al magazzino delle riparazioni.
- 9 Un Prodotto che, in seguito a un'alterazione illegale o non autorizzata del software/firmware presente nel Prodotto, non funzioni in conformità con le specifiche pubblicate da Motorola Solutions o con l'etichetta della certificazione FCC in vigore per il Prodotto al momento della sua distribuzione iniziale da parte di Motorola Solutions.

- 10 Graffi o altri danni di natura estetica alle superfici del Prodotto che non abbiano conseguenze sul suo funzionamento.
- 11 Usura e logoramento dovuti a cause normali e consuetudinarie.

## VI. DISPOSIZIONI RELATIVE A BREVETTI E SOFTWARE

Motorola Solutions prenderà parte, a proprie spese, a qualsiasi causa legale intentata contro l'acquirente finale in base a un reclamo che dichiara che il Prodotto o componenti del Prodotto violano un brevetto degli Stati Uniti; inoltre, Motorola Solutions si impegna a pagare costi e danni riconosciuti a carico dell'acquirente in qualsiasi causa legale e attribuibili a tale reclamo, ma tale partecipazione e i relativi pagamenti sono da intendersi soggetti alle seguenti condizioni:

- 1 Motorola Solutions deve ricevere immediata notifica scritta da parte dell'acquirente in seguito alla ricezione del reclamo sopra descritto,
- 2 Motorola Solutions sarà l'unico soggetto coinvolto nella causa e unico responsabile di tutte le negoziazioni volte al raggiungimento della risoluzione o compromesso e

- 3 nel caso in cui il Prodotto o le parti diventino o, a giudizio di Motorola Solutions, possano diventare oggetto di una rivendicazione basata sull'infrazione di un brevetto degli Stati Uniti, detto acquirente permetta a Motorola Solutions, a sua discrezione e spese, di acquisire per conto dell'acquirente stesso il diritto di continuare a utilizzare il Prodotto o le parti oppure di sostituire o modificare lo stesso in modo che non contravvenga al brevetto oppure di conferire a detto acquirente un credito rispetto al Prodotto o alle parti equivalente al deprezzamento e di accettare la restituzione dello stesso. Il deprezzamento sarà equivalente all'ammontare annuo relativo alla durata di vita del Prodotto o delle parti come stabilito da Motorola Solutions.

Motorola Solutions declina ogni responsabilità nei confronti di qualsiasi rivendicazione basata sull'infrazione di un brevetto conseguente o imputabile al Prodotto o alle parti fornite con software, apparati o dispositivi non Motorola Solutions, né sarà ritenuta responsabile per l'uso delle apparecchiature accessorie o di software non fornite da Motorola Solutions, che siano installate o utilizzate assieme al Prodotto. La succitata dichiarazione definisce la completa responsabilità di Motorola Solutions relativamente all'infrazione di brevetti da parte del Prodotto e di qualsiasi parte dello stesso.

Le leggi in vigore negli Stati Uniti e in altri Paesi accordano a Motorola Solutions alcuni diritti esclusivi riservati al software Motorola Solutions protetto da copyright, come i diritti esclusivi a riprodurre e distribuire copie di tale software. Il software Motorola Solutions può essere utilizzato solo con il Prodotto in cui è stato originalmente incorporato; è pertanto vietata la sostituzione, la riproduzione, la distribuzione, la modifica in qualsiasi modo e con qualsiasi mezzo di detto software in tale Prodotto oppure il suo utilizzo per creare software derivati dallo stesso. È vietato qualsiasi altro uso di detto software di Motorola Solutions, compresi, senza limiti, l'alterazione, la modifica, la riproduzione, la distribuzione o la decodifica oppure l'esercizio di diritti nei riguardi dello stesso. Non viene concessa per implicazione, per eccezione o in altro modo alcuna licenza nell'ambito di copyright o diritti di brevetto di Motorola Solutions.

## VII. LEGISLAZIONE APPLICABILE

# Ważne informacje dotyczące bezpieczeństwa

**Informacje na temat bezpieczeństwa produktu i działania fal radiowych dla dwukierunkowych radiotelefonów przenośnych**

## **UWAGA!**

**Użytkowanie tego radiotelefonu jest ograniczone wyłącznie do celów zawodowych.** Zgodnie z obowiązującymi normami i przepisami przed rozpoczęciem korzystania z urządzenia należy zapoznać się z podręcznikiem „Informacje na temat bezpieczeństwa produktu i działania fal radiowych dwukierunkowych radiotelefonów przenośnych”, który zawiera instrukcje gwarantujące bezpieczne użytkowanie oraz uwagi dotyczące energii o częstotliwości radiowej.

W celu uzyskania listy zatwierdzonych przez firmę Motorola Solutions anten oraz innych akcesoriów należy odwiedzić następującą stronę internetową:

<http://www.motorolasolutions.com>

Tę stronę celowo pozostawiono pustą.

## Wersja oprogramowania

Wszystkie funkcje opisane poniżej są obsługiwane przez oprogramowanie w wersji **R02.08.05.0000** lub nowszej.

Patrz [Sprawdzanie wersji oprogramowania sprzętowego i wersji Codeplug na str. 242](#), aby określić oprogramowanie radiotelefonu.

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Tę stronę celowo pozostawiono pustą.

## Prawa autorskie

Produkty firmy Motorola Solutions opisanych w tym dokumencie mogą obejmować autorskie programy komputerowe firmy Motorola Solutions. Prawo w Stanach Zjednoczonych i innych krajach zapewnia firmie Motorola Solutions pewne wyłączne prawa do programów komputerowych chronionych prawem autorskim. Zgodnie z tym wszelkie chronione prawem autorskim programy firmy Motorola Solutions zawarte w produktach Motorola opisanych w tym dokumencie nie mogą być kopiowane ani reprodukowane w jakikolwiek sposób bez wyraźnej pisemnej zgody firmy Motorola Solutions.

© 2017 Motorola Solutions, Inc. Wszystkie prawa zastrzeżone.

Żadna część niniejszego dokumentu nie może być powielana, przesyłana, przechowywana w systemie wyszukiwania danych ani tłumaczona na żaden język lub język komputerowy, w jakiegokolwiek formie i w jakikolwiek sposób, bez uprzedniej pisemnej zgody firmy Motorola Solutions, Inc.

Ponadto zakup produktów firmy Motorola Solutions nie może być uważany za przekazanie – w sposób bezpośredni, dorozumiany, na podstawie wcześniejszych oświadczeń lub w jakikolwiek inny – licencji chronionych

prawami autorskimi, patentami lub zgłoszeniami patentowymi, należących do firmy Motorola Solutions. Wyjątek stanowi zwykła, niewyłączna, wolna od opłat licencja, jaka zgodnie z prawem jest skutkiem transakcji sprzedaży produktu.

### Zastrzeżenie

Należy pamiętać, że niektóre z funkcji, instalacje i możliwości opisane w tym dokumencie mogą nie mieć zastosowania do lub nie być licencjonowane do użytku z określonym systemem, lub mogą być zależne od cech określonej przewoźnej jednostki abonenckiej lub konfiguracji niektórych parametrów. Aby uzyskać więcej informacji, należy zwrócić się do osoby kontaktowej firmy Motorola Solutions.

### Znaki towarowe

MOTOROLA, MOTO, MOTOROLA SOLUTIONS oraz stylizowane logo M są znakami towarowymi lub zastrzeżonymi znakami towarowymi firmy Motorola Trademark Holdings, LLC i są używane na licencji. Wszystkie inne znaki towarowe należą do odpowiednich właścicieli.

## Dyrektywa Unii Europejskiej (UE) dotycząca zużytego sprzętu elektrycznego i elektronicznego (WEEE)

■ Dyrektywa WEEE wymaga, aby produkty sprzedawane do krajów Unii Europejskiej były oznaczone etykietą z symbolem przekreślonego kosza, umieszczoną na urządzeniu (lub, w niektórych przypadkach, na opakowaniu).

Zgodnie z definicją dyrektywy WEEE etykieta z symbolem przekreślonego kosza oznacza, że klienci i użytkownicy końcowi w krajach UE nie mogą wyrzucać sprzętu lub akcesoriów elektrycznych i elektronicznych wraz z odpadami gospodarczymi.

Klienci i użytkownicy końcowi w krajach Unii Europejskiej powinni uzyskać informacje na temat zbiórki odpadów w danym państwie u miejscowego sprzedawcy urządzeń lub w centrum serwisowym.

## Prawa autorskie do oprogramowania komputerowego

Produkty firmy Motorola Solutions opisane w tym podręczniku mogą obejmować autorskie oprogramowanie firmy Motorola Solutions umieszczone w pamięci półprzewodnikowej lub na innych nośnikach. Prawo Stanów Zjednoczonych Ameryki Północnej i innych krajów chroni interes firmy Motorola Solutions w zakresie wyłączności własności programów komputerowych, w tym m.in. wyłącznego prawa do kopiowania lub reprodukcji w dowolnej formie programów komputerowych objętych prawami autorskimi. Zgodnie z powyższym, żaden program komputerowy firmy Motorola Solutions objęty prawami autorskimi, zawarty w urządzeniach firmy Motorola Solutions opisywanych w niniejszym podręczniku, nie może być skopiowany, powielony, poddany modyfikacji, przetwarzaniu wstecznemu lub dystrybucji w jakiegokolwiek formie bez uzyskania wyraźnej pisemnej zgody firmy Motorola Solutions. Ponadto zakup produktów firmy Motorola Solutions nie może być uważany za przekazanie – w sposób bezpośredni, dorozumiany, na podstawie wcześniejszych oświadczeń lub w jakikolwiek inny – licencji chronionych prawami autorskimi, patentami lub

zgłoszeniami patentowymi, należących do firmy Motorola Solutions. Wyjątek stanowi zwykła, niewyłączna, wolna od opłat licencja, jaka zgodnie z prawem jest skutkiem transakcji sprzedaży produktu.

Technologia kodowania głosu AMBE+2™ wykorzystana w tym produkcie jest chroniona przez prawa firmy Digital Voice Systems Inc. dotyczące własności intelektualnej, z prawami patentowymi i autorskimi oraz tajemnicą handlową włącznie.

Technologia kodowania głosu jest licencjonowana wyłącznie do użytku z tym wyposażeniem komunikacyjnym. Zabronione jest dekompilowanie, inżynieria wsteczna lub demontowanie kodu obiektowego albo konwertowanie go w inny sposób do czytelnej formy przez użytkowników korzystających z powyższej technologii.

Tę stronę celowo pozostawiono pustą.

## Środki ostrożności

Przenośny cyfrowy radiotelefon serii MOTOTRBO spełnia normę IP67, która wymaga, aby urządzenie było odporne na niekorzystne warunki polowe, np. zanurzenie w wodzie. Ta sekcja opisuje niektóre podstawowe środki ostrożności.

### PRZESTROGA:

Radiotelefonu nie wolno demontować. Może to spowodować uszkodzenie uszczelki i utratę szczelności urządzenia. Konserwację należy przeprowadzać w serwisie, wyposażonym w sprzęt do testowania i wymiany uszczelki radiotelefonu.

- Jeżeli urządzenie wpadnie do wody, należy nim potrząsnąć, aby osuszyć zamoczony głośnik i mikrofon. Woda może obniżyć wydajność pracy urządzenia.
- Jeżeli akumulator radiotelefonu był narażony na działanie wody, przed jego ponownym montażem należy oczyścić i wysuszyć styki zarówno akumulatora, jak i radiotelefonu. Pozostałości wody mogą spowodować spięcie.
- Jeżeli radiotelefon został zanurzony w substancji powodującej korozję (np. woda morska), należy urządzenie oraz akumulator wymyć w słodkiej wodzie, a następnie osuszyć.
- Do czyszczenia zewnętrznych powierzchni radiotelefonu należy stosować roztwór łagodnego płynu do mycia naczyń i słodkiej wody (np. jedna łyżeczka detergentu na 4 l wody).
- Nie przetykaj otworu wentylacyjnego umieszczonego na obudowie radia poniżej styków akumulatora. Służy on do wyrównania ciśnienia wewnątrz urządzenia. W przeciwnym wypadku może dojść do utraty szczelności radiotelefonu.
- Nie zaklejaj ani nie zasłaniaj w żaden sposób tego otworu.
- Dbaj o to, aby do otworu nie dostały się żadne tłuste substancje.
- Radiotelefon z właściwie zamontowaną anteną może zostać zanurzony w wodzie do głębokości 1 metra, na maksymalnie 30 minut. Przekroczenie limitu czasu lub niezamontowanie anteny może spowodować uszkodzenie radiotelefonu.
- Podczas czyszczenia urządzenia nie korzystaj ze sprężonych środków w aerozolu – w ten sposób możesz przekroczyć dopuszczalne ciśnienie, a woda dostanie się do środka.

Tę stronę celowo pozostawiono pustą.

## Podstawowe operacje

Ten rozdział opisuje działania ułatwiające rozpoczęcie korzystania z radiotelefonu.

### Włączanie radiotelefonu

Postępuj zgodnie z procedurą, aby włączyć radiotelefon.

---

Naciśnij przycisk **Wł./Wył.**

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Zielona dioda LED zapala się.
- Na wyświetlaczu pojawi się komunikat **MOTOTRBO (TM)**, a następnie powitalna wiadomość lub obraz.
- Uruchomi się ekran główny.

Jeśli funkcja dzwonek/alertów jest wyłączona, sygnał uruchamiania nie zostanie wyemitowany.

Sprawdź baterię, jeśli radiotelefon nie włącza się. Upewnij się, że jest on naładowany i prawidłowo zainstalowany. Skontaktuj się ze sprzedawcą, jeśli radiotelefon nadal się nie włącza.

[Wyślij informację zwrotną](#)

### Wyłączanie radiotelefonu

Postępuj zgodnie z procedurą, aby wyłączyć radiotelefon.

Naciśnij i przytrzymaj przycisk **On/Off**.

Całkowite wyłączenie radiotelefonu może trwać do siedmiu sekund.

Na wyświetlaczu pojawi się komunikat **Wyłączanie**.

---

### Regulacja głośności

Postępuj zgodnie z procedurą, aby zmienić głośność radiotelefonu.

Wykonaj jedną z następujących czynności:

- Obróć **pokrętko włączania/wyłączania/regulacji głośności** w prawo, aby zwiększyć głośność.
- Obróć **pokrętko włączania/wyłączania/regulacji głośności** w lewo, aby zmniejszyć głośność.

**UWAGA:**

W radiotelefonie można zaprogramować minimalną głośność. Nie będzie można wyciszyć urządzenia poniżej tej wartości. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

---

## Elementy sterujące radiotelefonu

Ten rozdział wyjaśnia działanie przycisków i funkcji sterujących radiotelefonu.

- 1 Przycisk włączania/wyłączania/informacji
- 2 Pokrętko Głośność/Kanał
- 3 Symbol
- 4 Przycisk Menu/OK
- 5 Przyciski przewijania Góra/Dół

[Wyślij informację zwrotną](#)

- 6 Głośnik
- 7 Przycisk Powrót/Ekran główny
- 8 Przednie programowane przyciski
- 9 Złącze akcesoriów
- 10 Wskaźniki LED

## Pokrętko Głośność/Kanał

**Pokrętko głośności/kanału** można zaprogramować do sterowania głośnością i kanałami lub samą głośnością.

Informacje o regulowaniu głośności znajdziesz w rozdziale [Regulacja głośności na str. 43](#).

Aby zmienić kanał, naciśnij i przytrzymaj **pookrętko głośności/kanału** do momentu wejścia w tryb wyboru kanału. Obróć **pookrętko głośność/kanał**, aby wybrać kanał. Wykonaj jedną z poniższych czynności, aby zamknąć tryb wyboru kanału:

- Naciśnij **pookrętko głośność/kanał**.
- Naciśnij przycisk .
- Naciśnij przycisk .
- Czekaj do momentu otwarcia menu.

## Zmiana ustawień działania dwufunkcyjnego pokrętła.

Wykonaj procedurę ustawiania działania dwufunkcyjnego pokrętła radiotelefonu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do dwufunkcyjnego pokrętła. Naciśnij , aby wybrać.

Na ekranie pojawiają się opcje Tylko głośn oraz Głośn i kanał.

- 
- 5 Naciśnij  lub , aby przejść do wybranych ustawień. Naciśnij , aby wybrać.  
✓ pojawi się obok wybranych ustawień. Ekran wraca do poprzedniego menu.
-

## Przyciski mikrofonu z klawiaturą

Można użyć klawiatury alfanumerycznej 3 × 4 z nawigacją 4-kierunkową mikrofonu (numer części Motorola Solutions RMN5127\_), aby uzyskać dostęp do funkcji radiotelefonu. W przypadku wielu znaków konieczne jest wielokrotne naciśnięcie przycisków. W poniższej tabeli podano liczbę naciśnień przycisku konieczną do wpisania wymaganego znaku.

Przy cisk	Liczba naciśnień przycisku												
	1	2	3	4	5	6	7	8	9	10	11	12	13
	1	.	,	?	!	@	&	'	%	—	:	*	#
	A	B	C	2									
	D	E	F	3									
	G	H	I	4									
	J	K	L	5									

Ciąg dalszy tabeli...

Przy cisk	Liczba naciśnień przycisku												
	1	2	3	4	5	6	7	8	9	10	11	12	13
	M	N	O	6									
	P	Q	R	S	7								
	T	U	V	8									
	W	X	Y	Z	9								
	0		<b>UWAGA:</b> Wciśnięcie powoduje wpisanie symbolu „0”, a przytrzymanie uaktywni funkcję CAPS LOCK (wpisywanie dużych liter). Kolejne długie naciśnięcie powoduje dezaktywację funkcji CAPS.										
	* lub del		<b>UWAGA:</b> Wciśnięcie podczas wpisywania tekstu powoduje usunięcie znaku. Naciśnięcie podczas wpisywania cyfr powoduje wpisanie symbolu *.

Tę stronę celowo pozostawiono pustą.

## WAVE

Środowisko o dużym zasięgu działania (sieć WAVE™) zapewnia nowy sposób nawiązywania połączeń między radiotelefonami.

Funkcja ta obsługuje także połączenia między radiotelefonami i innymi urządzeniami wraz z obsługą sieci WAVE. Kanał WAVE musi jednak zostać skonfigurowany do korzystania z tej funkcji.

W przypadku korzystania z kanału WAVE, radiotelefon nie jest w stanie odbierać połączenia od innych systemów i może odbierać tylko połączenia sieci WAVE.

Jeśli radiotelefon korzysta z kanału WAVE, radiotelefon automatycznie włącza funkcję Wi-Fi i przechodzi do logowania do serwera WaVE. Połączenia sieci WAVE są wykonywane, gdy radiotelefon jest podłączony do sieci IP za pośrednictwem Wi-Fi.

### UWAGA:

Ta funkcja dotyczy tylko urządzeń DM4601e.

### Tabela 1: Ikony wyświetlacza WAVE

Następujące ikony pojawiają się chwilowo na wyświetlaczu, gdy włączona jest sieć WAVE.

	<b>Połączono z siecią WAVE</b>
Nawiązano połączenie z siecią WAVE.	
	<b>Brak połączenia z siecią WAVE</b>
Nie nawiązano połączenia z siecią WAVE.	

## Ustawianie aktywnego kanału WAVE

Kanały WAVE są konfigurowane za pomocą oprogramowania CPS. Postępuj zgodnie z procedurą, aby wybrać wymagany kanał WAVE.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij przycisk  lub , aby przejść do Kanałów WAVE. Naciśnij , aby wybrać.
- 3 Naciśnij przycisk  lub , aby wybrać wymagany kanał WAVE. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Ustaw jako domyślny. Naciśnij , aby wybrać.

Na wyświetlaczu obok wybranego języka pojawi się .

## Wyświetlanie informacji o kanale WAVE

Postępuj zgodnie z procedurą aby wyświetlić informacje o kanale WAVE.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Lista kanałów WAVE**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij przycisk  lub , aby przejść do Kanałów WAVE. Naciśnij , aby wybrać.

- Naciśnij przycisk  lub , aby wybrać wymagany kanał WAVE. Naciśnij , aby wybrać.

- Naciśnij  lub , aby wyświetlić szczegóły. Naciśnij , aby wybrać.

Wyświetlacz pokazuje szczegóły kanału WAVE.

## Pozwala wyświetlić informacje o punktach końcowych WAVE.

Postępuj zgodnie z procedurą aby wyświetlić informacje o punktach końcowych WAVE.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Kontakt**. Przejdź do kroku [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij przycisk  lub , aby przejść do Punktów końcowych. Naciśnij , aby wybrać.

---

3 Naciśnij przycisk  lub , aby wybrać wymagany punkt końcowy WAVE. Naciśnij , aby wybrać.

---

4 Naciśnij przycisk , aby wybrać opcję Wyświetl szczegóły.

---

Wyświetlacz pokazuje szczegóły punktu końcowego WAVE.

## Zmiana konfiguracji WAVE

Postępuj zgodnie z procedurą, aby ustawić adres IP serwera WAVE, identyfikator użytkownika i hasło.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do WAVE. Naciśnij , aby wybrać.

---

5 Naciśnij przycisk , aby wybrać Adres serwera. Naciśnij przycisk , aby zmienić adres serwera. Naciśnij , aby wybrać.

---

6 Naciśnij , aby przejść do ID użytkownika. Naciśnij przycisk , aby zmienić identyfikator użytkownika. Naciśnij , aby wybrać.

---

- 7 Naciśnij przycisk , aby przejść do pozycji **Hasło**. Naciśnij przycisk , aby wyświetlić lub zmienić hasło WAVE. Naciśnij , aby wybrać.

- 8 Naciśnij przycisk , aby **Zastosować**. Naciśnij przycisk , aby zastosować wszystkie dokonane zmiany.

Wyświetlacz pokazuje tymczasowo informację o powodzeniu, a następnie powraca do ekranu **Ustawienia radia**.

## Inicjowanie połączeń grupowych

Postępuj zgodnie z procedurą, aby wykonywać połączenia na kanale zwrotnym.

- 1 Wybierz kanał zwrotny z wymaganym aliasem lub ID grupy.

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED zapala się. Pierwsza linia tekstu pokazuje ikoną **Połączenia grupowego** oraz alias. Druga linia tekstu pokazuje alias grupy WAVE.

- 3 Wykonaj jedną z następujących czynności:
- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
  - Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

- 4 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada. Na wyświetlaczu pojawi się ikona **Połączenia grupowego** oraz alias lub ID, jak również alias lub ID radiotelefonu nadającego.

- 5 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Radiotelefon powróci do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

---

Tę stronę celowo pozostawiono pustą.

## Obsługa systemu Capacity Max

Capacity Max to system trunkingowy oparty na kanale sterującym. Funkcje, które są dostępne dla użytkowników radiotelefonu w ramach tego systemu są opisane w tym rozdziale.

### Przycisk PTT

Przycisk **PTT** służy dwóm podstawowym celom.

- Po nawiązaniu połączenia przycisk **PTT** umożliwia nadawanie do innych radiotelefonów uwzględnionych w danym połączeniu. Mikrofon jest włączany po naciśnięciu przycisku **PTT**.
- Jeżeli połączenie nie zostało nawiązane, przycisk **PTT** umożliwia zainicjowanie nowego połączenia.

Naciśnij i przytrzymaj przycisk **PTT**, a następnie mów do mikrofonu. Aby słuchać, zwolnij przycisk **PTT**.

Jeśli zostanie włączona opcja Sygnał zezwolenia na rozmowę albo zostanie włączona funkcja Pogłosu **PTT**, przed rozpoczęciem rozmowy zaczekaj na zakończenie emisji krótkiego dźwięku alertu.

Jeżeli jest włączona funkcja wskazywania wolnego kanału w radiotelefonie (zaprogramowana przez sprzedawcę), usłyszysz krótki dźwięk alertu w chwili, gdy przycisk **PTT** zostanie zwolniony w radiotelefonie docelowym (radiotelefon, który odbiera połączenie), informujący o tym, że kanał jest wolny i można odpowiadać.

Słuchać ciągle sygnał zakazu rozmowy, jeśli połączenie jest przerwane, np. gdy radiotelefon odbiera połączenie alarmowe. Należy zwolnić przycisk **PTT**.

### Programowalne przyciski

W zależności od długości naciśnięcia przycisku, sprzedawca może zaprogramować przyciski jako skróty do funkcji radiotelefonu.

#### Krótkie naciśnięcie

Szybkie naciśnięcie i zwolnienie przycisku.

#### Naciśnij i przytrzymaj przycisk

Naciśnięcie i przytrzymanie przez zaprogramowany czas.

#### UWAGA:

Więcej informacji na temat zaprogramowanego czasu naciśnięcia **przycisku alarmowego**: [Tryb awaryjny na str. 463](#).

# Konfigurowalne funkcje radiotelefonu

Sprzedawca lub administrator systemu może przypisać do programowalnych przycisków następujące funkcje radiotelefonu.

## Otoczenie audio

Pozwala wybrać środowisko użytkownika radiotelefonu.

## Profile dźwięku

Pozwala wybrać odpowiedni profil audio.

## Przełącznik audio Bluetooth®

Przełącza ścieżkę dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a zewnętrznym urządzeniem Bluetooth.

## Połączenie Bluetooth

Inicjuje operację znajdowania i łączenia z urządzeniem Bluetooth.

## Rozłączenie Bluetooth

Zamyka wszystkie istniejące połączenia Bluetooth między radiotelefonem a urządzeniami Bluetooth.

## Tryb wykrywania Bluetooth

Radiotelefon rozpoczyna pracę w trybie wykrywania łączności Bluetooth.

## Kontakty

Zapewnia bezpośredni dostęp do listy kontaktów.

## Alert połączenia

Zapewnia bezpośredni dostęp do listy kontaktów, umożliwiając wybranie kontaktu, do którego ma zostać wysłany alert o połączeniu.

## Dziennik połączeń

Pozwala wybrać listę dziennika połączeń.

## Tryb awaryjny

W zależności od zaprogramowanej konfiguracji powoduje zainicjowanie lub anulowanie trybu awaryjnego.

## Nagłośnienie zewnętrzne

Włącza i wyłącza routing sygnału audio między wzmacniaczem głośnika i wewnętrznym systemem nagłośnienia radiotelefonu.

## Resetowanie kanału głównego

Ustawia nowy kanał główny.

## Wyciszanie przypomnienia kanału głównego

Wycisza przypomnienia kanału głównego.

## Lok. w budynku

Włącza i wyłącza funkcję lokalizacji wewnętrznej.

**Inteligentny dźwięk**

Włącza lub wyłącza inteligentny dźwięk.

**Wybieranie ręczne**

Inicjuje połączenie indywidualne przez wprowadzenie dowolnego ID użytkownika.

**Ręczny roaming miejsca**

Włącza ręczne wyszukiwanie stacji.

**AGC mikrofonu**

Włącza i wyłącza automatyczne wzmocnienie wewnętrzznego mikrofonu (AGC).

**Powiadomienia**

Zapewnia bezpośredni dostęp do listy powiadomień.

**Szybki dostęp**

Natychmiastowo aktywuje wstępnie zdefiniowane połączenie z rozgłaszaniem, indywidualne, telefoniczne lub grupowe, alert połączenia lub szybką wiadomość tekstową.

**Funkcja płytki opcji**

Włączenie lub wyłączenie funkcji płytki opcji dla kanałów uaktywnianych płytką opcji.

**Telefon**

Zapewnia bezpośredni dostęp do listy kontaktów telefonu.

**Prywatne**

Włącza lub wyłącza funkcję prywatności.

**System nagłośnienia (PA)**

Włącza lub wyłącza system nagłośnienia radiotelefonu.

**Alias oraz ID radiotelefonu**

Wyświetla alias oraz identyfikator radiotelefonu.

**Zdalny nasłuch**

Włącza mikrofon radiotelefonu docelowego bez sygnalizowania.

**Informacje o stacji**

Wyświetla nazwę i ID bieżącej stacji w systemie Capacity Max.

Odtwarzanie wiadomości głosowych powiadomień obszarowych dla bieżącej stacji, gdy opcja Odczytywanie powiadomień jest włączona.

**Blokada stacji**

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

**Kontrola telemetrii**

Kontroluje końcówkę wyjściową radiotelefonu lokalnego lub zdalnego.

### **Wiadomość tekstowa**

Pozwala wybrać menu wiadomości tekstowych.

### **Wzmocnienie głośki „r”**

Umożliwia włączenie lub wyłączenie funkcji wzmocnienia głośki „r”.

### **Zapowiedź głosowa wł./wył.**

Włącza i wyłącza funkcję zapowiedzi głosowej.

### **Zapowiedź głosowa dla kanału**

Odtwarza zapowiedzi głosowe strefy i kanału dla bieżącego kanału. Ta funkcja jest niedostępna, kiedy Zapowiedź głosowa jest wyłączona.

### **Wi-Fi**

Włączanie i wyłączanie Wi-Fi.

### **Wybór obszaru**

Umożliwia wybór strefy z listy.

## **Konfigurowalne ustawienia/ narzędzia**

Poniższe funkcje i ustawienia radiotelefonu można przypisać do przycisków programowalnych.

### **Tony/Alerty**

Włącza lub wyłącza wszystkie sygnały dźwiękowe i alerty.

### **Podświetlenie**

Włącza lub wyłącza podświetlenie wyświetlacza.

### **Kanał wyżej/niżej**

W zależności od sposobu zaprogramowania zmienia kanał na poprzedni lub następny.

### **Tryb wyświetlania**

Włącza i wyłącza tryb dzienny/nocny wyświetlacza.

### **Poziom mocy**

Przełącza między wysokim i niskim poziomem mocy nadawania.

## **Dostęp do zaprogramowanych funkcji**

Postępuj zgodnie z procedurą, aby uzyskać dostęp do zaprogramowanych funkcji.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk. Przejdź do [krok 3](#).
  - Naciśnij  , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby wejść do funkcji menu, a następnie naciśnij , aby wybrać funkcję lub wejść do dodatkowego menu.

- 3 Wykonaj jedną z następujących czynności:

- Naciśnij , aby powrócić do poprzedniego ekranu.
- Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

Radiotelefon automatycznie ukrywa menu po zdefiniowanym okresie braku aktywności i ponownie wyświetla ekran główny.

Przyciski nawigacji w menu są również dostępne na klawiaturze mikrofonu. Zobacz [Przyciski mikrofonu z klawiaturą na str. 47](#).

## Wskaźniki statusu

Ten rozdział opisuje ikony, wskaźniki stanu oraz sygnały dźwiękowe radiotelefonu.

## Ikony

Wyświetlacz ciekłokrystaliczny (LCD) radiotelefonu pokazuje stan radiotelefonu, pozycje tekstowe oraz pozycje menu.

**Tabela 2: Ikony na wyświetlaczu**

Poniższe ikony pojawiają się na pasku stanu, który widnieje w górnej części wyświetlacza radiotelefonu. Ikony są położone po lewej stronie i uporządkowane według kolejności występowania lub użycia. Ikony są także określone dla danego kanału.

	<p><b>Połączenie Bluetooth</b></p> <p>Funkcja Bluetooth jest włączona. Ikona będzie widoczna, gdy zostanie podłączone urządzenie w trybie Bluetooth.</p>
	<p><b>Brak połączenia Bluetooth</b></p> <p>Funkcja Bluetooth jest aktywna, ale nie ma podłączonych zdalnych urządzeń Bluetooth.</p>

*Ciąg dalszy tabeli...*

	<p><b>Tryb awaryjny</b> Radiotelefon jest przełączony do trybu awaryjnego.</p>
	<p><b>GNSS dostępny</b> Funkcja GNSS jest włączona. Ikona świeci się, gdy dostępne jest położenie ustalone.</p>
	<p><b>GNSS niedostępny</b> Funkcja GNSS jest włączona, ale dane z satelity nie są odbierane.</p>
	<p><b>Duże ilości danych</b> Radiotelefon odbiera duże ilości danych i kanał jest zajęty.</p>
	<p><b>Funkcja lokalizacji wewnętrznej dostępna<sup>1</sup></b> Lokalizacja wewnętrzna jest włączona i dostępna.</p>

*Ciąg dalszy tabeli...*

	<p><b>Lokalizacja wewnętrzna niedostępna<sup>1</sup></b> Lokalizacja wewnętrzna jest włączona, ale niedostępna z powodu wyłączenia funkcji Bluetooth lub zawieszenia skanowania punktów sygnałowych przez Bluetooth.</p>
	<p><b>Tryb wyciszony</b> Tryb wyciszenia jest włączony, a głośnik wyciszony.</p>
	<p><b>Powiadomienia</b> Na liście powiadomień znajduje się co najmniej jedno przeoczone zdarzenie.</p>
	<p><b>Płytki opcjonalna</b> Płytki opcji jest włączona. (Płytki opcji tylko w zgodnych modelach)</p>
	<p><b>Niedziałająca płytki opcji</b> Płytki opcji jest wyłączona.</p>

*Ciąg dalszy tabeli...*

<sup>1</sup> Dotyczy tylko modeli z najnowszą wersją konfiguracji programowej i sprzętowej.

	<p><b>Czas opóźnienia programowania bezprzewodowego</b></p> <p>Wskazuje czas pozostały do automatycznego zrestartowania radiotelefonu.</p>
	<p><b>Priorytet 1</b></p> <p>Wskazuje grupę konwersacyjną o priorytecie 1.</p>
	<p><b>Priorytet 2</b></p> <p>Wskazuje grupę konwersacyjną o priorytecie 2.</p>
	<p><b>Wskaźnik siły odbieranego sygnału (RSSI)</b></p> <p>Liczba wyświetlanych pasków oznacza natężenie sygnału radiowego. Cztery paski oznaczają najsilniejszy sygnał. Ta ikona jest wyświetlana tylko podczas odbierania sygnału.</p>

*Ciąg dalszy tabeli...*

	<p><b>Zawieszenie odpowiedzi</b></p> <p>Zawieszenie odpowiedzi jest włączone.</p>
	<p><b>Tylko dzwonek</b></p> <p>Tryb dzwonienia jest włączony.</p>

*Ciąg dalszy tabeli...*

	<b>Doskonały sygnał Wi-Fi<sup>2</sup></b> Sygnał Wi-Fi jest doskonały.
	<b>Dobry sygnał Wi-Fi<sup>2</sup></b> Sygnał Wi-Fi jest dobry.
	<b>Średni sygnał Wi-Fi<sup>2</sup></b> Sygnał Wi-Fi jest średni.
	<b>Słaby sygnał Wi-Fi<sup>2</sup></b> Sygnał Wi-Fi jest słaby.
	<b>Sieć Wi-Fi niedostępna<sup>2</sup></b> Sygnał Wi-Fi jest niedostępny.

**Tabela 3: Zaawansowane ikony menu**

Poniższe ikony znajdują się na wyświetlaczu obok pozycji menu i oferują możliwość wyboru jednej z dwóch opcji lub wskazują, że istnieje podmenu zawierające dwie opcje.

<sup>2</sup> Dotyczy tylko urządzeń DM4601e.

	<b>Pole wyboru (zaznaczone)</b> Oznacza, że opcja została wybrana.
	<b>Pole wyboru (puste)</b> Oznacza, że opcja nie została wybrana.
	<b>Pole wypełnione na czarno</b> Oznacza opcję wybraną dla pozycji menu zawierającej podmenu.

**Tabela 4: Ikony urządzeń Bluetooth**

Następujące ikony pojawiają się również obok elementów listy dostępnych urządzeń z włączoną funkcją Bluetooth, wskazując typ urządzenia.

	<b>Urządzenie audio Bluetooth</b> Urządzenie z włączoną funkcją Bluetooth, np. zestaw słuchawkowy.
	<b>Urządzenie danych Bluetooth</b> Urządzenie z włączoną funkcją Bluetooth, np. skaner.

*Ciąg dalszy tabeli...*

### Urządzenie PTT Bluetooth

Urządzenie PTT z włączoną funkcją Bluetooth, np. urządzenie PTT (POD).

### Połączenie grupowe/ogólne

Oznacza aktywne połączenie grupowe lub ogólne.

Na liście kontaktów oznacza alias (nazwę) lub identyfikator (numer) grupy.

### Połączenie indywidualne

Oznacza aktywne połączenie prywatne.

Na liście kontaktów oznacza alias (nazwisko) lub identyfikator (numer) abonenta.

### Połączenie telefoniczne jako połączenie grupowe/ogólne

Informuje, że trwa połączenie telefoniczne jako połączenie grupowe/ogólne.

Na liście kontaktów oznacza alias (nazwę) lub identyfikator (numer) grupy.

*Ciąg dalszy tabeli...*

**Tabela 5: Symbole połączenia**

Następujące symbole pojawiają się na wyświetlaczu podczas połączenia. Te ikony pojawiają się w Liście kontaktów i oznaczają typ aliasu lub ID.

### Połączenie Bluetooth z komputerem

Informuje, że trwa połączenie Bluetooth z komputerem.

Wskazuje na liście kontaktów alias grupy (nazwę) lub identyfikator (numer) połączenia Bluetooth z komputerem.

### Połączenie dyspozytorskie

Kontakt typu Połączenie dyspozytorskie służy do wysyłania wiadomości tekstowej do komputera-dyspozytora za pośrednictwem serwera wiadomości tekstowych innej firmy.

*Ciąg dalszy tabeli...*

	<p><b>Połączenie telefoniczne jako połączenie prywatne</b>          Informuje, że trwa połączenie telefoniczne jako połączenie prywatne.</p> <p>Wskazuje na liście kontaktów alias telefonu (nazwę) lub identyfikator (numer).</p>
---	--

**Tabela 6: Ikony kodów zadań**

Następujące ikony pojawiają się chwilowo na wyświetlaczu w folderze kodów zadań.

	<p><b>Wszystkie zadania</b>          Wyświetla listę wszystkich zadań.</p>
	<p><b>Nowe zadania</b>          Wyświetla nowe zadania.</p>
	<p><b>W toku</b>          Zadania są transmitowane. Ta ikona jest widoczna przed podaniem informacji, że kodów zadań nie udało</p>

*Ciąg dalszy tabeli...*

	<p>się wysłać lub zostały wysłane pomyślnie.</p>
	<p><b>Nie można wysłać</b>          Nie można wysłać zadań.</p> <p><b>Wysłana pomyślnie</b>          Zadania zostały pomyślnie wysłane.</p>
	<p><b>Priorytet 1</b>          Wskazuje poziom priorytetu 1 dla zadań.</p>
	<p><b>Priorytet 2</b>          Wskazuje poziom priorytetu 2 dla zadań.</p>
	<p><b>Priorytet 3</b>          Wskazuje poziom priorytetu 3 dla zadań.</p>

**Tabela 7: Miniikony powiadomienia**

Następujące ikony pojawiają się chwilowo na wyświetlaczu po podjęciu działania wykonania czynności.

	<b>Nieskuteczna transmisja (Negatywny)</b>
	Czynność zakończona niepowodzeniem.
	<b>Skuteczna transmisja (Pozytywny)</b>
	Czynność zakończona powodzeniem.
	<b>Nadawanie w toku (Przejęciowy)</b>
	Nadawanie. Ta ikona jest widoczna przed podaniem informacji czy transmisja była skuteczna, czy nie.

**Tabela 8: Ikony wysłanych pozycji**

W prawym górnym rogu wyświetlacza radiotelefonu, w folderze wysłanych pozycji, pojawiają się następujące ikony.

 lub 	<b>W toku</b>
	Wiadomość tekstowa do aliasu lub identyfikatora abonenta oczekuje na wysłanie, po czym następuje oczekiwanie na potwierdzenie.
	Wiadomość tekstowa do aliasu lub identyfikatora grupy oczekuje na wysłanie.
 lub 	<b>Wiadomość pojedyncza lub grupowa – przeczytano</b>
	Wiadomość została przeczytana.
 lub 	<b>Wiadomość pojedyncza lub grupowa – nie przeczytano</b>
	Wiadomość nie została przeczytana.
 lub 	<b>Nie można wysłać</b>
	Wiadomość tekstowa nie może zostać wysłana.

*Ciąg dalszy tabeli...*

## Dioda LED

Dioda LED pokazuje stan operacyjny radiotelefonu.

### Migające światło czerwone

Auto-test podczas uruchamiania nie powiódł się.

Radiotelefon odbiera transmisję alarmową.

Radiotelefon nadaje przy niskim poziomie naładowania akumulatora.

Radiotelefon znalazł się poza zasięgiem ARTS, jeśli skonfigurowano.

Tryb wyciszenia jest włączony.

### Zielone światło ciągłe

Radiotelefon jest w trakcie uruchamiania.

Radiotelefon nadaje.

Radiotelefon wysyła alert połączenia lub transmisję alarmową.

### Migające światło zielone

Radiotelefon odbiera połączenie lub dane.

Radiotelefon odbiera transmisję programowania bezprzewodowego.

Radiotelefon wykrywa aktywność programowania bezprzewodowego.

#### UWAGA:

Aktywność ta może oddziaływać lub może nie oddziaływać na zaprogramowany kanał radiotelefonu ze względu na charakter protokołu cyfrowego.

### Podwójne miganie zielonego światła

Radiotelefon odbiera połączenie lub dane poufne.

### Żółte światło stałe

Radiotelefon znajduje się w trybie wykrywania Bluetooth.

### Migające światło żółte

Radiotelefon musi odpowiedzieć na alert połączenia.

### Podwójnie migające światło żółte

Roaming automatyczny jest włączony.

Radiotelefon szuka nowej sieci.

Radiotelefon musi odpowiedzieć na grupowy alert połączenia.

Radiotelefon jest zablokowany.

## Sygnaly

Poniżej przedstawiono sygnaly, które wybrzmiewaja w glosniku radiotelefonu.

Wysoki sygnal

Niski sygnal

## Sygnaly dzwiekowe

Sygnaly dzwiekowe stanowia akustyczne potwierdzenie stanu radiotelefonu lub odpowiedz radiotelefonu na odbierane dane.

### Sygnal ciagly

Dzwiek jednostajny. Ciagly do zakonczenia.

### Dzwiek okresowy

Generowany okresowo, zaleznie od konfiguracji radiotelefonu. Dzwiek jest włączany, przerywany i powtarzany automatycznie.

### Sygnal powtarzany

Pojedynczy dzwiek powtarzany az do chwili, kiedy zostanie przerwany przez uzytkownika.

### Sygnal jednorazowy

Emitowany jednokrotnie przez krótki czas skonfigurowany przez radiotelefon.

## Sygnaly wskaźnikowe

Sygnaly dzwiekowe wskazuja status radiotelefonu po dzialaniu zmierzajacym do wykonania konkretnego zadania.

Dzwiek informacyjny

Dzwiek ostrzegawczy

## Rejestracja

Istnieje wiele komunikatów związanych z rejestracją, które użytkownik radiotelefonu może otrzymać.

### Rejestrowanie

Zazwyczaj zgłoszenie rejestracji jest wysyłane do systemu w trakcie włączania zasilania, zmiany grupy rozmówców lub podczas działania roamingu. Jeśli rejestracja radiotelefonu w stacji się nie powiedzie, urządzenie automatycznie spróbuje przełączyć się na inną stację. Radiotelefon tymczasowo usuwa stację, w której próbował się zarejestrować z listy roamingu.

Wskazanie oznacza, że radiotelefon jest zajęty wyszukiwaniem stacji w trybie roamingu, lub że znalazł stację, ale oczekuje na odpowiedź na zgłoszenie rejestracji.

Po wyświetleniu na ekranie radiotelefonu komunikatu **Rejestrowanie** urządzenie emituje sygnał dźwiękowy, a żółta dioda LED mignie dwukrotnie, sygnalizując wyszukiwanie stacji.

Jeśli komunikaty się utrzymują, użytkownik powinien zmienić lokalizację lub, jeśli jest to dozwolone, wybrać inną stację przy pomocy ręcznego skanowania kanałów.

### Poza zasięgiem

Radiotelefon jest uznawany za znajdujący się poza zasięgiem, gdy nie jest w stanie wykryć sygnału z systemu lub z bieżącej stacji. Zazwyczaj wskazanie to oznacza, że urządzenie znajduje się poza geograficznym zasięgiem częstotliwości radiowej (RF) sygnału wychodzącego.

Gdy komunikat **Poza zasięgiem** jest wyświetlany na ekranie radiotelefonu, urządzenie emituje dźwięk powtarzający się, a czerwona dioda LED zaczyna migać.

Skontaktuj się ze sprzedawcą lub administratorem systemu, jeśli radiotelefon w dalszym ciągu pokazuje komunikaty wskazujące, że jest poza zasięgiem, jeśli znajduje się on na obszarze z dobrym zasięgiem częstotliwości radiowej.

### Powiązanie grupy rozmówców nie powiodło się

Radiotelefon podejmuje próbę powiązania się z grupą rozmówców określonych w kanałach lub za pomocą ujednoliconego położenia pokrętki (UKP) podczas rejestracji.

Radiotelefon, któremu nie uda się powiązać z grupą rozmówców, nie może nawiązywać ani odbierać połączeń z tą grupą rozmówców.

Gdy radiotelefon nie zostanie powiązany z grupą rozmówców, na ekranie głównym pojawia się komunikat Alias UKP na podświetlonym tle.

Skontaktuj się ze sprzedawcą lub administratorem systemu, jeśli radiotelefon otrzymuje komunikaty o niepowodzeniu przy próbach powiązania z grupą rozmówców.

## Odmowa rejestr.

Wskaźniki odmowy rejestracji są otrzymywane w przypadku braku akceptacji rejestracji w systemie.

Radiotelefon nie podaje użytkownikowi konkretnego powodu odmowy rejestracji. Zazwyczaj odmowa rejestracji następuje, gdy operator systemu wyłączył dostęp radiotelefonu do systemu.

Gdy nastąpi odmowa rejestracji radiotelefonu, na ekranie urządzenia pojawi się komunikat Odmowa rejestracji, a żółta dioda LED mignie dwukrotnie, sygnalizując wyszukiwanie stacji.

## Wybór strefy i kanału

Ten rozdział wyjaśnia, jak wybrać strefę lub kanał.

Radiotelefon można zaprogramować do obsługi maksymalnie 250 stref Capacity Max, przy maksymalnej liczbie 160 kanałów na strefę. Każda strefa Capacity Max może zawierać maksymalnie 16 pozycji do przypisania.

## Wybieranie stref

Postępuj zgodnie z procedurą, aby wybrać określoną strefę.

- 1 Wykonaj jedną z następujących czynności:
    - Naciśnij zaprogramowany przycisk **wyboru strefy**. Przejdź do [krok 3](#).
    - Naciśnij  , aby uzyskać dostęp do menu.

---
  - 2 Naciśnij  lub  , aby przejść do Strefy. Naciśnij  , aby wybrać. Wyświetlacz pokazuje  i obecną strefę.
-

- 3 Naciśnij  lub , aby przejść do wybranej strefy. Naciśnij , aby wybrać.
- Na wyświetlaczu przez chwilę będzie widoczny komunikat <Strefa> wybrano i ponownie zostanie wyświetlony ekran wybranego obszaru.

## Wybieranie stref przy pomocy Wyszukiwania aliasów

Postępuj zgodnie z procedurą, aby wybrać wymaganą strefę przy pomocy wyszukiwania aliasów.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Strefy. Naciśnij , aby wybrać.
- Wyświetlacz pokazuje  obecną strefę.

- 3 Wprowadź pierwszą literę wymaganego aliasu. Na wyświetlaczu pojawia się migający kursor.
- 4 Wprowadź pozostałe litery wymaganego aliasu. Podczas wyszukiwania aliasu jest rozróżniana wielkość liter. Jeżeli istnieją co najmniej dwie pozycje o tej samej nazwie, wyświetlacz pokazuje tę, która jest pierwsza na liście. Pierwsza linia tekstu pokazuje wprowadzone litery. Następne linie tekstu pokazują wybrane wyniki wyszukiwania.
- 5 Naciśnij , aby wybrać.
- Na wyświetlaczu przez chwilę będzie widoczny komunikat <Strefa> wybrano i ponownie zostanie wyświetlony ekran wybranego obszaru.

## Wybór rodzaju połączenia

Skorzystaj z pokrętła kanałów, aby wybrać typ połączenia. Dostępne opcje: połączenie grupowe, połączenie z rozgłaszaniem, połączenie ogólne oraz połączenie

indywidualne, w zależności od zaprogramowanych ustawień radiotelefonu. Jeśli ustaw pokrętko wyboru kanału na inną pozycję (która ma przypisany rodzaj połączenia). Powoduje to, że radiotelefon ponownie rejestruje się w systemie Capacity Max. Radiotelefon zostanie zarejestrowany przy użyciu identyfikatora grupy rozmówców, który zaprogramowano dla nowej pozycji pokrętko wyboru kanałów wyznaczającej typ połączenia.

Radiotelefon nie działa po wybraniu niezaprogramowanego kanału, dlatego należy wybrać zaprogramowany kanał przy użyciu pokrętko wyboru kanałów.

Po wyświetleniu żądanej strefy (jeśli w radiotelefonie jest wiele stref) pokrętko wyboru kanału wybierz typ połączenia.

## Wybieranie stacji

Stacja zapewnia zasięg w określonym obszarze. W sieci z wieloma stacjami radiotelefon w systemie Capacity Max automatycznie będzie wyszukiwać nową stację, jeśli poziom sygnału aktualnej stacji spadnie do nieakceptowanego poziomu.

System Capacity Max może obsługiwać do 250 stacji.

## Żądanie roamingu

Żądanie roamingu to informacja, że radiotelefon szuka innej stacji, nawet jeśli poziom sygnału z bieżącej stacji jest akceptowalny.

Jeśli brak dostępnych stacji:

- na wyświetlaczu radiotelefonu pojawi się informacja **Wyszukiwanie i przeszukiwanie stacji uwzględnionych na liście** będzie kontynuowane.
- Radiotelefon powróci do poprzedniej stacji, jeśli wcześniejsza stacja nadal będzie niedostępna.

### UWAGA:

Jest to funkcja zaprogramowana przez sprzedawcę.

Naciśnij zaprogramowany przycisk **Ręczny roaming miejsca**.

Usłyszysz sygnał oznaczający, że radiotelefon został przełączony do nowej stacji. Na wyświetlaczu pojawi się komunikat **ID stacji <numer stacji>**.

## Blokada stacji wł./wył.

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

Naciśnij zaprogramowany przycisk **Blok miej**.

Jeśli funkcja **Blokada stacji** jest włączona:

- Usłyszysz dźwięk informacyjny oznaczający, że radiotelefon został zablokowany w bieżącej stacji.
- Na wyświetlaczu pojawi się informacja St. baz. Zablok.

Jeśli funkcja **Blokada stacji** jest wyłączona:

- Usłyszysz dźwięk ostrzegawczy oznaczający, że radiotelefon został odblokowany.
  - Na wyświetlaczu pojawi się informacja St. baz. Odblok.
- 

## Ograniczenie stacji

Administrator systemu radiotelefonicznego Capacity Max może określić, z których stacji sieciowych może korzystać radiotelefon.

Zmiana listy dozwolonych i niedozwolonych stacji nie wymaga ponownego programowania radiotelefonu. Jeśli radiotelefon spróbuje zarejestrować się w niedozwolonej stacji, otrzyma informację na ten temat. Następnie radiotelefon wyszuka inną stację sieciową.

Gdy występują ograniczenia dotyczące stacji, radiotelefon wyświetla komunikat *Odmowa rejestr.*, a żółta dioda LED miga dwukrotnie, sygnalizując wyszukiwanie stacji.

## Trunking stacji

Stacja musi być w stanie komunikować się z kontrolerem trunkingu, aby rozwiązanie mogło być uznawane za System trunkingowy.

Jeśli stacja nie może komunikować się z kontrolerem w systemie, radiotelefon przejdzie w tryb Trunkingu stacji. W trybie Trunkingu stacji radiotelefon okresowo sygnalizuje użytkownikowi dźwiękiem i wizualnie informację o ograniczonej funkcjonalności.

Gdy radiotelefon pracuje w trybie Trunkingu stacji, wyświetlany jest komunikat Trunking stacji i emitowany jest dźwięk powtarzający się.

Radiotelefony w trybie Trunkingu stacji są nadal w stanie wykonywać połączenia grupowe i prywatne oraz wysyłać wiadomości tekstowe do innych radiotelefonów w obrębie tej samej stacji. Konsole głosowe, rejestratory zapisu, bramki telefoniczne i aplikacje danych nie są w stanie komunikować się z radiotelefonami w obrębie stacji.

Po przejściu w tryb Trunkingu stacji radiotelefon, który wykonuje połączenia z innymi stacjami, będzie w stanie komunikować się wyłącznie z innymi radiotelefonami w obrębie tej samej stacji. Komunikacja z i do pozostałych stacji zostanie utracona.

#### **UWAGA:**

Jeśli istnieje wiele stacji, które obsługują bieżącą lokalizację radiotelefonu, i jedna z nich wejdzie w tryb Trunkingu stacji, radiotelefon będzie nawiązywać połączenie w roamingu z inną stacją, która znajduje się w jego zasięgu.

## Połączenia

Ten rozdział opisuje, w jaki sposób odbierać, wykonywać, przerywać i odpowiadać na połączenia.

Po wybraniu kanału możesz wybrać alias albo ID abonenta lub grupy przy pomocy jednej z poniższych funkcji:

#### **Wyszukiwanie aliasu**

Ta metoda jest używana tylko w przypadkach wywołań grupowych, indywidualnych i ogólnych przy pomocy mikrofonu z klawiaturą.

#### **Lista kontaktów**

Ta metoda pozwala na bezpośredni dostęp do Listy kontaktów.

#### **Wybieranie ręczne (za pomocą Kontaktów)**

Metoda ta jest używana tylko w przypadkach wywołań indywidualnych i telefonicznych przy pomocy mikrofonu z klawiaturą.

#### **Zaprogramowane klawisze numeryczne**

Ta metoda jest używana tylko w przypadkach wywołań grupowych, indywidualnych i ogólnych przy pomocy mikrofonu z klawiaturą.

**UWAGA:**

Do przycisku numerycznego można przypisać tylko jeden alias lub ID, ale z jednym aliasem lub ID może być skojarzonych kilka przycisków numerycznych. Wszystkie klawisze na mikrofonie z klawiaturą mogą zostać przypisane. Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447.](#)

**Zaprogramowany przycisk Szybkiego dostępu**

Ta metoda jest używana tylko w przypadkach wywołań grupowych, indywidualnych i telefonicznych.

Do przycisku **Szybkiego dostępu** można przypisać jedno ID przy pomocy krótkiego lub długiego naciśnięcia programowalnego przycisku. W radiotelefonie można zaprogramować wiele przycisków **Szybkiego dostępu**.

**Przycisk programowalny**

Ta metoda jest używana tylko w przypadku połączeń telefonicznych.

**Pokrętło regulacji głośności/wyboru kanałów**

Ta metoda pozwala na ręczne wybranie aliasu lub ID użytkownika bądź aliasu lub ID grupy.

Zielony wskaźnik jest włączony wówczas, gdy radiotelefon jest przełączony do trybu nadawania i miga po przełączeniu radiotelefonu w tryb odbioru.

**UWAGA:**

Dioda LED świeci ciągłym światłem zielonym, gdy radiotelefon nadaje, a podwójnie miga na zielono podczas odbioru wywołania z aktywną funkcją prywatności.

Po włączeniu funkcji poufności transmisję będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności lub taką samą wartością i ID klucza (programowane przez sprzedawcę), jak te skonfigurowane w transmitującym radiotelefonie.

Dodatkowe informacje: [Prywatne na str. 504.](#)

## Połączenia grupowe

Radiotelefon musi być skonfigurowany jako część grupy, aby otrzymywać lub wykonywać połączenia od/do użytkowników grupy.

## Inicjowanie połączeń grupowych

Aby zainicjować połączenie z grupą użytkowników, radiotelefon musi być skonfigurowany jako członek danej

grupy. Postępuj zgodnie z procedurą, aby wykonywać połączenia grupowe.

- Wykonaj jedną z następujących czynności:
  - Wybierz kanał z aktywnym grupowym aliasem lub ID. Zobacz [Wybór rodzaju połączenia na str. 72](#).
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

- Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED zapala się. Pierwsza linia tekstu pokazuje ikoną **Połączenia grupowego** oraz alias.

- Wykonaj jedną z następujących czynności:
  - Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
  - Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

- Aby słuchać, zwolnij przycisk **PTT**. Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada. Na wyświetlaczu pojawi się

ikoną **Połączenia grupowego** oraz alias lub ID, jak również alias lub ID radiotelefonu nadającego.

- Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

Inicjator połączenia może nacisnąć przycisk , aby zakończyć połączenie grupowe.

## Inicjowanie połączeń grupowych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia grupowe przy pomocy Listy kontaktów.

- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby otworzyć Kontak ty.

Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do

wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

---

4 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się.

W pierwszym wierszu znajduje się alias lub identyfikator abonenta. W drugim zobaczysz napis **Połączenie grupowe** wraz z ikoną **Połączenie grupowe**.

---

5 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
  - Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.
- 

6 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga po uzyskaniu odpowiedzi od użytkownika należącego do grupy. Na wyświetlaczu pojawi się ikona **Połączenia grupowego** oraz alias lub ID, jak również alias lub ID radiotelefonu nadającego.

---

7 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

Inicjator połączenia może nacisnąć przycisk  , aby zakończyć połączenie grupowe.

Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

---

## Inicjowanie połączeń grupowych przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia grupowe przy pomocy programowalnego przycisku numerycznego.

- 1 Długie naciśnięcie zaprogramowanego przycisku numerycznego przypisanego do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED zapala się.

- 3 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga po uzyskaniu odpowiedzi od użytkownika należącego do grupy.

- 4 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Radiotelefon powróci do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

Inicjator połączenia może nacisnąć przycisk , aby zakończyć połączenie grupowe.

Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447](#).

## Inicjowanie połączeń grupowych przy pomocy Wyszukiwania aliasów

Można również użyć funkcji wyszukiwania aliasu lub wyszukiwania alfanumerycznego do pobrania wymaganego aliasu abonenta. Ta funkcja jest dostępna tylko po wyświetleniu listy kontaktów. Postępuj zgodnie z procedurą, aby wykonywać połączenia przy pomocy wyszukiwania aliasów.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby otworzyć Kontak ty.

Naciśnij  , aby wybrać.

Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

---

3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje Numer telefonu:. W drugim wierszu wyświetlacza zobaczysz migający

kursor. Użyj klawiatury, aby wprowadzić numer telefonu.

---

4 Naciśnij  , aby wybrać. Jeżeli wybrany wpis jest pusty, urządzenie wyemituje dźwięk ostrzegawczy i wyświetli komunikat Błędny numer telefonu.

---

5 Naciśnij  lub  , aby wybrać numer i

Naciśnij  , aby wybrać. Jeżeli nie skonfigurowano kodu dostępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod dostępu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź kod dostępu i

naciśnij przycisk  , aby przejść dalej. W przypadku powodzenia zabrzmi sygnał DTMF. Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu. W pierwszym wierszu wyświetlacza pojawi się alias lub identyfikator abonenta i ikona RSSI. W drugim wierszu wyświetlacza pojawi się komunikat Połączenie telefoniczne i ikona połączenia telefonicznego. W przypadku niepowodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw. tel. Nieudane. Radiotelefon

wraca do ekranu wprowadzania kodu dostępu. Jeżeli zdefiniowano kod dostępu dla listy kontaktów, radiotelefon wraca do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

- 
- 6 Naciśnij przycisk **PTT**, aby mówić, albo zwolnij go, aby słuchać. Ikona **RSSI** znika podczas transmisji.
- 
- 7 W razie potrzeby wprowadzenia dodatkowych cyfr podczas połączenia telefonicznego wykonaj jedną z czynności:
- Naciśnij dowolny przycisk klawiatury, aby wpisać dodatkowe cyfry. Pierwszy wiersz wyświetlacza pokazuje parametr **Dodatk. cyfr:**. W drugim wierszu wyświetlacza zobaczysz migający kursor.
- Wpisz dodatkowe cyfry i naciśnij przycisk , aby przejść dalej. Radiotelefon wyemituje sygnał dźwiękowy DTMF i wróci do poprzedniego ekranu.
- Naciśnij **przycisk szybkiego połączenia**. Urządzenie wyemituje sygnał dźwiękowy DTMF. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.
- 

- 8 Aby zakończyć połączenie, naciśnij przycisk . Jeżeli nie skonfigurowano kodu odstępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat **Kod odstępu:**. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź kod odstępu i naciśnij , aby przejść dalej. Radiotelefon powróci do poprzedniego ekranu. Urządzenie emituje sygnał dźwiękowy DTMF i wyświetla komunikat **Kończę połączenie telefoniczne**. W przypadku powodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw tel zakończ**. Radiotelefon przywraca ekran połączenia telefonicznego. W przypadku niepowodzenia radiotelefon przywraca ekran połączenia telefonicznego. Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu **Naciśnij OK: Wykon poł**. Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw tel zakończ**. Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do

ekranu wyświetlanego przed zainicjowaniem połączenia.

- 9 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat `Połączenie zakończone`.

Inicjator połączenia może nacisnąć przycisk , aby zakończyć połączenie grupowe.

#### UWAGA:

Podczas uzyskiwania dostępu do kanału naciśnij

przycisk , aby odrzucić próbę połączenia i przycisk sygnałów dźwiękowych, aby zakończyć

wyszukiwanie aliasu. Naciśnij przycisk  lub

, aby zakończyć wyszukiwanie aliasu.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie. Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk Wł./wył., pokrętko regulacji głośności i przełącznik kanałów. Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

## Odbieranie połączeń grupowych

Postępuj zgodnie z procedurą, aby odpowiadać na połączenia grupy.

Odbieranie połączenia grupowego:

- Zielona dioda LED miga.

- W prawym górnym rogu wyświetlacza pojawia się ikona **Połączenia grupowego**.
- Pierwszy wiersz tekstu pokazuje alias rozmówcy.
- Druga linia tekstu wyświetla alias wywołania grupowego.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

#### 1 Wykonaj jedną z następujących czynności:

- Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.
- Jeżeli jest aktywna funkcja Przerywanie głosowe, naciśnij przycisk **PTT**, aby wyłączyć dźwięk z transmitującego radiotelefonu i zwolnić kanał do odpowiedzi.

Zielona dioda LED zapala się.

#### 2 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

#### 3 Aby słuchać, zwolnij przycisk **PTT**.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

## Połączenia z rozgłaszaniem

Połączenie z rozgłaszaniem to jednokierunkowe połączenie głosowe od dowolnego użytkownika do całej grupy rozmówców.

Funkcja połączeń z rozgłaszaniem umożliwia transmisję do grupy rozmówców tylko użytkownikowi inicjującemu połączenie, natomiast odbiorcy połączenia nie mogą odpowiadać.

W trybie rozgłaszania inicjator może także zakończyć połączenie z rozgłaszaniem. Aby odebrać połączenie od grupy użytkowników lub zadzwonić do grupy użytkowników, radiotelefon musi być skonfigurowany jako członek grupy.

## Nawiązywanie połączeń z rozgłaszaniem

Postępuj zgodnie z procedurą, aby wykonywać połączenia z rozgłaszaniem.

- Wykonaj jedną z następujących czynności:
  - Wybierz kanał z aktywnym grupowym aliasem lub ID. Zobacz [Wybór rodzaju połączenia na str. 72](#).
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

- Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Na wyświetlaczu pojawia się ikona **połączenia grupowego** i alias.

- Wykonaj jedną z następujących czynności:
  - Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
  - Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

Inicjator połączenia może nacisnąć przycisk , aby zakończyć połączenie z rozgłaszaniem.

## Nawiązywanie połączeń z rozgłaszaniem przy użyciu listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia z rozgłaszaniem przy pomocy Listy kontaktów.

- Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby otworzyć Kontakt **tj**. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

- Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED miga.

W pierwszym wierszu znajduje się alias lub identyfikator abonenta. W drugim zobaczysz napis **Połączenie grupowe** wraz z ikoną **Połączenie grupowe**.

5 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

Inicjator połączenia może nacisnąć przycisk  , aby zakończyć połączenie z rozgłaszaniem.

## Inicjowanie połączeń z rozgłaszaniem przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia z rozgłaszaniem przy pomocy programowalnego przycisku numerycznego.

1 Długie naciśnięcie zaprogramowanego przycisku numerycznego przypisanego do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. W prawym górnym rogu wyświetlacza pojawia się ikona **Połączenia grupowego**. Pierwszy wiersz tekstu pokazuje alias rozmówcy.

3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

Inicjator połączenia może nacisnąć przycisk  , aby zakończyć połączenie z rozgłaszaniem.

## Odbieranie połączeń z rozgłaszaniem

Postępuj zgodnie z procedurą, aby odbierać połączenia z rozgłaszaniem w radiotelefonie.

Odbieranie połączenia z rozgłaszaniem:

- Zielona dioda LED miga.
- W prawym górnym rogu wyświetlacza pojawia się ikona **Połączenia grupowego**.
- Pierwszy wiersz tekstu pokazuje alias rozmówcy.
- Druga linia tekstu wyświetla alias wywołania grupowego.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

### UWAGA:

Odbiorcy nie mogą prowadzić odsłuchu podczas połączenia z rozgłaszaniem. Na wyświetlaczu pojawi się komunikat Zakaz odsłuchu. Dźwięk oznaczający zakaz odsłuchu zostanie niezwłocznie wyemitowany, jeżeli przycisk **PTT** został wciśnięty podczas połączenia z rozgłaszaniem.

## Połączenie indywidualne

Połączenie prywatne jest inicjowane przez indywidualny radiotelefon i skierowane do innego indywidualnego radiotelefonu.

Połączenia prywatne można skonfigurować na dwa sposoby.

- Pierwszy typ połączenia nosi nazwę Off Air Call Set-Up (OACSU). System OACSU konfiguruje połączenie po przeprowadzeniu testu radiowego i automatycznie nawiązuje połączenie.
- Drugi typ połączenia to Full Off Air Call Set-Up (FOACSU). System FOACSU również konfiguruje połączenie po przeprowadzeniu testu radiowego. Jednak w systemie FOACSU nawiązanie połączenia wymaga potwierdzenia użytkownika, który może je odebrać lub odrzucić.

Typ połączenia jest konfigurowany przez administratora systemu.

**UWAGA:**

Zarówno inicjator wywołania jak i odbiorca są w stanie zakończyć trwające połączenie indywidualne

naciskając przycisk .

## Inicjowanie połączeń prywatnych

W celu zainicjowania połączenia prywatnego należy odpowiednio zaprogramować radiotelefon. Jeśli ta funkcja nie jest włączona, w przypadku zainicjowania połączenia użytkownik usłyszy sygnał ostrzegawczy. Postępuj zgodnie z procedurą, aby wykonywać połączenia prywatne. Jeśli radiotelefon docelowy nie jest dostępny, użytkownik usłyszy krótki sygnał dźwiękowy, a wyświetlacz wyświetli komunikat Strona niedostępna.

- 1 Wykonaj jedną z następujących czynności:
  - Wybierz kanał z aliasem lub ID aktywnego abonenta. Zobacz [Wybór rodzaju połączenia na str. 72](#).
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Na wyświetlaczu pojawi się ikona **połączenia prywatnego**, alias abonenta oraz stan połączenia.

- 3 Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

- 4 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada.

- 5 Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat *Połączenie zakończone*.

Zarówno inicjator wywołania jak i odbiorca są w stanie zakończyć trwające połączenie indywidualne naciskając przycisk .

## Inicjowanie połączeń prywatnych przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia prywatne przy pomocy programowalnego przycisku numerycznego.

- 1 Długie naciśnięcie zaprogramowanego przycisku numerycznego przypisanego do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED zapala się. W prawym górnym rogu wyświetlacza pojawia się ikona **połączenia prywatnego**. Pierwszy wiersz tekstu pokazuje alias rozmówcy. Drugi wiersz tekstu przedstawia stan połączenia.

- 3 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga, kiedy radiotelefon docelowy odpowiada. Wyświetlacz pokazuje alias docelowego radiotelefonu.

- 4 Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat *Połączenie zakończone*.

Zarówno inicjator wywołania, jak i odbiorcy są w stanie zakończyć trwające połączenie prywatne, naciskając przycisk .

Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447](#).

## Inicjowanie połączeń prywatnych przy pomocy Wyszukiwania aliasów

- 1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty.

Naciśnij , aby wybrać.

Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

---

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje Numer telefonu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Użyj klawiatury, aby wprowadzić numer telefonu.

---

4 Naciśnij , aby wybrać. Jeżeli wybrany wpis jest pusty, urządzenie wyemituje dźwięk ostrzegawczy i wyświetli komunikat Błędny numer telefonu.

---

5 Naciśnij  lub , aby wybrać numer i Naciśnij , aby wybrać. Jeżeli nie skonfigurowano kodu dostępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod dostępu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź kod dostępu i

naciśnij przycisk , aby przejść dalej. W przypadku powodzenia zabrmi sygnał DTMF. Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu. W pierwszym wierszu wyświetlacza pojawi się alias lub identyfikator abonenta i ikona **RSSI**. W drugim wierszu wyświetlacza pojawi się komunikat Połączenie telefoniczne i ikona **połączenia telefonicznego**. W przypadku niepowodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw. tel. Nieudane. Radiotelefon wraca do ekranu wprowadzania kodu dostępu. Jeżeli zdefiniowano kod dostępu dla listy kontaktów, radiotelefon wraca do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

---

6 Naciśnij przycisk **PTT**, aby mówić, albo zwolnij go, aby słuchać. Ikona **RSSI** znika podczas transmisji.

---

7 W razie potrzeby wprowadzenia dodatkowych cyfr podczas połączenia telefonicznego wykonaj jedną z czynności:

- Naciśnij dowolny przycisk klawiatury, aby wpisać dodatkowe cyfry. Pierwszy wiersz wyświetlacza pokazuje parametr Dodatk. cyfr:. W drugim

wierszu wyświetlacza zobaczysz migający kursor.

Wpisz dodatkowe cyfry i naciśnij przycisk , aby przejść dalej. Radiotelefon wyemituje sygnał dźwiękowy DTMF i wróci do poprzedniego ekranu.

- Naciśnij **przycisk szybkiego połączenia**. Urządzenie wyemituje sygnał dźwiękowy DTMF. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

8

Aby zakończyć połączenie, naciśnij przycisk . Jeżeli nie skonfigurowano kodu odstępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod odstępu: . W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź

kod odstępu i , aby przejść dalej. Radiotelefon powróci do poprzedniego ekranu. Urządzenie emituje sygnał dźwiękowy DTMF i wyświetla komunikat Kończę połączenie telefoniczne. W przypadku powodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wzyw tel zakończ. Radiotelefon przywraca ekran połączenia telefonicznego. W

przypadku niepowodzenia radiotelefon przywraca ekran połączenia telefonicznego. Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu Naciśnij OK: Wykon poł. Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wzyw tel zakończ. Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

- 9 Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat Połączenie zakończone.

Zarówno inicjator wywołania, jak i odbiorcy są w stanie zakończyć trwające połączenie prywatnie, naciskając przycisk .

**UWAGA:**

Podczas uzyskiwania dostępu do kanału naciśnij

przycisk , aby odrzucić próbę połączenia i przycisk sygnałów dźwiękowych, aby zakończyć

wyszukiwanie aliasu. Naciśnij przycisk  lub

, aby zakończyć wyszukiwanie aliasu.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie.

## Nawiązywanie połączenia prywatnego przy użyciu przycisku szybkiego połączenia

Funkcja szybkiego połączenia umożliwia łatwe nawiązywanie połączenia prywatnego o wstępnie określonym aliasie lub identyfikatorze. Ta funkcja może zostać przypisana do krótkiego lub długiego naciśnięcia programowanego przycisku.

Do przycisku szybkiego połączenia można przypisać tylko jeden alias lub identyfikator. W radiotelefonie można zaprogramować wiele przycisków szybkiego połączenia.

- 1 Naciśnij zaprogramowany przycisk **szybkiego połączenia**, aby nawiązać połączenie prywatne o wstępnie zdefiniowanym aliasie lub identyfikatorze.

---

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Dioda LED świeci na zielono.  
Na wyświetlaczu pojawi się alias lub identyfikator połączenia prywatnego.

---

- 3 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

---

- 4 Aby słuchać, zwolnij przycisk **PTT**.  
Gdy radiotelefon odbiorcy odpowie, zielona dioda LED zacznie migać.  
W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone.

Zarówno inicjator wywołania jak i odbiorca są w stanie zakończyć trwające połączenie indywidualne naciskając przycisk .

## Inicjowanie połączeń prywatnych przy pomocy ręcznego wybierania

Postępuj zgodnie z procedurą, aby wykonywać połączenia prywatne przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać.

5 Wykonaj jedną z następujących czynności:

- Wprowadź ID abonenta i naciśnij , aby kontynuować.
- Edytuj ID abonenta, z którym połączono się poprzednio, a następnie naciśnij , aby kontynuować.

6 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Wyświetlacz pokazuje alias docelowego radiotelefonu.

7 Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

8 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada. Na wyświetlaczu pojawi się ID lub alias nadającego użytkownika.

9 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia

przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat `Połączenie zakończone`.

Zarówno inicjator wywołania, jak i odbiorcy są w stanie zakończyć trwające połączenie prywatne, naciskając przycisk .

## Otrzymywanie połączeń prywatnych

Po otrzymaniu połączenia prywatnego skonfigurowanego jako Off Air Call Poradnik dotyczący ustawień (OACSU):

- Zielona dioda LED miga.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

### UWAGA:

W zależności od ustawień urządzenia, tj. zastosowania systemu OACSU albo Full Off Air Call Set-Up (FOACSU), odbieranie połączeń indywidualnych może, ale nie musi, wymagać potwierdzenia przez użytkownika.

W systemie OACSU radiotelefon wyłącza wyciszenie, a połączenie zostanie automatycznie odebrane.

## Odbieranie połączeń prywatnych

Po otrzymaniu połączenia prywatnego skonfigurowanego jako Full Off Air Call Set-Up (FOACSU):

- Zielona dioda LED miga.
- 1 Aby odebrać połączenie indywidualne, skonfigurowane jako FOACSU, wykonaj jedną z następujących czynności:
    - Naciśnij przycisk  lub , aby Odebrać i naciśnij przycisk , aby odebrać połączenie indywidualne.

- Naciśnij przycisk **PTT** przy dowolnej pozycji.

Zielona dioda LED zapala się.

- 
- 2 Poczekał na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- 

- 3 Aby słuchać, zwolnij przycisk **PTT**.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat `Połączenie zakończone`.

#### **UWAGA:**

Zarówno inicjator wywołania, jak i odbiorcy są w stanie zakończyć trwające połączenie

prywatne, naciskając przycisk .

## Odrzucanie połączeń prywatnych

Po otrzymaniu połączenia prywatnego skonfigurowanego jako Full Off Air Call Set-Up (FOACSU):

- Zielona dioda LED miga.

Aby odrzucić połączenie indywidualne, skonfigurowane jako FOACSU, wykonaj jedną z następujących czynności:

- Naciśnij przycisk  lub , aby wybrać

Odrzuć i naciśnij przycisk , aby odrzucić połączenie indywidualne.

- Naciśnij przycisk , aby odrzucić połączenie indywidualne.
- 

## Połączenia ogólne

Połączenie ogólne jest inicjowane przez pojedynczy radiotelefon i kierowane do wszystkich radiotelefonów w obrębie stacji lub do wszystkich radiotelefonów w obrębie kilku stacji, zależnie od konfiguracji systemu.

Połączenie ogólne jest wykorzystywane do przekazywania ważnych komunikatów, które wymagają uwagi użytkownika. Użytkownicy korzystający z systemu nie mogą odpowiadać na połączenie ogólne.

System Capacity Max obsługuje połączenia ogólne stacji i w trybie wielu stacji. Administrator systemu może skonfigurować jedną lub obie funkcje w radiotelefonie.

#### UWAGA:

Abonenci mogą obsługiwać ogólnosystemowe połączenia ogólne, ale infrastruktura firmy Motorola Solutions nie obsługuje takich połączeń.

## Inicjowanie połączeń ogólnych

Radiotelefon musi być wcześniej zaprogramowany, aby możliwe było inicjowanie połączeń ogólnych. Postępuj zgodnie z procedurą, aby wykonywać połączenia ogólne.

- 1 Wybierz kanał aktywnego aliasu grupowego połączenia ogólnego lub identyfikatora. Zobacz [Wybór rodzaju połączenia na str. 72](#).

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Na wyświetlaczu pojawi się ikona **Wywoł grup** i w zależności od typu konfiguracji `Wyw wszys`, `Wyw wszys w miejscu` albo `Wyw. wielu kom..`

- 3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

Użytkownicy korzystający z danego kanału nie mogą odpowiadać na połączenie ogólne.

Inicjator połączenia może nacisnąć przycisk , aby zakończyć połączenie ogólne.

## Inicjowanie połączeń ogólnych przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia ogólne przy pomocy programowalnego przycisku numerycznego.

- 1 Naciśnij i przytrzymaj zaprogramowany przycisk numeryczny przypisany do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest

obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

---

### 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Ekran pokazuje ikonę **połączenia grupowego** i w zależności od typu konfiguracji **wszystkie połączenia, połączenie ogólne stacji albo połączenie w trybie wielu stacji**.

---

### 3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

Inicjator połączenia może nacisnąć przycisk  , aby zakończyć połączenie ogólne.

Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447](#).

## Inicjowanie połączeń ogólnych przy pomocy Wyszukiwania aliasów

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby otworzyć Kontak ty.  
Naciśnij  , aby wybrać.

Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje Numer telefonu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Użyj klawiatury, aby wprowadzić numer telefonu.

4 Naciśnij  , aby wybrać. Jeżeli wybrany wpis jest pusty, urządzenie wyemituje dźwięk ostrzegawczy i wyświetli komunikat Błędny numer telefonu.

5 Naciśnij  lub , aby przejść do funkcji Połącz z telefonem. Naciśnij , aby wybrać. Jeżeli nie skonfigurowano kodu dostępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod dostępu: . W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź

kod dostępu i naciśnij przycisk , aby przejść dalej. W przypadku powodzenia zabrmi sygnał DTMF. Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu. W pierwszym wierszu wyświetlacza pojawi się alias lub identyfikator abonenta i ikona RSSI. W drugim wierszu wyświetlacza pojawi się komunikat Połączenie telefoniczne i ikona połączenia telefonicznego. W przypadku niepowodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw. tel. Niewdane. Radiotelefon wraca do ekranu wprowadzania kodu dostępu. Jeżeli zdefiniowano kod dostępu dla listy kontaktów, radiotelefon wraca do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

6 Naciśnij przycisk **PTT**, aby mówić, albo zwolnij go, aby słuchać. Ikona RSSI znika podczas transmisji.

7 W razie potrzeby wprowadzenia dodatkowych cyfr podczas połączenia telefonicznego wykonaj jedną z czynności:

- Naciśnij dowolny przycisk klawiatury, aby wpisać dodatkowe cyfry. Pierwszy wiersz wyświetlacza pokazuje parametr Dodatk. cyfr: . W drugim wierszu wyświetlacza zobaczysz migający kursor.

Wpisz dodatkowe cyfry i naciśnij przycisk , aby przejść dalej. Radiotelefon wyemituje sygnał dźwiękowy DTMF i wróci do poprzedniego ekranu.

- Naciśnij **przycisk szybkiego połączenia**. Urządzenie wyemituje sygnał dźwiękowy DTMF. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

8 Aby zakończyć połączenie, naciśnij przycisk . Jeżeli nie skonfigurowano kodu odstępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod odstępu: . W drugim wierszu

wyświetlacza zobaczysz migający kursor. Wprowadź kod odstępu i , aby przejść dalej. Radiotelefon powróci do poprzedniego ekranu. Urządzenie emituje sygnał dźwiękowy DTMF i wyświetla komunikat **Kończę połączenie telefoniczne**. W przypadku powodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw tel zakończ**. Radiotelefon przywraca ekran połączenia telefonicznego. W przypadku niepowodzenia radiotelefon przywraca ekran połączenia telefonicznego. Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu **Naciśnij OK: Wykon poł.** Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw tel zakończ**. Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

#### UWAGA:

Inicjator połączenia może nacisnąć przycisk , aby zakończyć połączenie ogólne.

## Odbieranie połączeń ogólnych

Po odebraniu połączenia ogólnego:

- Zostanie wyemitowany sygnał.
- Zielona dioda LED miga.
- W prawym górnym rogu wyświetlacza pojawia się ikona **Połączenia grupowego**.
- Pierwszy wiersz tekstu pokazuje alias rozmówcy.
- Druga linia tekstu wyświetla wszystkie połączenia, połączenie ogólne stacji oraz połączenie w trybie wielu stacji w zależności od typu konfiguracji.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

Po zakończeniu połączenia radiotelefon powraca do ekranu sprzed odebrania połączenia ogólnego.

Jeżeli włączona jest funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa sygnał alertu, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Nie można odpowiadać na połączenie ogólne.

#### **UWAGA:**

Radiotelefon przerywa odbiór połączenia ogólnego, jeżeli użytkownik przełączy kanał podczas odbierania połączenia. Podczas połączenia ogólnego nie można kontynuować nawigacji w menu lub edycji aż do chwili, kiedy połączenie zostanie zakończone.

## Połączenia telefoniczne

Połączenie prywatne jest połączeniem wykonywanym z indywidualnego radiotelefonu na telefon.

W systemie Capacity Max radiotelefon może odbierać połączenia i prowadzić odsłuch, nawet jeśli funkcja połączeń telefonicznych jest wyłączona.

Funkcję połączenia telefonicznego można włączyć poprzez przypisanie i ustawienie numerów telefonów w systemie. Skontaktuj się z administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

## Wykonywanie połączeń telefonicznych

Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne.

- 1 Naciśnij zaprogramowany **Przycisk szybkiego dostępu** na określonym aliasie lub ID.

Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

Jeżeli nie skonfigurowano kodu dostępu na liście kontaktów, na ekranie pojawia się komunikat Kod dostępu: .

- 2 Wprowadź kod dostępu i naciśnij przycisk , aby przejść dalej.

Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

- 3 Naciśnij przycisk **PTT**, aby odpowiedzieć.

- 4 Aby słuchać, zwolnij przycisk **PTT**.

- 5 Jeśli połączenie tego zażąda, wprowadź dodatkowe cyfry na klawiaturze, a następnie naciśnij , aby kontynuować.

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

Urządzenie wyemituje sygnał dźwiękowy DTMF. Radiotelefon powróci do poprzedniego ekranu.

- 6 Aby zakończyć połączenie, naciśnij przycisk .

- 7 Wykonaj jedną z następujących czynności:

- Jeżeli nie skonfigurowano kodu odstępu, wprowadź kod odstępu po wyświetleniu komunikatu Kod odstępu: i naciśnij przycisk, aby przejść dalej.  Radiotelefon powróci do poprzedniego ekranu.
- Naciśnij zaprogramowany **Przycisk szybkiego dostępu**. Jeżeli wpis przycisku **Szybkiego**

**dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

Urządzenie emituje dźwięk DTMF, a na wyświetlaczu widnieje napis Kończę połączenie telefoniczne.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu zobaczysz komunikat Połączenie zakończone.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu Połączenia telefonicznego. Powtórz powyższe dwa kroki lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

## Wykonywanie połączeń telefonicznych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne przy pomocy Listy kontaktów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty.

Naciśnij , aby wybrać.

Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

3 Naciśnij  lub , aby przejść do

wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Jeśli naciśniesz przycisk **PTT** w momencie, gdy uruchomiony jest ekran Kontaktów:

- Pierwszy wiersz wyświetlacza pokazuje Numer telefonu: .
- W drugim wierszu wyświetlacza zobaczysz migający kursor.

Jeżeli wybrany wpis jest pusty:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawi się komunikat Błędny numer telefonu.

4 Naciśnij  lub , aby przejść do Połącz z telefonem. Naciśnij , aby wybrać.

Jeśli kod dostępu nie został wstępnie skonfigurowany, na wyświetlaczu pojawi się napis Kod dostępu:.

5 Wprowadź kod dostępu i naciśnij przycisk , aby przejść dalej.

Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

Pierwsza linia tekstu pokazuje łączenie. Druga linia tekstu pokazuje alias lub ID abonenta oraz ikonę **Połączenia telefonicznego**.

Jeśli połączenie powiedzie się:

- Urządzenie wyemituje sygnał dźwiękowy DTMF.
- Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu.
- Pierwsza linia tekstu pokazuje alias i ID abonenta, jak również ikonę **RSSI**.

- Druga linia pokazuje tekst **Połączenie telefoniczne** oraz ikonę **Połączenia telefonicznego**.

Jeśli połączenie nie powiedzie się:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się napis **Połączenie telefoniczne nie powiodło się, a następnie Kod dostępu!**.
- Radiotelefon powróci do ekranu sprzed inicjacji połączenia, jeśli kod dostępu został wcześniej skonfigurowany w Liście kontaktów.

---

**6** Naciśnij przycisk **PTT**, aby odpowiedzieć.  
Ikona **RSSI** znika.

---

**7** Aby słuchać, zwolnij przycisk **PTT**.

---

**8** Jeśli połączenie tego zażąda, wprowadź dodatkowe cyfry na klawiaturze, a następnie naciśnij , aby kontynuować.

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez

połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

Urządzenie wyemituje sygnał dźwiękowy DTMF. Radiotelefon powróci do poprzedniego ekranu.

---

**9** Aby zakończyć połączenie, naciśnij przycisk  .

---

**10** Jeżeli nie skonfigurowano kodu odstępu, wprowadź kod odstępu po wyświetleniu komunikatu **Kod odstępu!** i naciśnij przycisk, aby przejść dalej. .

Radiotelefon powróci do poprzedniego ekranu. Urządzenie emituje dźwięk DTMF, a na wyświetlaczu widnieje napis **Kończę połączenie telefoniczne**.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu **Połączenia telefonicznego**. Powtórz [krok 9](#) i [krok 10](#) lub odczekaj, aż użytkownik telefonu zakończy wywołanie. Naciśnięcie przycisku

PTT na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu **Naciśnij OK: Wykon poł.**

Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw tel zakończ.**

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

#### **UWAGA:**

Po uzyskaniu dostępu do kanału naciśnij przycisk , aby odrzucić próbę połączenia. Zostanie wyemitowany sygnał dźwiękowy.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie.

Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk **Wł./wyl.**, **Pokrętło regulacji głośności** i **Przełącznik kanałów**. Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

## Wykonywanie połączeń telefonicznych przy pomocy Wyszukiwania aliasu

Można również użyć funkcji wyszukiwania aliasu lub wyszukiwania alfanumerycznego do pobrania wymaganego aliasu abonenta. Ta funkcja jest dostępna tylko po wyświetleniu listy kontaktów. Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne przy pomocy wyszukiwania aliasów.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby otworzyć Kontak ty.  
Naciśnij  , aby wybrać.  
Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

---

- 3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje Numer telefonu: . W drugim wierszu wyświetlacza zobaczysz migający kursor. Użyj klawiatury, aby wprowadzić numer telefonu.

---

- 4 Naciśnij  , aby wybrać. Jeżeli wybrany wpis jest pusty, urządzenie wyemituje dźwięk ostrzegawczy i wyświetli komunikat Błędny numer telefonu.

---

- 5 Naciśnij  lub  , aby wybrać numer i Naciśnij  , aby wybrać. Jeżeli nie

skonfigurowano kodu dostępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod dostępu: . W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź kod dostępu i

naciśnij przycisk  , aby przejść dalej. W przypadku powodzenia zabrmi sygnał DTMF. Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu. W pierwszym wierszu wyświetlacza pojawi się alias lub identyfikator abonenta i ikona **RSSI**. W drugim wierszu wyświetlacza pojawi się komunikat Połączenie telefoniczne i ikona **połączenia telefonicznego**. W przypadku niepowodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw. tel. Nieudane. Radiotelefon wraca do ekranu wprowadzania kodu dostępu. Jeżeli zdefiniowano kod dostępu dla listy kontaktów, radiotelefon wraca do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

- 6 Naciśnij przycisk **PTT**, aby mówić, albo zwolnij go, aby słuchać. Ikona **RSSI** znika podczas transmisji.

---

- 7 W razie potrzeby wprowadzenia dodatkowych cyfr podczas połączenia telefonicznego wykonaj jedną z czynności:

- Naciśnij dowolny przycisk klawiatury, aby wpisać dodatkowe cyfry. Pierwszy wiersz wyświetlacza pokazuje parametr `Dodatk. cyfr:`. W drugim wierszu wyświetlacza zobaczysz migający kursor.

Wpisz dodatkowe cyfry i naciśnij przycisk , aby przejść dalej. Radiotelefon wyemituje sygnał dźwiękowy DTMF i wróci do poprzedniego ekranu.

- Naciśnij **przycisk szybkiego połączenia**. Urządzenie wyemituje sygnał dźwiękowy DTMF. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

8

Aby zakończyć połączenie, naciśnij przycisk . Jeżeli nie skonfigurowano kodu odstępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat `Kod odstępu:`. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź

kod odstępu i naciśnij , aby przejść dalej. Radiotelefon powróci do poprzedniego ekranu. Urządzenie emituje sygnał dźwiękowy DTMF i wyświetla komunikat `Kończę połączenie telefoniczne`. W przypadku powodzenia

urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat `Wyw tel zakończ`. Radiotelefon przywraca ekran połączenia telefonicznego. W przypadku niepowodzenia radiotelefon przywraca ekran połączenia telefonicznego. Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu `Naciśnij OK: Wykon poł`. Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat `Wyw tel zakończ`. Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

**UWAGA:**

Podczas uzyskiwania dostępu do kanału naciśnij

przycisk , aby odrzucić próbę połączenia i przycisk sygnałów dźwiękowych, aby zakończyć

wyszukiwanie aliasu. Naciśnij przycisk  lub

, aby zakończyć wyszukiwanie aliasu.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie. Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk Wł./wył., pokrętko regulacji głośności i przełącznik kanałów. Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

## Wykonywanie połączeń telefonicznych przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Numeru telefonicznego. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się napis Numer: oraz migający kursor.

---

- 5 Wpisz numer telefonu i naciśnij , aby przejść dalej. Jeśli kod dostępu nie został wstępnie skonfigurowany, na wyświetlaczu pojawi się napis Kod dostępu: i migający kursor.

---

- 6 Wprowadź kod dostępu i naciśnij przycisk  , aby przejść dalej. Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

Zielona dioda LED zapala się. W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**. Pierwszy wiersz tekstu przedstawia alias abonenta. Drugi wiersz tekstu przedstawia stan połączenia.

Jeśli połączenie powiedzie się:

- Dźwięki sygnalizacji tonowej Dual Tone Multi Frequency (DTMF).
- Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu.
- Pierwszy wiersz tekstu przedstawia alias abonenta.
- W prawym górnym rogu nadal wyświetla się ikona **Połączenia telefonicznego**.

Jeśli połączenie nie powiedzie się:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się napis **Połączenie telefoniczne nie powiodło się, a następnie Kod dostępu:**.

- Radiotelefon powróci do ekranu sprzed inicjacji połączenia, jeśli kod dostępu został wcześniej skonfigurowany w Liście kontaktów.

- 
- 7 Aby zakończyć połączenie, naciśnij przycisk  .
- 

- 8 Wykonaj jedną z następujących czynności:

- Jeżeli nie skonfigurowano kodu odstępu, wprowadź kod odstępu po wyświetleniu komunikatu **Kod odstępu:** i naciśnij przycisk, aby przejść dalej.  Radiotelefon powróci do poprzedniego ekranu.
- Naciśnij zaprogramowany **Przycisk szybkiego dostępu**. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

Urządzenie emituje dźwięk DTMF, a na wyświetlaczu widnieje napis **Kończ połączenie telefoniczne**.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.

- Na wyświetlaczu zobaczysz komunikat  
Połączenie zakończone.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu Połączenia telefonicznego. Powtórz [krok 7](#) lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

**UWAGA:**

Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu **Naciśnij OK: Wykon połą.**

Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw. zakończ.**

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

Po uzyskaniu dostępu do kanału naciśnij przycisk , aby odrzucić próbę połączenia. Zostanie wyemitowany sygnał dźwiękowy.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie.

Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk **Wi./wył.**, **Pokrętko regulacji głośności** i **Przełącznik kanałów**.

Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

## Wybieranie tonowe wieloczęstotliwościowe DTMF

Funkcja sygnalizacji tonowej DMTF (Dual Tone Multi Frequency) umożliwia działanie radiotelefonu w systemie radiowym z interfejsem do połączeń z systemami telefonicznymi.

Możesz wyłączyć dźwięk DTMF, wyłączając wszystkie dźwięki i powiadomienia w radiotelefonie. Dodatkowe informacje: [Włączanie/wyłączanie dźwięków/alertów radiotelefonu na str. 221](#).

## Inicjowanie wywołań DTMF

Postępuj zgodnie z procedurą, aby zainicjować połączenie DTMF.

[Wyślij informację zwrotną](#)

1 Naciśnij i przytrzymaj przycisk **PTT**.

2 Wykonaj jedną z następujących czynności:

- Wpisz żądany numer, aby zainicjować połączenie DTMF.
- Naciśnij , aby zainicjować połączenie tonowe DTMF:
- Naciśnij , aby zainicjować połączenie tonowe DTMF:

## Odbieranie połączeń telefonicznych jako wywołań grupowych

Postępuj zgodnie z procedurą, aby odbierać połączenia telefoniczne jako połączenia grupowe.

Podczas odbierania połączenia telefonicznego jako połączenia grupowego:

- W górnym prawym rogu wyświetlacza pojawia się ikona **Połączenia telefonicznego**.
- Na wyświetlaczu pojawi się komunikat **Połączenie telefoniczne**.

- Zielona dioda LED miga.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

1 Naciśnij przycisk **PTT**, aby odpowiedzieć.

---

2 Aby słuchać, zwolnij przycisk **PTT**.

---

3 Aby zakończyć połączenie, naciśnij przycisk  .

Na wyświetlaczu pojawi się komunikat `Kończę wyw  
tel`.

#### **UWAGA:**

Jeżeli funkcja połączeń telefonicznych nie jest włączona, radiotelefon nie jest w stanie zakończyć połączenia telefonicznego jako połączenia grupowego. Użytkownik telefonu musi zakończyć połączenie. Podczas rozmowy odbiorca może jedynie prowadzić odsłuch.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.

- Na wyświetlaczu zobaczysz komunikat  
`Połączenie zakończone.`

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu Połączenia telefonicznego. Powtórz [krok 3](#) lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

---

## Odbieranie połączeń telefonicznych jako wywołań ogólnych

Po odebraniu połączenia telefonicznego jako połączenia ogólnego odbierający radiotelefon nie jest w stanie prowadzić odsłuchu ani odpowiadać. Użytkownik odbierający połączenie również nie może zakończyć połączenia ogólnego.

Podczas odbierania połączenia telefonicznego jako połączenia ogólnego:

- W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**.
- Na wyświetlaczu pojawi się w zależności od typu konfiguracji wszystkie połączenia, połączenie ogólne stacji albo połączenie w trybie wielu stacji i połączenie telefoniczne.

- Zielona dioda LED miga.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

## Odbieranie połączeń telefonicznych jako wywołań indywidualnych

Postępuj zgodnie z procedurą, aby odbierać połączenia telefoniczne jako połączenia prywatne.

Podczas odbierania połączenia telefonicznego jako połączenia prywatnego:

- W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**.
- Na wyświetlaczu pojawi się komunikat **Połączenie telefoniczne**.
- Zielona dioda LED miga.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

**1** Naciśnij przycisk **PTT**, aby odpowiedzieć.

**2** Aby słuchać, zwolnij przycisk **PTT**.

**3** Aby zakończyć połączenie, naciśnij przycisk  .  
Na wyświetlaczu pojawi się komunikat **Kończę wywołanie**.

### UWAGA:

Jeżeli funkcja połączeń telefonicznych nie jest włączona, radiotelefon nie jest w stanie zakończyć połączenia telefonicznego jako połączenia indywidualnego. Użytkownik telefonu musi zakończyć połączenie. Podczas rozmowy odbiorca może jedynie prowadzić odsłuch.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu **Połączenia telefonicznego**. Powtórz [krok 3](#) lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

## Pierwszeństwo połączeń

Funkcja pierwszeństwa połączeń pozwala urządzeniu zatrzymać trwającą transmisję głosową i zainicjować transmisję priorytetową.

Przy funkcji pierwszeństwa połączeń system przerywa i zastępuje trwające połączenia w przypadkach, gdy kanały trunkingowane są niedostępne.

Połączenia o wyższym priorytecie, takie jak połączenie alarmowe lub połączenie ogólne, mają pierwszeństwo wobec nadającego radiotelefonu, aby umożliwić połączenie o wyższym priorytecie. Jeżeli nie ma innych dostępnych kanałów częstotliwości radiowej (RF), połączenia awaryjne mają pierwszeństwo także wobec połączeń ogólnych.

## Głosowe przerywanie

Przerywanie głosowe pozwala użytkownikowi na wyłączenie trwającej transmisji głosowej.

Funkcja ta wykorzystuje kanał zwrotny, który sygnalizuje zatrzymanie trwającej transmisji głosowej, jeśli przerywający radiotelefon jest skonfigurowany do przerywania głosowego, a w nadającym radiotelefonie skonfigurowano możliwość przerywania połączeń głosowych. Przerywający transmisję radiotelefon może

wtedy nadać transmisję głosową do uczestnika przerwane połączenia.

Funkcja przerywania głosowego znacznie zwiększa prawdopodobieństwo skutecznego przekazania nowej transmisji do zamierzonego odbiorcy w czasie trwającego połączenia.

Przerywanie głosowe jest dostępne dla użytkownika tylko wtedy, gdy funkcja ta została skonfigurowana w radiotelefonie. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie funkcji przerywania głosowego

Postępuj zgodnie z procedurą, aby zainicjować funkcję przerywania głosowego w radiotelefonie.

Aby korzystać z tej funkcji było możliwe, radiotelefon musi być odpowiednio zaprogramowany. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

- 1 Aby przerwać nadawanie podczas trwającego wywołania, należy nacisnąć przycisk **PTT**.

W przypadku przerywania komunikacji radiowej na wyświetlaczu pojawia się komunikat **Połączenie**

przerwane. Aż do momentu zwolnienia przycisku **PTT** będzie emitowany dźwięk ostrzegawczy.

## 2 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.

## 3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

## Funkcje zaawansowane

Ten rozdział wyjaśnia działanie funkcji dostępnych w radiotelefonie.

Lokalny dystrybutor lub administrator systemu może dostosować radiotelefon zgodnie z Twoimi wymaganiami.

[Wyślij informację zwrotną](#)

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Kolejka połączeń

Gdy nie ma dostępnych zasobów do przetworzenia połączenia, kolejka połączeń umożliwia umieszczenie żądania połączenia w kolejce systemowej do momentu zwolnienia zasobów.

Usłyszysz sygnał kolejki połączeń sygnał po naciśnięciu przycisku **PTT**, który oznacza, że radiotelefon przeszedł do stanu kolejki połączeń. Przycisk **PTT** może zostać zwolniony po usłyszeniu sygnału kolejki połączeń.

W przypadku pomyślnego ustanowienia połączenia:

- Zielona dioda LED miga.
- Zostanie wyemitowany sygnał pozwolenia na połączenie, jeśli jest włączony.
- Na wyświetlaczu pojawi się ikona rodzaju połączenia, ID lub alias.
- Użytkownik radiotelefonu ma maksymalnie 4 sekundy, aby nacisnąć przycisk **PTT** i rozpocząć transmisję głosową.

Jeżeli ustanowienie połączenia nie powiedzie się:

- Zostanie wyemitowany sygnał odrzucenia, jeśli jest włączony.
- Na wyświetlaczu natychmiast pojawi się informacja o nieudanej próbie.
- Połączenie zostanie przerwane, a radiotelefon przejdzie w tryb ustanawiania połączenia.

## Skanowanie grupy rozmówców

Ta funkcja umożliwi radiotelefonowi monitorowanie i dołączanie do połączeń z grupami zdefiniowanymi w liście grupy rozmówców.

Po włączeniu skanowania na pasku stanu pojawia się ikona skanowania, a dioda LED miga na żółto. Tryb wyciszenia Twojego radiotelefonu zostanie wyłączony dla dowolnego członka listy grupy odbiorców.

Po wyłączeniu skanowania radiotelefon nie odbiera transmisji od żadnego członka listy grupy odbiorców za wyjątkiem wybranych grup rozmówców i opcji Wywołanie wszystkich.

### UWAGA:

Skanowanie grupy konwersacyjnej można skonfigurować za pomocą oprogramowania CPS. Skontaktuj się z administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

## Włączanie/wyłączanie skanowania grupy rozmówców

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć skanowanie grupy rozmówców.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

---

- 3 Wykonaj jedną z następujących czynności:
  - Naciśnij  lub , aby Włączyć. Naciśnij , aby wybrać.

- Naciśnij  lub , aby Wyłączyć. Naciśnij , aby wybrać.

Jeśli skanowanie jest włączone:

- Na wyświetlaczu widnieje komunikat Skanowanie włączone i ikona **Skanowania**.
- Żółta dioda LED miga.
- Wybrzmiewa potwierdzający sygnał dźwiękowy.

Jeśli skanowanie jest wyłączone:

- Na wyświetlaczu widnieje komunikat Skanowanie wyłączone.
- Znika ikona **Skanowania**.
- Dioda LED gaśnie.
- Rozlega się ostrzegawczy sygnał dźwiękowy.

## Lista grup odbiorców

Lista grup odbiorców jest funkcją umożliwiającą tworzenie i przypisywanie członków na liście skanowania grupy rozmówców.

Lista jest tworzona po zaprogramowaniu radiotelefonu i określa, które grupy mają być skanowane. Urządzenie obsługuje listy z maksymalnie 16 osobami.

Jeśli radiotelefon zaprogramowano do zezwalania na edycję listy skanowania, można:

- Dodawać/usuwać grupy rozmówców.
- Dodawać, usuwać i/lub edytować priorytety grup rozmówców. Patrz [Edytowanie priorytetu dla grupy rozmówców na str. 116](#).
- Dodawać, usuwać i/lub edytować przynależność grup rozmówców. Patrz [Dodawanie przynależności grupy rozmówców na str. 118](#) i [Usuwanie przynależności grupy rozmówców na str. 119](#)
- Zastąpić istniejącą listę skanowania nową.

### WAŻNE:

Aby dodać członka do listy, należy najpierw skonfigurować grupę rozmówców w radiotelefonie.

### UWAGA:

Lista grupy odbiorców jest programowana przez administratora systemu. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Monitorowanie priorytetu

Funkcja monitorowania priorytetu pozwala automatycznie odbierać połączenie od grup rozmówców o wyższym priorytecie, nawet w trakcie trwania innego połączenia od grupy rozmówców.

Radiotelefon opuści połączenie od grupy rozmówców o niższym priorytecie dla połączenia od grupy o wyższym priorytecie.

### UWAGA:

Ta funkcja jest dostępna tylko wtedy, gdy w radiotelefonie aktywowano funkcję Skanowania grupy rozmówców.

Monitorowanie priorytetu dotyczy wyłącznie członków na liście grupy odbiorców. Istnieją dwa rodzaje priorytetów grup rozmówców: Priorytet 1 (P1) i Priorytet 2 (P2). P1 ma wyższy priorytet niż P2. W systemie Capacity Max radiotelefon odbiera transmisje według poniższej kolejności priorytetów:

- 1 Połączenie alarmowe dla grupy rozmówców P1
- 2 Połączenie alarmowe dla grupy rozmówców P2
- 3 Połączenie alarmowe dla grup rozmówców bez priorytetu z listy grupy odbiorców
- 4 Połączenie ogólne

- 5 Połączenie grupy rozmówców P1
- 6 Połączenie grupy rozmówców P2
- 7 Połączenie grup rozmówców bez priorytetu z listy grupy odbiorców

Aby znaleźć więcej informacji na temat sposobu dodawania, usuwania i/lub edytowania priorytetów grup rozmówców, patrz [Edytowanie priorytetu dla grupy rozmówców na str. 116](#).

### UWAGA:

Ta funkcja jest programowana przez administratora systemu. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Edytowanie priorytetu dla grupy rozmówców

W menu skanowania grupy rozmówców można przeglądać i edytować priorytet grupy rozmówców.

1

Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby Przeglądać/Edytować listę. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do wymaganej grupy rozmówców. Naciśnij , aby wybrać. Bieżący priorytet jest wskazywany przez ikonę **Priorytet 1** lub **Priorytet 2** obok grupy rozmówców.

---

5 Naciśnij  lub , aby Edytować priorytet. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do wymaganego poziomu priorytetu. Naciśnij , aby wybrać. Jeśli inna grupa rozmówców zostanie przypisana do Priorytetu 1 lub Priorytetu 2, można zastąpić bieżący

priorytet. Gdy na wyświetlaczu pojawi się komunikat Zastąpić istniejące?, naciśnij  lub :

- Nie, aby powrócić do poprzedniego kroku.
- Tak, aby zastąpić.

Wyświetlacz pokazuje miniinformację o udanej operacji, a następnie powraca do poprzedniego ekranu. Ikona priorytetu pojawi się obok grupy rozmówców.

---

## Przynależność do wielu grup rozmówców

W systemie Capacity Max Twój radiotelefon można konfigurować dla nawet siedmiu grup rozmówców w określonej strefie.

Z 16 grup rozmówców na Liście grup odbiorców, nawet siedem grup może zostać przypisanych jako przynależne grupy rozmówców. Wybrana grupa rozmówców i priorytetowe grupy rozmówców są automatycznie przypisywane.

**UWAGA:**

Ta funkcja jest programowana przez administratora systemu. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Dodawanie przynależności grupy rozmówców

Postępuj zgodnie z procedurą, aby dodać przynależność grupy rozmówców.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby Przeglądać/Edytować listę. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do wymaganego ID lub aliasu grupy rozmówców. Naciśnij , aby wybrać.

Status przynależności jest wyświetlany w opcji Wyświetl/Edytuj listę. Na wyświetlaczu obok wybranego ID lub aliasu grupy rozmówców pojawi się .

- 5 Naciśnij  lub , aby Edytować przynależność. Naciśnij , aby wybrać.

---

- 6 Wykonaj jedną z następujących czynności:
  - Naciśnij  lub , aby W1. Naciśnij , aby wybrać.
  - Naciśnij  lub , aby Wy1. Naciśnij , aby wybrać.

Po wybraniu opcji W1. obok ID lub aliasu grupy rozmówców pojawi się oznaczenie .

Po poprawnym przypisaniu na wyświetlaczu obok wybranego ID lub aliasu grupy rozmówców pojawi się .

Po niepoprawnym przypisaniu oznaczenie  obok ID lub aliasu grupy rozmówców nadal będzie widoczne.

**UWAGA:**

Radiotelefon wyświetli komunikat *Lista pełna*, gdy maksymalna liczba siedmiu grup rozmówców zostanie wybrana do przypisania na liście skanowania. Aby wybrać nową grupę rozmówców do przypisania, usuń istniejącą przynależność grupy rozmówców, aby zrobić miejsce na dodanie nowej. Dodatkowe informacje: [Usuwanie przynależności grupy rozmówców na str. 119](#).

## Usuwanie przynależności grupy rozmówców

Gdy lista przynależności jest pełna i chcesz wybrać nową grupę rozmówców do przypisania, usuń istniejącą przypisaną grupę, aby zrobić miejsce na dodanie nowej. Postępuj zgodnie z procedurą, aby usunąć przynależność grupy rozmówców.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby Przeglądać/Edytować listę. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do wymaganego ID lub aliasu grupy rozmówców. Naciśnij , aby wybrać.

Status przynależności jest wyświetlany w opcji *Wyświetl/Edytuj listę*. Na wyświetlaczu obok wybranego ID lub aliasu grupy rozmówców pojawi się .

5 Naciśnij  lub , aby Edytować przynależność. Naciśnij , aby wybrać.

6 Naciśnij  lub , aby Wyczyść. Naciśnij , aby wybrać.

Po wybraniu opcji *Wyczyść*, oznaczenie  obok ID lub aliasu grupy rozmówców zniknie.

## Odpowiedź

Funkcja odpowiedzi umożliwia odpowiadanie na transmisję podczas skanowania.

Jeżeli radiotelefon szuka wywołania z dostępnej listy wyszukiwania, a przycisk **PTT** został naciśnięty, to sposób pracy urządzenia będzie uzależniony od tego czy funkcja odpowiedzi została w nim zaprogramowana. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

### Funkcja odpowiedzi wyłączona

Radiotelefon pomija znalezione wywołanie i próbuje nadawać dalej na wybranym kanale. Gdy minie czas wstrzymania połączenia dla wybranego kontaktu, urządzenie powróci do kanału macierzystego i rozpocznie odliczanie czasu wstrzymania wyszukiwania. Gdy czas minie, radiotelefon wznowi wyszukiwanie grupy.

### Funkcja odpowiedzi włączona

Jeżeli przycisk **PTT** został naciśnięty podczas odliczania czasu wstrzymania połączenia grupowego, radiotelefon będzie próbował nadawać na kanale znalezionej grupy.

### UWAGA:

Jeśli urządzenie znajdzie połączenie dla danej grupy, które nie zostało przydzielone do pozycji kanału w wybranej strefie, a ponadto połączenie zostanie zakończone, należy przełączyć się na właściwą strefę i wybrać pozycję kanału takiej grupy, aby odpowiedzieć.

## Bluetooth

Ta funkcja pozwala korzystać z radiotelefonu i urządzenia Bluetooth (akcesorium) poprzez łącze Bluetooth. Radiotelefon obsługuje urządzenia Bluetooth zarówno firmy Motorola Solutions jak i ogólnie dostępne w sprzedaży.

Łączność Bluetooth działa na linii widzenia 10 metrów. Jest to niezablokowana ścieżka pomiędzy radiotelefonem a urządzeniem Bluetooth. W celu uzyskania wysokiego stopnia niezawodności, firma Motorola Solutions zaleca nierozdzielanie radia i akcesoriów.

Na krańcach obszaru pokrycia zarówno jakość głosu jak i tonu ulegnie zniekształceniu lub fragmentacji. Aby skorygować problem, ustaw radiotelefon i urządzenie Bluetooth blisko siebie (na obszarze o zasięgu 10 m), aby ponownie uzyskać wyraźny odbiór audio. Funkcja Bluetooth radiotelefonu posiada maksymalną moc 2,5 mW (4 dBm) i zasięg 10 m.

Radiotelefon może obsługiwać jednoczesne połączenia maksymalnie z trzema urządzeniami Bluetooth różnego typu. Przykładowo: zestaw słuchawkowy, skaner oraz urządzenie PTT (POD). Radiotelefon nie obsługuje połączeń z kilkoma urządzeniami Bluetooth tego samego rodzaju.

Zapoznaj się z instrukcją obsługi urządzenia Bluetooth, aby uzyskać więcej informacji na temat jego funkcji.

#### UWAGA:

Po wyłączeniu za pomocą programu CPS wszystkie funkcje Bluetooth zostaną wyłączone, a baza danych Bluetooth urządzenia zostanie skasowana.

## Włączanie i wyłączanie funkcji Bluetooth

Postępuj zgodnie z procedurą, aby włączyć i wyłączyć Bluetooth.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do pozycji **Mój Status**. Naciśnij , aby wybrać.

Wyświetlacz pokazuje informacje **Wł.** i **Wył.**. Bieżący status będzie oznaczony za pomocą symbolu .

4 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby **Wł.** Naciśnij , aby wybrać. Obok opcji **Wł.** pojawi się oznaczenie .
- Naciśnij  lub , aby **Wył.** Naciśnij , aby wybrać. Obok opcji **Wył.** pojawi się oznaczenie .

## Łączenie z urządzeniem Bluetooth

Postępuj zgodnie z procedurą, aby połączyć się z urządzeniami Bluetooth.

Włącz urządzenie Bluetooth i uruchom tryb parowania.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Urządzeń. Naciśnij , aby wybrać.

4 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.
- Naciśnij  lub , aby wybrać **Znajdź urz.**, żeby zlokalizować dostępne urządzenia. Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.

5 Naciśnij przycisk  lub , aby nawiązać Połączenie. Naciśnij , aby wybrać.

Urządzenie Bluetooth może wymagać wykonania dodatkowych czynności, aby zakończyć parowanie. W razie potrzeby zajrzyj do instrukcji obsługi danego urządzenia Bluetooth.

Na ekranie pojawi się komunikat Łączenie z <Nazwa urz.>.

Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawi się komunikat <Urządzenie> podłączone i ikona **połączenia Bluetooth**.
- Na wyświetlaczu pojawi się symbol  obok podłączonego urządzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawi się komunikat Połączenie nieudane.

#### UWAGA:

Jeżeli wymagany jest kod PIN, patrz [Uzyskiwanie dostępu do radiotelefonów za pomocą haseł na str. 208](#).

## Podłączanie do urządzeń Bluetooth w trybie wykrywalnym

Postępuj zgodnie z procedurą, aby połączyć się z urządzeniami Bluetooth w trybie parowania.

Włącz urządzenie Bluetooth i uruchom tryb parowania.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do pozycji Bluetooth. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , przejdź do opcji Znajdź mnie. Naciśnij  , aby wybrać. Teraz radiotelefon może być wykrywany przez inne urządzenia Bluetooth przez zdefiniowany okres czasu. Stan ten nosi nazwę trybu wykrywalności.

Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.

- Na wyświetlaczu pojawi się komunikat <Urządzenie> podłączone i ikona **połączenia Bluetooth**.
- Na wyświetlaczu pojawi się symbol  obok podłączonego urządzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawi się komunikat Połączenie nieudane.

## Odlączenie od urządzeń Bluetooth

Postępuj zgodnie z procedurą, aby odłączyć się od urządzeń Bluetooth.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do opcji Bluetooth. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Urządzeń. Naciśnij  , aby wybrać.

4 Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.

5 Naciśnij przycisk  lub , aby je Odłączyć. Naciśnij , aby wybrać.

Na ekranie pojawi się komunikat Trwa rozłączanie: <nazwa urz.>.

#### UWAGA:

Urządzenie Bluetooth może wymagać dodatkowych kroków, aby wykonać rozłączenie. W razie potrzeby zajrzyj do instrukcji obsługi danego urządzenia Bluetooth.

Zaczekaj na potwierdzenie.

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się <Nazwa urz.> odłączone, a ikona **połączenia Bluetooth** zniknie.
- Symbol  przestanie być wyświetlany obok podłączonego urządzenia.

## Przełączanie ścieżki dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a urządzeniem Bluetooth

Postępuj zgodnie z procedurą, aby przełączać ścieżkę dźwięku pomiędzy głośnikiem radiotelefonu a urządzeniem Bluetooth.

Naciśnij programowalny przycisk **dźwięku trybu Bluetooth**.

Na ekranie pojawi się jedna z następujących informacji:

- Zostanie wyemitowany sygnał. Na wyświetlaczu pojawi się komunikat Przełączanie dźwięku do radiotelefonu.
- Zostanie wyemitowany sygnał. Na wyświetlaczu pojawi się komunikat Przełączanie dźwięku do urz. Bluetooth.

## Informacje o urządzeniu

Postępuj zgodnie z procedurą, aby wyświetlić informacje o radiotelefonie.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do pozycji Urządzenia. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Wyświetlić szczegóły. Naciśnij , aby wybrać.

---

## Usuwanie nazwy urządzenia

Możesz usunąć odłączone urządzenie z listy urządzeń Bluetooth.

[Wyślij informację zwrotną](#)

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Urządzeń. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać. Na wyświetlaczu pojawi się komunikat Urządź. usun.

---

## Wzmocnienie mikrofonu Bluetooth

Ta funkcja umożliwia użytkownikowi sterowanie wzmocnieniem mikrofonu podłączonego urządzenia obsługującego technologię Bluetooth.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Wzmocnienia mikrofonu BT. Naciśnij , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do wymaganego typu wzmocnienia mikrofonu Bluetooth i obecnych wartości. Naciśnij , aby wybrać. Użytkownik może edytować wartości tutaj.

---

- 5 Naciśnij przycisk  lub , aby zwiększyć lub zmniejszyć wartości. Naciśnij , aby wybrać.

## Lok. w budynku

### UWAGA:

Funkcja lokalizacji wewnętrznej jest dostępna dla modeli z najnowszą wersją konfiguracji programowej i sprzętowej. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Lokalizacja wewnętrzna jest używana do śledzenia lokalizacji użytkowników radiotelefonów. Gdy funkcja lokalizacji wewnętrznej jest aktywna, radiotelefon znajduje się w ograniczonym trybie wykrywalnym. Dedykowane sygnały nawigacyjne służą do lokalizacji radiotelefonu i określenia jego położenia.

## Włączanie i wyłączanie funkcji lokalizowania wewnętrznego

Wykonując jedną z poniższych czynności, możesz włączyć lub wyłączyć funkcję lokalizowania wewnętrznego.

- Dostęp do funkcji można uzyskać w menu.
  - a. Naciśnij przycisk , aby uzyskać dostęp do menu..

b. Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij przycisk , aby wybrać.

c. Naciśnij przycisk  lub , aby przejść do opcji Lokalizacja wewnętrzna i naciśnij przycisk , aby wybrać.

d. Naciśnij , aby włączyć lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne włączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego pojawi się na ekranie głównym.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat Włączanie nie powiodło się. Usłyszysz negatywny sygnał dźwiękowy

e. Naciśnij , aby wyłączyć lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne wyłączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego zniknie z ekranu głównego.
  - Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat Wyłączenie nie powiodło się. Usłyszysz negatywny sygnał dźwiękowy
- Dostęp do tej funkcji jest możliwy za pomocą zaprogramowanego przycisku.
    - a. Długie naciśnięcie przycisku zaprogramowanego pod funkcję **Lokalizowanie wewnętrzne** włączy funkcję lokalizowania wewnętrznego.
 

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne włączone. Rozlegnie się dźwięk informacyjny.

Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego pojawi się na ekranie głównym.
  - Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat **Włączenie nie powiodło się. Jeśli operacja zakończy się niepowodzeniem, usłyszysz sygnał ostrzegawczy.**
- b. Naciśnij przycisk zaprogramowany pod funkcję **Lokalizowania wewnętrznego**, aby wyłączyć Lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne wyłączone. Rozlegnie się dźwięk informacyjny.

Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego zniknie z ekranu głównego.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat

Wyłączenie nie powiodło się. Jeśli operacja zakończy się niepowodzeniem, usłyszysz sygnał ostrzegawczy.

## Uzyskiwanie dostępu do informacji o punktach sygnalizacyjnych w lokalizacjach wewnętrznych

Postępuj zgodnie z procedurą, aby przejść do informacji sygnałów lokalizacji wewnętrznej.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby przejść do opcji Bluetooth i naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub  , aby przejść do opcji Lokalizacja wewnętrzna i naciśnij przycisk  , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do Punktów sygnalizacyjnych i naciśnij naciśnij przycisk , aby wybrać.

Na wyświetlaczu widoczne są informacje dotyczące punktów sygnalizacyjnych.

## Sterowanie wieloma stacjami

Te funkcje można zastosować, jeżeli aktualny kanał radiowy jest skonfigurowany do systemu Capacity Max.

## Włączanie ręcznego wyszukiwania stacji

Postępuj zgodnie z procedurą, aby rozpocząć ręczne wyszukiwanie stacji, gdy siła sygnału jest niska, żeby spróbować znaleźć stację z lepszym sygnałem.

Jeśli radiotelefon znajdzie nową stację:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.

Jeśli radiotelefon nie znajdzie nowej stacji:

- Rozlega się ostrzegawczy sygnał dźwiękowy.

[Wyślij informację zwrotną](#)

## Blokada stacji wł./wył.

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

Naciśnij zaprogramowany przycisk **Blok miej**.

Jeśli funkcja **Blokada stacji** jest włączona:

- Usłyszysz dźwięk informacyjny oznaczający, że radiotelefon został zablokowany w bieżącej stacji.
- Na wyświetlaczu pojawi się informacja St. baz. Zablok.

Jeśli funkcja **Blokada stacji** jest wyłączona:

- Usłyszysz dźwięk ostrzegawczy oznaczający, że radiotelefon został odblokowany.
- Na wyświetlaczu pojawi się informacja St. baz. Odblok.

## Uzyskiwanie dostępu do listy sąsiednich stacji

Ta funkcja pozwala użytkownikowi sprawdzić stacje sąsiadujące z bieżącą, główną stacją. Postępuj zgodnie z procedurą, aby uzyskać dostęp do listy sąsiednich stacji:

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Informacji na temat radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Sąsiadujących stacji. Naciśnij , aby wybrać.

---

## Przypomnienie kanału głównego

Funkcja ta generuje przypomnienie, gdy w radiotelefonie przez pewien czas nie jest ustawiony kanał główny.

Jeśli funkcja ta zostanie aktywowana, gdy przez pewien czas radiotelefon nie jest ustawiony na kanale głównym, okresowo mogą się zdarzać poniższe sytuacje:

- Odtworzony zostaje ton przypomnienia kanału głównego oraz powiadomienie.
- W pierwszym wierszu wyświetlacza widoczne jest słowo Brak.
- W drugim wierszu widoczne są słowa Kanał główny.

## Wyciszyć przypomnienie kanału głównego

Po wybrzmieniu przypomnienia kanału głównego można je tymczasowo wyciszyć.

Naciśnij przycisk programowalny **Wycisz przypomnienie kanału głównego**.

W pierwszym wierszu wyświetlacza pojawi się tekst HCR, a w drugim — wyciszone.

## Ustawianie nowego kanału głównego

Po wystąpieniu przypomnienia kanału głównego można ustawić nowy kanał główny.

- Wykonaj jedną z następujących czynności:
  - Naciśnij programowany przycisk **resetowania kanału głównego**, aby ustawić bieżący kanał, jako nowy kanał główny. Pomiń poniższe czynności.  
W pierwszym wierszu wyświetlony zostanie alias kanału, a w drugim — tekst Nowy kanał główny.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Za pomocą przycisku  lub  przejdź do kanału głównego. Naciśnij , aby wybrać.

- Naciśnij przycisk  lub , aby wybrać nowy alias kanału głównego. Naciśnij , aby wybrać.  
Na wyświetlaczu obok aliasu wybranego kanału głównego widoczny jest symbol .

## Zdalny nasłuch

Funkcja ta jest używana do włączania mikrofonu w radiotelefonie docelowym przy pomocy aliasu lub ID użytkownika. Korzystając z tej funkcji, można zdalnie monitorować wszelkie dźwięki w pobliżu radiotelefonu docelowego.

Zarówno twój radiotelefon oraz radiotelefon docelowy musi być odpowiednio skonfigurowany, aby umożliwić korzystanie z tej funkcji.

Po zainicjowaniu na radiotelefonie docelowym będzie migać zielona dioda LED. Ta funkcja zatrzymuje się automatycznie po upływie zaprogramowanego czasu lub

kiedy użytkownik radiotelefonu docelowego wykona jakąś operację.

## Inicjowanie monitora zdalnego

Postępuj zgodnie z procedurą, aby zainicjować nasłuch zdalny.

**1** Naciśnij zaprogramowany przycisk **Zdalny nasłuch**.

---

**2** Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.

---

**3** Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.
- Dźwięk z monitorowanego radia będzie wybrzmiewać przez zaprogramowany czas, a na

wyświetlaczu pojawi się komunikat Zdalny Monitor. Gdy minie określony czas, zabrzmi dźwięk alertu, a dioda LED wyłączy się.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
- 

## Inicjowanie nasłuchów zdalnych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby zainicjować zdalny nasłuch przy pomocy Listy kontaktów.

**1** Naciśnij , aby uzyskać dostęp do menu.

---

**2** Naciśnij  lub , aby otworzyć Kontakty. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Zdalnego nasłuchu. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.

5 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.
- Dźwięk z monitorowanego radia będzie wybrzmiewać przez zaprogramowany czas, a na wyświetlaczu pojawi się komunikat Zdalny Monitor. Gdy minie określony czas, zabrzmi dźwięk alertu, a dioda LED wyłączy się.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Inicjowanie nasłuchu zdalnego przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby inicjować nasłuch zdalny przy pomocy wybierania ręcznego.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać.

## 5 Wykonaj jedną z następujących czynności:

- Wprowadź alias lub ID abonenta i naciśnij , aby przejść dalej.
- Edytuj ID, z którym połączono się poprzednio, a następnie naciśnij , aby przejść dalej.

## 6 Naciśnij lub , aby przejść do Zdalnego nasłuchu. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.

## 7 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.
- Dźwięk z monitorowanego radia będzie wybrzmiewać przez zaprogramowany czas, a na wyświetlaczu pojawi się komunikat *Zdalny*

*Monitor*. Gdy minie określony czas, zabrmi dźwięk alertu, a dioda LED wyłączy się.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Ustawienia kontaktów

Opcja Kontakty oferuje funkcję książki adresowej w radiotelefonie. Każdy wpis odpowiada aliasowi lub identyfikatorowi używanemu do inicjowania połączenia. Wpisy są porządkowane w kolejności alfabetycznej.

Każdy wpis, w zależności od kontekstu, wiąże się z różnymi typami połączeń: połączenie grupowe, połączenie indywidualne, połączenie z rozgłaszaniem, połączenie ogólne stacji, połączenie ogólne w trybie wielu stacji, połączenie przez komputer lub połączenie dyspozytorskie.

Połączenia komputerowe i dyspozytorskie są związane z transmisją danych. Są one dostępne tylko w aplikacjach. Więcej informacji zamieszczono w dokumentacji aplikacji do transmisji danych.

Dodatkowo, menu Kontakty pozwala przypisać każdą pozycję do jednego lub większej liczby programowanych przycisków numerycznych klawiatury mikrofonu. Jeżeli pozycja jest przypisana do przycisku numerycznego, radiotelefon może szybko ją wywołać po naciśnięciu odpowiedniego przycisku.

**UWAGA:**

Przed każdym przyciskiem numerycznym przypisanym do pozycji jest wyświetlany znak zaznaczenia. Jeśli znak zaznaczenia znajduje się przed **Push**, do pozycji nie przypisano przycisku numerycznego.

Dla każdego wpisu na liście kontaktów wyświetlane są następujące informacje:

- Typ połączenia
- Alias połączenia
- ID połączenia

**UWAGA:**

Jeżeli funkcja poufności jest włączona na kanale, można inicjować grupowe połączenie poufne, połączenia indywidualne i ogólne oraz telefoniczne na tym kanale przy włączonej funkcji poufności. Transmisję będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności lub z taką samą wartością i ID klucza jak w radiotelefonie.

## Przypisywanie wpisów do programowalnych przycisków numerycznych

Postępuj zgodnie z procedurą, aby przypisać wpisy do programowalnych przycisków numerycznych.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby otworzyć Kontak ty.  
Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby Zaprogramować przycisk. Naciśnij  , aby wybrać.

---

5 Wykonaj jedną z następujących czynności:

- Jeśli określony przycisk numeryczny nie ma przypisanego wpisu, naciśnij  lub  , aby przypisać do wybranego przycisku numerycznego. Naciśnij  , aby wybrać.
- Jeśli określony przycisk numeryczny ma już przypisany wpis, na wyświetlaczu wyświetli się komunikat *Przycisk w użyciu*, a dalej, w pierwszej linii tekstu pojawi się pytanie: *Zastąpić?*. Wykonaj jedną z następujących czynności:

Naciśnij  lub  , aby Potwierdzić.

Naciśnij  , aby wybrać.

Radiotelefon wyemituje dźwięk informacyjny i wyświetli komunikat *Kontakt zapisany* oraz miniinformację o udanej operacji.

Naciśnij  lub  , aby przejść do *Nie* i powrócić do poprzedniego kroku.

Każda pozycja może być przypisana innym przyciskom numerycznym. Przed każdym przyciskiem numerycznym przypisanym do pozycji jest wyświetlany znak . Jeśli znak  znajduje się przed pozycją *Pusty*, przycisk numeryczny nie jest przypisany.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Ekran automatycznie wraca do poprzedniego menu.

---

## Usuwanie połączeń pomiędzy wpisami i programowanymi przyciskami numerycznymi

Postępuj zgodnie z procedurą, aby usunąć połączenia pomiędzy wpisami i programowanymi przyciskami numerycznymi.

- 1 Wykonaj jedną z następujących czynności:
  - Przytrzymanie zaprogramowanego przycisku numerycznego pozwala przejść do wybranego aliasu lub ID. Przejdź do [krok 4](#).
  - Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby otworzyć **Kontakt y**.  
Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby Zaprogramować przycisk. Naciśnij , aby wybrać.

- 5 Naciśnij  lub , aby przejść do **Puste**.  
Naciśnij , aby wybrać.

Pierwsza linia tekstu pokazuje komunikat **Usuń ze wszystkich przycisków**.

- 6 Naciśnij  lub , aby **Potwierdzić**. Naciśnij , aby wybrać.

### UWAGA:

Gdy określona pozycja zostaje usunięta, połączenie pomiędzy nią a odpowiednim programowanym przyciskiem numerycznym zostaje anulowane.

Wybrzmiewa potwierdzający sygnał dźwiękowy. Na wyświetlaczu pojawi się komunikat **Kontakt t zapisany**.  
Ekran automatycznie wraca do poprzedniego menu.

## Dodawanie nowych kontaktów

Postępuj zgodnie z procedurą, aby dodać nowe kontakty.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontakty. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby dodać Nowy kontakt. Naciśnij , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby wybrać typ kontaktu Kontakt radiowy lub Kontakt telefoniczny. Naciśnij , aby wybrać.

---

- 5 Wprowadź numer kontaktowy przy pomocy klawiatury, a następnie naciśnij , aby kontynuować.

---

- 6 Wprowadź nazwę kontaktu przy pomocy klawiatury, a następnie naciśnij , aby kontynuować.
- 

- 7 Naciśnij  lub , aby przejść do wybranego rodzaju dzwonka. Naciśnij , aby wybrać. Wybrzmiewa potwierdzający sygnał dźwiękowy. Na wyświetlaczu pojawia się symbol powodzenia.
- 

## Ustawienia wskaźnika połączenia

Ta funkcja umożliwia użytkownikom konfigurowanie dźwięków połączeń lub wiadomości tekstowych.

## Włączanie lub wyłączanie dzwonek dla wywołań indywidualnych

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwoneki dla połączeń prywatnych.

- 1 Naciśnij , aby uzyskać dostęp do menu.
-

2 Naciśnij  lub  , aby przejść do Narzędzi.  
Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do Tonów/ Alarmów. Naciśnij  , aby wybrać.

---

5 Naciśnij  lub  , aby przejść do Dzwonków. Naciśnij  , aby wybrać.

---

6 Naciśnij  lub  , aby przejść do Połączeń prywatnych. Naciśnij  , aby wybrać.

---

7 Naciśnij  lub  , aby przejść do wybranego sygnału. Naciśnij  , aby wybrać.

Jeśli są włączone, obok informacji Włączone pojawi się  . Jeśli nie,  obok opcji Włączone zniknie.

---

## Włączanie lub wyłączanie dzwonek dla wiadomości tekstowych

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwonek dla wiadomości tekstowych.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do Tonów/ Alarmów. Naciśnij  , aby wybrać.

---

- 5 Naciśnij  lub  , aby przejść do Dzwonków. Naciśnij  , aby wybrać.

---

- 6 Naciśnij  lub  , aby przejść do Wiadomości tekstowej. Naciśnij  , aby wybrać.  
Wyświetlacz pokazuje  oraz obecny sygnał.

---

- 7 Naciśnij  lub  , aby przejść do wybranego sygnału. Naciśnij  , aby wybrać. Na wyświetlaczu pod wybranym sygnałem pojawi się .

## Włączanie lub wyłączanie dzwonek wywołania dla sygnału wywołania

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwonek odbieranych alertów połączeń.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do Dźwięków/ Alertów. Naciśnij  , aby wybrać.

---

- 5 Naciśnij  lub  , aby przejść do Dzwonków. Naciśnij  , aby wybrać.

---

- 6 Naciśnij przycisk  lub  , aby przejść do pozycji Alert połączenia. Naciśnij  , aby wybrać.

- 7 Naciśnij  lub , aby przejść do wybranego sygnału. Naciśnij , aby wybrać. Na wyświetlaczu pod wybranym sygnałem pojawi się ✓.
- 

## Włączanie lub wyłączanie dzwonek dla wywołań selektywnych

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwonek dla połączeń selektywnych.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- 
- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.
- 

- 4 Naciśnij  lub , aby przejść do Tonów Alarmów. Naciśnij , aby wybrać.
- 

- 5 Naciśnij  lub , aby przejść do Dzwonek. Naciśnij , aby wybrać.
- 

- 6 Naciśnij  lub , aby przejść do Połączeń selektywnych. Naciśnij , aby wybrać. Wyświetlacz pokazuje ✓ oraz obecny sygnał.
- 

- 7 Naciśnij  lub , aby przejść do wybranego sygnału. Naciśnij , aby wybrać. Na wyświetlaczu pod wybranym sygnałem pojawi się ✓.
-

## Włączanie i wyłączanie sygnału dźwiękowego wiadomości tekstowej z raportem telemetrycznym

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć sygnał dźwiękowy wiadomości tekstowej z raportem telemetrycznym.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Dźwięków Alertów. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do Dzwonków.  
Naciśnij , aby wybrać.

---

- 6 Naciśnij  lub , aby przejść do opcji Telemetria. Naciśnij , aby wybrać.  
Bieżący sygnał jest oznaczony za pomocą symbolu .

---

## Przypisywanie stylów dzwonka

Można zaprogramować radiotelefon do generowania jednego z dziesięciu wstępnie zdefiniowanych dzwonków podczas odbierania alertu połączenia lub wiadomości tekstowej od określonego kontaktu. Radiotelefon generuje dźwięk dla każdego stylu dzwonka podczas nawigacji na liście. Postępuj zgodnie z procedurą przypisywania stylów dzwonka w radiotelefonie.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.  
Wpisy są porządkowane w kolejności alfabetycznej.

---

- 3 Naciśnij  lub , aby przejść do  
wymaganego aliasu lub ID. Naciśnij , aby  
wybrać.

---

- 4 Naciśnij  lub , aby przejść do Edyc yj i.  
Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby Edytowa ć dzwonek.  
Naciśnij , aby wybrać.

---

- 6 Naciśnij  lub , aby przejść do wybranego  
sygnału. Naciśnij , aby wybrać.  
Pojawi się  obok wybranego sygnału dźwiękowego.

---

## Zwiększanie głośności dźwięku alarmu

Radiotelefon można zaprogramować do nieprzerwanego powiadamiania użytkownika o nieodebranych połączeniach radiowych. W tym przypadku poziom głośności dźwięku alarmu jest zwiększany automatycznie w miarę upływu czasu. Ta funkcja jest określana jako „alarm narastający”.

## Funkcje rejestru połączeń

Radiotelefon rejestruje wszystkie ostatnie wychodzące, odebrane i nieodebrane połączenia prywatne. Rejestr połączeń umożliwia przeglądanie ostatnich połączeń i zarządzanie nimi.

Nieodebrane alerty połączeń mogą być ujęte w rejestrze połączeń, w zależności od konfiguracji systemu w radiotelefonie. Na każdej liście połączeń można wykonać następujące zadania:

- Zapisz alias lub ID na liście kontaktów
- Usunięcie połączenia
- Usunięcie wszystkich połączeń
- Zobacz szczegóły

## Przeglądanie ostatnich połączeń

Postępuj zgodnie z procedurą, aby przeglądać ostatnie połączenia.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Rejestru połączeń. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do wybranej listy. Dostępne są następujące listy: Nieodebrane, Odebrane i Wychodzące.  
  
Naciśnij  , aby wybrać.  
  
Na wyświetlaczu zostanie pokazany najnowszy wpis.

---

- 4 Naciśnij  lub  , aby przeglądać listę.  
  
Naciśnij przycisk **PTT**, aby rozpocząć rozmowę prywatną z obecnie wyświetlanym aliasem lub ID.

## Zapisywanie aliasu lub ID z Listy połączeń

Postępuj zgodnie z procedurą, aby zapisywać aliasy lub ID z Listy połączeń.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Rejestru połączeń. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do wymaganej listy. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

- 5 Naciśnij  lub  , aby Zapisać. Naciśnij  , aby wybrać.

Na wyświetlaczu pojawia się migający kursor.

- 6 Wprowadź pozostałe litery wymaganego aliasu. Naciśnij  , aby wybrać.

Można również zapisać ID bez aliasu.

Na wyświetlaczu pojawia się symbol powodzenia.

## Usuwanie połączenia z Listy połączeń

Postępuj zgodnie z procedurą, aby usunąć połączenia z Listy połączeń.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub  , aby przejść do Rejestru połączeń. Naciśnij  , aby wybrać.

- 3 Naciśnij  lub  , aby przejść do wymaganej listy. Naciśnij  , aby wybrać.

Jeśli lista jest pusta:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*

- 4 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

- 5 Naciśnij  lub  , aby Skasować pozycję. Naciśnij  , aby wybrać.

- 6 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  , aby wybrać opcję Tak i usunąć wpis. Na wyświetlaczu pojawi się komunikat *Poz. Usun..*

- Naciśnij  lub , aby wybrać Nie.  
Naciśnij , aby wybrać.  
Radiotelefon powróci do poprzedniego ekranu.
- 

## Usuwanie wszystkich połączeń z Listy połączeń

Postępuj zgodnie z procedurą, aby usunąć wszystkie połączenia z Listy połączeń.

- Naciśnij , aby uzyskać dostęp do menu.
  - Naciśnij  lub , aby przejść do Rejestru połączeń. Naciśnij , aby wybrać.
  - Naciśnij  lub , aby przejść do wymaganej listy. Naciśnij , aby wybrać.
- 

- Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.
  - Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.
  - Wykonaj jedną z następujących czynności:
    - Naciśnij , aby wybrać opcję Tak i usunąć wszystkie wpisy. Na wyświetlaczu pojawia się symbol powodzenia.
    - Naciśnij  lub , aby wybrać Nie. Naciśnij , aby wybrać. Radiotelefon powróci do poprzedniego ekranu.
- 

## Wyświetlanie szczegółowych informacji z Listy połączeń

Postępuj zgodnie z procedurą, aby wyświetlić szczegółowe informacje z Listy połączeń.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Rejestru połączeń. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do wymaganej listy. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

---

- 5 Naciśnij  lub  , aby wyświetlić szczegóły. Naciśnij  , aby wybrać.  
Wyświetlacz pokaże szczegółowe informacje.

---

## Alert połączenia

Korzystając z funkcji wysyłania alertu połączenia na pager, można poinformować użytkownika określonego radiotelefonu o konieczności zainicjowania połączenia zwrotnego, kiedy będzie to możliwe.

Ta funkcja jest dostępna tylko dla aliasów lub identyfikatorów abonentów za pośrednictwem menu listy kontaktów, wybierania ręcznego lub programowanego przycisku **szybkiego połączenia**.

Funkcja alertu połączenia w systemie Capacity Max umożliwia użytkownikowi radiotelefonu lub dyspozytorowi wysłanie do innego użytkownika radiotelefonu alertu z żądaniem oddzwonienia do użytkownika inicjującego, kiedy użytkownik będzie dostępny. Komunikacja głosowa nie jest wykorzystywana w tej funkcji.

Działanie alertu połączenia może być skonfigurowane przez sprzedawcę lub administratora systemu na dwa sposoby:

- Radiotelefon jest skonfigurowany tak, aby umożliwić użytkownikowi naciśnięcie przycisku **PTT**, aby odpowiedzieć na połączenie bezpośrednio do inicjatora alertu poprzez nawiązanie połączenia prywatnego.
- Radiotelefon jest skonfigurowany tak, aby umożliwić użytkownikowi naciśnięcie przycisku **PTT** i

kontynuowanie komunikacji z inną grupą rozmówców. Naciśnięcie przycisku **PTT** w odpowiedzi na alert połączenia nie umożliwia użytkownikowi wysłania odpowiedzi do użytkownika inicjującego. Użytkownik musi przejść do rejestru połączeń nieodebranych w menu rejestru połączeń i odpowiedzieć na alert połączenia stamtąd.

Połączenie prywatne w systemie OACSU pozwala odpowiedzieć natychmiast, zaś w systemie FOACSU połączenie prywatne wymaga potwierdzenia przez użytkownika. Połączenia typu OACSU są z tego powodu zalecane dla funkcji alertu połączenia. Zobacz [Połączenie indywidualne na str. 86](#).

## Inicjowanie alertów połączenia

Postępuj zgodnie z procedurą, aby wysłać alarmy połączeń.

### 1 Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

Na wyświetlaczu pojawi się komunikat **Alert połączenia** oraz alias i ID abonenta. Zielona dioda LED zapala się.

### 2 Zaczekaj na potwierdzenie.

Jeżeli potwierdzenie alertu połączenia zostanie odebrane, na wyświetlaczu pojawi się miniinformacja o udanej operacji.

Jeżeli potwierdzenie alertu połączenia nie zostanie odebrane, na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.

## Inicjowanie alertów połączenia przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby inicjować alerty połączenia przy pomocy Listy kontaktów

### 1 Naciśnij , aby uzyskać dostęp do menu.

### 2 Naciśnij lub , aby otworzyć Kontak ty.

Naciśnij  , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

4 Naciśnij przycisk  lub , aby przejść do pozycji Alert połączenia. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się komunikat Alert połączenia oraz alias i ID abonenta. Zielona dioda LED zapala się.

5 Zaczekaj na potwierdzenie.

- Jeżeli potwierdzenie alertu połączenia zostanie odebrane, na wyświetlaczu pojawi się miniinformacja o udanej operacji.
- Jeżeli potwierdzenie alertu połączenia nie zostanie odebrane, na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.

## Reagowanie na alerty połączenia

Postępuj zgodnie z procedurą, aby odpowiadać na alerty połączenia.

Po otrzymaniu alertu połączenia:

- Zostanie wyemitowany powtarzany sygnał dźwiękowy.
- Żółta dioda LED miga.
- Na wyświetlaczu pojawi się lista powiadomień z alertami połączeń oraz aliasem lub ID radiotelefonu rozmówcy.

W zależności od sposobu konfiguracji urządzenia przez sprzedawcę lub administratora systemu, można odpowiedzieć na alert połączenia wykonując jedną z następujących czynności:

- Naciśnij przycisk **PTT** i odbierz połączenie indywidualne bezpośrednio.
- Naciśnij przycisk **PTT**, aby kontynuować normalną komunikację z grupą rozmówców. Alert połączenia jest przenoszony do nieodebranych połączeń w rejestrze połączeń. Możesz odpowiedzieć rozmówcy z rejestru nieodebranych połączeń.

Patrz [Lista powiadomień na str. 211](#) i [Funkcje rejestru połączeń na str. 143](#), aby uzyskać więcej informacji.

## Tryb wyciszony

Tryb wyciszenia zapewnia opcję wyciszenia wszystkich powiadomień dźwiękowych radiotelefonu.

Po zainicjowaniu trybu wyciszenia wszystkie powiadomienia dźwiękowe, za wyjątkiem funkcji o wysokim priorytecie, takich jak operacje awaryjne, zostaną wyciszone.

Po wyłączeniu trybu wyciszenia radiotelefon będzie ponownie emitować sygnały i transmisje dźwiękowe.

### UWAGA:

Jest to dodatkowa (płatna) funkcja. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie trybu wyciszenia

Postępuj zgodnie z procedurą, aby włączyć Tryb wyciszenia.

Dostęp do tej funkcji jest możliwy za pomocą zaprogramowanego przycisku **Tryb wyciszenia**.

Po włączeniu trybu wyciszenia:

- Rozlega się potwierdzający sygnał dźwiękowy.
- Wyświetlacz pokazuje Tryb wyciszenia wł.
- Czerwona dioda LED zacznie migać i będzie kontynuować miganie do momentu opuszczenia Trybu wyciszenia.
- Na wyświetlaczu na ekranie głównym pojawi się ikona **Tryb wyciszenia**.
- Radiotelefon jest wyciszony.
- Timer trybu wyciszenia rozpoczyna odliczanie skonfigurowanego czasu.

## Ustawianie timera trybu wyciszenia

Funkcję trybu wyciszenia można włączyć na określony wstępnie okres czasu, ustawiając timer trybu wyciszenia. Czas trwania timera jest konfigurowany w menu radiotelefonu i może mieścić się w zakresie od 0,5–6 godzin. Urządzenie wychodzi z trybu wyciszenia po upływie czasu timera.

Jeśli timer zostanie ustawiony na wartość 0, radiotelefon pozostanie w trybie wyciszenia przez niezdefiniowany okres czasu do momentu naciśnięcia zaprogramowanego przycisku **Tryb wyciszenia**.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby Wyciszyć timer. Naciśnij , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby edytować wartość numeryczną każdej cyfry i naciśnij .

## Wyjście z Trybu wyciszenia

Ta funkcja może zostać opuszczona automatycznie, po tym jak upłynie czas trybu wyciszenia.

Wykonaj jedną z poniższych czynności, aby wyjść z trybu wyciszenia ręcznie:

- Naciśnij zaprogramowany przycisk **Tryb wyciszenia**.
- Naciśnij przycisk **PTT** przy dowolnej pozycji.

Po wyłączeniu Trybu wyciszenia:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Wyświetlacz pokazuje Tryb wyciszenia wyl.
- Czerwona migająca dioda LED gaśnie.
- Ikona **trybu wyciszenia** znika z ekranu głównego.
- Wyciszenie radiotelefonu zostanie wyłączone, a stan głośnika przywrócony.
- Jeśli timer trybu wyciszenia nie wygaś, zostanie zatrzymany.

**UWAGA:**

Tryb wyciszenia zostanie również wyłączony, jeśli użytkownik rozpocznie transmisję głosową lub przełączy się na niezaprogramowany kanał.

## Tryb awaryjny

Sygnal alarmowy jest używany do sygnalizowania sytuacji krytycznej. Tryb awaryjny można zainicjować w dowolnym momencie, nawet jeśli bieżący kanał jest używany.

W systemie Capacity Max odbierający radiotelefon może obsługiwać tylko pojedynczą informację alarmową w danym czasie. Po zainicjowaniu druga informacja alarmowa zastąpi pierwszy alarm.

Gdy zostanie odebrana informacja alarmowa, odbiorca może wybrać jej usunięcie i wyjść z Listy alarmów lub odpowiedzieć na informację alarmową, naciskając przycisk **PTT** i dokonując transmisji głosowej w trybie niealarmowym.

Sprzedawca lub administrator systemu może ustawić czas naciśnięcia programowanego przycisku **Alarmowego** (z wyjątkiem dłuższego naciśnięcia), podobnie jak w przypadku wszystkich innych przycisków:

### Krótkie naciśnięcie

Czas trwania od 0,05 s do 0,75 s.

### Długie naciśnięcie

Czas trwania od 1,00 s do 3,75 s.

Przycisk **Alarmowy** jest przypisany funkcji włączania/wyłączania alarmu. Należy sprawdzić u sprzedawcy, jaki jest przypisany czas działania przycisku **alarmowego**.

**UWAGA:**

Jeżeli krótkie naciśnięcie przycisku **Alarmowego** jest przypisane włączeniu trybu alarmowego, to długie naciśnięcie przycisku **Alarmowego** jest przypisane wyjściu z trybu alarmowego.

Jeżeli długie naciśnięcie przycisku **Alarmowego** jest przypisane włączeniu trybu alarmowego, to krótkie naciśnięcie przycisku **Alarmowego** jest przypisane wyjściu z trybu alarmowego.

Radiotelefon obsługuje trzy informacje alarmowe:

- Informacja alarmowa,
- Informacja alarmowa z wywołaniem,
- Sygnal alarmowy z funkcją awaryjnej aktywacji mikrofonu.

Dodatkowo każdy alarm może należeć do jednego z następujących typów:

## Regularny

Radiotelefon nadaje sygnał alarmowy oraz stosuje sygnały wizualne lub dźwiękowe.

## Ciche

Radiotelefon nadaje sygnał alarmowy bez sygnałów wizualnych lub dźwiękowych. Radiotelefon odbiera połączenia bez emitowania dźwięku przez głośnik do chwili zakończenia zaprogramowanego czasu transmisji *mikrofonu aktywnego* i/lub do momentu naciśnięcia przycisku **PTT**.

## Cichy z obsługą głosu

Radiotelefon nadaje sygnał alarmowy bez sygnałów wizualnych czy dźwiękowych, ale odtwarza dźwięk połączeń przychodzących za pomocą wbudowanego głośnika.

### UWAGA:

Tylko **jeden** spośród powyższych alarmów może być przypisany do zaprogramowanego przycisku **awaryjnego** lub awaryjnego przycisku nożnego.

## Wysyłanie informacji alarmowych

Ta funkcja pozwala wysłać informację alarmową — sygnał bezdźwiękowy — który generuje informację o alarmie w

grupie radiotelefonów. Postępuj zgodnie z procedurą, aby wysłać informacje alarmowe.

Radiotelefon nie emituje powiadomień dźwiękowych ani wizualnych w trybie awaryjnym, gdy ustawiona jest opcja wyciszenia.

### 1 Naciśnij zaprogramowany przycisk **Alarm wł.**

Pojawi się jeden z poniższych rezultatów:

- Na wyświetlaczu pojawia się komunikat **Alarmy Tx** i alias odbiorcy.
- Na wyświetlaczu pojawi się komunikat **Tx Telegram (Telegram Tx)** i alias odbiorcy.

Zielona dioda LED zapala się. Pojawi się ikona **Alarm**.

**UWAGA:**

Jeżeli zaprogramowano go, emitowany jest sygnał dźwiękowy wyszukiwania awaryjnego. Dźwięk ten jest wyciszany, gdy radiotelefon nadaje lub odbiera komunikaty głosowe oraz wyłączany, gdy radiotelefon wyjdzie z trybu alarmowego. Sygnał awaryjnego wyszukiwania może być zaprogramowany przez sprzedawcę lub administratora systemu.

**2** Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Emitowany jest sygnał alarmowy.
- Zielona dioda LED miga.
- Na wyświetlaczu pojawi się komunikat Alarm wysł.

Jeśli operacja nie powiedzie się po wykorzystaniu wszystkich prób:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się komunikat Alarm nieudany.

Radiotelefon kończy tryb informacji alarmowej i ponownie wyświetla ekran główny.

**UWAGA:**

W przypadku skonfigurowania tylko alarmu awaryjnego proces awaryjny obejmuje tylko przekazanie informacji alarmowej. Alarm kończy się po otrzymaniu potwierdzenia z systemu, lub gdy liczba prób dostępu do kanału zostanie wyczerpana.

Brak połączenia głosowego jest powiązany z wysyłaniem informacji alarmowej podczas pracy w trybie tylko alarmu awaryjnego.

## Wysyłanie informacji alarmowych z wywołaniem

Ta funkcja pozwala wysłać informację alarmową z wywołaniem do grupy radiotelefonów lub do dyspozytora. Po uzyskaniu potwierdzenia przez infrastrukturę w danej grupie, grupa radiotelefonów może komunikować się przez zaprogramowany kanał alarmowy.

Radiotelefon musi mieć skonfigurowane informacje alarmowe z wywołaniem, aby było możliwe wykonywanie połączeń alarmowych po wystąpieniu alarmu.

## 1 Naciśnij programowalny przycisk **Alarm wł.**

Na wyświetlaczu pojawia się komunikat `Alarm Tx` i alias odbiorcy. Pojawi się ikona **Alarm**. Zielona dioda LED zapala się.

### **UWAGA:**

Jeżeli zaprogramowano go, emitowany jest sygnał dźwiękowy wyszukiwania awaryjnego. Dźwięk ten jest wyciszany, gdy radiotelefon nadaje lub odbiera komunikaty głosowe oraz wyłączany, gdy radiotelefon wyjdzie z trybu alarmowego.

Jeśli potwierdzenie odbioru informacji alarmowej zostanie pomyślnie odebrane:

- Emitowany jest sygnał alarmowy.
- Zielona dioda LED miga.
- Na wyświetlaczu pojawi się komunikat `Alarm wysł.`
- Radiotelefon przejdzie do trybu połączenia alarmowego po wyświetleniu komunikatu `Alarm` i docelowego aliasu grupy.

Jeśli potwierdzenie odbioru informacji alarmowej nie zostało pomyślnie odebrane:

- Wszelkie ponowne próby zostają wyczerpane.
- Zostanie odtworzony niski dźwięk.
- Na wyświetlaczu pojawi się komunikat `Alarm nieudany.`
- Radiotelefon wyjdzie z trybu alarmu awaryjnego.

---

## 2 Naciśnij przycisk **PTT** , aby zainicjować transmisję głosową.

Zielona dioda LED zapala się. Na wyświetlaczu pojawi się ikona **połączenia grupowego**.

---

## 3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

---

## 4 Aby słuchać, zwolnij przycisk **PTT**.

Na wyświetlaczu widać aliasy rozmówcy i grupy.

---

- 5 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

- 6 Naciśnij przycisk **Alarm Wył.**, aby wyjść z trybu alarmowego.

Zostanie wyświetlony ekran główny.

**UWAGA:**

W zależności od sposobu zaprogramowania radiotelefonu może być emitowany sygnał zezwolenia na rozmowę. Więcej informacji o sposobie zaprogramowania telefonu do obsługi trybu awaryjnego można uzyskać u sprzedawcy radiotelefonu lub u administratora systemu.

Inicjator połączenia alarmowego może

naciśnąć przycisk , aby zakończyć trwające połączenie alarmowe. Radiotelefon powróci do stanu bezczynności, ale ekran połączenia alarmowego pozostanie otwarty.

## Wysyłanie informacji alarmowych z żądaniem połączenia głosowego

Ta funkcja pozwala wysłać informację alarmową z żądaniem połączenia głosowego do grupy radiotelefonów. Mikrofon radiotelefonu zostaje automatycznie aktywowany, pozwalając na komunikację z grupą radiotelefonów bez naciśnięcia przycisku **PTT**. Taki stan jest również określany mianem *aktywny mikrofon*.

**UWAGA:**

Radiotelefon nie wykrywa mikrofonu innego niż IMPRES podłączonego do tylnego złącza do akcesoriów.

Jeśli nie zostanie wykryty żaden mikrofon w określonym zaprogramowanym złączu, radiotelefon sprawdzi drugie złącze. W takim wypadku akcesorium priorytetowym jest wykryty mikrofon.

Jeżeli w radiotelefonie jest włączony tryb Cyklu awaryjnego, powtórzenia okresów *aktywnego mikrofonu* i odbierania mają zaprogramowany czas. W trybie Cyklu awaryjnego odbierane połączenia są słyszalne przez głośnik.

Przy naciśnięciu przycisku **PTT** podczas zaprogramowanego okresu odbierania, zabrzmi ton zakazu, oznaczający konieczność zwolnienia przycisku

**PTT.** Radiotelefon ignoruje naciśnięcie przycisku **PTT** i pozostaje w trybie alarmowym.

Jeżeli przycisk **PTT** zostanie naciśnięty w interwale czasowym, w którym używany jest *mikrofon aktywny* i pozostanie naciśnięty po wygaśnięciu interwału *mikrofonu aktywnego*, radiotelefon kontynuuje nadawanie aż do chwili, gdy zostanie zwolniony przycisk **PTT**.

Jeżeli próba wysłania informacji alarmowej nie powiedzie się, radiotelefon nie ponawia próby, ale przechodzi bezpośrednio w stan *aktywny mikrofon*.

**UWAGA:**

Niektóre akcesoria mogą nie obsługiwać *mikrofonu aktywnego*. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Postępuj zgodnie z procedurą, aby wysłać sygnał alarmowy z żądaniem połączenia głosowego.

- 1 Naciśnij programowalny przycisk **Alarm wł.** lub **Alarmowy** włącznik nożny.

Na wyświetlaczu zobaczysz jeden z dwóch poniższych wyników:

- Na wyświetlaczu pojawia się komunikat **Alarm Tx** i alias odbiorcy.

- Na wyświetlaczu pojawi się komunikat **Tx Telegram** (Telegram Tx) i alias odbiorcy.

Zielona dioda LED zapala się. Pojawi się ikona **Alarm**.

- 
- 2 Gdy na wyświetlaczu pojawi się *wysłano informację alarmową*, mów wyraźnie do mikrofonu.

Radiotelefon automatycznie zaprzestaje transmisji:

- Po wygaśnięciu cyklu pomiędzy *aktywnym mikrofonem* a odbieraniem, jeżeli tryb Cyklu alarmowego jest włączony.
- Po wygaśnięciu okresu *mikrofonu aktywnego*, jeśli tryb Cyklu alarmowego jest wyłączony.

- 
- 3 Naciśnij przycisk **Alarm Wył.**, aby wyjść z trybu alarmowego.

Zostanie wyświetlony ekran główny.

---

## Odbieranie informacji alarmowych

Odbierający radiotelefon może obsługiwać tylko pojedynczą informację alarmową w danym czasie. Po zainicjowaniu druga informacja alarmowa zastąpi pierwszy alarm. Postępuj zgodnie z procedurą, aby odbierać i wyświetlać informacje alarmowe.

Gdy otrzymasz informację alarmową:

- Zostanie wyemitowany sygnał.
- Miga czerwona dioda LED.
- Na wyświetlaczu pojawi się lista informacji alarmowych, ID lub aliasy grup rozmówców w sytuacjach alarmowych oraz ID lub alias nadającego radiotelefonu.

**1** Naciśnij przycisk , aby wyświetlić informację alarmową.

**2** Naciśnij , aby wyświetlić opcje czynności i szczegóły dotyczące każdej pozycji na liście alarmów.

**3** Naciśnij  i wybierz **Tak**, aby wyjść z listy alarmów.

Radiotelefon powróci do ekranu głównego z wyświetloną w górnej części ekranu **ikoną alarmu**, która wskazuje, że istnieją informacje alarmowe oczekujące na rozwiązanie. **Ikona alarmu** zniknie po usunięciu wpisu na liście alarmów.

**4** Naciśnij , aby uzyskać dostęp do menu.

**5** Wybierz **Listę alarmów**, aby ponownie wejść do listy alarmów.

**6** Emitowany jest sygnał dźwiękowy, a dioda LED zaczyna migać na czerwono do momentu wyjścia z trybu awaryjnego. Sygnał dźwiękowy można wyciszyć. Wykonaj jedną z następujących czynności:

- naciśnij przycisk **PTT**, aby wywołać grupę radiotelefonów, które odebrały sygnał alarmowy,
- dotknij dowolny przycisk programowalny,

## Reagowanie na informacje alarmowe

Gdy zostanie odebrana informacja alarmowa, odbiorca może wybrać jej usunięcie i wyjść z Listy alarmów lub odpowiedzieć na informację alarmową, naciskając przycisk **PTT** i dokonując transmisji głosowej w trybie niealarmowym. Postępuj zgodnie z procedurą, aby odpowiadać na informacje alarmowe.

- 1 Jeśli wskaźnik informacji alarmowej jest włączony, lista informacji alarmowych jest wyświetlana, gdy radiotelefon odbiera informację alarmową. Naciśnij

 lub , aby przejść do wymaganego aliasu lub ID.

- 2 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby transmitować przekaz głosowy poza trybem alarmowym do tej samej grupy, dla której była przeznaczona informacja alarmowa.

Zielona dioda LED zapala się.

- 3 Wykonaj jedną z następujących czynności:
  - Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
  - Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

- 4 Aby słuchać, zwolnij przycisk **PTT**.

Gdy odpowiada radiotelefon inicjujący alarm:

- Miga czerwona dioda LED.
- Na wyświetlaczu pojawi się ikona **Połączenie alarmowe**, ID lub aliasy grup rozmówców w sytuacjach alarmowych oraz ID lub alias nadającego radiotelefonu.

### UWAGA:

Jeśli wskaźnik połączenia alarmowego nie jest włączony, na wyświetlaczu pojawi się ikona **Połączenie grupowe**, ID lub aliasy grup rozmówców w sytuacjach alarmowych oraz ID lub alias nadającego radiotelefonu.

## Reagowanie na informacje alarmowe z wywołaniem

Postępuj zgodnie z procedurą, aby odpowiadać na informacje alarmowe z wywołaniem.

Podczas odbierania połączenia alarmowego:

- Sygnał dźwiękowy połączenia alarmowego zostanie wyemitowany, jeśli wskaźnik połączenia alarmowego i sygnał dźwiękowy dekodowania połączenia alarmowego są włączone. Sygnał dźwiękowy połączenia alarmowego nie będzie słyszalny, jeśli jest włączony tylko wskaźnik wywołania alarmowego.
- W prawym górnym rogu wyświetlacza pojawi się ikona **Połączenia alarmowego**.
- W linii tekstu pojawi się ID lub alias grupy rozmówców w sytuacjach alarmowych oraz ID lub alias nadającego radiotelefonu.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.
  - 1 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia

przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Zielona dioda LED zapala się.

- 
- 2 Poczekał na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

- 
- 3 Aby słuchać, zwolnij przycisk **PTT**.

Gdy odpowiada radiotelefon inicjujący alarm:

- Miga czerwona dioda LED.
- Na wyświetlaczu pojawi się ikona **Połączenie alarmowe**, ID lub aliasy grup rozmówców w sytuacjach alarmowych oraz ID lub alias nadającego radiotelefonu.

### UWAGA:

Jeśli wskaźnik połączenia alarmowego nie jest włączony, na wyświetlaczu pojawi się ikona **Połączenie grupowe**, ID lub aliasy grup rozmówców w sytuacjach alarmowych oraz ID lub alias nadającego radiotelefonu.

## Wiadomość o statusie

Ta funkcja umożliwia użytkownikowi wysyłanie wiadomości o statusie do innych radiotelefonów.

Listę Szybki status można konfigurować poprzez oprogramowanie CPS-RM i może ona obejmować maksymalnie 99 statusów.

Maksymalna liczba znaków w wiadomości o statusie to 16.

### UWAGA:

Każdy status ma odpowiadającą mu wartość cyfrową z zakresu od 0–99. Dla każdego statusu można określić alias dla łatwiejszego korzystania.

## Wysyłanie komunikatu o stanie

Postępuj zgodnie z poniższą procedurą, aby wysłać wiadomość o statusie.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Statusu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do pozycji Szybki status. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do wymaganego aliasu lub ID użytkownika albo aliasu lub ID grupy. Naciśnij , aby wybrać.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o powodzeniu, a następnie powraca do ekranu Szybki status.

- Na wyświetlaczu pojawi się ✓ obok wysłanej wiadomości o statusie.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o niepowodzeniu, a następnie powraca do ekranu *Szybki status*.

## Wysyłanie nowej wiadomości o statusie za pomocą przycisku programowalnego

Postępuj zgodnie z procedurą, aby wysłać wiadomość o statusie za pomocą przycisku programowalnego.

- 1 Naciśnij zaprogramowany przycisk **Wiadomość o statusie**.

- 2 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać. Zostanie wyświetlona lista kontaktów.

- 3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID użytkownika albo aliasu lub ID grupy. Naciśnij , aby wybrać.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o powodzeniu, a następnie powraca do ekranu *Szybki status*.
- Na wyświetlaczu pojawi się ✓ obok wysłanej wiadomości o statusie.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o niepowodzeniu, a następnie powraca do ekranu *Szybki status*.

## Wysyłanie wiadomości o statusie przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wysłać wiadomość o statusie za pomocą Listy kontaktów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID użytkownika albo aliasu lub ID grupy. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do pozycji Wyślij status. Naciśnij , aby wybrać.

- 5 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o powodzeniu, a następnie powraca do ekranu Szybki status.
- Na wyświetlaczu pojawi się  obok wysłanej wiadomości o statusie.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o niepowodzeniu, a następnie powraca do ekranu Szybki status.

## Wysyłanie wiadomości o statusie przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby wysłać wiadomość o statusie przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać.

---

- 5 Wprowadź wymagany alias lub ID abonenta albo alias lub ID grupy i naciśnij , aby przejść dalej.

---

- 6 Naciśnij  lub , aby przejść do pozycji Wyślij status. Naciśnij , aby wybrać.
- 

- 7 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.
- 

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o powodzeniu, a następnie powraca do ekranu Szybki status.
- Na wyświetlaczu pojawi się  obok wysłanej wiadomości o statusie.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o niepowodzeniu, a następnie powraca do ekranu Szybki status.

## Wyświetlanie wiadomości o statusie

Postępuj zgodnie z procedurą, aby wyświetlić wiadomości o statusie.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Statusu.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.  
Treść wiadomości o statusie jest wyświetlana użytkownikowi radiotelefonu.

Otrzymane wiadomości o statusie można również wyświetlić, przechodząc do Listy powiadomień. Dodatkowe informacje: [Lista powiadomień na str. 211](#).

[Wyślij informację zwrotną](#)

## Odpowiadanie na wiadomości o statusie

Postępuj zgodnie z procedurą, aby odpowiedzieć na wiadomości o statusie.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Statusu.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.

---

- 5 Wyświetlona zostanie treść statusu. Naciśnij , aby wybrać.

6 Naciśnij  lub , aby Odpowiedzieć.

Naciśnij , aby wybrać.

---

7 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.

---

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje mini informację o udanej operacji, a następnie powraca do ekranu Skrzynka odbiorcza.
- Na wyświetlaczu pojawi się  obok wysłanej wiadomości o statusie.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Dioda LED gaśnie.
- Wyświetlacz pokazuje tymczasowo informację o niepowodzeniu, a następnie powraca do ekranu Skrzynka odbiorcza.

## Usuwanie wiadomości o statusie

Postępuj zgodnie z procedurą, aby usunąć wiadomości o statusie z radiotelefonu.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Statusu. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do wybranej wiadomości o statusie. Naciśnij , aby wybrać.

---

5 Wyświetlona zostanie treść statusu. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

---

7 Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać.

---

- Wyświetlacz pokazuje mini informację o udanej operacji, a następnie powraca do ekranu Skrzynka odbiorcza.

## Usuwanie wszystkich wiadomości o statusie

Postępuj zgodnie z procedurą, aby usunąć wszystkie wiadomości o statusie z radiotelefonu.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Statusu. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać.

---

- Na wyświetlaczu pojawi się komunikat Lista jest pusta.

## Wiadomości tekstowe

Radiotelefon może odbierać dane (np. wiadomości tekstowe) wysłane z innego urządzenia lub programu do ich wysyłania.

Istnieją dwa typy wiadomości tekstowych: krótkie wiadomości tekstowe DMR (Digital Mobile Radio) i wiadomości tekstowe. Maksymalna długość krótkiej wiadomości tekstowej DMR to 23 znaki. Maksymalna liczba znaków wiadomości wynosi 280, włączając w to linię

tematu. Wiersz tematu pojawia się tylko po otrzymaniu wiadomości z aplikacji poczty e-mail.

#### UWAGA:

Maksymalna długość znaków ma zastosowanie wyłącznie w modelach wyposażonych w najnowszej wersji oprogramowanie i sprzęt. W modelach ze starszą wersją oprogramowania i sprzętu maksymalna długość wiadomości tekstowej to 140 znaków. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

W języku arabskim tekst jest wpisywany od prawej strony do lewej.

## Wiadomości tekstowe

Wiadomości tekstowe są przechowywane w Skrzynce odbiorczej i sortowane zgodnie z kolejnością ich odebrania.

Radiotelefon zamyka bieżący ekran po zakończeniu odliczania czasu nieaktywności. Przytrzymaj przycisk

 , aby w dowolnym momencie powrócić do Ekranu głównego.

## Wyświetlanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wyświetlać wiadomości tekstowe.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

  - 2 Naciśnij  lub  , aby przejść do Wiadomości. Naciśnij  , aby wybrać.

---

  - 3 Naciśnij  lub  , aby przejść do Skrzynki odbiorczej. Naciśnij  , aby wybrać.
- Jeśli Skrzynka odbiorcza jest pusta:
- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*
  - Zabrzmi sygnał klawiatury, jeśli jest włączony.

- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać. Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.

## Przeglądanie wiadomości tekstowych z raportem telemetrii

Postępuj zgodnie z procedurą, aby wyświetlić wiadomość tekstową z raportem telemetrii ze skrzynki odbiorczej.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do wiadomości. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać. Nie możesz odpowiedzieć na wiadomość tekstową dot. stanu telemetrii.

Na ekranie pojawi się komunikat Telemetria:  
<Stan wiadomości tekstowej>.

- 5 Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

## Odpowiadanie na wiadomości tekstowe

Postępuj zgodnie z procedurą, aby odpowiadać na wiadomości tekstowe.

Po otrzymaniu wiadomości tekstowej:

- Wyświetlacz pokazuje listę powiadomień z aliasami lub ID nadawcy.
- Na wyświetlaczu pojawia się ikona **Wiadomość**.

**UWAGA:**

Jeżeli wciśnięty jest przycisk **PTT**, radiotelefon wychodzi z ekranu alertu wiadomości tekstowej i rozpoczyna połączenie prywatne lub grupowe z nadawcą wiadomości.

**1 Wykonaj jedną z następujących czynności:**

- Naciśnij  lub , aby **Przeczytać**.

Naciśnij , aby wybrać.

Na wyświetlaczu widnieje wiadomość tekstowa. Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.

- Naciśnij  lub , aby **Przeczytać**

później. Naciśnij , aby wybrać.

Radiotelefon powraca do ekranu, który był aktywny przed odebraniem wiadomości tekstowej.

- Naciśnij  lub , aby **Skasować**. Naciśnij , aby wybrać.

**2 Wykonaj jedną z następujących czynności:**

- Naciśnij przycisk , aby powrócić do skrzynki odbiorczej.
- Naciśnij przycisk  po raz drugi, aby odpowiedzieć, przesłać dalej lub usunąć wiadomość tekstową.

## Odpowiadanie na wiadomości tekstowe przy użyciu krótkich wiadomości tekstowych

Postępuj zgodnie z procedurą, aby odpowiadać na wiadomości przy użyciu krótkich wiadomości tekstowych.

**1 Wykonaj jedną z następujących czynności:**

- Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do kroku 3.
- Naciśnij , aby uzyskać dostęp do menu.

**2**

Naciśnij  lub , aby przejść do **Wiadomości**. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.  
Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.

---

5 Naciśnij , aby wejść do dodatkowego menu.

---

6 Naciśnij  lub , aby Odpowiedzieć.  
Naciśnij , aby wybrać.

---

7 Naciśnij  lub , aby przejść do Krótkiej odpowiedzi. Naciśnij , aby wybrać.

---

8 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się miniinformacja o tym, że wiadomość jest wysłana.

---

9 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Zostanie wyemitowany sygnał.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
  - Radiotelefon powróci do ekranu opcji Wyślij ponownie.
-

## Ponowne wysyłanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby ponownie wysłać wiadomości tekstowe.

Podczas wyświetlanie ekranu opcji **Wyślij** ponownie:

Naciśnij , aby ponownie wysłać tę samą wiadomość do tego samego aliasu grupy lub ID.

Jeżeli się powiedzie:

- Wyrzmiwia potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
  - Radiotelefon powróci do ekranu opcji **Wyślij** ponownie.
- 

## Przekazywanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby przekazywać wiadomości tekstowe.

Podczas wyświetlanie ekranu opcji **Wyślij** ponownie:

- 1 Naciśnij  lub , aby Przekazać dalej i naciśnij  aby przesłać tę samą wiadomość do innego aliasu lub ID abonenta lub grupy.
- 

- 2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

---

- 3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

**UWAGA:**

Mozna również ręcznie wybrać adres radiotelefonu docelowego (patrz rozdział [Przekazywanie wiadomości tekstowych za pomocą wybierania ręcznego na str. 477](#)).

## Przekazywanie wiadomości tekstowych za pomocą wybierania ręcznego

Postępuj zgodnie z procedurą, aby przekazywać wiadomości tekstowe za pomocą wybierania ręcznego.

- 1 Naciśnij przycisk  lub , aby przejść do przekazywania. Naciśnij , aby wybrać.
- 2 Naciśnij , aby ponownie wysłać tę samą wiadomość do tego samego abonenta, aliasu grupy lub ID.

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać. Na wyświetlaczu pojawi się Numer radiotelefonu!.

- 4 Wprowadź ID abonenta i naciśnij , aby kontynuować. Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

- 5 Zaczekaj na potwierdzenie.
  - Jeżeli się powiedzie:
    - Zostanie wyemitowany sygnał.
    - Na wyświetlaczu pojawia się symbol powodzenia.
  - Jeżeli się nie powiedzie:
    - Zostanie wyemitowany sygnał.
    - Na wyświetlaczu pojawia się symbol niepowodzenia.

## Edytowanie wiadomości tekstowych

Wybierz opcję *Edycja*, aby edytować wiadomość.

### UWAGA:

Jeśli wpisane zostało pole tematu (dla odebranych wiadomości wysłanych z programu poczty elektronicznej), nie możesz go edytować.

- 1 Naciśnij  lub , aby przejść do *Edycji*.  
Naciśnij , aby wybrać.  
Na wyświetlaczu pojawia się migający kursor.

- 2 Korzystając z klawiatury, edytuj wiadomość.

- Naciśnij przycisk , aby przejść o jedno miejsce w lewo.
- Naciśnij przycisk  lub , aby przejść o jedno miejsce w prawo.
- Naciśnij przycisk , aby usunąć niechciane znaki.

- Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

- 3 Po utworzeniu wiadomości naciśnij przycisk  .

- 4 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do *Wysyłania* i naciśnij , aby wysłać wiadomość.
- Naciśnij  lub , aby przejść do *Zapisywania* i naciśnij , aby zapisać wiadomość w folderze *Kopie robocze*.
- Naciśnij przycisk , aby edytować wiadomość.
- Naciśnij , aby usunąć wiadomość lub zapisać ją w folderze *Kopie robocze*.

## Pisanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysyłać wiadomości tekstowe.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby Utworzyć. Naciśnij , aby wybrać. Pojawi się migający kursor.

---

- 4 Przy pomocy klawiatury napisz wiadomość. Naciśnij przycisk , aby przejść o jedno miejsce w lewo.

Naciśnij przycisk  lub , aby przejść o jedno miejsce w prawo.

Naciśnij przycisk , aby usunąć niechciane znaki.

Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

- 5 Po utworzeniu wiadomości naciśnij przycisk . Wykonaj jedną z następujących czynności:
  - Naciśnij przycisk , aby wysłać wiadomość.
  - Naciśnij przycisk . Naciśnij przycisk  lub , aby wybrać edycję, usuwanie lub zapisywanie wiadomości. Naciśnij , aby wybrać.

## Wysyłanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysyłać wiadomości tekstowe.

Zakłada się, że masz nowo napisane wiadomości tekstowe lub zapisane wiadomości tekstowe.

Wybierz odbiorcę wiadomości. Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać. Wprowadź ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje parametr Nr radiotel:!. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wpisz alias lub ID użytkownika. Naciśnij przycisk .

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się miniinformacja o udanej operacji.

Jeżeli się nie powiedzie:

- Zostanie odtworzony niski dźwięk.
- Na wyświetlaczu pojawia się miniostrzeżenie o nieudanej operacji.
- Wiadomość zostanie przeniesiona do folderu Elementy wysłane.
- Wiadomość jest oznaczona ikoną Nie można wysłać.

#### UWAGA:

W przypadku nowo napisanej wiadomości tekstowej radiotelefon przełączy się na opcję Wyślij ponownie.

## Usuwanie wiadomości tekstowych ze Skrzynki odbiorczej

Postępuj zgodnie z procedurą, aby usunąć wiadomości tekstowe ze Skrzynki.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).

- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do wiadomości. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

Jeśli Skrzynka odbiorcza jest pusta:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*
- Zostanie wyemitowany sygnał.

4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.

5 Naciśnij , aby wejść do podmenu.

6 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

7 Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się symbol powodzenia. Ponownie wyświetlana jest Skrzynka odbiorcza.

## Usuwanie wszystkich wiadomości tekstowych ze Skrzynki odbiorczej

Postępuj zgodnie z procedurą, aby usunąć wszystkie wiadomości tekstowe ze Skrzynki.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

Jeśli Skrzynka odbiorcza jest pusta:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*
  - Zostanie wyemitowany sygnał.
- 

4 Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się symbol powodzenia.

---

## Wysłane wiadomości tekstowe

Po wysłaniu wiadomości do innego radiotelefonu jest ona zapisywana w folderze Wysłane pozycje. Wiadomość tekstowa wysłana jako ostatnia jest zawsze umieszczana na górze listy w folderze Wysłane pozycje. Wysłane wiadomości tekstowe można wysłać ponownie, przekazać dalej, edytować lub skasować.

Folder Wysłane pozycje przechowuje maksymalnie 30 ostatnio wysłanych wiadomości. Po zapełnieniu folderu następną wysłaną wiadomość tekstową automatycznie zastępuje najstarszą wiadomością tekstową w folderze.

Jeżeli ekran wysyłania wiadomości zostanie zamknięty podczas wysyłania wiadomości, radiotelefon uaktualni stan wiadomości w folderze Wysłane pozycje bez zapewnienia żadnego wskazania na wyświetlaczu ani za pomocą dźwięku.

Jeżeli radiotelefon zmieni tryb lub zostanie wyłączony zanim stan wiadomości w folderze Wysłane pozycje zostanie uaktualniony, radiotelefon nie będzie w stanie dokończyć wysłania wiadomości w toku i automatycznie wskaże to za pomocą ikony **Nie można wysłać**.

Radiotelefon obsługuje maksymalnie 5 wiadomości w toku w tym samym czasie. Podczas tego okresu radiotelefon nie

może wysłać żadnej nowej wiadomości i automatycznie zaznacza ją ikoną **Nie można wysłać**.

Długie naciśnięcie  w dowolnym momencie powoduje powrót do ekranu głównego.

#### UWAGA:

Jeżeli typ kanału, np. w przypadku kanałów konwencjonalnych cyfrowych, Capacity Plus — Pojedyncza stacja lub Capacity Plus — Wiele stacji, nie pasuje, wysłane wiadomości można jedynie edytować, przekazać dalej lub skasować.

## Przeglądanie wysłanych wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wyświetlać wysłane wiadomości tekstowe.

- 1 Wykonaj jedną z następujących czynności:
    - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).
    - Naciśnij , aby uzyskać dostęp do menu.
- 

- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.
- 

- 3 Naciśnij  lub , aby przejść do Elementów wysłanych. Naciśnij , aby wybrać.

Jeśli folder Wysłane jest pusty:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta*.
  - Zabrzmi niski sygnał klawiatury, jeśli jest włączony.
- 

- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.
- Ikona w prawym górnym rogu ekranu informuje o stanie wiadomości. Zobacz [Ikony pozycji wysłanych](#).
-

## Wysyłanie wysłanych wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysłać wysłane wiadomości tekstowe.

Podczas przeglądania wysłanych wiadomości:

- 1 Naciśnij przycisk  .

---

- 2 Użytkownik może ponownie wysłać lub przekazać wysłaną wiadomość tekstową. Wykonaj jedną z następujących czynności:
  -  , aby Ponownie wysłać. Naciśnij  , aby wybrać.
  -  , aby Przekazać. Naciśnij  , aby wybrać.

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

- 3 Zaczekaj na potwierdzenie.
 

Jeżeli się powiedzie:

  - Zostanie wyemitowany sygnał.

- Na wyświetlaczu pojawia się symbol powodzenia. Jeżeli się nie powiedzie:
- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawia się symbol niepowodzenia.
- Radiotelefon przejdzie do ekranu opcji **Wyślij ponownie**. Dodatkowe informacje: [Ponowne wysyłanie wiadomości tekstowych na str. 172](#).

## Usuwanie wysłanych wiadomości z folderu Wysłane

Postępuj zgodnie z procedurą, aby usunąć wysłane wiadomości tekstowe z folderu Wysłane.

Podczas przeglądania wysłanych wiadomości:

- 1 Naciśnij przycisk  .

---

- 2 Naciśnij  lub  , aby Skasować. Naciśnij  , aby wybrać.

## Usuwanie wszystkich wysłanych wiadomości tekstowych z folderu Wysłane

Postępuj zgodnie z procedurą, aby usunąć wszystkie wysłane wiadomości tekstowe z folderu Wysłane.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Elementów wysłanych. Naciśnij , aby wybrać.

Jeśli folder Wysłane jest pusty:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta*.
- Zostanie wyemitowany sygnał.

- Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.

- Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się symbol powodzenia.
- Naciśnij  lub , aby wybrać Nie. Naciśnij , aby wybrać. Radiotelefon powróci do poprzedniego ekranu.

## Zapisane wiadomości tekstowe

Wiadomość tekstową można zapisać w celu późniejszego wysłania.

Jeżeli po naciśnięciu przycisku **PTT** lub zmianie trybu radiotelefon przełączy się z ekranu pisania/edycji wiadomości tekstowej podczas jej tworzenia lub zmiany, bieżąca wiadomość tekstowa zostanie automatycznie zapisana w folderze kopii zapasowych.

Ostatnio zapisana wiadomość tekstowa zawsze znajduje się na pierwszej pozycji w folderze kopii zapasowych.

Folder kopii zapasowych może pomieścić maksymalnie 10 ostatnio zapisanych wiadomości. Gdy folder zapełni się, następną zapisana wiadomość tekstowa automatycznie zastępuje najstarszą wiadomość w folderze.

## Przeglądanie zapisanych wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wyświetlać zapisane wiadomości tekstowe.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do **Wiadomości**. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do folderu **Robocze**. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

## Edycja zapisanych wiadomości tekstowych

Wykonaj poniższą procedurę, aby edytować wiadomość tekstową zapisaną w radiotelefonie.

- Naciśnij przycisk  podczas wyświetlania danej wiadomości.
- Naciśnij  lub , aby przejść do **Edycji**. Naciśnij , aby wybrać. Pojawi się migający kursor.
- Przy pomocy klawiatury napisz wiadomość.

Naciśnij przycisk , aby przejść o jedno miejsce w lewo.

Naciśnij przycisk  lub , aby przejść o jedno miejsce w prawo.

Naciśnij przycisk , aby usunąć niechciane znaki.

Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

4 Po utworzeniu wiadomości naciśnij przycisk . Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  lub , aby wysłać. Naciśnij przycisk , aby wysłać wiadomość.
- Naciśnij przycisk . Naciśnij przycisk  lub , aby wybrać zapisanie lub usunięcie wiadomości. Naciśnij , aby wybrać.

## Usuwanie zapisanych wiadomości tekstowych z folderu Kopie zapasowe

Wykonaj poniższą procedurę, aby usunąć zapisane wiadomości tekstowe z folderu Kopie zapasowe w radiotelefonie.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do folderu Robocze. Naciśnij , aby wybrać.
- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

- 5 Naciśnij  lub , aby Skasować. Naciśnij przycisk , aby usunąć wiadomość tekstową.

## Krótkie wiadomości tekstowe

Radiotelefon obsługuje maksymalnie do 50 wiadomości z tekstem skrótowym, zaprogramowanych przez dealera.

Pomimo, że krótkie wiadomości tekstowe są wstępnie zaprogramowane, każdą wiadomość można redagować przed wysłaniem.

## Wysyłanie krótkich wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysłać wstępnie zdefiniowane krótkie wiadomości tekstowe do wstępnie zdefiniowanego aliasu.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**. Przejdź do [krok 6](#).

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

- Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Szybkiej wiadomości tekstowej. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do wybranej krótkiej wiadomości tekstowej. Naciśnij , aby wybrać.

- Wykonaj następujące czynności, aby wybrać odbiorcę i wysłać wiadomość.

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

## 6 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.
- Radiotelefon przejdzie do ekranu opcji **Wyślij ponownie**. Dodatkowe informacje: [Ponowne wysyłanie wiadomości tekstowych na str. 172](#).

## Konfiguracja wprowadzania tekstu

Radiotelefon umożliwia skonfigurowanie różnych ustawień tekstu.

W radiotelefonie można skonfigurować następujące ustawienia wprowadzania tekstu:

- Uzupełnianie słów
- Korekta słów

- Zdanie – wielka litera

- Moje słowa

Radiotelefon obsługuje następujące metody wpisywania tekstu:

- Cyfry
- Symbole
- Tryb przewidywania tekstu lub Multi-tap
- Wersja językowa (o ile została zaprogramowana)

### UWAGA:

W dowolnym momencie naciśnij przycisk , aby powrócić do poprzedniego ekranu.

Przytrzymanie przycisku  pozwala wrócić do ekranu głównego. Radiotelefon zamyka bieżący ekran po zakończeniu odliczania czasu nieaktywności.

## Włączanie i wyłączanie korekty słów

Funkcja proponuje inne słowa, gdy słowo wprowadzone w edytorze tekstu nie jest rozpoznawane przez wbudowany słownik.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby włączyć funkcję Korekty słów. Naciśnij , aby wybrać.

---

- 6 Wykonaj jedną z następujących czynności:
  - Naciśnij przycisk  lub , aby włączyć funkcję Korekty słów. Naciśnij , aby wybrać.

- Naciśnij przycisk , aby włączyć funkcję korekty słów. Jeśli są włączone, obok informacji Włączone pojawi się .
- Naciśnij przycisk , aby wyłączyć funkcję korekty słów. Jeśli nie,  obok opcji Włączone zniknie.

## Włączanie i wyłączanie przewidywania słów

**Przewidywanie słów:** Radiotelefon uczy się standardowych, często wprowadzanych zdań. Następnie przewiduje frazę, którą użytkownik chciałby wprowadzić, po napisaniu w edytorze tekstu pierwszego słowa typowego ciągu słów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij przycisk  lub , aby wyłączyć funkcję Przewidywania słów. Naciśnij , aby wybrać.

---

6 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby włączyć funkcję przewidywania słów. Jeśli są włączone, obok informacji *Włączone* pojawi się .
  - Naciśnij przycisk , aby wyłączyć funkcję kontroli zniekształcenia dynamicznego mikrofonu. Jeśli nie,  obok opcji *Włączone* zniknie.
- 

## Zdanie – wielka litera

Automatycznie włącza pisanie pierwszego słowa każdego nowego zdania z wielkiej litery.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij przycisk  lub , aby przełączyć opcję rozpoczynania zdania wielką literą. Naciśnij , aby wybrać.

---

6 Wykonaj jedną z następujących czynności:

- Naciśnij , aby włączyć funkcję rozpoczynania zdań wielką literą. Jeśli są włączone, obok informacji *Włączone* pojawi się .

- Naciśnij przycisk , aby wyłączyć funkcję rozpoczynania zdań wielką literą. Jeśli nie, ✓ obok opcji Włączone zniknie.

## Przeglądanie słów własnych

Możesz dodać własne słowa do wbudowanego słownika radiotelefonu. Radiotelefon przechowuje te słowa na liście.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.
- 4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

- 5 Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.
- 6 Naciśnij  lub , aby przejść do Listy słów. Naciśnij , aby wybrać.  
Na ekranie wyświetli się lista słów własnych.

## Edycja słów własnych

Można edytować słowa własne zapisane w radiotelefonie.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do Listy słów. Naciśnij , aby wybrać.  
Na ekranie wyświetli się lista słów własnych.

---

7 Naciśnij  lub , aby przejść do wymaganego słowa. Naciśnij , aby wybrać.

---

8 Naciśnij  lub , aby przejść do Edycji. Naciśnij , aby wybrać.

---

9 Słowa własne można edytować, używając klawiatury.

- Naciśnij przycisk , aby przejść o jedno miejsce w lewo.
- Naciśnij przycisk , aby przejść o jedno miejsce w prawo.
- Naciśnij przycisk , aby usunąć niepożądane znaki.
- Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

10 Gdy wpisane słowo będzie gotowe, naciśnij przycisk .

---

Na wyświetlaczu pojawi się przejściowa miniinformacja potwierdzająca zapisanie słowa własnego.

- Jeżeli słowo własne zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniinformację o udanej operacji.
- Jeżeli słowo własne nie zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniostrzeżenie o nieudanej operacji.

## Dodawanie słów własnych

Możesz dodać własne słowa do wbudowanego słownika radiotelefonu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.

---

- 6 Naciśnij  lub , aby Dodać nowe słowo. Naciśnij , aby wybrać. Na ekranie wyświetli się lista słów własnych.

- 7 Słowa własne można edytować, używając klawiatury.
  - Naciśnij przycisk , aby przejść o jedno miejsce w lewo.
  - Naciśnij przycisk , aby przejść o jedno miejsce w prawo.
  - Naciśnij przycisk , aby usunąć niepożądane znaki.
  - Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

---

- 8 Gdy wpisane słowo będzie gotowe, naciśnij przycisk .

Na wyświetlaczu pojawi się przejściowa miniinformacja potwierdzająca zapisanie słowa własnego.

- Jeżeli słowo własne zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniinformację o udanej operacji.
- Jeżeli słowo własne nie zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniostrzeżenie o nieudanej operacji.

## Usuwanie słowa własnego

Postępuj zgodnie z procedurą, aby usunąć słowa własne zapisane w radiotelefonie.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do wymaganego słowa. Naciśnij , aby wybrać.

---

7 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

---

8 Wybierz jedną z poniższych opcji:

- Po wyświetleniu monitu Usunąć wpis? naciśnij przycisk , aby wybrać Tak. Na wyświetlaczu pojawi się komunikat Poz. Usun..

- Naciśnij  lub , aby wybrać Nie.
  - Naciśnij , aby powrócić do poprzedniego ekranu.
- 

## Usuwanie wszystkich słów własnych

Postępuj zgodnie z procedurą, aby usunąć wszystkie słowa własne z wbudowanego słownika radiotelefonu.

- Naciśnij , aby uzyskać dostęp do menu.
  - Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
  - Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.
  - Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.
- 

- Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.
- 

- Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.
- 

- Wykonaj jedną z następujących czynności:
    - Po wyświetleniu monitu Usunąć wpis? naciśnij przycisk , aby wybrać Tak. Na wyświetlaczu pojawi się komunikat Wszystkie wpisy zostały usunięte.
    - Naciśnij  lub , aby przejść do Nie i powrócić do poprzedniego ekranu. Naciśnij , aby wybrać.
- 

## Etykiety zadań

Ta funkcja pozwala odbierać wiadomości od dyspozytora, które zawierają listę czynności do wykonania.

**UWAGA:**

Ta funkcja może być modyfikowana przez program CPS zgodnie z wymaganiami użytkownika. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Dostępne są dwa foldery, w których znajdują się różne etykiety zadań:

**Folder Moje zadania**

Spersonalizowane etykiety zadań przypisanych do ID zalogowanego użytkownika.

**Folder Wspólne zadania**

Wspólne etykiety zadań przypisane do grupy osób.

Możesz reagować na tego typu komunikaty, sortując kody zadań w ramach folderów. Domyślnie foldery mają nazwy

**Wszystkie, Nowe, Rozpoczęte i Zakończone.**

Sprzedawca lub administrator systemu może skonfigurować do 10 kolejnych folderów tego typu.

**UWAGA:**

Etykiety zadań pozostaną w pamięci urządzenia nawet po jego wyłączeniu i ponownym uruchomieniu.

Wszystkie etykiety zadań znajdują się w folderze

**Wszystkie.** W zależności od sposobu zaprogramowania radiotelefonu, etykiety zadań są sortowane według

poziomu priorytetu, a następnie według godziny odebrania. Nowe etykiety zadań, etykiety zadań z niedawną zmianą stanu i etykiety zadań o najwyższym priorytecie są wymienione jako pierwsze. Jeżeli urządzenie rejestruje maksymalną liczbę kodów zadań, to najstarsze kody na liście będą automatycznie zastępowane najnowszymi. Urządzenie obsługuje maksymalnie do 100 lub 500 etykiet zadań, w zależności od modelu radiotelefonu. Dodatkowych informacji udzieli sprzedawca lub administrator systemu. Urządzenie automatycznie wykryje i odrzuci duplikat kodu zadania o takim samym identyfikatorze.

W zależności od stopnia ważności etykiet zadań, dyspozytor dodaje do nich poziom priorytetu. Istnieją trzy poziomy priorytetu: Priorytet 1, priorytet 2 i priorytet 3. 1 to najwyższy, a 3 to najniższy priorytet. Istnieją również etykiety zadań bez priorytetu.

Radiotelefon jest odpowiednio aktualizowany, gdy dyspozytor wykonuje następujące zmiany:

- modyfikuje zawartość etykiet zadań,
- dodaje lub edytuje priorytet etykiet zadań,
- przenosi etykiety z folderu do folderu,
- anuluje etykiety zadań.

## Dostęp do folderu z kodami zadań

Postępuj zgodnie z procedurą, aby uzyskać dostęp do folderu z kodami zadań.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **bilet zad.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby wybrać dany kod zadania. Naciśnij , aby wybrać.

---

## Proces logowania i wylogowania z serwera zdalnego

Funkcja pozwala korzystać z procedur logowania i wylogowania dla zdalnego serwera przy pomocy identyfikatora użytkownika.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Logowania. Naciśnij , aby wybrać.  
  
Jeśli użytkownik jest już zalogowany, w menu będzie widoczna funkcja *Wyloguj się*.  
  
Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

---

- 3 Zaczekaj na potwierdzenie.  
  
Jeżeli się powiedzie:  
  - Wybrzmiewa potwierdzający sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Tworzenie kodów zadań

Radiotelefon potrafi generować kody zadań (na podstawie szablonów) i wysyłać zadania do wykonania.

Do konfiguracji szablonów kodów zadań potrzebne jest oprogramowanie CPS.

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub  , aby przejść do Kodów zadań. Naciśnij  , aby wybrać.
- 3 Wybierz  lub  , aby Utworzyć kod zadania. Naciśnij  , aby wybrać.

## Odpowiadanie na kody zadań

Postępuj zgodnie z procedurą, aby odpowiadać na kody zadań.

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub  , aby przejść do Kodów zadań. Naciśnij  , aby wybrać.
- 3 Naciśnij  lub  , aby przejść do wymaganego folderu. Naciśnij  , aby wybrać.
- 4 Naciśnij przycisk  lub  , aby wybrać dany kod zadania. Naciśnij  , aby wybrać.
- 5 Ponownie naciśnij przycisk  , aby uzyskać dostęp do podmenu.  
Możesz również nacisnąć odpowiedni klawisz numeryczny (1–9), aby uzyskać dostęp do opcji **Skrót odp..**

- 6 Naciśnij przycisk  lub  , aby wybrać dany kod zadania. Naciśnij  , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

- 7 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Wysyłanie kodów zadań za pomocą szablonu pojedynczych kodów zadań

Jeżeli radiotelefon ma skonfigurowany jeden szablon kodów zadań, wykonaj następujące czynności, aby wysłać kod zadania.

- 1 Skorzystaj z klawiatury, aby wpisać wymagany numer pomieszczenia. Naciśnij  , aby wybrać.

- 2 Naciśnij  lub  , aby przejść do pozycji Status pomieszczenia. Naciśnij  , aby wybrać.

- 3 Naciśnij  lub  , aby przejść do wybranej opcji. Naciśnij  , aby wybrać.

4 Naciśnij przycisk  lub  , aby wysłać.

Naciśnij  , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

5 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Wysyłanie kodów zadań za pomocą szablonu wielu kodów zadań

Jeżeli radiotelefon ma skonfigurowany więcej niż jeden szablon kodów zadań, wykonaj następujące czynności, aby wysłać kody zadań.

1 Naciśnij  lub  , aby przejść do wybranej opcji. Naciśnij  , aby wybrać.

2 Naciśnij przycisk  lub  , aby wysłać. Naciśnij  , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Usuwanie zadań

Postępuj zgodnie z procedurą, aby usunąć zadania z radiotelefonu.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **bilet zad.** Przejdź do [krok 4](#)
  - Naciśnij , aby uzyskać dostęp do menu.
- Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

- Za pomocą przycisku  lub  przejdź do folderu Wszystkie. Naciśnij , aby wybrać.
- Naciśnij przycisk  lub , aby wybrać dany kod zadania. Naciśnij , aby wybrać.
- Ponownie naciśnij przycisk  podczas przeglądania Kodu zadania.
- Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.  
Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.
- Zaczekaj na potwierdzenie.  
Jeżeli się powiedzie:
  - Wybrzmiewa potwierdzający sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Usuwanie wszystkich biletów zadań

Postępuj zgodnie z procedurą, aby usunąć wszystkie zadania z radiotelefonu.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **bilet zad.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

- 4 Za pomocą przycisku  lub  przejdź do folderu Wszystkie. Naciśnij , aby wybrać.
- 5 Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.
- 6 Wykonaj jedną z następujących czynności:
  - Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się symbol powodzenia.
  - Naciśnij  lub , aby wybrać Nie. Naciśnij , aby wybrać. Radiotelefon powróci do poprzedniego ekranu.

## Prywatne

Ta funkcja pomaga zapobiec podsłuchiwanemu przez nieupoważnione osoby na danym kanale dzięki zastosowaniu programowego rozwiązania szyfrującego.

Część transmisji, która zawiera sygnalizację i identyfikację użytkownika, nie jest szyfrowana.

Radiotelefon musi mieć włączoną funkcję prywatności na danym kanale, aby nadawać podczas połączenia prywatnego, chociaż nie jest to konieczny wymóg do odbioru transmisji. Po włączeniu funkcji prywatności na kanale radiotelefon może nadal odbierać czyste lub niezaszyfrowane transmisje.

Radiotelefon obsługuje tylko Prywatność rozszerzoną. Aby odszyfrować połączenie poufne lub transmisję danych, radiotelefon powinien zostać zaprogramowany z tą samą wartością klucza i ID klucza dla rozszerzonej prywatności.

W wypadku odbioru zaszyfrowanej transmisji z radiotelefonu, w którym ustawiono inną wartość i ID klucza, przy rozszerzonej prywatności nie będzie słycać niczego.

Na kanale z funkcją prywatności Twój radiotelefon może odbierać czyste lub niezaszyfrowane połączenia, w zależności od sposobu zaprogramowania. Dodatkowo, Twój radiotelefon może emitować sygnał ostrzegawczy lub go nie emitować, w zależności od sposobu zaprogramowania.

#### UWAGA:

Ta funkcja nie dotyczy kanałów w paśmie CB o tych samych częstotliwościach.

Dioda LED pali się zielonym światłem, gdy radiotelefon nadaje, i szybko pulsuje na zielono podczas odbioru transmisji z aktywną funkcją prywatności.

#### UWAGA:

Niektóre modele radiotelefonów mogą nie posiadać funkcji prywatności lub cechować się inną konfiguracją. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie/wyłączanie prywatności

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć prywatność w radiotelefonie.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Prywatność**. Pomiń poniższe kroki.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby wybrać Prywatność. Naciśnij  , aby wybrać.

5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub  , aby włączyć. Naciśnij  , aby wybrać. Obok opcji włączyć pojawi się oznaczenie  .
- Naciśnij  lub  , aby wyłączyć. Naciśnij  , aby wybrać. Obok opcji wyłączyć pojawi się oznaczenie  .

#### UWAGA:

Jest to dodatkowa (płatna) funkcja. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Po włączeniu tej funkcji radiotelefon nie będzie generować transmisji wychodzących w odpowiedzi na transmisje przychodzące, takie jak Sprawdzenie radia, Alert połączenia, Wyłączanie radiotelefonu, Zdalny nasłuch, Usługa automatycznej rejestracji (ARS), Odpowiadanie na wiadomości prywatne i Wysyłanie raportów o lokalizacji GNSS. Gdy ta funkcja jest włączona, radiotelefon nie może otrzymywać Potwierdzonych połączeń prywatnych. Radiotelefon może jednak nadawać transmisje ręcznie.

## Włączanie lub wyłączanie zawieszenia odpowiedzi

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć funkcję zawieszania odpowiedzi w radiotelefonie.

Naciśnij przycisk programowalny **Zawieszanie odpowiedzi**.

Jeżeli się powiedzie:

## Zawieszenie odpowiedzi

Ta funkcja pomaga zapobiegać odpowiadaniu radiotelefonu na wszystkie transmisje przychodzące.

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się tymczasowo informację o powodzeniu operacji.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się tymczasowo informację o niepowodzeniu.

## Zatrzymywanie/Ponawianie

Ta funkcja pozwala na włączenie lub wyłączenie dowolnego radiotelefonu w systemie. Na przykład konieczne może być wyłączenie skradzionego lub zgubionego radiotelefonu przez sprzedawcę lub administratora systemu, aby uniemożliwić korzystanie z niego osobie nieupoważnionej.

Radiotelefon można wyłączyć (zatrzymać) lub ponownie włączyć przy pomocy konsoli lub polecenia zainicjowanego przez inny radiotelefon.

Po wyłączeniu radiotelefonu wyda on dźwięk ostrzegawczy, a na stronie głównej zostanie wyświetlony komunikat `Kanał odmów`.

Gdy radiotelefon jest zatrzymany, nie może zażądać ani nie otrzyma żadnych zainicjowanych przez użytkownika usług w systemie, który wykonał procedurę zatrzymania. Radiotelefon może przełączyć się do innego systemu. Radiotelefon będzie kontynuować wysyłanie raportów lokalizacji GNSS i może być zdalnie monitorowany po jego wyłączeniu.

### UWAGA:

Sprzedawca lub administrator systemu mogą wyłączyć radiotelefon na stałe. Dodatkowe informacje: [Stałe wyłączenie radiotelefonu na str. 207](#).

## Zatrzymanie radiotelefonu

Postępuj zgodnie z procedurą, aby wyłączyć radiotelefon.

- 1 Naciśnij zaprogramowany przycisk **Blokowanie rtf**.

- 2 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

Na wyświetlaczu pojawi się przejściowa mini informacja, która wskazuje, że żądanie jest w toku. Zielona dioda LED miga.

- 3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Zatrzymywanie radiotelefonu przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby zablokować radiotelefon przy pomocy Listy kontaktów.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub  , aby otworzyć Kontak ty. Naciśnij  , aby wybrać.

- 3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

- 4 Naciśnij  lub  , aby Zablokować radiotelefon. Naciśnij  , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED miga.

**5** Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Zatrzymywanie radiotelefonu przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby zablokować radiotelefon przy pomocy wybierania ręcznego.

**1** Naciśnij , aby uzyskać dostęp do menu.

**2** Naciśnij  lub , aby otworzyć Kontakt y. Naciśnij , aby wybrać.

**3** Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

**4** Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać. Pierwsza linia tekstu pokazuje Numer radiotelefonu:.

**5** Wprowadź ID abonenta i naciśnij , aby kontynuować.

**6** Naciśnij  lub , aby Zablokować radiotelefon. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED miga.

**7** Zaczekaj na potwierdzenie. Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Ponowne włączanie radiotelefonu

Postępuj zgodnie z procedurą, aby włączyć radiotelefon.

1 Naciśnij zaprogramowany przycisk **Odblok. rtf**.

2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się komunikat **Włączenie radiotelefonu** oraz alias lub ID użytkownika. Zielona dioda LED zapala się.

3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Ponowne włączanie radiotelefonu przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby włączyć radiotelefon za pomocą Listy kontaktów.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontakty. Naciśnij , aby wybrać.

3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby odblokować radiotelefon. Naciśnij  , aby wybrać. Zielona dioda LED miga. Na wyświetlaczu pojawi się komunikat Włączenie radiotelefonu oraz alias lub ID użytkownika. Zielona dioda LED zapala się.

5 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się informacja Odblokowanie rtf. powiodło się.

Jeżeli się nie powiedzie:

- Zostanie wyemitowany sygnał.

- Na wyświetlaczu pojawi się informacja Odblokowanie rtf. nie powiodło się.

## Ponowne włączenie radiotelefonu przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby odblokować radiotelefon przy pomocy wybierania ręcznego.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby otworzyć Kontakty. Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Wybierania ręcznego. Naciśnij  , aby wybrać.

- 4 Naciśnij  lub  , aby przejść do Połączeń prywatnych. Naciśnij  , aby wybrać. Pierwsza linia tekstu pokazuje Numer radiotelefonu!.

- 5 Wprowadź ID abonenta i naciśnij  , aby kontynuować.

- 6 Naciśnij  lub  , aby Odblokować radiotelefon. Naciśnij  , aby wybrać. Zielona dioda LED miga. Na wyświetlaczu pojawi się komunikat Włączenie radiotelefonu oraz alias lub ID użytkownika. Zielona dioda LED zapala się.

- 7 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się informacja Odblokowanie rtf. powiodło się.

Jeżeli się nie powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się informacja Odblokowanie rtf. nie powiodło się.

## Stałe wyłączenie radiotelefonu

Ta funkcja to rozszerzony środek bezpieczeństwa, mający na celu ograniczanie nieautoryzowanego dostępu do radiotelefonu.

Funkcja stałe wyłączenia radiotelefonu sprawia, że urządzenie jest niezdatne do użytku. Sprzedawca lub administrator systemu może na przykład chcieć wyłączyć na stałe skradziony lub zgubiony radiotelefon, aby zapobiec nieautoryzowanemu użyciu.

Po włączeniu zasilania wyłączony na stałe radiotelefon wyświetli chwilowy komunikat Radiotelefon wyłączony na stałe informujący o stałym wyłączeniu.

### UWAGA:

Wyłączony na stałe radiotelefon można ponownie uruchomić wyłącznie w punkcie serwisowym Motorola Solutions. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Praca w pojedynkę

Funkcja ta pozwala na wysyłanie okresowego sygnału ostrzegawczego, jeżeli użytkownik pozostaje nieaktywny przez określony czas, np. nie naciska żadnego przycisku radiotelefonu lub nie używa wybieraka kanałów.

Po upływie zaprogramowanego czasu radiotelefon ostrzega użytkownika za pomocą sygnału dźwiękowego, gdy licznik czasu nieaktywności zostanie wyzerowany.

Jeżeli użytkownik wciąż nie odpowiada przed upływem zaprogramowanego czasu licznika przypomnienia, radiotelefon uruchamia stan awaryjny zaprogramowany przez sprzedawcę lub administratora systemu.

Dodatkowe informacje: [Tryb awaryjny na str. 152](#).

### UWAGA:

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Funkcje blokady hasła

Ta funkcja pozwala ograniczyć dostęp do radiotelefonu poprzez żądanie hasła po włączeniu urządzenia.

Możesz używać mikrofonu z klawiaturą lub przycisków **Przewijania w górę/w dół**, aby wpisać hasło.

## Uzyskiwanie dostępu do radiotelefonów za pomocą haseł

Postępuj zgodnie z procedurą, aby uzyskać dostęp do radiotelefonu za pomocą haseł.

- 1 Wprowadź aktualne czterocyfrowe hasło.

### UWAGA:

Użycie **Alarmowego** włącznika nożnego anuluje ekran wprowadzania hasła celem uzyskania dostępu do radiotelefonu.

- Użyj klawiatury mikrofonu.
- Naciśnij  lub , aby edytować wartość numeryczną każdej cyfry, a następnie wciśnij , aby wprowadzić i przejść do następnej cyfry.

- 2 Naciśnij , aby wprowadzić hasło.

Jeżeli operacja się powiedzie, radiotelefon uruchomia się.

Jeżeli się nie powiedzie:

- Po pierwszej i drugiej próbie pojawia się komunikat **Niepoprawne hasło**. Powtórz czynność **krok 1**.
- Trzecia nieudana próba powoduje wyświetlenie komunikatu **Hasło niepoprawne**, a następnie **Radiotelefon zablokowany**. Zostanie wyemitowany sygnał. Żółta dioda LED miga dwa razy. Radiotelefon blokuje się na 15 minut.

#### **UWAGA:**

W stanie zablokowania radiotelefon będzie reagować wyłącznie na sygnały z **Pokrętła wł./wył./regulacji głośności** oraz zaprogramowany przycisk **Podświetlenia**.

- Jeśli radiotelefon jest włączony, należy odczekać 15 minut, a następnie powtórzyć kroki procedury [Uzyskiwanie dostępu do radiotelefonów za pomocą haseł na str. 208](#), aby uzyskać dostęp do radiotelefonu.
- Jeżeli radiotelefon jest wyłączony, włącz go. Radiotelefon ponownie uruchamia 15-minutowy licznik blokady. Zostanie wyemitowany sygnał. Żółta dioda LED miga dwa razy. Na wyświetlaczu pojawi się informacja **Radio Locked** (Radiotelefon zablokowany).  
  
Odczekaj 15 minut, a następnie powtórz kroki procedury [Uzyskiwanie dostępu do radiotelefonów za pomocą haseł na str. 208](#), aby uzyskać dostęp do radiotelefonu.

## Odblokowywanie radiotelefonów ze stanu zablokowania

W stanie zablokowania radiotelefon nie będzie odbierał żadnych połączeń, nawet alarmowych. Postępuj zgodnie z procedurą, aby odblokować radiotelefon ze stanu zablokowania.

Wykonaj jedną z następujących czynności:

## Włączanie i wyłączanie blokady hasła

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć blokadę hasła.

**1** Naciśnij , aby uzyskać dostęp do menu.

**2** Naciśnij  lub , aby przejść do **Narzędzi**. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Blokadę hasła. Naciśnij , aby wybrać.

---

5 Wprowadź aktualne czterocyfrowe hasło.

- Użyj klawiatury mikrofonu.
  - Naciśnij  lub , aby edytować wartość numeryczną każdej cyfry, a następnie wciśnij , aby wprowadzić i przejść do następnej cyfry. Sygnał potwierdzający zabrzmiał dla każdej naciśniętej cyfry.
- 

6 Naciśnij , aby wprowadzić hasło. Na wyświetlaczu pojawi się komunikat *Złe hasło* i nastąpi automatyczny powrót do poprzedniego menu.

---

7 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Włączyć. Naciśnij , aby wybrać. Na ekranie pojawi się  obok *Wł.*
  - Naciśnij  lub , aby Wyłączyć. Naciśnij , aby wybrać. Na ekranie pojawi się  obok *Wył.*
- 

## Zmiana haseł

Postępuj zgodnie z procedurą, aby zmienić hasło.

- 1 Naciśnij , aby uzyskać dostęp do menu.
  - 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
  - 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.
-

- 4 Naciśnij  lub  , aby przejść do Blokady

hasła. Naciśnij  , aby wybrać.

- 5 Wpisz obecne czterocyfrowe hasło i naciśnij  , aby kontynuować.

Na wyświetlaczu pojawi się komunikat *Złe hasło* i nastąpi automatyczny powrót do poprzedniego menu.

- 6 Naciśnij  lub  , aby przejść do Zmiany

hasła. Naciśnij  , aby wybrać.

- 7 Wprowadź nowe czterocyfrowe hasło i naciśnij

 , aby kontynuować.

- 8 Ponownie wprowadź nowe czterocyfrowe hasło i naciśnij  , aby kontynuować.

Jeśli operacja zakończy się powodzeniem, na wyświetlaczu pojawi się komunikat *Zmieniono hasło*.

Jeśli operacja nie powiedzie się, na wyświetlaczu pojawi się komunikat *Niezgodność haseł*.

Ekran automatycznie wraca do poprzedniego menu.

## Lista powiadomień

Radiotelefon posiada Listę powiadomień, która zbiera wszystkie nieodczytane zdarzenia na danym kanale, np. wiadomości tekstowe, wiadomości telemetryczne, nieodebrane połączenia i sygnały wywołania.

Wyświetlacz pokazuje ikonę **Powiadomień**, gdy na Liście powiadomień znajduje się jedno zdarzenie lub więcej.

Maksymalna długość listy to 40 nieprzeczytanych zdarzeń. Kiedy lista jest zapełniona, nowa pozycja automatycznie zastępuje pozycję najstarszą. Po odczytaniu pozycje są usuwane z Listy powiadomień.

W przypadku wiadomości tekstowych i nieodebranych połączeń/alertów połączenia maksymalna liczba powiadomień to 30 wiadomości tekstowych i 10 nieodebranych połączeń lub alertów połączenia. Maksymalna liczba jest zależna od możliwości listy określonej funkcji (kody zadań, wiadomości tekstowe lub nieodebrane połączenia lub alerty połączenia).

## Dostęp do Listy powiadomień

Postępuj zgodnie z procedurą, aby uzyskać dostęp do Listy powiadomień.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Powiadomień. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wybranego wydarzenia. Naciśnij , aby wybrać.

Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

## Programowanie drogą radiową

Sprzedawca może zdalnie aktualizować radiotelefon poprzez Programowanie drogą radiową (OTAP) bez fizycznego połączenia. Dodatkowo niektóre ustawienia także mogą być wprowadzane za pośrednictwem OTAP.

Gdy radiotelefon znajduje się w trakcie programowania drogą radiową (OTAP), dioda LED pulsuje na zielono.

Gdy radiotelefon odbiera duże ilości danych:

- Na wyświetlaczu widnieje ikona **Duża ilość danych**.
- Kanał staje się zajęty.
- Naciśnięcie przycisku **PTT** powoduje wybrzmiewanie sygnału ostrzegawczego.

Gdy OTAP dobiegnie końca, w zależności od konfiguracji:

- Zostanie wyemitowany sygnał. Na wyświetlaczu pojawi się komunikat **Aktualizacja i restart**. Radiotelefon restartuje się poprzez wyłączenie i ponowne włączenie.
- Można wybrać opcję **Zrestartuj teraz** lub **Odiń na później**. Wybranie opcji **Odiń na później** powoduje powrót do poprzedniego ekranu. Na wyświetlaczu widnieje ikona **Odliczanie przełożenia OTAP** aż do momentu automatycznego restartu.

Gdy radiotelefon uruchamia się ponownie po automatycznym restarcie:

- Jeśli operacja powiedzie się, na wyświetlaczu widać komunikat **Aktualizacja oprogramowania powiodła się**.

- W przypadku niepowodzenia na wyświetlaczu widać komunikat Aktualizacja oprogramowania nie powiodła się.

Patrz [Sprawdzanie informacji dotyczących aktualizacji oprogramowania na str. 243](#), aby zobaczyć zakutalizowaną wersję oprogramowania.

## Wybór trybów podłączania urządzeń peryferyjnych innych producentów

Wykonaj procedurę, aby wybrać jeden z poniższych trybów podłączania urządzeń peryferyjnych innych producentów:

- Motorola Solutions
- Komputer i dźwięk
- Akcesorium danych
- Telemetria
- Ogólne

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Za pomocą przycisku lub  lub  wybierz Typ kabla. Naciśnij , aby wybrać.

---

5 Naciśnij przycisk  lub , aby wybrać wymagany tryb podłączania. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się wybrany typ połączenia. Ekran wraca do poprzedniego menu.

---

## Wskaźnik siły odbieranego sygnału

Ta funkcja pozwala przeglądać wartości wskaźnika siły odbieranego sygnału (RSSI).

W prawym górnym rogu na wyświetlaczu pojawi się ikona **RSSI**. Zobacz [Ikony na wyświetlaczu](#), aby dowiedzieć się więcej o ikonie **RSSI**.

## Przeglądanie wartości RSSI

Postępuj zgodnie z procedurą, aby przeglądać wartości RSSI.

Podczas wyświetlania ekranu głównego:

- 1 W czasie 5 sekund naciśnij  trzykrotnie i natychmiast naciśnij trzykrotnie  .  
Na ekranie są widoczne aktualne wartości RSSI.
- 2 Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

## Konfiguracja przedniego panelu

Aby ułatwić sobie korzystanie z radiotelefonu, można dopasować niektóre parametry funkcji za pomocą konfiguracji przedniego panelu (FPC).

## Wejście w tryb konfiguracji przedniego panelu

Postępuj zgodnie z procedurą, aby wejść w tryb programowania przedniego panelu radiotelefonu.

Przytrzymaj przycisk  , aby w dowolnym momencie powrócić do Ekranu głównego.

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.
- 3 Naciśnij  lub  , aby Zaprogramować radiotelefon. Naciśnij  , aby wybrać.

## Edycja parametrów trybu FPP

Następujące przyciski można wykorzystać do przemieszczania się po parametrach funkcji.

-  ,  – przewijanie opcji, zwiększanie/zmniejszanie wartości lub nawigacja pionowa.
-  – wybór opcji lub przejście do podmenu.
-  – krótkie naciśnięcie powoduje powrót do poprzedniego menu lub zamknięcie ekranu wyboru. Przytrzymanie przycisku pozwala wrócić do Ekranu głównego.

## Praca Wi-Fi

Wi-Fi® jest zastrzeżonym znakiem towarowym firmy Wi-Fi Alliance®.

### UWAGA:

Ta funkcja dotyczy tylko urządzeń DM4601e .

Funkcja ta umożliwi konfigurację sieci Wi-Fi oraz połączenie się z nią. Sieć Wi-Fi obsługuje aktualizacje oprogramowania sprzętowego radiotelefonu, wtyczek codeplug i zasobów, takich jak pakiety językowe i pliki zapowiedzi głosowych.

## Włączanie i wyłączanie Wi-Fi

Programowalny przycisk **Wi-Fi wł. lub wył.** jest przypisany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Ustawienia zapowiedzi głosowych dla zaprogramowanego przycisku **Wi-Fi wł. lub wył.** można dostosować do potrzeb użytkownika poprzez program CPS. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Wykonując jedną z poniższych czynności, możesz włączyć lub wyłączyć Wi-Fi.

- Naciśnij zaprogramowany przycisk **WiFi wł./wył.** Funkcja Zapowiedzi głosowej informuje o włączeniu lub wyłączeniu Wi-Fi.
- Dostęp do funkcji można uzyskać w menu.
  - a. Naciśnij przycisk  , aby uzyskać dostęp do menu..
  - b. Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.

- c. Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

Naciśnij przycisk , aby włączyć sieć Wi-Fi. Na ekranie pojawi się oznaczenie  obok opcji **Włączone**.

Naciśnij przycisk , aby wyłączyć sieć Wi-Fi. Oznaczenie  obok informacji **Włączone** zniknie.

## Podłączanie do punktu dostępowego sieci

Po włączeniu funkcji sieci Wi-Fi radiotelefon skanuje i łączy się z punktem dostępowym.

Możesz także połączyć się z punktem dostępowym za pośrednictwem menu.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

- 3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do punktu dostępowego, a następnie naciśnij przycisk , aby wybrać.

- 5 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Połączenia, a następnie naciśnij przycisk , aby wybrać.

- 6 Wprowadź hasło i naciśnij przycisk .

Gdy połączenie powiedzie się, radiotelefon wyświetli powiadomienie, a punkt dostępowy zostanie zapisany na liście profili.

## Sprawdzanie stanu połączenia Wi-Fi

Postępuj zgodnie z procedurą, aby sprawdzić stan połączenia Wi-Fi.

Naciśnij zaprogramowany przycisk **zapytania o status sieci Wi-Fi**, aby usłyszeć status połączenia odczytany za pośrednictwem funkcji Zapowiedzi głosowej. Zapowiedź głosowa wskazuje, że funkcja Wi-Fi jest wyłączona, włączona, ale nie podłączona lub włączona i podłączona.

- Po wyłączeniu Wi-Fi na wyświetlaczu zostanie wyświetlony komunikat **WiFi wyłączone**.
- Gdy radiotelefon jest podłączony do sieci, na wyświetlaczu pojawi się komunikat **WiFi wł., podłączono**.
- Gdy radiotelefon jest włączony, ale niepodłączony do sieci, na wyświetlaczu pojawi się komunikat **WiFi wł., nie podłączono**.

Ustawienia zapowiedzi głosowych dla wyników zapytania o stan sieci Wi-Fi można dostosować do potrzeb użytkownika w programie CPS. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

### UWAGA:

Programowalny przycisk **zapytania o status sieci Wi-Fi** jest przypisywany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

## Odświeżanie listy sieci

Postępuj zgodnie z procedurą, aby odświeżyć listę sieci.

- Aby odświeżyć listę sieci poprzez menu, należy wykonać następujące czynności.
  - a. Naciśnij przycisk  , aby uzyskać dostęp do menu..
  - b. Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.

- c. Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

Po otwarciu menu Sieci, radiotelefon automatycznie odświeża listę sieci.

- Po wejściu do menu Sieci, wykonaj następujące czynności, aby odświeżyć listę sieci.

Naciśnij przycisk  lub , aby odświeżyć i naciśnij przycisk , aby wybrać.

Radiotelefon zostanie odświeżony i wyświetli najnowszą listę sieci.

## Dodawanie sieci

Jeśli preferowana sieć nie jest na liście dostępnych sieci, należy wykonać następujące czynności, aby dodać sieć.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

- 3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby Dodać Sieć i naciśnij przycisk , aby wybrać.

- 5 Wprowadź kod Service Set Identifier (identyfikator SSID) i naciśnij przycisk .

- 6 Naciśnij przycisk  lub , aby wybrać Otwórz i naciśnij przycisk , aby wybrać.

- 7 Wprowadź hasło i naciśnij przycisk  .  
Radiotelefon wyświetla miniinformację o udanej operacji, informującą że sieć została pomyślnie zapisana.
- 

## Wyświetlanie szczegółowych informacji z punktami dostępu do sieci

Postępuj według procedury, aby zobaczyć szczegółowe informacje o punktach dostępu do sieci.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..
- 
- 2 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.
- 

- 3 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk  , aby wybrać.
- 

- 4 Naciśnij przycisk  lub  , aby przejść do punktu dostępowego, a następnie naciśnij przycisk  , aby wybrać.
- 

- 5 Naciśnij przycisk  lub  , aby ustawić Wyświetl szczegóły i naciśnij przycisk  , aby wybrać.

Dla podłączonego punktu dostępu do sieci wyświetla się Service Set Identifier (identyfikator SSID), tryb zabezpieczeń, adres kontroli dostępu do nośników (MAC) i adres protokołu internetowego (IP).

Dla niepodłączonego punktu dostępu do sieci wyświetla się Service Set Identifier (identyfikator SSID) i tryb zabezpieczeń.

---

## Usuwanie punktów dostępu

Aby usunąć sieć punktów dostępowych z listy profili, należy wykonać następujące czynności.

1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.

---

3 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby przejść do wybranego punktu dostępowego w sieci naciśnij przycisk  , aby wybrać.

---

5 Naciśnij przycisk  lub  , aby Usunąć i naciśnij przycisk  , aby wybrać.

---

6 Naciśnij przycisk  lub  , aby Potwierdzić i naciśnij przycisk  , aby wybrać.

Radiotelefon wyświetla miniinformację o udanej operacji informującą, że wybrane punkty dostępu do sieci zostały pomyślnie usunięte.

---

## Narzędzia

Ten rozdział wyjaśnia działanie funkcji narzędzi dostępnych w radiotelefonie.

### Poziomy mocy

Można dostosować ustawienie wysokiej lub niskiej mocy dla poszczególnych kanałów.

#### Wysoki

Umożliwia komunikowanie się z radiotelefonami znajdującymi się w znacznej odległości.

## Niski

Umożliwia komunikowanie się z radiotelefonami znajdującymi się w bliskiej odległości.

### UWAGA:

Ta funkcja nie dotyczy kanałów w paśmie CB o tych samych częstotliwościach.

## Ustawianie poziomów mocy

Postępuj zgodnie z procedurą, aby ustawić poziomy mocy radiotelefonu.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Poziom mocy**. Pomiń poniższe kroki.

- Naciśnij , aby uzyskać dostęp do menu.

2

Naciśnij  lub , aby przejść do

Narzędzi. Naciśnij , aby wybrać.

3

Naciśnij  lub , aby przejść do Ustawień

radiotelefonu. Naciśnij , aby wybrać.

4

Naciśnij  lub , aby przejść do Mocy.

Naciśnij , aby wybrać.

5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby wybrać Wysoka.

Naciśnij , aby wybrać.

Na ekranie pojawi się  obok komunikatu Wysoka.

- Naciśnij  lub , aby wybrać Niska.

Naciśnij , aby wybrać.

Na ekranie pojawi się  obok komunikatu Niska.

6

Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

## Włączanie/wyłączanie dźwięków/ alertów radiotelefonu

jeśli to konieczne, można włączyć lub wyłączyć wszystkie dźwięki i powiadomienia z wyjątkiem przychodzącego

sygnału alarmowego. Postępuj zgodnie z procedurą, aby włączyć i wyłączyć dźwięki i alerty.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Dźwięki/Alerty**. Pomiń poniższe czynności.
- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Tonów/Alarmów. Naciśnij , aby wybrać.

5 Naciśnij  lub , aby przejść do Wszystkich dźwięków. Naciśnij , aby wybrać.

6 Naciśnij przycisk , aby włączyć lub wszystkie dźwięki i powiadomienia. Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji **Włączone** pojawi się .
- Jeśli nie,  obok opcji **Włączone** zniknie.

## Włączanie/wyłączanie dźwięków przycisków

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dźwięki przycisków radiotelefonu.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Tonów/  
Alarmów. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do Dźwięków  
klawiatury. Naciśnij , aby wybrać.

---

- 6 Naciśnij przycisk , aby włączyć lub wyłączyć  
dźwięki klawiatury. Na ekranie pojawi się jedna z  
następujących informacji:
  - Jeśli są włączone, obok informacji Włączone  
pojawi się .
  - Jeśli nie,  obok opcji Włączone zniknie.

## Ustawianie wyrównania poziomu głośności dźwięków/alertów

Funkcja ta służy do regulacji głośności sygnałów lub alarmów powyżej/poniżej poziomu głośności głosu ludzkiego. Postępuj zgodnie z procedurą, aby ustawić wyrównanie poziomu głośności dźwięków lub alertów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień  
radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Sygnałów/  
Alarmów. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do  
Przesunięcia głośności. Naciśnij , aby  
wybrać.

---

- 6 Naciśnij  lub , aby ustawić określony  
poziom wyrównania głośności.  
Zabrzmi sygnał odpowiedzi odpowiadający każdemu  
poziomowi wyrównania głośności.

7 Wykonaj jedną z następujących czynności:

- Naciśnij , aby wybrać. Wymagany poziom głośności zostanie zapisany.
- Naciśnij przycisk , aby wyjść z menu. Zmiany zostaną odrzucone.

## Włączanie lub wyłączenie sygnału zezwolenia na rozmowę

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć sygnał zezwolenia na rozmowę.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Tonów Alarmów. Naciśnij , aby wybrać.

- 5 Naciśnij  lub , aby przejść do Zezwolenie na rozmowę. Naciśnij , aby wybrać.

- 6 Naciśnij przycisk , aby włączyć lub wyłączyć sygnał zezwolenia na rozmowę.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji Włączone pojawi się ✓.
- Jeśli nie, ✓ obok opcji Włączone zniknie.

## Włączanie lub wyłączenie dźwięku uruchamiania

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dźwięk uruchamiania radiotelefonu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Tonów/ Alarmów. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do Uruchamiania. Naciśnij , aby wybrać.

---

- 6 Naciśnij przycisk , aby włączyć lub wyłączyć dźwięk uruchamiania radiotelefonu. Na ekranie pojawi się jedna z następujących informacji:
  - Jeśli są włączone, obok informacji Włączone pojawi się .

- Jeśli nie,  obok opcji Włączone zniknie.

## Ustawianie dźwięku alertu wiadomości tekstowej

Istnieje możliwość dostosowania dźwięku alertu wiadomości tekstowej jako Chwilowy lub Powtarzany dla każdej pozycji na liście kontaktów. Postępuj zgodnie z procedurą, aby ustawić dźwięki alertów wiadomości tekstowych.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Alerty wiadomości. Naciśnij , aby wybrać.

- 5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby wybrać Chwilowy. Naciśnij , aby wybrać. Na ekranie pojawi się  obok komunikatu Chwilowy.
- Naciśnij  lub , aby wybrać Powtarzający się. Naciśnij , aby wybrać. Na ekranie pojawi się  obok opcji Powtarzający się.

## Zmiana trybów wyświetlania

Można wybierać odpowiednio tryb Nocny lub Dzienny wyświetlacza radiotelefonu. Ta funkcja zmienia paletę kolorów wyświetlacza. Postępuj zgodnie z procedurą, aby zmienić tryb wyświetlacza radiotelefonu.

- 1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Tryb wyświetlania**. Pomiń poniższe czynności.
- Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do opcji Wyświetlacz. Naciśnij , aby wybrać. Wyświetlacz pokazuje Tr. dnia i Tryb nocny.

- 5 Naciśnij  lub , aby przejść do wybranych ustawień. Naciśnij , aby wybrać. Na wyświetlaczu obok wybranego ustawienia pojawi się .

## Regulacja jasności wyświetlacza

Postępuj zgodnie z procedurą, aby dopasować jasność wyświetlacza radiotelefonu. Jasności wyświetlacza nie można ustawić po włączeniu funkcji „Jasność automatyczna”.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Jasność**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do **Ustawień** radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do **Jasność**.  
Naciśnij , aby wybrać.  
Na wyświetlaczu pojawi się pasek postępu.

---

- 5 Naciśnij  lub , aby zwiększyć lub zmniejszyć jasność wyświetlacza. Naciśnij , aby wybrać.  
Wartość ustawienia może wynosić od 1 do 8.

---

## Włączanie i wyłączanie funkcji klakson/światła

Radiotelefon może zawiadamiać użytkownika o przychodzących połączeniach światłami i klaksonem. Kiedy funkcja jest aktywna, połączenia przychodzące są sygnalizowane światłami i klaksonem pojazdu. Funkcję tę instaluje sprzedawca przy pomocy łącza znajdującego się z tyłu urządzenia dodatkowego. Postępuj zgodnie z instrukcją, aby włączyć lub wyłączyć wszystkie klaksony i światła.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Horns/Lights**. Pomiń poniższe kroki.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Klaksony/Światła. Naciśnij , aby wybrać.

- Naciśnij przycisk , aby włączyć lub wyłączyć funkcję klaksonu/światła. Na ekranie pojawi się jedna z następujących informacji:
  - Jeśli są włączone, obok informacji **Włączone** pojawi się .

- Jeśli nie,  obok opcji **Włączone** zniknie.

## Włączanie/wyłączanie wskaźników LED

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć wskaźniki LED radiotelefonu.

- Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Wskaźnik LED. Naciśnij , aby wybrać.

- 5 Naciśnij przycisk  , aby włączyć lub wyłączyć wskaźnik LED.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji **Włączone** pojawi się ✓ .
- Jeśli nie, ✓ obok opcji **Włączone** zniknie.

## Włączanie i wyłączanie urządzenia rozgłoszeniowego

Postępuj zgodnie z procedurą włączania lub wyłączania wewnętrznego systemu rozgłoszeniowego (PA) radiotelefonu.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **System rozgłoszeniowy**. Pomiń poniższe czynności.
  - Naciśnij  , aby uzyskać dostęp do menu.

- Naciśnij  lub  , aby przejść do **Narzędzi**.  
Naciśnij  , aby wybrać.

- Naciśnij  lub  , aby przejść do **Ustawień radiotelefonu**. Naciśnij  , aby wybrać.

- Naciśnij  lub  , aby przejść do **systemu rozgłoszeniowego**. Naciśnij  , aby wybrać.

- Naciśnij przycisk  , aby włączyć lub wyłączyć funkcję systemu rozgłoszeniowego.
  - Jeśli są włączone, obok informacji **Włączone** pojawi się ✓ .
  - Jeśli nie, ✓ obok opcji **Włączone** zniknie.

## Włączanie i wyłączenie zewnętrznego urządzenia rozgłoszeniowego

Postępuj zgodnie z procedurą włączania lub wyłączenia zewnętrznego systemu rozgłoszeniowego (PA) radiotelefonu.

- Wykonaj jedną z następujących czynności:
  - Naciśnij przycisk programowany **Nagłośnienie zewnętrzne**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Zewnętrzny system rozgłoszeniowy. Naciśnij , aby wybrać.

- Naciśnij przycisk , aby włączyć lub wyłączyć zewnętrzny system rozgłoszeniowy.
  - Jeśli są włączone, obok informacji Włączone pojawi się .
  - Jeśli nie,  obok opcji Włączone zniknie.

## Włączanie i wyłączenie ekranu powitalnego

Poniższa procedura pozwala włączyć lub wyłączyć ekran powitalny.

- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi.

Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień

radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij przycisk  lub  , aby przejść do

opcji Wyświetlacz. Naciśnij  , aby wybrać.

5 Wybierz  lub  w celu otwarcia opcji Ekran

powitalny. Naciśnij  , aby wybrać.

6 Naciśnij przycisk  , aby włączyć lub wyłączyć ekran powitalny.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji Włączone pojawi się  .

- Jeśli nie,  obok opcji Włączone zniknie.

## Ustawienia języków

Postępuj zgodnie z procedurą, aby ustawić języki w radiotelefonie.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi.

Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień

radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do pozycji

Języki. Naciśnij  , aby wybrać.

- 5 Naciśnij  lub  , aby przejść do wybranego języka. Naciśnij  , aby wybrać.  
Na wyświetlaczu obok wybranego języka pojawi się .
- 

- 4 Za pomocą przycisku lub  lub  wybierz Typ kabla. Naciśnij  , aby wybrać.
- 

- 5 Aktualny typ przewodu jest oznaczony za pomocą symbolu .
- 

## Identyfikacja typu kabla

Wykonaj poniższe czynności, aby wybrać typ kabla radiotelefonu.

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub  , aby przejść do Narzędzi.  
Naciśnij  , aby wybrać.
- 
- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.
- 

## Włączanie i wyłączanie funkcji komunikatów głosowych

Ta funkcja umożliwia podanie w formie zapowiedzi głosowej strefy lub kanału, który użytkownik właśnie zaprogramował, lub sygnalizowanie naciśnięcia przycisku programowanego.

Funkcja jest zazwyczaj przydatna, kiedy użytkownik ma problem z odczytaniem zawartości wyświetlacza.

Powiadomienie dźwiękowe można dostosować do wymagań klienta. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć komunikaty głosowe.

## Włączanie lub wyłączenie płytki opcji

Możliwości płytki opcji dla każdego kanału mogą być przypisane do przycisków programowanych. Kanał może obsługiwać maksymalnie 6 funkcji płytek opcji. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć płytkę opcji.

Naciśnij zaprogramowany przycisk **Płytką opcji**.

## Syntezytor mowy Text-to-Speech

Funkcja Text-to-Speech może zostać włączona tylko przez sprzedawcę lub administratora systemu. Jeśli funkcja Text-to-Speech jest włączona, funkcja komunikatów głosowych jest automatycznie wyłączana. Włączenie funkcji komunikatów głosowych powoduje automatyczne wyłączenie funkcji syntezytor mowy Text-to-Speech.

Ta funkcja umożliwi podanie w formie zapowiedzi głosowej następujących informacji:

- Obecny kanał
- Obecna strefa

- Włączenie lub wyłączenie funkcji przycisku programowalnego
- Treść odbieranych wiadomości tekstowych
- Treść odbieranych etykiet zadań

Powiadomienie dźwiękowe można dostosować do wymagań klienta. Funkcja ta jest zazwyczaj przydatna, kiedy użytkownik znajduje się w warunkach utrudniających odczyt wyświetlacza.

## Ustawianie funkcji Text-to-Speech

Postępuj zgodnie z procedurą, aby skonfigurować funkcję Text-to-Speech.

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.
- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do Komunikatów głosowych. Naciśnij  , aby wybrać.

---

5 Naciśnij przycisk  lub  , aby przejść do dowolnej z poniższych funkcji. Naciśnij  , aby wybrać.

Dostępne opcje znajdują się poniżej:

- Wszystkie
- Wiadomości
- Etykiety zadań
- Kanał
- Strefa
- Przycisk Program

Symbol  pojawi się obok wybranego ustawienia.

---

## Ustawienia menu ogr.

Możesz ustawić czas, przez który menu radiotelefonu pozostanie otwarte, zanim na wyświetlaczu pojawi się znów Ekran główny. Postępuj zgodnie z procedurą, aby ustawić czas otwarcia menu.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby przejść do opcji Wyświetlacz. Naciśnij  , aby wybrać.

---

5 Naciśnij  lub  w celu przejścia do czasu menu. Naciśnij  , aby wybrać.

---

- 6 Naciśnij  lub  , aby przejść do wybranych ustawień. Naciśnij  , aby wybrać.

## Włączanie lub wyłączanie mikrofonu cyfrowego AGC

Automatyczna regulacja wzmocnienia (AGC) kontroluje wzmocnienie mikrofonu radiotelefonu automatycznie podczas transmisji w systemie cyfrowym.

Funkcja ta wycisza głośne dźwięki lub wzmacnia ciche dźwięki do zdefiniowanej wartości, aby zapewnić stały poziom dźwięku. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć mikrofon cyfrowy AGC.

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.
- 
- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

[Wyślij informację zwrotną](#)

- 4 Naciśnij  lub  , aby przejść do Mikrofonu cyfrowego AGC. Naciśnij  , aby wybrać.

- 5 Naciśnij przycisk  , aby włączyć lub wyłączyć mikrofon cyfrowy AGC.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji **Włączone** pojawi się  .
- Jeśli nie,  obok opcji **Włączone** zniknie.

## Włączanie lub wyłączanie dźwięku inteligentnego

Radiotelefon automatycznie zwiększa swoją głośność, aby skompensować hałas otoczenia, w tym nieruchome i ruchome źródła hałasu. Ta funkcja dotyczy jedynie odbioru i nie ma wpływu na transmitowany dźwięk. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dźwięk inteligentny.

**UWAGA:**

Ta funkcja jest niedostępna podczas sesji Bluetooth.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Inteligentny dźwięk**. Pomiń poniższe kroki.

- Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi.

Naciśnij  , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub , aby przejść do Inteligentnego dźwięku. Naciśnij  , aby wybrać.

5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby włączyć. Naciśnij  , aby wybrać. Obok opcji włączyć pojawi się oznaczenie .

- Naciśnij  lub , aby wyłączyć. Naciśnij  , aby wybrać. Obok opcji wyłączyć pojawi się oznaczenie .

## Włączenie lub wyłączenie funkcji akustycznego tłumika sprzężeń

Ta funkcja umożliwia minimalizowanie sprzężeń akustycznych w odbieranych połączeniach.

1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

4 Naciśnij przycisk  lub , aby przejść do menu Tłum. RF, a następnie naciśnij przycisk , aby wybrać.

Możesz również użyć przycisku lub  lub , aby zmienić wybraną opcję.

5 Wykonaj jedną z poniższych czynności:

- Naciśnij przycisk , aby włączyć funkcję tłumienia sprzężenia akustycznego. Na ekranie pojawi się oznaczenie  obok opcji Włączone.
- Naciśnij przycisk , aby wyłączyć funkcję tłumienia sprzężenia akustycznego. Oznaczenie  obok informacji Włączone zniknie.

## Włączanie lub wyłączanie funkcji wzmocnienia głoski „r”

Funkcję tę można włączyć w przypadku rozmów w języku zawierającym wiele słów ze spółgłoskami drżącymi dźwięłowymi (oznaczenie [r] w jęz. polskim). Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć wzmocnianie głoski „r”.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Wzmocnienie głoski „r”**. Pomiń poniższe kroki.
- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby wybrać Wzmocnienie głosu „r”. Naciśnij , aby wybrać.

---

5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Wł. Naciśnij , aby wybrać. Obok opcji Wł. pojawi się oznaczenie ✓.
  - Naciśnij  lub , aby Wył. Naciśnij , aby wybrać. Obok opcji Wył. pojawi się oznaczenie ✓.
- 

## Otoczenie audio

Możesz dostosować otoczenie audio w radiotelefonie w zależności od warunków, w jakich korzysta się z urządzenia.

### Domyślne

To jest ustawienie domyślne.

### Głośne

To ustawienie umożliwia użycie tłumika hałasów i zwiększa głośność odsłuchu w hałaśliwych miejscach.

### Grupa robocza

To ustawienie umożliwia użycie tłumika AF i wyłącza używanie funkcji AGC, kiedy grupa radiotelefonów znajduje się blisko siebie.

## Ustawianie otoczenia audio

Postępuj zgodnie z procedurą, aby ustawić otoczenie audio w radiotelefonie stosownie do danego otoczenia.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Otoczenia audio. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do wybranych ustawień. Naciśnij , aby wybrać.

Ustawienia wymieniono poniżej.

- Wybierz **Ustawienie domyślne** dla domyślnych ustawień fabrycznych.
- Wybierz **Głośny**, aby zwiększyć głośność głośnika podczas używania w głośnym otoczeniu.
- Wybierz **Grupa robocza**, aby zredukować sprzężenie akustyczne przy korzystaniu z grupy radiotelefonów, które znajdują się blisko siebie.

Na wyświetlaczu obok wybranego ustawienia pojawi się .

## Profile dźwięku

Możesz dostosować profile audio w radiotelefonie w zależności od swoich preferencji.

### Domyślne

To jest ustawienie domyślne.

### Poziom 1, Poziom 2, Poziom 3

Te ustawienia są przeznaczone do kompensacji zaniku słuchu występującej u osób w wieku 40, 50 czy 60 lat i powyżej.

### Wzmocnienie tonów wysokich, Wzmocnienie tonów średnich, Wzmocnienie tonów niskich

Te ustawienia są dla cienkich, bardziej nosowych lub głębszych dźwięków.

## Ustawianie profili dźwięku

Postępuj zgodnie z procedurą, aby ustawić profile dźwięku.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do **Ustawień radiotelefonu**. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Profili dźwięku. Naciśnij , aby wybrać.

5 Naciśnij  lub , aby przejść do wybranych ustawień. Naciśnij , aby wybrać.

Ustawienia wymieniono poniżej.

- Wybierz **Domyślny**, aby wyłączyć poprzednio wybrany profil audio i powrócić do domyślnych ustawień fabrycznych.
- Wybierz **Poziom 1**, **Poziom 2** lub **Poziom 3**, aby skorzystać z profili dźwięku przeznaczonych do kompensacji utraty słuchu typowej dla dorosłych powyżej 40 roku życia.
- Wybierz **Wzmocnienie tonów wysokich**, **Wzmocnienie tonów średnich** lub **Wzmocnienie tonów niskich**, aby skorzystać z profili dźwięku, które będą zgodne z twoimi preferencjami związanymi z wysokimi, nosowymi lub głębokimi dźwiękami.

Na wyświetlaczu obok wybranego ustawienia pojawi się .

## Włączanie lub wyłączanie systemu globalnej nawigacji satelitarnej

Global Navigation Satellite System (GNSS) to system nawigacji satelitarnej, który pozwala dokładnie określać położenie geograficzne radiotelefonu. GNSS korzysta z systemów Global Positioning System (GPS) oraz Global Navigation Satellite System (GLONASS).

### UWAGA:

Wybrane modele radiotelefonów mogą korzystać z nawigacji GPS i GLONASS. Ustawienie GNSS należy skonfigurować za pomocą oprogramowania CPS. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

- 1 Należy wykonać następujące czynności, aby włączyć/wyłączyć GNSS w radiotelefonie.
  - Naciśnij zaprogramowany przycisk **GNSS**.
  - Naciśnij , aby uzyskać dostęp do menu. Przejdź do kolejnego kroku.

2 Naciśnij  lub  , aby przejść do Narzędzi.

Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień

radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do pozycji

GNSS. Naciśnij  , aby wybrać.

5 Naciśnij przycisk  , aby włączyć lub wyłączyć funkcję GNSS.

Jeśli są włączone, obok informacji Włączone pojawi się  .

Jeśli nie,  obok opcji Włączone zniknie.

Dostępne są następujące ogólne informacje o radiotelefonie.

- Alias oraz ID radiotelefonu.
- Oprogramowanie sprzętowe i wersje codeplug.
- Aktualizacja oprogramowania.
- Informacje GNSS.
- Informacje o stacji.

#### UWAGA:

Naciśnij  , aby powrócić do poprzedniego

ekranu. Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

Radiotelefon zamyka bieżący ekran po zakończeniu odliczania czasu nieaktywności.

## Sprawdzanie aliasu oraz ID radiotelefonu

Postępuj zgodnie z procedurą, aby sprawdzić ID i alias radiotelefonu.

- 1 Wykonaj jedną z następujących czynności:

## Ogólne informacje dotyczące radiotelefonu

Radiotelefon zawiera informacje na temat różnych parametrów ogólnych.

[Wyślij informację zwrotną](#)

- Naciśnij zaprogramowany przycisk **Alias i ID radiotelefonu**. Pomiń poniższe czynności. Wybrzmiewa potwierdzający sygnał dźwiękowy.

Można nacisnąć programowalny przycisk **Alias oraz ID radiotelefonu**, aby powrócić do poprzedniego ekranu.

- Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do opcji Mój ID. Naciśnij , aby wybrać.

Pierwszy wiersz tekstowy pokazuje alias radiotelefonu. Drugi wiersz tekstowy pokazuje ID radiotelefonu.

## Sprawdzanie wersji oprogramowania sprzętowego i wersji Codeplug

Postępuj zgodnie z procedurą, aby sprawdzić wersję oprogramowania sprzętowego i wersję codeplug.

- 1 Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Wersje. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się bieżąca wersja oprogramowania sprzętowego i codeplug.

## Sprawdzanie informacji dotyczących aktualizacji oprogramowania

Ta funkcja pokazuje datę i godzinę ostatniej aktualizacji oprogramowania w ramach programowania bezprzewodowego (OTAP) lub Wi-Fi. Postępuj zgodnie z procedurą, aby sprawdzić informacje dotyczące aktualizacji oprogramowania.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Aktualizacji oprogramowania. Naciśnij , aby wybrać.  
Na ekranie jest wyświetlana data i godzina najnowszej aktualizacji oprogramowania.

Menu aktualizacji oprogramowania jest dostępne po co najmniej jednej udanej sesji OTAP lub Wi-Fi. Dodatkowe informacje: [Programowanie drogą radiową na str. 526](#).

## Sprawdzanie informacji GNSS

Ta funkcja umożliwia wyświetlanie na ekranie radiotelefonu informacji GNSS, takich jak:

- Szerokość geograficzna
- Długość geograficzna
- Wysokość
- Kierunek
- Prędkość
- Poziome rozmycie dokładności (HDOP)
- Satelity

- Wersja

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Informacje GNSS. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do wymaganej pozycji. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się żądane informacje GNSS.

## Wyświetlanie informacji o stacji

Postępuj zgodnie z procedurą, aby wyświetlić nazwę stacji, w której znajduje się radiotelefon.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Informacje o stacji. Naciśnij , aby wybrać.

Wyświetlacz pokazuje nazwę aktualnego miejsca.

## Praca w trybie Connect Plus

Connect Plus to kompleksowe rozwiązanie trunkingowe, oparte o technologię DMR. Connect Plus wykorzystuje dedykowany kanał sterujący do przydzielania i żądań kanału. Funkcje, które są dostępne dla użytkowników radiotelefonu w ramach tego systemu są opisane w tym rozdziale.

## Dodatkowe elementy sterujące radiotelefonem w trybie Connect Plus

Ten rozdział opisuje dodatkowe elementy sterujące radiotelefonu, dostępne dla użytkownika radiotelefonu za pomocą zaprogramowanych środków, takich jak przyciski programowalne oraz konfigurowalne funkcje radiotelefonu.

### Przycisk PTT

Przycisk **PTT** na bocznym panelu obudowy radiotelefonu pełni dwie podstawowe funkcje:

- Po nawiązaniu połączenia przycisk **PTT** umożliwia nadawanie do innych radiotelefonów uwzględnionych w danym połączeniu.  
Naciśnij i przytrzymaj przycisk **PTT**, a następnie mów do mikrofonu. Aby słuchać, zwolnij przycisk **PTT**.  
Mikrofon jest włączany po naciśnięciu przycisku **PTT**.
- Jeżeli połączenie nie zostało nawiązane, przycisk **PTT** umożliwia zainicjowanie nowego połączenia (zob. [Nawiązywanie połączeń radiowych na str. 263](#)).

Jeśli zostanie włączona opcja Sygnał zezwolenia na rozmowę, przed rozpoczęciem rozmowy zaczekaj na zakończenie emisji krótkiego sygnału ostrzegawczego.

## Programowalne przyciski

Sprzedawca może zaprogramować programowalne przyciski jako skróty do funkcji radiotelefonu z rozróżnieniem długości naciśnięcia przycisku:

### Krótkie naciśnięcie

Szybkie naciśnięcie i zwolnienie przycisku.

### Naciśnij i przytrzymaj przycisk

Naciśnięcie i przytrzymanie przez zaprogramowany czas.

**UWAGA:**

Zaprogramowany czas naciśnięcia przycisku obowiązuje dla wszystkich przypisywanych funkcji lub ustawień radiotelefonu/urządzenia dodatkowego. Więcej informacji na temat zaprogramowanego czasu naciśnięcia *przycisku alarmowego*: [Tryb awaryjny na str. 304](#).

## Konfigurowalne funkcje radiotelefonu

### Przełącznik audio Bluetooth®

Przełącza ścieżkę dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a zewnętrznym urządzeniem Bluetooth.

### Połączenie Bluetooth

Inicjuje operację znajdowania i łączenia z urządzeniem Bluetooth.

### Rozłączenie Bluetooth

Zamyka wszystkie istniejące połączenia Bluetooth między radiotelefonem a urządzeniami Bluetooth.

### Tryb wykrywania Bluetooth

Radiotelefon rozpoczyna pracę w trybie wykrywania łączności Bluetooth.

### Anulowanie zajętości kolejki

Anuluje tryb zajętości w przypadku zainicjowania połączenia niealarmowego z kolejki zajętości. Połączeń alarmowych zaakceptowanych do kolejki zajętości nie można anulować.

### Dziennik połączeń

Pozwala wybrać listę dziennika połączeń.

### Ogłoszenie kanału

Odtwarza zapowiedzi głosowe strefy i kanału dla bieżącego kanału.

### Kontakty

Zapewnia bezpośredni dostęp do listy kontaktów.

### Tryb awaryjny włączony/wyłączony

W zależności od zaprogramowanej konfiguracji powoduje zainicjowanie lub anulowanie trybu awaryjnego.

### Klakson/światła

Pozwala włączyć lub wyłączyć funkcję klaksonu i świateł.

### Lok. w budynku

Włącza i wyłącza funkcję lokalizacji wewnętrznej.

### Inteligentny dźwięk

Włącza lub wyłącza inteligentny dźwięk.

**Wybieranie ręczne**

W zależności od sposobu zaprogramowania może inicjować połączenie prywatne lub telefoniczne poprzez wprowadzenie dowolnego identyfikatora abonenta albo numeru telefonu.

**Szybki dostęp**

Natychmiastowo aktywuje wstępnie zdefiniowane połączenie prywatne, alert połączenia, wiadomość tekstową lub domowy zwrotny.

**Prywatne**

Włącza lub wyłącza funkcję prywatności.

**Kontrola radiotelefonu**

Sprawdza, czy radiotelefon jest aktywny w systemie.

**Aktywacja radiotelefonu**

Umożliwia zdalne włączanie radiotelefonu docelowego.

**Dezaktywacja radiotelefonu**

Umożliwia zdalne wyłączanie radiotelefonu docelowego.

**Zdalny nasłuch**

Włącza mikrofon radiotelefonu docelowego bez sygnalizowania.

**Resetowanie kanału głównego**

Ustawia nowy kanał główny.

**Typ dzwonka alertu**

Zapewnia bezpośredni dostęp do ustawienia typu dźwięku alertu.

**Żądanie roamingu**

Przesyła żądanie wyszukania innej stacji.

**Skanowanie**

Włącza lub wyłącza skanowanie.

**Wyciszanie przypomnienia kanału głównego**

Wycisza przypomnienia kanału głównego.

**Blokada stacji wł./wył.**

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

**Wiadomość tekstowa**

Pozwala wybrać menu wiadomości tekstowych.

**Zapowiedź głosowa wł./wył.**

Włącza i wyłącza funkcję zapowiedzi głosowej.

**Wi-Fi**

Włączanie i wyłączanie Wi-Fi.

**Strefa**

Umożliwia wybór strefy z listy.

## Konfigurowalne ustawienia/narzędzia

### Tłumienie AF

Włącza lub wyłącza funkcję tłumienia sprzężenia akustycznego.

### Wszyst. tony/Alarmy

Włącza lub wyłącza wszystkie sygnały dźwiękowe i alerty.

### Jasność podświetlenia

Służy do regulacji poziomu jasności.

### Kanał wyżej/nżej

W zależności od sposobu zaprogramowania zmienia kanał na poprzedni lub następny.

### Tryb wyświetlania

Włącza i wyłącza tryb dzienny/nocny wyświetlacza.

### System globalnej nawigacji satelitarnej (GNSS)

Włącza lub wyłącza system nawigacji satelitarnej.

### Poziom mocy

Przełącza między wysokim i niskim poziomem mocy nadawania.

### Nieprzypisany

Wskazuje, że funkcja przycisku nie została jeszcze przypisana.

## Opis wskaźników statusu w trybie Connect Plus

### Ikony na wyświetlaczu

Poniższe ikony ukazują się na wyświetlaczu radiotelefonu.

	<p><b>Wskaźnik siły odbieranego sygnału (RSSI)</b></p> <p>Liczba wyświetlanych pasków oznacza natężenie sygnału radiowego. Cztery paski oznaczają najsilniejszy sygnał. Ta ikona jest wyświetlana tylko podczas odbierania sygnału.</p>
	<p><b>Brak połączenia Bluetooth</b></p> <p>Funkcja Bluetooth jest aktywna, ale nie ma podłączonych zdalnych urządzeń Bluetooth.</p>
	<p><b>Połączenie Bluetooth</b></p>

*Ciąg dalszy tabeli...*

	Funkcja Bluetooth jest włączona. Ikona będzie widoczna, gdy zostanie podłączone urządzenie w trybie Bluetooth.
	<b>Duże ilości danych</b> Radiotelefon odbiera duże ilości danych i kanał jest zajęty.
	<b>Lokalizacja wewnętrzna dostępna</b> <sup>3</sup> Lokalizacja wewnętrzna jest włączona i dostępna.
	<b>Funkcja lokalizacji wewnętrznej jest niedostępna</b> <sup>3</sup> Lokalizacja wewnętrzna jest włączona, ale niedostępna z powodu wyłączenia funkcji Bluetooth lub zawieszenia skanowania punktów sygnałowych przez Bluetooth.
	<b>Tryb wyciszony</b> Tryb wyciszenia jest włączony, a głośnik wyciszony.

*Ciąg dalszy tabeli...*

	<b>Powiadomienia</b> Na liście powiadomień nie ma pozycji do sprawdzenia.
	<b>Poziom mocy</b> Radiotelefon jest ustawiony na niski lub wysoki poziom mocy.
	<b>Dźwięki wyłączone</b> Sygnały dźwiękowe są wyłączone.
	<b>Płytką opcjonalną</b> Płytką opcji jest włączona.
	<b>Niedziałająca płytką opcji</b> Płytką opcji jest wyłączona.
	<b>GNSS dostępny</b> Funkcja GPS/GNSS jest włączona. Ikona świeci się, gdy dostępne jest położenie ustalone.

*Ciąg dalszy tabeli...*

<sup>3</sup> Dotyczy wyłącznie modeli z najnowszą wersją konfiguracji programowej i sprzętowej

	<b>GNSS niedostępny/Poza zasięgiem</b> Funkcja GPS/GNSS jest włączona, jednak dane nie są odbierane z satelity.
	<b>Skanowanie</b> Funkcja skanowania jest aktywna.
	<b>Tryb awaryjny</b> Radiotelefon jest przełączony do trybu awaryjnego.
	<b>Zabezpieczono</b> Funkcja prywatności jest włączona.
	<b>Odbezpieczono</b> Funkcja prywatności jest wyłączona.
	<b>Roaming</b> Funkcja szukania sieci jest włączona.
	<b>Kontakt</b> Dany kontakt jest dostępny.

*Ciąg dalszy tabeli...*

	<b>Dziennik połączeń</b> Rejestr połączeń radiotelefonu.
	<b>Wiadomość</b> Wiadomość przychodząca.
	<b>Tylko dzwonek</b> Tryb dzwonienia jest włączony.
	<b>Tryb cichy</b> Włączono tryb cichy.
	<b>Wibracje</b> Tryb wibracji jest włączony.
	<b>Wibracje i dzwonek</b> Wibracje i dźwięk dzwonka włączone.
	<b>Doskonały sygnał Wi-Fi <sup>4</sup></b> Sygnał Wi-Fi jest doskonały.
	<b>Dobry sygnał Wi-Fi <sup>4</sup></b> Sygnał Wi-Fi jest dobry.

*Ciąg dalszy tabeli...*

	<b>Średni sygnał Wi-Fi</b> <sup>4</sup> Sygnał Wi-Fi jest średni.
	<b>Słaby sygnał Wi-Fi</b> <sup>4</sup> Sygnał Wi-Fi jest słaby.
	<b>Sieć Wi-Fi niedostępna</b> <sup>4</sup> Sygnał Wi-Fi jest niedostępny.

## Symbole połączenia

Następujące symbole pojawiają się na wyświetlaczu radiotelefonu po nawiązaniu połączenia. Te symbole są również wyświetlane na liście kontaktów, wskazując typ identyfikatora.

	<b>Połączenie indywidualne</b> Oznacza aktywne połączenie prywatne. Na liście kontaktów oznacza alias (nazwisko) lub identyfikator (numer) abonenta.
---	---

*Ciąg dalszy tabeli...*

	<b>Połączenie grupowe/połączenie zbiorcze stacji</b> Sygnalizuje aktywne połączenie grupowe lub zbiorcze stacji. Na liście kontaktów oznacza alias (nazwę) lub identyfikator (numer) grupy.
	<b>Połączenie telefoniczne jako połączenie prywatne</b> Informuje, że trwa połączenie telefoniczne jako połączenie prywatne.
	<b>Połączenie Bluetooth z komputerem</b> Informuje, że trwa połączenie Bluetooth z komputerem. Wskazuje na liście kontaktów alias grupy (nazwę) lub identyfikator (numer) połączenia Bluetooth z komputerem.
	<b>Połączenie dyspozytorskie</b> Kontakt typu Połączenie dyspozytorskie służy do wysyłania wiadomości

<sup>4</sup> Dotyczy tylko urządzeń DM4601e

tekstowej do komputera-dyspozytora za pośrednictwem serwera wiadomości tekstowych innej firmy.

## Zaawansowane ikony menu

Poniższe ikony znajdują się na wyświetlaczu obok pozycji menu i oferują możliwość wyboru jednej z dwóch opcji lub wskazują, że istnieje podmenu zawierające dwie opcje.

	<b>Pole wyboru (puste)</b> Oznacza, że opcja nie została wybrana.
	<b>Pole wyboru (zaznaczone)</b> Oznacza, że opcja została wybrana.
	<b>Pole wypełnione na czarno</b> Oznacza opcję wybraną dla pozycji menu zawierającej podmenu.

## Ikony pozycji wysłanych

W prawym górnym rogu wyświetlacza radiotelefonu, w folderze wysłanych pozycji, pojawiają się następujące ikony.

	<b>Wysłana pomyślnie</b> Wiadomość tekstowa wysłana pomyślnie.
LUB 	
	<b>W toku</b>
LUB 	<ul style="list-style-type: none"> <li>• Wiadomość tekstowa do aliasu lub identyfikatora grupy oczekuje na wysłanie.</li> <li>• Wiadomość tekstowa do aliasu lub identyfikatora abonenta oczekuje na wysłanie, po czym następuje oczekiwanie na potwierdzenie.</li> </ul>

*Ciąg dalszy tabeli...*

	<b>Wiadomość pojedyncza lub grupowa – przeczytano</b>
LUB	Wiadomość została przeczytana.
	
LUB	<b>Wiadomość pojedyncza lub grupowa – nie przeczytano</b>
	Wiadomość nie została przeczytana.
	<b>Nie można wysłać</b>
LUB	Wiadomość nie została wysłana.
	

## Ikony urządzeń Bluetooth

Poniższe ikony pojawiają się również obok elementów listy dostępnych urządzeń z włączoną funkcją Bluetooth, wskazując typ urządzenia.

	<b>Urządzenie danych Bluetooth</b> Urządzenie z włączoną funkcją Bluetooth, np. skaner.
	<b>Urządzenie audio Bluetooth</b> Urządzenie z włączoną funkcją Bluetooth, np. zestaw słuchawkowy.
	<b>Urządzenie PTT Bluetooth</b> Urządzenie PTT z włączoną funkcją Bluetooth, np. urządzenie PTT (POD).

## Dioda LED

Dioda LED pokazuje stan operacyjny radiotelefonu.

<b>Migające światło czerwone</b>	Radiotelefon nadaje przy bardzo niskim poziomie naładowania akumulatora, odbiera transmisję awaryjną, nie zaliczył autotestu podczas rozruchu lub znalazł się poza zasięgiem, jeżeli skonfigurowano system automatycznej kontroli przebywania w zasięgu innego
----------------------------------	--

*Ciąg dalszy tabeli...*

	telefonu. Tryb wyciszenia jest włączony.
<b>Szybko migające czerwone światło</b>	Radiotelefon odbiera plik przesyłany bezprzewodowo (plik oprogramowania sprzętowego płytki opcji, plik częstotliwości sieci lub plik codeplug płytki opcji) albo jego plik oprogramowania sprzętowego płytki opcji jest uaktualniany do nowej wersji.
<b>Migające światło zielone i żółte</b>	Radiotelefon odbiera alert połączenia, wiadomość tekstową lub Wyszukiwanie jest włączone i wykryto aktywność.
<b>Żółte światło stałe</b>	Radiotelefon znajduje się w trybie wykrywania Bluetooth.
<b>Podwójnie migające światło żółte</b>	Radiotelefon szuka nowej sieci.
<b>Migające światło żółte</b>	Radiotelefon odbiera alert połączenia lub funkcja Wyszukiwania jest włączona i znajduje się w trybie bezczynności (radiotelefon pozostanie wyciszony niezależnie od aktywności).

*Ciąg dalszy tabeli...*

<b>Zielone światło ciągle</b>	Radiotelefon uruchamia się lub nadaje.
<b>Migające światło zielone</b>	Radiotelefon uruchamia się, odbiera połączenie lub dane.
<b>podwójne zielone światło</b>	Radiotelefon odbiera połączenie poufne.

## Sygnaly wskaźnikowe

Poniżej przedstawiono sygnały, które wybrzmiewają w głośniku radiotelefonu.

Wysoki ton  Niski ton

Sygnaly dźwiękowe wskazują status radiotelefonu po działaniu zmierzającym do wykonania konkretnego zadania.

	Dźwięk informacyjny
	Dźwięk ostrzegawczy

## Sygnaly alarmów

Sygnaly alarmów stanowią akustyczne potwierdzenie stanu radiotelefonu lub odpowiedź radiotelefonu na odbierane dane.

<b>Sygnal ciągły</b> 	Dźwięk jednostajny. Ciągły do zakończenia.
<b>Dźwięk okresowy</b> 	Generowany okresowo, zależnie od konfiguracji radiotelefonu. Dźwięk jest włączany, przerywany i powtarzany automatycznie.
<b>Sygnal powtarzany</b> 	Pojedynczy dźwięk powtarzany aż do chwili, kiedy zostanie przerwany przez użytkownika.
<b>Sygnal jednorazowy</b> 	Generowany tylko jeden raz przez krótki czas, określony ustawieniach radiotelefonu.

[Wyślij informację zwrotną](#)

## Przełączanie między trybami Connect Plus a pozostałymi

Aby przełączyć się do trybu innego niż Connect Plus, należy zmienić obszar, o ile został on zaprogramowany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby dowiedzieć się, czy w radiotelefonie zostały zaprogramowane obszary inne niż Connect Plus, oraz uzyskać listę funkcji dostępnych podczas pracy w obszarach innych niż Connect Plus.

## Inicjowanie i odbieranie wywołań w trybie Connect Plus

Ta sekcja wyjaśnia ogólne działanie radiotelefonu i funkcje połączeń dostępne w radiotelefonie.

## Wybieranie stacji

Stacja zapewnia zasięg w określonym obszarze. Stacja Connect Plus jest wyposażona w kontroler stacji oraz maksymalnie 15 przemienników. W sieci z wieloma stacjami radiotelefon Connect Plus automatycznie będzie

wyszukiwać nową stację, jeśli poziom sygnału aktualnej stacji spadnie do nieakceptowanego poziomu.

## Żądanie roamingu

Żądanie roamingu to informacja, że radiotelefon szuka innej stacji, nawet jeśli poziom sygnału z bieżącej stacji jest akceptowalny.

Jeśli brak dostępnych stacji:

- Radioodtwarzacz wyświetla Wyszukiwanie oraz Alias wybranego kanału i kontynuuje przeszukiwanie stacji uwzględnionych na liście.
- Radiotelefon powróci do poprzedniej stacji, jeśli wcześniej stacja nadal będzie niedostępna.

### UWAGA:

Jest to funkcja zaprogramowana przez sprzedawcę.

Naciśnij zaprogramowany przycisk **Żądanie roamingu**.

Usłyszysz sygnał oznaczający, że radiotelefon został przełączony do nowej stacji. Na wyświetlaczu pojawi się komunikat ID stacji <numer stacji>.

## Blokada stacji wł./wył.

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

Naciśnij zaprogramowany przycisk **Blok miej**.

Jeśli funkcja **Blokada stacji** jest włączona:

- Usłyszysz dźwięk informacyjny oznaczający, że radiotelefon został zablokowany w bieżącej stacji.
- Na wyświetlaczu pojawi się informacja St. baz. Zablok.

Jeśli funkcja **Blokada stacji** jest wyłączona:

- Usłyszysz dźwięk ostrzegawczy oznaczający, że radiotelefon został odblokowany.
- Na wyświetlaczu pojawi się informacja St. baz. Odblok.

## Ograniczenie stacji

Administrator systemu radiotelefonicznego Connect Plus może określić, z których stacji sieciowych może korzystać radiotelefon. Zmiana listy dozwolonych i niedozwolonych

stacji nie wymaga ponownego programowania radiotelefonu. Jeśli radiotelefon spróbuje zarejestrować się w niedozwolonej stacji, na ekranie zobaczysz komunikat: Stacja <numer> jest niedozwolona. Następnie radiotelefon wyszuka inną stację sieciową.

## Wybieranie strefy

Radiotelefon można zaprogramować do obsługi maksymalnie 16 obszarów Connect Plus, z których każdy może zawierać maksymalnie 16 pozycji możliwych do przypisania na pokrętle wyboru kanałów.

Każda z pozycji możliwych do przypisania na pokrętle może służyć do uruchamiania jednego z następujących rodzajów połączeń głosowych:

- Połączenie grupowe
- Połączenie z wielogrupą
- Połączenie zbiorcze stacji
- Połączenie indywidualne

1 Aby uzyskać dostęp do funkcji strefy, wykonaj następujące czynności:

Elementy sterujące radiotelefonu	Kroki
Zaprogramowany przycisk wyboru strefy	Naciśnij zaprogramowany przycisk <b>wyboru strefy</b> .
Menu radiotelefonu	<p><b>a</b> Naciśnij przycisk  , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub  , aby przejść do pozycji Strefa i naciśnij przycisk  , aby wybrać.</p>

Bieżący obszar jest wyświetlany i oznaczony za pomocą .

2 Wybierz żądaną strefę.

Obsługa radiotelefonu	Kroki
 lub 	Naciśnij przycisk  lub  i przewiń do żądanej strefy.

3 Naciśnij , aby wybrać.

Na wyświetlaczu przez chwilę będzie widoczny komunikat <Strefa> wybrano i ponownie zostanie wyświetlony ekran wybranego obszaru.

## Korzystanie z wielu sieci

Jeśli radiotelefon został zaprogramowany do korzystania z wielu sieci Connect Plus, można wybrać inną sieć, przełączając go do strefy Connect Plus, którą przypisano do tej sieci. Są to ustawienia sieć-strefa, które zostały skonfigurowane przez sprzedawcę podczas programowania radiotelefonu.

## Wybór rodzaju połączenia

Skorzystaj z pokrętła kanałów, aby wybrać typ połączenia. Dostępne opcje: połączenie grupowe, połączenie z wieloma grupami, połączenie zbiorcze stacji oraz połączenie prywatne, w zależności od zaprogramowanych ustawień radiotelefonu. Jeśli ustaw pokrętło wyboru kanału na inną pozycję (która ma przypisany rodzaj połączenia). Powoduje to, że radio ponownie rejestruje stację Connect Plus. Radiotelefon zostanie zarejestrowany przy użyciu identyfikatora grupy, który zaprogramowano dla nowej pozycji pokrętławyboru kanałów.

Jeśli zostanie wybrana pozycja, do której nie przypisano żadnego rodzaju połączenia, radiotelefon wyemituje dźwięk ciągły i wyświetli komunikat o niezaprogramowanym kanale. Radiotelefon nie działa po wybraniu niezaprogramowanego kanału, dlatego należy wybrać zaprogramowany kanał przy użyciu pokrętła wyboru kanałów.

Po wyświetleniu żądanej strefy (jeśli w radiotelefonie jest wiele stref) pokrętło wyboru kanału wybierz typ połączenia.

## Otrzymywanie i odbieranie połączeń radiowych

Po wyświetleniu kanału zostanie wyświetlone ID użytkownika lub typ połączenia. Możesz zacząć odbierać połączenia.

Zielony wskaźnik jest włączony wówczas, gdy radiotelefon jest przełączony do trybu nadawania i miga po przełączeniu radiotelefonu w tryb odbioru.

### UWAGA:

Dioda LED pali się ciągłym zielonym światłem, gdy radiotelefon nadaje, podwójnie pulsuje na zielono podczas odbioru połączenia poufnego i . Po włączeniu funkcji poufności transmisję będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności LUB taką samą wartością i ID klucza (programowane przez sprzedawcę), jak te skonfigurowane w transmitującym radiotelefonie.

Dodatkowe informacje: [Prywatne na str. 327](#).

## Otrzymywanie i odbieranie połączenia grupowego

Aby odebrać połączenie od grupy użytkowników, radiotelefon musi być skonfigurowany jako członek danej grupy.

Podczas odbierania połączenia grupowego (na ekranie głównym), dioda LED miga na zielono. W prawym górnym rogu pojawi się ikona połączenia grupowego. Pierwszy wiersz tekstu pokazuje alias rozmówcy. Druga linia tekstu wyświetla alias wywołania grupowego. Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik radiotelefonu.

- 1 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.

Dioda LED świeci na zielono.

- 2 Zaczekaj na zakończenie jednego z sygnałów zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

- 3 Aby słuchać, zwolnij przycisk **PTT**.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone.

#### **UWAGA:**

Szczegółowe informacje dotyczące inicjowania połączenia grupowego: [Inicjowanie wywołania grupowego na str. 264](#).

## Otrzymywanie i odbieranie połączenia prywatnego

Połączenie prywatne jest inicjowane przez indywidualny radiotelefon i skierowane do innego indywidualnego radiotelefonu.

Po odebraniu połączenia prywatnego dioda LED miga na zielono. W pierwszym wierszu widoczny jest alias lub identyfikator użytkownika oraz ikona wskaźnika RSSI. W drugim zobaczysz napis *wyw. prywat.* wraz z ikoną. Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik radiotelefonu.

- 1 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.

- 2 Naciśnij przycisk **PTT**, aby odpowiedzieć.  
Dioda LED świeci na zielono.

- 3 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

- 4 Aby słuchać, zwolnij przycisk **PTT**.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone.

Na wyświetlaczu zobaczysz komunikat *Połączenie zakończone*.

Rozdział [Inicjowanie połączenia prywatnego na str. 265](#) zawiera szczegółowe informacje dotyczące inicjowania połączenia prywatnego.

## Odbieranie połączenia ogólnego stacji

Połączenie ogólne stacji to połączenie z pojedynczego radiotelefonu do wszystkich radiotelefonów w tej stacji. Jest ono używane do transmitowania ważnych zawiadomień, wymagających pełnej uwagi użytkowników.

Po odebraniu połączenia zbiorczego stacji zostanie wyemitowany sygnał dźwiękowy, a dioda LED zacznie migać na zielono.

W prawym górnym rogu pojawi się ikona połączenia grupowego. Pierwszy wiersz tekstu pokazuje alias rozmówcy. W drugim wierszu jest wyświetlana pozycja Wszystkie połączenia stacji. Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik radiotelefonu.

Po zakończeniu połączenia ogólnego stacji radiotelefon ponownie wyświetli ekran widoczny przed odebraniem połączenia. Połączenie ogólne stacji zostaje zakończone bez oczekiwania przez predefiniowany czas.

Nie można odpowiedzieć na połączenie zbiorcze stacji.

#### UWAGA:

Szczegółowe informacje dotyczące nawiązywania połączenia ogólnego stacji zawiera rozdział [Nawiązywanie połączenia zbiorczego stacji na str. 266](#).

Radiotelefon przerywa odbiór połączenia ogólnego stacji, jeżeli użytkownik przełączy kanał podczas odbierania połączenia. Podczas połączenia zbiorczego stacji nie można korzystać z funkcji przycisków zaprogramowanych, aż do zakończenia połączenia.

## Odbieranie prywatnego połączenia telefonicznego

Gdy urządzenie wykryje tego typu połączenie przychodzące, w prawym górnym rogu ekranu pojawi się ikona prywatnego połączenia telefonicznego. W pierwszym wierszu znajdzie się komunikat Wywołanie telefoniczne.

- 1 Przytrzymaj przycisk **PTT**, aby odebrać i zacznij mówić. Aby słuchać, zwolnij przycisk **PTT**.

- 2 Przytrzymaj przycisk , aby je zakończyć.

W pierwszym wierszu znajdzie się komunikat **Kończę**. W drugim wierszu znajdzie się komunikat **Połączenie telefoniczne....** Urządzenie powróci do menu wywołania telefonicznego. Na ekranie pojawi się komunikat **Wyw. tel. zakończ.**

## Buforowane wybieranie długich numerów w ramach prywatnego połączenia telefonicznego (przychodzącego)

Na czas połączenia ikona prywatnego połączenia telefonicznego będzie widoczna w prawym górnym rogu ekranu. W pierwszym wierszu znajdzie się komunikat **Wywołanie telefoniczne.**

- 1 Wpisz numer za pomocą klawiatury, następnie naciśnij przycisk .

Naciśnij przyciski  i  (w ciągu dwóch sekund), aby wstawić pauzę. Na wyświetlaczu symbol P zastępuje \* i #.

Ikona prywatnego połączenia telefonicznego pojawi się w prawym górnym rogu ekranu. W pierwszym wierszu znajdą się wpisane cyfry.

- 2 Aby zakończyć połączenie, przytrzymaj przycisk

W pierwszym wierszu znajdzie się komunikat **Kończę**. W drugim wierszu znajdzie się komunikat **Połączenie telefoniczne....** Urządzenie powróci do menu wywołania telefonicznego.

Na ekranie pojawi się komunikat **Wyw. tel. zakończ.**

## Wybieranie długich numerów podczas przychodzącego prywatnego wywołania telefonicznego

Na czas połączenia ikona prywatnego połączenia telefonicznego będzie widoczna w prawym górnym rogu

ekranu. W pierwszym wierszu znajdzie się komunikat `Wywołanie telefoniczne`.

- 1 Naciśnij przycisk **PTT** i za pomocą klawiatury wpisz numer.

Ikona prywatnego połączenia telefonicznego pojawi się w prawym górnym rogu ekranu. W pierwszym wierszu znajda się wpisane cyfry.

- 
- 2 Aby zakończyć połączenie, przytrzymaj przycisk

W pierwszym wierszu znajdzie się komunikat `Kończę`. W drugim wierszu znajdzie się komunikat `Połączenie telefoniczne...`. Urządzenie powróci do menu wywołania telefonicznego.

Na ekranie pojawi się komunikat `Wyw. tel. zakończ.`

## Odbieranie prywatnego połączenia telefonicznego dla grupy rozmówców

Gdy urządzenie wykryje tego typu połączenie przychodzące, w prawym górnym rogu ekranu pojawi się ikona połączenia grupowego. W pierwszym wierszu znajdzie się komunikat `Połączenie1`.

Naciśnij przycisk **PTT**, aby mówić, albo zwolnij go, aby słuchać.

---

## Przychodzące połączenie telefoniczne wielogrupy

Gdy urządzenie wykryje tego typu połączenie przychodzące, w prawym górnym rogu ekranu pojawi się ikona wywołania grupowego. W pierwszym wierszu znajdzie się komunikat `Połączenie wielogrupy`. W głośniku radiotelefonu usłyszysz sygnał dźwiękowy połączenia wielogrupy.

## Nawiązywanie połączeń radiowych

Po wybraniu kanału można wybrać alias lub ID abonenta bądź alias lub ID grupy, wykorzystując:

- Pokrętko wyboru kanałów.
- Zaprogramowany przycisk **szybkiego dostępu** – Funkcja szybkiego dostępu pozwala na proste wykonanie połączenia prywatnego do predefiniowanego identyfikatora. Ta funkcja może zostać przypisana do krótkiego lub długiego naciśnięcia programowanego przycisku. Do przycisku **Szybkiego połączenia** można przypisać tylko jedno ID. W radiotelefonie można zaprogramować wiele przycisków **Szybkiego dostępu**.
- Lista kontaktów (patrz [Ustawienia kontaktów na str. 290](#)).

#### UWAGA:

Radiotelefon musi mieć włączoną funkcję prywatności na danym kanale, aby nadawać podczas połączenia prywatnego. Transmisję mogą odszyfrować tylko radiotelefony docelowe, dla których skonfigurowano ten sam klucz i ID klucza, co dla radiotelefonu transmitującego.

Dodatkowe informacje: [Prywatne na str. 327](#).

## Nawiązywanie połączenia przy użyciu pokrętkła wyboru kanałów

Ta funkcja pozwala użytkownikom na wykonywanie różnych typów połączeń: połączeń grupowych, prywatnych, połączeń ogólnych stacji, połączeń z wielogrupą.

## Inicjowanie wywołania grupowego

Aby zainicjować połączenie z grupą użytkowników, radiotelefon musi być skonfigurowany jako członek danej grupy.

- 1 Wybierz kanał z aktywnym aliasem lub ID grupy. Zobacz [Wybór rodzaju połączenia na str. 258](#).
- 2 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.
- 3 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Dioda LED świeci na zielono. Ikona połączenia grupowego jest wyświetlana w górnym prawym rogu. Pierwszy wiersz tekstu pokazuje alias połączenia grupowego.

- 4 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.
- 

- 5 Aby słuchać, zwolnij przycisk **PTT**.

Dioda zacznie pulsować na zielono, radiotelefon wyłączy wyciszenie i usłyszysz odpowiedź przez głośnik urządzenia. Na wyświetlaczu pojawi się ikona Połączenia grupowego, alias lub identyfikator grupy oraz alias lub identyfikator nadającego radiotelefonu.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone. Radiotelefon wraca do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

---

## Inicjowanie połączenia prywatnego

Mimo, iż użytkownik może odbierać lub odpowiadać na połączenie prywatne zainicjowane przez innego autoryzowanego użytkownika radiotelefonu, jego własne urządzenie musi zostać zaprogramowane do inicjowania połączenia prywatnego.

Rozlegnie się dźwięk ostrzegawczy, jeżeli zostanie dokonane połączenie prywatne za pomocą **przycisku**

[Wyślij informację zwrotną](#)

**szybkiego połączenia** lub pokręćła wyboru kanałów jeśli ta funkcja nie została włączona.

- 1 Wykonaj jedną z poniższych czynności:

- Wybierz kanał aktywnego aliasu lub identyfikatora. Zobacz [Wybór rodzaju połączenia na str. 258](#).
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.
- 

- 2 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.
- 

- 3 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Dioda świeci na zielono.. Ikona Połączenia prywatnego będzie widoczna w prawym górnym rogu. Pierwsza linia tekstu pokazuje alias docelowego abonenta. Druga linia tekstu przedstawia stan połączenia.

---

- 4 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.
- 

- 5 Aby słuchać, zwolnij przycisk **PTT**.

Dioda zacznie pulsować na zielono.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone. Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat `Połączenie zakończone`.

Radiotelefon może być zaprogramowany do wykonywania testu radiowego przed skonfigurowaniem połączenia prywatnego. Jeżeli radiotelefon docelowy jest niedostępny, usłyszysz krótki sygnał i na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.

## Nawiązywanie połączenia zbiorczego stacji

Ta funkcja umożliwia transmisję do wszystkich użytkowników w stacji, którzy nie są aktualnie zajęci innym połączeniem. Aby korzystać z tej funkcji było możliwe, radiotelefon musi być odpowiednio zaprogramowany.

Użytkownicy korzystający z danego kanału/danej stacji nie mogą odpowiadać na połączenie zbiorcze stacji.

- 1 Wybierz kanał aktywnego aliasu grupowego połączenia zbiorczego stacji. Zobacz [Wybór rodzaju połączenia na str. 258](#).

- 2 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.

- 3 Naciśnij przycisk **PTT**, aby zainicjować połączenie.

Dioda LED świeci na zielono. Ikona połączenia grupowego jest wyświetlana w górnym prawym rogu. Pierwszy wiersz tekstu przedstawia `Wszystkie połączenia stacji`.

- 4 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

## Inicjowanie połączenia z wielogrupą

Ta funkcja umożliwia nadawanie sygnału do wszystkich użytkowników w wielu grupach. Aby korzystać z tej funkcji było możliwe, radiotelefon musi być odpowiednio zaprogramowany.

**UWAGA:**

Użytkownicy w grupach nie mogą odpowiadać na połączenie z wielogrupą.

- 1 Obróć pokrętko wyboru kanału, aby wybrać alias lub identyfikator wielogrupy.

- 2 Naciśnij przycisk **PTT**, aby zainicjować połączenie.

Dioda LED świeci na zielono. Na wyświetlaczu pojawi się alias lub identyfikator wielogrupy.

Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

## Nawiązywanie połączenia prywatnego przy użyciu przycisku szybkiego połączenia

**UWAGA:**

Przyciski programowane należy zainicjować na ekranie głównym.

Funkcja szybkiego połączenia umożliwia łatwe nawiązywanie połączenia prywatnego o wstępnie

określonym aliasie lub identyfikatorze. Ta funkcja może zostać przypisana do krótkiego lub długiego naciśnięcia programowanego przycisku.

Do przycisku szybkiego połączenia można przypisać TYLKO jeden alias lub identyfikator. W radiotelefonie można zaprogramować wiele przycisków szybkiego połączenia.

- 1 Naciśnij zaprogramowany przycisk **szybkiego połączenia**, aby nawiązać połączenie prywatne o wstępnie zdefiniowanym aliasie lub identyfikatorze.

- 2 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.

- 3 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Dioda LED świeci na zielono.

Na wyświetlaczu pojawi się alias lub identyfikator połączenia prywatnego.

- 4 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

- 5 Aby słuchać, zwolnij przycisk **PTT**.

Gdy radiotelefon odbiorcy odpowie, zielona dioda LED zacznie migać.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone.

---

## Nawiązywanie połączenia przy użyciu programowalnego przycisku wybierania ręcznego

Ta funkcja pozwala użytkownikom radiotelefonu na wykonywanie połączeń prywatnych za pomocą programowalnego przycisku wybierania ręcznego.

### Inicjowanie połączenia prywatnego

- 1 Naciśnij zaprogramowany przycisk **Wybier ręcz**, aby przejść do ekranu wybierania ręcznego.

Na ekranie pojawi się komunikat Numer :.

---

- 2 Użyj klawiatury, aby wprowadzić alias abonenta lub identyfikator prywatny.
- 

- 3 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.
- 

- 4 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Dioda LED świeci na zielono. Ikona połączenia prywatnego jest widoczna w prawym górnym rogu. Pierwszy wiersz tekstu przedstawia alias abonenta. Drugi wiersz tekstu pokazuje stan połączenia.

---

- 5 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.
- 

- 6 Aby słuchać, zwolnij przycisk **PTT**.

Gdy radiotelefon odbiorcy odpowie, zielona dioda LED zacznie migać.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone. Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat Połączenie zakończone.

---

## Wychodzące połączenia telefoniczne przy pomocy programowanego przycisku wybierania ręcznego

- 1 Naciśnij zaprogramowany przycisk **Wybier ręcz.**, aby przejść do ekranu wybierania ręcznego.

Na ekranie pojawi się komunikat Numer!.

- 2 Skorzystaj z klawiatury i wpisz numer telefonu.

Naciśnij przycisk , aby rozpocząć wywołanie dla wpisanego numeru.

Naciśnij przycisk , aby usunąć niechciane znaki.

Naciśnij przyciski  i  (w ciągu dwóch sekund), aby wstawić pauzę. Na wyświetlaczu symbol P zastępuje \* i #.

Jeżeli operacja się powiedzie, na ekranie pojawi się komunikat Połączenie telefoniczne. W drugim wierszu znajdzie się numer telefonu.

Jeżeli wybrany numer jest nieprawidłowy, na ekranie pojawi się powiadomienie: Wywołanie

telefoniczne nieudane, Zasoby niedostępne lub Brak prawidłowych pozwoleń.

Jeżeli wciśniesz przycisk  bez wpisywania numeru, usłyszysz dźwięk potwierdzenia, a następnie odmowy. Stan ekranu się nie zmienia.

- 3 Aby zakończyć połączenie, przytrzymaj przycisk

W pierwszym wierszu znajdzie się komunikat Kończę. W drugim wierszu znajdzie się komunikat Połączenie telefoniczne....

Na ekranie pojawi się komunikat Wyw. tel. zakończ.

## Wykonywanie prywatnych połączeń telefonicznych (wychodzących) z menu telefonu

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do pozycji Telefon i wybierz naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk , aby przejść do opcji Wybieranie ręczne.  
W pierwszym wierszu pojawi się Numer, a w drugim migający kursor.

---

- 4 Skorzystaj z klawiatury i wpisz numer telefonu.  
Naciśnij przycisk , aby rozpocząć wywołanie dla wpisanego numeru.

Naciśnij przycisk , aby usunąć niechciane znaki.

Naciśnij przyciski  i  (w ciągu dwóch sekund), aby wstawić pauzę. Na wyświetlaczu symbol P zastępuje \* i #.

Jeżeli operacja się powiedzie, na ekranie pojawi się komunikat Połączenie telefoniczne. W drugim wierszu znajdzie się numer telefonu.

Jeżeli wybrany numer jest nieprawidłowy, na ekranie pojawi się powiadomienie: Wywołanie telefoniczne nieudane, Zasoby niedostępne lub Brak prawidłowych pozwoleń.

Jeżeli wciśniesz przycisk  bez wpisywania numeru, usłyszysz dźwięk potwierdzenia, a następnie odmowy. Stan ekranu się nie zmienia.

- 5 Aby zakończyć połączenie, przytrzymaj przycisk .

W pierwszym wierszu znajdzie się komunikat Kończę. W drugim wierszu znajdzie się komunikat Połączenie telefoniczne....

Na ekranie pojawi się komunikat Wzyw. tel. zakończ.

## Prywatne połączenie telefoniczne z menu kontaktów (wychodzące)

### UWAGA:

Jeżeli w oprogramowaniu MOTOTRBO Connect Plus Option Board CPS zablokowano ręczne wybieranie numerów telefonicznych, opcja Numer telefonu **nie będzie widoczna** w menu.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do pozycji Kontak ty i wybierz naciśnij przycisk , aby wybrać.

- 3 Naciśnij przycisk  lub , aby przejść do menu Wyb ręcz i wybierz naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Numer telefonu i wybierz naciśnij przycisk , aby wybrać.

W pierwszym wierszu pojawi się Numer, a w drugim migający kursor.

- 5 Skorzystaj z klawiatury i wpisz numer telefonu.  
Naciśnij przycisk , aby rozpocząć wywołanie dla wpisanego numeru.  
Po wciśnięciu przycisku **PTT** na ekranie pojawi się komunikat Naciśnij przycisk OK, aby wysłać. Urządzenie powróci do poprzedniego menu.  
Naciśnij przycisk , aby usunąć niechciane znaki.  
Naciśnij przyciski  i  (w ciągu dwóch

sekund), aby wstawić pauzę. Na wyświetlaczu symbol P zastępuje \* i #.

Jeżeli operacja się powiedzie, na ekranie pojawi się komunikat Połączenie telefoniczne. W drugim wierszu znajdzie się numer telefonu.

Jeżeli wciśniesz przycisk  bez wpisywania numeru, usłyszysz dźwięk potwierdzenia, a następnie odmowy. Stan ekranu się nie zmieni.

## 6 Aby zakończyć połączenie, przytrzymaj przycisk

W pierwszym wierszu znajdzie się komunikat Kończę. W drugim wierszu znajdzie się komunikat Połączenie telefoniczne...

Na ekranie pojawi się komunikat Wyw. tel. Zakończ..

## Oczekiwanie na przyznanie kanału w trakcie prywatnego połączenia telefonicznego (wychodzącego)

Podczas prywatnego połączenia telefonicznego w pierwszym wierszu pojawi się komunikat Wywołanie telefoniczne. W drugim wierszu znajdzie się numer telefonu.

W trakcie trwania rozmowy ikona prywatnego połączenia telefonicznego będzie widoczna w prawym górnym rogu ekranu. W pierwszym wierszu znajdzie się numer telefonu.

Jeżeli operacja zakończy się niepowodzeniem, na ekranie zobaczysz powiadomienie: Wywołanie telefoniczne nieudane, Zasoby niedostępne lub Brak prawidłowych pozwoleń.

Aby zakończyć połączenie, przytrzymaj przycisk

Radiotelefon powróci do poprzedniego ekranu.

## Buforowane wybieranie długich numerów w ramach prywatnego połączenia telefonicznego

Na czas połączenia ikona prywatnego połączenia telefonicznego będzie widoczna w prawym górnym rogu ekranu. W pierwszym wierszu znajdzie się numer telefonu.

### 1 Wpisz numer za pomocą klawiatury.

Naciśnij przycisk , aby usunąć niechciane znaki.

Naciśnij przyciski  i  (w ciągu dwóch sekund), aby wstawić pauzę. Na wyświetlaczu symbol P zastępuje \* i #.

W pierwszym wierszu pojawi się komunikat **Dodatkowe cyfry**. Drugi wiersz pozwala je wpisać i wyświetlić.

### 2 Naciśnij przycisk .

Po wciśnięciu przycisku **PTT** na ekranie pojawi się komunikat **Naciśnij przycisk OK**, aby wysłać. Urządzenie powróci do poprzedniego menu.

Ikona prywatnego połączenia telefonicznego pojawi się w prawym górnym rogu ekranu. W pierwszym wierszu znajdzie się numer telefonu z dodatkowymi cyframi.

### 3 Wykonaj jedną z poniższych czynności:

- Naciśnij przycisk  , aby powrócić do ekranu wywołania telefonicznego.
- Aby zakończyć połączenie, przytrzymaj przycisk  .

## Wybieranie długich numerów podczas wychodzącego prywatnego połączenia telefonicznego

Na czas połączenia ikona prywatnego połączenia telefonicznego będzie widoczna w prawym górnym rogu ekranu. W pierwszym wierszu znajdzie się numer telefonu.

- 1 Naciśnij przycisk **PTT** i za pomocą klawiatury wpisz numer.

Ikona prywatnego połączenia telefonicznego pojawi się w prawym górnym rogu ekranu. W pierwszym wierszu znajdzie się numer telefonu z dodatkowymi cyframi.

- 2 Aby zakończyć połączenie, przytrzymaj przycisk

W pierwszym wierszu znajdzie się komunikat **Kończę**. W drugim wierszu znajdzie się komunikat **Połączenie telefoniczne...**

Na ekranie pojawi się komunikat **Wyw. tel. zakończ**.

## Zaawansowane funkcje w trybie Connect Plus

Ten rozdział wyjaśnia działanie funkcji dostępnych w radiotelefonie.

### Przypomnienie kanału głównego

Funkcja ta generuje przypomnienie, gdy w radiotelefonie przez pewien czas nie jest ustawiony kanał główny.

Jeśli po włączeniu tej funkcji za pośrednictwem programu CPS przez pewien czas w radiotelefonie nie jest ustawiony kanał główny, emitowany jest sygnał przypomnienia kanału głównego i dźwięk wiadomości oraz wyświetlany jest następujący komunikat: w pierwszym wierszu tekst **Brak**, a w drugim wierszu — **Kanał główny**.

Na przypomnienie można zareagować wykonując jedną z następujących czynności:

- Powrócić do kanału głównego.
- Tymczasowo wyciszyć przypomnienie za pomocą przycisku programowalnego.
- Ustawić nowy kanał główny za pomocą przycisku programowalnego.

## Automatyczne usuwanie awarii

Automatyczne usuwanie awarii to funkcja systemowa umożliwiająca nawiązywanie i odbieranie połączeń innych niż alarmowe w wybranym kontakcie grupy, jeśli wystąpią określone typy awarii systemu Connect Plus.

Jeśli wystąpi jedna z takich awarii, radiotelefon spróbuje przełączyć się na inną stację Connect Plus. Wynikiem tego procesu wyszukiwania przez radiotelefon może być działająca stacja Connect Plus lub „kanał zredukowanej funkcjonalności” (o ile radiotelefon obsługuje funkcję Automatycznego redukowania funkcjonalności). Kanał zredukowanej funkcjonalności to przemiennik będący zwykle częścią działającej stacji Connect Plus, który nie może aktualnie połączyć się ze swoim kontrolerem stacji lub siecią Connect Plus. W trybie zredukowanej funkcjonalności przemiennik działa jako pojedynczy przemiennik cyfrowy. W trybie automatycznego redukowania funkcjonalności są obsługiwane tylko niealarmowe połączenia grupowe. W trybie zredukowanej funkcjonalności nie są obsługiwane żadne inne rodzaje połączeń.

## Oznaki wskazujące na użycie trybu Automatyczne redukowanie funkcjonalności

Jeśli radiotelefon korzysta z Kanału awaryjnego, usłyszysz przerywany sygnał – raz na około 15 sekund (nie licząc samej transmisji). Na ekranie co pewien czas będzie pojawiać się komunikat: „Kanał awaryjny”. Radiotelefon umożliwia korzystanie z przycisku PTT tylko w wybranym kontakcie grupy (Połączeniu grupowym, Połączeniu wielogrupy albo Połączeniu zbiorczym stacji). Urządzenie nie umożliwi nawiązywania innych typów połączeń.

## Nawiązywanie/odbieranie połączeń w trybie zredukowanej funkcjonalności

### UWAGA:

Połączenia są dostępne tylko w radiotelefonach monitorujących ten sam kanał zredukowanej funkcjonalności i wybranych do tej samej grupy. Połączenia nie są przekazywane do innych stacji ani przemienników.

W trybie rezerwy awaryjnej nie są dostępne alarmowe połączenia głosowe ani alerty alarmowe. Jeśli w trybie rezerwy awaryjnej zostanie naciśnięty przycisk awaryjny, radiotelefon wyemituje sygnał naciśnięcia nieprawidłowego klawisza. W radiotelefonach z wyświetlaczem pojawi się również komunikat „Funkcja niedostępna”.

W trybie usuwania awarii nie są dostępne połączenia prywatne (radiotelefon-radiotelefon) ani telefoniczne. Przy próbie połączenia kontaktu prywatnego zostanie wyemitowany sygnał odmowy. Na tym etapie należy wybrać żądany kontakt grupy. Inne nieobsługiwane połączenia to monitor zdalny, alert połączenia, kontrola radiotelefonu, włączenie radiotelefonu, wyłączenie radiotelefonu, wiadomość tekstowa, aktualizacja lokalizacji oraz połączenia transmisji danych pakietowych.

W trybie Automatyczne redukowanie funkcjonalności nie jest obsługiwany dostęp ETCA (Enhanced Traffic Channel Access). Jeśli dwóch lub więcej użytkowników naciśnie przycisk **PTT** równocześnie (lub prawie w tym samym czasie), może się zdarzyć, że oba radiotelefony będą nadawać aż do zwolnienia przycisku **PTT**. W takim przypadku może się zdarzyć, że żadna z transmisji nie zostanie prawidłowo odczytana na radiotelefonach odbierających.

Nawiązywanie połączeń w trybie zredukowanej funkcjonalności odbywa się podobnie, jak w normalnym trybie. Po prostu wybierz kontakt grupy, z którego chcesz skorzystać (stosując zwykłą metodę wyboru kanałów radiotelefonu), a następnie naciśnij przycisk **PTT**, aby rozpocząć rozmowę. Może się zdarzyć, że kanał jest już używany przez inną grupę. Jeśli kanał jest używany, pojawi się sygnał zajętości i zostanie wyświetlony komunikat „Kanał zajęty”. Kontakty, które można wybrać, stosując normalną metodę wyboru kanałów radiotelefonu, to połączenie grupowe, połączenie z wieloma grupami oraz połączenie zbiorcze stacji. Gdy radiotelefon działa na kanale zredukowanej funkcjonalności, połączenie z wieloma grupami jest obsługiwane tak, jak z połączenie innymi grupami. Sygnał wyboru do tej samej wielogrupy

będzie słyszalny tylko na aktualnie wybranych radiotelefonach.

## Powrót do normalnego trybu pracy

Jeśli użytkownik znajduje się w zasięgu przemiennika trybu zredukowanej funkcjonalności, a stacja powróci do normalnego trybu trunkingu, tryb Automatyczne redukowanie funkcjonalności w radiotelefonie zostanie wyłączony. Rozlegnie się sygnał rejestracji, kiedy radiotelefon dokona poprawnej rejestracji. Jeśli masz przekonanie, że znajdujesz się w zasięgu działającej stacji (która nie pracuje w trybie zredukowanej funkcjonalności), możesz nacisnąć przycisk Żądanie roamingu (o ile została zaprogramowany w radiotelefonie), aby wymusić wyszukanie dostępnej stacji i rejestrację w niej. Jeśli żadna inna stacja nie jest dostępna, po zakończeniu wyszukiwania radiotelefon powróci do trybu Automatyczne redukowanie funkcjonalności. W przypadku znalezienia się poza zasięgiem przemiennika działającego w trybie rezerwy awaryjnej radiotelefon przejdzie do trybu wyszukiwania (zostanie wyświetlony komunikat *Wyszukiwanie*).

## Kontrola radiotelefonu

Jeżeli ta funkcja jest włączona, można ustalić, czy inny radiotelefon w systemie jest aktywny, bez zakłócania bieżącej komunikacji użytkownika danego radiotelefonu. Żadne dźwiękowe lub wizualne powiadomienie nie jest przesyłane do radiotelefonu docelowego.

Ta funkcja jest dostępna tylko dla aliasów lub identyfikatorów abonentów.

## Wysyłanie sygnału kontroli radiotelefonu

### 1 Dostęp do funkcji kontroli radiotelefonu

Obsługa radiotelefonu	Kroki
Zaprogramowany przycisk kontroli radiotelefonu	a Naciśnij zaprogramowany przycisk <b>Spr. radia</b> .

Obsługa radiotelefonu	Kroki
	<p><b>b</b> Naciśnij przycisk  lub , aby przejść do wymaganego aliasu lub identyfikatora abonenta i naciśnij przycisk , aby wybrać.</p>
<b>Menu</b>	<p><b>a</b> Naciśnij przycisk , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub , aby przejść do pozycji Kontak ty i wybierz naciśnij przycisk , aby wybrać.</p>

Obsługa radiotelefonu	Kroki
	<p><b>c</b> Naciśnij przycisk  lub , aby przejść do wymaganego aliasu lub identyfikatora abonenta i naciśnij przycisk , aby wybrać.</p> <p><b>d</b> Naciśnij przycisk  lub , aby przejść do pozycji Kontrola radiotelefonu i naciśnij naciśnij przycisk , aby wybrać.</p>

Na wyświetlaczu pojawi się Alias docelowy, informując że polecenie jest w trakcie realizacji. Dioda LED świeci na zielono.

## 2 Zaczekaj na potwierdzenie.

Jeśli w systemie jest aktywny radiotelefon docelowy, zostanie wyemitowany sygnał i wyświetlony komunikat **Sprawdz. rtf. dostępny**.

Jeśli w systemie nie ma aktywnego radiotelefonu docelowego, zostanie wyemitowany sygnał i wyświetlony komunikat **Sprawdz. rtf. niedostępny**.

Radiotelefon ponownie wyświetla ekran identyfikatora abonenta po zainicjowaniu z poziomu menu.

Radiotelefon ponownie wyświetla ekran główny po zainicjowaniu za pomocą przycisku programowalnego.

## Zdalny nasłuch

Korzystając z funkcji zdalnego nasłuchu, można włączyć mikrofon radiotelefonu docelowego (tylko aliasy lub identyfikatory abonentów). Zielona dioda LED zaświeci się raz u docelowego abonenta. Korzystając z tej funkcji, można zdalnie monitorować obszar w pobliżu radiotelefonu docelowego.

[Wyślij informację zwrotną](#)

Aby korzystanie z tej funkcji było możliwe, radiotelefon musi być odpowiednio zaprogramowany.

## Inicjowanie monitora zdalnego

### UWAGA:

Monitor zdalny kończy się automatycznie po upływie zaprogramowanego czasu lub kiedy wykonano próbę zainicjowania transmisji, zmiany kanału lub wyłączenia radiotelefonu.

### 1 Dostęp do funkcji monitora zdalnego.

Obsługa radiotelefonu	Kroki
<b>Zaprogramowany przycisk Zdalny nasłuch</b>	<p><b>a</b> Naciśnij zaprogramowany przycisk <b>Zdalny nasłuch</b>.</p> <p><b>b</b> Naciśnij przycisk  lub , aby przejść do wymaganego aliasu</p>

Obsługa radiotelefonu	Kroki
	<p>lub identyfikatora abonenta i naciśnij przycisk , aby wybrać.</p>
<b>Menu</b>	<p><b>a</b> Naciśnij przycisk , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub , aby przejść do pozycji <b>Kontak ty</b> i wybierz naciśnij przycisk , aby wybrać.</p> <p><b>c</b> Naciśnij przycisk  lub , aby przejść do wymaganego aliasu</p>

Obsługa radiotelefonu	Kroki
	<p>lub identyfikatora abonenta i naciśnij przycisk , aby wybrać.</p> <p><b>d</b> Naciśnij przycisk  lub , aby przejść do menu <b>Wyb ręcz i</b> wybierz naciśnij przycisk , aby wybrać.</p> <p><b>e</b> Naciśnij  lub , aby przejść do <b>Nasłuchu zdalnego i</b> naciśnij przycisk , aby wybrać.</p>

W pierwszym wierszu pojawi się komunikat **Zda1. Monitor**. W drugim wierszu pojawi się **Alias**

docelowy, informujący o rozpoczęciu realizacji polecenia. Dioda LED miga na zielono.

## 2 Zaczekaj na potwierdzenie.

W przypadku powodzenia zabrmi dźwięk potwierdzenia, a na ekranie pojawi się komunikat **Zdalny nasłuch zakończony powodzeniem**. Radiotelefon rozpocznie odtwarzanie dźwięku z monitorowanego urządzenia przez zadany okres czasu. Na ekranie pojawi się symbol **Zdal. nasłuch** oraz alias docelowy. Gdy minie czas, urządzenie wyemituje dźwięk alertu, a dioda zostanie wyłączona.

Jeżeli operacja zakończy się niepowodzeniem, radio wyemituje dźwięk odmowy i wyświetli komunikat **Zdalny nasłuch nieudany**.

## Skanowanie

Ta funkcja umożliwi radiotelefonowi monitorowanie i dołączanie do połączeń z grupami zdefiniowanymi w zaprogramowanej liście skanowania. Po włączeniu skanowania na pasku stanu pojawia się ikona skanowania, a dioda LED miga na żółto w trybie bezczynności.

[Wyślij informację zwrotną](#)

## Rozpoczynanie i kończenie skanowania

### UWAGA:

Ta procedura włącza lub wyłącza funkcję skanowania dla wszystkich stref Connect Plus o tym samym identyfikatorze sieci, co aktualnie wybrana strefa. Należy pamiętać, że nawet w przypadku włączenia funkcji skanowania przy użyciu tej procedury, skanowanie może nadal być wyłączone dla niektórych (lub wszystkich) grup na liście skanowania. Dodatkowe informacje: [Edytowanie listy skanowania na str. 284](#).

Możesz rozpoczynać i zatrzymywać wyszukiwanie, wciskając zaprogramowany przycisk **skanowania**. Służy do tego **RÓWNIEŻ** następująca procedura.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..
- 2 Naciśnij przycisk  lub  , aby Skanować i naciśnij przycisk  , aby wybrać.

- 3 Naciśnij przycisk  lub , aby włączyć lub wyłączyć funkcję i naciśnij przycisk , aby wybrać.
- Jeśli skanowanie jest włączone, na ekranie pojawi się komunikat Skanowanie wł.
  - Jeśli skanowanie jest włączone, w menu skanowania wyświetli się komunikat Wyłącz.
  - Wyświetlacz pokazuje Scan Off (Skanowanie wyłącz.), kiedy funkcja skanowania zostaje dezaktywowana.
  - Jeśli skanowanie jest wyłączone, w menu skanowania wyświetli się komunikat Włącz.

## Odbieranie połączeń podczas skanowania

Skanowanie jest przerywane tylko w grupie, w której wykryto aktywność. W trybie bezczynności radiotelefon

nasłuchuje w trybie ciągłym na kanale sterującym aktywności członków listy skanowania.

- 1 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.
- 2 Naciśnij przycisk **PTT** w podczasy wstrzymania. Dioda LED świeci na zielono.
- 3 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.
- 4 Aby słuchać, zwolnij przycisk **PTT**. Jeżeli użytkownik nie odpowie na połączenie podczas wstrzymania, radiotelefon kontynuuje skanowanie innych grup.

## Skanowanie konfigurowane przez użytkownika

Jeśli menu Edytuj listę jest włączone, użytkownik może dodawać lub usuwać członków skanowania z menu Dodaj członka. Członek listy skanowania musi być regularnym

kontaktem grupowym (np. nie wielogrupy czy połączenia zbiorczego stacji/połączenia zbiorczego w całej sieci), który jest aktualnie przypisany do pozycji pokrętła kanału w obszarze Connect Plus o tym samym identyfikatorze sieci, co aktualnie wybrana strefa. Alias grupy rozmówców nie może być taki sam, co grupa rozmówców, która jest już zawarta w liście skanowania bieżącej strefy.

Skanowanie można włączyć i wyłączyć w menu lub naciskając zaprogramowany przycisk **Skanowanie wł./wył.**

Funkcja ta działa tylko w radiotelefonie, który nie jest aktualnie używany do żadnego połączenia. Jeśli obecnie trwa nasłuch połączenia, radiotelefon nie może wyszukać innych połączeń grupy i dlatego nie ma on żadnych informacji o ich statusie. Po zakończeniu połączenia radiotelefon powróci do gniazda czasowego kanału sterującego i będzie można wyszukać grupy, które znajdują się na liście skanowania.

## Włączanie/wyłączanie skanowania

### UWAGA:

Ta procedura pozwala włączyć lub wyłączyć wyszukiwanie obszarów o tym samym identyfikatorze sieci, co aktualnie wybrana. Należy pamiętać, że nawet w przypadku włączenia funkcji skanowania przy użyciu tej procedury, skanowanie może nadal być wyłączone dla niektórych (lub wszystkich) grup na liście skanowania. Więcej informacji na ten temat znajduje się w następnej sekcji.

Jeśli funkcja skanowania jest włączona, na wyświetlaczu pojawi się ikona skanowania. Jeśli włączono funkcję skanowania, a użytkownik nie uczestniczy w żadnym połączeniu, dioda LED miga na zielono i żółto.

Procedura włączania lub wyłączania funkcji skanowania zależy od zaprogramowanych ustawień radiotelefonu. Jeśli w radiotelefonie zaprogramowano przycisk **Wł/Wył** skan, przy jego użyciu można włączać i wyłączać tę funkcję. Jeżeli w radiotelefonie zaprogramowano przełączenie

funkcji skanowania z poziomu menu, zastosuj się do następującej procedury.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

  - 2 Naciśnij przycisk  lub , aby Skanować i naciśnij przycisk , aby wybrać.

---

  - 3 Naciśnij przycisk  lub , aby Wł. lub Wył. funkcję i naciśnij przycisk , aby wybrać.
    - Na ekranie pojawi się komunikat Skanowanie wł..
    - Na ekranie pojawi się komunikat Skanowanie wył..
- 

## Edytowanie listy skanowania

### UWAGA:

Jeśli pozycja na liście skanowania jest aktualnie wybraną grupą, nasłuchiwanie aktywności w tej grupie będzie prowadzone w radiotelefonie bez względu na to, czy obok pozycji na liście znajduje się symbol zaznaczenia. Jeśli radiotelefon nie bierze udziału w połączeniu, to nasłuchuje aktywności w wybranej grupie lub wielogrupie, w ramach połączenia zbiorczego stacji, a także w domyślnej grupie awaryjnego przywracania (jeśli została skonfigurowana). Tej operacji nie można wyłączyć. Jeśli skanowanie jest włączone, radiotelefon będzie również nasłuchiwał aktywności aktywnych członków listy skanowania strefy.

Na liście skanowania są określone grupy, które można skanować. Lista jest tworzona podczas programowania radiotelefonu. Jeśli radiotelefon zaprogramowano do zezwalania na edycję listy skanowania, można:

- Włączyć/wyłączyć skanowanie poszczególnych grup na liście.
- Dodawać i usuwać członków skanowania w menu Dodaj członka. Patrz [Dodawanie i usuwanie grupy przez menu Dodaj członków na str. 286](#).

**UWAGA:**

Członek listy skanowania musi być regularnym kontaktem grupowym (nie wielogrupy czy połączenia zbiorczego stacji/połączenia zbiorczego w całej sieci), który jest aktualnie przypisany do pozycji pokrętła kanału w obszarze Connect Plus o tym samym identyfikatorze sieci, co aktualnie wybrana strefa.

Alias grupy rozmówców nie może być taki sam, co grupa rozmówców, która jest już zawarta w liście skanowania bieżącej strefy.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do menu Wyśw./Edyt list i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do nazwy wybranej grupy.  
Jeśli grupę poprzedza symbol zaznaczenia, dla danej grupy włączone jest obecnie skanowanie.

Jeśli przed nazwą grupy nie ma symbolu zaznaczenia, skanowanie dla danej grupy jest obecnie wyłączone.

- 4 Naciśnij przycisk , aby wybrać daną grupę.  
Na wyświetlaczu pojawia się pozycja Włącz, jeśli skanowanie jest obecnie wyłączone dla grupy.  
Na wyświetlaczu pojawia się pozycja Wyłącz, jeśli skanowanie jest obecnie włączone dla grupy.

---

- 5 Zaznacz wyświetlaną opcję (Włącz lub Wyłącz), a następnie naciśnij przycisk , aby wybrać.  
Zależnie od wybranej opcji, w ramach potwierdzenia radiotelefon wyświetli komunikat Skanowanie włączone lub Skanowanie wyłączone.

Radiotelefon wyświetli ponownie listę skanowania Strefa. Jeśli skanowanie dla grupy jest włączone, przed nazwą grupy wyświetlany jest symbol zaznaczenia. Jeśli skanowanie dla grupy jest wyłączone, przed nazwą grupy nie jest wyświetlany symbol zaznaczenia.

## Dodawanie i usuwanie grupy przez menu Dodaj członków

Radiotelefon Connect Plus nie pozwala na umieszczanie duplikatów numerów i aliasów grup na liście skanowania strefy (lub „kandydatów skanowania”). Dlatego lista kanałów do skanowania opisana w [krok 6](#) i [krok 7](#) niekiedy zmienia się po dodaniu lub usunięciu grupy z listy skanowania obszaru.

Jeśli radiotelefon został zaprogramowany do zezwalania na edytowanie listy skanowania, można użyć menu Dodaj członków do dodania grupy do listy skanowania wybranej aktualnie strefy lub usunięcia grupy z listy skanowania aktualnie wybranej strefy.

1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub  , aby użyć funkcji skanowania i naciśnij przycisk  , aby wybrać.

3 Naciśnij przycisk  lub  , aby <Dodaj członków> i naciśnij przycisk  , aby wybrać.

Na wyświetlaczu pojawi się komunikat Dodaj członków ze strefy n (n = numer obszaru Connect Plus pierwszej strefy w radiotelefonie o tym samym identyfikatorze sieci, co aktualnie wybrany obszar).

4 Wykonaj jedną z poniższych czynności:

- Jeśli grupa, która ma zostać dodana do listy skanowania, jest przypisana do pozycji pokrętkła wyboru kanałów w tym obszarze, przejdź do czynności [krok 6](#).
- Jeśli grupa, która ma zostać dodana do listy skanowania, jest przypisana do pozycji pokrętkła wyboru kanałów w innym obszarze Connect Plus, przejdź do czynności [krok 5](#).

5 Naciśnij przycisk  lub  , aby przewinąć listę obszarów Connect Plus o tym samym identyfikatorze sieci, co aktualnie wybrany obszar.

- 6 Po odnalezieniu obszaru Connect Plus, w którym odpowiednia grupa jest przypisana do pozycji pokręta wyboru kanałów, naciśnij naciśnij przycisk

 , aby wybrać.

W radiotelefonie zostanie wyświetlona pierwsza pozycja z listy grup przypisanych do pozycji kanału w tym obszarze. Grupy na liście noszą nazwę „kandydatów do skanowania”, ponieważ mogą zostać dodane do listy skanowania aktualnie wybranego obszaru (lub już znajdują się na liście skanowania obszaru).

Jeśli obszar nie zawiera żadnych grup, które można dodać do listy skanowania, wyświetlany jest komunikat Brak kandydatów.

- 7 Naciśnij przycisk  lub  , aby przewinąć listę grup kandydatów.

Jeśli znak plus (+) jest wyświetlany bezpośrednio przed aliasem grupy, wskazuje to, że grupa znajduje się aktualnie na liście skanowania wybranego obszaru.

Jeśli przed aliasem nie jest wyświetlany znak plus (+), grupa nie znajduje się aktualnie na liście skanowania, ale może zostać do niej dodana.

- 8 Naciśnij  po wyświetleniu odpowiedniego aliasu grupy.

Jeśli grupa ta nie znajduje się obecnie na liście skanowania aktualnie wybranego obszaru, wyświetlany jest komunikat Dodaj (alias grupy).

Jeśli grupa ta znajduje się obecnie na liście skanowania aktualnie wybranego obszaru, wyświetlany jest komunikat Usuń (alias grupy).

- 9 Naciśnij  , aby zatwierdzić wyświetlany komunikat (Dodaj lub Usuń).

W przypadku usuwania grupy z listy powodzenie operacji można zweryfikować, ponieważ znak plus (+) nie będzie już wyświetlany bezpośrednio przed aliasem.

W przypadku dodawania grupy do listy powodzenie operacji można zweryfikować, ponieważ znak plus (+) będzie wyświetlany bezpośrednio przed aliasem.

W przypadku próby dodania grupy, gdy lista jest już pełna, wyświetlany jest komunikat *Lista pełna*. W takim przypadku należy usunąć grupę z listy skanowania przed dodaniem nowej grupy.

- 10** Po zakończeniu naciśnij kilkakrotnie , aby powrócić do odpowiedniego menu.

## Opis działania funkcji wyszukiwania

### UWAGA:

Jeżeli radiotelefon dołączy do wywołania dla członków listy wyszukiwania danej strefy i minie czas oczekiwania zanim użytkownikowi uda się odpowiedzieć, musisz przejść do takiej strefy i kanału (na liście wyszukiwania), a następnie rozpocząć nowe wywołanie.

W niektórych sytuacjach można nie zauważyć połączeń z grup, które znajdują się na liście skanowania. Jeśli połączenie nie zostało odebrane z jednego z następujących powodów, nie oznacza to problemu z radiotelefonem. Jest to normalne działanie funkcji skanowania w sieci Connect Plus.

- Funkcja skanowania nie jest włączona (poszukaj ikony skanowania na wyświetlaczu).

- Członka listy skanowania wyłączono przy użyciu menu (patrz rozdział [Edytowanie listy skanowania na str. 284](#)).
- Jest już prowadzona rozmowa.
- W stacji użytkownika nie jest zarejestrowany żaden członek skanowanej grupy (dotyczy tylko systemów z wieloma stacjami).

## Przeszukiwanie trybu Talkback

Jeżeli radiotelefon szuka wywołania z dostępnej listy wyszukiwania, a przycisk **PTT** został wciśnięty, to sposób pracy urządzenia będzie uzależniony od tego czy przeszukiwanie funkcji Talkback zostało w nim zaprogramowane. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

### Przeszukiwanie trybu Talkback wyłączone

Radiotelefon pomija znalezione wywołanie i próbuje nadawać dalej na wybranym kanale. Gdy minie czas wstrzymania połączenia dla wybranego kontaktu, urządzenie powróci do kanału macierzystego i rozpocznie odliczanie czasu wstrzymania wyszukiwania. Gdy czas minie, radiotelefon wznowi wyszukiwanie grupy.

### Przeszukiwanie trybu Talkback włączone

Jeżeli przycisk **PTT** został naciśnięty podczas odliczania czasu wstrzymania połączenia grupowego, radiotelefon będzie próbował nadawać na kanale znalezionej grupy.

#### UWAGA:

Jeśli urządzenie znajdzie połączenie dla danej grupy, które nie zostało przydzielone do pozycji kanału w wybranej strefie, a ponadto minie jego czas wstrzymania, należy przełączyć się na właściwą strefę i wybrać pozycję kanału takiej grupy.

## Edytowanie priorytetu dla grupy rozmówców

Funkcja monitorowania priorytetu pozwala automatycznie odbierać połączenie od grupy rozmówców o wyższym priorytecie w trakcie trwania innego połączenia. Gdy radiotelefon przełączy się na połączenie o wyższym priorytecie, zostanie wyemitowany sygnał dźwiękowy. Istnieją dwa poziomy priorytetu dla grup rozmówców: P1 i P2. P1 ma wyższy priorytet niż P2.

#### UWAGA:

Jeśli domyślny ID grupy zwrotnego kanału alarmowego jest skonfigurowany w oprogramowaniu MOTOTRBO Connect Plus Option Board CPS, istnieją trzy poziomy priorytetu dla grup rozmówców: P0, P1 i P2. P0 jest stałym, najwyższym priorytetem dla ID domyślnej grupy przywracania awaryjnego. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij przycisk  lub , aby przejść do skanowania i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do menu Wyśw./Edyt list i naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do wybranej grupy konwersacyjnej i naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby wybrać opcję Edyt. prioryt., a następnie naciśnij przycisk , aby wybrać.

6 Naciśnij przycisk  lub , aby wybrać poziom priorytetu i naciśnij przycisk , aby wybrać.

Wyświetlacz pokazuje miniinformację o udanej operacji, a następnie powraca do poprzedniego ekranu. Po lewej stronie grupy rozmówców pojawi się ikona priorytetu.

## Ustawienia kontaktów

### UWAGA:

Można dodawać lub edytować ID abonentów dla Kontaktów Connect Plus. Usunięcie ID abonenta może być wykonane jedynie przez sprzedawcę. Jeżeli funkcja prywatności jest włączona na kanale, można inicjować prywatne połączenie głosowe na tym kanale. Transmisję będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności lub z taką samą wartością i ID klucza jak w radiotelefonie.

Dostęp do listy kontaktów zależy od konfiguracji strefy:

- Jeśli w radiotelefonie jest skonfigurowana tylko jedna strefa, lista kontaktów wyświetla bezpośrednio listę z aktualnie wybranej strefy.
- Jeśli w radiotelefonie jest skonfigurowanych wiele stref, folder kontaktów strefy wyświetla wszystkie strefy z takim samym ID sieci jak aktualnie wybrana strefy. Użytkownik może uzyskać dostęp do kontaktów w tych strefach.

Opcja Kontakty to funkcja książki adresowej w radiotelefonie. Każdy wpis odpowiada aliasowi lub identyfikatorowi używanemu do inicjowania połączenia.

Każda strefa pozwala korzystać z Listy kontaktów zawierającej do 100 osób. Dostępne są następujące typy kontaktów:

- Połączenie indywidualne
- Połączenie grupowe
- Połączenie wielogrupy
- Wszystkie połączenia głosowe stacji
- Wszystkie połączenia tekstowe stacji
- Połączenie dyspozytorskie

Kontakt typu Połączenie dyspozytorskie służy do wysyłania wiadomości tekstowej do komputera-dyspozytora za pośrednictwem serwera wiadomości tekstowych innej firmy.

## Inicjowanie połączenia prywatnego przy użyciu listy kontaktów

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..
- 

- 2 Naciśnij przycisk  lub  , aby przejść do pozycji **Kontak ty** i wybierz naciśnij przycisk  , aby wybrać.  
Wpisy są porządkowane w kolejności alfabetycznej.
- 

- 3 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.
- 

- 4 Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Dioda LED świeci na zielono.
- 

- 5 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.
- 

- 6 Aby słuchać, zwolnij przycisk **PTT**.

Po uzyskaniu odpowiedzi od radiotelefonu docelowego zielony wskaźnik miga, a na wyświetlaczu widoczny jest alias lub identyfikator użytkownika radiotelefonu transmitującego.

W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone.

Usłyszysz krótki sygnał dźwiękowy. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

---

## Wykonywanie połączenia przy użyciu wyszukiwania aliasów

Można również użyć funkcji wyszukiwania aliasu lub wyszukiwania alfanumerycznego do pobrania wymaganego aliasu abonenta.

Ta funkcja jest dostępna tylko po wyświetleniu listy kontaktów.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..
  - 2 Naciśnij przycisk  lub  , aby przejść do pozycji **Kontak ty** i wybierz naciśnij przycisk  , aby wybrać.  
Wpisy są porządkowane w kolejności alfabetycznej.
- 

- 3 Wpisz pierwszy znak wymaganego aliasu, a następnie naciśnij przycisk  lub  , aby go zlokalizować.
  - 4 Trzymaj mikrofon w odległości od 2,5 do 5 cm od ust.
  - 5 Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Dioda LED świeci na zielono. Wyświetlacz pokazuje alias docelowego radiotelefonu.
  - 6 Zaczekaj na zakończenie sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.
  - 7 Aby słuchać, zwolnij przycisk **PTT**.  
Gdy radiotelefon odbiorcy odpowie, zielona dioda LED zacznie migać.  
W razie braku aktywności głosowej przez zdefiniowany okres połączenie zostanie zakończone.  
Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.
-

## Dodawanie nowego kontaktu

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do pozycji **Kontak ty** i wybierz naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby wybrać menu **Nowy kontakt** i naciśnij przycisk , aby wybrać.

---

- 4 Wpisz numer kontaktu za pomocą klawiatury, a następnie potwierdź, wybierając opcję .

---

- 5 Wpisz nazwę kontaktu za pomocą klawiatury, a następnie potwierdź, wybierając opcję .

- 6 Jeżeli dodasz kontakt radiotelefonu, przycisk  lub  pozwala wybrać typ dzwonka i naciśnij przycisk , aby wybrać.  
Usłyszysz dźwięk informacyjny, a na ekranie pojawi się komunikat **Kontakt zapisany**.

## Ustawienia wskaźnika połączenia

Ta funkcja umożliwia użytkownikom konfigurowanie dźwięków połączeń lub wiadomości tekstowych.

## Włączanie lub wyłączanie dzwonków połączenia dla alertów połączeń

Można wybrać lub włączyć bądź wyłączyć dzwonki dla odbieranych alertów połączeń.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby ustawić  
Narzędzia i naciśnij przycisk , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do  
pozycji Ustawienia radiotelefonu i naciśnij  
naciśnij przycisk , aby wybrać.

4 Naciśnij przycisk  lub , aby przejść do  
pozycji Sygnały/Alertry i naciśnij naciśnij przycisk  
, aby wybrać.

5 Naciśnij przycisk  lub , aby przejść do  
pozycji Dzwonki i naciśnij naciśnij przycisk ,  
aby wybrać.

6 Naciśnij przycisk  lub , aby przejść do  
pozycji Alert połączenia i naciśnij naciśnij  
przycisk , aby wybrać.

Bieżący sygnał jest oznaczony za pomocą symbolu  
.

7 Naciśnij przycisk  lub , aby przejść do  
wybranego sygnału i naciśnij naciśnij przycisk ,  
aby wybrać.

Obok wybranego sygnału pojawi się symbol .

## Włączanie i wyłączanie dzwonek połączeń prywatnych

Można włączyć lub wyłączyć dzwonki dla odbieranego  
połączenia prywatnego.

1 Naciśnij przycisk , aby uzyskać dostęp do  
menu..

2 Naciśnij przycisk  lub , aby ustawić  
Narzędzia i naciśnij przycisk , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby ustawić Sygnały dźwiękowe/Alerty i naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby przejść do pozycji Dzwonki i naciśnij przycisk , aby wybrać.

---

6 Naciśnij przycisk  lub , aby przejść do opcji Wyw. prywat., i wybierz pozycję naciśnij przycisk , aby wybrać.

---

7 Naciśnij przycisk , aby włączyć dźwięki połączeń prywatnych.

Jeżeli dźwięki połączeń prywatnych zostaną włączone, na ekranie pojawi się oznaczenie  obok napisu WŁ.

Oznaczenie  nie będzie wyświetlane, jeśli wyłączono dźwięki połączeń prywatnych.

---

## Włączanie i wyłączanie dzwonków wiadomości tekstowych

Można włączyć lub wyłączyć dzwonki dla przychodzących Wiadomości tekstowych.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.
- 
- 4 Naciśnij przycisk  lub  aby ustawić Sygnały dźwiękowe/Alerty i naciśnij przycisk , aby wybrać.
- 
- 5 Naciśnij przycisk  lub , aby przejść do pozycji Dzwonki i naciśnij przycisk , aby wybrać.
- 
- 6 Naciśnij przycisk  lub , aby przejść do opcji Wiadomość tekstowa, a następnie naciśnij przycisk , aby wybrać.  
Bieżący sygnał jest oznaczony za pomocą symbolu .
- 

- 7 Naciśnij przycisk  lub , aby przejść do wybranego sygnału i naciśnij przycisk , aby wybrać.  
Obok wybranego sygnału pojawi się symbol .
- 

## Wybierz Typ dzwonka alertu

### UWAGA:

Programowalny przycisk **Typ dzwonka alertu** jest przypisany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Możesz ustawić połączenia radiowe tak, aby korzystały z ustalonego typu połączenia i wibracji. Jeżeli wszystkie dźwięki są wyłączone, urządzenie wyświetli ikonę wyciszenia. Jeżeli wszystkie dźwięki są włączone, na ekranie pojawi się właściwy typ alarmu dla dzwonka.

Radiotelefon użyje jednokrotnej wibracji, jeżeli wybrano taki typ dzwonka. Radiotelefon użyje wielokrotnej wibracji, jeżeli wybrano taki typ dzwonka. Jeżeli wybierzesz opcję dzwonka i wibracji, urządzenie odtworzy odpowiedni dźwięk dla transmisji przychodzących (na przykład alertu

połączenia lub wiadomości). Będzie to dźwięk zatwierdzenia lub nieodebranego połączenia.

## Zwiększanie głośności dźwięku alarmu

Radiotelefon można zaprogramować, aby generował ciągły alarm, jeżeli połączenie nie zostanie odbierane. W tym przypadku poziom głośności dźwięku alarmu jest zwiększany automatycznie w miarę upływu czasu. Ta funkcja jest określana jako „alarm narastający”.

## Funkcje rejestru połączeń

Radiotelefon rejestruje wszystkie ostatnie wychodzące, odebrane i nieodebrane połączenia prywatne. Korzystając z rejestru połączeń, można przeglądać ostatnie połączenia i zarządzać nimi.

Na każdej liście połączeń można wykonać następujące zadania:

- Usun
- Zobacz szczegóły

## Przeglądanie ostatnich połączeń

Dostępne są następujące listy: Nieodebrane, Odebrane i Wychodzące.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby przejść do pozycji Rejestr połączeń i naciśnij naciśnij przycisk , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do preferowanej listy, a następnie naciśnij przycisk , aby wybrać.

Na wyświetlaczu pojawią się zarejestrowane wpisy, począwszy od najnowszego.

4 Naciśnij  lub , aby przeglądać listę.

Naciśnij przycisk **PTT**, aby rozpocząć połączenie prywatne przy użyciu aktualnie wybranego aliasu lub identyfikatora.

---

## Usuwanie połączenia z listy połączeń

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

  - 2 Naciśnij przycisk  lub , aby przejść do pozycji **Rejestr połączeń** i naciśnij naciśnij przycisk , aby wybrać.

---

  - 3 Naciśnij przycisk  lub , aby przejść do żądanej listy i wybierz naciśnij przycisk , aby wybrać.  
  
Jeżeli wybrana lista nie zawiera żadnych wpisów, na ekranie pojawi się komunikat **Lista pusta**. Usłyszysz niski ton, o ile dźwięki klawiatury są włączone.
- 

- 4 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID, a następnie naciśnij przycisk , aby wybrać.
- 

- 5 Naciśnij przycisk  lub , aby **Usunąć** i wybierz naciśnij przycisk , aby wybrać.
- 

- 6 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby wybrać opcję **Tak** i usunąć wpis. Na wyświetlaczu pojawi się komunikat **Poz. Usun.**
  - Za pomocą przycisku  lub  wybierz opcję **Nie** i naciśnij przycisk naciśnij przycisk , aby powrócić do poprzedniego ekranu.
-

## Wyświetlanie szczegółowych informacji z Listy połączeń

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby przejść do pozycji Rejestr połączeń i naciśnij naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub  , aby przejść do żądanej listy i wybierz naciśnij przycisk  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID, a następnie naciśnij przycisk  , aby wybrać.

---

- 5 Naciśnij przycisk  lub  , aby ustawić Wyświetl szczegóły i naciśnij przycisk  , aby wybrać.  
Wyświetlacz pokazuje szczegółowe informacje na temat listy połączeń.
- 

## Alert połączenia

Korzystając z funkcji wysyłania alertu połączenia na pager, można poinformować użytkownika określonego radiotelefonu o konieczności zainicjowania połączenia zwrotnego, kiedy będzie to możliwe.

Ta funkcja jest dostępna z poziomu menu poprzez Kontakty, ręczne wybieranie lub zaprogramowany przycisk **szybkiego połączenia**.

## Reagowanie na alerty połączenia

Postępuj zgodnie z procedurą, aby odpowiadać na alerty połączenia.

Po otrzymaniu alertu połączenia:

- Zostanie wyemitowany powtarzany sygnał dźwiękowy.

- Żółta dioda LED miga.
- Na wyświetlaczu pojawi się lista powiadomień z alertami połączeń oraz aliasem lub ID radiotelefonu rozmówcy.

W zależności od sposobu konfiguracji urządzenia przez sprzedawcę lub administratora systemu, można odpowiedzieć na alert połączenia wykonując jedną z następujących czynności:

- Naciśnij przycisk **PTT** i odbierz połączenie indywidualne bezpośrednio.
- Naciśnij przycisk **PTT**, aby kontynuować normalną komunikację z grupą rozmówców. Alert połączenia jest przenoszony do nieodebranych połączeń w rejestrze połączeń. Możesz odpowiedzieć rozmówcy z rejestru nieodebranych połączeń.

Patrz [Lista powiadomień na str. 211](#) i [Funkcje rejestru połączeń na str. 143](#), aby uzyskać więcej informacji.

## Wysyłanie alertu połączenia z Listy kontaktów

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do pozycji **Kontakty** i wybierz naciśnij przycisk , aby wybrać.

---

- 3 Aby wybrać alias lub identyfikator abonenta, wykonaj jedną z poniższych czynności:
  - wybierz bezpośrednio alias abonenta;
  - Naciśnij  lub , aby przejść do wymaganego aliasu abonenta i naciśnij przycisk , aby wybrać.
  - Skorzystaj z menu **Wyb ręcz**
    - Naciśnij przycisk  lub , aby przejść do menu **Wyb ręcz** i wybierz naciśnij przycisk , aby wybrać.

- Wyświetli się ekran wprowadzania tekstu wybierania ręcznego. Wpisz identyfikator abonenta i naciśnij przycisk  .

4 Naciśnij przycisk  lub  , aby przejść do pozycji Alert połączenia i naciśnij przycisk  , aby wybrać.

Na wyświetlaczu zobaczysz komunikat Alert połączenia: Na wyświetlaczu pojawi się komunikat <ID lub alias użytkownika>Alert połączenia i ID lub alias użytkownika, co oznacza, że alert połączenia został wysłany.

Dioda LED zaświeci się na zielono, gdy radiotelefon wysła alert połączenia.

Jeżeli potwierdzenie alertu połączenia zostanie odebrane, na ekranie pojawi się komunikat Syg. wywoł. przekazany.

W przeciwnym wypadku pojawi się komunikat Syg. wywoł. nieprzekazany.

## Wysyłanie alertu połączenia przy pomocy przycisku Szybkiego połączenia

Naciśnij programowalny **przycisk szybkiego połączenia**, aby utworzyć alert połączenia ze zdefiniowanym aliasem.

Na wyświetlaczu pojawi się komunikat Syg. wyw. i alias lub ID abonenta, co oznacza, że alert połączenia został wysłany. Dioda LED zaświeci się na zielono, gdy radiotelefon wysła alert połączenia.

Po odebraniu powiadomienia o połączeniu na ekranie pojawi się komunikat Syg. wywoł. przekazany.

Jeżeli powiadomienie o połączeniu nie zostanie odebrane, na ekranie pojawi się komunikat Syg. wywoł. nieprzekazany.

## Tryb wyciszony

Tryb wyciszenia zapewnia opcję wyciszenia wszystkich powiadomień dźwiękowych radiotelefonu.

Po zainicjowaniu trybu wyciszenia wszystkie powiadomienia dźwiękowe, za wyjątkiem funkcji o wysokim priorytecie, takich jak operacje awaryjne, zostaną wyciszone.

Po wyłączeniu trybu wyciszenia radiotelefon będzie ponownie emitować sygnały i transmisje dźwiękowe.

#### **UWAGA:**

Jest to dodatkowa (płatna) funkcja. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie trybu wyciszenia

Postępuj zgodnie z procedurą, aby włączyć Tryb wyciszenia.

Dostęp do tej funkcji jest możliwy za pomocą zaprogramowanego przycisku **Tryb wyciszenia**.

Po włączeniu trybu wyciszenia:

- Rozlega się potwierdzający sygnał dźwiękowy.
- Wyświetlacz pokazuje Tryb wyciszenia wł.

- Czerwona dioda LED zacznie migać i będzie kontynuować miganie do momentu opuszczenia Trybu wyciszenia.
- Na wyświetlaczu na ekranie głównym pojawi się ikona **Tryb wyciszenia**.
- Radiotelefon jest wyciszony.
- Timer trybu wyciszenia rozpoczyna odliczanie skonfigurowanego czasu.

## Ustawianie timera trybu wyciszenia

Funkcję trybu wyciszenia można włączyć na określony wstępnie okres czasu, ustawiając timer trybu wyciszenia. Czas trwania timera jest konfigurowany w menu radiotelefonu i może mieścić się w zakresie od 0,5–6 godzin. Urządzenie wychodzi z trybu wyciszenia po upływie czasu timera.

Jeśli timer zostanie ustawiony na wartość 0, radiotelefon pozostanie w trybie wyciszenia przez niezdefiniowany okres czasu do momentu naciśnięcia zaprogramowanego przycisku **Tryb wyciszenia**.

1

Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby Wyciszyć timer. Naciśnij , aby wybrać.

5 Naciśnij przycisk  lub , aby edytować wartość numeryczną każdej cyfry i naciśnij .

## Wyjście z Trybu wyciszenia

Ta funkcja może zostać opuszczona automatycznie, po tym jak upłynie czas trybu wyciszenia.

Wykonaj jedną z poniższych czynności, aby wyjść z trybu wyciszenia ręcznie:

- Naciśnij zaprogramowany przycisk **Tryb wyciszenia**.
- Naciśnij przycisk **PTT** przy dowolnej pozycji.

Po wyłączeniu Trybu wyciszenia:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Wyświetlacz pokazuje Tryb wyciszenia wył.
- Czerwona migająca dioda LED gaśnie.
- Ikona **trybu wyciszenia** znika z ekranu głównego.
- Wyciszenie radiotelefonu zostanie wyłączone, a stan głośnika przywrócony.
- Jeśli timer trybu wyciszenia nie wygaś, zostanie zatrzymany.

### UWAGA:

Tryb wyciszenia zostanie również wyłączony, jeśli użytkownik rozpocznie transmisję głosową lub przełączy się na niezaprogramowany kanał.

## Tryb awaryjny

### UWAGA:

Jeśli radiotelefon został zaprogramowany tak, aby uruchamiać Tryb cichy (również z obsługą głosu), to w większości przypadków taki tryb zostanie wyłączony po zakończeniu połączenia alarmowego lub odtworzeniu alertu alarmowego. Wyjątek od tej reguły polega na ustawieniu trybu awaryjnego jako alertu alarmowego oraz typu trybu alarmowego jako cichy. Jeśli radiotelefon został tak zaprogramowany, Tryb cichy będzie aktywny dopóki nie wciśniesz przycisku **PTT** lub przycisku, który został skonfigurowany do wyłączania trybu awaryjnego.

Awaryjne połączenia głosowe i alerty alarmowe nie są obsługiwane podczas pracy w trybie automatycznego usuwania awarii Connect Plus. Informacje dodatkowe: [Automatyczne usuwanie awarii na str. 275](#).

Alert alarmowy służy do sygnalizowania sytuacji krytycznych. Tryb awaryjny można zainicjować w dowolnym momencie na dowolnym ekranie, nawet jeśli bieżący kanał jest używany. Naciśnięcie przycisku **alarmowego** spowoduje zainicjowanie zaprogramowanego trybu awaryjnego. Zaprogramowany tryb awaryjny można również zainicjować, włączając opcjonalną funkcję

ręcznego wyłączania. Można wyłączyć tryb awaryjny w radiotelefonie.

Sprzedawca może ustawić czas naciskania programowanego przycisku **alarmowego** (z wyjątkiem dłuższego naciśnięcia), podobnie jak w przypadku wszystkich innych przycisków:

### Krótkie naciśnięcie

Od 0,05 s do 0,75 s.

### Naciśnij i przytrzymaj przycisk

Od 1,00 s do 3,75 s.

Przycisk **Alarmowy** jest przypisany funkcji włączania/wyłączania alarmu. Należy sprawdzić u sprzedawcy, jaki jest przypisany czas działania przycisku **alarmowego**.

- Jeżeli krótkie naciśnięcie przycisku **alarmowego** włącza Tryb alarmowy, to **jego** przytrzymanie spowoduje wyłączenie tego trybu.
- Jeżeli przytrzymanie przycisku **alarmowego** włącza Tryb alarmowy, to **jego** krótkie naciśnięcie spowoduje wyłączenie tego trybu.

Po przełączeniu radiotelefonu do strefy Connect Plus będzie on obsługiwać trzy tryby awaryjne:

## Połączenie alarmowe

Należy nacisnąć przycisk **PTT**, aby rozmawiać w przydzielonym okienku czasowym trybu awaryjnego.

## Połączenie alarmowe z funkcją awaryjnej aktywacji mikrofonu

W przypadku pierwszej transmisji w przydzielonym okienku czasowym trybu awaryjnego wyciszenie mikrofonu zostanie automatycznie wyłączone i będzie można rozmawiać bez konieczności naciskania przycisku **PTT**. Mikrofon pozostanie aktywny przez okres czasu zaprogramowany w radiotelefonie. Przy kolejnych transmisjach w ramach tego samego połączenia alarmowego należy naciskać przycisk **PTT**.

## Alarm

Alert alarmowy nie jest połączeniem głosowym. Jest to powiadomienie alarmowe wysyłane do radiotelefonów, które zostały skonfigurowane do otrzymywania takich alertów. Radiotelefon wysyła alert alarmowy poprzez kanał sterujący aktualnie zarejestrowanej stacji. Alert alarmowy jest odbierany na radiotelefonach w sieci Connect Plus, które zostały zaprogramowane do otrzymywania go (bez względu na to, w której stacji sieciowej je zarejestrowano).

Do przycisku alarmowego w danej strefie można przypisać tylko jeden tryb awaryjny. Dodatkowo każdy tryb awaryjny może być następującego typu:

### Regularny

Radiotelefon nadaje sygnał awaryjny oraz stosuje wskaźniki dźwiękowe i/albo wizualne.

### Ciche

Radiotelefon nadaje sygnał awaryjny bez wskaźników dźwiękowych lub wizualnych. Radiotelefon wyłączy całą sygnalizację dźwiękową i wizualną o połączeniu alarmowym aż do naciśnięcia przycisku **PTT** w celu rozpoczęcia transmisji głosowej.

### Cichy z obsługą głosu

Tak samo jak w przypadku Trybu cichego, ale radiotelefon dodatkowo wyłączy wyciszenie niektórych transmisji głosowych.

## Otrzymywanie alarmu

Radiotelefon można zaprogramować do emitowania dźwięku alertu oraz wyświetlania informacji o przychodzącym alarmie. Po zaprogramowaniu, w momencie otrzymania alertu na wyświetlaczu pojawi się ekran szczegółów alarmu, zawierający ikonę alarmu, alias lub identyfikator radiotelefonu wysyłającego sygnał

alarmowy, kontakt grupowy wykorzystywany do alarmu oraz dodatkową linię informacji. Dodatkowe informacje to nazwa strefy zawierającej Kontakt grupowy.

Obecnie radiotelefon wyświetla tylko ostatnio zdekodowane alarmy. Jeśli alarm został otrzymany przed usunięciem wcześniejszego alarmu, informacje szczegółowe dotyczące nowego alarmu zastępują informacje szczegółowe poprzedniego alarmu.

W zależności od tego, jak zaprogramowano radiotelefon, ekran Szczegółów alarmu (lub ekran Listy alarmów) będzie wyświetlany na ekranie radiotelefonu nawet po zakończeniu alarmu. Możliwe jest zapisanie szczegółów alarmu na liście alarmów lub usunięcie szczegółów alarmu opisanych w poniższych sekcjach.

## Zapisywanie szczegółów alarmu na liście alarmów

Zapisanie szczegółów alarmu na Liście alarmów umożliwia przeglądanie szczegółów ponownie później, po wybraniu Listy alarmów z Menu głównego.

- 1 Kiedy wyświetlane są szczegóły alarmu (lub lista alarmów), naciśnij przycisk .

Wyświetlony zostanie ekran **Zamknij listę alarmów**.

---

- 2 Wybierz jedną z następujących czynności:

- Wybierz pozycję **Tak** i naciśnij przycisk , aby zapisać szczegóły alarmów na liście alarmów, a następnie opuść ekran Szczegóły alarmu (lub Lista alarmów).
  - Wybierz pozycję **Nie** i naciśnij przycisk , aby powrócić do ekranu Szczegóły alarmu (lub Lista alarmów).
-

## Usuwanie szczegółów alarmu

- 1 Na ekranie Szczegóły alarmu naciśnij przycisk . Wyświetlony zostanie ekran **Usuń**.

---

- 2 Wybierz jedną z następujących czynności:
  - Wybierz opcję **Tak** i naciśnij przycisk , aby usunąć szczegóły alarmu.
  - Wybierz opcję **Nie** i naciśnij przycisk , aby powrócić do ekranu Szczegóły alarmu.

## Odpowiadanie na połączenie alarmowe

### UWAGA:

Jeśli nie odpowiesz na połączenie alarmowe w czasie, który ustalono we wstrzymaniu połączenia alarmowego, zostanie ono zakończone. Jeśli chcesz rozmawiać z grupą po upływie wstrzymania połączenia alarmowego, musisz najpierw wybrać pozycję kanału przypisaną do grupy (jeśli nie została jeszcze wybrana). Następnie, naciśnij przycisk **PTT**, aby rozpocząć niealarmowe połączenie z grupą.

- 1 Po odebraniu połączenia alarmowego naciśnij dowolny przycisk, aby zatrzymać wszystkie odebrane wskazania połączeń alarmowych.

---

- 2 Naciśnij przycisk **PTT**, aby rozpocząć transmisję głosową do Grupy alarmowej.  
Transmisja będzie odbierana na wszystkich radiotelefonach monitorujących tę grupę.

- 3 Zaczekaj na zakończeniu sygnału zezwolenia na rozmowę (jeżeli jest włączony) i zacznij wyraźnie mówić do mikrofonu.

Dioda LED zaświeci na zielono.

- 4 Aby słuchać, zwolnij przycisk **PTT**.

Gdy uzyskasz odpowiedź od urządzenia wysyłającego alarm, . Na wyświetlaczu widoczny jest symbol połączenia grupowego, alias lub ID grupy oraz alias lub ID radiotelefonu transmitującego.

## Odpowiadanie na alert alarmowy

### **UWAGA:**

Kontakt grupowy wykorzystywany do alertów alarmowych nie powinien być wykorzystywany do komunikacji głosowej. Pozwala to na zapobieganie wysłaniu i otrzymywaniu alertów alarmowych przez inne radiotelefony z tej samej grupy.

Alert alarmowy z radiotelefonu oznacza, że jego użytkownik znajduje się w poważnej sytuacji. Na alert można odpowiedzieć, inicjując połączenie prywatne z radiotelefonem, z którego nadano alarm, inicjując połączenie grupowe z wyznaczoną grupą rozmówców,

wysyłając alert połączenia do radiotelefonu, inicjując monitor zdalny tego radiotelefonu itd. Prawidłowa reakcja jest zależna od organizacji oraz konkretnej sytuacji.

## Ignorowanie zwrotnego połączenia alarmowego

Ta funkcja umożliwia ignorowanie aktywnych zwrotnych połączeń alarmowych w radiotelefonie.

Aby włączyć funkcję ignorowania zwrotnego połączenia alarmowego, radiotelefon musi mieć skonfigurowane oprogramowanie Connect Plus Customer Programming Software (CPCPS).

Gdy funkcja ta jest aktywna, radiotelefon nie wyświetla wskaźników połączeń alarmowych i nie otrzymuje komunikatów głosowych na domyślnym ID grupy zwrotnego kanału alarmowego.

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Inicjowanie połączenia alarmowego

### UWAGA:

Jeśli w radiotelefonie wybrano Tryb cichy, to w Trybie awaryjnym nie będą emitowane żadne sygnały dźwiękowe ani graficzne, aż do naciśnięcia przycisku **PTT** i rozpoczęcia transmisji głosowej. Jeśli w radiotelefonie wybrano Tryb cichy z obsługą głosu, na początku nie będą emitowane żadne sygnały dźwiękowe ani graficzne informujące o pracy radiotelefonu w Trybie awaryjnym. Tym niemniej w sytuacjach, gdy inne radiotelefony będą odpowiadać na sygnał alarmowy, wyciszenie zostanie wyłączone. Sygnały alarmowe zostaną wyemitowane tylko raz – po naciśnięciu przycisku **PTT** i rozpoczęciu transmisji głosowej.

Zarówno w Trybie cichym, jak i Trybie cichym z obsługą głosu, po zakończeniu połączenia alarmowego radiotelefon automatycznie opuści taki tryb.

- 1 Naciśnij zaprogramowany przycisk **alarmowy**.
- 2 Naciśnij przycisk **PTT**, aby rozpocząć transmisję głosową do Grupy alarmowej.

Po zwolnieniu przycisku **PTT** połączenie alarmowe będzie kontynuowane przez czas, który skonfigurowano w ustawieniu wstrzymania połączenia alarmowego.

Jeśli w tym czasie zostanie naciśnięty przycisk **PTT**, połączenie alarmowe będzie kontynuowane.

## Inicjowanie połączenia alarmowego ze śledzeniem głosu

Aby można było korzystać z operacji tego typu, radiotelefon musi być odpowiednio zaprogramowany.

Jeśli został on skonfigurowany do tego trybu, po naciśnięciu zaprogramowanego przycisku **alarmowego** (gdy radiotelefon otrzyma przydział gniazda czasowego) mikrofon zostanie automatycznie uaktywniony (bez konieczności naciskania przycisku **PTT**). Taki stan jest również określany jako "mikrofon aktywny". „Automatyczny mikrofon” dotyczy pierwszej transmisji głosowej z radiotelefonu podczas połączenia alarmowego. Przy kolejnych transmisjach w ramach tego samego połączenia alarmowego należy naciskać przycisk **PTT**.

- 1 Naciśnij zaprogramowany przycisk **alarmowy**.

- 2 Mikrofon pozostanie aktywny przez czas określony w ustawieniach codeplug radiotelefonu.

W tym czasie dioda LED będzie świecić się na zielono.

- 3 Naciśnij i przytrzymaj przycisk **PTT**, aby rozmawiać dłużej niż to określono w zaprogramowanych ustawieniach.

## Inicjowanie alertu alarmowego

### UWAGA:

Jeśli radiotelefon został zaprogramowany do trybu „cichego” lub „cichego z głosem”, nie będą emitowane żadne sygnały dźwiękowe ani graficzne informujące o wysłaniu alertu alarmowego. W przypadku ustawienia trybu „cichego” będzie on aktywny bezterminowo, aż do naciśnięcia przycisku PTT lub przycisku skonfigurowanego do wyłączenia trybu awaryjnego. W przypadku ustawienia trybu „cichego z głosem” radiotelefon automatycznie wyjdzie z trybu cichego, gdy kontroler stacji wyemituje alert alarmowy.

Naciśnij pomarańczowy przycisk **alarmowy**.

Po wysłaniu alertu alarmowego do kontrolera stacji na ekranie pojawi się ikona alarmu, kontakt grupowy wykorzystywany do alertu oraz Alarm TX.

Po pomyślnym wysłaniu alertu alarmowego i wyemitowaniu go na innych radiotelefonach usłyszysz dźwięk informacyjny. Na wyświetlaczu pojawi się komunikat Alarm wysł. Jeśli alert alarmowy nie zostanie wysłany, usłyszysz dźwięk ostrzegawczy, a na ekranie zobaczysz komunikat Alarm niepokaz..

## Wyjście z trybu awaryjnego

### UWAGA:

Jeśli połączenie alarmowe zostało zakończone z powodu upływu czasu wstrzymania połączeń alarmowych, ale przyczyna alarmu nadal istnieje, ponownie naciśnij przycisk **alarmowy**, aby uruchomić proces od nowa.

Po rozpoczęciu alertu alarmowego przez naciśnięcie zaprogramowanego przycisku **alarmowego** radiotelefon automatycznie opuści tryb alarmowy po otrzymaniu odpowiedzi z systemu Connect Plus.

Jeśli zainicjujesz połączenie alarmowe, naciskając zaprogramowany przycisk **alarmowy**, dla radiotelefonu zostanie automatycznie przydzielony dostępny kanał. Gdy radiotelefon nada komunikat informujący o alarmie, nie będzie można anulować połączenia alarmowego. Jeśli jednak przypadkowo został naciśnięty przycisk lub alarm już nie istnieje, można odpowiedzieć w przydzielonym kanale. Gdy zwolnisz przycisk **PTT**, po upływie wstrzymania połączenia alarmowego połączenie alarmowe zostanie rozłączone.

**Jeśli radiotelefon został skonfigurowany do obsługi trybu awaryjnego ze śledzeniem głosu, ustal przyczynę błędu przy użyciu opcji „mikrofon aktywny”, a następnie naciśnij i zwolnij przycisk PTT w celu przerwania transmisji. Po upływie wstrzymania połączenia alarmowego połączenie alarmowe zostanie rozłączone.**

## Wiadomości tekstowe

Radiotelefon może odbierać dane (np. wiadomości tekstowe) wysłane z innego urządzenia lub programu do ich wysyłania.

Istnieją dwa typy wiadomości tekstowych: krótkie wiadomości tekstowe DMR (Digital Mobile Radio) i wiadomości tekstowe. Maksymalna długość krótkiej

wiadomości tekstowej DMR to 23 znaki. Maksymalna liczba znaków wiadomości wynosi 280, włączając w to linię tematu. Wiersz tematu pojawia się tylko po otrzymaniu wiadomości z aplikacji poczty e-mail.

### UWAGA:

Maksymalna długość znaków ma zastosowanie wyłącznie w modelach wyposażonych w najnowszej wersji oprogramowanie i sprzęt. W modelach ze starszą wersją oprogramowania i sprzętu maksymalna długość wiadomości tekstowej to 140 znaków. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

W języku arabskim tekst jest wpisywany od prawej strony do lewej.

## Wysyłanie krótkiej wiadomości tekstowej

Radiotelefon obsługuje maksymalnie do 10 zaprogramowanych przez sprzedawcę krótkich wiadomości tekstowych.

Pomimo, że krótkie wiadomości tekstowe są wstępnie zaprogramowane, każdą wiadomość można redagować przed wysłaniem.

Jeśli chcesz wysłać wiadomość, wykonaj następujące czynności, aby wybrać odbiorcę:

- Naciśnij  lub , aby przejść do wymaganego aliasu, a następnie naciśnij przycisk , aby wybrać.
- Naciśnij przycisk  lub , aby przejść do menu **Wybierz** i wybierz naciśnij przycisk , aby wybrać. W pierwszym wierszu wyświetlacza pojawi się pozycja **Numer**. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź alias lub identyfikator abonenta i naciśnij przycisk .

Na wyświetlaczu pojawi się komunikat **Wyślij wiad.**, co stanowi potwierdzenie wykonywania tej operacji.

Jeśli wiadomość zostanie wysłana pomyślnie, usłyszysz sygnał, a na wyświetlaczu pojawi się komunikat **Message Sent** (Wiadomość wysłana).

Jeśli nie można wysłać wiadomości, zostanie wyemitowany sygnał niskotonowy, a na wyświetlaczu pojawi się komunikat **Message Send Failed** (Wysłanie wiadomości nie powiodło się).

Jeżeli nie można wysłać wiadomości tekstowej, radiotelefon przełączy się na ekran opcji **Wyś. ponow.** (patrz [Zarządzanie niewysłanymi wiadomościami tekstowymi na str. 316](#)).

---

## Wysyłanie szybkiej wiadomości tekstowej za pomocą przycisku szybkiego połączenia

Istnieje możliwość wysyłania krótkich wiadomości tekstowych za pomocą przycisku programowalnego zaprogramowana przez sprzedawcę.

Naciśnij zaprogramowany **przycisk szybkiego połączenia**, aby wysłać predefiniowaną krótką wiadomość tekstową do predefiniowanego aliasu.

Na wyświetlaczu pojawi się komunikat `Wysył. wiad.`, co stanowi potwierdzenie wykonywania tej operacji.

Jeśli wiadomość zostanie wysłana, usłyszysz sygnał, a na wyświetlaczu pojawi się komunikat `Wiadomość została wysłana.`

Jeśli nie można wysłać wiadomości, zostanie wyemitowany sygnał niskotonowy, a na wyświetlaczu pojawi się komunikat `Wysyłanie wiadomości nie powiodło się.`

Jeżeli nie można wysłać wiadomości tekstowej, radiotelefon przełączy się na ekran opcji `Wys. ponow.` (patrz [Zarządzanie niewysłanymi wiadomościami tekstowymi na str. 316](#)).

## Dostęp do folderu kopii zapasowych

Folder kopii zapasowych może pomieścić maksymalnie dziesięć (10) ostatnio zapisanych wiadomości. Gdy folder zapełni się, następna zapisana wiadomość tekstowa automatycznie zastępuje najstarszą wiadomość w folderze.

[Wyślij informację zwrotną](#)

### UWAGA:

Możesz edytować zapisaną wiadomość tekstową przed wysłaniem. Funkcja dostępna wyłącznie w modelach posiadających mikrofon z klawiaturą (patrz [Edycja i wysyłanie zapisanej wiadomości](#)

[tekstowej na str. 314](#)). Przytrzymaj przycisk `↵`, aby w dowolnym momencie powrócić do Ekranu głównego.

## Przeglądanie tekstu zapisanej wiadomości tekstowej

### 1 Dostęp do funkcji **Wiad tekst.**

Elementy sterujące radiotelefonu	Kroki
Zaprogramowany przycisk wiadomości tekstowej	Naciśnij zaprogramowany przycisk <b>Wiad tekst.</b>

Elementy sterujące radiotelefonu	Kroki
<b>Menu</b>	<p><b>a</b> Naciśnij przycisk , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub , aby przejść do Wiadomości, a następnie naciśnij przycisk , aby wybrać.</p>

**2** Naciśnij przycisk  lub , aby przejść do pozycji *Robocza* i wybrać naciśnij przycisk , aby wybrać.

**3** Naciśnij przycisk  lub , aby przejść do żądanej wiadomości i wybierz naciśnij przycisk , aby wybrać.

## Edycja i wysyłanie zapisanej wiadomości tekstowej

**1** Naciśnij ponownie przycisk  podczas wyświetlania danej wiadomości.

**2** Naciśnij przycisk  lub , aby edytować i naciśnij przycisk , aby wybrać. Pojawi się migający kursor.

**3** Przy pomocy klawiatury napisz wiadomość.

Naciśnij przycisk , aby przesunąć kursor o jedno miejsce w lewo. Naciśnij przycisk  lub , aby przesunąć kursor o jedno miejsce w prawo. Naciśnij przycisk , aby usunąć niepożądane znaki.

Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

**4** Po utworzeniu wiadomości naciśnij przycisk .

## 5 Wybierz odbiorcę za pomocą przycisku:

- Naciśnij przycisk  lub , aby przejść do wymaganego aliasu i naciśnij przycisk , aby wybrać.
- Naciśnij przycisk  lub , aby przejść do menu Wyb ręcz i naciśnij przycisk , aby wybrać. W pierwszym wierszu wyświetlacza pojawi się pozycja Numer#. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź alias lub identyfikator abonenta i naciśnij przycisk .

Na wyświetlaczu pojawi się komunikat **Wysył wiad.**, co stanowi potwierdzenie wykonywania tej operacji.

Jeśli wiadomość zostanie wysłana pomyślnie, usłyszysz sygnał, a na wyświetlaczu pojawi się komunikat **Message Sent (Wiadomość wysłana)**.

Jeśli nie można wysłać wiadomości, zostanie wyemitowany sygnał niskotonowy, a na wyświetlaczu pojawi się komunikat **Message Send Failed (Wysłanie wiadomości nie powiodło się)**.

Jeżeli operacja zakończy się niepowodzeniem, wiadomość zostanie przeniesiona do folderu Elementy wysłane i oznaczona ikoną Wysyłanie nieudane.

## Usuwanie zapisanej wiadomości tekstowej z folderu kopii zapasowych

### 1 Dostęp do funkcji **Wiad tekst.**

Elementy sterujące radiotelefonu	Kroki
<b>Zaprogramowany przycisk wiadomości tekstowej</b>	Naciśnij zaprogramowany przycisk <b>Wiad tekst.</b>
<b>Menu</b>	<b>a</b> Naciśnij przycisk  , aby uzyskać dostęp do menu..

Elementy sterujące radiotelefonu	Kroki
	<p><b>b</b> Naciśnij przycisk  lub  , aby przejść do Wiadomości, a następnie naciśnij przycisk  , aby wybrać.</p>

**2** Naciśnij przycisk  lub  , aby przejść do pozycji **Robocza** i wybrać naciśnij przycisk  , aby wybrać.

**3** Naciśnij przycisk  lub  , aby przejść do żądanej wiadomości i wybierz naciśnij przycisk  , aby wybrać.

**4** Naciśnij przycisk  lub  , aby przejść do opcji **Usuń** i naciśnij przycisk  w celu skasowania wiadomości tekstowej.

## Zarządzanie niewysłanymi wiadomościami tekstowymi

Na ekranie opcji **Wys. ponow.** można wybrać jedną z następujących opcji:

- Wyślij ponownie
- Dalej
- Edycja

## Ponowne wysyłanie wiadomości tekstowej

Naciśnij  , aby ponownie wysłać tę samą wiadomość do tego samego aliasu lub identyfikatora użytkownika/grupy.

Po pomyślnym wysłaniu wiadomości zostanie wyemitowany sygnał dźwiękowy, a na wyświetlaczu pojawi się miniinformacja o udanej operacji.

Jeśli nie można wysłać wiadomości, na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.

Jeśli nie można wysłać wiadomości, zostanie wyemitowany sygnał niskotonowy, a na wyświetlaczu pojawi się komunikat `Message Send Failed` (Wysłanie wiadomości nie powiodło się).

## Przesyłanie dalej wiadomości tekstowej

Wybierz opcję `Prześlij dalej`, aby wysłać wiadomość do innego aliasu lub identyfikatora abonenta/grupy.

- 1 Naciśnij przycisk  lub , aby przejść do `Przekazywania` i naciśnij przycisk , aby wybrać.
- 2 Wybierz odbiorcę wiadomości za pomocą przycisku  lub , wybierz żądany alias lub identyfikator, a następnie naciśnij przycisk `naciśnij przycisk` , aby wybrać.

Na wyświetlaczu pojawi się komunikat `Wysł. wiad.`, co stanowi potwierdzenie wykonywania tej operacji.

Jeśli wiadomość zostanie wysłana pomyślnie, usłyszysz sygnał, a na wyświetlaczu pojawi się komunikat `Message Sent` (Wiadomość wysłana).

[Wyślij informację zwrotną](#)

## Zarządzanie wysłanymi wiadomościami tekstowymi

Po wysłaniu wiadomości do innego radiotelefonu jest ona zapisywana w folderze `Wysłane pozycje`. Wiadomość tekstowa wysłana jako ostatnia jest zawsze umieszczana na górze listy `Wysłane pozycje`.

Folder `Wysłane pozycje` przechowuje maksymalnie 30 ostatnio wysłanych wiadomości. Po wypełnieniu folderu następną wysłana wiadomość tekstowa automatycznie zastępuje najstarszą wiadomość tekstową w folderze.

### UWAGA:

Przytrzymaj przycisk , aby w dowolnym momencie powrócić do Ekranu głównego.

## Przeglądanie wysłanej wiadomości tekstowej

- 1 Dostęp do funkcji **Wiad tekst.**

Elementy sterujące radiotelefonu	Kroki
Zaprogramowany przycisk wiadomości tekstowej	Naciśnij zaprogramowany przycisk <b>Wiad. tekst.</b>
Menu	<p><b>a</b> Naciśnij przycisk , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub , aby przejść do Wiadomości, a następnie naciśnij przycisk , aby wybrać.</p>

**2** Naciśnij przycisk  lub , aby przejść do opcji Poz. wysł., a następnie naciśnij przycisk , aby wybrać.

**3**  lub  pozwoli przejść do jednej z nich i wykonać polecenie naciśnij przycisk , aby wybrać.

Ikona w prawym górnym rogu ekranu informuje o statusie wiadomości (patrz rozdział [Ikony pozycji wysłanych na str. 252](#)).

## Wysyłanie wysłanej wiadomości tekstowej

Można wybrać jedną z następujących opcji podczas przeglądania wysłanej wiadomości tekstowej:

- Wyślij ponownie
- Dalej
- Edycja

- Usun

1 Naciśnij ponownie przycisk  podczas wyświetlania danej wiadomości.

2 Naciśnij przycisk  lub , aby wybrać jedną z poniższych opcji, a następnie naciśnij przycisk , aby wybrać.

Opcja	Kroki
Dalej	Wybierz opcję <b>Prześlij dalej</b> , aby wysłać zaznaczoną wiadomość tekstową do innego aliasu lub identyfikatora abonenta lub grupy (patrz <a href="#">Przesyłanie dalej wiadomości tekstowej na str. 317</a> ).
Usun	Wybierz opcję <b>Usun</b> , aby usunąć wiadomość tekstową.
Wyslij ponownie	Wybierz opcję <b>Wys. ponow.</b> , aby ponownie wysłać wybraną wiadomość do tego samego aliasu lub identyfikatora użytkownika/grupy.

Opcja	Kroki
	<p>Na wyświetlaczu pojawi się komunikat <b>Wysył. wiad.</b> potwierdzający wysyłanie tej samej wiadomości do tego samego radiotelefonu docelowego.</p> <p>Jeśli wiadomość zostanie wysłana pomyślnie, usłyszysz sygnał, a na wyświetlaczu pojawi się komunikat <b>Message Sent</b> (Wiadomość wysłana).</p> <p>Jeśli nie można wysłać wiadomości, zostanie wyemitowany sygnał niskotonowy, a na wyświetlaczu pojawi się komunikat <b>Message Send Failed</b> (Wysłanie wiadomości nie powiodło się).</p> <p>Jeżeli nie można wysłać wiadomości, radiotelefon wyświetla ekran opcji <b>Wys. ponow.</b> Naciśnij , aby ponownie wysłać wiadomość do tego samego aliasu</p>

Opcja	Kroki
	lub identyfikatora użytkownika/ grupy.

Jeżeli ekran wysyłania wiadomości zostanie zamknięty podczas wysyłania wiadomości, radiotelefon uaktualni stan wiadomości w folderze Wysłane pozycje bez żadnego wskazania na wyświetlaczu ani za pomocą dźwięku.

Jeżeli radiotelefon zmieni tryb lub zostanie wyłączony zanim stan wiadomości w folderze Wysłane pozycje zostanie uaktualniony, radiotelefon nie będzie w stanie dokończyć wysłania wiadomości w toku i automatycznie wskaże to za pomocą ikony **Nie można wysłać**.

Radiotelefon obsługuje maksymalnie 5 wiadomości w toku w tym samym czasie. Podczas tego okresu radiotelefon nie może wysłać żadnej nowej wiadomości i automatycznie zaznacza ją ikoną **Nie można wysłać**.

## Usuwanie wszystkich wysłanych wiadomości tekstowych z folderu Wysłane pozycje

- 1 Dostęp do funkcji **Wiad tekst**.

Elementy sterujące radiotelefonu	Kroki
<b>Zaprogramowany przycisk wiadomości tekstowej</b>	Naciśnij zaprogramowany przycisk <b>Wiad tekst</b> .
<b>Menu</b>	<p><b>a</b> Naciśnij przycisk  , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub  , aby przejść do wiadomości, a następnie naciśnij</p>

Elementy sterujące radiotelefonu	Kroki
	przycisk  , aby wybrać.

- 2 Naciśnij przycisk  lub  , aby przejść do opcji **Poz. wysł.**, a następnie naciśnij przycisk  , aby wybrać.

Jeżeli wybrana opcja **Wysłane pozycje** nie zawiera żadnych wiadomości tekstowych, na wyświetlaczu widoczny jest komunikat **Lista pusta**. Jeśli dźwięki przycisków są włączone, usłyszysz niski ton.

- 3 Naciśnij przycisk  lub  , aby **Usunąć wszystko** i wybierz naciśnij przycisk  , aby wybrać.

- 4 Wybierz jedną z poniższych opcji:

- Naciśnij  lub  , aby wybrać **Tak**, a następnie naciśnij przycisk  , aby wybrać. Na wyświetlaczu pojawi się miniinformacja o udanej operacji.
-  lub  Przejdź do **Nie** i naciśnij przycisk  , aby powrócić do poprzedniego ekranu.

## Odbieranie wiadomości tekstowej

Kiedy radiotelefon odbiera wiadomość, wyświetlacz pokazuje Listę powiadomień zawierającą alias lub ID nadawcy oraz ikonę wiadomości.

Można wybrać jedną z następujących opcji podczas odbierania wiadomości tekstowej:

- Przeczytaj
- Odczyt późn.
- Usuń

## Odczytywanie wiadomości tekstowej

- 1 Naciśnij przycisk  lub , aby przejść do opcji Odczytać?, a następnie naciśnij przycisk , aby wybrać.

Otwierana jest wybrana wiadomość w Skrzynce odbiorczej.

- 2 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby powrócić do skrzynki odbiorczej.
- Naciśnij przycisk  po raz drugi, aby odpowiedzieć, przesłać dalej lub usunąć wiadomość tekstową.

## Zarządzanie odebranymi wiadomościami tekstowymi

Korzystając ze Skrzynki odbiorczej, można zarządzać wiadomościami tekstowymi. W Skrzynce odbiorczej można zapisać maksymalnie 30 wiadomości.

Wiadomości tekstowe w Skrzynce odbiorczej są sortowane zgodnie z kolejnością odebrania wiadomości, z ostatnią odebraną wiadomością na początku listy.

Radiotelefon obsługuje następujące opcje wiadomości tekstowych:

- Odpowiedz (przy pomocy funkcji Tekst krtk.)
- Dalej
- Usuń
- Usuń wszystko

### UWAGA:

Jeżeli typ kanału nie jest odpowiedni, można tylko przesłać dalej lub usuwać wszystkie odebrane wiadomości.

Przytrzymaj przycisk , aby w dowolnym momencie powrócić do Ekranu głównego.

## Przeglądanie wiadomości tekstowej ze Skrzynki odbiorczej

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby przejść do Wiadomości, a następnie naciśnij przycisk , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do Skrzynki odbiorczej, a następnie naciśnij przycisk , aby wybrać.

4 Przycisk  lub  pozwala wybrać wyświetlić wiadomości.

5 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby wybrać bieżącą wiadomość, i ponownie , aby na nią odpowiedzieć, wysłać, przesłać wiadomość dalej albo ją usunąć.
- Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

## Odpowiadanie na wiadomość tekstową ze skrzynki odbiorczej

1 Dostęp do funkcji **Wiad tekst.**

Element sterujące radiotelefonu	Kroki
Zaprogramowany przycisk wiadomości tekstowej	Naciśnij zaprogramowany przycisk <b>Wiad tekst.</b>
Menu	a Naciśnij przycisk  , aby uzyskać dostęp do menu..

Elementy sterujące radiotelefonu	Kroki
	<p><b>b</b> Naciśnij przycisk  lub , aby przejść do Wiadomości, a następnie naciśnij przycisk , aby wybrać.</p>

2 Naciśnij przycisk  lub , aby przejść do Skrzynki odbiorczej, a następnie naciśnij przycisk , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do żądanej wiadomości i wybierz naciśnij przycisk , aby wybrać.

4 Ponownie naciśnij przycisk , aby uzyskać dostęp do podmenu.

5 Użyj klawiatury do zapisania/edycji wiadomości.

6 Po utworzeniu wiadomości naciśnij przycisk . Na wyświetlaczu pojawi się komunikat **Wysył. wiad.**, co stanowi potwierdzenie wykonywania tej operacji.

Jeśli wiadomość zostanie wysłana pomyślnie, usłyszysz sygnał, a na wyświetlaczu pojawi się komunikat **Wiadomość wysłana**.

Jeśli nie można wysłać wiadomości, zostanie wyemitowany sygnał niskotonowy, a na wyświetlaczu pojawi się komunikat **Wysłanie wiadomości nie powiodło się**.

Jeżeli wiadomość nie może zostać wysłana, radiotelefon przełączy się na ekran opcji **Wys. ponow.** (patrz [Zarządzanie niewysłanymi wiadomościami tekstowymi na str. 316](#)).

## Usuwanie wiadomości tekstowej ze Skrzynki odbiorczej

### 1 Dostęp do funkcji **Wiad tekst.**

Elementy sterujące radiotelefonu	Kroki
Zaprogramowany przycisk wiadomości tekstowej	Naciśnij zaprogramowany przycisk <b>Wiad tekst.</b>
Menu	<p><b>a</b> Naciśnij przycisk  , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub  , aby przejść do Wiadomości, a następnie naciśnij przycisk  , aby wybrać.</p>

2 Naciśnij przycisk  lub  , aby przejść do Skrzynki odbiorczej, a następnie naciśnij przycisk  , aby wybrać.

3 Naciśnij przycisk  lub  , aby przejść do żądanej wiadomości i wybierz naciśnij przycisk  , aby wybrać.

4 Ponownie naciśnij przycisk  , aby uzyskać dostęp do podmenu.

5 Naciśnij przycisk  lub  , aby Usunąć i wybierz naciśnij przycisk  , aby wybrać.

6 Naciśnij przycisk  lub  , aby wybrać opcję Tak. Naciśnij przycisk  , aby wybrać opcję .  
Na ekranie pojawi się komunikat **Wiad usun.**, a urządzenie powróci do widoku Skrzynki odbiorczej.

## Usuwanie wszystkich wiadomości tekstowych ze Skrzynki odbiorczej

### 1 Dostęp do funkcji **Wiad tekst.**

Elementy sterujące radiotelefonu	Kroki
Zaprogramowany przycisk wiadomości tekstowej	Naciśnij zaprogramowany przycisk <b>Wiad tekst.</b>
Menu	<p><b>a</b> Naciśnij przycisk  , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub  , aby przejść do <b>Wiadomości</b>, a następnie naciśnij przycisk  , aby wybrać.</p>

- 2 Naciśnij przycisk  lub  , aby przejść do Skrzynki odbiorczej, a następnie naciśnij przycisk  , aby wybrać.

Jeśli wybrana Skrzynka odbiorcza nie zawiera żadnych wiadomości tekstowych, na ekranie pojawi się komunikat **Lista pusta**. Jeśli dźwięki przycisków są włączone, usłyszysz niski ton (patrz rozdział [Włączanie/wyłączanie dźwięków przycisków na str. 222](#)).

- 3 Naciśnij przycisk  lub  , aby **Usunąć** wszystko i wybierz naciśnij przycisk  , aby wybrać.

- 4 Naciśnij przycisk  lub  , aby wybrać opcję **Tak**. Naciśnij przycisk  , aby wybrać opcję . Na wyświetlaczu pojawi się komunikat **Skrzynka odbiorcza wyczyszczona**.

## Prywatne

Jeżeli ta funkcja jest włączona, pomaga ona zapobiec podsłuchiowaniu przez nieupoważnione osoby na danym kanale, dzięki zastosowaniu programowego rozwiązania szyfrującego. Część transmisji, która zawiera sygnalizację i identyfikację użytkownika, nie jest szyfrowana.

Radiotelefon musi mieć włączoną funkcję prywatności na obecnie wybranym kanale, aby nadawać podczas połączenia prywatnego, chociaż nie jest to konieczny wymóg do odbioru transmisji. Po włączeniu funkcji prywatności na wybranym kanale radiotelefon może nadal odbierać czyste (niezaszyfrowane) transmisje.

Twój radiotelefon obsługuje tylko funkcję Rozszerzone szyfrowanie.

Aby odszyfrować połączenie poufne, radiotelefon powinien zostać zaprogramowany z tą samą wartością klucza i ID klucza (dla rozszerzonej prywatności).

W wypadku odbioru zaszyfrowanej transmisji z radiotelefonu, w którym ustawiono inną wartość i ID klucza, nie będzie słycać niczego (Rozszerzone szyfrowanie).

Jeżeli radiotelefon ma przypisany typ prywatności, na ekranie głównym pojawia się ikona zabezpieczenia lub

braku zabezpieczenia, oprócz sytuacji, kiedy radiotelefon odbiera połączenie alarmowe lub alarm.

Dioda LED świeci się ciągłym zielonym światłem, gdy radiotelefon jest przełączony do trybu nadawania, i szybko miga, gdy radiotelefon odbiera transmisję z ochroną prywatności.

Aby uzyskać dostęp do tej funkcji, wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk funkcji **Prywatn.**, aby włączyć lub wyłączyć funkcję prywatności.
- użycie menu radiotelefonu, jak opisano w dalszych krokach.

### UWAGA:

Niektóre modele radiotelefonów mogą nie posiadać funkcji prywatności. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..
- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

- 3 Naciśnij przycisk  lub , aby wybrać pozycję **Ustawienia rtf.**, lub  lub , aby wybrać pozycję **Connect Plus** i naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby wybrać pozycję **Rozszerz. szyfr.**
- Jeśli na wyświetlaczu pojawia się komunikat **Wł.**, naciśnij przycisk , aby włączyć szyfrowanie. Radiotelefon wyświetla wiadomość potwierdzającą wybór.
- Jeśli na wyświetlaczu pojawia się komunikat **Wył.**, naciśnij przycisk , aby wyłączyć szyfrowanie. Radiotelefon wyświetla wiadomość potwierdzającą wybór.
- Jeżeli radiotelefon nie ma przypisanego typu prywatności, na pasku stanu pojawia się ikona zabezpieczenia lub braku zabezpieczenia, oprócz sytuacji, kiedy radiotelefon odbiera lub wysyła alert alarmowy.

## Nawiązywanie (szyfrowanego) połączenia z ochroną prywatności

Włącz ochronę prywatności za pomocą zaprogramowanego przycisku ochrony prywatności lub przy użyciu menu. Aby wysłać transmisję z ochroną prywatności, w radiotelefonie należy włączyć funkcję ochrony prywatności dla aktualnie wybranego kanału. Po włączeniu ochrony prywatności dla aktualnie wybranego kanału wszystkie transmisje głosowe radiotelefonu będą szyfrowane. Dotyczy to połączenia grupowego, wielogrupy, odpowiedzi podczas wyszukanych połączeń, połączenia zbiorczego stacji, połączenia alarmowego oraz połączenia prywatnego. Transmisję mogą odszyfrować tylko radiotelefony odbierające, dla których skonfigurowano ten sam klucz i ID klucza, co dla radiotelefonu transmitującego.

## Zabezpieczenia

Można włączyć lub wyłączyć dowolny radiotelefon w systemie. Na przykład konieczne może być wyłączenie skradzionego radiotelefonu, aby uniemożliwić korzystanie z niego osobie nieupoważnionej, lub ponowne włączenie odzyskanego radiotelefonu.

**UWAGA:**

Funkcja zdalnego wyłączenia i włączania jest dostępna dla odpowiednio skonfigurowanych radiotelefonów. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Dezaktywacja radiotelefonu

- 1 Aby uzyskać dostęp do tej funkcji, wykonaj jedną z następujących czynności:

Elementy sterujące radiotelefonu	Kroki
Przycisk Blokowanie rtf.	<ol style="list-style-type: none"> <li>a Naciśnij zaprogramowany przycisk <b>Blokowanie rtf.</b></li> <li>b Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID, a następnie naciśnij przycisk  , aby wybrać.</li> </ol>

Elementy sterujące radiotelefonu	Kroki
Menu radiotelefonu	<ol style="list-style-type: none"> <li>a Naciśnij przycisk  , aby uzyskać dostęp do menu..</li> <li>b Naciśnij przycisk  lub  , aby przejść do pozycji Kontak ty i wybierz naciśnij przycisk  , aby wybrać. Wpisy są porządkowane w kolejności alfabetycznej.</li> <li>c Aby wybrać alias lub identyfikator abonenta, wykonaj jedną z poniższych czynności: <ul style="list-style-type: none"> <li>• Wybierz bezpośrednio żądany alias lub identyfikator.</li> </ul> </li> </ol>

Elementy sterujące radiotelefonu	Kroki
	<ul style="list-style-type: none"> <li>Naciśnij  lub , aby przejść do wymaganego aliasu lub ID, a następnie naciśnij przycisk , aby wybrać.</li> <li>Skorzystaj z menu Wyb ręcz.</li> <li>Naciśnij przycisk  lub , aby przejść do menu Wyb ręcz i wybierz naciśnij przycisk , aby wybrać.</li> </ul>

Elementy sterujące radiotelefonu	Kroki
	<ul style="list-style-type: none"> <li>Naciśnij przycisk  lub , aby przejść do opcji Nr radiotelefonu i naciśnij przycisk , aby wybrać.</li> <li>Pierwszy wiersz wyświetlacza pokazuje parametr Nr radiotel:!. W drugim wierszu wyświetlacza zobaczysz migający kursor. Użyj klawiatury, aby wprowadzić alias lub identyfikator użytkownika, i naciśnij .</li> </ul>

Elementy sterujące radiotelefonu	Kroki
	<p><b>d</b> Naciśnij przycisk  lub , aby przejść do opcji Dezaktywacja radiotelefonu</p> <p>i naciśnij przycisk , aby wybrać.</p>

Na wyświetlaczu pojawi się komunikat Dezaktywacja radiotelefonu: <Alias lub ID urządzenia docelowego>, a dioda LED zacznie migać na zielono.

## 2 Poczekać na potwierdzenie.

W przypadku powodzenia rozbrzmiewa dźwięk informacyjny, a na wyświetlaczu pojawi się komunikat Rtf. zablok..

W przypadku niepowodzenia rozbrzmiewa dźwięk ostrzegawczy, a na wyświetlaczu pojawi się komunikat Blok. rtf. niezrealiz.

## Aktywacja radiotelefonu

- 1 Aby uzyskać dostęp do tej funkcji, wykonaj jedną z następujących czynności:

Elementy sterujące radiotelefonu	Kroki
<p><b>Przycisk Odblok. rtf.</b></p>	<p><b>a</b> Naciśnij zaprogramowany przycisk <b>Odblok. rtf.</b></p> <p><b>b</b> Naciśnij  lub , aby przejść do wymaganego aliasu lub ID, a następnie naciśnij przycisk , aby wybrać.</p>

Elementy sterujące radiotelefonu	Kroki
<b>Menu radiotelefonu</b>	<p><b>a</b> Naciśnij przycisk  , aby uzyskać dostęp do menu..</p> <p><b>b</b> Naciśnij przycisk  lub  , aby przejść do pozycji <b>Kontakt ty</b> i wybierz naciśnij przycisk  , aby wybrać. Wpisy są porządkowane w kolejności alfabetycznej.</p> <p><b>c</b> Wykonaj jedną z poniższych czynności, aby wybrać następnego alias lub identyfikator abonenta.</p> <ul style="list-style-type: none"> <li>Wybierz bezpośrednio żądany alias lub identyfikator.</li> </ul>

Elementy sterujące radiotelefonu	Kroki
	<ul style="list-style-type: none"> <li>Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID, a następnie naciśnij przycisk  , aby wybrać.</li> <li>Skorzystaj z menu <b>Wyb ręcz.</b></li> <li>Naciśnij przycisk  lub  , aby przejść do menu <b>Wyb ręcz</b> i wybierz naciśnij przycisk  , aby wybrać.</li> </ul>

Elementy sterujące radiotelefonu	Kroki
	<ul style="list-style-type: none"> <li>• Naciśnij przycisk  lub , aby przejść do opcji Nr radiotelefonu i naciśnij przycisk , aby wybrać.</li> <li>• Pierwszy wiersz wyświetlacza pokazuje parametr Nr radiotel:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Użyj klawiatury, aby wprowadzić alias lub identyfikator użytkownika, i naciśnij .</li> </ul>

Elementy sterujące radiotelefonu	Kroki
	<p><b>d</b> Naciśnij przycisk  lub , aby przejść do opcji Włącz radiotelefon i naciśnij przycisk , aby wybrać.</p>

Na wyświetlaczu pojawi się komunikat Aktywacja radiotelefonu: <Alias lub ID urządzenia docelowego>, a dioda LED zacznie świecić na zielono.

## 2 Poczekał na potwierdzenie.

W przypadku powodzenia rozbrzmiewa dźwięk informacyjny, a na wyświetlaczu pojawi się komunikat Rtf. odblok.

W przypadku niepowodzenia rozbrzmiewa dźwięk ostrzegawczy, a na wyświetlaczu pojawi się komunikat Odblok. rtf. niezrealiz.

## Obsługa Bluetooth

### UWAGA:

Po wyłączeniu za pomocą programu CPS wszystkie funkcje Bluetooth zostaną wyłączone, a baza danych Bluetooth urządzenia zostanie skasowana.

Ta funkcja pozwala korzystać z radiotelefonu i urządzenia Bluetooth (akcesorium) poprzez łącze bezprzewodowe Bluetooth. Radiotelefon obsługuje urządzenia Bluetooth zarówno firmy Motorola Solutions jak i ogólnie dostępne w sprzedaży.

Łączność Bluetooth działa na linii widzenia 10 metrów. Jest to niezablokowana ścieżka pomiędzy radiotelefonem a urządzeniem Bluetooth.

Nie zaleca się pozostawiać radiotelefonu w dużej odległości od urządzenia Bluetooth, gdy istotna jest niezawodność ich współdziałania.

Na krańcach obszaru pokrycia zarówno jakość głosu jak i tonu ulegnie zniekształceniu lub fragmentacji. Aby skorygować problem, ustaw radiotelefon i urządzenie Bluetooth blisko siebie (w zasięgu 10 m). Pozwoli to uzyskać wyraźny odbiór dźwięku. Moduł Bluetooth radiotelefonu posiada maksymalną moc 2,5 mW (4 dBm) i zasięg 10 m.

Radiotelefon może obsługiwać jednoczesne połączenia maksymalnie z 4 urządzeniami Bluetooth różnego typu. Przykładowo: zestaw słuchawkowy oraz urządzenie PTT (POD). Radiotelefon nie obsługuje połączeń z kilkoma urządzeniami Bluetooth tego samego rodzaju.

Zapoznaj się z odpowiednimi instrukcjami obsługi producentów urządzeń Bluetooth, aby uzyskać informacje na temat wszystkich funkcji urządzenia.

## Włączanie i wyłączanie funkcji Bluetooth

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby przejść do opcji Bluetooth i naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do funkcji **Mój status**, a następnie naciśnij przycisk , aby wybrać.

Wyświetlacz pokazuje informacje **Wi.** i **Wył.**. Bieżący status będzie oznaczony za pomocą symbolu .

- 4 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  lub , aby **Włączyć** i naciśnij przycisk , aby wybrać. Na ekranie pojawi się komunikat **Wi.**, a po lewej stronie wybranego statusu pojawi się symbol .
- Naciśnij przycisk  lub , aby **Wyłączyć** i naciśnij przycisk , aby wybrać. Na ekranie pojawi się komunikat **Wył.**, a po lewej stronie wybranego statusu pojawi się symbol .

## Wyszukiwanie i łączenie urządzeń Bluetooth

W trakcie operacji wyszukiwania i łączenia nie należy wyłączać urządzenia Bluetooth ani naciskać przycisku

, ponieważ anuluje to całą procedurę.

- 1 Włącz urządzenie Bluetooth i uruchom tryb parowania. Więcej informacji zawiera instrukcja obsługi odpowiedniego urządzenia Bluetooth.
- 
- 2 W radiotelefonie naciśnij , aby uzyskać dostęp do menu..
- 
- 3 Naciśnij przycisk  lub , aby przejść do opcji **Bluetooth** i naciśnij naciśnij przycisk , aby wybrać.
- 
- 4 Naciśnij przycisk  lub , aby przejść do opcji **Urządzenia** i naciśnij naciśnij przycisk , aby wybrać.
-

## 5 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  lub , aby przejść do wybranego urządzenia i naciśnij przycisk , aby wybrać.

- Naciśnij  lub , aby wybrać Znajdź urz., żeby zlokalizować dostępne urządzenia.

Naciśnij przycisk  lub , aby przejść do wybranego urządzenia i naciśnij przycisk , aby wybrać.

- ## 6
- Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień połączenia, a następnie naciśnij przycisk , aby wybrać.

Na ekranie pojawi się komunikat Łączenie z <Nazw urz.>. Urządzenie Bluetooth może wymagać wykonania dodatkowych czynności, aby zakończyć

parowanie. Więcej informacji zawiera instrukcja obsługi odpowiedniego urządzenia Bluetooth.

Jeżeli operacja się powiedzie, radiotelefon wyświetli komunikat <Nazwa urz.>: połączono. Usłyszysz , a obok podłączonego urządzenia pojawi się symbol . Ikona Połączenia Bluetooth pojawi się na pasku stanu.

W przeciwnym wypadku na ekranie zobaczysz komunikat Łączenie nieud.

## Wyszukiwanie i nawiązywanie połączenia przez urządzenie Bluetooth (tryb wykrywania)

Nie wyłączaj urządzenia Bluetooth ani radiotelefonu podczas operacji wyszukiwania i nawiązywania połączenia, ponieważ może to spowodować anulowanie operacji.

- 1 Włącz tryb Bluetooth.

Zobacz [Włączanie i wyłączanie funkcji Bluetooth na str. 334](#).

2 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

3 Naciśnij przycisk  lub  , aby przejść do opcji Bluetooth i naciśnij przycisk  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby przejść do opcji Znajdź mnie, a następnie naciśnij przycisk  , aby wybrać.

Teraz radiotelefon może zostać znaleziony przez inne urządzenia Bluetooth przez zdefiniowany okres czasu. Stan ten nosi nazwę trybu wykrywalności.

---

5 Włącz urządzenie Bluetooth i sparuj je z radiotelefonem.

Więcej informacji zawiera instrukcja obsługi odpowiedniego urządzenia Bluetooth.

---

## Rozłączanie urządzenia Bluetooth

1 W radiotelefonie naciśnij  , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub  , aby przejść do opcji Bluetooth i naciśnij przycisk  , aby wybrać.

---

3 Naciśnij przycisk  lub  , aby przejść do opcji Urządzenia i naciśnij przycisk  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby przejść do wybranego urządzenia i naciśnij przycisk  , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby Odłączyć i wybierz naciśnij przycisk , aby wybrać.

Na ekranie pojawi się komunikat Trwa rozłączanie: <nazwa urz.>. Urządzenie Bluetooth może wymagać dodatkowych kroków, aby wykonać rozłączenie. Więcej informacji zawiera instrukcja obsługi odpowiedniego urządzenia Bluetooth.

Na wyświetlaczu radiotelefonu pojawi się komunikat <Nazwa urz.> odłączone. Usłyszysz dźwięk informacyjny i symbol  zniknie z podłączonego urządzenia. Symbol połączenia Bluetooth zniknie z paska statusu

## Przełączanie ścieżki dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a urządzeniem Bluetooth

Można przełączać ścieżkę dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a zewnętrznym urządzeniem Bluetooth.

Naciśnij programowalny przycisk **dźwięku trybu Bluetooth**.

- Zabrzmi dźwięk, a na wyświetlaczu pojawi się komunikat Ruting glos do radio.
- Zabrzmi dźwięk, a na wyświetlaczu pojawi się komunikat Ruting glos do Bluetooth.

## Informacje o urządzeniu

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..
- 2 Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij naciśnij przycisk , aby wybrać.
- 3 Naciśnij przycisk  lub , aby przejść do pozycji Urządzenia i naciśnij naciśnij przycisk , aby wybrać.

4 Naciśnij przycisk  lub , aby przejść dożądanego urządzenia i wybierz naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby ustawićWyświetl szczegóły i naciśnij przycisk , aby wybrać.

---

## Usuwanie nazwy urządzenia

Możesz usunąć odłączone urządzenie z listy urządzeń Bluetooth.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Urządzenia i naciśnij naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść dożądanego urządzenia i wybierz naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby Usunąć i wybierz naciśnij przycisk , aby wybrać.  
Na wyświetlaczu pojawi się komunikat Urządźusun.

---

## Wzmocnienie mikrofonu Bluetooth

Umożliwia regulację wzmocnienia mikrofonu podłączonego urządzenia Bluetooth.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij przycisk , aby wybrać.
- 
- 3 Naciśnij przycisk  lub , aby wybrać pozycję Wzm. mkr. BT i naciśnij przycisk , aby wybrać.
- 
- 4 Naciśnij przycisk  lub , aby przejść do wymaganego typu wzmocnienia mikrofonu Bluetooth i obecnych wartości.
- Aby edytować wartości, naciśnij przycisk , aby wybrać.
- 
- 5 Naciśnij przycisk  lub , aby zwiększyć lub zmniejszyć wartości i naciśnij przycisk , aby wybrać.
- 

## Lok. w budynku

### UWAGA:

Funkcja lokalizacji wewnętrznej jest dostępna dla modeli z najnowszą wersją konfiguracji programowej i sprzętowej. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Lokalizacja wewnętrzna jest używana do śledzenia lokalizacji użytkowników radiotelefonów. Gdy funkcja lokalizacji wewnętrznej jest aktywna, radiotelefon znajduje się w ograniczonym trybie wykrywalnym. Dedykowane sygnały nawigacyjne służą do lokalizacji radiotelefonu i określenia jego położenia.

## Włączanie i wyłączanie funkcji lokalizowania wewnętrznego

Wykonując jedną z poniższych czynności, możesz włączyć lub wyłączyć funkcję lokalizowania wewnętrznego.

- Dostęp do funkcji można uzyskać w menu.
  - a. Naciśnij przycisk , aby uzyskać dostęp do menu..

b. Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij przycisk , aby wybrać.

c. Naciśnij przycisk  lub , aby przejść do opcji Lokalizacja wewnętrzna i naciśnij przycisk , aby wybrać.

d. Naciśnij , aby włączyć lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne włączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego pojawi się na ekranie głównym.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat Włączanie nie powiodło się. Usłyszysz negatywny sygnał dźwiękowy

e. Naciśnij , aby wyłączyć lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne wyłączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego zniknie z ekranu głównego.
  - Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat Wyłączenie nie powiodło się. Usłyszysz negatywny sygnał dźwiękowy
- Dostęp do tej funkcji jest możliwy za pomocą zaprogramowanego przycisku.
    - a. Długie naciśnięcie przycisku zaprogramowanego pod funkcję **Lokalizowanie wewnętrzne** włączy funkcję lokalizowania wewnętrznego.
 

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne włączone. Rozlegnie się dźwięk informacyjny.

Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego pojawi się na ekranie głównym.
  - Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat **Włączenie nie powiodło się. Jeśli operacja zakończy się niepowodzeniem, usłyszysz sygnał ostrzegawczy.**
- b. Naciśnij przycisk zaprogramowany pod funkcję **Lokalizowania wewnętrznego**, aby wyłączyć Lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat **Lokalizowanie wewnętrzne wyłączone. Rozlegnie się dźwięk informacyjny.**

Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego zniknie z ekranu głównego.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat

**Wyłączenie nie powiodło się. Jeśli operacja zakończy się niepowodzeniem, usłyszysz sygnał ostrzegawczy.**

## Uzyskiwanie dostępu do informacji o punktach sygnalizacyjnych w lokalizacjach wewnętrznych

Postępuj zgodnie z procedurą, aby przejść do informacji sygnałów lokalizacji wewnętrznej.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do opcji Lokalizacja wewnętrzna i naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do Punktów sygnalizacyjnych i naciśnij przycisk , aby wybrać.

Na wyświetlaczu widoczne są informacje dotyczące punktów sygnalizacyjnych.

## Lista powiadomień

Radiotelefon ma Listę powiadomień, która zbiera wszystkie „nieodczytane” zdarzenia na danym kanale, np. nieprzeczytane wiadomości tekstowe, nieodebrane połączenia i alerty połączenia.

Ikona Powiadomienia pojawia się na pasku stanu, kiedy na Liście powiadomień jest przynajmniej jedna pozycja.

Maksymalna długość listy to 40 nieprzeczytanych zdarzeń. Kiedy lista jest zapelniona, nowa pozycja automatycznie zastępuje pozycję najstarszą.

### UWAGA:

Po odczytaniu pozycje są usuwane z Listy powiadomień.

## Dostęp do Listy powiadomień

Postępuj zgodnie z procedurą, aby uzyskać dostęp do Listy powiadomień.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..
- 2 Naciśnij przycisk  lub , aby przejść do pozycji Powiadomienie i wybierz przycisk , aby wybrać.
- 3 Naciśnij przycisk  lub , aby przejść dożądanego zdarzenia i wybierz przycisk , aby wybrać.

Przytrzymanie przycisku  spowoduje powrót do ekranu głównego.

## Praca Wi-Fi

Wi-Fi® jest zastrzeżonym znakiem towarowym firmy Wi-Fi Alliance®.

**UWAGA:**

Ta funkcja dotyczy tylko urządzeń DM4601e .

Funkcja ta umożliwi konfigurację sieci Wi-Fi oraz połączenie się z nią. Sieć Wi-Fi obsługuje aktualizacje oprogramowania sprzętowego radiotelefonu, wtyczek codeplug i zasobów, takich jak pakiety językowe i pliki zapowiedzi głosowych.

## Włączanie i wyłączenie Wi-Fi

Programowalny przycisk **Wi-Fi wł. lub wył.** jest przypisany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Ustawienia zapowiedzi głosowych dla zaprogramowanego przycisku **Wi-Fi wł. lub wył.** można dostosować do potrzeb użytkownika poprzez program CPS. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Wykonując jedną z poniższych czynności, możesz włączyć lub wyłączyć Wi-Fi.

- Naciśnij zaprogramowany przycisk **WiFi wł./wył.** Funkcja Zapowiedzi głosowej informuje o włączeniu lub wyłączeniu Wi-Fi.
- Dostęp do funkcji można uzyskać w menu.

- a. Naciśnij przycisk , aby uzyskać dostęp do menu..
- b. Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.
- c. Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi **wł.**, a następnie naciśnij przycisk , aby wybrać.

Naciśnij przycisk , aby włączyć sieć Wi-Fi. Na ekranie pojawi się oznaczenie  obok opcji **Włączone**.

Naciśnij przycisk , aby wyłączyć sieć Wi-Fi. Oznaczenie  obok informacji **Włączone** zniknie.

## Podłączanie do punktu dostępowego sieci

Po włączeniu funkcji sieci Wi-Fi radiotelefon skanuje i łączy się z punktem dostępowym.

Możesz także połączyć się z punktem dostępowym za pośrednictwem menu.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do punktu dostępowego, a następnie naciśnij przycisk , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Połączenia, a następnie naciśnij przycisk , aby wybrać.

---

- 6 Wprowadź hasło i naciśnij przycisk .

---

Gdy połączenie powiedzie się, radiotelefon wyświetli powiadomienie, a punkt dostępowy zostanie zapisany na liście profili.

## Sprawdzanie stanu połączenia Wi-Fi

Postępuj zgodnie z procedurą, aby sprawdzić stan połączenia Wi-Fi.

Naciśnij zaprogramowany przycisk **zapytania o status sieci Wi-Fi**, aby usłyszeć status połączenia odczytany za pośrednictwem funkcji Zapowiedzi głosowej. Zapowiedź głosowa wskazuje, że funkcja Wi-Fi jest wyłączona, włączona, ale nie podłączona lub włączona i podłączona.

- Po wyłączeniu Wi-Fi na wyświetlaczu zostanie wyświetlony komunikat WiFi **wyłączone**.

- Gdy radiotelefon jest podłączony do sieci, na wyświetlaczu pojawi się komunikat **WiFi wł.,** podłączono.
- Gdy radiotelefon jest włączony, ale niepodłączony do sieci, na wyświetlaczu pojawi się komunikat **WiFi wł.,** nie podłączono.

Ustawienia zapowiedzi głosowych dla wyników zapytania o stan sieci Wi-Fi można dostosować do potrzeb użytkownika w programie CPS. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

#### UWAGA:

Programowalny przycisk **zapytania o status sieci Wi-Fi** jest przypisywany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

## Odświeżanie listy sieci

Postępuj zgodnie z procedurą, aby odświeżyć listę sieci.

- Aby odświeżyć listę sieci poprzez menu, należy wykonać następujące czynności.

- Naciśnij przycisk , aby uzyskać dostęp do menu..
- Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.
- Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

Po otwarciu menu Sieci, radiotelefon automatycznie odświeża listę sieci.

- Po wejściu do menu Sieci, wykonaj następujące czynności, aby odświeżyć listę sieci.

Naciśnij przycisk  lub , aby odświeżyć i naciśnij przycisk , aby wybrać.

Radiotelefon zostanie odświeżony i wyświetli najnowszą listę sieci.

## Dodawanie sieci

Jeśli preferowana sieć nie jest na liście dostępnych sieci, należy wykonać następujące czynności, aby dodać sieć.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby Dodać Sieć i naciśnij przycisk , aby wybrać.

---

- 5 Wprowadź kod Service Set Identifier (identyfikator SSID) i naciśnij przycisk .

---

- 6 Naciśnij przycisk  lub , aby wybrać  
Otwórz i naciśnij przycisk , aby wybrać.

---

- 7 Wprowadź hasło i naciśnij przycisk .  
Radiotelefon wyświetla miniinformację o udanej operacji, informującą że sieć została pomyślnie zapisana.

---

## Wyświetlanie szczegółowych informacji z punktami dostępu do sieci

Postępuj według procedury, aby zobaczyć szczegółowe informacje o punktach dostępu do sieci.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do punktu dostępowego, a następnie naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby ustawić wyświetl szczegóły i naciśnij przycisk , aby wybrać.

Dla podłączonego punktu dostępu do sieci wyświetla się Service Set Identifier (identyfikator SSID), tryb zabezpieczeń, adres kontroli dostępu do nośników (MAC) i adres protokołu internetowego (IP).

Dla niepodłączonego punktu dostępu do sieci wyświetla się Service Set Identifier (identyfikator SSID) i tryb zabezpieczeń.

---

## Usuwanie punktów dostępu

Aby usunąć sieć punktów dostępowych z listy profili, należy wykonać następujące czynności.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do wybranego punktu dostępowego w sieci naciśnij przycisk , aby wybrać.

---

- 5 Naciśnij przycisk  lub  , aby **Usunąć** i naciśnij przycisk  , aby wybrać.
- 
- 6 Naciśnij przycisk  lub  , aby **Potwierdzić** i naciśnij przycisk  , aby wybrać.
- Radiotelefon wyświetla miniinformację o udanej operacji informującą, że wybrane punkty dostępu do sieci zostały pomyślnie usunięte.
- 

## Narzędzia

Ten rozdział wyjaśnia działanie funkcji narzędzi dostępnych w radiotelefonie.

## Włączanie/wyłączanie dźwięków/alertów radiotelefonu

Można włączyć lub wyłączyć wszystkie dźwięki i alerty radiotelefonu (z wyjątkiem dźwięku przychodzącego alertu alarmowego), jeżeli jest to konieczne.

Naciśnij zaprogramowany przycisk **Wszyst. Tony/alarmy**. Przycisk pozwala włączyć lub wyłączyć wszystkie dźwięki. Możesz również postępować zgodnie z następującą procedurą, aby uzyskać dostęp do tej funkcji z poziomu menu.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..
- 
- 2 Naciśnij przycisk  lub  , aby ustawić **Narzędzia** i naciśnij przycisk  , aby wybrać.
- 
- 3 Naciśnij przycisk  lub  , aby przejść do pozycji **Ustawienia radiotelefonu** i naciśnij naciśnij przycisk  , aby wybrać.
- 
- 4 Naciśnij przycisk  lub  , aby ustawić **Sygnały dźwiękowe/Alerty** i naciśnij przycisk  , aby wybrać.
-

5 Naciśnij przycisk  lub , aby wybrać menu Wszystkie. Tony, a następnie naciśnij przycisk , aby wybrać.

6 Naciśnij przycisk , aby włączyć lub wszystkie dźwięki i powiadomienia.

Na ekranie pojawi się oznaczenie  obok opcji Włączone.

Oznaczenie  obok informacji Włączone zniknie.

## Ustawianie wyrównania poziomu głośności alertu dźwiękowego

W razie potrzeby można wyrównać poziom głośności alertu dźwiękowego. Funkcja ta służy do regulacji głośności sygnałów/alarmów powyżej/poniżej poziomu głośności głosu ludzkiego.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij naciśnij przycisk , aby wybrać.

4 Naciśnij przycisk  lub , aby ustawić Sygnały dźwiękowe/Alerty i naciśnij przycisk , aby wybrać.

5 Naciśnij  lub , aby przejść do Przesunięcia głośności i naciśnij przycisk , aby wybrać

6 Naciśnij  lub , aby wybrać żadaną wartość głośności.

Radiotelefon wyemituje sygnał wzorcowy po każdej zmianie poziomu głośności o jeden stopień.

7 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby zapisać wybrany (widoczny) poziom głośności.
- Naciśnij przycisk , aby wyjść bez zmiany ustawień zwiększenia głośności.

## Włączanie lub wyłączanie sygnału zezwolenia na rozmowę

W zależności od potrzeb możesz włączać i wyłączać sygnał dźwiękowy zezwolenia na rozmowę.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

4 Naciśnij przycisk  lub , aby ustawić Sygnały dźwiękowe/Alerty i naciśnij przycisk , aby wybrać.

5 Naciśnij przycisk  lub , aby przejść do opcji Zezwol rozm, a następnie naciśnij przycisk , aby wybrać.

6 Naciśnij przycisk , aby włączyć/wyłączyć sygnał zezwolenia na rozmowę.

Na ekranie pojawi się oznaczenie  obok opcji Włączone.

Oznaczenie  obok informacji Włączone zniknie.

## Włączanie lub wyłączanie dźwięku alertu uruchamiania

W zależności od potrzeb możesz włączać i wyłączać dźwięk alertu uruchomienia.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby ustawić Sygnały dźwiękowe/Alerty i naciśnij przycisk , aby wybrać.

- 5 Naciśnij przycisk  lub , aby przejść do menu Włączanie i naciśnij przycisk , aby wybrać.

- 6 Naciśnij przycisk , aby włączyć lub wyłączyć dźwięk alertu uruchamiania.  
Na ekranie pojawi się oznaczenie  obok opcji Włączone.  
Oznaczenie  obok informacji Włączone zniknie.

## Konfigurowanie poziomu mocy

Możesz dostosować ustawienie wysokiej lub niskiej mocy radiotelefonu dla poszczególnych stref w ramach funkcji Connect Plus.

Maksymalna moc umożliwia łączność z radiostacjami w trybie Connect Plus, które znajdują się w znacznej odległości. Minimalna umożliwia łączność z radiostacjami w trybie Connect Plus położonymi bliżej.

Naciśnij zaprogramowany przycisk **Poziom mocy** pozwala przełączać pomiędzy wysoką a niską mocą nadawania.

Postępuj zgodnie z opisaną dalej procedurą, aby skorzystać z tej funkcji z poziomu menu urządzenia.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby ustawić Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby ustawić Moc i naciśnij przycisk , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby wybrać wymagane ustawienie i naciśnij przycisk , aby wybrać.

✓ pojawi się obok wybranego ustawienia.

Przytrzymaj przycisk , aby w dowolnym momencie powrócić do ekranu głównego.

Wyświetlacz powraca do poprzedniego ekranu.

## Zmiana trybu wyświetlacza

Można wybierać odpowiednio tryb Nocny lub Dzienny wyświetlacza radiotelefonu. Tryb zmienia paletę kolorów wyświetlacza.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Wyświetlacz, a następnie naciśnij przycisk , aby wybrać.

Wyświetlacz pokazuje Tr. dnia i Tryb nocny.

---

- 5 Naciśnij  lub , aby przejść dożądanego ustawienia i naciśnij klawisz , aby dokonać wyboru. ✓ Symbol pojawi się obok wybranego ustawienia.
- 

## Regulacja jasności wyświetlacza

Można odpowiednio regulować jasność wyświetlacza radiotelefonu.

### UWAGA:

Jasności wyświetlacza nie można ustawić po włączeniu funkcji „Jasność automatyczna”.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..
- 

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.
- 

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij naciśnij przycisk , aby wybrać.
- 

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Wyświetlacz, a następnie naciśnij przycisk , aby wybrać.
- 

- 5 Naciśnij przycisk  lub , aby przejść do pozycji Jasność, a następnie naciśnij przycisk , aby wybrać.

Na wyświetlaczu pojawi się pasek postępu.

---

- 6 Zmniejsz jasność wyświetlacza, naciskając przycisk , lub zwiększ ją, naciskając przycisk .

Wybierz ustawienie od 1 do 8. Naciśnij przycisk

 , aby zatwierdzić wpis.

---

## Włączanie/wyłączanie ekranu powitalnego

Można włączyć lub wyłączyć ekran powitalny, jeżeli jest to konieczne.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub  , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk  , aby wybrać.

---

- 4 Naciśnij przycisk  lub  , aby przejść do pozycji Wyświetlacz, a następnie naciśnij przycisk  , aby wybrać.

---

- 5 Naciśnij przycisk  lub  , aby przejść do menu Ekran powit., a następnie naciśnij przycisk  , aby wybrać.

---

- 6 Naciśnij przycisk  , aby włączyć lub wyłączyć Ekran powitalny.  
Na ekranie pojawi się oznaczenie  obok opcji Włączone.  
Oznaczenie  obok informacji Włączone zniknie.

---

## Język

Możesz zmienić wersję językową menu radiotelefonu.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do pozycji Języki i wybierz naciśnij przycisk , aby wybrać.

---

5 Przycisk  lub  pozwala przejść do wybranej wersji językowej. Naciśnij przycisk , aby dokonać wyboru. Obok wybranej wersji językowej pojawi się symbol .

---

## Włączanie/wyłączanie wskaźnika LED

Można włączyć lub wyłączyć wskaźnik LED, jeżeli jest to konieczne.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby wybrać menu Wskaźnik LED i naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  , aby włączyć lub wyłączyć wskaźnik LED.

Na ekranie pojawi się oznaczenie ✓ obok opcji Włączone.

Oznaczenie ✓ obok informacji Włączone zniknie.

4 Naciśnij przycisk  lub  , aby przejść do opcji Typ przewodu i naciśnij przycisk  , aby wybrać.

5 Aktualny typ przewodu jest oznaczony za pomocą symbolu ✓.

## Identyfikacja typu kabla

Możesz wybrać typ kabla radiotelefonu.

1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub  , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać.

3 Naciśnij przycisk  lub  , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij naciśnij przycisk  , aby wybrać.

## Komunikat głosowy

Ta funkcja umożliwia podanie w formie zapowiedzi głosowej Strefy i Kanału, który użytkownik właśnie zaprogramował, lub sygnalizowanie naciśnięcia przycisku programowanego. Powiadomienie dźwiękowe można dostosować do wymagań klienta. Funkcja jest zazwyczaj przydatna, kiedy użytkownik znajduje się w warunkach utrudniających odczyt wyświetlacza.

1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub  , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać.

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do menu Zapow głos. i naciśnij przycisk , aby wybrać.

Możesz również użyć przycisku lub  lub , aby zmienić wybraną opcję.

---

5 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby włączyć Komunikat głosowy. Na ekranie pojawi się oznaczenie  obok opcji .
  - Naciśnij przycisk , aby wyłączyć Komunikat głosowy. Oznaczenie  obok informacji  zniknie.
- 

## Menu ogr.

Ustaw czas, przez który menu radiotelefonu pozostaje otwarte, zanim wyświetlacz przywróci Stronę główną.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do pozycji Wyświetlacz, a następnie naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby przejść do pozycji Menu ogr. i naciśnij przycisk , aby wybrać.

---

6 Naciśnij przycisk  lub , aby przejść do żądanego ustawienia i wybierz naciśnij przycisk , aby wybrać.

---

## Włączanie i wyłączanie funkcji klakson/światła

Ta funkcja musi być zainstalowana przez sprzedawcę poprzez tylne złącze akcesoriów radiotelefonu.

Radiotelefon może zawiadamiać użytkownika o przychodzących połączeniach światłami i klaksonem. Kiedy funkcja jest aktywna, połączenia radiotelefonu są sygnalizowane światłami i klaksonem pojazdu.

- Wykonaj jedną z następujących czynności:
  - Naciśnij przycisk programowany **Klakson/Światła**, aby włączyć lub wyłączyć tę funkcję. Pomiń poniższe czynności.

- Naciśnij przycisk , aby uzyskać dostęp do menu..
- 

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do menu Klaks/świat, a następnie naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk , aby włączyć/wyłączyć funkcję klaksonu/światel.

Na ekranie pojawi się oznaczenie  obok opcji Włączone.

Oznaczenie  obok informacji Włączone zniknie.

---

## Zmiana ustawień działania dwufunkcyjnego pokręćła.

Radiotelefon jest wyposażony w **Pokręćło głośności/zmiany kanału**. Dezaktywacja opcji podwójnego działania umożliwia pracę pokręćła tylko w trybie głośności.

- 1  , aby uzyskać dostęp do menu. .

---

- 2 Naciśnij przycisk  lub  , aby przejść do menu **Narzędz.**, a następnie naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub  , aby przejść do opcji **Ustaw. rtf.** i naciśnij przycisk  , aby wybrać.

---

- 4 Naciśnij przycisk  lub  , aby przejść do opcji **Pokr. dwufnk.**. Wybierz pozycję naciśnij przycisk  , aby wybrać.

- 5 Na ekranie pojawią się opcje **Tylko głośn** oraz **Głośn i kan.** Użyj  lub  , aby przejść do żądanego ustawienia i naciśnij przycisk  , aby wybrać.  
Symbol  pojawi się obok wybranego ustawienia.  
Wyświetlacz powraca do poprzedniego ekranu.

## Mikrofon cyfrowy – funkcja AGC (Mic AGC-D)

Ta funkcja automatycznie reguluje wzmocnienie mikrofonu radiotelefonu podczas nadawania w systemie cyfrowym. Wycisza głośne dźwięki lub wzmacnia ciche dźwięki do zdefiniowanej wartości, aby zapewnić stały poziom dźwięku.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub  , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać.

3 Naciśnij przycisk  lub  , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij naciśnij przycisk  , aby wybrać.

4 Użyj  lub  , aby przejść do pozycji AGC-D mikr. i naciśnij przycisk  , aby wybrać.

- 5 Wykonaj jedną z następujących czynności:
- Naciśnij  , aby włączyć opcję **AGC-D mikr.** Na ekranie pojawi się oznaczenie  obok opcji Włączone
  - Naciśnij  , aby wyłączyć opcję **AGC-D mikr.** Oznaczenie  zniknie z miejsca obok opcji Włączone .

## Inteligentny dźwięk

Radiotelefon potrafi automatycznie zwiększyć poziom głośności, jeśli z otoczenia dobiega hałas, uwzględniając ruchome i nieruchome źródła hałasu. Ta funkcja dotyczy jedynie odbioru i nie ma wpływu na transmitowany dźwięk.

5 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby włączyć inteligentne audio. Na ekranie pojawi się oznaczenie  obok opcji **Włączone**.
- Naciśnij przycisk , aby wyłączyć inteligentne audio. Oznaczenie  obok informacji **Włączone** zniknie.

## Włączenie lub wyłączenie funkcji akustycznego tłumika sprzężeń

Ta funkcja umożliwia minimalizowanie sprzężeń akustycznych w odbieranych połączeniach.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

3 Naciśnij przycisk  lub , aby przejść do pozycji Ustawienia radiotelefonu i naciśnij naciśnij przycisk , aby wybrać.

4 Naciśnij przycisk  lub , aby przejść do menu Tłum. AF, a następnie naciśnij przycisk , aby wybrać.

Możesz również użyć przycisku lub , aby zmienić wybraną opcję.

5 Wykonaj jedną z poniższych czynności:

- Naciśnij przycisk , aby włączyć funkcję tłumienia sprzężenia akustycznego. Na ekranie pojawi się oznaczenie  obok opcji **Włączone**.
- Naciśnij przycisk , aby wyłączyć funkcję tłumienia sprzężenia akustycznego. Oznaczenie  obok informacji **Włączone** zniknie.

## Włączanie i wyłączenie GNSS

Global Navigation Satellite System (GNSS) to system nawigacji satelitarnej, który pozwala dokładnie określać położenie geograficzne radiotelefonu. GNSS korzysta z systemów Global Positioning System (GPS) oraz Global Navigation Satellite System (GLONASS).

### UWAGA:

Wybrane modele radiotelefonów mogą korzystać z nawigacji GPS i GLONASS. Ustawienie GNSS należy skonfigurować za pomocą oprogramowania CPS. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

- 1 Wykonaj jedną z następujących czynności:
    - Aby włączyć lub wyłączyć tę funkcję, naciśnij zaprogramowany przycisk **GNSS**. Pomiń poniższe czynności.
    - Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- 

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.
- 

- 4 Naciśnij  lub , aby przejść do pozycji GNSS. Naciśnij , aby wybrać.
- 

- 5 Naciśnij przycisk , aby włączyć/wyłączyć funkcję GNSS.

Jeśli są włączone, obok informacji **Włączone** pojawi się .

Jeśli nie,  obok opcji **Włączone** zniknie.

Patrz [Sprawdzanie informacji GNSS na str. 378](#), aby zapoznać się ze szczegółami dotyczącymi uzyskiwania informacji GNSS.

## Wyświetlanie ogólnych informacji dotyczących radiotelefonu

W pamięci radiotelefonu zapisywane są następujące informacje:

- Akumulator
- Stopień nachylenia (Akcelerometr)
- Indeks numeru modelu radiotelefonu
- Suma kontrolna pliku codeplug dla Option Board Over-the-Air (OTA)
- Numer stacji
- Informacje o stacji
- Alias oraz ID radiotelefonu
- Oprogramowanie sprzętowe (Firmware) i wersje codeplug
- Informacje GNSS

W dowolnym momencie naciśnij przycisk  , aby powrócić do poprzedniego ekranu. Przytrzymanie przycisku

 pozwala wrócić do Ekranu głównego. Radiotelefon zamyka bieżący ekran po zakończeniu odliczania czasu nieaktywności.

## Sprawdzanie indeksu numeru modelu radiotelefonu

Jest to numer indeksu identyfikujący sprzęt w określonym modelu radiotelefonu. Administrator systemu radiotelefonicznego może poprosić o ten numer przy przygotowywaniu nowego codeplug płytki opcji dla radiotelefonu.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub  , aby przejść do pozycji Informacje o radiotelefonie i naciśnij przycisk  , aby wybrać.

---

- 4 Użyj  lub , aby przejść do opcji Indeks modelu i naciśnij przycisk , aby wybrać.  
Na wyświetlaczu pojawi się indeks numeru modelu.

## Sprawdzanie sumy kontrolnej pliku codeplug płytki opcji OTA

Jeśli administrator systemu radiotelefonicznego zaleci przejrzanie sumy kontrolnej pliku codeplug płytki opcji OTA, należy wykonać poniższe instrukcje. Ta opcja menu jest dostępna tylko po otrzymaniu najnowszej aktualizacji codeplug płytki opcji metodą OTA.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..
- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do pozycji OB OTA CPProc i naciśnij przycisk , aby wybrać.

Na wyświetlaczu pojawią się litery i cyfry. Przekaż te informacje administratorowi systemu radiotelefonicznego dokładnie w tej postaci.

## Wyświetlanie identyfikatora stacji (numeru stacji)

### UWAGA:

Jeśli radiotelefon nie jest aktualnie zarejestrowany w stacji, na wyświetlaczu pojawi się komunikat Nie zarejestrowany.

Przy rejestracji radiotelefonu w stacji Connect Plus na krótko pojawia się identyfikator stacji. Przy rejestracji radiotelefon na ogół nie wyświetla numeru stacji. Aby

wyświetlić zarejestrowany numer stacji, należy wykonać następujące czynności:

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby ustawić Narzędzia i naciśnij przycisk  , aby wybrać

---

- 3 Naciśnij przycisk  lub  , aby przejść do pozycji Informacje o radiotelefonie i naciśnij przycisk  , aby wybrać.

---

- 4 Naciśnij przycisk  lub  aby przejść do opcji Nr stacji i naciśnij przycisk  , aby wybrać.  
Na wyświetlaczu pojawi się identyfikator sieciowy i numer stacji.

---

## Sprawdzanie informacji o stacji

### UWAGA:

Jeśli radiotelefon nie jest aktualnie zarejestrowany w stacji, na wyświetlaczu pojawi się komunikat **Nie zarejestrowany**.

Funkcja Informacje o stacji podaje informacje, które mogą być przydatne dla technika serwisu. Zawiera ona następujące informacje:

- Numer bieżącego przemiennika kanału sterującego.
- RSSI: ostatnia wartość siły sygnału zmierzona z przemiennika kanału kontrolnego.
- Lista sąsiadów przesłana przez przemiennik kanału kontrolnego (pięć liczb oddzielonych przecinkami).

Jeśli serwisant poprosi Cię o użycie tej funkcji, podaj wyświetlone informacje dokładnie w formie, w jakiej pojawiły się na ekranie.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do opcji Informacje o stacji i naciśnij przycisk , aby wybrać.  
Na ekranie pojawią się informacje o stacji.

---

## Sprawdzanie ID radiotelefonu

Ta funkcja pozwala wyświetlić ID (identyfikator) radiotelefonu.

Wykonaj procedurę opisaną dalej, aby uzyskać dostęp do funkcji z poziomu ekranu radiotelefonu.

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Mój ID, a następnie naciśnij przycisk , aby wybrać.  
Na wyświetlaczu pojawi się ID radiotelefonu.

---

## Sprawdzanie wersji oprogramowania sprzętowego i wersji codeplug

W radiotelefonie zostanie wyświetlona wersja oprogramowania sprzętowego.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Wersje, a następnie naciśnij przycisk , aby wybrać.  
Zostanie wyświetlona lista z następującymi informacjami:

- Wersja oprogramowania sprzętowego (radiotelefonu)
- Wersja codeplug (radiotelefonu)
- Wersja oprogramowania sprzętowego płytki opcji
- Wersja pliku częstotliwości płytki opcji
- Wersja sprzętu płytki opcji
- Wersja codeplug płytki opcji

## Sprawdzanie dostępności aktualizacji

W systemie Connect Plus można bezprzewodowo aktualizować określone pliki (plik codeplug płytki opcji, plik częstotliwości sieci oraz plik oprogramowania sprzętowego płytki opcji).

### UWAGA:

Skontaktuj się ze sprzedawcą lub administratorem sieci, aby ustalić, czy ta funkcja jest dostępna dla radiotelefonu.

W każdym radiotelefonie Connect Plus z wyświetlaczem można sprawdzić sumę kontrolną codeplug płytki opcji OTA, wersję pliku częstotliwości oraz wersję pliku oprogramowania sprzętowego płytki opcji przy użyciu opcji

menu. Dodatkowo w radiotelefonach z wyświetlaczem, w których włączono obsługę transferu plików OTA, może pojawić się informacja o wersji „oczekującego pliku”. „Oczekujący plik” to plik częstotliwości lub plik oprogramowania sprzętowego płytki opcji, o którym radiotelefon Connect Plus został powiadomiony za pomocą wiadomości systemowej, ale nie zostały odebrane jeszcze wszystkie pakiety pliku. Jeśli w radiotelefonie Connect Plus z wyświetlaczem istnieje plik oczekujący, w menu można wykonać następujące czynności:

- wyświetlenie numeru wersji oczekującego pliku;
- wyświetlenie informacji o procencie pakietów, które zostały już odebrane;
- wysłanie żądania do radiotelefonu Connect Plus dotyczącego wznowienia odbioru pakietów pliku.

Jeśli w radiotelefonie włączono bezprzewodowy transfer plików (OTA) w sieci Connect Plus, może się zdarzyć, że radiotelefon będzie automatycznie rozpoczynać transfer plików bez wcześniejszego powiadomienia użytkownika. Kiedy radiotelefon zbiera pakiety plików, dioda LED miga szybko, a radiotelefon wyświetla ikonę dużej ilości danych na pasku statusu ekranu głównego.

#### UWAGA:

W radiotelefonie Connect Plus nie można równocześnie pobierać pakietów pliku i odbierać połączeń. Aby anulować transfer plików, naciśnij i zwolnij przycisk **PTT**. W efekcie radiotelefon zażąda połączenia z wybraną nazwą kontaktu, a ponadto anuluje transfer plików, który będzie można wznowić w późniejszym czasie.

Istnieje kilka przyczyn ponownego rozpoczynania transferu plików. Pierwszy przykład dotyczy wszystkich typów plików OTA. Kolejne przykłady dotyczą tylko pliku częstotliwości sieci i pliku oprogramowania sprzętowego płytki opcji:

- Administrator systemu radiotelefonicznego ponownie inicjuje transfer plików OTA.
- Upływa wstępnie zdefiniowany czas na zegarze płytki opcji, co powoduje automatyczne wznowienie procesu pobierania pakietów.
- Czas na zegarze jeszcze nie upłynął, ale użytkownik radiotelefonu zażądał wznowienia transferu plików, wybierając odpowiednią opcję menu.

Po zakończeniu pobierania wszystkich pakietów pliku w radiotelefonie Connect Plus należy uaktualnić go przy użyciu nowo pobranego pliku. W przypadku pliku częstotliwości sieci jest to proces automatyczny i nie

wymaga resetowania radiotelefonu. W przypadku pliku bloku codeplug płytki opcji jest to proces automatyczny, który spowoduje krótką przerwę usługi podczas wczytywania nowych informacji o codeplug płytki opcji oraz ponownego pobierania informacji o stacji sieciowej. Szybkość uaktualniania radiotelefonu do nowej wersji pliku oprogramowania sprzętowego płytki opcji zależy od ustawień radiotelefonu, które zostały skonfigurowane przez sprzedawcę lub administratora systemu. Uaktualnianie radiotelefonu rozpocznie się od razu po pobraniu wszystkich pakietów pliku albo przy kolejnym włączeniu radiotelefonu przez użytkownika.

#### **UWAGA:**

Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Uaktualnianie do nowej wersji pliku oprogramowania sprzętowego płytki opcji trwa kilka sekund i wymaga zresetowania radiotelefonu przez płytkę opcji Connect Plus. Po rozpoczęciu uaktualniania użytkownik radiotelefonu nie może nawiązywać ani odbierać połączeń, aż do zakończenia tego procesu. Podczas trwania procesu radiotelefon wyświetla monit o niewyłączanie radiotelefonu.

## Plik oprogramowania sprzętowego

Niniejszy rozdział zawiera informacje dotyczące oprogramowania sprzętowego radiotelefonu.

### Aktualizacja oprogramowania sprzętowego

#### **UWAGA:**

Jeśli plik oprogramowania sprzętowego płytki opcji nie jest aktualny (oraz jeśli radiotelefon częściowo pobrał nowszą wersję oprogramowania sprzętowego płytki opcji), na ekranie radiotelefonu wyświetlana jest lista zawierająca dodatkowe opcje: Wersja, %Pobrano oraz Pobierz.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do pozycji Narzędzia i naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji **Informacje o radiotelefonie** i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do pozycji **Aktualizacje**, a następnie naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby przejść do pozycji **Oprogramowanie sprzętowe**, a następnie naciśnij przycisk , aby wybrać.

Na wyświetlaczu pojawi się komunikat **Oprogr. sprzęt. jest aktualne**.

---

## Oczekujące oprogramowanie sprzętowe — wersja

1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub , aby ustawić **Narzędzia** i naciśnij przycisk , aby wybrać.

---

3 Naciśnij przycisk  lub , aby przejść do pozycji **Informacje o radiotelefonie** i naciśnij przycisk , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do pozycji **Aktualizacje**, a następnie naciśnij przycisk , aby wybrać.

---

5 Naciśnij przycisk  lub , aby przejść do pozycji **Oprogramowanie sprzętowe**, a następnie naciśnij przycisk , aby wybrać.

---

6 Naciśnij przycisk  lub , aby przejść do pozycji **Wersja**, a następnie naciśnij przycisk , aby wybrać.

Jeśli dostępny jest oczekujący plik oprogramowania sprzętowego płytki opcji, na wyświetlaczu widoczny

jest numer wersji oczekującego oprogramowania sprzętowego.

Jeśli nie ma żadnego oczekującego pliku oprogramowania sprzętowego, na wyświetlaczu pojawia się komunikat Oprogr. sprzęt. jest aktualne.

## Oczekujący plik oprogramowania sprzętowego — pobrano %

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub  , aby przejść do pozycji Narzędzia i naciśnij przycisk  , aby wybrać.

---

- 3 Naciśnij przycisk  lub  , aby przejść do pozycji Informacje o radiotelefonie i naciśnij przycisk  , aby wybrać.

- 4 Naciśnij przycisk  lub  , aby przejść do pozycji Aktualizacje, a następnie naciśnij przycisk  , aby wybrać.

- 5 Naciśnij przycisk  lub  , aby przejść do pozycji Oprogramowanie sprzętowe, a następnie naciśnij przycisk  , aby wybrać.

- 6 Naciśnij przycisk  lub  , aby przejść do pozycji Pobrano %, a następnie naciśnij przycisk  , aby wybrać.

Na ekranie pojawi się informacja o procencie już pobranych pakietów pliku oprogramowania sprzętowego.

### UWAGA:

Przy 100% należy wyłączyć i włączyć radiotelefon, aby zainicjować uaktualnienie oprogramowania sprzętowego.

## Oczekujące oprogramowanie sprzętowe — pobieranie

Jeśli w radiotelefonie Connect Plus przerwano wcześniej transfer OTA pliku oprogramowania sprzętowego płytki opcji, pozostawiając pobraną część pliku, po upływie czasu na wewnętrznym zegarze urządzenie automatycznie dołączy do transferu pliku (o ile nadal trwa). Aby urządzenie ponownie dołączyło do trwającego transferu oprogramowania sprzętowego płytki opcji przed upływem czasu na tym zegarze wewnętrznym, należy użyć opcji Pobierz, którą opisano poniżej.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do pozycji Narzędzia i naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Aktualizacje, a następnie naciśnij przycisk , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby przejść do pozycji Oprogramowanie sprzętowe, a następnie naciśnij przycisk , aby wybrać.

---

- 6 Naciśnij przycisk  lub , aby przejść do pozycji Pobierz, a następnie naciśnij przycisk , aby wybrać.

Na ekranie pojawią się następujące informacje:

Materiały dostępne do pobrania	Rozpocznij pobieranie
Brak materiałów dostępnych do pobrania	Pobieranie niedostępne

- 7 Wykonaj jedną z następujących czynności:

[Wyślij informację zwrotną](#)

- Wybierz pozycję **Tak** i naciśnij , aby rozpocząć pobieranie.
- Wybierz pozycję **Nie** i naciśnij , aby powrócić do poprzedniego menu.

## Plik częstotliwości

Niniejszy rozdział zawiera informacje na temat pliku częstotliwości radiotelefonu.

### Aktualizacja pliku częstotliwości

#### UWAGA:

Jeśli plik częstotliwości nie jest aktualny (oraz jeśli radiotelefon częściowo pobrał nowszą wersję pliku częstotliwości), na ekranie radiotelefonu wyświetlana jest lista zawierająca dodatkowe opcje: Wersja, %Pobrano oraz Pobierz.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Częstotliwość i naciśnij przycisk , aby wybrać.

Na ekranie pojawi się komunikat Plik częstotliwości jest aktualny.

### Oczekujący plik częstotliwości – wersja

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do pozycji Aktualizacje, a następnie naciśnij przycisk , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby przejść do pozycji Częstotliwość i naciśnij przycisk , aby wybrać.

---

- 6 Naciśnij przycisk  lub , aby przejść do pozycji Wersja, a następnie naciśnij przycisk , aby wybrać.  
Jeśli jest dostępny oczekujący plik częstotliwości, na wyświetlaczu pojawi się numer wersji tego pliku.

### Oczekujący plik częstotliwości - Pobrano %

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby ustawić Narzędzia i naciśnij przycisk , aby wybrać

---

- 3 Naciśnij przycisk  lub , aby przejść do pozycji Informacje o radiotelefonie i naciśnij naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do pozycji **Aktualizacje**, a następnie naciśnij przycisk , aby wybrać.

- 5 Naciśnij przycisk  lub , aby przejść do pozycji **Pobrano %**, a następnie naciśnij przycisk , aby wybrać.

Na ekranie pojawi się informacja o pobieranych pakietach pliku częstotliwości.

### ***Oczekujący plik częstotliwości – pobieranie***

Jeśli w radiotelefonie Connect Plus przerwano wcześniej transfer OTA pliku częstotliwości sieci, pozostawiając pobraną część pliku, po upływie czasu w wewnętrznym zegarze urządzenie automatycznie dołącza do transferu pliku (o ile nadal trwa). Aby urządzenie ponownie dołączyło do trwającego transferu pliku częstotliwości sieci przed

upływem czasu w zegarze, należy użyć opcji **Pobierz**, którą opisano poniżej.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby ustawić **Narzędzia** i naciśnij przycisk , aby wybrać

- 3 Naciśnij przycisk  lub , aby przejść do pozycji **Informacje o radiotelefonie** i naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do pozycji **Aktualizacje**, a następnie naciśnij przycisk , aby wybrać.

- 5 Naciśnij przycisk  lub , aby przejść do pozycji **Częstotliwość** i naciśnij przycisk , aby wybrać.

- 6 Naciśnij przycisk  lub , aby przejść do pozycji **Pobierz**, a następnie naciśnij przycisk , aby wybrać.

Pobieranie aktualnie nie jest niedostępne	Pobieranie niedostępne
Pobieranie aktualnie jest dostępne	Rozpocznij pobieranie

- 7 Wykonaj jedną z następujących czynności:
- Wybierz opcję **Tak** i naciśnij przycisk, aby rozpocząć pobieranie.
  - Wybierz opcję **Nie** i naciśnij przycisk, aby powrócić do poprzedniego menu.

## Sprawdzanie informacji GNSS

Ta funkcja umożliwi wyświetlanie na ekranie radiotelefonu informacji GNSS, takich jak:

- Szerokość geograficzna
- Długość geograficzna

- Wysokość
- Kierunek
- Prędkość
- Poziome rozmycie dokładności (HDOP)
- Satelity
- Wersja

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby ustawić **Narzędzia** i naciśnij przycisk , aby wybrać.

- 3 Naciśnij przycisk  lub , aby przejść do pozycji **Informacje o radiotelefonie** i naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do opcji **Informacje GNSS** i naciśnij przycisk , aby wybrać.

- 5 Naciśnij przycisk  lub  , aby przejść do wybranej pozycji i naciśnij przycisk  , aby wybrać.
- Na wyświetlaczu pojawią się żądane informacje GNSS.

---

Patrz [Włączanie i wyłączanie GNSS na str. 364](#), aby zapoznać się ze szczegółowymi informacjami dotyczącymi GNSS.

Tę stronę celowo pozostawiono pustą.

## Inne systemy

Funkcje, które są dostępne dla użytkowników radiotelefonu w ramach tego systemu są opisane w tym rozdziale.

### Przycisk Push-to-Talk

Przycisk Push-to-Talk (**PTT**) służy dwóm podstawowym celom.

- Po nawiązaniu połączenia przycisk **PTT** umożliwia nadawanie do innych radiotelefonów uwzględnionych w danym połączeniu. Mikrofon jest włączany po naciśnięciu przycisku **PTT**.
- Jeżeli połączenie nie zostało nawiązane, przycisk **PTT** umożliwia zainicjowanie nowego połączenia.

Naciśnij dłużej przycisk **PTT**, aby rozmawiać. Aby słuchać, zwolnij przycisk **PTT**.

Jeśli zostanie włączona opcja Sygnał zezwolenia na rozmowę albo zostanie włączona funkcja Pogłosu PTT , przed rozpoczęciem rozmowy zaczekaj na zakończenie emisji krótkiego dźwięku alertu.

 Jeżeli jest włączona funkcja wskazywania wolnego kanału w radiotelefonie (zaprogramowana przez sprzedawcę), usłyszysz krótki dźwięk alertu w chwili, gdy

przycisk **PTT** zostanie zwolniony w radiotelefonie docelowym (radiotelefon, który odbiera połączenie), informujący o tym, że kanał jest wolny i można odpowiadać.

 W przypadku przerwania połączenia słyhać ciągły sygnał zakazu rozmowy. Po usłyszeniu ciągłego sygnału zakazu rozmowy należy zwolnić przycisk **PTT**.

## Programowalne przyciski

W zależności od długości naciśnięcia przycisku, sprzedawca może zaprogramować przyciski jako skróty do funkcji radiotelefonu.

### Krótkie naciśnięcie

Szybkie naciśnięcie i zwolnienie przycisku.

### Naciśnij i przytrzymaj przycisk

Naciśnięcie i przytrzymanie przez zaprogramowany czas.

### UWAGA:

Więcej informacji na temat zaprogramowanego czasu naciśnięcia **przycisku alarmowego**: [Tryb awaryjny na str. 463](#).

## Konfigurowalne funkcje radiotelefonu

Poniższe funkcje radiotelefonu można przypisać do przycisków programowalnych.

### Otoczenie audio

Pozwala wybrać środowisko użytkownika radiotelefonu.

### Profile dźwięku

Pozwala wybrać odpowiedni profil audio.

### Przełącznik audio Bluetooth®

Przełącza ścieżkę dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a zewnętrznym urządzeniem Bluetooth.

### Połączenie Bluetooth

Inicjuje operację znajdowania i łączenia z urządzeniem Bluetooth.

### Rozłączenie Bluetooth

Zamyka wszystkie istniejące połączenia Bluetooth między radiotelefonem a urządzeniami Bluetooth.

### Tryb wykrywania Bluetooth

Radiotelefon rozpoczyna pracę w trybie wykrywania łączności Bluetooth.

### Alert połączenia

Zapewnia bezpośredni dostęp do listy kontaktów, umożliwiając wybranie kontaktu, do którego ma zostać wysłany alert o połączeniu.

### Przekierowanie wywołania

Włącza lub wyłącza funkcję przekierowywania połączeń.

### Dziennik połączeń

Pozwala wybrać listę dziennika połączeń.

### Ogłoszenie kanału

Odtwarza zapowiedzi głosowe strefy i kanału dla bieżącego kanału.

### Kontakty

Zapewnia bezpośredni dostęp do listy kontaktów.

### Tryb awaryjny

W zależności od zaprogramowanej konfiguracji powoduje zainicjowanie lub anulowanie trybu awaryjnego.

### Nagłośnienie zewnętrzne

Włącza i wyłącza routing sygnału audio między wzmacniaczem głośnika i wewnętrznym systemem nagłośnienia radiotelefonu.

**Lok. w budynku**

Włącza i wyłącza funkcję lokalizacji wewnętrznej.

**Inteligentny dźwięk**

Włącza lub wyłącza inteligentny dźwięk.

**Wybieranie ręczne **

Inicjuje połączenie indywidualne przez wprowadzenie dowolnego ID użytkownika.

**Ręczny roaming miejsca <sup>5</sup> **

Włącza ręczne wyszukiwanie stacji.

**AGC mikrofonu**

Włącza i wyłącza automatyczne wzmocnienie wewnętrznego mikrofonu (AGC).

**Nasłuch**

Funkcja umożliwi monitorowanie aktywności w wybranym kanale.

**Powiadomienia**

Zapewnia bezpośredni dostęp do listy powiadomień.

**Usuwanie kanału zakłócającego<sup>5</sup>**

Tymczasowo usuwa niepożądany kanał, z wyjątkiem kanału wybranego z listy skanowania. Wybrany kanał

odnosi się do wybranej kombinacji strefa/kanał, z której inicjowane jest skanowanie.

**Szybki dostęp **

Natychmiastowo aktywuje wstępnie zdefiniowane połączenie prywatne, telefoniczne lub grupowe, alert połączenia, wiadomość tekstową lub domowy zwrotny.

**Funkcja płytki opcji**

Włączenie lub wyłączenie funkcji płytki opcji dla kanałów uaktywnianych płytką opcji.

**Otwarty monitor<sup>5</sup>**

Monitoruje ruch radiowy na wybranym kanale do momentu wyłączenia tej funkcji.

**Telefon **

Zapewnia bezpośredni dostęp do listy kontaktów telefonu.

**Prywatne **

Włącza lub wyłącza funkcję prywatności.

**System nagłośnienia (PA)**

Włącza lub wyłącza system nagłośnienia radiotelefonu.

**Alias oraz ID radiotelefonu**

Wyświetla alias oraz identyfikator radiotelefonu.

<sup>5</sup> Nie dotyczy systemu Capacity Plus.

**Kontrola radiotelefonu** 

Sprawdza, czy radiotelefon jest aktywny w systemie.

**Dezaktywacja radiotelefonu** 

Umożliwia zdalne wyłączenie radiotelefonu docelowego.

**Aktywacja radiotelefonu** 

Umożliwia zdalne włączanie radiotelefonu docelowego.

**Zdalny nastuch**

Włącza mikrofon radiotelefonu docelowego bez sygnalizowania.

**Przełącznik/Talkaround<sup>5</sup>**

Przełączenie pomiędzy trybem korzystania z przełącznika a komunikowaniem się bezpośrednio z innym radiotelefonem.

**Resetowanie kanału głównego**

Ustawia nowy kanał główny.

**Wyciszenie przypomnienia kanału głównego**

Wycisza przypomnienia kanału głównego.

**Skanuj<sup>6</sup>**

Włącza lub wyłącza skanowanie.

**Informacje o stacji**

Wyświetla aktualną nazwę stacji oraz ID systemu Capacity Plus — Wiele stacji.

Odtwarzanie wiadomości głosowych powiadomień obszarowych dla bieżącej stacji, gdy opcja Odczytywanie powiadomień jest włączona.

**Blokada stacji<sup>5</sup>** 

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

**Kontrola telemetrii** 

Kontroluje końcówkę wyjściową radiotelefonu lokalnego lub zdalnego.

**Wiadomość tekstowa** 

Pozwala wybrać menu wiadomości tekstowych.

**Przycisk zdalnego przerwania transmisji** 

Zatrzymuje trwające połączenie, które można przerwać, w celu zwolnienia kanału.

**Wzmocnienie głoski „r”**

Umożliwia włączenie lub wyłączenie funkcji wzmocnienia głoski „r”.

<sup>6</sup> Nie dotyczy systemu Capacity Plus – Pojedyncza stacja.

**Zapowiedź głosowa wł./wył.**

Włącza i wyłącza funkcję zapowiedzi głosowej.

**Nadawanie uruchamiane głosem (VOX)**

Włącza lub wyłącza funkcję VOX.

**Wi-Fi**

Włączanie i wyłączanie Wi-Fi.

**Wybór obszaru**

Umożliwia wybór strefy z listy.

## Konfigurowalne ustawienia/ narzędzia

Poniższe funkcje i ustawienia radiotelefonu można przypisać do przycisków programowalnych.

**Tony/Alerty**

Włącza lub wyłącza wszystkie sygnały dźwiękowe i alerty.

**Podświetlenie**

Włącza lub wyłącza podświetlenie wyświetlacza.

**Kanał wyżej/niżej**

W zależności od sposobu zaprogramowania zmienia kanał na poprzedni lub następny.

**Tryb wyświetlania**

Włącza i wyłącza tryb dzienny/nocny wyświetlacza.

**Poziom mocy**

Przełącza między wysokim i niskim poziomem mocy nadawania.

## Dostęp do zaprogramowanych funkcji

Postępuj zgodnie z procedurą, aby uzyskać dostęp do zaprogramowanych funkcji.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk. Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

---
- Naciśnij  lub , aby wejść do funkcji menu, a następnie naciśnij , aby wybrać funkcję lub wejść do dodatkowego menu.

---

- Wykonaj jedną z następujących czynności:

- Naciśnij , aby powrócić do poprzedniego ekranu.
- Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

Radiotelefon automatycznie ukrywa menu po zdefiniowanym okresie braku aktywności i ponownie wyświetla ekran główny.

Przyciski nawigacji w menu są również dostępne na klawiaturze mikrofonu. Zobacz [Przyciski mikrofonu z klawiaturą na str. 47](#).

## Wskaźniki statusu

Ten rozdział opisuje ikony, wskaźniki stanu oraz sygnały dźwiękowe radiotelefonu.

### Ikony

Wyświetlacz ciekłokrystaliczny (LCD) radiotelefonu pokazuje stan radiotelefonu, pozycje tekstowe oraz pozycje menu.

### Tabela 9: Ikony na wyświetlaczu

Poniższe ikony pojawiają się na pasku stanu, który widnieje w górnej części wyświetlacza radiotelefonu. Ikony są położone po lewej stronie i uporządkowane według kolejności występowania lub użycia. Ikony są także określone dla danego kanału.

	<p><b>Połączenie Bluetooth</b></p> <p>Funkcja Bluetooth jest włączona. Ikona będzie widoczna, gdy zostanie podłączone urządzenie w trybie Bluetooth.</p>
	<p><b>Brak połączenia Bluetooth</b></p> <p>Funkcja Bluetooth jest aktywna, ale nie ma podłączonych zdalnych urządzeń Bluetooth.</p>
	<p><b>Dziennik połączeń</b></p> <p>Rejestr połączeń radiotelefonu.</p>
	<p><b>Kontakt</b></p> <p>Dany kontakt jest dostępny.</p>

*Ciąg dalszy tabeli...*

	<b>Tryb awaryjny</b> Radiotelefon jest przełączony do trybu awaryjnego.
	<b>Elastyczna lista odbioru</b> Elastyczna lista odbioru jest włączona.
	<b>GNSS dostępny</b>  Funkcja GNSS jest włączona. Ikona świeci się, gdy dostępne jest położenie ustalone.
	<b>GNSS niedostępny</b>  Funkcja GNSS jest włączona, ale dane z satelity nie są odbierane.
	<b>Duże ilości danych</b> Radiotelefon odbiera duże ilości danych i kanał jest zajęty.

*Ciąg dalszy tabeli...*

	<b>Funkcja lokalizacji wewnętrznej dostępna</b> <sup>7</sup> Lokalizacja wewnętrzna jest włączona i dostępna.
	<b>Lokalizacja wewnętrzna niedostępna</b> <sup>7</sup> Lokalizacja wewnętrzna jest włączona, ale niedostępna z powodu wyłączenia funkcji Bluetooth lub zawieszenia skanowania punktów sygnałowych przez Bluetooth.
	<b>Wiadomość</b> Wiadomość przychodząca.
	<b>Nasłuch</b> Wybrany kanał jest monitorowany.
	<b>Tryb wyciszony</b> Tryb wyciszenia jest włączony, a głośnik wyciszony.

*Ciąg dalszy tabeli...*

<sup>7</sup> Dotyczy tylko modeli z najnowszą wersją konfiguracji programowej i sprzętowej.

	<p><b>Powiadomienia</b></p> <p>Na liście powiadomień znajduje się co najmniej jedno przeoczone zdarzenie.</p>
	<p><b>Płytką opcjonalną</b></p> <p>Płytką opcji jest włączona. (Płytką opcji tylko w zgodnych modelach.)</p>
	<p><b>Niedziałająca płytką opcji</b></p> <p>Płytką opcji jest wyłączona.</p>
	<p><b>Czas opóźnienia programowania bezprzewodowego</b></p> <p>Wskazuje czas pozostały do automatycznego zrestartowania radiotelefonu.</p>
	<p><b>Wskaźnik siły odbieranego sygnału (RSSI)</b></p> <p>Liczba wyświetlanych pasków oznacza natężenie sygnału radiowego. Cztery paski oznaczają najsilniejszy sygnał. Ta ikona jest</p>

*Ciąg dalszy tabeli...*

	<p>wyświetlana tylko podczas odbierania sygnału.</p>
	<p><b>Zawieszenie odpowiedzi</b></p> <p>Zawieszenie odpowiedzi jest włączone.</p>
	<p><b>Tylko dzwonek</b></p> <p>Tryb dzwonienia jest włączony.</p>
	<p><b>Skanowanie<sup>8</sup></b></p> <p>Funkcja skanowania jest aktywna.</p>
	<p><b>Skanowanie – priorytet 1<sup>8</sup></b></p> <p>Radiotelefon wykrywa aktywność na kanale/grupie oznaczonej jako Priorytet 1.</p>
	<p><b>Skanowanie – priorytet 2<sup>8</sup></b></p> <p>Radiotelefon wykrywa aktywność na kanale/grupie oznaczonej jako Priorytet 2.</p>

*Ciąg dalszy tabeli...*

<sup>8</sup> Nie dotyczy Capacity Plus.

	<b>Zabezpieczono</b> Funkcja prywatności jest włączona.
	<b>Zaloguj się</b> Umożliwia zalogowanie radiotelefonu w serwerze zdalnym.
	<b>Wyloguj się</b> Umożliwia wylogowanie radiotelefonu z serwera zdalnego.
	<b>Tryb cichy</b> Włączono tryb cichy.
	<b>Roaming stacji</b> <sup>9</sup> Funkcja szukania sieci jest włączona.
	<b><sup>8</sup>Talkaround</b> Radiotelefon jest skonfigurowany do bezpośredniej komunikacji z innymi radiotelefonami w przypadku braku przemiennika.

*Ciąg dalszy tabeli...*

	<b>Dźwięki wyłączone</b> Sygnały dźwiękowe są wyłączone.
	<b>Odbezpieczono</b> Funkcja prywatności jest wyłączona.
	<b>Skanowanie głosujące</b> Funkcja Skanowanie głosujące jest aktywna.
	<b>Doskonały sygnał Wi-Fi</b> <sup>10</sup> Sygnał Wi-Fi jest doskonały.
	<b>Dobry sygnał Wi-Fi</b> <sup>10</sup> Sygnał Wi-Fi jest dobry.
	<b>Średni sygnał Wi-Fi</b> <sup>10</sup> Sygnał Wi-Fi jest średni.
	<b>Słaby sygnał Wi-Fi</b> <sup>10</sup> Sygnał Wi-Fi jest słaby.

*Ciąg dalszy tabeli...*

<sup>9</sup> Nie dotyczy systemu Capacity Plus – Pojedyncza stacja

<sup>10</sup> Dotyczy tylko urządzeń DM4601e.

**Sieć Wi-Fi niedostępna<sup>10</sup>**  
 Sygnał Wi-Fi jest niedostępny.

**Tabela 10: Zaawansowane ikony menu**

Poniższe ikony znajdują się na wyświetlaczu obok pozycji menu i oferują możliwość wyboru jednej z dwóch opcji lub wskazują, że istnieje podmenu zawierające dwie opcje.

**Pole wyboru (zaznaczone)**  
 Oznacza, że opcja została wybrana.

**Pole wyboru (puste)**  
 Oznacza, że opcja nie została wybrana.

**Pole wypełnione na czarno**  
 Oznacza opcję wybraną dla pozycji menu zawierającej podmenu.

**Tabela 11: Ikony urządzeń Bluetooth**

Następujące ikony pojawiają się również obok elementów listy dostępnych urządzeń z włączoną funkcją Bluetooth, wskazując typ urządzenia.

**Urządzenie audio Bluetooth**  
 Urządzenie z włączoną funkcją Bluetooth, np. zestaw słuchawkowy.

**Urządzenie danych Bluetooth**  
 Urządzenie z włączoną funkcją Bluetooth, np. skaner.

**Urządzenie PTT Bluetooth**  
 Urządzenie PTT z włączoną funkcją Bluetooth, np. urządzenie PTT (POD).

**Tabela 12: Symbole połączenia**

Następujące symbole pojawiają się na wyświetlaczu podczas połączenia. Te ikony pojawiają się w Liście kontaktów i oznaczają typ aliasu lub ID.

**Połączenie Bluetooth z komputerem**  
 Informuje, że trwa połączenie Bluetooth z komputerem.

Wskazuje na liście kontaktów alias grupy (nazwę) lub identyfikator

*Ciąg dalszy tabeli...*

	(numer) połączenia Bluetooth z komputerem.
	<p><b>Połączenie dyspozytorskie</b> Kontakt typu Połączenie dyspozytorskie służy do wysyłania wiadomości tekstowej do komputera-dyspozytora za pośrednictwem serwera wiadomości tekstowych innej firmy.</p>
	<p><b>Połączenie grupowe/ogólne</b> Oznacza aktywne połączenie grupowe lub ogólne. Na liście kontaktów oznacza alias (nazwę) lub identyfikator (numer) grupy.</p>
	<p><b>Połączenie indywidualne</b> Oznacza aktywne połączenie prywatne. Na liście kontaktów oznacza alias (nazwisko) lub identyfikator (numer) abonenta.</p>

*Ciąg dalszy tabeli...*

	<p><b>Połączenie telefoniczne jako połączenie grupowe/ogólne</b> Informuje, że trwa połączenie telefoniczne jako połączenie grupowe/ogólne. Na liście kontaktów oznacza alias (nazwę) lub identyfikator (numer) grupy.</p>
	<p><b>Połączenie telefoniczne jako połączenie prywatne</b> Informuje, że trwa połączenie telefoniczne jako połączenie prywatne. Wskazuje na liście kontaktów alias telefonu (nazwę) lub identyfikator (numer).</p>

**Tabela 13: Ikony kodów zadań**

Następujące ikony pojawiają się chwilowo na wyświetlaczu w folderze kodów zadań.

	<b>Wszystkie zadania</b> Wyświetla listę wszystkich zadań.
	<b>Nowe zadania</b> Wyświetla nowe zadania.
	<b>W toku</b> Zadania są transmitowane. Ta ikona jest widoczna przed podaniem informacji, że kodów zadań nie udało się wysłać lub zostały wysłane pomyślnie.
	<b>Nie można wysłać</b> Nie można wysłać zadań.
	<b>Wysłana pomyślnie</b> Zadania zostały pomyślnie wysłane.

*Ciąg dalszy tabeli...*

	<b>Priorytet 1</b> Wskazuje poziom priorytetu 1 dla zadań.
	<b>Priorytet 2</b> Wskazuje poziom priorytetu 2 dla zadań.
	<b>Priorytet 3</b> Wskazuje poziom priorytetu 3 dla zadań.

**Tabela 14: Miniikony powiadomienia**

Następujące ikony pojawiają się chwilowo na wyświetlaczu po podjęciu działania wykonania czynności.

	<b>Nieskuteczna transmisja (Negatywny)</b> Czynność zakończona niepowodzeniem.
	<b>Skuteczna transmisja (Pozytywny)</b> Czynność zakończona powodzeniem.

*Ciąg dalszy tabeli...*

### Nadawanie w toku (Przejsciowy)

Nadawanie. Ta ikona jest widoczna przed podaniem informacji czy transmisja była skuteczna, czy nie.

lub

### Wiadomość pojedyncza lub grupowa – nie przeczytano

Wiadomość nie została przeczytana.

lub

### Nie można wysłać

Wiadomość tekstowa nie może zostać wysłana.

lub

### Wysłana pomyślnie

Wiadomość została wysłana.

**Tabela 15: Ikony wysłanych pozycji** 

W prawym górnym rogu wyświetlacza radiotelefonu, w folderze wysłanych pozycji, pojawiają się następujące ikony.

lub

### W toku

Wiadomość tekstowa do aliasu lub identyfikatora abonenta oczekuje na wysłanie, po czym następuje oczekiwanie na potwierdzenie.

Wiadomość tekstowa do aliasu lub identyfikatora grupy oczekuje na wysłanie.

lub

### Wiadomość pojedyncza lub grupowa – przeczytano

Wiadomość została przeczytana.

## Wskaźniki LED

Dioda LED pokazuje stan operacyjny radiotelefonu.

### Miganie na czerwono

Auto-test podczas uruchamiania nie powiódł się.

Radiotelefon odbiera transmisję alarmową.

Radiotelefon nadaje przy niskim poziomie naładowania akumulatora.

*Ciąg dalszy tabeli...*

Radiotelefon znalazł się poza zasięgiem ARTS, jeśli skonfigurowano.

Tryb wyciszenia jest włączony.

### **Świeci na zielono**

Radiotelefon jest w trakcie uruchamiania.

Radiotelefon nadaje.

Radiotelefon wysyła alert połączenia lub transmisję alarmową.

### **Migające światło zielone**

Radiotelefon odbiera połączenie lub dane.

Radiotelefon odbiera transmisję programowania bezprzewodowego.

Radiotelefon wykrywa aktywność programowania bezprzewodowego.

#### **UWAGA:**

Aktywność ta może oddziaływać lub może nie oddziaływać na zaprogramowany kanał radiotelefonu ze względu na charakter protokołu cyfrowego.

Gdy radiotelefon wykrywa aktywność radiową w trybie Capacity Plus, nie jest to sygnalizowane za pomocą diody LED.

### **Podwójne miganie zielonego światła**

Radiotelefon odbiera połączenie lub dane poufne.

### **Świeci na żółto**

Radiotelefon monitoruje kanał konwencjonalny.

Radiotelefon znajduje się w trybie wykrywania Bluetooth.

### **Migające światło żółte**

Radiotelefon szuka aktywności.

Radiotelefon musi odpowiedzieć na alert połączenia.

W radiotelefonie włączono elastyczną listę odbioru.

Wszystkie kanały z włączonym systemem Capacity Plus — Wiele stacji są zajęte.

### **Podwójnie migające światło żółte**

Roaming automatyczny jest włączony.

Radiotelefon szuka nowej sieci.

Radiotelefon musi odpowiedzieć na grupowy alert połączenia.

Radiotelefon jest zablokowany.

Radiotelefon nie jest połączony z przemiennikiem w trybie Capacity Plus.

Wszystkie kanały Capacity Plus są zajęte.

## Sygnaly

Poniżej przedstawiono sygnaly, które wybrzmiewają w głośniku radiotelefonu.

Wysoki sygnał

Niski sygnał

## Sygnaly wskaźnikowe

Sygnaly dźwiękowe wskazują status radiotelefonu po działaniu mierzącym do wykonania konkretnego zadania.

Dźwięk informacyjny

Dźwięk ostrzegawczy

## Sygnaly dźwiękowe

Sygnaly dźwiękowe stanowią akustyczne potwierdzenie stanu radiotelefonu lub odpowiedź radiotelefonu na odbierane dane.

[Wyślij informację zwrotną](#)

### Sygnał ciągły

Dźwięk jednostajny. Ciągły do zakończenia.

### Dźwięk okresowy

Generowany okresowo, zależnie od konfiguracji radiotelefonu. Dźwięk jest włączany, przerywany i powtarzany automatycznie.

### Sygnał powtarzany

Pojedynczy dźwięk powtarzany aż do chwili, kiedy zostanie przerwany przez użytkownika.

### Sygnał jednorazowy

Emitowany jednokrotnie przez krótki czas skonfigurowany przez radiotelefon.

## Tryby konwencjonalny analogowy i cyfrowy

Każdy kanał radiotelefonu można skonfigurować jako konwencjonalny kanał analogowy lub cyfrowy.

Korzystając z **pokrętła wyboru kanałów**, można uaktywniać kanał analogowy lub cyfrowy.

Niektóre funkcje nie są dostępne podczas przełączania z trybu cyfrowego na analogowy. Ikony dla funkcji cyfrowych odzwierciedlają tę zmianę: będą widoczne w kolorze szarym. Wyłączone funkcje są ukryte w menu.

Niektóre funkcje radiotelefonu są dostępne zarówno w trybie analogowym, jak i cyfrowym. Niewielkie różnice w działaniu poszczególnych funkcji **nie** wpływają na ogólne parametry i wydajność urządzenia.

#### UWAGA:

Radiotelefon przełącza się również pomiędzy trybem analogowym a cyfrowym podczas wyszukiwania w dwóch trybach. Dodatkowe informacje: [Skanowanie na str. 442](#).

## Informacje dotyczące ikon

W tym dokumencie opisane ikony służą do określania funkcji obsługiwanych w trybie standardowym analogowym lub trybie standardowym cyfrowym, albo udostępnianych przy pomocy mikrofonu z klawiaturą.

Oznacza funkcję obsługiwaną **wyłącznie w standardowym trybie analogowym**.

Oznacza funkcję obsługiwaną **wyłącznie w standardowym trybie cyfrowym**.

**Obie** ikony nie wyświetlają się dla funkcji dostępnych w **obu** trybach standardowych – analogowym i cyfrowym.

## IP Site Connect

Funkcja pozwala na rozszerzenie łączności konwencjonalnej poza zasięg jednej stacji, łącząc wiele z nich w sieć protokołów internetowych (IP). Jest to konwencjonalny tryb dla wielu stacji.

Gdy radiotelefon opuszcza zasięg jednej stacji i wchodzi w zasięg innej, łączy się on z przemiennikiem nowej stacji, aby wysyłać lub odbierać połączenia/transmisję danych. Odbywa się to automatycznie lub poprzez obsługę ręczną, w zależności od ustawień.

W przypadku automatycznego wyszukiwania stacji radiotelefon skanuje wszystkie dostępne stacje, gdy sygnał

z obecnej stacji jest słaby lub gdy radiotelefon nie wykrywa żadnego sygnału z obecnej stacji. Następnie radiotelefon synchronizuje się z przemiennikiem o najsilniejszej wartości wskaźnika siły odbieranego sygnału (RSSI).

Po wybraniu ręcznej zmiany ustawień urządzenie szuka kolejnej dostępnej w zasięgu stacji z listy roamingowej (choć niekoniecznie o najsilniejszym sygnale), a następnie się z nią łączy.

**UWAGA:**

Dla każdego kanału można włączyć albo Skanowanie, albo Roaming – nigdy obie funkcje jednocześnie.

Kanały, dla których włączono tę funkcję, można dodać do wybranej listy roamingowej. Radiotelefon automatycznie przeszukuje kanały na liście roamingowej, aby zlokalizować najlepszą stację. Lista roamingowa obsługuje maksymalnie 16 kanałów (łącznie z wybranym kanałem).

**UWAGA:**

Wpisów na liście nie można dodawać ani usuwać ręcznie. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Capacity Plus — Pojedyncza stacja

Capacity Plus — Pojedyncza stacja to konfiguracja trunkingowa systemu radiowego MOTOTRBO, która korzysta z określonej puli kanałów do obsługi setek użytkowników i nawet 254 grup. Funkcja ta pozwala na skuteczne wykorzystywanie dostępnej liczby zaprogramowanych kanałów w trybie przemiennika.

W przypadku naciśnięcia przycisku programowalnego do obsługi funkcji niedostępnej w Capacity Plus — Pojedyncza stacja zostanie wyemitowany dźwięk ostrzegawczy.

Radiotelefon ma również funkcje dostępne w konwencjonalnym trybie cyfrowym, IP Site Connect i Capacity Plus — Pojedyncza stacja. Jednak niewielkie różnice w działaniu poszczególnych funkcji nie wpływają na ogólne parametry i wydajność urządzenia.

Szczegółowe informacje na temat tej konfiguracji można uzyskać u sprzedawcy lub administratora systemu.

## Capacity Plus — Wiele stacji

Capacity Plus — Wiele stacji, to wielokanałowa konfiguracja łączności trunkingowej z obsługą wielu stacji systemu MOTOTRBO. Łączy w sobie najlepsze cechy konfiguracji Capacity Plus i IP Site Connect.

System Capacity Plus — Wiele stacji pozwala na rozszerzenie łączności trunkingowej poza zasięg jednej stacji, łącząc się z różnymi dostępnymi stacjami połączonymi za pomocą sieci IP. Daje ona również lepszą przepustowość dzięki łącznemu wykorzystaniu dostępnych zaprogramowanych kanałów, obsługiwanych przez każdą dostępną stację.

Gdy radiotelefon opuszcza zasięg jednej stacji i wchodzi w zasięg innej, łączy się on z przemiennikiem nowej stacji, aby wysyłać lub odbierać połączenia/transmisję danych. Zależnie od skonfigurowanych ustawień radiotelefon jest przełączany automatycznie lub ręcznie.

Po wybraniu automatycznej zmiany ustawień, gdy sygnał aktualnie używanej stacji jest słaby lub nie można uzyskać sygnału aktualnie używanej stacji, urządzenie skanuje wszystkie dostępne stacje. Następnie synchronizuje się ono z przemiennikiem o najsilniejszej wartości RSSI.

Po wybraniu ręcznej zmiany ustawień urządzenie szuka kolejnej dostępnej w zasięgu sieci z listy roamingowej (choć niekoniecznie o najsilniejszym sygnale), a następnie się z nią łączy.

Kanały z włączonym systemem Capacity Plus — Wiele stacji można dodać do dowolnej listy roamingowej. Radiotelefon przeszukuje te kanały w trakcie automatycznego roamingu, aby wyszukać najlepsze miejsce.

### UWAGA:

Wpisów na liście nie można dodawać ani usuwać ręcznie. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Podobnie jak w systemie Capacity Plus — Pojedyncza stacja, ikony funkcji nie mających zastosowania w Capacity Plus — Wiele stacji nie są dostępne w menu. W przypadku naciśnięcia przycisku programowalnego do obsługi funkcji niedostępnej w systemie Capacity Plus — Wiele stacji zostanie wyemitowany dźwięk ostrzegawczy.

## Wybór strefy i kanału

Ten rozdział wyjaśnia, jak wybrać strefę lub kanał. Strefa to grupa kanałów.

Radiotelefon obsługuje do 99 kanałów i 2 stref, z maksymalnie 99 kanałami na strefę.

Każdy kanał może zostać zaprogramowany do obsługi różnych funkcji i/lub różnych grup użytkowników.

## Wybieranie stref

Postępuj zgodnie z procedurą, aby wybrać określoną strefę.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **wyboru strefy**. Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Strefy.  
Naciśnij , aby wybrać.  
Wyświetlacz pokazuje  i obecną strefę.

- 3 Naciśnij  lub , aby przejść do wybranej strefy. Naciśnij , aby wybrać.

Na wyświetlaczu przez chwilę będzie widoczny komunikat <Strefa> wybrano i ponownie zostanie wyświetlony ekran wybranego obszaru.

## Wybieranie stref przy pomocy Wyszukiwania aliasów

Postępuj zgodnie z procedurą, aby wybrać wymaganą strefę przy pomocy wyszukiwania aliasów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Strefy.  
Naciśnij , aby wybrać.  
Wyświetlacz pokazuje  obecną strefę.

- 3 Wprowadź pierwszą literę wymaganego aliasu.

Na wyświetlaczu pojawia się migający kursor.

- 4 Wprowadź pozostałe litery wymaganego aliasu.

Podczas wyszukiwania aliasu jest rozróżniana wielkość liter. Jeżeli istnieją co najmniej dwie pozycje o tej samej nazwie, wyświetlacz pokazuje tę, która jest pierwsza na liście.

Pierwsza linia tekstu pokazuje wprowadzone litery. Następne linie tekstu pokazują wybrane wyniki wyszukiwania.

- 5 Naciśnij  , aby wybrać.

Na wyświetlaczu przez chwilę będzie widoczny komunikat <Strefa> wybrano i ponownie zostanie wyświetlony ekran wybranego obszaru.

## Wybieranie kanałów

Postępuj zgodnie z procedurą, aby wybrać wymagany kanał radiotelefonu po wyborze strefy.

Wykonaj jedną z następujących czynności:

- Naciśnij przycisk **Przewijanie w górę/w dół**.
- Skorzystaj z **Pokrętła głośności/kanału**.
- Naciśnij zaprogramowany przycisk **Kanał w górę/w dół**.

## Połączenia

Ten rozdział opisuje, w jaki sposób odbierać, wykonywać, przerywać i odpowiadać na połączenia.

Po wybraniu kanału możesz wybrać alias albo ID abonenta lub grupy przy pomocy jednej z poniższych funkcji:

### Wyszukiwanie aliasu

Ta metoda jest używana tylko w przypadkach wywołań grupowych, indywidualnych i ogólnych przy pomocy mikrofonu z klawiaturą.

### Lista kontaktów

Ta metoda pozwala na bezpośredni dostęp do Listy kontaktów.

### Wybieranie ręczne (za pomocą Kontaktów)

Metoda ta jest używana tylko w przypadkach wywołań indywidualnych i telefonicznych przy pomocy mikrofonu z klawiaturą.

## Zaprogramowane klawisze numeryczne

Ta metoda jest używana tylko w przypadkach wywołań grupowych, indywidualnych i ogólnych przy pomocy mikrofonu z klawiaturą.

### UWAGA:

Do przycisku numerycznego można przypisać tylko jeden alias lub ID, ale z jednym aliasem lub ID może być skojarzonych kilka przycisków numerycznych. Wszystkie klawisze na mikrofonie z klawiaturą mogą zostać przypisane. Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447](#).

## Zaprogramowany przycisk Szybkiego dostępu

Ta metoda jest używana tylko w przypadkach wywołań grupowych, indywidualnych i telefonicznych.

Do przycisku **Szybkiego dostępu** można przypisać jedno ID przy pomocy krótkiego lub długiego naciśnięcia programowalnego przycisku. W radiotelefonie można zaprogramować wiele przycisków **Szybkiego dostępu**.

## Przycisk programowalny

Ta metoda jest używana tylko w przypadku połączeń telefonicznych.

## Pokrętko regulacji głośności/wyboru kanałów

Ta metoda pozwala na ręczne wybranie aliasu lub ID użytkownika bądź aliasu lub ID grupy.

Zielony wskaźnik jest włączony wówczas, gdy radiotelefon jest przełączony do trybu nadawania i miga po przełączeniu radiotelefonu w tryb odbioru.

### UWAGA:

Dioda LED świeci ciągłym światłem zielonym, gdy radiotelefon nadaje, a podwójnie miga na zielono podczas odbioru wywołania z aktywną funkcją prywatności.

Po włączeniu funkcji poufności transmisję będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności lub taką samą wartością i ID klucza (programowane przez sprzedawcę), jak te skonfigurowane w transmitującym radiotelefonie.

Dodatkowe informacje: [Prywatne na str. 504](#).

## Połączenia grupowe

Radiotelefon musi być skonfigurowany jako część grupy, aby otrzymywać lub wykonywać połączenia od/do użytkowników grupy.

## Inicjowanie połączeń grupowych

Postępuj zgodnie z procedurą, aby wykonywać połączenia grupowe.

- Wykonaj jedną z następujących czynności:
  - Wybierz kanał z aktywnym grupowym aliasem lub ID.
  - Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

- Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Zielona dioda LED zapala się. Wyświetlacz pokazuje ikonę **Połączenia grupowego** oraz alias wywołania grupowego.

- Aby słuchać, zwolnij przycisk **PTT**.  
Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada. Na wyświetlaczu pojawi się ikona **Połączenia grupowego** oraz alias lub ID grupy, jak również alias lub ID radiotelefonu nadającego.

- Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Radiotelefon powróci do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

## Inicjowanie połączeń grupowych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia grupowe przy pomocy Listy kontaktów.

- Naciśnij , aby uzyskać dostęp do menu.
- Naciśnij  lub , aby otworzyć **Kontakt ty**. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

---

4 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED zapala się.

---

5 Aby słuchać, zwolnij przycisk **PTT**. Zielona dioda LED miga po uzyskaniu odpowiedzi od użytkownika należącego do grupy. Na wyświetlaczu pojawi się ikona **Połączenia grupowego** oraz alias lub ID, jak również alias lub ID radiotelefonu nadającego.

---

6  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

---

## Inicjowanie połączeń grupowych przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia grupowe przy pomocy programowalnego przycisku numerycznego.

1 Długie naciśnięcie zaprogramowanego przycisku numerycznego przypisanego do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

---

2 Naciśnij przycisk **PTT**, aby nawiązać połączenie. Zielona dioda LED zapala się.

---

### 3 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga po uzyskaniu odpowiedzi od użytkownika należącego do grupy.

- 
- 4  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Radiotelefon powróci do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447](#).

## Odbieranie połączeń grupowych

Aby odebrać połączenie od grupy użytkowników, radiotelefon musi być skonfigurowany jako członek danej grupy. Postępuj zgodnie z procedurą, aby odpowiadać na połączenia grupy.

Odbieranie połączenia grupowego:

- Zielona dioda LED miga.
- W prawym górnym rogu wyświetlacza pojawia się ikona **Połączenia grupowego**.
- Pierwszy wiersz tekstu pokazuje alias rozmówcy.
- Druga linia tekstu wyświetla alias wywołania grupowego.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

### 1 Wykonaj jedną z następujących czynności:

-  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.
-  Jeżeli jest aktywna funkcja Przerwanie głosowe, naciśnij przycisk **PTT**, aby wyłączyć

dźwięk z transmitującego radiotelefonu i zwolnić kanał do odpowiedzi.

Zielona dioda LED zapala się.

## 2 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
-  Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

## 3 Aby słuchać, zwolnij przycisk **PTT**.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

Jeśli radiotelefon otrzyma połączenie grupowe, gdy nie jest wyświetlony ekran główny, odebranie połączenia nie spowoduje zmiany aktualnego ekranu.

Przyciśnij dłużej przycisk , aby powrócić do ekranu głównego i wyświetlić alias rozmowy przed odebraniem.

## Połączenia prywatne

Połączenie prywatne jest inicjowane przez indywidualny radiotelefon i skierowane do innego indywidualnego radiotelefonu.

Połączenia prywatne można skonfigurować na dwa sposoby. Pierwszy sposób służy do ustawienia połączenia po dokonaniu sprawdzenia obecności radiotelefonu, natomiast drugi do ustawienia połączenia natychmiastowego. Sprzedawca może zaprogramować w radiotelefonie tylko jeden z takich rodzajów połączeń

## Inicjowanie połączeń prywatnych

W celu zainicjowania połączenia prywatnego należy odpowiednio zaprogramować radiotelefon. Jeśli ta funkcja nie jest włączona, w przypadku zainicjowania połączenia użytkownik usłyszy sygnał ostrzegawczy. Postępuj zgodnie z procedurą, aby wykonywać połączenia prywatne.

Aby skontaktować się z określonym użytkownikiem radiotelefonu, należy skorzystać z funkcji wiadomości tekstowej lub alertu połączenia (Call Alert). Informacje dodatkowe: [Wiadomości tekstowe na str. 167](#) lub [Alert połączenia na str. 458](#).

### 1 Wykonaj jedną z następujących czynności:

- Wybierz kanał z aliasem lub ID aktywnego abonenta.
- Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

## 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Wyświetlacz pokazuje ikonę **Połączenia prywatnego**, alias abonenta oraz stan połączenia.

## 3 Poczekać na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

## 4 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga, kiedy radiotelefon docelowo odpowiada.

## 5 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

## Inicjowanie połączeń prywatnych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia prywatne przy pomocy Listy kontaktów.

### 1 Naciśnij , aby uzyskać dostęp do menu.

### 2 Naciśnij lub , aby otworzyć Kontakt **ty**. Naciśnij , aby wybrać.

### 3 Naciśnij lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

#### 4 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Wyświetlacz pokazuje alias docelowego radiotelefonu.

#### 5 Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

#### 6 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga, kiedy radiotelefon docelowo odpowiada. Na wyświetlaczu pojawi się ID lub alias nadającego użytkownika.

#### 7 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

## Inicjowanie połączenia indywidualnego przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby wykonywać połączenia prywatne przy pomocy wybierania ręcznego.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać.

5 Wykonaj jedną z następujących czynności:

- Wprowadź ID abonenta i naciśnij , aby kontynuować.

- Edytuj ID abonenta, z którym połączono się poprzednio, a następnie naciśnij  , aby kontynuować.

---

#### 6 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Wyświetlacz pokazuje alias docelowego radiotelefonu.

---

#### 7 Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

---

#### 8 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada. Na wyświetlaczu pojawi się ID lub alias nadającego użytkownika.

---

#### 9 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

---

## Inicjowanie połączeń prywatnych przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia prywatne przy pomocy programowalnego przycisku numerycznego.

- 1 Długie naciśnięcie zaprogramowanego przycisku numerycznego przypisanego do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

---

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. W prawym górnym rogu wyświetlacza pojawia się ikona **połączenia prywatnego**. Pierwszy wiersz tekstu pokazuje alias rozmówcy. Drugi wiersz tekstu przedstawia stan połączenia.

- 3 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga, kiedy radiotelefon docelowy odpowiada. Wyświetlacz pokazuje alias docelowego radiotelefonu.

- 4  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Radiotelefon powróci do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447.](#)

## Odbieranie połączeń prywatnych

Postępuj zgodnie z procedurą, aby odbierać połączenia prywatne.

Podczas odbierania połączenia prywatnego:

- Zielona dioda LED miga.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

- 1 Wykonaj jedną z następujących czynności:

-  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.
-  Jeśli funkcja Przycisk zdalnego przerwania transmisji jest włączona, naciśnij przycisk **PTT** w celu zatrzymania aktualnego połączenia (które

może być zatrzymane) i zwolnienia kanału do odpowiedzi.

Zielona dioda LED zapala się.

---

**2** Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.

---

**3** Aby słuchać, zwolnij przycisk **PTT**.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

---

## Połączenia ogólne

Połączenie ogólne jest inicjowane przez indywidualny radiotelefon i skierowane do wszystkich radiotelefonów w danym kanale. Połączenie ogólne jest wykorzystywane do przekazywania ważnych komunikatów, które wymagają uwagi użytkownika. Użytkownicy korzystający z danego kanału nie mogą odpowiadać na połączenie ogólne.

## Odbieranie połączeń ogólnych

Podczas odbierania połączenia ogólnego:

- Zostanie wyemitowany sygnał.
- Zielona dioda LED miga.
- W prawym górnym rogu wyświetlacza pojawia się ikona **Połączenia grupowego**.
- Pierwszy wiersz tekstu pokazuje alias rozmówcy.
- Druga linia tekstu pokazuje **Wzyw. wszyscy**.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

Po zakończeniu połączenia radiotelefon powraca do ekranu sprzed odebrania połączenia ogólnego.

Połączenie ogólne zostaje zakończone bez oczekiwania przez wcześniej zdefiniowany czas.

 Jeżeli włączona jest funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa sygnał alertu, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć.

Nie można odpowiadać na połączenie ogólne.

**UWAGA:**

Radiotelefon przerywa odbiór połączenia ogólnego, jeżeli użytkownik przełączy kanał podczas odbierania połączenia. Podczas połączenia ogólnego nie można kontynuować nawigacji w menu lub edycji aż do chwili, kiedy połączenie zostanie zakończone.

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
-  Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

Użytkownicy korzystający z danego kanału nie mogą odpowiadać na połączenie ogólne.

## Inicjowanie połączeń ogólnych

Radiotelefon musi być wcześniej zaprogramowany, aby możliwe było inicjowanie połączeń ogólnych. Postępuj zgodnie z procedurą, aby wykonywać połączenia ogólne.

- 1 Wybierz kanał aktywnego aliasu grupowego połączenia ogólnego lub identyfikatora.
- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Na wyświetlaczu pojawi się ikona **Połączenia grupowego** oraz komunikat **Połączenie ogólne**.

- 3 Wykonaj jedną z następujących czynności:

## Inicjowanie połączeń ogólnych przy pomocy programowalnego przycisku numerycznego

Postępuj zgodnie z procedurą, aby inicjować połączenia ogólne przy pomocy programowalnego przycisku numerycznego.

- 1 Naciśnij i przytrzymaj zaprogramowany przycisk numeryczny przypisany do aliasu lub ID podczas przebywania na ekranie głównym.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Rozlega się dźwięk ostrzegawczy, jeśli przycisk nie jest przypisany.

- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się.

- 3 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada. Nie można odpowiadać na połączenie ogólne w danej chwili.

- 4  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Radiotelefon powróci do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

Po zakończeniu połączenia prywatnego rozlega się krótki sygnał dźwiękowy.

Dodatkowe informacje: [Przypisywanie wpisów do programowalnych przycisków numerycznych na str. 447.](#)

## Połączenia selektywne

Połączenie selektywne to połączenie pojedynczego radiotelefonu z innym radiotelefonem indywidualnym. W systemie analogowym takie połączenie to połączenie prywatne.

## Inicjowanie połączeń selektywnych

Radiotelefon musi być wcześniej zaprogramowany, aby możliwe było inicjowanie połączeń selektywnych. Postępuj zgodnie z procedurą, aby wykonywać połączenia selektywne.

- 1 Wybierz kanał z aliasem lub ID aktywnego abonenta.
- 2 Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Zielona dioda LED zapala się. Wyświetlacz pokazuje ikonę **Połączenia prywatnego**, alias abonenta oraz stan połączenia.
- 3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
-  Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

---

#### 4 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED zapala się, kiedy radiotelefon docelowy odpowiada.

- 
- #### 5 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

- 
- #### 6 Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.
- 

## Odbieranie połączeń selektywnych

Postępuj zgodnie z procedurą, aby odpowiadać na połączenia selektywne.

Połączenie selektywne sygnalizowane jest przez:

- Zielona dioda LED miga.
- Pierwsza linia tekstu pokazuje ikonę **Połączenia prywatnego** i alias rozmówcy lub **Połączenie selektywne** lub też **Alert** z połączeniem.
- Radiotelefon wyłącza wyciszenie, a sygnał dźwiękowy połączenia przychodzącego jest emitowany przez głośnik.

- 1 Naciśnij przycisk **PTT**, aby odpowiedzieć.

Zielona dioda LED zapala się.

- 
- 2 Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
- 

- 3 Aby słuchać, zwolnij przycisk **PTT**.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie

wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

## Połączenia telefoniczne

Połączenie prywatne jest połączeniem wykonywanym z indywidualnego radiotelefonu na telefon.

Jeżeli funkcja połączeń telefonicznych jest wyłączona:

- Na wyświetlaczu widnieje komunikat **Niedostępne**.
- Radiotelefon wycisza połączenie.
- Po zakończeniu połączenia radiotelefon wraca do poprzedniego ekranu.

Podczas połączenia telefonicznego radiotelefon próbuje je przerwać, gdy:

- Naciśnij przycisk **Szybkiego dostępu** przy wcześniej skonfigurowanym kodzie odstępu.
- Wprowadzasz kod odstępu jako dane wejściowe dla dodatkowych cyfr.

Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przyciski i pokrętła **Wł. /Wył., Regulacji głośności i Przełącznika kanałów**. Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

Podczas dostępu do kanału naciśnij , aby odrzucić próbę połączenia. Zostanie wyemitowany sygnał.

### UWAGA:

Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Wykonywanie połączeń telefonicznych

Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne.

- 1 Naciśnij zaprogramowany **Przycisk szybkiego dostępu** na określonym aliasie lub ID.

Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy. Jeżeli nie skonfigurowano kodu dostępu na liście kontaktów, na ekranie pojawia się komunikat **Kod dostępu?**.

2 Wprowadź kod dostępu i naciśnij przycisk  , aby przejść dalej.

Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

---

3 Naciśnij przycisk **PTT**, aby odpowiedzieć. Aby słuchać, zwolnij przycisk **PTT**.

---

4 Jeśli połączenie tego zażąda, wprowadź dodatkowe cyfry na klawiaturze, a następnie naciśnij  , aby kontynuować.

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

Wyemitowana zostanie sygnalizacja tonowa Dual Tone Multi Frequency (DTMF). Radiotelefon powróci do poprzedniego ekranu.

---

5 Aby zakończyć połączenie, naciśnij przycisk  .

---

6 Wykonaj jedną z następujących czynności:

- Jeżeli nie skonfigurowano kodu odstępu, wprowadź kod odstępu po wyświetleniu komunikatu Kod odstępu: i naciśnij przycisk, aby przejść dalej.  Radiotelefon powróci do poprzedniego ekranu.
- Naciśnij zaprogramowany **Przycisk szybkiego dostępu**. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

Urządzenie emituje dźwięk sygnał dźwiękowy DTMF i wyświetla komunikat Kończę połączenie telefoniczne.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu zobaczysz komunikat Połączenie zakończone.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu Połączenia telefonicznego. Powtórz powyższe dwa kroki lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

---

## Wykonywanie połączeń telefonicznych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne przy pomocy Listy kontaktów.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby otworzyć Kontakty. Naciśnij , aby wybrać.

Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

---

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Jeśli naciśniesz przycisk **PTT** w momencie, gdy uruchomiony jest ekran Kontaktów:

- Pierwszy wiersz wyświetlacza pokazuje Numer telefonu: .

- W drugim wierszu wyświetlacza zobaczysz migający kursor.

Jeżeli wybrany wpis jest pusty:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawi się komunikat Błędny numer telefonu.
- 

4 Naciśnij  lub , aby przejść do funkcji Połącz z telefonem. Naciśnij , aby wybrać.

Jeśli kod dostępu nie został wstępnie skonfigurowany, na wyświetlaczu pojawi się napis Kod dostępu:.

---

5 Wprowadź kod dostępu i naciśnij przycisk , aby przejść dalej.

Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

Pierwsza linia tekstu pokazuje łączenie. Druga linia tekstu pokazuje alias lub ID abonenta oraz ikonę

**Połączenia telefonicznego.**

Jeśli połączenie powiedzie się:

- Urządzenie wyemituje sygnał dźwiękowy DTMF.
- Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu.
- Pierwsza linia tekstu pokazuje alias i ID abonenta, jak również ikonę **RSSI**.
- Druga linia pokazuje tekst **Połączenie telefoniczne** oraz ikonę **Połączenia telefonicznego**.

Jeśli połączenie nie powiedzie się:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się napis **Połączenie telefoniczne nie powiodło się, a następnie Kod dostępu:**.
- Radiotelefon powróci do ekranu sprzed inicjacji połączenia, jeśli kod dostępu został wcześniej skonfigurowany w Liście kontaktów.

---

**6** Naciśnij przycisk **PTT**, aby odpowiedzieć.  
Ikona **RSSI** znika.

---

**7** Aby słuchać, zwolnij przycisk **PTT**.

---

**8** Jeśli połączenie tego zażąda, wprowadź dodatkowe cyfry na klawiaturze, a następnie naciśnij , aby kontynuować.

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

Urządzenie wyemituje sygnał dźwiękowy DTMF.  
Radiotelefon powróci do poprzedniego ekranu.

---

**9** Aby zakończyć połączenie, naciśnij przycisk .

---

**10** Jeżeli nie skonfigurowano kodu odstępu, wprowadź kod odstępu po wyświetleniu komunikatu **Kod odstępu:** i naciśnij przycisk, aby przejść dalej. 

Radiotelefon powróci do poprzedniego ekranu.  
Urządzenie emituje dźwięk DTMF, a na wyświetlaczu widnieje napis **Kończę połączenie telefoniczne**.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.

- Na wyświetlaczu zobaczysz komunikat  
Połączenie zakończone.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu Połączenia telefonicznego. Powtórz [krok 9](#) i [krok 10](#) lub odczekaj, aż użytkownik telefonu zakończy wywołanie. Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu **Naciśnij OK: Wykon poł.**

Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw tel zakończ.**

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

### UWAGA:

Po uzyskaniu dostępu do kanału naciśnij przycisk

, aby odrzucić próbę połączenia. Zostanie wyemitowany sygnał dźwiękowy.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie.

Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk **Wł./wył.**, **Pokrętko regulacji głośności** i **Przełącznik kanałów**. Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

## Wykonywanie połączeń telefonicznych przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby wykonywać połączenia telefoniczne przy pomocy wybierania ręcznego.

1

Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub  , aby otworzyć Kontak ty. Naciśnij  , aby wybrać.
- 
- 3 Naciśnij  lub  , aby przejść do Wybierania ręcznego. Naciśnij  , aby wybrać.
- 
- 4 Naciśnij  lub  , aby przejść do Numeru telefonicznego. Naciśnij  , aby wybrać.  
Na wyświetlaczu pojawia się napis Numer: oraz migający kursor.
- 
- 5 Wpisz numer telefonu i naciśnij  , aby przejść dalej.  
Jeśli kod dostępu nie został wstępnie skonfigurowany, na wyświetlaczu pojawi się napis Kod dostępu: i migający kursor.
- 
- 6 Wprowadź kod dostępu i naciśnij przycisk  , aby przejść dalej.

Kod dostępu lub odstępu nie może być dłuższy niż 10 znaków.

- 7 Zielona dioda LED zapala się. W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**. Pierwszy wiersz tekstu przedstawia alias abonenta. Drugi wiersz tekstu przedstawia stan połączenia.  
Jeśli połączenie powiedzie się:
- Urządzenie wyemituje sygnał dźwiękowy DTMF.
  - Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu.
  - Pierwszy wiersz tekstu przedstawia alias abonenta.
  - W prawym górnym rogu nadal wyświetla się ikona **Połączenia telefonicznego**.
- Jeśli połączenie nie powiedzie się:
- Zostanie wyemitowany sygnał.
  - Na wyświetlaczu pojawi się napis Połączenie telefoniczne nie powiodło się, a następnie Kod dostępu:.

- Radiotelefon powróci do ekranu sprzed inicjacji połączenia, jeśli kod dostępu został wcześniej skonfigurowany w Liście kontaktów.

---

8 Aby zakończyć połączenie, naciśnij przycisk .

---

9 Wykonaj jedną z następujących czynności:

- Jeżeli nie skonfigurowano kodu odstępu, wprowadź kod odstępu po wyświetleniu komunikatu Kod odstępu: i naciśnij przycisk, aby przejść dalej.   
Radiotelefon powróci do poprzedniego ekranu.
- Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.  
Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

Urządzenie emituje dźwięk DTMF, a na wyświetlaczu widnieje napis Kończę połączenie telefoniczne.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.

- Na wyświetlaczu zobaczysz komunikat  
Połączenie zakończone.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu Połączenia telefonicznego. Powtórz [krok 8](#) lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

**UWAGA:**

Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu **Naciśnij OK: Wykon połą.**

Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat **Wyw. zakoñ.**

Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

Po uzyskaniu dostępu do kanału naciśnij przycisk , aby odrzucić próbę połączenia. Zostanie wyemitowany sygnał dźwiękowy.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie.

Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk **Wi./wył.**, **Pokrętko regulacji głośności** i **Przełącznik kanałów**.

Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

---

## Wykonywanie połączenia grupowego, prywatnego, telefonicznego lub ogólnego poprzez Wyszukanie aliasu

Postępuj zgodnie z procedurą, aby wykonywać połączenia przy pomocy wyszukiwania aliasów.

**1**

Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby otworzyć Kontak ty.

Naciśnij , aby wybrać.

Na wyświetlaczu pojawiają się wpisy w porządku alfabetycznym.

---

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje Numer telefonu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Użyj klawiatury, aby wprowadzić numer telefonu.

---

4 Naciśnij , aby wybrać. Jeżeli wybrany wpis jest pusty, urządzenie wyemituje dźwięk ostrzegawczy i wyświetli komunikat Błędny numer telefonu.

---

5 Naciśnij  lub , aby wybrać numer i Naciśnij , aby wybrać. Jeżeli nie skonfigurowano kodu dostępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod dostępu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź kod dostępu i

naciśnij przycisk , aby przejść dalej. W przypadku powodzenia zabrmi sygnał DTMF. Zostanie wyemitowany sygnał dźwiękowy wyboru numeru użytkownika telefonu. W pierwszym wierszu wyświetlacza pojawi się alias lub identyfikator abonenta i ikona RSSI. W drugim wierszu wyświetlacza pojawi się komunikat Połączenie telefoniczne i ikona połączenia telefonicznego. W przypadku niepowodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw. tel. Nieudane. Radiotelefon wraca do ekranu wprowadzania kodu dostępu. Jeżeli zdefiniowano kod dostępu dla listy kontaktów, radiotelefon wraca do ekranu, który był wyświetlany przed zainicjowaniem połączenia.

---

6 Naciśnij przycisk **PTT**, aby mówić, albo zwolnij go, aby słuchać. Ikona RSSI znika podczas transmisji.

---

7 W razie potrzeby wprowadzenia dodatkowych cyfr podczas połączenia telefonicznego wykonaj jedną z czynności:

- Naciśnij dowolny przycisk klawiatury, aby wpisać dodatkowe cyfry. Pierwszy wiersz wyświetlacza pokazuje parametr Dodatk. cyfr:. W drugim

wierszu wyświetlacza zobaczysz migający kursor.

Wpisz dodatkowe cyfry i naciśnij przycisk  , aby przejść dalej. Radiotelefon wyemituje sygnał dźwiękowy DTMF i wróci do poprzedniego ekranu.

- Naciśnij **przycisk szybkiego połączenia**. Urządzenie wyemituje sygnał dźwiękowy DTMF. Jeżeli wpis **Przycisku szybkiego dostępu** jest pusty, urządzenie wyemituje dźwięk ostrzegawczy.

8

Aby zakończyć połączenie, naciśnij przycisk  . Jeżeli nie skonfigurowano kodu odstępu na liście kontaktów, w pierwszym wierszu ekranu pojawia się komunikat Kod odstępu:. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wprowadź

kod odstępu i  , aby przejść dalej. Radiotelefon powróci do poprzedniego ekranu. Urządzenie emituje sygnał dźwiękowy DTMF i wyświetla komunikat Kończę połączenie telefoniczne. W przypadku powodzenia urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw tel zakończ. Radiotelefon przywraca ekran połączenia telefonicznego. W przypadku

niepowodzenia radiotelefon przywraca ekran połączenia telefonicznego. Naciśnięcie przycisku **PTT** na ekranie kontaktów telefonu spowoduje wyemitowanie sygnału dźwiękowego i wyświetlenie komunikatu Naciśnij OK: Wykon poł. Gdy użytkownik telefonu kończy połączenie, urządzenie emituje sygnał dźwiękowy, a na wyświetlaczu pojawia się komunikat Wyw tel zakończ. Jeżeli połączenie zostanie zakończone podczas wprowadzania dodatkowych cyfr wymaganych przez połączenie telefoniczne, radiotelefon wróci do ekranu wyświetlanego przed zainicjowaniem połączenia.

**UWAGA:**

Podczas uzyskiwania dostępu do kanału naciśnij

przycisk , aby odrzucić próbę połączenia i przycisk sygnałów dźwiękowych, aby zakończyć

wyszukiwanie aliasu. Naciśnij przycisk  lub

, aby zakończyć wyszukiwanie aliasu.

Naciśnięcie podczas połączenia przycisku **Szybki dostęp** ze skonfigurowanym kodem odstępu lub próba wprowadzenia kodu odstępu jako dodatkowych cyfr zaowocuje tym, że radiotelefon spróbuje zakończyć połączenie. Podczas uzyskiwania dostępu do kanału i transmisji kodu dostępu/odstępu lub dodatkowych cyfr radiotelefon reaguje tylko na przycisk Wł./wył., pokrętko regulacji głośności i przełącznik kanałów. Urządzenie emituje sygnał dźwiękowy przy każdym błędnym wprowadzeniu.

## Wybieranie tonowe wieloczęstotliwościowe DTMF

Funkcja sygnalizacji tonowej DMTF (Dual Tone Multi Frequency) umożliwia działanie radiotelefonu w systemie

radiowym z interfejsem do połączeń z systemami telefonicznymi.

Możesz wyłączyć dźwięk DTMF, wyłączając wszystkie dźwięki i powiadomienia w radiotelefonie. Dodatkowe informacje: [Włączanie/wyłączanie dźwięków/alertów radiotelefonu na str. 221](#).

## Inicjowanie wywołań DTMF

Postępuj zgodnie z procedurą, aby zainicjować połączenie DTMF.

- 1 Naciśnij i przytrzymaj przycisk **PTT**.

---

  - 2 Wykonaj jedną z następujących czynności:
    - Wpisz żądany numer, aby zainicjować połączenie DTMF.
    - Naciśnij , aby zainicjować połączenie tonowe DTMF:
    - Naciśnij , aby zainicjować połączenie tonowe DTMF:
-

## Odbieranie połączeń telefonicznych jako wywołań grupowych

Postępuj zgodnie z procedurą, aby odbierać połączenia telefoniczne jako połączenia grupowe.

Podczas odbierania połączenia telefonicznego jako połączenia grupowego:

- W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**.
- Na wyświetlaczu pojawia się alias grupy i komunikat `Połączenie telefoniczne`.

Jeżeli funkcja połączeń telefonicznych nie jest włączona, w pierwszym wierszu wyświetlacza pojawia się komunikat `Niedostępny`, a radiotelefon wycisza połączenie. Po zakończeniu połączenia radiotelefon wraca do poprzedniego ekranu.

- 1 Naciśnij przycisk **PTT**, aby odpowiedzieć. Aby słuchać, zwolnij przycisk **PTT**.

- 2 Aby zakończyć połączenie, naciśnij przycisk  .  
Na wyświetlaczu pojawi się komunikat `Kończąc wywołanie`.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu zobaczysz komunikat `Połączenie zakończone`.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu `Połączenia telefonicznego`. Powtórz tę czynność lub odczekaj, aż użytkownik telefonu zakończy połączenie.

---

## Odbieranie połączeń telefonicznych jako wywołań ogólnych

Po odebraniu połączenia telefonicznego jako połączenia ogólnego można na nie odpowiedzieć lub je zakończyć wyłącznie wtedy, gdy do kanału przypisano kategorię połączeń ogólnych. Postępuj zgodnie z procedurą, aby odbierać połączenia telefoniczne jako połączenia ogólne.

Podczas odbierania połączenia telefonicznego jako połączenia ogólnego:

- W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**.

- Na wyświetlaczu widoczne są komunikaty `Połączenie ogólne` i `Połączenie telefoniczne`.

Jeżeli funkcja połączeń telefonicznych nie jest włączona, w pierwszym wierszu wyświetlacza pojawia się komunikat `Niedostępny`, a radiotelefon wycisza połączenie.

Po zakończeniu połączenia radiotelefon wraca do poprzedniego ekranu.

1 Naciśnij przycisk **PTT**, aby odpowiedzieć.

2 Aby słuchać, zwolnij przycisk **PTT**.

3 Aby zakończyć połączenie, naciśnij przycisk  .

Na wyświetlaczu pojawi się komunikat `Kończę wyw tel`.

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu widnieją komunikaty `Połączenie ogólne` i `Zakończono połączenie`.

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu `Połączenia telefonicznego`.

Powtórz [krok 3](#) lub poczekaj na zakończenie połączenia przez użytkownika telefonu.

## Odbieranie połączeń telefonicznych jako wywołań indywidualnych

Postępuj zgodnie z procedurą, aby odbierać połączenia telefoniczne jako połączenia prywatne.

Podczas odbierania połączenia telefonicznego jako połączenia prywatnego:

- W górnym prawym rogu wyświetlacza pojawi się ikona **Połączenia telefonicznego**.
- Na wyświetlaczu widać alias dzwoniącego lub komunikat `Połączenie telefoniczne`.

Jeżeli funkcja połączeń telefonicznych nie jest włączona, w pierwszym wierszu wyświetlacza pojawia się komunikat `Niedostępny`, a radiotelefon wycisza połączenie. Po zakończeniu połączenia radiotelefon wraca do poprzedniego ekranu.

1 Naciśnij przycisk **PTT**, aby odpowiedzieć. Aby słuchać, zwolnij przycisk **PTT**.

2 Aby zakończyć połączenie, naciśnij przycisk  .

Na wyświetlaczu pojawi się komunikat `Kończę wywoł.`

Jeśli połączenie zostanie zakończone pomyślnie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu zobaczysz komunikat `Połączenie zakończone.`

Jeśli połączenie nie zakończy się, radiotelefon powróci do ekranu `Połączenia telefonicznego.` Powtórz tę czynność lub odczekaj, aż użytkownik telefonu zakończy połączenie.

## Kończenie połączenia radiowego

Ta funkcja umożliwi zakończenie trwającego połączenia grupowego lub prywatnego w celu zwolnienia kanału dla potrzeb transmisji. Na przykład, gdy w radiotelefonie występuje stan „blokady mikrofonu” spowodowany przypadkowym naciśnięciem przez użytkownika przycisku **PTT**. Aby korzystanie z tej funkcji było możliwe, radiotelefon musi być odpowiednio zaprogramowany. Postępuj zgodnie z procedurą, aby przerwać połączenie.

[Wyślij informację zwrotną](#)

1 Naciśnij zaprogramowany przycisk **zdalnego przerywania transmisji** na danym kanale.

Na ekranie pojawi się tekst `Zdalne Wył.`

2 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na ekranie pojawi się tekst `Zdalne Wył. udane.`

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na ekranie pojawi się tekst `Zdalne Wył. nieudane.`

### UWAGA:

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Talkaround

Funkcja ta umożliwi kontynuowanie komunikacji, gdy przemiennik nie działa lub gdy radiotelefon jest poza jego zasięgiem, ale w zasięgu rozmów innych radiotelefonów.

Ustawienie funkcji Talkaround zostanie zachowane nawet po wyłączeniu zasilania.

#### UWAGA:

Ta funkcja jest niedostępna w trybie Capacity Plus — Pojedyncza stacja ani Capacity Plus — Wiele stacji, ani dla kanałów CB, które znajdują się na tej samej częstotliwości.

## Przełączanie między trybem Talkaround i przemiennika

Postępuj zgodnie z procedurą, aby przełączać radiotelefon między trybem Talkaround a trybem przemiennika.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Repeater/Talkaround**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Talkaround. Naciśnij , aby wybrać.  
Jeśli są włączone, obok informacji Włączone pojawi się .  
Jeśli nie,  obok opcji Włączone zniknie.  
Ekran automatycznie wraca do poprzedniego ekranu.

## Funkcje zaawansowane

Ten rozdział wyjaśnia działanie funkcji dostępnych w radiotelefonie.

Lokalny dystrybutor lub administrator systemu może dostosować radiotelefon zgodnie z Twoimi wymaganiami. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Przypomnienie kanału głównego

Funkcja ta generuje przypomnienie, gdy w radiotelefonie przez pewien czas nie jest ustawiony kanał główny.

Jeśli funkcja ta zostanie aktywowana za pośrednictwem CPS, gdy przez pewien czas radiotelefon nie jest ustawiony na kanał głównym, okresowo mogą się zdarzać poniższe sytuacje:

- Odtworzony zostaje ton przypomnienia kanału głównego oraz powiadomienie.
- W pierwszym wierszu wyświetlacza widoczne jest słowo Brak.
- W drugim wierszu widoczne są słowa Kanał główny.

Na przypomnienie można zareagować wykonując jedną z następujących czynności:

- Powrócić do kanału głównego.
- Tymczasowo wyciszyć przypomnienie za pomocą przycisku programowalnego.
- Ustawić nowy kanał główny za pomocą przycisku programowalnego.

## Wyciszyć przypomnienie kanału głównego

Po wybrzmieniu przypomnienia kanału głównego można je tymczasowo wyciszyć.

Naciśnij przycisk programowalny **Wycisz przypomnienie kanału głównego**.

W pierwszym wierszu wyświetlacza pojawi się tekst HCR, a w drugim — wyciszone.

## Ustawianie nowego kanału głównego

Po wystąpieniu przypomnienia kanału głównego można ustawić nowy kanał główny.

1 Wykonaj jedną z następujących czynności:

- Naciśnij programowany przycisk **resetowania kanału głównego**, aby ustawić bieżący kanał, jako nowy kanał główny. Pomiń poniższe czynności.  
W pierwszym wierszu wyświetlony zostanie alias kanału, a w drugim — tekst Nowy kanał główny.

- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Za pomocą przycisku  lub  przejdź do kanału głównego. Naciśnij , aby wybrać.

5 Naciśnij przycisk  lub , aby wybrać nowy alias kanału głównego. Naciśnij , aby wybrać. Na wyświetlaczu obok aliasu wybranego kanału głównego widoczny jest symbol .

## Spr. radia

Ta funkcja pozwala można ustalić, czy inny radiotelefon w systemie jest aktywny, bez zakłócania bieżącej komunikacji

użytkownika danego radiotelefonu. Żadne dźwiękowe lub wizualne powiadomienie nie jest przesyłane do radiotelefonu docelowego. Ta funkcja jest dostępna tylko dla aliasów lub identyfikatorów abonentów. Aby korzystanie z tej funkcji było możliwe, radiotelefon musi być odpowiednio zaprogramowany.

## Wysyłanie sygnału kontroli radiotelefonu

Postępuj zgodnie z instrukcją, aby wysłać sygnał kontroli radiotelefonu.

1 Naciśnij zaprogramowany przycisk **Kontrola radiotelefonu**.

2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która wskazuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.

Zaczekaj na potwierdzenie.

[Wyślij informację zwrotną](#)

Jeśli naciśniesz przycisk , gdy radiotelefon oczekuje na potwierdzenie, usłyszysz sygnał, a urządzenie przerwie wszelkie ponowne próby i wyłączy tryb weryfikacji dostępności innego radiotelefonu.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

Radiotelefon ponownie wyświetli ekran z aliasem lub identyfikatorem abonenta.

## Wysyłanie sygnału weryfikacji dostępności innego radiotelefonu przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby wysłać sygnał kontroli radiotelefonu przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 

- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.
- 

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.
- 

- 4 Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać.
- 

- 5 Wykonaj jedną z następujących czynności:
    - Wprowadź alias lub ID abonenta i naciśnij , aby przejść dalej.
    - Edytuj ID, z którym połączono się poprzednio, a następnie naciśnij , aby przejść dalej.
-

- 6 Naciśnij  lub , aby przejść do Kontrola radiotelefonu. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.

- 7 Zaczekaj na potwierdzenie.

Jeśli wciśniesz przycisk , gdy radiotelefon oczekuje na potwierdzenie, usłyszysz dźwięk, a urządzenie przerwie wszelkie ponowne próby i wyłączy tryb Kontrola radiotelefonu.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

Radiotelefon ponownie wyświetli ekran z aliasem lub identyfikatorem abonenta.

## Zdalny nasłuch

Ta funkcja służy to włączania mikrofonu radiotelefonu docelowego przy pomocy aliasu lub ID abonenta. Korzystając z tej funkcji, można zdalnie monitorować wszelkie dźwięki w pobliżu radiotelefonu docelowego.

Są dostępne dwa rodzaje zdalnego nasłuchu:

- Monitorowanie zdalne bez uwierzytelnienia
- Monitorowanie zdalne z uwierzytelnianiem.

Uwierzytelniony zdalny nasłuch to dodatkowa (płatna) funkcja. W uwierzytelnionym zdalnym nasłuchu uwierzytelnianie jest wymagane, gdy radiotelefon włącza mikrofon radiotelefonu docelowego.

Kiedy Twój radiotelefon inicjuje tę funkcję na radiotelefonie docelowym, wymagane jest hasło. Hasło jest wstępnie zaprogramowane w radiotelefonie docelowym poprzez program CPS.

Zarówno twój radiotelefon oraz radiotelefon docelowy musi być odpowiednio skonfigurowany, aby umożliwić korzystanie z tej funkcji.

Ta funkcja zatrzymuje się po upływie zaprogramowanego czasu lub kiedy użytkownik radiotelefonu docelowego wykona jakąś operację.

## Inicjowanie monitora zdalnego

Postępuj zgodnie z procedurą, aby zainicjować nastuch zdalny.

### 1 Naciśnij zaprogramowany przycisk **Zdalny nastuch**.

2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID.

3 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.

### 4 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.
- Dźwięk z monitorowanego radia będzie wybrzmiewać przez zaprogramowany czas, a na wyświetlaczu pojawi się komunikat **Zdalny Monitor**. Gdy minie określony czas, zabrzmi dźwięk alertu, a dioda LED wyłączy się.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Inicjowanie nasłuchów zdalnych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby zainicjować zdalny nasłuch przy pomocy Listy kontaktów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontakty. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Zdalnego nasłuchu.

---

- 5 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.

### 6 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.
- Dźwięk z monitorowanego radia będzie wybrzmiewać przez zaprogramowany czas, a na wyświetlaczu pojawi się komunikat Zdalny

Monitor. Gdy minie określony czas, zabrmi dźwięk alertu, a dioda LED wyłączy się.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Inicjowanie nasłuchu zdalnego przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby inicjować nasłuch zdalny przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Numeru radiotelefonu. Naciśnij , aby wybrać.

- 5 Wykonaj jedną z następujących czynności:

- Wprowadź alias lub ID abonenta i naciśnij , aby przejść dalej.
- Edytuj ID, z którym połączono się poprzednio, a następnie naciśnij , aby przejść dalej.

- 6 Naciśnij  lub , aby przejść do Zdalnego nasłuchu.

- 7 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:
  - Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
  - Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.

## 8 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.
- Dźwięk z monitorowanego radia będzie wybrzmiewać przez zaprogramowany czas, a na wyświetlaczu pojawi się komunikat **Zdalny Monitor**. Gdy minie określony czas, zabrzmi dźwięk alertu, a dioda LED wyłączy się.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.

- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Listy skanowania

Listy skanowania są tworzone i przypisywane do indywidualnych kanałów lub grup. Radiotelefon skanuje aktywność głosową w kanałach lub grupach zgodnie z sekwencją określoną na liście skanowania dla bieżącego kanału lub grupy.

Radiotelefon może obsługiwać do 250 list skanowania. Na każdej liście może znajdować się maksymalnie 16 członków.

Każda lista skanowania obsługuje kombinację wpisów analogowych i cyfrowych.

Edytując listę skanowania, można dodawać, usuwać lub określać priorytety kanałów.

Użytkownik może dołączyć nową listę skanowania do radiotelefonu poprzez programowanie przednich przycisków. Dodatkowe informacje: [Konfiguracja przedniego panelu na str. 214](#).

Ikona **Priorytetu** pojawi się po lewej stronie obok aliasu (jeżeli został określony), informując o umieszczeniu wpisu

na liście kanałów z priorytetem 1 lub 2. Nie można umieścić na liście skanowania kilku kanałów z priorytetem 1 lub 2. Ikona **Priorytetu** nie będzie widoczna, jeśli wybierzesz ustawienie **Brak**.

#### UWAGA:

Ta funkcja jest niedostępna w Capacity Plus.

## Przeglądanie wpisów na liście skanowania

Postępuj zgodnie z procedurą, aby przejrzeć wpisy na liście skanowania.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Listy skanowania. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby wyświetlić wszystkich członków na liście.

## Przeglądanie wpisów na liście skanowania przy pomocy wyszukiwania aliasów

Postępuj zgodnie z procedurą, aby przejrzeć wpisy na liście skanowania przy pomocy wyszukiwania aliasów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Listy skanowania. Naciśnij , aby wybrać.

---

- 4 Wprowadź pierwszą literę wymaganego aliasu. Na wyświetlaczu pojawia się migający kursor.

### 5 Wprowadź pozostałe litery wymaganego aliasu.

Podczas wyszukiwania aliasu jest rozróżniana wielkość liter. Jeżeli istnieją co najmniej dwie pozycje o tej samej nazwie, wyświetlacz pokazuje tę, która jest pierwsza na liście.

Pierwsza linia tekstu pokazuje wprowadzone litery. Następne linie tekstu pokazują wybrane wyniki wyszukiwania.

## Dodawanie nowych wpisów do listy skanowania

Postępuj zgodnie z procedurą, aby dodać nowe wpisy do listy skanowania.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby Skanować. Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Listy skanowania. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby Dodać członka. Naciśnij  , aby wybrać.

5 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

6 Naciśnij  lub  , aby przejść do wymaganego poziomu priorytetu. Naciśnij  , aby wybrać.

Na wyświetlaczu pojawi się potwierdzająca miniinformacja – Dodać?.

7 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść to Tak i dodać kolejny wpis. Naciśnij , aby wybrać. Powtórz [krok 5](#) i [krok 6](#).
- Naciśnij  lub , aby przejść do Nie i zapisać obecną listę. Naciśnij , aby wybrać.

## Dodawanie nowych wpisów do listy skanowania przy pomocy wyszukiwania aliasów 🗨️

Postępuj zgodnie z procedurą, aby dodać nowe wpisy do listy skanowania przy pomocy wyszukiwania aliasów.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Listy skanowania. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby Dodać członka. Naciśnij , aby wybrać.

- 5 Wprowadź pierwszą literę wymaganego aliasu. Na wyświetlaczu pojawia się migający kursor.

- 6 Wprowadź pozostałe litery wymaganego aliasu. Podczas wyszukiwania aliasu jest rozróżniana wielkość liter. Jeżeli istnieją co najmniej dwie pozycje o tej samej nazwie, wyświetlacz pokazuje tę, która jest pierwsza na liście. Pierwsza linia tekstu pokazuje wprowadzone litery. Następne linie tekstu pokazują wybrane wyniki wyszukiwania.

- 7 Naciśnij , aby wybrać.

8 Naciśnij  lub , aby przejść do wymaganego poziomu priorytetu. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się potwierdzająca miniinformacja – Dodać?.

9 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do Tak i dodać kolejny wpis. Naciśnij , aby wybrać. Powtórz kroki od [krok 5](#) do [krok 8](#).
- Naciśnij  lub , aby przejść do Nie i zapisać obecną listę. Naciśnij , aby wybrać.

## Usuwanie wpisów z listy skanowania

Postępuj zgodnie z procedurą, aby usunąć wpisy z Listy skanowania.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Listy skanowania. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

5 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się pytanie – Skasować wpis?.

6 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do Tak i skasować wpis. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się symbol powodzenia.

- Naciśnij  lub , aby przejść do Nie i powrócić do poprzedniego ekranu. Naciśnij , aby wybrać.

7 Powtórz czynności od [krok 4](#) do [krok 6](#), aby usunąć pozostałe wpisy.

8 Długie naciśnięcie  pozwala na powrót do ekranu głównego po usunięciu wszystkich określonych aliasów i ID.

## Ustawianie priorytetu wpisów na liście skanowania

Postępuj zgodnie z procedurą, aby ustawić priorytety wpisów na liście skanowania.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Listy skanowania. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

5 Naciśnij  lub , aby Edytować priorytet. Naciśnij , aby wybrać.

6 Naciśnij  lub , aby przejść do wymaganego poziomu priorytetu. Naciśnij , aby wybrać.

Wyświetlacz pokazuje miniinformację o udanej operacji, a następnie powraca do poprzedniego ekranu. Na lewo od aliasu członka pojawi się ikona **Priorytet**.

## Skanowanie

Po rozpoczęciu skanowania radiotelefon cyklicznie przegląda zaprogramowaną listę skanowania dla bieżącego kanału, poszukując aktywności głosowej.

### UWAGA:

Ta funkcja jest niedostępna w Capacity Plus.

Jeżeli używany jest kanał cyfrowy i skanowanie w dwóch trybach zostanie zatrzymane na kanale analogowym, radiotelefon jest automatycznie przełączany do trybu analogowego na czas trwania połączenia. Ta zasada obowiązuje w przypadku zarówno kanałów analogowych, jak i cyfrowych.

Dostępne są dwie metody inicjowania skanowania:

### Skanowanie kanału głównego (ręczne)

Radiotelefon skanuje wszystkie kanały lub grupy uwzględnione na liście skanowania. Zależnie od ustawień radiotelefon może rozpocząć skanowanie automatycznie od ostatnio skanowanego „aktywnego” kanału/grupy lub od kanału, w którym zainicjowano skanowanie.

### Skanowanie automatyczne

Radiotelefon automatycznie rozpoczyna skanowanie po wybraniu kanału lub grupy z włączoną funkcją skanowania automatycznego.

### UWAGA:

Po skonfigurowaniu opcji **Odbieraj wiadomości grupowych w trybie skanowania** radiotelefon może odbierać wiadomości grupowe z kanałów innych niż domowy. Radiotelefon może odpowiadać na wiadomości grupowe na kanale domowym, ale nie może odpowiadać na kanałach innych niż domowy. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie/wyłączanie skanowania

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć skanowanie.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby Skanować. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Stanu skanowania. Naciśnij , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby wybrać żądany stan skanowania i naciśnij przycisk , aby go wybrać.

Jeśli skanowanie jest włączone:

- Na wyświetlaczu widnieje komunikat Skanowanie włączone i ikona **Skanowania**.
- Żółta dioda LED miga.

Jeśli skanowanie jest wyłączone:

- Na wyświetlaczu widnieje komunikat Skanowanie wyłączone.
- Znika ikona **Skanowania**.
- Dioda LED gaśnie.

## Odbieranie transmisji podczas skanowania

Skanowanie jest przerywane tylko w kanale lub w grupie, w których wykryto aktywność. Radiotelefon pozostaje na tym kanale przez zaprogramowany czas, który jest określany jako czas zawieszenia. Postępuj zgodnie z procedurą, aby odpowiadać na transmisje podczas skanowania.

[Wyślij informację zwrotną](#)

- 1  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT** w podczas wstrzymania.

Zielona dioda LED zapala się.

- 2 Aby słuchać, zwolnij przycisk **PTT**.

Radiotelefon powraca do skanowania innych kanałów lub grup, jeśli nie udzieli się odpowiedzi w czasie zawieszenia.

## Eliminacja kanałów niepożądanych

Jeżeli w określonym kanale nieustannie wykrywane są niepożądane połączenia lub zakłócenia szumowe (tzw. kanał „uciążliwy”), można tymczasowo usunąć ten kanał z listy skanowania. Ta funkcja nie jest dostępna dla aktualnie wybranego kanału. Postępuj zgodnie z procedurą, aby usunąć kanały niepożądane.

- 1 Po zatrzymaniu wyszukiwania na niepożądanym lub uciążliwym kanale naciśnij i przytrzymaj

zaprogramowany przycisk **Eliminacji kanału niepożądanego**, aż usłyszysz sygnał.

---

## 2 Zwolnij zaprogramowany przycisk **Eliminacji kanału niepożądanego**.

Kanał zostanie usunięty.

---

## Przywracanie kanałów niepożądanych

Postępuj zgodnie z procedurą, aby przywrócić kanały niepożądane.

Wykonaj jedną z następujących czynności:

- Wyłącz radiotelefon i włącz go ponownie.
  - Zatrzymaj i ponownie uruchom skanowanie za pomocą zaprogramowanego przycisku **Skanuj** lub menu.
  - Zmień kanał za pomocą przycisku **Kanał w górę/w dół**.
- 

## Skanowanie głosujące

Skanowanie głosujące zapewnia użytkownikowi duże pokrycie na obszarach, gdzie zainstalowanych jest wiele stacji bazowych, transmitujących identyczne informacje na różnych kanałach analogowych.

Radiotelefon skanuje kanały analogowe różnych stacji bazowych i przeprowadza proces głosowania, aby wybrać najsilniejszy sygnał. Po jego zakończeniu radiotelefon odbiera transmisje z tej stacji bazowej.

Podczas skanowania głosującego miga żółta dioda LED, a na wyświetlaczu widnieje ikona **Skanowanie głosujące**.

Postępuj tak samo, jak w przypadku procedury [Odbieranie transmisji podczas skanowania na str. 443](#), aby odpowiedzieć na transmisję podczas skanowania głosującego.

## Ustawienia kontaktów

Opcja Kontakty oferuje funkcję książki adresowej w radiotelefonie. Każdy wpis odpowiada aliasowi lub identyfikatorowi używanemu do inicjowania połączenia. Wpisy są porządkowane w kolejności alfabetycznej.

Każdy wpis, w zależności od kontekstu, wiąże się z różnymi typami połączeń: połączeniem grupowym,

indywidualnym, ogólnym, przez komputer lub dyspozytorskim.

Połączenia komputerowe i dyspozytorskie są związane z transmisją danych. Są one dostępne tylko w aplikacjach. Więcej informacji zamieszczono w dokumentacji aplikacji do transmisji danych.

 Dodatkowo, menu Kontakty pozwala przypisać każdą pozycję do jednego lub większej liczby programowanych przycisków numerycznych klawiatury mikrofonu. Jeżeli pozycja jest przypisana do przycisku numerycznego, radiotelefon może szybko ją wywołać po naciśnięciu odpowiedniego przycisku.

#### **UWAGA:**

Przed każdym przyciskiem numerycznym przypisanym do pozycji jest wyświetlany znak zaznaczenia. Jeśli znak zaznaczenia znajduje się przed **Push**, do pozycji nie przypisano przycisku numerycznego.

Dla każdego wpisu na liście kontaktów wyświetlane są następujące informacje:

- Typ połączenia
- Alias połączenia
- ID połączenia

#### **UWAGA:**

Jeżeli funkcja poufności jest włączona na kanale, można inicjować połączenie grupowe, indywidualne i ogólne na tym kanale przy włączonej funkcji poufności. Transmisję będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności lub z taką samą wartością i ID klucza jak w radiotelefonie.

## Inicjowanie połączeń grupowych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia grupowe przy pomocy Listy kontaktów.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby otworzyć **Kontakty**. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

---

- 4 Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Zielona dioda LED zapala się.

- 5 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga po uzyskaniu odpowiedzi od użytkownika należącego do grupy. Na wyświetlaczu pojawi się ikona **Połączenia grupowego** oraz alias lub ID, jak również alias lub ID radiotelefonu nadającego.

- 6  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia.

## Inicjowanie połączeń prywatnych przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby wykonywać połączenia prywatne przy pomocy Listy kontaktów.

- 1 Naciśnij  **OK**, aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby otworzyć  
Kontakt ty. Naciśnij  **OK**, aby wybrać.

- 3 Naciśnij  lub , aby przejść do  
wymaganego aliasu lub ID. Naciśnij  **OK**, aby  
wybrać.

- 4 Naciśnij przycisk **PTT**, aby nawiązać połączenie.  
Zielona dioda LED zapala się. Wyświetlacz pokazuje  
alias docelowego radiotelefonu.

- 5 Poczekaj na sygnał rozpoczęcia rozmowy i zacznij  
wyraźnie mówić do mikrofonu, jeśli jest  
uruchomiony.

## 6 Aby słuchać, zwolnij przycisk **PTT**.

Zielona dioda LED miga, kiedy radiotelefon docelowo odpowiada. Na wyświetlaczu pojawi się ID lub alias nadającego użytkownika.

## 7 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

Brak aktywności głosowej przez określony czas powoduje przerwanie połączenia. Zostanie wyemitowany sygnał. Na wyświetlaczu zobaczysz komunikat **Połączenie zakończone**.

## Przypisywanie wpisów do programowalnych przycisków numerycznych

Postępuj zgodnie z procedurą, aby przypisać wpisy do programowalnych przycisków numerycznych.

### 1 Naciśnij , aby uzyskać dostęp do menu.

### 2 Naciśnij lub , aby otworzyć **Kontak ty**. Naciśnij , aby wybrać.

### 3 Naciśnij lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

### 4 Naciśnij lub , aby **Zaprogramować przycisk**. Naciśnij , aby wybrać.

### 5 Wykonaj jedną z następujących czynności:

- Jeśli określony przycisk numeryczny nie ma przypisanego wpisu, naciśnij  lub  , aby przypisać do wybranego przycisku numerycznego. Naciśnij  , aby wybrać.
- Jeśli określony przycisk numeryczny ma już przypisany wpis, na wyświetlaczu wyświetli się komunikat **Przycisk został już przypisany**,

a dalej, w pierwszej linii tekstu pojawi się pytanie: Zastąpić?. Wykonaj jedną z następujących czynności:

Naciśnij  lub , aby Potwierdzić.

Naciśnij , aby wybrać.

Radiotelefon wyemituje dźwięk informacyjny i wyświetli komunikat Kontakt zapisany oraz miniinformację o udanej operacji.

Naciśnij  lub , aby przejść do Nie i powrócić do poprzedniego kroku.

Każda pozycja może być przypisana innym przyciskom numerycznym. Przed każdym przyciskiem numerycznym przypisanym do pozycji jest wyświetlany znak ✓. Jeśli znak ✓ znajduje się przed pozycją Pusty, przycisk numeryczny nie jest przypisany.

Jeżeli przycisk numeryczny jest przypisany do pozycji w określonym trybie, ta funkcja nie jest obsługiwana przy dłuższym naciśnięciu przycisku numerycznego w innym trybie.

Ekran automatycznie wraca do poprzedniego menu.

## Usuwanie połączeń pomiędzy wpisami i programowalnymi przyciskami numerycznymi

Postępuj zgodnie z procedurą, aby usunąć połączenia pomiędzy wpisami i programowalnymi przyciskami numerycznymi.

- Wykonaj jedną z następujących czynności:
  - Przytrzymanie zaprogramowanego przycisku numerycznego pozwala przejść do wybranego aliasu lub ID. Przejdź do [krok 4](#).
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

4 Naciśnij  lub  , aby Zaprogramować przycisk. Naciśnij  , aby wybrać.

---

5 Naciśnij  lub  , aby przejść do Puste. Naciśnij  , aby wybrać. Pierwsza linia tekstu pokazuje komunikat Usunąć ze wszystkich przycisków.

---

6 Naciśnij  lub  , aby Potwierdzić. Naciśnij  , aby wybrać.

**UWAGA:**

Gdy określona pozycja zostaje usunięta, połączenie pomiędzy nią a odpowiednim programowanym przyciskiem numerycznym zostaje anulowane.

Wybrzmiewa potwierdzający sygnał dźwiękowy. Na wyświetlaczu pojawi się komunikat Kontakt zapisany. Ekran automatycznie wraca do poprzedniego menu.

---

## Dodawanie nowych kontaktów

Postępuj zgodnie z procedurą, aby dodać nowe kontakty.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby otworzyć Kontakty. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby dodać Nowy kontakt. Naciśnij  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby wybrać typ kontaktu Kontakt radiowy lub Kontakt telefoniczny. Naciśnij  , aby wybrać.

---

5 Wprowadź numer kontaktowy przy pomocy klawiatury, a następnie naciśnij  , aby kontynuować.

---

6 Wprowadź nazwę kontaktu przy pomocy klawiatury, a następnie naciśnij , aby kontynuować.

7 Naciśnij  lub , aby przejść do wybranego rodzaju dzwonka. Naciśnij , aby wybrać. Wybrzmiewa potwierdzający sygnał dźwiękowy. Na wyświetlaczu pojawia się symbol powodzenia.

## Ustawianie domyślnego kontaktu

Postępuj zgodnie z procedurą, aby ustawić kontakt domyślny.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Ustaw jako domyślny. Naciśnij , aby wybrać. Wybrzmiewa potwierdzający sygnał dźwiękowy. Na wyświetlaczu pojawia się symbol powodzenia. Na wyświetlaczu obok ID lub aliasu wybranego jako domyślny pojawi się .

## Ustawienia wskaźnika połączenia

Ta funkcja umożliwi użytkownikom konfigurowanie dźwięków połączeń lub wiadomości tekstowych.

## Włączanie lub wyłączanie dzwonków wywołania dla sygnału wywołania

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwonki odbieranych alertów połączeń.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Dźwięków/Alertów. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do Dzwonków. Naciśnij , aby wybrać.

---

6 Naciśnij przycisk  lub , aby przejść do pozycji Alert połączenia. Naciśnij , aby wybrać.

---

7 Naciśnij  lub , aby przejść do wybranego sygnału. Naciśnij , aby wybrać. Na wyświetlaczu pod wybranym sygnałem pojawi się .

---

## Włączanie lub wyłączanie dzwonek dla wywołań indywidualnych

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwonki dla połączeń prywatnych.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Tonów/ Alarmów. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do Dzwonków. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do Połączeń prywatnych. Naciśnij , aby wybrać.

Jeżeli dźwięki połączeń prywatnych zostaną włączone, na ekranie pojawi się oznaczenie  obok opcji Wł.

Jeżeli dźwięki połączeń prywatnych zostaną wyłączone, na ekranie pojawi się oznaczenie  obok opcji Wł.

---

7 Naciśnij  lub , aby przejść do wybranego sygnału. Naciśnij , aby wybrać.

Jeśli są włączone, obok informacji Włączone pojawi się . Jeśli nie,  obok opcji Włączone zniknie.

---

## Włączanie lub wyłączenie dzwonek dla wywołań selektywnych

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwoneki dla połączeń selektywnych.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do Tonów/ Alarmów. Naciśnij  , aby wybrać.
- 
- 5 Naciśnij  lub  , aby przejść do Dzwonków. Naciśnij  , aby wybrać.
- 
- 6 Naciśnij  lub  , aby przejść do Połączeń selek tywnych. Naciśnij  , aby wybrać. Wyświetlacz pokazuje  oraz obecny sygnał.
- 
- 7 Naciśnij  lub  , aby przejść do wybranego sygnału. Naciśnij  , aby wybrać. Na wyświetlaczu pod wybranym sygnałem pojawi się .

## Włączanie lub wyłączenie dzwonek dla wiadomości tekstowych

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dzwoneki dla wiadomości tekstowych.

[Wyślij informację zwrotną](#)

- 1 Naciśnij  , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.
- 
- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.
- 
- 4 Naciśnij  lub  , aby przejść do Tonów/ Alarmów. Naciśnij  , aby wybrać.
- 
- 5 Naciśnij  lub  , aby przejść do Dzwonków. Naciśnij  , aby wybrać.
- 
- 6 Naciśnij  lub  , aby przejść do Wiadomości tekstowej. Naciśnij  , aby wybrać. Wyświetlacz pokazuje  oraz obecny sygnał.

- 7 Naciśnij  lub , aby przejść do wybranego sygnału. Naciśnij , aby wybrać.

Na wyświetlaczu pod nowo wybranym sygnałem pojawi się .

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Dźwięków/Alertów. Naciśnij , aby wybrać.

- 5 Naciśnij  lub , aby przejść do Dzwonków. Naciśnij , aby wybrać.

- 6 Naciśnij  lub , aby przejść do opcji Telemetria. Naciśnij , aby wybrać.  
Bieżący sygnał jest oznaczony za pomocą symbolu .

## Włączanie i wyłączanie sygnału dźwiękowego wiadomości tekstowej z raportem telemetrycznym

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć sygnał dźwiękowy wiadomości tekstowej z raportem telemetrycznym.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

## Przypisywanie stylów dzwonka

Można zaprogramować radiotelefon do generowania jednego z dziesięciu wstępnie zdefiniowanych dzwonków podczas odbierania alertu połączenia lub wiadomości tekstowej od określonego kontaktu. Radiotelefon generuje

dźwięk dla każdego stylu dzwonka podczas nawigacji na liście. Postępuj zgodnie z procedurą przypisywania stylów dzwonka w radiotelefonie.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby otworzyć Kontak ty.  
Naciśnij  , aby wybrać.  
Wpisy są porządkowane w kolejności alfabetycznej.

3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do Edycji.  
Naciśnij  , aby wybrać.

5 Naciśnij  lub  , aby Edytować dzwonek.  
Naciśnij  , aby wybrać.

6 Naciśnij  lub  , aby przejść do wybranego sygnału. Naciśnij  , aby wybrać.  
Pojawi się  obok wybranego sygnału dźwiękowego.

## Zwiększanie głośności dźwięku alarmu

Radiotelefon można zaprogramować do nieprzerwanego powiadamiania użytkownika o nieodebranych połączeniach radiowych. W tym przypadku poziom głośności dźwięku alarmu jest zwiększany automatycznie w miarę upływu czasu. Ta funkcja jest określana jako „alarm narastający”.

## Funkcje rejestru połączeń

Radiotelefon rejestruje wszystkie ostatnie wychodzące, odebrane i nieodebrane połączenia prywatne. Rejestr połączeń umożliwia przeglądanie ostatnich połączeń i zarządzanie nimi.

Nieodebrane alerty połączeń mogą być ujęte w rejestrze połączeń, w zależności od konfiguracji systemu w radiotelefonie. Na każdej liście połączeń można wykonać następujące zadania:

- Zapisz alias lub ID na liście kontaktów
- Usunięcie połączenia
- Usunięcie wszystkich połączeń
- Zobacz szczegóły

## Przeglądanie ostatnich połączeń

Postępuj zgodnie z procedurą, aby przeglądać ostatnie połączenia.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Rejestru połączeń. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do wybranej listy. Dostępne są następujące listy: Nieodebrane, Odebrane i Wychodzące.

Naciśnij , aby wybrać.

Na wyświetlaczu zostanie pokazany najnowszy wpis.

---

4 Naciśnij  lub , aby przeglądać listę.

Naciśnij przycisk **PTT**, aby rozpocząć rozmowę prywatną z obecnie wyświetlanym aliasem lub ID.

---

## Usuwanie połączenia z Listy połączeń

Postępuj zgodnie z procedurą, aby usunąć połączenia z Listy połączeń.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Rejestru połączeń. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do wymaganej listy. Naciśnij , aby wybrać.

Jeśli lista jest pusta:

- Zostanie wyemitowany sygnał.

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*

---

**4** Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

---

**5** Naciśnij  lub , aby przejść do pozycji *Skasować pozycję?*. Naciśnij , aby wybrać.

- 
- 6** Wykonaj jedną z następujących czynności:
- Naciśnij przycisk , aby wybrać opcję *Tak* i usunąć wpis. Na wyświetlaczu pojawi się komunikat *Poz. Usun..*
  - Naciśnij  lub , aby wybrać *Nie*. Naciśnij , aby wybrać. Radiotelefon powróci do poprzedniego ekranu.
- 

## Przeglądanie szczegółów listy połączeń

Postępuj zgodnie z procedurą, aby wyświetlić informacje o połączeniu.

---

**1** Naciśnij , aby uzyskać dostęp do menu.

---

**2** Naciśnij  lub , aby przejść do Rejestru połączeń. Naciśnij , aby wybrać.

---

**3** Naciśnij  lub , aby przejść do wymaganej listy. Naciśnij , aby wybrać.

---

**4** Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby wyświetlić szczegóły. Naciśnij , aby wybrać. Wyświetlacz pokaże szczegółowe informacje o połączeniu.
- 

## Zapisywanie aliasów lub ID z Listy połączeń

Postępuj zgodnie z procedurą, aby zapisywać aliasy lub ID z Listy połączeń.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do Rejestru połączeń. Naciśnij , aby wybrać.
- 
- 3 Naciśnij  lub , aby przejść do wymaganej listy. Naciśnij , aby wybrać.
- 

- 4 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.
- 

- 5 Naciśnij  lub , aby Zapisać. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się migający kursor.
- 

- 6 Wprowadź pozostałe litery wymaganego aliasu. Naciśnij , aby wybrać. Można również zapisać ID bez aliasu. Na wyświetlaczu pojawia się symbol powodzenia.
- 

## Alert połączenia

Korzystając z funkcji wysyłania alertu połączenia na pager, można poinformować użytkownika określonego radiotelefonu o konieczności zainicjowania wywołania zwrotnego.

Ta funkcja jest dostępna tylko dla aliasów lub identyfikatorów abonentów za pośrednictwem menu listy kontaktów, wybierania ręcznego lub programowanego przycisku **szybkiego połączenia**.

## Inicjowanie alertów połączenia

Postępuj zgodnie z procedurą, aby wysyłać alarmy połączeń.

### 1 Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

Na wyświetlaczu pojawi się komunikat **Alert połączenia** oraz alias i ID abonenta. Zielona dioda LED zapala się.

### 2 Zaczekaj na potwierdzenie.

Jeżeli potwierdzenie alertu połączenia zostanie odebrane, na wyświetlaczu pojawi się miniinformacja o udanej operacji.

Jeżeli potwierdzenie alertu połączenia nie zostanie odebrane, na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.

## Inicjowanie alertów połączenia przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby inicjować alerty połączenia przy pomocy Listy kontaktów

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

4 Naciśnij przycisk  lub , aby przejść do pozycji **Alert połączenia**. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się komunikat **Alert połączenia** oraz alias i ID abonenta. Zielona dioda LED zapala się.

- 5 Zaczekaj na potwierdzenie.
    - Jeżeli potwierdzenie alertu połączenia zostanie odebrane, na wyświetlaczu pojawi się miniinformacja o udanej operacji.
    - Jeżeli potwierdzenie alertu połączenia nie zostanie odebrane, na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.
- 

## Inicjowanie alertów połączenia przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby inicjować alerty połączenia przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.
- 

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.  
Na wyświetlaczu pojawia się migający kursor.
- 

- 4 Wprowadź ID abonenta i naciśnij , aby kontynuować.
- 

- 5 Naciśnij przycisk  lub , aby przejść do pozycji Alert połączenia. Naciśnij , aby wybrać.  
Na wyświetlaczu pojawi się komunikat Alert połączenia oraz alias i ID abonenta. Zielona dioda LED zapala się.
- 

- 6 Zaczekaj na potwierdzenie.
  - Jeżeli potwierdzenie alertu połączenia zostanie odebrane, na wyświetlaczu pojawi się miniinformacja o udanej operacji.

- Jeżeli potwierdzenie alertu połączenia nie zostanie odebrane, na wyświetlaczu pojawi się miniostrzeżenie o nieudanej operacji.

Alert połączenia jest przenoszony do nieodebranych połączeń w rejestrze połączeń. Możesz odpowiedzieć rozmówcy z rejestru nieodebranych połączeń.

## Reagowanie na alerty połączenia

Postępuj zgodnie z procedurą, aby odpowiadać na alerty połączenia.

Po otrzymaniu alertu połączenia:

- Zostanie wyemitowany powtarzany sygnał dźwiękowy.
- Żółta dioda LED miga.
- Na wyświetlaczu pojawi się lista powiadomień z alertami połączeń oraz aliasem lub ID radiotelefonu rozmówcy.

W zależności od sposobu konfiguracji urządzenia przez sprzedawcę lub administratora systemu, można odpowiedzieć na alert połączenia wykonując jedną z następujących czynności:

- Naciśnij przycisk **PTT** i odbierz połączenie indywidualne bezpośrednio.
- Naciśnij przycisk **PTT**, aby kontynuować normalną komunikację z grupą rozmówców.

Patrz [Lista powiadomień na str. 211](#) i [Funkcje rejestru połączeń na str. 143](#), aby uzyskać więcej informacji.

## Tryb wyciszony

Tryb wyciszenia zapewnia opcję wyciszenia wszystkich powiadomień dźwiękowych radiotelefonu.

Po zainicjowaniu trybu wyciszenia wszystkie powiadomienia dźwiękowe, za wyjątkiem funkcji o wysokim priorytecie, takich jak operacje awaryjne, zostaną wyciszone.

Po wyłączeniu trybu wyciszenia radiotelefon będzie ponownie emitować sygnały i transmisje dźwiękowe.

### UWAGA:

Jest to dodatkowa (płatna) funkcja. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie trybu wyciszenia

Postępuj zgodnie z procedurą, aby włączyć Tryb wyciszenia.

Dostęp do tej funkcji jest możliwy za pomocą zaprogramowanego przycisku **Tryb wyciszenia**.

Po włączeniu trybu wyciszenia:

- Rozlega się potwierdzający sygnał dźwiękowy.
- Wyświetlacz pokazuje Tryb wyciszenia wł.
- Czerwona dioda LED zacznie migać i będzie kontynuować miganie do momentu opuszczenia Trybu wyciszenia.
- Na wyświetlaczu na ekranie głównym pojawi się ikona **Tryb wyciszenia**.
- Radiotelefon jest wyciszony.
- Timer trybu wyciszenia rozpoczyna odliczanie skonfigurowanego czasu.

## Ustawianie timera trybu wyciszenia

Funkcję trybu wyciszenia można włączyć na określony wstępnie okres czasu, ustawiając timer trybu wyciszenia.

Czas trwania timera jest konfigurowany w menu radiotelefonu i może mieścić się w zakresie od 0,5–6 godzin. Urządzenie wychodzi z trybu wyciszenia po upływie czasu timera.

Jeśli timer zostanie ustawiony na wartość 0, radiotelefon pozostanie w trybie wyciszenia przez niezdefiniowany okres czasu do momentu naciśnięcia zaprogramowanego przycisku **Tryb wyciszenia**.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby Wyciszyć timer. Naciśnij  , aby wybrać.

- 5 Naciśnij przycisk  lub , aby edytować wartość numeryczną każdej cyfry i naciśnij .

## Wyjście z Trybu wyciszenia

Ta funkcja może zostać opuszczona automatycznie, po tym jak upłynie czas trybu wyciszenia.

Wykonaj jedną z poniższych czynności, aby wyjść z trybu wyciszenia ręcznie:

- Naciśnij zaprogramowany przycisk **Tryb wyciszenia**.
- Naciśnij przycisk **PTT** przy dowolnej pozycji.

Po wyłączeniu Trybu wyciszenia:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Wyświetlacz pokazuje Tryb wyciszenia wył.
- Czerwona migająca dioda LED gaśnie.
- Ikona **trybu wyciszenia** znika z ekranu głównego.
- Wyciszenie radiotelefonu zostanie wyłączone, a stan głośnika przywrócony.

- Jeśli timer trybu wyciszenia nie wygaś, zostanie zatrzymany.

### UWAGA:

Tryb wyciszenia zostanie również wyłączony, jeśli użytkownik rozpocznie transmisję głosową lub przełączy się na niezaprogramowany kanał.

## Tryb awaryjny

Sygnał alarmowy jest używany do sygnalizowania sytuacji krytycznej. Tryb awaryjny można zainicjować w dowolnym momencie, nawet jeśli bieżący kanał jest używany.

Sprzedawca może ustawić czas naciskania programowanego przycisku **alarmowego** (z wyjątkiem dłuższego naciśnięcia), podobnie jak w przypadku wszystkich innych przycisków:

### Krótkie naciśnięcie

Czas trwania od 0,05 s do 0,75 s.

### Długie naciśnięcie

Czas trwania od 1,00 s do 3,75 s.

Przycisk **Alarmowy** jest przypisany funkcji włączania/wyłączania alarmu. Należy sprawdzić u sprzedawcy, jaki jest przypisany czas działania przycisku **alarmowego**.

**UWAGA:**

Jeżeli krótkie naciśnięcie przycisku **alarmowego** powoduje rozpoczęcie trybu alarmowego, to długie naciśnięcie tego przycisku umożliwia radiotelefonowi wyjście z trybu alarmowego.

Jeżeli długie naciśnięcie przycisku **alarmowego** powoduje rozpoczęcie trybu alarmowego, to krótkie naciśnięcie tego przycisku umożliwia radiotelefonowi wyjście z trybu alarmowego.

Radiotelefon obsługuje trzy informacje alarmowe:

- Informacja alarmowa,
- Informacja alarmowa z wywołaniem,
- Sygnał alarmowy z funkcją awaryjnej aktywacji mikrofonu. 

**UWAGA:**

Tylko **jeden** spośród powyższych alarmów może być przypisany do zaprogramowanego przycisku awaryjnego lub awaryjnego przycisku nożnego.

Dodatkowo każdy alarm może należeć do jednego z następujących typów:

**Regularny**

Radiotelefon nadaje sygnał alarmowy oraz stosuje sygnały wizualne lub dźwiękowe.

**Ciche**

Radiotelefon nadaje sygnał alarmowy bez sygnałów wizualnych lub dźwiękowych. Radiotelefon odbiera połączenia bez emitowania dźwięku przez głośnik do chwili zakończenia zaprogramowanego czasu transmisji *mikrofonu aktywnego* i/lub do momentu naciśnięcia przycisku **PTT**.

**Cichy z obsługą głosu**

Radiotelefon nadaje sygnał alarmowy bez sygnałów wizualnych czy dźwiękowych, ale odtwarza dźwięk połączeń przychodzących za pomocą wbudowanego głośnika.

## Odbieranie informacji alarmowych

Postępuj zgodnie z procedurą, aby odbierać informacje alarmowe.

Gdy otrzymasz informację alarmową:

- Zostanie wyemitowany sygnał.
- Miga czerwona dioda LED.
- Na wyświetlaczu pojawia się ikona **Alarm** oraz alias osoby inicjującej alarm lub, jeśli istnieje więcej niż jeden

alarm, aliasy wszystkich rozmówców zostaną wyświetlone na liście alarmów.

1 Wykonaj jedną z następujących czynności:

- Jeśli ma miejsce tylko jeden alarm, naciśnij , aby zobaczyć więcej szczegółów.
- Jeśli istnieje więcej alarmów, naciśnij  lub , aby przejść do określonego alarmu i naciśnij , aby zobaczyć więcej szczegółów.

2 Naciśnij , aby zobaczyć opcje postępowania.

3 Naciśnij przycisk  i wybierz pozycję Tak, aby wyjść z Listy alarmów.

4 Naciśnij , aby uzyskać dostęp do menu.

5 Wybierz Listę alarmów, aby ponownie wejść do listy alarmów.

6 Emitowany jest sygnał dźwiękowy, a dioda LED zaczyna migać na czerwono do momentu wyjścia z trybu awaryjnego. Sygnał dźwiękowy można wyciszyć. Wykonaj jedną z następujących czynności:

- naciśnij przycisk **PTT**, aby wywołać grupę radiotelefonów, które odebrały sygnał alarmowy,
- dotknij dowolny przycisk programowalny,
- wyjdź z trybu awaryjnego. Zobacz [Wyjście z trybu awaryjnego po otrzymaniu sygnału alarmowego na str. 466](#).

## Reagowanie na informacje alarmowe

Postępuj zgodnie z procedurą, aby odpowiadać na informacje alarmowe.

1 Upewnij się, że na wyświetlaczu jest widoczna lista alarmów. Naciśnij  lub , aby przejść do wymaganego aliasu lub ID.

2  Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i

można odpowiedzieć. Naciśnij przycisk **PTT**, aby transmitować przekaz głosowy poza trybem alarmowym do tej samej grupy, dla której była przeznaczona informacja alarmowa.

Zielona dioda LED zapala się. Radiotelefon nadal funkcjonuje w trybie awaryjnym.

### 3 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
-  Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

### 4 Aby słuchać, zwolnij przycisk **PTT**.

Gdy odpowiada radiotelefon inicjujący alarm:

- Zielona dioda LED miga.
- Na wyświetlaczu pojawia się ikona **Połączenie grupowe**, alias lub ID nadającego radiotelefonu oraz lista alarmów.

Głos w trybie alarmowym może transmitować wyłącznie radiotelefon inicjujący alarm. Wszystkie inne radiotelefony

(łącznie z odbierającym połączenie alarmowe) nadają głos w trybie niealarmowym.

## Wyjście z trybu awaryjnego po otrzymaniu sygnału alarmowego

Wykonaj jedną z poniższych czynności, aby wyjść z trybu alarmowego po otrzymaniu informacji alarmowej.

- Usuń pozycje alarmów.
- Wyłącz radiotelefon.

## Wysyłanie informacji alarmowych

Ta funkcja pozwala wysłać informację alarmową — sygnał bezdźwiękowy — który generuje informację o alarmie w grupie radiotelefonów. Radiotelefon nie emituje powiadomień dźwiękowych ani wizualnych w trybie awaryjnym, gdy ustawiona jest opcja wyciszenia.

Postępuj zgodnie z procedurą, aby wysłać informacje alarmowe.

### 1 Naciśnij programowalny przycisk **Alarm wł.**

Na wyświetlaczu zobaczysz jeden z dwóch poniższych wyników:

- Na wyświetlaczu pojawia się komunikat Alarmy Tx i alias odbiorcy.
-  Na wyświetlaczu pojawi się komunikat Tx Telegram (Telegram Tx) i alias odbiorcy.

Zielona dioda LED zapala się. Pojawi się ikona **Alarm**.

#### UWAGA:

Jeżeli zaprogramowano go, emitowany jest sygnał dźwiękowy wyszukiwania awaryjnego. Dźwięk ten jest wyciszany, gdy radiotelefon nadaje lub odbiera komunikaty głosowe oraz wyłączany, gdy radiotelefon wyjdzie z trybu alarmowego. Awaryjne wyszukiwanie sygnału można zaprogramować za pomocą CPS.

## 2 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Emitowany jest sygnał alarmowy.
- Miga czerwona dioda LED.
- Na wyświetlaczu pojawi się komunikat Alarm wysł.

Jeśli operacja nie powiedzie się po wykorzystaniu wszystkich prób:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się komunikat Alarm nieudany.

Radiotelefon kończy tryb informacji alarmowej i ponownie wyświetla ekran główny.

## Wysyłanie informacji alarmowych z wywołaniem

Ta funkcja pozwala wysłać informację alarmową z wywołaniem do grupy radiotelefonów. Po uzyskaniu potwierdzenia przez radiotelefon w danej grupie, grupa radiotelefonów może komunikować się przez zaprogramowany kanał alarmowy.

Postępuj zgodnie z procedurą, aby wysłać informacje alarmowe z wywołaniem.

- 1 Naciśnij programowalny przycisk **Alarm wł.** lub **Alarmowy** włącznik nożny. Na wyświetlaczu pojawi

się komunikat Wysyłanie alarmu na przemian z identyfikatorem radiotelefonu.

Dostępne opcje:

- Na wyświetlaczu pojawi się komunikat Tx Telegram (Telegram Tx) i alias odbiorcy.

Zielona dioda LED zapala się. Pojawi się ikona **Alarm**.

#### **UWAGA:**

Jeżeli zaprogramowano go, emitowany jest sygnał dźwiękowy wyszukiwania awaryjnego. Dźwięk ten jest wyciszony, gdy radiotelefon nadaje lub odbiera komunikaty głosowe oraz wyłączony, gdy radiotelefon wyjdzie z trybu alarmowego. Sygnał awaryjnego wyszukiwania może być zaprogramowany przez sprzedawcę lub administratora systemu.

---

## 2 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Emitowany jest sygnał alarmowy.
- Miga czerwona dioda LED.

- Na wyświetlaczu pojawi się komunikat Alarm wysł.
- Radiotelefon przejdzie do trybu połączenia alarmowego po wyświetleniu komunikatu Alarm i docelowego aliasu grupy.

---

## 3 Naciśnij przycisk **PTT**, aby nawiązać połączenie.

Zielona dioda LED zapala się. Na wyświetlaczu pojawi się ikona **połączenia grupowego**.

---

## 4 Wykonaj jedną z następujących czynności:

- Poczekaj na sygnał rozpoczęcia rozmowy i zacznij wyraźnie mówić do mikrofonu, jeśli jest uruchomiony.
-  Zaczekaj, aż zamilknie pogłos **PTT** i mów wyraźnie do mikrofonu, jeśli jest uruchomiony.

---

## 5 Aby słuchać, zwolnij przycisk **PTT**.

Na wyświetlaczu widać aliasy rozmówcy i grupy.

---

## 6 Jeżeli jest włączona funkcja Sygnalizacja wolnego kanału, przez chwilę rozbrzmiewa ton

powiadamiający, gdy nadający radiotelefon zwalnia przycisk **PTT**, co oznacza, że kanał jest wolny i można odpowiedzieć. Naciśnij przycisk **PTT**, aby odpowiedzieć.

- 
- 7 Aby wyjść z trybu alarmowego po zakończeniu połączenia, należy nacisnąć przycisk **Wył. alarm..**  
Zostanie wyświetlony ekran główny.
- 

## Sygnaly alarmowe z funkcją awaryjnej aktywacji mikrofonu

Ta funkcja pozwala wysyłać informację alarmową z żądaniem połączenia głosowego do grupy radiotelefonów. Mikrofon radiotelefonu zostaje automatycznie aktywowany, pozwalając na komunikację z grupą radiotelefonów bez naciskania przycisku **PTT**. Taki stan jest również określany mianem *aktywny mikrofon*.

### UWAGA:

Radiotelefon nie wykrywa mikrofonu innego niż IMPRES podłączonego do tylnego złącza do akcesoriów.

Jeśli nie zostanie wykryty żaden mikrofon w określonym zaprogramowanym złączu, radiotelefon sprawdzi drugie złącze. W takim wypadku akcesorium priorytetowym jest wykryty mikrofon.

Jeżeli w radiotelefonie jest włączony tryb Cyklu awaryjnego, powtórzenia okresów *aktywnego mikrofonu* i odbierania mają zaprogramowany czas. W trybie Cyklu awaryjnego odbierane połączenia są słyszalne przez głośnik.

Przy naciśnięciu przycisku **PTT** podczas zaprogramowanego okresu odbierania, zabrzmi ton zakazu, oznaczający konieczność zwolnienia przycisku **PTT**. Radiotelefon ignoruje naciśnięcie przycisku **PTT** i pozostaje w trybie alarmowym.

Jeżeli przycisk **PTT** zostanie naciśnięty w interwale czasowym, w którym używany jest *mikrofon aktywny* i pozostanie naciśnięty po wygaśnięciu interwału *mikrofonu aktywnego*, radiotelefon kontynuuje nadawanie aż do chwili, gdy zostanie zwolniony przycisk **PTT**.

Jeżeli próba wysłania informacji alarmowej nie powiedzie się, radiotelefon nie ponawia próby, ale przechodzi bezpośrednio w stan *aktywny mikrofon*.

#### UWAGA:

Niektóre akcesoria mogą nie obsługiwać *mikrofonu aktywnego*. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Wysyłanie informacji alarmowych z żądaniem połączenia głosowego

Postępuj zgodnie z procedurą, aby wysłać sygnał alarmowy z żądaniem połączenia głosowego.

- 1 Naciśnij programowalny przycisk **Alarm wł.** lub **Alarmowy** włącznik nożny.

Na wyświetlaczu zobaczysz jeden z dwóch poniższych wyników:

- Na wyświetlaczu pojawia się komunikat **Alarm Tx** i alias odbiorcy.
- Na wyświetlaczu pojawi się komunikat **Tx Telegram** (Telegram Tx) i alias odbiorcy.

Zielona dioda LED zapala się. Pojawi się ikona **Alarm**.

- 2 Gdy na wyświetlaczu pojawi się *wysłano informację alarmową*, mów wyraźnie do mikrofonu.

Radiotelefon automatycznie zaprzestaje transmisji:

- Po wygaśnięciu cyklu pomiędzy *aktywnym mikrofonem* a odbieraniem, jeżeli tryb Cyklu alarmowego jest włączony.
- Po wygaśnięciu okresu *mikrofonu aktywnego*, jeśli tryb Cyklu alarmowego jest wyłączony.

- 3 Naciśnij przycisk **Alarm Wył.**, aby wyjść z trybu alarmowego.

Zostanie wyświetlony ekran główny.

## Ponowne inicjowanie trybu alarmowego

Ta funkcja jest dostępna tylko w radiotelefonie wysyłającym informację alarmową. Postępuj zgodnie z procedurą, aby ponownie zainicjować tryb alarmowy.

Wykonaj jedną z następujących czynności:

- Zmień kanał, gdy radiotelefon jest w trybie alarmowym. Radiotelefon wyjdzie z trybu alarmowego i zainicjuje go ponownie, jeśli Informacja alarmowa jest włączona na nowym kanale.
- Naciśnij przycisk **Alarm wł.** podczas inicjacji alarmu/transmisji. Radiotelefon wychodzi z tego trybu i ponownie uruchamia tryb alarmowy.

## Wyjście z trybu awaryjnego po wysłaniu wywołania alarmowego

Ta funkcja jest dostępna tylko w radiotelefonie wysyłającym informację alarmową.

Radiotelefon wychodzi z trybu alarmowego, gdy:

- Otrzymano potwierdzenie odbioru (dotyczy tylko alarmu awaryjnego).
- Wykonano wszystkie ponowne próby wysłania alarmu.

### UWAGA:

Wyłączenie radiotelefonu powoduje zakończenie trybu awaryjnego. Po ponownym włączeniu radiotelefonu tryb awaryjny nie zostanie ponownie uaktywniony automatycznie.

Postępuj zgodnie z procedurą, aby ponownie wyjść z trybu alarmowego.

Wykonaj jedną z następujących czynności:

- Naciśnij programowalny przycisk **Alarm wł.**
- Zmień kanał na nowy, który nie ma zaprogramowanego systemu alarmowego. Na wyświetlaczu pojawi się komunikat **Brak alarmu.**

## Usuwanie pozycji z listy alarmów

Postępuj zgodnie z procedurą, aby usunąć elementy z listy alarmów i wyjść z trybu alarmowego.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Listy alarmów. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do danego alarmu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby Skasować. Naciśnij  , aby wybrać.

## Wiadomości tekstowe

Radiotelefon może odbierać dane (np. wiadomości tekstowe) wysłane z innego urządzenia lub programu do ich wysyłania.

Istnieją dwa typy wiadomości tekstowych: krótkie wiadomości tekstowe DMR (Digital Mobile Radio) i wiadomości tekstowe. Maksymalna długość krótkiej wiadomości tekstowej DMR to 23 znaki. Maksymalna liczba znaków wiadomości wynosi 280, włączając w to linię

tematu. Wiersz tematu pojawia się tylko po otrzymaniu wiadomości z aplikacji poczty e-mail.

### UWAGA:

Maksymalna długość znaków ma zastosowanie wyłącznie w modelach wyposażonych w najnowszej wersji oprogramowanie i sprzęt. W modelach ze starszą wersją oprogramowania i sprzętu maksymalna długość wiadomości tekstowej to 140 znaków. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

W języku arabskim tekst jest wpisywany od prawej strony do lewej.

## Wiadomości tekstowe

Wiadomości tekstowe są przechowywane w Skrzynce odbiorczej i sortowane zgodnie z kolejnością ich odebrania.

## Wyświetlanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wyświetlać wiadomości tekstowe.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.
- 
- 3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.
- Jeśli Skrzynka odbiorcza jest pusta:
- Na wyświetlaczu pojawi się komunikat *Lista jest pusta*.
  - Zabrzmi sygnał klawiatury, jeśli jest włączony.
- 
- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.
- Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.
- 

## Przeglądanie wiadomości tekstowych z raportem telemetrii

Postępuj zgodnie z procedurą, aby wyświetlić wiadomość tekstową z raportem telemetrii ze skrzynki odbiorczej.

[Wyślij informację zwrotną](#)

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.
- 
- 3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.
- 
- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.
- Nie możesz odpowiedzieć na wiadomość tekstową dot. stanu telemetrii.
- Na ekranie pojawi się komunikat Telemetria:  
<Stan wiadomości tekstowej>.
- 
- 5 Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.
-

## Odpowiadanie na wiadomości tekstowe

Postępuj zgodnie z procedurą, aby odpowiadać na wiadomości tekstowe.

Po otrzymaniu wiadomości tekstowej:

- Wyświetlacz pokazuje listę powiadomień z aliasami lub ID nadawcy.
- Na wyświetlaczu pojawia się ikona **Wiadomość**.

### UWAGA:

Jeżeli wciśnięty jest przycisk **PTT**, radiotelefon wychodzi z ekranu alertu wiadomości tekstowej i rozpoczyna połączenie prywatne lub grupowe z nadawcą wiadomości.

#### 1 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Przeczytać.  
Naciśnij , aby wybrać.  
Na wyświetlaczu widnieje wiadomość tekstowa. Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.
- Naciśnij  lub , aby Przeczytać później. Naciśnij , aby wybrać.

Radiotelefon powraca do ekranu, który był aktywny przed odebraniem wiadomości tekstowej.

- Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

#### 2 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk , aby powrócić do skrzynki odbiorczej.
- Naciśnij przycisk  po raz drugi, aby odpowiedzieć, przesłać dalej lub usunąć wiadomość tekstową.

## Odpowiadanie na wiadomości tekstowe przy użyciu krótkich wiadomości tekstowych

Postępuj zgodnie z procedurą, aby odpowiadać na wiadomości tekstowe w radiotelefonie przy użyciu krótkich wiadomości tekstowych.

#### 1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Wiad tekst**.  
Przejdź do kroku [krok 3](#).
- Naciśnij , aby uzyskać dostęp do menu.

**2** Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

**3** Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

**4** Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.  
Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.

**5** Naciśnij , aby wejść do podmenu.

**6** Naciśnij  lub , aby Odpowiedzieć.  
Naciśnij , aby wybrać.

**7** Naciśnij  lub , aby przejść do Krótkiej odpowiedzi. Naciśnij , aby wybrać.

**8** Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się miniinformacja o tym, że wiadomość jest wysyłana.

**9** Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawia się symbol niepowodzenia.
- Radiotelefon powróci do ekranu opcji **Wyślij** ponownie.

## Ponowne wysyłanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby ponownie wysłać wiadomości tekstowe.

Podczas wyświetlanie ekranu opcji **Wyślij** ponownie:

Naciśnij , aby ponownie wysłać tę samą wiadomość do tego samego aliasu grupy lub ID.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
  - Radiotelefon powróci do ekranu opcji **Wyślij** ponownie.
- 

## Przekazywanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby przekazywać wiadomości tekstowe.

Podczas wyświetlanie ekranu opcji **Wyślij** ponownie:

- 1 Naciśnij  lub , aby Przekazać dalej, i naciśnij , aby przesłać tą samą wiadomość do innego aliasu lub ID abonenta lub grupy.
- 

- 2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

---

- 3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

**UWAGA:**

Mozna również ręcznie wybrać adres radiotelefonu docelowego (patrz rozdział [Przekazywanie wiadomości tekstowych za pomocą wybierania ręcznego na str. 477](#)).

## Przekazywanie wiadomości tekstowych za pomocą wybierania ręcznego

Postępuj zgodnie z procedurą, aby przekazywać wiadomości tekstowe za pomocą wybierania ręcznego.

- 1 Naciśnij przycisk  lub , aby przejść do przekazywania. Naciśnij , aby wybrać.
- 2 Naciśnij , aby ponownie wysłać tę samą wiadomość do tego samego abonenta, aliasu grupy lub ID.

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać. Na wyświetlaczu pojawi się Numer radiotelefonu!.

- 4 Wprowadź ID abonenta i naciśnij , aby kontynuować. Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

- 5 Zaczekaj na potwierdzenie.
  - Jeżeli się powiedzie:
    - Zostanie wyemitowany sygnał.
    - Na wyświetlaczu pojawia się symbol powodzenia.
  - Jeżeli się nie powiedzie:
    - Zostanie wyemitowany sygnał.
    - Na wyświetlaczu pojawia się symbol niepowodzenia.

## Edytowanie wiadomości tekstowych

Wybierz opcję *Edycja*, aby edytować wiadomość.

### UWAGA:

Jeśli wpisane zostało pole tematu (dla odebranych wiadomości wysłanych z programu poczty elektronicznej), nie możesz go edytować.

- 1 Naciśnij  lub , aby przejść do *Edycji*.  
Naciśnij , aby wybrać.  
Na wyświetlaczu pojawia się migający kursor.

- 2 Korzystając z klawiatury, edytuj wiadomość.

- Naciśnij przycisk , aby przejść o jedno miejsce w lewo.
- Naciśnij przycisk  lub , aby przejść o jedno miejsce w prawo.
- Naciśnij przycisk , aby usunąć niechciane znaki.

- Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

- 3 Po utworzeniu wiadomości naciśnij przycisk  .

- 4 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do *Wysyłania* i naciśnij , aby wysłać wiadomość.
- Naciśnij  lub , aby przejść do *Zapisywania* i naciśnij , aby zapisać wiadomość w folderze *Kopie robocze*.
- Naciśnij przycisk , aby edytować wiadomość.
- Naciśnij , aby usunąć wiadomość lub zapisać ją w folderze *Kopie robocze*.

## Pisanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysyłać wiadomości tekstowe.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby Utworzyć. Naciśnij , aby wybrać. Pojawi się migający kursor.

---

- 4 Przy pomocy klawiatury napisz wiadomość. Naciśnij przycisk , aby przejść o jedno miejsce w lewo.

Naciśnij przycisk  lub , aby przejść o jedno miejsce w prawo.

Naciśnij przycisk , aby usunąć niechciane znaki.

Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

- 5 Po utworzeniu wiadomości naciśnij przycisk . Wykonaj jedną z następujących czynności:
  - Naciśnij przycisk , aby wysłać wiadomość.
  - Naciśnij przycisk . Naciśnij przycisk  lub , aby wybrać edycję, usuwanie lub zapisywanie wiadomości. Naciśnij , aby wybrać.

## Wysyłanie wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysyłać wiadomości tekstowe.

Zakłada się, że masz nowo napisane wiadomości tekstowe lub zapisane wiadomości tekstowe.

Wybierz odbiorcę wiadomości. Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do wybierania ręcznego. Naciśnij , aby wybrać. Wprowadź ID użytkownika. Pierwszy wiersz wyświetlacza pokazuje parametr Nr radiotel:!. W drugim wierszu wyświetlacza zobaczysz migający kursor. Wpisz alias lub ID użytkownika. Naciśnij przycisk .

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

Jeżeli się powiedzie:

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się miniinformacja o udanej operacji.

Jeżeli się nie powiedzie:

- Zostanie odtworzony niski dźwięk.
- Na wyświetlaczu pojawia się miniostrzeżenie o nieudanej operacji.
- Wiadomość zostanie przeniesiona do folderu Elementy wysłane.
- Wiadomość jest oznaczona ikoną Nie można wysłać.

#### UWAGA:

W przypadku nowo napisanej wiadomości tekstowej radiotelefon przełączy się na opcję Wyślij ponownie.

## Usuwanie wiadomości tekstowych ze Skrzynki odbiorczej

Postępuj zgodnie z procedurą, aby usunąć wiadomości tekstowe ze Skrzynki.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).

- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do wiadomości. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

Jeśli Skrzynka odbiorcza jest pusta:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*
- Zostanie wyemitowany sygnał.

4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

Wyświetlacz pokaże temat, jeśli wiadomość pochodzi z aplikacji e-mail.

5 Naciśnij , aby wejść do podmenu.

6 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

7 Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się symbol powodzenia. Ponownie wyświetlana jest Skrzynka odbiorcza.

## Usuwanie wszystkich wiadomości tekstowych ze Skrzynki odbiorczej

Postępuj zgodnie z procedurą, aby usunąć wszystkie wiadomości tekstowe ze Skrzynki.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3.](#)
  - Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Skrzynki odbiorczej. Naciśnij , aby wybrać.

Jeśli Skrzynka odbiorcza jest pusta:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta.*
  - Zostanie wyemitowany sygnał.
- 

4 Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się symbol powodzenia.

---

## Wysłane wiadomości tekstowe

Po wysłaniu wiadomości do innego radiotelefonu jest ona zapisywana w folderze Wysłane pozycje. Wiadomość tekstowa wysłana jako ostatnia jest zawsze umieszczana na górze listy w folderze Wysłane pozycje. Wysłane wiadomości tekstowe można wysłać ponownie, przekazać dalej, edytować lub skasować.

Folder Wysłane pozycje przechowuje maksymalnie 30 ostatnio wysłanych wiadomości. Po zapełnieniu folderu następną wysłaną wiadomość tekstową automatycznie zastępuje najstarszą wiadomością tekstową w folderze.

Jeżeli ekran wysyłania wiadomości zostanie zamknięty podczas wysyłania wiadomości, radiotelefon uaktualni stan wiadomości w folderze Wysłane pozycje bez zapewnienia żadnego wskazania na wyświetlaczu ani za pomocą dźwięku.

Jeżeli radiotelefon zmieni tryb lub zostanie wyłączony zanim stan wiadomości w folderze Wysłane pozycje zostanie uaktualniony, radiotelefon nie będzie w stanie dokończyć wysłania wiadomości w toku i automatycznie wskaże to za pomocą ikony **Nie można wysłać.**

Radiotelefon obsługuje maksymalnie 5 wiadomości w toku w tym samym czasie. Podczas tego okresu radiotelefon nie

może wysłać żadnej nowej wiadomości i automatycznie zaznacza ją ikoną **Nie można wysłać**.

Długie naciśnięcie  w dowolnym momencie powoduje powrót do ekranu głównego.

#### UWAGA:

Jeżeli typ kanału, np. w przypadku kanałów konwencjonalnych cyfrowych, Capacity Plus — Pojedyncza stacja lub Capacity Plus — Wiele stacji, nie pasuje, wysłane wiadomości można jedynie edytować, przekazać dalej lub skasować.

## Przeglądanie wysłanych wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wyświetlać wysłane wiadomości tekstowe.

- 1 Wykonaj jedną z następujących czynności:
    - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).
    - Naciśnij , aby uzyskać dostęp do menu.
- 

- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.
- 

- 3 Naciśnij  lub , aby przejść do Elementów wysłanych. Naciśnij , aby wybrać.

Jeśli folder Wysłane jest pusty:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta*.
  - Zabrzmi niski sygnał klawiatury, jeśli jest włączony.
- 

- 4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.
- Ikona w prawym górnym rogu ekranu informuje o stanie wiadomości. Zobacz [Ikony pozycji wysłanych](#).
-

## Wysyłanie wysłanych wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysłać wysłane wiadomości tekstowe.

Podczas przeglądania wysłanych wiadomości:

**1** Naciśnij przycisk  podczas wyświetlania danej wiadomości.

---

**2** Użytkownik może ponownie wysłać lub przekazać wysłaną wiadomość tekstową. Wykonaj jedną z następujących czynności:

- , aby Ponownie wysłać. Naciśnij , aby wybrać.
- , aby Przekazać. Naciśnij , aby wybrać.

Na wyświetlaczu ukaze się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

---

**3** Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
  - Radiotelefon przejdzie do ekranu opcji **Wyślij ponownie**. Dodatkowe informacje: [Ponowne wysyłanie wiadomości tekstowych na str. 172](#).
- 

## Usuwanie wysłanych wiadomości z folderu **Wysłane**

Postępuj zgodnie z procedurą, aby usunąć wysłane wiadomości tekstowe z folderu **Wysłane**.

Podczas przeglądania wysłanych wiadomości:

**1** Naciśnij przycisk  .

---

- 2 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

## Usuwanie wszystkich wysłanych wiadomości tekstowych z folderu Wysłane

Postępuj zgodnie z procedurą, aby usunąć wszystkie wysłane wiadomości tekstowe z folderu Wysłane.

- 1 Wykonaj jedną z następujących czynności:
- Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Elementów wysłanych. Naciśnij , aby wybrać.  
Jeśli folder Wysłane jest pusty:

- Na wyświetlaczu pojawi się komunikat *Lista jest pusta*.
- Zostanie wyemitowany sygnał.

- 4 Naciśnij  lub , aby Skasować wszystko. Naciśnij , aby wybrać.

- 5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Potwierdzić. Naciśnij , aby wybrać. Na wyświetlaczu pojawia się symbol powodzenia.
- Naciśnij  lub , aby wybrać Nie. Naciśnij , aby wybrać. Radiotelefon powróci do poprzedniego ekranu.

## Zapisanie wiadomości tekstowe

Wiadomość tekstową można zapisać w celu późniejszego wysłania.

Jeżeli po naciśnięciu przycisku **PTT** lub zmianie trybu radiotelefon przełączy się z ekranu pisania/edycji

wiadomości tekstowej podczas jej tworzenia lub zmiany, bieżąca wiadomość tekstowa zostanie automatycznie zapisana w folderze kopii zapasowych.

Ostatnio zapisana wiadomość tekstowa zawsze znajduje się na pierwszej pozycji w folderze kopii zapasowych.

Folder kopii zapasowych może pomieścić maksymalnie 10 ostatnio zapisanych wiadomości. Gdy folder zapełni się, następną zapisaną wiadomość tekstową automatycznie zastępuje najstarszą wiadomość w folderze.

## Przeglądanie zapisanych wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wyświetlać zapisane wiadomości tekstowe.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst**. Przejdź do [krok 3](#).
  - Naciśnij  , aby uzyskać dostęp do menu.

- Naciśnij  lub  , aby przejść do Wiadomości. Naciśnij  , aby wybrać.

- Naciśnij  lub  , aby przejść do folderu Robocze. Naciśnij  , aby wybrać.

- Naciśnij  lub  , aby przejść do wybranej wiadomości. Naciśnij  , aby wybrać.

## Edycja zapisanych wiadomości tekstowych

Wykonaj poniższą procedurę, aby edytować wiadomość tekstową zapisaną w radiotelefonie.

- Naciśnij przycisk  podczas wyświetlania danej wiadomości.

- 2 Naciśnij  lub , aby przejść do Edycji.  
Naciśnij , aby wybrać.  
Pojawi się migający kursor.

- 3 Przy pomocy klawiatury napisz wiadomość.

Naciśnij przycisk , aby przejść o jedno miejsce w lewo.

Naciśnij przycisk  lub , aby przejść o jedno miejsce w prawo.

Naciśnij przycisk , aby usunąć niechciane znaki.

Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

- 4 Po utworzeniu wiadomości naciśnij przycisk .  
Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  lub , aby wysłać.  
Naciśnij przycisk , aby wysłać wiadomość.
- Naciśnij przycisk . Naciśnij przycisk  lub , aby wybrać zapisanie lub usunięcie wiadomości. Naciśnij , aby wybrać.

## Usuwanie zapisanych wiadomości tekstowych z folderu Kopie zapasowe

Wykonaj poniższą procedurę, aby usunąć zapisane wiadomości tekstowe z folderu Kopie zapasowe w radiotelefonie.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wiad tekst**.  
Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do folderu Robocze. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do wybranej wiadomości. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Skasować. Naciśnij przycisk , aby usunąć wiadomość tekstową.

---

## Krótkie wiadomości tekstowe

Radiotelefon obsługuje maksymalnie do 50 zaprogramowanych przez sprzedawcę krótkich wiadomości tekstowych.

Pomimo, że krótkie wiadomości tekstowe są wstępnie zaprogramowane, każdą wiadomość można redagować przed wysłaniem.

## Wysyłanie krótkich wiadomości tekstowych

Postępuj zgodnie z procedurą, aby wysyłać wstępnie zdefiniowane krótkie wiadomości tekstowe do wstępnie zdefiniowanego aliasu.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Wiad tekst.** Przejdź do [krok 6](#).
- Naciśnij zaprogramowany **Przycisk szybkiego dostępu**.

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

Przejdź do [krok 6](#).

- Naciśnij , aby uzyskać dostęp do menu.
- 

2 Naciśnij  lub , aby przejść do Wiadomości. Naciśnij , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Szybkiej wiadomości tekstowej. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do wybranej krótkiej wiadomości tekstowej. Naciśnij  , aby wybrać.

5 Wykonaj następujące czynności, aby wybrać odbiorcę i wysłać wiadomość.

Na wyświetlaczu ukaże się przejściowa miniinformacja o tym, że wiadomość jest wysyłana.

6 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.

- Na wyświetlaczu pojawia się symbol niepowodzenia.
- Radiotelefon przejdzie do ekranu opcji Wyślij ponownie. Dodatkowe informacje: [Ponowne wysyłanie wiadomości tekstowych na str. 172.](#)

## Konfiguracja wprowadzania tekstu

Radiotelefon umożliwia skonfigurowanie różnych ustawień tekstu.

W radiotelefonie można skonfigurować następujące ustawienia wprowadzania tekstu:

- Uzupełnianie słów
- Korekta słów
- Zdanie – wielka litera
- Moje słowa

Radiotelefon obsługuje następujące metody wpisywania tekstu:

- Cyfry
- Symbole
- Tryb przewidywania tekstu lub Multi-tap

- Wersja językowa (o ile została zaprogramowana)

**UWAGA:**

W dowolnym momencie naciśnij przycisk , aby powrócić do poprzedniego ekranu.

Przytrzymanie przycisku  pozwala wrócić do ekranu głównego. Radiotelefon zamyka bieżący ekran po zakończeniu odliczania czasu nieaktywności.

## Włączanie i wyłączanie korekty słów

Funkcja proponuje inne słowa, gdy słowo wprowadzone w edytorze tekstu nie jest rozpoznawane przez wbudowany słownik.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

- 5 Naciśnij przycisk  lub , aby włączyć funkcję Korekty słów. Naciśnij , aby wybrać.

- 6 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  lub , aby włączyć funkcję Korekty słów. Naciśnij , aby wybrać.
- Naciśnij przycisk  lub , aby włączyć funkcję korekty słów. Jeśli są włączone, obok informacji Włączone pojawi się .
- Naciśnij przycisk  lub , aby wyłączyć funkcję korekty słów. Jeśli nie,  obok opcji Włączone zniknie.

## Włączanie i wyłączanie przewidywania słów

**Przewidywanie słów:** Radiotelefon uczy się standardowych, często wprowadzanych zdań. Następnie przewiduje frazę, którą użytkownik chciałby wprowadzić, po napisaniu w edytorze tekstu pierwszego słowa typowego ciągu słów.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do Wprowadzania tekstu. Naciśnij  , aby wybrać.

---

- 5 Naciśnij przycisk  lub  , aby wyłączyć funkcję Przewidywania słów. Naciśnij  , aby wybrać.

---

- 6 Wykonaj jedną z następujących czynności:
  - Naciśnij przycisk  , aby włączyć funkcję przewidywania słów. Jeśli są włączone, obok informacji **Włączone** pojawi się  .
  - Naciśnij przycisk  , aby wyłączyć funkcję kontroli zniekształcenia dynamicznego mikrofonu. Jeśli nie,  obok opcji **Włączone** zniknie.

---

## Zdanie – wielka litera

Automatycznie włącza pisanie pierwszego słowa każdego nowego zdania z wielkiej litery.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij przycisk  lub , aby przełączyć opcję rozpoczęcia zdania wielką literą. Naciśnij , aby wybrać.

---

6 Wykonaj jedną z następujących czynności:

- Naciśnij , aby włączyć funkcję rozpoczęcia zdań wielką literą. Jeśli są włączone, obok informacji Włączone pojawi się .

- Naciśnij przycisk , aby wyłączyć funkcję rozpoczęcia zdań wielką literą. Jeśli nie,  obok opcji Włączone zniknie.
- 

## Przeglądanie słów własnych

Możesz dodać własne słowa do wbudowanego słownika radiotelefonu. Radiotelefon przechowuje te słowa na liście.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do opcji *Moje słowa*. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do *Listy słów*. Naciśnij , aby wybrać.  
Na ekranie wyświetli się lista słów własnych.

---

## Edycja słów własnych

Można edytować słowa własne zapisane w radiotelefonie.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do *Narzędzi*. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do *Ustawień radiotelefonu*. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do *Wprowadzania tekstu*. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do opcji *Moje słowa*. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do *Listy słów*. Naciśnij , aby wybrać.  
Na ekranie wyświetli się lista słów własnych.

---

7 Naciśnij  lub , aby przejść do wymaganego słowa. Naciśnij , aby wybrać.

---

8 Naciśnij  lub , aby przejść do *Edycji*. Naciśnij , aby wybrać.

---

9 Słowa własne można edytować, używając klawiatury.

- Naciśnij przycisk , aby przejść o jedno miejsce w lewo.
- Naciśnij przycisk , aby przejść o jedno miejsce w prawo.
- Naciśnij przycisk , aby usunąć niepożądane znaki.
- Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

**10** Gdy wpisane słowo będzie gotowe, naciśnij przycisk

Na wyświetlaczu pojawi się przejściowa miniinformacja potwierdzająca zapisanie słowa własnego.

- Jeżeli słowo własne zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniinformację o udanej operacji.
- Jeżeli słowo własne nie zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniostrzeżenie o nieudanej operacji.

## Dodawanie słów własnych

Możesz dodać własne słowa do wbudowanego słownika radiotelefonu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Wprowadzania tekstu. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby Dodać nowe słowo.

Naciśnij , aby wybrać.

Na ekranie wyświetli się lista słów własnych.

7 Słowa własne można edytować, używając klawiatury.

- Naciśnij przycisk , aby przejść o jedno miejsce w lewo.

- Naciśnij przycisk , aby przejść o jedno miejsce w prawo.

- Naciśnij przycisk , aby usunąć niepożądane znaki.

- Przytrzymanie przycisku  spowoduje zmianę metody wpisywania tekstu.

8 Gdy wpisane słowo będzie gotowe, naciśnij przycisk

- Jeżeli słowo własne zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniinformację o udanej operacji.
- Jeżeli słowo własne nie zostało zapisane, urządzenie emituje sygnał dźwiękowy i wyświetla miniostrzeżenie o nieudanej operacji.

## Usuwanie słowa własnego

Postępuj zgodnie z procedurą, aby usunąć słowa własne zapisane w radiotelefonie.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

Na wyświetlaczu pojawi się przejściowa miniinformacja potwierdzająca zapisanie słowa własnego.

4 Naciśnij  lub , aby przejść do wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do opcji Moje słowa. Naciśnij , aby wybrać.

---

6 Naciśnij  lub , aby przejść do wymaganego słowa. Naciśnij , aby wybrać.

---

7 Naciśnij  lub , aby Skasować. Naciśnij , aby wybrać.

---

8 Wybierz jedną z poniższych opcji:

- Po wyświetleniu monitu Usunąć wpis? naciśnij przycisk , aby wybrać Tak. Na wyświetlaczu pojawi się komunikat Poz. Usun..

- Naciśnij  lub , aby wybrać Nie. Naciśnij , aby powrócić do poprzedniego ekranu.
- 

## Usuwanie wszystkich słów własnych

Postępuj zgodnie z procedurą, aby usunąć wszystkie słowa własne z wbudowanego słownika radiotelefonu.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do wprowadzania tekstu. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do opcji **Moje słowa**. Naciśnij , aby wybrać.

6 Naciśnij  lub , aby **Skasować wszystko**. Naciśnij , aby wybrać.

7 Wykonaj jedną z następujących czynności:

- Po wyświetleniu monitu **Usunąć wpis?** naciśnij przycisk , aby wybrać **Tak**. Na wyświetlaczu pojawi się komunikat **Wszystkie wpisy zostały usunięte**.
- Naciśnij  lub , aby przejść do **Nie** i powrócić do poprzedniego ekranu. Naciśnij , aby wybrać.

## Etykiety zadań

Ta funkcja pozwala odbierać wiadomości od dyspozytora, które zawierają listę czynności do wykonania.

### UWAGA:

Ta funkcja może być modyfikowana przez program CPS zgodnie z wymaganiami użytkownika. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Dostępne są dwa foldery, w których znajdują się różne etykiety zadań:

#### Folder **Moje zadania**

Spersonalizowane etykiety zadań przypisanych do ID zalogowanego użytkownika.

#### Folder **Wspólne zadania**

Wspólne etykiety zadań przypisane do grupy osób.

Możesz reagować na tego typu komunikaty, sortując kody zadań w ramach folderów. Domyślnie foldery mają nazwy **Wszystkie**, **Nowe**, **Rozpoczęte** i **Zakończone**.

Sprzedawca lub administrator systemu może skonfigurować do 10 kolejnych folderów tego typu.

### UWAGA:

Etykiety zadań pozostaną w pamięci urządzenia nawet po jego wyłączeniu i ponownym uruchomieniu.

Wszystkie etykiety zadań znajdują się w folderze **Wszystkie**. W zależności od sposobu zaprogramowania radiotelefonu, etykiety zadań są sortowane według

poziomu priorytetu, a następnie według godziny odebrania. Nowe etykiety zadań, etykiety zadań z niedawną zmianą stanu i etykiety zadań o najwyższym priorytecie są wymienione jako pierwsze. Jeżeli urządzenie rejestruje maksymalną liczbę kodów zadań, to najstarsze kody na liście będą automatycznie zastępowane najnowszymi. Urządzenie obsługuje maksymalnie do 100 lub 500 etykiet zadań, w zależności od modelu radiotelefonu. Dodatkowych informacji udzieli sprzedawca lub administrator systemu. Urządzenie automatycznie wykryje i odrzuci duplikat kodu zadania o takim samym identyfikatorze.

W zależności od stopnia ważności etykiet zadań, dyspozytor dodaje do nich poziom priorytetu. Istnieją trzy poziomy priorytetu: Priorytet 1, priorytet 2 i priorytet 3. 1 to najwyższy, a 3 to najniższy priorytet. Istnieją również etykiety zadań bez priorytetu.

Radiotelefon jest odpowiednio aktualizowany, gdy dyspozytor wykonuje następujące zmiany:

- modyfikuje zawartość etykiet zadań,
- dodaje lub edytuje priorytet etykiet zadań,
- przenosi etykiety z folderu do folderu,
- anuluje etykiety zadań.

## Dostęp do folderu z kodami zadań

Postępuj zgodnie z procedurą, aby uzyskać dostęp do folderu z kodami zadań.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **bilet zad.** Przejdź do [krok 3](#).
  - Naciśnij , aby uzyskać dostęp do menu.

---
- Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.

---

- Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

---

- Naciśnij przycisk  lub , aby wybrać dany kod zadania. Naciśnij , aby wybrać.

---

## Proces logowania i wylogowania z serwera zdalnego

Funkcja pozwala korzystać z procedur logowania i wylogowania dla zdalnego serwera przy pomocy identyfikatora użytkownika.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Logowania.  
Naciśnij , aby wybrać.

Jeśli użytkownik jest już zalogowany, w menu będzie widoczna funkcja Wyloguj się.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Tworzenie kodów zadań

Radiotelefon potrafi generować kody zadań (na podstawie szablonów) i wysyłać zadania do wykonania.

Do konfiguracji szablonów kodów zadań potrzebne jest oprogramowanie CPS.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.

3 Wybierz  lub , aby Utworzyć kod zadania. Naciśnij , aby wybrać.

## Odpowiadanie na kody zadań

Postępuj zgodnie z procedurą, aby odpowiadać na kody zadań.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby wybrać dany kod zadania. Naciśnij , aby wybrać.

---

- 5 Ponownie naciśnij przycisk , aby uzyskać dostęp do podmenu.  
  
Możesz również nacisnąć odpowiedni klawisz numeryczny (1–9), aby uzyskać dostęp do opcji **Skrót odp..**

- 6 Naciśnij przycisk  lub , aby wybrać dany kod zadania. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

- 7 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Wysyłanie kodów zadań za pomocą szablonu pojedynczych kodów zadań

Jeżeli radiotelefon ma skonfigurowany jeden szablon kodów zadań, wykonaj następujące czynności, aby wysłać kod zadania.

1 Skorzystaj z klawiatury, aby wpisać wymagany numer pomieszczenia. Naciśnij , aby wybrać.

---

2 Naciśnij  lub , aby przejść do pozycji Status pomieszczenia. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do wybranej opcji. Naciśnij , aby wybrać.

---

4 Naciśnij przycisk  lub , aby wyłączyć.

Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

---

5 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wyrzmięwa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
-

## Wysyłanie kodów zadań za pomocą szablonu wielu kodów zadań

Jeżeli radiotelefon ma skonfigurowany więcej niż jeden szablon kodów zadań, wykonaj następujące czynności, aby wysłać kody zadań.

1 Naciśnij  lub , aby przejść do wybranej opcji. Naciśnij , aby wybrać.

2 Naciśnij przycisk  lub , aby wysłać. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

3 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Usuwanie zadań

Postępuj zgodnie z procedurą, aby usunąć zadania z radiotelefonu.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **bilet zad.** Przejdź do [krok 4](#)
- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

4 Za pomocą przycisku  lub  przejdź do folderu **Wszystkie**. Naciśnij , aby wybrać.

5 Naciśnij przycisk  lub , aby wybrać dany kod zadania. Naciśnij , aby wybrać.

6 Ponownie naciśnij przycisk  podczas przeglądania Kodu zadania.

7 Naciśnij  lub , aby **Skasować**. Naciśnij , aby wybrać.

Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji.

8 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Usuwanie wszystkich biletów zadań

Postępuj zgodnie z procedurą, aby usunąć wszystkie zadania z radiotelefonu.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **bilet zad.** Przejdź do [krok 3](#).
- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Kodów zadań. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego folderu. Naciśnij , aby wybrać.

- 4 Za pomocą przycisku  lub  przejdź do folderu **Wszystkie**. Naciśnij , aby wybrać.
- 
- 5 Naciśnij  lub , aby **Skasować wszystko**. Naciśnij , aby wybrać.
- 
- 6 Wykonaj jedną z następujących czynności:
- Naciśnij  lub , aby **Potwierdzić**.  
Naciśnij , aby wybrać.  
Na wyświetlaczu pojawia się symbol powodzenia.
  - Naciśnij  lub , aby wybrać **Nie**.  
Naciśnij , aby wybrać.  
Radiotelefon powróci do poprzedniego ekranu.
- 

## Prywatne

Ta funkcja pomaga zapobiec podsłuchiwananiu przez nieupoważnione osoby na danym kanale dzięki zastosowaniu programowego rozwiązania szyfrującego.

Część transmisji, która zawiera sygnalizację i identyfikację użytkownika, nie jest szyfrowana.

Radiotelefon musi mieć włączoną funkcję prywatności na danym kanale, aby nadawać podczas połączenia prywatnego, chociaż nie jest to konieczny wymóg do odbioru transmisji. Po włączeniu funkcji prywatności na kanale radiotelefon może nadal odbierać czyste lub niezaszyfrowane transmisje.

Niektóre modele radiotelefonów mogą nie posiadać funkcji prywatności lub cechować się inną konfiguracją. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Radiotelefon obsługuje dwa ustawienia dotyczące prywatności, ale tylko jedno może być przypisane do radiotelefonu. Ustawienia prywatności są następujące:

- Ochrona prywatności na poziomie podstawowym
- Ochrona prywatności na poziomie rozszerzonym

Po włączeniu funkcji poufności transmisję danych lub połączenie będą mogły odszyfrować tylko radiotelefony z takim samym kluczem poufności (poziom podstawowy) lub taką samą wartością i identyfikatorem klucza (poziom rozszerzony), jak te skonfigurowane w radiotelefonie-nadajniku.

W wypadku odbioru zaszyfrowanej transmisji z radiotelefonu, w którym ustawiono inny klucz zabezpieczający lub inną wartość oraz identyfikator klucza, będzie słycać zakłócenia (po ustawieniu poziomu podstawowego ochrony prywatności) lub nie będzie słycać nic (po ustawieniu poziomu rozszerzonego ochrony prywatności).

Na kanale z funkcją prywatności Twój radiotelefon może odbierać czyste lub niezaszyfrowane połączenia, w zależności od sposobu zaprogramowania. Dodatkowo, Twój radiotelefon może emitować sygnał ostrzegawczy lub go nie emitować, w zależności od sposobu zaprogramowania.

Dioda LED pali się zielonym światłem, gdy radiotelefon nadaje, i szybko pulsuje na zielono podczas odbioru transmisji z aktywną funkcją prywatności.

#### UWAGA:

Ta funkcja nie dotyczy kanałów w paśmie CB o tych samych częstotliwościach.

## Włączanie/wyłączanie prywatności

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć prywatność w radiotelefonie.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Prywatność**. Pomiń poniższe kroki.
  - Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do **Narzędzi**. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do **Ustawień radiotelefonu**. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby wybrać **Prywatność**. Naciśnij  , aby wybrać.

---

- 5 Wykonaj jedną z następujących czynności:
  - Naciśnij  lub  , aby włączyć. Naciśnij  , aby wybrać. Obok opcji włączyć pojawi się oznaczenie  .

- Naciśnij  lub , aby włączyć. Naciśnij , aby wybrać. Obok opcji włączyć pojawi się oznaczenie ✓.

## Zawieszenie odpowiedzi

Ta funkcja pomaga zapobiegać odpowiadaniu radiotelefonu na wszystkie transmisje przychodzące.

### UWAGA:

Jest to dodatkowa (płatna) funkcja. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Po włączeniu tej funkcji radiotelefon nie będzie generować transmisji wychodzących w odpowiedzi na transmisje przychodzące, takie jak Sprawdzenie radia, Alert połączenia, Wyłączenie radiotelefonu, Zdalny nasłuch, Usługa automatycznej rejestracji (ARS), Odpowiadanie na wiadomości prywatne i Wysyłanie raportów o lokalizacji GNSS. Gdy ta funkcja jest włączona, radiotelefon nie może otrzymywać Potwierdzonych połączeń prywatnych. Radiotelefon może jednak nadawać transmisje ręcznie.

## Włączanie lub wyłączenie zawieszania odpowiedzi

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć funkcję zawieszania odpowiedzi w radiotelefonie.

Naciśnij przycisk programowalny **Zawieszanie odpowiedzi**.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się tymczasowo informację o powodzeniu operacji.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się tymczasowo informację o niepowodzeniu.

## Sterowanie wieloma stacjami

Te funkcje są dostępne, jeżeli aktualny kanał radiowy jest częścią konfiguracji IP Site Connect lub Capacity Plus — Wiele stacji.

## Włączanie ręcznego wyszukiwania stacji

Postępuj zgodnie z procedurą, aby rozpocząć ręczne wyszukiwanie stacji, gdy siła sygnału jest niska, żeby spróbować znaleźć stację z lepszym sygnałem.

Jeśli radiotelefon znajdzie nową stację:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.

Jeśli radiotelefon nie znajdzie nowej stacji:

- Rozlega się ostrzegawczy sygnał dźwiękowy.

## Blokada stacji wł./wył.

Po włączeniu tej opcji radiotelefon będzie wyszukiwać tylko bieżącą stację. Po wyłączeniu tej opcji radiotelefon będzie dodatkowo wyszukiwać inne stacje.

Naciśnij zaprogramowany przycisk **Blok miej**.

Jeśli funkcja **Blokada stacji** jest włączona:

- Usłyszysz dźwięk informacyjny oznaczający, że radiotelefon został zablokowany w bieżącej stacji.

- Na wyświetlaczu pojawi się informacja St. baz. Zablok.

Jeśli funkcja **Blokada stacji** jest wyłączona:

- Usłyszysz dźwięk ostrzegawczy oznaczający, że radiotelefon został odblokowany.
- Na wyświetlaczu pojawi się informacja St. baz. Odblok.

## Uzyskiwanie dostępu do listy sąsiednich stacji

Ta funkcja pozwala użytkownikowi sprawdzić stacje sąsiadujące z bieżącą, główną stacją. Postępuj zgodnie z procedurą, aby uzyskać dostęp do listy sąsiednich stacji:

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Informacji na temat radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do Sąsiadujących stacji. Naciśnij , aby wybrać.

radiotelefon inicjuje tę funkcję na radiotelefonie docelowym, wymagane jest hasło. Hasło jest wstępnie zaprogramowane w radiotelefonie docelowym poprzez program CPS.

Nie otrzymasz potwierdzenia, jeśli naciśniesz  podczas operacji włączania lub wyłączania radiotelefonu.

#### UWAGA:

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Zabezpieczenia

Ta funkcja pozwala na włączenie lub wyłączenie dowolnego radiotelefonu w systemie.

Na przykład konieczne może być wyłączenie skradzionego radiotelefonu, aby uniemożliwić korzystanie z niego osobie nieupoważnionej, lub ponowne włączenie odzyskanego radiotelefonu.

Istnieją dwa sposoby aktywacji lub dezaktywacji radiotelefonu, z uwierzytelnianiem i bez niego.

Uwierzytelniona dezaktywacja radiotelefonu to dodatkowa (płatna) funkcja. W przypadku uwierzytelnionej dezaktywacji radiotelefonu do włączenia lub wyłączenia radiotelefonu wymagana jest weryfikacja. Kiedy Twój

## Blokowanie radiotelefonów

Postępuj zgodnie z procedurą, aby zablokować radiotelefon.

- 1 Naciśnij zaprogramowany przycisk **Blokowanie rtf**.

- 2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID.

- 3 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Na wyświetlaczu pojawi się przejściowa mini informacja, która wskazuje, że żądanie jest w toku. Zielona dioda LED miga.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.

#### 4 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.

- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Blokowanie radiotelefonów przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby zablokować radiotelefon przy pomocy Listy kontaktów.

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby Zablokować radiotelefon.

- 5 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:
- Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED miga.
  - Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.

- 6 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Blokowanie radiotelefonu przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby zablokować radiotelefon przy pomocy wybierania ręcznego.

- 1 Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby otworzyć Kontakt y. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do Wybierania ręcznego. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Numeru

radiotelefonu. Naciśnij , aby wybrać.

Pierwsza linia tekstu pokazuje Numer radiotelefonu!.

---

5 Wprowadź ID abonenta i naciśnij , aby kontynuować.

---

6 Naciśnij  lub , aby Zablokować radiotelefon.

---

7 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Na wyświetlaczu pojawia się przejściowa miniinformacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED miga.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
  - Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.
- 

8 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
- 

## Odblokowywanie radiotelefonów

Postępuj zgodnie z procedurą, aby odblokować radiotelefon.

1 Naciśnij zaprogramowany przycisk **Odblok. rtf.**

---

2 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID.

---

3 Naciśnij , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Na wyświetlaczu pojawi się komunikat `Włączenie radiotelefonu` oraz alias lub ID użytkownika. Zielona dioda LED zapala się.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
  - Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.
- 

4 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
- 

## Odblokowywanie radiotelefonów przy pomocy Listy kontaktów

Postępuj zgodnie z procedurą, aby odblokować radiotelefon przy pomocy Listy kontaktów.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby otworzyć Kontak ty. Naciśnij , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do wymaganego aliasu lub ID. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby Odblokować radiotelefon.

---

5 Naciśnij  , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Zielona dioda LED miga. Na wyświetlaczu pojawi się komunikat **Włączenie radiotelefonu** oraz alias lub ID użytkownika. Zielona dioda LED zapala się.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk  , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.

- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.
- 

6 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawia się symbol powodzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol niepowodzenia.
- 

## Odblokowywanie radiotelefonu przy pomocy wybierania ręcznego

Postępuj zgodnie z procedurą, aby odblokować radiotelefon przy pomocy wybierania ręcznego.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby otworzyć Kontak ty. Naciśnij  , aby wybrać.
- 
- 3 Naciśnij  lub  , aby przejść do Wybierania ręcznego. Naciśnij  , aby wybrać.
- 
- 4 Naciśnij  lub  , aby przejść do Połączeń prywatnych. Naciśnij  , aby wybrać.  
Pierwsza linia tekstu pokazuje Numer radiotelefonu:.
- 
- 5 Wprowadź ID abonenta i naciśnij  , aby kontynuować.
- 
- 6 Naciśnij  lub  , aby Odblokować radiotelefon.
- 
- 7 Naciśnij  , aby wybrać. Nastąpi jeden z poniższych scenariuszy wydarzeń:

- Zielona dioda LED miga. Na wyświetlaczu pojawi się komunikat Włączenie radiotelefonu oraz alias lub ID użytkownika. Zielona dioda LED zapala się.
- Zostanie wyświetlony ekran z zapytaniem o hasło.

Wprowadź hasło. Naciśnij przycisk  , aby przejść dalej.

- Jeśli hasło będzie poprawne, na wyświetlaczu pojawia się przejściowa mini informacja, która informuje, że żądanie jest w trakcie realizacji. Zielona dioda LED zapala się.
- Jeśli hasło będzie niepoprawne, na ekranie pojawi się komunikat o niepowodzeniu, a urządzenie powróci do poprzedniego ekranu.

## 8 Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
  - Na wyświetlaczu pojawia się symbol powodzenia.
- Jeżeli się nie powiedzie:
- Rozlega się ostrzegawczy sygnał dźwiękowy.

- Na wyświetlaczu pojawia się symbol niepowodzenia.

## Praca w pojedynkę

Funkcja ta pozwala na wysyłanie okresowego sygnału ostrzegawczego, jeżeli użytkownik pozostaje nieaktywny przez określony czas, np. nie naciska żadnego przycisku radiotelefonu lub nie wybiera kanałów.

Po upływie zaprogramowanego czasu radiotelefon ostrzega użytkownika za pomocą sygnału dźwiękowego, gdy licznik czasu nieaktywności zostanie wyzerowany.

Jeżeli użytkownik wciąż nie odpowiada przed upływem zaprogramowanego czasu licznika przypomnienia, radiotelefon uruchamia informację alarmową.

Do tej funkcji można przypisać tylko jeden z poniższych sygnałów alarmowych:

- Informacja alarmowa,
- Informacja alarmowa z wywołaniem,
- Sygnał alarmowy z funkcją awaryjnej aktywacji mikrofonu. 

Radiotelefon pozostaje w trybie alarmowym, umożliwiając przesyłanie wiadomości głosowych do momentu podjęcia działania. Zobacz [Tryb awaryjny na str. 463](#), aby dowiedzieć się więcej o sposobach wyjścia z trybu alarmowego.

### UWAGA:

Ta funkcja jest dostępna wyłącznie w radiotelefonach, w których została uruchomiona. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Bluetooth

Ta funkcja pozwala korzystać z radiotelefonu i urządzenia Bluetooth (akcesorium) poprzez łącze Bluetooth. Radiotelefon obsługuje urządzenia Bluetooth zarówno firmy Motorola Solutions jak i ogólnie dostępne w sprzedaży.

Łączność Bluetooth działa na linii widzenia 10 metrów. Jest to niezablokowana ścieżka pomiędzy radiotelefonem a urządzeniem Bluetooth. W celu uzyskania wysokiego stopnia niezawodności, firma Motorola Solutions zaleca nierozdzielanie radia i akcesoriów.

Na krańcach obszaru pokrycia zarówno jakość głosu jak i tonu ulegnie zniekształceniu lub fragmentacji. Aby skorygować problem, ustaw radiotelefon i urządzenie

Bluetooth blisko siebie (na obszarze o zasięgu 10 m), aby ponownie uzyskać wyraźny odbiór audio. Funkcja Bluetooth radiotelefonu posiada maksymalną moc 2,5 mW (4 dBm) i zasięg 10 m.

Radiotelefon może obsługiwać jednoczesne połączenia maksymalnie z trzema urządzeniami Bluetooth różnego typu. Przykładowo: zestaw słuchawkowy, skaner oraz urządzenie PTT (POD). Radiotelefon nie obsługuje połączeń z kilkoma urządzeniami Bluetooth tego samego rodzaju.

Zapoznaj się z instrukcją obsługi urządzenia Bluetooth, aby uzyskać więcej informacji na temat jego funkcji.

#### **UWAGA:**

Po wyłączeniu za pomocą programu CPS wszystkie funkcje Bluetooth zostaną wyłączone, a baza danych Bluetooth urządzenia zostanie skasowana.

## Włączanie i wyłączanie funkcji Bluetooth

Postępuj zgodnie z procedurą, aby włączyć i wyłączyć Bluetooth.

- 1 Naciśnij , aby uzyskać dostęp do menu.

- 2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

- 3 Naciśnij  lub , aby przejść do pozycji Mój Status. Naciśnij , aby wybrać.

Wyświetlacz pokazuje informacje Wł. i Wyl. . Bieżący status będzie oznaczony za pomocą symbolu .

- 4 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Wł. Naciśnij , aby wybrać. Obok opcji Wł. pojawi się oznaczenie .
- Naciśnij  lub , aby Wyl. Naciśnij , aby wybrać. Obok opcji Wyl. pojawi się oznaczenie .

## Łączenie z urządzeniem Bluetooth

Postępuj zgodnie z procedurą, aby połączyć się z urządzeniami Bluetooth.

Włącz urządzenie Bluetooth i uruchom tryb parowania.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Urządzeń. Naciśnij , aby wybrać.

---

- 4 Wykonaj jedną z następujących czynności:
  - Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.
  - Naciśnij  lub , aby wybrać Znajdź urz., żeby zlokalizować dostępne urządzenia.

Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.

- 5 Naciśnij przycisk  lub , aby nawiązać Połączenie. Naciśnij , aby wybrać.  
 Urządzenie Bluetooth może wymagać wykonania dodatkowych czynności, aby zakończyć parowanie. W razie potrzeby zajrzyj do instrukcji obsługi danego urządzenia Bluetooth.  
 Na ekranie pojawi się komunikat łączenie z <Nazwa urz.>.

Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
  - Na wyświetlaczu pojawi się komunikat <Urządzenie> podłączone i ikona **połączenia Bluetooth**.
  - Na wyświetlaczu pojawi się symbol  obok podłączonego urządzenia.
- Jeżeli się nie powiedzie:
- Rozlega się ostrzegawczy sygnał dźwiękowy.

- Na wyświetlaczu pojawi się komunikat Połączenie nieudane.

**UWAGA:**

Jeżeli wymagany jest kod PIN, patrz [Uzyskiwanie dostępu do radiotelefonów za pomocą haseł na str. 208](#).

## Podłączanie do urządzeń Bluetooth w trybie wykrywalnym

Postępuj zgodnie z procedurą, aby połączyć się z urządzeniami Bluetooth w trybie parowania.

Włącz urządzenie Bluetooth i uruchom tryb parowania.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do pozycji Bluetooth. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , przejść do opcji Znajdź mnie. Naciśnij , aby wybrać. Teraz radiotelefon może być wykrywany przez inne urządzenia

Bluetooth przez zdefiniowany okres czasu. Stan ten nosi nazwę trybu wykrywalności.

Zaczekaj na potwierdzenie.

Jeżeli się powiedzie:

- Wybrzmiewa potwierdzający sygnał dźwiękowy.
- Na wyświetlaczu pojawi się komunikat <Urządzenie> podłączone i ikona **połączenia Bluetooth**.
- Na wyświetlaczu pojawi się symbol  obok podłączonego urządzenia.

Jeżeli się nie powiedzie:

- Rozlega się ostrzegawczy sygnał dźwiękowy.
- Na wyświetlaczu pojawi się komunikat Połączenie nieudane.

## Odłączanie od urządzeń Bluetooth

Postępuj zgodnie z procedurą, aby odłączyć się od urządzeń Bluetooth.

- 1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do opcji Bluetooth. Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Urządzeń. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do danego urządzenia. Naciśnij , aby wybrać.

5 Naciśnij przycisk  lub , aby je Odłączyć. Naciśnij , aby wybrać.

Na ekranie pojawi się komunikat Trwa rozłączanie: <nazwa urz.>.

#### UWAGA:

Urządzenie Bluetooth może wymagać dodatkowych kroków, aby wykonać rozłączenie. W razie potrzeby zajrzyj do instrukcji obsługi danego urządzenia Bluetooth.

Zaczekaj na potwierdzenie.

- Zostanie wyemitowany sygnał.
- Na wyświetlaczu pojawi się <Nazwa urz.> odłączone, a ikona **połączenia Bluetooth** zniknie.
- Symbol  przestanie być wyświetlany obok podłączonego urządzenia.

## Przełączanie ścieżki dźwięku pomiędzy wewnętrznym głośnikiem radiotelefonu a urządzeniem Bluetooth

Postępuj zgodnie z procedurą, aby przełączyć ścieżkę dźwięku pomiędzy głośnikiem radiotelefonu a urządzeniem Bluetooth.

### Naciśnij programowalny przycisk **dźwięku trybu Bluetooth**.

---

Na ekranie pojawi się jedna z następujących informacji:

- Zostanie wyemitowany sygnał. Na wyświetlaczu pojawi się komunikat **Przełączanie dźwięku do radiotelefonu**.
- Zostanie wyemitowany sygnał. Na wyświetlaczu pojawi się komunikat **Przełączanie dźwięku do urz. Bluetooth**.

## Informacje o urządzeniu

Postępuj zgodnie z procedurą, aby wyświetlić informacje o radiotelefonie.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby przejść do opcji Bluetooth. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do pozycji **Urządzenia**. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do danego urządzenia. Naciśnij  , aby wybrać.

---

5 Naciśnij  lub  , aby wyświetlić szczegóły. Naciśnij  , aby wybrać.

---

## Usuwanie nazwy urządzenia

Możesz usunąć odłączone urządzenie z listy urządzeń Bluetooth.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby przejść do opcji Bluetooth. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Urządzeń.

Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do danego

urządzenia. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby Skasować. Naciśnij

, aby wybrać. Na wyświetlaczu pojawi się komunikat Urządź. usun.

---

3 Naciśnij  lub , aby przejść do

Wzmocnienia mikrofonu BT. Naciśnij , aby wybrać.

---

4 Naciśnij przycisk  lub , aby przejść do wymaganego typu wzmocnienia mikrofonu Bluetooth

i obecnych wartości. Naciśnij , aby wybrać. Użytkownik może edytować wartości tutaj.

---

5 Naciśnij przycisk  lub , aby zwiększyć lub

zmniejszyć wartości. Naciśnij , aby wybrać.

---

## Wzmocnienie mikrofonu Bluetooth

Ta funkcja umożliwi użytkownikowi sterowanie wzmocnieniem mikrofonu podłączonego urządzenia obsługującego technologię Bluetooth.

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do opcji

Bluetooth. Naciśnij , aby wybrać.

---

[Wyślij informację zwrotną](#)

## Lok. w budynku

### UWAGA:

Funkcja lokalizacji wewnętrznej jest dostępna dla modeli z najnowszą wersją konfiguracji programowej i sprzętowej. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Lokalizacja wewnętrzna jest używana do śledzenia lokalizacji użytkowników radiotelefonów. Gdy funkcja lokalizacji wewnętrznej jest aktywna, radiotelefon znajduje

się w ograniczonym trybie wykrywalnym. Dedykowane sygnały nawigacyjne służą do lokalizacji radiotelefonu i określenia jego położenia.

## Włączanie i wyłączanie funkcji lokalizowania wewnętrznego

Wykonując jedną z poniższych czynności, możesz włączyć lub wyłączyć funkcję lokalizowania wewnętrznego.

- Dostęp do funkcji można uzyskać w menu.
  - a. Naciśnij przycisk , aby uzyskać dostęp do menu..
  - b. Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij przycisk , aby wybrać.
  - c. Naciśnij przycisk  lub , aby przejść do opcji Lokalizacja wewnętrzna i naciśnij przycisk , aby wybrać.

- d. Naciśnij , aby włączyć lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne włączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego pojawi się na ekranie głównym.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat Włączenie nie powiodło się. Usłyszysz negatywny sygnał dźwiękowy

- e. Naciśnij , aby wyłączyć lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat Lokalizowanie wewnętrzne wyłączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego zniknie z ekranu głównego.
  - Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat **Wyłączenie nie powiodło się. Usłyszysz negatywny sygnał dźwiękowy**
- Dostęp do tej funkcji jest możliwy za pomocą zaprogramowanego przycisku.
    - a. Długie naciśnięcie przycisku zaprogramowanego pod funkcję **Lokalizowanie wewnętrzne** włączy funkcję lokalizowania wewnętrznego.

Na wyświetlaczu pojawi się komunikat **Lokalizowanie wewnętrzne włączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.**

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego pojawi się na ekranie głównym.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat **Włączanie nie powiodło się. Jeśli**

operacja zakończy się niepowodzeniem, usłyszysz sygnał ostrzegawczy.

- b. Naciśnij przycisk zaprogramowany pod funkcję **Lokalizowania wewnętrznego**, aby wyłączyć Lokalizowanie wewnętrzne.

Na wyświetlaczu pojawi się komunikat **Lokalizowanie wewnętrzne wyłączone. Rozlegnie się dźwięk informacyjny. Nastąpi jeden z poniższych scenariuszy wydarzeń.**

- Jeśli operacja zakończy się powodzeniem, ikona funkcji Lokalizowania wewnętrznego zniknie z ekranu głównego.
- Jeśli operacja zakończy się niepowodzeniem, na wyświetlaczu pojawi się komunikat **Wyłączenie nie powiodło się. Jeśli operacja zakończy się niepowodzeniem, usłyszysz sygnał ostrzegawczy.**

## Uzyskiwanie dostępu do informacji o punktach sygnalizacyjnych w lokalizacjach wewnętrznych

Postępuj zgodnie z procedurą, aby przejść do informacji sygnałów lokalizacji wewnętrznej.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

---

- 2 Naciśnij przycisk  lub , aby przejść do opcji Bluetooth i naciśnij naciśnij przycisk , aby wybrać.

---

- 3 Naciśnij przycisk  lub , aby przejść do opcji Lokalizacja wewnętrzna i naciśnij naciśnij przycisk , aby wybrać.

---

- 4 Naciśnij przycisk  lub , aby przejść do Punktów sygnalizacyjnych i naciśnij naciśnij przycisk , aby wybrać.

Na wyświetlaczu widoczne są informacje dotyczące punktów sygnalizacyjnych.

## Lista powiadomień

Radiotelefon posiada Listę powiadomień, która zbiera wszystkie nieodczytane zdarzenia na danym kanale, np. wiadomości tekstowe, wiadomości telemetryczne, nieodebrane połączenia i sygnały wywołania.

Wyświetlacz pokazuje ikonę **Powiadomień**, gdy na Liście powiadomień znajduje się jedno zdarzenie lub więcej.

Maksymalna długość listy to 40 nieprzeczytanych zdarzeń. Kiedy lista jest zapełniona, nowa pozycja automatycznie zastępuje pozycję najstarszą. Po odczytaniu pozycje są usuwane z Listy powiadomień.

W przypadku wiadomości tekstowych i nieodebranych połączeń/alertów połączenia maksymalna liczba powiadomień to 30 wiadomości tekstowych i 10 nieodebranych połączeń lub alertów połączenia. Maksymalna liczba jest zależna od możliwości listy

określonej funkcji (kody zadań, wiadomości tekstowe lub nieodebrane połączenia lub alerty połączenia).

## Dostęp do Listy powiadomień

Postępuj zgodnie z procedurą, aby uzyskać dostęp do Listy powiadomień.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Powiadomień. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do wybranego wydarzenia. Naciśnij  , aby wybrać.  
  
Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

---

## System ARTS (Auto-Range Transponder System)

ARTS to działająca wyłącznie w trybie analogowym funkcja, która została opracowana, aby informować użytkownika, gdy jego radiotelefon znajdzie się poza zasięgiem innych radiotelefonów z funkcją ARTS.

Radiotelefony wyposażone w funkcję ARTS od czasu do czasu nadają lub odbierają sygnały, aby sprawdzić, czy są w zasięgu.

Radiotelefon obsługuje następujące powiadomienia o stanie:

### Pierwszy alert

Zostanie wyemitowany sygnał.

Na wyświetlaczu, za aliasem kanału, pojawi się komunikat **W zasięgu**.

### Alert ARTS w zasięgu

Jeśli zaprogramowano, zabrmi sygnał dźwiękowy.

Na wyświetlaczu, za aliasem kanału, pojawi się komunikat **W zasięgu**.

### Alert ARTS poza zasięgiem

Zostanie wyemitowany sygnał. Czerwona dioda LED szybko miga.

Na wyświetlaczu pojawi się komunikat Poza zasięgiem na zmianę z ekranem głównym.

**UWAGA:**

Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Programowanie drogą radiową

Sprzedawca może zdalnie aktualizować radiotelefonu poprzez Programowanie drogą radiową (OTAP) bez fizycznego połączenia. Dodatkowo niektóre ustawienia także mogą być wprowadzane za pośrednictwem OTAP.

Gdy radiotelefon znajduje się w trakcie programowania drogą radiową (OTAP), dioda LED pulsuje na zielono.

Gdy radiotelefon odbiera duże ilości danych:

- Na wyświetlaczu widnieje ikona **Duża ilość danych**.
- Kanał staje się zajęty.
- Naciśnięcie przycisku **PTT** powoduje wybrzmiewanie sygnału ostrzegawczego.

Gdy OTAP dobiegnie końca, w zależności od konfiguracji:

- Zostanie wyemitowany sygnał. Na wyświetlaczu pojawi się komunikat Aktualizacja i restart. Radiotelefon restartuje się poprzez wyłączenie i ponowne włączenie.

- Można wybrać opcję Zrestartuj teraz lub Odlóż na później. Wybranie opcji Odlóż na później powoduje powrót do poprzedniego ekranu. Na wyświetlaczu widnieje ikona **Odliczanie przełożenia OTAP** aż do momentu automatycznego restartu.

Gdy radiotelefon uruchamia się ponownie po automatycznym restarcie:

- Jeśli operacja powiedzie się, na wyświetlaczu widać komunikat Aktualizacja oprogramowania powiodła się.
- W przypadku niepowodzenia na wyświetlaczu widać komunikat Aktualizacja oprogramowania nie powiodła się.

Patrz [Sprawdzanie informacji dotyczących aktualizacji oprogramowania na str. 243](#), aby zobaczyć zakutalizowaną wersję oprogramowania.

## Zawieszenie transmisji

Funkcja zawieszenia transmisji pozwala użytkownikom na zablokowanie wszystkich transmisji w radiotelefonie.

**UWAGA:**

Funkcje Bluetooth i Wi-Fi są dostępne w trybie blokowania nadawania.

## Włączanie funkcji zawieszenia nadawania

Postępuj zgodnie z procedurą, aby włączyć funkcję zawieszania transmisji.

Wybierz jedną z następujących czynności:

- Naciśnij przycisk  lub , aby przejść do funkcji Zawieszenie Tx i naciśnij naciśnij przycisk , aby wybrać.
- Naciśnij przycisk programowalny **Zawieszenia nadawania**.

- 
- Wybrzmiewa potwierdzający sygnał dźwiękowy.
  - Na wyświetlaczu pojawi się Zawieszenie Tx wł..

### UWAGA:

Stan zawieszenia nadawania nie ulega zmianie po uruchomieniu radiotelefonu.

## Wyłączanie zawieszenia nadawania

Postępuj zgodnie z procedurą, aby wyłączyć Zawieszenie transmisji.

Wybierz jedną z następujących czynności:

- Naciśnij przycisk  lub , aby przejść do funkcji Zawieszenie Tx i naciśnij naciśnij przycisk , aby wybrać.
- Naciśnij przycisk programowalny **Zawieszenia nadawania**.

- 
- Rozlega się ostrzegawczy sygnał dźwiękowy. Nadawanie wróci do normalnego trybu pracy.
  - Na wyświetlaczu pojawi się komunikat Zawieszenie Tx włi..

## Wybór trybów podłączania urządzeń peryferyjnych innych producentów

Wykonaj procedurę, aby wybrać jeden z poniższych trybów podłączania urządzeń peryferyjnych innych producentów:

- Motorola Solutions
- Komputer i dźwięk
- Akcesorium danych
- Telemetria

- Ogólne

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Za pomocą przycisku lub  lub  wybierz Typ kabla. Naciśnij , aby wybrać.

---

5 Naciśnij przycisk  lub , aby wybrać wymagany tryb podłączania. Naciśnij , aby wybrać.  
Na wyświetlaczu pojawia się wybrany typ połączenia. Ekran wraca do poprzedniego menu.

---

## Wskaźnik siły odbieranego sygnału

Ta funkcja pozwala przeglądać wartości wskaźnika siły odbieranego sygnału (RSSI).

W prawym górnym rogu na wyświetlaczu pojawi się ikona **RSSI**. Zobacz [Ikony na wyświetlaczu](#), aby dowiedzieć się więcej o ikonie **RSSI**.

## Przeglądanie wartości RSSI

Postępuj zgodnie z procedurą, aby przeglądać wartości RSSI.

Podczas wyświetlania ekranu głównego:

- 1 W czasie 5 sekund naciśnij  trzykrotnie i natychmiast naciśnij trzykrotnie . Na ekranie są widoczne aktualne wartości RSSI.

---

- 2 Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

---

## Funkcje blokady hasła

Ta funkcja pozwala ograniczyć dostęp do radiotelefonu poprzez żądanie hasła po włączeniu urządzenia.

Możesz używać mikrofonu z klawiaturą lub przycisków **Przewijania w górę/w dół**, aby wpisać hasło.

## Uzyskiwanie dostępu do radiotelefonów za pomocą haseł

Postępuj zgodnie z procedurą, aby uzyskać dostęp do radiotelefonu za pomocą haseł.

- 1 Wprowadź aktualne czterocyfrowe hasło.

### UWAGA:

Użycie **Alarmowego** włącznika nożnego anuluje ekran wprowadzania hasła celem uzyskania dostępu do radiotelefonu.

- Użyj klawiatury mikrofonu.
- Naciśnij  lub , aby edytować wartość numeryczną każdej cyfry, a następnie wciśnij , aby wprowadzić i przejść do następnej cyfry.

- 2 Naciśnij , aby wprowadzić hasło.

Jeżeli operacja się powiedzie, radiotelefon uruchomia się.

Jeżeli się nie powiedzie:

- Po pierwszej i drugiej próbie pojawia się komunikat **Niepoprawne hasło**. Powtórz czynność **krok 1**.
- Trzecia nieudana próba powoduje wyświetlenie komunikatu **Hasło niepoprawne**, a następnie **Radiotelefon zablokowany**. Zostanie wyemitowany sygnał. Żółta dioda LED miga dwa razy. Radiotelefon blokuje się na 15 minut.

### UWAGA:

W stanie zablokowania radiotelefon będzie reagować wyłącznie na sygnały z **Pokrętła wł./wył./regulacji głośności** oraz zaprogramowany przycisk **Podświetlenia**.

## Odblokowywanie radiotelefonów ze stanu zablokowania

W stanie zablokowania radiotelefon nie będzie odbierał żadnych połączeń, nawet alarmowych. Postępuj zgodnie z procedurą, aby odblokować radiotelefon ze stanu zablokowania.

Wykonaj jedną z następujących czynności:

- Jeśli radiotelefon jest włączony, należy odczekać 15 minut, a następnie powtórzyć kroki procedury [Uzyskiwanie dostępu do radiotelefonów za pomocą hasła na str. 208](#), aby uzyskać dostęp do radiotelefonu.
- Jeżeli radiotelefon jest wyłączony, włącz go. Radiotelefon ponownie uruchamia 15-minutowy licznik blokady. Zostanie wyemitowany sygnał. Żółta dioda LED miga dwa razy. Na wyświetlaczu pojawi się informacja Radio Locked (Radiotelefon zablokowany).

Odczekaj 15 minut, a następnie powtórz kroki procedury [Uzyskiwanie dostępu do radiotelefonów za pomocą hasła na str. 208](#), aby uzyskać dostęp do radiotelefonu.

## Włączanie i wyłączanie blokady hasła

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć blokadę hasła.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do Blokady hasła. Naciśnij  , aby wybrać.

---

- 5 Wprowadź aktualne czterocyfrowe hasło.
  - Użyj klawiatury mikrofonu.

- Naciśnij  lub , aby edytować wartość numeryczną każdej cyfry, a następnie wciśnij , aby wprowadzić i przejść do następnej cyfry.  
Sygnał potwierdzający zabrzmiał dla każdej naciśniętej cyfry.

- 6** Naciśnij , aby wprowadzić hasło.

Na wyświetlaczu pojawi się komunikat *Złe hasło* i nastąpi automatyczny powrót do poprzedniego menu.

- 7** Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby Włączyć. Naciśnij , aby wybrać.  
Na ekranie pojawi się  obok Wł.
- Naciśnij  lub , aby Wyłączyć. Naciśnij , aby wybrać.  
Na ekranie pojawi się  obok Wyl.

## Zmiana haseł

Postępuj zgodnie z procedurą, aby zmienić hasło.

- Naciśnij , aby uzyskać dostęp do menu.
- Naciśnij  lub , aby przejść do *Narzędzi*.  
Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do *Ustawień* radiotelefonu. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do *Blokady hasła*. Naciśnij , aby wybrać.
- Wpisz obecne czterocyfrowe hasło i naciśnij , aby kontynuować.  
Na wyświetlaczu pojawi się komunikat *Złe hasło* i nastąpi automatyczny powrót do poprzedniego menu.

6 Naciśnij  lub  , aby przejść do Zmiany hasła. Naciśnij  , aby wybrać.

7 Wprowadź nowe czterocyfrowe hasło i naciśnij  , aby kontynuować.

8 Ponownie wprowadź nowe czterocyfrowe hasło i naciśnij  , aby kontynuować.

Jeśli operacja zakończy się powodzeniem, na wyświetlaczu pojawi się komunikat *Zmieniono hasło*.

Jeśli operacja nie powiedzie się, na wyświetlaczu pojawi się komunikat *Niezgodność haseł*.

Ekran automatycznie wraca do poprzedniego menu.

## Konfiguracja przedniego panelu

Aby ułatwić sobie korzystanie z radiotelefonu, można dopasować niektóre parametry funkcji za pomocą konfiguracji przedniego panelu (FPC).

## Wejście w tryb konfiguracji przedniego panelu

Postępuj zgodnie z procedurą, aby wejść w tryb programowania przedniego panelu radiotelefonu.

Przytrzymaj przycisk  , aby w dowolnym momencie powrócić do Ekranu głównego.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby Zaprogramować radiotelefon. Naciśnij  , aby wybrać.

## Edycja parametrów trybu FPP

Następujące przyciski można wykorzystać do przemieszczania się po parametrach funkcji.

-  ,  – przewijanie opcji, zwiększanie/zmniejszanie wartości lub nawigacja pionowa.
-  – wybór opcji lub przejście do podmenu.
-  – krótkie naciśnięcie powoduje powrót do poprzedniego menu lub zamknięcie ekranu wyboru. Przytrzymanie przycisku pozwala wrócić do Ekranu głównego.

## Praca Wi-Fi

Wi-Fi® jest zastrzeżonym znakiem towarowym firmy Wi-Fi Alliance®.

### UWAGA:

Ta funkcja dotyczy tylko urządzeń DM4601e .

Funkcja ta umożliwi konfigurację sieci Wi-Fi oraz połączenie się z nią. Sieć Wi-Fi obsługuje aktualizacje oprogramowania sprzętowego radiotelefonu, wtyczek codeplug i zasobów, takich jak pakiety językowe i pliki zapowiedzi głosowych.

## Włączanie i wyłączenie Wi-Fi

Programowalny przycisk **Wi-Fi wł. lub wył.** jest przypisany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

Ustawienia zapowiedzi głosowych dla zaprogramowanego przycisku **Wi-Fi wł. lub wył.** można dostosować do potrzeb użytkownika poprzez program CPS. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

Wykonując jedną z poniższych czynności, możesz włączyć lub wyłączyć Wi-Fi.

- Naciśnij zaprogramowany przycisk **WiFi wł./wył.** Funkcja Zapowiedzi głosowej informuje o włączeniu lub wyłączeniu Wi-Fi.
- Dostęp do funkcji można uzyskać w menu.
  - a. Naciśnij przycisk  , aby uzyskać dostęp do menu..
  - b. Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.

- c. Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

Naciśnij przycisk , aby włączyć sieć Wi-Fi. Na ekranie pojawi się oznaczenie  obok opcji **Włączone**.

Naciśnij przycisk , aby wyłączyć sieć Wi-Fi. Oznaczenie  obok informacji **Włączone** zniknie.

## Podłączanie do punktu dostępowego sieci

Po włączeniu funkcji sieci Wi-Fi radiotelefon skanuje i łączy się z punktem dostępowym.

Możesz także połączyć się z punktem dostępowym za pośrednictwem menu.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.

- 3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

- 4 Naciśnij przycisk  lub , aby przejść do punktu dostępowego, a następnie naciśnij przycisk , aby wybrać.

- 5 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Połączenia, a następnie naciśnij przycisk , aby wybrać.

- 6 Wprowadź hasło i naciśnij przycisk .

Gdy połączenie powiedzie się, radiotelefon wyświetli powiadomienie, a punkt dostępowy zostanie zapisany na liście profili.

## Sprawdzanie stanu połączenia Wi-Fi

Postępuj zgodnie z procedurą, aby sprawdzić stan połączenia Wi-Fi.

Naciśnij zaprogramowany przycisk **zapytania o status sieci Wi-Fi**, aby usłyszeć status połączenia odczytany za pośrednictwem funkcji Zapowiedzi głosowej. Zapowiedź głosowa wskazuje, że funkcja Wi-Fi jest wyłączona, włączona, ale nie podłączona lub włączona i podłączona.

- Po wyłączeniu Wi-Fi na wyświetlaczu zostanie wyświetlony komunikat **WiFi wyłączone**.
- Gdy radiotelefon jest podłączony do sieci, na wyświetlaczu pojawi się komunikat **WiFi wł., podłączono**.
- Gdy radiotelefon jest włączony, ale niepodłączony do sieci, na wyświetlaczu pojawi się komunikat **WiFi wł., nie podłączono**.

Ustawienia zapowiedzi głosowych dla wyników zapytania o stan sieci Wi-Fi można dostosować do potrzeb użytkownika w programie CPS. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

### UWAGA:

Programowalny przycisk **zapytania o status sieci Wi-Fi** jest przypisywany przez sprzedawcę lub administratora systemu. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

## Odświeżanie listy sieci

Postępuj zgodnie z procedurą, aby odświeżyć listę sieci.

- Aby odświeżyć listę sieci poprzez menu, należy wykonać następujące czynności.
  - a. Naciśnij przycisk  , aby uzyskać dostęp do menu..
  - b. Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.

- c. Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.

Po otwarciu menu Sieci, radiotelefon automatycznie odświeża listę sieci.

- Po wejściu do menu Sieci, wykonaj następujące czynności, aby odświeżyć listę sieci.

Naciśnij przycisk  lub , aby odświeżyć i naciśnij przycisk , aby wybrać.

Radiotelefon zostanie odświeżony i wyświetli najnowszą listę sieci.

## Dodawanie sieci

Jeśli preferowana sieć nie jest na liście dostępnych sieci, należy wykonać następujące czynności, aby dodać sieć.

- 1 Naciśnij przycisk , aby uzyskać dostęp do menu..
- 

- 2 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk , aby wybrać.
- 

- 3 Naciśnij przycisk  lub , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk , aby wybrać.
- 

- 4 Naciśnij przycisk  lub , aby Dodać Sieć i naciśnij przycisk , aby wybrać.
- 

- 5 Wprowadź kod Service Set Identifier (identyfikator SSID) i naciśnij przycisk .
- 

- 6 Naciśnij przycisk  lub , aby wybrać Otwórz i naciśnij przycisk , aby wybrać.
-

- 7 Wprowadź hasło i naciśnij przycisk  .  
Radiotelefon wyświetla miniinformację o udanej operacji, informującą że sieć została pomyślnie zapisana.
- 

## Wyświetlanie szczegółowych informacji z punktami dostępu do sieci

Postępuj według procedury, aby zobaczyć szczegółowe informacje o punktach dostępu do sieci.

- 1 Naciśnij przycisk  , aby uzyskać dostęp do menu..
- 
- 2 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.
- 

- 3 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk  , aby wybrać.
- 

- 4 Naciśnij przycisk  lub  , aby przejść do punktu dostępowego, a następnie naciśnij przycisk  , aby wybrać.
- 

- 5 Naciśnij przycisk  lub  , aby ustawić Wyświetl szczegóły i naciśnij przycisk  , aby wybrać.

Dla podłączonego punktu dostępu do sieci wyświetla się Service Set Identifier (identyfikator SSID), tryb zabezpieczeń, adres kontroli dostępu do nośników (MAC) i adres protokołu internetowego (IP).

Dla niepodłączonego punktu dostępu do sieci wyświetla się Service Set Identifier (identyfikator SSID) i tryb zabezpieczeń.

---

## Usuwanie punktów dostępu

Aby usunąć sieć punktów dostępowych z listy profili, należy wykonać następujące czynności.

1 Naciśnij przycisk  , aby uzyskać dostęp do menu..

---

2 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień WiFi, a następnie naciśnij przycisk  , aby wybrać.

---

3 Naciśnij przycisk  lub  , aby uzyskać dostęp do ustawień Sieci, a następnie naciśnij przycisk  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby przejść do wybranego punktu dostępowego w sieci naciśnij przycisk  , aby wybrać.

---

5 Naciśnij przycisk  lub  , aby Usunąć i naciśnij przycisk  , aby wybrać.

---

6 Naciśnij przycisk  lub  , aby Potwierdzić i naciśnij przycisk  , aby wybrać.

Radiotelefon wyświetla miniinformację o udanej operacji informującą, że wybrane punkty dostępu do sieci zostały pomyślnie usunięte.

---

## Narzędzia

Ten rozdział wyjaśnia działanie funkcji narzędzi dostępnych w radiotelefonie.

## Poziomy blokady szumów

Można dostosować poziom blokady szumów radiotelefonu, aby eliminować niepożądane połączenia z niskim natężeniem sygnału lub kanały, w których występuje podwyższony poziom zakłóceń.

### Normalny

To jest ustawienie domyślne.

## Silny

To ustawienie filtruje niepożądane połączenia i/lub hałasy. Filtrować można również połączenia z oddalonych lokalizacji.

### UWAGA:

Ta funkcja nie dotyczy kanałów w paśmie CB o tych samych częstotliwościach.

## Konfigurowanie poziomów blokady szumów

Postępuj zgodnie z procedurą, aby skonfigurować poziom szumów.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Wyciszenie**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby Wyciszyć. Naciśnij , aby wybrać.

- Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby wybrać Normalny. Naciśnij , aby wybrać. Na ekranie pojawi się  obok komunikatu Normalny.
- Naciśnij  lub , aby wybrać Ograniczony. Naciśnij , aby wybrać. Na ekranie pojawi się  obok komunikatu Ograniczony.

Ekran automatycznie wraca do poprzedniego menu.

## Poziomy mocy

Można dostosować ustawienie wysokiej lub niskiej mocy dla poszczególnych kanałów.

### Wysoki

Umożliwia komunikowanie się z radiotelefonami znajdującymi się w znacznej odległości.

### Niski

Umożliwia komunikowanie się z radiotelefonami znajdującymi się w bliskiej odległości.

#### UWAGA:

Ta funkcja nie dotyczy kanałów w paśmie CB o tych samych częstotliwościach.

## Ustawianie poziomów mocy

Postępuj zgodnie z procedurą, aby ustawić poziomy mocy radiotelefonu.

- Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Poziom mocy**. Pomiń poniższe kroki.
  - Naciśnij , aby uzyskać dostęp do menu.

- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

- Naciśnij  lub , aby przejść do Mocy. Naciśnij , aby wybrać.

- Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby wybrać Wysoka. Naciśnij , aby wybrać. Na ekranie pojawi się  obok komunikatu Wysoka.
- Naciśnij  lub , aby wybrać Niska. Naciśnij , aby wybrać. Na ekranie pojawi się  obok komunikatu Niska.

- 6 Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.
- 

## Włączanie/wyłączanie dźwięków/ alertów radiotelefonu

jeśli to konieczne, można włączyć lub wyłączyć wszystkie dźwięki i powiadomienia z wyjątkiem przychodzącego sygnału alarmowego. Postępuj zgodnie z procedurą, aby włączyć i wyłączyć dźwięki i alerty.

- Wykonaj jedną z następujących czynności:
    - Naciśnij zaprogramowany przycisk **Dźwięki/Alerty**. Pomiń poniższe czynności.
    - Naciśnij  , aby uzyskać dostęp do menu.
- 

- Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.
- 

- Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.
- 

- Naciśnij  lub  , aby przejść do Tonów/Alarmów. Naciśnij  , aby wybrać.
- 

- Naciśnij  lub  , aby przejść do Wszystkich dźwięków. Naciśnij  , aby wybrać.
- 

- Naciśnij przycisk  , aby włączyć lub wszystkie dźwięki i powiadomienia. Na ekranie pojawi się jedna z następujących informacji:
    - Jeśli są włączone, obok informacji Włączone pojawi się  .
    - Jeśli nie,  obok opcji Włączone zniknie.
-

## Włączanie/wyłączanie dźwięków przycisków

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dźwięki przycisków radiotelefonu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Tonów Alarmów. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do Dźwięków klawiatury. Naciśnij , aby wybrać.

---

- 6 Naciśnij przycisk , aby włączyć lub wyłączyć dźwięki klawiatury. Na ekranie pojawi się jedna z następujących informacji:
    - Jeśli są włączone, obok informacji Włączone pojawi się .
    - Jeśli nie,  obok opcji Włączone zniknie.
- 

## Ustawianie wyrównania poziomu głośności dźwięków/alertów

Funkcja ta służy do regulacji głośności sygnałów lub alarmów powyżej/poniżej poziomu głośności głosu ludzkiego. Postępuj zgodnie z procedurą, aby ustawić wyrównanie poziomu głośności dźwięków lub alertów.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do Sygnałów Alarmów. Naciśnij  , aby wybrać.

5 Naciśnij  lub  , aby przejść do Przesunięcia głośności. Naciśnij  , aby wybrać.

6 Naciśnij  lub  , aby ustawić określony poziom wyrównania głośności.  
Zabrzmi sygnał odpowiedzi odpowiadający każdemu poziomowi wyrównania głośności.

7 Wykonaj jedną z następujących czynności:

- Naciśnij  , aby wybrać. Wymagany poziom głośności zostanie zapisany.

- Naciśnij przycisk  , aby wyjść z menu. Zmiany zostaną odrzucone.

## Włączanie lub wyłączanie sygnału zezwolenia na rozmowę

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć sygnał zezwolenia na rozmowę.

1 Naciśnij  , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

4 Naciśnij  lub  , aby przejść do Tonów Alarmów. Naciśnij  , aby wybrać.

5 Naciśnij  lub  , aby przejść do Zezwolenie na rozmowę. Naciśnij  , aby wybrać.

---

6 Naciśnij przycisk  , aby włączyć lub wyłączyć sygnał zezwolenia na rozmowę.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji **Włączone** pojawi się .
  - Jeśli nie,  obok opcji **Włączone** zniknie.
- 

## Włączanie lub wyłączanie dźwięku uruchamiania

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dźwięk uruchamiania radiotelefonu.

1 Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do Tonów Alarmów. Naciśnij  , aby wybrać.

---

5 Naciśnij  lub  , aby przejść do Uruchamiania. Naciśnij  , aby wybrać.

---

6 Naciśnij przycisk  , aby włączyć lub wyłączyć dźwięk uruchamiania radiotelefonu. Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji **Włączone** pojawi się .
- Jeśli nie,  obok opcji **Włączone** zniknie.

---

## Ustawianie dźwięku alertu wiadomości tekstowej

Istnieje możliwość dostosowania dźwięku alertu wiadomości tekstowej jako Chwilowy lub Powtarzany dla każdej pozycji na liście kontaktów. Postępuj zgodnie z procedurą, aby ustawić dźwięki alertów wiadomości tekstowych.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby otworzyć Kontak ty.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do wymaganego aliasu lub ID. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Alertu wiadomości. Naciśnij , aby wybrać.

---

- 5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby wybrać Chwilowy.  
Naciśnij , aby wybrać.  
Na ekranie pojawi się  obok komunikatu Chwilowy.
- Naciśnij  lub , aby wybrać Powtarzający się. Naciśnij , aby wybrać.  
Na ekranie pojawi się  obok opcji Powtarzający się.

## Zmiana trybów wyświetlania

Można wybierać odpowiednio tryb Nocny lub Dzienny wyświetlacza radiotelefonu. Ta funkcja zmienia paletę kolorów wyświetlacza. Postępuj zgodnie z procedurą, aby zmienić tryb wyświetlacza radiotelefonu.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Tryb wyświetlania**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do Narzędzi.

Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień

radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij przycisk  lub  , aby przejść do

opcji Wyświetlacz. Naciśnij  , aby wybrać.

Wyświetlacz pokazuje Tr. dnia i Tryb nocny.

---

5 Naciśnij  lub  , aby przejść do wybranych

ustawień. Naciśnij  , aby wybrać.

Na wyświetlaczu obok wybranego ustawienia pojawi się  .

---

## Regulacja jasności wyświetlacza

Postępuj zgodnie z procedurą, aby dopasować jasność wyświetlacza radiotelefonu. Jasności wyświetlacza nie

można ustawić po włączeniu funkcji „Jasność automatyczna”.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Jasność**. Pomiń poniższe czynności.

- Naciśnij  , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub  , aby przejść do Narzędzi.

Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień

radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do Jasność.

Naciśnij  , aby wybrać.

Na wyświetlaczu pojawi się pasek postępu.

---

- 5 Naciśnij  lub  , aby zwiększyć lub zmniejszyć jasność wyświetlacza. Naciśnij  , aby wybrać.
- Wartość ustawienia może wynosić od 1 do 8.
- 

## Włączanie i wyłączanie funkcji klakson/światła

Radiotelefon może zawiadamiać użytkownika o przychodzących połączeniach światłami i klaksonem. Kiedy funkcja jest aktywna, połączenia przychodzące są sygnalizowane światłami i klaksonem pojazdu. Funkcję tę instaluje sprzedawca przy pomocy łącza znajdującego się z tyłu urządzenia dodatkowego. Postępuj zgodnie z instrukcją, aby włączyć lub wyłączyć wszystkie klaksony i światła.

- Wykonaj jedną z następujących czynności:
    - Naciśnij zaprogramowany przycisk **Horns/Lights**. Pomiń poniższe kroki.
    - Naciśnij  , aby uzyskać dostęp do menu.
- 

- Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.
- 

- Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.
- 

- Naciśnij  lub  , aby przejść do Klaksony/Światła. Naciśnij  , aby wybrać.
- 

- Naciśnij przycisk  , aby włączyć lub wyłączyć funkcję klaksonu/światła. Na ekranie pojawi się jedna z następujących informacji:
    - Jeśli są włączone, obok informacji **Włączone** pojawi się  .
    - Jeśli nie,  obok opcji **Włączone** zniknie.
-

## Włączanie/wyłączanie wskaźników LED

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć wskaźniki LED radiotelefonu.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Wskaźnik LED. Naciśnij , aby wybrać.

---

- 5 Naciśnij przycisk , aby włączyć lub wyłączyć wskaźnik LED.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji Włączone pojawi się .
- Jeśli nie,  obok opcji Włączone zniknie.

## Włączanie i wyłączanie urządzenia rozgłoszeniowego

Postępuj zgodnie z procedurą włączania lub wyłączania wewnętrznego systemu rozgłoszeniowego (PA) radiotelefonu.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **System rozgłoszeniowy**. Pomiń poniższe czynności.
  - Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do systemu rozgłoszeniowego. Naciśnij  , aby wybrać.

---

5 Naciśnij przycisk  , aby włączyć lub wyłączyć funkcję systemu rozgłoszeniowego.

- Jeśli są włączone, obok informacji Włączone pojawi się  .
  - Jeśli nie,  obok opcji Włączone zniknie.
- 

## Włączanie i wyłączanie zewnętrznego urządzenia rozgłoszeniowego

Postępuj zgodnie z procedurą włączania lub wyłączania zewnętrznego systemu rozgłoszeniowego (PA) radiotelefonu.

[Wyślij informację zwrotną](#)

1 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk programowany **Nagłośnienie zewnętrzne**. Pomiń poniższe czynności.
  - Naciśnij  , aby uzyskać dostęp do menu.
- 

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do Zewnętrzny system rozgłoszeniowy. Naciśnij  , aby wybrać.

---

5 Naciśnij przycisk  , aby włączyć lub wyłączyć zewnętrzny system rozgłoszeniowy.

- Jeśli są włączone, obok informacji Włączone pojawi się  .

- Jeśli nie, ✓ obok opcji **Włączone** zniknie.

## Włączanie i wyłączanie ekranu powitalnego

Poniższa procedura pozwala włączyć lub wyłączyć ekran powitalny.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do **Ustawień** radiotelefonu. Naciśnij , aby wybrać.
- 4 Naciśnij przycisk  lub , aby przejść do opcji **Wyświetlacz**. Naciśnij , aby wybrać.

- 5 Wybierz  lub  w celu otwarcia opcji **Ekran powitalny**. Naciśnij , aby wybrać.

- 6 Naciśnij przycisk , aby włączyć lub wyłączyć ekran powitalny.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są **włączone**, obok informacji **Włączone** pojawi się ✓.
- Jeśli nie, ✓ obok opcji **Włączone** zniknie.

## Ustawienia języków

Postępuj zgodnie z procedurą, aby ustawić języki w radiotelefonie.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do pozycji Języki. Naciśnij , aby wybrać.

---

5 Naciśnij  lub , aby przejść do wybranego języka. Naciśnij , aby wybrać.

Na wyświetlaczu obok wybranego języka pojawi się .

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

4 Za pomocą przycisku lub  lub  wybierz Typ kabla. Naciśnij , aby wybrać.

---

5 Aktualny typ przewodu jest oznaczony za pomocą symbolu .

---

## Identyfikacja typu kabla

Wykonaj poniższe czynności, aby wybrać typ kabla radiotelefonu.

1 Naciśnij , aby uzyskać dostęp do menu.

---

## Nadawanie uruchamiane głosem

Ta funkcja umożliwia wykonywanie uruchamianych głosem połączeń za pośrednictwem zaprogramowanego kanału. Gdy tylko mikrofon lub akcesorium zgodne z funkcją VOX rozpozna głos, radiotelefon automatycznie przekazuje dźwięk przez wybrany czas.

**UWAGA:**

Ta funkcja nie dotyczy kanałów w paśmie CB o tych samych częstotliwościach.

Włączyć lub wyłączyć funkcję VOX można w następujący sposób:

- Wyłącz radiotelefon, a następnie uruchom go ponownie, aby włączyć funkcję VOX.
- Zmień kanał przyciskami **przewijania w górę/w dół**, aby włączyć funkcję VOX.
- Zmień kanał przy pomocy **Pokręła głośności/kanału**, aby włączyć funkcję VOX.
- Włącz lub wyłącz funkcję VOX, używając programowanego przycisku **VOX** lub menu.
- Naciśnij przycisk **PTT**, gdy radiotelefon działa, aby wyłączyć funkcję VOX.

**UWAGA:**

Tę funkcję można włączać i wyłączać tylko w radiotelefonach, w których jest ona dostępna. Dodatkowych informacji udzieli sprzedawca lub administrator systemu.

## Włączanie lub wyłączanie funkcji nadawania uruchamianego głosem

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć VOX w radiotelefonie.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **VOX**. Pomiń poniższe kroki.
  - Naciśnij , aby uzyskać dostęp do menu.

---
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do VOX. Naciśnij , aby wybrać.

---

- 5 Naciśnij przycisk , aby włączyć lub wyłączyć funkcję **VOX**.

#### **UWAGA:**

Jeśli włączony jest sygnał zezwolenia na rozmowę, wypowiedz słowo umożliwiające rozpoczęcie rozmowy. Po usłyszeniu sygnału rozpoczęcia rozmowy zacznij wyraźnie mówić do mikrofonu.

Dodatkowe informacje: [Włączanie lub wyłączanie sygnału zezwolenia na rozmowę na str. 224](#).

## Włączanie i wyłączanie funkcji komunikatów głosowych

Ta funkcja umożliwi podanie w formie zapowiedzi głosowej strefy lub kanału, który użytkownik właśnie zaprogramował, lub sygnalizowanie naciśnięcia przycisku programowanego.

Funkcja jest zazwyczaj przydatna, kiedy użytkownik ma problem z odczytaniem zawartości wyświetlacza.

Powiadomienie dźwiękowe można dostosować do wymagań klienta. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć komunikaty głosowe.

[Wyślij informację zwrotną](#)

## Włączanie lub wyłączanie płytki opcji

Możliwości płytki opcji dla każdego kanału mogą być przypisane do przycisków programowanych. Kanał może obsługiwać maksymalnie 6 funkcji płytek opcji. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć płytkę opcji.

Naciśnij zaprogramowany przycisk **Płytką opcji**.

## Syntezytor mowy Text-to-Speech

Funkcja Text-to-Speech może zostać włączona tylko przez sprzedawcę lub administratora systemu. Jeśli funkcja Text-to-Speech jest włączona, funkcja komunikatów głosowych jest automatycznie wyłączana. Włączenie funkcji komunikatów głosowych powoduje automatyczne wyłączenie funkcji syntezytoru mowy Text-to-Speech.

Ta funkcja umożliwi podanie w formie zapowiedzi głosowej następujących informacji:

- Obecny kanał
- Obecna strefa

- Włączenie lub wyłączenie funkcji przycisku programowalnego
- Treść odbieranych wiadomości tekstowych
- Treść odbieranych etykiet zadań

Powiadomienie dźwiękowe można dostosować do wymagań klienta. Funkcja ta jest zazwyczaj przydatna, kiedy użytkownik znajduje się w warunkach utrudniających odczyt wyświetlacza.

## Ustawianie funkcji Text-to-Speech

Postępuj zgodnie z procedurą, aby skonfigurować funkcję Text-to-Speech.

- 1 Naciśnij , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

---

- 3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

---

- 4 Naciśnij  lub , aby przejść do Komunikatów głosowych. Naciśnij , aby wybrać.

---

- 5 Naciśnij przycisk  lub , aby przejść do dowolnej z poniższych funkcji. Naciśnij , aby wybrać.

Dostępne opcje znajdują się poniżej:

- Wszystkie
- Wiadomości
- Etykiety zadań
- Kanał
- Strefa
- Przycisk Program

Symbol  pojawi się obok wybranego ustawienia.

---

## Włączanie i wyłączanie funkcji automatycznego przekierowywania połączeń

Możesz zaprogramować radiotelefon, aby automatycznie przekierowywał połączenia głosowe do innego radiotelefonu.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Narzędzi.  
Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do funkcji Przekazywanie wywołań. Naciśnij  , aby wybrać.

---

- 5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub  , aby aktywować Przekierowanie wywołań. Jeśli są włączone, obok informacji Włączone pojawi się ✓.
- Naciśnij  lub  , aby dezaktywować Przekierowanie wywołań. Jeśli nie, ✓ obok opcji Włączone zniknie.

## Ustawienia menu ogr.

Możesz ustawić czas, przez który menu radiotelefonu pozostanie otwarte, zanim na wyświetlaczu pojawi się znów Ekran główny. Postępuj zgodnie z procedurą, aby ustawić czas otwarcia menu.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

- 4 Naciśnij przycisk  lub  , aby przejść do opcji Wyświetlacz. Naciśnij  , aby wybrać.

---

- 5 Naciśnij  lub  w celu przejścia do czasu menu. Naciśnij  , aby wybrać.

---

- 6 Naciśnij  lub  , aby przejść do wybranych ustawień. Naciśnij  , aby wybrać.

---

## Włączanie lub wyłączanie szyfrowania mikrofonu analogowego AGC

Automatyczna regulacja wzmocnienia mikrofonu analogowego (AGC) kontroluje wzmocnienie mikrofonu radiotelefonu automatycznie podczas transmisji w systemie analogowym.

Funkcja ta wycisza głośne dźwięki lub wzmacnia ciche dźwięki do zdefiniowanej wartości, aby zapewnić stały

poziom dźwięku. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć mikrofon analogowy AGC.

- 1 Naciśnij  , aby uzyskać dostęp do menu.

---

- 2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

- 3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

- 4 Naciśnij  lub  , aby przejść do Mikrofonu analogowego AGC. Naciśnij  , aby wybrać.

---

- 5 Naciśnij przycisk  , aby włączyć lub wyłączyć mikrofon analogowy AGC.  
Na ekranie pojawi się jedna z następujących informacji:
  - Jeśli są włączone, obok informacji Włączone pojawi się  .

- Jeśli nie, ✓ obok opcji **Włączone** zniknie.

## Włączanie lub wyłączenie mikrofonu cyfrowego AGC

Automatyczna regulacja wzmacnienia (AGC) kontroluje wzmacnienie mikrofonu radiotelefonu automatycznie podczas transmisji w systemie cyfrowym.

Funkcja ta wycisza głośne dźwięki lub wzmacnia ciche dźwięki do zdefiniowanej wartości, aby zapewnić stały poziom dźwięku. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć mikrofon cyfrowy AGC.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do **Ustawień** radiotelefonu. Naciśnij , aby wybrać.

- 4 Naciśnij  lub , aby przejść do **Mikrofonu** cyfrowego AGC. Naciśnij , aby wybrać.

- 5 Naciśnij przycisk , aby włączyć lub wyłączyć mikrofon cyfrowy AGC.

Na ekranie pojawi się jedna z następujących informacji:

- Jeśli są włączone, obok informacji **Włączone** pojawi się ✓.
- Jeśli nie, ✓ obok opcji **Włączone** zniknie.

## Włączanie lub wyłączenie dźwięku inteligentnego

Radiotelefon automatycznie zwiększa swoją głośność, aby skompensować hałas otoczenia, w tym nieruchome i ruchome źródła hałasu. Ta funkcja dotyczy jedynie odbioru i nie ma wpływu na transmitowany dźwięk. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć dźwięk inteligentny.

**UWAGA:**

Ta funkcja jest niedostępna podczas sesji Bluetooth.

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Inteligentny dźwięk**. Pomiń poniższe kroki.

- Naciśnij   , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do **Narzędzi**.

Naciśnij   , aby wybrać.

3 Naciśnij  lub  , aby przejść do **Ustawień radiotelefonu**. Naciśnij   , aby wybrać.

4 Naciśnij  lub  , aby przejść do **Inteligentnego dźwięku**. Naciśnij   , aby wybrać.

5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub  , aby włączyć. Naciśnij   , aby wybrać. Obok opcji włączyć pojawi się oznaczenie  .

- Naciśnij  lub  , aby wyłączyć. Naciśnij   , aby wybrać. Obok opcji wyłączyć pojawi się oznaczenie  .

## Włączenie lub wyłączenie funkcji akustycznego tłumika sprzężeń

Ta funkcja umożliwi minimalizowanie sprzężeń akustycznych w odbieranych połączeniach. Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć tłumienie sprzężenia akustycznego w radiotelefonie.

1 Naciśnij   , aby uzyskać dostęp do menu.

2 Naciśnij  lub  , aby przejść do **Narzędzi**. Naciśnij   , aby wybrać..

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby przejść do pozycji Tłumienie RF. Naciśnij  , aby wybrać.

---

5 Wykonaj jedną z następujących czynności:

- Naciśnij przycisk  , aby włączyć funkcję tłumienia sprzężenia akustycznego. Jeśli są włączone, obok informacji Włączone pojawi się ✓ .
  - Naciśnij przycisk  , aby wyłączyć funkcję tłumienia sprzężenia akustycznego. Jeśli nie, ✓ obok opcji Włączone zniknie.
- 

## Włączanie lub wyłączanie funkcji wzmocnienia głoski „r”

Funkcję tę można włączyć w przypadku rozmów w języku zawierającym wiele słów ze spółgłoskami drżącymi dźwiękowymi (oznaczenie [r] w jęz. polskim). Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć wzmacnianie głoski „r”.

[Wyślij informację zwrotną](#)

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Wzmocnienie głoski „r”**. Pomiń poniższe kroki.
  - Naciśnij  , aby uzyskać dostęp do menu.
- 

2 Naciśnij  lub  , aby przejść do Narzędzi. Naciśnij  , aby wybrać.

---

3 Naciśnij  lub  , aby przejść do Ustawień radiotelefonu. Naciśnij  , aby wybrać.

---

4 Naciśnij  lub  , aby wybrać Wzmocnienie głoski „r”. Naciśnij  , aby wybrać.

---

5 Wykonaj jedną z następujących czynności:

- Naciśnij  lub  , aby wł. Naciśnij  , aby wybrać. Obok opcji wł. pojawi się oznaczenie ✓ .

- Naciśnij  lub , aby włączyć. Naciśnij , aby wybrać. Obok opcji włączyć pojawi się oznaczenie .

## Otoczenie audio

Możesz dostosować otoczenie audio w radiotelefonie w zależności od warunków, w jakich korzysta się z urządzenia.

### Domyślne

To jest ustawienie domyślne.

### Głośne

To ustawienie umożliwia użycie tłumika hałasów i zwiększa głośność odsłuchu w hałaśliwych miejscach.

### Grupa robocza

To ustawienie umożliwia użycie tłumika AF i wyłącza używanie funkcji AGC, kiedy grupa radiotelefonów znajduje się blisko siebie.

## Ustawianie otoczenia audio

Postępuj zgodnie z procedurą, aby ustawić otoczenie audio w radiotelefonie stosownie do danego otoczenia.

- Naciśnij , aby uzyskać dostęp do menu.
- Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do Otoczenia audio. Naciśnij , aby wybrać.
- Naciśnij  lub , aby przejść do wybranych ustawień. Naciśnij , aby wybrać.  
Ustawienia wymieniono poniżej.
  - Wybierz Ustawienie domyślne dla domyślnych ustawień fabrycznych.
  - Wybierz Głośny, aby zwiększyć głośność głośnika podczas używania w głośnym otoczeniu.

- Wybierz Grupa robocza, aby zredukować sprzężenie akustyczne przy korzystaniu z grupy radiotelefonów, które znajdują się blisko siebie.

Na wyświetlaczu obok wybranego ustawienia pojawi się .

## Profile dźwięku

Możesz dostosować profile audio w radiotelefonie w zależności od swoich preferencji.

### Domyślne

To jest ustawienie domyślne.

### Poziom 1, Poziom 2, Poziom 3

Te ustawienia są przeznaczone do kompensacji zaniku słuchu występującej u osób w wieku 40, 50 czy 60 lat i powyżej.

### Wzmocnienie tonów wysokich, Wzmocnienie tonów średnich, Wzmocnienie tonów niskich

Te ustawienia są dla cienkich, bardziej nosowych lub głębszych dźwięków.

## Ustawianie profili dźwięku

Postępuj zgodnie z procedurą, aby ustawić profile dźwięku.

[Wyślij informację zwrotną](#)

1 Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby przejść do Narzędzi.  
Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Ustawień radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do Profili dźwięku. Naciśnij , aby wybrać.

5 Naciśnij  lub , aby przejść do wybranych ustawień. Naciśnij , aby wybrać.

Ustawienia wymieniono poniżej.

- Wybierz Domyślne, aby wyłączyć poprzednio wybrany profil audio i powrócić do domyślnych ustawień fabrycznych.
- Wybierz Poziom 1, Poziom 2 lub Poziom 3, aby skorzystać z profili dźwięku przeznaczonych do

kompensacji utraty słuchu typowej dla dorosłych powyżej 40 roku życia.

- Wybierz **Wzmocnienie tonów wysokich**, **Wzmocnienie tonów średnich** lub **Wzmocnienie tonów niskich**, aby skorzystać z profili dźwięku, które będą zgodne z twoimi preferencjami związanymi z wysokimi, nosowymi lub głębokimi dźwiękami.

Na wyświetlaczu obok wybranego ustawienia pojawi się ✓.

## Włączanie lub wyłączanie systemu globalnej nawigacji satelitarnej

Global Navigation Satellite System (GNSS) to system nawigacji satelitarnej, który pozwala dokładnie określać położenie geograficzne radiotelefonu. GNSS korzysta z systemów Global Positioning System (GPS) oraz Global Navigation Satellite System (GLONASS).

### UWAGA:

Wybrane modele radiotelefonów mogą korzystać z nawigacji GPS i GLONASS. Ustawienie GNSS należy skonfigurować za pomocą oprogramowania CPS. Skontaktuj się ze sprzedawcą lub administratorem systemu, aby ustalić, w jaki sposób został zaprogramowany radiotelefon.

- 1 Należy wykonać następujące czynności, aby włączyć/wyłączyć GNSS w radiotelefonie.
  - Naciśnij zaprogramowany przycisk **GNSS**.
  - Naciśnij , aby uzyskać dostęp do menu. Przejdź do kolejnego kroku.
- 2 Naciśnij  lub , aby przejść do **Narzędzi**. Naciśnij , aby wybrać.
- 3 Naciśnij  lub , aby przejść do **Ustawień** radiotelefonu. Naciśnij , aby wybrać.

4 Naciśnij  lub , aby przejść do pozycji GNSS. Naciśnij , aby wybrać.

5 Naciśnij przycisk , aby włączyć lub wyłączyć funkcję GNSS.

Jeśli są włączone, obok informacji **Włączone** pojawi się .

Jeśli nie,  obok opcji **Włączone** zniknie.

## Elastyczna lista odbioru

Elastyczna lista odbioru jest funkcją umożliwiającą tworzenie i przypisywanie członków na liście odbioru grupy rozmówców. Urządzenie obsługuje listy z maksymalnie 16 osobami. Ta funkcja jest obsługiwana w systemie Capacity Plus.

## Włączanie lub wyłączanie Elastycznej listy odbioru

Postępuj zgodnie z procedurą, aby włączyć lub wyłączyć Elastyczną listę odbioru.

[Wyślij informację zwrotną](#)

1 Wykonaj jedną z następujących czynności:

- Naciśnij zaprogramowany przycisk **Lista Flex Rx**. Pomiń poniższe czynności.
- Naciśnij , aby uzyskać dostęp do menu.

2 Naciśnij  lub , aby wyświetlić **Elastyczną listę odbioru**. Naciśnij , aby wybrać.

3 Wykonaj jedną z następujących czynności:

- Naciśnij  lub , aby **włączyć**. Naciśnij , aby wybrać. Wybrzmiewa potwierdzający sygnał dźwiękowy. Na wyświetlaczu pojawia się symbol powodzenia.
- Naciśnij  lub , aby **wyłączyć**. Naciśnij , aby wybrać. Rozlega się ostrzegawczy sygnał dźwiękowy. Na wyświetlaczu pojawia się symbol niepowodzenia.

## Ogólne informacje dotyczące radiotelefonu

Radiotelefon zawiera informacje na temat różnych parametrów ogólnych.

Dostępne są następujące ogólne informacje o radiotelefonie.

- Alias oraz ID radiotelefonu.
- Oprogramowanie sprzętowe i wersje codeplug.
- Aktualizacja oprogramowania.
- Informacje GNSS.
- Informacje o stacji.

### UWAGA:

Naciśnij , aby powrócić do poprzedniego

ekranu. Przytrzymanie przycisku  spowoduje ponowne wyświetlenie ekranu głównego.

Radiotelefon zamyka bieżący ekran po zakończeniu odliczania czasu nieaktywności.

## Sprawdzanie aliasu oraz ID radiotelefonu

Postępuj zgodnie z procedurą, aby sprawdzić ID i alias radiotelefonu.

- 1 Wykonaj jedną z następujących czynności:
  - Naciśnij zaprogramowany przycisk **Alias i ID radiotelefonu**. Pomiń poniższe czynności. Wybrzmiewa potwierdzający sygnał dźwiękowy. Można nacisnąć programowalny przycisk **Alias oraz ID radiotelefonu**, aby powrócić do poprzedniego ekranu.
  - Naciśnij , aby uzyskać dostęp do menu.

- 
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

- 
- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.
-

- 4 Naciśnij  lub , aby przejść do opcji **Mój ID**. Naciśnij , aby wybrać.
- Pierwszy wiersz tekstowy pokazuje alias radiotelefonu. Drugi wiersz tekstowy pokazuje ID radiotelefonu.

## Sprawdzanie wersji oprogramowania sprzętowego i wersji Codeplug

Postępuj zgodnie z procedurą, aby sprawdzić wersję oprogramowania sprzętowego i wersję codeplug.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.
- 
- 3 Naciśnij  lub , aby przejść do **Informacje na temat radiotelefonu**. Naciśnij , aby wybrać.

[Wyślij informację zwrotną](#)

- 4 Naciśnij  lub , aby przejść do **Wersje**.  
Naciśnij , aby wybrać.
- Na wyświetlaczu pojawi się bieżąca wersja oprogramowania sprzętowego i codeplug.

## Sprawdzanie informacji dotyczących aktualizacji oprogramowania

Ta funkcja pokazuje datę i godzinę ostatniej aktualizacji oprogramowania w ramach programowania bezprzewodowego (OTAP) lub Wi-Fi. Postępuj zgodnie z procedurą, aby sprawdzić informacje dotyczące aktualizacji oprogramowania.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do **Narzędzi**.  
Naciśnij , aby wybrać.

3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Aktualizacji oprogramowania. Naciśnij , aby wybrać.

Na ekranie jest wyświetlana data i godzina najnowszej aktualizacji oprogramowania.

---

Menu aktualizacji oprogramowania jest dostępne po co najmniej jednej udanej sesji OTAP lub Wi-Fi. Dodatkowe informacje: [Programowanie drogą radiową na str. 526](#).

## Sprawdzanie informacji GNSS

Ta funkcja umożliwia wyświetlanie na ekranie radiotelefonu informacji GNSS, takich jak:

- Szerokość geograficzna
- Długość geograficzna
- Wysokość

- Kierunek
- Prędkość
- Poziome rozmycie dokładności (HDOP)
- Satelity
- Wersja

1 Naciśnij , aby uzyskać dostęp do menu.

---

2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.

---

3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.

---

4 Naciśnij  lub , aby przejść do Informacje GNSS. Naciśnij , aby wybrać.

---

- 5 Naciśnij  lub , aby przejść do wymaganej pozycji. Naciśnij , aby wybrać. Na wyświetlaczu pojawią się żądane informacje GNSS.
- 

- 4 Naciśnij  lub , aby przejść do Informacje o stacji. Naciśnij , aby wybrać.
- 

Wyświetlacz pokazuje nazwę aktualnego miejsca.

## Wyświetlanie informacji o stacji

Postępuj zgodnie z procedurą, aby wyświetlić nazwę stacji, w której znajduje się radiotelefon.

- 1 Naciśnij , aby uzyskać dostęp do menu.
- 
- 2 Naciśnij  lub , aby przejść do Narzędzi. Naciśnij , aby wybrać.
- 
- 3 Naciśnij  lub , aby przejść do Informacje na temat radiotelefonu. Naciśnij , aby wybrać.
-

# Ograniczona gwarancja

## MOTOROLA SOLUTIONS COMMUNICATION PRODUCTS.

### I. Co obejmuje gwarancja i przez jaki okres?

Firma Motorola Solutions Inc. („Motorola Solutions”) gwarantuje, że wymienione poniżej produkty komunikacyjne firmy Motorola Solutions („Produkt”) będą wolne od wad materiałowych i produkcyjnych w warunkach normalnego użytkowania oraz serwisowania przez podany czas od daty zakupu:

Radiotelefony Serii DM Cyfrowe Mobilne	24 miesiące
Akcesoria dla produktu	12 miesięcy

Firma Motorola Solutions, według własnego uznania, nieodpłatnie naprawi Produkt (używając nowych lub regenerowanych elementów), wymieni go (na Produkt nowy lub regenerowany) bądź zwróci koszt zakupu w

okresie gwarancyjnym, pod warunkiem, że Produkt zostanie zwrócony zgodnie z warunkami niniejszej gwarancji. Okres gwarancji wymienionych części lub płyt będzie odpowiednio dostosowany do pierwotnego okresu gwarancyjnego. Wszystkie wymienione części Produktu stają się własnością firmy Motorola Solutions.

Ta jasno określona, ograniczona gwarancja jest udzielana przez firmę Motorola Solutions tylko pierwotnemu nabywcy końcowemu i nie może być przypisywana ani przenoszona na żadną stronę trzecią. Jest to pełna gwarancja na Produkt wyprodukowany przez firmę Motorola Solutions. Firma Motorola Solutions nie przyjmuje na siebie zobowiązań ani odpowiedzialności za ulepszenia bądź modyfikacje w okresie gwarancyjnym, jeśli nie zostały one zatwierdzone na piśmie i podpisane przez uprawnionego przedstawiciela firmy Motorola Solutions.

O ile nie ustalono inaczej w osobnej umowie pomiędzy firmą Motorola Solutions a nabywcą końcowym, gwarancja firmy Motorola Solutions nie obejmuje montażu, konserwacji ani serwisowania produktu.

Firma Motorola Solutions nie ponosi odpowiedzialności za urządzenia dodatkowe, które nie zostały dostarczone przez firmę Motorola Solutions, a które są zamontowane lub użytkowane w połączeniu z Produktem, ani też za działanie Produktu z dowolnym urządzeniem dodatkowym. Wszelkie

tego rodzaju urządzenia są wyłączone z niniejszej gwarancji. Ponieważ każdy system, który może wykorzystywać Produkt, jest unikatowy, firma Motorola Solutions zrzuca się gwarancyjnej odpowiedzialności za zakres, pokrycie lub działanie takiego systemu.

## II. POSTANOWIENIA OGÓLNE:

Niniejsza gwarancja określa pełny zakres odpowiedzialności firmy Motorola Solutions za Produkt. Naprawa, wymiana lub zwrot ceny zakupu to wyłączne opcje rozwiązania problemu, zależnie od decyzji firmy Motorola Solutions. NINIEJSZA GWARANCJA JEST UDZIELANA W MIEJSCE WSZELKICH INNYCH JASNO OKREŚLONYCH GWARANCJI. GWARANCJE IMPLIKOWANE, OBEJMUJĄCE BEZ OGRANICZENIA GWARANCJE PRZYDATNOŚCI HANDLOWEJ ORAZ ZDATNOŚCI DO OKREŚLONEGO CELU, SĄ WARUNKOWANE OKRESEM OBOWIĄZYWANIA NINIEJSZEJ OGRANICZONEJ GWARANCJI. W ŻADNYM PRZYPADKU FIRMA MOTOROLA SOLUTIONS NIE PONOSI ODPOWIEDZIALNOŚCI ZA SZKODY PRZEKRACZAJĄCE KOSZT ZAKUPU PRODUKTU, STRATY UŻYTECZNOŚCI, PRZESTOJE, NIEDOGODNOŚCI, STRATY HANDLOWE, UTRACONE ZYSKI LUB OSZCZĘDNOŚCI, ANI TEŻ ŻADNE INNE

SZKODY PRZYPADKOWE, SPECJALNE LUB WYNIKOWE, SPOWODOWANE UŻYTKOWANIEM BĄDŹ NIEMOŻNOŚCIĄ UŻYTKOWANIA PRODUKTU, W PEŁNYM ZAKRESIE OKREŚLONYM PRZEPISAMI.

## III. PRZEPISY PAŃSTWOWE:

NIEKTÓRE PAŃSTWA NIE ZEZWALAJĄ NA WYŁĄCZENIE LUB OGRANICZENIE SZKÓD PRZYPADKOWYCH BĄDŹ WYNIKOWYCH ALBO NA OGRANICZENIE OKRESU GWARANCJI IMPLIKOWANEJ I WÓWCZAS POWYŻSZE OGRANICZENIA LUB WYŁĄCZENIA MOGĄ NIE MIEĆ ZASTOSOWANIA.

Niniejsza gwarancja daje określone prawa ustawowe. Mogą obowiązywać inne prawa, różniące się w zależności od państwa.

## IV. JAK DOKONAĆ NAPRAWY GWARANCYJNEJ:

Aby skorzystać z naprawy gwarancyjnej, należy przedstawić dowód zakupu (z datą zakupu i numerem seryjnym Produktu) oraz dostarczyć lub przesać Produkt (opłacając z góry transport i ubezpieczenie) do autoryzowanej placówki serwisu gwarancyjnego. Serwis

gwarancyjny zostanie zrealizowany przez firmę Motorola Solutions za pośrednictwem jednej z autoryzowanych placówek świadczących tego typu usługi. Należy najpierw skontaktować się ze sprzedawcą Produktu (np. dystrybutorem lub dostawcą usług komunikacyjnych), który pomoże w uzyskaniu pomocy gwarancyjnej. Można również zatelefonować do firmy Motorola Solutions pod numer 1-800-927-2744 (Stany Zjednoczone/Kanada).

## V. CZEGO NIE OBEJMUJE GWARANCJA

- 1 Usterki lub uszkodzenia będących wynikiem użytkowania Produktu w sposób inny niż przewidziany i zwyczajowy.
- 2 Usterki lub uszkodzenia będących wynikiem niewłaściwego użycia, incydentu, działania wody lub zaniedbania.
- 3 Usterki lub uszkodzenia będących wynikiem nieprawidłowego testowania, użytkowania, konserwacji, montażu, zmian konstrukcyjnych, modyfikacji lub regulacji.
- 4 Zniszczeń ani uszkodzeń anten, o ile nie zostały one spowodowane wadą materiałową/produkcyjną.
- 5 Produktu poddanego nieautoryzowanym modyfikacjom, demontażom lub naprawom (m.in. dołączeniu do Produktu sprzętu dostarczonego przez inną firmę), które niekorzystnie wpłynęły na wydajność Produktu lub utrudniły zwykle oględziny i testy gwarancyjne Produktu wykonywane przez firmę Motorola Solutions w celu zweryfikowania zgłoszenia gwarancyjnego.
- 6 Produktów z usuniętym lub nieczytelnym numerem seryjnym.
- 7 Akumulatorów, jeżeli:
  - którakolwiek uszczelka na zamknięciu ogniw jest uszkodzona lub wykazuje ślady manipulowania;
  - uszkodzenie lub usterka są wynikiem ładowania bądź użytkowania akumulatora w urządzeniu innym niż Produkt, do którego akumulator jest przeznaczony.
- 8 Kosztów transportu do placówki naprawczej.
- 9 Produktu, który ze względu na nielegalne lub nieautoryzowane przeróbki oprogramowania/ wewnętrznego oprogramowania Produktu działa niezgodnie ze specyfikacjami opublikowanymi przez firmę Motorola Solutions lub umieszczonymi na deklaracji zgodności z warunkami certyfikatu FCC, obowiązującymi dla Produktu w czasie jego

pierwotnego dystrybuowania przez firmę Motorola Solutions.

- 10 Zarysowań i innych defektów kosmetycznych powierzchni Produktu, które nie mają wpływu na jego działanie.
- 11 Zwyczajne zużycie eksploatacyjne.

## VI. POSTANOWIENIA PATENTOWE I DOTYCZĄCE OPROGRAMOWANIA:

Firma Motorola Solutions na własny koszt podejmie obronę w sprawie przeciwko nabywcy końcowemu, jeżeli sprawa będzie opierać się na zarzucie, że Produkt lub jego część narusza patent USA. Firma Motorola Solutions pokryje koszty i wypłaci odszkodowania zasądzone wobec nabywcy końcowego w każdej takiej sprawie związanej z roszczeniem, jednakże odnośna obrona i odszkodowania będą podlegać następującym warunkom:

- 1 Firma Motorola Solutions zostanie niezwłocznie powiadomiona przez nabywcę na piśmie o takim roszczeniu;
- 2 Firma Motorola Solutions będzie mieć wyłączną kontrolę nad obroną w takiej sprawie oraz nad wszystkimi

negocjacjami w celu jej rozwiązania lub osiągnięcia kompromisu; oraz

- 3 jeżeli Produkt lub części staną się lub zdaniem firmy Motorola Solutions mogą stać się przedmiotem skargi o naruszenie patentu USA, nabywca zezwoli firmie Motorola Solutions - według jej uznania i na jej koszt - na pozyskanie dla nabywcy prawa dalszego korzystania z Produktu lub części bądź na odpowiednią ich wymianę lub modyfikację, które wyeliminują sytuację naruszenia patentu, albo na zwrot kosztów Produktu lub części po uwzględnieniu amortyzacji, przy dokonaniu zwrotu tego Produktu lub części. Deprecjacja będzie jednakowa w każdym roku okresu eksploatacji Produktu lub części, zgodnie z postanowieniem firmy Motorola Solutions.

Firma Motorola Solutions nie będzie ponosić odpowiedzialności za żadne skargi odnośnie naruszenia prawa patentowego dotyczące przypadków połączenia dostarczonego przez nią Produktu lub części z oprogramowaniem, aparaturą lub urządzeniami, które nie zostały dostarczone przez firmę Motorola Solutions, i nie będzie odpowiadać za wykorzystanie dodatkowego oprzyrządowania lub oprogramowania, które nie zostało dostarczone przez firmę Motorola Solutions, a przyłączonego bądź użytkowanego w połączeniu z Produktem. Powyższe zasady określają całkowitą

odpowiedzialność firmy Motorola Solutions w zakresie naruszenia patentów przez Produkt lub jego części.

Przepisy w USA oraz innych państwach gwarantują firmie Motorola Solutions pewne wyłączne prawa dla oprogramowania firmy Motorola Solutions, takie jak wyłączne prawa powielania oraz dystrybucji kopii wspomnianego oprogramowania. Oprogramowanie firmy Motorola Solutions może być wykorzystywane tylko z Produktem, w którym zostało pierwotnie użyte, i takie oprogramowanie w Produkcie nie może być w żaden sposób wymieniane, powielane, dystrybuowane, modyfikowane ani wykorzystywane do wytwarzania produktów pochodnych. Nie jest dozwolone żadne inne wykorzystanie, włącznie z zamianą, modyfikacją, powielaniem, dystrybucją bądź inżynierią wsteczną, oprogramowania firmy Motorola Solutions ani też wykorzystywanie praw do tego oprogramowania. Żadna licencja nie jest udzielana w sposób dorozumiany, na podstawie wcześniejszych oświadczeń bądź w dowolny inny sposób w zakresie praw patentowych lub autorskich firmy Motorola Solutions.

## VII. PRAWO WŁAŚCIWE:

## Важная информация по безопасности

**Сведения о безопасности и воздействии излучаемой радиочастотной энергии для мобильных приемопередающих радиостанций**

### **ВНИМАНИЕ!**

**Данная радиостанция предназначена только для профессиональной эксплуатации.** Прежде чем использовать ее, ознакомьтесь с буклетом "Сведения о безопасности и воздействии излучаемой радиочастотной энергии для мобильных приемопередающих радиостанций". Он содержит важные инструкции по эксплуатации и технике безопасности, а также информацию по воздействию радиочастотной энергии и контролю соответствия применимым стандартам и нормативам.

Для ознакомления со списком антенн и других аксессуаров, утвержденных компанией Motorola Solutions, посетите следующий веб-сайт:

<http://www.motorolasolutions.com>

Данная страница намеренно оставлена пустой.

## Версия ПО

Все функции, описанные в следующих разделах, поддерживаются программным обеспечением радиостанции версии **R02.08.05.0000** или более поздней версии.

Для получения сведений о том, как определить версию программного обеспечения радиостанции, см. раздел [Просмотр версии микропрограммы и версии кодплага на стр. 256](#).

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Данная страница намеренно оставлена пустой.

## Авторские права

Описанные в данном руководстве изделия Motorola Solutions могут содержать защищенные авторскими правами компьютерные программы Motorola Solutions. Законы США и некоторых других стран обеспечивают определенные эксклюзивные права компании Motorola Solutions в отношении защищенных авторским правом компьютерных программ. В связи с этим любые защищенные авторским правом компьютерные программы Motorola Solutions, содержащиеся в изделиях Motorola Solutions, которые описаны в настоящем документе, запрещается копировать или воспроизводить каким бы то ни было способом без явного письменного разрешения компании Motorola Solutions.

© 2017 Motorola Solutions, Inc. Все права защищены

Запрещается воспроизведение, передача, хранение в поисковых системах или перевод на любой язык, в том числе машинный, любой части настоящего документа в любой форме, любыми средствами и для любых целей без письменного разрешения компании Motorola Solutions, Inc.

Кроме того, приобретение изделий Motorola Solutions не приводит прямо, косвенно, процессуально или каким-

либо иным образом к предоставлению какой-либо лицензии в отношении авторских прав, патентов или запатентованных приложений Motorola Solutions, за исключением обычной неисключительной лицензии на использование без уплаты роялти, которая возникает по закону при продаже продукта.

### Отказ от ответственности

Обратите внимание, что определенные функции, оборудование и возможности, описанные в настоящем документе, могут не подходить или не быть лицензированы для использования в определенных системах, а также могут зависеть от характеристик определенного мобильного абонентского терминала или конфигурации определенных параметров. Обратитесь к представителю компании Motorola Solutions для получения дополнительной информации.

### Товарные знаки

MOTOROLA, MOTO, MOTOROLA SOLUTIONS и логотип в виде стилизованной буквы M являются товарными знаками или зарегистрированными товарными знаками Motorola Trademark Holdings, LLC и используются по лицензии. Все прочие товарные знаки являются собственностью соответствующих владельцев.

## Директива по утилизации электрического и электронного оборудования (WEEE) Европейского союза (ЕС)

■ В соответствии с директивой WEEE Европейского союза продукция, поступающая в страны ЕС, должна иметь ярлык со значком перечеркнутой мусорной корзины на продукте (в некоторых случаях — на упаковке).

Согласно директиве WEEE такой ярлык с перечеркнутой мусорной корзиной означает, что покупатели и конечные пользователи в странах ЕС не должны выбрасывать электрическое и электронное оборудование или аксессуары к нему вместе с бытовыми отходами.

Покупатели или конечные пользователи в странах ЕС должны обратиться в местное представительство поставщика оборудования или в центр обслуживания, чтобы получить информацию о пунктах переработки.

## Авторские права на компьютерное программное обеспечение

Описанные в данном руководстве изделия Motorola Solutions могут содержать защищенные авторскими правами компьютерные программы Motorola Solutions, хранящиеся на полупроводниковых ЗУ или других носителях. Законы США и некоторых других стран обеспечивают определенные эксклюзивные права компании Motorola Solutions в отношении защищенных авторским правом компьютерных программ, включая, помимо прочего, эксклюзивное право на копирование и воспроизведение в любой форме защищенных авторским правом компьютерных программ. В связи с этим никакие компьютерные программы компании Motorola Solutions, которые содержатся в изделиях Motorola Solutions, описанных в настоящем руководстве, не разрешается копировать, воспроизводить, изменять, подвергать инженерному анализу для создания аналога или распространять каким бы то ни было способом без явного письменного разрешения компании Motorola Solutions. Кроме того, приобретение изделий Motorola Solutions не приведет прямо, косвенно, процессуально или каким-либо иным

образом к передаче лицензии на авторские права, патенты или запатентованные приложения Motorola Solutions, кроме обычной неисключительной лицензии на использование, которая возникает по закону при продаже изделия.

Используемая в этом изделии технология кодирования речи AMBE+2™ защищена правами на интеллектуальную собственность, включая авторские права, а также права на патенты и коммерческую тайну, принадлежащие компании Digital Voice Systems, Inc.

Лицензия на использование данной технологии кодирования речи распространяется только на данное оборудование для связи. Пользователю данной технологии строго запрещается декомпилировать, подвергать инженерному анализу для создания аналога или дизассемблировать объектный код, а также любым другим способом преобразовывать объектный код в читаемую человеком форму.

Номера пат. США: № 5 870 405, № 5 826 222, № 5 754 974, № 5 701 390, № 5 715 365, № 5 649 050, № 5 630 011, № 5 581 656, № 5 517 511, № 5 491 772, № 5 247 579, № 5 226 084 и № 5 195 166.

Данная страница намеренно оставлена пустой.

## Меры предосторожности при эксплуатации

Портативная цифровая радиостанция MOTOTRBO соответствует требованиям IP67, что позволяет использовать ее в тяжелых условиях эксплуатации, например при погружении в воду. В данном разделе приводятся меры предосторожности при эксплуатации.

### **ВНИМАНИЕ!**

Не разбирайте радиостанцию. Разборка может повредить уплотнения и привести к нарушению герметичности радиостанции. Техобслуживание радиостанции должно выполняться только в сервисном центре, оснащенный средствами проверки и замены уплотнений.

- Если радиостанция была погружена в воду, хорошо встряхните ее, чтобы удалить воду из решетки динамика и гнезда микрофона. Вода может ухудшить характеристики звука.
- Если вода попала на область контактов аккумулятора радиостанции, прочистите и высушите контакты аккумулятора и радиостанции перед тем, как присоединять аккумулятор к радиостанции.

Оставшаяся вода может вызвать короткое замыкание в радиостанции.

- Если радиостанция была погружена в коррозионную среду (например, в соленую воду), промойте радиостанцию и аккумулятор пресной водой, а затем просушите.
- Для очистки наружных поверхностей радиостанции используйте разбавленный раствор слабого бытового моющего средства и пресную воду (например, чайная ложка моющего средства на 4 литра воды).
- Ни в коем случае не вставляйте какие-либо предметы в отверстие, расположенное в корпусе радиостанции под контактом аккумулятора. Это отверстие служит для выравнивания давления в радиостанции. В противном случае герметичность и водостойкость радиостанции может быть нарушена.
- Ни в коем случае не закрывайте и не блокируйте это отверстие, даже этикеткой.
- Убедитесь, что отверстие не будет контактировать с маслянистыми веществами.
- Радиостанция с правильно прикрепленной антенной может быть погружена в воду на глубину не более 1 метра (3,28 фута) и не дольше, чем на 30 минут.

Выход за эти пределы или использование радиостанции без антенны может привести к повреждению радиостанции.

- При очистке радиостанции не направляйте на нее сильную струю воды, т. к. такая струя превысит значение давления на глубине 1 м и может вызвать попадание воды внутрь радиостанции.

## Основные операции

В данной главе описываются основные операции по использованию радиостанции.

### Включение питания радиостанции

Для включения питания радиостанции выполните следующие действия.

Нажмите кнопку включения/выключения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- Загорится зеленый светодиодный индикатор.
- На дисплее появится сообщение **МОТОТРВО (TM)**, а затем приветственное сообщение или изображение.
- Включится подсветка главного экрана.

Если функция тональных сигналов/оповещений отключена, при включении питания звукового сигнала не будет.

Если питание радиостанции не включается, проверьте аккумулятор. Убедитесь, что он заряжен и правильно

установлен. Если питание радиостанции по-прежнему не включается, обратитесь к дилеру.

### Выключение питания радиостанции

Для выключения питания радиостанции выполните следующие действия.

Нажмите и удержите кнопку **Вкл./Выкл.**

Чтобы полностью выключить радиостанцию, может понадобиться до семи секунд.

На дисплее появится сообщение **Идет выключение.**

### Регулировка громкости

Для регулировки уровня громкости радиостанции выполните следующие действия.

Выполните одно из следующих действий.

- Поверните **регулятор "Вкл./Выкл./Громкость"** по часовой стрелке, чтобы повысить уровень громкости.
- Поверните **регулятор "Вкл./Выкл./Громкость"** против часовой стрелки, чтобы понизить уровень громкости.

**УВЕДОМЛЕНИЕ:**

Радиостанцию можно запрограммировать на минимальный уровень громкости, чтобы звук нельзя было приглушить ниже запрограммированного уровня. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

---

## Элементы управления радиостанцией

В данной главе описываются кнопки и функции, позволяющие управлять радиостанцией.

- 1 Кнопка "Вкл./Выкл./Информация"
- 2 Ручка выбора каналов/регулировки громкости
- 3 Дисплей
- 4 Кнопка "Меню/ОК"
- 5 Кнопки прокрутки вверх/вниз

[Отправить отзыв](#)

- 6 Динамик
- 7 Кнопка "Назад/Домой"
- 8 Программируемые кнопки на передней панели
- 9 Аксессуарный разъем
- 10 Светодиодные индикаторы

## Ручка выбора каналов/регулировки громкости

Ручку выбора каналов/регулировки громкости можно запрограммировать на выполнение обеих указанных функций или только на регулировку громкости.

Инструкции по регулировке громкости см. в разделе [Регулировка громкости на стр. 45](#).

Для смены каналов нажмите и удерживайте **ручку выбора каналов/регулировки громкости**, пока на дисплее не отобразится режим выбора каналов. Поверните **ручку выбора каналов/регулировки громкости**, чтобы выбрать канал. Чтобы выйти из режима выбора каналов, выполните одно из следующих действий.

- Нажмите **ручку выбора каналов/регулировки громкости**.
- Нажмите  .
- Нажмите  .
- Подождите, пока исчезнет таймер меню.

## Задание предпочтительной функции ручки двойного назначения

Для установки предпочтительной функции ручки двойного назначения выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

## Клавиши микрофона с клавиатурой

Доступ к ряду функций радиостанции осуществляется с помощью буквенно-цифровой клавиатуры с 4 строками и 3 столбцами на 4-позиционном микрофоне (номер по каталогу Motorola Solutions: RMN5127\_). Ввод многих

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Двойн. ручка**. Нажмите  для выбора. На дисплее отображаются варианты **Только громк.** и **Громк. и кан.**

- 5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора. Рядом с выбранными настройками появится значок . Радиостанция вернется к предыдущему меню.

символов требует неоднократного нажатия клавиш. Сведения о числе нажатий клавиш, необходимом для ввода различных символов, приведены в таблице ниже.

Клавиша	Число нажатий клавиши												
	1	2	3	4	5	6	7	8	9	10	11	12	13
1 .,?	1	.	,	?	!	@	&	'	%	—	:	*	#
2 ABC	A	B	C	2									
DEF 3	D	E	F	3									
4 GHI	G	H	I	4									
5 JKL	J	K	L	5									
MNO 6	M	N	O	6									

Продолжение таблицы...

Кла виш а	Число нажатий клавиши												
	1	2	3	4	5	6	7	8	9	10	11	12	13
 7 PORS	P	Q	R	S	7								
 8 TUV	T	U	V	8									
 WXYZ 9	W	X	Да	Z	9								
 0	0												
 *													
 * <	или DEL												
 #	#												
 #	или проб ел												

**УВЕДОМЛЕНИЕ:**

Нажмите, чтобы ввести "0". Длительное нажатие включает режим заглавных букв. Повторное длительное нажатие выключает режим заглавных букв.

**УВЕДОМЛЕНИЕ:**

Нажмите во время ввода текста, чтобы удалить символ. Нажмите во время ввода цифр, чтобы ввести "\*".

**УВЕДОМЛЕНИЕ:**

Нажмите во время ввода текста, чтобы вставить пробел. Нажмите во время ввода цифр, чтобы ввести "#".

## WAVE

Среда WAVE™ (Wide Area Voice Environment, среда территориально распределенной голосовой связи) обеспечивает новый метод выполнения вызовов между двумя радиостанциями.

Данная функция также поддерживает вызовы между радиостанциями и другими WAVE-совместимыми устройствами. При этом для использования этой функции необходимо настроить канал WAVE.

При работе на канале WAVE радиостанция не может принимать вызовы от других систем и может принимать только вызовы WAVE.

Если радиостанция работает на канале WAVE, автоматически активируется Wi-Fi и выполняется вход на сервер WAVE. Вызовы WAVE выполняются, если радиостанция подключена к IP-сети через Wi-Fi.

### УВЕДОМЛЕНИЕ:

Данная функция применима только для DM4601e.

### Таблица 1: Экранные значки WAVE

При активации WAVE на экране сразу отобразятся следующие значки WAVE.

	<b>WAVE подключен</b> Система WAVE подключена.
	<b>WAVE отсоединен</b> Система WAVE отсоединена

## Настройка активного канала WAVE

Конфигурация каналов WAVE настраивается посредством CPS. Для выбора требуемого канала WAVE выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента Каналы WAVE. Нажмите  для выбора.
-

3 Нажмите  или  для выбора нужного канала WAVE. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Уст. как активн.. Нажмите  для выбора.

---

Рядом с выбранным каналом появится значок .

## Просмотр информации о канале WAVE

Для просмотра информации о канале WAVE следуйте описанной процедуре.

- 1 Выполните одно из следующих действий.
    - Нажмите запрограммированную кнопку **списка каналов WAVE**. Пропустите следующие действия.
    - Нажмите  для доступа к меню.
- 

2 Нажмите  или  для выбора элемента Каналы WAVE. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужного канала WAVE. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Дет. данные. Нажмите  для выбора.

---

На дисплее появится информация о канале WAVE.

## Просмотр информации о терминалах WAVE

Для просмотра информации о терминалах WAVE следуйте описанной процедуре.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **контакта**. Сразу перейдите к [шаг 3](#).

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Терминалы. Нажмите  для выбора.

3 Нажмите  или  для выбора нужного терминала WAVE. Нажмите  для выбора.

4 Нажмите  для выбора элемента Дет. данные.

На дисплее появится информация о терминале WAVE.

## Изменение конфигурации WAVE

Для установки IP-адреса сервера, идентификатора пользователя и пароля WAVE следуйте следующей процедуре.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента WAVE. Нажмите  для выбора.

5 Нажмите  , чтобы выделить элемент Адрес сервера. Нажмите  , чтобы изменить адрес сервера. Нажмите  для выбора.

6 Нажмите  , чтобы выбрать элемент ID польз. Нажмите  , чтобы изменить идентификатор пользователя. Нажмите  для выбора.

- 7 Нажмите  , чтобы выбрать элемент Пароль.  
Нажмите  , чтобы просмотреть или изменить пароль WAVE. Нажмите  для выбора.
- 

- 8 Нажмите  , чтобы выбрать элемент Применить. Нажмите  , чтобы применить все сделанные изменения.
- 

Перед возвратом к экрану Параметры р/с на дисплее ненадолго отображается мини-уведомление об успешном выполнении действия.

## Выполнение групповых вызовов

Для выполнения группового вызова на канале WAVE выполните следующие действия.

- 1 Выберите канал WAVE с требуемым псевдонимом или идентификатором группы.
- 
- 2 Нажмите кнопку **РТТ** для выполнения вызова.  
Загорится зеленый светодиодный индикатор. В первой строке на дисплее отобразится значок

**группового вызова** и псевдоним. Во второй строке отобразится псевдоним группы WAVE.

---

- 3 Выполните одно из следующих действий.
    - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
    - Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.
- 

- 4 Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор. На дисплее отобразится значок **группового вызова**, псевдоним или идентификатор группы, а также псевдоним или идентификатор передающей радиостанции.
- 

- 5 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и

можно отвечать. Нажмите кнопку **PTT** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Вид экрана радиостанции вернется к отображению до выполнения вызова.

---

Данная страница намеренно оставлена пустой.

## Работа в режиме Caracity Max

Caracity Max — это транкинговая система радиосвязи на основе управляющего канала. В данной главе приводится описание функций, доступных пользователям радиостанции.

### Кнопка PTT (Push-To-Talk)

Кнопка **PTT** выполняет две основные задачи.

- Во время вызова кнопка **PTT** позволяет радиостанции выполнять передачу на другие радиостанции, участвующие в вызове. При нажатии кнопки **PTT** активируется микрофон.
- Кнопка **PTT** также служит для выполнения нового вызова, когда не выполняются другие вызовы.

Для передачи голоса нажмите кнопку **PTT** и удерживайте ее. Для прослушивания отпустите кнопку **PTT**.

Если включен тональный сигнал разрешения разговора или вспомогательный тональный сигнал **PTT**, не

начинайте говорить, пока не прозвучит короткий тональный сигнал оповещения.

Если на радиостанции включена функция индикации свободного канала, запрограммированная дилером, то в момент отпускания кнопки **PTT** на целевой (принимающей ваш вызов) радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать.

Если вызов будет прерван (например, в случае получения экстренного вызова), прозвучит непрерывный тональный сигнал запрета разговора. Это значит, что нужно отпустить кнопку **PTT**.

### Программируемые клавиши

Программируемые кнопки могут быть запрограммированы дилером для быстрого доступа к определенным функциям радиостанции (в зависимости от продолжительности нажатия кнопки).

#### Короткое нажатие

Нажатие и быстрое отпускание кнопки.

### **Длительное нажатие**

Продолжительное нажатие запрограммированной кнопки.

#### **УВЕДОМЛЕНИЕ:**

См. раздел [Работа в экстренном режиме на стр. 492](#) для получения дополнительной информации о запрограммированной длительности нажатия кнопки **экстренного режима**.

## **Назначаемые функции радиостанции**

Дилер или системный администратор может назначить программируемым кнопкам следующие функции радиостанции.

### **Уровень шума**

Выбор условий, в которых работает радиостанция.

### **Аудиопрофили**

Выбор предпочитаемого аудиопрофиля.

### **Переключатель аудио Bluetooth®**

Перенаправление звука на встроенный динамик радиостанции или на внешний Bluetooth-аксессуар.

### **Подключение к Bluetooth**

Выполнение операции поиска и подключения к Bluetooth.

### **Отключение Bluetooth**

Отключение всех текущих Bluetooth-соединений между радиостанцией и всеми Bluetooth-устройствами.

### **Обнаружение Bluetooth**

Переключение радиостанции в режим обнаружения Bluetooth.

### **Контакты**

Прямой доступ к списку контактов.

### **Оповещение о вызове**

Прямой доступ к списку контактов для выбора контакта, которому можно послать оповещение о вызове.

### **Журнал вызовов**

Выбор списка в журнале вызовов.

### **Экстренный режим**

Инициирование или отмена экстренного режима связи в зависимости от программных настроек.

**Внешняя система оповещения (РА)**

Перенаправление звука на усилитель для динамика подключенной системы оповещения или на внутреннюю систему оповещения радиостанции.

**Сбросить домашний канал**

Установка нового домашнего канала.

**Заглушить напоминание домашнего канала**

Отключение звука напоминания домашнего канала

**Отслеживание в помещении**

Включение и выключение функции отслеживания в помещении.

**Функция интеллектуального аудио**

Включение и выключение функции интеллектуального аудио.

**Ручной набор**

Инициирование частного вызова путем набора любого идентификатора абонента.

**Роуминг сайтов в ручном режиме**

Включение ручного поиска сайтов.

**АРУ микрофона**

Включение и выключение автоматической регулировки усиления (АРУ) встроенного микрофона.

**Уведомления**

Прямой доступ к списку уведомлений.

**Доступ одним нажатием**

Непосредственное выполнение предварительно настроенного широковещательного, частного, телефонного или группового вызова, а также отправка оповещения о вызове или шаблона текстового сообщения.

**Функциональная плата**

Активация и деактивация возможностей функциональной платы для соответствующих каналов.

**Телефон**

Прямой доступ к списку контактов телефона.

**Конфиденциальность**

Включение и выключение функции конфиденциальности.

**Публичное объявление (ПО)**

Включение или выключение внутренней системы оповещения радиостанции.

**Псевдоним и идентификатор радиостанции**

Отображение псевдонима и идентификатора радиостанции.

## **Удаленный мониторинг**

Включение микрофона вызываемой радиостанции без сопутствующей индикации.

## **Информация о сайте**

Отображение имени и идентификатора текущего сайта Saracity Max.

Воспроизведение голосовых сообщений для текущего сайта, если функция голосовых объявлений активирована.

## **Фиксация сайта**

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда функция выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

## **Телеметрическое управление**

Управление выходным контактом местной или удаленной радиостанции.

## **Текстовые сообщения**

Выбор меню текстовых сообщений.

## **Улучшение качества звучания**

Включение или выключение функции улучшения звучания речи.

## **Голосовые объявления вкл/выкл**

Включение и выключение функции голосовых объявлений.

## **Голосовое объявление канала**

Воспроизведение голосовых объявлений зоны и канала для текущего канала. Эта функция недоступна, если деактивирована функция голосовых объявлений.

## **Wi-Fi**

Включение и выключение Wi-Fi.

## **Выбор зоны**

Выбор зоны из списка зон.

# Назначаемые настройки и дополнительные функции

Следующие настройки или дополнительные функции радиостанции можно назначить программируемым кнопкам.

## **Тональные сигналы/оповещения**

Включение и выключение всех тональных сигналов и оповещений.

## **Подсветка**

Включение и выключение подсветки дисплея.

**канал вверх/вниз**

Переключение на предыдущий или следующий канал в зависимости от программных настроек.

**Режим дисплея**

Включение и выключение дневного/ночного режима дисплея.

**Уровень мощности**

Переключение между высоким и низким уровнями мощности передачи.

## Доступ к запрограммированным функциям

Для получения доступа к запрограммированным функциям выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора функции меню, затем нажмите  для выбора функции или перехода в подменю.

- 3 Выполните одно из следующих действий.

- Нажмите , чтобы вернуться на предыдущий экран.
- Нажмите и удерживайте , чтобы вернуться на главный экран.

При длительном периоде неактивности выход из меню и возврат на главный экран происходит автоматически.

Навигационные кнопки меню также доступны на микрофоне с клавиатурой. См. [Клавиши микрофона с клавиатурой на стр. 48](#).

## Индикаторы состояния

В данной главе описываются индикаторы состояния и тональные сигналы, используемые в радиостанции.

## Значки

Жидкокристаллический дисплей (ЖК-дисплей) радиостанции отображает состояние радиостанции, текстовые записи и пункты меню.

### Таблица 2: Значки дисплея

Следующие значки появляются в строке состояния в верхней части дисплея радиостанции. Значки отображаются слева направо в порядке появления или использования и относятся к конкретным каналам.

	<p><b>Bluetooth подключен</b> Функция Bluetooth активирована. Значок горит, когда удаленное Bluetooth-устройство подсоединено.</p>
	<p><b>Bluetooth не подключен</b> Функция Bluetooth активирована, но удаленное Bluetooth-устройство не подсоединено.</p>

*Продолжение таблицы...*

	<p><b>Чрезвычайные</b> Радиостанция работает в режиме экстренной связи.</p>
	<p><b>Функция GNSS доступна</b> Функция GNSS активирована. Значок горит, если доступно определение местоположения.</p>
	<p><b>Функция GNSS недоступна</b> Функция GNSS активирована, но прием данных со спутника не выполняется.</p>
	<p><b>Большой объем данных</b> Радиостанция выполняет прием большого объема данных, и канал занят.</p>
	<p><b>Доступно отслеживание в помещении<sup>1</sup></b> Функция отслеживания в помещении активирована и доступна.</p>

*Продолжение таблицы...*

<sup>1</sup> Доступно только в моделях с программным и аппаратным обеспечением последней версии.

	<p><b>Функция отслеживания в помещении недоступна<sup>1</sup></b>          Функция отслеживания в помещении активирована, но недоступна, поскольку функция Bluetooth отключена или сканирование радиомаяков приостановлено функцией Bluetooth.</p>
	<p><b>Беззвучный режим</b>          Режим без звука включен и звук динамика выключен.</p>
	<p><b>Уведомление</b>          В списке уведомлений есть одно или несколько пропущенных событий.</p>
	<p><b>Функциональная плата</b>          Функциональная плата активирована. (Только для моделей с функциональной платой)</p>

Продолжение таблицы...

	<p><b>Функциональная плата отключена</b>          Функциональная плата деактивирована.</p>
	<p><b>Таймер задержки беспроводного программирования</b>          Показывает время, оставшееся до автоматического перезапуска радиостанции.</p>
	<p><b>Приоритет 1</b>          Индикация разговорной группы 1-го приоритета.</p>
	<p><b>Приоритет 2</b>          Индикация разговорной группы 2-го приоритета.</p>
	<p><b>Индикатор уровня принимаемого сигнала (RSSI)</b>          Количество отображаемых штрихов обозначает уровень мощности радиосигнала. Четыре штриха указывают на максимальный уровень мощности</p>

Продолжение таблицы...

	сигнала. Этот значок отображается только во время приема.
	<b>Запрет ответа</b> Запрет ответа включен.
	<b>Только звук</b> Активирован звуковой режим.
	<b>Защищенная связь</b> Функция конфиденциальности активирована.
	<b>Без звука</b> Активирован беззвучный режим.
	<b>Роуминг сайтов</b> Функция роуминга сайтов активирована.
	<b>Состояние</b> Индикация нового сообщения состояния.

Продолжение таблицы...

	<b>Отключение тональных сигналов</b> Тональные сигналы выключены.
	<b>Незащищенная связь</b> Функция конфиденциальности деактивирована.
	<b>Отличный сигнал Wi-Fi<sup>2</sup></b> Сигнал Wi-Fi отличный.
	<b>Хороший сигнал Wi-Fi<sup>2</sup></b> Сигнал Wi-Fi хороший.
	<b>Средний сигнал Wi-Fi<sup>2</sup></b> Сигнал Wi-Fi средний.
	<b>Слабый сигнал Wi-Fi<sup>2</sup></b> Сигнал Wi-Fi слабый.
	<b>Сигнал Wi-Fi недоступен<sup>2</sup></b> Сигнал Wi-Fi недоступен.

<sup>2</sup> Применимо только для DM4601e.

**Таблица 3: Дополнительные значки меню**

Нижеследующие значки отображаются рядом с пунктами меню, позволяя выбирать из двух вариантов или указывая на наличие подменю с двумя вариантами.

	<b>Кнопка-флажок (отмечена флажком)</b>
Указывает на то, что опция выбрана.	
	<b>Кнопка-флажок (пустая, без флажка)</b>
Указывает на то, что опция не выбрана.	
	<b>Черная экранная кнопка</b>
Означает, что выбрана опция пункта меню с имеющимся в нем подменю.	

**Таблица 4: Значки Bluetooth-устройств**

Нижеследующие значки появляются рядом с пунктами списка доступных устройств, имеющих функцию Bluetooth, и обозначают тип устройства.

	<b>Аудиоустройство Bluetooth</b> Аудиоустройство Bluetooth, например гарнитура.
	<b>Bluetooth-устройство обмена данными</b> Bluetooth-устройство обмена данными, например сканер.
	<b>Bluetooth-устройство с PTT</b> Bluetooth-устройство с PTT, например устройство только с поддержкой PPT (POD).

**Таблица 5: Значки вызова**

Во время вызова на дисплее отображаются следующие значки. Эти значки также отображаются в списке контактов, обозначая тип идентификатора или псевдоним.

	<b>Вызов на ПК по Bluetooth</b> Выполняется вызов на ПК по Bluetooth.
---	--

*Продолжение таблицы...*

	<p>В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) вызова на ПК по Bluetooth.</p>
	<p><b>Вызов диспетчера</b> Вызов диспетчера используется для отправки текстового сообщения на компьютер диспетчера через сторонний сервер текстовых сообщений.</p>
	<p><b>Групповой/общий вызов</b> Выполняется групповой или общий вызов.  В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) группы.</p>
	<p><b>Частный вызов</b> Выполняется частный вызов.  В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) абонента.</p>

Продолжение таблицы...

	<p><b>Телефонный вызов в режиме группового/общего вызова</b> Выполняется телефонный вызов в режиме группового или общего вызова.  В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) группы.</p>
	<p><b>Телефонный вызов в режиме частного вызова</b> Выполняется телефонный вызов в режиме частного вызова.  В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) телефона.</p>

**Таблица 6: Значки заданий**

В папке задания сразу отобразятся следующие значки.

	<p><b>Все задания</b> Обозначает все задания в списке.</p>
---	--

Продолжение таблицы...

	<b>Новые задания</b> Обозначает новые задания.
	<b>Выполняется...</b> Выполняется передача задания. Отображается перед индикацией состояния об успешной или неуспешной отправке задания.
	<b>Сбой отправки</b> Задания не могут быть отправлены.
	<b>Отправлено успешно</b> Задания были успешно отправлены.
	<b>Приоритет 1</b> Указывает на 1-й уровень приоритета для заданий.
	<b>Приоритет 2</b> Указывает на 2-й уровень приоритета для заданий.

Продолжение таблицы...

	<b>Приоритет 3</b> Указывает на 3-й уровень приоритета для заданий.
---	--

**Таблица 7: Значки мини-уведомлений**

Следующие значки могут на короткое время появляться на дисплее после выполнения определенных действий.

	<b>Передача не состоялась (отрицательное)</b> Действие не выполнено.
	<b>Успешная передача (положительное)</b> Действие выполнено успешно.
	<b>Идет передача (переходное)</b> Выполняется передача. Этот значок появляется перед индикацией "Успешная передача" или "Передача не состоялась".

**Таблица 8: Значки отправленных элементов**

В папке "Отправленные" в правом верхнем углу дисплея отображаются следующие значки.

	<p><b>Выполняется...</b></p> <p>Выполняется отправка текстового сообщения на псевдоним или идентификатор абонента. За этим следует ожидание подтверждения.</p> <p>Ожидается отправка текстового сообщения на псевдоним или идентификатор группы.</p>
	<p><b>Индивидуальное или групповое сообщение прочитано</b></p> <p>Текстовое сообщение прочитано.</p>
	<p><b>Индивидуальное или групповое сообщение не прочитано</b></p> <p>Текстовое сообщение не прочитано.</p>

*Продолжение таблицы...*

	<p><b>Сбой отправки</b></p> <p>Не удалось отправить текстовое сообщение.</p>
	<p><b>Отправлено успешно</b></p> <p>Текстовое сообщение успешно отправлено.</p>

## Светодиодный индикатор

Светодиодный индикатор отображает рабочее состояние радиостанции.

### Мигает красным

Радиостанция не прошла автотестирование при включении питания.

Радиостанция принимает или отправляет передачу в экстренном режиме.

Радиостанция передает сигнал при низком уровне заряда аккумулятора.

Радиостанция перемещена за пределы допустимого диапазона при настройке системы автоматического оповещения.

Режим без звука включен.

### **Постоянно горит зеленым**

Радиостанция включается.

Радиостанция передает сигнал.

Радиостанция отправляет оповещение о вызове или выполняет экстренную передачу.

### **Мигает зеленым**

Радиостанция принимает вызов или данные.

Радиостанция получает передачу беспроводного программирования.

Радиостанция выполняет поиск активности в эфире.

### **УВЕДОМЛЕНИЕ:**

В силу особенностей цифрового протокола эта активность может влиять или не влиять на использование запрограммированного канала радиостанции.

### **Дважды мигает зеленым**

Радиостанция принимает зашифрованный вызов или данные.

### **Постоянно горит желтым**

Радиостанция находится в режиме обнаружения Bluetooth.

### **Мигает желтым**

Радиостанция еще не отреагировала на оповещение о вызове.

### **Дважды мигает желтым**

В радиостанции активирована функция автоматического роуминга.

Радиостанция выполняет активный поиск нового сайта.

Радиостанция еще не отреагировала на оповещение о групповом вызове.

Радиостанция заблокирована.

## **Сигналы**

Ниже приведены тональные сигналы, которые звучат в динамике радиостанции.

Звуковой сигнал высокой тональности

Звуковой сигнал низкой тональности

## Звуковые сигналы

Звуковые сигналы выступают в роли звуковых индикаторов, указывая на состояние радиостанции или ее реакцию на полученные данные.

### Непрерывный тональный сигнал

Однообразный звук. Звучит до тех пор, пока не будет отключен.

### Периодический тональный сигнал

Включается с периодичностью, определяемой настройками радиостанции. Сигнал звучит, прекращается, затем повторяется.

### Повторяющийся тональный сигнал

Одиночный тональный сигнал, который повторяется до тех пор, пока не будет отключен пользователем.

### Кратковременный тональный сигнал

Звучит один раз в течение периода времени, определяемого настройками радиостанции.

## Индикаторные тональные сигналы

Индикаторные тональные сигналы обеспечивают звуковую индикацию состояния радиостанции после выполнения какого-либо действия.

Тональный сигнал успешного действия

Тональный сигнал неуспешного действия

## Регистрация

Пользователь может получать различные сообщения, имеющие отношение к регистрации.

### Регистрация

Отправка запроса на регистрацию в системе обычно выполняется во время включения, изменения разговорной группы или роуминга сайтов. Если происходит сбой при регистрации радиостанции на сайте, радиостанция автоматически предпринимает попытку роуминга на другой сайт. Радиостанция временно удаляет сайт, если запрос на регистрацию был отправлен из списка роуминга.

Индикатор указывает на то, что радиостанция занята и выполняет поиск сайта для роуминга, или на то, что радиостанция нашла сайт, но ожидает ответ на отправляемые сообщения о регистрации.

При появлении на дисплее радиостанции сообщения **Регистр-я** звучит тональный сигнал и светодиодный индикатор мигает двойными вспышками желтого цвета, указывая на то, что радиостанция выполняет поиск сайта.

Если индикация сохраняется, пользователь должен изменить местоположение или выполнить роуминг на другой сайт в ручном режиме при наличии такой возможности.

## Вне диапазона

Радиостанция находится вне диапазона, если ей не удастся обнаружить сигнал системы или текущего сайта. Как правило, этот индикатор указывает на то, что радиостанция находится за пределами географической зоны радиопокрытия исходящих соединений.

При появлении на дисплее радиостанции сообщения **Вне зоны приема** звучит повторяющийся тональный сигнал и светодиодный индикатор мигает красным цветом.

Обратитесь к дилеру или системному администратору, если на радиостанции, находящейся в зоне хорошего радиопокрытия, активирована индикация "вне диапазона".

## Сбой присоединения к разговорной группе

Радиостанция предпринимает попытку присоединиться к разговорной группе, указанной для каналов или для положения унифицированной ручки (УКР) во время регистрации.

Находясь в состоянии сбоя присоединения, радиостанция не может совершать или принимать вызовы от разговорной группы, к которой она пытается присоединиться.

Если радиостанции не удастся присоединиться к разговорной группе, на главном экране появляется выделенное сообщение **Псевдоним УКР**.

Обратитесь к дилеру или системному администратору, если на радиостанции отображается индикация сбоя присоединения.

## Регистрация отклонена

Индикаторы отклонения регистрации срабатывают, если запрос на регистрацию в системе не был принят.

Радиостанция не информирует пользователя о конкретной причине отклонения регистрации. Обычно радиостанция получает отказ в регистрации, если оператор системы заблокировал доступ радиостанции к системе.

При отклонении регистрации на дисплее радиостанции появляется сообщение **Регистр. откл.** и светодиодный индикатор мигает двойными вспышками желтого цвета.

## Выбор зон и каналов

В данной главе описываются принципы выбора зон и каналов на радиостанции.

Радиостанцию можно запрограммировать для работы в 250 зонах **Saracity Max**, каждая из которых может включать до 160 каналов. Для каждой зоны **Saracity Max** можно назначить до 16 позиций.

### Выбор зон

Для выбора нужной зоны выполните следующие действия.

- 1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **выбора зоны**. Перейдите к [шаг 3](#).
- Нажмите  для доступа к меню.

- 
- 2 Нажмите  или  для выбора элемента Зона. Нажмите  для выбора.  
На дисплее появится значок  и текущая зона.

- 
- 3 Нажмите  или  для выбора нужной зоны. Нажмите  для выбора.  
На дисплее появится сообщение **Выбрана <зона>**, после чего радиостанция вернется к экрану выбранной зоны.

### Выбор зоны с помощью поиска псевдонима

Для выбора зоны с помощью поиска псевдонима выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента зона. Нажмите  для выбора.

На дисплее появится значок  и текущая зона.

---

3 Наберите первый символ нужного псевдонима.  
На дисплее появится мигающий курсор.

---

4 Наберите остальные символы нужного псевдонима.  
Поиск псевдонима выполняется без учета регистра. При наличии двух или более пунктов с одним названием на дисплее радиостанции отобразится тот, который стоит первым в списке.  
В первой строке на дисплее отобразятся введенные вами символы. В следующих строках появится краткий перечень результатов поиска.

---

5 Нажмите  для выбора.

На дисплее появится сообщение Выбрано <зона>, после чего радиостанция вернется к экрану выбранной зоны.

---

## Выбор типа вызова

Ручка выбора каналов используется, чтобы выбрать тип вызова. В зависимости от программных настроек радиостанции это может быть групповой вызов, широкопередаточный вызов, общий вызов или частный вызов. При установке ручки выбора каналов в другое положение (которому назначен определенный тип вызова) радиостанция повторно регистрируется в системе Capacity Max. Для регистрации радиостанции будет использован идентификатор разговорной группы, который запрограммирован для нового положения ручки выбора каналов типа вызова.

Поскольку радиостанция не может работать на незапрограммированном канале, установите ручку

выбора каналов в положение запрограммированного канала.

После отображения требуемой зоны (если на радиостанции настроено несколько зон) поверните запрограммированную ручку выбора каналов, чтобы выбрать тип вызова.

---

## Выбор сайта

Сайт обеспечивает покрытие определенной области радиосвязью. В многосайтовой сети радиостанция Saracity Max автоматически выполняет поиск нового сайта, когда мощность сигнала текущего сайта падает до неприемлемого уровня.

Система Saracity Max может поддерживать до 250 сайтов.

## Запрос на роуминг

Запрос на роуминг сообщает радиостанции о необходимости поиска другого сайта, даже если уровень сигнала от текущего сайта приемлемый.

Если доступных сайтов не найдено:

- Радиостанция отображает сообщение Поиск, и продолжает поиск по списку сайтов.
- Радиостанция вернется на предыдущий сайт, если он все еще доступен.

### УВЕДОМЛЕНИЕ:

Эта функция программируется дилером.

Нажмите запрограммированную кнопку **роуминга сайтов в ручном режиме**.

Прозвучит тональный сигнал, оповещающий о том, что радиостанция переключилась на новый сайт. На дисплее отобразится сообщение ИД сайта <номер сайта>.

---

## Включение/выключение блокировки сайта

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда функция

выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

Нажмите запрограммированную кнопку **блокировки сайта**.

Если функция **блокировки сайта** включена:

- Прозвучит тональный сигнал успешного действия, оповещающий о том, что радиостанция зафиксирована на текущем сайте.
- На дисплее появится сообщение Сайт зафикс.

Если функция **блокировки сайта** выключена:

- Прозвучит тональный сигнал неуспешного действия, оповещающий о том, что радиостанция расфиксирована.
- На дисплее появится сообщение Сайт расфикс.

## Ограничение сайта

В системе Saracity Max администратор радиостанции может решать, какие сетевые сайты может использовать ваша радиостанция.

Для изменения списка разрешенных и запрещенных сайтов радиостанцию не требуется перепрограммировать. При попытке радиостанции зарегистрироваться на неразрешенном сайте радиостанция получает оповещение об отказе в доступе к сайту. После этого радиостанция продолжит поиск другого сетевого сайта.

При наличии ограничений сайта на дисплее радиостанции отобразится сообщение Регистр. откл., и светодиодный индикатор будет мигать двойными вспышками желтого цвета, указывая на то, что радиостанция выполняет поиск сайта.

## Транкинг сайта

Если сайт может связываться с транкинговым контроллером, то это указывает на то, что сайт может работать в режиме транкинга системы.

Если сайту не удастся установить связь с транкинговым контроллером в системе, радиостанция

переходит в режим транкинга сайта. В режиме транкинга сайта радиостанция периодически инициирует звуковую и визуальную индикацию в целях информирования пользователя об ограничении доступа к определенным функциям.

Когда радиостанция работает в режиме транкинга сайта, на дисплее отображается сообщение **Транк. сайта** и звучит повторяющийся тональный сигнал.

В режиме транкинга сайта радиостанции по-прежнему могут совершать групповые или индивидуальные голосовые вызовы, а также отправлять текстовые сообщения на другие радиостанции в пределах одного и того же сайта. Консоли для передачи голосовых данных, средства записи журнала, телефонные шлюзы и приложения для работы с данными не могут связываться с радиостанциями на сайте.

После перехода в режим транкинга сайта радиостанция, задействованная в вызовах между несколькими сайтами, может устанавливать связь только с другими радиостанциями в пределах одного и того же сайта. Связь с другими сайтами будет потеряна.

## **УВЕДОМЛЕНИЕ:**

Если радиостанции находятся в зоне покрытия нескольких сайтов и один из сайтов переходит в режим транкинга сайта, радиостанции осуществляют роуминг на другой сайт в пределах зоны покрытия.

## **Вызовы**

В данной главе приводится описание действий для приема, ответа, выполнения и завершения вызовов.

После выбора канала можно выбрать псевдоним или идентификатор абонента или группы с помощью одного из следующих способов.

### **Поиск псевдонима**

Этот способ используется для выполнения групповых, частных и общих вызовов только при помощи микрофона с клавиатурой.

### **Список контактов**

Этот способ дает прямой доступ к списку контактов.

### **Ручной набор (через список контактов)**

Этот способ используется для выполнения частных и телефонных вызовов только при помощи микрофона с клавиатурой.

### Запрограммированные цифровые клавиши

Этот способ используется для выполнения групповых, частных и общих вызовов только при помощи микрофона с клавиатурой.

#### УВЕДОМЛЕНИЕ:

Каждой цифровой клавише можно назначить только один псевдоним или идентификатор, но псевдониму или идентификатору можно назначить несколько цифровых клавиш. Псевдоним или идентификатор можно назначить любой цифровой клавише микрофона с клавиатурой. Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

### Запрограммированная кнопка доступа одним нажатием

Этот способ используется только для выполнения групповых, частных и телефонных вызовов.

Кнопке **доступа одним нажатием** можно назначить только один идентификатор, а также запрограммировать для нее короткое или длительное нажатие. Радиостанция поддерживает программирование нескольких кнопок **доступа одним нажатием**.

### Программируемая кнопка

Этот способ используется только для выполнения телефонных вызовов.

### Ручка выбора каналов/регулировки громкости

Этот способ используется для выбора псевдонима или идентификатора абонента, а также псевдонима или идентификатора группы вручную.

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет передачу, и мигает зеленым цветом, когда радиостанция ведет прием.

**УВЕДОМЛЕНИЕ:**

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет передачу, и мигает двойными вспышками зеленого цвета, когда радиостанция принимает зашифрованный вызов.

Для дескремблирования зашифрованного вызова секретный ключ радиостанции или значение ключа и идентификатор ключа (которые программируются дилером) должны совпадать с соответствующими параметрами передающей радиостанции (радиостанции, от которой вы принимаете вызов).

Более подробную информацию см. в разделе [Конфиденциальность на стр. 536](#).

## Груп. выз.

Для получения или выполнения группового вызова радиостанция должна быть сконфигурирована как участник этой группы.

## Выполнение групповых вызовов

Для выполнения вызова группы пользователей необходимо, чтобы радиостанция была сконфигурирована как участник этой группы. Для выполнения группового вызова на радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Выберите канал с активным псевдонимом или идентификатором группы. См. [Выбор типа вызова на стр. 73](#).
  - Нажмите запрограммированную кнопку **доступа одним нажатием**.

---
- 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. В первой строке на дисплее отобразится значок **группового вызова** и псевдоним.

---
- 3 Выполните одно из следующих действий.
  - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

#### 4 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор. На дисплее отобразится значок **группового вызова**, псевдоним или идентификатор группы, а также псевдоним или идентификатор передающей радиостанции.

#### 5 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

Инициатор вызова может нажать  , чтобы завершить групповой вызов.

## Выполнение группового вызова с помощью списка контактов

Для выполнения группового вызова на радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.
- 4 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. В первой строке отобразится псевдоним или идентификатор абонента. Во второй строке

отобразится элемент **Груп. выз.** и значок **группового вызова**.

---

**5** Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
  - Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.
- 

**6** Для прослушивания отпустите кнопку **РТТ**.

При ответе любого пользователя из группы светодиодный индикатор начнет мигать зеленым цветом. На дисплее отобразится значок **группового вызова**, псевдоним или идентификатор группы, а также псевдоним или идентификатор передающей радиостанции.

---

**7** Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и

можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

Инициатор вызова может нажать , чтобы завершить групповой вызов.

Прозвучит короткий тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

---

## Выполнение группового вызова с помощью программируемой цифровой клавиши

Для выполнения группового вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

- 1** Находясь на главном экране, длительным нажатием запрограммированной цифровой клавиши выберите предварительно заданный псевдоним или идентификатор.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

---

2 Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор.

---

3 Для прослушивания отпустите кнопку **РТТ**.

При ответе любого пользователя из группы светодиодный индикатор начнет мигать зеленым цветом.

---

4 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. На дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

Инициатор вызова может нажать  , чтобы завершить групповой вызов.

---

Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

## Выполнение группового вызова с помощью поиска псевдонима

Для доступа к псевдониму требуемого абонента можно использовать буквенно-цифровой поиск или поиск псевдонима. Этой функцией можно воспользоваться, только находясь в списке контактов. Для выполнения любых вызовов с помощью поиска псевдонима выполните следующие действия.

1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.  
На дисплее отобразятся пункты в алфавитном порядке.
- 
- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора абонента. В первой строке на дисплее появится сообщение **Номер тел.:**. Во второй строке появится мигающий курсор. С помощью клавиатуры введите номер телефона.
- 
- 4 Нажмите  для выбора. Если выбрана пустая запись, прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение **Недейств. т. номер**.
- 
- 5 Нажмите  или  для выбора элемента вызова телефона и нажмите  для выбора.. Если код доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение **Код доступа:**. Во второй

- строке появится мигающий курсор. Введите код доступа и нажмите кнопку , чтобы продолжить. В случае успешного выполнения прозвучит тональный сигнал DTMF. Прозвучит тональный сигнал набора телефонного номера пользователя. В первой строке на дисплее появится псевдоним или идентификатор абонента и значок **RSSI**. Во второй строке на дисплее появится сообщение **Тел. вызов** и значок телефонного вызова. В случае сбоя прозвучит тональный сигнал, и на дисплее появится сообщение **Тел. вызов отказ**. На дисплее радиостанции отобразится окно ввода кода доступа. Если код доступа был предварительно задан в списке контактов, на дисплее появится окно, которое отображалось до выполнения вызова.
- 
- 6 Нажмите кнопку **PTT** для разговора и отпустите ее для прослушивания. Значок **RSSI** исчезает во время передачи.
- 
- 7 Чтобы ввести дополнительные цифры, необходимые для выполнения телефонного вызова, выполните одно из следующих действий.

- Введите дополнительные цифры с помощью клавиатуры. В первой строке на дисплее появится сообщение **Доп. знаки:**. Во второй строке появится мигающий курсор. Введите дополнительные цифры и нажмите кнопку  , чтобы продолжить. Прозвучит тональный сигнал DTMF, и радиостанция вернется к предыдущему экрану.
- Нажмите кнопку **доступа одним нажатием**. Прозвучит тональный сигнал DTMF. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

## 8 Чтобы закончить разговор, нажмите клавишу

 . Если код отмены доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение **Код отм. дост.:**. Во второй строке появится мигающий курсор. Введите код отмены доступа и нажмите  , чтобы продолжить. Радиостанция вернется к предыдущему экрану. Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение **Заканч. тел. выз.** В случае

успешного выполнения прозвучит тональный сигнал, и на дисплее появится сообщение **"Тел. выз законч"**. радиостанция вернется к экрану телефонного вызова. В случае сбоя радиостанция вернется к экрану телефонного вызова. После нажатия кнопки **РТТ** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение **Нажать ОК для вызова**. После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение **Тел. выз законч**. В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

- 9 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

Инициатор вызова может нажать  , чтобы завершить групповой вызов.

---

#### УВЕДОМЛЕНИЕ:

Во время осуществления доступа к каналу

нажмите  , чтобы отменить вызов (после чего прозвучит тональный сигнал) или чтобы прекратить поиск псевдонима. Нажмите кнопку

 или  , чтобы прекратить поиск псевдонима. При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод дополнительных цифр, радиостанция попытается завершить вызов. Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки включения/выключения, регулятора громкости и селектора каналов. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

## Ответ на групповой вызов

Для ответа на групповой вызов выполните следующие действия.

При поступлении группового вызова:

[Отправить отзыв](#)

- Зеленый светодиодный индикатор начнет мигать.
- В правом верхнем углу дисплея появится значок **группового вызова**.
- В первой строке на дисплее появится псевдоним вызывающего абонента.
- Во второй строке появится псевдоним группового вызова.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

#### 1 Выполните одно из следующих действий.

- Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.
- Если включена функция прерывания голосовой передачи, нажмите кнопку **РТТ**, чтобы прервать аудиосигнал с передающей

радиостанции и освободить канал для того, чтобы вы могли ответить.

Загорится зеленый светодиодный индикатор.

---

#### 2 Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

---

#### 3 Для прослушивания отпустите кнопку **РТТ**.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

## Широковещательный вызов

Широковещательный вызов — это односторонний голосовой вызов, инициируемый любым пользователем для установки соединения со всей разговорной группой.

Функция широковещательного вызова позволяет осуществлять передачу в разговорной группе только пользователю, инициирующему вызов, при этом возможность ответа на вызов у получателей отсутствует.

Инициатор широковещательного вызова также может завершать вызов. Чтобы выполнить прием вызова от группы пользователей или вызов группы пользователей, необходимо настроить радиостанцию в качестве участника этой группы.

## Выполнение широковещательных вызовов

Для выполнения широковещательных вызовов на радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Выберите канал с активным псевдонимом или идентификатором группы. См. [Выбор типа вызова на стр. 73](#).
  - Нажмите запрограммированную кнопку **доступа одним нажатием**.

- 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова** и псевдоним.

- 3 Выполните одно из следующих действий.
  - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
  - Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

Инициатор вызова может нажать  , чтобы завершить широковещательный вызов.

## Выполнение широковещательного вызова с помощью списка контактов

Для выполнения широковещательного вызова на радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 4 Нажмите кнопку **РТТ** для выполнения вызова.  
Зеленый светодиодный индикатор начнет мигать. В первой строке отобразится псевдоним или идентификатор абонента. Во второй строке отобразится элемент **Груп. выз.** и значок **группового вызова**.

---

- 5 Выполните одно из следующих действий.
  - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

Инициатор вызова может нажать , чтобы завершить широковещательный вызов.

## Выполнение широковещательного вызова с помощью программируемой цифровой клавиши

Для выполнения широковещательного вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

- 1 Находясь на главном экране, длительным нажатием запрограммированной цифровой клавиши выберите предварительно заданный псевдоним или идентификатор.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

---

**2** Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор. В правом верхнем углу дисплея появится значок **группового вызова**. В первой строке на дисплее появится псевдоним вызывающего абонента.

---

**3** Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

Инициатор вызова может нажать , чтобы завершить широковещательный вызов.

---

## Прием широковещательных вызовов

Для приема широковещательных вызовов на радиостанции выполните следующие действия.

При поступлении широковещательного вызова:

- Зеленый светодиодный индикатор начнет мигать.
- В правом верхнем углу дисплея появится значок **группового вызова**.
- В первой строке на дисплее появится псевдоним вызывающего абонента.
- Во второй строке появится псевдоним группового вызова.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

**УВЕДОМЛЕНИЕ:**

Получатели не могут отвечать во время широковещательного вызова. На дисплее появится сообщение **Ответ запрещен**. При нажатии кнопки **PTT** во время выполнения широковещательного вызова прозвучит кратковременный тональный сигнал запрета ответа.

при этом пользователь может принять или отклонить вызов.

Настройка этого типа вызова осуществляется системным администратором.

**УВЕДОМЛЕНИЕ:**

Инициатор вызова и получатель могут прервать текущий частный вызов нажатием .

## Частный вызов

Частный вызов — это вызов одной радиостанции другой радиостанцией.

Существует два типа осуществления частного вызова.

- Первый тип вызова называется вызовом с установкой соединения без выхода в эфир (Off Air Call Set-Up, OACSU). Вызовы OACSU выполняются после проверки доступности радиостанции, и установка завершается автоматически.
- Второй тип называется вызовом с полной установкой соединения без выхода в эфир (Full Off Air Call Set-Up, FOACSU). Вызовы FOACSU также выполняются после проверки доступности радиостанции. Однако вызовы FOACSU требуют от пользователя подтверждения совершения вызова,

## Выполнение индивидуального вызова

Для выполнения частного вызова радиостанция должна быть запрограммирована соответствующим образом. Если эта функция неактивна, то при иницировании вызова вы услышите тональный сигнал неуспешного действия. Для выполнения частного вызова на радиостанции выполните следующие действия. Если целевая радиостанция недоступна, прозвучит короткий тональный сигнал и на дисплее отобразится сообщение **Получатель не доступен**.

- 1 Выполните одно из следующих действий.

- Выберите канал с активным псевдонимом или идентификатором абонента. См. [Выбор типа вызова на стр. 73](#).
- Нажмите запрограммированную кнопку **доступа одним нажатием**.

---

## 2 Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор. На дисплее появится значок **частного вызова** псевдоним абонента и состояние вызова.

---

## 3 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

## 4 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор.

---

## 5 Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит короткий тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

Инициатор вызова и получатель могут прервать текущий частный вызов нажатием .

---

## Выполнение частного вызова с помощью программируемой цифровой клавиши

Для выполнения частного вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

- 1 Находясь на главном экране, длительным нажатием запрограммированной цифровой клавиши выберите предварительно заданный псевдоним или идентификатор.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

- 2 Нажмите кнопку **РТТ** для выполнения вызова.  
Загорится зеленый светодиодный индикатор. В правом верхнем углу дисплея появится значок **частного вызова**. В первой строке на дисплее появится псевдоним вызывающего абонента. Во второй строке отобразится состояние вызова.

- 3 Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом. На дисплее отобразится псевдоним получателя.

- 4 Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит короткий тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

Инициатор и получатель вызова могут прервать текущий частный вызов нажатием .

Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

[Отправить отзыв](#)

## Выполнение частного вызова с помощью поиска псевдонима

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.  
На дисплее отобразятся пункты в алфавитном порядке.
- 
- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора абонента. В первой строке на дисплее появится сообщение **Номер тел. :**. Во второй строке появится мигающий курсор. С помощью клавиатуры введите номер телефона.
- 
- 4 Нажмите  для выбора. Если выбрана пустая запись, прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение **Недейств. т. номер**.

- 5 Нажмите  или  для выбора элемента "Вызов тел." и нажмите  для выбора.. Если код доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение Код доступа:. Во второй строке появится мигающий курсор. Введите код доступа и нажмите кнопку , чтобы продолжить. В случае успешного выполнения прозвучит тональный сигнал DTMF. Прозвучит тональный сигнал набора телефонного номера пользователя. В первой строке на дисплее появится псевдоним или идентификатор абонента и значок **RSSI**. Во второй строке на дисплее появится сообщение Тел. вызов и значок **телефонного вызова**. В случае сбоя прозвучит тональный сигнал, и на дисплее появится сообщение Тел. вызов отказ. На дисплее радиостанции отобразится окно ввода кода доступа. Если код доступа был предварительно задан в списке контактов, на дисплее появится окно, которое отображалось до выполнения вызова.

- 6 Нажмите кнопку **PTT** для разговора и отпустите ее для прослушивания. Значок **RSSI** исчезает во время передачи.

- 7 Чтобы ввести дополнительные цифры, необходимые для выполнения телефонного вызова, выполните одно из следующих действий.

- Введите дополнительные цифры с помощью клавиатуры. В первой строке на дисплее появится сообщение Доп. знаки:. Во второй строке появится мигающий курсор. Введите дополнительные цифры и нажмите кнопку , чтобы продолжить. Прозвучит тональный сигнал DTMF, и радиостанция вернется к предыдущему экрану.
- Нажмите кнопку **доступа одним нажатием**. Прозвучит тональный сигнал DTMF. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

- 8 Чтобы закончить разговор, нажмите клавишу . Если код отмены доступа не был предварительно задан в списке контактов, в

первой строке на дисплее появится сообщение Код отм. дост. : . Во второй строке появится мигающий курсор. Введите код отмены доступа и нажмите  , чтобы продолжить. Радиостанция вернется к предыдущему экрану. Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение Законч. тел. выз. В случае успешного выполнения прозвучит тональный сигнал, и на дисплее появится сообщение Тел. выз законч. радиостанция вернется к экрану телефонного вызова. В случае сбоя радиостанция вернется к экрану телефонного вызова. После нажатия кнопки **РТТ** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение Нажать ОК для вызова. После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение Тел. выз законч. В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

- 9 Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит короткий тональный сигнал. На дисплее отобразится сообщение Выз. законч.

Инициатор и получатель вызова могут прервать текущий частный вызов нажатием  .

#### УВЕДОМЛЕНИЕ:

Во время осуществления доступа к каналу

нажмите  , чтобы отменить вызов (после чего прозвучит тональный сигнал) или чтобы прекратить поиск псевдонима. Нажмите кнопку

 или  , чтобы прекратить поиск псевдонима. При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод дополнительных цифр, радиостанция попытается завершить вызов.

## Выполнение частного вызова с помощью кнопки вызова одним нажатием

Функция вызова одним нажатием позволяет быстро совершать частные вызовы на предварительно заданный псевдоним или идентификатор частного вызова. Для включения этой функции можно назначить короткое нажатие программируемой кнопки или нажатие с удержанием.

Кнопке вызова одним нажатием можно назначить только один псевдоним или идентификатор.

Радиостанция поддерживает программирование нескольких кнопок вызова одним нажатием.

- 1 Нажмите запрограммированную кнопку **вызова одним нажатием**, чтобы выполнить частный вызов на предварительно заданный псевдоним или идентификатор.
- 2 Нажмите кнопку **РТТ** для выполнения вызова. Светодиодный индикатор загорится постоянным зеленым цветом.

На дисплее отобразится псевдоним или идентификатор частного вызова.

- 
- 3 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

- 
- 4 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

Инициатор вызова и получатель могут прервать текущий частный вызов нажатием .

---

## Выполнение частного вызова с помощью ручного набора

Для выполнения на радиостанции частного вызова с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента **Номер р/ст.** Нажмите  для выбора.

---

- 5 Выполните одно из следующих действий.
  - Введите идентификатор абонента и нажмите  , чтобы продолжить.
  - Отредактируйте ранее набранный идентификатор абонента и нажмите  , чтобы продолжить.

---

- 6 Нажмите кнопку **РТТ** для выполнения вызова.  
Загорится зеленый светодиодный индикатор. На дисплее отобразится псевдоним получателя.

---

- 7 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

- 8 Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор. На дисплее отобразится псевдоним или идентификатор передающего абонента.

---

- 9 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.  
Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов

будет завершен.Прозвучит тональный сигнал.На дисплее отобразится сообщение **Выз. законч.**

Инициатор и получатель вызова могут прервать текущий частный вызов нажатием  .

## Прием частных вызовов

Во время приема частных вызовов, настроенных как OACSU:

- Зеленый светодиодный индикатор начнет мигать.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

### УВЕДОМЛЕНИЕ:

В зависимости от настроек радиостанции (OACSU или FOACSU) при ответе на частный вызов от пользователя может потребоваться подтверждение получения вызова.

При использовании конфигурации OACSU радиостанция активирует звуковые сигналы и автоматически устанавливает соединение для приема вызова.

## Принятие частных вызовов

Во время приема частных вызовов, настроенных как FOACSU:

- Зеленый светодиодный индикатор начнет мигать.

- 1 Чтобы принять частный вызов, настроенный как FOACSU, выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Принять**, затем нажмите  , чтобы ответить на частный вызов.

- Выберите любую запись и нажмите **РТТ**.  
Загорится зеленый светодиодный индикатор.

**2** Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

**3** Для прослушивания отпустите кнопку **РТТ**.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

#### **УВЕДОМЛЕНИЕ:**

Инициатор и получатель вызова могут прервать текущий частный вызов

нажатием .

## **Отклонение частных вызовов**

Во время приема частных вызовов, настроенных как FOACSU:

- Зеленый светодиодный индикатор начнет мигать.

Чтобы отклонить частный вызов, настроенный как FOACSU, выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Отклонить**, затем нажмите , чтобы отклонить частный вызов.
- Нажмите , чтобы отклонить частный вызов.

## **Общие вызовы**

Общий вызов — это вызов с одной радиостанции на все радиостанции на выбранном сайте или все радиостанции группы сайтов в зависимости от конфигурации системы.

Общий вызов используется для передачи важных объявлений, требующих особого внимания пользователей. Пользователи системы не могут ответить на общий вызов.

Saracity Max поддерживает общий вызов сайта и многосайтовый общий вызов. Системный администратор может настроить на радиостанции один или оба типа вызовов.

**УВЕДОМЛЕНИЕ:**

Абонентские терминалы могут поддерживать общие вызовы по всей системе, но инфраструктура Motorola Solutions не поддерживает такой тип общих вызовов по всей системе.

## Выполнение общего вызова

Для выполнения общего вызова радиостанция должна быть запрограммирована соответствующим образом. Для выполнения общего вызова на радиостанции выполните следующие действия.

- 1 Выберите канал с активным псевдонимом или идентификатором группы общего вызова. См. [Выбор типа вызова на стр. 73](#).
- 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова** и

сообщение **Общий вызов**, **Общий вызов сайта** или **Многос. выз.** в зависимости от типа конфигурации.

### 3 Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

Пользователи канала не могут ответить на общий вызов.

Инициатор вызова может нажать , чтобы завершить общий вызов.

## Выполнение общего вызова с помощью программируемой цифровой клавиши

Для выполнения общего вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

- 1 Находясь на главном экране, выполните длительное нажатие запрограммированной цифровой клавиши, назначенной предварительно заданному псевдониму или идентификатору.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

- 2 Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова** и сообщение **Общий вызов**, **Общий вызов сайта** или **Многос. выз.** в зависимости от типа конфигурации.

- 3 Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

Инициатор вызова может нажать , чтобы завершить общий вызов.

Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

## Выполнение общего вызова с помощью поиска псевдонима

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

На дисплее отобразятся пункты в алфавитном порядке.

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора абонента. В первой строке на дисплее появится сообщение **Номер тел. :**. Во второй строке появится мигающий курсор. С помощью клавиатуры введите номер телефона.
- 
- 4 Нажмите  для выбора. Если выбрана пустая запись, прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение **Недейств. т. номер.**
- 
- 5 Нажмите  или  для выбора элемента "Вызов тел.". Нажмите  для выбора. Если код доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение **Код доступа :**. Во второй строке появится мигающий курсор. Введите код доступа и нажмите кнопку , чтобы продолжить. В случае успешного выполнения прозвучит тональный сигнал DTMF. Прозвучит тональный сигнал набора телефонного номера пользователя. В первой строке на дисплее появится псевдоним или идентификатор абонента и значок RSSI. Во второй строке на дисплее появится сообщение **Тел. вызов** и значок телефонного вызова. В случае сбоя прозвучит тональный сигнал, и на дисплее появится сообщение **Тел. вызов отказ.** На дисплее радиостанции отобразится окно ввода кода доступа. Если код доступа был предварительно задан в списке контактов, на дисплее появится окно, которое отображалось до выполнения вызова.
- 
- 6 Нажмите кнопку **PTT** для разговора и отпустите ее для прослушивания. Значок RSSI исчезает во время передачи.
- 
- 7 Чтобы ввести дополнительные цифры, необходимые для выполнения телефонного вызова, выполните одно из следующих действий.
- Введите дополнительные цифры с помощью клавиатуры. В первой строке на дисплее появится сообщение **Доп. знаки :**. Во второй строке появится мигающий курсор. Введите дополнительные цифры и нажмите кнопку , чтобы продолжить. Прозвучит

тональный сигнал DTMF, и радиостанция вернется к предыдущему экрану.

- Нажмите кнопку **доступа одним нажатием**. Прозвучит тональный сигнал DTMF. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

## 8 Чтобы закончить разговор, нажмите клавишу

. Если код отмены доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение Код отм. дост. :. Во второй строке появится мигающий курсор. Введите код отмены доступа и

нажмите , чтобы продолжить. Радиостанция вернется к предыдущему экрану. Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение Законч. тел. выз. В случае успешного выполнения прозвучит тональный сигнал, и на дисплее появится сообщение "Тел. выз законч". радиостанция вернется к экрану телефонного вызова. В случае сбоя радиостанция вернется к экрану телефонного вызова. После нажатия кнопки **РТТ** во время отображения экрана контактов телефона

[Отправить отзыв](#)

прозвучит тональный сигнал, и на дисплее появится сообщение Нажать ОК для вызова. После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение Тел. выз законч. В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

### УВЕДОМЛЕНИЕ:

Инициатор вызова может нажать , чтобы завершить общий вызов.

## Прием общего вызова

При приеме общего вызова происходит следующее:

- Прозвучит тональный сигнал.
- Зеленый светодиодный индикатор начнет мигать.
- В правом верхнем углу дисплея появится значок **группового вызова**.
- В первой строке на дисплее появится идентификатор псевдонима вызывающего абонента.

- Во второй строке на дисплее появится сообщение **Общий вызов, Общий вызов сайта или Многос. выз.** в зависимости от типа конфигурации.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

По окончании общего вызова радиостанция вернется к экрану, который отображался до принятия вызова.

Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и доступен для использования. Ответ на общий вызов не предусмотрен.

### **УВЕДОМЛЕНИЕ:**

Радиостанция прекратит прием общего вызова, если при поступлении вызова пользователь переключится на другой канал. Во время общего вызова вы не можете пользоваться навигацией по меню или выполнять операции редактирования.

## Телефонные вызовы

Телефонный вызов — это вызов телефона с радиостанции.

В режиме **Caracity Max** радиостанция может принимать вызовы и обеспечивает двухстороннюю связь, даже если функция телефонного вызова выключена.

Для включения функции телефонного вызова необходимо назначить и настроить номера телефонов в системе. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к системному администратору.

## Выполнение телефонного вызова

Для выполнения телефонного вызова на радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **доступа одним нажатием**, чтобы выполнить вызов предварительно заданного псевдонима или идентификатора.

Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

Если код доступа не задан предварительно в списке контактов, на дисплее появится сообщение Код доступа:

- 2 Введите код доступа и нажмите  , чтобы продолжить.  
Код доступа или отмены доступа не может содержать более 10 символов.
- 3 Нажмите кнопку **PTT** для ответа на вызов.
- 4 Для прослушивания отпустите кнопку **PTT**.
- 5 При необходимости введите дополнительные цифры с помощью клавиатуры и нажмите  , чтобы продолжить.  
В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.  
Прозвучит тональный сигнал DTMF.  
Радиостанция вернется к предыдущему экрану.

[Отправить отзыв](#)

- 6 Чтобы закончить разговор, нажмите клавишу

- 7 Выполните одно из следующих действий.

- Если код отмены доступа не был предварительно задан, введите его, когда на дисплее появится сообщение Код отм. дост. :, затем нажмите  для продолжения. Радиостанция вернется к предыдущему экрану.
- Нажмите запрограммированную кнопку **доступа одним нажатием**. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение *Заканч. тел. выз.*.

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение *Выз. законч.*

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите два последних шага, описанные выше, или подождите, пока пользователь телефона завершит вызов.

## Выполнение телефонного вызова с помощью списка контактов

Для выполнения телефонного вызова на радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.  
На дисплее отобразятся пункты в алфавитном порядке.

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

После нажатия кнопки **РТТ** во время отображения экрана контактов телефона:

- В первой строке на дисплее появится сообщение **Номер тел.:**.
- Во второй строке появится мигающий курсор.

Если выбран пустой пункт списка:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится сообщение **Недейств. т. номер.**

- 4 Нажмите  или  для выбора элемента **Вызов тел.**. Нажмите  для выбора.  
Если код доступа не был предварительно задан, на дисплее появится сообщение **Код доступа:**.

- 5 Введите код доступа и нажмите  , чтобы продолжить.

Код доступа или отмены доступа не может содержать более 10 символов.

В первой строке на дисплее отобразится сообщение *Идет вызов*. Во второй строке на дисплее появится псевдоним или идентификатор абонента и значок **телефонного вызова**.

Если вызов выполнен успешно:

- Прозвучит тональный сигнал DTMF.
- Прозвучит тональный сигнал набора телефонного номера пользователя.
- В первой строке на дисплее появится псевдоним или идентификатор абонента и значок **RSSI**.
- Во второй строке на дисплее появится сообщение *Тел. вызов* и значок **телефонного вызова**.

Если вызов не будет выполнен успешно:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение *Тел. вызов отказ.*, а затем сообщение *Код доступа:*.

[Отправить отзыв](#)

- Если код доступа был предварительно задан в списке контактов, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

- 
- 6 Нажмите кнопку **PTT** для ответа на вызов. Значок **RSSI** исчезнет.

- 
- 7 Для прослушивания отпустите кнопку **PTT**.

- 
- 8 При необходимости введите дополнительные цифры с помощью клавиатуры и нажмите  , чтобы продолжить.

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

Прозвучит тональный сигнал DTMF. Радиостанция вернется к предыдущему экрану.

9 Чтобы закончить разговор, нажмите клавишу

10 Если код отмены доступа не был предварительно задан, введите его, когда на дисплее появится сообщение Код отм. дост. :, затем нажмите

для продолжения.

Радиостанция вернется к предыдущему экрану. Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение Заканч. тел. выз..

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение Выз. законч.

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите шаг 9 и шаг 10 или подождите, пока пользователь телефона завершит вызов. После нажатия кнопки РТТ во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение Нажать ОК для вызова.

После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение Тел. выз законч.

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

**УВЕДОМЛЕНИЕ:**

Во время осуществления доступа к каналу

нажмите , чтобы отменить вызов, после чего прозвучит тональный сигнал.

При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод дополнительных цифр, радиостанция попытается завершить вызов.

Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки **Вкл./Выкл., регулятора громкости и ручки выбора каналов**. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

## Выполнение телефонного вызова с помощью поиска псевдонима

Для доступа к псевдониму требуемого абонента можно использовать буквенно-цифровой поиск или поиск псевдонима. Этой функцией можно воспользоваться, только находясь в списке контактов. Для выполнения

телефонного вызова на радиостанции с помощью поиска псевдонима выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.  
На дисплее отобразятся пункты в алфавитном порядке.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора абонента. В первой строке на дисплее появится сообщение **Номер тел. :**. Во второй строке появится мигающий курсор. С помощью клавиатуры введите номер телефона.

---

- 4 Нажмите  для выбора. Если выбрана пустая запись, прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение **Недейств. т. номер**.

---

- 5 Нажмите  или  для выбора элемента вызова телефона и нажмите  для выбора.. Если код доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение Код доступа:. Во второй строке появится мигающий курсор. Введите код доступа и нажмите кнопку , чтобы продолжить. В случае успешного выполнения прозвучит тональный сигнал DTMF. Прозвучит тональный сигнал набора телефонного номера пользователя. В первой строке на дисплее появится псевдоним или идентификатор абонента и значок **RSSI**. Во второй строке на дисплее появится сообщение Тел. вызов и значок **телефонного вызова**. В случае сбоя прозвучит тональный сигнал, и на дисплее появится сообщение Тел. вызов отказ. На дисплее радиостанции отобразится окно ввода кода доступа. Если код доступа был предварительно задан в списке контактов, на дисплее появится окно, которое отображалось до выполнения вызова.
- 
- 6 Нажмите кнопку **PTT** для разговора и отпустите ее для прослушивания. Значок **RSSI** исчезает во время передачи.
- 
- 7 Чтобы ввести дополнительные цифры, необходимые для выполнения телефонного вызова, выполните одно из следующих действий.
- Введите дополнительные цифры с помощью клавиатуры. В первой строке на дисплее появится сообщение Доп. знаки:. Во второй строке появится мигающий курсор. Введите дополнительные цифры и нажмите кнопку , чтобы продолжить. Прозвучит тональный сигнал DTMF, и радиостанция вернется к предыдущему экрану.
  - Нажмите кнопку **доступа одним нажатием**. Прозвучит тональный сигнал DTMF. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.
- 
- 8 Чтобы закончить разговор, нажмите клавишу . Если код отмены доступа не был предварительно задан в списке контактов, в

первой строке на дисплее появится сообщение Код отм. дост. : . Во второй строке появится мигающий курсор. Введите код отмены доступа и нажмите  , чтобы продолжить. Радиостанция вернется к предыдущему экрану. Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение Законч. тел. выз. В случае успешного выполнения прозвучит тональный сигнал, и на дисплее появится сообщение "Тел. выз законч". радиостанция вернется к экрану телефонного вызова. В случае сбоя радиостанция вернется к экрану телефонного вызова. После нажатия кнопки **PTT** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение Нажать ОК для вызова. После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение Тел. выз законч. В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

#### УВЕДОМЛЕНИЕ:

Во время осуществления доступа к каналу

нажмите  , чтобы отменить вызов (после чего прозвучит тональный сигнал) или чтобы прекратить поиск псевдонима. Нажмите кнопку

 или  , чтобы прекратить поиск псевдонима. При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод дополнительных цифр, радиостанция попытается завершить вызов. Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки включения/выключения, регулятора громкости и селектора каналов. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

## Выполнение телефонного вызова с помощью ручного набора

Для выполнения телефонного вызова на радиостанции с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.
- 4 Нажмите  или  для выбора элемента **Номер тел.**. Нажмите  для выбора.  
На дисплее появится сообщение **Номер:** и мигающий курсор.

- 5 Введите номер телефона и нажмите , чтобы продолжить.

Если код доступа не был предварительно задан, на дисплее появится сообщение **Код доступа:** и мигающий курсор.

- 6 Введите код доступа и нажмите , чтобы продолжить. Код доступа или отмены доступа не может содержать более 10 символов.

Загорится зеленый светодиодный индикатор. В правом верхнем углу дисплея появится значок **телефонного вызова**. В первой строке на дисплее появится псевдоним абонента. Во второй строке отобразится состояние вызова. Если вызов выполнен успешно:

- Звуковые сигналы двухтонального многочастотного сигнала.
- Прозвучит тональный сигнал набора телефонного номера пользователя.
- В первой строке на дисплее появится псевдоним абонента.

- В правом верхнем углу дисплея сохранится значок **телефонного вызова**.

Если вызов не будет выполнен успешно:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение `Тел. вызов отказ.`, а затем сообщение `Код доступа.`
- Если код доступа был предварительно задан в списке контактов, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

---

## 7 Чтобы закончить разговор, нажмите клавишу

---

## 8 Выполните одно из следующих действий.

- Если код отмены доступа не был предварительно задан, введите его, когда на дисплее появится сообщение `Код`

`отм. дост.`, затем нажмите  для продолжения. Радиостанция вернется к предыдущему экрану.

- Нажмите запрограммированную кнопку **доступа одним нажатием**. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение `Заканч. тел. выз.`

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение `Выз. законч.`

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите [шаг 7](#) или подождите, пока пользователь телефона завершит вызов.

**УВЕДОМЛЕНИЕ:**

После нажатия кнопки **РТТ** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение

Нажать **OK** для вызова.

После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение

Выз. законч..

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

Во время осуществления доступа к каналу

нажмите  , чтобы отменить вызов, после чего прозвучит тональный сигнал.

При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод

дополнительных цифр, радиостанция попытается завершить вызов.

Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки **Вкл./Выкл., регулятора громкости и ручки выбора каналов**. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

---

## Двухтональный многочастотный сигнал

Двухтональный многочастотный сигнал (DTMF) позволяет радиостанции работать в системе радиосвязи, имеющей выход в телефонную сеть.

Тональный сигнал DTMF можно отключить путем деактивирования всех тональных сигналов и оповещений радиостанции. Более подробную информацию см. в разделе [Активация и деактивация тональных сигналов/оповещений радиостанции на стр. 233](#).

## Инициирование вызовов DTMF

Для инициирования вызова DTMF на радиостанции выполните следующие действия.

- 1 Нажмите и удерживайте кнопку **РТТ**.

---

  - 2 Выполните одно из следующих действий.
    - Введите требуемый номер для инициирования вызова DTMF.
    - Для инициирования вызова DTMF нажмите  .
    - Для инициирования вызова DTMF нажмите  .
- 

## Ответ на телефонный вызов в режиме группового вызова

Для ответа на телефонный вызов в режиме группового вызова выполните следующие действия.

При приеме телефонного вызова в режиме группового вызова:

- В правом верхнем углу дисплея появится значок **телефонного вызова**.
- На дисплее появится сообщение **Телефонный вызов**.
- Зеленый светодиодный индикатор начнет мигать.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

1 Нажмите кнопку **РТТ** для ответа на вызов.

---

2 Для прослушивания отпустите кнопку **РТТ**.

---

3 Нажмите  , чтобы завершить вызов.

На дисплее появится сообщение **Заканч. тел. выз.**

**УВЕДОМЛЕНИЕ:**

Если на радиостанции не включена функция телефонного вызова, радиостанция не может прервать телефонный вызов как групповой вызов. Пользователь телефона должен завершить вызов самостоятельно. Получатель может только отвечать во время вызова.

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение **Выз. законч.**

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите **шаг 3** или подождите, пока пользователь телефона завершит вызов.

## Ответ на телефонный вызов в режиме общего вызова

При приеме телефонного вызова в режиме общего вызова, принимающая радиостанция не сможет

установить двухстороннюю связь или ответить на вызов. Кроме того, получатель не сможет завершить общий вызов.

При приеме телефонного вызова в режиме общего вызова:

- В правом верхнем углу дисплея появится значок **телефонного вызова**.
- На дисплее появится сообщение **Общий вызов**, **Общий вызов сайта** или **Многос. выз. (в зависимости от типа конфигурации)** и **Тел. вызов**.
- Зеленый светодиодный индикатор начнет мигать.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

## Ответ на телефонный вызов в режиме частного вызова

Для ответа на телефонный вызов в режиме частного вызова выполните следующие действия.

При приеме телефонного вызова в режиме частного вызова:

- В правом верхнем углу дисплея появится значок **телефонного вызова**.
- На дисплее появится сообщение **Телефонный вызов**.
- Зеленый светодиодный индикатор начнет мигать.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

**1** Нажмите кнопку **РТТ** для ответа на вызов.

---

**2** Для прослушивания отпустите кнопку **РТТ**.

---

**3** Чтобы закончить разговор, нажмите клавишу

На дисплее появится сообщение **Заканч. тел. выз.**

#### **УВЕДОМЛЕНИЕ:**

Если на радиостанции не включена функция телефонного вызова, радиостанция не может прервать телефонный вызов как частный вызов. Пользователь телефона должен завершить вызов самостоятельно. Получатель может только отвечать во время вызова.

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение **Выз. законч.**

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите **шаг 3** или подождите, пока пользователь телефона завершит вызов.

---

## **Приоритетное прерывание вызова**

Функция приоритетного прерывания вызова позволяет радиостанции остановить текущую голосовую передачу и инициировать приоритетную передачу.

С помощью функции приоритетного прерывания вызова система прерывает текущие вызовы в тех случаях, когда транкинговые каналы недоступны.

Вызовы с более высоким приоритетом, например экстренные вызовы или общие вызовы, прерывают текущую передачу, выполняемую радиостанцией, для переключения на вызов с более высоким приоритетом. При отсутствии доступных радиоканалов экстренный вызов также прерывает общий вызов.

## Прерывание голосовой передачи

Функция прерывания голосовой передачи позволяет пользователю останавливать любую текущую голосовую передачу.

Эта функция использует передачу сигнала по обратным каналам для остановки текущей голосовой передачи, если на прерывающей радиостанции настроена функция прерывания голосовой передачи, а передающая радиостанция поддерживает прерывание голосовых вызовов. Прерывающая радиостанция может осуществлять голосовую передачу в адрес участника прекращенного вызова.

Функция прерывания голосовой передачи значительно повышает вероятность выполнения успешной передачи выбранным участникам во время текущего вызова.

Функция прерывания голосовой передачи доступна пользователям, только если она была настроена на радиостанции. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение прерывания голосовой передачи

Для включения функции прерывания голосовой передачи выполните следующие действия.

Чтобы использовать эту функцию, радиостанция должна быть запрограммирована соответствующим образом. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

- 1 Для прерывания передачи во время текущего вызова нажмите кнопку **PTT**.

На дисплее радиостанции, выполняющей прерванный вызов, отобразится сообщение **Вызов прерван**. Тональный сигнал неуспешного

действия будет звучать, пока пользователь не отпустит кнопку **РТТ**.

---

## 2 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- 

## 3 Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
  - Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.
- 

# Дополнительные функции

В данной главе описываются функции, доступные на радиостанции.

[Отправить отзыв](#)

Ваш дилер или системный администратор могли внести изменения в настройки вашей радиостанции, исходя из конкретных задач. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Постановка вызова в очередь

При отсутствии доступных ресурсов для обработки вызова функция постановки вызова в очередь позволяет поместить запрос на вызов в очередь ожидания доступного ресурса.

После нажатия кнопки **РТТ** прозвучит тональный сигнал постановки вызова в очередь, оповещающий о том, что радиостанция перешла в состояние постановки вызова в очередь. Кнопку **РТТ** можно отпустить после того, как прозвучит тональный сигнал постановки вызова в очередь.

Если соединение установлено успешно, произойдет следующее:

- Зеленый светодиодный индикатор начнет мигать.
- Прозвучит тональный сигнал разрешения разговора, если он включен.

- На дисплее появится значок типа вызова, идентификатор или псевдоним.
- У пользователя радиостанции будет не более 4 секунд для нажатия кнопки **PTT**, чтобы начать голосовую передачу.

Если соединение не установлено, произойдет следующее:

- Прозвучит тональный сигнал отклонения вызова.
- На дисплее на короткое время появится экран с оповещением о сбое.
- Вызов будет прерван и радиостанция выйдет из режима установки соединения.

## Сканирование разговорных групп

Эта функция позволяет радиостанции отслеживать и присоединяться к групповым вызовам, определенным в списке групп приема.

При активации сканирования в строке состояния появляется значок сканирования, а светодиодный индикатор мигает желтым цветом. Звук радиостанции включается для каждого участника из списка группы приема.

Если сканирование отключено, радиостанция не принимает передачи ни от одного участника списка группы приема, кроме общих вызовов и передач выбранной разговорной группы.

### УВЕДОМЛЕНИЕ:

Сканирование разговорных групп можно настроить с помощью CPS. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к системному администратору.

## Включение и выключение функции сканирования разговорной группы

Для включения или выключения функции сканирования разговорной группы выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сканир... Нажмите  для выбора.

---

- 3 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.** Нажмите  для выбора.
- Нажмите  или  для выбора элемента **Выкл.** Нажмите  для выбора.

Если сканирование включено:

- На дисплее появится сообщение **Скан. вкл.** и значок **сканирования**.
- Светодиодный индикатор начнет мигать желтым цветом.
- Прозвучит тональный сигнал успешного действия.

Если сканирование выключено:

- На дисплее появится сообщение **Скан. выкл.**
- Значок **сканирования** исчезнет.
- Светодиодный индикатор выключится.
- Прозвучит тональный сигнал неуспешного действия.

## Список групп приема

Функция списка групп приема позволяет создавать и назначать участников в списке сканирования разговорной группы.

Список можно создать при программировании радиостанции; в него добавляют группы, которые разрешено сканировать. Радиостанция поддерживает не более 16 участников в списке.

Если радиостанция запрограммирована на редактирование списка сканирования, можно выполнять следующее.

- Добавлять/удалять разговорные группы.
- Добавлять, удалять и/или изменять приоритет для разговорных групп. См. [Изменение приоритета разговорной группы на стр. 121](#).
- Добавлять, удалять и/или изменять регистрацию с разговорной группой. См. [Добавление присоединения разговорной группы на стр. 122](#) и [Удаление регистрации с разговорной группой на стр. 123](#).
- Заменять существующий список сканирования новым списком сканирования.

**ВАЖНО!**

Чтобы добавить участника в список, разговорная группа должна быть настроена на радиостанции.

**УВЕДОМЛЕНИЕ:**

Список групп приема программируется системным администратором. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Мониторинг приоритетов

Функция мониторинга приоритетов позволяет радиостанции автоматически принимать передачу от разговорных групп с более высоким приоритетом даже во время обработки другого вызова разговорной группы.

Радиостанция покидает вызов разговорной группы с более низким приоритетом и переключается на вызов разговорной группы с более высоким приоритетом.

**УВЕДОМЛЕНИЕ:**

Доступ к этой функции возможен, только если включена функция сканирования разговорных групп.

Функция мониторинга приоритетов применяется только к участникам из списка группы приема. Существует две

приоритетные разговорные группы: "Приоритет 1" (P1) и "Приоритет 2" (P2). Значение P1 соответствует более высокому приоритету, чем P2. В системе Caracity Max радиостанция принимает передачу в приведенном ниже порядке приоритета:

- 1 Экстренный вызов для разговорной группы P1
- 2 Экстренный вызов для разговорной группы P2
- 3 Экстренный вызов для разговорных групп без приоритета в списке группы приема
- 4 Общий вызов
- 5 Вызов разговорной группы P1
- 6 Вызов разговорной группы P2
- 7 Разговорные группы без приоритета в списке группы приема

Дополнительную информацию по добавлению, удалению или изменению приоритета разговорных групп в списке сканирования см. [Изменение приоритета разговорной группы на стр. 121](#).

**УВЕДОМЛЕНИЕ:**

Эта функция программируется системным администратором. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Изменение приоритета разговорной группы

В меню сканирования разговорных групп можно просматривать и изменять приоритет разговорной группы.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сканир.. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента См.ред. спис. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора требуемой разговорной группы. Нажмите  для выбора.  
Текущий приоритет отображается значком **Приоритет 1** или **Приоритет 2** рядом с разговорной группой.

---

- 5 Нажмите  или  для выбора элемента Ред. приоритет. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора нужного уровня приоритета. Нажмите  для выбора.  
Если приоритет 1 или приоритет 2 был назначен другой разговорной группе, можно перезаписать текущий приоритет. Если на экране отображается Вместо существ.?, нажмите  или  для выбора одной из следующих опций:
  - Нет, чтобы вернуться к предыдущему шагу.
  - Да, чтобы перезаписать.
 На дисплее появится мини-уведомление об успешном выполнении действия, после чего откроется предыдущий экран. Рядом с разговорной группой появляется значок приоритета.

---

## Регистрация с несколькими разговорными группами

В системе Saracity Max радиостанцию можно настроить на семь разговорных групп в рамках одного сайта.

Семь из 16 разговорных групп из списка группы приема можно назначить в качестве регистрируемых разговорных групп. Выбранная разговорная группа и приоритетные разговорные группы регистрируются автоматически.

### УВЕДОМЛЕНИЕ:

Эта функция программируется системным администратором. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Добавление присоединения разговорной группы

Чтобы добавить регистрацию присоединенной разговорной группы, выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Смред. спис. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного псевдонима или идентификатора разговорной группы. Нажмите  для выбора. Состояние присоединения отображается в списке Смред. спис. Рядом с выбранным псевдонимом или идентификатором разговорной группы появится значок .

- 5 Нажмите  или  для выбора элемента Ред. присоед. Нажмите  для выбора.

- 6 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора.
- Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора.

Если выбран вариант **Вкл.**, значок  начинает отображаться рядом с идентификатором или псевдонимом разговорной группы.

Если регистрация присоединения выполнена успешно, рядом с выбранным псевдонимом или идентификатором разговорной группы появится значок .

Если регистрация присоединения выполнена неуспешно, рядом с идентификатором или псевдонимом разговорной группы отображается значок .

#### УВЕДОМЛЕНИЕ:

Радиостанция отображает сообщение **Список полон**, если для присоединения в списке сканирования уже выбрано семь разговорных групп, что является максимальным допустимым количеством. Чтобы выбрать новую разговорную группу для регистрации присоединения, удалите имеющуюся присоединенную группы и освободите место для добавления новой. Более подробную информацию см. в разделе [Удаление регистрации с разговорной группой на стр. 123](#).

## Удаление регистрации с разговорной группой

Если список регистрации присоединений полон и необходимо выбрать новую разговорную группу для регистрации, можно удалить имеющиеся присоединенные разговорные группы и освободить место для добавления новой. Чтобы удалить регистрацию присоединенной разговорной группы, выполните следующие действия.

1

Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента См<sup>ред.</sup> спис. Нажмите  для выбора.

---

4 Нажмите  или  для выбора нужного псевдонима или идентификатора разговорной группы. Нажмите  для выбора.

Состояние присоединения отображается в списке См<sup>ред.</sup> спис. Рядом с выбранным псевдонимом или идентификатором разговорной группы появится значок .

---

5 Нажмите  или  для выбора элемента Ред. присоед. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента Выкл. Нажмите  для выбора.

Если выбран вариант Выкл., значок  перестает отображаться рядом с идентификатором или псевдонимом разговорной группы.

---

## Ответ

Функция ответа позволяет отвечать на передачу во время сканирования.

Если радиостанция сканирует вызов из списка сканирования выбранной группы, и если во время сканируемого вызова нажата кнопка **РТТ**, работа радиостанции будет зависеть от того, была ли функция ответа включена или отключена во время программирования радиостанции. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

### Ответ отключен

Радиостанция оставляет сканируемый вызов и пытается осуществить передачу контакту канала, выбранному в данный момент времени. После того как истечет пауза вызова контакта, выбранного в

данный момент, радиостанция вернется на домашний канал и заново запустит таймер паузы сканирования. Радиостанция возобновит групповое сканирование после истечения таймера паузы сканирования.

#### Ответ включен

Если кнопка **РТТ** нажата во время паузы сканируемого группового вызова, радиостанция попытается осуществить передачу сканируемой группе.

#### УВЕДОМЛЕНИЕ:

Если при сканировании вызова группы, для которой не назначен канал в текущей выбранной зоне, вызов завершается, то для ответа этой группе необходимо переключиться на соответствующую зону и выбрать канал группы.

## Bluetooth

Эта функция позволяет использовать Bluetooth-устройство (аксессуар), соединив его посредством Bluetooth-подключения с радиостанцией. Радиостанция совместима как с Bluetooth-устройствами Motorola Solutions, так и со стандартными устройствами, имеющимися в массовой продаже.

Дальность связи Bluetooth составляет 10 м (32 фута) при прямой видимости. Линия связи между радиостанцией и Bluetooth-устройством не должна быть ничем заслонена. Для обеспечения высокой надежности Motorola Solutions рекомендует не разносить радиостанцию и аксессуар на большое расстояние.

В приграничных зонах приема сигнала голосовые и тональные сигналы становятся искаженными и ломаными. Чтобы улучшить качество звука, нужно восстановить радиосвязь, приблизив Bluetooth-устройство к радиостанции (в пределах установленной 10-метровой зоны приема). В радиусе 10 м максимальная мощность функции Bluetooth, поддерживаемая радиостанцией, составляет 2,5 мВт (4 дБм).

Радиостанция может поддерживать до трех одновременных Bluetooth-подключений к Bluetooth-устройствам разных типов. Например, это может быть гарнитура, сканер и устройство только с поддержкой PPT (POD). Несколько соединений с однотипными Bluetooth-устройствами установить нельзя.

Дополнительную информацию о функциональности Bluetooth-устройства можно найти в руководстве пользователя соответствующего Bluetooth-устройства.

**УВЕДОМЛЕНИЕ:**

При отключении через CPS все функции Bluetooth будут отключены, а также будет удалена база данных Bluetooth-устройств.

## Включение и выключение функции Bluetooth

Чтобы включить Bluetooth, выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Мой статус. Нажмите  для выбора.  
На дисплее появятся элементы Вкл. и Выкл.  
Текущий статус отмечен значком .

---

- 4 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Вкл.. Нажмите  для выбора. На дисплее появится значок  рядом с элементом Вкл..
- Нажмите  или  для выбора элемента Выкл.. Нажмите  для выбора. На дисплее появится значок  рядом с элементом Выкл..

## Подключение к Bluetooth-устройству

Для подключения Bluetooth-устройств выполните следующие действия.

Включите Bluetooth-устройство и переведите его в режим сопряжения.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.

4 Выполните одно из следующих действий.

- Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.
- Нажмите  или  для выбора элемента *Найти уст-ва*, чтобы обнаружить доступные устройства. Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Соединить. Нажмите  для выбора.

Для выполнения сопряжения с Bluetooth-устройством могут потребоваться дополнительные действия. Обратитесь к

руководству пользователя соответствующего Bluetooth-устройства.

На дисплее появится сообщение *Соединение с <название устройства>*.

Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится сообщение *<Название устройства> соединено* и значок **Bluetooth-соединения**.
- На дисплее рядом с подключенным устройством появится значок .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится сообщение *Соединение не удалось*.

#### УВЕДОМЛЕНИЕ:

Если требуется ввести PIN-код, см. [Доступ к радиостанции с использованием пароля на стр. 219](#).

## Подключение к Bluetooth-устройству в режиме обнаружения

Для подключения Bluetooth-устройств выполните следующие действия в режиме обнаружения.

Включите Bluetooth-устройство и переведите его в режим сопряжения.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Найти меня. Нажмите  для выбора. Ваша радиостанция остается видимой для других Bluetooth-устройств в течение заданного периода времени. Это называется "режим обнаружения".

Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.

- На дисплее появится сообщение <Название устройства> соединено и значок **Bluetooth-соединения**.
- На дисплее рядом с подключенным устройством появится значок .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится сообщение Соединение не удалось.

## Отключение от Bluetooth-устройства

Для отключения Bluetooth-устройства выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.

4 Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Отсоединить. Нажмите  для выбора.

На дисплее появится сообщение Отсоединение от <название устройства>.

#### УВЕДОМЛЕНИЕ:

Для отсоединения Bluetooth-устройства могут потребоваться дополнительные действия. При необходимости обратитесь к руководству пользователя соответствующего Bluetooth-устройства.

Дождитесь подтверждения.

- Прозвучит тональный сигнал.

- На дисплее появится <Название устройства> отсоединено, и значок **Bluetooth-соединения** исчезнет.
- Значок  рядом с подключенным устройством исчезнет.

## Перенаправление звука на встроенный динамик радиостанции или Bluetooth-устройство

Для перенаправления звука на внутренний динамик радиостанции или на внешний Bluetooth-аксессуар выполните следующие действия.

Нажмите запрограммированную кнопку **переключателя аудио Bluetooth**.

На дисплее появится один из следующих вариантов.

- Прозвучит тональный сигнал. На дисплее появится сообщение **Аудио на радиост.**
- Прозвучит тональный сигнал. На дисплее появится сообщение **Аудио на Bluetooth.**

## Просмотр информации об устройстве

Для просмотра информации об устройстве выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.
- 4 Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.
- 5 Нажмите  или  для выбора элемента Дет. данные. Нажмите  для выбора.

## Удаление имени устройства

Вы можете удалить отключенное устройство из списка Bluetooth-устройств.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.
- 4 Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.
- 5 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора. На дисплее появится сообщение Устройство удалено.

## Усиление микрофона Bluetooth

Данная функция позволяет управлять значением усиления микрофона для подключенного устройства с поддержкой Bluetooth.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Ус.мик ВТ. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора типа усиления микрофона ВТ и текущего значения. Нажмите  для выбора. Значения можно отредактировать здесь.

---

- 5 Нажмите  или , чтобы увеличить или уменьшить значения. Нажмите  для выбора.

## Отслеживание в помещении

### УВЕДОМЛЕНИЕ:

Функция отслеживания в помещении доступна только в моделях с программным и аппаратным обеспечением последней версии. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Функция отслеживания в помещении используется для отслеживания местоположения пользователей радиостанций. Если функция отслеживания в помещении активирована, радиостанция работает в ограниченном режиме обнаружения. Для поиска радиостанции и определения ее местоположения используются специальные радиомаяки.

## Включение и выключение функции отслеживания в помещении

Для включения или выключения функции отслеживания в помещении выполните одно из следующих действий.

- Доступ к этой функции можно получить в меню.
  - а. Нажмите  для доступа к меню.

b. Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

c. Нажмите  или  для выбора элемента Отсл. в помещ., затем нажмите  для выбора.

d. Нажмите , чтобы включить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в помещ. вкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного включения функции на главном экране появится значок "Отслеживание в помещении доступно".
- В случае сбоя на дисплее появится сообщение Сбой включения. Прозвучит тональный сигнал неуспешного действия

e. Нажмите , чтобы выключить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в помещ. выкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного выключения функции значок "Отслеживание в помещении доступно" на главном экране исчезнет.
- В случае сбоя на дисплее появится сообщение Сбой выключения. Прозвучит тональный сигнал неуспешного действия

• Для доступа к этой функции можно использовать программируемую кнопку.

a. Выполните длительное нажатие запрограммированной кнопки **отслеживания в помещении**, чтобы включить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в помещ. вкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного включения функции на главном экране появится значок "Отслеживание в помещении доступно".
  - В случае сбоя на дисплее появится сообщение **Сбой включения**. В случае сбоя прозвучит тональный сигнал неуспешного действия.
- b. Нажмите запрограммированную кнопку **отслеживания в помещении**, чтобы выключить функцию отслеживания в помещении.

На дисплее появится сообщение **Отсл. в пом. выкл.** Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного выключения функции значок "Отслеживание в помещении доступно" на главном экране исчезнет.
- В случае сбоя на дисплее появится сообщение **Сбой выключения**. В случае сбоя прозвучит тональный сигнал неуспешного действия.

## Доступ к информации о радиомаяках для отслеживания в помещении

Для доступа к информации радиомаяков для отслеживания в помещении следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Отсл. в помещ., затем нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Радиомаяки, затем нажмите  для выбора.

---

На дисплее отобразится информация о радиомаяках.

## Многосайтовые элементы управления

Эти функции применимы, если конфигурация текущего канала радиосвязи настроена на систему Caracity Max.

### Включение ручного поиска сайтов

При низком уровне принимаемого сигнала выполните следующие действия, чтобы включить ручной поиск сайтов для поиска сайта с более высоким уровнем сигнала.

Если радиостанция найдет новый сайт:

- Прозвучит тональный сигнал успешного действия.

Если радиостанции не удастся найти новый сайт:

- Прозвучит тональный сигнал неуспешного действия.

### Включение/выключение блокировки сайта

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда функция

выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

Нажмите запрограммированную кнопку **блокировки сайта**.

Если функция **блокировки сайта** включена:

- Прозвучит тональный сигнал успешного действия, оповещающий о том, что радиостанция зафиксирована на текущем сайте.
- На дисплее появится сообщение Сайт зафикс.

Если функция **блокировки сайта** выключена:

- Прозвучит тональный сигнал неуспешного действия, оповещающий о том, что радиостанция расфиксирована.
  - На дисплее появится сообщение Сайт расфикс.
-

## Доступ к списку соседних сайтов

Эта функция позволяет пользователю просматривать список соседних сайтов текущего домашнего сайта. Для получения доступа к списку соседних сайтов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Сосед. сайт. Нажмите  для выбора.

---

## Напоминание домашнего канала

Эта функция обеспечивает напоминание, если радиостанция не настроена на домашний канал в течение определенного периода времени.

Если эта функция включена и радиостанция не настроена на домашний канал в течение определенного периода времени, периодически выполняются следующие действия.

- Воспроизводится тональный сигнал напоминания домашнего канала и объявление.
- В первой строке на дисплее отобразится Не.
- Во второй строке отобразится дом. канал.

## Отключение звука напоминания домашнего канала

При звуковом сигнале напоминания домашнего канала можно временно отключить его звук.

Нажмите программируемую кнопку **выключения звука напоминания домашнего канала**.

В первой строке на дисплее будет отображаться HCR, а во второй строке — выключено.

## Установка новых домашних каналов

При появлении напоминания домашнего канала можно установить новый домашний канал.

- 1 Выполните одно из следующих действий.
  - Нажмите программируемую кнопку **сброса домашнего канала**, чтобы установить текущий канал в качестве нового домашнего канала. Пропустите следующие действия. В первой строке на дисплее будет отображаться Нов. дом. канал, а во второй строке — псевдоним канала.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент Дом. канал. Нажмите  для выбора.

- 5 Нажмите  или  для выбора нужного псевдонима домашнего канала. Нажмите  для выбора.  
Рядом с выбранным псевдонимом домашнего канала появится значок .

## Удаленный мониторинг

Данная функция позволяет включать микрофон прослушиваемой радиостанции с помощью псевдонима или идентификатора абонента. Эту функцию можно использовать для дистанционного слежения за звуковой активностью вокруг прослушиваемой радиостанции.

Чтобы использовать данную функцию, ваша радиостанция и прослушиваемая радиостанция должны быть запрограммированы соответствующим образом.

Если инициировано, светодиодный индикатор однократно мигнет зеленым на целевой радиостанции. Функция автоматически прекращает действовать по истечении запрограммированного периода времени, или когда пользователь совершит любую операцию с прослушиваемой радиостанцией.

## Инициализация удаленного мониторинга

Для инициализации удаленного мониторинга выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **удаленного мониторинга**.

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.
- В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой радиостанции, а на дисплее появится сообщение `Удал. монит.`. По истечении периода действия таймера прозвучит тональный сигнал оповещения, и светодиодный индикатор выключится.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Инициализация удаленного мониторинга с помощью списка контактов

Для инициализации удаленного мониторинга с помощью списка контактов выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента **Уд. монит.** Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.

5 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.
- В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой радиостанции, а на дисплее появится

сообщение **Удал. монит.**. По истечении периода действия таймера прозвучит тональный сигнал оповещения, и светодиодный индикатор выключится.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Инициализация удаленного мониторинга с помощью ручного набора

Для инициализации удаленного мониторинга с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Номер р/ст.** Нажмите  для выбора.

- 5 Выполните одно из следующих действий.
  - Введите псевдоним или идентификатор абонента и нажмите  , чтобы продолжить.
  - Отредактируйте набранный идентификатор и нажмите  , чтобы продолжить.

- 6 Нажмите  или  для выбора элемента **Уд. монит.** Нажмите  для выбора.  
На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение

запроса. Загорится зеленый светодиодный индикатор.

## 7 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.
- В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой радиостанции, а на дисплее появится сообщение `Удал. монит.`. По истечении периода действия таймера прозвучит тональный сигнал оповещения, и светодиодный индикатор выключится.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Настройки контактов

Список контактов — это адресная книга вашей радиостанции. Каждый пункт соответствует псевдониму или идентификатору, который используется для инициирования вызова. Пункты сортируются в алфавитном порядке.

Каждый пункт, в зависимости от контекста, привязан к определенному типу вызова: Групповой вызов, частный вызов, широковещательный вызов, общий вызов сайта, многосайтовый общий вызов, вызов на ПК, диспетчерский вызов.

Вызов на ПК и вызов диспетчера сопровождаются передачей данных. Они требуют использования соответствующих программных приложений. Для получения дополнительной информации см. документацию по приложениям для передачи данных.

Кроме того, меню контактов позволяет назначить каждую запись одной или несколькими программируемыми цифровыми клавишам на микрофоне с клавиатурой. Если пункт назначен цифровой клавише, то с радиостанции можно выполнить быстрый набор номера этого пункта.

**УВЕДОМЛЕНИЕ:**

Перед каждой цифровой клавишей, назначенной для пункта, стоит галочка. Если флажок стоит перед элементом Пусто, это означает, что записи не назначена ни одна цифровая клавиша.

В каждом пункте списка контактов отображается следующая информация.

- Тип вызова
- Псевдоним вызова
- ИД вызова

**УВЕДОМЛЕНИЕ:**

Если для канала активирована функция конфиденциальности, то на нем можно выполнять групповые, частные, общие вызовы и телефонные вызовы с шифрованием. Вызываемая радиостанция сможет дешифровать передачу, только если ее секретный ключ или значение ключа и идентификатор ключа совпадают с соответствующими параметрами вашей радиостанции.

## Назначение пункта программируемой цифровой клавише

Для назначения пункта программируемой цифровой клавише выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Прогр. кнопку. Нажмите  для выбора.

---

- 5 Выполните одно из следующих действий.

- Если выбранной цифровой клавише не назначен никакой пункт, нажмите  или  для выбора нужной цифровой клавиши.

Нажмите  для выбора.

- Если выбранной цифровой клавише уже назначен другой пункт, на дисплее появится сообщение *Клавиша уже использов.*, а затем в первой строке дисплея появится сообщение *Заменить?*. Выполните одно из следующих действий.

Нажмите  или  для выбора элемента *Да*. Нажмите  для выбора.

После этого прозвучит тональный сигнал успешного действия, а на дисплее появится *Контакт сохран* и мини-уведомление об успешном выполнении действия.

Чтобы вернуться к предыдущему шагу, нажмите  или  для выбора варианта *Нет*.

Каждую запись можно назначать различным цифровым клавишам. Перед каждой цифровой

клавишей, назначенной для записи, стоит значок . Если значок  стоит перед элементом *Пусто*, это означает, что цифровая клавиша не назначена.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

На экране автоматически отобразится предыдущее меню.

## Удаление назначения пункта программируемой цифровой клавише

Для удаления назначения пункта программируемой цифровой клавише выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Длинным нажатием запрограммированной цифровой клавиши выберите необходимый псевдоним или идентификатор. Перейдите к [шаг 4](#).

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Прогр. кнопку. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Пусто. Нажмите  для выбора.  
В первой строке на дисплее появится сообщение Очистить все ключи.

6 Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

[Отправить отзыв](#)

#### УВЕДОМЛЕНИЕ:

При удалении пункта связь между этим пунктом и соответствующими запрограммированными цифровыми клавишами отменяется.

Прозвучит тональный сигнал успешного действия. На дисплее появится сообщение Контакт сохр-н.

На экране автоматически отобразится предыдущее меню.

## Добавление нового контакта

Для добавления нового контакта выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Новый контакт**. Нажмите  для выбора.
- 
- 4 Нажмите  или  для выбора типа контакта: **Радио контакт** или **Тел. контакт**. Нажмите  для выбора.
- 
- 5 Введите номер контакта с помощью клавиатуры и нажмите  , чтобы продолжить.
- 
- 6 Введите имя контакта с помощью клавиатуры и нажмите  , чтобы продолжить.
- 
- 7 Нажмите  или  для выбора нужного типа звонка. Нажмите  для выбора. Прозвучит тональный сигнал успешного действия. На дисплее появится мини-уведомление об успешном выполнении действия.
- 

## Настройки сигналов вызова

Данная настройка позволяет пользователям радиостанции настраивать конфигурацию вызовов или звуковые сигналы текстовых сообщений.

## Активация и деактивация сигналов вызова для частных вызовов

Для активации или деактивации сигналов вызова для частных вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.
- 
- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.
-

4 Нажмите  или  для выбора элемента  
Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Сигналы выз.. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента  
Частн. вызов. Нажмите  для выбора.

---

7 Нажмите  или  для выбора нужного  
тонального сигнала. Нажмите  для выбора.  
Если функция активирована, рядом со статусом  
Активировано отобразится значок . Если  
функция деактивирована, значок  рядом со  
статусом Активировано исчезнет.

---

## Активация и деактивация сигналов вызова для текстовых сообщений

Для активации или деактивации сигналов вызова для  
текстовых сообщений выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Сигналы выз.. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора элемента Текст. сообщ. Нажмите  для выбора. На дисплее появится значок  и текущий тональный сигнал.

- 7 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора. На дисплее рядом с выбранным тональным сигналом появится значок .

## Активация и деактивация сигналов вызова для оповещения о вызове

Для активации или деактивации сигналов вызова для оповещения о вызове выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Тоны/опов. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента Сигналы выз.. Нажмите  для выбора.

- 6 Нажмите  или  для выбора элемента Опов. о выз. Нажмите  для выбора.

- 7 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора. На дисплее рядом с выбранным тональным сигналом появится значок .

## Активация и деактивация сигналов вызова для выборочных вызовов

Для активации или деактивации сигналов вызова для выборочных вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента **Тонные/опов.** Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента **Сигналы выз.** Нажмите  для выбора.

- 6 Нажмите  или  для выбора элемента **Выбор. вызов.** Нажмите  для выбора.  
На дисплее появится значок  и текущий тональный сигнал.

- 7 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора.  
На дисплее рядом с выбранным тональным сигналом появится значок .

## Активация и деактивация сигналов вызова для телеметрических статусных текстовых сообщений

Активация и деактивация сигналов вызова для телеметрических статусных текстовых сообщений выполните следующие действия.

- 1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента

Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента

Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента

Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента

Сигналы выз.. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента

Телеметрия. Нажмите  для выбора.

Текущий тональный сигнал отмечен значком .

---

## Назначение типа звонка

Радиостанцию можно запрограммировать на включение одного из десяти заранее заданных сигналов вызова при поступлении оповещения о вызове или текстового сообщения от определенного контакта. Сигналы вызова будут воспроизводиться при перемещении по списку. Для назначения типа звонка выполните следующее действие.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента

Контакты. Нажмите  для выбора.

Пункты сортируются в алфавитном порядке.

---

3 Нажмите  или  для выбора нужного

псевдонима или идентификатора. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Редакт. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Ред. рингтон. Нажмите  для выбора.

---

6 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора. Рядом с выбранным тональным сигналом появится значок .

---

## Оповещение с нарастающей громкостью

Радиостанцию можно запрограммировать на непрерывное оповещение пользователя, когда он не отвечает на радиовывоз. При этом громкость тонального сигнала оповещения постепенно автоматически повышается. Эта функция называется оповещением с нарастающей громкостью.

[Отправить отзыв](#)

## Функции журнала вызовов

Радиостанция ведет учет всех недавних исходящих, ответвленных и пропущенных частных вызовов. Журнал вызовов позволяет просматривать недавние вызовы и управлять ими.

В зависимости конфигурации системы радиостанции журналы вызовов могут содержать оповещения о пропущенных вызовах. В каждом списке вызовов можно выполнять следующие операции:

- Сохранение псевдонимов или идентификаторов в контактах
- Удаление вызова
- Удаление всех вызовов
- Просмотр информации

## Просмотр недавних вызовов

Для просмотра недавних вызовов выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента

Журн. вызв. Нажмите  для выбора.

---

3 Нажмите  или  для выбора предпочитаемого списка. Доступны следующие варианты Пропущен., Отвечен. и Исходящие.

Нажмите  для выбора.

На дисплее появится самый последний пункт.

---

4 Нажмите  или  для просмотра списка.

При нажатии на кнопку **РТТ** радиостанция выполнит частный вызов с использованием псевдонима или идентификатора, отображаемого в данный момент на экране.

---

## Сохранение псевдонимов или идентификаторов из списка вызовов

Для сохранения псевдонимов или идентификаторов из списка вызовов выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента

Журн. вызв. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужного списка.

Нажмите  для выбора.

---

4 Нажмите  или  для выбора нужного псевдонима или идентификатора.

Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента

Оставить. Нажмите  для выбора.

На дисплее появится мигающий курсор.

---

6 Наберите остальные символы нужного псевдонима.

Нажмите  для выбора.

Для сохранения идентификатора псевдоним необязателен.

На дисплее появится мини-уведомление об успешном выполнении действия.

## Удаление вызовов из списка вызовов

Для удаления вызова из списка вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Журн. выз.. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного списка. Нажмите  для выбора.  
Если список пуст:
  - Прозвучит тональный сигнал.

- На дисплее появится сообщение Список пуст.

- 4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Удалить пункт?. Нажмите  для выбора.

---

- 6 Выполните одно из следующих действий.
  - Чтобы удалить пункт, нажмите  для выбора элемента Да.  
На дисплее появится сообщение Пункт удален.
  - Нажмите  или  для выбора элемента Нет. Нажмите  для выбора.  
Радиостанция вернется к предыдущему экрану.

## Удаление всех вызовов из списка вызовов

Для удаления всех вызовов из списка вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Журн. выз.. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного списка. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

---

6 Выполните одно из следующих действий.

- Чтобы удалить все пункты, нажмите  для выбора элемента Да. На дисплее появится мини-уведомление об успешном выполнении действия.
  - Нажмите  или  для выбора элемента Нет. Нажмите  для выбора. Радиостанция вернется к предыдущему экрану.
- 

## Просмотр информации в списке вызовов

Для просмотра информации в списке вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Журн. выз.. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужного списка. Нажмите  для выбора.

4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Дет. данные. Нажмите  для выбора.  
На дисплее отобразятся подробные данные.

## Функция оповещения о вызове

Функция оповещения о вызове позволяет оповестить пользователя определенной радиостанции о необходимости вызвать вас, когда у него будет такая возможность.

Эту функцию можно использовать, только если абоненту присвоен псевдоним или идентификатор. Доступ к функции осуществляется в меню через список контактов, с помощью ручного набора или с помощью

запрограммированной кнопки **доступа одним нажатием**.

В Saracuity Max функция оповещения о вызове позволяет пользователю радиостанции или диспетчеру отправить оповещение пользователю другой радиостанции с запросом выполнить ответный вызов пользователя вызывающей радиостанции при наличии такой возможности. Эта функция не задействует голосовую связь.

Функция оповещения о вызове может быть настроена дилером или системным администратором двумя способами.

- Радиостанция настраивается таким образом, чтобы пользователь мог нажать кнопку **РТТ** для выполнения частного вызова и ответа непосредственно инициатору вызова.
- Радиостанция настраивается таким образом, чтобы пользователь мог нажать кнопку **РТТ** для поддержания связи с разговорной группой. Пользователь не сможет ответить инициатору вызова при помощи нажатия кнопки **РТТ** в момент отображения записи с оповещением о вызове. Пользователю потребуется перейти в журнал пропущенных вызовов, выбрав соответствующий пункт меню журнала вызовов, для ответа на

оповещение о вызове непосредственно из этого журнала.

Частный вызов OACSU позволяет пользователю отвечать сразу в момент получения вызова, в то время как частный вызов FOACSU требует от пользователя подтверждения получения вызова. Таким образом, OACSU является рекомендуемым типом вызова при использовании функции оповещения о вызове. См. [Частный вызов на стр. 89](#).

## Выполнение оповещения о вызове

Для выполнения оповещения о вызове выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **доступа одним нажатием**.

На дисплее появятся сообщение **Опов. о вызв** и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.

- 2 Дождитесь подтверждения.

При получении подтверждения оповещения о вызове на дисплее появится мини-уведомление об успешном выполнении действия.

В случае неполучения подтверждения оповещения о вызове на дисплее появится мини-уведомление о неуспешном выполнении действия.

## Выполнение оповещения о вызове с помощью списка контактов

Для выполнения оповещения о вызове с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

Опов. о выз. Нажмите  для выбора.

На дисплее появятся сообщение Опов. о выз и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.

5 Дождитесь подтверждения.

- При получении подтверждения оповещения о вызове на дисплее появится мини-уведомление об успешном выполнении действия.
- В случае неполучения подтверждения оповещения о вызове на дисплее появится мини-уведомление о неуспешном выполнении действия.

- Прозвучит повторяющийся тональный сигнал.
- Светодиодный индикатор начнет мигать желтым цветом.
- На дисплее появится список уведомлений, содержащий оповещения о вызове с псевдонимом или идентификатором вызывающей радиостанции.

В зависимости от конфигурации, выбранной дилером или системным администратором, можно ответить на оповещение о вызове, выполнив следующие действия.

- Нажмите кнопку **РТТ** для выполнения частного вызова, чтобы ответить непосредственно вызывающему абоненту.
- Нажмите кнопку **РТТ** для поддержания связи с разговорной группой. Оповещение о вызове будет перемещено в журнал пропущенных вызовов, доступный в меню журнала вызовов. На вызов абонента можно ответить из журнала пропущенных вызовов.

## Ответ на оповещение о вызове

Для ответа на оповещение о вызове выполните следующие действия.

При получении оповещения о вызове:

[Отправить отзыв](#)

Для получения дополнительной информации см. разделы [Список уведомлений на стр. 222](#) и [Функции журнала вызовов на стр. 149](#).

## Беззвучный режим

Режим без звука предоставляет пользователю возможность отключить все звуковые уведомления на радиостанции.

После активации беззвучного режима звук всех звуковых уведомлений отключается, кроме функций с высоким уровнем приоритета, например связанные с режимом экстренной связи.

После выхода из беззвучного режима радиостанция может воспроизводить входящие звуковые сигналы и аудиопередачи.

### УВЕДОМЛЕНИЕ:

Эта функция приобретается отдельно. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение режима без звука

Для включения режима без звука выполните следующие действия.

Для доступа к этой функции можно использовать программируемую кнопку **режима без звука**.

При включении режима без звука происходит следующее.

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится надпись `Беззв.реж.вкл.`
- Светодиодный индикатор красного цвета начинает мигать и продолжает мигать до выхода из режима без звука.
- На дисплее на главном экране отображается значок **режима без звука**.
- Звук радиостанции выключается.
- Таймер режима без звук начинает обратный отсчет в зависимости от заданного временного интервала.

## Настройка таймера режима без звука

Функцию режима без звука можно включить, предварительно настроив таймер режима без звука на определенный временной интервал.

Продолжительность таймера настраивается в меню радиостанции в диапазоне 0,5–6 часов. Выход из

режима без звука происходит после окончания действия таймера.

Если значение длительности таймера установить на "0", радиостанция будет оставаться в режиме без звука неопределенное количество времени до нажатия запрограммированной кнопки **режима без звука**.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Тайм. беззв. Нажмите  для выбора.

---

- 5 Нажмите  или  для изменения числового значения каждой цифры, и нажмите  .

## Выход из режима без звука

Выход из этого режима выполняется автоматически после окончания таймера режима без звука.

Для выхода из режима без звука вручную можно выполнить следующие действия.

- Нажмите запрограммированную кнопку **режима без звука**.
- Выберите любую запись и нажмите **РТТ**.

При отключении режима без звука происходит следующее.

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится надпись Беззв. реж. выкл. .
- Светодиодный индикатор красного цвета перестает мигать и отключается.

- Значок **режима без звука** пропадает с главного экрана.
- Звук на радиостанции включается, состояние динамика восстанавливается.
- Если действие таймера не окончено, таймер режима без звука останавливается.

### **УВЕДОМЛЕНИЕ:**

Режим без звука также активируется, если пользователь осуществляет голосовую передачу или переключается на незапрограммированный канал.

## **Работа в экстренном режиме**

Экстренный сигнал оповещения служит для уведомления о чрезвычайных обстоятельствах. Экстренный сигнал оповещения можно подать в любой момент, при любых обстоятельствах и даже при наличии активности на текущем канале.

В Saracity Max принимающая радиостанция может одновременно поддерживать только один экстренный сигнал оповещения. В случае инициирования второго экстренного сигнала первый сигнал будет отменен.

При получении экстренного сигнала оповещения пользователь может либо удалить сигнал и выйти из списка сигналов, либо ответить на экстренный сигнал оповещения при помощи нажатия кнопки **РТТ** и передачи неэкстренного голосового вызова.

Дилер или системный администратор может установить длительность нажатия запрограммированной кнопки **экстренного режима**, кроме длительного нажатия, которое аналогично для всех кнопок.

### **Короткое нажатие**

Продолжительность – от 0,05 секунды до 0,75 секунды.

### **Длительное нажатие**

Продолжительность – от 1,00 секунды до 3,75 секунды.

За кнопкой **экстренного режима** закреплена функция включения/выключения экстренного режима. Для получения сведений о назначении кнопки **экстренного режима** обратитесь к дилеру.

**УВЕДОМЛЕНИЕ:**

Если короткое нажатие кнопки **экстренного режима** назначено для включения экстренного режима, то длительное нажатие кнопки **экстренного режима** назначается для выхода из экстренного режима.

Если длительное нажатие кнопки **экстренного режима** назначено для включения экстренного режима, то короткое нажатие кнопки **экстренного режима** назначается для выхода из экстренного режима.

Данная радиостанция позволяет посылать экстренные сигналы оповещения трех типов.

- Экстренный сигнал оповещения
- Экстренный сигнал оповещения с вызовом
- Экстренный сигнал оповещения с последующей голосовой передачей

Кроме того, каждый сигнал оповещения имеет следующие типы:

**Обычный**

Передача сигнала оповещения сопровождается звуковой и/или визуальной индикацией.

**Беззвучный**

Передача сигнала оповещения не сопровождается звуковой или визуальной индикацией. Радиостанция принимает вызов без воспроизведения звука через динамик, пока не завершится передача в режиме *"горячего микрофона"* и пользователь не нажмет кнопку РТТ.

**Беззвучный с голосом**

Передача сигнала оповещения не сопровождается звуковой или визуальной индикацией, но звук всех входящих вызовов поступает через динамик радиостанции.

**УВЕДОМЛЕНИЕ:**

Только один из указанных экстренных сигналов оповещения может быть назначен запрограммированной кнопке **экстренного режима** или переключателю **экстренного режима**.

## Отправка экстренного сигнала оповещения

Данная функция позволяет отправлять неголосовой экстренный сигнал оповещения, который инициирует индикацию оповещения для группы радиостанций. Для

отправки экстренного сигнала оповещения выполните следующие действия.

Если на радиостанции выбран тип экстренного режима "Бесшумный", во время работы в экстренном режиме радиостанция не будет отображать звуковые или визуальные индикаторы.

## 1 Нажмите запрограммированную кнопку **включения экстренного режима**.

Далее возможен один из следующих вариантов:

- На дисплее появится сообщение **Сигн. пер.** и псевдоним получателя.
- На дисплее появится сообщение **Пер. телегр.** и псевдоним получателя.

Загорится зеленый светодиодный индикатор.  
Появится значок **экстренной связи**.

## **УВЕДОМЛЕНИЕ:**

Если данная функция запрограммирована, прозвучит тональный сигнал экстренного поиска. Тональный сигнал не звучит, когда радиостанция выполняет передачу или прием голосовых данных, и отключается при выходе из экстренного режима. Тональный сигнал экстренного поиска может быть запрограммирован дилером или системным администратором.

## 2 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал экстренного режима.
- Зеленый светодиодный индикатор начнет мигать.
- На дисплее появится сообщение **Сигн. отпр.**

Если, несмотря на все повторные попытки, отправка экстренного сигнала оповещения не будет выполнена:

- Прозвучит тональный сигнал.

- На дисплее появится сообщение **Сигн. не получ.**

Радиостанция выйдет из режима экстренного сигнала оповещения и вернется к главному экрану.

#### УВЕДОМЛЕНИЕ:

При настройке только экстренного сигнала оповещения процесс экстренной связи состоит только из передачи экстренного сигнала оповещения. Экстренный сигнал прекращается, когда получено подтверждение системы или при использовании всех попыток доступа к каналу.

При работе радиостанции в режиме только экстренного сигнала оповещения отправка экстренного сигнала оповещения не сопровождается голосовым вызовом.

## Отправка экстренного сигнала оповещения с вызовом

Данная функция позволяет отправлять экстренный сигнал оповещения с вызовом группе радиостанций или диспетчеру. После подтверждения получения

сигнала инфраструктурой группы, эта группа радиостанций сможет поддерживать связь на запрограммированном экстренном канале.

Для выполнения экстренного вызова после передачи экстренного сигнала оповещения на радиостанции должен быть настроен экстренный сигнал оповещения с вызовом.

- 1 Нажмите запрограммированную кнопку **включения экстренного режима**.

На дисплее появится сообщение **Сигн. пер.** и псевдоним получателя. Появится значок **экстренного режима**. Загорится зеленый светодиодный индикатор.

#### УВЕДОМЛЕНИЕ:

Если данная функция запрограммирована, прозвучит тональный сигнал экстренного поиска. Тональный сигнал не звучит, когда радиостанция выполняет передачу или прием голосовых данных, и отключается при выходе из экстренного режима.

После получения подтверждения экстренного сигнала оповещения:

- Прозвучит тональный сигнал экстренного режима.
- Зеленый светодиодный индикатор начнет мигать.
- На дисплее появится сообщение *Сигн. отпр.*
- Когда на дисплее появится сообщение *Экст. сист.* и псевдоним группы назначения, радиостанция перейдет в режим экстренного вызова.

Если подтверждение экстренного сигнала оповещения не получено:

- Использваны все попытки отправки сигнала.
- Прозвучит звуковой сигнал низкой тональности.
- На дисплее появится сообщение *Сиг. не получ.*
- Радиостанция выйдет из режима экстренного сигнала оповещения.

- 2 Нажмите кнопку **РТТ** для начала голосовой передачи.

Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова**.

---

- 3 Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

- 4 Для прослушивания отпустите кнопку **РТТ**.

На дисплее появится псевдоним абонента и группы.

---

- 5 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и

можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

- 6 Нажмите запрограммированную кнопку **выключения экстренного режима**, чтобы выйти из экстренного режима.

Радиостанция вернется к главному экрану.

#### **УВЕДОМЛЕНИЕ:**

Наличие тонального сигнала разрешения разговора зависит от программных настроек радиостанции. Для получения дополнительной информации о программных настройках экстренного режима радиостанции обратитесь к своему дилеру или системному администратору.

Инициатор экстренного вызова может нажать  для завершения текущего экстренного вызова. Радиостанция вернется в режим ожидания вызова, но экран экстренного вызова будет по-прежнему отображаться на дисплее.

## Отправка экстренного сигнала оповещения с последующей голосовой передачей

Данная функция позволяет отправлять группе радиостанций экстренный сигнал оповещения с последующей голосовой передачей. Микрофон радиостанции активируется автоматически, позволяя поддерживать связь с группой радиостанций без нажатия кнопки **РТТ**. Этот режим работы микрофона называется *"горячий микрофон"*.

#### **УВЕДОМЛЕНИЕ:**

Радиостанция не распознает микрофон без поддержки IMPRES, подключенный к заднему аксессуарному разъему.

Если на указанном запрограммированном разъеме не будет обнаружен микрофон, радиостанция выполнит проверку другого разъема. В данном случае приоритет будет отдан обнаруженному микрофону.

Если в радиостанции активирован режим экстренного цикла, то повторы периодов *"горячего микрофона"* и приема выполняются в течение заданного времени. В режиме экстренного цикла принимаемые вызовы звучат в динамике радиостанции.

При нажатии кнопки **РТТ** в течение запрограммированного периода приема прозвучит тональный сигнал запрета, означающий, что нужно отпустить кнопку **РТТ**. Радиостанция проигнорирует нажатие кнопки **РТТ** и останется в экстренном режиме.

При нажатии кнопки **РТТ** в режиме *"горячего микрофона"* и удержании ее нажатой после завершения периода передачи в режиме *"горячего микрофона"*, радиостанция продолжит передачу, пока пользователь не отпустит кнопку **РТТ**.

Если подтверждение экстренного сигнала оповещения не будет получено, радиостанция не будет его повторять и напрямую перейдет в режим *"горячего микрофона"*.

#### **УВЕДОМЛЕНИЕ:**

Некоторые аксессуары не поддерживают режим *"горячего микрофона"*. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для отправки экстренного сигнала оповещения с последующей голосовой передачей выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **включения экстренного режима** или переключатель **экстренного режима**.

Далее возможен один из следующих вариантов:

- На дисплее появится сообщение *Сигн. пер.* и псевдоним получателя.
- На дисплее появится сообщение *Пер. телегр.* и псевдоним получателя.

Загорится зеленый светодиодный индикатор. Появится значок **экстренного режима**.

- 
- 2 Когда на дисплее появится сообщение *Сигн. отпр.*, четко говорите в микрофон.

Передача прекращается автоматически в следующих случаях:

- Когда истекает срок циклического повторения режимов *"горячего микрофона"* и приема вызовов (если режим экстренного цикла включен).

- Когда истекает период действия "горячего микрофона" (если режим экстренного цикла выключен).

---

**3** Нажмите запрограммированную кнопку **выключения экстренного режима**, чтобы выйти из экстренного режима.

Радиостанция вернется к главному экрану.

---

## Прием экстренного сигнала оповещения

Принимающая радиостанция может одновременно поддерживать только один экстренный сигнал оповещения. В случае инициирования второго экстренного сигнала первый сигнал будет отменен. Для приема и просмотра экстренного сигнала оповещения выполните следующие действия.

При поступлении экстренного сигнала оповещения:

- Прозвучит тональный сигнал.
- Светодиодный индикатор начнет мигать красным цветом.

[Отправить отзыв](#)

- На дисплее появится список экстренных сигналов оповещения, идентификатор или псевдоним экстренной разговорной группы, а также идентификатор или псевдоним передающей радиостанции.

---

**1** Нажмите  для просмотра оповещения.

---

**2** Нажмите , чтобы просмотреть варианты действий и подробные сведения для записи в списке оповещений.

---

**3** Нажмите  и выберите вариант Да, чтобы закрыть список оповещений.

Радиостанция вернется к главному экрану, в верхней части которого будет отображаться **значок экстренного режима**, предупреждающий о наличии экстренного сигнала оповещения, требующего внимания пользователя. После удаления записи из списка оповещений **значок экстренного режима** исчезнет.

---

**4** Нажмите  для доступа к меню.

---

- 5 Для возврата к списку сигналов оповещения выберите элемент `Список сигн...`.
- 
- 6 Тональный сигнал будет звучать, а светодиодный индикатор будет мигать красным цветом до выхода из экстренного режима. Однако тональный сигнал можно выключить. Выполните одно из следующих действий.
    - Нажмите кнопку **РТТ**, чтобы выполнить вызов группы радиостанций, которая получила экстренный сигнал оповещения.
    - Нажмите любую программируемую кнопку.
- 

## Ответ на экстренный сигнал оповещения

При получении экстренного сигнала оповещения пользователь может либо удалить сигнал и выйти из списка сигналов, либо ответить на экстренный сигнал оповещения при помощи нажатия кнопки **РТТ** и передачи неэкстренного голосового вызова. Для ответа на экстренный сигнал оповещения выполните следующие действия.

- 1 Если функция индикации экстренного оповещения включена, при получении радиостанцией экстренного сигнала оповещения на дисплее появится список экстренных сигналов оповещения. Нажмите  или  для выбора нужного псевдонима или идентификатора.
- 
- 2 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ**, чтобы передать неэкстренное голосовое сообщение той же группе, которой предназначался экстренный сигнал оповещения.  
Загорится зеленый светодиодный индикатор.
- 
- 3 Выполните одно из следующих действий.
    - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

- Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

#### 4 Для прослушивания отпустите кнопку **РТТ**.

При ответе радиостанции, инициировавшей экстренный вызов:

- Светодиодный индикатор начнет мигать красным цветом.
- На дисплее появится значок **экстренного вызова**, идентификатор или псевдоним экстренной разговорной группы, а также идентификатор или псевдоним передающей радиостанции.

#### **УВЕДОМЛЕНИЕ:**

Если функция индикации экстренного вызова выключена, на дисплее появится значок **группового вызова**, идентификатор или псевдоним экстренной разговорной группы, а также идентификатор или псевдоним передающей радиостанции.

## Ответ на экстренный сигнал оповещения с вызовом

Для ответа на экстренный сигнал оповещения с вызовом выполните следующие действия.

При приеме экстренного вызова:

- Если функция индикации экстренного вызова и тональный сигнал декодирования экстренного вызова включены, прозвучит тональный сигнал экстренного вызова. Тональный сигнал экстренного вызова не раздается, если включена только функция индикации экстренного вызова.
  - В правом верхнем углу дисплея появится значок **экстренного вызова**.
  - В текстовой строке появится идентификатор или псевдоним экстренной разговорной группы, а также идентификатор или псевдоним передающей радиостанции.
  - Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.
- 1** Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на

передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Загорится зеленый светодиодный индикатор.

**2** Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

**3** Для прослушивания отпустите кнопку **РТТ**.

При ответе радиостанции, инициировавшей экстренный вызов:

- Светодиодный индикатор начнет мигать красным цветом.
- На дисплее появится значок **экстренного вызова**, идентификатор или псевдоним экстренной разговорной группы, а также идентификатор или псевдоним передающей радиостанции.

#### УВЕДОМЛЕНИЕ:

Если функция индикации экстренного вызова выключена, на дисплее появится значок **группового вызова**, идентификатор или псевдоним экстренной разговорной группы, а также идентификатор или псевдоним передающей радиостанции.

## Статусные сообщения

С помощью этой функции пользователь может отправлять сообщения состояния на другие радиостанции.

Список быстрых статусов можно настроить с помощью CPS-RM; в него можно добавить максимум 99 статусов.

Максимальная длина каждого сообщения состояния — 16.

#### УВЕДОМЛЕНИЕ:

Каждый статус имеет соответствующее цифровое значение в диапазоне 0–99. Каждому статусу можно задать псевдоним для удобства использования.

## Отправка статусного сообщения

Чтобы отправить сообщение состояния, выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **доступа одним нажатием**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Статус**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента **Кратк. стат.** Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора нужного псевдонима/идентификатора абонента или группы. Нажмите  для выбора.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану **Кратк. стат.** на дисплее ненадолго отображается мини-уведомление об успешном выполнении действия.
- Рядом с отправленным сообщением состояния на экране отображается .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану **Кратк. стат.** на дисплее ненадолго отображается мини-уведомление о неуспешном выполнении действия.

## Отправка сообщений состояния с помощью программируемой кнопки

Чтобы отправить сообщение состояния с помощью программируемой кнопки выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **сообщений состояния**.

---

- 2 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора. Отображается список контактов.

---

- 3 Нажмите  или  для выбора нужного псевдонима/идентификатора абонента или группы. Нажмите  для выбора.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- Светодиодный индикатор выключится.

- Перед возвратом к экрану **Кратк. стат.** на дисплее ненадолго отображается мини-уведомление об успешном выполнении действия.
- Рядом с отправленным сообщением состояния на экране отображается .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану **Кратк. стат.** на дисплее ненадолго отображается мини-уведомление о неуспешном выполнении действия.

## Отправка сообщения состояния с помощью списка контактов

Чтобы отправить сообщение состояния с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента

Контакты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужного псевдонима/идентификатора абонента или

группы. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента

Отпр. статус. Нажмите  для выбора.

---

5 Нажмите  или  для выбора требуемого

сообщения состояния. Нажмите  для выбора.

---

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану **Кратк. стат.** на дисплее ненадолго отображается мини-уведомление об успешном выполнении действия.

[Отправить отзыв](#)

- Рядом с отправленным сообщением состояния на экране отображается .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану **Кратк. стат.** на дисплее ненадолго отображается мини-уведомление о неуспешном выполнении действия.

## Отправка сообщений состояния с помощью ручного набора

Чтобы отправить сообщение состояния с помощью ручного набора выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента

Контакты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Ручной набор. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Номер р/ст. Нажмите  для выбора.

---

5 Введите требуемый псевдоним/идентификатор абонента или группы и нажмите , чтобы продолжить.

---

6 Нажмите  или  для выбора элемента Отпр. статус. Нажмите  для выбора.

---

7 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора.

---

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- Светодиодный индикатор выключится.

- Перед возвратом к экрану Кратк. стат. на дисплее ненадолго отображается мини-уведомление об успешном выполнении действия.
- Рядом с отправленным сообщением состояния на экране отображается .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану Кратк. стат. на дисплее ненадолго отображается мини-уведомление о неуспешном выполнении действия.

## Просмотр сообщений состояния

Чтобы просмотреть сообщения состояния, выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Статус. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

---

4 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора.

Содержание сообщений состояния отображается для пользователя радиостанции.

---

Полученные сообщения состояния можно также просматривать в списке уведомлений. Более подробную информацию см. в разделе [Список уведомлений на стр. 222](#).

## Ответ на сообщения состояния

Чтобы ответить на сообщения состояния, выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Статус. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

---

4 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора.

---

5 Отображается содержание сообщения состояния. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента Ответить. Нажмите  для выбора.

---

- 7 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- Светодиодный индикатор выключится.
- На дисплее появится мини-уведомление об успешном выполнении действия, после чего откроется экран *Полученные*.
- Рядом с отправленным сообщением состояния на экране отображается .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- Светодиодный индикатор выключится.
- Перед возвратом к экрану *Полученные* на дисплее ненадолго отображается мини-уведомление о неуспешном выполнении действия.

## Удаление сообщения состояния

Для удаления сообщений состояния с радиостанции выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента *Статус*. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента *Полученные*. Нажмите  для выбора.
- 4 Нажмите  или  для выбора требуемого сообщения состояния. Нажмите  для выбора.
- 5 Отображается содержание сообщения состояния. Нажмите  для выбора.

6 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

7 Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

- На дисплее появится мини-уведомление об успешном выполнении действия, после чего откроется экран Полученные.

3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

- На дисплее появится сообщение Список пуст.

## Удаление всех сообщений состояния

Для удаления всех сообщений состояния с радиостанции выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Статус. Нажмите  для выбора.

## Обмен текстовыми сообщениями

Радиостанция может принимать данные, например текстовые сообщения, отправленные с другой радиостанции или с помощью приложения для текстовых сообщений.

Существует два типа текстовых сообщений: короткие текстовые сообщения цифровой мобильной радиосвязи (DMR) и текстовые сообщения. Максимальная длина короткого текстового сообщения DMR составляет 23 символа. Максимальная длина текстового

сообщения вместе со строкой темы сообщения составляет 280 символов. Строка темы отображается только при получении сообщения, отправленного с помощью приложения электронной почты.

#### УВЕДОМЛЕНИЕ:

Максимальная длина текстовых сообщений в символах относится только к моделям с программным и аппаратным обеспечением последней версии. Для моделей радиостанций с программным и аппаратным обеспечением устаревших версий максимальная длина текстовых сообщений составляет 140 символов. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для арабского языка ввод текста выполняется справа налево.

## Текстовые сообщения

Текстовые сообщения хранятся в папке "Полученные" и сортируются, начиная с последнего поступившего сообщения.

По истечении таймера бездействия текущий экран закрывается. Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки  .

## Просмотр текстовых сообщений

Для просмотра текстового сообщения выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

  - 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

---

  - 3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.
- Если папка "Полученные" пуста:
- На дисплее появится сообщение *Список пуст.*
  - Если тональные сигналы клавиатуры активированы, прозвучит тональный сигнал.

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

## Просмотр телеметрических статусных текстовых сообщений

Для просмотра телеметрических статусных текстовых сообщений из папки "Полученные" выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.
- 
- 3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

[Отправить отзыв](#)

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

Ответ на телеметрическое статусное текстовое сообщение не предусмотрен.

На дисплее появится сообщение Телеметрия: <статусное текстовое сообщение>.

- 5 Долго зажмите , чтобы вернуться на главный экран.

## Ответ на текстовое сообщение

Для ответа на текстовое сообщение выполните следующие действия.

При получении текстового сообщения:

- На дисплее появится список уведомлений с псевдонимом или идентификатором отправителя.
- На дисплее появится значок **сообщения**.

**УВЕДОМЛЕНИЕ:**

При нажатии кнопки **РТТ** экран с оповещением о получении текстового сообщения закроется, и будет выполнен частный или групповой вызов отправителю сообщения.

**1** Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Читать**. Нажмите  для выбора. На дисплее появится текстовое сообщение. На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.
- Нажмите  или  для выбора элемента **Читать позже**. Нажмите  для выбора. На дисплее радиостанции появится экран, который был открыт до получения текстового сообщения.

- Нажмите  или  для выбора элемента **Удалить**. Нажмите  для выбора.

**2** Выполните одно из следующих действий.

- Нажмите , чтобы вернуться в папку "Полученные".
- Повторно нажмите , чтобы ответить на текстовое сообщение, переслать или удалить его.

## Ответ на текстовое сообщение с помощью шаблона

Для ответа на текстовое сообщение с помощью шаблона выполните следующие действия.

- 1** Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к действию 3.

- Нажмите  для доступа к меню.
- 

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

---

4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

---

На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

---

5 Нажмите  для доступа к подменю.

---

6 Нажмите  или  для выбора элемента Ответить. Нажмите  для выбора.

---

7 Нажмите  или  для выбора элемента Быстр. ответ. Нажмите  для выбора.

---

8 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.  
На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

---

9 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

- Радиостанция вернется к экрану опции Отпр. снова.
- 

## Повторная отправка текстового сообщения

Для повторной отправки текстового сообщения выполните следующие действия.

Находясь на экране опции Отпр. снова:

Чтобы повторно отправить сообщение на тот же псевдоним или идентификатор абонента или группы, нажмите .

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.
  - Радиостанция вернется к экрану опции Отпр. снова.
- 

## Пересылка текстового сообщения

Для пересылки текстового сообщения выполните следующие действия.

Находясь на экране опции Отпр. снова:

- 1 Нажмите  или  для выбора элемента Пересл., затем нажмите  для отправки того же сообщения на другой псевдоним или идентификатор абонента или группы.
-

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

#### УВЕДОМЛЕНИЕ:

Адрес вызываемой радиостанции можно также выбрать вручную (см. [Пересылка текстового сообщения с помощью ручного набора на стр. 508](#)).

## Пересылка текстового сообщения с помощью ручного набора

Для пересылки текстового сообщения с помощью ручного набора выполните следующие действия.

- 1 Нажмите  или  для выбора элемента Пересл. Нажмите  для выбора.
- 2 Чтобы отправить то же сообщение на другой псевдоним или идентификатор абонента или группы, нажмите  .

- 3 Нажмите  или  для выбора элемента Ручной набор. Нажмите  для выбора. На дисплее появится сообщение Номер р/с:.

- 4 Введите идентификатор абонента и нажмите  , чтобы продолжить.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

- 5 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Редактирование текстовых сообщений

Чтобы отредактировать сообщение, выберите элемент Редакт.

### УВЕДОМЛЕНИЕ:

Отображаемую строку темы (в случае, если сообщение отправлено по электронной почте) редактировать нельзя.

- 1 Нажмите  или  для выбора элемента Редакт. Нажмите  для выбора. На дисплее появится мигающий курсор.

- 2 Отредактируйте сообщение с помощью клавиатуры.

- Нажмите , чтобы переместить курсор на один символ влево.
- Нажмите  или  , чтобы переместить курсор на один символ вправо.
- Нажмите  , чтобы удалить ненужные символы.

- Нажмите и удерживайте , чтобы изменить метод ввода текста.

**3** Завершив набор сообщения, нажмите один раз.

**4** Выполните одно из следующих действий.

- Нажмите или для выбора элемента **Отправить**, затем нажмите , чтобы отправить сообщение.
- Нажмите или для выбора элементы **Сохранить**, затем нажмите , чтобы сохранить сообщение в папке "Черновики".
- Нажмите , чтобы отредактировать сообщение.
- Нажмите , чтобы выбрать между удалением сообщения и сохранением его в папке "Черновики".

## Создание текстовых сообщений

Для создания текстового сообщения выполните следующие действия.

- 1** Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
  - Нажмите для доступа к меню.

**2** Нажмите или для выбора элемента **Сообщения**. Нажмите для выбора.

**3** Нажмите или , чтобы выделить элемент **Написать**. Нажмите для выбора. Отобразится мигающий курсор.

**4** Наберите сообщение на клавиатуре.

Нажмите , чтобы переместить курсор на один символ влево.

Нажмите  или , чтобы переместить курсор на один символ вправо.

Нажмите , чтобы удалить ненужные символы.

Нажмите и удерживайте , чтобы изменить метод ввода текста.

5 Завершив набор сообщения, нажмите  один раз.

Выполните одно из следующих действий.

- Нажмите , чтобы отправить сообщение.
- Нажмите . Нажмите  или , чтобы выбрать между редактированием, удалением или сохранением сообщения.

Нажмите  для выбора.

## Отправка текстовых сообщений

Для отправки текстового сообщения выполните следующие действия.

В данном примере подразумевается, что у вас есть новое текстовое сообщение или сохраненное текстовое сообщение.

Укажите получателя сообщения. Выполните одно из следующих действий.

- Нажмите  или  для выбора требуемого псевдонима или идентификатора.

Нажмите  для выбора.

- Нажмите  или  для выбора элемента *Ручной набор*. Нажмите  для выбора. Введите идентификатор абонента. В первой строке на дисплее появится сообщение *Номер р:с:*. Во второй строке появится мигающий курсор. Введите псевдоним или идентификатор абонента.

Нажмите .

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит сигнал низкой тональности.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- Сообщение будет перемещено в папку "Отправленные"
- Сообщение будет помечено значком сбоя отправки.

#### УВЕДОМЛЕНИЕ:

Если выбрано новое текстовое сообщение, на дисплее радиостанции появится экран опции Отпр. снова.

## Удаление текстового сообщения из папки "Полученные"

Для удаления текстового сообщения из папки "Полученные" выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).

- Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

Если папка "Полученные" пуста:

- На дисплее появится сообщение Список пуст.
- Прозвучит тональный сигнал.

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

5 Нажмите  для доступа к подменю.

6 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

7 Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

На дисплее появится мини-уведомление об успешном выполнении действия. Затем будет выполнен возврат в папку "Полученные".

## Удаление всех текстовых сообщений из папки "Полученные"

Для удаления всех текстовых сообщений из папки "Полученные" выполните следующие действия.

1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

Если папка "Полученные" пуста:

- На дисплее появится сообщение *Список пуст*.
- Прозвучит тональный сигнал.

4 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента

Да. Нажмите  для выбора.

На дисплее появится мини-уведомление об успешном выполнении действия.

## Отправка текстовых сообщений

После отправки текстовые сообщения автоматически сохраняются в папке "Отправленные". При этом новые сообщения всегда добавляются в начало папки.

Отправленное текстовое сообщение можно отправить повторно, переслать, отредактировать или удалить.

В папке "Отправленные" может храниться до 30 сообщений. Если папка заполнена, то при добавлении в нее нового текстового сообщения самое старое сообщение автоматически удаляется.

В случае закрытия экрана отправки во время отправки сообщения статус этого сообщения в папке "Отправленные" обновляется автоматически без визуальной и звуковой индикации.

В случае изменения режима работы или выключения радиостанции до обновления статуса сообщения в

папке "Отправленные" сообщение автоматически помечается значком **сбоя отправки**.

Радиостанция поддерживает одновременную отправку до пяти сообщений. После того, как число сообщений достигает пяти, отправка новых сообщений становится невозможной, и новые сообщения автоматически помечаются значком **сбоя отправки**.

Главный экран радиостанции можно открыть в любой момент с помощью длительного нажатия кнопки  .

### УВЕДОМЛЕНИЕ:

Если тип канала (например, конвенциональный цифровой или Caracity Plus) не совпадает, будут доступны только редактирование, пересылка и удаление отправленного сообщения.

## Просмотр отправленных текстовых сообщений

Для просмотра отправленного текстового сообщения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Отправленные. Нажмите  для выбора.

Если папка "Отправленные" пуста:

- На дисплее появится сообщение *Список пуст.*
- Если активированы тональные сигналы клавиатуры, прозвучит сигнал низкой тональности.

4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

Значок в правом верхнем углу экрана обозначает статус сообщения. См. [Значки отправленных элементов](#).

## Повторная отправка отправленных текстовых сообщений

Для повторной отправки отправленного текстового сообщения выполните следующие действия.

Находясь на экране просмотра отправленного текстового сообщения:

1 Нажмите  .

2 Отправленное текстовое сообщение можно отправить повторно или переслать. Выполните одно из следующих действий.

- Нажмите  для выбора элемента *Отпр.* снова. Нажмите  для выбора.
- Нажмите  для выбора элемента *Пересл.* Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

**3** Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- Радиостанция перейдет к экрану опции Отпр. снова. Более подробную информацию см. в разделе [Повторная отправка текстового сообщения на стр. 180](#).

## Удаление отправленных текстовых сообщений из папки "Отправленные"

Для удаления отправленных текстовых сообщений из папки "Отправленные" выполните следующие действия.

Находясь на экране просмотра отправленного текстового сообщения:

**1** Нажмите  .

**2** Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

## Удаление всех отправленных текстовых сообщений из папки "Отправленные"

Для удаления всех отправленных текстовых сообщений из папки "Отправленные" выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Отправленные. Нажмите  для выбора.

Если папка "Отправленные" пуста:

- На дисплее появится сообщение *Список пуст.*
  - Прозвучит тональный сигнал.
- 

4 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

---

5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Да. Нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия.

- Нажмите  или  для выбора элемента Нет. Нажмите  для выбора. Радиостанция вернется к предыдущему экрану.
- 

## Сохраненные текстовые сообщения

Текстовое сообщение можно сохранить и отправить позднее.

При нажатии кнопки **PTT** или изменении режима во время набора или редактирования текстового сообщения экран набора/редактирования закрывается, а текущее текстовое сообщение автоматически сохраняется в папку "Черновики".

При этом новые текстовые сообщения всегда добавляются в начало списка.

В папке "Черновики" может храниться до 10 (десяти) сообщений. Если папка заполнена, то при добавлении в нее нового текстового сообщения самое старое сообщение автоматически удаляется.

## Просмотр сохраненных текстовых сообщений

Для просмотра сохраненного текстового сообщения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Черновики. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

## Редактирование сохраненных текстовых сообщений

Для редактирования сохраненного на радиостанции текстового сообщения выполните следующие действия.

- 1 Нажмите  во время просмотра сообщения.

- 2 Нажмите  или  для выбора элемента Редакт.. Нажмите  для выбора. Отобразится мигающий курсор.

- 3 Наберите сообщение на клавиатуре.

Нажмите , чтобы переместить курсор на один символ влево.

Нажмите  или , чтобы переместить курсор на один символ вправо.

Нажмите , чтобы удалить ненужные символы.

Нажмите и удерживайте  , чтобы изменить метод ввода текста.

4 Завершив набор сообщения, нажмите  один раз.

Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Отправить**. Нажмите  , чтобы отправить сообщение.
- Нажмите  . Нажмите  или  , чтобы выбрать между удалением сообщения и сохранением сообщения. Нажмите  для выбора.

## Удаление сохраненных текстовых сообщений из папки "Черновики"

Для удаления сохраненных текстовых сообщений из папки "Черновики" выполните следующие действия.

1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Черновики. Нажмите  для выбора.

4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Удалить. Нажмите  , чтобы удалить текстовое сообщение.

## Шаблоны текстовых сообщений

Радиостанция поддерживает до 50 шаблонов текстовых сообщений, запрограммированных дилером.

Шаблоны сообщения задаются заранее, но допускают редактирование при отправке.

### Отправка шаблона текстового сообщения

Для отправки предустановленного шаблона текстового сообщения для предустановленного псевдонима выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
  - Нажмите запрограммированную кнопку **доступа одним нажатием**. Перейдите к [шаг 6](#).  
На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.
  - Нажмите  для доступа к меню.

[Отправить отзыв](#)

- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Быстр. текст. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного шаблона текстового сообщения. Нажмите  для выбора.

- 5 Для выбора получателя сообщения и отправки сообщения выполните следующие действия.  
На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки этого сообщения.

- 6 Дождитесь подтверждения.  
В случае успешного выполнения:
  - Прозвучит тональный сигнал успешного действия.

- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- Радиостанция перейдет к экрану опции **Отпр. снова**. Более подробную информацию см. в разделе [Повторная отправка текстового сообщения на стр. 180](#).

## Настройка ввода текста

Радиостанция позволяет выполнять настройку различных параметров ввода текста.

Вы можете настроить следующие параметры ввода текста на радиостанции:

- Прогнозирование слова
- Правка слова
- Предложение с заглавной буквы

- Мои слова

Радиостанция поддерживает следующие методы ввода текста:

- Цифры
- Символы
- Прогнозирование или мультисенсорный ввод
- Язык (если запрограммирован)

### УВЕДОМЛЕНИЕ:

Нажмите , чтобы вернуться на предыдущий экран, или нажмите и удерживайте , чтобы вернуться на главный экран. По истечении таймера бездействия текущий экран закрывается.

## Включение или выключение функции правки

Эта функция предлагает альтернативные варианты слов, если текстовому редактору не удастся распознать введенное слово с помощью встроенного словаря.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Верное слово. Нажмите  для выбора.

---

- 6 Выполните одно из следующих действий.
  - Нажмите  или  для выбора элемента Верное слово. Нажмите  для выбора.

- Нажмите  , чтобы активировать функцию правки. Если функция активирована, рядом со статусом Активировано отобразится значок  .
- Нажмите  , чтобы выключить функцию правки. Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.

## Включение или выключение функции прогнозирования

**Прогнозирование слова:** Радиостанция может запоминать наиболее часто используемые вами последовательности слов. Эта функция предугадывает следующее слово, которое необходимо использовать после ввода в текстовом редакторе первого слова часто используемой последовательности.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Текст. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Предикт. Нажмите  для выбора.

---

6 Выполните одно из следующих действий.

- Нажмите  , чтобы включить функцию прогнозирования. Если функция активирована, рядом со статусом Активировано отобразится значок  .
  - Нажмите  , чтобы деактивировать функцию управления искажением микрофона. Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.
- 

## Предложение с заглавной буквы

Эта функция автоматически преобразует первую букву первого слова каждого нового предложения в заглавную.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Текст. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Лимит предл. Нажмите  для выбора.

---

6 Выполните одно из следующих действий.

- Нажмите , чтобы активировать функцию ввода предложения с заглавной буквы. Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Нажмите , чтобы деактивировать функцию ввода предложения с заглавной буквы. Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Просмотр пользовательского списка слов

Вы можете добавлять собственные слова во встроенный словарь радиостанции. Радиостанция сохраняет список добавленных вами слов.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Текст**. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента **Мои слова**. Нажмите  для выбора.

- 6 Нажмите  или  для выбора элемента **Список слов**. Нажмите  для выбора.  
На дисплее отобразится список пользовательских слов.

## Редактирование пользовательских слов

Вы можете редактировать пользовательские слова, сохраненные в памяти радиостанции.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Мои слова. Нажмите  для выбора.

6 Нажмите  или  для выбора элемента Список слов. Нажмите  для выбора.

На дисплее отобразится список пользовательских слов.

7 Нажмите  или  для выбора нужного слова. Нажмите  для выбора.

8 Нажмите  или  для выбора элемента Редакт. Нажмите  для выбора.

9 Отредактируйте пользовательское слово с помощью клавиатуры.

- Нажмите , чтобы переместить курсор на один символ влево.
- Нажмите , чтобы переместить курсор на один символ вправо.
- Чтобы удалить ненужный знак, нажмите клавишу .
- Нажмите и удерживайте , чтобы изменить метод ввода текста.

- 10 Нажмите  после завершения редактирования пользовательского слова.

На дисплее на короткое время отобразится мини-уведомление об изменении, подтверждающее сохранение пользовательского слова.

- После сохранения пользовательского слова прозвучит тональный сигнал, а на дисплее появится мини-уведомление об успешном выполнении действия.
- Если пользовательское слово не сохранилось, прозвучит сигнал низкой тональности, и на дисплее появится мини-уведомление о неуспешном выполнении действия.

## Добавление пользовательских слов

Вы можете добавлять пользовательские слова во встроенный словарь радиостанции.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента Мои слова. Нажмите  для выбора.

- 6 Нажмите  или  для выбора элемента Доб. нов. общ. Нажмите  для выбора.

На дисплее отобразится список пользовательских слов.

- 7 Отредактируйте пользовательское слово с помощью клавиатуры.

- Нажмите , чтобы переместить курсор на один символ влево.
- Нажмите , чтобы переместить курсор на один символ вправо.
- Чтобы удалить ненужный знак, нажмите клавишу .
- Нажмите и удерживайте , чтобы изменить метод ввода текста.

**8** Нажмите  после завершения редактирования пользовательского слова.

На дисплее на короткое время отобразится мини-уведомление об изменении, подтверждающее сохранение пользовательского слова.

- После сохранения пользовательского слова прозвучит тональный сигнал, а на дисплее появится мини-уведомление об успешном выполнении действия.
- Если пользовательское слово не сохранилось, прозвучит сигнал низкой тональности, и на дисплее

появится мини-уведомление о неуспешном выполнении действия.

## Удаление пользовательских слов

Для удаления пользовательских слов, сохраненных в памяти радиостанции, выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента

Мои слова. Нажмите  для выбора.

---

6 Нажмите  или  для выбора нужного

слова. Нажмите  для выбора.

---

7 Нажмите  или  для выбора элемента

Удалить. Нажмите  для выбора.

---

8 Выполните одно из следующих действий.

- При появлении запроса Удалить пункт? нажмите  для выбора варианта Да. На дисплее появится сообщение Пункт удален.
  - Нажмите  или  для выбора элемента Нет. Нажмите , чтобы вернуться на предыдущий экран.
- 

## Удаление всех пользовательских слов

Для удаления всех пользовательских слов из встроенного словаря радиостанции выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Мои слова. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

## 7 Выполните одно из следующих действий.

- При появлении запроса Удалить пункт? нажмите  для выбора варианта Да. На дисплее появится сообщение Все пункты удалены.
- Чтобы вернуться к предыдущему экрану, нажмите  или  для выбора элемента Нет. Нажмите  для выбора.

## Задания

Эта функция позволяет радиостанции принимать сообщения от диспетчера с рабочими нарядами, которые необходимо выполнить.

### УВЕДОМЛЕНИЕ:

Данную функцию можно настраивать через CPS в соответствии с пользовательскими предпочтениями. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для различных заданий предусмотрены две папки:

#### Папка Мои задачи

Персонализированные задания, назначенные вашему идентификатору пользователя при выполнении входа в систему.

#### Папка Общие задачи

Общие задания, назначенные группе пользователей.

Вы можете отвечать на эти задания и сортировать их в соответствующих папках. По умолчанию существуют папки **Все**, **Новые**, **Начатые** и **Завершенные**. Чтобы получить дополнительные 10 папок, обратитесь к дилеру или системному администратору.

### УВЕДОМЛЕНИЕ:

Задания сохраняются даже после того, как радиостанция была выключена и включена снова.

Все задания находятся в папке **Все**. В зависимости от программных настроек радиостанции задания сортируются по уровню приоритета, затем — по времени получения. Новые задания, задания с недавними изменениями статуса и задания с самым высоким приоритетом отображаются в списке в первую очередь. По достижении предельного количества заданий радиостанции последующее задание автоматически заменяет самое раннее. Ваша радиостанция максимально поддерживает от 100 до 500 заданий в зависимости от модели. Для получения дополнительной информации обратитесь к дилеру или системному администратору. Радиостанция автоматически определяет и удаляет дублирующиеся задания с одинаковым идентификатором.

В зависимости от важности задания диспетчер добавляет заданиям уровень приоритета. Доступны три уровня приоритета: Приоритет 1, Приоритет 2, Приоритет 3. Приоритет 1 предусматривает наивысший приоритет, а Приоритет 3 — самый низкий приоритет. Также существуют задания без приоритета.

Ваша радиостанция обновляется соответствующим образом, когда диспетчер выполняет следующие изменения:

- Изменяет содержание задания.

- Добавляет или изменяет уровень приоритета задания.
- Перемещает задания из одной папки в другую.
- Отменяет задания.

## Доступ к папке задания

Для получения доступа к папке задания выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **задания**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 
- 2 Нажмите  или , чтобы выделить элемент **Задания**. Нажмите  для выбора.

- 
- 3 Нажмите  или  для выбора нужной папки. Нажмите  для выбора.
-

- 4 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.
- 

## Вход на удаленный сервер или выход из него

Данная функция позволяет осуществить вход на удаленный сервер и выход из него с помощью идентификатора пользователя.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента Вход. Нажмите  для выбора.
- Если вы уже осуществили вход, в меню отобразится Выйти.
- На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.
- 

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
  - На дисплее появится мини-уведомление о неуспешном выполнении действия.
- 

## Создание заданий

Радиостанция может создавать задания на основе шаблонов и отправлять рабочие наряды, которые необходимо выполнить.

Чтобы настроить шаблон для заданий, требуется программное обеспечение CPS.

- 1 Нажмите  для доступа к меню.
-

2 Нажмите  или , чтобы выделить элемент Задания. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Созд запр. Нажмите  для выбора.

---

## Ответ на задание

Для ответа на все задания выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент Задания. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужной папки. Нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.

---

5 Повторно нажмите , чтобы получить доступ к подменю.

Можно также нажать соответствующую цифровую клавишу (1–9) для **быстрого ответа**.

---

6 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

---

7 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.

- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

---

## Отправка заданий с использованием одного шаблона задания

Если радиостанция настроена на один шаблон задания, для отправки задания выполните следующие действия.

- 1 С помощью клавиатуры введите нужный номер помещения. Нажмите  для выбора.

- 
- 2 Нажмите  или  для выбора элемента Статус помещения. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужной опции. Нажмите  для выбора.

- 
- 4 Нажмите  или  для выбора элемента Отправить. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

- 
- 5 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Отправка заданий с использованием более одного шаблона задания

Если радиостанция настроена на более чем один шаблон задания, для отправки заданий выполните следующие действия.

- 1 Нажмите  или  для выбора нужной опции. Нажмите  для выбора.

- 2 Нажмите  или  для выбора элемента Отправить. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

[Отправить отзыв](#)

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Удаление заданий

Для удаления заданий выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **задания**. Перейдите к [шаг 4](#)
  - Нажмите  для доступа к меню.

2 Нажмите  или  , чтобы выделить элемент Задания. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужной папки. Нажмите  для выбора.

---

4 Нажмите  или  для выбора папки Все. Нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить необходимое задание. Нажмите  для выбора.

---

6 Повторно нажмите  во время просмотра задания.

---

7 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

---

8 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
  - На дисплее появится мини-уведомление о неуспешном выполнении действия.
-

## Удаление всех заданий

Для удаления всех заданий выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **задания**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент **Задания**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужной папки. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора папки **Все**.  
Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента **Удалить все**. Нажмите  для выбора.

- 6 Выполните одно из следующих действий.
  - Нажмите  или  для выбора элемента **Да**. Нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия.
  - Нажмите  или  для выбора элемента **Нет**. Нажмите  для выбора. Радиостанция вернется к предыдущему экрану.

## Конфиденциальность

Эта функция позволяет предотвратить несанкционированное прослушивание радиообмена на канале. Для этого используется скремблирование с программной реализацией. Сигналинг и идентификация пользователя в сеансе передачи не скремблируются.

Активация функции конфиденциальности является обязательным условием ведения передач со скремблированием на канале, но для приема передач это не является обязательным. После активации функции конфиденциальности на канале по-прежнему можно принимать нескремблированные передачи.

Радиостанция поддерживает только улучшенную конфиденциальность. Для дескремблирования зашифрованного вызова или данных радиостанция должна быть запрограммирована таким образом, чтобы значение ключа и идентификатор ключа (для расширенной конфиденциальности) совпадали со значением ключа и идентификатором ключа передающей радиостанции.

Если при приеме скремблированного вызова значение ключа и идентификатор ключа не совпадают, сигнал не прозвучит (для расширенной конфиденциальности).

По зашифрованному каналу радиостанция может принимать нешифрованные вызовы без скремблирования в зависимости от запрограммированной конфигурации конкретной радиостанции. Кроме того, радиостанция может воспроизводить тональный сигнал предупреждения в зависимости от запрограммированной конфигурации.

## УВЕДОМЛЕНИЕ:

Эта функция недоступна на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

Зеленый светодиодный индикатор постоянно горит, когда радиостанция ведет передачу, и быстро мигает, когда радиостанция принимает зашифрованную передачу.

## УВЕДОМЛЕНИЕ:

Некоторые модели радиостанций не снабжены функцией конфиденциальности или предлагают другой способ ее реализации. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение и выключение функции конфиденциальности

Для включения или выключения функции конфиденциальности выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **конфиденциальности**. Пропустите описанные ниже действия.

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Шифрование. Нажмите  для выбора.

5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Вкл.. Нажмите  для выбора. На дисплее появится значок  рядом с элементом Вкл..
- Нажмите  или  для выбора элемента Выкл.. Нажмите  для выбора.

На дисплее появится значок  рядом с элементом Выкл.

## Запрет ответа

С помощью этой функции можно настроить выборочный прием входящих передач радиостанций.

### УВЕДОМЛЕНИЕ:

Эта функция приобретается отдельно. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Если включено, в ответ на входящие передачи (например, проверка радиостанции, оповещение о вызове, отключение радиостанции, удаленный мониторинг, служба автоматической регистрации (ARS), ответ на частные сообщения и отправка отчетов GNSS о местоположении) радиостанция не инициирует никакие исходящие передачи. Если эта функция включена, радиостанция не может принимать подтвержденные частные вызовы. При этом с радиостанции можно осуществлять передачу в ручном режиме.

## Включение/отключение запрета ответа

Для включения или отключения запрета ответа на радиостанции выполните следующие действия.

Нажмите запрограммированную кнопку **запрета ответа**.

---

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее ненадолго отобразится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее ненадолго отобразится мини-уведомление о неуспешном выполнении действия.

## Временная блокировка/возобновление работы

Данная функция позволяет активировать и деактивировать любую радиостанцию в системе. Например, дилер или системный администратор может

деактивировать украденную радиостанцию, чтобы несанкционированный пользователь не смог ей пользоваться, и активировать ее после ее возврата.

Радиостанцию можно деактивировать (временно заблокировать, заглушить) или активировать (возобновить работу) через консоль или с помощью команды, инициированной с другой радиостанции.

После деактивации радиостанция издает отрицательный тональный сигнал и на главном экране отображается **В кан.отказ**.

Если радиостанция заглушена, она не может отправлять инициированные пользователем запросы или получать доступ к каким-либо службам в системе, в которой было выполнено глушение. Однако радиостанция может переключиться на другую систему. Радиостанция будет по-прежнему отправлять отчеты о местоположении GNSS и доступна для удаленного мониторинга даже после глушения/временной блокировки.

### УВЕДОМЛЕНИЕ:

Дилер или системный администратор могут деактивировать радиостанцию на постоянной основе. Более подробную информацию см. в разделе [Прекращение работы радиостанции на стр. 218](#).

## Временная блокировка радиостанции

Для деактивации радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **деактивации радиостанции**.

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Зеленый светодиодный индикатор начнет мигать.

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

[Отправить отзыв](#)

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Временная блокировка радиостанции с помощью списка контактов

Для выполнения деактивации радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Деактив. р/с. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Зеленый светодиодный индикатор начнет мигать.

5 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Временная блокировка радиостанции с помощью ручного набора

Для выполнения деактивации радиостанции с помощью ручного набора выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Ручной набор. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента  
Номер р/ст. Нажмите  для выбора.  
В первой строке на дисплее появится сообщение  
Номер р/ст.:

- 5 Введите идентификатор абонента и нажмите  
, чтобы продолжить.

- 6 Нажмите  или  для выбора элемента  
Деактив. р/с. Нажмите  для выбора.  
На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Зеленый светодиодный индикатор начнет мигать.

- 7 Дождитесь подтверждения.  
В случае успешного выполнения:
- Прозвучит тональный сигнал успешного действия.

- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Возобновление работы радиостанции

Для активации радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **активации радиостанции**.

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.  
На дисплее появятся сообщение **Активир. р/с** и псевдоним или идентификатор

абонента. Загорится зеленый светодиодный индикатор.

---

**3** Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
  - На дисплее появится мини-уведомление о неуспешном выполнении действия.
- 

## Возобновление работы радиостанции с помощью списка контактов

Для выполнения активации радиостанции с помощью списка контактов выполните следующие действия.

**1** Нажмите  для доступа к меню.

---

**2** Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

**3** Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

**4** Нажмите  или  для выбора элемента **Активир. р/с**. Нажмите  для выбора. Зеленый светодиодный индикатор начнет мигать. На дисплее появятся сообщение **Активир. р/с** и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.

---

**5** Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.

- На дисплее появится сообщение  
Радиостанция активирована.

В случае сбоя:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение Активация  
р/с не удалась.

## Возобновление работы радиостанции с помощью ручного набора

Для выполнения активации радиостанции с помощью  
ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента  
Контакты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента  
Ручной набор. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента  
Частн. вызов. Нажмите  для выбора.

В первой строке на дисплее появится сообщение  
Номер р/ст:.

- 5 Введите идентификатор абонента и нажмите  
, чтобы продолжить.

- 6 Нажмите  или  для выбора элемента  
Активир. р/с. Нажмите  для выбора.  
Зеленый светодиодный индикатор начнет мигать.  
На дисплее появятся сообщение Активир. р/с  
и псевдоним или идентификатор  
абонента. Загорится зеленый светодиодный  
индикатор.

## 7 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение  
Радиостанция активирована.

В случае сбоя:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение Активация р/с не удалась.

При включении радиостанции после прекращения работы на экране ненадолго отображается сообщение Раб. радио прекращена для индикации состояния.

### УВЕДОМЛЕНИЕ:

Возобновление работы полностью заблокированной радиостанции выполняется только в сервисном центре Motorola Solutions. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Функция "Одинокий работник"

Эта функция обеспечивает подачу экстренного сигнала в случае отсутствия активности со стороны пользователя радиостанции (нажатия любой кнопки или активации переключателя каналов) в течение заданного времени.

По истечении таймера бездействия радиостанция предупреждает пользователя звуковым сигналом.

Если активность со стороны пользователя по-прежнему отсутствует, то по истечении заданного времени радиостанция переходит в экстренное состояние, если это предварительно запрограммировано дилером или системным администратором.

## Прекращение работы радиостанции

Эта функция выполняет роль расширенной меры безопасности для предотвращения несанкционированного доступа к радиостанции.

Функция прекращения работы переводит радиостанцию в нерабочее состояние. Например, дилер или системный администратор может прекратить работу радиостанции в случае ее кражи или утери для предотвращения несанкционированного доступа.

Более подробную информацию см. в разделе [Работа в экстренном режиме на стр. 158](#).

#### УВЕДОМЛЕНИЕ:

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Функции блокировки с паролем

Эта функция позволяет ограничивать доступ к радиостанции посредством вывода запроса на ввод пароля при включении устройства.

Для ввода пароля можно использовать микрофон с клавиатурой или кнопки **прокрутки вверх/вниз**.

## Доступ к радиостанции с использованием пароля

Для получения доступа к радиостанции с использованием пароля выполните следующие действия.

- 1 Наберите текущий четырехзначный пароль.

#### УВЕДОМЛЕНИЕ:

В случае использования переключателя **экстренного режима** вводить пароль для доступа к радиостанции не требуется.

- Используйте микрофон с клавиатурой.
- Нажмите  или , чтобы отредактировать числовое значение каждого знака, а затем нажмите , чтобы ввести выбранную цифру и перейти к следующей.

2

Нажмите  для ввода пароля.

В случае успешного ввода пароля радиостанция включится.

В случае сбоя:

- После двух неудачных попыток на дисплее появится сообщение **Неверный пароль**. Повторите [шаг 1](#).
- После ввода неверного пароля в третий раз на дисплее появится сообщение **Неверный пароль, а затем сообщение Радиостанц. заблокир.** Прозвучит тональный сигнал. Светодиодный индикатор дважды мигнет

желтым цветом. Радиостанция блокируется на 15 минут.

#### УВЕДОМЛЕНИЕ:

В заблокированном состоянии радиостанция реагирует только на команды регулятора **"Вкл./Выкл./Громкость"** и запрограммированной кнопки **подсветки**.

- Если радиостанция выключена, включите питание радиостанции. Радиостанция снова начнет отсчет 15 минут до заблокированного состояния. Прозвучит тональный сигнал. Светодиодный индикатор дважды мигнет желтым цветом. На дисплее появится сообщение Радиостанц. заблок.

Подождите 15 минут. и затем повторите шаги в разделе [Доступ к радиостанции с использованием пароля на стр. 219](#), чтобы получить доступ к радиостанции.

## Разблокировка заблокированной радиостанции

В заблокированном состоянии радиостанция не принимает вызовы. Для разблокировки заблокированной радиостанции выполните следующие действия.

Выполните одно из следующих действий.

- Если радиостанция включена, подождите 15 минут. и затем повторите шаги в разделе [Доступ к радиостанции с использованием пароля на стр. 219](#), чтобы получить доступ к радиостанции.

## Включение и выключение блокировки с паролем

Для включения или выключения блокировки с паролем выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента

Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента

Блок с парол. Нажмите  для выбора.

---

5 Наберите текущий четырехзначный пароль.

- Используйте микрофон с клавиатурой.
  - Нажмите  или , чтобы отредактировать числовое значение каждого знака, а затем нажмите , чтобы ввести выбранную цифру и перейти к следующей. При наборе каждого знака будет звучать тональный сигнал успешного действия.
- 

6 Нажмите  для ввода пароля.

Если пароль введен неправильно, на дисплее появится сообщение Неверный пароль и автоматически отобразится предыдущее меню.

---

7 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Вкл. Нажмите  для выбора. На дисплее появится значок  рядом с сообщением Вкл.
  - Нажмите  или  для выбора элемента Выкл. Нажмите  для выбора. На дисплее появится значок  рядом с сообщением Выкл.
- 

## Изменение паролей

Для изменения пароля радиостанции выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Блок с парол. Нажмите  для выбора.

---

5 Введите текущий четырехзначный пароль и  
нажмите , чтобы продолжить.  
Если пароль введен неправильно, на дисплее  
появится сообщение Неверный пароль и  
автоматически отобразится предыдущее меню.

---

6 Нажмите  или  для выбора элемента  
Смена пароля. Нажмите  для выбора.

---

7 Введите новый четырехзначный пароль и  
нажмите , чтобы продолжить.

---

8 Введите новый четырехзначный пароль еще раз  
и нажмите , чтобы продолжить.

В случае успешной смены пароля на дисплее  
появится сообщение Пароль изменен.  
В противном случае на дисплее появится  
сообщение Пароли не совпад..

На экране автоматически отобразится  
предыдущее меню.

---

## Список уведомлений

В радиостанции предусмотрен список уведомлений, в  
котором фиксируются все "непрочитанные" события на  
канале, такие как непрочитанные текстовые  
сообщения, телеметрические сообщения, пропущенные  
вызовы и оповещения о вызове.

Когда в списке уведомлений имеется одно или  
несколько событий, в строке состояния появляется  
значок **уведомления**.

В списке отображается не более 40 непрочитанных  
событий. Когда список заполняется, последующее  
событие автоматически заменяет в нем самое раннее

событие. Прочитанные события удаляются из списка уведомлений.

Для текстовых сообщений, пропущенных вызовов и оповещений об общих вызовах максимальное число уведомлений составляет 30 текстовых сообщений и 10 пропущенных вызовов или оповещений о вызовах. Максимальное количество зависит от отдельных функций списка (задания, текстовые сообщения или пропущенные вызовы или оповещения о вызовах).

## Доступ к списку уведомлений

Для получения доступа к списку уведомлений выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Уведом-ие. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного события. Нажмите  для выбора.

[Отправить отзыв](#)

Нажмите и удерживайте , чтобы вернуться на главный экран.

## Программирование в эфире

Ваш дилер может обновлять радиостанцию удаленно с помощью беспроводного программирования (OTA) без необходимости устанавливать физическое соединение с устройством. Кроме того, настройка некоторых параметров также возможна посредством OTA.

Во время выполнения OTA светодиодный индикатор мигает зеленым цветом.

Во время приема радиостанцией большого объема данных:

- На дисплее отображается значок **большого объема данных**.
- Канал становится занятым.
- При нажатии на кнопку **РТТ** звучит тональный сигнал неуспешного действия.

После завершения OTA в зависимости от конфигурации радиостанции произойдет следующее:

- Прозвучит тональный сигнал. На дисплее появится сообщение Обновл. перезагруз.. Радиостанция выполнит перезапуск (выключение и повторное включение).
- Выберите Перезапустить или Отложить. При выборе варианта Отложить радиостанция возвращается к предыдущему экрану. До автоматического перезапуска радиостанции на дисплее отображается значок таймера задержки **ОТАР**.

При включении радиостанции после автоматического перезапуска:

- В случае успешного выполнения на дисплее появится сообщение ПО обновлено.
- В случае сбоя на дисплее появится сообщение Отказ обн. ПО.

Для получения сведений о версии обновленного ПО см. раздел [Просмотр информации об обновлении программного обеспечения на стр. 256](#).

## Выбор режимов подключения к периферийным устройствам сторонних производителей

Выполните следующие действия для выбора одного из нижеуказанных режимов подключения к периферийным устройствам сторонних производителей:

- Motorola Solutions
- ПК и аудио
- Аксессуар для работы с данными
- Телеметрия
- Общий

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Тип кабеля. Нажмите  для выбора.

- 5 Нажмите  или  для выбора нужного режима подключения. Нажмите  для выбора. На дисплее появится название выбранного режима подключения. Радиостанция вернется к предыдущему меню.

## Индикатор уровня принимаемого сигнала

Эта функция позволяет просматривать значения индикатора уровня принимаемого сигнала (RSSI).

В правом верхнем углу дисплея появится значок **RSSI**. Для получения дополнительной информации о значке **RSSI** см. [Значки дисплея](#).

## Просмотр значений RSSI

Для просмотра значений RSSI выполните следующие действия.

Находясь на главном экране:

- 1 В течение 5 секунд нажмите  три раза и сразу же три раза нажмите . На дисплее отобразятся текущие значения RSSI.
- 2 Нажмите и удерживайте , чтобы вернуться на главный экран.

## Настройка передней панели

С помощью настройки передней панели (FPC) можно менять некоторые параметры радиостанции для расширения ее функциональности.

## Вход в режим настройки передней панели

Для входа в режим программирования с передней панели выполните следующие действия.

Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки .

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Прогр. р/с. Нажмите  для выбора.

## Редактирование параметров режима FPP

Перемещаясь между параметрами функции, используйте следующие кнопки.

- ,  — просмотр опций, увеличение/уменьшение значений, вертикальное перемещение.
-  — выбор опции или открытие подменю.
-  — короткое нажатие открывает предыдущее меню или закрывает экран выбора. Нажмите и удерживайте , чтобы вернуться на главный экран.

## Использование функции Wi-Fi

Wi-Fi® является зарегистрированным товарным знаком компании Wi-Fi Alliance®.

### УВЕДОМЛЕНИЕ:

Эта функция применима только для DM4601e .

Эта функция позволяет устанавливать и настраивать подключение к сети Wi-Fi. Wi-Fi поддерживает обновления микропрограммы радиостанции, кодплага и ресурсов, например языковых пакетов и голосовых объявлений.

## Включение или выключение Wi-Fi

Программируемая кнопка **включения или выключения Wi-Fi** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Голосовые оповещения при нажатии на запрограммированную кнопку **включения или отключения Wi-Fi** можно настроить с помощью CPS в зависимости от пользовательских предпочтений. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для включения или отключения Wi-Fi выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **включения или выключения Wi-Fi**. Прозвучит голосовое объявление о включении Wi-Fi или выключении Wi-Fi.
- Доступ к этой функции можно получить в меню.
  - a. Нажмите  для доступа к меню.

b. Нажмите  или , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

c. Нажмите  или , чтобы выделить элемент **Wi-Fi вкл.**, затем нажмите  для выбора.

Нажмите , чтобы включить Wi-Fi. На дисплее рядом с сообщением **Активировано** появится значок .

Нажмите , чтобы выключить Wi-Fi. Значок  рядом с сообщением **Активировано** исчезнет.

## Подключение к точке доступа к сети

При включении Wi-Fi радиостанция выполняет сканирование и подключается к точке доступа к сети.

Также можно подключиться к точке доступа к сети через меню.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

---

- 3 Нажмите  или  , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

---

- 4 Нажмите  или  , чтобы выделить точку доступа к сети, затем нажмите  для выбора.

---

- 5 Нажмите  или  , чтобы выделить элемент **Соединить**, затем нажмите  для выбора.

---

- 6 Введите пароль и нажмите  .

При успешном установлении соединения на экране радиостанции отобразится уведомление, и точка доступа к сети будет сохранена в списке профилей.

## Проверка состояния подключения Wi-Fi

Чтобы проверить состояние подключения Wi-Fi, выполните следующие действия.

Нажмите запрограммированную кнопку **запроса статуса Wi-Fi**, чтобы получить голосовое объявление о состоянии подключения. Прозвучит голосовое объявление о том, что сеть Wi-Fi выключена, или что Wi-Fi включена, но подключения нет, или что Wi-Fi включена и подключение присутствует.

- Если Wi-Fi выключен, на экране отображается **Wi-Fi выкл.**
- Если радиостанция подключена к сети, на экране отображается **Wi-Fi вкл., подключен.**
- Если Wi-Fi включен, но радиостанция не подключена ни к одной сети, на экране отображается **Wi-Fi вкл., отключен.**

Голосовые оповещения в ответ на запрос состояния подключения Wi-Fi можно настроить с помощью CPS в зависимости от пользовательских предпочтений. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

**УВЕДОМЛЕНИЕ:**

Программируемая кнопка **запроса статуса Wi-Fi** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

## Обновление списка сетей

Для обновления списка сетей следуйте описанной процедуре.

- Чтобы обновить список сетей, выполните следующие действия с помощью меню.
  - a. Нажмите  для доступа к меню.
  - b. Нажмите  или , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

c. Нажмите  или , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

При переходе в меню "Сети" радиостанция автоматически обновляет список сетей.

- Если меню "Сети" уже открыто, выполните следующее действие, чтобы обновить список сетей.

Нажмите  или , чтобы выделить элемент **Обновить**, затем нажмите  для выбора.

Радиостанция выполнит обновление и отобразит новый список сетей.

## Добавление сети

Если предпочтительная сеть недоступна в списке сетей, для добавления сети выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент Добав. сеть, затем нажмите  для выбора.

---

- 5 Введите идентификатор беспроводной сети (SSID) и нажмите .

---

- 6 Нажмите  или , чтобы выделить элемент Без защиты, затем нажмите  для выбора.

---

- 7 Введите пароль и нажмите .

На дисплее радиостанции отобразится мини-уведомление об успешном выполнении действия, указывая, что сеть успешно сохранена.

---

## Просмотр информации о точках доступа к сети

Для просмотра информации о точках доступа к сети следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить точку доступа к сети, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент Дет. данные, затем нажмите  для выбора.

Для подключенной точки доступа к сети отобразятся идентификатор беспроводной сети (SSID), режим безопасности, адрес управления доступом к среде передачи (MAC) и интернет-протокол (IP).

Для неподключенной точки доступа отобразятся идентификатор беспроводной сети (SSID) и режим безопасности.

---

## Удаление точек доступа к сети

Чтобы удалить точки доступа к сети из списка профилей, выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить выбранную точку доступа к сети, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент Удалить, затем нажмите  для выбора.

---

- 6 Нажмите  или , чтобы выделить элемент Да, затем нажмите  для выбора.

На экране радиостанции отобразится мини-уведомление об успешном выполнении действия, указывая, что выбранная точка доступа к сети успешно удалена.

## Вспомогательные функции

В данной главе описываются вспомогательные функции, доступные на радиостанции.

### Уровни мощности

Пользователь может переключать режимы высокой и низкой мощности радиостанции для каждого канала.

#### Высокий

Данный уровень позволяет поддерживать связь с радиостанциями, находящимися на значительном расстоянии от пользователя.

#### Низкая

Данный уровень обеспечивает связь с радиостанциями, находящимися на небольшом расстоянии.

#### УВЕДОМЛЕНИЕ:

Эта функция недоступна на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

## Настройка уровней мощности

Для настройки уровней мощности выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **уровня мощности**. Пропустите описанные ниже действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Питание. Нажмите  для выбора.

---

5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Большая. Нажмите  для выбора. На дисплее появится значок  рядом с элементом Большая.
  - Нажмите  или  для выбора элемента Малая. Нажмите  для выбора. На дисплее появится значок  рядом с элементом Малая.
- 

6 Нажмите и удерживайте , чтобы вернуться на главный экран.

---

## Активация и деактивация тональных сигналов/оповещений радиостанции

Вы можете включить или отключить все тональные сигналы и оповещения радиостанции при необходимости, за исключением входящего оповещения экстренного вызова. Для активации или деактивации тональных сигналов и оповещений радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
    - Нажмите запрограммированную кнопку **тональных сигналов/оповещений**. Пропустите следующие действия.
    - Нажмите  для доступа к меню.
- 

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
-

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Все тоны. Нажмите  для выбора.

---

6 Нажмите , чтобы активировать или  
деактивировать все тональные сигналы и  
оповещения. На дисплее появится один из  
следующих вариантов.

- Если функция активирована, рядом со  
статусом **Активировано** отобразится значок  
.
- Если функция деактивирована, значок   
рядом со статусом **Активировано** исчезнет.

---

## Включение и выключение тональных сигналов клавиатуры

Для включения или выключения тональных сигналов  
клавиатуры выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Тон клав. Нажмите  для выбора.

---

- 6 Нажмите , чтобы активировать или деактивировать тональные сигналы клавиатуры. На дисплее появится один из следующих вариантов.
- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Установка уровня громкости тональных сигналов или оповещений

Эта функция позволяет установить громкость тональных сигналов или оповещений выше или ниже уровня громкости передачи голоса. Для установки уровня громкости тональных сигналов или оповещений выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Тоны/опов.** Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента **Мин. громкость**. Нажмите  для выбора.

- 6 Нажмите  или  для выбора нужного уровня громкости.

При переходе к каждому значению звучит тональный сигнал, соответствующий данному уровню громкости.

- 7 Выполните одно из следующих действий.

- Нажмите  для выбора. Нужный уровень громкости сохранен.
- Нажмите , чтобы выйти. Изменения отменены.

## Включение и выключение тонального сигнала разрешения разговора

Для включения или выключения тонального сигнала разрешения разговора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Тонный опов.** Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента **Разр. разгов.** Нажмите  для выбора.

- 6 Нажмите , чтобы активировать или деактивировать тональный сигнал разрешения разговора.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение тонального сигнала включения питания

Для включения или выключения тонального сигнала включения питания выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Тонь/опов. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Вкл. Нажмите  для выбора.

---

- 6 Нажмите , чтобы активировать или деактивировать тональный сигнал включения питания. На дисплее появится один из следующих вариантов.
  - Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

---

## Настройка тонального сигнала оповещения о получении текстового сообщения

Вы можете выбрать однократный или повторяющийся тональный сигнал оповещения о получении текстового сообщения для каждой записи в списке контактов. Для настройки тонального сигнала оповещения о получении текстового сообщения выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента **Оп. о выз.** Нажмите  для выбора.

---

- 5 Выполните одно из следующих действий.
  - Нажмите  или  для выбора элемента **Однораз.** Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Однораз.**

- Нажмите  или  для выбора элемента **Повтор.** Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Повтор.**

## Смена режимов дисплея

Режим дисплея радиостанции можно переключать с дневного на ночной и обратно по мере необходимости. От этой функции зависит палитра цветов дисплея. Для изменения режима дисплея радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **режима дисплея**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Дисплей. Нажмите  для выбора.  
На дисплее появятся варианты настройки  
Дневн. режим и Ночн. режим.

---

5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора.  
Рядом с выбранной настройкой появится значок .

---

## Регулировка яркости дисплея

Для регулировки яркости дисплея радиостанции выполните следующие действия. Если функция "Автояркость" активирована, яркость дисплея нельзя регулировать.

- 1 Выполните одно из следующих действий.
    - Нажмите запрограммированную кнопку **яркости**. Пропустите следующие действия.
    - Нажмите  для доступа к меню.
- 

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Яркость. Нажмите  для выбора. На дисплее появится индикатор выполнения.

- 5 Нажмите  или  для уменьшения или увеличения яркости дисплея. Нажмите  для выбора. Значение настройки варьируется от 1 до 8.

## Включение и выключение функции гудка и фар

Радиостанция может уведомлять пользователя о входящем вызове с помощью функции гудка и освещения. Когда функция активирована, при поступлении входящего вызова включаются гудок и фары транспортного средства. Эта функция может быть установлена дилером при помощи заднего разъема для аксессуаров на радиостанции. Для включения или выключения функции гудка и фар выполните следующие действия.

- 1 Выполните одно из следующих действий.

- Нажмите запрограммированную **кнопку звукового сигнала/фар**. Пропустите описанные ниже действия.

- Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Гудок/фары. Нажмите  для выбора.

- 5 Нажмите , чтобы активировать или деактивировать функцию гудка и фар. На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение функции светодиодного индикатора

Для включения или выключения функции светодиодного индикатора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

[Отправить отзыв](#)

- 4 Нажмите  или  для выбора элемента **LED**. Нажмите  для выбора.

- 5 Нажмите , чтобы активировать или деактивировать светодиодный индикатор. На дисплее появится один из следующих вариантов.
  - Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение системы оповещения

Для включения и выключения внутренней системы оповещения выполните следующие действия.

- 1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **системы оповещения**. Пропустите следующие действия.

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Громкоговоритель. Нажмите  для выбора.

5 Нажмите , чтобы включить или отключить систему оповещения.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .

- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение внешней системы оповещения

Для включения и выключения внешней системы оповещения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **внешней системы оповещения**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Внешняя система оповещения. Нажмите  для выбора.

---

5 Нажмите , чтобы включить или отключить внешнюю систему оповещения.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

---

## Включение и выключение экрана приветствия

Экран приветствия можно активировать и деактивировать, выполнив следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Дисплей. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Экран привет. Нажмите  для выбора.

---

6 Нажмите , чтобы активировать или деактивировать экран приветствия.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .

- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Настройка языка

Для настройки языка на радиостанции выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.
- 4 Нажмите  или  для выбора элемента Языки. Нажмите  для выбора.

- 5 Нажмите  или  для выбора нужного языка. Нажмите  для выбора.

На дисплее рядом с выбранным языком появится значок .

## Определение типа кабеля

Для выбора типа кабеля, используемого радиостанцией, выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента  
Тип кабеля. Нажмите  для выбора.

- 5 Текущий тип кабеля отмечен значком .

## Включение и выключение голосового объявления

Эта функция позволяет радиостанции объявлять текущую зону или канал, только что выбранный пользователем, а также нажатие программируемой кнопки.

Такие объявления, как правило, полезны в случаях, когда просмотр сведений, отображаемых на дисплее, затруднен.

Параметры звуковых сигналов можно настраивать в соответствии с требованиями пользователя. Для включения или выключения голосовых объявлений выполните следующие действия.

## Включение и выключение функциональной платы

Возможности функциональной платы для каждого канала можно назначать программируемым кнопкам. Канал может поддерживать до 6 функций функциональной платы. Для включения или выключения функциональной платы выполните следующие действия.

Нажмите запрограммированную кнопку  
**функциональной платы.**

## Синтез речи

Функция синтеза речи может быть активирована только дилером или системным администратором. Если активирована функция синтеза речи, то функция голосового объявления автоматически деактивируется. Если активирована функция голосового объявления, то функция синтеза речи автоматически деактивируется.

Эта функция позволяет радиостанции объявлять следующие параметры.

- Текущий канал

- Текущая зона
- Включение и выключение программируемой кнопки
- Содержание полученных текстовых сообщений
- Содержание полученного задания

Пользователь может настраивать параметры звуковых сигналов. Эта функция, как правило, полезна в случаях, когда условия работы затрудняют просмотр сведений, отображаемых на дисплее.

## Настройка функции синтеза речи

Для настройки синтеза речи выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Голос. объяв. Нажмите  для выбора.

---

5 Нажмите  или  для выбора одной из опций. Нажмите  для выбора.

Доступны следующие опции:

- Все
- Сообщения
- Задания
- Канал
- Зона
- Кноп прогр.

Рядом с выбранной настройкой появится значок .

---

## Установка таймера меню

Вы можете задать период времени, по истечении которого вместо меню автоматически откроется

главный экран. Для настройки таймера меню выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Дисплей. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Таймер меню. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора.

## Включение и выключение АРУ цифрового микрофона

Автоматическая регулировка усиления (АРУ) цифрового микрофона позволяет автоматически управлять усилением микрофона радиостанции во время передачи в цифровой системе. Данная функция подавляет громкий и усиливает тихий аудиосигнал до предустановленного значения, чтобы обеспечить постоянный уровень громкости звука. Для включения или выключения АРУ цифрового микрофона выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

АРУ МИК. -Ц. Нажмите  для выбора.

5 Нажмите  для включения или выключения АРУ цифрового микрофона.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение функции интеллектуального аудио

Радиостанция автоматически регулирует громкость звука с учетом фоновых шумов как от стационарных, так и от подвижных источников. Эта функция действует только в режиме приема и не влияет на передаваемый звук. Для включения или выключения функции

интеллектуального аудио выполните следующие действия.

### УВЕДОМЛЕНИЕ:

Данная функция не действует во время работы в режиме Bluetooth.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **интеллектуального аудио**. Пропустите описанные ниже действия.
  - Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента **Инт. аудио**. Нажмите  для выбора.

---

5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Вкл.**.
  - Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Выкл.**.
- 

## Включение и выключение функции подавления акустической обратной связи

Эта функция позволяет снизить акустическую обратную связь при приеме вызовов.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Подав. ЗЧ**, затем нажмите  для выбора.

Также можно использовать кнопки или для изменения выбранного параметра.

**5** Выполните одно из следующих действий.

- Нажмите , чтобы активировать подавление акустической обратной связи. На дисплее рядом с сообщением **Активировано** появится значок .
- Нажмите , чтобы деактивировать подавление акустической обратной связи. Значок  рядом с сообщением **Активировано** исчезнет.

## Включение и выключение функции улучшения звучания речи

Данную функцию можно включить при разговоре на языке, в котором содержится много альвеолярных вибрирующих звуков (например, раскатистая "р"). Для включения или выключения функции улучшения звучания речи выполните следующие действия.

**1** Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **улучшения звучания речи**. Пропустите описанные ниже действия.
- Нажмите  для доступа к меню.

**2** Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

**3** Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

**4** Нажмите  или  для выбора элемента **Улучш зв реч**. Нажмите  для выбора.

**5** Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора. На

дисплее появится значок  рядом с элементом **Выкл.**.

- Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Выкл.**.

работе группы радиостанций, расположенных близко друг к другу.

## Настройка уровня шума

Для настройки уровня шума в соответствии с окружающими условиями выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.
- 4 Нажмите  или  для выбора элемента **Уровень шума**. Нажмите  для выбора.

## Уровень шума

Пользователь может настраивать уровень шума радиостанции в соответствии с окружающими условиями.

### Default

Эта настройка используется по умолчанию.

### Громко

Данная настройка активирует функцию шумоподавления и увеличивает громкость динамика для работы в шумной окружающей обстановке.

### Рабочая группа

Данная настройка активирует функцию подавления акустической обратной связи и деактивирует автоматическую регулировку усиления (АРУ) при

- 5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора.

Доступны следующие настройки.

- Выберите **По умолч.** для восстановления заводских настроек по умолчанию.
- Выберите **Громк** для увеличения громкости динамика для работы в шумной окружающей обстановке.
- Выберите **Раб. группа** для подавления акустической обратной связи при работе группы радиостанций, расположенных близко друг к другу.

Рядом с выбранной настройкой появится значок .

## Аудиопрофили

Пользователь может настраивать аудиопрофили радиостанции по своему предпочтению.

### Default

Эта настройка используется по умолчанию.

### Уровень 1, Уровень 2, Уровень 3

Эти аудиопрофили предназначены для компенсации вызванного шумом ухудшения слуха, характерного для людей от 40 лет и старше.

### Усиление высоких частот, Усиление средних частот, Усиление басов

Эти аудиопрофили предназначены для настройки более высокого, носового или низкого звучания.

## Настройка аудиопрофилей

Для настройки аудиопрофилей выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Аудиопрофили. Нажмите  для выбора.

5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора.

Доступны следующие настройки.

- Выберите По умолч. для деактивации ранее выбранного аудиопрофиля и восстановления заводских настроек по умолчанию.
- Выберите Уровень 1, Уровень 2 или Уровень 3, каждый из которых представляет собой аудиопрофиль, предназначенный для компенсации вызванного шумом ухудшения слуха, характерного для людей от 40 лет и старше.
- Выберите Ус выс част, Ус ср част или Усил бас, представляющие собой аудиопрофили для настройки более высокого,

носового или низкого звучания в соответствии с вашими предпочтениями.

Рядом с выбранной настройкой появится значок .

## Включение и выключение глобальной навигационной спутниковой системы

Глобальная навигационная спутниковая система (GNSS) представляет собой спутниковую систему навигации, определяющую точное местоположение радиостанции. GNSS включает систему глобального позиционирования (GPS) и глобальную навигационную спутниковую систему (GLONASS).

**УВЕДОМЛЕНИЕ:**

Некоторые модели радиостанций могут быть оснащены GPS и GLONASS. Созвездие GNSS настраивается через CPS. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

- 1 Для включения или выключения функции GNSS выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **GNSS**.
  - Нажмите  для доступа к меню. Перейдите к следующему действию.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или , чтобы выбрать элемент GNSS. Нажмите  для выбора.

- 5 Нажмите , чтобы активировать или деактивировать функцию GNSS.

Если функция активирована, рядом со статусом *Активировано* отобразится значок .

Если функция деактивирована, значок  рядом со статусом *Активировано* исчезнет.

## Общая информация о радиостанции

Радиостанция содержит сведения о различных общих параметрах.

Общая информация о радиостанции включает следующие сведения.

- Псевдоним и идентификатор радиостанции.
- Версии микропрограммы и кодплага.
- Обновление ПО.

- Сведения о GNSS.
- Информация об объекте.

### УВЕДОМЛЕНИЕ:

Нажмите , чтобы вернуться на предыдущий экран. Нажмите и удерживайте , чтобы вернуться на главный экран. По истечении таймера бездействия текущий экран закрывается.

## Просмотр псевдонима и идентификатора радиостанции

Для просмотра псевдонима и идентификатора радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **псевдонима и идентификатора радиостанции**. Пропустите следующие действия.  
Прозвучит тональный сигнал успешного действия.

Чтобы вернуться к предыдущему экрану, можно нажать запрограммированную кнопку **псевдонима и идентификатора радиостанции**.

- Нажмите   для доступа к меню.

- 
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите   для выбора.

- 
- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите   для выбора.

- 
- 4 Нажмите  или  для выбора элемента Мой ID. Нажмите   для выбора.

В первой строке на дисплее появится псевдоним радиостанции. Во второй строке появится идентификатор радиостанции.

## Просмотр версии микропрограммы и версии кодплага

Для просмотра версии микропрограммы и версии кодплага радиостанции выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Версии. Нажмите  для выбора.  
На дисплее отобразятся текущие версии микропрограммы и кодплага.

## Просмотр информации об обновлении программного обеспечения

Эта функция позволяет вывести на дисплей дату и время последнего обновления ПО, выполненного с помощью беспроводного программирования (OTAP) или по Wi-Fi. Для просмотра информации об обновлении программного обеспечения выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

ОБНОВЛ. ПО. Нажмите  для выбора.

На дисплее отобразятся дата и время последнего обновления программного обеспечения.

---

Меню обновления ПО станет доступным только после проведения как минимум одного успешного сеанса OTAР или подключения к Wi-Fi. Более подробную информацию см. в разделе [Беспроводное программирование на стр. 559](#).

## Проверка информации GNSS

Эта функция позволяет вывести на дисплей данные GNSS, такие как:

- Широта
- Долгота
- Высота
- Направление
- Скорость

- Фактор снижения точности при определении положения (HDOP)
- Спутники
- Версия

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента УТИЛИТЫ. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Инф. о GNSS. Нажмите  для выбора.

5 Нажмите  или  для выбора нужного элемента. Нажмите  для выбора. На дисплее отобразятся запрошенные данные GNSS.

## Отображение информации о сайте

Выполните следующие действия, чтобы отобразить имя текущего сайта, в пределах которого работает ваша радиостанция.

- 1 Нажмите  для доступа к меню.

---
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---
- 3 Нажмите  или  для выбора элемента Инф. о р.с. Нажмите  для выбора.

---
- 4 Нажмите  или  для выбора элемента Инф. с. Нажмите  для выбора.

---

На дисплее появится название текущего сайта.

## Работа в режиме Connect Plus

Connect Plus — это решение полной транкинговой связи, разработанное на основе технологии DMR. Connect Plus использует выделенный управляющий канал для запросов и назначения каналов. В данной главе приводится описание функций, доступных пользователям радиостанции.

### Дополнительные элементы управления радиостанцией в режиме Connect Plus

В данной главе описываются дополнительные способы управления радиостанцией посредством предварительно запрограммированных средств, таких как программируемые клавиши и назначаемые функции радиостанции.

## Кнопка PTT (Push-To-Talk)

Кнопка **PTT** на боковой части радиостанции выполняет две основные задачи.

- Во время вызова кнопка **PTT** позволяет радиостанции выполнять передачу на другие радиостанции, участвующие в вызове.

Для передачи голоса нажмите кнопку **PTT** и удерживайте ее. Для прослушивания отпустите кнопку **PTT**.

При нажатии кнопки **PTT** активируется микрофон.

- Кнопка **PTT** также служит для выполнения нового вызова, когда не выполняются другие вызовы (см. раздел [Выполнение радиовызова на стр. 279](#)).

Если активирован тональный сигнал разрешения разговора, не начинайте говорить, пока не прозвучит короткий тональный сигнал оповещения.

## Программируемые кнопки

Программируемые кнопки могут быть настроены дилером для быстрого доступа к определенным функциям радиостанции в зависимости от продолжительности нажатия кнопки.

### Короткое нажатие

Нажатие и быстрое отпускание кнопки.

### Длительное нажатие

Продолжительное нажатие запрограммированной кнопки.

#### УВЕДОМЛЕНИЕ:

Запрограммированная длительность нажатия кнопки применима ко всем назначаемым функциям и настройкам радиостанции/ вспомогательных функций. См. раздел [Работа в экстренном режиме на стр. 321](#) для получения дополнительной информации о запрограммированной длительности нажатия кнопки *экстренного режима*.

## Назначаемые функции радиостанции

### Переключатель аудио Bluetooth®

Перенаправление звука на встроенный динамик радиостанции или на внешний Bluetooth-аксессуар.

### Подключение к Bluetooth

Выполнение операции поиска и подключения к Bluetooth.

### Отключение Bluetooth

Отключение всех текущих Bluetooth-соединений между радиостанцией и всеми Bluetooth-устройствами.

### Обнаружение Bluetooth

Переключение радиостанции в режим обнаружения Bluetooth.

### Отмена очереди занятости

Выход из режима очереди занятости при выполнении неэкстренного вызова, находящегося в очереди занятости. Экстренные вызовы, принятые в очередь занятости, невозможно отменить.

### Журнал вызовов

Выбор списка в журнале вызовов.

### Объявление канала

Воспроизведение голосовых объявлений зоны и канала для текущего канала.

### Контакты

Прямой доступ к списку контактов.

### Включение/выключение экстренного режима

Инициирование или отмена экстренного режима связи в зависимости от программных настроек.

### Гудок/фары

Включение и выключение функции гудка и фар.

**Отслеживание в помещении**

Включение и выключение функции отслеживания в помещении.

**Функция интеллектуального аудио**

Включение и выключение функции интеллектуального аудио.

**Ручной набор**

Инициирование частного или телефонного вызова путем набора любого идентификатора абонента или номера телефона в зависимости от программных настроек.

**Доступ одним нажатием**

Непосредственное выполнение предварительно настроенного частного вызова, а также отправка оповещения о вызове, быстрого текстового сообщения или возврат к базовому каналу.

**Конфиденциальность**

Включение и выключение функции конфиденциальности.

**Проверка радиостанции**

Проверка активности радиостанции в системе.

**Активация радиостанции**

Выполнение дистанционной активации вызываемой радиостанции.

**Деактивация радиостанции**

Выполнение дистанционной деактивации вызываемой радиостанции.

**Удаленный мониторинг**

Включение микрофона вызываемой радиостанции без сопутствующей индикации.

**Сбросить домашний канал**

Установка нового домашнего канала.

**Тип сигнала**

Прямой доступ к настройке типа звонка оповещения.

**Запрос на роуминг**

Запрос на поиск другого сайта.

**Сканирование**

Включение и выключение функции сканирования.

**Заглушить напоминание домашнего канала**

Отключение звука напоминания домашнего канала

**Включение/выключение блокировки сайта**

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда функция выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

**Текстовые сообщения**

Выбор меню текстовых сообщений.

### **Голосовые объявления вкл/выкл**

Включение и выключение функции голосовых объявлений.

### **Wi-Fi**

Включение и выключение Wi-Fi.

### **Зона**

Выбор зоны из списка зон.

## **Назначаемые настройки и дополнительные функции**

### **Подавление АФ**

Включение и выключение функции подавления акустической обратной связи.

### **Все тональные сигналы/оповещения**

Включение и выключение всех тональных сигналов и оповещений.

### **Яркость подсветки**

Регулировка уровня яркости.

### **канал вверх/вниз**

Переключение на предыдущий или следующий канал в зависимости от программных настроек.

### **Режим дисплея**

Включение и выключение дневного/ночного режима дисплея.

### **Глобальная навигационная спутниковая система (GNSS)**

Включение и выключение спутниковой системы навигации.

### **Уровень мощности**

Переключение между высоким и низким уровнями мощности передачи.

### **Не назначено**

Для кнопки еще не назначена функция.

## **Индикаторы состояния в режиме Connect Plus**

## Значки дисплея

В этом разделе представлены значки, которые отображаются на дисплее радиостанции.

	<p><b>Индикатор уровня принимаемого сигнала (RSSI)</b></p> <p>Количество отображаемых штрихов обозначает уровень мощности радиосигнала. Четыре штриха указывают на максимальный уровень мощности сигнала. Этот значок отображается только во время приема.</p>
	<p><b>Bluetooth не подключен</b></p> <p>Функция Bluetooth активирована, но удаленное Bluetooth-устройство не подсоединено.</p>
	<p><b>Bluetooth подключен</b></p>

Продолжение таблицы...

	<p>Функция Bluetooth активирована. Значок горит, когда удаленное Bluetooth-устройство подсоединено.</p>
	<p><b>Большой объем данных</b></p> <p>Радиостанция выполняет прием большого объема данных, и канал занят.</p>
	<p><b>Доступна функция отслеживания в помещении<sup>3</sup></b></p> <p>Функция отслеживания в помещении активирована и доступна.</p>
	<p><b>Недоступна функция отслеживания в помещении<sup>3</sup></b></p> <p>Функция отслеживания в помещении активирована, но недоступна, поскольку функция Bluetooth отключена или сканирование радиомаяков приостановлено функцией Bluetooth.</p>

Продолжение таблицы...

<sup>3</sup> Доступна только в моделях с программным и аппаратным обеспечением последней версии

	<b>Беззвучный режим</b> Режим без звука включен и звук динамика выключен.
	<b>Уведомление</b> В списке уведомлений есть пункты для просмотра.
	<b>Уровень мощности</b> Радиостанция работает в режиме низкой мощности или в режиме высокой мощности.
	<b>Отключение тональных сигналов</b> Тональные сигналы выключены.
	<b>Функциональная плата</b> Функциональная плата активирована.
	<b>Функциональная плата отключена</b> Функциональная плата деактивирована.
	<b>Функция GNSS доступна</b>

Продолжение таблицы...

	Функция GPS/GNSS включена. Значок горит, если доступно определение местоположения.
	<b>Функция GNSS недоступна/выход из зоны досягаемости</b> Функция GPS/GNSS включена, но прием данных со спутника не выполняется.
	<b>Сканирование</b> Функция сканирования включена.
	<b>Экстренный режим</b> Радиостанция работает в режиме экстренной связи.
	<b>Защищенная связь</b> Функция конфиденциальности активирована.
	<b>Незащищенная связь</b> Функция конфиденциальности деактивирована.

Продолжение таблицы...

	<b>Роуминг сайтов</b> Функция роуминга сайтов активирована.
	<b>Контакт</b> Доступен контакт радиостанции.
	<b>Журнал вызовов</b> Журнал вызовов радиостанции.
	<b>Сообщение</b> Входящее сообщение.
	<b>Только звук</b> Активирован звуковой режим.
	<b>Без звука</b> Активирован беззвучный режим.
	<b>Вибрация</b> Активирован режим вибрации.

*Продолжение таблицы...*

	<b>Вибрация и звук</b> Активирован режим вибрации и звука.
	<b>Отличный сигнал Wi-Fi <sup>4</sup></b> Сигнал Wi-Fi отличный.
	<b>Хороший сигнал Wi-Fi <sup>4</sup></b> Сигнал Wi-Fi хороший.
	<b>Средний сигнал Wi-Fi <sup>4</sup></b> Сигнал Wi-Fi средний.
	<b>Слабый сигнал Wi-Fi <sup>4</sup></b> Сигнал Wi-Fi слабый.
	<b>Сигнал Wi-Fi недоступен <sup>4</sup></b> Сигнал Wi-Fi недоступен.

## Значки вызова

Во время вызова на дисплее радиостанции отображаются следующие значки. Эти значки также

<sup>4</sup> Применимо только к DM4601e

появляются в списке контактов, указывая на соответствующий тип идентификатора.

	<b>Частный вызов</b>
	<b>Групповой вызов/общий вызов сайта</b>
	<b>Телефонный вызов в режиме частного вызова</b>
	<b>Вызов на ПК по Bluetooth</b>

Выполняется частный вызов. В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) абонента.

Выполняется групповой или общий вызов сайта. В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) группы.

Выполняется телефонный вызов в режиме частного вызова.

*Продолжение таблицы...*

Выполняется вызов на ПК по Bluetooth.

В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) вызова на ПК по Bluetooth.

### **Вызов диспетчера**

Вызов диспетчера используется для отправки текстового сообщения на компьютер диспетчера через сторонний сервер текстовых сообщений.

## **Дополнительные значки меню**

Нижеследующие значки отображаются рядом с пунктами меню, позволяя выбирать из двух вариантов или указывая на наличие подменю с двумя вариантами.

### **Экранная кнопка (пустая)**

Означает, что опция не выбрана.

*Продолжение таблицы...*

**Экранная кнопка (отмечена флажком)**

Означает, что опция выбрана.

**Черная экранная кнопка**

Означает, что выбрана опция пункта меню с имеющимся в нем подменю.

## Значки отправленных элементов

В папке "Отправленные" в правом верхнем углу дисплея радиостанции отображаются следующие значки.

**Отправлено успешно**

Текстовое сообщение успешно отправлено.

ИЛИ

*Продолжение таблицы...*

**Идет отправка сообщения**

- Ожидается отправка текстового сообщения на псевдоним или идентификатор группы.
- Выполняется отправка текстового сообщения на псевдоним или идентификатор абонента. За этим следует ожидание подтверждения.

ИЛИ

**Индивидуальное или групповое сообщение прочитано**

Текстовое сообщение прочитано.

ИЛИ

ИЛИ

**Индивидуальное или групповое сообщение не прочитано**

Текстовое сообщение не прочитано.

**Сбой отправки**

Текстовое сообщение не отправлено.

ИЛИ

## Значки Bluetooth-устройств

Нижеследующие значки также появляются рядом с пунктами списка доступных устройств с поддержкой Bluetooth и обозначают тип устройства.

	<p><b>Bluetooth-устройство обмена данными</b></p> <p>Bluetooth-устройство обмена данными, например сканер.</p>
	<p><b>Аудиоустройство Bluetooth</b></p> <p>Аудиоустройство Bluetooth, например гарнитура.</p>
	<p><b>Bluetooth-устройство с РТТ</b></p> <p>Bluetooth-устройство с РТТ, например устройство только с поддержкой РРТ (POD).</p>

## Светодиодный индикатор

Светодиодный индикатор отображает рабочее состояние радиостанции.

<p><b>Мигает красным</b></p>	<p>Радиостанция ведет передачу при низком заряде аккумулятора, принимает экстренную передачу, не прошла самотестирование при включении питания или была перемещена за пределы допустимого диапазона (при настройке радиостанции с помощью системы автоматического оповещения). Режим без звука включен.</p>
<p><b>Быстро мигает красным цветом</b></p>	<p>Радиостанция принимает файл для беспроводной передачи (файл микропрограммы функциональной платы, файл данных сетевой частоты, файл кодаплага функциональной платы) или выполняет обновление до новой версии файла микропрограммы функциональной платы.</p>
<p><b>Мигает зеленым и желтым цветом</b></p>	<p>Радиостанция принимает оповещение о вызове, приняла текстовое сообщение, или</p>

*Продолжение таблицы...*

	активирована функция сканирования.
<b>Постоянно горит желтым цветом</b>	Радиостанция находится в режиме обнаружения Bluetooth.
<b>Дважды мигает желтым цветом</b>	Радиостанция выполняет активный поиск нового сайта.
<b>Мигает желтым цветом</b>	Радиостанция принимает оповещение о вызове, или активирована функция сканирования и радиостанция находится в режиме ожидания (сигналы отключены для любой активности).
<b>Постоянно горит зеленым</b>	Радиостанция включается или выполняет передачу.
<b>Мигает зеленым</b>	Радиостанция включается, принимает вызов или данные.

*Продолжение таблицы...*

**Дважды мигает зеленым цветом**

Радиостанция принимает зашифрованный вызов.

## Индикаторные тональные сигналы

Ниже приведены тональные сигналы, которые звучат в динамике радиостанции.

Звуковой сигнал высокой тональности

Звуковой сигнал низкой тональности

Индикаторные тональные сигналы обеспечивают звуковую индикацию состояния радиостанции после выполнения какого-либо действия.

	Тональный сигнал успешного действия
	Тональный сигнал неуспешного действия

## Тональные сигналы оповещения

Тональные сигналы оповещения выступают в роли звуковых индикаторов, указывая на состояние радиостанции или ее реакцию на полученные данные.

<b>Непрерывный тональный сигнал</b> 	Однообразный звук. Звучит до тех пор, пока не будет отключен.
<b>Периодический тональный сигнал</b> 	Включается с периодичностью, определяемой настройками радиостанции. Сигнал звучит, прекращается, затем повторяется.
<b>Повторяющийся тональный сигнал</b> 	Одиночный тональный сигнал, который повторяется до тех пор, пока не будет отключен пользователем.
<b>Кратковременный тональный сигнал</b>	Звучит только один раз в течение небольшого

## Переключение между режимами Connect Plus и режимами, отличными от Connect Plus

Если эта функция запрограммирована дилером или системным администратором, то чтобы переключиться в режим, отличный от Connect Plus, необходимо изменить зону. Узнайте у дилера или системного администратора, запрограммированы ли на вашей радиостанции зоны, отличные от Connect Plus, и какие функции доступны при работе в этих зонах.

## Выполнение и прием вызовов в режиме Connect Plus

В этом разделе приводятся общие принципы работы с радиостанцией и основные функции вызовов, доступных на вашей радиостанции.

## Выбор сайта

Сайт обеспечивает покрытие определенной области радиосвязью. Сайт Connect Plus имеет контроллер сайта и до 15 ретрансляторов. В многосайтовой сети радиостанция Connect Plus автоматически выполняет поиск нового сайта, когда мощность сигнала от текущего сайта падает до неприемлемого уровня.

## Запрос на роуминг

Запрос на роуминг сообщает радиостанции о необходимости поиска другого сайта, даже если уровень сигнала от текущего сайта приемлемый.

Если доступных сайтов не найдено:

- Радиостанция отображает уведомление *Идет поиск* и *Выбран псевдоним канала* и продолжает поиск по списку сайтов.
- Радиостанция вернется на предыдущий сайт, если он все еще доступен.

[Отправить отзыв](#)

### УВЕДОМЛЕНИЕ:

Эта функция программируется дилером.

Нажмите запрограммированную кнопку **запроса на роуминг**.

Прозвучит тональный сигнал, оповещающий о том, что радиостанция переключилась на новый сайт. На дисплее отобразится сообщение *ИД сайта <номер сайта>*.

## Включение/выключение блокировки сайта

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда функция выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

Нажмите запрограммированную кнопку **блокировки сайта**.

Если функция **блокировки сайта** включена:

- Прозвучит тональный сигнал успешного действия, оповещающий о том, что

радиостанция зафиксирована на текущем сайте.

- На дисплее появится сообщение **Сайт зафикс.**

Если функция **блокировки сайта** выключена:

- Прозвучит тональный сигнал неуспешного действия, оповещающий о том, что радиостанция расфиксирована.
- На дисплее появится сообщение **Сайт расфикс.**

## Ограничение сайта

Системный администратор радиосистемы Connect Plus может решать, какие сетевые сайты может использовать ваша радиостанция. Для изменения списка разрешенных и запрещенных сайтов радиостанцию не требуется перепрограммировать. При попытке радиостанции зарегистрироваться на неразрешенном сайте на дисплее на короткое время отобразится сообщение: **Сайт <номер> запрещен.** После этого радиостанция продолжит поиск другого сетевого сайта.

## Выбор зоны

Радиостанцию можно запрограммировать для работы в 16 зонах Connect Plus, и для каждой зоны Connect Plus можно назначить до 16 положений ручки выбора каналов.

Каждое положение ручки можно назначить для выполнения одного из типов вызова:

- Групповой вызов
- Мультигрупповой вызов
- Общий вызов сайта
- Частный вызов

- 1 Для доступа к функции зоны выполните следующие действия:

Элементы управления	Этапы
<b>Запрограммированная кнопка выбора зоны</b>	Нажмите запрограммированную кнопку <b>выбора зоны</b> .
<b>Меню радиостанции</b>	<b>а</b> Нажмите  для доступа к меню.

Элементы управления	Этапы
	<b>b</b> Нажмите  или  для выбора элемента Зона, затем нажмите  для выбора.

Текущая зона отображается и обозначается ✓.

## 2 Выберите требуемую зону.

Элемент управления	Этапы
 или 	Нажмите  или  и прокрутите до требуемой зоны.

3 Нажмите  для выбора.

На дисплее появится сообщение Выбрано <зона>, после чего радиостанция вернется к экрану выбранной зоны.

## Использование нескольких сетей

Если радиостанция запрограммирована на использование нескольких сетей Connect Plus, то для выбора другой сети необходимо переключиться на зону Connect Plus, которая назначена необходимой сети. Зоны назначаются сетям дилером во время программирования радиостанции.

## Выбор типа вызова

Ручка выбора каналов используется, чтобы выбрать тип вызова. В зависимости от программных настроек радиостанции это может быть групповой, мультигрупповой, общий вызов сайта или частный вызов. При установке ручки выбора каналов в другое положение (которому назначен определенный тип вызова) радиостанция повторно регистрируется на сайте Connect Plus. Для регистрации радиостанции

будет использован идентификатор регистрации группы, который запрограммирован для нового положения ручки выбора каналов типа вызова.

При выборе положения, которому не назначен тип вызова, прозвучит непрерывный тональный сигнал, и на дисплее появится сообщение **Не запрогр.** Поскольку радиостанция не может работать на незапрограммированном канале, установите ручку выбора каналов в положение запрограммированного канала.

После отображения необходимой зоны (если на радиостанции настроено несколько зон), поверните запрограммированную ручку выбора каналов, чтобы выбрать тип вызова.

## Прием радиовызова и ответ на него

Когда канал, идентификатор абонента или тип вызова отображаются на дисплее, это означает, что радиостанция готова к приему вызовов.

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет передачу, и мигает зеленым цветом, когда радиостанция ведет прием.

### УВЕДОМЛЕНИЕ:

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет передачу, и мигает двойными вспышками зеленого цвета, когда радиостанция принимает зашифрованный вызов. Для дескремблирования зашифрованного вызова секретный ключ радиостанции ИЛИ значение ключа и идентификатор ключа (которые программируются дилером) должны совпадать с соответствующими параметрами передающей радиостанции (радиостанции, от которой вы принимаете вызов).

Более подробную информацию см. в разделе [Конфиденциальность на стр. 346](#).

## Прием группового вызова и ответ на него

Чтобы выполнить прием вызова от группы пользователей, необходимо настроить радиостанцию в качестве участника этой группы.

При поступлении группового вызова (на главном экране) светодиодный индикатор мигает зеленым цветом. В верхнем правом углу появится значок

группового вызова. В первой строке на дисплее появится псевдоним вызывающего абонента. Во второй строке появится псевдоним группового вызова.

Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

- 1 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) от рта.

Светодиодный индикатор загорится постоянным зеленым цветом.

---

- 2 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- 

- 3 Для прослушивания отпустите кнопку **РТТ**.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

---

#### **УВЕДОМЛЕНИЕ:**

Для получения подробной информации о выполнении группового вызова см. раздел [Выполнение группового вызова на стр. 279](#).

## Прием частного вызова и ответ на него

Частный вызов — это вызов одной радиостанции другой радиостанцией.

При поступлении частного вызова светодиодный индикатор начнет мигать зеленым цветом. В первой строке на дисплее появится псевдоним или идентификатор абонента и значок **RSSI**. Во второй строке отобразится элемент **Частн. вызов** и значок частного вызова. Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

- 1 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) от рта.
- 

- 2 Нажмите кнопку **РТТ** для ответа на вызов.

Светодиодный индикатор загорится постоянным зеленым цветом.

---

- 3 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
-

#### 4 Для прослушивания отпустите кнопку РТТ.

---

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

На дисплее отобразится сообщение `Выз. законч.`

Подробнее о выполнении частного вызова см. раздел [Выполнение частного вызова на стр. 280](#).

### Прием общего вызова сайта

Общий вызов сайта — это вызов, отправляемый одной радиостанцией всем радиостанциям на данном сайте. Он используется для передачи важных объявлений, требующих особого внимания пользователей.

При поступлении общего вызова сайта прозвучит тональный сигнал, и светодиодный индикатор начнет мигать зеленым цветом.

В верхнем правом углу появится значок группового вызова. В первой строке на дисплее появится псевдоним вызывающего абонента. Во второй строке появится сообщение `Общий вызов сайта`.

Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

По окончании общего вызова сайта радиостанция вернется к экрану, который отображался до принятия вызова. Общий вызов сайта заканчивается без установленного периода ожидания.

Ответ на общий вызов сайта не предусмотрен.

#### УВЕДОМЛЕНИЕ:

Для получения подробной информации о выполнении общего вызова сайта см. раздел [Выполнение общего вызова сайта на стр. 281](#).

Радиостанция прекратит прием общего вызова сайта, если при поступлении вызова пользователь переключится на другой канал. Во время общего вызова сайта функции программируемых кнопок будут недоступны до завершения вызова.

### Прием входящего частного телефонного вызова

При поступлении входящего частного телефонного вызова в верхнем правом углу появится значок

частного телефонного вызова. В первой строке на дисплее появится сообщение **Тел. вызов.**

- 1 Нажмите и удерживайте кнопку **PTT**, чтобы ответить на вызов и начать разговор. Для прослушивания отпустите кнопку **PTT**.
- 
- 2 Нажмите и удерживайте кнопку , чтобы завершить вызов.  
 В первой строке на дисплее отобразится **Заканч.**  
 Во второй строке на дисплее отобразится **тел. выз...** На дисплее отобразится экран телефонного вызова.  
 На дисплее появится сообщение **Тел. выз законч.**

## Выполнение буферизованного дополнительного набора при входящем частном телефонном вызове

При совершении вызова в верхнем правом углу появится значок телефонного вызова в режиме

частного вызова. В первой строке на дисплее появится сообщение **Тел. вызов.**

- 1 С помощью клавиатуры введите цифры и нажмите  .

Нажмите , а затем  в течение 2 секунд, чтобы вставить паузу. Символ **Р** заменит символы \* и # на дисплее.

В верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появятся введенные знаки.

- 
- 2 Завершите вызов с помощью длительного нажатия кнопки  .

В первой строке на дисплее отобразится **Заканч.**  
 Во второй строке на дисплее отобразится **тел. выз...** На дисплее отобразится экран телефонного вызова.

На дисплее появится сообщение **Тел. выз законч.**

## Выполнение дополнительного набора в режиме реального времени при входящем частном телефонном вызове

При совершении вызова в верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появится сообщение **Тел. вызов**.

- 1 Нажмите кнопку **РТТ** и с помощью клавиатуры введите цифры.

В верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появятся цифры, набранные в режиме реального времени.

- 2 Завершите вызов с помощью длительного нажатия кнопки  .

В первой строке на дисплее отобразится **Заканч.** Во второй строке на дисплее отобразится **тел. выз...** На дисплее отобразится экран телефонного вызова.

На дисплее появится сообщение  
**Тел. выз законч.**

## Получение входящего телефонного группового вызова

При получении входящего телефонного группового вызова в правом верхнем углу появляется значок группового вызова. В первой строке на дисплее отобразится сообщение **Вызов1**.

Нажмите кнопку **РТТ** для разговора и отпустите ее для прослушивания.

## Входящий телефонный мультигрупповой вызов

При получении входящего телефонного мультигруппового вызова в правом верхнем углу появится значок группового вызова. В первой строке на дисплее отобразится сообщение **Мультигрупповой вызов**. Радиостанция активирует звуковые сигналы, и звук входящего мультигруппового вызова прозвучит в динамике радиостанции.

## Выполнение радиовызова

Выбрав канал, вы можете выбрать псевдоним или идентификатор абонента, либо псевдоним или идентификатор группы с помощью следующих средств.

- Ручки выбора каналов.
- Запрограммированная кнопка **доступа одним нажатием** — функция доступа одним нажатием позволяет легко выполнить частный вызов на предварительно заданный идентификатор. Для включения этой функции можно назначить короткое нажатие программируемой кнопки или нажатие с удержанием. Кнопке **вызова одним нажатием** можно назначить только один идентификатор. Радиостанция поддерживает программирование нескольких кнопок **доступа одним нажатием**.
- Список контактов (см. [Настройки контактов на стр. 307](#)).

### УВЕДОМЛЕНИЕ:

Для выполнения зашифрованной передачи в радиостанции должна быть активирована функция конфиденциальности для выбранного канала. Расшифровать сообщение смогут только целевые радиостанции, у которых значение ключа и идентификатор ключа совпадают с соответствующими параметрами вашей радиостанции.

Более подробную информацию см. в разделе [Конфиденциальность на стр. 346](#).

## Выполнение вызова с помощью ручки выбора каналов

Данная функция позволяет пользователям радиостанции выполнять различные типы вызовов: групповой вызов, частный вызов, общий вызов сайта, мультигрупповой вызов.

## Выполнение группового вызова

Для выполнения вызова группы пользователей необходимо, чтобы радиостанция была сконфигурирована как участник этой группы.

- 1 Выберите канал с активным псевдонимом или идентификатором группы. См. [Выбор типа вызова на стр. 273](#).

---

- 2 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) ото рта.

---

- 3 Нажмите кнопку **РТТ** для выполнения вызова.  
Светодиодный индикатор загорится постоянным. В верхнем правом углу появится значок группового вызова. В первой строке на дисплее отобразится псевдоним группового вызова.

---

- 4 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

- 5 Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции начнет мигать зеленый светодиодный индикатор, радиостанция активирует звуковые сигналы, и ответ прозвучит в динамике радиостанции. На дисплее появится значок группового вызова, псевдоним или идентификатор группы, а также

псевдоним или идентификатор передающей радиостанции.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. На дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

## Выполнение частного вызова

Радиостанция может принимать и/или отвечать на частные вызовы, выполняемые отдельными авторизованными радиостанциями, но для выполнения частного вызова радиостанция должна быть соответствующим образом запрограммирована.

Если эта функция не активирована, то при попытке выполнить частный вызов с помощью **кнопки доступа одним нажатием**, или ручки выбора каналов, прозвучит тональный сигнал неуспешного действия.

- 1 Выполните одно из следующих действий.
  - Выберите канал с активным псевдонимом или идентификатором абонента. См. [Выбор типа вызова на стр. 273](#).

- Нажмите запрограммированную кнопку **доступа одним нажатием**.

2 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) ото рта.

3 Нажмите кнопку **РТТ** для выполнения вызова.

Светодиодный индикатор загорится постоянным зеленым цветом. В верхнем правом углу появится значок частного вызова. В первой строке на дисплее отобразится псевдоним вызываемой радиостанции. Во второй строке отобразится состояние вызова.

4 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

5 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции начнет мигать зеленый светодиодный индикатор.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит короткий тональный

сигнал. На дисплее отобразится сообщение **Выз. законч.**

Радиостанцию можно запрограммировать на проверку доступности радиостанции перед выполнением частного вызова. Если вызываемая радиостанция не доступна, прозвучит короткий тональный сигнал, и на дисплее появится мини-уведомление о неуспешном действии.

## Выполнение общего вызова сайта

Эта функция позволяет вызвать всех пользователей, работающих на данном сайте и не участвующих в данный момент в другом вызове. Чтобы использовать эту функцию, радиостанция должна быть запрограммирована соответствующим образом.

Пользователи канала/сайта не могут ответить на общий вызов сайта.

1 Выберите канал с активным псевдонимом группы общего вызова сайта. См. раздел [Выбор типа вызова на стр. 273](#).

2 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) ото рта.

- 3 Нажмите кнопку **РТТ** для выполнения вызова.

Светодиодный индикатор загорится постоянным зеленым цветом. В верхнем правом углу появится значок группового вызова. В первой строке на дисплее появится сообщение *Общий вызов сайта*.

---

- 4 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- 

## Выполнение мультигруппового вызова

Эта функция позволяет вызвать всех пользователей в нескольких группах. Чтобы использовать эту функцию, радиостанция должна быть запрограммирована соответствующим образом.

### **УВЕДОМЛЕНИЕ:**

Ответ пользователей на мультигрупповой вызов не предусмотрен.

- 1 Поворачивайте ручку выбора каналов, чтобы выбрать псевдоним или идентификатор мультигруппы.
- 

- 2 Нажмите кнопку **РТТ** для выполнения вызова.

Светодиодный индикатор загорится постоянным зеленым цветом. На дисплее отобразится псевдоним или идентификатор мультигруппы.

Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

## Выполнение частного вызова с помощью кнопки вызова одним нажатием

### **УВЕДОМЛЕНИЕ:**

Нажатие запрограммированной кнопки должно выполняться на главном экране.

Функция вызова одним нажатием позволяет быстро совершать частные вызовы на предварительно заданный псевдоним или идентификатор частного вызова. Для включения этой функции можно назначить короткое нажатие программируемой кнопки или нажатие с удержанием.

Кнопке вызова одним нажатием можно назначить ТОЛЬКО один псевдоним или идентификатор. Радиостанция поддерживает программирование нескольких кнопок вызова одним нажатием.

- 1 Нажмите запрограммированную кнопку **вызова одним нажатием**, чтобы выполнить частный вызов на предварительно заданный псевдоним или идентификатор.

---

- 2 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) от рта.

---

- 3 Нажмите кнопку **РТТ** для выполнения вызова. Светодиодный индикатор загорится постоянным зеленым цветом.

На дисплее отобразится псевдоним или идентификатор частного вызова.

---

- 4 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

- 5 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

---

## Выполнение вызова с помощью программируемой кнопки ручного набора

Данная функция позволяет пользователям радиостанции выполнять частные вызовы с помощью запрограммированной кнопки ручного набора.

## Выполнение частного вызова

- 1 Нажмите запрограммированную кнопку **ручного набора**, чтобы перейти к экрану ручного набора.

На дисплее появится сообщение **Номер:**.

---

- 2 С помощью клавиатуры введите псевдоним или идентификатор абонента.

---

3 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) ото рта.

---

4 Нажмите кнопку **РТТ** для выполнения вызова.

Светодиодный индикатор загорится постоянным зеленым цветом. В верхнем правом углу появится значок частного вызова. В первой строке на дисплее появится псевдоним абонента. Во второй строке отобразится состояние вызова.

---

5 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

6 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит короткий тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

---

## Выполнение исходящего частного телефонного вызова с помощью программируемой кнопки ручного набора

1 Нажмите запрограммированную кнопку **ручного набора**, чтобы перейти к экрану ручного набора.

На дисплее появится сообщение **Номер:**.

---

2 С помощью клавиатуры введите номер телефона, затем нажмите  **OK**, чтобы осуществить вызов на набранный номер.

Нажмите , чтобы удалить ненужные символы.

Нажмите , а затем  в течение 2 секунд, чтобы вставить паузу. Символ **P** заменит символы \* и # на дисплее.

В первой строке на дисплее появится сообщение **Тел. вызов.** Во второй строке отобразится набранный телефонный номер.

В случае выбора неверного номера на дисплее отобразится мини-уведомление о неуспешном

выполнении действия, Тел. вызов отказ, Ресурс недоступен или Invalid Permissions (Разрешения недействительны).

Если нажата кнопка  и не выбран телефонный номер, прозвучит тональный сигнал успешного действия, затем тональный сигнал неуспешного действия. Дисплей останется неизменным.

---

### 3 Завершите вызов с помощью длительного

нажатия кнопки  .

В первой строке на дисплее отобразится **Заканч.**  
Во второй строке на дисплее отобразится  
Тел. выз...

На дисплее появится сообщение  
Тел. выз законч.

---

## Выполнение исходящего частного телефонного вызова с помощью меню телефона

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  , чтобы выделить элемент **Телефон**, затем нажмите  для выбора.

---

3 Нажмите  , чтобы выделить элемент **Ручной набор**.

В первой строке на дисплее появится сообщение **Номер**, во второй строке появится мигающий курсор.

---

4 С помощью клавиатуры введите номер телефона, затем нажмите  , чтобы осуществить вызов на набранный номер.

Нажмите , чтобы удалить ненужные символы.

Нажмите , а затем  в течение 2 секунд, чтобы вставить паузу. Символ P заменит символы \* и # на дисплее.

В первой строке на дисплее появится сообщение Тел. вызов. Во второй строке отобразится набранный телефонный номер.

В случае выбора неверного номера на дисплее отобразится мини-уведомление о неуспешном выполнении действия, Тел. вызов отказ, Ресурс недоступен или Разрешения недействительны.

Если нажата кнопка  и не выбран телефонный номер, прозвучит тональный сигнал успешного действия, затем тональный сигнал неуспешного действия. Дисплей останется неизменным.

5 Завершите вызов с помощью длительного нажатия кнопки  .

В первой строке на дисплее отобразится Законч. Во второй строке на дисплее появится сообщение Тел. выз...

На дисплее появится сообщение Тел. выз законч.

---

## Выполнение исходящего частного телефонного вызова из списка контактов

### УВЕДОМЛЕНИЕ:

Если в MOTOTRBO Connect Plus Option Board CPS отключен ручной набор телефонного вызова, элемент Номер тел. **не** будет отображаться в меню.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Контакты**, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Ручной набор**, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент **Номер тел.**, затем нажмите  для выбора.  
В первой строке на дисплее появится сообщение **Номер**, во второй строке появится мигающий курсор.

5 С помощью клавиатуры введите номер телефона, затем нажмите , чтобы осуществить вызов на набранный номер.  
Если нажата кнопка **РТТ**, на дисплее появится мини-уведомление о неуспешном выполнении

действия, сообщение **Нажать ОК для отпр.**, и радиостанция вернется к предыдущему экрану.

Нажмите , чтобы удалить ненужные символы.

Нажмите , а затем  в течение 2 секунд, чтобы вставить паузу. Символ **Р** заменит символы \* и # на дисплее.

В первой строке на дисплее появится сообщение **Тел. вызов**. Во второй строке отобразится набранный телефонный номер.

Если нажата кнопка  и не выбран телефонный номер, прозвучит тональный сигнал успешного действия, затем тональный сигнал неуспешного действия. Дисплей останется неизменным.

6 Завершите вызов с помощью длительного нажатия кнопки .

В первой строке на дисплее отобразится **Заканч.** Во второй строке на дисплее появится сообщение **Тел. выз...**

На дисплее появится сообщение  
Тел. выз законч.

---

## Ожидание предоставления канала при исходящем частном телефонном вызове

При выполнении частного телефонного вызова в первой строке на дисплее появится Тел. вызов. Во второй строке отобразится набранный телефонный номер.

При совершении вызова в верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появится телефонный номер.

В случае сбоя на дисплее отобразится мини-уведомление о неуспешном выполнении действия,

Тел. вызов отказ., Ресурс недоступен или Invalid Permissions (Разрешения недействительны).

Завершите вызов с помощью длительного нажатия кнопки .

На дисплее отобразится предыдущий экран.

---

## Выполнение буферизированного дополнительного набора при подключенном исходящем частном телефонном вызове

При совершении вызова в верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появится телефонный номер.

- 1 Введите цифры с помощью клавиатуры.

Нажмите , чтобы удалить ненужные символы.

Нажмите , а затем  в течение

2 секунд, чтобы вставить паузу. Символ P заменит символы \* и # на дисплее.

В первой строке на дисплее появится сообщение Доп. знаки, во второй строке появятся введенные дополнительные символы.

2 Нажмите кнопку  .

Если нажата кнопка РТТ, на дисплее появится мини-уведомление о неуспешном выполнении действия, сообщение Нажать ОК для отпр., и радиостанция вернется к предыдущему экрану.

В верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появится телефонный номер с добавленными дополнительными цифрами.

3 Выполните одно из следующих действий.

- Нажмите  , чтобы вернуться к экрану телефонного вызова.

- Завершите вызов с помощью длительного нажатия кнопки  .

## Выполнение дополнительного набора в режиме реального времени при подключенном исходящем частном телефонном вызове

При совершении вызова в верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появится телефонный номер.

1 Нажмите кнопку РТТ и с помощью клавиатуры введите цифры.

В верхнем правом углу появится значок телефонного вызова в режиме частного вызова. В первой строке на дисплее появится телефонный номер с добавленными дополнительными цифрами.

- 2 Завершите вызов с помощью длительного нажатия кнопки  .

В первой строке на дисплее отобразится **Заканч.**  
Во второй строке на дисплее отобразится **Тел. выз...**

На дисплее появится сообщение  
**Тел. выз законч.**

## Дополнительные функции в режиме Connect Plus

В данной главе описываются функции, доступные на радиостанции.

### Напоминание домашнего канала

Эта функция обеспечивает напоминание, если радиостанция не настроена на домашний канал в течение определенного периода времени.

Если эта функция включена с помощью CPS, когда радиостанция не настроена на домашний канал в течение определенного периода времени,

периодически воспроизводятся тональный сигнал напоминания домашнего канала и звук оповещения; в первой строке на дисплее отображается **He**, а во второй строке — **дом. канал.**

При появлении напоминания можно выполнить одно из следующих действий:

- вернуться на домашний канал;
- временно отключить звук напоминания с помощью программируемой кнопки;
- установить новый домашний канал с помощью программируемой кнопки.

### Автоматическое резервирование

Автоматическое резервирование — это системная функция, которая позволяет совершать и принимать неэкстренные вызовы от выбранного группового контакта в случае определенных сбоев системы Connect Plus.

При возникновении одного из таких сбоев радиостанция выполняет поиск другого сайта Connect Plus. При этом радиостанция может найти работающий сайт Connect Plus или резервный канал (если на радиостанции активирована функция автоматического

резервирования). Резервный канал — это ретранслятор, который является частью системы работающего сайта Connect Plus, но в настоящее время не может взаимодействовать со своим контроллером сайта или сетью Connect Plus. В режиме резервирования этот ретранслятор функционирует как один цифровой ретранслятор. В режиме автоматического резервирования поддерживаются только неэкстренные групповые вызовы. Другие типы вызовов в режиме резервирования не поддерживаются.

## Индикаторы режима автоматического резервирования

Во время работы радиостанции на резервном канале приблизительно каждые 15 секунд (за исключением периода передачи) будет звучать прерывистый тональный сигнал резервного режима. На дисплее будет периодически на короткое время появляться сообщение «Резервный канал». При нажатии кнопки РТТ можно будет вступить в разговор только с выбранным групповым контактом (групповой вызов, мультигрупповой вызов или общий вызов сайта). Выполнение других типов вызовов не поддерживается.

[Отправить отзыв](#)

## Выполнение и прием вызовов в режиме резервирования

### УВЕДОМЛЕНИЕ:

Вызовы могут быть приняты только радиостанциями, отслеживающими тот же резервный канал и выбравшими ту же группу. Вызовы не подключаются к сети других сайтов или ретрансляторов.

Экстренные голосовые вызовы и экстренные сигналы тревоги недоступны в режиме резервирования. При нажатии кнопки экстренного режима в режиме резервирования прозвучит тональный сигнал нажатия недопустимой клавиши. На радиостанциях, оснащенных дисплеем, также появится сообщение "Функция недоступна".

Частные вызовы (между двумя радиостанциями) и телефонные вызовы в режиме резервирования недоступны. При попытке выполнить частный вызов прозвучит тональный сигнал запрета. В этом случае необходимо выбрать нужный контакт группы. Также не поддерживаются следующие типы вызовов: удаленный мониторинг, оповещение о вызове, проверка радиостанции, активация радиостанции,

деактивация радиостанции, обмен текстовыми сообщениями, уведомление об изменении местоположения и вызовы пакетных данных.

Расширенный доступ к информационным каналам (ETSA) не поддерживается в режиме автоматического резервирования. Если два или более пользователей одновременно (или практически одновременно) нажмут кнопку **РТТ**, обе радиостанции могут вести передачу, пока кнопка **РТТ** не будет отпущена. В этом случае возможно, что принимающие радиостанции не смогут распознать ни одной передачи.

Вызовы в режиме резервирования выполняются так же, как при нормальной работе радиостанции. Выберите нужный групповой контакт (используя обычный способ выбора канала радиостанции) и нажмите кнопку **РТТ**, чтобы начать вызов. Возможно, что канал уже будет использоваться другой группой. В этом случае прозвучит тональный сигнал занятого канала, и на дисплее появится сообщение "Канал занят". Вы можете выбрать групповой, мультигрупповой вызов или общий вызов сайта обычным способом выбора канала радиостанции. Во время работы радиостанции на резервном канале мультигрупповой вызов действует так же, как любой другой групповой вызов. Он может

быть принят только радиостанциями, на которых в данный момент выбрана та же мультигруппа.

## Возврат к обычному режиму работы

Если сайт возвращается к нормальному транкинговому режиму работы, когда вы находитесь в зоне действия резервного ретранслятора, радиостанция автоматически выйдет из режима автоматического резервирования. При успешной регистрации радиостанции прозвучит звуковой сигнал. Если вы находитесь в зоне действия работающего сайта (который не находится в режиме резервирования), нажмите кнопку запроса на роуминг (если она запрограммирована на радиостанции) для поиска доступного сайта и регистрации на нем. Если другой доступный сайт не будет найден, после завершения поиска радиостанция вернется в режим автоматического резервирования. При выходе из зоны покрытия резервного ретранслятора радиостанция перейдет в режим поиска (на дисплее появится сообщение *Идет поиск*).

## Radio Check

Эта функция позволяет проверить активность другой радиостанции в системе, не оповещая об этом пользователя этой радиостанции. При этом на целевой радиостанции отсутствует звуковая или визуальная индикация выполняемого действия.

Этой функцией можно воспользоваться, только если соответствующему абоненту присвоен псевдоним или идентификатор.

### Выполнение проверки радиостанции

- 1 Выполните доступ к функции проверки радиостанции.

Элемент управления	Этапы
Запрограммированная кнопка проверки радиостанции	<b>a</b> Нажмите запрограммированную кнопку <b>проверки радиостанции</b> .

Элемент управления	Этапы
	<b>b</b> Нажмите  или  , чтобы выделить нужный псевдоним абонента или идентификатор, затем нажмите  для выбора.
Меню	<b>a</b> Нажмите  для доступа к меню. <b>b</b> Нажмите  или  , чтобы выделить элемент <b>Контакты</b> , затем нажмите  для выбора.

Элемент управления	Этапы	2
	<p><b>c</b> Нажмите  или , чтобы выделить нужный псевдоним абонента или идентификатор, затем нажмите  для выбора.</p> <p><b>d</b> Нажмите  или , чтобы выделить элемент Проверка р/с., затем нажмите  для выбора.</p>	<p>Дождитесь подтверждения.</p> <p>Если вызываемая радиостанция активна в системе, прозвучит тональный сигнал и на дисплее на короткое время появится сообщение Р/с-получ. доступна.</p> <p>Если вызываемая радиостанция не активна в системе, прозвучит тональный сигнал и на дисплее на короткое время появится сообщение Р/с-получ. не доступна.</p> <p>При выполнении проверки через меню радиостанция возвращается к экрану псевдонима или идентификатора абонента.</p> <p>При выполнении проверки с помощью запрограммированной кнопки радиостанция возвращается на главный экран.</p>

На дисплее отобразится нужный псевдоним, указывая на выполнение запроса. Светодиодный индикатор загорится постоянным зеленым цветом.

## Remote Monitor

Функция удаленного мониторинга позволяет включить микрофон вызываемой радиостанции (только псевдоним или идентификатор абонента). На вызываемом абонентском терминале светодиодный индикатор один раз мигнет зеленым цветом. Эту

функцию можно использовать для дистанционного слежения за звуковой активностью вокруг прослушиваемой радиостанции.

Чтобы использовать эту функцию, радиостанция должна быть запрограммирована соответствующим образом.

## Инициализация удаленного мониторинга

### УВЕДОМЛЕНИЕ:

Удаленный мониторинг прекращается автоматически по истечении запрограммированного периода времени или при попытке начать передачу, сменить канал или выключить радиостанцию.

- 1 Выполните доступ к функции удаленного мониторинга.

Элемент управления	Этапы
Запрограммированная кнопка удаленного мониторинга	a Нажмите запрограммированную

Элемент управления	Этапы
	<p>кнопку <b>удаленного мониторинга</b>.</p> <p>b Нажмите  или , чтобы выделить нужный псевдоним абонента или идентификатор, затем нажмите  для выбора.</p>
<b>Меню</b>	<p>a Нажмите  для доступа к меню.</p> <p>b Нажмите  или , чтобы выделить элемент <b>Контакты</b>, затем нажмите  для выбора.</p>

Элемент управления	Этапы
	<p>нажмите  для выбора.</p> <p>В первой строке на дисплее отобразится сообщение Удал. монит.. Во второй строке отобразится псевдоним вызываемой радиостанции, указывая на выполнение запроса. Светодиодный индикатор начнет мигать зеленым цветом.</p> <hr/> <p><b>2</b> Дождитесь подтверждения.</p> <p>В случае успешного выполнения прозвучит тональный сигнал успешного действия, и на дисплее появится сообщение Удал. мон. действует. В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой радиостанции, и на дисплее появится сообщение Удал. монит. и псевдоним вызываемой радиостанции. По истечении периода действия таймера прозвучит тональный сигнал оповещения, и светодиодный индикатор выключится.</p>

В случае сбоя прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение **Отказ удал. мониторинга.**

---

## Сканирование

Эта функция позволяет радиостанции отслеживать и присоединяться к групповым вызовам, определенным в предварительно запрограммированном списке сканирования. При активации сканирования в строке состояния появляется значок сканирования, а светодиодный индикатор мигает желтым цветом в режиме ожидания.

## Включение и выключение сканирования

### УВЕДОМЛЕНИЕ:

Данная процедура позволяет включить или выключить функцию сканирования для всех зон Connect Plus, которые имеют такой же идентификатор сети, как и текущая зона. Важно отметить, что даже когда функция сканирования включена с помощью данной процедуры, сканирование все же может быть деактивировано для некоторых (или всех) групп в списке сканирования. Более подробную информацию см. в разделе [Редактирование списка сканирования на стр. 300](#).

Чтобы включить или выключить функцию сканирования, нажмите запрограммированную кнопку **Сканирование ИЛИ** выполните действия, описанные ниже.

1

Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Скан.**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Вкл.** или **Выкл.**, затем нажмите  для выбора.

- После активации функции сканирования на дисплее появится сообщение **Скан. вкл.**
  - Если функция сканирования активирована, в меню сканирования отображается элемент **Выкл.**
  - После деактивации функции сканирования на дисплее появится сообщение **Скан. выкл.**
  - Если функция сканирования деактивирована, в меню сканирования отображается элемент **Вкл.**
- 

## Ответ на вызов во время сканирования

При выполнении сканирования радиостанция останавливается на группе каналов, где обнаруживает активность. Находясь в режиме ожидания на управляющем канале, радиостанция постоянно прослушивает участников списка сканирования.

1 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) от рта.

---

2 Во время паузы нажмите кнопку **РТТ**. Светодиодный индикатор загорится постоянным зеленым цветом.

---

3 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

4 Для прослушивания отпустите кнопку **РТТ**. Если не ответить на вызов до окончания паузы, радиостанция продолжит сканировать другие группы каналов.

---

## Настраиваемое пользователем сканирование

Если меню списка сканирования активировано, можно добавлять и удалять участников списка сканирования в меню добавления пунктов. Участник списка сканирования должен принадлежать к обычной группе (например, не к мультигруппе или общему вызову сайта/по всей сети), для которой назначено положение селектора канала в зоне Connect Plus с тем же идентификатором сети, что и у текущей выбранной зоны. Псевдоним разговорной группы не должен совпадать с разговорной группой, которая уже включена в список сканирования текущей зоны.

Сканирование можно включать и выключать с помощью меню или запрограммированной кнопки **Вкл./выкл. сканирование**.

Эта функция действует, только когда радиостанция не участвует в вызове. Во время приема вызова радиостанция не может сканировать другие групповые вызовы и поэтому не определяет их передачу. После завершения текущего вызова радиостанция возвращается в таймслот управляющего канала и может выполнить сканирование групп, находящихся в списке сканирования.

[Отправить отзыв](#)

## Включение и выключение функции сканирования

### УВЕДОМЛЕНИЕ:

Данная процедура позволяет включить или выключить функцию сканирования для всех зон, которые имеют такой же идентификатор сети, как и текущая зона. Важно отметить, что даже когда функция сканирования включена с помощью данной процедуры, сканирование все же может быть деактивировано для некоторых (или всех) групп в списке сканирования. Дополнительную информацию см. в следующем разделе.

Если функция сканирования включена, на дисплее отображается значок сканирования. Если при включенной функции сканирования вы не участвуете ни в одном вызове, светодиодный индикатор мигает зеленым и желтым цветом.

Порядок включения и выключения функции сканирования зависит от программных настроек радиостанции. Если на радиостанции запрограммирована кнопка "Сканирование вкл./выкл.", используйте ее для включения и выключения этой функции. Если радиостанция запрограммирована для

включения и выключения функции сканирования через меню, выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент **Скан.**, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент **Вкл.** или **Выкл.**, затем нажмите  для выбора.
  - После деактивации функции сканирования на дисплее на короткое время появится сообщение **Скан. вкл.**
  - После активации функции сканирования на дисплее на короткое время появится сообщение **Скан. выкл.**

## Редактирование списка сканирования

### УВЕДОМЛЕНИЕ:

Если запись списка сканирования оказывается текущей выбранной группой, то радиостанция прослушивает активность текущей выбранной группы независимо от того, отображается ли рядом с ней галочка или нет. Когда радиостанция не участвует в вызове, она прослушивает активность выбранной группы, мультигруппы, общего вызова сайта и группы возврата к экстренной связи по умолчанию (если для нее настроена такая группа). Отключить эту операцию невозможно. Если функция сканирования активирована, радиостанция также будет прослушивать активность участников списка сканирования зоны.

Список сканирования определяет группы, доступные для сканирования. Это список создается во время программирования радиостанции. Если программные настройки радиостанции позволяют редактировать список сканирования, то доступно следующее:

- Функцию сканирования можно активировать и деактивировать для отдельных групп в списке.

- Участников списка сканирования можно добавлять и удалять в меню добавления пунктов. См. [Добавление или удаление группы с помощью меню добавления пунктов на стр. 302.](#)

#### УВЕДОМЛЕНИЕ:

Участник списка сканирования должен принадлежать к обычной группе (не к мультигруппе или общему вызову сайта/по всей сети), для которой назначено положение селектора канала в зоне Connect Plus с тем же идентификатором сети, что и у текущей выбранной зоны.

Псевдоним разговорной группы не должен совпадать с разговорной группой, которая уже включена в список сканирования текущей зоны.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выделить элемент [См.ред. спис.](#), затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить нужное имя группы.

Если перед именем группы установлена галочка, это означает, что для данной группы сканирование уже активировано.

Если галочки нет, значит, сканирование для этой группы в настоящий момент деактивировано.

- 4 Нажмите , чтобы выбрать нужную группу.

Если сканирование в настоящий момент деактивировано для группы, на дисплее отобразится **Акт-ть.**

Если сканирование в настоящий момент активировано для группы, на дисплее отобразится **Деакт.**

- 5 Выберите параметр (**Акт-ть** или **Деакт.**), затем нажмите  для выбора.

В зависимости от выбранного параметра на дисплее радиостанции кратковременно

отобразится сообщение **Скан. вкл. или Скан. выкл.** для подтверждения.

На дисплее радиостанции снова отобразится список сканирования зоны. Если для группы было активировано сканирование, перед именем группы будет отображаться галочка. Если для группы было деактивировано сканирование, галочка перед именем группы будет отсутствовать.

## Добавление или удаление группы с помощью меню добавления пунктов

Радиостанция Connect Plus не позволяет добавлять в список сканирования зоны повторяющийся номер или псевдоним группы (или отображать такой номер или псевдоним в качестве "кандидата на сканирование"). Из-за этого правила список "кандидатов на сканирование", описанный в шагах [шаг 6](#) и [шаг 7](#), иногда меняется после того, как группа была добавлена в список сканирования зоны или удалена из него.

Если программные настройки радиостанции позволяют редактировать список сканирования, чтобы добавить или удалить группу из списка сканирования текущей выбранной зоны, можно воспользоваться меню добавления пунктов.

1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент "Сканирование", затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент <Добавить участников>, затем нажмите  для выбора.

На дисплее отобразится сообщение **Добав. пункты из зоны n** (n = номер первой зоны Connect Plus радиостанции с тем же сетевым идентификатором, что и у текущей выбранной зоны).

4 Выполните одно из следующих действий.

- Если для группы, которую вы хотите добавить в список сканирования, назначено положение ручки выбора каналов в этой зоне, перейдите к [шаг 6](#).
- Если для группы, которую вы хотите добавить в список сканирования, назначено положение ручки выбора каналов в другой зоне Connect Plus, перейдите к [шаг 5](#).

**5** Нажмите  или  , чтобы пролистать список зон Connect Plus, которые имеют тот же идентификатор сети, что и текущая выбранная зона.

**6** После того, как будет найдена зона Connect Plus, в которой для нужной группы назначено положение ручки выбора каналов, нажмите  для выбора.

На дисплее радиостанции отобразится первая запись из списка групп, для которых назначено положение ручки выбора каналов в данной зоне. Группы в этом списке называются "кандидаты на сканирование", потому что их можно добавить в список сканирования текущей выбранной зоны

(или они уже добавлены в список сканирования зоны).

Если в зоне нет групп, которые можно добавить в список сканирования, на дисплее радиостанции отображается сообщение **Кандидатов нет**.

**7** Нажмите  или  , чтобы пролистать список групп-кандидатов.

Если перед псевдонимом группы отображается знак плюса (+), то эта группа в данный момент находится в списке сканирования для выбранной зоны.

Если знак плюса (+) не отображается перед псевдонимом группы, то эта группа в данный момент не находится в списке сканирования, но может быть в него добавлена.

**8** Когда псевдоним нужной группы отобразится на дисплее, нажмите  .

Если эта группа в данный момент не находится в списке сканирования текущей выбранной зоны, на дисплее отобразится сообщение **Добавить** (псевдоним группы).

Если эта группа уже находится в списке сканирования для текущей выбранной зоны, на дисплее отобразится сообщение *Удалить* (псевдоним группы).

- 9 Нажмите , чтобы принять отображаемое сообщение (*Добавить* или *Удалить*).

Об успешном удалении группы из списка будет свидетельствовать отсутствие знака плюса (+) перед псевдонимом группы.

Об успешном добавлении группы в список будет свидетельствовать отображение знака плюса (+) перед псевдонимом группы.

При попытке добавить группу в заполненный список радиостанция отображает сообщение *Список полон*. В такой ситуации перед добавлением новой группы необходимо удалить какую-нибудь группу из списка сканирования.

- 10 По завершении нажмите  столько раз, сколько необходимо для того, чтобы вернуться в нужное меню.

## Общие сведения об операции сканирования

### УВЕДОМЛЕНИЕ:

Если радиостанция выполняет вызов участника списка сканирования зоны из другой зоны и таймер ожидания вызова истекает до того, как был получен ответ, для того чтобы ответить, нужно перейти к зоне и каналу участника списка сканирования и инициировать новый вызов.

В некоторых случаях вы можете пропустить вызовы групп из вашего списка сканирования. Если вызов пропущен по одной из следующих причин, то это не говорит о неисправности радиостанции. Такая работа функции сканирования Connect Plus является нормальной.

- Функция сканирования не включена (на дисплее должен отображаться значок сканирования).
- Участник списка сканирования отключен с помощью меню (см. [Редактирование списка сканирования на стр. 300](#)).
- Пользователь уже участвует в вызове.

- Ни один из участников сканируемой группы не зарегистрирован на данном сайте (только для многосайтовых систем).

## Отклик сканирования

Если радиостанция сканирует вызов из списка сканирования выбранной группы, и если во время сканируемого вызова нажата кнопка **РТТ**, работа радиостанции будет зависеть от того, был ли отклик сканирования включен или отключен во время программирования радиостанции. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

### Отклик сканирования отключен

Радиостанция оставляет сканируемый вызов и пытается осуществить передачу контакту канала, выбранному в данный момент времени. После того как истечет пауза вызова контакта, выбранного в данный момент, радиостанция вернется на домашний канал и заново запустит таймер паузы сканирования. Радиостанция возобновит групповое сканирование после истечения таймера паузы сканирования.

### Отклик сканирования включен

Если кнопка **РТТ** нажата во время паузы сканируемого группового вызова, радиостанция попытается осуществить передачу сканируемой группе.

### УВЕДОМЛЕНИЕ:

Если при сканировании вызова группы, для которой не назначен канал в текущей выбранной зоне, истекло время паузы вызова, то для ответа этой группе необходимо переключиться на соответствующую зону и выбрать канал группы.

## Изменение приоритета разговорной группы

Функция мониторинга приоритетов позволяет радиостанции автоматически принимать передачу от разговорной группы с более высоким приоритетом во время обработки другого вызова. При переключении радиостанции на вызов с более высоким приоритетом воспроизводится тональный сигнал.

Для разговорных групп предусмотрено два уровня приоритета: P1 и P2. Значение P1 соответствует более высокому приоритету, чем P2.

**УВЕДОМЛЕНИЕ:**

Если в ПО MOTOTRBO Connect Plus Option Board CPS настроен идентификатор группы возврата к экстренной связи по умолчанию, для разговорных групп используются три уровня приоритета: P0, P1 и P2. Уровень P0 соответствует постоянному идентификатору группы возврата к экстренной связи и указывает на самый высокий приоритет. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент **Скан.**, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент **См.ред. спис.**, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить требуемую разговорную группу, затем нажмите  для выбора.

---

- 5 Нажмите  или , чтобы выделить элемент **Ред. приоритет**, затем нажмите  для выбора.

---

- 6 Нажмите  или , чтобы выделить требуемый уровень приоритета, затем нажмите  для выбора.

На дисплее появится мини-уведомление об успешном выполнении действия, после чего откроется предыдущий экран. Значок приоритета появится слева от разговорной группы.

## Настройки контактов

### УВЕДОМЛЕНИЕ:

В списке контактов Connect Plus можно добавлять и редактировать идентификаторы абонентов. Функция удаления идентификаторов абонентских терминалов доступна только для дилера.

Если для канала активирована функция конфиденциальности, то на нем можно выполнять частные вызовы с шифрованием. Вызываемая радиостанция может дескремблировать передачу, только если ее секретный ключ или значение ключа и идентификатор ключа совпадают с соответствующими параметрами вашей радиостанции.

Доступ к списку контактов зависит от конфигурации зоны:

- Если в радиостанции настроена конфигурация только для одной зоны, список контактов отображает непосредственно список из текущей выбранной зоны.
- Если в радиостанции настроены конфигурации нескольких зон, в папке контактов зон отображаются

все зоны с идентификаторами сети, которые совпадают с текущей выбранной зоной.

Пользователь может получить доступ к контактам в этих зонах.

Список контактов — это адресная книга вашей радиостанции. Каждый пункт соответствует псевдониму или идентификатору, который используется для инициирования вызова.

В каждой зоне можно создать список контактов, содержащий до 100 пунктов. Доступны следующие типы контактов:

- Частный вызов
- Групповой вызов
- Мультигрупповой вызов
- Голосовой вызов по всем сайтам
- Текстовый вызов по всем сайтам
- Вызов диспетчера

Вызов диспетчера используется для отправки текстового сообщения на компьютер диспетчера через сторонний сервер текстовых сообщений.

## Выполнение частного вызова из списка контактов

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент **Контакты**, затем нажмите  для выбора.  
Пункты сортируются в алфавитном порядке.

---

- 3 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) ото рта.

---

- 4 Нажмите кнопку **РТТ** для выполнения вызова.  
Светодиодный индикатор загорится постоянным зеленым цветом.

---

- 5 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

- 6 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом, и на дисплее появится идентификатор передающего пользователя.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

Прозвучит короткий тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

## Выполнение вызова с помощью поиска псевдонима

Для доступа к псевдониму требуемого абонента можно использовать буквенно-цифровой поиск или поиск псевдонима.

Этой функцией можно воспользоваться, только находясь в списке контактов.

- 1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент **Контакты**, затем нажмите  для выбора.

Пункты сортируются в алфавитном порядке.

3 Наберите первый символ нужного псевдонима, затем нажмите кнопку  или , чтобы найти нужный псевдоним.

4 Держите микрофон на расстоянии примерно 2,5–5 см (1-2 дюйма) от рта.

5 Нажмите кнопку **РТТ** для выполнения вызова. Светодиодный индикатор загорится постоянным зеленым цветом. На дисплее отобразится псевдоним получателя.

6 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

7 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

На дисплее появится сообщение **Выз. законч.**

## Добавление нового контакта

1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент **Контакты**, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Новый контакт**, затем нажмите  для выбора.

4 С помощью клавиатуры введите номер контакта и нажмите , чтобы подтвердить.

5 С помощью клавиатуры введите имя контакта и нажмите , чтобы подтвердить.

6 При добавлении контакта радиостанции нажмите  или , чтобы выделить необходимый тип звонка, затем нажмите  для выбора.

После этого прозвучит тональный сигнал успешного выполнения, а на дисплее появится сообщение Контакт сохр-н.

## Настройки сигналов вызова

Данная настройка позволяет пользователям радиостанции настраивать конфигурацию вызовов или звуковые сигналы текстовых сообщений.

## Активация и деактивация сигналов вызова для оповещений о вызове

Для принимаемых оповещений о вызове можно выбрать, включить или выключить тональный сигнал вызова.

1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент Утилиты, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент Параметры р/с, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент Тоны/опов., затем нажмите  для выбора.

5 Нажмите  или , чтобы выделить элемент **Сигналы выз.**, затем нажмите  для выбора.

---

6 Нажмите  или , чтобы выделить элемент **Опов. о выз.**, затем нажмите  для выбора.  
Текущий тональный сигнал отмечен значком ✓.

---

7 Нажмите  или , чтобы выбрать нужный тональный сигнал, затем нажмите  для выбора.  
Рядом с выбранным сигналом появится значок ✓.

---

## Активация и деактивация сигналов вызова для частных вызовов

Для получаемых частных вызовов можно включить или выключить тональные сигналы вызова.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Тоны/опов.**, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Сигналы выз.**, затем нажмите  для выбора.

---

6 Нажмите  или , чтобы выделить элемент **Частн. вызов**, затем нажмите  для выбора.

---

7 Нажмите , чтобы активировать или деактивировать сигналы частных вызовов.

Если сигналы частных вызовов активированы, на дисплее рядом с сообщением **Активировано** появится значок .

Значок  не отображается, когда сигналы частных вызовов деактивированы.

---

## Активация и деактивация сигналов вызова для текстовых сообщений

Для принимаемых текстовых сообщений можно включить или выключить тональный сигнал вызова.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Тонь/опов.**, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Сигналы выз.**, затем нажмите  для выбора.

---

6 Нажмите  или , чтобы выделить элемент **Текст. сообщ.**, затем нажмите  для выбора.  
Текущий тональный сигнал отмечен значком .

---

7 Нажмите  или , чтобы выбрать нужный тональный сигнал, затем нажмите  для выбора.  
Рядом с выбранным сигналом появится значок .

---

## Выбор типа оповещения о вызове

### УВЕДОМЛЕНИЕ:

Программируемая кнопка **типа звонка оповещения** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Радиостанцию можно запрограммировать на один предустановленный вибровывоз. Если элемент "Все тоны" деактивирован, радиостанция отобразит значок "Все тоны без звука". Если элемент "Все тоны" активирован, отобразится значок соответствующего типа сигнала оповещения.

Радиостанция подает однократный сигнал вибровывоза в случае кратковременного типа тонального сигнала. Радиостанция подает повторяющийся сигнал вибровывоза в случае повторяющегося типа звонка. При использовании режима "Звонок и вибрация" радиостанция подаст определенный тип звонка в случае любой входящей передачи (например, оповещение о вызове или сообщение). Он звучит как тональный сигнал успешного действия или пропущенный вызов.

## Оповещение с нарастающей громкостью

Радиостанцию можно запрограммировать на непрерывное оповещение пользователя, когда он не отвечает на вызов. При этом громкость тонального сигнала оповещения постепенно автоматически повышается. Эта функция называется оповещением с нарастающей громкостью.

## Функции журнала вызовов

Радиостанция ведет учет всех недавних исходящих, ответных и пропущенных частных вызовов. Журнал вызовов позволяет просматривать недавние вызовы и управлять ими.

В каждом списке вызовов можно выполнять следующие операции:

- Delete
- Просмотр информации

## Просмотр недавних вызовов

Существуют следующие списки вызовов: Пропущен., Ответен. и Исходящие.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент Журнал вызовов, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить нужный список, затем нажмите  для выбора. На дисплее появится список вызовов, начиная с последнего по времени.

---

- 4 Нажмите  или , чтобы просмотреть список.  
Для выполнения частного вызова с текущим выбранным псевдонимом или идентификатором нажмите кнопку **PTT**.

---

## Удаление вызова из списка вызовов

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  , чтобы выделить элемент Журнал вызовов, затем нажмите  для выбора.

---

- 3 Нажмите  или  , чтобы выделить требуемый список, затем нажмите  для выбора.  
  
Если выбранный список вызовов не содержит ни одного пункта, на дисплее появится сообщение Список пуст. Кроме того, если активированы тональные сигналы клавиатуры, прозвучит сигнал низкой тональности.

---

- 4 Нажмите  или  , чтобы выделить нужный псевдоним или идентификатор, затем нажмите  для выбора.

---

- 5 Нажмите  или  , чтобы выделить элемент Удалить, затем нажмите  для выбора.

---

- 6 Выполните одно из следующих действий.
  - Чтобы удалить пункт, нажмите  для выбора элемента Да. На дисплее появится сообщение Пункт удален.
  - Нажмите  или  , чтобы выделить элемент Нет, затем нажмите кнопку  , чтобы вернуться к предыдущему экрану.

---

## Просмотр информации в списке вызовов

- 1 Нажмите  для доступа к меню.

---

2 Нажмите  или  , чтобы выделить элемент Журнал вызовов, затем нажмите  для выбора.

---

3 Нажмите  или  , чтобы выделить требуемый список, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить нужный псевдоним или идентификатор, затем нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить элемент Дет. данные, затем нажмите  для выбора.

На дисплее отображаются данные списка вызовов.

---

## Функция оповещения о вызове

Функция оповещения о вызове позволяет оповестить пользователя определенной радиостанции о необходимости вызвать вас, когда у него будет такая возможность.

Доступ к функции осуществляется через меню с помощью списка контактов, ручного набора или запрограммированной кнопки **доступа одним нажатием**.

## Ответ на оповещение о вызове

Для ответа на оповещение о вызове выполните следующие действия.

При получении оповещения о вызове:

- Прозвучит повторяющийся тональный сигнал.
- Светодиодный индикатор начнет мигать желтым цветом.

- На дисплее появится список уведомлений, содержащий оповещения о вызове с псевдонимом или идентификатором вызывающей радиостанции.

В зависимости от конфигурации, выбранной дилером или системным администратором, можно ответить на оповещение о вызове, выполнив следующие действия.

- Нажмите кнопку **PTT** для выполнения частного вызова, чтобы ответить непосредственно вызывающему абоненту.
- Нажмите кнопку **PTT** для поддержания связи с разговорной группой. Оповещение о вызове будет перемещено в журнал пропущенных вызовов, доступный в меню журнала вызовов. На вызов абонента можно ответить из журнала пропущенных вызовов.

Для получения дополнительной информации см. разделы [Список уведомлений на стр. 222](#) и [Функции журнала вызовов на стр. 149](#).

## Создание оповещения о вызове из списка контактов

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент **Контакты**, затем нажмите  для выбора.

---

- 3 Выполните одно из действий, описанных ниже, чтобы выделить необходимый псевдоним или идентификатор абонента.
  - напрямую выберите псевдоним абонента
  - Нажмите  или , чтобы выделить необходимый псевдоним абонента, затем нажмите  для выбора.
  - используйте меню *Ручной набор*.

- Нажмите  или , чтобы выделить элемент Ручной набор, затем нажмите  для выбора.
- На дисплее появится экран ввода текста с помощью ручного набора. Введите идентификатор абонента, затем нажмите .

4

Нажмите  или , чтобы выделить элемент Опов. о выз, затем нажмите  для выбора.

На дисплее появится сообщение Опов. о выз: <псевдоним или идентификатор абонента>сообщение Опов. о выз, а также псевдоним или идентификатор абонента, указывая на то, что оповещение о вызове отправлено.

Во время отправки оповещения о вызове светодиодный индикатор постоянно горит зеленым цветом.

При подтверждении получения оповещения о вызове на дисплее появится сообщение Оп. о выз. успешное.

В случае неподтверждения получения оповещения о вызове на дисплее появится сообщение Опов. о выз. не удалось.

## Создание оповещения о вызове с помощью кнопки доступа одним нажатием

Нажмите запрограммированную кнопку **доступа одним нажатием**, чтобы отправить оповещение о вызове на предварительно заданный псевдоним.

На дисплее появится сообщение Опов. о выз., а также псевдоним или идентификатор абонента, что означает, что оповещение о вызове отправлено.

Во время отправки оповещения о вызове светодиодный индикатор постоянно горит зеленым цветом.

При подтверждении получения оповещения о вызове на дисплее появится

Оп. о выз. успешное.

В случае неподтверждения получения оповещения о вызове на дисплее появится

Опов. о выз. не удалось.

#### УВЕДОМЛЕНИЕ:

Эта функция приобретается отдельно. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение режима без звука

Для включения режима без звука выполните следующие действия.

Для доступа к этой функции можно использовать программируемую кнопку **режима без звука**.

При включении режима без звука происходит следующее.

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится надпись **Беззв. реж. вкл.**
- Светодиодный индикатор красного цвета начинает мигать и продолжает мигать до выхода из режима без звука.
- На дисплее на главном экране отображается значок **режима без звука**.
- Звук радиостанции выключается.

## Беззвучный режим

Режим без звука предоставляет пользователю возможность отключить все звуковые уведомления на радиостанции.

После активации беззвучного режима звук всех звуковых уведомлений отключается, кроме функций с высоким уровнем приоритета, например связанные с режимом экстренной связи.

После выхода из беззвучного режима радиостанция может воспроизводить входящие звуковые сигналы и аудиопередачи.

- Таймер режима без звук начинает обратный отсчет в зависимости от заданного временного интервала.

## Настройка таймера режима без звука

Функцию режима без звука можно включить, предварительно настроив таймер режима без звука на определенный временной интервал.

Продолжительность таймера настраивается в меню радиостанции в диапазоне 0,5–6 часов. Выход из режима без звука происходит после окончания действия таймера.

Если значение длительности таймера установить на "0", радиостанция будет оставаться в режиме без звука неопределенное количество времени до нажатия запрограммированной кнопки **режима без звука**.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента

**Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента

**Тайм. беззв.** Нажмите  для выбора.

- 5 Нажмите  или  для изменения числового значения каждой цифры, и нажмите

.

## Выход из режима без звука

Выход из этого режима выполняется автоматически после окончания таймера режима без звука.

Для выхода из режима без звука вручную можно выполнить следующие действия.

- Нажмите запрограммированную кнопку **режима без звука**.

- Выберите любую запись и нажмите **РТТ**.

При отключении режима без звука происходит следующее.

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится надпись *Беззв. реж. выкл.*
- Светодиодный индикатор красного цвета перестает мигать и отключается.
- Значок **режима без звука** пропадает с главного экрана.
- Звук на радиостанции включается, состояние динамика восстанавливается.
- Если действие таймера не окончено, таймер режима без звука останавливается.

#### **УВЕДОМЛЕНИЕ:**

Режим без звука также активируется, если пользователь осуществляет голосовую передачу или переключается на незапрограммированный канал.

## Работа в экстренном режиме

#### **УВЕДОМЛЕНИЕ:**

Если на радиостанции запрограммирован тип инициации экстренного режима "Беззвучный" или "Беззвучный с голосом", то в большинстве случаев радиостанция будет автоматически выходить из беззвучного режима работы после завершения экстренного вызова или экстренного оповещения. Исключение составляют случаи, когда в качестве экстренного режима выбран режим экстренного оповещения, а в качестве типа экстренного режима выбран тип "Беззвучный". Если радиостанция запрограммирована таким образом, она будет работать в беззвучном режиме, пока пользователь не нажмет кнопку **РТТ** или кнопку, настроенную для выключения экстренного режима.

Экстренные голосовые вызовы и экстренные оповещения не поддерживаются в режиме автоматического резервирования Connect Plus. Для получения дополнительной информации см. раздел [Автоматическое резервирование на стр. 290](#).

Экстренное оповещение служит для уведомления о чрезвычайных обстоятельствах. Переход в экстренный режим можно совершить в любой момент, с любого экрана и даже при наличии активности на текущем канале. При нажатии кнопки **экстренного режима** активируется запрограммированный экстренный режим. Запрограммированный экстренный режим также может быть инициирован включением дополнительной функции "Упавший человек". Функция экстренного режима на радиостанции может быть отключена.

Дилер может установить длительность нажатия запрограммированной кнопки **экстренного режима**, кроме длительного нажатия, которое аналогично для всех кнопок.

### Короткое нажатие

От 0,05 секунды до 0,75 секунды.

### Длительное нажатие

От 1,00 секунды до 3,75 секунды.

За кнопкой **экстренного режима** закреплена функция включения/выключения экстренного режима. Для получения сведений о назначении кнопки **экстренного режима** обратитесь к дилеру.

- Если короткое нажатие кнопки **экстренного режима** назначено для включения экстренного режима, то

длительное нажатие кнопки **экстренного режима** назначено для выхода из экстренного режима.

- Если длительное нажатие кнопки **экстренного режима** назначено для включения экстренного режима, то короткое нажатие кнопки **экстренного режима** назначено для выхода из экстренного режима.

Радиостанция, на которой выбрана зона Connect Plus, поддерживает три экстренных режима.

### Экстренный вызов

Для передачи голосового сообщения на назначенном таймслоте экстренной связи необходимо нажать кнопку **РТТ**.

### Экстренный вызов с последующей голосовой передачей

При первой передаче на назначенном таймслоте экстренной связи микрофон автоматически активируется, и пользователь может говорить, не нажимая кнопку **РТТ**. Микрофон остается включенным в таком режиме в течение запрограммированного времени. Для последующей передачи голосового сообщения в этом же экстренном вызове необходимо нажать кнопку **РТТ**.

### **Экстренное оповещение**

Экстренное оповещение не является голосовым вызовом. Это уведомление об экстренной ситуации, отправляемое на радиостанции, настроенные для приема таких оповещений. Радиостанция отправляет экстренное оповещение через управляющий канал сайта, на котором она зарегистрирована в данный момент. Экстренное оповещение принимается радиостанциями в сети Connect Plus, которые запрограммированы на его прием (независимо от сайта сети, на котором они зарегистрированы).

Для кнопки экстренного режима в каждой зоне можно назначить только один из экстренных режимов. Кроме того, каждый экстренный режим имеет следующие типы:

#### **Обычный**

Радиостанция инициирует экстренный режим и включает звуковые и/или визуальные индикаторы.

#### **Беззвучный**

Радиостанция инициирует экстренный режим без звуковых или визуальных индикаторов. Все звуковые или визуальные индикаторы экстренного режима будут подавляться, пока пользователь не

нажмет кнопку **PTT** для инициации голосовой передачи.

#### **Беззвучный с голосом**

Аналогично беззвучному типу, за исключением того, что радиостанция будет включать некоторые голосовые передачи.

## **Прием входящего экстренного сигнала**

Радиостанция может быть запрограммирована для воспроизведения тонального сигнала оповещения и отображения информации об экстренном уведомлении на дисплее. Если это так, при приеме экстренного вызова или экстренного сигнала оповещения на дисплее отобразится экран со сведениями об экстренном уведомлении: значок экстренного сигнала, псевдоним или идентификатор запрашивающей радиостанции, контакт группы, который используется для экстренного вызова, и еще одна дополнительная строка с информацией. Дополнительной информацией является имя зоны, содержащий контакт группы.

В настоящее время радиостанция отображает только последний декодированный экстренный сигнал. Если до проверки предыдущего экстренного сигнала был

получен следующий, сведения о новом экстренном сигнале заменят сведения о предыдущем.

В зависимости от программных настроек радиостанции экран со сведениями об экстренном сигнале (или со списком сигналов оповещения) может оставаться на дисплее радиостанции даже после завершения экстренного сигнала. Можно сохранить сведения об экстренном сигнале в список сигналов оповещения или удалить их, как описано в следующих разделах.

## Сохранение сведений об экстренном сигнале в список сигналов оповещения

Сохранение сведений об экстренном сигнале в список сигналов оповещения позволяет снова просмотреть эти сведения позже, выбрав список сигналов оповещения в главном меню.

- 1 Когда отображается экран со сведениями об экстренном сигнале (или со списком сигналов оповещения), нажмите  .  
Отобразится экран **выхода из списка сигналов**.

2 Выполните одно из следующих действий.

- Выберите **Да** и нажмите  , чтобы сохранить сведения об экстренном сигнале в список сигналов оповещения и выйти из экрана сведений об экстренном сигнале (или из экрана списка сигналов оповещения).
- Выберите **Нет** и нажмите  , чтобы вернуться к экрану сведений об экстренном сигнале (или к экрану списка сигналов оповещения).

## Удаление сведений об экстренном сигнале

- 1 Когда отображается экран со сведениями об экстренном сигнале, нажмите  .  
Отобразится экран **Удалить**.
- 2 Выполните одно из следующих действий.

- Выберите **Да** и нажмите , чтобы удалить сведения об экстренном сигнале.
  - Выберите **Нет** и нажмите , чтобы вернуться к экрану со сведениями об экстренном сигнале.
- 

## Ответ на экстренный вызов

### УВЕДОМЛЕНИЕ:

Если вы не ответите на экстренный вызов в течение паузы экстренного вызова, он будет завершен. Чтобы поговорить с группой по истечении паузы экстренного вызова, необходимо сначала выбрать назначенный этой группе канал (если он еще не выбран). Затем нажмите кнопку **РТТ**, чтобы инициировать неэкстренный вызов группы.

- 1 При поступлении экстренного вызова нажмите любую кнопку, чтобы прервать всю индикацию полученных экстренных вызовов.
- 

- 2 Нажмите кнопку **РТТ**, чтобы начать голосовую передачу для группы экстренного режима.  
Это сообщение услышат все радиостанции, выполняющие мониторинг данной группы.
- 

- 3 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

Светодиодный индикатор загорится зеленым цветом.

---

- 4 Для прослушивания отпустите кнопку **РТТ**.

При ответе радиостанции, с которой был отправлен экстренный сигнал оповещения, светодиодный индикатор начнет мигать зеленым цветом. На дисплее появится значок группового вызова, идентификатор группы и идентификатор передающей радиостанции.

---

## Ответ на экстренное оповещение

### УВЕДОМЛЕНИЕ:

Не следует использовать для голосовой связи контакт группы, который используется для экстренного оповещения. Это может помешать другим радиостанциям отправлять и получать экстренные оповещения в пределах данной группы.

Экстренное оповещение, полученное от радиостанции, означает, что ее пользователь находится в экстренной ситуации. Чтобы ответить на оповещение, можно выполнить частный вызов радиостанции, отправляющей экстренный сигнал, групповой вызов разговорной группы, отправить на радиостанцию оповещение о вызове, выполнить удаленный мониторинг этой радиостанции и т.п. Выбор способа ответа зависит от вашей организации и конкретной ситуации.

## Игнорирование вызова возврата к экстренной связи

Эта дополнительная функция позволяет радиостанции игнорировать активный вызов возврата к экстренной связи.

Функцию игнорирования вызова возврата к экстренной связи можно включить только на радиостанции, настроенной с помощью ПО для пользовательского программирования Connect Plus (CPCPS).

Если эта функция включена, радиостанция не уведомляет об экстренном вызове с помощью индикации и не принимает аудиосигналы на идентификатор группы возврата к экстренной связи по умолчанию.

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Инициация экстренного вызова

### УВЕДОМЛЕНИЕ:

Если на радиостанции выбран тип экстренного режима "Беззвучный", во время работы в экстренном режиме радиостанция не будет отображать звуковые или визуальные индикаторы, пока пользователь не нажмет кнопку **РТТ** для начала голосовой передачи. Если выбран тип "Беззвучный с голосом", радиостанция изначально не будет отображать звуковые или визуальные индикаторы, указывающие на ее работу в экстренном режиме. Однако при получении ответа на экстренный вызов радиостанция воспроизведет его. Индикаторы экстренного режима появятся только после нажатия кнопки **РТТ** для начала голосовой передачи.

В обоих режимах работы (беззвучном и беззвучном с голосом) радиостанция автоматически выйдет из беззвучного режима после завершения экстренного вызова.

- 1 Нажмите запрограммированную кнопку **экстренного режима**.

- 2 Нажмите кнопку **РТТ**, чтобы начать голосовую передачу для группы экстренного режима.

Когда кнопка **РТТ** будет отпущена, экстренный вызов будет продолжаться в течение заданного времени ожидания экстренного вызова.

Если в это время нажать кнопку **РТТ**, экстренный вызов будет продолжен.

---

## Инициация экстренного вызова с последующей голосовой передачей

Для работы в этом режиме радиостанция должна быть запрограммирована соответствующим образом.

Когда включен этот режим работы, то при нажатии запрограммированной кнопки **экстренного режима** и получении радиостанцией выделенного таймслота микрофон автоматически активируется без нажатия кнопки **РТТ**. Этот режим работы микрофона называется "горячий микрофон". Режим "горячий микрофон" включается для первой голосовой передачи, осуществляемой с радиостанции во время экстренного вызова. Для последующей передачи голосового

сообщения в этом же экстренном вызове необходимо нажать кнопку **РТТ**.

- 1 Нажмите запрограммированную кнопку **экстренного режима**.

---

- 2 Микрофон останется активным в течение времени, заданного для режима "горячего микрофона" при программировании кода плага радиостанции.  
В течение этого времени светодиодный индикатор будет гореть зеленым цветом.

---

- 3 Чтобы говорить дольше запрограммированного времени, нажмите и удерживайте кнопку **РТТ**.

---

## Инициация экстренного оповещения

### УВЕДОМЛЕНИЕ:

Если на радиостанции запрограммирован тип экстренного режима "Беззвучный" или "Беззвучный с голосом", радиостанция не будет отображать звуковые или визуальные индикаторы, указывающие на отправку экстренного оповещения. Если запрограммирован тип экстренного режима "Беззвучный", радиостанция будет работать в этом режиме до тех пор, пока не будет нажата кнопка РТТ или кнопка, настроенная для отключения экстренного режима. Если запрограммирован режим "Беззвучный с голосом", то радиостанция автоматически прекращает работу в беззвучном режиме при широкопередаточной передаче экстренного оповещения контроллером сайта.

Нажмите оранжевую кнопку **экстренного режима**.

При передаче экстренного оповещения контроллеру сайта на дисплее радиостанции отобразится значок экстренного режима, контакт

группы, который используется для экстренного оповещения, и сообщение *Сигн. пер.*

После успешной отправки экстренного сигнала тревоги и его широкоэвещательной передачи на другие радиостанции прозвучит тональный сигнал успешного действия, и на дисплее отображается *Сигн. отпр.*

Если экстренное оповещение не было передано, прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение *Сигн. не получ.*

## Выход из экстренного режима

### УВЕДОМЛЕНИЕ:

Если экстренный вызов завершен в результате истечения ожидания экстренного вызова, но экстренная ситуация сохраняется, нажмите кнопку **экстренного режима** еще раз, чтобы начать процесс заново.

Если экстренное оповещение было инициировано нажатием запрограммированной кнопки **экстренного режима**, радиостанция автоматически выйдет из экстренного режима, получив ответ от системы Connect Plus.

При нажатии запрограммированной кнопки **экстренного режима** для инициации экстренного вызова радиостанции будет автоматически назначен доступный канал по мере его освобождения. Когда радиостанция завершит передачу экстренного сообщения, отменить экстренный вызов будет невозможно. В случае если вы случайно нажали кнопку или экстренная ситуация отсутствует, вы можете сообщить об этом по выделенному каналу. Когда кнопка **РТТ** будет отпущена, вызов будет завершен после истечения времени паузы экстренного вызова.

Если на радиостанции настроен режим экстренного вызова с последующим голосовым сигналом, воспользуйтесь периодом действия «горячего микрофона», чтобы объяснить свою ошибку, затем нажмите и отпустите кнопку **РТТ** для прекращения передачи. Вызов будет завершен по истечении времени паузы экстренного вызова.

## Обмен текстовыми сообщениями

Радиостанция может принимать данные, например текстовые сообщения, отправленные с другой радиостанции или с помощью приложения для текстовых сообщений.

Существует два типа текстовых сообщений: короткие текстовые сообщения цифровой мобильной радиосвязи (DMR) и текстовые сообщения. Максимальная длина короткого текстового сообщения DMR составляет 23 символа. Максимальная длина текстового сообщения вместе со строкой темы сообщения составляет 280 символов. Строка темы отображается только при получении сообщения, отправленного с помощью приложения электронной почты.

#### **УВЕДОМЛЕНИЕ:**

Максимальная длина текстовых сообщений в символах относится только к моделям с программным и аппаратным обеспечением последней версии. Для моделей радиостанций с программным и аппаратным обеспечением устаревших версий максимальная длина текстовых сообщений составляет 140 символов. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для арабского языка ввод текста выполняется справа налево.

## Отправка шаблона текстового сообщения

Радиостанция поддерживает до 10 шаблонов текстовых сообщений, запрограммированных дилером.

Шаблоны сообщения задаются заранее, но допускают редактирование при отправке.

Если вы отправляете сообщение, выполните одно из следующих действий, чтобы выбрать получателя:

- Нажмите  или , чтобы выбрать требуемый псевдоним, затем нажмите  для выбора.
- Нажмите  или , чтобы выделить элемент *Ручной набор*, затем нажмите  для выбора. В первой строке на дисплее появится сообщение *Номер:*. Во второй строке появится мигающий курсор. Введите

псевдоним или идентификатор абонента,  
затем нажмите  .

На дисплее появится уведомление Сообщение отправляется, сопровождающее процесс отправки сообщения.

Если сообщение будет отправлено успешно, прозвучит тональный сигнал и на дисплее отобразится текст Сообщение отправлено успешно.

Если сообщение не удастся отправить, прозвучит сигнал низкой тональности и на дисплее появится сообщение Сбой отправки сообщения.

Если текстовое сообщение не удастся отправить, на дисплее радиостанции появится экран опции Отпр. снова (см. раздел [Управление текстовыми сообщениями после сбоя отправки на стр. 335](#)).

---

[Отправить отзыв](#)

## Отправка шаблона текстового сообщения с помощью кнопки доступа одним нажатием

Возможность отправки быстрых текстовых сообщений с помощью программируемой кнопки программируется дилером.

Чтобы отправить заранее заданный шаблон текстового сообщения на заранее заданный псевдоним, нажмите запрограммированную кнопку **доступа одним нажатием**.

На дисплее появится уведомление Сообщение отправляется, сопровождающее процесс отправки сообщения.

---

Если сообщение будет отправлено, прозвучит тональный сигнал и на дисплее отобразится текст Сообщение отправлено.

Если сообщение не удастся отправить, прозвучит сигнал низкой тональности и на дисплее отобразится текст Сбой отправки сообщения.

Если текстовое сообщение не удастся отправить, на дисплее радиостанции появится экран опции

Отпр. снова (см. раздел [Управление текстовыми сообщениями после сбоя отправки на стр. 335](#)).

## Доступ к папке «Черновики»

В папке "Черновики" может храниться до 10 (десяти) сообщений. Если папка заполнена, то при добавлении в нее нового текстового сообщения самое старое сообщение автоматически удаляется.

### УВЕДОМЛЕНИЕ:

Вы можете отредактировать сохраненное текстовое сообщение перед отправкой. Эта функция доступна только при наличии микрофона с клавиатурой (см. [Редактирование и отправка сохраненного текстового сообщения на стр. 333](#).) Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки

## Просмотр сохраненного текстового сообщения

- 1 Выполните доступ к функции **Текстовые сообщения**.

Элементы управления	Этапы
<b>Запрограммированная кнопка текстовых сообщений</b>	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
<b>Меню</b>	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент Сообщения, затем нажмите  для выбора.</p>

- 2 Нажмите  или , чтобы выделить элемент Черновики, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить требуемое сообщение, затем нажмите  для выбора.

## Редактирование и отправка сохраненного текстового сообщения

- 1 Повторно нажмите  во время просмотра сообщения.

- 2 Нажмите  или , чтобы выделить элемент **Редакт.**, затем нажмите  для выбора.  
Отобразится мигающий курсор.

- 3 Наберите сообщение на клавиатуре.

Нажмите , чтобы переместить курсор на один символ влево. Нажмите  или , чтобы переместить курсор на один символ вправо.

Чтобы удалить ненужный знак, нажмите клавишу . Нажмите и удерживайте , чтобы изменить метод ввода текста.

- 4 Завершив набор сообщения, нажмите  один раз.

- 5 Укажите получателя сообщения:

- Нажмите  или , чтобы выбрать требуемый псевдоним, затем нажмите  для выбора.
- Нажмите  или , чтобы выделить элемент **Ручной набор**, затем нажмите  для выбора. В первой строке на дисплее появится сообщение **Номер:**. Во второй строке появится мигающий курсор. Введите псевдоним или идентификатор абонента, затем нажмите .

На дисплее появится уведомление **Сообщение отправляется**, сопровождающее процесс отправки сообщения.

Если сообщение будет отправлено успешно, прозвучит тональный сигнал и на дисплее отобразится текст Сообщение отправлено успешно.

Если сообщение не удастся отправить, прозвучит сигнал низкой тональности и на дисплее появится сообщение Сбой отправки сообщения.

Если текстовое сообщение не удастся отправить, оно будет автоматически перемещено в папку "Отправленные" и помечено значком сбоя отправки.

## Удаление сохраненного текстового сообщения из папки "Черновики"

- 1 Выполните доступ к функции **Текстовые сообщения**.

Элементы управления	Этапы
<b>Запрограммированная кнопка текстовых сообщений</b>	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
<b>Меню</b>	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент Сообщения, затем нажмите  для выбора.</p>

- 2 Нажмите  или , чтобы выделить элемент Черновики, затем нажмите  для выбора.

3 Нажмите  или  , чтобы выделить требуемое сообщение, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить элемент Удалить, и нажмите  , чтобы удалить сообщение.

---

## Управление текстовыми сообщениями после сбоя отправки

Находясь на экране опции Отпр. снова, можно выполнить одно из следующих действий.

- Отпр. снова
- Пересл.
- Редактировать

## Повторная отправка текстового сообщения

Чтобы повторно отправить сообщение на тот же псевдоним или идентификатор абонента/группы, нажмите  .

Если сообщение будет отправлено успешно, прозвучит тональный сигнал и на дисплее появится мини-уведомление об успешном выполнении действия.

Если сообщение не удастся отправить, на дисплее появится мини-уведомление о неуспешном выполнении действия.

---

## Пересылка текстового сообщения

Выберите вариант Пересл., чтобы отправить сообщение на другой псевдоним или идентификатор абонента/группы.

- 1 Нажмите  или , чтобы выделить элемент Пересл., затем нажмите  для выбора.

- 2 Чтобы выбрать получателя сообщения, нажмите  или , чтобы выделить необходимый псевдоним или идентификатор, затем нажмите  для выбора.

На дисплее появится уведомление Сообщение отправляется, сопровождающее процесс отправки сообщения.

Если сообщение будет отправлено успешно, прозвучит тональный сигнал и на дисплее отобразится текст Сообщение отправлено успешно.

Если сообщение не удастся отправить, прозвучит сигнал низкой тональности и на дисплее появится сообщение Сбой отправки сообщения.

## Управление отправленными текстовыми сообщениями

После отправки текстовые сообщения автоматически сохраняются в папке "Отправленные". При этом новые сообщения всегда добавляются в начало списка.

В папке "Отправленные" может храниться до 30 сообщений. Если папка заполнена, то при добавлении в нее нового текстового сообщения самое старое сообщение автоматически удаляется.

### УВЕДОМЛЕНИЕ:

Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки .

## Просмотр отправленного текстового сообщения

- 1 Выполните доступ к функции **Текстовые сообщения**.

Элементы управления	Этапы
Запрограммированная кнопка текстовых сообщений	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
Меню	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент <b>Сообщения</b>, затем нажмите  для выбора.</p>

**2** Нажмите  или , чтобы выделить элемент **Отправл.**, затем нажмите  для выбора.

**3** Нажмите  или , чтобы перейти к нужному сообщению, затем нажмите  для выбора.

Значок в правом верхнем углу обозначает статус сообщения (см. [Значки отправленных элементов на стр. 267](#)).

## Пересылка отправленного текстового сообщения

При просмотре отправленного текстового сообщения можно выбрать одну из следующих опций:

- Отпр. снова
- Пересл.
- Редактировать

• Удалить

1 Повторно нажмите  во время просмотра сообщения.

2 Нажмите  или  для выбора одной из опций, затем нажмите  для выбора.

Опция	Этапы
Пересл.	Выберите опцию <b>Пересл.</b> , чтобы отправить выбранное текстовое сообщение на другой псевдоним или идентификатор абонента/ группы, (см. раздел <a href="#">Пересылка текстового сообщения на стр. 336</a> ).
Удалить	Выберите опцию <b>Удалить</b> , чтобы удалить текстовое сообщение.
Отпр. снова	Выберите опцию <b>Отпр. снова</b> , чтобы повторно отправить выбранное текстовое сообщение на тот же псевдоним или идентификатор абонента/группы.

Опция	Этапы
	<p>На дисплее на короткое время появится уведомление Сообщение отправляется, подтверждающее, что на вызываемую радиостанцию отправляется то же самое сообщение.</p> <p>Если сообщение будет отправлено успешно, прозвучит тональный сигнал и на дисплее отобразится текст Сообщение отправлено успешно.</p> <p>Если сообщение не удастся отправить, прозвучит сигнал низкой тональности и на дисплее появится сообщение Сбой отправки сообщения.</p> <p>Если сообщение не удастся отправить, на дисплее радиостанции появится экран опции Отпр. снова. Чтобы повторно отправить сообщение</p>

Опция	Этапы
	на тот же псевдоним или идентификатор абонента/группы, нажмите  .

В случае закрытия экрана отправки во время отправки сообщения радиостанция обновляет статус этого сообщения в папке "Отправленные" автоматически без звуковой и визуальной индикации.

В случае изменения режима работы или выключения радиостанции до обновления статуса сообщения в папке "Отправленные" сообщение автоматически помечается значком **сбоя отправки**.

Радиостанция поддерживает одновременную отправку до пяти сообщений. После того, как число сообщений достигает пяти, отправка новых сообщений становится невозможной, и новые сообщения автоматически помечаются значком **сбоя отправки**.

## Удаление всех отправленных текстовых сообщений из папки "Отправленные"

- 1 Выполните доступ к функции **Текстовые сообщения**.

Элементы управления	Этапы
<b>Запрограммированная кнопка текстовых сообщений</b>	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
<b>Меню</b>	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент <b>Сообщения</b>, затем нажмите  для выбора.</p>

- 2 Нажмите  или , чтобы выделить элемент Отправл., затем нажмите  для выбора.

Если папка Отправл. не содержит ни одного текстового сообщения, на дисплее появится сообщение Список пуст; кроме того, если активированы тональные сигналы клавиатуры, прозвучит сигнал низкой тональности.

- 3 Нажмите  или , чтобы выделить элемент Удалить все, затем нажмите  для выбора.

- 4 Выполните одно из следующих действий.

- Нажмите  или  для выбора варианта Да, затем нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия.

- Нажмите  или  для выбора варианта Нет и нажмите , чтобы вернуться на предыдущий экран.

## Прием текстового сообщения

Когда радиостанция принимает сообщение, на дисплее появляется список уведомлений с псевдонимом или идентификатором отправителя и значком сообщения.

Полученные текстовые сообщения можно:

- Прочитать
- Читать позже
- Delete

## Чтение текстового сообщения

- 1 Нажмите  или , чтобы выделить элемент **Читать?**, затем нажмите  для выбора.

Откроется сообщение, выбранное в папке "Полученные".

- 2 Выполните одно из следующих действий.
- Нажмите , чтобы вернуться в папку "Полученные".
  - Повторно нажмите , чтобы ответить на текстовое сообщение, переслать или удалить его.

## Управление полученными текстовыми сообщениями

Для управления текстовыми сообщениями служит папка «Полученные». Папка «Полученные» может содержать до 30 сообщений.

[Отправить отзыв](#)

Текстовые сообщения в папке «Полученные» расположены, начиная с последнего поступившего сообщения.

При работе с текстовыми сообщениями можно выполнить одно из следующих действий:

- Ответить (с помощью функции "Шаблоны")
- Переслать
- Удалить
- Удалить все

### УВЕДОМЛЕНИЕ:

Если тип канала не совпадает, будут доступны только пересылка, удаление и удаление всех отправленных сообщений.

Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки  .

## Просмотр текстовых сообщений в папке "Полученные"

- 1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент **Сообщения**, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Полученные**, затем нажмите  для выбора.

4 Нажмите  или , чтобы просмотреть сообщения.

- 5 Выполните одно из следующих действий.
- Нажмите , чтобы выбрать текущее сообщение, и повторно нажмите , чтобы ответить на это сообщение, переслать или удалить его.
  - Нажмите и удерживайте , чтобы вернуться на главный экран.

## Ответ на текстовое сообщение из папки "Полученные"

1 Выполните доступ к функции **Текстовые сообщения**.

Элемент	Этапы
<b>ы управле ния</b>	
<b>Запрог аммиро ванная кнопка текстов ых сообщ ений</b>	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
<b>Меню</b>	<b>a</b> Нажмите  для доступа к меню.

Элементы управления	Этапы
	<p><b>b</b> Нажмите  или , чтобы выделить элемент Сообщения, затем нажмите  для выбора.</p>

- 2 Нажмите  или , чтобы выделить элемент Полученные, затем нажмите  для выбора.
- 3 Нажмите  или , чтобы выделить требуемое сообщение, затем нажмите  для выбора.
- 4 Повторно нажмите , чтобы получить доступ к подменю.

5 Используйте клавиатуру для написания и редактирования сообщения.

6 Завершив набор сообщения, нажмите  один раз.

На дисплее появится уведомление Сообщение отправляется, сопровождающее процесс отправки сообщения.

Если сообщение будет отправлено успешно, прозвучит тональный сигнал, и на дисплее появится текст Сообщение отправлено.

Если сообщение не удастся отправить, прозвучит сигнал низкой тональности и на дисплее появится текст Сбой отправки сообщения.

Если сообщение не будет отправлено, на дисплее радиостанции появится экран опции Отпр. снова (см. [Управление текстовыми сообщениями после сбоя отправки на стр. 335](#)).

## Удаление текстового сообщения из папки "Полученные"

- 1 Выполните доступ к функции **Текстовые сообщения**.

Элементы управления	Этапы
Запрограммированная кнопка текстовых сообщений	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
Меню	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент <b>Сообщения</b>, затем нажмите  для выбора.</p>

- 2 Нажмите  или , чтобы выделить элемент **Полученные**, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить требуемое сообщение, затем нажмите  для выбора.

- 4 Повторно нажмите , чтобы получить доступ к подменю.

- 5 Нажмите  или , чтобы выделить элемент **Удалить**, затем нажмите  для выбора.

- 6 Нажмите  или , чтобы выделить элемент **Да**, и нажмите , чтобы выбрать. На дисплее появится **Сообщение удалено**, и будет выполнен возврат в папку "Полученные".

## Удаление всех текстовых сообщений из папки "Полученные"

- 1 Выполните доступ к функции **Текстовые сообщения**.

Элементы управления	Этапы
Запрограммированная кнопка текстовых сообщений	Нажмите запрограммированную кнопку <b>текстовых сообщений</b> .
Меню	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент <b>Сообщения</b>, затем нажмите  для выбора.</p>

- 2 Нажмите  или , чтобы выделить элемент **Полученные**, затем нажмите  для выбора.

Если папка **Полученные** не содержит ни одного текстового сообщения, на дисплее появится сообщение **Список пуст**; кроме того, если активированы тональные сигналы клавиатуры, прозвучит сигнал низкой тональности (см. [Включение и выключение тональных сигналов клавиатуры на стр. 234](#)).

- 3 Нажмите  или , чтобы выделить элемент **Удалить все**, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент **Да**, затем нажмите , чтобы выбрать.

На дисплее появится сообщение **Входящие очищены**.

## Конфиденциальность

Эта функция позволяет предотвратить несанкционированное прослушивание радиообмена на канале. Для этого используется скремблирование с программной реализацией. Сигналинг и идентификация пользователя в сеансе передачи не скремблируются.

Активация функции конфиденциальности является обязательным условием ведения передач со скремблированием на текущем канале, но для приема передач это не является обязательным. После активации функции конфиденциальности на канале по-прежнему можно принимать нескремблированные передачи.

Радиостанция поддерживает расширенную конфиденциальность.

Для дескремблирования зашифрованного вызова или данных радиостанция должна быть запрограммирована таким образом, чтобы значение ключа и идентификатор ключа (для расширенной конфиденциальности) совпадали со значением ключа и идентификатором ключа передающей радиостанции.

Если при приеме скремблированного вызова значение ключа и идентификатор ключа не совпадают, сигнал не прозвучит (расширенная конфиденциальность).

Если в радиостанции установлен тип конфиденциальности, то на главном экране появится значок защищенной или незащищенной связи, за исключением случаев, когда идет отправление или прием экстренного вызова или сигнала.

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет зашифрованную передачу, и быстро мигает вспышками зеленого цвета, когда радиостанция принимает зашифрованную передачу.

Для доступа к этой функции выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **конфиденциальности**, чтобы включить или выключить функцию конфиденциальности.
- Использование меню радиостанции, как описано в следующих шагах.

**УВЕДОМЛЕНИЕ:**

В некоторых моделях радиостанций функция конфиденциальности может отсутствовать. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Параметры р/с*, или  или , чтобы выделить элемент *Connect Plus*, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент *Расшир. шифр.*

Если на дисплее отображается *Вкл.*, нажмите

 для активации функции конфиденциальности. На дисплее радиостанции отобразится сообщение с подтверждением выбора.

Если на дисплее отображается *Выкл.*, нажмите

 для деактивации функции конфиденциальности. На дисплее радиостанции отобразится сообщение с подтверждением выбора.

Если в радиостанции установлен тип конфиденциальности, то в строке состояния появится значок защищенной или незащищенной связи, за исключением случаев, когда идет отправление или прием экстренного сигнала тревоги.

---

## Выполнение зашифрованного (скремблированного) вызова

Включить шифрование можно с помощью запрограммированной кнопки или меню. Для выполнения зашифрованной передачи в радиостанции должна быть активирована функция конфиденциальности для текущего канала. Если для текущего канала активирована функция конфиденциальности, то все передаваемые радиостанцией голосовые сообщения будут шифроваться. К таким вызовам относятся групповые вызовы, мультигрупповые, ответы во время сканируемых вызовов, вызовы по всем сайтам, экстренные и частные вызовы. Расшифровать сообщение смогут только принимающие радиостанции, у которых значение ключа и идентификатор ключа совпадают с соответствующими параметрами вашей радиостанции.

## Службы безопасности

Вы можете активировать и деактивировать любую радиостанцию в системе. Можно, например, деактивировать украденную радиостанцию, чтобы вор

не смог ей пользоваться, и активировать ее после ее возврата.

### УВЕДОМЛЕНИЕ:

Деактивировать и активировать можно только те радиостанции, в которых эти функции подключены. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Деактивация радиостанции

- 1 Для доступа к этой функции выполните одно из следующих действий.

Элемент	Этапы
ы управле ния радиост анции	
Кнопка деактив ации	а Нажмите запрограммированную кнопку <b>деактивации радиостанции</b> .

Элемент	Этапы
<p><b>ы управле ния радиост анции</b></p> <p><b>радиост анции</b></p>	<p><b>b</b> Нажмите  или  , чтобы выделить нужный псевдоним или идентификатор, затем нажмите  для выбора.</p>
<p><b>Меню радиост анции</b></p>	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или  , чтобы выделить элемент <b>Контакты</b>, затем нажмите  для выбора. Пункты сортируются в алфавитном порядке.</p>

Элемент	Этапы
<p><b>ы управле ния радиост анции</b></p>	<p><b>c</b> Выполните одно из действий, описанных ниже, чтобы выделить необходимый псевдоним или идентификатор абонента.</p> <ul style="list-style-type: none"> <li>• Напрямую выберите необходимый псевдоним или идентификатор абонента.</li> <li>• Нажмите  или  , чтобы выделить нужный псевдоним или идентификатор, затем нажмите  для выбора.</li> </ul>

Элемент	Этапы
ы управле ния радиост анции	<ul style="list-style-type: none"> <li>• Используйте меню Ручной набор.</li> <li>• Нажмите  или , чтобы выделить элемент Ручной набор, затем нажмите  для выбора.</li> <li>• Нажмите  или , чтобы выделить элемент Номер р/с., затем нажмите  для выбора.</li> </ul>

Элемент	Этапы
ы управле ния радиост анции	<ul style="list-style-type: none"> <li>• В первой строке на дисплее появится сообщение Номер р/с.: Во второй строке появится мигающий курсор. С помощью клавиатуры введите псевдоним или идентификатор абонента и нажмите  .</li> </ul> <p><b>d</b> Нажмите  или , чтобы выделить элемент</p>

Элементы	Этапы
управления радиостанции	Деактив. р/с, затем нажмите  для выбора.

На дисплее появится сообщение Деактив. р/с: <<псевдоним или идентификатор радиостанции-получателя>, и светодиодный индикатор начнет мигать зеленым цветом.

## 2 Дождитесь подтверждения.

В случае успешного выполнения прозвучит тональный сигнал успешного действия, и на дисплее появится сообщение Радиостанция деакт-на.

В случае сбоя прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение Деакт-ие р/с не удалось.

## Активация радиостанции

- Для доступа к этой функции выполните одно из следующих действий.

Элементы	Этапы
управления радиостанции	
Кнопка активации радиостанции	<p><b>a</b> Нажмите запрограммированную кнопку <b>активации радиостанции</b>.</p> <p><b>b</b> Нажмите  или , чтобы выделить нужный псевдоним или идентификатор, затем нажмите  для выбора.</p>
Меню радиостанции	<p><b>a</b> Нажмите  для доступа к меню.</p>

Элементы управления радиостанции	Этапы
	<p><b>b</b> Нажмите  или , чтобы выделить элемент <b>Контакты</b>, затем нажмите  для выбора. Пункты сортируются в алфавитном порядке.</p> <p><b>c</b> Выполните одно из действий, описанных ниже, чтобы выделить необходимый псевдоним или идентификатор абонента.</p> <ul style="list-style-type: none"><li>• Напрямую выберите необходимый псевдоним или идентификатор абонента.</li></ul>

Элементы управления радиостанции	Этапы
	<ul style="list-style-type: none"><li>• Нажмите  или , чтобы выделить нужный псевдоним или идентификатор, затем нажмите  для выбора.</li><li>• Используйте меню <b>Ручной набор</b>.</li><li>• Нажмите  или , чтобы выделить элемент <b>Ручной набор</b>, затем нажмите  для выбора.</li></ul>

Элементы управления радиостанции	Этапы
	<ul style="list-style-type: none"> <li>• Нажмите  или , чтобы выделить элемент Номер р/с., затем нажмите  для выбора.</li> <li>• В первой строке на дисплее появится сообщение <small>Номер р/с:</small>. Во второй строке появится мигающий курсор. С помощью клавиатуры введите псевдоним или</li> </ul>

Элементы управления радиостанции	Этапы
	<p>идентификатор абонента и нажмите .</p> <p><b>d</b> Нажмите  или , чтобы выделить элемент <small>Активация р/с</small>, затем нажмите  для выбора.</p>

На дисплее появится сообщение Активация р/с:. <<псевдоним или идентификатор абонента>, и светодиодный индикатор загорится ровным зеленым цветом.

## 2 Дождитесь подтверждения.

В случае успешного выполнения прозвучит тональный сигнал успешного действия, и на

дисплее появится сообщение Радиостанция активирована.

В случае сбоя прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение Активация р/с не удалась.

---

## Функция Bluetooth

### УВЕДОМЛЕНИЕ:

При отключении с помощью CPS все функции Bluetooth будут отключены, а также будет удалена база данных Bluetooth-устройств.

Эта функция позволяет использовать Bluetooth-устройство (аксессуар), подключив его к радиостанции его посредством Bluetooth-соединения. Радиостанция совместима как с Bluetooth-устройствами Motorola Solutions, так и со стандартными устройствами, имеющимися в массовой продаже.

Дальность связи Bluetooth составляет 10 метров (32 фута) при прямой видимости. Линия связи между радиостанцией и Bluetooth-устройством не должна быть ничем заслонена.

Не рекомендуется оставлять радиостанцию, рассчитывая на то, что Bluetooth-устройство будет надежно работать на удалении.

В приграничных зонах приема сигнала голосовые и тональные сигналы станут искаженными и ломаными. Чтобы улучшить качество звука, нужно просто восстановить радиосвязь, приблизив Bluetooth-устройство к радиостанции (в пределах установленной 10-метровой зоны приема). В радиусе 10 метров (32 фута) максимальная мощность функции Bluetooth в радиостанции составляет 2,5 мВт (4 дБм).

Радиостанция может поддерживать до 4 одновременных Bluetooth-подключений к Bluetooth-устройствам разных типов. Например, это может быть гарнитура и устройство только с поддержкой PPT (POD). Несколько соединений с однотипными Bluetooth-устройствами установить нельзя.

Дополнительную информацию о функциональности Bluetooth-устройств можно найти в руководстве пользователя соответствующего Bluetooth-устройства.

## Включение и выключение функции Bluetooth

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент **Мой статус**, затем нажмите  для выбора.  
 На дисплее появятся элементы **Вкл.** и **Выкл.**  
 Текущий статус отмечен значком .

---

- 4 Выполните одно из следующих действий.
  - Нажмите  или , чтобы выделить элемент **Вкл.**, затем нажмите  для выбора. На дисплее появится сообщение **Вкл.**, и слева от выбранного статуса появится значок .

[Отправить отзыв](#)

- Нажмите  или  для выбора элемента **Выкл.**, затем нажмите  для выбора. На дисплее появится сообщение **Выкл.**, и слева от выбранного статуса появится значок .

## Обнаружение Bluetooth-устройства и подключение к нему

Не выключайте Bluetooth-устройство и не нажимайте  во время обнаружения и соединения, чтобы не отменить операцию.

- 1 Включите Bluetooth-устройство и переведите его в режим сопряжения. При необходимости обратитесь к руководству пользователя соответствующего Bluetooth-устройства.

---

- 2 Нажмите  для доступа к меню.

---

- 3 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент Устройства, затем нажмите  для выбора.

- 5 Выполните одно из следующих действий.

- Нажмите  или , чтобы выделить требуемое устройство, затем нажмите  для выбора.
- Нажмите  или , чтобы выбрать элемент Найти уст-ва, чтобы обнаружить доступные устройства. Нажмите  или , чтобы выделить требуемое устройство, затем нажмите  для выбора.

- 6 Нажмите  или , чтобы выделить элемент Соединить, затем нажмите  для выбора.
- На дисплее появится сообщение Соединение с «название устройства». Для

выполнения сопряжения с Bluetooth-устройством могут потребоваться дополнительные действия. При необходимости обратитесь к руководству пользователя соответствующего Bluetooth-устройства.

В случае успешного подключения на дисплее радиостанции появится сообщение «Название устройства» соединено. Прозвучит тональный сигнал и рядом с подключенным устройством появится значок ✓. В строке состояния появится значок Bluetooth-соединения.

В случае сбоя на дисплее появится сообщение Соединение не удалось.

## Поиск и подключение к Bluetooth-устройству (режим обнаружения)

Не выключайте Bluetooth-устройство или радиостанцию во время поиска и установки соединения, так как это может привести к отмене операции.

- 1 Включите функцию Bluetooth.

См. Включение и выключение функции Bluetooth на стр. 355.

---

- 2 Нажмите  для доступа к меню.
  - 3 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.
- 

- 4 Нажмите  или  , чтобы выделить элемент *Найти меня*, затем нажмите  для выбора.

Ваша радиостанция остается видимой для других Bluetooth-устройств в течение заданного периода времени. Это называется "режим обнаружения".

---

- 5 Включите Bluetooth-устройство и выполните сопряжение с радиостанцией.

При необходимости обратитесь к руководству пользователя соответствующего Bluetooth-устройства.

---

## Отключение от Bluetooth-устройства

- 1 Нажмите  для доступа к меню на радиостанции.
  - 2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.
  - 3 Нажмите  или  , чтобы выделить элемент *Устройства*, затем нажмите  для выбора.
  - 4 Нажмите  или  , чтобы выделить требуемое устройство, затем нажмите  для выбора.
-

5 Нажмите  или , чтобы выделить элемент **Отсоединить**, затем нажмите  для выбора.

На дисплее появится сообщение **Отсоед-ие от <название устройства>**. Для отсоединения Bluetooth-устройства могут потребоваться дополнительные действия. При необходимости обратитесь к руководству пользователя соответствующего Bluetooth-устройства.

На дисплее радиостанции появится сообщение **<Название устройства> отсоединено**. Прозвучит тональный сигнал успешного действия, и значок  рядом с подключенным устройством исчезнет. Значок Bluetooth-соединения в строке состояния исчезнет.

## Перенаправление звука на встроенный динамик радиостанции или Bluetooth-устройство

Звук можно направлять на внутренний динамик радиостанции или на внешний Bluetooth-аксессуар.

Нажмите запрограммированную кнопку **переключателя аудио Bluetooth**.

- Прозвучит тональный сигнал, и на дисплее появится сообщение **Аудио на радиост.**
- Прозвучит тональный сигнал, и на дисплее появится сообщение **Аудио на Bluetooth**.

## Просмотр информации об устройстве

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Bluetooth**, затем нажмите  для выбора.
- 3 Нажмите  или , чтобы выделить элемент **Устройства**, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить требуемое устройство, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент Дет. данные, затем нажмите  для выбора.

---

## Удаление имени устройства

Вы можете удалить отключенное устройство из списка Bluetooth-устройств.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент Устройства, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить требуемое устройство, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент Удалить, затем нажмите  для выбора.

На дисплее появится сообщение Устройство удалено.

---

## Усиление микрофона Bluetooth

Эта функция позволяет регулировать усиление микрофона подключенного Bluetooth-устройства.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

3 Нажмите  или  для выбора элемента Ус.мик ВТ, затем нажмите  для выбора.

4 Нажмите  или  для выбора типа усиления микрофона ВТ и текущего значения.

Чтобы изменить значения, нажмите  для выбора.

5 Нажмите  или , чтобы увеличить или уменьшить значения, затем нажмите  для выбора.

## Отслеживание в помещении

### УВЕДОМЛЕНИЕ:

Функция отслеживания в помещении доступна только в моделях с программным и аппаратным обеспечением последней версии. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Функция отслеживания в помещении используется для отслеживания местоположения пользователей радиостанций. Если функция отслеживания в помещении активирована, радиостанция работает в ограниченном режиме обнаружения. Для поиска радиостанции и определения ее местоположения используются специальные радиомаяки.

## Включение и выключение функции отслеживания в помещении

Для включения или выключения функции отслеживания в помещении выполните одно из следующих действий.

- Доступ к этой функции можно получить в меню.
  - а. Нажмите  для доступа к меню.

b. Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

c. Нажмите  или  для выбора элемента Отсл. в помещ., затем нажмите  для выбора.

d. Нажмите , чтобы включить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в помещ. вкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного включения функции на главном экране появится значок "Отслеживание в помещении доступно".
- В случае сбоя на дисплее появится сообщение Сбой включения. Прозвучит тональный сигнал неуспешного действия

e. Нажмите , чтобы выключить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в помещ. выкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного выключения функции значок "Отслеживание в помещении доступно" на главном экране исчезнет.
- В случае сбоя на дисплее появится сообщение Сбой выключения. Прозвучит тональный сигнал неуспешного действия

• Для доступа к этой функции можно использовать программируемую кнопку.

a. Выполните длительное нажатие запрограммированной кнопки **отслеживания в помещении**, чтобы включить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в помещ. вкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного включения функции на главном экране появится значок "Отслеживание в помещении доступно".
  - В случае сбоя на дисплее появится сообщение **Сбой включения**. В случае сбоя прозвучит тональный сигнал неуспешного действия.
- b. Нажмите запрограммированную кнопку **отслеживания в помещении**, чтобы выключить функцию отслеживания в помещении.

На дисплее появится сообщение **Отсл. в пом. выкл.** Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного выключения функции значок "Отслеживание в помещении доступно" на главном экране исчезнет.
- В случае сбоя на дисплее появится сообщение **Сбой выключения**. В случае сбоя прозвучит тональный сигнал неуспешного действия.

## Доступ к информации о радиомаяках для отслеживания в помещении

Для доступа к информации радиомаяков для отслеживания в помещении следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Отсл. в помещ., затем нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Радиомаяки, затем нажмите  для выбора.

---

На дисплее отобразится информация о радиомаяках.

## Список уведомлений

В радиостанции предусмотрен список уведомлений, в котором фиксируются все "непрочитанные" события на канале, такие как непрочитанные текстовые сообщения, пропущенные вызовы и оповещения о вызове.

Когда в списке уведомлений имеется одно или несколько событий, в строке состояния появляется значок уведомления.

В списке отображается не более 40 непрочитанных событий. Когда список заполняется, последующее событие автоматически заменяет в нем самое раннее событие.

### УВЕДОМЛЕНИЕ:

Прочитанные события удаляются из списка уведомлений.

## Доступ к списку уведомлений

Для получения доступа к списку уведомлений следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выбрать пункт Уведом-ие, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выбрать требуемое событие, затем нажмите  для выбора.

Нажмите и удерживайте , чтобы вернуться на главный экран.

## Использование функции Wi-Fi

Wi-Fi® является зарегистрированным товарным знаком компании Wi-Fi Alliance®.

### УВЕДОМЛЕНИЕ:

Эта функция применима только для DM4601e .

Эта функция позволяет устанавливать и настраивать подключение к сети Wi-Fi. Wi-Fi поддерживает обновления микропрограммы радиостанции, кода плаги и ресурсов, например языковых пакетов и голосовых объявлений.

## Включение или выключение Wi-Fi

Программируемая кнопка **включения или выключения Wi-Fi** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Голосовые оповещения при нажатии на запрограммированную кнопку **включения или отключения Wi-Fi** можно настроить с помощью CPS в зависимости от пользовательских предпочтений. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для включения или отключения Wi-Fi выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **включения или выключения Wi-Fi**. Прозвучит голосовое объявление о включении Wi-Fi или выключении Wi-Fi.
- Доступ к этой функции можно получить в меню.
  - a. Нажмите  для доступа к меню.

b. Нажмите  или , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

c. Нажмите  или , чтобы выделить элемент **Wi-Fi вкл.**, затем нажмите  для выбора.

Нажмите , чтобы включить Wi-Fi. На дисплее рядом с сообщением **Активировано** появится значок .

Нажмите , чтобы выключить Wi-Fi. Значок  рядом с сообщением **Активировано** исчезнет.

## Подключение к точке доступа к сети

При включении Wi-Fi радиостанция выполняет сканирование и подключается к точке доступа к сети.

Также можно подключиться к точке доступа к сети через меню.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить точку доступа к сети, затем нажмите  для выбора.

---

- 5 Нажмите  или , чтобы выделить элемент **Соединить**, затем нажмите  для выбора.

---

- 6 Введите пароль и нажмите .

При успешном установлении соединения на экране радиостанции отобразится уведомление, и точка доступа к сети будет сохранена в списке профилей.

[Отправить отзыв](#)

## Проверка состояния подключения Wi-Fi

Чтобы проверить состояние подключения Wi-Fi, выполните следующие действия.

Нажмите запрограммированную кнопку **запроса статуса Wi-Fi**, чтобы получить голосовое объявление о состоянии подключения. Прозвучит голосовое объявление о том, что сеть Wi-Fi выключена, или что Wi-Fi включена, но подключения нет, или что Wi-Fi включена и подключение присутствует.

- Если Wi-Fi выключен, на экране отображается **Wi-Fi выкл.**
- Если радиостанция подключена к сети, на экране отображается **Wi-Fi вкл., подключен.**
- Если Wi-Fi включен, но радиостанция не подключена ни к одной сети, на экране отображается **Wi-Fi вкл., отключен.**

Голосовые оповещения в ответ на запрос состояния подключения Wi-Fi можно настроить с помощью CPS в зависимости от пользовательских предпочтений. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

**УВЕДОМЛЕНИЕ:**

Программируемая кнопка **запроса статуса Wi-Fi** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

## Обновление списка сетей

Для обновления списка сетей следуйте описанной процедуре.

- Чтобы обновить список сетей, выполните следующие действия с помощью меню.
  - a. Нажмите  для доступа к меню.
  - b. Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

c. Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

При переходе в меню "Сети" радиостанция автоматически обновляет список сетей.

- Если меню "Сети" уже открыто, выполните следующее действие, чтобы обновить список сетей.

Нажмите  или , чтобы выделить элемент Обновить, затем нажмите  для выбора.

Радиостанция выполнит обновление и отобразит новый список сетей.

## Добавление сети

Если предпочтительная сеть недоступна в списке сетей, для добавления сети выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент Добав. сеть, затем нажмите  для выбора.

---

- 5 Введите идентификатор беспроводной сети (SSID) и нажмите .

---

- 6 Нажмите  или , чтобы выделить элемент Без защиты, затем нажмите  для выбора.

---

- 7 Введите пароль и нажмите  .  
На дисплее радиостанции отобразится мини-уведомление об успешном выполнении действия, указывая, что сеть успешно сохранена.

---

## Просмотр информации о точках доступа к сети

Для просмотра информации о точках доступа к сети следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

3 Нажмите  или  , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить точку доступа к сети, затем нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить элемент **Дет. данные**, затем нажмите  для выбора.

Для подключенной точки доступа к сети отобразятся идентификатор беспроводной сети (SSID), режим безопасности, адрес управления доступом к среде передачи (MAC) и интернет-протокол (IP).

Для неподключенной точки доступа отобразятся идентификатор беспроводной сети (SSID) и режим безопасности.

---

## Удаление точек доступа к сети

Чтобы удалить точки доступа к сети из списка профилей, выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

---

3 Нажмите  или  , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить выбранную точку доступа к сети, затем нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить элемент **Удалить**, затем нажмите  для выбора.

---

- 6 Нажмите  или  , чтобы выделить элемент Да, затем нажмите  для выбора.

На экране радиостанции отобразится мини-уведомление об успешном выполнении действия, указывая, что выбранная точка доступа к сети успешно удалена.

## Вспомогательные функции

В данной главе описываются вспомогательные функции, доступные на радиостанции.

### Включение и выключение тональных сигналов или оповещений радиостанции

Все тональные сигналы и оповещения радиостанции (за исключением экстренного сигнала оповещения) можно при необходимости активировать и деактивировать.

Нажмите запрограммированную кнопку **всех тональных сигналов/оповещений** , чтобы включить

или выключить все тональные сигналы, или выполните процедуру, описанную далее, с помощью меню радиостанции.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  , чтобы выделить элемент Утилиты, затем нажмите  для выбора.

---

- 3 Нажмите  или  , чтобы выделить элемент Параметры р/с, затем нажмите  для выбора.

---

- 4 Нажмите  или  , чтобы выделить элемент Тоны/опов., затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Все тоны**, затем нажмите  для выбора.

6 Нажмите , чтобы активировать или деактивировать все тональные сигналы и оповещения.

На дисплее рядом с сообщением **Активировано** появится значок .

Значок  рядом с сообщением **Активировано** исчезнет.

## Установка уровня громкости тональных сигналов или оповещений

При необходимости вы можете отрегулировать уровень громкости тональных сигналов/оповещений. Эта функция позволяет установить громкость тональных

сигналов/оповещений выше или ниже уровня громкости передачи речи.

1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент **Тоны/опов.**, затем нажмите  для выбора.

5 Нажмите  или , чтобы выделить элемент **Мин. громкость**, затем нажмите  для выбора.

6 Нажмите  или , чтобы выделить необходимое значение громкости.

При переходе к каждому значению звучит тональный сигнал, соответствующий данному уровню громкости.

7 Выполните одно из следующих действий.

- Нажмите  для выбора отображаемого значения громкости.
- Нажмите , чтобы выйти без изменения текущих установок уровня громкости.

## Включение и выключение тонального сигнала разрешения разговора

Тональный сигнал разрешения разговора можно при необходимости активировать и деактивировать.

1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент *Параметры р/с*, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент *Тоны/опов.*, затем нажмите  для выбора.

5 Нажмите  или , чтобы выделить элемент *Разр. разгов.*, затем нажмите  для выбора.

- 6 Нажмите  , чтобы активировать или деактивировать тональный сигнал разрешения разговора.

На дисплее рядом с сообщением **Активировано** появится значок ✓.

Значок ✓ рядом с сообщением **Активировано** исчезнет.

## Включение и выключение тонального сигнала оповещения о включении питания

Тональный сигнал оповещения о включении питания можно при необходимости активировать и деактивировать.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

- 3 Нажмите  или  , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

- 4 Нажмите  или  , чтобы выделить элемент **Тоны/опов.**, затем нажмите  для выбора.

- 5 Нажмите  или  , чтобы выделить элемент **Вкл.**, затем нажмите  для выбора.

- 6 Нажмите  , чтобы активировать или деактивировать тональный сигнал оповещения о включении питания.

На дисплее рядом с сообщением **Активировано** появится значок ✓.

Значок  рядом с сообщением **Активировано** исчезнет.

## Регулировка уровня мощности

Пользователь может переключать режимы высокой и низкой мощности радиостанции для каждой зоны Connect Plus.

**Высокий** обеспечивает связь с вышками сетей в режиме Connect Plus, находящимися на значительном расстоянии от вас. **Низкий** обеспечивает связь с вышками сетей в режиме Connect Plus, находящимися на небольшом расстоянии.

Нажмите запрограммированную кнопку **уровня мощности**, чтобы переключиться между высоким и низким уровнем мощности передачи.

Для получения доступа к этой функции с помощью меню радиостанции выполните действия, описанные ниже.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент **Мощность**, затем нажмите  для выбора.

- 5 Нажмите  или , чтобы выделить нужную настройку, затем нажмите  для выбора.
  -  появится рядом с выбранной настройкой. Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки . Радиостанция вернется к предыдущему меню.

## Изменение режима дисплея

Режим дисплея радиостанции можно переводить с дневного на ночной и обратно по мере необходимости. От этих режимов зависит палитра цветов дисплея.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или  , чтобы выделить элемент *Параметры р/с*, затем нажмите  для выбора.

---

- 4 Нажмите  или  , чтобы выделить элемент *Дисплей*, затем нажмите  для выбора.  
 На дисплее появятся варианты настройки *Дневн. режим* и *Ночн. режим*.

- 5 Нажмите  или  , чтобы выделить требуемую настройку, затем нажмите  , чтобы активировать его. ✓ Рядом с выбранной настройкой появится значок .

## Регулировка яркости дисплея

Яркость дисплея радиостанции можно регулировать по мере необходимости.

### УВЕДОМЛЕНИЕ:

Если функция "Автояркость" активирована, яркость дисплея нельзя регулировать.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Дисплей**, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Яркость**, затем нажмите  для выбора.  
На дисплее появится индикатор выполнения.

---

6 Уменьшайте яркость дисплея нажатием  или увеличивайте нажатием . Выберите настройку от 1 до 8. Нажмите  для подтверждения выбора.

---

## Включение и выключение экрана приветствия

Экран приветствия можно при необходимости активировать и деактивировать.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Дисплей**, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Экран привет.**, затем нажмите  для выбора.

---

6 Нажмите , чтобы активировать или деактивировать экран приветствия.

На дисплее рядом с сообщением **Активировано** появится значок .

Значок  рядом с сообщением **Активировано** исчезнет.

---

## Язык

Дисплей радиостанции можно настроить на нужный язык.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Языки**, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить нужный язык, затем нажмите , чтобы активировать его. Рядом с выбранным языком появится значок .

---

## Включение и выключение функции светодиодного индикатора

Светодиодный индикатор можно при необходимости активировать и деактивировать.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Параметры р/с*, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент *LED*, затем нажмите  для выбора.

---

- 5 Нажмите , чтобы активировать или деактивировать светодиодный индикатор.  
На дисплее рядом с сообщением *Активировано* появится значок .  
Значок  рядом с сообщением *Активировано* исчезнет.
- 

## Определение типа кабеля

Вы можете выбрать тип кабеля, используемого радиостанцией.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Тип кабеля**, затем нажмите  для выбора.

---

5 Текущий тип кабеля отмечен значком .

---

## Голосовое объявление

Эта функция позволяет радиостанции объявлять текущую зону или канал, только что выбранный пользователем, а также нажатие программируемой кнопки. Пользователь может настраивать параметры звуковых сигналов. Такие объявления, как правило, полезны в случаях, когда условия работы затрудняют просмотр сведений, отображаемых на дисплее.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Голос. объяв.**, затем нажмите  для выбора.

Также можно использовать  или  для изменения выбранного параметра.

---

5 Выполните одно из следующих действий.

- Нажмите , чтобы активировать функцию голосовых объявлений. На дисплее рядом с сообщением **Активировано** появится значок .

- Нажмите , чтобы деактивировать функцию голосовых объявлений. Значок  рядом с сообщением **Активировано** исчезнет.

## Таймер меню

Вы можете задать период времени, по истечении которого вместо меню автоматически откроется главный экран.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.
- 3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент **Дисплей**, затем нажмите  для выбора.

- 5 Нажмите  или , чтобы выделить элемент **Таймер меню**, затем нажмите  для выбора.

- 6 Нажмите  или , чтобы выбрать нужную настройку, затем нажмите  для выбора.

## Включение и выключение функции гудка и фар

Эта функция может быть установлена дилером при помощи заднего аксессуарного разъема на радиостанции.

Радиостанция может уведомлять пользователя о входящем вызове с помощью функции гудка и фар. Если функция активирована, при поступлении

входящего вызова звучит гудок и включаются фары транспортного средства.

1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **звукового сигнала/освещения** для включения или выключения функции. Пропустите следующие действия.
- Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент **Гудок/фары**, затем нажмите  для выбора.

5 Нажмите , чтобы активировать или деактивировать функцию звукового сигнала/освещения.

На дисплее рядом с сообщением **Активировано** появится значок .

Значок  рядом с сообщением **Активировано** исчезнет.

## Задание предпочтительной функции ручки двойного назначения

Ваша радиостанция снабжена **ручкой выбора каналов/регулировки громкости**. При отключении двойного назначения ручка служит только для регулировки громкости.

1  для доступа к меню .

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.
- 
- 4 Нажмите  или , чтобы выделить элемент **Двойн. ручка**, затем нажмите  для выбора.
- 
- 5 На дисплее отображаются варианты **Только громк.** и **Громк. и кан.** Нажмите  или , чтобы выделить нужную настройку, затем нажмите  для выбора. Рядом с выбранной настройкой появится значок . Радиостанция вернется к предыдущему меню.
- 

## Цифровая АРУ микрофона (Ц-АРУ микрофона)

Эта функция позволяет автоматически управлять усилением микрофона радиостанции во время передачи в цифровой системе. Она подавляет громкий и усиливает тихий аудиосигнал до предустановленного значения, чтобы обеспечить постоянный уровень громкости звука.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.
- 
- 3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.
-

- 4 Нажмите  или , чтобы выделить элемент АРУ мик. -Ц, затем нажмите  для выбора.

5 Выполните одно из следующих действий.

- Нажмите , чтобы активировать функцию **Цифровая АРУ микрофона**. На дисплее появится значок  рядом с сообщением **Активировано**.
- Нажмите , чтобы деактивировать функцию **Цифровая АРУ микрофона**. Значок  рядом с сообщением **Активировано** исчезнет.

## Функция интеллектуального аудио

Радиостанция может автоматически регулировать громкость звука с учетом наружного шума как всех от стационарных, так и от подвижных источников. Эта

функция действует только в режиме приема и не влияет на передаваемый звук.

- 1 Нажмите  для доступа к меню.

Управление радиостанцией	Этапы
<p><b>Меню</b></p>	<p><b>a</b> Нажмите  для доступа к меню.</p> <p><b>b</b> Нажмите  или , чтобы выделить элемент <b>Параметры р/с</b>, затем нажмите  для выбора.</p> <p><b>c</b> Нажмите  или , чтобы выделить элемент <b>Параметры р/с</b>, затем нажмите  для выбора.</p>

Управление радиостанцией	Этапы
	<p>d Нажмите  или , чтобы выделить элемент <b>Инт. аудио</b>, затем нажмите  для выбора.</p> <p> <b>УВЕДОМЛЕНИЕ:</b> Также можно использовать  или  для изменения выбранного параметра.</p> <p>e Выполните одно из следующих действий.</p> <ul style="list-style-type: none"> <li>Нажмите , чтобы активировать функцию интеллектуального аудио. На дисплее</li> </ul>

Управление радиостанцией	Этапы
	<p>рядом с сообщением <b>Активировано</b> появится значок .</p> <ul style="list-style-type: none"> <li>Нажмите , чтобы деактивировать функцию интеллектуального аудио. Значок  рядом с сообщением <b>Активировано</b> исчезнет.</li> </ul>
<p>2 Нажмите  или , чтобы выделить элемент <b>Утилиты</b>, затем нажмите  для выбора.</p>	
<p>3 Нажмите  или , чтобы выделить элемент <b>Параметры р/с</b>, затем нажмите  для выбора.</p>	

4 Нажмите  или , чтобы выделить элемент **Инт. аудио**, затем нажмите  для выбора.

5 Выполните одно из следующих действий.

- Нажмите , чтобы активировать функцию интеллектуального аудио. На дисплее рядом с сообщением **Активировано** появится значок .
- Нажмите , чтобы деактивировать функцию интеллектуального аудио. Значок  рядом с сообщением **Активировано** исчезнет.

## Включение и выключение функции подавления акустической обратной связи

Эта функция позволяет снизить акустическую обратную связь при приеме вызовов.

1 Нажмите  для доступа к меню.

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент **Параметры р/с**, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент **Подав. ЗЧ**, затем нажмите  для выбора.

Также можно использовать или для изменения выбранного параметра.

#### 5 Выполните одно из следующих действий.

- Нажмите , чтобы активировать подавление акустической обратной связи. На дисплее рядом с сообщением **Активировано** появится значок ✓.
- Нажмите , чтобы деактивировать подавление акустической обратной связи. Значок ✓ рядом с сообщением **Активировано** исчезнет.

## Включение и выключение функции GNSS

Глобальная навигационная спутниковая система (GNSS) представляет собой спутниковую систему навигации, определяющую точное местоположение радиостанции. GNSS включает систему глобального позиционирования (GPS) и глобальную навигационную спутниковую систему (GLONASS).

### УВЕДОМЛЕНИЕ:

Некоторые радиостанции могут поддерживать GPS и ГЛОНАСС. Созвездие GNSS настраивается через CPS. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

#### 1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **GNSS** для включения или выключения функции. Пропустите следующие действия.
- Нажмите  для доступа к меню.

#### 2 Нажмите или для выбора элемента Утилиты. Нажмите для выбора.

#### 3 Нажмите или для выбора элемента Параметры р/с. Нажмите для выбора.

4 Нажмите  или  для выбора элемента GNSS. Нажмите  для выбора.

5 Нажмите , чтобы активировать или деактивировать функцию GNSS.

Если функция активирована, рядом со статусом **Активировано** отобразится значок .

Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

Для получения дополнительной информации о данных GNSS см. раздел [Проверка информации GNSS на стр. 400](#).

## Просмотр общей информации о радиостанции

В памяти радиостанции содержится следующая информация:

- Аккумулятор
- Угол наклона (акселерометр)

- Индекс номера модели радиостанции
- CRC кодплата функциональной платы для беспроводной связи (OTA)
- Номер сайта
- Информация о сайте
- Псевдоним и идентификатор радиостанции
- Версии микропрограммы и кодплата
- Сведения о GNSS

Нажмите , чтобы вернуться на предыдущий экран, или нажмите и удерживайте , чтобы вернуться на главный экран. По истечении таймера бездействия текущий экран закрывается.

## Просмотр индекса номера модели радиостанции

Этот номер обозначает оборудование, используемое непосредственно на данной модели радиостанции. Системный администратор может запросить этот номер

для подготовки нового кода прошивки функциональной платы для радиостанции.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Информация о р/с*, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент *Индекс модели*, затем нажмите  для выбора.  
На дисплее отобразится индекс номера модели.

## Просмотр CRC файла кода прошивки функциональной платы OTA

Если системный администратор просит просмотреть CRC (циклическую контрольную сумму) файла кода прошивки функциональной платы OTA (беспроводной), следуйте указаниям ниже. Эта опция меню отображается только после получения функциональной платой последнего обновления кода прошивки по беспроводной связи.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Информация о р/с*, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент **OTA с/с СР ФП**, затем нажмите  для выбора.

На дисплее появится набор цифр и букв. Сообщите эту информацию системному администратору точно в том виде, в котором она отображается.

## Отображение идентификатора сайта (номера сайта)

### УВЕДОМЛЕНИЕ:

Если в настоящее время радиостанция не зарегистрирована на каком-либо сайте, на дисплее появится сообщение **Не зарегистрир.**

Радиостанция на короткое время отображает идентификатор сайта при регистрации на сайте Connect Plus. После регистрации номер сайта обычно больше не отображается. Чтобы просмотреть его, выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить элемент **Инф. о р/с**, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент **Номер сайта**, затем нажмите  для выбора.

На дисплее отобразится идентификатор сети и номер сайта.

## Просмотр информации о сайте

### УВЕДОМЛЕНИЕ:

Если в настоящее время радиостанция не зарегистрирована на каком-либо сайте, на дисплее появится сообщение **Не зарегистрир.**

Функция просмотра информации о сайте отображает информацию, которая может быть полезна специалистам по обслуживанию. С помощью данной функции можно узнать следующую информацию:

- Номер текущего ретранслятора управляющего канала.
- RSSI: последнее значение уровня сигнала, измеряемого ретранслятором управляющего канала.
- Список соседних элементов, отправляемый ретранслятором управляющего канала (пять цифр, разделенных запятыми).

Если вас просят использовать эту функцию, сообщите информацию в точности так же, как она отображается на экране.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

3 Нажмите  или  , чтобы выделить элемент *Информация*, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить элемент *Информация*, затем нажмите  для выбора. На дисплее отобразится информация о сайте.

---

## Просмотр идентификатора радиостанции

Эта функция отображает идентификатор радиостанции.

Для получения доступа к этой функции с помощью дисплея радиостанции выполните действия, описанные ниже.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент *Инф. о р/с*, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент *Мой ID*, затем нажмите  для выбора.

На дисплее отобразится идентификатор радиостанции.

---

## Просмотр версии микропрограммы и версии кодплага

Отображение версии микропрограммы радиостанции.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент *Инф. о р/с*, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент *Версии*, затем нажмите  для выбора.

На дисплее появится следующая информация:

- Версия микропрограммы (радиостанции)
- Версия кодплага (радиостанции)
- Версия микропрограммы функциональной платы
- Версия файла данных частоты функциональной платы
- Версия оборудования функциональной платы

- Версия кодплага функциональной платы

## Проверка обновлений

Connect Plus предоставляет возможность обновлять некоторые файлы (файл кодплага функциональной платы, файл данных сетевой частоты и файл микропрограммы функциональной платы) беспроводным способом (OTA).

### УВЕДОМЛЕНИЕ:

Чтобы узнать, активирована ли эта функция на вашей радиостанции, обратитесь к дилеру или администратору сети.

На любой оснащенной дисплеем радиостанции Connect Plus можно узнать текущую версию CRC кодплага функциональной платы OTA, версию файла данных частоты или микропрограммы функциональной платы с помощью меню. Кроме того, на дисплее радиостанции, на которой активирована функция беспроводной передачи файлов, может отображаться версия ожидаемого файла. Ожидаемый файл — это файл данных частоты или микропрограммы функциональной платы, наличие которого радиостанция Connect Plus обнаруживает с помощью системы обмена сообщениями, но пакеты данных которого еще не

получены полностью. Если на радиостанции Connect Plus с дисплеем имеется ожидаемый файл, меню предоставляет опции для:

- просмотра номера версии ожидаемого файла;
- просмотра количества полученных пакетов данных в процентах;
- запроса радиостанции Connect Plus на возобновление сбора пакетов файлов.

Если на радиостанции активирована функция беспроводной (OTA) передачи файлов Connect Plus, то в некоторых случаях радиостанция может автоматически начинать передачу файлов без предварительного уведомления пользователя. Во время приема пакетов файлов светодиодный индикатор быстро мигает красным цветом, а в строке состояния главного экрана отображается значок большого объема данных.

**УВЕДОМЛЕНИЕ:**

Радиостанция Connect Plus не поддерживает одновременное получение пакетов файлов и прием вызовов. Чтобы отменить передачу файла, нажмите и отпустите кнопку **PTT**. В этом случае радиостанция запрашивает вызов выбранного имени контакта и отменяет передачу файла этой радиостанции до возобновления процесса в будущем.

Возобновить процесс передачи файла можно несколькими способами. Первый способ относится ко всем типам файлов OTA. Два других способа относятся только к файлам данных сетевой частоты и микропрограммы функциональной платы.

- Повторный запуск файлов OTA выполняется системным администратором радиостанции.
- Процесс сбора пакетов автоматически возобновляется функциональной платой после истечения заранее заданного времени функциональной платы.
- Если заданное время еще не истекло, передача файла возобновляется пользователем радиостанции через меню.

После завершения загрузки всех пакетов файлов радиостанция Connect Plus должна выполнить обновление с помощью принятого файла. Обновление файла данных сетевой частоты выполняется автоматически и не требует перезагрузки радиостанции. Обновление файла кода функциональной платы также выполняется автоматически, однако во время загрузки функциональной платой новой информации кода и повторного получения сетевого сайта произойдет кратковременный перебой в обслуживании. Скорость обновления радиостанции до новой версии файла микропрограммы функциональной платы зависит от конфигурации радиостанции дилером или системным администратором. Радиостанция выполнит обновление сразу после получения всех пакетов файлов или при следующем включении.

**УВЕДОМЛЕНИЕ:**

Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Процесс обновления файла микропрограммы функциональной платы занимает несколько секунд и требует перезагрузки радиостанции Connect Plus. После начала обновления пользователь не сможет выполнять и принимать вызовы до завершения

процесса. Во время обновления радиостанция отображает сообщение с просьбой не отключать питание радиостанции.

## Файл микропрограммы

В данном разделе приводятся сведения о микропрограммном обеспечении радиостанции.

### Обновление микропрограммы

#### УВЕДОМЛЕНИЕ:

Если файл микропрограммы функциональной платы не обновлен (и если радиостанция частично собрала более новую версию файла микропрограммы функциональной платы), на дисплее отобразится список дополнительных опций: Версия, Получено\* и Загрузка.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  Утилиты, затем нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить элемент Инф. о р/с, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент Обновления, затем нажмите  для выбора.

- 5 Нажмите  или , чтобы выделить элемент Микропрограмма, затем нажмите  для выбора.

На дисплее отобразится сообщение Микропрогр. обновлена.

## Ожидание файла микропрограммного обеспечения — Версия

- 1 Нажмите  для доступа к меню.

2 Нажмите  или  , чтобы выделить элемент Утилиты, затем нажмите  для выбора.

---

3 Нажмите  или  , чтобы выделить элемент Инф. о р/с, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить элемент Обновления, затем нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить элемент Микропрограмма, затем нажмите  для выбора.

---

6 Нажмите  или  , чтобы выделить элемент Версия, затем нажмите  для выбора.

Если имеется ожидаемый файл микропрограммы дополнительной платы, на дисплее отобразится номер версии ожидаемого файла микропрограммного обеспечения.

Если имеется ожидаемый файл микропрограммы функциональной платы, на дисплее отобразится сообщение Микропрограмма обновлена.

---

## Ожидание файла микропрограммного обеспечения — Получено %

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  Утилиты, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Инф. о р/с**, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент **Обновления**, затем нажмите  для выбора.

5 Нажмите  или , чтобы выделить элемент **Микропрограмма**, затем нажмите  для выбора.

6 Нажмите  или , чтобы выделить элемент **Получено%**, затем нажмите  для выбора.

На дисплее отобразится количество полученных пакетов файлов в процентах.

#### УВЕДОМЛЕНИЕ:

При достижении 100% радиостанцию необходимо выключить и включить снова, чтобы начать обновление микропрограммного обеспечения.

## Ожидание файла микропрограммного обеспечения — Загрузка

Если во время предыдущей беспроводной передачи файла микропрограммного обеспечения функциональной платы радиостанция Connect Plus загрузила его не полностью, радиостанция автоматически продолжит процесс передачи (если он не завершен) по истечении заданного времени. Чтобы возобновить прием файла микропрограммы функциональной платы до истечения заданного времени, используйте опцию загрузки, как описано ниже.

1 Нажмите  для доступа к меню.

2 Нажмите  или  Утилиты, затем нажмите  для выбора.

3 Нажмите  или , чтобы выделить элемент Инф. о р/с, затем нажмите  для выбора.

4 Нажмите  или , чтобы выделить элемент Обновления, затем нажмите  для выбора.

5 Нажмите  или , чтобы выделить элемент Микропрограмма, затем нажмите  для выбора.

6 Нажмите  или , чтобы выделить элемент Загрузить, затем нажмите  для выбора.

На дисплее отобразится следующее.

Загрузка возможна	Начать загрузку
Загрузка невозможна	Невозможно загрузить

7 Выполните одно из следующих действий.

- Выберите Да и нажмите , чтобы начать загрузку.
- Выберите Нет и нажмите , чтобы вернуться к предыдущему меню.

### Файл данных частоты

В данном разделе приводятся сведения о файлах частот для радиостанции.

## Обновление файла данных частоты

### УВЕДОМЛЕНИЕ:

Если файл данных частоты не обновлен (и если радиостанция частично собрала более новую версию файла данных частоты), на дисплее отобразится список дополнительных опций:

Версия, Получено% и Загрузка.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Инф. о р/с*, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент *Частота*, затем нажмите  для выбора.

На дисплее в первой строке отобразится сообщение *Файл частоты обновлен*.

## Ожидаемый файл данных частоты — Версия

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Инф. о р/с*, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить элемент Обновления, затем нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить элемент Частота, затем нажмите  для выбора.

---

6 Нажмите  или  , чтобы выделить элемент Версия, затем нажмите  для выбора.

Если имеется ожидаемый файл данных частоты, на дисплее отобразится номер версии ожидаемого файла данных частоты.

---

### **Ожидаемый файл данных частоты — Получено %**

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  , чтобы выделить элемент Утилиты, затем нажмите  для выбора.

---

3 Нажмите  или  , чтобы выделить элемент Инф. о р/с, затем нажмите  для выбора.

---

4 Нажмите  или  , чтобы выделить элемент Обновления, затем нажмите  для выбора.

---

5 Нажмите  или  , чтобы выделить элемент Получено%, затем нажмите  для выбора.

На дисплее отобразится количество полученных пакетов файлов данных частоты в процентах.

---

## Ожидаемый файл данных частоты — Загрузка

Если во время предыдущей беспроводной передачи загрузка файла данных сетевой частоты была прервана, радиостанция Connect Plus автоматически продолжит процесс передачи (если он не завершен) по истечении заданного времени. Чтобы возобновить прием файла данных сетевой частоты до истечения заданного времени, используйте опцию загрузки, как описано ниже.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент *Утилиты*, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент *Инф. о р/с*, затем нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить элемент *Обновления*, затем нажмите  для выбора.

- 5 Нажмите  или , чтобы выделить элемент *Частота*, затем нажмите  для выбора.

- 6 Нажмите  или , чтобы выделить элемент *Загрузить*, затем нажмите  для выбора.

В данный момент загрузка невозможна	Невозможно загрузить
В данный момент загрузка возможна	Начать загрузку

- 7 Выполните одно из следующих действий.

- Выберите **Да** и нажмите, чтобы начать загрузку.
  - Выберите **Нет** и нажмите, чтобы вернуться к предыдущему меню.
- 

## Проверка информации GNSS

Эта функция позволяет вывести на дисплей данные GNSS, такие как:

- Широта
- Долгота
- Высота
- Направление
- Скорость
- Фактор снижения точности при определении положения (HDOP)
- Спутники
- Версия

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **Утилиты**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Инф. о р/с**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить элемент **Инф. о GNSS**, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выбрать требуемый элемент, затем нажмите  для выбора.

На дисплее отобразятся запрошенные данные GNSS.

---

Для получения дополнительной информации о GNSS см. [Включение и выключение функции GNSS на стр. 385](#).

Данная страница намеренно оставлена пустой.

## Другие системы

В данной главе приводится описание функций, доступных пользователям радиостанции.

### Кнопка РТТ (Push-To-Talk)

Кнопка **РТТ** (Push-to-Talk) выполняет две основные задачи.

- Во время вызова кнопка **РТТ** позволяет радиостанции выполнять передачу на другие радиостанции, участвующие в вызове. При нажатии кнопки **РТТ** активируется микрофон.
- Кнопка **РТТ** также служит для выполнения нового вызова, когда не выполняются другие вызовы.

Для передачи голоса выполните длительное нажатие кнопки **РТТ**. Для прослушивания отпустите кнопку **РТТ**.

Если включен тональный сигнал разрешения разговора или вспомогательный тональный сигнал РТТ , не начинайте говорить, пока короткий тональный сигнал оповещения не перестанет звучать.

 Если на радиостанции включена функция индикации свободного канала, запрограммированная дилером, то в момент отпускания кнопки **РТТ** на целевой

(принимающей ваш вызов) радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать.

 Прозвучит непрерывный тональный сигнал запрета разговора, если вызов будет прерван. Если зазвучит непрерывный тональный сигнал запрета разговора, необходимо отпустить кнопку **РТТ**.

## Программируемые клавиши

Программируемые кнопки могут быть запрограммированы дилером для быстрого доступа к определенным функциям радиостанции (в зависимости от продолжительности нажатия кнопки).

### Короткое нажатие

Нажатие и быстрое отпускание кнопки.

### Длительное нажатие

Продолжительное нажатие запрограммированной кнопки.

#### **УВЕДОМЛЕНИЕ:**

См. раздел [Работа в экстренном режиме на стр. 492](#) для получения дополнительной информации о запрограммированной длительности нажатия кнопки **экстренного режима**.

## Назначаемые функции радиостанции

Следующие функции радиостанции можно назначить программируемым кнопкам.

#### **Уровень шума**

Выбор условий, в которых работает радиостанция.

#### **Аудиопрофили**

Выбор предпочитаемого аудиопрофиля.

#### **Переключатель аудио Bluetooth®**

Перенаправление звука на встроенный динамик радиостанции или на внешний Bluetooth-аксессуар.

#### **Подключение к Bluetooth**

Выполнение операции поиска и подключения к Bluetooth.

#### **Отключение Bluetooth**

Отключение всех текущих Bluetooth-соединений между радиостанцией и всеми Bluetooth-устройствами.

#### **Обнаружение Bluetooth**

Переключение радиостанции в режим обнаружения Bluetooth.

#### **Оповещение о вызове**

Прямой доступ к списку контактов для выбора контакта, которому можно послать оповещение о вызове.

#### **Переадресация вызовов**

Включение и выключение переадресации вызовов.

#### **Журнал вызовов**

Выбор списка в журнале вызовов.

#### **Объявление канала**

Воспроизведение голосовых объявлений зоны и канала для текущего канала.

#### **Контакты**

Прямой доступ к списку контактов.

#### **Экстренный режим**

Инициирование или отмена экстренного режима связи в зависимости от программных настроек.

**Внешняя система оповещения (РА)**

Перенаправление звука на усилитель для динамика подключенной системы оповещения или на внутреннюю систему оповещения радиостанции.

**Отслеживание в помещении**

Включение и выключение функции отслеживания в помещении.

**Функция интеллектуального аудио**

Включение и выключение функции интеллектуального аудио.

**Ручной набор** 

Инициирование частного вызова путем набора любого идентификатора абонента.

**Роуминг сайтов в ручном режиме**<sup>5</sup> 

Включение ручного поиска сайтов.

**АРУ микрофона**

Включение и выключение автоматической регулировки усиления (АРУ) встроенного микрофона.

**Мониторинг**

Мониторинг выбранного канала на наличие активности.

**Уведомления**

Прямой доступ к списку уведомлений.

**Удаление мешающего канала**<sup>5</sup>

Временное удаление ненужного канала (кроме выбранного канала) из списка сканирования. Под выбранным каналом понимается выбранная пользователем комбинация зоны и канала, с которой иницируется сканирование.

**Доступ одним нажатием** 

Непосредственное выполнение предварительно настроенного частного, телефонного или группового вызова, а также отправка оповещения о вызове, быстрого текстового сообщения или возврат к базовому каналу.

**Функциональная плата**

Активация и деактивация возможностей функциональной платы для соответствующих каналов.

**Непрерывный мониторинг**<sup>5</sup>

Мониторинг всего радиотрафика на выбранном канале до выключения данной функции.

---

<sup>5</sup> Неприменимо в Capacity Plus.

### Телефон

Прямой доступ к списку контактов телефона.

### Конфиденциальность

Включение и выключение функции конфиденциальности.

### Публичное объявление (ПО)

Включение или выключение внутренней системы оповещения радиостанции.

### Псевдоним и идентификатор радиостанции

Отображение псевдонима и идентификатора радиостанции.

### Проверка радиостанции

Проверка активности радиостанции в системе.

### Деактивация радиостанции

Выполнение дистанционной деактивации вызываемой радиостанции.

### Активация радиостанции

Выполнение дистанционной активации вызываемой радиостанции.

### Удаленный мониторинг

Включение микрофона вызываемой радиостанции без сопутствующей индикации.

### Ретранслятор/прямая связь<sup>5</sup>

Переключение между режимом ретранслятора и режимом прямой связи с другой радиостанцией.

### Сбросить домашний канал

Установка нового домашнего канала.

### Заглушить напоминание домашнего канала

Отключение звука напоминания домашнего канала

### Сканирование<sup>6</sup>

Включение и выключение функции сканирования.

### Информация о сайте

Отображение имени и идентификатора текущего сайта в режиме "Capacity Plus – многосайтовая".

Воспроизведение голосовых сообщений для текущего сайта, если функция голосовых объявлений активирована.

### Фиксация сайта<sup>5</sup>

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда

<sup>6</sup> Неприменимо в Capacity Plus Single-Site.

функция выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

#### **Телеметрическое управление**

Управление выходным контактом местной или удаленной радиостанции.

#### **Текстовые сообщения**

Выбор меню текстовых сообщений.

#### **Отключение удаленного прерывания передачи**

Завершение текущего прерываемого вызова для освобождения канала.

#### **Улучшение качества звучания**

Включение или выключение функции улучшения звучания речи.

#### **Голосовые объявления вкл/выкл**

Включение и выключение функции голосовых объявлений.

#### **Передача с голосовым управлением (VOX)**

Включение и выключение функции VOX.

#### **Wi-Fi**

Включение и выключение Wi-Fi.

#### **Выбор зоны**

Выбор зоны из списка зон.

## **Назначаемые настройки и дополнительные функции**

Следующие настройки или дополнительные функции радиостанции можно назначить программируемым кнопкам.

#### **Тональные сигналы/оповещения**

Включение и выключение всех тональных сигналов и оповещений.

#### **Подсветка**

Включение и выключение подсветки дисплея.

#### **канал вверх/вниз**

Переключение на предыдущий или следующий канал в зависимости от программных настроек.

#### **Режим дисплея**

Включение и выключение дневного/ночного режима дисплея.

#### **Уровень мощности**

Переключение между высоким и низким уровнями мощности передачи.

## Доступ к запрограммированным функциям

Для получения доступа к запрограммированным функциям выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора функции меню, затем нажмите  для выбора функции или перехода в подменю.

- 3 Выполните одно из следующих действий.
  - Нажмите , чтобы вернуться на предыдущий экран.
  - Нажмите и удерживайте , чтобы вернуться на главный экран.

При длительном периоде неактивности выход из меню и возврат на главный экран происходит автоматически.

Навигационные кнопки меню также доступны на микрофоне с клавиатурой. См. [Клавиши микрофона с клавиатурой на стр. 48](#).

## Индикаторы состояния

В данной главе описываются индикаторы состояния и тональные сигналы, используемые в радиостанции.

## Значки

Жидкокристаллический дисплей (ЖК-дисплей) радиостанции отображает состояние радиостанции, текстовые записи и пункты меню.

### Таблица 9: Значки дисплея

Следующие значки появляются в строке состояния в верхней части дисплея радиостанции. Значки

отображаются слева направо в порядке появления или использования и относятся к конкретным каналам.

	<b>Bluetooth подключен</b> Функция Bluetooth активирована. Значок горит, когда удаленное Bluetooth-устройство подсоединено.
	<b>Bluetooth не подключен</b> Функция Bluetooth активирована, но удаленное Bluetooth-устройство не подсоединено.
	<b>Журнал вызовов</b> Журнал вызовов радиостанции.
	<b>Контакт</b> Доступен контакт радиостанции.
	<b>Экстренный режим</b> Радиостанция работает в режиме экстренной связи.

Продолжение таблицы...

	<b>Адаптивный список приема</b> Функция адаптивного списка приема активирована.
	<b>Доступна функция GNSS</b>  Функция GNSS активирована. Значок горит, если доступно определение местоположения.
	<b>Функция GNSS недоступна</b>  Функция GNSS активирована, но прием данных со спутника не выполняется.
	<b>Большой объем данных</b> Радиостанция выполняет прием большого объема данных, и канал занят.
	<b>Доступно отслеживание в помещении</b> <sup>7</sup> Функция отслеживания в помещении активирована и доступна.

Продолжение таблицы...

<sup>7</sup> Доступно только в моделях с программным и аппаратным обеспечением последней версии.

	<p><b>Функция отслеживания в помещении недоступна<sup>7</sup></b>          Функция отслеживания в помещении активирована, но недоступна, поскольку функция Bluetooth отключена или сканирование радиомаяков приостановлено функцией Bluetooth.</p>
	<p><b>Сообщение</b>          Входящее сообщение.</p>
	<p><b>Мониторинг</b>          Радиостанция выполняет мониторинг выбранного канала.</p>
	<p><b>Беззвучный режим</b>          Режим без звука включен и звук динамика выключен.</p>
	<p><b>Уведомление</b>          В списке уведомлений есть одно или несколько пропущенных событий.</p>

*Продолжение таблицы...*

	<p><b>Функциональная плата</b>          Функциональная плата активирована. (Только для моделей с функциональной платой.)</p>
	<p><b>Функциональная плата отключена</b>          Функциональная плата деактивирована.</p>
	<p><b>Таймер задержки беспроводного программирования</b>          Показывает время, оставшееся до автоматического перезапуска радиостанции.</p>
	<p><b>Индикатор уровня принимаемого сигнала (RSSI)</b>          Количество отображаемых штрихов обозначает уровень мощности радиосигнала. Четыре штриха указывают на максимальный уровень мощности сигнала. Этот значок отображается только во время приема.</p>

*Продолжение таблицы...*

	<b>Запрет ответа</b> Запрет ответа включен.
	<b>Только звук</b> Активирован звуковой режим.
	<b>Сканирование<sup>8</sup></b> Функция сканирования включена.
	<b>Приоритет сканирования 1<sup>8</sup></b> Радиостанция обнаруживает активность на канале/в группе с приоритетом 1.
	<b>Приоритет сканирования 2<sup>8</sup></b> Радиостанция обнаруживает активность на канале/в группе с приоритетом 2.
	<b>Защищенная связь</b> Функция конфиденциальности активирована.

*Продолжение таблицы...*

	<b>Вход</b> Радиостанция выполнила вход на удаленный сервер.
	<b>Выход</b> Радиостанция выполнила выход из удаленного сервера.
	<b>Без звука</b> Активирован беззвучный режим.
	<b>Роуминг сайтов<sup>9</sup></b> Функция роуминга сайтов активирована.
	<b>Прямая связь<sup>8</sup></b> Радиостанция настраивается на прямую связь с другими радиостанциями при отсутствии ретранслятора.
	<b>Отключение тональных сигналов</b> Тональные сигналы выключены.

*Продолжение таблицы...*

<sup>8</sup> Неприменимо в Saracity Plus.

<sup>9</sup> Неприменимо в Saracity Plus - односайтовая.

	<b>Незащищенная связь</b> Функция конфиденциальности деактивирована.
	<b>Многочастотное сканирование</b> Функция многочастотного сканирования включена.
	<b>Отличный сигнал Wi-Fi<sup>10</sup></b> Сигнал Wi-Fi отличный.
	<b>Хороший сигнал Wi-Fi<sup>10</sup></b> Сигнал Wi-Fi хороший.
	<b>Средний сигнал Wi-Fi<sup>10</sup></b> Сигнал Wi-Fi средний.
	<b>Слабый сигнал Wi-Fi<sup>10</sup></b> Сигнал Wi-Fi слабый.
	<b>Сигнал Wi-Fi недоступен<sup>10</sup></b> Сигнал Wi-Fi недоступен.

**Таблица 10: Дополнительные значки меню**

Нижеследующие значки отображаются рядом с пунктами меню, позволяя выбирать из двух вариантов или указывая на наличие подменю с двумя вариантами.

	<b>Кнопка-флажок (отмечена флажком)</b> Указывает на то, что опция выбрана.
	<b>Кнопка-флажок (пустая, без флажка)</b> Указывает на то, что опция не выбрана.
	<b>Черная экранная кнопка</b> Означает, что выбрана опция пункта меню с имеющимся в нем подменю.

<sup>10</sup> Применимо только для DM4601e.

**Таблица 11: Значки Bluetooth-устройств**

Нижеследующие значки появляются рядом с пунктами списка доступных устройств, имеющих функцию Bluetooth, и обозначают тип устройства.

	<b>Аудиоустройство Bluetooth</b>
	Аудиоустройство Bluetooth, например гарнитура.
	<b>Bluetooth-устройство обмена данными</b>
	Bluetooth-устройство обмена данными, например сканер.
	<b>Bluetooth-устройство с РТТ</b>
	Bluetooth-устройство с РТТ, например устройство только с поддержкой РРТ (РОР).

**Таблица 12: Значки вызова**

Во время вызова на дисплее отображаются следующие значки. Эти значки также отображаются в списке контактов, обозначая тип идентификатора или псевдоним.

	<b>Вызов на ПК по Bluetooth</b>
	Выполняется вызов на ПК по Bluetooth.
	В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) вызова на ПК по Bluetooth.
	<b>Вызов диспетчера</b>
	Вызов диспетчера используется для отправки текстового сообщения на компьютер диспетчера через сторонний сервер текстовых сообщений.
	<b>Групповой/общий вызов</b>
	Выполняется групповой или общий вызов.
	В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) группы.
	<b>Частный вызов</b>
	Выполняется частный вызов. В списке контактов данный значок

*Продолжение таблицы...*

	обозначает псевдоним (имя) или идентификатор (номер) абонента.
	<p><b>Телефонный вызов в режиме группового/общего вызова</b> Выполняется телефонный вызов в режиме группового или общего вызова.</p> <p>В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) группы.</p>
	<p><b>Телефонный вызов в режиме частного вызова</b> Выполняется телефонный вызов в режиме частного вызова.</p> <p>В списке контактов данный значок обозначает псевдоним (имя) или идентификатор (номер) телефона.</p>

**Таблица 13: Значки заданий**

В папке задания сразу отобразятся следующие значки.

	<p><b>Все задания</b> Обозначает все задания в списке.</p>
	<p><b>Новые задания</b> Обозначает новые задания.</p>
	<p><b>Выполняется...</b> Выполняется передача задания. Отображается перед индикацией состояния об успешной или неуспешной отправке задания.</p>
	<p><b>Сбой отправки</b> Задания не могут быть отправлены.</p>
	<p><b>Отправлено успешно</b> Задания были успешно отправлены.</p>
	<p><b>Приоритет 1</b> Указывает на 1-й уровень приоритета для заданий.</p>
	<p><b>Приоритет 2</b> Указывает на 2-й уровень приоритета для заданий.</p>

**Приоритет 3**

Указывает на 3-й уровень приоритета для заданий.

**Таблица 14: Значки мини-уведомлений**

Следующие значки могут на короткое время появляться на дисплее после выполнения определенных действий.

**Передача не состоялась (отрицательное)**

Действие не выполнено.

**Успешная передача (положительное)**

Действие выполнено успешно.

**Идет передача (переходное)**

Выполняется передача. Этот значок появляется перед индикацией "Успешная передача" или "Передача не состоялась".

**Таблица 15: Значки отправленных элементов** 

В папке "Отправленные" в правом верхнем углу дисплея отображаются следующие значки.

[Отправить отзыв](#)

или

**Выполняется...**

Выполняется отправка текстового сообщения на псевдоним или идентификатор абонента. За этим следует ожидание подтверждения.

Ожидается отправка текстового сообщения на псевдоним или идентификатор группы.

или

**Индивидуальное или групповое сообщение прочитано**

Текстовое сообщение прочитано.

или

**Индивидуальное или групповое сообщение не прочитано**

Текстовое сообщение не прочитано.

или

**Сбой отправки**

Не удалось отправить текстовое сообщение.

*Продолжение таблицы...*

или

**Отправлено успешно**

Текстовое сообщение успешно отправлено.

## Светодиодные индикаторы

Светодиодные индикаторы показывают рабочее состояние радиостанции.

**Мигает красным**

Радиостанция не прошла автотестирование при включении питания.

Радиостанция принимает или отправляет передачу в экстренном режиме.

Радиостанция передает сигнал при низком уровне заряда аккумулятора.

Радиостанция перемещена за пределы допустимого диапазона при настройке системы автоматического оповещения.

Режим без звука включен.

**Постоянно горит зеленым**

Радиостанция включается.

Радиостанция передает сигнал.

Радиостанция отправляет оповещение о вызове или выполняет экстренную передачу.

**Мигает зеленым**

Радиостанция принимает вызов или данные.

Радиостанция получает передачу беспроводного программирования.

Радиостанция выполняет поиск активности в эфире.

**УВЕДОМЛЕНИЕ:**

В силу особенностей цифрового протокола эта активность может влиять или не влиять на использование запрограммированного канала радиостанции.

В режиме Capacity Plus при обнаружении активности в эфире светодиодная индикация отсутствует.

**Дважды мигает зеленым**

Радиостанция принимает зашифрованный вызов или данные.

**Постоянно горит желтым**

Радиостанция выполняет мониторинг конвенционального канала.

Радиостанция находится в режиме обнаружения Bluetooth.

### **Мигает желтым**

Радиостанция выполняет поиск активности.

Радиостанция еще не отреагировала на оповещение о вызове.

На радиостанции активирован адаптивный список приема.

Все каналы в режиме "Capacity Plus – многосайтовая" заняты.

### **Дважды мигает желтым**

В радиостанции активирована функция автоматического роуминга.

Радиостанция выполняет активный поиск нового сайта.

Радиостанция еще не отреагировала на оповещение о групповом вызове.

Радиостанция заблокирована.

Отсутствует соединение радиостанции с ретранслятором в режиме Capacity Plus.

Все каналы Capacity Plus заняты.

[Отправить отзыв](#)

## **Сигналы**

Ниже приведены тональные сигналы, которые звучат в динамике радиостанции.

Звуковой сигнал высокой тональности

Звуковой сигнал низкой тональности

## **Индикаторные тональные сигналы**

Индикаторные тональные сигналы обеспечивают звуковую индикацию состояния радиостанции после выполнения какого-либо действия.

Тональный сигнал успешного действия

Тональный сигнал неуспешного действия

## **Звуковые сигналы**

Звуковые сигналы выступают в роли звуковых индикаторов, указывая на состояние радиостанции или ее реакцию на полученные данные.

**Непрерывный тональный сигнал**

Однообразный звук. Звучит до тех пор, пока не будет отключен.

**Периодический тональный сигнал**

Включается с периодичностью, определяемой настройками радиостанции. Сигнал звучит, прекращается, затем повторяется.

**Повторяющийся тональный сигнал**

Одиночный тональный сигнал, который повторяется до тех пор, пока не будет отключен пользователем.

**Кратковременный тональный сигнал**

Звучит один раз в течение периода времени, определяемого настройками радиостанции.

## Конвенциональные аналоговый и цифровой режимы

Каждый канал радиостанции может быть настроен на работу в конвенциональном аналоговом или конвенциональном цифровом режиме.

Переключение между аналоговыми и цифровыми каналами осуществляется при помощи **селектора каналов**.

При переключении из цифрового режима в аналоговый некоторые функции становятся недоступными. При этом значки цифровых функций становятся "серыми". Неактивные функции не отображаются в меню.

Некоторые функции радиостанции доступны как в аналоговом, так и в цифровом режиме. Небольшие различия в работе каждой функции **не** отражаются на качестве работы радиостанции.

**УВЕДОМЛЕНИЕ:**

Радиостанция также переключается между цифровым и аналоговым режимами во время двухрежимного сканирования. Более подробную информацию см. в разделе [Сканирование на стр. 469](#).

## Сведения о значках

В данной публикации для обозначения функций, работающих только в конвенциональном аналоговом или конвенциональном цифровом режиме, а также для обозначения функций, доступных при наличии микрофона с клавиатурой, используются следующие значки.

Указывает на функцию, работающую только в конвенциональном **аналоговом** режиме.

Указывает на функцию, работающую только в конвенциональном **цифровом** режиме.

Функции, доступные **как** в конвенциональном аналоговом, так и в конвенциональном цифровом режиме, значками **не** обозначаются.

## IP Site Connect

Эта функция позволяет расширить конвенциональную связь радиостанции за пределы одного сайта, соединяясь с разными доступными сайтами посредством сети интернет-протокола (IP). Это конвенциональный многосайтовый режим.

Когда радиостанция выходит из зоны доступа одного сайта и попадает в зону доступа другого сайта, она соединяется с ретранслятором нового сайта и может отправлять и принимать вызовы или данные. Эта процедура может выполняться автоматически или вручную в зависимости от настроек радиостанции.

В режиме автоматического поиска сайта при слишком низкой мощности сигнала текущего сайта или невозможности его обнаружить радиостанция сканирует все доступные сайты. Затем она фиксируется на ретрансляторе с самым высоким значением индикатора уровня принимаемого сигнала (RSSI).

В режиме ручного поиска сайта радиостанция ищет следующий доступный сайт из списка роуминга (не обязательно с самым сильным сигналом) и фиксируется на его ретрансляторе.

**УВЕДОМЛЕНИЕ:**

Для каждого канала может быть активирована либо функция сканирования, либо функция роуминга, но не обе одновременно.

Каналы, для которых активирована эта функция, могут быть включены в определенный список роуминга. Во время автоматического роуминга радиостанция осуществляет поиск каналов в списке роуминга, чтобы определить самый подходящий сайт. В списке роуминга может быть не более 16 каналов (включая выбранный канал).

**УВЕДОМЛЕНИЕ:**

Пункты списка роуминга нельзя удалять или добавлять вручную. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Capacity Plus – односайтовая

Конфигурация "Capacity Plus – односайтовая" — это односайтовая транкинговая конфигурация системы радиосвязи MOTOTRBO с использованием пула каналов, обеспечивающего связь между сотнями пользователей и поддержку до 254 групп. Эта функция позволяет радиостанции эффективно использовать доступное количество запрограммированных каналов в режиме связи через ретранслятор.

При попытке доступа к функции, неприменимой в рамках системы "Capacity Plus – односайтовая", нажатием программируемой кнопки вы услышите тональный сигнал неуспешного действия.

В радиостанции также имеются функции, доступные в конвенциональном цифровом режиме, а также в режимах IP Site Connect и Capacity Plus. Небольшие различия в работе каждой функции не отражаются на качестве работы радиостанции.

Для получения дополнительной информации о данной конфигурации обратитесь к дилеру или системному администратору.

## Capacity Plus – многосайтовая

Конфигурация "Capacity Plus – многосайтовая" — это многоканальная транкинговая конфигурация системы радиосвязи MOTOTRBO, сочетающая в себе лучшие возможности конфигураций Capacity Plus и IP Site Connect.

Конфигурация "Capacity Plus Multi-Site" позволяет расширить транкинговую связь за пределы одного сайта, соединяясь с разными доступными сайтами, связанными посредством IP-сети. Также увеличивается емкость сети благодаря эффективному использованию совокупности доступных запрограммированных каналов, которые поддерживает каждый из доступных сайтов.

Когда радиостанция выходит из зоны доступа одного сайта и попадает в зону доступа другого сайта, она соединяется с ретранслятором нового сайта и может отправлять и принимать вызовы или данные. В зависимости от настроек радиостанции эта процедура может выполняться автоматически или вручную.

Если радиостанция настроена на автоматический режим работы, то при слишком низкой мощности

сигнала текущего сайта или невозможности его обнаружить радиостанция сканирует все доступные сайты. Затем радиостанция фиксируется на ретрансляторе с самым высоким индикатором уровня принимаемого сигнала (RSSI).

При ручном поиске сайтов радиостанция выполняет поиск следующего доступного сайта из списка роуминга (не обязательно с самым сильным сигналом) и фиксируется на нем.

Любой канал, на котором активирован режим "Capacity Plus – многосайтовая", можно добавлять в определенный список роуминга. Во время автоматического роуминга радиостанция осуществляет поиск этих каналов, чтобы определить самый подходящий сайт.

### **УВЕДОМЛЕНИЕ:**

Пункты списка роуминга нельзя удалять или добавлять вручную. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Как и при работе в режиме "Capacity Plus – односайтовая", в меню не отображаются значки функций, неприменимых в режиме "Capacity Plus – многосайтовая". При попытке доступа к функции, неприменимой в рамках системы "Capacity Plus –

многосайтовая", нажатием программируемой кнопки вы услышите тональный сигнал неуспешного действия.

## Выбор зон и каналов

В данной главе описываются принципы выбора зон и каналов на радиостанции. Зона — это группа каналов.

Радиостанция поддерживает до 99 каналов и 2 зон, каждая из которых можем включать не более 99 каналов.

Каждый канал может быть запрограммирован с разными функциями и/или поддерживать различные группы пользователей.

### Выбор зон

Для выбора нужной зоны выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **выбора зоны**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента зона. Нажмите  для выбора.  
На дисплее появится значок  и текущая зона.

- 3 Нажмите  или  для выбора нужной зоны. Нажмите  для выбора.  
На дисплее появится сообщение Выбрана <зона>, после чего радиостанция вернется к экрану выбранной зоны.

### Выбор зоны с помощью поиска псевдонима

Для выбора зоны с помощью поиска псевдонима выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Зона. Нажмите  для выбора. На дисплее появится значок  и текущая зона.
- 

- 3 Наберите первый символ нужного псевдонима. На дисплее появится мигающий курсор.
- 

- 4 Наберите остальные символы нужного псевдонима. Поиск псевдонима выполняется без учета регистра. При наличии двух или более пунктов с одним названием на дисплее радиостанции отобразится тот, который стоит первым в списке. В первой строке на дисплее отобразятся введенные вами символы. В следующих строках появится краткий перечень результатов поиска.
- 

- 5 Нажмите  для выбора.

На дисплее появится сообщение Выбрано <зона>, после чего радиостанция вернется к экрану выбранной зоны.

---

## Выбор канала

Для выбора нужного канала после выбора зоны выполните следующие действия.

Выполните одно из следующих действий.

- Нажмите кнопку **прокрутки вверх/вниз**.
  - Используйте **ручку выбора каналов/регулировки громкости**.
  - Нажмите запрограммированную кнопку **Канал вверх/вниз**.
- 

## Вызовы

В данной главе приводится описание действий для приема, ответа, выполнения и завершения вызовов.

После выбора канала можно выбрать псевдоним или идентификатор абонента или группы с помощью одного из следующих способов.

## Поиск псевдонима

Этот способ используется для выполнения групповых, частных и общих вызовов только при помощи микрофона с клавиатурой.

## Список контактов

Этот способ дает прямой доступ к списку контактов.

## Ручной набор (через список контактов)

Этот способ используется для выполнения частных и телефонных вызовов только при помощи микрофона с клавиатурой.

## Запрограммированные цифровые клавиши

Этот способ используется для выполнения групповых, частных и общих вызовов только при помощи микрофона с клавиатурой.

## УВЕДОМЛЕНИЕ:

Каждой цифровой клавише можно назначить только один псевдоним или идентификатор, но псевдониму или идентификатору можно назначить несколько цифровых клавиш. Псевдоним или идентификатор можно назначить любой цифровой клавише микрофона с клавиатурой. Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

## Запрограммированная кнопка доступа одним нажатием

Этот способ используется только для выполнения групповых, частных и телефонных вызовов.

Кнопке **доступа одним нажатием** можно назначить только один идентификатор, а также запрограммировать для нее короткое или длительное нажатие. Радиостанция поддерживает программирование нескольких кнопок **доступа одним нажатием**.

## Программируемая кнопка

Этот способ используется только для выполнения телефонных вызовов.

### Ручка выбора каналов/регулировки громкости

Этот способ используется для выбора псевдонима или идентификатора абонента, а также псевдонима или идентификатора группы вручную.

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет передачу, и мигает зеленым цветом, когда радиостанция ведет прием.

#### УВЕДОМЛЕНИЕ:

Светодиодный индикатор постоянно горит зеленым цветом, когда радиостанция ведет передачу, и мигает двойными вспышками зеленого цвета, когда радиостанция принимает зашифрованный вызов.

Для дескремблирования зашифрованного вызова секретный ключ радиостанции или значение ключа и идентификатор ключа (которые программируются дилером) должны совпадать с соответствующими параметрами передающей радиостанции (радиостанции, от которой вы принимаете вызов).

Более подробную информацию см. в разделе [Конфиденциальность на стр. 536](#).

## Груп. выз.

Для получения или выполнения группового вызова радиостанция должна быть сконфигурирована как участник этой группы.

## Выполнение групповых вызовов

Для выполнения группового вызова на радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
    - Выберите канал с активным псевдонимом или идентификатором группы.
    - Нажмите запрограммированную кнопку **доступа одним нажатием**.

---

  - 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова** и псевдоним группового вызова.
-

### 3 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор. На дисплее отобразится значок **группового вызова**, псевдоним или идентификатор группы, а также псевдоним или идентификатор передающей радиостанции.

### 4 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Вид экрана радиостанции вернется к отображению до выполнения вызова.

## Выполнение группового вызова с помощью списка контактов

Для выполнения группового вызова на радиостанции с помощью списка контактов выполните следующие действия.

### 1 Нажмите для доступа к меню.

### 2 Нажмите или для выбора элемента **Контакты**. Нажмите для выбора.

### 3 Нажмите или для выбора нужного псевдонима или идентификатора. Нажмите для выбора.

### 4 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор.

### 5 Для прослушивания отпустите кнопку **РТТ**. При ответе любого пользователя из группы светодиодный индикатор начнет мигать зеленым

цветом. На дисплее отобразится значок **группового вызова**, псевдоним или идентификатор группы, а также псевдоним или идентификатор передающей радиостанции.

- 
- 6  Если включена функция индикации свободного канала, то в момент отпускания кнопки **PTT** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **PTT** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

---

## Выполнение группового вызова с помощью программируемой цифровой клавиши

Для выполнения группового вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

- 1 Находясь на главном экране, длительным нажатием запрограммированной цифровой клавиши выберите предварительно заданный псевдоним или идентификатор.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

---

- 2 Нажмите кнопку **PTT** для выполнения вызова. Загорится зеленый светодиодный индикатор.
- 

- 3 Для прослушивания отпустите кнопку **PTT**. При ответе любого пользователя из группы светодиодный индикатор начнет мигать зеленым цветом.
- 

- 4  Если включена функция индикации свободного канала, то в момент отпускания кнопки **PTT** на передающей радиостанции вы услышите короткий тональный сигнал оповещения,

уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. На дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

## Ответ на групповой вызов

Чтобы выполнить прием вызова от группы пользователей, необходимо настроить радиостанцию в качестве участника этой группы. Для ответа на групповой вызов выполните следующие действия.

При поступлении группового вызова:

- Зеленый светодиодный индикатор начнет мигать.
- В правом верхнем углу дисплея появится значок **группового вызова**.

- В первой строке на дисплее появится псевдоним вызывающего абонента.
- Во второй строке появится псевдоним группового вызова.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

### 1 Выполните одно из следующих действий.

-  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.
-  Если включена функция прерывания голосовой передачи, нажмите кнопку **РТТ**, чтобы прервать аудиосигнал с передающей радиостанции и освободить канал для того, чтобы вы могли ответить.

Загорится зеленый светодиодный индикатор.

### 2 Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
-  Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

### 3 Для прослушивания отпустите кнопку **РТТ**.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

Если при получении группового вызова на радиостанции отображается не главный экран, то до ответа на вызов будет отображаться текущий экран.

Нажмите и удерживайте кнопку  , чтобы вернуться на главный экран для просмотра псевдонима вызывающего абонента перед ответом на вызов.

## Частные вызовы

Частный вызов — это вызов одной радиостанции другой радиостанцией.

Существует два типа осуществления частного вызова. В первом типе перед выполнением вызова производится проверка доступности радиостанции, а во втором типе вызов выполняется сразу же. Только один из этих типов вызова может быть запрограммирован дилером для радиостанции.

## Выполнение индивидуального вызова

Для выполнения частного вызова радиостанция должна быть запрограммирована соответствующим образом. Если эта функция неактивна, то при инициировании вызова звучит тональный сигнал неуспешного действия. Для выполнения частного вызова на радиостанции выполните следующие действия.

Для связи с отдельными радиостанциями используйте текстовые сообщения или оповещения о вызове. Для получения дополнительной информации см. раздел [Обмен текстовыми сообщениями на стр. 175](#) или [Функция оповещения о вызове на стр. 487](#).

- 1 Выполните одно из следующих действий.
  - Выберите канал с активным псевдонимом или идентификатором абонента.

- Нажмите запрограммированную кнопку **доступа одним нажатием**.

**2** Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор. На дисплее появится значок **частного вызова**, псевдоним абонента и состояние вызова.

**3** Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

**4** Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом.

**5**  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

## Выполнение частного вызова с помощью списка контактов

Для выполнения частного вызова на радиостанции с помощью списка контактов выполните следующие действия.

**1** Нажмите  для доступа к меню.

**2** Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

**3** Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 4 Нажмите кнопку **РТТ** для выполнения вызова.  
Загорится зеленый светодиодный индикатор. На дисплее отобразится псевдоним получателя.

- 5 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

- 6 Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом. На дисплее отобразится псевдоним или идентификатор передающего абонента.

- 7  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов

будет завершен. Прозвучит тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

## Выполнение частного вызова с помощью ручного набора

Для выполнения на радиостанции частного вызова с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.
- 4 Нажмите  или  для выбора элемента **Номер р/ст**. Нажмите  для выбора.

5 Выполните одно из следующих действий.

- Введите идентификатор абонента и нажмите  , чтобы продолжить.
- Отредактируйте ранее набранный идентификатор абонента и нажмите  , чтобы продолжить.

6 Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор. На дисплее отобразится псевдоним получателя.

7 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

8 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор. На дисплее отобразится псевдоним или идентификатор передающего абонента.

9  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

## Выполнение частного вызова с помощью программируемой цифровой клавиши

Для выполнения частного вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

1 Находясь на главном экране, длительным нажатием запрограммированной цифровой

клавиши выберите предварительно заданный псевдоним или идентификатор.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

---

## 2 Нажмите кнопку **PTT** для выполнения вызова.

Загорится зеленый светодиодный индикатор. В правом верхнем углу дисплея появится значок **частного вызова**. В первой строке на дисплее появится псевдоним вызывающего абонента. Во второй строке отобразится состояние вызова.

---

## 3 Для прослушивания отпустите кнопку **PTT**.

При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом. На дисплее отобразится псевдоним получателя.

- 4  Если включена функция индикации свободного канала, то в момент отпускания кнопки **PTT** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **PTT** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Прозвучит тональный сигнал. На дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

---

Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

## Ответ на частный вызов

Для ответа на частный вызов выполните следующие действия.

При поступлении частного вызова:

- Зеленый светодиодный индикатор начнет мигать.

- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

## 1 Выполните одно из следующих действий.

-  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.
-  Если включена функция удаленного прерывания передачи, нажмите кнопку **РТТ**, чтобы остановить текущий прерываемый вызов и освободить канал для ответа.

Загорится зеленый светодиодный индикатор.

- 
- ## 2 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
- 

- ## 3 Для прослушивания отпустите кнопку **РТТ**.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

---

## Общие вызовы

Общий вызов — это вызов одной радиостанцией всех радиостанций, работающих на данном канале. Общий вызов используется для передачи важных объявлений, требующих особого внимания пользователей. Пользователи канала не могут ответить на общий вызов.

## Прием общего вызова

При приеме общего вызова:

- Прозвучит тональный сигнал.
- Зеленый светодиодный индикатор начнет мигать.
- В правом верхнем углу дисплея появится значок **группового вызова**.
- В первой строке на дисплее появится идентификатор псевдонима вызывающего абонента.
- Во второй строке появится сообщение **Общий вызов**.

- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

По окончании общего вызова радиостанция вернется к экрану, который отображался до принятия вызова.

Общий вызов заканчивается без установленного периода ожидания.

 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и доступен для использования.

Ответ на общий вызов не предусмотрен.

#### **УВЕДОМЛЕНИЕ:**

Радиостанция прекратит прием общего вызова, если при поступлении вызова пользователь переключится на другой канал. Во время общего вызова вы не можете пользоваться навигацией по меню или выполнять операции редактирования до завершения общего вызова.

## Выполнение общего вызова

Для выполнения общего вызова радиостанция должна быть запрограммирована соответствующим образом. Для выполнения общего вызова на радиостанции выполните следующие действия.

- 1 Выберите канал с активным псевдонимом или идентификатором группы общего вызова.
- 
- 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова** и сообщение **Общий вызов**.
- 
- 3 Выполните одно из следующих действий.
    - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
    -  Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

Пользователи канала не могут ответить на общий вызов.
-

## Выполнение общего вызова с помощью программируемой цифровой клавиши 📞

Для выполнения общего вызова на радиостанции с помощью программируемой цифровой клавиши выполните следующие действия.

- 1 Находясь на главном экране, выполните длительное нажатие запрограммированной цифровой клавиши, назначенной предварительно заданному псевдониму или идентификатору.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

Если цифровая клавиша не назначена пункту, прозвучит тональный сигнал неуспешного действия.

- 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор.

- 3 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор. Возможность ответа на общий вызов в этот момент будет отсутствовать.

- 4 📞 Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен. Вид экрана радиостанции вернется к отображению до выполнения вызова. В случае частного вызова по завершении вызова прозвучит короткий тональный сигнал.

Более подробную информацию см. в разделе [Назначение пункта программируемой цифровой клавише на стр. 475](#).

## Выборочные вызовы

Выборочный вызов — это вызов одной радиостанции другой радиостанцией. Это частный вызов, выполняемый в аналоговой системе.

### Выполнение выборочного вызова

Для выполнения выборочного вызова радиостанция должна быть запрограммирована соответствующим образом. Для выполнения выборочного вызова на радиостанции выполните следующие действия.

- 1 Выберите канал с активным псевдонимом или идентификатором абонента.

---

- 2 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. На дисплее появится значок **частного вызова**, псевдоним абонента и состояние вызова.

---

- 3 Выполните одно из следующих действий.
  - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

[Отправить отзыв](#)

-  Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

- 4 Для прослушивания отпустите кнопку **РТТ**.

При ответе вызываемой радиостанции загорится зеленый светодиодный индикатор.

- 5  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

- 6 На дисплее отобразится сообщение **Выз. законч.**

## Ответ на выборочный вызов

Для ответа на выборочный вызов выполните следующие действия.

При поступлении выборочного вызова:

- Зеленый светодиодный индикатор начнет мигать.
- В первой строке на дисплее появится значок **частного вызова**, псевдоним абонента и сообщение **Выбор. вызов** или **Оповещ. с выз.**.
- Радиостанция активирует звуковые сигналы, и звук входящего вызова прозвучит в динамике радиостанции.

**1** Нажмите кнопку **РТТ** для ответа на вызов.  
Загорится зеленый светодиодный индикатор.

**2** Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

**3** Для прослушивания отпустите кнопку **РТТ**.  
Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов

будет завершен. Прозвучит тональный сигнал. На дисплее отобразится сообщение **Выз. законч.**

## Телефонные вызовы

Телефонный вызов — это вызов телефона с радиостанции.

Если на радиостанции не включена функция телефонного вызова:

- На дисплее появится сообщение **Недоступно**.
- Радиостанция отключит сигнал вызова.
- После завершения вызова радиостанция вернется к предыдущему экрану.

Радиостанция попытается завершить телефонный вызов в следующих случаях:

- Нажатие кнопки **доступа одним нажатием**, которой соответствует код отмены доступа.
- Ввод кода отмены доступа при появлении запроса на ввод дополнительных цифр.

Во время осуществления доступа к каналу, передачи кода доступа или отмены доступа или дополнительных цифр радиостанция реагирует только на команды кнопок и ручек **включения/выключения**,

**регулировки громкости и селектора каналов.**

Каждый раз при вводе недопустимого значения звучит тональный сигнал.

Во время осуществления доступа к каналу нажмите

 , чтобы отменить вызов. Прозвучит тональный сигнал.

**УВЕДОМЛЕНИЕ:**

Код доступа или отмены доступа не может содержать более 10 символов.

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

**Выполнение телефонного вызова** 

Для выполнения телефонного вызова на радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **доступа одним нажатием**, чтобы выполнить вызов предварительно заданного псевдонима или идентификатора.

Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит

тональный сигнал неуспешного действия. Если код доступа не задан предварительно в списке контактов, на дисплее появится сообщение **Код доступа:**.

- 
- 2 Введите код доступа и нажмите  , чтобы продолжить.

Код доступа или отмены доступа не может содержать более 10 символов.

- 
- 3 Нажмите кнопку **РТТ** для ответа на вызов. Для прослушивания отпустите кнопку **РТТ**.

- 
- 4 При необходимости введите дополнительные цифры с помощью клавиатуры и нажмите  , чтобы продолжить.

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения вызова, на дисплее радиостанции

появится окно, которое отображалось до выполнения вызова.

Звуковые сигналы двухтонального многочастотного сигнала. Радиостанция вернется к предыдущему экрану.

## 5 Чтобы закончить разговор, нажмите клавишу

## 6 Выполните одно из следующих действий.

- Если код отмены доступа не был предварительно задан, введите его, когда на дисплее появится сообщение Код

отм. дост. :, затем нажмите  для продолжения.

Радиостанция вернется к предыдущему экрану.

- Нажмите запрограммированную кнопку **доступа одним нажатием**.

Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение *Заканч. тел. выз.*

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение *Выз. законч.*

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите два последних шага, описанные выше, или подождите, пока пользователь телефона завершит вызов.

## Выполнение телефонного вызова с помощью списка контактов

Для выполнения телефонного вызова на радиостанции с помощью списка контактов выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

На дисплее отобразятся пункты в алфавитном порядке.

---

3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

После нажатия кнопки **РТТ** во время отображения экрана контактов телефона:

- В первой строке на дисплее появится сообщение **Номер тел.:**.
- Во второй строке появится мигающий курсор.

Если выбран пустой пункт списка:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится сообщение **Недейств. т. номер.**
- 

4 Нажмите  или  для выбора элемента **Вызов тел.**. Нажмите  для выбора.

Если код доступа не был предварительно задан, на дисплее появится сообщение **Код доступа:**.

---

5 Введите код доступа и нажмите  , чтобы продолжить.

Код доступа или отмены доступа не может содержать более 10 символов.

В первой строке на дисплее отобразится сообщение **Идет вызов**. Во второй строке на дисплее появится псевдоним или идентификатор абонента и значок **телефонного вызова**. Если вызов выполнен успешно:

- Прозвучит тональный сигнал DTMF.
- Прозвучит тональный сигнал набора телефонного номера пользователя.

- В первой строке на дисплее появится псевдоним или идентификатор абонента и значок **RSSI**.
- Во второй строке на дисплее появится сообщение **Тел. вызов** и значок **телефонного вызова**.

Если вызов не будет выполнен успешно:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение **Тел. вызов отказ.**, а затем сообщение **Код доступа**.
- Если код доступа был предварительно задан в списке контактов, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

---

**6** Нажмите кнопку **PTT** для ответа на вызов.  
Значок **RSSI** исчезнет.

---

**7** Для прослушивания отпустите кнопку **PTT**.

---

**8** При необходимости введите дополнительные цифры с помощью клавиатуры и нажмите , чтобы продолжить.

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

Прозвучит тональный сигнал DTMF.  
Радиостанция вернется к предыдущему экрану.

---

**9** Чтобы закончить разговор, нажмите клавишу

---

**10** Если код отмены доступа не был предварительно задан, введите его, когда на дисплее появится сообщение **Код отм. дост.**, затем нажмите

для продолжения.

Радиостанция вернется к предыдущему экрану.  
Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение **Заканч. тел. выз.**  
Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение  
Выз. законч.

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите шаг 9 и шаг 10 или подождите, пока пользователь телефона завершит вызов. После нажатия кнопки **РТТ** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение *Нажать ОК для вызова.*

После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение *Тел. выз законч.*

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

#### УВЕДОМЛЕНИЕ:

Во время осуществления доступа к каналу нажмите , чтобы отменить вызов, после чего прозвучит тональный сигнал.

При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод дополнительных цифр, радиостанция попытается завершить вызов.

Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки **Вкл./Выкл., регулятора громкости и ручки выбора каналов**. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

## Выполнение телефонного вызова с помощью ручного набора

Для выполнения телефонного вызова на радиостанции с помощью ручного набора выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента **Номер тел.**. Нажмите  для выбора.

На дисплее появится сообщение **Номер:** и мигающий курсор.

---

5 Введите номер телефона и нажмите  , чтобы продолжить.

Если код доступа не был предварительно задан, на дисплее появится сообщение **Код доступа:** и мигающий курсор.

---

6 Введите код доступа и нажмите  , чтобы продолжить.

Код доступа или отмены доступа не может содержать более 10 символов.

---

7 Загорится зеленый светодиодный индикатор. В правом верхнем углу дисплея появится значок **телефонного вызова**. В первой строке на дисплее появится псевдоним абонента. Во второй строке отобразится состояние вызова. Если вызов выполнен успешно:

- Прозвучит тональный сигнал DTMF.
- Прозвучит тональный сигнал набора телефонного номера пользователя.
- В первой строке на дисплее появится псевдоним абонента.
- В правом верхнем углу дисплея сохранится значок **телефонного вызова**.

Если вызов не будет выполнен успешно:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение **Тел. вызов отказ.**, а затем сообщение **Код доступа:**.

- Если код доступа был предварительно задан в списке контактов, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

---

## 8 Чтобы закончить разговор, нажмите клавишу

---

## 9 Выполните одно из следующих действий.

- Если код отмены доступа не был предварительно задан, введите его, когда на дисплее появится сообщение Код

отм. дост. :., затем нажмите  для продолжения.

Радиостанция вернется к предыдущему экрану.

- Нажмите запрограммированную кнопку **доступа одним нажатием**. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение *Заканч. тел. выз.*.

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение *Выз. законч.*

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите [шаг 8](#) или подождите, пока пользователь телефона завершит вызов.

**УВЕДОМЛЕНИЕ:**

После нажатия кнопки **РТТ** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение

Нажать **OK** для вызова.

После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение

Выз. законч..

В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

Во время осуществления доступа к каналу нажмите , чтобы отменить вызов, после чего прозвучит тональный сигнал.

При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод

дополнительных цифр, радиостанция попытается завершить вызов.

Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки **Вкл./Выкл., регулятора громкости и ручки выбора каналов**. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

---

## Выполнение группового, частного, телефонного или общего вызова с помощью поиска псевдонима

Для выполнения любых вызовов с помощью поиска псевдонима выполните следующие действия.

- 1 Нажмите  для доступа к меню.
-

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- На дисплее отобразятся пункты в алфавитном порядке.
- 
- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора абонента. В первой строке на дисплее появится сообщение **Номер тел.:**. Во второй строке появится мигающий курсор. С помощью клавиатуры введите номер телефона.
- 
- 4 Нажмите  для выбора. Если выбрана пустая запись, прозвучит тональный сигнал неуспешного действия, и на дисплее появится сообщение **Недейств. т. номер**.
- 
- 5 Нажмите  или  для выбора элемента **"Вызов тел."** и нажмите  для выбора. Если код доступа не был предварительно задан в списке контактов, в первой строке на дисплее

появится сообщение **Код доступа:**. Во второй строке появится мигающий курсор. Введите код доступа и нажмите кнопку , чтобы продолжить. В случае успешного выполнения прозвучит тональный сигнал DTMF. Прозвучит тональный сигнал набора телефонного номера пользователя. В первой строке на дисплее появится псевдоним или идентификатор абонента и значок RSSI. Во второй строке на дисплее появится сообщение **Тел. вызов** и значок телефонного вызова. В случае сбоя прозвучит тональный сигнал, и на дисплее появится сообщение **Тел. вызов отказ**. На дисплее радиостанции отобразится окно ввода кода доступа. Если код доступа был предварительно задан в списке контактов, на дисплее появится окно, которое отображалось до выполнения вызова.

- 
- 6 Нажмите кнопку **PTT** для разговора и отпустите ее для прослушивания. Значок RSSI исчезает во время передачи.
- 
- 7 Чтобы ввести дополнительные цифры, необходимые для выполнения телефонного вызова, выполните одно из следующих действий.

- Введите дополнительные цифры с помощью клавиатуры. В первой строке на дисплее появится сообщение **Доп. знаки:**. Во второй строке появится мигающий курсор. Введите дополнительные цифры и нажмите кнопку , чтобы продолжить. Прозвучит тональный сигнал DTMF, и радиостанция вернется к предыдущему экрану.
- Нажмите кнопку **доступа одним нажатием**. Прозвучит тональный сигнал DTMF. Если кнопке **доступа одним нажатием** не соответствует ни один из пунктов, прозвучит тональный сигнал неуспешного действия.

## 8 Чтобы закончить разговор, нажмите клавишу

. Если код отмены доступа не был предварительно задан в списке контактов, в первой строке на дисплее появится сообщение **Код отм. дост.:**. Во второй строке появится мигающий курсор. Введите код отмены доступа и нажмите , чтобы продолжить. Радиостанция вернется к предыдущему экрану. Прозвучит тональный сигнал DTMF, и на дисплее появится сообщение **Заканч. тел. выз.** В случае
