успешного выполнения прозвучит тональный сигнал, и на дисплее появится сообщение **"Тел. выз законч"**. радиостанция вернется к экрану телефонного вызова. В случае сбоя радиостанция вернется к экрану телефонного вызова. После нажатия кнопки **PTT** во время отображения экрана контактов телефона прозвучит тональный сигнал, и на дисплее появится сообщение **Нажать ОК для вызова**. После завершения вызова пользователем телефона прозвучит тональный сигнал, и на дисплее появится сообщение **Тел. выз законч**. В случае завершения вызова во время ввода дополнительных цифр, необходимых для совершения телефонного вызова, на дисплее радиостанции появится окно, которое отображалось до выполнения вызова.

### УВЕДОМЛЕНИЕ:

Во время осуществления доступа к каналу нажмите , чтобы отменить вызов (после чего прозвучит тональный сигнал) или чтобы прекратить поиск псевдонима. Нажмите  или , чтобы прекратить поиск псевдонима. При нажатии во время вызова кнопки **доступа одним нажатием**, которой соответствует код отмены доступа, или при вводе во время вызова кода отмены доступа по запросу на ввод дополнительных цифр, радиостанция попытается завершить вызов. Во время осуществления доступа к каналу и передачи кода доступа/прекращения доступа или дополнительных цифр радиостанция реагирует только на команды кнопки включения/выключения, регулятора громкости и селектора каналов. Каждый раз при вводе недопустимого значения звучит тональный сигнал.

[Отправить отзыв](#)

## Двухтональный многочастотный сигнал

Двухтональный многочастотный сигнал (DTMF) позволяет радиостанции работать в системе радиосвязи, имеющей выход в телефонную сеть.

Тональный сигнал DTMF можно отключить путем деактивирования всех тональных сигналов и оповещений радиостанции. Более подробную информацию см. в разделе [Активация и деактивация тональных сигналов/оповещений радиостанции на стр. 233](#).

## Инициирование вызовов DTMF

Для инициирования вызова DTMF на радиостанции выполните следующие действия.

- 1 Нажмите и удерживайте кнопку **PTT**.
- 2 Выполните одно из следующих действий.
  - Введите требуемый номер для инициирования вызова DTMF.

- Для инициирования вызова DTMF нажмите

- Для инициирования вызова DTMF нажмите

## Ответ на телефонный вызов в режиме группового вызова

Для ответа на телефонный вызов в режиме группового вызова выполните следующие действия.

При приеме телефонного вызова в режиме группового вызова:

- В правом верхнем углу дисплея появится значок **телефонного вызова**.
- На дисплее отобразится псевдоним группы и сообщение **Тел. вызов**.

Если на радиостанции не включена функция телефонного вызова, в первой строке на дисплее появится сообщение **Недоступно**, и радиостанция

отключит сигнал вызова. После завершения вызова радиостанция вернется к предыдущему экрану.

- 1 Нажмите кнопку **РТТ** для ответа на вызов. Для прослушивания отпустите кнопку **РТТ**.

- 2 Чтобы закончить разговор, нажмите клавишу

На дисплее появится сообщение

**Заканч. тел. выз.**

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение **Выз. законч.**

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите шаг и завершите вызов или подождите, пока пользователь телефона завершит вызов.

## Ответ на телефонный вызов в режиме общего вызова

При приеме телефонного вызова в режиме общего вызова можно ответить на вызов или завершить его, только если для канала назначен тип "Общий вызов". Для ответа на телефонный вызов в режиме общего вызова выполните следующие действия.

При приеме телефонного вызова в режиме общего вызова:

- В правом верхнем углу дисплея появится значок **телефонного вызова**.
- На дисплее появится сообщение **Общий вызов и Тел. вызов**.

Если на радиостанции не включена функция телефонного вызова, в первой строке на дисплее появится сообщение **Недоступно**, и радиостанция отключит сигнал вызова.

После завершения вызова радиостанция вернется к предыдущему экрану.

**1** Нажмите кнопку **РТТ** для ответа на вызов.

**2** Для прослушивания отпустите кнопку **РТТ**.

[Отправить отзыв](#)

**3** Чтобы закончить разговор, нажмите клавишу

На дисплее появится сообщение **Заканч. тел. выз.**

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее появится сообщение **Общий вызов и Выз. законч.**

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного вызова. Повторите [шаг 3](#) или подождите, пока пользователь телефона завершит вызов.

## Ответ на телефонный вызов в режиме частного вызова

Для ответа на телефонный вызов в режиме частного вызова выполните следующие действия.

При приеме телефонного вызова в режиме частного вызова:

- В правом верхнем углу дисплея появится значок **телефонного вызова**.
- На дисплее отобразится псевдоним вызывающего абонента или сообщение **Тел. вызов**.

Если на радиостанции не включена функция телефонного вызова, в первой строке на дисплее появится сообщение **Недоступно**, и радиостанция отключит сигнал вызова. После завершения вызова радиостанция вернется к предыдущему экрану.

- 1 Нажмите кнопку **РТТ** для ответа на вызов. Для прослушивания отпустите кнопку **РТТ**.

- 2 Чтобы закончить разговор, нажмите клавишу

На дисплее появится сообщение **Заканч. тел. выз.**

Если вызов завершен успешно:

- Прозвучит тональный сигнал.
- На дисплее отобразится сообщение **Выз. законч.**

Если вызов не удалось завершить, на дисплее радиостанции отобразится экран телефонного

вызова. Повторите шаг и завершите вызов или подождите, пока пользователь телефона завершит вызов.

---

## Прекращение радиовызова

Данная функция позволяет остановить текущий групповой или частный вызов, чтобы освободить канал для передачи. Например, это можно сделать в ситуации "залипания" микрофона, когда кнопка **РТТ** случайно нажата пользователем. Чтобы использовать эту функцию, радиостанция должна быть запрограммирована соответствующим образом. Для прекращения радиовызова выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **дистанционного прерывания передачи**.

На дисплее появится сообщение **Дист. прер. пер.**

- 2 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится сообщение  
Дист. прер. пер. успешно.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится сообщение  
Дист. прер. пер. не усп..

#### УВЕДОМЛЕНИЕ:

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Прямая связь

Данная функция позволяет поддерживать связь, когда ретранслятор не работает или радиостанция находится за пределами радиуса действия ретранслятора, но в зоне приема других радиостанций.

При выключении питания заданная настройка прямой связи сохраняется.

#### УВЕДОМЛЕНИЕ:

Эта функция недоступна в режиме "Capacity Plus – односайтовая", в режиме "Capacity Plus – многосайтовая" и на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

## Переключение между режимом ретранслятора и режимом прямой связи

Для переключения между режимом ретранслятора и режимом прямой связи выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **ретранслятора/прямой связи**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Пр. связь. Нажмите  для выбора.

Если функция активирована, рядом со статусом Активировано отобразится значок .

Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.

Радиостанция автоматически вернется к предыдущему экрану.

## Дополнительные функции

В данной главе описываются функции, доступные на радиостанции.

Ваш дилер или системный администратор могли внести изменения в настройки вашей радиостанции, исходя из конкретных задач. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Напоминание домашнего канала

Эта функция обеспечивает напоминание, если радиостанция не настроена на домашний канал в течение определенного периода времени.

Если эта функция активирована с помощью CPS и ваша радиостанция не настроена на домашний канал в течение определенного периода времени, периодически выполняются следующие действия.

- Воспроизводится тональный сигнал напоминания домашнего канала и объявление.
- В первой строке на дисплее отобразится **He**.
- Во второй строке отобразится **дом. канал**.

При появлении напоминания можно выполнить одно из следующих действий:

- вернуться на домашний канал;

- временно отключить звук напоминания с помощью программируемой кнопки;
- установить новый домашний канал с помощью программируемой кнопки.

## Отключение звука напоминания домашнего канала

При звуковом сигнале напоминания домашнего канала можно временно отключить его звук.

Нажмите программируемую кнопку **выключения звука напоминания домашнего канала**.

В первой строке на дисплее будет отображаться HCR, а во второй строке — выключено.

## Установка новых домашних каналов

При появлении напоминания домашнего канала можно установить новый домашний канал.

- 1 Выполните одно из следующих действий.
  - Нажмите программируемую кнопку **сброса домашнего канала**, чтобы установить

[Отправить отзыв](#)

текущий канал в качестве нового домашнего канала. Пропустите следующие действия. В первой строке на дисплее будет отображаться Нов. дом. канал, а во второй строке — псевдоним канала.

- Нажмите  для доступа к меню.

- 
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 
- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 
- 4 Нажмите  или , чтобы выделить элемент Дом. канал. Нажмите  для выбора.

- 5 Нажмите  или  для выбора нужного псевдонима домашнего канала. Нажмите  для выбора.
- Рядом с выбранным псевдонимом домашнего канала появится значок .

## Проверка радиостанции

Эта функция позволяет проверить активность другой радиостанции в системе, не оповещая об этом пользователя этой радиостанции. При этом на целевой радиостанции отсутствует звуковая или визуальная индикация выполняемого действия. Этой функцией можно воспользоваться, только если соответствующему абоненту присвоен псевдоним или идентификатор. Чтобы использовать эту функцию, радиостанция должна быть запрограммирована соответствующим образом.

## Отправка сигнала проверки радиостанции

Для отправки сигнала проверки радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **проверки радиостанции**.
  - 2 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.
- На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.

Дождитесь подтверждения.

Если во время ожидания подтверждения нажать кнопку , прозвучит тональный сигнал и радиостанция прекратит попытки получить подтверждение, а затем выйдет из режима проверки радиостанции.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

Радиостанция вернется к экрану псевдонима или идентификатора абонента.

## Отправка сигнала проверки радиостанции с помощью ручного набора

Для отправки сигнала проверки радиостанции с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 

- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.
- 

- 4 Нажмите  или  для выбора элемента **Номер р/ст.** Нажмите  для выбора.
- 

- 5 Выполните одно из следующих действий.
    - Введите псевдоним или идентификатор абонента и нажмите , чтобы продолжить.
    - Отредактируйте набранный идентификатор и нажмите , чтобы продолжить.
- 

- 6 Нажмите  или  для выбора элемента **Проверка р/ст.** Нажмите  для выбора.  
На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение

запроса. Загорится зеленый светодиодный индикатор.

## 7 Дождитесь подтверждения.

Если во время ожидания подтверждения нажать кнопку , прозвучит тональный сигнал и радиостанция прекратит попытки получить подтверждение, а затем выйдет из режима проверки радиостанции.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

Радиостанция вернется к экрану псевдонима или идентификатора абонента.

## Удаленный мониторинг

Данная функция позволяет включать микрофон вызываемой радиостанции с помощью псевдонима или идентификатора абонента. Эту функцию можно использовать для дистанционного слежения за звуковой активностью вокруг прослушиваемой радиостанции.

Существует два типа сообщений удаленного мониторинга:

- Удаленный мониторинг без аутентификации
- Удаленный мониторинг с аутентификацией

Функция "Удаленный мониторинг с аутентификацией" приобретается отдельно. При работе в режиме удаленного мониторинга с аутентификацией проверка требуется при включении микрофона на целевой радиостанции с помощью радиостанции.

Если радиостанция запускает эту функцию на целевой радиостанции с аутентификацией пользователя потребуются ввести парольную фразу. Парольная фраза на целевой радиостанции программируется заранее с помощью CPS.

Чтобы использовать данную функцию, ваша радиостанция и прослушиваемая радиостанция

должны быть запрограммированы соответствующим образом.

Функция прекращает действовать по истечении запрограммированного периода времени, или когда пользователь совершит любую операцию с прослушиваемой радиостанцией.

## Инициация удаленного мониторинга

Для инициации удаленного мониторинга выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **удаленного мониторинга**.

---

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора.

---

- 3 Нажмите  для выбора. Будет выполнен один из следующих сценариев:
  - На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.

- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

- 4 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.
- В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой

радиостанции, а на дисплее появится сообщение **Удал. монит.** По истечении периода действия таймера прозвучит тональный сигнал оповещения, и светодиодный индикатор выключится.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Инициализация удаленного мониторинга с помощью списка контактов

Для инициализации удаленного мониторинга с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Уд. монит.**

- 5 Нажмите  для выбора. Будет выполнен один из следующих сценариев:

- На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

## 6 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.
- В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой радиостанции, а на дисплее появится сообщение Удал. монит.. По истечении периода действия таймера прозвучит

тональный сигнал оповещения, и светодиодный индикатор выключится.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Инициализация удаленного мониторинга с помощью ручного набора

Для инициализации удаленного мониторинга с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента

Ручной набор. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента

Номер р/ст. Нажмите  для выбора.

---

5 Выполните одно из следующих действий.

- Введите псевдоним или идентификатор абонента и нажмите , чтобы продолжить.
  - Отредактируйте набранный идентификатор и нажмите , чтобы продолжить.
- 

6 Нажмите  или  для выбора элемента

Уд. мониторинг.

---

7 Нажмите  для выбора. Будет выполнен один из следующих сценариев:

- На дисплее на короткое время отобразится мини-уведомление, указывающее на

выполнение запроса. Загорится зеленый светодиодный индикатор.

- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
  - Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.
- 

8 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

- В течение запрограммированного периода времени радиостанция будет воспроизводить звуковые сигналы с прослушиваемой радиостанции, а на дисплее появится сообщение **Удал. монит.**. По истечении периода действия таймера прозвучит тональный сигнал оповещения, и светодиодный индикатор выключится.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Списки сканирования

Для отдельных каналов и групп каналов можно формировать и назначать списки сканирования. Радиостанция выполняет поиск голосовой активности путем циклического сканирования каналов или групп каналов в последовательности, определяемой списком сканирования, соответствующим текущему каналу или группе каналов.

Ваша радиостанция поддерживает до 250 списков сканирования, каждый из которых может содержать до 16 пунктов.

Каждый список сканирования может одновременно включать и аналоговые, и цифровые каналы.

Функции редактирования списков сканирования включают добавление и удаление каналов, а также присвоение им приоритетов.

Новый список сканирования можно добавить с помощью программирования с передней панели. См. раздел [Настройка передней панели на стр. 225](#) для получения более подробной информации.

Слева от псевдонима участника появится значок **приоритета**, если эта установка задана. Значок указывает, в какой список каналов включен этот участник — "Приоритет 1" или "Приоритет 2". В вашем списке сканирования не может быть несколько каналов с установленными уровнями "Приоритет 1" или "Приоритет 2". Значок **приоритета** не отображается, если текущей настройкой приоритета является **Нет**.

### УВЕДОМЛЕНИЕ:

Эта функция недоступна в режиме Capacity Plus.

## Просмотр пунктов списка сканирования

Для просмотра пунктов списка сканирования выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Список сканирования. Нажмите  для выбора.

---

- 4 Нажмите  или  для просмотра участников списка.

## Просмотр пунктов списка сканирования с помощью поиска псевдонима

Для просмотра пунктов списка сканирования с помощью поиска псевдонима выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Список сканирования. Нажмите  для выбора.

---

- 4 Наберите первый символ нужного псевдонима. На дисплее появится мигающий курсор.

---

- 5 Наберите остальные символы нужного псевдонима.

Поиск псевдонима выполняется без учета регистра. При наличии двух или более пунктов с одним названием на дисплее радиостанции отобразится тот, который стоит первым в списке.

В первой строке на дисплее отобразятся введенные вами символы. В следующих строках появится краткий перечень результатов поиска.

## Добавление нового пункта в список сканирования

Для добавления нового пункта в список сканирования выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Список сканирования. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Добав. пункт. Нажмите  для выбора.

5 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

6 Нажмите  или  для выбора нужного уровня приоритета. Нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия, а затем сообщение Доб-ть друг. ?.

7 Выполните одно из следующих действий.

- Чтобы добавить пункт, нажмите  или  для выбора элемента Да. Нажмите  для выбора. Повторите шаг 5 и шаг 6.
- Чтобы сохранить текущий список, нажмите  или  для выбора элемента Нет. Нажмите  для выбора.

## Добавление нового пункта в список сканирования с помощью поиска псевдонима

Для добавления нового пункта в список сканирования с помощью поиска псевдонима выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Список сканирования. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Добав. пункт. Нажмите  для выбора.

- 5 Наберите первый символ нужного псевдонима. На дисплее появится мигающий курсор.

- 6 Наберите остальные символы нужного псевдонима.  
Поиск псевдонима выполняется без учета регистра. При наличии двух или более пунктов с одним названием на дисплее радиостанции отобразится тот, который стоит первым в списке. В первой строке на дисплее отобразятся введенные вами символы. В следующих строках появится краткий перечень результатов поиска.

- 7 Нажмите  для выбора.

- 8 Нажмите  или  для выбора нужного уровня приоритета. Нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия, а затем сообщение *Доб-ть друг.?*

9 Выполните одно из следующих действий.

- Чтобы добавить пункт, нажмите  или  для выбора элемента *Да*. Нажмите  для выбора. Повторите шаги с [шаг 5](#) по [шаг 8](#).
- Чтобы сохранить текущий список, нажмите  или  для выбора элемента *Нет*. Нажмите  для выбора.

## Удаление пункта из списка сканирования

Для удаления пунктов из списка сканирования выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента *Сканир*. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента *Список сканирования*. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента *Удалить*. Нажмите  для выбора. На дисплее появится сообщение *Удалить запись?*

- 6 Выполните одно из следующих действий.

- Чтобы удалить пункт, нажмите  или  для выбора элемента Да. Нажмите  для выбора.  
На дисплее появится мини-уведомление об успешном выполнении действия.
- Чтобы вернуться к предыдущему экрану, нажмите  или  для выбора элемента Нет. Нажмите  для выбора.

7 Повторяйте шаги с [шаг 4](#) по [шаг 6](#), чтобы удалить другие пункты.

8 Завершив удаление псевдонимов или идентификаторов, вернитесь на главный экран с помощью длительного нажатия .

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Список сканирования. Нажмите  для выбора.

4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Ред. приоритет. Нажмите  для выбора.

## Установка приоритетности пунктов списка сканирования

Для установки приоритетности пунктов списка сканирования выполните следующие действия.

- 6 Нажмите  или  для выбора нужного уровня приоритета. Нажмите  для выбора.

На дисплее появится мини-уведомление об успешном выполнении действия, после чего откроется предыдущий экран. Значок **приоритета** появится слева от псевдонима участника.

## Сканирование

При запуске сканирования радиостанция начнет циклически сканировать запрограммированный для текущего канала список сканирования на наличие голосовой активности.

### УВЕДОМЛЕНИЕ:

Эта функция недоступна в режиме Caracity Plus.

Если, находясь на цифровом канале во время двухрежимного сканирования, ваша радиостанция фиксируется на аналоговом канале, она автоматически переключится с цифрового на аналоговый режим до окончания вызова. Аналогичная процедура выполняется и в обратном случае.

Существует два типа сканирования:

### Полное сканирование каналов (ручное)

Радиостанция сканирует все каналы или группы каналов из списка сканирования. В зависимости от настроек радиостанция может автоматически начать сканирование с последнего сканированного "активного" канала или группы каналов, а также с канала, на котором было инициировано сканирование.

### Автосканирование (автоматическое)

Радиостанция начинает сканирование автоматически при выборе вами канала или группы каналов, для которых активировано автосканирование.

### УВЕДОМЛЕНИЕ:

При настройке функции **получения сообщений в режиме сканирования** радиостанция может принимать групповые сообщения не с домашних каналов. Радиостанция может отвечать на групповые сообщения на домашнем канале, но не может отвечать на не домашних каналах. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение и выключение функции сканирования

Для включения или выключения функции сканирования выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сканир. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Сост. скан. Нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить требуемое состояние сканирования, и нажмите  для выбора.

---

Если сканирование включено:

- На дисплее появится сообщение Скан. вкл. и значок **сканирования**.

- Светодиодный индикатор начнет мигать желтым цветом.

Если сканирование выключено:

- На дисплее появится сообщение Скан. выкл.
- Значок **сканирования** исчезнет.
- Светодиодный индикатор выключится.

## Ответ на передачу во время сканирования

При выполнении сканирования радиостанция останавливается на канале или группе, где обнаруживает активность. Радиостанция остается на этом канале в течение запрограммированного периода времени, называемого "паузой" сканирования. Для ответа на передачу во время сканирования выполните следующие действия.

- 1  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и

можно отвечать. Во время паузы нажмите кнопку **РТТ**.

Загорится зеленый светодиодный индикатор.

## 2 Для прослушивания отпустите кнопку **РТТ**.

Если пользователь не отвечает до окончания паузы, радиостанция продолжит сканировать другие каналы или группы.

## Удаление мешающих каналов

Если по какому-либо каналу (т. н. "мешающему" каналу) постоянно поступают нежелательные вызовы или шумы, можно временно убрать этот канал из списка сканирования. Эта функция не применима к текущему выбранному каналу. Для удаления мешающего канала выполните следующие действия.

- 1 Если радиостанция "фиксируется" на нежелательном или мешающем канале, нажмите запрограммированную кнопку **удаления мешающего канала** и удерживайте ее, пока не услышите тональный сигнал.

## 2 Отпустите запрограммированную кнопку **удаления мешающего канала**.

Мешающий канал будет удален.

## Восстановление мешающих каналов

Для восстановления удаленного мешающего канала выполните следующие действия.

Выполните одно из следующих действий.

- Выключите и снова включите питание радиостанции.
- Выключите и снова включите сканирование с помощью запрограммированной кнопки **сканирования** или из меню.
- Для изменения канала используйте кнопку **Канал вверх/вниз**.

## Многочастотное сканирование

Выборочное сканирование обеспечивает широкую зону покрытия там, где несколько базовых станций

передают идентичную информацию на разных аналоговых каналах.

Радиостанция сканирует аналоговые каналы разных базовых станций и с помощью системы выбора определяет наиболее сильный принимаемый сигнал. Определив самый сильный сигнал, радиостанция начинает получать передачи с соответствующей базовой станции.

Во время выборочного сканирования мигает желтый светодиодный индикатор, и на дисплее появляется значок **выборочного сканирования**.

Для ответа на передачу во время многочастотного сканирования выполните действия, описанные в разделе [Ответ на передачу во время сканирования на стр. 470](#).

## Настройки контактов

Список контактов — это адресная книга вашей радиостанции. Каждый пункт соответствует псевдониму или идентификатору, который используется для инициирования вызова. Пункты сортируются в алфавитном порядке.

Каждый пункт, в зависимости от контекста, привязан к определенному типу вызова: групповой вызов, частный вызов, общий вызов, вызов на ПК и вызов диспетчера.

Вызов на ПК и вызов диспетчера сопровождаются передачей данных. Они требуют использования соответствующих программных приложений. Для получения дополнительной информации см. документацию по приложениям для передачи данных.

 Кроме того, меню контактов позволяет назначить каждую запись одной или несколькими программируемыми цифровыми клавишами на микрофоне с клавиатурой. Если пункт назначен цифровой клавише, то с радиостанции можно выполнить быстрый набор номера этого пункта.

### УВЕДОМЛЕНИЕ:

Перед каждой цифровой клавишей, назначенной для пункта, стоит галочка. Если флажок стоит перед элементом *Пусто*, это означает, что записи не назначена ни одна цифровая клавиша.

В каждом пункте списка контактов отображается следующая информация.

- Тип вызова
- Псевдоним вызова

- ИД вызова

### УВЕДОМЛЕНИЕ:

Если для канала активирована функция конфиденциальности, то на нем можно выполнять групповые, частные и общие вызовы с шифрованием. Вызываемая радиостанция сможет дешифровать передачу, только если ее секретный ключ или значение ключа и идентификатор ключа совпадают с соответствующими параметрами вашей радиостанции.

## Выполнение группового вызова с помощью списка контактов

Для выполнения группового вызова на радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 4 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор.

- 5 Для прослушивания отпустите кнопку **РТТ**. При ответе любого пользователя из группы светодиодный индикатор начнет мигать зеленым цветом. На дисплее отобразится значок **группового вызова**, псевдоним или идентификатор группы, а также псевдоним или идентификатор передающей радиостанции.

- 6  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов будет завершен.

---

## Выполнение частного вызова с помощью списка контактов

Для выполнения частного вызова на радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 4 Нажмите кнопку **РТТ** для выполнения вызова. Загорится зеленый светодиодный индикатор. На дисплее отобразится псевдоним получателя.

---

- 5 Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.

---

- 6 Для прослушивания отпустите кнопку **РТТ**.  
При ответе вызываемой радиостанции светодиодный индикатор начнет мигать зеленым цветом. На дисплее отобразится псевдоним или идентификатор передающего абонента.

---

- 7  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **РТТ** для ответа на вызов.

Если голосовая активность отсутствует в течение запрограммированного периода времени, вызов

будет завершен.Прозвучит тональный сигнал.На дисплее отобразится сообщение **Выз. законч.**

---

## Назначение пункта программируемой цифровой клавише

Для назначения пункта программируемой цифровой клавише выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора.Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента **Прогр. кнопку**. Нажмите  для выбора.

---

- 5 Выполните одно из следующих действий.
  - Если выбранной цифровой клавише не назначен никакой пункт, нажмите  или  для выбора нужной цифровой клавиши. Нажмите  для выбора.
  - Если выбранной цифровой клавише уже назначен другой пункт, на дисплее появится сообщение **Клавиша уже использов.**, а затем в первой строке дисплея появится сообщение **Заменить?**. Выполните одно из следующих действий.
 

Нажмите  или  для выбора элемента **Да**. Нажмите  для выбора.

После этого прозвучит тональный сигнал успешного действия, а на дисплее появится **Контакт сохр-н** и мини-уведомление об успешном выполнении действия.

Чтобы вернуться к предыдущему шагу,

нажмите  или  для выбора варианта Нет.

Каждую запись можно назначать различным цифровым клавишам. Перед каждой цифровой клавишей, назначенной для записи, стоит значок ✓. Если значок ✓ стоит перед элементом Пусто, это означает, что цифровая клавиша не назначена.

Если цифровая клавиша назначена пункту в конкретном режиме, эту функцию нельзя включить длительным нажатием этой цифровой клавиши в другом режиме.

На экране автоматически отобразится предыдущее меню.

## Удаление назначения пункта программируемой цифровой клавише

Для удаления назначения пункта программируемой цифровой клавише выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Длинным нажатием запрограммированной цифровой клавиши выберите необходимый псевдоним или идентификатор. Перейдите к [шаг 4](#).
  - Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Progr. кнопку. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Пусто. Нажмите  для выбора.
- В первой строке на дисплее появится сообщение Очистить все ключи.

- 6 Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

#### УВЕДОМЛЕНИЕ:

При удалении пункта связь между этим пунктом и соответствующими запрограммированными цифровыми клавишами отменяется.

Прозвучит тональный сигнал успешного действия. На дисплее появится сообщение Контакт сохр-н.  
На экране автоматически отобразится предыдущее меню.

## Добавление нового контакта

Для добавления нового контакта выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Новый контакт. Нажмите  для выбора.
- 4 Нажмите  или  для выбора типа контакта: Радио контакт или Тел. контакт.  
Нажмите  для выбора.
- 5 Введите номер контакта с помощью клавиатуры и нажмите  , чтобы продолжить.

6 Введите имя контакта с помощью клавиатуры и нажмите  , чтобы продолжить.

---

7 Нажмите  или  для выбора нужного типа звонка. Нажмите  для выбора. Прозвучит тональный сигнал успешного действия. На дисплее появится мини-уведомление об успешном выполнении действия.

---

## Настройка контакта по умолчанию

Для настройки контакта по умолчанию выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Контакты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента По умолч. Нажмите  для выбора. Прозвучит тональный сигнал успешного действия. На дисплее появится мини-уведомление об успешном выполнении действия. Рядом с выбранным псевдонимом или идентификатором по умолчанию появится значок  .

---

## Настройки сигналов вызова

Данная настройка позволяет пользователям радиостанции настраивать конфигурацию вызовов или звуковые сигналы текстовых сообщений.

### Активация и деактивация сигналов вызова для оповещения о вызове

Для активации или деактивации сигналов вызова для оповещения о вызове выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Тонь/опов.** Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента **Сигналы выз.**. Нажмите  для выбора.

- 6 Нажмите  или  для выбора элемента **Опов. о выз.** Нажмите  для выбора.

- 7 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора. На дисплее рядом с выбранным тональным сигналом появится значок .

### Активация и деактивация сигналов вызова для частных вызовов

Для активации или деактивации сигналов вызова для частных вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Тоны/опов. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Сигналы выз.. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора элемента Частн. вызов. Нажмите  для выбора.  
 Если сигналы частных вызовов активированы, на дисплее рядом с сообщением Вкл. появится значок .

Если сигналы частных вызовов деактивированы, на дисплее рядом с сообщением Выкл. появится значок .

- 7 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора.  
 Если функция активирована, рядом со статусом Активировано отобразится значок . Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.

## Активация и деактивация сигналов вызова для выборочных вызовов

Для активации или деактивации сигналов вызова для выборочных вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Сигналы выз.. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента Выбор. вызов. Нажмите  для выбора.  
На дисплее появится значок  и текущий тональный сигнал.

---

7 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора. На дисплее рядом с выбранным тональным сигналом появится значок .

---

## Активация и деактивация сигналов вызова для текстовых сообщений

Для активации или деактивации сигналов вызова для текстовых сообщений выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Сигналы выз.. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента  
Текст. сообщ. Нажмите  для выбора.  
На дисплее появится значок  и текущий  
тональный сигнал.

---

7 Нажмите  или  для выбора нужного  
тонального сигнала. Нажмите  для выбора.  
На дисплее рядом с выбранным тональным  
сигналом появится значок .

---

## Активация и деактивация сигналов вызова для телеметрических статусных текстовых сообщений

Активация и деактивация сигналов вызова для  
телеметрических статусных текстовых сообщений  
выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Тоны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Сигналы выз.. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента  
Телеметрия. Нажмите  для выбора.  
Текущий тональный сигнал отмечен значком .

---

## Назначение типа звонка

Радиостанцию можно запрограммировать на включение одного из десяти заранее заданных сигналов вызова при поступлении оповещения о вызове или текстового сообщения от определенного контакта. Сигналы вызова будут воспроизводиться при перемещении по списку. Для назначения типа звонка выполните следующее действие.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Контакты. Нажмите  для выбора.  
Пункты сортируются в алфавитном порядке.

---

3 Нажмите  или  для выбора нужного  
псевдонима или идентификатора. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Редакт. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Ред. рингтон. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора нужного тонального сигнала. Нажмите  для выбора. Рядом с выбранным тональным сигналом появится значок .

## Оповещение с нарастающей громкостью

Радиостанцию можно запрограммировать на непрерывное оповещение пользователя, когда он не отвечает на радиовызов. При этом громкость тонального сигнала оповещения постепенно автоматически повышается. Эта функция называется оповещением с нарастающей громкостью.

## Функции журнала вызовов

Радиостанция ведет учет всех недавних исходящих, ответченных и пропущенных частных вызовов. Журнал вызовов позволяет просматривать недавние вызовы и управлять ими.

В зависимости конфигурации системы радиостанции журналы вызовов могут содержать оповещения о пропущенных вызовах. В каждом списке вызовов можно выполнять следующие операции:

- Сохранение псевдонимов или идентификаторов в контактах
- Удаление вызова
- Удаление всех вызовов
- Просмотр информации

## Просмотр недавних вызовов

Для просмотра недавних вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Журн. выз. Нажмите  для выбора.

3 Нажмите  или  для выбора предпочитаемого списка. Доступны следующие варианты Пропущен., Отвечен. и Исходящие.

Нажмите  для выбора.

На дисплее появится самый последний пункт.

---

4 Нажмите  или  для просмотра списка. При нажатии на кнопку РТТ радиостанция выполнит частный вызов с использованием псевдонима или идентификатора, отображаемого в данный момент на экране.

---

## Удаление вызовов из списка вызовов

Для удаления вызова из списка вызовов выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Журн. выз.. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужного списка. Нажмите  для выбора.

Если список пуст:

- Прозвучит тональный сигнал.
  - На дисплее появится сообщение Список пуст.
- 

4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Удалить пункт?. Нажмите  для выбора.

---

6 Выполните одно из следующих действий.

- Чтобы удалить пункт, нажмите  для выбора элемента Да.  
На дисплее появится сообщение  
Пункт удален.
- Нажмите  или  для выбора элемента Нет. Нажмите  для выбора.  
Радиостанция вернется к предыдущему экрану.

## Просмотр деталей списка вызовов

Для просмотра информации о вызове выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Журн. выз.. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужного списка. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента Дет. данные. Нажмите  для выбора.  
На дисплее отобразятся подробные данные вызова.

## Сохранение псевдонимов или идентификаторов из списка вызовов

Для сохранения псевдонимов или идентификаторов из списка вызовов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Журн. выз.. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного списка. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Оставить. Нажмите  для выбора.  
На дисплее появится мигающий курсор.

---

- 6 Наберите остальные символы нужного псевдонима. Нажмите  для выбора.

Для сохранения идентификатора псевдоним необязателен.

На дисплее появится мини-уведомление об успешном выполнении действия.

## Функция оповещения о вызове

Функция оповещения о вызове позволяет оповестить пользователя определенной радиостанции о необходимости вызвать вас.

Эту функцию можно использовать, только если абоненту присвоен псевдоним или идентификатор. Доступ к функции осуществляется в меню через список контактов, с помощью ручного набора или с помощью запрограммированной кнопки **доступа одним нажатием**.

## Выполнение оповещения о вызове

Для выполнения оповещения о вызове выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **доступа одним нажатием**.

На дисплее появятся сообщение **Опов. о вызв** и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.

- 2 Дождитесь подтверждения.

При получении подтверждения оповещения о вызове на дисплее появится мини-уведомление об успешном выполнении действия.

В случае неполучения подтверждения оповещения о вызове на дисплее появится мини-уведомление о неуспешном выполнении действия.

## Выполнение оповещения о вызове с помощью списка контактов

Для выполнения оповещения о вызове с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Опов. о вызв**. Нажмите  для выбора. На дисплее появятся сообщение **Опов. о вызв** и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.

- 5 Дождитесь подтверждения.
  - При получении подтверждения оповещения о вызове на дисплее появится мини-уведомление об успешном выполнении действия.
  - В случае неполучения подтверждения оповещения о вызове на дисплее появится

мини-уведомление о неуспешном выполнении действия.

## Выполнение оповещения о вызове с помощью ручного набора

Для выполнения оповещения о вызове с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.  
На дисплее появится мигающий курсор.

---

- 4 Введите идентификатор абонента и нажмите  , чтобы продолжить.

---

[Отправить отзыв](#)

- 5 Нажмите  или  для выбора элемента

**Опов. о выз.** Нажмите  для выбора.

На дисплее появятся сообщение **Опов. о выз** и псевдоним или идентификатор абонента.  
Загорится зеленый светодиодный индикатор.

- 6 Дождитесь подтверждения.

- При получении подтверждения оповещения о вызове на дисплее появится мини-уведомление об успешном выполнении действия.
- В случае неполучения подтверждения оповещения о вызове на дисплее появится мини-уведомление о неуспешном выполнении действия.

## Ответ на оповещение о вызове

Для ответа на оповещение о вызове выполните следующие действия.

При получении оповещения о вызове:

- Прозвучит повторяющийся тональный сигнал.
- Светодиодный индикатор начнет мигать желтым цветом.
- На дисплее появится список уведомлений, содержащий оповещения о вызове с псевдонимом или идентификатором вызывающей радиостанции.

В зависимости от конфигурации, выбранной дилером или системным администратором, можно ответить на оповещение о вызове, выполнив следующие действия.

- Нажмите кнопку **РТТ** для выполнения частного вызова, чтобы ответить непосредственно вызывающему абоненту.
- Нажмите кнопку **РТТ** для поддержания связи с разговорной группой.  
Оповещение о вызове будет перемещено в журнал пропущенных вызовов, доступный в меню журнала вызовов. На вызов абонента можно ответить из журнала пропущенных вызовов.

---

Для получения дополнительной информации см. разделы [Список уведомлений на стр. 222](#) и [Функции журнала вызовов на стр. 149](#).

## Беззвучный режим

Режим без звука предоставляет пользователю возможность отключить все звуковые уведомления на радиостанции.

После активации беззвучного режима звук всех звуковых уведомлений отключается, кроме функций с высоким уровнем приоритета, например связанные с режимом экстренной связи.

После выхода из беззвучного режима радиостанция может воспроизводить входящие звуковые сигналы и аудиопередачи.

### УВЕДОМЛЕНИЕ:

Эта функция приобретается отдельно. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение режима без звука

Для включения режима без звука выполните следующие действия.

Для доступа к этой функции можно использовать программируемую кнопку **режима без звука**.

При включении режима без звука происходит следующее.

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится надпись **Беззв. реж. вкл.**.
- Светодиодный индикатор красного цвета начинает мигать и продолжает мигать до выхода из режима без звука.
- На дисплее на главном экране отображается значок **режима без звука**.
- Звук радиостанции выключается.
- Таймер режима без звука начинает обратный отсчет в зависимости от заданного временного интервала.

## Настройка таймера режима без звука

Функцию режима без звука можно включить, предварительно настроив таймер режима без звука на определенный временной интервал.

Продолжительность таймера настраивается в меню радиостанции в диапазоне 0,5–6 часов. Выход из

режима без звука происходит после окончания действия таймера.

Если значение длительности таймера установить на "0", радиостанция будет оставаться в режиме без звука неопределенное количество времени до нажатия запрограммированной кнопки **режима без звука**.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента **Тайм. беззв.**. Нажмите  для выбора.

- 5 Нажмите  или  для изменения числового значения каждой цифры, и нажмите .

## Выход из режима без звука

Выход из этого режима выполняется автоматически после окончания таймера режима без звука.

Для выхода из режима без звука вручную можно выполнить следующие действия.

- Нажмите запрограммированную кнопку **режима без звука**.
- Выберите любую запись и нажмите **РТТ**.

При отключении режима без звука происходит следующее.

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится надпись *Беззв. реж. выкл.*
- Светодиодный индикатор красного цвета перестает мигать и отключается.

- Значок **режима без звука** пропадает с главного экрана.
- Звук на радиостанции включается, состояние динамика восстанавливается.
- Если действие таймера не окончено, таймер режима без звука останавливается.

### УВЕДОМЛЕНИЕ:

Режим без звука также активируется, если пользователь осуществляет голосовую передачу или переключается на незапрограммированный канал.

## Работа в экстренном режиме

Экстренный сигнал оповещения служит для уведомления о чрезвычайных обстоятельствах. Экстренный сигнал оповещения можно подать в любой момент, при любых обстоятельствах и даже при наличии активности на текущем канале.

Дилер может установить длительность нажатия запрограммированной кнопки **экстренного режима**, кроме длительного нажатия, которое аналогично для всех кнопок.

**Короткое нажатие**

Продолжительность – от 0,05 секунды до 0,75 секунды.

**Длительное нажатие**

Продолжительность – от 1,00 секунды до 3,75 секунды.

За кнопкой **экстренного режима** закреплена функция включения/выключения экстренного режима. Для получения сведений о назначении кнопки **экстренного режима** обратитесь к дилеру.

**УВЕДОМЛЕНИЕ:**

Короткое нажатие кнопки **экстренного режима** инициирует запуск экстренный режим, а длительное нажатие той же кнопки позволяет радиостанции выйти из экстренного режима.

Длительное нажатие кнопки **экстренного режима** инициирует запуск экстренный режим, а короткое нажатие той же кнопки позволяет радиостанции выйти из экстренного режима.

Данная радиостанция позволяет посылать экстренные сигналы оповещения трех типов.

- Экстренный сигнал оповещения
- Экстренный сигнал оповещения с вызовом

- Экстренный сигнал оповещения с последующей голосовой передачей 🗣️

**УВЕДОМЛЕНИЕ:**

Только один из указанных экстренных сигналов оповещения может быть назначен запрограммированной кнопке **экстренного режима** или переключателю экстренного режима.

Кроме того, каждый сигнал оповещения имеет следующие типы:

**Обычный**

Передача сигнала оповещения сопровождается звуковой и/или визуальной индикацией.

**Беззвучный**

Передача сигнала оповещения не сопровождается звуковой или визуальной индикацией. Радиостанция принимает вызов без воспроизведения звука через динамик, пока не завершится передача в режиме *"горячего микрофона"* и пользователь не нажмет кнопку РТТ.

**Беззвучный с голосом**

Передача сигнала оповещения не сопровождается звуковой или визуальной индикацией, но звук всех

входящих вызовов поступает через динамик радиостанции.

## Прием экстренного сигнала оповещения

Для приема экстренного сигнала оповещения выполните следующие действия.

При поступлении экстренного сигнала оповещения:

- Прозвучит тональный сигнал.
- Светодиодный индикатор начнет мигать красным цветом.
- На дисплее появится значок **экстренного режима** и псевдоним абонента, посылающего экстренный сигнал. Если сигналов несколько, в списке сигналов оповещения отобразятся все псевдонимы отправителей экстренного сигнала.

- 1 Выполните одно из следующих действий.
  - Если принят один сигнал оповещения, нажмите  для просмотра подробных сведений.

- Если принято несколько сигналов оповещения, нажмите  или  для выбора нужного псевдонима и нажмите  для просмотра подробных сведений.

- 2 Нажмите  для просмотра вариантов действий.
- 3 Нажмите  и выберите вариант Да, чтобы закрыть список оповещений.
- 4 Нажмите  для доступа к меню.
- 5 Для возврата к списку сигналов оповещения выберите элемент `Список сигн..`
- 6 Тональный сигнал будет звучать, а светодиодный индикатор будет мигать красным цветом до выхода из экстренного режима. Однако тональный сигнал можно выключить. Выполните одно из следующих действий.

- Нажмите кнопку **РТТ**, чтобы выполнить вызов группы радиостанций, которая получила экстренный сигнал оповещения.
- Нажмите любую программируемую кнопку.
- Выйдите из экстренного режима. См. [Выход из экстренного режима после получения экстренного сигнала оповещения на стр. 496](#).

## Ответ на экстренный сигнал оповещения

Для ответа на экстренный сигнал оповещения выполните следующие действия.

- 1 Убедитесь, что на дисплее отображается список сигналов оповещения. Нажмите  или  для выбора нужного псевдонима или идентификатора.
- 2  Если включена функция индикации свободного канала, то в момент отпускания кнопки **РТТ** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и

можно отвечать. Нажмите кнопку **РТТ**, чтобы передать неэкстренное голосовое сообщение той же группе, которой предназначался экстренный сигнал оповещения.

Загорится зеленый светодиодный индикатор. Радиостанция остается в экстренном режиме.

- 3 Выполните одно из следующих действий.
  - Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
  -  Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.
- 4 Для прослушивания отпустите кнопку **РТТ**. При ответе радиостанции, инициировавшей экстренный вызов:
  - Зеленый светодиодный индикатор начнет мигать.

- На дисплее появится значок **группового вызова**, идентификатор передающей радиостанции и список сигналов оповещения.

Экстренное голосовое сообщение может передавать только радиостанция, инициировавшая экстренный вызов. Все другие радиостанции, включая радиостанцию, принявшую экстренный сигнал, осуществляют неэкстренную передачу голоса.

## Выход из экстренного режима после получения экстренного сигнала оповещения

Для выхода из экстренного режима после получения экстренного сигнала оповещения выполните следующие действия:

- Удалите сигналы оповещения.

- Выключите радиостанцию.

## Отправка экстренного сигнала оповещения

Данная функция позволяет отправлять неголосовой экстренный сигнал оповещения, который инициирует индикацию оповещения для группы радиостанций. Если на радиостанции выбран тип экстренного режима "Бесшумный", во время работы в экстренном режиме радиостанция не будет отображать звуковые или визуальные индикаторы.

Для отправки экстренного сигнала оповещения выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **включения экстренного режима**.

Далее возможен один из следующих вариантов:

- На дисплее появится сообщение **Сигн. пер.** и псевдоним получателя.
-  На дисплее появится сообщение **Пер. телегр.** и псевдоним получателя.

Загорится зеленый светодиодный индикатор. Появится значок **экстренного режима**.

**УВЕДОМЛЕНИЕ:**

Если данная функция запрограммирована, прозвучит тональный сигнал экстренного поиска. Тональный сигнал не звучит, когда радиостанция выполняет передачу или прием голосовых данных, и отключается при выходе из экстренного режима. Тональный сигнал экстренного поиска можно запрограммировать с помощью CPS.

**2** Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал экстренного режима.
- Светодиодный индикатор начнет мигать красным цветом.
- На дисплее появится сообщение **Сигн. отпр.**

Если, несмотря на все повторные попытки, отправка экстренного сигнала оповещения не будет выполнена:

- Прозвучит тональный сигнал.

- На дисплее появится сообщение **Сиг. не получ.**

Радиостанция выйдет из режима экстренного сигнала оповещения и вернется к главному экрану.

---

## Отправка экстренного сигнала оповещения с вызовом

Данная функция позволяет отправлять группе радиостанций экстренный сигнал оповещения с вызовом. После подтверждения получения сигнала радиостанцией, входящей в группу, эта группа радиостанций может поддерживать связь на запрограммированном экстренном канале. Для отправки экстренного сигнала оповещения с вызовом выполните следующие действия.

- 1** Нажмите запрограммированную кнопку **включения экстренного режима** или переключатель **экстренного режима**. На дисплее появится сообщение **Отправка сигнала**,

чередующееся с идентификатором вашей радиостанции.

Произойдет следующее:

- На дисплее появится сообщение **Пер. телегр.** и псевдоним получателя.

Загорится зеленый светодиодный индикатор. Появится значок **экстренного режима**.

#### **УВЕДОМЛЕНИЕ:**

Если данная функция запрограммирована, прозвучит тональный сигнал экстренного поиска. Тональный сигнал не звучит, когда радиостанция выполняет передачу или прием голосовых данных, и отключается при выходе из экстренного режима. Тональный сигнал экстренного поиска может быть запрограммирован дилером или системным администратором.

---

## **2** Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал экстренного режима.

- Светодиодный индикатор начнет мигать красным цветом.
- На дисплее появится сообщение **Сигн. отпр.**
- Когда на дисплее появится сообщение **Экст. сист.** и псевдоним группы назначения, радиостанция перейдет в режим экстренного вызова.

---

## **3** Нажмите кнопку **РТТ** для выполнения вызова.

Загорится зеленый светодиодный индикатор. На дисплее появится значок **группового вызова**.

---

## **4** Выполните одно из следующих действий.

- Дождитесь окончания тонального сигнала разрешения разговора (если он включен), а затем четко говорите в микрофон.
-  Дождитесь окончания вспомогательного тонального сигнала **РТТ** (если он включен), а затем четко говорите в микрофон.

5 Для прослушивания отпустите кнопку **PTT**.

На дисплее появится псевдоним абонента и группы.

6  Если включена функция индикации свободного канала, то в момент отпускания кнопки **PTT** на передающей радиостанции вы услышите короткий тональный сигнал оповещения, уведомляющий о том, что канал свободен и можно отвечать. Нажмите кнопку **PTT** для ответа на вызов.

7 Для выхода из экстренного режима после завершения вызова нажмите кнопку **выключения экстренного режима**.  
Радиостанция вернется к главному экрану.

## Экстренные сигналы оповещения с последующей голосовой передачей

Данная функция позволяет отправлять группе радиостанций экстренный сигнал оповещения с последующей голосовой передачей. Микрофон радиостанции активируется автоматически, позволяя

поддерживать связь с группой радиостанций без нажатия кнопки **PTT**. Этот режим работы микрофона называется *"горячий микрофон"*.

### УВЕДОМЛЕНИЕ:

Радиостанция не распознает микрофон без поддержки IMPRES, подключенный к заднему аксессуарному разъему.

Если на указанном запрограммированном разъеме не будет обнаружен микрофон, радиостанция выполнит проверку другого разъема. В данном случае приоритет будет отдан обнаруженному микрофону.

Если в радиостанции активирован режим экстренного цикла, то повторы периодов *"горячего микрофона"* и приема выполняются в течение заданного времени. В режиме экстренного цикла принимаемые вызовы звучат в динамике радиостанции.

При нажатии кнопки **PTT** в течение запрограммированного периода приема прозвучит тональный сигнал запрета, означающий, что нужно отпустить кнопку **PTT**. Радиостанция проигнорирует нажатие кнопки **PTT** и останется в экстренном режиме.

При нажатии кнопки **PTT** в режиме *"горячего микрофона"* и удержании ее нажатой после завершения периода передачи в режиме *"горячего*

*микрофона*", радиостанция продолжит передачу, пока пользователь не отпустит кнопку **РТТ**.

Если подтверждение экстренного сигнала оповещения не будет получено, радиостанция не будет его повторять и напрямую перейдет в режим *"горячего микрофона"*.

## УВЕДОМЛЕНИЕ:

Некоторые аксессуары не поддерживают режим *"горячего микрофона"*. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Отправка экстренного сигнала оповещения с последующей голосовой передачей

Для отправки экстренного сигнала оповещения с последующей голосовой передачей выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **включения экстренного режима** или переключатель **экстренного режима**.

Далее возможен один из следующих вариантов:

- На дисплее появится сообщение *Сигн. пер.* и псевдоним получателя.
- На дисплее появится сообщение *Пер. телегр.* и псевдоним получателя.

Загорится зеленый светодиодный индикатор. Появится значок **экстренного режима**.

- 
- 2 Когда на дисплее появится сообщение *Сигн. отпра.*, четко говорите в микрофон.

Передача прекращается автоматически в следующих случаях:

- Когда истекает срок циклического повторения режимов *"горячего микрофона"* и приема вызовов (если режим экстренного цикла включен).
- Когда истекает период действия *"горячего микрофона"* (если режим экстренного цикла выключен).

- 3 Нажмите запрограммированную кнопку **выключения экстренного режима**, чтобы выйти из экстренного режима.

Радиостанция вернется к главному экрану.

## Возврат в экстренный режим

Эта функция доступна только для радиостанции, посылающей экстренный сигнал оповещения. Для возврата в экстренный режим выполните следующие действия.

Выполните одно из следующих действий.

- Находясь в экстренном режиме, переключитесь на другой канал. Если на новом канале активирован экстренный сигнал оповещения, радиостанция выходит из экстренного режима, а затем возвращается в него.
- Нажмите запрограммированную кнопку **включения экстренного режима** во время инициации или передачи экстренного сигнала. Радиостанция выходит из этого режима, а затем возвращается в экстренный режим.

[Отправить отзыв](#)

## Выход из экстренного режима после отправки экстренного сигнала оповещения

Эта функция доступна только для радиостанции, посылающей экстренный сигнал оповещения.

Радиостанция выходит из экстренного режима в следующих случаях:

- Получение подтверждения (только при отправке экстренного сигнала оповещения).
- Завершение числа повторных попыток для отправки сигнала.

### УВЕДОМЛЕНИЕ:

Выход из экстренного режима также происходит при выключении питания радиостанции. При последующем включении питания радиостанция не возвращается в экстренный режим.

Для выхода из экстренного режима выполните следующие действия.

Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **выключения экстренного режима**.

- Перейдите на канал, для которого не настроена экстренная система. На дисплее появится сообщение Не экстренн..

## Удаление сигнала из списка сигналов оповещения

Чтобы удалить сигналы из списка сигналов оповещения для выхода из экстренного режима, выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Список сигн.. Нажмите  для выбора.
- 3 Нажмите  или  для выбора нужного сигнала оповещения. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

## Обмен текстовыми сообщениями

Радиостанция может принимать данные, например текстовые сообщения, отправленные с другой радиостанции или с помощью приложения для текстовых сообщений.

Существует два типа текстовых сообщений: короткие текстовые сообщения цифровой мобильной радиосвязи (DMR) и текстовые сообщения. Максимальная длина короткого текстового сообщения DMR составляет 23 символа. Максимальная длина текстового сообщения вместе со строкой темы сообщения составляет 280 символов. Строка темы отображается только при получении сообщения, отправленного с помощью приложения электронной почты.

**УВЕДОМЛЕНИЕ:**

Максимальная длина текстовых сообщений в символах относится только к моделям с программным и аппаратным обеспечением последней версии. Для моделей радиостанций с программным и аппаратным обеспечением устаревших версий максимальная длина текстовых сообщений составляет 140 символов. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для арабского языка ввод текста выполняется справа налево.

**Текстовые сообщения** 

Текстовые сообщения хранятся в папке "Полученные" и сортируются, начиная с последнего поступившего сообщения.

**Просмотр текстовых сообщений**

Для просмотра текстового сообщения выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.  
Если папка "Полученные" пуста:
  - На дисплее появится сообщение *Список пуст.*
  - Если тональные сигналы клавиатуры активированы, прозвучит тональный сигнал.

---

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.  
На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

## Просмотр телеметрических статусных текстовых сообщений

Для просмотра телеметрических статусных текстовых сообщений из папки "Полученные" выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

Ответ на телеметрическое статусное текстовое сообщение не предусмотрен.

На дисплее появится сообщение Телеметрия: <статусное текстовое сообщение>.

- 5 Долго зажмите , чтобы вернуться на главный экран.

## Ответ на текстовое сообщение

Для ответа на текстовое сообщение выполните следующие действия.

При получении текстового сообщения:

- На дисплее появится список уведомлений с псевдонимом или идентификатором отправителя.
- На дисплее появится значок **сообщения**.

### УВЕДОМЛЕНИЕ:

При нажатии кнопки РТТ экран с оповещением о получении текстового сообщения закроется, и будет выполнен частный или групповой вызов отправителю сообщения.

- 1 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента *Читать*. Нажмите  для выбора. На дисплее появится текстовое сообщение. На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

- Нажмите  или  для выбора элемента *Читать позже*. Нажмите  для выбора. На дисплее радиостанции появится экран, который был открыт до получения текстового сообщения.

- Нажмите  или  для выбора элемента *Удалить*. Нажмите  для выбора.

## 2 Выполните одно из следующих действий.

- Нажмите , чтобы вернуться в папку "Полученные".

- Повторно нажмите , чтобы ответить на текстовое сообщение, переслать или удалить его.

## Ответ на текстовое сообщение с помощью шаблона

Для ответа на текстовое сообщение с помощью шаблона выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к действию [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента *Сообщения*. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента *Полученные*. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

---

- 5 Нажмите  для доступа к подменю.
- 

- 6 Нажмите  или  для выбора элемента Ответить. Нажмите  для выбора.
- 

- 7 Нажмите  или  для выбора элемента Быстр. ответ. Нажмите  для выбора.
- 

- 8 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

---

- 9 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал.
  - На дисплее появится мини-уведомление о неуспешном выполнении действия.
  - Радиостанция вернется к экрану опции Отпр. снова.
- 

## Повторная отправка текстового сообщения

Для повторной отправки текстового сообщения выполните следующие действия.

Находясь на экране опции Отпр. снова:

Чтобы повторно отправить сообщение на тот же псевдоним или идентификатор абонента или группы, нажмите .

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- Радиостанция вернется к экрану опции Отпр. снова.

## Пересылка текстового сообщения

Для пересылки текстового сообщения выполните следующие действия.

[Отправить отзыв](#)

Находясь на экране опции Отпр. снова:

- 1 Нажмите  или  для выбора элемента Пересл., затем нажмите  для отправки того же сообщения на другой псевдоним или идентификатор абонента или группы.

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

#### УВЕДОМЛЕНИЕ:

Адрес вызываемой радиостанции можно также выбрать вручную (см. [Пересылка текстового сообщения с помощью ручного набора на стр. 508](#)).

## Пересылка текстового сообщения с помощью ручного набора

Для пересылки текстового сообщения с помощью ручного набора выполните следующие действия.

- 1 Нажмите  или  для выбора элемента Пересл. Нажмите  для выбора.
- 2 Чтобы отправить то же сообщение на другой псевдоним или идентификатор абонента или группы, нажмите  .

- 3 Нажмите  или  для выбора элемента Ручной набор. Нажмите  для выбора. На дисплее появится сообщение Номер р/с:.

- 4 Введите идентификатор абонента и нажмите  , чтобы продолжить.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

- 5 Дождитесь подтверждения.
  - В случае успешного выполнения:
    - Прозвучит тональный сигнал.
    - На дисплее появится мини-уведомление об успешном выполнении действия.
  - В случае сбоя:
    - Прозвучит тональный сигнал.
    - На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Редактирование текстовых сообщений

Чтобы отредактировать сообщение, выберите элемент Редакт.

### УВЕДОМЛЕНИЕ:

Отображаемую строку темы (в случае, если сообщение отправлено по электронной почте) редактировать нельзя.

- 1 Нажмите  или  для выбора элемента Редакт. Нажмите  для выбора. На дисплее появится мигающий курсор.

- 2 Отредактируйте сообщение с помощью клавиатуры.

- Нажмите , чтобы переместить курсор на один символ влево.
- Нажмите  или , чтобы переместить курсор на один символ вправо.
- Нажмите , чтобы удалить ненужные символы.

[Отправить отзыв](#)

- Нажмите и удерживайте , чтобы изменить метод ввода текста.

- 3 Завершив набор сообщения, нажмите  один раз.

- 4 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Отправить, затем нажмите , чтобы отправить сообщение.
- Нажмите  или  для выбора элемента Сохранить, затем нажмите , чтобы сохранить сообщение в папке "Черновики".
- Нажмите , чтобы отредактировать сообщение.
- Нажмите , чтобы выбрать между удалением сообщения и сохранением его в папке "Черновики".

## Создание текстовых сообщений

Для создания текстового сообщения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Сообщения**. Нажмите  для выбора.

- 3 Нажмите  или , чтобы выделить элемент **Написать**. Нажмите  для выбора. Отобразится мигающий курсор.

- 4 Наберите сообщение на клавиатуре.

Нажмите , чтобы переместить курсор на один символ влево.

Нажмите  или , чтобы переместить курсор на один символ вправо.

Нажмите , чтобы удалить ненужные символы.

Нажмите и удерживайте , чтобы изменить метод ввода текста.

- 5 Завершив набор сообщения, нажмите  один раз.

Выполните одно из следующих действий.

- Нажмите , чтобы отправить сообщение.
  - Нажмите . Нажмите  или , чтобы выбрать между редактированием, удалением или сохранением сообщения.
- Нажмите  для выбора.

## Отправка текстовых сообщений

Для отправки текстового сообщения выполните следующие действия.

В данном примере подразумевается, что у вас есть новое текстовое сообщение или сохраненное текстовое сообщение.

Укажите получателя сообщения. Выполните одно из следующих действий.

- Нажмите  или  для выбора требуемого псевдонима или идентификатора.

Нажмите  для выбора.

- Нажмите  или  для выбора элемента Ручной набор. Нажмите  для выбора. Введите идентификатор абонента. В первой строке на дисплее появится сообщение Номер р/с:!. Во второй строке появится мигающий курсор. Введите псевдоним или идентификатор абонента.

Нажмите .

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

В случае успешного выполнения:

- Прозвучит тональный сигнал.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит сигнал низкой тональности.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- Сообщение будет перемещено в папку "Отправленные"
- Сообщение будет помечено значком сбоя отправки.

#### УВЕДОМЛЕНИЕ:

Если выбрано новое текстовое сообщение, на дисплее радиостанции появится экран опции Отпр. снова.

## Удаление текстового сообщения из папки "Полученные"

Для удаления текстового сообщения из папки "Полученные" выполните следующие действия.

- 1 Выполните одно из следующих действий.
- Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).

- Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

Если папка "Полученные" пуста:

- На дисплее появится сообщение *Список пуст*.
- Прозвучит тональный сигнал.

- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

На дисплее может отображаться строка темы, если сообщение отправлено с помощью приложения электронной почты.

- 5 Нажмите  для доступа к подменю.

- 6 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

- 7 Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

На дисплее появится мини-уведомление об успешном выполнении действия. Затем будет выполнен возврат в папку "Полученные".

## Удаление всех текстовых сообщений из папки "Полученные"

Для удаления всех текстовых сообщений из папки "Полученные" выполните следующие действия.

- 1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
- Нажмите  для доступа к меню.

**2** Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

**3** Нажмите  или  для выбора элемента Полученные. Нажмите  для выбора.

Если папка "Полученные" пуста:

- На дисплее появится сообщение **Список пуст**.
- Прозвучит тональный сигнал.

**4** Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

**5** Нажмите  или  для выбора элемента Да. Нажмите  для выбора.

На дисплее появится мини-уведомление об успешном выполнении действия.

## Отправка текстовых сообщений

После отправки текстовые сообщения автоматически сохраняются в папке "Отправленные". При этом новые сообщения всегда добавляются в начало папки. Отправленное текстовое сообщение можно отправить повторно, переслать, отредактировать или удалить.

В папке "Отправленные" может храниться до 30 сообщений. Если папка заполнена, то при добавлении в нее нового текстового сообщения самое старое сообщение автоматически удаляется.

В случае закрытия экрана отправки во время отправки сообщения статус этого сообщения в папке "Отправленные" обновляется автоматически без визуальной и звуковой индикации.

В случае изменения режима работы или выключения радиостанции до обновления статуса сообщения в

папке "Отправленные" сообщение автоматически помечается значком **сбоя отправки**.

Радиостанция поддерживает одновременную отправку до пяти сообщений. После того, как число сообщений достигает пяти, отправка новых сообщений становится невозможной, и новые сообщения автоматически помечаются значком **сбоя отправки**.

Главный экран радиостанции можно открыть в любой момент с помощью длительного нажатия кнопки  .

#### УВЕДОМЛЕНИЕ:

Если тип канала (например, конвенциональный цифровой или Saracity Plus) не совпадает, будут доступны только редактирование, пересылка и удаление отправленного сообщения.

## Просмотр отправленных текстовых сообщений

Для просмотра отправленного текстового сообщения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).

- Нажмите  для доступа к меню.

- 
- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

- 
- 3 Нажмите  или  для выбора элемента Отправленные. Нажмите  для выбора.

Если папка "Отправленные" пуста:

- На дисплее появится сообщение **Список пуст**.
- Если активированы тональные сигналы клавиатуры, прозвучит сигнал низкой тональности.

- 
- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.  
Значок в правом верхнем углу обозначает статус сообщения. См. [Значки отправленных элементов](#).

## Повторная отправка отправленных текстовых сообщений

Для повторной отправки отправленного текстового сообщения выполните следующие действия.

Находясь на экране просмотра отправленного текстового сообщения:

- 1 Нажмите  во время просмотра сообщения.

---

- 2 Отправленное текстовое сообщение можно отправить повторно или переслать. Выполните одно из следующих действий.
  -  , чтобы Отпр. снова. Нажмите  для выбора.
  -  , чтобы Пересл. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.

---

[Отправить отзыв](#)

- 3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
  - На дисплее появится мини-уведомление о неуспешном выполнении действия.
  - Радиостанция перейдет к экрану опции Отпр. снова. Более подробную информацию см. в разделе [Повторная отправка текстового сообщения на стр. 180](#).
- 

## Удаление отправленных текстовых сообщений из папки «Отправленные»

Для удаления отправленных текстовых сообщений из папки «Отправленные» выполните следующие действия.

Находясь на экране просмотра отправленного текстового сообщения:

1 Нажмите  .

---

2 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора.

---

## Удаление всех отправленных текстовых сообщений из папки "Отправленные"

Для удаления всех отправленных текстовых сообщений из папки "Отправленные" выполните следующие действия.

- 1 Выполните одно из следующих действий.
    - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
    - Нажмите  для доступа к меню.
- 

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Отправленные. Нажмите  для выбора. Если папка "Отправленные" пуста:

- На дисплее появится сообщение *Список пуст*.
- Прозвучит тональный сигнал.

---

4 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.

---

5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Да. Нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия.

- Нажмите  или  для выбора элемента Нет. Нажмите  для выбора. Радиостанция вернется к предыдущему экрану.

## Сохраненные текстовые сообщения

Текстовое сообщение можно сохранить и отправить позднее.

При нажатии кнопки **РТТ** или изменении режима во время набора или редактирования текстового сообщения экран набора/редактирования закрывается, а текущее текстовое сообщение автоматически сохраняется в папку "Черновики".

При этом новые текстовые сообщения всегда добавляются в начало списка.

В папке "Черновики" может храниться до 10 (десяти) сообщений. Если папка заполнена, то при добавлении в нее нового текстового сообщения самое старое сообщение автоматически удаляется.

## Просмотр сохраненных текстовых сообщений

Для просмотра сохраненного текстового сообщения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Черновики. Нажмите  для выбора.
- 4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

## Редактирование сохраненных текстовых сообщений

Для редактирования сохраненного на радиостанции текстового сообщения выполните следующие действия.

1 Нажмите  во время просмотра сообщения.

2 Нажмите  или  для выбора элемента Редакт.. Нажмите  для выбора. Отобразится мигающий курсор.

3 Наберите сообщение на клавиатуре.

Нажмите , чтобы переместить курсор на один символ влево.

Нажмите  или , чтобы переместить курсор на один символ вправо.

Нажмите , чтобы удалить ненужные символы.

Нажмите и удерживайте , чтобы изменить метод ввода текста.

4 Завершив набор сообщения, нажмите  один раз.

Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Отправить. Нажмите , чтобы отправить сообщение.
- Нажмите . Нажмите  или , чтобы выбрать между удалением сообщения и сохранением сообщения. Нажмите  для выбора.

## Удаление сохраненных текстовых сообщений из папки "Черновики"

Для удаления сохраненных текстовых сообщений из папки "Черновики" выполните следующие действия.

1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 3](#).
- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Черновики. Нажмите  для выбора.

4 Нажмите  или  для выбора нужного сообщения. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Удалить. Нажмите , чтобы удалить текстовое сообщение.

## Шаблоны текстовых сообщений

Радиостанция поддерживает до 50 шаблонов текстовых сообщений, запрограммированных дилером.

Шаблоны сообщения задаются заранее, но допускают редактирование при отправке.

## Отправка шаблона текстового сообщения

Для отправки предустановленного шаблона текстового сообщения для предустановленного псевдонима выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **текстовых сообщений**. Перейдите к [шаг 6](#).
  - Нажмите запрограммированную кнопку **доступа одним нажатием**. На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки сообщения.  
Перейдите к [шаг 6](#).

- Нажмите  для доступа к меню.

**2** Нажмите  или  для выбора элемента Сообщения. Нажмите  для выбора.

**3** Нажмите  или  для выбора элемента Быстр. текст. Нажмите  для выбора.

**4** Нажмите  или  для выбора нужного шаблона текстового сообщения. Нажмите  для выбора.

**5** Для выбора получателя сообщения и отправки сообщения выполните следующие действия.

На дисплее на короткое время отобразится мини-уведомление, сопровождающее процесс отправки этого сообщения.

**6** Дождитесь подтверждения.  
В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- Радиостанция перейдет к экрану опции Отпр. снова. Более подробную информацию см. в разделе [Повторная отправка текстового сообщения на стр. 180](#).

## Настройка ввода текста

Радиостанция позволяет выполнять настройку различных параметров ввода текста.

Вы можете настроить следующие параметры ввода текста на радиостанции:

- Прогнозирование слова
- Правка слова

- Предложение с заглавной буквы
- Мои слова

Радиостанция поддерживает следующие методы ввода текста:

- Цифры
- Символы
- Прогнозирование или мультисенсорный ввод
- Язык (если запрограммирован)

#### УВЕДОМЛЕНИЕ:

Нажмите , чтобы вернуться на предыдущий экран, или нажмите и удерживайте , чтобы вернуться на главный экран. По истечении таймера бездействия текущий экран закрывается.

## Включение или выключение функции правки

Эта функция предлагает альтернативные варианты слов, если текстовому редактору не удастся распознать введенное слово с помощью встроенного словаря.

[Отправить отзыв](#)

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Верное слово. Нажмите  для выбора.

6 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Верное слово. Нажмите  для выбора.

- Нажмите , чтобы активировать функцию правки. Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Нажмите , чтобы выключить функцию правки. Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение или выключение функции прогнозирования

**Прогнозирование слова:** Радиостанция может запоминать наиболее часто используемые вами последовательности слов. Эта функция предугадывает следующее слово, которое необходимо использовать после ввода в текстовом редакторе первого слова часто используемой последовательности.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Текст**. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента **Предикт**. Нажмите  для выбора.

- 6 Выполните одно из следующих действий.

- Нажмите , чтобы включить функцию прогнозирования. Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Нажмите , чтобы деактивировать функцию управления искажением микрофона. Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Предложение с заглавной буквы

Эта функция автоматически преобразует первую букву первого слова каждого нового предложения в заглавную.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Лимит предл. Нажмите  для выбора.

---

- 6 Выполните одно из следующих действий.

[Отправить отзыв](#)

- Нажмите , чтобы активировать функцию ввода предложения с заглавной буквы. Если функция активирована, рядом со статусом Активировано отобразится значок ✓.
- Нажмите , чтобы деактивировать функцию ввода предложения с заглавной буквы. Если функция деактивирована, значок ✓ рядом со статусом Активировано исчезнет.

## Просмотр пользовательского списка слов

Вы можете добавлять собственные слова во встроенный словарь радиостанции. Радиостанция сохраняет список добавленных вами слов.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Текст. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Мои слова. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента  
Список слов. Нажмите  для выбора.  
На дисплее отобразится список  
пользовательских слов.

---

## Редактирование пользовательских слов

Вы можете редактировать пользовательские слова, сохраненные в памяти радиостанции.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Текст. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента  
Мои слова. Нажмите  для выбора.

---

6 Нажмите  или  для выбора элемента  
Список слов. Нажмите  для выбора.  
На дисплее отобразится список  
пользовательских слов.

---

7 Нажмите  или  для выбора нужного слова. Нажмите  для выбора.

8 Нажмите  или  для выбора элемента Редакт. Нажмите  для выбора.

9 Отредактируйте пользовательское слово с помощью клавиатуры.

- Нажмите , чтобы переместить курсор на один символ влево.
- Нажмите , чтобы переместить курсор на один символ вправо.
- Чтобы удалить ненужный знак, нажмите клавишу  .
- Нажмите и удерживайте , чтобы изменить метод ввода текста.

10 Нажмите  после завершения редактирования пользовательского слова.

На дисплее на короткое время отобразится мини-уведомление об изменении, подтверждающее сохранение пользовательского слова.

- После сохранения пользовательского слова прозвучит тональный сигнал, а на дисплее появится мини-уведомление об успешном выполнении действия.
- Если пользовательское слово не сохранилось, прозвучит сигнал низкой тональности, и на дисплее появится мини-уведомление о неуспешном выполнении действия.

## Добавление пользовательских слов

Вы можете добавлять пользовательские слова во встроенный словарь радиостанции.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Мои слова. Нажмите  для выбора.

6 Нажмите  или  для выбора элемента Доб. нов. общ. Нажмите  для выбора.  
На дисплее отобразится список пользовательских слов.

7 Отредактируйте пользовательское слово с помощью клавиатуры.

- Нажмите , чтобы переместить курсор на один символ влево.

- Нажмите , чтобы переместить курсор на один символ вправо.

- Чтобы удалить ненужный знак, нажмите клавишу  .

- Нажмите и удерживайте , чтобы изменить метод ввода текста.

8 Нажмите  после завершения редактирования пользовательского слова.

На дисплее на короткое время отобразится мини-уведомление об изменении, подтверждающее сохранение пользовательского слова.

- После сохранения пользовательского слова прозвучит тональный сигнал, а на дисплее появится мини-уведомление об успешном выполнении действия.

- Если пользовательское слово не сохранилось, прозвучит сигнал низкой тональности, и на дисплее

появится мини-уведомление о неуспешном выполнении действия.

## Удаление пользовательских слов

Для удаления пользовательских слов, сохраненных в памяти радиостанции, выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента **Текст**. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента **Мои слова**. Нажмите  для выбора.

---

6 Нажмите  или  для выбора нужного слова. Нажмите  для выбора.

---

7 Нажмите  или  для выбора элемента **Удалить**. Нажмите  для выбора.

---

8 Выполните одно из следующих действий.

- При появлении запроса **Удалить пункт?** нажмите  для выбора варианта **Да**. На дисплее появится сообщение **Пункт удален**.
  - Нажмите  или  для выбора элемента **Нет**. Нажмите , чтобы вернуться на предыдущий экран.
-

## Удаление всех пользовательских слов

Для удаления всех пользовательских слов из встроенного словаря радиостанции выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Текст. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Мои слова. Нажмите  для выбора.

---

- 6 Нажмите  или  для выбора элемента Удалить все. Нажмите  для выбора.
- 

- 7 Выполните одно из следующих действий.
    - При появлении запроса Удалить пункт? нажмите  для выбора варианта Да. На дисплее появится сообщение Все пункты удалены.
    - Чтобы вернуться к предыдущему экрану, нажмите  или  для выбора элемента Нет. Нажмите  для выбора.
- 

## Задания

Эта функция позволяет радиостанции принимать сообщения от диспетчера с рабочими нарядами, которые необходимо выполнить.

**УВЕДОМЛЕНИЕ:**

Данную функцию можно настраивать через CPS в соответствии с пользовательскими предпочтениями. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для различных заданий предусмотрены две папки:

**Папка Мои задачи**

Персонализированные задания, назначенные вашему идентификатору пользователя при выполнении входа в систему.

**Папка Общие задачи**

Общие задания, назначенные группе пользователей.

Вы можете отвечать на эти задания и сортировать их в соответствующих папках. По умолчанию существуют папки **Все**, **Новые**, **Начатые** и **Завершенные**. Чтобы получить дополнительные 10 папок, обратитесь к дилеру или системному администратору.

**УВЕДОМЛЕНИЕ:**

Задания сохраняются даже после того, как радиостанция была выключена и включена снова.

Все задания находятся в папке **Все**. В зависимости от программных настроек радиостанции задания сортируются по уровню приоритета, затем — по времени получения. Новые задания, задания с недавними изменениями статуса и задания с самым высоким приоритетом отображаются в списке в первую очередь. По достижении предельного количества заданий радиостанции последующее задание автоматически заменяет самое раннее. Ваша радиостанция максимально поддерживает от 100 до 500 заданий в зависимости от модели. Для получения дополнительной информации обратитесь к дилеру или системному администратору. Радиостанция автоматически определяет и удаляет дублирующиеся задания с одинаковым идентификатором.

В зависимости от важности задания диспетчер добавляет заданиям уровень приоритета. Доступны три уровня приоритета: Приоритет 1, Приоритет 2, Приоритет 3. Приоритет 1 предусматривает наивысший приоритет, а Приоритет 3 — самый низкий приоритет. Также существуют задания без приоритета.

Ваша радиостанция обновляется соответствующим образом, когда диспетчер выполняет следующие изменения:

- Изменяет содержание задания.

- Добавляет или изменяет уровень приоритета задания.
- Перемещает задания из одной папки в другую.
- Отменяет задания.

## Доступ к папке задания

Для получения доступа к папке задания выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **задания**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выделить элемент **Задания**. Нажмите  для выбора.

- 3 Нажмите  или , для выбора нужной папки. Нажмите  для выбора.

- 4 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.

## Вход на удаленный сервер или выход из него

Данная функция позволяет осуществить вход на удаленный сервер и выход из него с помощью идентификатора пользователя.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или , для выбора элемента **Вход**. Нажмите  для выбора.

Если вы уже осуществили вход, в меню отобразится **Выйти**.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

**3** Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

---

## Создание заданий

Радиостанция может создавать задания на основе шаблонов и отправлять рабочие наряды, которые необходимо выполнить.

Чтобы настроить шаблон для заданий, требуется программное обеспечение CPS.

- 1** Нажмите  для доступа к меню.
- 

- 2** Нажмите  или , чтобы выделить элемент Задания. Нажмите  для выбора.
- 

- 3** Нажмите  или  для выбора элемента Созд запр. Нажмите  для выбора.
- 

## Ответ на задание

Для ответа на все задания выполните следующие действия.

- 1** Нажмите  для доступа к меню.
- 

- 2** Нажмите  или , чтобы выделить элемент Задания. Нажмите  для выбора.
- 

- 3** Нажмите  или  для выбора нужной папки. Нажмите  для выбора.
-

4 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.

---

5 Повторно нажмите , чтобы получить доступ к подменю.

Можно также нажать соответствующую цифровую клавишу (1–9) для **быстрого ответа**.

---

6 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

---

7 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.

- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
  - На дисплее появится мини-уведомление о неуспешном выполнении действия.
- 

## Отправка заданий с использованием одного шаблона задания

Если радиостанция настроена на один шаблон задания, для отправки задания выполните следующие действия.

1 С помощью клавиатуры введите нужный номер помещения. Нажмите  для выбора.

---

2 Нажмите  или  для выбора элемента Статус помещения. Нажмите  для выбора.

---

3 Нажмите  или  для выбора нужной опции. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Отправить. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

---

5 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.
- 

## Отправка заданий с использованием более одного шаблона задания

Если радиостанция настроена на более чем один шаблон задания, для отправки заданий выполните следующие действия.

1 Нажмите  или  для выбора нужной опции. Нажмите  для выбора.

---

2 Нажмите  или  для выбора элемента Отправить. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

---

3 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Удаление заданий

Для удаления заданий выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **задания**. Перейдите к [шаг 4](#)
  - Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выделить элемент **Задания**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужной папки. Нажмите  для выбора.

- 4 Нажмите  или  для выбора папки **Все**. Нажмите  для выбора.

- 5 Нажмите  или , чтобы выделить необходимое задание. Нажмите  для выбора.

- 6 Повторно нажмите  во время просмотра задания.

7 Нажмите  или  для выбора элемента

Удалить. Нажмите  для выбора.

На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса.

8 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Удаление всех заданий

Для удаления всех заданий выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **задания**. Перейдите к [шаг 3](#).
  - Нажмите  для доступа к меню.

- 2 Нажмите  или , чтобы выделить элемент **Задания**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужной папки. Нажмите  для выбора.

- 4 Нажмите  или  для выбора папки **Все**. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента

Удалить все. Нажмите  для выбора.

6 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Да. Нажмите  для выбора. На дисплее появится мини-уведомление об успешном выполнении действия.

- Нажмите  или  для выбора элемента Нет. Нажмите  для выбора. Радиостанция вернется к предыдущему экрану.

## Конфиденциальность

Эта функция позволяет предотвратить несанкционированное прослушивание радиообмена на канале. Для этого используется скремблирование с программной реализацией. Сигналинг и идентификация пользователя в сеансе передачи не скремблируются.

Активация функции конфиденциальности является обязательным условием ведения передач со скремблированием на канале, но для приема передач это не является обязательным. После активации функции конфиденциальности на канале по-прежнему можно принимать нескремблированные передачи.

Некоторые модели радиостанций не снабжены функцией конфиденциальности или предлагают другой способ ее реализации. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Радиостанция поддерживает два типа конфиденциальности, назначить можно только один из них. К ним относятся:

- Базовая конфиденциальность
- Улучшенная конфиденциальность

Для дескремблирования зашифрованного вызова или данных радиостанция должна быть запрограммирована таким образом, чтобы ее секретный ключ (для базовой конфиденциальности) или значение ключа и идентификатор ключа (для улучшенной конфиденциальности) совпадали с соответствующими параметрами передающей радиостанции.

Если секретный ключ или значение ключа и идентификатор ключа не совпадают, то при приеме зашифрованных вызовов пользователь радиостанции либо услышит искаженный сигнал (базовая конфиденциальность), либо не услышит ничего (улучшенная конфиденциальность).

По зашифрованному каналу радиостанция может принимать нешифрованные вызовы без скремблирования в зависимости от запрограммированной конфигурации конкретной радиостанции. Кроме того, радиостанция может воспроизводить тональный сигнал предупреждения в зависимости от запрограммированной конфигурации.

Зеленый светодиодный индикатор постоянно горит, когда радиостанция ведет передачу, и быстро мигает, когда радиостанция принимает зашифрованную передачу.

#### УВЕДОМЛЕНИЕ:

Эта функция недоступна на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

## Включение и выключение функции конфиденциальности

Для включения или выключения функции конфиденциальности выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **конфиденциальности**. Пропустите описанные ниже действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Конфид.** Нажмите  для выбора.

## 5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Вкл.**.
- Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Выкл.**.

## Запрет ответа

С помощью этой функции можно настроить выборочный прием входящих передач радиостанцией.

### УВЕДОМЛЕНИЕ:

Эта функция приобретается отдельно. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Если включено, в ответ на входящие передачи (например, проверка радиостанции, оповещение о

вызове, отключение радиостанции, удаленный мониторинг, служба автоматической регистрации (ARS), ответ на частные сообщения и отправка отчетов GNSS о местоположении) радиостанция не инициирует никакие исходящие передачи. Если эта функция включена, радиостанция не может принимать подтвержденные частные вызовы. При этом с радиостанции можно осуществлять передачу в ручном режиме.

## Включение/отключение запрета ответа

Для включения или отключения запрета ответа на радиостанции выполните следующие действия.

Нажмите запрограммированную кнопку **запрета ответа**.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее ненадолго отобразится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее ненадолго отобразится мини-уведомление о неуспешном выполнении действия.

## Многосайтовые элементы управления

Эти функции применимы, когда текущий канал радиосвязи является частью конфигурации IP Site Connect или Capacity Plus – многосайтовая.

### Включение ручного поиска сайтов

При низком уровне принимаемого сигнала выполните следующие действия, чтобы включить ручной поиск сайтов для поиска сайта с более высоким уровнем сигнала.

Если радиостанция найдет новый сайт:

- Прозвучит тональный сигнал успешного действия.

Если радиостанции не удастся найти новый сайт:

- Прозвучит тональный сигнал неуспешного действия.

## Включение/выключение блокировки сайта

Когда функция включена, радиостанция осуществляет поиск только текущего сайта. Когда функция выключена, помимо текущего сайта, радиостанция также выполняет поиск других сайтов.

Нажмите запрограммированную кнопку **блокировки сайта**.

Если функция **блокировки сайта** включена:

- Прозвучит тональный сигнал успешного действия, оповещающий о том, что радиостанция зафиксирована на текущем сайте.
- На дисплее появится сообщение **Сайт зафикс.**

Если функция **блокировки сайта** выключена:

- Прозвучит тональный сигнал неуспешного действия, оповещающий о том, что радиостанция расфиксирована.

- На дисплее появится сообщение Сайт расфикс.

## Доступ к списку соседних сайтов

Эта функция позволяет пользователю просматривать список соседних сайтов текущего домашнего сайта. Для получения доступа к списку соседних сайтов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.
- 4 Нажмите  или  для выбора элемента Сосед. сайт. Нажмите  для выбора.

## Безопасность

Данная функция позволяет активировать и деактивировать любую радиостанцию в системе.

Можно, например, деактивировать украденную радиостанцию, чтобы несанкционированный пользователь не смог ей пользоваться, и активировать ее после ее возврата.

Активировать и деактивировать радиостанцию можно двумя способами: с аутентификацией и без аутентификации.

Функция "Отключение аутентифицированной радиостанции" приобретается отдельно. В случае работы с функцией "Отключение аутентифицированной радиостанции" для активации или деактивации радиостанции требуется проверка. Если радиостанция запускает эту функцию на целевой радиостанции с аутентификацией пользователя потребуется ввести парольную фразу. Парольная фраза на целевой радиостанции программируется заранее с помощью CPS.

При нажатии на кнопку  во время выполнения процедуры активации или деактивации радиостанции вы не получите подтверждающего сообщения.

**УВЕДОМЛЕНИЕ:**

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Деактивация радиостанций

Для деактивации радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **деактивации радиостанции**.

---

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора.

---

- 3 Нажмите  для выбора. Будет выполнен один из следующих сценариев:
  - На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Зеленый светодиодный индикатор начнет мигать.
  - Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

### 4 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Деактивация радиостанции с помощью списка контактов

Для выполнения деактивации радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента **Деактив. р/с**.

- 5 Нажмите  для выбора. Будет выполнен один из следующих сценариев:

- На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Зеленый светодиодный индикатор начнет мигать.
- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

- 6 Дождитесь подтверждения.  
В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Деактивация радиостанции с помощью ручного набора

Для выполнения деактивации радиостанции с помощью ручного набора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Номер р/ст**. Нажмите  для выбора.  
В первой строке на дисплее появится сообщение **Номер р/ст:**.

- 5 Введите идентификатор абонента и нажмите , чтобы продолжить.

- 6 Нажмите  или  для выбора элемента **Деактив. р/с**.

- 7 Нажмите  для выбора. Будет выполнен один из следующих сценариев:
  - На дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Зеленый светодиодный индикатор начнет мигать.

- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите  , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

## 8 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Активация радиостанций

Для активации радиостанции выполните следующие действия.

- 1 Нажмите запрограммированную кнопку **активации радиостанции**.

- 2 Нажмите  или  для выбора нужного псевдонима или идентификатора.

- 3 Нажмите  для выбора. Будет выполнен один из следующих сценариев:
  - На дисплее появятся сообщение **Активир.** **р/с** и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.
  - Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

#### 4 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.

- На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Активация радиостанции с помощью списка контактов

Для выполнения активации радиостанции с помощью списка контактов выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.
- 4 Нажмите  или  для выбора элемента **Активир. р/с**.

5 Нажмите  для выбора. Будет выполнен один из следующих сценариев:

- Зеленый светодиодный индикатор начнет мигать. На дисплее появятся сообщение «Активирован р/с и псевдоним или идентификатор абонента». Загорится зеленый светодиодный индикатор.
- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

6 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

---

## Активация радиостанции с помощью ручного набора

Для выполнения активации радиостанции с помощью ручного набора выполните следующие действия.

1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.
- 
- 3 Нажмите  или  для выбора элемента **Ручной набор**. Нажмите  для выбора.
- 
- 4 Нажмите  или  для выбора элемента **Частн. вызов**. Нажмите  для выбора.  
В первой строке на дисплее появится сообщение **Номер р/ст:**.
- 
- 5 Введите идентификатор абонента и нажмите  , чтобы продолжить.
- 
- 6 Нажмите  или  для выбора элемента **Активир. р/с**.
- 
- 7 Нажмите  для выбора. Будет выполнен один из следующих сценариев:

- Зеленый светодиодный индикатор начнет мигать. На дисплее появятся сообщение **Активир. р/с** и псевдоним или идентификатор абонента. Загорится зеленый светодиодный индикатор.
- Появится экран для ввода парольной фразы.

Введите парольную фразу. Нажмите  , чтобы продолжить.

- Если парольная фраза введена верно, на дисплее на короткое время отобразится мини-уведомление, указывающее на выполнение запроса. Загорится зеленый светодиодный индикатор.
- Если парольная фраза введена неверно, на дисплее отобразится мини-уведомление о неуспешном выполнении действия и радиостанция вернется к предыдущему экрану.

## 8 Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.

- На дисплее появится мини-уведомление об успешном выполнении действия.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится мини-уведомление о неуспешном выполнении действия.

---

## Функция "Одинокий работник"

Эта функция обеспечивает подачу экстренного сигнала в случае отсутствия активности со стороны пользователя радиостанции (нажатия любой кнопки или выбора каналов) в течение заданного времени.

По истечении таймера бездействия радиостанция предупреждает пользователя звуковым сигналом.

Если активность со стороны пользователя по-прежнему отсутствует, то по истечении заданного времени радиостанция инициирует экстренный сигнал оповещения.

Только один из следующих экстренных сигналов оповещения может быть закреплен за этой функцией.

- Экстренный сигнал оповещения
- Экстренный сигнал оповещения с вызовом
- Экстренный сигнал оповещения с последующей голосовой передачей 

Радиостанция остается в экстренном режиме с возможностью приема и отправки голосовых сообщений до выполнения необходимых действий. Для получения сведений о способах выхода из экстренного режима см. раздел [Работа в экстренном режиме на стр. 492](#).

### УВЕДОМЛЕНИЕ:

Эта функция доступна только на радиостанциях, в которых она активирована. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Bluetooth

Эта функция позволяет использовать Bluetooth-устройство (аксессуар), соединив его посредством Bluetooth-подключения с радиостанцией. Радиостанция совместима как с Bluetooth-устройствами Motorola Solutions, так и со стандартными устройствами, имеющимися в массовой продаже.

Дальность связи Bluetooth составляет 10 м (32 фута) при прямой видимости. Линия связи между радиостанцией и Bluetooth-устройством не должна быть ничем заслонена. Для обеспечения высокой надежности Motorola Solutions рекомендует не разносить радиостанцию и аксессуар на большое расстояние.

В приграничных зонах приема сигнала голосовые и тональные сигналы становятся искаженными и ломаными. Чтобы улучшить качество звука, нужно восстановить радиосвязь, приблизив Bluetooth-устройство к радиостанции (в пределах установленной 10-метровой зоны приема). В радиусе 10 м максимальная мощность функции Bluetooth, поддерживаемая радиостанцией, составляет 2,5 мВт (4 дБм).

Радиостанция может поддерживать до трех одновременных Bluetooth-подключений к Bluetooth-устройствам разных типов. Например, это может быть гарнитура, сканер и устройство только с поддержкой PPT (POD). Несколько соединений с однотипными Bluetooth-устройствами установить нельзя.

Дополнительную информацию о функциональности Bluetooth-устройства можно найти в руководстве пользователя соответствующего Bluetooth-устройства.

[Отправить отзыв](#)

#### УВЕДОМЛЕНИЕ:

При отключении через CPS все функции Bluetooth будут отключены, а также будет удалена база данных Bluetooth-устройств.

## Включение и выключение функции Bluetooth

Чтобы включить Bluetooth, выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Мой статус. Нажмите  для выбора.  
На дисплее появятся элементы Вкл. и Выкл. Текущий статус отмечен значком .

---

- 4 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Вкл.**.
- Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Выкл.**.

## Подключение к Bluetooth-устройству

Для подключения Bluetooth-устройств выполните следующие действия.

Включите Bluetooth-устройство и переведите его в режим сопряжения.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Bluetooth**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Устройства**. Нажмите  для выбора.

- 4 Выполните одно из следующих действий.

- Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.
- Нажмите  или  для выбора элемента **Найти уст-ва**, чтобы обнаружить доступные устройства. Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента **Соединить**. Нажмите  для выбора.

Для выполнения сопряжения с Bluetooth-устройством могут потребоваться дополнительные действия. Обратитесь к

руководству пользователя соответствующего Bluetooth-устройства.

На дисплее появится сообщение **Соединение с** <название устройства>.

Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.
- На дисплее появится сообщение <Название устройства> соединено и значок **Bluetooth-соединения**.
- На дисплее рядом с подключенным устройством появится значок .

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится сообщение **Соединение не удалось**.

#### УВЕДОМЛЕНИЕ:

Если требуется ввести PIN-код, см. [Доступ к радиостанции с использованием пароля на стр. 219](#).

[Отправить отзыв](#)

## Подключение к Bluetooth-устройству в режиме обнаружения

Для подключения Bluetooth-устройств выполните следующие действия в режиме обнаружения.

Включите Bluetooth-устройство и переведите его в режим сопряжения.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента **Найти меня**. Нажмите  для выбора. Ваша радиостанция остается видимой для других Bluetooth-устройств в течение заданного периода времени. Это называется "режим обнаружения".

Дождитесь подтверждения.

В случае успешного выполнения:

- Прозвучит тональный сигнал успешного действия.

- На дисплее появится сообщение «Название устройства» соединено и значок **Bluetooth-соединения**.
- На дисплее рядом с подключенным устройством появится значок ✓.

В случае сбоя:

- Прозвучит тональный сигнал неуспешного действия.
- На дисплее появится сообщение Соединение не удалось.

## Отключение от Bluetooth-устройства

Для отключения Bluetooth-устройства выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.

- 4 Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.

- 5 Нажмите  или  для выбора элемента Отсоединить. Нажмите  для выбора.

На дисплее появится сообщение Отсоединение от «название устройства».

### УВЕДОМЛЕНИЕ:

Для отсоединения Bluetooth-устройства могут потребоваться дополнительные действия. При необходимости обратитесь к руководству пользователя соответствующего Bluetooth-устройства.

Дождитесь подтверждения.

- Прозвучит тональный сигнал.

- На дисплее появится `<Название устройства>` отсоединено, и значок **Bluetooth-соединения** исчезнет.
- Значок  рядом с подключенным устройством исчезнет.

## Перенаправление звука на встроенный динамик радиостанции или Bluetooth-устройство

Для перенаправления звука на внутренний динамик радиостанции или на внешний Bluetooth-аксессуар выполните следующие действия.

Нажмите запрограммированную кнопку **переключателя аудио Bluetooth**.

На дисплее появится один из следующих вариантов.

- Прозвучит тональный сигнал. На дисплее появится сообщение **Аудио на радиост.**
- Прозвучит тональный сигнал. На дисплее появится сообщение **Аудио на Bluetooth.**

## Просмотр информации об устройстве

Для просмотра информации об устройстве выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Дет. данные. Нажмите  для выбора.

## Удаление имени устройства

Вы можете удалить отключенное устройство из списка Bluetooth-устройств.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Устройства. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора нужного устройства. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора элемента Удалить. Нажмите  для выбора. На дисплее появится сообщение Устройство удалено.

## Усиление микрофона Bluetooth

Данная функция позволяет управлять значением усиления микрофона для подключенного устройства с поддержкой Bluetooth.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Ус.мик ВТ. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора типа усиления микрофона ВТ и текущего значения. Нажмите  для выбора. Значения можно отредактировать здесь.

---

- 5 Нажмите  или , чтобы увеличить или уменьшить значения. Нажмите  для выбора.

## Отслеживание в помещении

### УВЕДОМЛЕНИЕ:

Функция отслеживания в помещении доступна только в моделях с программным и аппаратным обеспечением последней версии. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Функция отслеживания в помещении используется для отслеживания местоположения пользователей радиостанций. Если функция отслеживания в помещении активирована, радиостанция работает в ограниченном режиме обнаружения. Для поиска радиостанции и определения ее местоположения используются специальные радиомаяки.

## Включение и выключение функции отслеживания в помещении

Для включения или выключения функции отслеживания в помещении выполните одно из следующих действий.

- Доступ к этой функции можно получить в меню.

a. Нажмите  для доступа к меню.

b. Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

c. Нажмите  или  для выбора элемента Отсл. в помещ., затем нажмите  для выбора.

d. Нажмите , чтобы включить функцию отслеживания в помещении.

На дисплее появится сообщение Отсл. в пом. вкл. Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного включения функции на главном экране появится значок "Отслеживание в помещении доступно".
- В случае сбоя на дисплее появится сообщение Сбой включения. Прозвучит тональный сигнал неуспешного действия

- е. Нажмите  , чтобы выключить функцию отслеживания в помещении.

На дисплее появится сообщение **Отсл. в пом. выкл.** Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного выключения функции значок "Отслеживание в помещении доступно" на главном экране исчезнет.
- В случае сбоя на дисплее появится сообщение **Сбой выключения.** Прозвучит тональный сигнал неуспешного действия

- Для доступа к этой функции можно использовать программируемую кнопку.

- а. Выполните длительное нажатие запрограммированной кнопки **отслеживания в помещении**, чтобы включить функцию отслеживания в помещении.

На дисплее появится сообщение **Отсл. в пом. вкл.** Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного включения функции на главном экране появится значок "Отслеживание в помещении доступно".
- В случае сбоя на дисплее появится сообщение **Сбой включения.** В случае сбоя прозвучит тональный сигнал неуспешного действия.

- б. Нажмите запрограммированную кнопку **отслеживания в помещении**, чтобы выключить функцию отслеживания в помещении.

На дисплее появится сообщение **Отсл. в пом. выкл.** Прозвучит тональный сигнал успешного действия.

Произойдет одна из следующих ситуаций:

- В случае успешного выключения функции значок "Отслеживание в помещении доступно" на главном экране исчезнет.
- В случае сбоя на дисплее появится сообщение **Сбой выключения.** В случае сбоя прозвучит тональный сигнал неуспешного действия.

## Доступ к информации о радиомаяках для отслеживания в помещении

Для доступа к информации радиомаяков для отслеживания в помещении следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Bluetooth, затем нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Отсл. в помещ., затем нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Радиомаяки, затем нажмите  для выбора.

На дисплее отобразится информация о радиомаяках.

## Список уведомлений

В радиостанции предусмотрен список уведомлений, в котором фиксируются все "непрочитанные" события на канале, такие как непрочитанные текстовые сообщения, телеметрические сообщения, пропущенные вызовы и оповещения о вызове.

Когда в списке уведомлений имеется одно или несколько событий, в строке состояния появляется значок **уведомления**.

В списке отображается не более 40 непрочитанных событий. Когда список заполняется, последующее событие автоматически заменяет в нем самое раннее событие. Прочитанные события удаляются из списка уведомлений.

Для текстовых сообщений, пропущенных вызовов и оповещений об общих вызовах максимальное число уведомлений составляет 30 текстовых сообщений и 10 пропущенных вызовов или оповещений о вызовах. Максимальное количество зависит от отдельных функций списка (задания, текстовые сообщения или пропущенные вызовы или оповещения о вызовах).

## Доступ к списку уведомлений

Для получения доступа к списку уведомлений выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Уведом-ие. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора нужного события. Нажмите  для выбора.  
  
Нажмите и удерживайте , чтобы вернуться на главный экран.

---

## Система автоматического оповещения

Функцию системы автоматического оповещения (ARTS) поддерживают только аналоговые линии связи. Она используется для информирования пользователя о

нахождении его радиостанции вне зоны действия других радиостанций с поддержкой ARTS.

Радиостанции с поддержкой ARTS время от времени посылают и принимают сигналы, позволяющие удостовериться, что они находятся в радиусе действия друг друга.

Радиостанция информирует пользователя о следующих состояниях.

### Первое оповещение

Прозвучит тональный сигнал.

На дисплее появится сообщение *Доступно*, расположенное после псевдонима канала.

### Оповещение "ARTS-в зоне приема"

Прозвучит тональный сигнал, если данная функция запрограммирована.

На дисплее появится сообщение *Доступно*, расположенное после псевдонима канала.

### Оповещение "ARTS-вне зоны приема"

Прозвучит тональный сигнал. Светодиодный индикатор начнет быстро мигать красным цветом.

На дисплее появится сообщение *Вне зоны приема*, а затем главный экран.

**УВЕДОМЛЕНИЕ:**

Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Беспроводное программирование

Ваш дилер может обновлять радиостанцию удаленно с помощью беспроводного программирования (ОТАР) без необходимости устанавливать физическое соединение с устройством. Кроме того, настройка некоторых параметров также возможна посредством ОТАР.

Во время выполнения ОТАР светодиодный индикатор мигает зеленым цветом.

Во время приема радиостанцией большого объема данных:

- На дисплее отображается значок **большого объема данных**.
- Канал становится занятым.
- При нажатии на кнопку **РТТ** звучит тональный сигнал неуспешного действия.

После завершения ОТАР в зависимости от конфигурации радиостанции произойдет следующее:

- Прозвучит тональный сигнал. На дисплее появится сообщение **Обновл. перезагруз.** Радиостанция выполнит перезапуск (выключение и повторное включение).
- Выберите **Перезапустить** или **Отложить**. При выборе варианта **Отложить** радиостанция возвращается к предыдущему экрану. До автоматического перезапуска радиостанции на дисплее отображается значок **таймера задержки ОТАР**.

При включении радиостанции после автоматического перезапуска:

- В случае успешного выполнения на дисплее появится сообщение **ПО обновлено**.
- В случае сбоя на дисплее появится сообщение **Отказ обн. ПО**.

Для получения сведений о версии обновленного ПО см. раздел [Просмотр информации об обновлении программного обеспечения на стр. 256](#).

## Запрет передачи

Функция запрета передачи позволяет пользователям блокировать все передачи с радиостанции.

### УВЕДОМЛЕНИЕ:

Функции Bluetooth и Wi-Fi доступны в режиме запрета передачи.

## Включение запрета передачи

Для включения запрета передачи выполните следующие действия.

Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Запр. Тх, затем нажмите  для выбора.
  - Нажмите программируемую кнопку **запрета передачи**.
- 
- Прозвучит тональный сигнал успешного действия.
  - На дисплее появится сообщение Запрет Тх вкл.

### УВЕДОМЛЕНИЕ:

Состояние запрета передачи остается неизменным после включения радиостанции.

## Выключение запрета передачи

Для отключения запрета передачи выполните следующие действия.

Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Запр. Тх, затем нажмите  для выбора.
  - Нажмите программируемую кнопку **запрета передачи**.
- 
- Прозвучит тональный сигнал неуспешного действия. Передача возвращается в нормальный рабочий режим.
  - На дисплее появится сообщение Запрет Тх выкл.

## Выбор режимов подключения к периферийным устройствам сторонних производителей

Выполните следующие действия для выбора одного из нижеуказанных режимов подключения к периферийным устройствам сторонних производителей:

- Motorola Solutions
- ПК и аудио
- Аксессуар для работы с данными
- Телеметрия
- Общий

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Тип кабеля. Нажмите  для выбора.

5 Нажмите  или  для выбора нужного режима подключения. Нажмите  для выбора. На дисплее появится название выбранного режима подключения. Радиостанция вернется к предыдущему меню.

## Индикатор уровня принимаемого сигнала

Эта функция позволяет просматривать значения индикатора уровня принимаемого сигнала (RSSI).

В правом верхнем углу дисплея появится значок **RSSI**. Для получения дополнительной информации о значке **RSSI** см. [Значки дисплея](#).

## Просмотр значений RSSI

Для просмотра значений RSSI выполните следующие действия.

Находясь на главном экране:

- 1 В течение 5 секунд нажмите  три раза и сразу же три раза нажмите  .  
На дисплее отобразятся текущие значения RSSI.

- 2 Нажмите и удерживайте , чтобы вернуться на главный экран.

## Функции блокировки с паролем

Эта функция позволяет ограничивать доступ к радиостанции посредством вывода запроса на ввод пароля при включении устройства.

Для ввода пароля можно использовать микрофон с клавиатурой или кнопки **прокрутки вверх/вниз**.

## Доступ к радиостанции с использованием пароля

Для получения доступа к радиостанции с использованием пароля выполните следующие действия.

- 1 Наберите текущий четырехзначный пароль.

### УВЕДОМЛЕНИЕ:

В случае использования переключателя **экстренного режима** вводить пароль для доступа к радиостанции не требуется.

- Используйте микрофон с клавиатурой.
- Нажмите  или , чтобы отредактировать числовое значение каждого знака, а затем нажмите , чтобы ввести выбранную цифру и перейти к следующей.

- 2 Нажмите  для ввода пароля.

В случае успешного ввода пароля радиостанция включится.

В случае сбоя:

- После двух неудачных попыток на дисплее появится сообщение **Неверный пароль**. Повторите [шаг 1](#).
- После ввода неверного пароля в третий раз на дисплее появится сообщение **Неверный пароль**, а затем сообщение **Радиостанц. заблок.** Прозвучит тональный сигнал. Светодиодный индикатор дважды мигнет желтым цветом. Радиостанция блокируется на 15 минут.

#### УВЕДОМЛЕНИЕ:

В заблокированном состоянии радиостанция реагирует только на команды регулятора **"Вкл./Выкл./Громкость"** и запрограммированной кнопки **подсветки**.

## Разблокировка заблокированной радиостанции

В заблокированном состоянии радиостанция не принимает вызовы. Для разблокировки заблокированной радиостанции выполните следующие действия.

[Отправить отзыв](#)

Выполните одно из следующих действий.

- Если радиостанция включена, подождите 15 минут. и затем повторите шаги в разделе [Доступ к радиостанции с использованием пароля на стр. 219](#), чтобы получить доступ к радиостанции.
- Если радиостанция выключена, включите питание радиостанции. Радиостанция снова начнет отсчет 15 минут до заблокированного состояния. Прозвучит тональный сигнал. Светодиодный индикатор дважды мигнет желтым цветом. На дисплее появится сообщение **Радиостанц. заблок.**  
  
Подождите 15 минут. и затем повторите шаги в разделе [Доступ к радиостанции с использованием пароля на стр. 219](#), чтобы получить доступ к радиостанции.

## Включение и выключение блокировки с паролем

Для включения или выключения блокировки с паролем выполните следующие действия.

1

Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Блок с парол. Нажмите  для выбора.

---

5 Наберите текущий четырехзначный пароль.

- Используйте микрофон с клавиатурой.
- Нажмите  или , чтобы отредактировать числовое значение каждого знака, а затем нажмите , чтобы ввести выбранную цифру и перейти к следующей. При наборе каждого знака будет звучать тональный сигнал успешного действия.

---

6 Нажмите  для ввода пароля.

Если пароль введен неправильно, на дисплее появится сообщение Неверный пароль и автоматически отобразится предыдущее меню.

---

7 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Вкл. Нажмите  для выбора. На дисплее появится значок  рядом с сообщением Вкл.
  - Нажмите  или  для выбора элемента Выкл. Нажмите  для выбора. На дисплее появится значок  рядом с сообщением Выкл.
- 

## Изменение паролей

Для изменения пароля радиостанции выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Блок с парол. Нажмите  для выбора.

---

5 Введите текущий четырехзначный пароль и нажмите  , чтобы продолжить.

Если пароль введен неправильно, на дисплее появится сообщение Неверный пароль и автоматически отобразится предыдущее меню.

---

6 Нажмите  или  для выбора элемента Смена пароля. Нажмите  для выбора.

---

7 Введите новый четырехзначный пароль и нажмите  , чтобы продолжить.

---

8 Введите новый четырехзначный пароль еще раз и нажмите  , чтобы продолжить.

В случае успешной смены пароля на дисплее появится сообщение Пароль изменен.

В противном случае на дисплее появится сообщение Пароли не совпад..

На экране автоматически отобразится предыдущее меню.

---

## Настройка передней панели

С помощью настройки передней панели (FPC) можно менять некоторые параметры радиостанции для расширения ее функциональности.

## Вход в режим настройки передней панели

Для входа в режим программирования с передней панели выполните следующие действия.

Главный экран можно открыть в любой момент с помощью длительного нажатия кнопки .

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Прогр. р/с. Нажмите  для выбора.

## Редактирование параметров режима FRP

Перемещаясь между параметрами функции, используйте следующие кнопки.

-  ,  — просмотр опций, увеличение/уменьшение значений, вертикальное перемещение.
-  — выбор опции или открытие подменю.
-  — короткое нажатие открывает предыдущее меню или закрывает экран выбора. Нажмите и удерживайте , чтобы вернуться на главный экран.

## Использование функции Wi-Fi

Wi-Fi® является зарегистрированным товарным знаком компании Wi-Fi Alliance®.

### УВЕДОМЛЕНИЕ:

Эта функция применима только для DM4601e .

Эта функция позволяет устанавливать и настраивать подключение к сети Wi-Fi. Wi-Fi поддерживает обновления микропрограммы радиостанции, кодплага и ресурсов, например языковых пакетов и голосовых объявлений.

## Включение или выключение Wi-Fi

Программируемая кнопка **включения или выключения Wi-Fi** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

Голосовые оповещения при нажатии на запрограммированную кнопку **включения или отключения Wi-Fi** можно настроить с помощью CPS в зависимости от пользовательских предпочтений. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

Для включения или отключения Wi-Fi выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **включения или выключения Wi-Fi**. Прозвучит голосовое объявление о включении Wi-Fi или выключении Wi-Fi.
- Доступ к этой функции можно получить в меню.
  - a. Нажмите  для доступа к меню.

b. Нажмите  или , чтобы выделить элемент Wi-Fi, затем нажмите  для выбора.

c. Нажмите  или , чтобы выделить элемент Wi-Fi **вкл.**, затем нажмите  для выбора.

Нажмите , чтобы включить Wi-Fi. На дисплее рядом с сообщением **Активировано** появится значок .

Нажмите , чтобы выключить Wi-Fi. Значок  рядом с сообщением **Активировано** исчезнет.

## Подключение к точке доступа к сети

При включении Wi-Fi радиостанция выполняет сканирование и подключается к точке доступа к сети.

Также можно подключиться к точке доступа к сети через меню.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент Wi-Fi, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить точку доступа к сети, затем нажмите  для выбора.

---

- 5 Нажмите  или , чтобы выделить элемент Соединить, затем нажмите  для выбора.

---

- 6 Введите пароль и нажмите .

При успешном установлении соединения на экране радиостанции отобразится уведомление, и точка доступа к сети будет сохранена в списке профилей.

## Проверка состояния подключения Wi-Fi

Чтобы проверить состояние подключения Wi-Fi, выполните следующие действия.

Нажмите запрограммированную кнопку **запроса статуса Wi-Fi**, чтобы получить голосовое объявление о состоянии подключения. Прозвучит голосовое объявление о том, что сеть Wi-Fi выключена, или что Wi-Fi включена, но подключения нет, или что Wi-Fi включена и подключение присутствует.

- Если Wi-Fi выключен, на экране отображается Wi-Fi выкл.
- Если радиостанция подключена к сети, на экране отображается Wi-Fi вкл., подключен.
- Если Wi-Fi включен, но радиостанция не подключена ни к одной сети, на экране отображается Wi-Fi вкл., отключен.

Голосовые оповещения в ответ на запрос состояния подключения Wi-Fi можно настроить с помощью CPS в зависимости от пользовательских предпочтений. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

**УВЕДОМЛЕНИЕ:**

Программируемая кнопка **запроса статуса Wi-Fi** назначается дилером или системным администратором. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

## Обновление списка сетей

Для обновления списка сетей следуйте описанной процедуре.

- Чтобы обновить список сетей, выполните следующие действия с помощью меню.
  - a. Нажмите  для доступа к меню.
  - b. Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

- c. Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

При переходе в меню "Сети" радиостанция автоматически обновляет список сетей.

- Если меню "Сети" уже открыто, выполните следующее действие, чтобы обновить список сетей.

- Нажмите  или , чтобы выделить элемент Обновить, затем нажмите  для выбора.

Радиостанция выполнит обновление и отобразит новый список сетей.

## Добавление сети

Если предпочтительная сеть недоступна в списке сетей, для добавления сети выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

- 3 Нажмите  или , чтобы выделить элемент Сети, затем нажмите  для выбора.

---

- 4 Нажмите  или , чтобы выделить элемент Добав. сеть, затем нажмите  для выбора.

---

- 5 Введите идентификатор беспроводной сети (SSID) и нажмите .

---

- 6 Нажмите  или , чтобы выделить элемент Без защиты, затем нажмите  для выбора.

---

- 7 Введите пароль и нажмите .
 

На дисплее радиостанции отобразится мини-уведомление об успешном выполнении действия, указывая, что сеть успешно сохранена.

---

## Просмотр информации о точках доступа к сети

Для просмотра информации о точках доступа к сети следуйте описанной процедуре.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или , чтобы выделить элемент WiFi, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить точку доступа к сети, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Дет. данные**, затем нажмите  для выбора.

Для подключенной точки доступа к сети отобразятся идентификатор беспроводной сети (SSID), режим безопасности, адрес управления доступом к среде передачи (MAC) и интернет-протокол (IP).

Для неподключенной точки доступа отобразятся идентификатор беспроводной сети (SSID) и режим безопасности.

---

## Удаление точек доступа к сети

Чтобы удалить точки доступа к сети из списка профилей, выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или , чтобы выделить элемент **WiFi**, затем нажмите  для выбора.

---

3 Нажмите  или , чтобы выделить элемент **Сети**, затем нажмите  для выбора.

---

4 Нажмите  или , чтобы выделить выбранную точку доступа к сети, затем нажмите  для выбора.

---

5 Нажмите  или , чтобы выделить элемент **Удалить**, затем нажмите  для выбора.

---

- 6 Нажмите  или , чтобы выделить элемент Да, затем нажмите  для выбора.

На экране радиостанции отобразится мини-уведомление об успешном выполнении действия, указывая, что выбранная точка доступа к сети успешно удалена.

## Вспомогательные функции

В данной главе описываются вспомогательные функции, доступные на радиостанции.

### Уровни шумоподавления

Уровень шумоподавления можно регулировать, что позволяет отфильтровывать ненужные вызовы с низким уровнем сигнала и каналы с повышенным уровнем фонового шума.

#### Нормальный

Эта опция используется по умолчанию.

#### Высокий

Эта настройка позволяет отфильтровывать ненужные вызовы и/или фоновый шум. При этом

возможно отфильтровывание вызовов из удаленных местоположений.

#### УВЕДОМЛЕНИЕ:

Эта функция недоступна на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

## Настройка уровней шумоподавления

Для настройки уровней шумоподавления выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **шумоподавления**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента ШПД. Нажмите  для выбора.

5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Нормальн.. Нажмите  для выбора.  
На дисплее появится значок  рядом с элементом Нормальн..
- Нажмите  или  для выбора элемента Высок.. Нажмите  для выбора.  
На дисплее появится значок  рядом с элементом Высок..

На экране автоматически отобразится предыдущее меню.

## Уровни мощности

Пользователь может переключать режимы высокой и низкой мощности радиостанции для каждого канала.

### Высокий

Данный уровень позволяет поддерживать связь с радиостанциями, находящимися на значительном расстоянии от пользователя.

### Низкая

Данный уровень обеспечивает связь с радиостанциями, находящимися на небольшом расстоянии.

### УВЕДОМЛЕНИЕ:

Эта функция недоступна на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

## Настройка уровней мощности

Для настройки уровней мощности выполните следующие действия.

- 1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **уровня мощности**. Пропустите описанные ниже действия.
- Нажмите  для доступа к меню.

**2** Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

**3** Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

**4** Нажмите  или  для выбора элемента **Питание**. Нажмите  для выбора.

**5** Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Большая**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Большая**.

- Нажмите  или  для выбора элемента **Малая**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Малая**.

**6** Нажмите и удерживайте , чтобы вернуться на главный экран.

## Активация и деактивация тональных сигналов/оповещений радиостанции

Вы можете включить или отключить все тональные сигналы и оповещения радиостанции при необходимости, за исключением входящего оповещения экстренного вызова. Для активации или деактивации тональных сигналов и оповещений радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **тональных сигналов/оповещений**. Пропустите следующие действия.

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Тоны/опов. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента Все тоны. Нажмите  для выбора.

6 Нажмите , чтобы активировать или деактивировать все тональные сигналы и оповещения. На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом Активировано отобразится значок .
- Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.

## Включение и выключение тональных сигналов клавиатуры

Для включения или выключения тональных сигналов клавиатуры выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

Тонны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента

Тон клав. Нажмите  для выбора.

---

6 Нажмите , чтобы активировать или деактивировать тональные сигналы клавиатуры. На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.
- 

## Установка уровня громкости тональных сигналов или оповещений

Эта функция позволяет установить громкость тональных сигналов или оповещений выше или ниже уровня громкости передачи голоса. Для установки уровня громкости тональных сигналов или оповещений выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента  
Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента  
Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента  
Тонны/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Мин. громкость. Нажмите  для выбора.

---

6 Нажмите  или  для выбора нужного уровня громкости.  
При переходе к каждому значению звучит тональный сигнал, соответствующий данному уровню громкости.

---

- 7 Выполните одно из следующих действий.
- Нажмите  для выбора. Нужный уровень громкости сохранен.
  - Нажмите , чтобы выйти. Изменения отменены.
- 

## Включение и выключение тонального сигнала разрешения разговора

Для включения или выключения тонального сигнала разрешения разговора выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Тонь/опов. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента

Разр. разгов. Нажмите  для выбора.

---

6 Нажмите , чтобы активировать или деактивировать тональный сигнал разрешения разговора.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.
- 

## Включение и выключение тонального сигнала включения питания

Для включения или выключения тонального сигнала включения питания выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента **Тоны/опов.** Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента **Вкл.** Нажмите  для выбора.

---

6 Нажмите , чтобы активировать или деактивировать тональный сигнал включения питания. На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Настройка тонального сигнала оповещения о получении текстового сообщения

Вы можете выбрать однократный или повторяющийся тональный сигнал оповещения о получении текстового сообщения для каждой записи в списке контактов. Для настройки тонального сигнала оповещения о получении текстового сообщения выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента **Контакты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора нужного псевдонима или идентификатора. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Оп. о выз.** Нажмите  для выбора.

- 5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Однораз.** Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Однораз.**
- Нажмите  или  для выбора элемента **Повтор.** Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Повтор.**

## Смена режимов дисплея

Режим дисплея радиостанции можно переключать с дневного на ночной и обратно по мере необходимости. От этой функции зависит палитра цветов дисплея. Для изменения режима дисплея радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **режима дисплея**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Дисплей**. Нажмите  для выбора.

На дисплее появятся варианты настройки **Дневн. режим** и **Ночн. режим**.

- 5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора. Рядом с выбранной настройкой появится значок .

## Регулировка яркости дисплея

Для регулировки яркости дисплея радиостанции выполните следующие действия. Если функция "Автояркость" активирована, яркость дисплея нельзя регулировать.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **яркости**. Пропустите следующие действия.

- Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Яркость. Нажмите  для выбора.  
На дисплее появится индикатор выполнения.

5 Нажмите  или  для уменьшения или увеличения яркости дисплея. Нажмите  для выбора.  
Значение настройки варьируется от 1 до 8.

## Включение и выключение функции гудка и фар

Радиостанция может уведомлять пользователя о входящем вызове с помощью функции гудка и освещения. Когда функция активирована, при поступлении входящего вызова включаются гудок и фары транспортного средства. Эта функция может быть установлена дилером при помощи заднего разъема для аксессуаров на радиостанции. Для включения или выключения функции гудка и фар выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную **кнопку звукового сигнала/фар**. Пропустите описанные ниже действия.
  - Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.
- 
- 4 Нажмите  или  для выбора элемента Гудок/фары. Нажмите  для выбора.
- 
- 5 Нажмите , чтобы активировать или деактивировать функцию гудка и фар. На дисплее появится один из следующих вариантов.
- Если функция активирована, рядом со статусом Активировано отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.
- 

## Включение и выключение функции светодиодного индикатора

Для включения или выключения функции светодиодного индикатора выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
- 
- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.
- 
- 4 Нажмите  или  для выбора элемента LED. Нажмите  для выбора.
-

- 5 Нажмите  , чтобы активировать или деактивировать светодиодный индикатор. На дисплее появится один из следующих вариантов.
- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.
- 

## Включение и выключение системы оповещения

Для включения и выключения внутренней системы оповещения выполните следующие действия.

- 1 Выполните одно из следующих действий.
- Нажмите запрограммированную кнопку **системы оповещения**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.
- 

[Отправить отзыв](#)

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
- 

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.
- 

- 4 Нажмите  или  для выбора элемента Громкоговоритель. Нажмите  для выбора.
- 

- 5 Нажмите  , чтобы включить или отключить систему оповещения.
- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.
-

## Включение и выключение внешней системы оповещения

Для включения и выключения внешней системы оповещения выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **внешней системы оповещения**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента Внешняя система оповещения. Нажмите  для выбора.

- 5 Нажмите , чтобы включить или отключить внешнюю систему оповещения.
  - Если функция активирована, рядом со статусом **Активировано** отобразится значок .
  - Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение экрана приветствия

Экран приветствия можно активировать и деактивировать, выполнив следующие действия.

- 1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента

Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента

Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

Дисплей. Нажмите  для выбора.

5 Нажмите  или  для выбора элемента

Экран привет. Нажмите  для выбора.

6 Нажмите  , чтобы активировать или деактивировать экран приветствия.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .

- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Настройка языка

Для настройки языка на радиостанции выполните следующие действия.

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента

Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента

Параметры р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

Языки. Нажмите  для выбора.

- 5 Нажмите  или  для выбора нужного языка. Нажмите  для выбора.
- На дисплее рядом с выбранным языком появится значок .

- 4 Нажмите  или  для выбора элемента Тип кабеля. Нажмите  для выбора.

- 5 Текущий тип кабеля отмечен значком .

## Определение типа кабеля

Для выбора типа кабеля, используемого радиостанцией, выполните следующие действия.

- 1 Нажмите  для доступа к меню.
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.
- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

## Передача с голосовым управлением

Передача с голосовым управлением (VOX) позволяет инициировать вызовы на запрограммированном канале при помощи голосового управления (в режиме hands-free). При поступлении голосового сигнала на микрофон аксессуара с поддержкой VOX радиостанция автоматически выполняет передачу в течение запрограммированного периода времени.

### УВЕДОМЛЕНИЕ:

Эта функция недоступна на каналах диапазона частот гражданской связи, которые находятся на такой же частоте.

Функцию VOX можно включить или выключить, выполнив одну из следующих последовательностей действий:

- Выключите и снова включите питание радиостанции для включения функции VOX.
- Смените канал с помощью **кнопок прокрутки вверх/вниз** для включения функции VOX.
- Смените канал с помощью **ручки выбора каналов/регулировки громкости** для включения функции VOX.
- Для включения и выключения функции VOX можно использовать запрограммированную кнопку **VOX** или соответствующее меню.
- Нажмите кнопку **PTT** во время работы радиостанции для выключения функции VOX.

#### УВЕДОМЛЕНИЕ:

Включение и выключение этой функции возможно только на радиостанциях, в которых она активирована. Для получения дополнительной информации обратитесь к дилеру или системному администратору.

## Включение и выключение передачи с голосовым управлением

Для включения или выключения функции VOX выполните следующие действия.

[Отправить отзыв](#)

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **VOX**. Пропустите описанные ниже действия.
  - Нажмите  **OK** для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  **OK** для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  **OK** для выбора.

- 4 Нажмите  или  для выбора элемента **VOX**. Нажмите  **OK** для выбора.

- 5 Нажмите  **OK**, чтобы включить или выключить функцию **VOX**.

**УВЕДОМЛЕНИЕ:**

Если активирован тональный сигнал разрешения разговора, используйте ключевое слово для инициации вызова. Дождитесь окончания тонального сигнала разрешения разговора и четко говорите в микрофон. Более подробную информацию см. в разделе [Включение и выключение тонального сигнала разрешения разговора на стр. 236](#).

## Включение и выключение голосового объявления

Эта функция позволяет радиостанции объявлять текущую зону или канал, только что выбранный пользователем, а также нажатие программируемой кнопки.

Такие объявления, как правило, полезны в случаях, когда просмотр сведений, отображаемых на дисплее, затруднен.

Параметры звуковых сигналов можно настраивать в соответствии с требованиями пользователя. Для включения или выключения голосовых объявлений выполните следующие действия.

## Включение и выключение функциональной платы

Возможности функциональной платы для каждого канала можно назначать программируемым кнопкам. Канал может поддерживать до 6 функций функциональной платы. Для включения или выключения функциональной платы выполните следующие действия.

Нажмите запрограммированную кнопку **функциональной платы**.

---

## Синтез речи

Функция синтеза речи может быть активирована только дилером или системным администратором. Если активирована функция синтеза речи, то функция голосового объявления автоматически деактивируется. Если активирована функция голосового объявления, то функция синтеза речи автоматически деактивируется.

Эта функция позволяет радиостанции объявлять следующие параметры.

- Текущий канал

- Текущая зона
- Включение и выключение программируемой кнопки
- Содержание полученных текстовых сообщений
- Содержание полученного задания

Пользователь может настраивать параметры звуковых сигналов. Эта функция, как правило, полезна в случаях, когда условия работы затрудняют просмотр сведений, отображаемых на дисплее.

## Настройка функции синтеза речи

Для настройки синтеза речи выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

[Отправить отзыв](#)

- 4 Нажмите  или  для выбора элемента Голос. объяв. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора одной из опций. Нажмите  для выбора.

Доступны следующие опции:

- Все
- Сообщения
- Задания
- Канал
- Зона
- Кноп прогр.

Рядом с выбранной настройкой появится значок .

---

## Включение и выключение автоматической переадресации вызовов

На радиостанции можно активировать автоматическую переадресацию голосовых вызовов на другую радиостанцию.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Переадр. выз. Нажмите  для выбора.

---

- 5 Выполните одно из следующих действий.

- Нажмите  или , чтобы активировать переадресацию вызовов. Если функция активирована, рядом со статусом Активировано отобразится значок .
- Нажмите  или , чтобы деактивировать переадресацию вызовов. Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.

## Установка таймера меню

Вы можете задать период времени, по истечении которого вместо меню автоматически откроется главный экран. Для настройки таймера меню выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента Дисплей. Нажмите  для выбора.

---

5 Нажмите  или  для выбора элемента Таймер меню. Нажмите  для выбора.

---

6 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора.

---

## Включение и выключение АРУ аналогового микрофона

Автоматическая регулировка усиления (АРУ) аналогового микрофона позволяет автоматически управлять усилением микрофона радиостанции во время передачи в аналоговой системе.

Данная функция подавляет громкий и усиливает тихий аудиосигнал до предустановленного значения, чтобы обеспечить постоянный уровень громкости звука. Для включения или выключения АРУ аналогового микрофона выполните следующие действия.

1 Нажмите  для доступа к меню.

---

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

4 Нажмите  или  для выбора элемента АРУ мик. -А. Нажмите  для выбора.

---

5 Нажмите  для выключения или включения АРУ аналогового микрофона.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение АРУ цифрового микрофона

Автоматическая регулировка усиления (АРУ) цифрового микрофона позволяет автоматически управлять усилением микрофона радиостанции во время передачи в цифровой системе.

Данная функция подавляет громкий и усиливает тихий аудиосигнал до предустановленного значения, чтобы обеспечить постоянный уровень громкости звука. Для включения или выключения АРУ цифрового микрофона выполните следующие действия.

- 1 Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента АРУ мик. -Ц. Нажмите  для выбора.

- 5 Нажмите  для выключения или включения АРУ цифрового микрофона.

На дисплее появится один из следующих вариантов.

- Если функция активирована, рядом со статусом **Активировано** отобразится значок .
- Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Включение и выключение функции интеллектуального аудио

Радиостанция автоматически регулирует громкость звука с учетом фоновых шумов как от стационарных, так и от подвижных источников. Эта функция действует только в режиме приема и не влияет на передаваемый звук. Для включения или выключения функции интеллектуального аудио выполните следующие действия.

### УВЕДОМЛЕНИЕ:

Данная функция не действует во время работы в режиме Bluetooth.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **интеллектуального аудио**. Пропустите описанные ниже действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

- 3 Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

- 4 Нажмите  или  для выбора элемента **Инт. аудио**. Нажмите  для выбора.

- 5 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Вкл.**.
- Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Выкл.**.

## Включение и выключение функции подавления акустической обратной связи

Эта функция позволяет снизить подавление акустической обратной связи при приеме вызовов. Для включения или выключения функции подавления акустической обратной связи радиостанции выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора..

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Подав. ЗЧ. Нажмите  для выбора.

---

- 5 Выполните одно из следующих действий.
  - Нажмите , чтобы активировать подавление акустической обратной связи. Если функция активирована, рядом со статусом Активировано отобразится значок .
  - Нажмите , чтобы деактивировать подавление акустической обратной связи. Если функция деактивирована, значок  рядом со статусом Активировано исчезнет.

## Включение и выключение функции улучшения звучания речи

Данную функцию можно включить при разговоре на языке, в котором содержится много альвеолярных вибрирующих звуков (например, раскатистая "р"). Для включения или выключения функции улучшения звучания речи выполните следующие действия.

- 1 Выполните одно из следующих действий.

- Нажмите запрограммированную кнопку **улучшения звучания речи**. Пропустите описанные ниже действия.
- Нажмите  для доступа к меню.

**2** Нажмите  или  для выбора элемента **Утилиты**. Нажмите  для выбора.

**3** Нажмите  или  для выбора элемента **Параметры р/с**. Нажмите  для выбора.

**4** Нажмите  или  для выбора элемента **Улучш зв реч**. Нажмите  для выбора.

**5** Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента **Вкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Вкл.**

- Нажмите  или  для выбора элемента **Выкл.**. Нажмите  для выбора. На дисплее появится значок  рядом с элементом **Выкл.**

## Уровень шума

Пользователь может настраивать уровень шума радиостанции в соответствии с окружающими условиями.

### Default

Эта настройка используется по умолчанию.

### Громко

Данная настройка активирует функцию шумоподавления и увеличивает громкость динамика для работы в шумной окружающей обстановке.

### Рабочая группа

Данная настройка активирует функцию подавления акустической обратной связи и деактивирует автоматическую регулировку усиления (АРУ) при работе группы радиостанций, расположенных близко друг к другу.

## Настройка уровня шума

Для настройки уровня шума в соответствии с окружающими условиями выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Уровень шума. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора.  
Доступны следующие настройки.

- Выберите По умолч. для восстановления заводских настроек по умолчанию.
- Выберите Громк для увеличения громкости динамика для работы в шумной окружающей обстановке.
- Выберите Раб. группа для подавления акустической обратной связи при работе группы радиостанций, расположенных близко друг к другу.

Рядом с выбранной настройкой появится значок .

## Аудиопрофили

Пользователь может настраивать аудиопрофили радиостанции по своему предпочтению.

### Default

Эта настройка используется по умолчанию.

### Уровень 1, Уровень 2, Уровень 3

Эти аудиопрофили предназначены для компенсации вызванного шумом ухудшения слуха, характерного для людей от 40 лет и старше.

## Усиление высоких частот, Усиление средних частот, Усиление басов

Эти аудиопрофили предназначены для настройки более высокого, носового или низкого звучания.

## Настройка аудиопрофилей

Для настройки аудиопрофилей выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Аудиопрофили. Нажмите  для выбора.

---

- 5 Нажмите  или  для выбора нужной настройки. Нажмите  для выбора. Доступны следующие настройки.

- Выберите По умолч. для деактивации ранее выбранного аудиопрофиля и восстановления заводских настроек по умолчанию.
- Выберите Уровень 1, Уровень 2 или Уровень 3, каждый из которых представляет собой аудиопрофиль, предназначенный для компенсации вызванного шумом ухудшения слуха, характерного для людей от 40 лет и старше.
- Выберите Ус выс част, Ус ср част или Усил бас, представляющие собой аудиопрофили для настройки более высокого, носового или низкого звучания в соответствии с вашими предпочтениями.

Рядом с выбранной настройкой появится значок .

## Включение и выключение глобальной навигационной спутниковой системы

Глобальная навигационная спутниковая система (GNSS) представляет собой спутниковую систему навигации, определяющую точное местоположение радиостанции. GNSS включает систему глобального позиционирования (GPS) и глобальную навигационную спутниковую систему (GLONASS).

### УВЕДОМЛЕНИЕ:

Некоторые модели радиостанций могут быть оснащены GPS и GLONASS. Созвездие GNSS настраивается через CPS. Чтобы узнать запрограммированные настройки радиостанции, обратитесь к дилеру или системному администратору.

- 1 Для включения или выключения функции GNSS выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **GNSS**.
  - Нажмите  **OK** для доступа к меню. Перейдите к следующему действию.

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  **OK** для выбора.

- 3 Нажмите  или  для выбора элемента Параметры р/с. Нажмите  **OK** для выбора.

- 4 Нажмите  или , чтобы выбрать элемент GNSS. Нажмите  **OK** для выбора.

- 5 Нажмите  **OK**, чтобы активировать или деактивировать функцию GNSS.  
 Если функция активирована, рядом со статусом **Активировано** отобразится значок .  
 Если функция деактивирована, значок  рядом со статусом **Активировано** исчезнет.

## Адаптивный список приема

Функция адаптивного списка приема позволяет создавать и назначать участников в списке разговорной

группы приема. Радиостанция поддерживает не более 16 участников в списке. Эта функция поддерживается в системе Carapacity Plus.

## Включение и выключение функции адаптивного списка приема

Для включения или выключения функции адаптивного списка приема выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **адаптивного списка приема**. Пропустите следующие действия.
  - Нажмите  для доступа к меню.

- 2 Нажмите  или  для выбора элемента Гибк. спис. пр. Нажмите  для выбора.

- 3 Выполните одно из следующих действий.

- Нажмите  или  для выбора элемента Вкл. Нажмите  для выбора. Прозвучит тональный сигнал успешного действия.  
На дисплее появится мини-уведомление об успешном выполнении действия.
- Нажмите  или  для выбора элемента Выкл. Нажмите  для выбора. Прозвучит тональный сигнал неуспешного действия.  
На дисплее появится мини-уведомление о неуспешном выполнении действия.

## Общая информация о радиостанции

Радиостанция содержит сведения о различных общих параметрах.

Общая информация о радиостанции включает следующие сведения.

- Псевдоним и идентификатор радиостанции.

- Версии микропрограммы и кода прошивки.
- Обновление ПО.
- Сведения о GNSS.
- Информация об объекте.

#### УВЕДОМЛЕНИЕ:

Нажмите , чтобы вернуться на предыдущий экран. Нажмите и удерживайте , чтобы вернуться на главный экран. По истечении таймера бездействия текущий экран закрывается.

## Просмотр псевдонима и идентификатора радиостанции

Для просмотра псевдонима и идентификатора радиостанции выполните следующие действия.

- 1 Выполните одно из следующих действий.
  - Нажмите запрограммированную кнопку **псевдонима и идентификатора радиостанции**. Пропустите следующие действия.

Прозвучит тональный сигнал успешного действия.

Чтобы вернуться к предыдущему экрану, можно нажать запрограммированную кнопку **псевдонима и идентификатора радиостанции**.

- Нажмите  для доступа к меню.

- 
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

- 
- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

- 
- 4 Нажмите  или  для выбора элемента Мой IP. Нажмите  для выбора.

В первой строке на дисплее появится псевдоним радиостанции. Во второй строке появится идентификатор радиостанции.

## Просмотр версии микропрограммы и версии кодплага

Для просмотра версии микропрограммы и версии кодплага радиостанции выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

---

- 4 Нажмите  или  для выбора элемента Версии. Нажмите  для выбора.  
На дисплее отобразятся текущие версии микропрограммы и кодплага.

## Просмотр информации об обновлении программного обеспечения

Эта функция позволяет вывести на дисплей дату и время последнего обновления ПО, выполненного с помощью беспроводного программирования (OTAP) или по Wi-Fi. Для просмотра информации об обновлении программного обеспечения выполните следующие действия.

- 1 Нажмите  для доступа к меню.

---

- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---

- 3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента

Обновл. ПО. Нажмите  для выбора.

На дисплее отобразятся дата и время последнего обновления программного обеспечения.

Меню обновления ПО станет доступным только после проведения как минимум одного успешного сеанса O-TAR или подключения к Wi-Fi. Более подробную информацию см. в разделе [Беспроводное программирование на стр. 559](#).

## Проверка информации GNSS

Эта функция позволяет вывести на дисплей данные GNSS, такие как:

- Широта
- Долгота
- Высота
- Направление
- Скорость

- Фактор снижения точности при определении положения (HDOP)
- Спутники
- Версия

1 Нажмите  для доступа к меню.

2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

3 Нажмите  или  для выбора элемента Инф. о р/с. Нажмите  для выбора.

4 Нажмите  или  для выбора элемента Инф. о GNSS. Нажмите  для выбора.

5 Нажмите  или  для выбора нужного элемента. Нажмите  для выбора. На дисплее отобразятся запрошенные данные GNSS.

## Отображение информации о сайте

Выполните следующие действия, чтобы отобразить имя текущего сайта, в пределах которого работает ваша радиостанция.

- 1 Нажмите  для доступа к меню.

---
- 2 Нажмите  или  для выбора элемента Утилиты. Нажмите  для выбора.

---
- 3 Нажмите  или  для выбора элемента Инф. о р.с. Нажмите  для выбора.

---
- 4 Нажмите  или  для выбора элемента Инф. с. Нажмите  для выбора.

---

На дисплее появится название текущего сайта.

Данная страница намеренно оставлена пустой.

## Ограниченная гарантия

### КОММУНИКАЦИОННЫЕ ИЗДЕЛИЯ MOTOROLA SOLUTIONS

#### I. РАСПРОСТРАНЕНИЕ И ПЕРИОД ДЕЙСТВИЯ ГАРАНТИИ.

Компания Motorola Solutions Inc. ("Motorola Solutions") гарантирует отсутствие в перечисленных ниже коммуникационных изделиях, изготовленных компанией Motorola Solutions ("Изделие"), дефектов материалов и производственного брака при нормальной эксплуатации и обслуживании в течение указанного ниже периода времени со дня покупки.

Цифровые Мобильные радиостанции серии DM	24 месяцев
Аксессуары изделия	12 месяцев

Компания Motorola Solutions по собственному выбору отремонтирует изделие (с помощью новых или восстановленных частей), заменит его (новым или

восстановленным изделием) или вернет стоимость покупки изделия в течение гарантийного периода, предоставленного для возврата в соответствии с условиями данного гарантийного соглашения. Замененные части или платы имеют гарантийный период, подобранный с учетом применимого исходного гарантийного периода. Все замененные части Изделия являются собственностью компании Motorola Solutions.

Эта ограниченная гарантия распространяется компанией Motorola Solutions только на первоначальных конечных пользователей. Она не предоставляется и не передается какой-либо другой стороне. Это полная гарантия на Изделие, изготовленное компанией Motorola Solutions. Компания Motorola Solutions не несет никаких обязательств или ответственности за дополнения или изменения данной гарантии, если они не представлены в письменном виде и не подписаны официальным представителем компании Motorola Solutions.

Компания Motorola Solutions не предоставляет гарантию на установку, техническое обслуживание и ремонт Изделия, если между компанией Motorola Solutions и первоначальным конечным пользователем не заключено отдельное соглашение.

Компания Motorola Solutions не может нести никакой ответственности за какое-либо дополнительное оборудование, не предоставленное компанией Motorola Solutions, подключенное к Изделию или используемое в соединении с Изделием, а также за работу Изделия с каким-либо дополнительным оборудованием; любое такое оборудование явным образом исключается из данной гарантии. В связи с тем, что каждая система, использующая Изделие, уникальна, по условиям данной гарантии компания Motorola Solutions не несет ответственности за диапазон дальности, покрытие и функционирование системы в целом.

## II. ОБЩИЕ ПОЛОЖЕНИЯ

Данная гарантия в полной мере выражает ответственность компании Motorola Solutions относительно Изделия. Ремонт, замена или возмещение стоимости покупки по выбору компании Motorola Solutions являются исключительными средствами. ДАННАЯ ГАРАНТИЯ ПРЕДОСТАВЛЯЕТСЯ С ЦЕЛЬЮ ЗАМЕНЫ ВСЕХ ДРУГИХ ЯВНЫХ ГАРАНТИЙ. ПОДРАЗУМЕВАЕМЫЕ ГАРАНТИИ, ВКЛЮЧАЯ, БЕЗ ОГРАНИЧЕНИЙ, ПОДРАЗУМЕВАЕМЫЕ ГАРАНТИИ КОММЕРЧЕСКОЙ ВЫГОДЫ И ПРИГОДНОСТИ ДЛЯ КОНКРЕТНЫХ ЦЕЛЕЙ, ОГРАНИЧЕНЫ СРОКОМ

ДАННОЙ ГАРАНТИИ. НИ ПРИ КАКИХ ОБСТОЯТЕЛЬСТВАХ КОМПАНИЯ MOTOROLA SOLUTIONS НЕ НЕСЕТ ОТВЕТСТВЕННОСТИ ЗА УБЫТКИ, ПРЕВЫШАЮЩИЕ СТОИМОСТЬ ПОКУПКИ ИЗДЕЛИЯ, УЩЕРБ, СВЯЗАННЫЙ С ПОТЕРЕЙ ВОЗМОЖНОСТИ ИСПОЛЬЗОВАНИЯ, ВРЕМЕНИ, НЕУДОБСТВОМ, КОММЕРЧЕСКИЕ УБЫТКИ, ПОТЕРЮ ПРИБЫЛИ ИЛИ СБЕРЕЖЕНИЙ, А ТАКЖЕ ЗА ДРУГИЕ СПЕЦИАЛЬНЫЕ, СЛУЧАЙНЫЕ ИЛИ КОСВЕННЫЕ УБЫТКИ, КАКИМ-ЛИБО ОБРАЗОМ ОТНОсяЩИЕСЯ К ИЗДЕЛИЮ ЛИБО СЛЕДУЮЩИЕ ИЗ ПОКУПКИ ИЛИ ИСПОЛЬЗОВАНИЯ ИЗДЕЛИЯ В ПОЛНОМ СООТВЕТСТВИИ С ПРИМЕНИМЫМ ЗАКОНОМ.

## III. ПРАВА СОГЛАСНО ГОСУДАРСТВЕННЫМ ЗАКОНОДАТЕЛЬНЫМ НОРМАМ.

В НЕКОТОРЫХ ГОСУДАРСТВАХ ЗАПРЕЩАЕТСЯ ИСКЛЮЧЕНИЕ ИЛИ ОГРАНИЧЕНИЕ СЛУЧАЙНЫХ ИЛИ КОСВЕННЫХ УБЫТКОВ ИЛИ ОГРАНИЧЕНИЕ ПРОДОЛЖИТЕЛЬНОСТИ ПОДРАЗУМЕВАЕМОЙ ГАРАНТИИ, ПОЭТОМУ ПЕРЕЧИСЛЕННЫЕ ВЫШЕ ОГРАНИЧЕНИЯ ИЛИ ИСКЛЮЧЕНИЯ МОГУТ НЕ ПРИМЕНЯТЬСЯ.

Данная гарантия предоставляет определенные юридические права и другие права, которые могут различаться в разных государствах.

## IV. ГАРАНТИЙНОЕ ОБСЛУЖИВАНИЕ

Для получения гарантийного обслуживания необходимо предоставить доказательства покупки (с указанием даты покупки и серийного номера изделия) и доставить или отправить изделие (с предоплатой транспортировки и страховки) в сертифицированный центр гарантийного обслуживания. Гарантийное обслуживание предоставляется компанией Motorola Solutions в одном из сертифицированных центров гарантийного обслуживания. Если вы сначала обратитесь в организацию, которая продала вам Изделие (т.е. к дилеру или провайдеру услуг связи), он сможет помочь организовать гарантийное обслуживание. Вы можете также позвонить в компанию Motorola Solutions по телефону 1-800-927-2744 (для США и Канады).

## V. НЕРАСПРОСТРАНЕНИЕ ГАРАНТИИ

- 1 Дефекты или повреждения, возникшие в результате использования Изделия ненадлежащим или нестандартным образом.
- 2 Дефекты или повреждения, возникшие в результате неправильного использования, аварии, воздействия воды или неосторожности.
- 3 Дефекты или повреждения, возникшие при неправильной проверке, работе, обслуживании, установке, изменении, регулировке или настройке.
- 4 Поломка или повреждение антенн, за исключением повреждений, связанных непосредственно с дефектами материалов.
- 5 Изделие, подвергшееся несертифицированным изменениям, несанкционированной разборке или ремонту (включая, без ограничений, добавление в Изделие компонентов оборудования, поставленных не компанией Motorola Solutions), которые неблагоприятно влияют на производительность Изделия или мешают выполнению стандартной гарантийной проверки компании Motorola Solutions и

тестированию Изделия для подтверждения претензии по гарантии.

**6** Изделия с удаленным или неразборчивым серийным номером.

**7** Аккумуляторы, если:

- любая из пломб на защитном корпусе аккумуляторов разрушена или существуют доказательства фальсификации этих пломб;
- повреждение или дефект вызваны зарядкой или использованием аккумулятора в оборудовании, отличном от Изделия, для которого он предназначен.

**8** Транспортные расходы по перевозке Изделия в сервисный центр.

**9** Изделие, не работающее в соответствии с опубликованными техническими характеристиками вследствие несанкционированного или несертифицированного изменения программного/ микропрограммного обеспечения в Изделии или согласно положениям на этикетке сертификации Изделия Федеральной комиссией по связи (FCC) во время первоначального распространения Изделия компанией Motorola Solutions.

**10** Царапины или другие косметические повреждения поверхности Изделия, не влияющие на функционирование Изделия.

**11** Обычный и пользовательский износ оборудования.

## VI. ПРЕДОСТАВЛЕНИЕ ПАТЕНТОВ И ПРОГРАММНОГО ОБЕСПЕЧЕНИЯ

Компания Motorola Solutions за свой счет предоставит защиту в ходе любого судебного иска против конечного пользователя, в случае претензий о нарушении изделием или компонентами каких-либо патентных прав США. Компания Motorola Solutions будет оплачивать расходы и убытки, отнесенные на счет конечного пользователя, которые могут быть отнесены к таким претензиям, однако такая защита и платежи будут предоставлены при выполнении следующих условий:

**1** компания Motorola Solutions будет заблаговременно уведомлена в письменной форме покупателем о каких-либо претензиях;

- 2 компания Motorola Solutions будет по собственному усмотрению управлять защитой на таких процессах и вести все переговоры по их разрешению; и
- 3 если Изделие или его компоненты становятся или, по мнению компании Motorola Solutions, могут стать предметом нарушения законодательства о патентах США, покупатель предоставит разрешение компании Motorola Solutions по своему выбору и за свой счет либо обеспечить право на продолжение использования Изделия покупателем или на замену или изменение Изделия и его компонентов таким образом, чтобы исключить нарушение, либо предоставить этому покупателю возможность оформления Изделия или компонентов как изношенных и дать согласие на их возврат. Снижение стоимости будет равно ежегодной сумме с учетом срока службы Изделия или компонентов, установленного компанией Motorola Solutions;

Компания Motorola Solutions не несет ответственности по каким-либо претензиям, связанным с нарушением патентов, которые основаны на комбинировании Изделия или компонентов с программным обеспечением, аппаратурой или устройствами, не имеющими отношения к компании Motorola Solutions. Кроме того, компания Motorola Solutions не несет ответственности за использование дополнительного

оборудования или программного обеспечения, не имеющего отношения к компании Motorola Solutions, которое подключено или используется совместно с Изделием. Вышеупомянутые положения представляют собой все обязательства компании Motorola Solutions по нарушениям патентов на Изделие или любые компоненты.

Законы США и некоторых других стран обеспечивают компании Motorola Solutions некоторые эксклюзивные права в отношении защищенных авторским правом компьютерных программ Motorola Solutions, например эксклюзивные права на создание копий и распространение копий программного обеспечения Motorola Solutions. Программное обеспечение Motorola Solutions может использоваться только в Изделии, для которого оно изначально предназначалось. Запрещается воспроизводить, копировать, распространять или изменять каким-либо способом программное обеспечение либо использовать его для действий, вытекающих из перечисленных. Запрещены любые действия, включая, без ограничений, изменение, модификацию, воспроизведение, распространение или структурный анализ программного обеспечения Motorola Solutions либо осуществление прав в рамках такого ПО Motorola Solutions. Лицензия или права на нее не

предоставляются явно или другим способом в рамках патентных прав Motorola Solutions или авторских прав.

## VII. РЕГУЛИРУЮЩЕЕ ЗАКОНОДАТЕЛЬСТВО

Данная гарантия регулируется законодательством штата Иллинойс, США.

# Önemli Güvenlik Bilgileri

## Çift Yönlü Mobil Telsizler için RF Enerjisine Maruz Kalma ve Ürün Güvenliği Kılavuzu

### DİKKAT!

**Bu telsiz yalnızca İş Amaçlı kullanımla sınırlıdır.** Telsizi kullanmadan önce yürürlükteki standartlar ve yönetmelikler uyarınca güvenli kullanım ile RF enerjisi farkındalığı ve kontrolü açısından önem arz eden kullanım talimatlarını içeren Çift Yönlü Mobil Telsizler için RF Enerjisine Maruz Kalma ve Ürün Güvenliği Kılavuzunu okuyun.

Motorola Solutions tarafından onaylanmış antenler ve diğer aksesuarların listesini aşağıdaki web sitesinde bulabilirsiniz:

<http://www.motorolasolutions.com>

Bu sayfa özellikle boş bırakılmıştır.

## Yazılım Sürümü

Aşağıdaki bölümlerde açıklanan tüm özellikler, **R02.08.05.0000** veya daha sonraki yazılım sürümleri tarafından desteklenmektedir.

Telsizinizin yazılım sürümünü belirlemek için bkz. [Ürün Yazılımı ve Codeplug Sürümlerini Kontrol Etme sayfa 229](#).

Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Bu sayfa özellikle boş bırakılmıştır.

## Telif Hakları

Bu belgede açıklanan Motorola Solutions ürünleri, telif hakkıyla korunan Motorola Solutions bilgisayar programları içerebilir. Amerika Birleşik Devletleri ve diğer ülkelerdeki yasalar, telif hakkıyla korunan bilgisayar programları için Motorola Solutions'ın belirli münhasır haklarını koruma altına alır. Buna göre, bu belgede açıklanan Motorola Solutions ürünlerinde yer alan ve telif haklarıyla korunan hiçbir Motorola Solutions bilgisayar programı, Motorola Solutions'ın açık yazılı izni alınmadan hiçbir şekilde kopyalanamaz veya çoğaltılamaz.

© 2017 Motorola Solutions, Inc. Tüm Hakları Saklıdır

Bu belgenin hiçbir bölümü; Motorola Solutions Inc. şirketinin önceden yazılı izni alınmadan hiçbir biçimde ve hiçbir yolla yeniden üretilemez, iletilemez, bir erişim sisteminde saklanamaz veya herhangi bir dile ya da program diline çevrilemez.

Dahası, Motorola Solutions ürünlerinin satın alınması, bir ürünün satışında kanunların uygulanması gereği ortaya çıkan, münhasır olmayan normal kullanım lisansı dışında, Motorola Solutions'ın telif hakları, patentleri veya patent başvuruları uyarınca doğrudan ya da zımni, önceden yapılan beyanın değiştirilmesinin yasaklanması veya başka

bir şekilde herhangi bir ücretsiz lisans hakkı veriyormuş gibi kabul edilemez.

## Sorumluluk Reddi Beyanı

Bu belgede açıklanan belirli özellik, olanak ve kabiliyetlerin geçerli olmayabileceğini, belirli bir sistemde kullanım için lisanslı olmayabileceğini ya da belirli parametre yapılandırması veya belirli mobil abonelik birimlerine bağlı olabileceğini unutmayın. Daha fazla bilgi için lütfen Motorola Solutions irtibat kişinize danışın.

## Ticari Markalar

MOTOROLA, MOTO, MOTOROLA SOLUTIONS ve Stil Verilmiş M Logosu, Motorola Trademark Holdings, LLC'nin ticari markaları veya tescilli ticari markalarıdır ve lisans kapsamında kullanılmaktadır. Diğer tüm ticari markalar ilgili sahiplerinin malıdır.

## Avrupa Birliği (AB) Atık Elektrikli ve Elektronik Ekipman (WEEE) direktifi

■ Avrupa Birliği'nin WEEE direktifi uyarınca, AB ülkelerinde satılan ürünlerin üstünde (veya bazı durumlarda paketin üstünde) üzeri çizili çöp kutusu etiketi bulunmalıdır.

WEEE direktiflerinde tanımlandığı şekliyle bu üzeri çizili çöp kutusu etiketi, AB ülkelerindeki müşteri ve son kullanıcıların bu elektronik ve elektrikli ekipmanı veya aksesuarları evsel atık olarak atmaması gerektiği anlamına gelir.

AB ülkelerindeki müşteri veya son kullanıcılar, ülkelerindeki atık toplama sistemi hakkında bilgi almak için yerel ekipman tedarikçisi temsilcileriyle veya servis merkeziyle iletişime geçmelidir.

## Bilgisayar Yazılımı Telif Hakları

Bu kılavuzda anlatılan Motorola Solutions ürünleri, yarı iletken belleklerde ya da diğer ortamlarda saklanan, telif hakkı alınmış Motorola Solutions bilgisayar programlarını içerebilir. Amerika Birleşik Devletleri ve diğer ülkelerdeki kanunlar, Motorola Solutions'a telif haklarıyla korunan bilgisayar programını kopyalamak veya herhangi bir formatta çoğaltmak konusundaki münhasır haklar dahil ancak bunlarla sınırlı olmamak kaydıyla telif haklarıyla korunan bilgisayar programları üzerinde belli münhasır haklar sağlamaktadır. Buna göre, bu kullanıcı kılavuzunda açıklanan Motorola Solutions ürünlerinde yer alan ve telif haklarıyla korunan hiçbir Motorola Solutions bilgisayar programı, Motorola Solutions'ın açık yazılı izni alınmadan hiçbir şekilde kopyalanamaz, çoğaltılamaz, değiştirilemez, tersine mühendisliğe konu olamaz veya dağıtılamaz. Ayrıca, Motorola Solutions ürünlerinin satın alınması, bu ürünün satışında uygulanan yasa gereği ortaya çıkan münhasır olmayan normal kullanım lisansı hariç olmak üzere, Motorola Solutions telif hakları, patentleri ve patent uygulamaları uyarınca hiçbir lisansın, doğrudan ya da zımnen, hukuki engel ya da başka herhangi bir yolla, bu ürünleri satın alan kişiye geçmesini sağlamamaktadır.

Patent hakları, telif hakları ve Digital Voice Systems, Inc.'nin ticari sırları dahil olmak üzere, bu ürünün bünyesinde barındırdığı AMBE+2™ ses kodlama teknolojisinin tüm hakları fikri mülkiyet hakları uyarınca korunmaktadır.

Bu ses kodlama teknolojisi, sadece bu belgeye konu İletişim Ekipmanı kapsamında kullanılmak üzere lisanslandırılmıştır. Bu teknolojinin kullanıcılarının, Nesne Kodunu kaynak koduna dönüştürmeye, tersine mühendisliğe konu etmeye ya da bileşenlerine ayırmaya veya herhangi bir şekilde Nesne Kodunu insanın okuyabileceği bir forma dönüştürmeye teşebbüs etmeleri açıkça yasaklanmıştır.

ABD Patent Numaraları: #5,870,405, #5,826,222, #5,754,974, #5,701,390, #5,715,365, #5,649,050, #5,630,011, #5,581,656, #5,517,511, #5,491,772, #5,247,579, #5,226,084 ve #5,195,166.

Bu sayfa özellikle boş bırakılmıştır.

## Kullanım Önlemleri

MOTOTRBO Serisi Dijital Portatif telsiz IP67 teknik şartlarını karşılamaktadır. Dolayısıyla telsiziniz suya batırılma gibi olumsuz saha koşullarına karşı dayanıklıdır. Bu bölümde bazı temel kullanım önlemleri açıklanmaktadır.

### DİKKAT:

Telsizinizi parçalarına ayırmayın. Aksi takdirde, telsizin sızdırmazlığı zarar görebilir ve telsizin içine doğru su sızıntısı yolları açılabilir. Telsizin bakım işleri yalnızca telsizin sızdırmazlığının test edilip değiştirilebileceği donanıma sahip servis deposunda yapılmalıdır.

- Telsiziniz suya batırıldığında hoparlör ızgarasından ve mikrofon yuvasından içeri giren suyu çıkarmak için telsizi iyice sallayın. Telsizin içinde kalan su performansını düşürebilir.
- Telsizinizin pil temas bölgesi ıslanırsa pili telsize takmadan önce hem pilin hem de telsizinizin pil temas noktalarını temizleyip kurulaşın. Bu bölgelerin ıslak kalması telsize kısa devre yaptırabilir.
- Telsiziniz aşındırıcı sıvıların (ör. tuzlu su) içine batırılırsa telsizi ve pili temiz suyla durulayıp kurulaşın.
- Telsizinizin dış yüzeylerini temizlemek için temiz suda seyreltilmiş az miktarda yumuşak bir bulaşık deterjanı (ör. yaklaşık dört litre suya bir çay kaşığı deterjan) kullanın.
- Telsiz gövdesi üzerinde, pil temas noktasının altında yer alan havalandırmaya (deliğe) kesinlikle bir şey sokmayın. Bu havalandırma, telsizin basınç dengesini sağlar. Bu deliğe bir şey sokulması durumunda telsizin içine doğru bir sızdırma yolu açılabilir; bu da telsizinizin su geçirmezlik özelliğinin kaybolmasına neden olabilir.
- Etiketle bile olsa havalandırma deliğini kesinlikle kapatmayın ya da engellemeyin.
- Yağlı maddelerin delikle temas etmesine kesinlikle izin vermeyin.
- Anteni doğru bir şekilde takılmış telsiziniz maksimum 1 metre (3,28 ft) derinliğe kadar, en fazla 30 dakika boyunca suda kalabilecek şekilde tasarlanmıştır. Maksimum sınırların aşılması ya da telsizinizin antensiz olması, telsizinizin zarar görmesine neden olabilir.
- Telsizinizi temizlerken üzerinde yüksek basınçlı jet sprej kullanmayın. Bu sprejler, 1 metre derinlikteki su basıncından çok daha fazla basınca sahiptir ve telsizinizin içine su girmesine neden olabilir.

Bu sayfa özellikle boş bırakılmıştır.

## Temel İşlemler

Bu bölümde, telsizi kullanmaya başlamak için yapmanız gereken işlemler açıklanmaktadır.

### Telsizi Açma

Telsizinizi açmak için bu prosedürü uygulayın.

**Açma/Kapatma** düğmesine basın.

İşlem başarılı olursa:

- Bir ton duyulur.
- Yeşil LED yanar.
- Ekranda, MOTOTRBO (TM) bilgisi, ardından bir karşılama mesajı veya resmi görüntülenir.
- Giriş ekranı yanar.

Tonlar/Uyarılar işlevi devre dışıysa açılma sırasında ton duyulmaz.

Telsiziniz açılmazsa pilinizi kontrol edin. Pilin şarj edilmiş olduğundan ve doğru takıldığından emin olun. Telsiziniz yine açılmazsa satıcınızla iletişime geçin.

### Telsizi Kapatma

Telsizinizi kapatmak için bu prosedürü uygulayın.

**Açma/Kapatma** düğmesini basılı tutun.

Telsizin tamamen kapanması yedi saniye kadar sürebilir.

Ekranda **Kapatılıyor** bilgisi görüntülenir.

### Sesi Ayarlama

Telsizinizin ses seviyesini değiştirmek için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- Sesi yükseltmek için **Açma/Kapatma/Ses Kontrol Topuzu**'nu saat yönünde döndürün.
- Sesi kısmak için **Açma/Kapatma/Ses Kontrol Topuzu**'nu saatin aksi yönünde döndürün.

**NOT:**

Telsiniziz, en düşük ses ofsetinde çalışacak şekilde programlanabilir; böylece ses seviyesi programlanan en düşük sesin altına düşürülemez. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

---

## Telsiz Kontrolleri

Bu bölümde, telsizi kontrol etmek için kullanılan düğmeler ve işlevler açıklanmaktadır.

- 1 Açma/Kapatma/Bilgi Düğmesi
- 2 Ses/Kanal Topuzu
- 3 Ekran
- 4 Menü/OK Düğmesi
- 5 Aşağı/Yukarı Kaydırma Düğmeleri
- 6 Hoparlör

- 7 Geri Dön/Ana Ekran Düğmesi
- 8 Programlanabilir Ön Panel Düğmeleri
- 9 Aksesuar Konektörü
- 10 LED Göstergeleri

## Ses/Kanal Düğmesi

**Ses/Kanal Düğmesi**, hem kanal hem ses kontrolü amaçlı ya da sadece ses kontrolü amaçlı olarak programlanabilir.

Sesi ayarlamak için bkz. [Sesi Ayarlama sayfa 39](#).

Kanalları değiştirmek için kanal seçim durumu görüntülenene kadar **Ses/Kanal Düğmesini** basılı tutun. Kanalı seçmek için **Ses/Kanal Düğmesini** çevirin. Kanal seçim durumundan çıkmak için aşağıdakilerden birini yapın:

- **Ses/Kanal Düğmesine** basın.
- 
- 
- Menü zamanlayıcısının bitmesini bekleyin.

## İkili Topuz İşlemi Tercihini Ayarlama

Telsizin ikili topuz işlemi tercihini ayarlamak için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak İkili Topuz seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranada Sadece Ses ve Ses ve Kanal yazısı görüntülenir.

---

5 Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Seçili ayarların yanında ✓ simgesi görünür. Ekran önceki menüye döner.

---

## Tuş Takımlı Mikrofon Düğmeleri

4 Yönlü Gezinme Tuş Takımlı Mikrofon üzerindeki 3 x 4 alfasayısal tuş takımını (Motorola Solutions parça numarası RMN5127\_) kullanarak telsizinizin özelliklerini değiştirebilirsiniz. Birçok karakteri yazabilmek için tuşlara birden çok kez basmanız gerekir. Tabloda, istenen karakteri girebilmek için tuşlara kaç kez basılması gerektiği gösterilmektedir.

Tuş	Tuşa Basma Sayısı												
	1	2	3	4	5	6	7	8	9	10	11	12	13

**NOT:**

Metin giriş işlemi sırasında bir boşluk girmek için basın. Sayısal giriş işlemi esnasında bir "#" işareti girmek için basın.

Bu sayfa özellikle boş bırakılmıştır.

## WAVE

Geniş Alan Ses Ortamı (WAVE™) iki telsiz arasında çağrı yapmak için yeni bir yöntem sunar.

Bu özellik, telsizler ile WAVE özellikli diğer cihazlar arasında çağrı yapmayı da destekler. Ancak bu özelliği kullanmak için bir WAVE kanalının ayarlanmış olması gerekir.

Telsiz WAVE kanalındayken diğer sistemlerden çağrı alamaz ve yalnızca WAVE çağrılarını alabilir.

Telsiz WAVE kanalındaysa otomatik olarak Wi-Fi özelliğini etkinleştirir ve WAVE sunucusuna giriş yapma işlemine geçer. WAVE çağrıları, telsiz Wi-Fi üzerinden bir IP ağına bağlıyken yapılır.

### NOT:

Bu özellik yalnızca DM4601e için geçerlidir.

### Tablo 1: WAVE Ekran Simgeleri

WAVE etkinken ekranda kısa süreliğine aşağıdaki simgeler görünür.

	<b>WAVE Bağlı</b> WAVE bağlıdır.
	<b>WAVE Bağlı Değil</b> WAVE bağlantısı kesilmiştir.

## Etkin WAVE Kanalını Ayarlama

WAVE kanalları CPS üzerinden yapılandırılır. Gerekli WAVE kanalını seçmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için düğmesine basın.
- 2 veya düğmesine basarak WAVE Kanalları seçeneğine gidin. Seçmek için düğmesine basın.
- 3 veya düğmesine basarak ilgili WAVE kanalına gidin. Seçmek için düğmesine basın.

- 4  veya  düğmesine basarak Etkin Olrk Ayarları seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda, seçilen kanalın yanında ✓ simgesi görüntülenir.

## WAVE Kanalı Bilgilerini Görüntüleme

WAVE kanalı bilgilerini görüntülemek için bu prosedürü izleyin.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **WAVE Kanal Listesi** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak WAVE Kanalları seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak ilgili WAVE kanalına gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Ayrıntıları Gör seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda WAVE kanalı ayrıntıları görüntülenir.

## WAVE Uç Noktası Bilgilerini Görüntüleme

WAVE uç noktası bilgilerini görüntülemek için bu prosedürü izleyin.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Kişİ** düğmesine basın. Şu adıma atlayın: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Uç Noktalar seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak ilgili WAVE Uç Noktasına gidin. Seçmek için  düğmesine basın.

4  düğmesine basarak Ayrıntıları Gör seçeneğine gidin.

Ekranda WAVE Uç Noktası ayrıntıları görüntülenir.

## WAVE Yapılandırmasını Değiştirme

WAVE sunucusu IP adresini, kullanıcı kimliğini ve şifreyi belirlemek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak WAVE seçeneğine gidin. Seçmek için  düğmesine basın.

5  düğmesine basarak Sunucu Adresi seçeneğine gidin.  düğmesine basarak sunucu adresini değiştirin. Seçmek için  düğmesine basın.

6  düğmesine basarak Kullanıcı Kimliği seçeneğine gidin.  düğmesine basarak kullanıcı

kimliğini değiştirin. Seçmek için  düğmesine basın.

7  düğmesine basarak Şifre seçeneğine gidin.

 düğmesine basarak WAVE şifresini

görüntüleyin veya değiştirin. Seçmek için  düğmesine basın.

8  düğmesine basarak Uygula seçeneğine gidin.

 düğmesine basarak yapılan tüm değişiklikleri uygulayın.

Telsiz Ayarları ekranına dönmeden önce kısa bir süreliğine ekranda olumlu bir mini bilgi notu görüntülenir.

## Grup Çağrıları Yapma

WAVE Kanalında grup çağrıları yapmak için bu prosedürü uygulayın.

1 İstenen grup adına ya da kimliğine sahip WAVE kanalını seçin.

2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. İlk metin satırında **Grup Çağrısı** simgesi ve adı gösterilir. İkinci metin satırında WAVE grup adı görüntülenir.

3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun

4 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde yeşil LED yanar.Ekranda **Grup Çağrısı** simgesi ve ad veya kimlik ile yayın yapan telsizin adı veya kimliği görüntülenir.

5 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliđi olmazsa çağrı sona erer. Telsiz, çağrı başlatılmadan önce bulunduđunuz ekrana döner.

---

Bu sayfa özellikle boş bırakılmıştır.

## Capacity Max İşlemleri

Capacity Max, kontrol kanalı temelli birleştirilmiş bir telsiz sistemidir. Bu sistemde telsiz kullanıcılarına açık olan özellikler bu bölümde yer alır.

### Bas Konuş (PTT) Düğmesi

**PTT** düğmesi iki temel amaca hizmet eder.

- **PTT** düğmesi, çağrı yapılırken telsizin çağrıdaki diğer telsizlere yayın göndermesini sağlar. **PTT** düğmesine basıldığında mikrofon etkin hale gelir.
- **PTT** düğmesi, çağrı yapılmadığında yeni bir çağrı yapmak için kullanılır .

Konuşmak için **PTT** düğmesini basılı tutun. Dinlemek için **PTT** düğmesini bırakın.

Konuşma İzni Tonu veya **PTT** Yan Tonu etkinse konuşmadan önce kısa uyarı tonunun bitmesini bekleyin.

Telsizin üzerinde Kanal Boş Göstergesi özelliği (satıcınız tarafından programlanır) etkinse hedef telsiz (çağrınızı alan telsiz) **PTT** düğmesini bıraktığı anda kısa bir uyarı tonu duyarsınız. Bu ton kanalın yanıt vermeniz için boş olduğunu gösterir.

Örneğin, telsiz bir Acil Durum çağrısı aldığında çağrınız kesilirse sürekli bir Konuşma Yasağı Tonu duyarsınız. **PTT** düğmesini bırakmanız gerekir.

## Programlanabilir Düğmeler

Bir düğmeye basılma süresine bağlı olarak, satıcınız programlanabilir düğmeleri telsiz işlevlerinin kısayolları olarak programlayabilir.

### Kısa basma

Basma ve hızlıca bırakma.

### Uzun basma

Basma ve programlanan süre kadar basılı tutma.

### NOT:

**Acil durum** düğmesinin programlanmış süresi hakkında daha fazla bilgi için bkz. [Acil Durum İşlemi sayfa 435](#).

## Atanabilir Telsiz İşlevleri

Aşağıdaki telsiz işlevleri, satıcınız ya da sistem yöneticiniz tarafından programlanabilir düğmelere atanabilir.

### Ses Ortamı

Kullanıcının telsizin çalışacağı ortamı seçmesine izin verir.

### Ses Profilleri

Kullanıcının tercih edilen ses profilini seçmesine izin verir.

### Bluetooth® Ses Anahtarı

Ses yönlendirmesini dahili telsiz hoparlörü ya da harici Bluetooth özellikli bir aksesuar olacak şekilde değiştirir.

### Bluetooth Bağlantısı

Bluetooth bulma ve bağlantı kurma işlemini başlatır.

### Bluetooth Bağlantısını Kesme

Telsiziniz ve Bluetooth özellikli cihazınız arasındaki mevcut tüm Bluetooth bağlantılarını keser.

### Bluetooth Bulunabilir

Telsizinizin Bluetooth Bulunabilir Moduna geçmesine olanak sağlar.

### Kişiler

Kişi listesine doğrudan erişim sağlar.

### Çağrı Uyarısı

Çağrı Uyarısının gönderilebileceği kişileri seçmeniz için doğrudan kişi listesine ulaşmanızı sağlar.

### Çağrı Kaydı

Çağrı kaydı listesini seçer.

### Acil Durum

Programlamaya bağlı olarak, acil durum başlatır veya iptal eder.

### Harici Genel Yayın (PA)

Bağlı PA hoparlör amplifikatörü ile telsizin dahili PA sistemi arasındaki ses yönlendirmesini değiştirir.

### Ana Kanal Sıfırlama

Yeni bir ana kanal ayarlar.

### Ana Kanal Hatırlatıcıyı Sessize Alma

Ana Kanal Hatırlatıcıyı sessize al.

### İç Konum

İç Konum özelliğini açar veya kapatır.

### Akıllı Ses

Akıllı sesi açar veya kapatır.

### Elle Çevirme

Bir abone kimliği tuşlayarak Özel Çağrı başlatır.

### Manuel Saha Dolaşımı

Manuel saha araması başlatır.

### Mik AGC

Dahili mikrofonun otomatik kazanç kontrolünü (AGC) açar ya da kapatır.

### Bildirimler

Bildirimler listesine doğrudan erişim sağlar.

**Tek Tuşla Erişim**

Doğrudan önceden tanımlanmış bir Yayın, Özel Çağrı, Telefon veya Grup Çağrısı, Çağrı Uyarısı ya da Hızlı Metin mesajı başlatır.

**Opsiyon Kartı Özelliği**

Opsiyon kartının etkin olduğu kanallar için opsiyon kartı özelliklerini açar ya da kapatır.

**Telefon**

Telefondaki Kişi listesine doğrudan erişim sağlar.

**Gizlilik**

Gizlilik özelliğini açar veya kapatır.

**Genel Yayın (PA)**

Telsizin dahili PA sistemini kapatır veya açar.

**Telsiz Diğer Adı ve Kimliği**

Telsiz adı ve kimliğini gösterir.

**Uzaktan İzleme**

Bir hedef telsizin mikrofonunu bu telsize hiçbir gösterge vermeden açar.

**Saha Bilgileri**

Geçerli Capacity Max sahası adını ve kimliğini görüntüler.

Sesli Anons etkinleştirildiğinde geçerli saha için saha anonsu sesli mesajlarını çalar.

**Saha Kilidi**

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahayla birlikte diğer sahaları da arar.

**Telemetri Kontrolü**

Yerel ya da uzak telsiz üzerinde Çıkış Pinini kontrol eder.

**Metin Mesajı**

Yazılı mesaj menüsünü seçer.

**Titrek Ses İyileştirme**

Titrek ses iyileştirmeyi açar veya kapatır.

**Sesli Anons Açık/Kapalı**

Sesli Anonsu açar veya kapatır.

**Kanal için Sesli Anons**

Geçerli kanal için bölge ve kanal anonsu sesli mesajlarını çalar. Bu işlev, Sesli Anons devre dışı bırakıldığında kullanılamaz.

**Wi-Fi**

Wi-Fi özelliğini açar veya kapatır.

**Bölge Seçimi**

Bölge listesinden seçim yapılmasını sağlar.

## Atanabilir Ayarlar ya da Uygulama İşlevleri

Aşağıdaki telsiz ayarları veya uygulama işlevleri programlanabilir düğmelere atanabilir.

### Tonlar/Uyarılar

Tüm tonları ve uyarıları açar veya kapatır.

### Arka Aydınlatma

Ekran arka aydınlatmasını açar veya kapatır.

### Kanal Yukarı/Aşağı

Programlamaya bağlı olarak, kanalı önceki ya da sonraki kanala değiştirir.

### Ekran Kipi

Gündüz/gece ekran kipini açar ya da kapatır.

### Güç Seviyesi

Güç seviyesini yüksek ile düşük ayarları arasında değiştirir.

## Programlanmış İşlevlere Erişim

Telsizinizde programlanmış işlevlere erişmek için buradaki prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış düğmeye basın. Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  düğmesine basın.

2

Menü işlevi için  veya  düğmesine ve bir işlevi seçmek veya bir alt menüye girmek için  düğmesine basın.

3 Aşağıdakilerden birini yapın:

- Önceki ekrana dönmek için  düğmesine basın.
- Giriş ekranına dönmek için  düğmesine uzun basın.

Telsiziniz, belirli bir süre işlem yapılmadığında otomatik olarak menüden çıkar ve Giriş ekranına döner.

Tuş takımlı mikrofon sisteminde de Menü Gezinme Düğmeleri mevcuttur. Bkz. [Tuş Takımlı Mikrofon Düğmeleri sayfa 43](#)

## Durum Göstergeleri

Bu bölümde, telsizde kullanılan durum göstergeleri ve ses tonları açıklanmaktadır.

## Simgeler

Telsizinizin Likit Kristal Ekranı (LCD) telsizin durumunu, metin girişlerini ve menü girişlerini gösterir.

### Tablo 2: Ekran Simgeleri

Aşağıda telsiz ekranının üst tarafındaki durum çubuğunda görülen simgeler yer almaktadır. Simgeler, görünüm veya kullanım sırasıyla en soldan başlayarak ayarlanmıştır ve kanala özeldir.

	<b>Bluetooth Bağlı</b>	Bluetooth özelliği etkindir. Uzak bir Bluetooth cihazı bağlı olduğunda bu simge yanmaya devam eder.
--	------------------------	---

Tablonun devamı...

	<b>Bluetooth Cihazı Bağlı Değil</b>	Bluetooth özelliği etkindir; ancak uzaktan bağlı herhangi bir Bluetooth cihazı yoktur.
	<b>Acil Durum</b>	Telsiz, Acil Durum kipindedir.
	<b>GNSS Kullanılabilir</b>	GNSS özelliği etkindir. Bu simge, sabit bir pozisyona geçildiği durumlarda yanmaya devam eder.
	<b>GNSS Kullanılmıyor</b>	GNSS özelliği etkindir ancak uydudan veri almamaktadır.
	<b>Yüksek Hacimli Veri</b>	Telsiz yüksek hacimli veri almaktadır ve kanal meşguldür.
	<b>İç Konum Kullanılabilir<sup>1</sup></b>	İç konum durumu açıktır ve kullanılabilir.

Tablonun devamı...

<sup>1</sup> Yalnızca en güncel yazılım ve donanıma sahip modeller için geçerlidir.

	<p><b>İç Konum Kullanılamaz<sup>1</sup></b> İç konum durumu açıktır fakat Bluetooth devre dışı bırakıldığı veya İşaretleme Tarama işlevi Bluetooth tarafından askıya alındığı için kullanılamaz.</p>
	<p><b>Sessize Alma Modu</b> Sessiz Kipi etkinleştirilir ve hoparlörün sesi kapatılır.</p>
	<p><b>Bildirim</b> Bildirim Listesinde bir veya daha fazla cevapsız olay vardır.</p>
	<p><b>Opsiyon Kartı</b> Opsiyon Kartı etkindir. (Sadece Opsiyon kartı özelliği etkin modellerde)</p>
	<p><b>Opsiyon Kartı Devre Dışı</b> Opsiyon Kartı devre dışıdır.</p>

Tablonun devamı...

	<p><b>Kablosuz Programlama Gecikme Zamanlayıcı</b> Telsizin otomatik olarak yeniden başlatılmasına kalan süreyi belirtir.</p>
	<p><b>1. Öncelik</b> 1. Öncelikli Konuşma Grubunu gösterir.</p>
	<p><b>2. Öncelik</b> 2. Öncelikli Konuşma Grubunu gösterir.</p>
	<p><b>Alınan Sinyal Gücü Göstergesi (RSSI)</b> Ekranda görünen çubuk sayısı, telsiz sinyalinin gücünü gösterir. Dört çubuk en güçlü sinyal seviyesini gösterir. Bu simge sadece sinyal alınırken görüntülenir.</p>
	<p><b>Yanıt Engelleme</b> Yanıt Engelleme etkindir.</p>
	<p><b>Sadece Zil</b> Zil sesi kipi etkindir.</p>

Tablonun devamı...

	<b>Güvenli</b> Gizlilik özelliği etkindir.
	<b>Sessiz Zil</b> Sessiz zil kipi etkindir.
	<b>Saha Gezinme</b> Saha gezinme özelliği etkindir.
	<b>Durum</b> Yeni bir durum mesajı bulunduğunu belirtir.
	<b>Tonlar Devre Dışı</b> Tonlar kapalıdır.
	<b>Güvenli değil</b> Gizlilik özelliği devre dışıdır.
	<b>Wi-Fi Mükemmel<sup>2</sup></b> Wi-Fi sinyali mükemmel.

Tablonun devamı...

	<b>Wi-Fi İyi<sup>2</sup></b> Wi-Fi sinyali iyi.
	<b>Wi-Fi Orta<sup>2</sup></b> Wi-Fi sinyali orta.
	<b>Wi-Fi Zayıf<sup>2</sup></b> Wi-Fi sinyali zayıf.
	<b>Wi-Fi Kullanılmıyor<sup>2</sup></b> Wi-Fi sinyali kullanılmıyor.

**Tablo 3: Geliştirilmiş Menü Simgeleri**

Aşağıdaki simgeler, iki seçenek arasında tercih sunan menü öğelerinin yanında ya da iki seçenekli tercih sunan bir alt menü olduğunun işareti olarak görüntülenir.

	<b>Onay kutusu (İşaretli)</b> Seçeneğin belirlendiğini gösterir.
	<b>Onay kutusu (Boş)</b> Seçeneğin belirlenmediğini gösterir.

Tablonun devamı...

<sup>2</sup> Yalnızca DM4601e için geçerlidir.

	<p><b>Koyu Siyah Kutu</b> Alt menü aracılığıyla menü için seçeneğin belirlendiğini gösterir.</p>
---	--

**Tablo 4: Bluetooth Cihaz Simgeleri**

Aşağıdaki simgeler cihaz türünü göstermek için Bluetooth özelliği etkin kullanılabilir cihazlar listesinde öğelerin yanında görünür.

	<p><b>Bluetooth Ses Cihazı</b> Kulaklık gibi Bluetooth özellikli ses cihazları.</p>
	<p><b>Bluetooth Veri Cihazı</b> Tarayıcı gibi Bluetooth özellikli veri cihazları.</p>
	<p><b>Bluetooth Bas-Konuş Cihazı</b> Yalnızca Bas-Konuş Cihazı (POD) gibi Bluetooth özellikli PTT cihazları.</p>

**Tablo 5: Çağrı Simgeleri**

Bir çağrı sırasında ekranda aşağıdaki simgeler görüntülenir. Bu simgeler aynı zamanda, ad ya da kimlik tipini belirtecek şekilde Kişi listesinde de görünür.

	<p><b>Bluetooth PC Çağrısı</b> Bir Bluetooth PC Çağrısının sürmekte olduğunu gösterir.  Kişiler listesinde bir Bluetooth PC Çağrısı adını (metin) veya kimliğini (numara) gösterir.</p>
	<p><b>Sevk Çağrısı</b> Sevk Çağrısı iletişim tipi, üçüncü taraf bir Yazılı Mesaj Sunucusu aracılığıyla sevk işlemini yapan bilgisayara yazılı mesaj göndermek için kullanılır.</p>
	<p><b>Grup Çağrısı/Herkese Çağrı</b> Bir Grup Çağrısı ya da Herkese Çağrının sürmekte olduğunu gösterir.  Kişi listesinde bir grup adını (metin) veya kimliğini (numara) gösterir.</p>
	<p><b>Özel Çağrı</b> Bir Özel Çağrının sürmekte olduğunu gösterir.  Kişi listesinde bir abonenin adını (metin) ya da kimliğini (numara) gösterir.</p>

Tablonun devamı...

	<p><b>Grup Çağrısı/Herkese Çağrı olarak Telefon Çağrısı</b> Bir Grup Çağrısı veya Herkese Çağrı olarak Telefon Çağrısının sürmekte olduğunu gösterir.</p> <p>Kişi listesinde bir grup adını (metin) veya kimliğini (numara) gösterir.</p>
	<p><b>Özel Çağrı olarak Telefon Çağrısı</b> Özel Çağrı olarak bir Telefon Çağrısının sürmekte olduğunu gösterir.</p> <p>Kişi listesinde bir telefon adı (metin) veya kimliğini (numara) gösterir.</p>

**Tablo 6: İş Kartları Simgeleri**

İş Kartı klasöründe ekranda kısa süreliğine aşağıdaki simgeler görünür.

	<p><b>Tüm İşler</b> Listelenen tüm işleri gösterir.</p>
--	---

Tablonun devamı...

	<p><b>Yeni İşler</b> Yeni işleri gösterir.</p>
	<p><b>Sürüyor</b> İşler iletiliyordur. Bu simge, İş Kartları Gönderme Başarısız veya Başarıyla Gönderildi göstergesinden önce görünür.</p>
	<p><b>Gönderme Başarısız</b> İşler gönderilememektedir.</p>
	<p><b>Başarıyla Gönderildi</b> İşler başarıyla gönderilmiştir.</p>
	<p><b>1. Öncelik</b> İşlerin Öncelik Seviyesinin 1 olduğunu gösterir.</p>
	<p><b>2. Öncelik</b> İşlerin Öncelik Seviyesinin 2 olduğunu gösterir.</p>
	<p><b>3. Öncelik</b> İşlerin Öncelik Seviyesinin 3 olduğunu gösterir.</p>

**Tablo 7: Mini Bilgi Notu Simgeleri**

Aşağıdaki simgeler, bir görevi gerçekleştirmek için yapılan işlemden sonra ekranda kısa bir an için görünür.

	<b>Başarısız Yayın (Olumsuz)</b> İşlem gerçekleştirilememiştir.
	<b>Başarılı Yayın (Olumlu)</b> İşlem başarıyla gerçekleştirilmiştir.
	<b>Yayın Sürüyor (Geçici)</b> Yayın gönderilmektedir. Bu simge, Başarılı Yayın veya Başarısız Yayın göstergesinden önce görünür.

**Tablo 8: Gönderilenler Simgeleri**

Aşağıdaki simgeler ekranın sağ üst köşesinde Gönderilenler klasöründe görüntülenir.

 ya da 	<b>Sürüyor</b> Abone adına ya da kimliğine gidecek yazılı mesaj iletilmeyi beklemektedir; gönderildikten sonra da alındı iletisi beklenmektedir.
---	---

Tablonun devamı...

	Grup diğer adına ya da kimliğine gidecek yazılı mesaj iletilmeyi beklemektedir.
 ya  da	<b>Kişisel veya Grup Mesajı Okundu</b> Yazılı mesaj okunmuştur.
 ya  da	<b>Kişisel veya Grup Mesajı Okunmadı</b> Yazılı mesaj okunmamıştır.
 ya da 	<b>Gönderme Başarısız</b> Yazılı Mesaj gönderilememiştir.
 ya da 	<b>Başarıyla Gönderildi</b> Yazılı mesaj başarılı bir şekilde gönderilmiştir.

## LED Göstergesi

LED göstergesi, telsizinizin çalışma durumunu gösterir.

### Yanıp Sönen Kırmızı

Telsiz açıldığında otomatik testi geçememiştir.

Telsiz, bir acil durum yayını almaktadır.

Telsiz düşük pil durumunda yayın yapıyordur.

Otomatik Menzil Transponder Sistemi yapılandırıldıysa telsiz menzil dışına çıkmıştır.

Sessiz Kipi etkindir.

### Aralıksız Yeşil

Telsiz açılıyordur.

Telsiz yayın yapıyordur.

Telsiz bir Çağrı Uyarısı veya acil durum yayını göndermektedir.

### Yanıp Sönen Yeşil

Telsiz, bir çağrı veya veri alıyordur.

Telsiz, kablosuz olarak Kablosuz Programlama yayınlarını almaktadır.

Telsiz, kablosuz etkinlik tespit etmektedir.

### NOT:

Bu etkinlik, dijital protokolün doğası nedeniyle telsizin programlanmış kanalını etkileyebilir veya etkilemeyebilir.

### İki Kez Yanıp Sönen Yeşil

Telsiz, gizliliği etkinleştirilmiş bir çağrı veya veri alıyordur.

### Aralıksız Sarı

Telsiz, Bluetooth Bulunabilir Modundadır.

### Yanıp Sönen Sarı

Telsiz, bir Çağrı Uyarısına yanıt verecektir.

### İki Kez Yanıp Sönen Sarı

Telsizde Otomatik Gezinme etkindir.

Telsiz etkin olarak yeni saha aramaktadır.

Telsiz, bir Grup Çağrısı Uyarısına yanıt verecektir.

Telsiz kilitlemiştir.

## Tonlar

Aşağıda, telsiz hoparlörü aracılığıyla duyulan tonlar belirtilmektedir.

Yüksek Perdeli Ton

Düşük Perdeli Ton

### Ses Tonları

Ses tonları, telsizin durumu ya da telsizin alınan veriye yanıtı ile ilgili sesli göstergeler sağlar.

#### Sürekli Ton

Monoton bir sestir. Durdurulana kadar sürekli ses verir.

#### Sürelili Ton

Telsizde yapılan süre ayarına bağlı olarak süreli ses verir. Ton kendi kendine başlar, durur ve tekrar eder.

#### Tekrarlanan Ton

Kullanıcı tarafından durdurulana kadar kendi kendine tekrar eden tek bir tondur.

#### Anlık Ton

Telsiz tarafından ayarlanan kısa süre için bir kez ses verir.

### Gösterge Tonları

Gösterge tonları, bir görevi gerçekleştirmek üzere bir işlem yapıldıktan sonra, durumun sesli bildirimini sağlar.

Olumlu Gösterge Tonu

Olumsuz Gösterge Tonu

### Kayıt

Alabileceğiniz, kayıtlarla ilgili çok sayıda mesaj vardır.

### Kaydoluyor

Kayıt genellikle, cihazın açılması, Konuşma Grubu değişikliği veya saha gezinme işlemi sırasında sisteme gönderilir. Telsizin, bir sahada kayıt işlemi başarısız olursa telsiz otomatik olarak başka bir sahada gezinmeyi dener. Telsiz, kayıt işleminin denendiği sahayı gezinme listesinden geçici olarak kaldırır.

Gösterge, telsizin gezinme için saha araması nedeniyle meşgul olduğu veya telsizin başarılı bir şekilde bir saha bulunduğu fakat telsizden kayıt mesajlarına yanıt beklediği anlamına gelir.

Telsizde Kaydoluyor bilgisi görüntülediğinde bir ton duyulur ve sarı LED iki kez yanıp söner ve saha araması yapıldığını belirtir.

Göstergeler devam ederse kullanıcının konum değiştirmesi veya izin veriliyorsa elle başka bir sahada gezinmesi gerekir.

## Aralık Dışında

Telsiz sistemden veya geçerli sahadan sinyal algılayamadığında telsizin aralık dışında olduğu düşünülür. Bu gösterge genellikle telsizin coğrafi giden telsiz frekansı (RF) kapsama alanı aralığı dışında olduğu anlamına gelir.

Telsizde Aralık Dışında bilgisi görüntülediğinde tekrarlayan bir ton duyulur ve kırmızı LED yanıp söner.

Telsiz, iyi RF kapsama alanına sahip bir alanda olmasına rağmen aralık dışında göstergeleri alıyorsa satıcınızla veya sistem yöneticinizle iletişime geçin.

## Konuşma Grubu Bağlantısı Başarısız

Bir telsiz kayıt sırasında kanallarda veya Birleştirilmiş Düşme Konumunda (UKP) belirtilen Konuşma Grubu ile bağlantı kurmaya çalışır.

Bağlantısı başarısız durumda olan bir telsiz, telsizin bağlantı kurmaya çalıştığı Konuşma Grubu içinden arama yapamaz veya arama alamaz.

Bir radyo Konuşma Grubu ile bağlantı kuramadığında giriş ekranında UKP Adı bilgisi görüntülenir ve arka planı vurgulanır.

Telsizde bağlantı arızası belirtileri varsa satıcınızla veya sistem yöneticinizle iletişime geçin.

## Kayıt Engellendi

Kayıt reddedildi göstergeleri, sistem kaydı kabul edilmediğinde alınır.

Telsiz, kullanıcıya kaydın reddedilmesiyle ilgili net bir sebep vermez. Normal koşullarda kayıt, sistem operatörü telsizin sisteme erişimini devre dışı bıraktığında reddedilir.

Bir telsizin kaydı reddedildiğinde, telsizde Kayıt Reddedildi bilgisi görüntülenir ve sarı LED iki kez yanıp söner ve saha araması yapıldığını belirtir.

## Bölge ve Kanal Seçimleri

Bu bölümde, telsizinizdeki bir bölgeyi veya kanalı seçmek için yapılacak işlemler açıklanmaktadır.

Telsiz, bölge başına maksimum 160 Kanal olmak üzere maksimum 250 Capacity Max Bölgesiyle programlanabilir. Her Capacity Max bölgesinde atanabilir maksimum 16 konum bulunur.

## Bölgeleri Seçme

Telsizinizde gerekli bölgeyi seçmek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Bölge Seçimi** düğmesine basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Bölge seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranında, ✓ simgesi ve geçerli bölge görüntülenir.

- 3 Gerekli bölge için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Ekranında kısa süreliğine <Bölge> Seçildi yazısı görüntülenir ve seçili bölge ekranına döndülür.

## Ad Aramasını Kullanarak Bölgeleri Seçme

Telsizinizde ad aramasını kullanarak gerekli bölgeyi seçmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Bölge seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranında, ✓ simgesi ve geçerli bölge görüntülenir.

- 3 Gerekli adın ilk karakterini girin.  
Ekranında yanıp sönen bir imleç görüntülenir.

- 4 Gereken adın kalan karakterlerini girin.  
Diğer ad araması büyük-küçük harf duyarlı değildir. Aynı ada sahip iki ya da daha fazla giriş varsa ekranda listenin ilk sırasında olan giriş görüntülenir.  
İlk metin satırında, girdiğiniz karakterler görüntülenir. Sonraki metin satırlarında, kısa liste halinde arama sonuçları görüntülenir.

- 5 Seçmek için  düğmesine basın.  
Ekranında kısa süreliğine <Bölge> Seçildi yazısı görüntülenir ve seçilen bölge ekranına dönlür.

## Çağrı Tipi Seçme

Kanal Seçim Düğmesini kullanın. Telsizinizin nasıl programlandığına bağlı olarak bu bir Grup Çağrısı, Yayın Çağrısı, Herkese Çağrı veya Özel Çağrı olabilir. Kanal Seçim Düğmesini (kendisine bir çağrı tipi atanmış olan) farklı bir konuma getirirseniz bu, telsizin Capacity Max

Sistemine yeniden kaydolmasına neden olur. Telsiz, yeni Kanal Seçim Düğmesi konumu çağrı tipi için programlanmış olan Konuşma Grubu Kimliği ile kaydolur.

Programlanmamış bir kanal seçtiğinde telsiziniz çalışmaz, onun yerine programlanmış bir kanal seçmek için Kanal Seçim Düğmesini kullanın.

İstenen bölge ayarlandığında (telsizinizde birden çok bölge varsa), programlanmış Kanal Seçim Düğmesini döndürerek çağrı tipini seçebilirsiniz.

## Saha Seçme

Bir saha belirli bir bölge için kapsama alanı sağlar. Çok sahalı bir ağda, geçerli sahanın sinyal seviyesi kabul edilemez bir seviyeye düşerse Capacity Max telsizi otomatik olarak yeni saha arar.

Capacity Max sistemi en fazla 250 sahayı destekleyebilir.

## Dolaşım İsteği

Gezinme İsteği, mevcut sahanın sinyali uygun olsa bile telsizin farklı bir saha aramasını ister.

Mevcut saha yoksa:

- Telsiz ekranında Arıyor bilgisi görüntülenir. Telsiz saha listesinde arama yapmaya devam eder.
- Önceki saha halen kullanılabiliriyorsa telsiz bu sahaya döner.

### NOT:

Bu özellik, satıcınız tarafından programlanır.

Programlanmış **Manuel Saha Gezinme** düğmesine basın.

Telsizin yeni sahaya geçtiğini belirten bir ton duyulur. Ekranda, Saha Kimliği <Saha Numarası> bilgisi görüntülenir.

## Saha Kilidi Açık/Kapalı

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahaya birlikte diğer sahaları da arar.

Programlanmış **Saha Kilidi** düğmesine basın.

**Saha Kilidi** işlevi açıksa:

- Telsizin geçerli sahaya kilitlendiğini belirten bir olumlu gösterge tonu duyulur.

- Ekranda, Site Locked (Saha Kilitlendi) bilgisi görüntülenir.

**Saha Kilidi** işlevi kapalıysa:

- Telsizin kilidinin açıldığını belirten bir olumsuz gösterge tonu duyulur.
- Ekranda, Site Unlocked (Saha Kilidi Açıldı) bilgisi görüntülenir.

## Saha Kısıtlama

Capacity Max sisteminde, telsiz yöneticinizin hangi ağ sahalarını kullanma izni olup hangilerini kullanamayacağına karar verme yetkisi vardır.

İzin verilen ve verilmeyen sahalar listesini değiştirmek için telsizin yeniden programlanmasına gerek yoktur. Telsiz, izin verilmeyen bir sahaya kaydolmaya çalışırsa sahaya izin verilmediğine dair bir uyarı alır. Telsiz daha sonra farklı bir ağ sahası arar.

Saha kısıtlamaları yaşandığında, telsizinizde Kayıt Reddedildi bilgisi görüntülenir ve sarı LED iki kez yanıp sönerek saha araması yapıldığını belirtir.

## Saha Birleştirme

Bir sahanın Sistem Birleştirme olarak görülmesi için Birleştirme Kontrol Cihazıyla iletişim kurabiliyor olması gerekir.

Saha, sistemdeki Birleştirme Kontrol Cihazıyla iletişim kuramazsa telsiz Saha Birleştirme kipine girer. Telsiz, Saha Birleştirme kipinde kullanıcıyı sınırlı işlevler hakkında bilgilendirmek amacıyla düzenli aralıklarla sesli ve görsel uyarı gönderir.

Bir telsiz, Saha Birleştirme kipindeyken Saha Birleştirme bilgisini görüntüler ve tekrarlayan bir ton duyulur.

Saha Birleştirme kipindeki telsizler, grup çağrısı ve ayrı sesli çağrılar yapabilir ve aynı saha içindeki telsizlere metin mesajları gönderebilir. Ses konsolları, kayıt cihazları, telefon ağ geçitleri ve veri uygulamaları sahadaki telsizlerle iletişim kuramaz.

Birden çok sahada çağrıları olan bir telsiz Saha Birleştirme kipine girdiğinde yalnızca aynı saha içindeki telsizlerle iletişim kurabilir. Diğer sahalardan gelen ve diğer sahalara giden iletişim kaybolur.

### NOT:

Telsizin mevcut konumunu kapsayan birden çok saha varsa ve sahalardan biri Saha Birleştirmeye girerse telsizler kapsama alanı içinde olması durumunda başka bir sahada gezinme işlemine başlar.

## Çağrılar

Bu bölümde çağrı alma, yanıtlama, yapma ve durdurma işlemleri açıklanmaktadır.

Şu özelliklerden birini kullanarak kanal seçtikten sonra bir abone adı/kimliği ya da grup adı/kimliği seçebilirsiniz:

### Ad Araması

Bu yöntem, yalnızca tuş takımlı mikrofonla yapılan Grup, Özel ve Tüm Çağrılar için kullanılır.

### Kişi Listesi

Bu yöntem, Kişi listesine doğrudan erişim sağlar.

### Manuel Çevirme (Kişiler ögesini kullanarak)

Bu yöntem, yalnızca tuş takımlı mikrofon ile yapılan Özel Çağrılar ve Telefon Çağrıları için kullanılır.

### Programlanmış Sayı Tuşları

Bu yöntem, yalnızca tuş takımlı mikrofonla yapılan Grup, Özel ve Tüm Çağrılar için kullanılır.

### NOT:

Bir sayı tuşuna yalnızca bir ad ya da kimlik atayabilirsiniz; ancak ad ya da kimlik atanmış birden fazla sayı tuşunuz olabilir. Bir tuş takımlı mikrofona tüm sayı tuşları atanabilir. Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

### Programlanmış Tek Tuşla Erişim Düğmesi

Bu yöntem, yalnızca Grup, Özel ve Telefon Çağruları için kullanılır.

Bir **Tek Tuşla Erişim** düğmesine, programlanabilir düğmeye kısa veya uzun basılarak atanmış yalnızca bir kimliğiniz olabilir. Telsizinizde birden fazla düğmeyi **Tek Tuşla Erişim** düğmesi olarak programlayabilirsiniz.

### Programlanabilir Düğme

Bu yöntem, yalnızca Telefon Çağruları için kullanılır.

### Ses/Kanal Seçici Düğmesi

Bu yöntem manuel olarak bir abone adı veya kimliği ya da grup adı veya kimliği seçer.

Telsiz yayın gönderirken LED devamlı yeşil yanar, yayın alırken ise yeşil yanıp söner.

### NOT:

Telsiz yayın gönderirken LED sürekli yeşil yanar, gizliliğin etkin olduğu bir çağrı alırken ise iki kez yeşil yanıp söner.

Gizliliğin etkin olduğu bir çağrıyı çözebilmesi için telsizinizde yayını gönderen telsizle (çağrıyı aldığınız telsiz) aynı Gizlilik Anahtarı veya Tuş Değeri ve Tuş Kimliği (bayiniz tarafından programlanır) bulunmalıdır.

Daha fazla bilgi için bkz. [Gizlilik sayfa 474](#).

## Grup Çağruları

Telsizinizin kullanıcı grubundan bir çağrı alması veya kullanıcı grubuna çağrı yapması için grubun bir parçası olarak yapılandırılmış olması gerekir.

## Grup Çağruları Yapma

Bir kullanıcı grubuna çağrı göndermek için telsiziniz bu grubun bir parçası olarak yapılandırılmalıdır. Telsizinizden Grup Çağruları yapmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:

- Etkin grup adına veya kimliğine sahip olan bir kanal seçin. Bkz. [Çağrı Tipi Seçme sayfa 67](#)
- Programlanmış **Tek Tuşla Erişim** düğmesine basın.

## 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. İlk metin satırında **Grup Çağrısı** simgesi ve adı görüntülenir.

## 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
- **PTT Yan** Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

## 4 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğiğinde yeşil LED yanar. Ekranda **Grup Çağrısı** simgesi ve ad veya kimlik ile yayın yapan telsizin adı veya kimliği görüntülenir.

## 5 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda

[Geribildirim Gönder](#)

yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

Çağrıyı başlatan taraf  düğmesine basarak Grup Çağrısını sonlandırabilir.

## Kişi Listesini Kullanarak Grup Çağrılarını Yapma

Telsizinizde Kişi listesini kullanarak Grup Çağrılarını yapmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4 Çağrı yapmak için **PTT** düğmesine basın.  
Yeşil LED yanar.  
İlk satırda abone adı veya kimliği görüntülenir. İkinci satırda Grup Çağrısı bilgisi ve **Grup Çağrısı** simgesi görüntülenir.

5 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
- **PTT Yan** Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

6 Dinlemek için **PTT** düğmesini bırakın.  
Gruptaki herhangi bir kullanıcı yanıt verdiğinde yeşil LED yanıp söner. Ekranda **Grup Çağrısı** simgesi ve

ad veya kimlik ile yayın yapan telsizin adı veya kimliği görüntülenir.

7 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

Çağrıyı başlatan taraf  düğmesine basarak Grup Çağrısını sonlandırabilir.

Kısa bir ton duyulur. Ekranda **Call Ended** (Çğr Son) bilgisi görüntülenir.

## Programlanabilir Sayı Tuşunu Kullanarak Grup Çağrılarını Yapma

Telsizinizde programlanabilir sayı tuşunu kullanarak Grup Çağrılarını yapmak için buradaki prosedürü uygulayın.

1 Giriş ekranındayken önceden tanımlanmış ad veya kimlik için programlanmış sayı tuşuna uzun basın.

Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.

Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.

- 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar.

- 3 Dinlemek için **PTT** düğmesini bırakın.

Gruptaki herhangi bir kullanıcı yanıt verdiğinde yeşil LED yanıp söner.

- 4 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Telsiz, çağrı başlatılmadan önce bulunduğunuz ekrana döner.

Çağrıyı başlatan taraf  düğmesine basarak Grup Çağrısını sonlandırabilir.

Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

## Ad Aramasını Kullanarak Grup Çağrılarını Yapma

Ad araması ya da alfasayısal arama yaparak da istediğiniz abone adlarına ulaşabilirsiniz. Bu özellik, sadece Kişiler menüsündeyken kullanılabilir. Ad aramasını kullanarak dilediğiniz çağrıyı yapmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.

- 3  veya  düğmesine basarak istenen abone adına veya kimliğe gidin. Ekranın ilk satırında **Telefon No:** bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Telefon numarasını girmek için tuş takımını kullanın.

4 Seçmek için  düğmesine basın. Seçilen giriş boşsa olumsuz bir gösterge tonu duyulur ve ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

5  veya  düğmesine basarak Çağrı Telefonu

seçeneğine gidin ve Seçmek için  düğmesine basın. Erişim kodu Kişiler listesinde önceden yapılandırılmamışsa ekranın ilk satırında Erişim Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişim kodunu

girin ve devam etmek için  düğmesine basın. Çağrı başarılı olursa DTMF tonu duyulur. Telefon kullanıcısının çevirme sesi duyulur. Ekranın ilk satırında abone adı veya kimliği ve RSSI simgesi görüntülenir. Ekranın ikinci satırında Tlf Çağr bilgisi ve Telefon Çağrısı simgesi görüntülenir. Çağrı başarısız olursa bir ton duyulur ve ekranda Telf Arama Başarısız bilgisi görüntülenir. Telsiziniz, Erişim Kodu giriş ekranına döner. Erişim kodu Kişiler listesinde önceden yapılandırılmışsa telsiz çağrısı başlatmadan önce bulunduğunuz ekrana döner.

6 Konuşmak için **PTT** düğmesine basın, dinlemek için düğmeyi bırakın. **RSSI** simgesi yayın sırasında kaybolur.

7 Telefon Çağrısı tarafından ekstra rakam istenirse bu rakamları girmek için aşağıdakilerden birini yapın.

- Ekstra rakam girişini başlatmak için tuş takımındaki herhangi bir tuşa basın. Ekranın ilk satırında Ekstra Rakam: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Ekstra basamakları girin ve devam etmek için  düğmesine basın. DTMF tonu duyulur ve telsiz önceki ekrana geri döner.
- **Tek Tuşla Erişim** düğmesine basın. DTMF tonu duyulur. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

8 Çağrıyla sonlandırmak için  düğmesine basın. Erişimi kaldırma kodu Kişiler listesinde yapılandırılmamışsa ekranın ilk satırında Erişimi Kaldır Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişimi

kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner. DTMF

tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir. Bir ton duyulur ve ekranda Tel Görüşmesi Bitti bilgisi görüntülenir. Telsiziniz Telefon Çağrısı ekranına döner. Çağrı başarısız olursa telsiziniz Tlf Çağr ekranına döner. Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir. Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir. Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

- 9 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrıyı başlatan taraf  düğmesine basarak Grup Çağrısını sonlandırabilir.

#### NOT:

Kanal erişimi sırasında çağrı denemesini iptal etmek (bir ton duyulur) veya ad aramasından çıkmak için

 düğmesine basın.  OK veya 

düğmesine basarak ad aramasından çıkın. Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener. Kanal erişimi ve erişim/erişimi kaldırma kodu veya ekstra rakam iletimi sırasında, telsiziniz sadece Açma/Kapatma düğmesi, Ses Düzeyi Topuzu ve Kanal Ayarlayıcı'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Grup Çağrılarını Yanıtlama

Telsizinizden Grup Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Grup Çağrısı aldığınızda:

- Yeşil LED yanıp söner.

- Ekranın sağ üst köşesinde **Grup Çağrısı** simgesi görüntülenir.
- İlk metin satırında çağrı yapanın adı görüntülenir.
- İkinci metin satırında grup çağrısı adı görünür.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

### 1 Aşağıdakilerden birini yapın:

- Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.
- Ses Kesintisi özelliği etkinse yayını gönderen telsizden gelen sesi kesmek ve kanalı yanıtlanmanız için ayırmak amacıyla boşaltmak üzere **PTT** düğmesine basın.

Yeşil LED yanar.

### 2 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

### 3 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

## Yayın Çağrısı

Yayın Çağrısı, herhangi bir kullanıcının konuşma grubunun tamamına yaptığı tek yönlü bir sesli çağrıdır.

Yayın Çağrısı özelliği, yalnızca çağrıyı başlatan kullanıcının konuşma grubuna yayın yapmasına izin verir ve çağrının alıcıları yanıt veremez.

Yayını başlatan taraf da yayın çağrısını sonlandırabilir. Bir kullanıcı grubundan çağrı almak veya bir kullanıcı grubuna çağrı yapmak için telsiz o grubun parçası olarak yapılandırılmalıdır.

## Yayın Çağrılarını Yapma

Telsizinizden Yayın Çağrılarını yapmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Etkin grup adına veya kimliğine sahip olan bir kanal seçin. Bkz. [Çağrı Tipi Seçme sayfa 67](#)
  - Programlanmış **Tek Tuşla Erişim** düğmesine basın.

- 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar.Ekranda **Grup Çağrısı** simgesi ve adı görüntülenir.

- 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
- **PTT Yan Tonunun** bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

Çağrıyı başlatan taraf  düğmesine basarak Yayın Çağrısını sonlandırabilir.

## Kişi Listesini Kullanarak Yayın Çağrılarını Yapma

Telsizinizde Kişi listesini kullanarak Yayın Çağrılarını yapmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Kişiler bölümüne gidin.Seçmek için  düğmesine basın.

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın.Seçmek için  düğmesine basın.

- 4 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanıp söner.

İlk satırda abone adı veya kimliği görüntülenir. İkinci satırda Grup Çağrısı bilgisi ve **Grup Çağrısı** simgesi görüntülenir.

- 5 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

Çağrıyı başlatan taraf  düğmesine basarak Yayın Çağrısını sonlandırabilir.

## Programlanabilir Sayı Tuşunu Kullanarak Yayın Çağrılarını Yapma

Telsizinizde programlanabilir sayı tuşunu kullanarak Yayın Çağrılarını yapmak için bu prosedürü uygulayın.

- 1 Giriş ekranındayken önceden tanımlanmış ad veya kimlik için programlanmış sayı tuşuna uzun basın.  
Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.  
Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.

- 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar.Ekranın sağ üst köşesinde **Grup Çağrısı** simgesi görüntülenir. İlk metin satırında çağrı yapanın adı görüntülenir.

- 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

Çağrıyı başlatan taraf  düğmesine basarak Yayın Çağrısını sonlandırabilir.

## Yayın Çağrılarını Alma

Telsizinizden Yayın Çağrısını almak için bu prosedürü uygulayın.

Yayın Çağrısını aldığınızda:

- Yeşil LED yanıp söner.

- Ekranın sağ üst köşesinde **Grup Çağrısı** simgesi görüntülenir.
- İlk metin satırında çağrı yapanın adı görüntülenir.
- İkinci metin satırında grup çağrısı adı görünür.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

**NOT:**

Alıcı kullanıcıların Yayın Çağrısı sırasında cevap vermesine izin verilmez. Ekranda **Cevap Yasağı** bilgisi görüntülenir. Yayın Çağrısı sırasında **PTT** düğmesine basılırsa Cevap Yasağı Tonu kısa süreli olarak duyulur.

## Özel Çağrı

Bağımsız bir telsizle başka bir bağımsız telsiz arasında yapılan çağrılara Özel Çağrı denir.

Özel Çağrı yapmanın iki yolu vardır.

- İlk çağrı türü Yayında Olmayan Çağrı Yapma (OACSU) olarak adlandırılır. OACSU, telsiz varlığı kontrolü yaptıktan sonra çağrıyı ayarlar ve otomatik olarak tamamlar.

- İkinci çağrı türü Tamamen Yayında Olmayan Çağrı Yapma (FOACSU) olarak adlandırılır. FOACSU da çağrıyı telsiz varlığı kontrolü yaptıktan sonra ayarlar. Ancak FOACSU çağrılarının tamamlanması için kullanıcı onayı gerekir. Bu çağrılar, kullanıcıya çağrıyı Kabul Etme veya Reddetme seçeneği sunar.

Çağrı türü sistem yöneticisi tarafından yapılandırılır.

**NOT:**

Hem aramayı başlatan hem de alıcı taraf  düğmesine basarak sürmekte olan bir Özel Çağrıyı sonlandırabilir.

## Özel Çağrılar Yapma

Özel Çağrı başlatabilmeniz için telsizinizin programlanmış olması gerekir. Bu özellik etkin değilse çağrıyı başlattığınızda olumsuz gösterge tonu duyarsınız. Telsizinizden Özel Çağrılar yapmak için bu prosedürü uygulayın. Hedef telsiz kullanılabilir değilse kısa bir ton duyulur ve ekranda **Taraf Müsait Değil** bilgisi gösterilir.

### 1 Aşağıdakilerden birini yapın:

- Etkin abone adına veya kimliğine sahip olan bir kanal seçin. Bkz. [Çağrı Tipi Seçme sayfa 67](#)

- Programlanmış **Tek Tuşla Erişim** düğmesine basın.

2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar.Ekranda **Özel Çağrı** simgesi, abone adı ve çağrı durumu görüntülenir.

3 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

4 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde yeşil LED yanar.

5 Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.Kısa bir ton duyulur. Ekranda **Call Ended** (Çğr Son) bilgisi görüntülenir.

Hem aramayı başlatan hem de alıcı taraf  düğmesine basarak sürmekte olan bir Özel Çağrıyı sonlandırabilir.

## Programlanabilir Sayı Tuşunu Kullanarak Özel Çağrılar Yapma

Telsizinizde programlanabilir sayı tuşunu kullanarak Özel Çağrılar yapmak için buradaki prosedürü uygulayın.

1 Giriş ekranındayken önceden tanımlanmış ad veya kimlik için programlanmış sayı tuşuna uzun basın.

Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.

Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.

2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. Ekranın sağ üst köşesinde **Özel Çağrı** simgesi görüntülenir. İlk metin satırında çağrı yapanın adı görüntülenir. İkinci metin satırında ise çağrı durumu görüntülenir.

3 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde yeşil LED yanıp söner. Ekranda hedef adı görüntülenir.

- 4 Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Kısa bir ton duyulur. Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Hem çağrıyı başlatan taraf hem de alıcı taraf

sürmekte olan bir Özel Çağrıyı  düğmesine basarak sonlandırabilir.

Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

## Ad Aramasını Kullanarak Özel Çağrılar Yapma

- 1 Menüye erişmek için  düğmesine basın.
- 
- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.

- 3  veya  düğmesine basarak istenen abone adına veya kimliğe gidin. Ekranın ilk satırında Telefon No: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Telefon numarasını girmek için tuş takımını kullanın.

- 4 Seçmek için  düğmesine basın. Seçilen giriş boşa olumsuz bir gösterge tonu duyulur ve ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

- 5  veya  düğmesine basarak Çağrı Telefonu seçeneğine gidin ve Seçmek için  düğmesine basın. Erişim kodu Kişiler listesinde önceden yapılandırılmamışsa ekranın ilk satırında Erişim Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişim kodunu girin ve devam etmek için  düğmesine basın. Çağrı başarılı olursa DTMF tonu duyulur. Telefon kullanıcısının çevirme sesi duyulur. Ekranın ilk satırında abone adı veya kimliği ve **RSSI** simgesi görüntülenir. Ekranın ikinci satırında Tlf Çağr bilgisi ve **Telefon Çağrısı** simgesi görüntülenir. Çağrı başarısız olursa bir ton duyulur ve ekranda Telf

Arama Başarısız bilgisi görüntülenir. Telsiziniz, Erişim Kodu giriş ekranına döner. Erişim kodu Kişiler listesinde önceden yapılandırılmışsa telsiz çağrısı başlatmadan önce bulunduğunuz ekrana döner.

- 6 Konuşmak için **PTT** düğmesine basın, dinlemek için düğmeyi bırakın. **RSSI** simgesi yayın sırasında kaybolur.
- 7 Telefon Çağrısı tarafından ekstra rakam istenirse bu rakamları girmek için aşağıdakilerden birini yapın.
  - Ekstra rakam girişini başlatmak için tuş takımındaki herhangi bir tuşa basın. Ekranın ilk satırında Ekstra Rakam: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Ekstra basamakları girin ve devam etmek için  düğmesine basın. DTMF tonu duyulur ve telsiz önceki ekrana geri döner.
  - **Tek Tuşla Erişim** düğmesine basın. DTMF tonu duyulur. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.
- 8 Çağrısı sonlandırmak için  düğmesine basın. Erişimi kaldırma kodu Kişiler listesinde

yapılandırılmamışsa ekranın ilk satırında Erişimi Kaldır Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişimi

kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner. DTMF tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir. Bir ton duyulur ve ekranda Tel Görüşmesi Bitti bilgisi görüntülenir. Telsiziniz Telefon Çağrısı ekranına döner. Çağrı başarısız olursa telsiziniz Tlf Çağr ekranına döner. Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir. Telefon kullanıcısı çağrısı sonlandırdığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir. Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrısı başlatmadan önce bulunduğunuz ekrana döner.

- 9 Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Kısa bir ton duyulur. Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Hem çağrıyı başlatan taraf hem de alıcı taraf sürmekte olan bir Özel Çağrı (☎) düğmesine basarak sonlandırabilir.

#### NOT:

Kanal erişimi sırasında çağrı denemesini iptal etmek (bir ton duyulur) veya ad aramasından çıkmak için

(☎) düğmesine basın. Ad aramasından çıkmak

için (OK) veya (☎) düğmesine basın. Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener.

## Tek Tuşla Çağrı Düğmesiyle Özel Çağrı Yapma

Tek Tuşla Çağrı özelliği, önceden tanımlanmış bir Özel Çağrı adına veya kimliğine kolayca Özel Çağrı yapmanızı sağlar. Bu özellik, kısa veya uzun süre programlanabilir düğme basışılarına atanabilir.

Tek Tuşla Çağrı düğmesine atanmış yalnızca bir adınız veya kimliğiniz olabilir. Telsizinizde birden fazla Tek Tuşla Çağrı düğmesi programlanabilir.

1 Programlanmış **Tek Tuşla Çağrı** düğmesine basarak önceden tanımlanmış bir Özel Çağrı adına veya kimliğine Özel Çağrı yapabilirsiniz.

2 Çağrı yapmak için **PTT** düğmesine basın.

LED ışıkları sürekli yeşil renkte yanar.

Ekranda, Özel Çağrı adı veya kimliği görüntülenir.

3 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

4 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde, LED yeşil renkte yanıp söner.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer.

Hem aramayı başlatan hem de alıcı taraf (☎) düğmesine basarak sürmekte olan bir Özel Çağrıyı sonlandırabilir.

## Elle Çevirmeyi Kullanarak Özel Çağrılar Yapma

Telsizinizde elle çevirmeyi kullanarak Özel Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak **Telsiz Numarası** seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5 Aşağıdakilerden birini yapın:

- Abone kimliğini girin ve devam etmek için  düğmesine basın.
- Önceden çevrilmiş abone kimliğini düzenleyin ve devam etmek için  düğmesine basın.

- 6 Çağrı yapmak için **PTT** düğmesine basın.  
Yeşil LED yanar. Ekranda hedef ad görüntülenir.

---

- 7 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

---

- 8 Dinlemek için **PTT** düğmesini bırakın.  
Hedef telsiz yanıt verdiğinde yeşil LED yanar. Ekranda, yayını yapan kullanıcının adı veya kimliği görüntülenir.

---

- 9 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Hem çağrıyı başlatan taraf hem de alıcı taraf

sürmekte olan bir Özel Çağrıyı  düğmesine basarak sonlandırabilir.

#### NOT:

Telsizinizin, OACSU veya Tamamen Yayında Olmayan Çağrı Yapma (FOACSU) yapılandırmasına bağlı olarak Özel Çağrıları yanıtlamak için kullanıcı onayı gerekebilir ya da gerekmeyebilir.

OACSU yapılandırmasında telsiziniz sessiz kipten çıkar ve çağrılar otomatik olarak bağlanır.

## Özel Çağrıları Alma

Yayında Olmayan Çağrı Yapma (OACSU) olarak yapılandırılan Özel Çağrılar aldığınızda:

- Yeşil LED yanıp söner.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

## Özel Çağrıları Kabul Etme

Tamamen Yayında Olmayan Çağrı Yapma (FOACSU) olarak yapılandırılan Özel Çağrılar aldığınızda:

- Yeşil LED yanıp söner.
- 1 FOACSU olarak yapılandırılmış bir Özel Çağrıyı kabul etmek için aşağıdaki işlemlerden birini yapın:
    - Bir Özel Çağrıyı yanıtlamak için  veya  ile Kabul Et seçeneğine gidin ve  düğmesine basın.
    - Her girişte **PTT** düğmesine basın. Yeşil LED yanar.

2 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

3 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Ekranda **Call Ended** (Çğr Son) bilgisi görüntülenir.

### NOT:

Hem çağrıyı başlatan taraf hem de alıcı taraf sürmekte olan bir Özel Çağrıyı  düğmesine basarak sonlandırabilir.

## Özel Çağrıları Reddetme

Tamamen Yayında Olmayan Çağrı Yapma (FOACSU) olarak yapılandırılan Özel Çağrılar aldığınızda:

- Yeşil LED yanıp söner.

FOACSU olarak yapılandırılmış bir Özel Çağrıyı reddetmek için aşağıdaki işlemlerden birini yapın:

- Bir Özel Çağrıyı reddetmek için  veya  ile **Reddet** seçeneğine gidin ve  düğmesine basın.
- Bir Özel Çağrıyı reddetmek için  düğmesine basın.

## Herkese Çağrılar

Herkese Çağrı, bağımsız bir telsizden sistem yapılandırmasına göre sahadaki tüm telsizlere veya saha grubundaki tüm telsizlere yapılan çağrıdır.

Herkese Çağrı, kullanıcının tüm dikkatini vermesini gerektiren önemli duyurular yapmak için kullanılır. Sistemdeki kullanıcılar Herkese Çağrılara yanıt veremez.

Capacity Max, Sahadaki Herkese Çağrı ve Çoklu Sahada Herkese Çağrıyı destekler. Sistem yöneticiniz, telsizinizde bu seçeneklerden birini veya ikisini yapılandırabilir.

### NOT:

Aboneler Sistem Genelinde Herkese Çağrıyı destekler ancak Motorola Solutions altyapısı Sistem Genelinde Herkese Çağrıyı desteklemez.

## Herkese Çağrılar Yapma

Herkese Çağrı yapmanız için telsizinizin programlanmış olması gerekir. Telsizinizden Herkese Çağrılar yapmak için bu prosedürü uygulayın.

- 1 Etkin Herkese Çağrı grup adına veya kimliğine sahip olan kanalı seçin. Bkz. [Çağrı Tipi Seçme sayfa 67](#)

- 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar.Ekranda **Grup Çağrısı** simgesi ve yapılandırma türüne bağlı olarak **Herkese Çağrı**, **Sahadaki Herkese Çağrı** veya **Çoklu Saha Çağrısı** bilgisi görüntülenir.

- 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

Kanaldaki kullanıcılar Herkese Çağrıya yanıt veremezler.

Çağrıyı başlatan taraf  düğmesine basarak Herkese Çağrıyı sonlandırabilir.

## Programlanabilir Sayı Tuşunu Kullanarak Herkese Çağrılar Yapma

Telsizinizde programlanabilir sayı tuşunu kullanarak Herkese Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Giriş ekranındayken önceden tanımlanmış ad veya kimliğe atanan programlanmış sayı tuşuna uzun basın.

Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.

Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.

- 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar.Ekranda **Grup Çağrısı** simgesi ve yapılandırma türüne bağlı olarak **Herkese Çağrı**,

Sahadaki Herkese Çağrı veya Çoklu Saha Çağrısı bilgisi görüntülenir.

### 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
- **PTT Yan Tonunun** bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

Çağrıyı başlatan taraf  düğmesine basarak Herkese Çağrıyı sonlandırabilir.

Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

## Ad Aramasını Kullanarak Herkese Çağrılar Yapma

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.

- 3  veya  düğmesine basarak istenen abone adına veya kimliğe gidin. Ekranın ilk satırında Telefon No: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Telefon numarasını girmek için tuş takımını kullanın.

- 4 Seçmek için  düğmesine basın. Seçilen giriş boşsa olumsuz bir gösterge tonu duyulur ve ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

- 5 Çağrı Telefonu seçeneği için  veya  düğmesine basın. Seçmek için  düğmesine basın. Erişim kodu önceden Kişiler listesinde yapılandırılmamışsa ekranın ilk satırında Erişim Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişim kodunu girin ve devam etmek için  düğmesine basın.

Çağrı başarılı olursa DTMF tonu duyulur. Telefon kullanıcısının çevirme sesi duyulur. Ekranın ilk satırında abone adı veya kimliği ve RSSI simgesi görüntülenir. Ekranın ikinci satırında Tlf Çağr bilgisi ve Telefon Çağrısı simgesi görüntülenir. Çağrı başarısız olursa bir ton duyulur ve ekranda Telf Arama Başarısız bilgisi görüntülenir. Telsiziniz, Erişim Kodu giriş ekranına döner. Erişim kodu Kişiler listesinde önceden yapılandırılmışsa telsiz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

6 Konuşmak için **PTT** düğmesine basın, dinlemek için düğmeyi bırakın. RSSI simgesi yayın sırasında kaybolur.

7 Telefon Çağrısı tarafından ekstra rakam istenirse bu rakamları girmek için aşağıdakilerden birini yapın.

- Ekstra rakam girişini başlatmak için tuş takımındaki herhangi bir tuşa basın. Ekranın ilk satırında Ekstra Rakam: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Ekstra basamakları girin ve devam etmek için  düğmesine basın. DTMF tonu duyulur ve telsiz önceki ekrana geri döner.

- Tek Tuşla Erişim** düğmesine basın. DTMF tonu duyulur. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

8 Çağrıyı sonlandırmak için  düğmesine basın. Erişimi kaldırma kodu Kişiler listesinde yapılandırılmamışsa ekranın ilk satırında Erişimi Kaldır Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişimi

kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner. DTMF tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir. Bir ton duyulur ve ekranda Tel Görüşmesi Bitti bilgisi görüntülenir. Telsiziniz Telefon Çağrısı ekranına döner. Çağrı başarısız olursa telsiziniz Tlf Çağr ekranına döner. Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir. Telefon kullanıcısı çağrıyı sonlandığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir. Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

### NOT:

Çağrıyı başlatan taraf  düğmesine basarak Herkese Çağrıyı sonlandırabilir.

## Herkese Çağrıları Alma

Herkese Çağrı aldığınızda, aşağıdakiler gerçekleşir:

- Bir ton duyulur.
- Yeşil LED yanıp söner.
- Ekranın sağ üst köşesinde **Grup Çağrısı** simgesi görüntülenir.
- İlk metin satırında çağrı yapanın adı ve kimliği görüntülenir.
- Yapılandırma türüne bağlı olarak ikinci metin satırında Herkese Çağrı, Sahadaki Herkese Çağrı veya Çoklu Saha Çağrısı bilgisi görüntülenir.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

Telsiz, çağrı sonlandırıldığında Herkese Çağrı'yı almadan önce bulunduğunuz ekrana döner.

Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığında kanalın boş olduğunu ve

artık kullanabileceğinizi gösteren kısa bir uyarı tonu duyarsınız. Herkese Çağrıyı yanıtlayamazsınız.

### NOT:

Çağrı alınırken farklı bir kanala geçmeniz halinde telsiz Herkese Çağrıyı almayı durdurur. Herkese Çağrı yapılıyorken çağrı sonlandırılana kadar menüde gezinme veya düzenleme yapma işlemlerine devam edemezsiniz.

## Telefon Çağrıları

Telefon Çağrısı, bağımsız bir telsizden bir telefona yapılan çağrıdır.

Telefon Çağrısı özelliği devre dışı olduğunda bile telsiziniz Capacity Max'te çağrıları ve cevapları alabilir.

Telefon Çağrısı özelliği sistem üzerinde telefon numaraları atayarak ve ayarlayarak etkinleştirilebilir. Telsizinizin nasıl programlandığını belirlemek için sistem yöneticinize başvurun.

## Telefon Çağrıları Yapma

Telsizinizden Telefon Çağrıları yapmak için bu prosedürü uygulayın.

1 Önceden tanımlanmış ada veya kimliğe ilişkin programlanmış **Tek Tuşla Erişim** düğmesine basın.

**Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

Erişim kodu Kişiler listesinde yapılandırılmamışsa ekranda **Erişim Kodu:** bilgisi görüntülenir.

2 Erişim kodunu girin ve devam etmek için  düğmesine basın.

Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.

3 Çağrıyı yanıtlamak için **PTT** düğmesine basın.

4 Dinlemek için **PTT** düğmesini bırakın.

5 Çağrı tarafından talep edilirse tuş takımını kullanarak

ekstra rakamlar girin ve devam etmek için  düğmesine basın.

Çağrı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

DTMF Tonu duyulur. Telsiziniz önceki ekrana döner.

6 Çağrıyı sonlandırmak için  düğmesine basın.

7 Aşağıdakilerden birini yapın:

- Erişimi kaldırma kodu önceden yapılandırılmadıysa ekranda **Erişimi Kaldırma Kodu:** bilgisi gösterildiğinde erişimi kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner.
- Programlanmış **Tek Tuşla Erişim** düğmesine basın. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

DTMF Tonu duyulur ve ekranda **Tel Görüşmesi Bitiyor** bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. Son iki adımı tekrarlayın veya telefon kullanıcısının çağrışı sonlandırmasını bekleyin.

## Kişi Listesini Kullanarak Telefon Çağruları Yapma

Telsizinizde Kişi listesini kullanarak Telefon Çağruları yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.
- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

Telefon Kişileri ekranında **PTT** düğmesine bastığınızda:

- Ekranın ilk satırında Phone Number: (Telefon No:) bilgisi görüntülenir.
- Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir.

Seçilen giriş boşsa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

- 4  veya  düğmesine basarak Telefon Ara seçeneğine gidin. Seçmek için  düğmesine basın. Erişim kodu önceden yapılandırılmamışsa ekranda Erişim Kodu: bilgisi görüntülenir.
- 5 Erişim kodunu girin ve devam etmek için  düğmesine basın.

Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.

İlk metin satırında Çağrı Yapıyor bilgisi görüntülenir. İkinci metin satırında abone adı veya kimliği ve **Telefon Çağrısı** simgesi görüntülenir. Çağrı başarılı olursa:

- DTMF Tonu duyulur.
- Telefon kullanıcısının çevirme sesi duyulur.
- İlk metin satırında abone adı veya kimliği ve **RSSI** simgesi görüntülenir.
- İkinci metin satırında, Tlf Çağrı bilgisi ve **Telefon Çağrısı** simgesi görüntülenir.

Çağrı başarısız olursa:

- Bir ton duyulur.
- Ekranda Telf Arama Başarısız ve ardından, Erişim Kodu: bilgisi görüntülenir.
- Erişim kodu Kişi listesinde önceden yapılandırılmışsa telsiziniz, çağrı başlatılmadan önce bulunduğunuz ekrana geri döner.

**6** Çağrıyı yanıtlamak için **PTT** düğmesine basın.  
**RSSI** simgesi kaybolur.

**7** Dinlemek için **PTT** düğmesini bırakın.

**8** Çağrı tarafından talep edilirse tuş takımını kullanarak ekstra rakamlar girin ve devam etmek için  düğmesine basın.

Çağrı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

DTMF Tonu duyulur. Telsiziniz önceki ekrana döner.

**9** Çağrıyı sonlandırmak için  düğmesine basın.

**10** Erişimi kaldırma kodu önceden yapılandırılmadıysa ekranda Erişimi Kaldır Kodu: bilgisi gösterildiğinde erişimi kaldırma kodunu girin ve devam etmek için  düğmesine basın.

Telsiz önceki ekrana döner. DTMF Tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. [adım 9](#) ve [adım 10](#) adımlarını tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin. Telefon Kişileri ekranında PTT düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir.

Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir.

Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

### NOT:

Kanal erişimi sırasında  düğmesine basılırsa çağrı denemesi geçersiz kalır ve bir ton duyulur.

Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener.

Kanal erişimi ve erişim/erişimi kaldırma kodu veya ekstra rakam iletimi sırasında, telsiziniz sadece **Açma/Kapatma** düğmesi, **Ses Düzeyi Topuzu** ve **Kanal Ayarlayıcı**'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Ad Aramasını Kullanarak Telefon Çağrılarını Yapma

Ad araması ya da alfasayısal arama yaparak da istediğiniz abone adlarına ulaşabilirsiniz. Bu özellik, sadece Kişiler menüsündeyken kullanılabilir. Telsizinizde ad aramasını kullanarak Telefon Çağrılarını yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.

---

- 3  veya  düğmesine basarak istenen abone adına veya kimliğe gidin. Ekranın ilk satırında Telefon No: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Telefon numarasını girmek için tuş takımını kullanın.

---

- 4 Seçmek için  düğmesine basın. Seçilen giriş boşsa olumsuz bir gösterge tonu duyulur ve ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

---

- 5  veya  düğmesine basarak Çağrı Telefonu seçeneğine gidin ve Seçmek için  düğmesine basın. Erişim kodu Kişiler listesinde önceden yapılandırılmamışsa ekranın ilk satırında Erişim Kodu: bilgisi görüntülenir. Ekranın ikinci satırında

yanıp sönen bir imleç görüntülenir. Erişim kodunu girin ve devam etmek için  düğmesine basın. Çağrı başarılı olursa DTMF tonu duyulur. Telefon kullanıcısının çevirme sesi duyulur. Ekranın ilk satırında abone adı veya kimliği ve **RSSI** simgesi görüntülenir. Ekranın ikinci satırında Tlf Çağr bilgisi ve **Telefon Çağrısı** simgesi görüntülenir. Çağrı başarısız olursa bir ton duyulur ve ekranda Telf Arama Başarısız bilgisi görüntülenir. Telsiziniz, Erişim Kodu giriş ekranına döner. Erişim kodu Kişiler listesinde önceden yapılandırılmışsa telsiz çağrısı başlatmadan önce bulunduğunuz ekrana döner.

- 6 Konuşmak için **PTT** düğmesine basın, dinlemek için düğmeyi bırakın. **RSSI** simgesi yayın sırasında kaybolur.

---

- 7 Telefon Çağrısı tarafından ekstra rakam istenirse bu rakamları girmek için aşağıdakilerden birini yapın.
  - Ekstra rakam girişini başlatmak için tuş takımındaki herhangi bir tuşa basın. Ekranın ilk satırında Ekstra Rakam: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Ekstra basamakları girin ve devam

etmek için  düğmesine basın. DTMF tonu duyulur ve telsiz önceki ekrana geri döner.

- **Tek Tuşla Erişim** düğmesine basın. DTMF tonu duyulur. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

8 Çağrıyı sonlandırmak için  düğmesine basın. Erişimi kaldırma kodu Kişiler listesinde yapılandırılmamışsa ekranın ilk satırında Erişimi Kaldır Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişimi kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner. DTMF tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir. Bir ton duyulur ve ekranda Tel Görüşmesi Bitti bilgisi görüntülenir. Telsiziniz Telefon Çağrısı ekranına döner. Çağrı başarısız olursa telsiziniz Tlf Çağr ekranına döner. Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir. Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir. Telefon Çağrısı tarafından istenen

ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

### NOT:

Kanal erişimi sırasında çağrı denemesini iptal etmek (bir ton duyulur) veya ad aramasından çıkmak için

 düğmesine basın.  veya  düğmesine basarak ad aramasından çıkın. Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener. Kanal erişimi ve erişim/erişimi kaldırma kodu veya ekstra rakam iletimi sırasında, telsiziniz sadece Açma/Kapatma düğmesi, Ses Düzeyi Topuzu ve Kanal Ayarlayıcı'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Elle Çevirmeyi Kullanarak Telefon Çağrılarını Yapma

Telsizinizde elle çevirmeyi kullanarak Telefon Çağrılarını yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 
- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.
- 
- 3  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın.
- 
- 4  veya  düğmesine basarak Telefon Numarası seçeneğine gidin. Seçmek için  düğmesine basın.
- Ekranı Numara: bilgisi ve yanıp sönen bir imleç görüntülenir.
- 

- 5 Telefon numarasını girin ve devam etmek için  düğmesine basın.
- Erişim kodu önceden yapılandırılmamışsa ekranda Erişim Kodu: bilgisi ve yanıp sönen bir imleç görüntülenir.
- 
- 6 Erişim kodunu girin ve devam etmek için  düğmesine basın. Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.
- Yeşil LED yanar. Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir. İlk metin satırında abone adı görüntülenir. İkinci metin satırında ise çağrı durumu görüntülenir.
- Çağrı başarılı olursa:
- Çift Tonlu Çoklu Frekans (DTMF) Tonu duyulur.
  - Telefon kullanıcısının çevirme sesi duyulur.
  - İlk metin satırında abone adı görüntülenir.
  - Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi gösterilmeye devam eder.
- Çağrı başarısız olursa:
- Bir ton duyulur.

- Ekranda Telf Arama Başarısız ve ardından, Erişim Kodu: bilgisi görüntülenir.
- Erişim kodu Kişi listesinde önceden yapılandırılmışsa telsiziniz, çağrı başlatılmadan önce bulunduğunuz ekrana geri döner.

---

7 Çağrıyı sonlandırmak için  düğmesine basın.

---

8 Aşağıdakilerden birini yapın:

- Erişimi kaldırma kodu önceden yapılandırılmadıysa ekranda Erişimi Kaldırma Kodu: bilgisi gösterildiğinde erişimi kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner.
- Programlanmış **Tek Tuşla Erişim** düğmesine basın. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

DTMF Tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.

- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. [adım 7.](#) adımı tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin.

**NOT:**

Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Press OK to Place Phone Call (Telefon Çağrısı İçin OK'e Bas) bilgisi görüntülenir.

Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Çğr Son bilgisi görüntülenir.

Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

Kanal erişimi sırasında  düğmesine basılırsa çağrı denemesi geçersiz kalır ve bir ton duyulur.

Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener.

Kanal erişimi ve erişim/erişimi kaldırma kodu veya ekstra rakam iletimi sırasında, telsiziniz sadece **Açma/Kapatma** düğmesi, **Ses**

**Düzeyi Topuzu** ve **Kanal Ayarlayıcı**'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Çift Tonlu Çoklu Frekans

Çift Tonlu Çoklu Frekans (DTMF) özelliği, telsizinizi telefon sistemlerine arabirimi olan telsiz sistemlerinde çalıştırmanızı sağlar.

Tüm telsiz tonlarını ve uyarılarını devre dışı bırakarak DTMF tonunu kapatabilirsiniz. Daha fazla bilgi için bkz. [Telsiz Tonlarını/Uyarılarını Açma veya Kapatma sayfa 208](#).

## DTMF Çağrıları Başlatma

Telsizinizden DTMF çağrıları başlatmak için buradaki prosedürü uygulayın.

- 1 **PTT** düğmesini basılı tutun.
- 2 Aşağıdakilerden birini yapın:
  - DTMF çağrısı başlatmak için istediğiniz numarayı girin.

- DTMF çağrısı başlatmak için  düğmesine basın.
- DTMF çağrısı başlatmak için  düğmesine basın.

## Telefon Çağrılarını Grup Çağrısı Olarak Yanıtlama

Telsizinizden Grup Çağrısı olarak Telefon Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Grup Çağrısı olarak bir Telefon Çağrısı aldığınızda:

- Ekranın sağ üst köşesinde **Tlf Çağr** simgesi görüntülenir.
- Ekranda Tlf Çağr bilgisi görüntülenir.
- Yeşil LED yanıp söner.
- Telsiziniz sessiz kipten çıkar ve hoparlörden gelen çağrı sesi duyulur.

**1** Çağrıyı yanıtlamak için **PTT** düğmesine basın.

**2** Dinlemek için **PTT** düğmesini bırakın.

**3** Çağrıyı sonlandırmak için  düğmesine basın.

Ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir.

### NOT:

Telefon Çağrısı özelliği telsizinizde etkinleştirilmemişse telsiz grup çağrısı olarak gelen telefon çağrısını sonlandıramaz. Çağrıyı, telefon kullanıcısının sonlandırması gerekir. Çağrı sırasında alıcı kullanıcının yalnızca cevap vermesine izin verilir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. **adım 3** adımını tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin.

## Telefon Çağrılarını Herkese Çağrı Olarak Yanıtlama

Herkese Çağrı olarak bir Telefon Çağrısı aldığınızda alıcı telsiz cevap veremez. Alıcı kullanıcının Herkese Çağrısı sonlandırmasına izin verilmez.

Herkese Çağrı olarak bir Telefon Çağrısı aldığınızda:

- Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir.
- Yapılandırma ve T1f Çağrı türüne bağlı olarak ekranda Herkese Çağrı, Sahadaki Herkese Çağrı veya Çoklu Saha Çağrısı bilgisi görüntülenir.
- Yeşil LED yanıp söner.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

## Telefon Çağrılarını Özel Çağrı Olarak Yanıtlama

Telsizinizden Özel Çağrı olarak Telefon Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Özel Çağrı olarak bir Telefon Çağrısı aldığınızda:

- Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir.
- Ekranda T1f Çağrı bilgisi görüntülenir.
- Yeşil LED yanıp söner.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

1 Çağrıyı yanıtlamak için **PTT** düğmesine basın.

2 Dinlemek için **PTT** düğmesini bırakın.

3 Çağrıyı sonlandırmak için  düğmesine basın.

Ekranada Tel Görüşmesi Bitiyor bilgisi görüntülenir.

### NOT:

Telefon Çağrısı özelliği telsizinizde etkinleştirilmemişse telsiz özel çağrı olarak gelen telefon çağrısını sonlandıramaz. Çağrıyı, telefon kullanıcısının sonlandırması gerekir. Çağrı sırasında alıcı kullanıcının yalnızca cevap vermesine izin verilir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.

- Ekranda **Call Ended** (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. **adım 3** adımını tekrarlayın veya telefon kullanıcısının çağrışı sonlandırmasını bekleyin.

## Çağrı Önceliği

Çağrı Önceliği, telsizden sürmekte olan tüm ses yayını durdurarak öncelikli yayın başlatmasını sağlar.

Çağrı Önceliği özelliği sayesinde sistem, birleştirilmiş kanalların kullanılmadığı durumlarda sürmekte olan çağrıları keser ve önceliklendirir.

Acil Durum Çağrıları veya Herkese Çağrılar gibi daha yüksek öncelikli çağrılar daha yüksek öncelikli çağrıların sırasını almak için yayın yapan telsizde üstün durumdadır. Kullanılabilir başak Telsiz Frekansı (RD) kanalı yoksa Acil Durum Çağrısı, Herkese Çağrıdan da üstün durumdadır.

## Ses Kesme

Ses Kesme özelliği kullanıcının sürmekte olan ses yayını kapatmasını sağlar.

Kesintiyi yapan telsiz Ses Kesme özelliği için yapılandırılmışsa ve yayını yapan telsiz Sesli Çağrısı Kesilebilir şeklinde yapılandırılmışsa bu özellik, ters kanal sinyali kullanarak telsize ait sürmekte olan ses yayını durdurur. Daha sonra kesintiyi yapan telsizin durdurulan çağrının katılımcılarına ses yayını yapmasına izin verilir.

Ses Kesme özelliği, bir arama sürmekteyken amaçlanan taraflara yeni bir yayının başarıyla iletilme ihtimalini önemli oranda artırır.

Ses Kesme özelliğine, yalnızca telsizde bu özelliğin ayarlanmış olması durumunda kullanıcı tarafından erişilebilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Ses Kesme Özelliğini Etkinleştirme

Telsizinizden Ses Kesme özelliğini başlatmak için bu prosedürü uygulayın.

Telsiziniz, bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

- 1 Devam eden bir çağrı sırasında yayını kesmek için **PTT** düğmesine basın.

Kesilen telsizin ekranında Çağrı Kesildi bilgisi görüntülenir. **PTT** düğmesi bırakılana kadar telsizden olumsuz bir gösterge tonu duyulur.

## 2 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.

## 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

## Gelişmiş Özellikler

Bu bölümde, telsizinizde bulunan özelliklerin nasıl çalıştığı açıklanmaktadır.

Bayiniz ya da sistem yöneticiniz, telsizinizi özel ihtiyaçlarınız doğrultusunda özelleştirmiş olabilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Çağrı Kuyruğu

Bir çağrı işlemek için kullanılacak kaynak olmadığında Çağrı Kuyruğu, çağrı talebinin sistem kuyruğunda sonraki kullanılabilir kaynağa atanmasını sağlar.

**PTT** düğmesine bastıktan sonra bir Çağrı Kuyruğu Tonu duyulur ve bu ton telsizin Çağrı Kuyruğu Durumuna girdiğini gösterir. Çağrı Kuyruğu Tonu duyulduğunda **PTT** düğmesi bırakılabilir.

Çağrı bağlantısı başarılı olursa aşağıdaki durumlar meydana gelir:

- Yeşil LED yanıp söner.
- Etkinse Konuşma İzni Tonu duyulur.
- Ekranda çağrı türü simgesi, kimliği veya adı görüntülenir.
- Telsiz kullanıcısının **PTT** düğmesine basarak ses yayını başlatması için en fazla 4 saniye süresi vardır.

Çağrı bağlantısı başarısız olursa aşağıdaki durumlar meydana gelir:

- Etkinse Reddetme Tonu duyulur.
- Ekranda kısa bir süreyle arıza bildirim ekranı görüntülenir.
- Çağrı sonlandırılır ve telsiz çağrı bağlantısından çıkar.

## Konuşma Grubu Tarama

Bu özellik, telsizinizin Alım Grubu Listesi tarafından tanımlanan gruplar için çağrılarını izlemesini ve bu çağrılara katılmasını sağlar.

Tarama etkinleştirildiğinde, durum çubuğunda tarama simgesi görünür ve LED sarı yanıp söner. Telsiziniz, Alım Grubu Listesindeki üyeler için sessiz kipten çıkar.

Tarama devre dışı bırakıldığında telsiziniz Herkese Çağrı ve seçili Konuşma Grubu dışında Alım Grubu Listesi üyelerinden yayın almaz.

### NOT:

Konuşma Grubu Tarama özelliği, CPS kullanılarak yapılandırılabilir. Telsizinizin nasıl programlandığını belirlemek için sistem yöneticinize başvurun.

## Konuşma Grubu Taramayı Açma veya Kapatma

Telsizinizde Konuşma Grubu Taramayı açmak veya kapatmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Tarama bölümüne gidin. Seçmek için  düğmesine basın.
- 3 Aşağıdakilerden birini yapın:
  -  veya  düğmesine basarak Aç seçeneğine gidin. Seçmek için  düğmesine basın.
  -  veya  düğmesine basarak Kapat seçeneğine gidin. Seçmek için  düğmesine basın.

Tarama etkinse:

- Ekranda Tırma Aç bilgisi ve **Tarama** simgesi görüntülenir.
- Sarı LED yanıp söner.
- Bir olumlu gösterge tonu duyulur.

Tarama devre dışıysa:

- Ekranda, Tırma Kap bilgisi görüntülenir.
- **Tarama** simgesi kaybolur.
- LED söner.
- Bir olumsuz gösterge tonu duyulur.

## Alım Grubu Listesi

Alım Grubu Listesi, konuşma grubu tarama listesinin üyelerini oluşturmanızı ve atamanızı sağlayan bir özelliktir.

Bu liste, telsiziniz programlandığında oluşturulur ve hangi grupların taranacağını belirler. Telsiziniz bu listede maksimum 16 üyeyi destekleyebilir.

Telsiziniz tarama listesini düzenlemenize izin verecek şekilde programlanmışsa şunları yapabilirsiniz:

- Konuşma grupları ekleme/kaldırma.

- Konuşma grupları için öncelik düzeyi ekleme, kaldırma ve/veya düzenleme. Bkz. [Konuşma Grubu için Öncelik Düzenleme sayfa 106](#).
- Konuşma grubu bağlantıları ekleme, kaldırma ve/veya düzenleme. Bkz. [Konuşma Grubu Bağlantısı Ekleme sayfa 107](#) ve [Konuşma Grubu Bağlantısını Kaldırma sayfa 109](#).
- Mevcut tarama listesini yeni bir tarama listesiyle değiştirme.

### ÖNEMLİ:

Listeye üye eklemek için önce telsizde konuşma grubunun yapılandırılması gerekir.

### NOT:

Alım Grubu Listesi, sistem yöneticisi tarafından programlanır. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Öncelikli İzleme

Öncelikli İzleme özelliği, telsizin konuşma grubu çağrısında bile daha yüksek öncelikli konuşma grubundan gelen yayınları otomatik olarak almasına olanak tanır.

Telsiz, daha yüksek öncelikli konuşma grubu çağrısı için düşük öncelikli konuşma grubu çağrısından ayrılır.

**NOT:**

Bu özelliğe yalnızca Konuşma Grubu Tarama özelliği etkinleştirildiğinde erişilebilir.

Öncelikli İzleme özelliği, yalnızca Alım Grubu Listesi üyeleri için geçerlidir. İki Öncelikli Konuşma Grubu vardır: 1. Öncelik (P1) ve 2. Öncelik (P2). P1, P2'ye göre daha yüksek önceliğe sahiptir. Capacity Max sisteminde telsiz, yayını aşağıdaki öncelik sırasına göre alır:

- 1 P1 Konuşma Grubu için Acil Durum Çağrısı
- 2 P2 Konuşma Grubu için Acil Durum Çağrısı
- 3 Alım Grubu Listesindeki öncelikli olmayan Konuşma Grupları için Acil Durum Çağrısı
- 4 Herkese Çağrı
- 5 P1 Konuşma Grubu Çağrısı
- 6 P2 Konuşma Grubu Çağrısı
- 7 Alım Grubu Listesindeki öncelikli olmayan Konuşma Grupları

Tarama listesindeki konuşma gruplarına öncelik ekleme, kaldırma ve/veya öncelik düzeyini değiştirme hakkında

daha fazla bilgi için [Konuşma Grubu için Öncelik Düzenleme sayfa 106](#) bölümüne bakın.

**NOT:**

Bu özellik, sistem yöneticisi tarafından programlanır. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Konuşma Grubu için Öncelik Düzenleme

Konuşma Grubu Tarama menüsünde, konuşma grubunun öncelik düzeyini görüntüleyebilir veya düzenleyebilirsiniz.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Tarama bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  ile Listeye Ekle/Düzeltilt seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 İstenen konuşma grubu için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Mevcut öncelik düzeyi, konuşma grubunun yanındaki **1. Öncelik** veya **2. Öncelik** simgesiyle belirtilir.

- 5  veya  ile Öncüğü Düzle seçeneğine gidin. Seçmek için  düğmesine basın.

- 6 Gereken öncelik seviyesi için  veya  düğmesine basın. Seçmek için  düğmesine basın.
1. Öncelik veya 2. Öncelik alanına başka bir konuşma grubu atanmışsa mevcut öncelik düzeyinin üzerine yazmayı tercih edebilirsiniz. Ekranda **Ölünün Üstüne Yaz?** mesajı görüntülendiğinde, aşağıdaki seçenekler için  veya  düğmesine basın:
- Önceki adıma dönmek için **Hayıır** seçeneğini belirleyin.

- Üstüne yazmak için **Evet** seçeneğini belirleyin. Önceki sayfaya dönmeden önce ekranda olumlu bir mini bilgi notu görünür. Konuşma grubunun yanında öncelik simgesi görünür.

## Konuşma Grubu Bağlantısı

Capacity Max sisteminde, telsiziniz bir sahada en fazla yedi konuşma grubu bulunacak şekilde yapılandırılabilir.

Alım Grubu Listesindeki 16 konuşma grubunun en fazla yedisi, konuşma grubu bağlantısı olarak atanabilir. Seçili konuşma grubu ve öncelikli konuşma grupları otomatik olarak bağlanır.

### NOT:

Bu özellik, sistem yöneticisi tarafından programlanır. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Konuşma Grubu Bağlantısı Ekleme

Konuşma grubu bağlantısı eklemek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak **Tarama** seçeneğine gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak **İstye Bk/** **Düzt** seçeneğine gidin. Seçmek için  düğmesine basın.

---

4 İstene konuşma grubu kimliği ya da adı için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Bağlantı durumu **İstye Bk/Düzt** bölümünde gösterilir. Ekranda, seçili konuşma grubu kimliği veya adının yanında  simgesi görüntülenir.

---

5 Bağlantıyı **Düzenle** seçeneği için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

6 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak **Açık** seçeneğine gidin. Seçmek için  düğmesine basın.
  -  veya  düğmesine basarak **Kapalı** seçeneğine gidin. Seçmek için  düğmesine basın.  
Açık seçeneği belirlendiğinde, konuşma grubu kimliği veya adının yanında  simgesi görünür.
- 

Bağlantı başarılıysa seçili konuşma grubu kimliği veya adının yanında  simgesi görüntülenir.

Bağlantı başarısızsa konuşma grubu kimliği veya adının yanında  simgesi görüntülenmeye devam eder.

**NOT:**

Tarama listesindeki bağlantı için maksimum değer olan yedi konuşma grubu seçildiğinde, telsizde Liste Dolu bilgisi görüntülenir. Bağlantı için yeni bir konuşma grubu seçmek isterseniz yeni eklemelere yer açmak amacıyla mevcut bir bağlı konuşma grubunu kaldırın. Daha fazla bilgi için bkz. [Konuşma Grubu Bağlantısını Kaldırma sayfa 109.](#)

## Konuşma Grubu Bağlantısını Kaldırma

Bağlantı listesi dolu olduğunda ve bağlantı için yeni bir konuşma grubu seçmek istediğinizde, yeni eklemelere yer açmak amacıyla mevcut bir bağlı konuşma grubunu kaldırın. Konuşma grubu bağlantısını kaldırmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Tarama seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Lstye Bk/Düzl t seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4 İstenen konuşma grubu kimliği ya da adı için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Bağlantı durumu Lstye Bk/Düzl t bölümünde gösterilir. Ekranda, seçili konuşma grubu kimliği veya adının yanında  simgesi görüntülenir.

---

- 5 Bağlantıyı Düzenle seçeneği için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

- 6  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine basın.  
Kapalı seçeneği belirlendiğinde, konuşma grubu kimliği veya adının yanındaki  simgesi kaybolur.

---

## Cevap

Cevap özelliği, tarama sırasında bir yayını yanıtlamanızı sağlar.

Telsiziniz seçilebilir grup tarama listesindeki bir çağrıyı tarıyorsa ve taranan çağrı sırasında **PTT** düğmesine basarsanız telsizinizin yapacağı işlem, telsiz programlama sırasında Cevap özelliğinin etkinleştirilmiş ya da devre dışı bırakılmış olmasına bağlı olarak değişiklik gösterir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

### Cevap Devre Dışı

Telsiz, taranan çağrıyı bırakır ve seçili olan geçerli kanal konumu kişisi üzerinden yayın yapmayı dener. Seçili olan geçerli kişinin Çağrı Kalma Süresi bittikten sonra telsiz giriş kanalına geri döner ve Tarama Kalma Süresi Sayacını Başlatır. Tarama Kalma Süresi bittikten sonra telsiz grup taramasına kaldığı yerden devam eder.

### Cevap Etkin

Taranan çağrının Grup Kalma Süresinde **PTT** düğmesine basıldığında telsiz, taranan gruba yayın göndermeyi dener.

### NOT:

O sırada seçili olan bölgedeki bir kanal konumuna atanmamış bir gruba yapılan çağrıyı tarıyorsanız ve çağrı sonlanırsa doğru bölgeye geçmeniz ve sonra o gruba cevap vermek üzere grubun kanal konumunu seçmeniz gerekir.

## Bluetooth

Bu özellik sayesinde telsizinizi Bluetooth bağlantısı aracılığıyla Bluetooth özellikli cihazlarla (aksesuar) kullanabilirsiniz. Telsiziniz hem Motorola Solutions'ın hem de piyasada bulunan diğer ticari markaların (COTS) Bluetooth özellikli cihazlarını desteklemektedir.

Bluetooth 10 metrelik (32 ft) bir görüş alanı menziline çalışır. Telsiziniz ve Bluetooth özellikli cihazınız arasındaki bu mesafenin engelsiz olması gerekir. Motorola Solutions, yüksek güvenilirlik için telsiz ve aksesuarı ayırmamanızı önerir.

Kapsama alanı sınırlarına yakın olduğunuz durumlarda hem konuşma hem de ton kalitesi düşer, sesler "karışık" ve "bozuk" çıkar. Bu sorunu çözerek yeniden net ses alımı sağlamak için telsizinizle Bluetooth özellikli cihazınızı birbirlerine yaklaştırın (tanımlanmış 10 metrelik menzil içine alın). Telsizinizin Bluetooth işlevinin maksimum gücü, 10 metrelik menzil içerisinde 2,5 mW'dir (4 dBm).

Telsiziniz, birbirinden farklı türlerde Bluetooth özellikli cihazlarla aynı anda üç Bluetooth bağlantısı gerçekleştirilmesini destekler. Örneğin kulaklık, tarayıcı ve bir Yalnızca Bas Konuş Cihazı (POD). Aynı tip Bluetooth özellikli cihazlarla çoklu bağlantı desteklenmemektedir.

Bluetooth özellikli cihazınızın tüm özellikleri hakkında ayrıntılar için Bluetooth özellikli cihazınızın kullanım kılavuzuna bakın.

#### NOT:

CPS ile devre dışı bırakıldığında Bluetooth ile ilgili tüm özellikler devre dışı kalır ve Bluetooth cihazı veritabanı silinir.

## Bluetooth'u Açık ve Kapalı Konuma Getirme

Bluetooth'u açıp kapatmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Durumum seçeneğine gidin.

Seçmek için  düğmesine basın.

Ekranında On (Açık) ve Off (Kapalı) seçenekleri görüntülenir. Geçerli durum bir ✓ simgesi ile belirtilir.

- 4 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranında, Açık bilgisinin yanında ✓ simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine basın. Ekranında, Kapalı bilgisinin yanında ✓ simgesi görüntülenir.

## Bluetooth Cihazlarına Bağlanma

Bluetooth cihazlarını bağlamak için bu prosedürü uygulayın.

Bluetooth özellikli cihazınızı açın ve eşleştirme modunda bırakın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Cihazlar ögesine gidin. Seçmek için  düğmesine basın.
- 4 Aşağıdakilerden birini yapın:
  - İstenen cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.
  - Kullanılabilir cihazları bulmak için  veya  düğmesine basarak Cihazları Bul ögesine gidin. İstenen cihaz için  veya  düğmesine basın.

düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak Bağlan ögesine gidin. Seçmek için  düğmesine basın. Eşleştirmenin tamamlanması için Bluetooth özellikli cihazınızda başka işlemler yapılması gerekebilir. Bluetooth özellikli cihazınızın kullanım kılavuzuna bakın. Ekranında <Cihaza> Bağlanıyor bilgisi görüntülenir.

Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında <Cihaz> Bağlandı bilgisi ve **Bluetooth Bağlandı** simgesi görüntülenir.
- Ekranında bağlı cihazın yanında ✓ ögesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranında Bağlantı Başarısız bilgisi görüntülenir.

**NOT:**

Pin kodu gerekirse bkz. [Telsizlere Şifre Kullanarak Erişme sayfa 195](#).

## Keşfedilebilir Kipinde Bluetooth Cihazlarına Bağlanma

Bulunabilirlik modundaki Bluetooth cihazlarını bağlamak için bu prosedürü uygulayın.

Bluetooth özellikli cihazınızı açın ve eşleştirme modunda bırakın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Bluetooth öğesine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmelerine basarak Beni Bul öğesine gidin. Seçmek için  düğmesine basın. Telsiz artık programlanan süre boyunca diğer

Bluetooth özellikli cihazlar tarafından bulunabilir. Buna, Bulunabilir Kip adı verilir.

Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda <Cihaz> Bağlandı bilgisi ve **Bluetooth Bağlandı** simgesi görüntülenir.
- Ekranda bağlı cihazın yanında ✓ ögesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda Bağlantı Başarısız bilgisi görüntülenir.

## Bluetooth Cihazlarının Bağlantısını Kesme

Bluetooth cihazlarının bağlantısını kesmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

2  veya  ile Bluetooth seçeneğine gidin.  
Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Cihazlar  
öğesine gidin. Seçmek için  düğmesine basın.

---

4 İstenen cihaz için  veya  düğmesine  
basın. Seçmek için  düğmesine basın.

---

5  veya  düğmesine basarak Bağlantıyı  
Kes öğesine gidin. Seçmek için  düğmesine  
basın.  
Ekranda <Cihaz> Bağlantı Ksiliyor bilgisi  
göüntülenir.

## NOT:

Bağlantının kesilmesi için Bluetooth özellikli cihazınızda başka işlemler yapılması gerekebilir. Bluetooth özellikli cihazlarınızın ilgili kullanım kılavuzuna bakın.

---

Onay için bekleyin.

- Bir ton duyulur.
- Ekranda <Cihaz Adı> Bağlantı Ksildi bilgisi göüntülenir ve **Bluetooth Bağlandı** simgesi kaybolur.
- Bağlı cihazın yanındaki ✓ ögesi kaybolur.

## Ses Yönlendirmesini Dahili Telsiz Hoparlörü ve Bluetooth Cihazı Arasında Değişirme

Ses yönlendirmesini telsiz dahili hoparlörü ve Bluetooth özellikli harici cihaz arasında değiştirmek için bu prosedürü uygulayın.

Programlanmış **Bluetooth Ses Anahtarı** düğmesine basın.

---

Ekranda aşağıdaki sonuçlardan biri göüntülenir:

- Bir ton duyulur. Ekranda Sesi Telsize Yönlendir bilgisi görüntülenir.
- Bir ton duyulur. Ekranda Sesi Bluetooth'a Yönlendir bilgisi görüntülenir.

## Cihaz Ayrıntılarını Görüntüleme

Telsiziniz hakkındaki cihaz ayrıntılarını görüntülemek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  ile Cihazlar seçeneğine gidin. Seçmek için  düğmesine basın.
- 4 İstenen cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  ile Ayrıntıları Gör seçeneğine gidin. Seçmek için  düğmesine basın.

## Cihaz Adını Silme

Bağlantısı kesilen bir cihazı Bluetooth özellikli cihazlar listesinden silebilirsiniz.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Cihazlar ögesine gidin. Seçmek için  düğmesine basın.
- 4 İstenen cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Cihaz Silindi bilgisi görüntülenir.

## Bluetooth Mikrofon Kazancı

Bu özellik kullanıcının bağlı Bluetooth özellikli cihazının mikrofon kazancı değerini kontrol etmesini sağlar.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak BT Mik Kazancı seçeneğini görebilirsiniz. Seçmek için  düğmesine basın.
- 4 BT Mik Kazancı tipi ve geçerli değerler için  veya  düğmesine basın. Seçmek için  düğmesine basın.

düğmesine basın. Değerleri buradan düzenleyebilirsiniz.

- 5 Değerleri artırmak ya da azaltmak için  veya  düğmesine basın. Seçmek için  düğmesine basın.

## İç Konum

### NOT:

İç Konum özelliği en güncel yazılım ve donanıma sahip modeller için geçerlidir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

İç Konum, telsiz kullanıcılarını takip etmek için kullanılır. İç Konum etkinleştirildiğinde telsiz kısıtlı keşfedilebilir kipte olur. Telsizi bulmak ve konumunu belirlemek için özel işaretlemeler kullanılır.

## İç Konum Özelliğini Açma veya Kapatma

İç Konum özelliğini, aşağıdaki işlemlerden birini gerçekleştirerek açabilir veya kapatabilirsiniz.

- Bu özelliğe menüden erişin.
  - a.  ile menüye erişin düğmesine basın.
  - b.  ya da  ile Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.
  - c.  ya da  veya İç Konum seçeneğine gidin ve seçmek için  düğmesine basın.
  - d. İç Konum özelliğini açmak için  düğmesine basın.

Ekranında İç Konum Açık bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi görüntülenir.

- Başarısız olursa ekranda Açma İşlemi Başarısız bilgisi görüntülenir. Olumsuz gösterge tonu duyulur.

- e. İç Konum özelliğini kapatmak için  düğmesine basın.

Ekranında İç Konum Kapalı bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi kaybolur.
- Başarısız olursa ekranda Kapatma İşlemi Başarısız bilgisi görüntülenir. Olumsuz gösterge tonu duyulur.

- Bu özelliğe programlanmış düğmeyi kullanarak erişin.
  - a. İç Konum özelliğini açmak için programlanmış **İç Konum** düğmesine uzun basın.

Ekranında İç Konum Açık bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi görüntülenir.
  - Başarısız olursa ekranda Açma İşlemi Başarısız bilgisi görüntülenir. Başarısız olursa olumsuz gösterge tonu duyarsınız.
- b. İç Konum özelliğini kapatmak için programlanmış **İç Konum** düğmesine basın.

Ekranda İç Konum Kapalı bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi kaybolur.
- Başarısız olursa ekranda Kapatma İşlemi Başarısız bilgisi görüntülenir. Başarısız olursa olumsuz gösterge tonu duyarsınız.

## İç Konum İşaretleme Bilgilerine Erişim

İç Konum işaretleri ile ilgili bilgilere erişmek için bu prosedürü uygulayın.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  ile Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  veya İç Konum seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak İşaretleme öğesine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

Ekranda, işaretleme bilgileri görüntülenir.

## Çoklu Saha Kontrolleri

Bu özellikler, geçerli telsiz kanalınız bir Capacity Max sistemi için yapılandırıldığında geçerlidir.

### Manuel Saha Araması Başlatma

Alınan sinyal gücü düşükse daha iyi sinyale sahip başka bir saha bulmak üzere manuel saha araması başlatmak için bu prosedürü uygulayın.

Telsiz yeni bir saha bulursa:

- Bir olumlu gösterge tonu duyulur.

Telsiz yeni bir saha bulamazsa:

- Bir olumsuz gösterge tonu duyulur.

### Saha Kilidi Açık/Kapalı

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahayla birlikte diğer sahaları da arar.

Programlanmış **Saha Kilidi** düğmesine basın.

**Saha Kilidi** işlevi açıksa:

- Telsizin geçerli sahaya kilitlendiğini belirten bir olumlu gösterge tonu duyulur.
- Ekranda, **Site Locked** (Saha Kilitlendi) bilgisi görüntülenir.

**Saha Kilidi** işlevi kapalıysa:

- Telsizin kilidinin açıldığını belirten bir olumsuz gösterge tonu duyulur.
- Ekranda, **Site Unlocked** (Saha Kilidi Açıldı) bilgisi görüntülenir.

## Komşu Saha Listesine Erişme

Bu özellik kullanıcının geçerli ana sahanın yanında bulunan sahaların listesini kontrol etmesini sağlar. Komşu Saha Listesine erişmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  ile Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile Komşu Sahalar seçeneğine gidin. Seçmek için  düğmesine basın.

## Ana Kanal Hatırlatıcısı

Bu özellik, telsiz belirli bir süre ana kanala ayarlı olmadığında bir hatırlatıcı sağlar.

Bu özellik etkinleştirilmişse telsiziniz bir süreliğine ana kanala ayarlanmadığında düzenli aralıklarla şu durum oluşur:

- Ana Kanal Hatırlatıcısı tonu ve anonsu duyulur.
- Ekranın ilk satırında Ana Kanal bilgisi görüntülenir.
- İkinci satırda Olmayan bilgisi görüntülenir.

## Ana Kanal Hatırlatıcısını Susturma

Ana Kanal Hatırlatıcısı duyulduğunda hatırlatıcının sesini geçici olarak kapatabilirsiniz.

**Ana Kanal Hatırlatıcısı Sessize Al** programlanabilir düğmesine basın.

Ekranın ilk satırında HCR, ikinci satırında Sessiz ifadesi görüntülenir.

## Yeni Ana Kanal Ayarlama

Ana Kanal Anımsatıcı duyulduğunda yeni bir ana kanal ayarlayabilirsiniz.

1 Aşağıdakilerden birini yapın:

- Geçerli kanalı yeni Ana Kanal olarak ayarlamak için programlanabilir **Ana Kanalı Sıfırla** düğmesine basın. Aşağıdaki adımları atlayın. Ekranın ilk satırında kanal adı, ikinci satırında Yeni Ana Kanal ifadesi gösterilir.
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Ana Kanal

bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak istenilen yeni

ana kanal adına gidin. Seçmek için  düğmesine basın.

Ekranında, seçilen ana kanal adının yanında  gösterilir.

## Uzaktan İzleme

Bu özellik, abone adı veya kimliğiyle hedef telsizin mikrofonunu açmak için kullanılır. Bu özelliği hedef telsiz civarındaki her türlü işitilebilir faaliyeti uzaktan izlemek için kullanabilirsiniz.

Hem telsiziniz hem de hedef telsiz bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır.

[Geribildirim Gönder](#)

Başlatıldığında, hedef telsizdeki yeşil LED bir kez yanıp söner. Programlanan sürenin sonunda ya da hedef telsizde kullanıcı herhangi bir işlem yaptığında bu özellik otomatik olarak durur.

## Uzaktan İzleme Başlatma

Telsizinizde Uzaktan İzleme özelliğini başlatmak için buradaki prosedürü uygulayın.

1 Programlanmış **Uzaktan İzleme** düğmesine basın.

2 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.

3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

- İzlenen telsizin sesi, programlanan bir süre boyunca çalmaya başlar ve ekranda Uzaktan İzleme (Uzaktan İzleme) bilgisi görüntülenir. Zamanlayıcının süresi dolduğunda telsiz, bir uyarı tonu verir ve LED söner.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Uzaktan İzleme Başlatma

Telsizinizde Kişi listesini kullanarak Uzaktan İzleme başlatmak için buradaki prosedürü uygulayın.

- Menüye erişmek için  düğmesine basın.
-  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

- Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

-  veya  ile Uzaktan İzleme seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.

- Onay için bekleyin. İşlem başarılı olursa:
  - Bir olumlu gösterge tonu duyulur.
  - Ekranda olumlu bir mini bilgi notu görüntülenir.
  - İzlenen telsizin sesi, programlanan bir süre boyunca çalmaya başlar ve ekranda Uzaktan İzleme (Uzaktan İzleme) bilgisi görüntülenir. Zamanlayıcının süresi dolduğunda telsiz, bir uyarı tonu verir ve LED söner.İşlem başarısız olursa:
  - Bir olumsuz gösterge tonu duyulur.

- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Uzaktan İzlemeler Başlatma

Telsizinizde elle çevirmeyi kullanarak Uzaktan İzleme başlatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.
- 4  veya  ile **Telsiz Numarası** seçeneğine gidin. Seçmek için  düğmesine basın.

### 5 Aşağıdakilerden birini yapın:

- Abone adını veya kimliğini girin ve devam etmek için  düğmesine basın.
- Önceden çevrilmiş kimliği girin ve devam etmek için  düğmesine basın.

### 6 veya ile **Uzaktan İzlm.** seçeneğine gidin. Seçmek için düğmesine basın.

Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.

### 7 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.
- İzlenen telsizin sesi, programlanan bir süre boyunca çalmaya başlar ve ekranda **Uzktn. Monitor (Uzktn İzleme)** bilgisi görüntülenir. Zamanlayıcının süresi dolduğunda telsiz, bir uyarı tonu verir ve LED söner.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Ayarları

Kişiler, telsizinizde adres defteri özellikleri sağlar. Her giriş, çağrı başlatmak için kullandığınız bir ada ya da kimliğe karşılık gelir. Girişler alfabetik olarak sıralanmıştır.

Her giriş, bağlamına göre farklı çağrı tipleriyle ilişkilendirilir: Grup Çağrısı, Özel Çağrı, Yayın Çağrısı, Sahada Herkese Çağrı, Çoklu Sahada Herkese Çağrı, PC Çağrı veya Sevk Çağrısı.

PC Çağrı ve Sevk Çağrısı veriyle ilişkili çağrılardır. Yalnızca uygulamalarla kullanılabilirler. Ayrıntılı bilgi almak için veri uygulamaları belgesine bakın.

Ayrıca Kişiler menüsü, tuş takımlı mikrofondaki bir ya da daha fazla programlanabilir numara tuşuna giriş atamanızı sağlar. Sayı tuşlarına giriş atadığınızda telsiziniz girişler için hızlı arama yapabilir.

### NOT:

Bir girişe atanan her sayı tuşunun önünde bir onay işareti görünür. Boş öğesinin önünde bir onay işareti görünüyorsa girişe bir sayı tuşu atanmamıştır.

Kişilerde yer alan tüm girişler aşağıdaki bilgileri içerir:

- Çağrı Türü
- Çağrı Diğer Adı
- Çağrı Kimliği

### NOT:

Gizlilik özelliği etkin olan kanallar üzerinde gizliliğin etkin olduğu Grup Çağrıları, Özel Çağrılar, Herkese Çağrıları ve Telefon Çağrıları yapabilirsiniz. Yayını sadece sizin telsizinizle aynı Gizlilik Anahtarına ya da Anahtar Değerine ve Anahtar Kimliğine sahip olan hedef telsizler çözebilir.

## Programlanabilir Sayı Tuşlarına Giriş Atama

Telsizinizin programlanabilir sayı tuşlarına giriş atamak için buradaki prosedürü uygulayın.

1

Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

---

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

4  veya  ile **Program Tuşu** seçeneğine gidin. Seçmek için  düğmesine basın.

---

5 Aşağıdakilerden birini yapın:

- İsteddiğiniz sayı tuşu bir girişe atanmadıysa istediğiniz sayı tuşu için  veya  düğmesine basın. Seçmek için  düğmesine basın.
- İsteddiğiniz sayı tuşu bir girişe atandıysa ekranda **Bu Tuş Atandı** uyarısı ve ardından, ilk metin satırında **Üstüne Yaz?** metni görüntülenir. Aşağıdakilerden birini yapın:

 veya  ile **Evet** seçeneğine gidin.

Seçmek için  düğmesine basın.

Telsiz olumlu bir gösterge tonu verir ve ekranda **Kişi Kaydedildi** bilgisi ve olumlu bir mini bilgi notu görüntülenir.

Önceki adıma dönmek için  veya  ile **Hayır** seçeneğine gidin.

Her giriş farklı bir numara tuşuna atanabilir. Bir girişe atanan her numara tuşunun önünde bir  ögesi görüntülenir.  ögesi **Boş** ifadesinin önünde yer alıyorsa bu sayı tuşu atanmamıştır. Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.

Ekran otomatik olarak önceki menüye döner.

---

## Girişler ve Programlanabilir Sayı Tuşları Arasındaki İlişkilendirmeyi Kaldırma

Telsizinizde girişler ve programlanabilir sayı tuşları arasındaki ilişkilendirmeleri kaldırmak için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Gerekli ad veya kimlik için programlanmış sayı tuşuna uzun basın. Şu adıma geçin: [adım 4](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 4  veya  ile **Program Tuşu** seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  ile **Boş** seçeneğine gidin. Seçmek için  düğmesine basın.

İlk metin satırında **Tüm Tuşları Temiz** mesajı görüntülenir.

- 6  veya  ile **Evet** seçeneğine gidin. Seçmek için  düğmesine basın.

### NOT:

Bir giriş silindiğinde, bu giriş ve onun için programlanmış sayı tuşu/tuşları arasındaki ilişki kaldırılmış olur.

Bir olumlu gösterge tonu duyulur. Ekranda **Kişi Kaydedildi** bilgisi görüntülenir. Ekran otomatik olarak önceki menüye döner.

## Yeni Kişiler Ekleme

Telsizinizde yeni kişiler eklemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  ile Yeni Kişi seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Telsiz Kişisi ya da Telefon Kişisi seçenekleri arasından kişi türünü seçin. Seçmek için  düğmesine basın.

---

- 5 Tuş takımıyla kişi numarasını girin ve devam etmek için  düğmesine basın.

---

- 6 Tuş takımıyla kişinin adını girin ve devam etmek için  düğmesine basın.

---

- 7 Gereken zil türü için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Bir olumlu gösterge tonu duyulur. Ekranda olumlu bir mini bilgi notu görüntülenir.

---

## Çağrı Göstergesi Ayarları

Bu özellik, telsiz kullanıcılarının çağrı veya yazılı mesaj zil tonlarını yapılandırmasını sağlar.

## Özel Çağrılar için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Telsizinizde Özel Çağrılar için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

- 1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Tonlar Uyarılar bölümüne gidin. Seçmek için  düğmesine basın.

---

5  veya  ile Çağrı Ziller seçeneğine gidin. Seçmek için  düğmesine basın.

---

6  veya  ile Özel Çağrı seçeneğine gidin. Seçmek için  düğmesine basın.

---

7 İstedığınız ton için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

---

## Yazılı Mesajlar için Çağrı Zillerini Etkinleştirme veya Devre Dışı Bırakma

Telsizinizde yazılı mesajlara ilişkin çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar

Uyarılar bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  ile Çağrı Ziller seçeneğine

gidin. Seçmek için  düğmesine basın.

6  veya  düğmesine basarak Metin Mesajı

bölümüne gidin. Seçmek için  düğmesine basın. Ekranda  simgesi ve geçerli ton görüntülenir.

7 İstedığınız ton için  veya  düğmesine

basın. Seçmek için  düğmesine basın. Ekranda, seçilen dilin yanında  simgesi görüntülenir.

## Çağrı Uyarısı için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Telsizinizde Çağrı Uyarıları için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar

Uyarılar bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

---

6  veya  düğmesine basarak Çağrı Uyarısı seçeneğine gidin. Seçmek için  düğmesine basın.

---

7 İstenen ton için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ekranda, seçilen dilin yanında ✓ simgesi görüntülenir.

---

## Seçici Çağrılar için Çağrı Zillerini Etkinleştirme veya Devre Dışı Bırakma

Telsizinizde Seçici Çağrılar için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

---

5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

---

6  veya  düğmesine basarak Seçici Çağrı seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda ✓ simgesi ve geçerli ton görüntülenir.

---

- 7 İstenen ton için  veya  düğmesine basın.  
Seçmek için  düğmesine basın. Ekranda, seçilen dilin yanında ✓ simgesi görüntülenir.

## Yazılı Telemetri Durumu için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Telsizinizde metinli telemetri durumu için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Uyarıları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Tonlar Uyarıları bölümüne gidin. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

- 6  veya  ile Telemetri. Seçmek için  düğmesine basın.  
Geçerli ton bir ✓ simgesi ile belirtilir.

## Zil Stilleri Atama

Telsiz belirli bir kişiden Çağrı Uyarısı veya Metin Mesajı alırken önceden tanımlanmış on adet zil sesinden birini çalacak şekilde programlanabilir. Listede gezindikçe, telsiz her zil stilinin sesini çıkarır. Telsizinizde zil stillerini atamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın. Girişler alfabetik olarak sıralanmıştır.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak **Düzenle** seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile **Zil Sesini Düzenle** seçeneğine gidin. Seçmek için  düğmesine basın.

6 İsteddiğiniz ton için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
✓ Seçili tonun yanında simgesi görüntülenir.

## Alarm Tonu Ses Seviyesini Yükseltme

Telsiz, bir telsiz çağrısı yanıtlanmadığında sürekli olarak uyarı verecek şekilde programlanabilir. Alarm tonu ses seviyesi zaman içinde otomatik olarak yükselir. Bu özelliğe Kademeli Uyarı denir.

## Çağrı Kaydı Özellikleri

Telsiziniz giden, cevaplanan ve cevapsız tüm Özel Çağrıların kaydını tutar. Arama geçmiş özelliği, son çağrıları görüntülemek ve yönetmek için kullanılır.

Sistem yapılandırmasına bağlı olarak telsizinizde Cevapsız Çağrı Uyarıları arama geçmişi kayıtlarına dahil edilebilir. Her çağrı listenizde aşağıdaki görevleri gerçekleştirebilirsiniz:

- Adı veya Kimliği Kişilerde Saklama
- Çağrıyı Silme

- Tüm Çağruları Silme
- Ayrıntıları Görme

## Son Çağruları Görüntüleme

Telsizinizdeki son çağruları görüntülemek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Arama

Geçmiş i seçeneğine gidin. Seçmek için  düğmesine basın.

3 Tercih edilen liste için  veya  düğmesine basın. Cevapsız, Cevaplanan ve Giden seçenekleri listelenir.

Seçmek için  düğmesine basın.

Ekranda en son yapılan giriş görüntülenir.

4 Listeyi görüntülemek için  veya  düğmesine basın.

PTT düğmesine basarak ekranda gösterilmekte olan ad veya kimlikle bir Özel Çağrı başlatabilirsiniz.

## Çağrı Listesindeki Ad veya Kimlikleri Saklama

Çağrı listesindeki adları veya kimlikleri telsizinize kaydederek saklamak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  ile Arama Geçmiş i seçeneğine gidin. Seçmek için  düğmesine basın.

3 Gerekli liste için  veya  düğmesine basın. Seçmek için  düğmesine basın.

4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

5  veya  ile **Sakla** seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda yanıp sönen bir imleç görüntülenir.

---

6 Gereken adın kalan karakterlerini girin. Seçmek için  düğmesine basın. Bir kimliği ad olmadan saklayabilirsiniz. Ekranda olumlu bir mini bilgi notu görüntülenir.

---

## Çağrı Listesindeki Çağrılar Silme

Çağrı listesindeki çağrıları telsizinizden silmek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak **Arama** Geçmiş'i seçeneğine gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak istenen listeye gidin. Seçmek için  düğmesine basın. Liste boşsa:

- Bir ton duyulur.
- Ekranda **Liste Boş** bilgisi görüntülenir.

---

4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

5  veya  düğmesine basarak **Giriş Silinsin Mi?** seçeneğine gidin. Seçmek için  düğmesine basın.

---

6 Aşağıdakilerden birini yapın:

- Girişi silmek için  düğmesine basarak Evet'i seçin.  
Ekranda, Entry Deleted (Giriş Silindi) bilgisi görüntülenir.
-  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın.  
Telsiz önceki ekrana döner.

## Çağrı Listesindeki Tüm Çağrıları Silme

Çağrı listesindeki tüm çağrıları telsizinizden silmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Arama Geçmiş'i seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak istenen listeye gidin. Seçmek için  düğmesine basın.

- 4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

- 6 Aşağıdakilerden birini yapın:

- Tüm girişleri silmek için  ile Evet seçeneğini belirleyin.  
Ekranda olumlu bir mini bilgi notu görüntülenir.
-  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın.  
Telsiz önceki ekrana döner.

## Çağrı Listesindeki Ayrıntıları Görüntüleme

Çağrı listesindeki ayrıntıları telsizinizde görüntülemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Arama Geçmişini seçeneğine gidin. Seçmek için  düğmesine basın.
- 3 Gerekli liste için  veya  düğmesine basın. Seçmek için  düğmesine basın.
- 4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  ile Ayrıntıları Gör seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda ayrıntılar görüntülenir.

## Çağrı Uyarısı İşlemi

Çağrı Uyarısı mesaj gönderme sistemi sayesinde, belirli bir telsiz kullanıcıyı müsait olduğunda sizi geri araması için uyarabilirsiniz.

Bu özellik sadece abone adları veya kimlikleri için geçerlidir ve özelliğe menüden Kişiler aracılığıyla ya da elle çevirerek veya programlanmış bir **Tek Tuşla Erişim** düğmesi kullanılarak erişilebilir.

Capacity Max'te Çağrı Uyarısı özelliği telsiz kullanıcısının veya dağıtıcısının, başka bir telsiz kullanıcıya uyarı göndermesini sağlar. Bu kullanıcı telsiz kullanıcısından çağrıyı başlatan telsiz kullanıcıya yanıt vermesini ister. Bu özellikte sesli iletişim yoktur.

Çağrı Uyarısı Çalışması satıcı veya sistem yöneticisi tarafından iki şekilde yapılandırılabilir.

- Telsiz, kullanıcının bir Özel Çağrı yaparak doğrudan çağrıyı başlatan tarafa yanıt vermesi için **PTT**

düğmesine basmasını sağlayacak şekilde yapılandırılmıştır.

- Telsiz, kullanıcının **PTT** düğmesine basarak ve diğer Konuşma Grubu iletişimiyle devam etmesini sağlayacak şekilde yapılandırılmıştır. Çağrı uyarısı girişinde **PTT** düğmesine basıldığında kullanıcının çağrıyı başlatan tarafa yanıt vermesine izin verilmez. Kullanıcı, Çağrı Kaydı menüsünde Cevapsız Çağrı kaydına gitmeli ve Çağrı Uyarısını yanıtlamalıdır.

Yayında Olmayan Çağrı Yapma (OACSU) özel çağrısı kullanıcının hemen yanıt vermesini sağlarken Tamamen Yayında Olmayan Çağrı Yapma (FOACSU) özel çağrısı, çağrı için kullanıcı onayı gerektirir. Bu nedenle, çağrı uyarısı özelliği için OACSU türü çağrılar önerilir. Bkz. [Özel Çağrı sayfa 79](#)

## Çağrı Uyarıları Yapma

Telsizinizde Çağrı Uyarıları yapmak için bu prosedürü uygulayın.

- 1 Programlanmış **Tek Tuşla Erişim** düğmesine basın. Ekranda, Çağrı Uyarısı ve abone adı veya kimliği görüntülenir. Yeşil LED yanar.

- 2 Onay için bekleyin.

Çağrı Uyarısı onayı alınırsa ekranda olumlu bir mini bilgi notu görüntülenir.

Çağrı Uyarısı onayı alınmazsa ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Çağrı Uyarıları Yapma

Telsizinizde Kişi listesini kullanarak Çağrı Uyarıları yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.
- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Çağrı

Uyarısı seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda, Çağrı Uyarısı ve abone adı veya kimliği görüntülenir. Yeşil LED yanar.

5 Onay için bekleyin.

- Çağrı Uyarısı onayı alınırsa ekranda olumlu bir mini bilgi notu görüntülenir.
- Çağrı Uyarısı onayı alınmazsa ekranda olumsuz bir mini bilgi notu görüntülenir.

## Çağrı Uyarılarına Yanıt Verme

Telsizinizde Çağrı Uyarılarını yanıtlamak için bu prosedürü uygulayın.

Çağrı Uyarısı aldığınızda:

- Tekrarlanan bir ton duyulur.
- Sarı LED yanıp söner.

- Ekranda çağrıyı yapan telsizin adı veya kimliğiyle bir Çağrı Uyarısının listelendiği bildirim listesi görüntülenir.

Satıcınızın veya sistem yöneticinizin yaptığı yapılandırmaya bağlı olarak aşağıdakilerden birini yaparak Çağrı Uyarısına yanıt verebilirsiniz:

- **PTT** düğmesine basın ve doğrudan çağrıyı yapan tarafa Özel Çağrı ile yanıt verin.
- Normal konuşma grubu iletişimine devam etmek için **PTT** düğmesine basın. Çağrı Uyarısı, Çağrı Kaydı menüsünde Cevapsız Çağrı seçeneğine taşınır. Cevapsız Çağrı kaydından size çağrı yapan kişiye yanıt verebilirsiniz.

Daha fazla bilgi için bkz. [Bildirim Listesi sayfa 198](#) ve [Çağrı Kaydı Özellikleri sayfa 132](#).

## Sessize Alma Modu

Sessiz Kipi sayesinde kullanıcı, telsizin tüm sesli göstergelerinin sesini kapatabilir.

Sessiz Kipi özelliği başlatıldığında, Acil Durum işlemleri gibi yüksek öncelikli özellikler haricinde tüm sesli göstergelerin sesi kapatılır.

Sessiz Kipinden çıktığında telsiz, devam eden tonları ve ses yayınlarını oynatmaya devam eder.

**NOT:**

Bu özelliği satın alabilirsiniz. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Sessiz Kipini Açma

Sessiz Kipini açmak için bu prosedürü uygulayın.

Bu özelliğe programlanmış **Sessiz Kipi** düğmesini kullanarak erişin.

Sessiz kipi etkinleştirildiğinde şunlar meydana gelir:

- Olumlu Gösterge Tonu duyulur.
- Ekranda Sessiz Kipi Açık bilgisi gösterilir.
- Kırmızı LED ışığı yanıp sönmeye başlar ve Sessiz Kipinden çıkılana kadar yanıp sönmeye devam eder.
- Giriş ekranında **Sessiz Kipi** simgesi gösterilir.
- Radyonun sesi kapatılır.
- Sessiz Kipi Zamanlayıcısı, ayarlanan süre dolana kadar geri saymaya başlar.

## Sessiz Kipi Zamanlayıcısını Ayarlama

Sessiz Kipi Zamanlayıcısının ayarlanmasıyla, Sessiz Kipi özelliği önceden belirlenmiş bir süre boyunca etkinleştirilebilir. Telsiz menüsünde yapılandırılan zamanlayıcı süresi, 0,5 ile 6 saat arasında değişebilir. Zamanlayıcının süresi dolduğunda, Sessiz Kipinden çıkarılır.

Zamanlayıcı 0'da bırakılırsa programlanan **Sessiz Kipi** düğmesi basılana kadar, telsiz süresiz olarak Sessiz kipinde kalır.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak **Sessize Alma** Zamanlayıcısı seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak her bir hanenin sayısal değerini düzenleyin ve  düğmesine basın.

## Sessiz Kipinden Çıkma

Sessiz Kipi Zamanlayıcısının süresi dolduktan sonra bu özellikten otomatik olarak çıkılabilir.

Sessiz kipinden manuel olarak çıkmak için aşağıdakilerden birini yapın:

- Programlanmış **Sessiz Kipi** düğmesine basın.
- Her girişte **PTT** düğmesine basın.

Sessiz kipi devre dışı bırakıldığında şunlar meydana gelir:

- Olumsuz Gösterge Tonu duyulur.
- Ekranda **Sessiz Kipi Kapalı** bilgisi gösterilir.

- Yanıp sönen kırmızı LED kapanır.
- Ekrandaki **Sessiz Kipi** simgesi kaybolur.
- Telsiziniz sessiz kipten çıkar ve hoparlör durumu eskisine döner.
- Zamanlayıcının süresi dolmamışsa Sessiz kipi zamanlayıcısı durdurulur.

### NOT:

Kullanıcı ses yayını yaptığında veya programlanmamış bir kanala geçtiğinde de Sessiz Kipten çıkılır.

## Acil Durum İşlemi

Acil Durum Alarmı, kritik durumları bildirmek için kullanılır. İstedığınız zaman, geçerli kanalda faaliyet olduğunda bile bir Acil Durum başlatabilirsiniz.

Capacity Max'te alıcı telsiz tek seferde yalnızca bir tek Acil Durum Alarmını destekleyebilir. Başlatılması durumunda ikinci Acil Durum Alarmı, birinci alarmı geçersiz kılar.

Bir Acil Durum Alarmı alındığında, alıcı alarmı silmeyi veya Alarm Listesinden çıkmayı tercih edebilir ya da **PTT** düğmesine basarak ve acil olmayan ses yayını yaparak Acil Durum Alarmını yanıtlayabilir.

Bayiniz veya sistem yöneticiniz programlanmış **Acil Durum** düğmesi için uzun basma haricinde tüm düğmelere benzer şekilde düğmeye basma süresi ayarlayabilir:

#### Kısa Basma

0,05 ile 0,75 saniye arasındaki süre.

#### Uzun Basma

1,00 - 3,75 saniye arasındaki süre.

**Acil Durum** düğmesine Acil Durum Açık/Kapalı özelliği atanmıştır. Bayinizden **Acil Durum** düğmesine atanan işlemi öğrenin.

#### NOT:

**Acil Durum** düğmesine kısa basma Acil Durum kipini açacak şekilde ayarlandıysa **Acil Durum** düğmesine uzun basma için Acil Durumdan çıkma işlemi atanmıştır.

**Acil Durum** düğmesine uzun basma Acil Durum kipini açacak şekilde ayarlandıysa **Acil Durum** düğmesine kısa basma için Acil Durumdan çıkma işlemi atanmıştır.

Telsiziniz üç Acil Durum Alarmını destekler:

- Acil Durum Alarmı
- Çağrılı Acil Durum Alarmı
- Ses Takipli Acil Durum Alarmı

[Geribildirim Gönder](#)

Ayrıca, her bir alarmın aşağıda belirtilen türleri bulunur:

#### Normal

Telsiz, bir alarm sinyali gönderir ve sesli ve/veya görsel gösterge verir.

#### Sessiz

Telsiz, bir alarm sinyali gönderir ancak sesli veya görsel gösterge vermez. Telsiz, programlanmış *hot mic* yayın süresi doluncaya ve/veya **PTT** düğmesine basılıncaya kadar hoparlör üzerinden hiç ses duyulmadan çağrılar alır.

#### Sesli Sessiz

Telsiz herhangi bir sesli veya görsel gösterge olmadan bir alarm sinyali gönderir ancak gelen çağrılar hoparlörden duyulmasını sağlar.

#### NOT:

Programlanmış **Acil Durum** düğmesine veya **Acil Durum** pedalına yukarıdaki Acil Durum Alarmlarının yalnızca biri atanabilir.

## Acil Durum Alarmları Gönderme

Bu özellik, bir grup telsiz üzerinde uyarı göstergesi başlatan sessiz bir sinyal olan Acil Durum Alarmı göndermenizi sağlar. Telsizinizden Acil Durum Alarmları göndermek için bu prosedürü uygulayın.

Telsiziniz Sessiz kipe ayarlandığında Acil Durum kipindeyken herhangi bir sesli veya görsel uyarı görüntüleme.

### 1 Programlanmış **Acil Durum Açık** düğmesine basın.

Bu sonuçlardan birini göreceksiniz:

- Ekranda Tx Alarmları bilgisi ve hedef telsizin adı görüntülenir.
- Ekranda Tx Telgraf ve hedef telsizin adı görüntülenir.

Yeşil LED yanar.**Acil Durum** simgesi görünür.

#### **NOT:**

Programlanmışsa Acil Durum Arama Tonu duyulur. Bu ton, telsiz ses ilettiğinde veya aldığı anda sessize alınır ve telsiz Acil Durum kipinden çıktığında durdurulur. Acil Durum Arama tonu, satıcı veya sistem yöneticisi tarafından programlanabilir.

### 2 Onay için bekleyin.

İşlem başarılı olursa:

- Acil Durum tonu duyulur.

- Yeşil LED yanıp söner.
- Ekranda Alarm Gön. bilgisi görüntülenir.

Tüm yeniden denemelere rağmen başarısız olunduysa:

- Bir ton duyulur.
- Ekranda Alarm Başarısız bilgisi görüntülenir.

Telsiz, Acil Durum Alarm kipinden çıkar ve Giriş ekranına döner.

#### **NOT:**

Acil durum işlemi, yalnızca Acil Durum Alarmı için yapılandırıldığında yalnızca Acil Durum Alarmının iletilmesinden oluşur. Sistemden onay alındığında veya kanal erişim denemeleri sona erdiğinde acil durum sona erer.

Yalnızca Acil Durum Alarmı çalışması sırasında hiçbir sesli çağrı Acil Durum Alarmının gönderilmesiyle ilişkilendirilmez.

## Çağrı ile Acil Durum Alarmları Gönderme

Bu özellik, bir grup telsize veya dağıtıcıya Çağrıyla Acil Durum Alarmı göndermenizi sağlar. Grup içerisindeki bir altyapıdan onay alındıktan sonra telsiz grubu programlanmış Acil Durum kanalı üzerinden iletişime geçebilir.

Alarm işleminden sonra bir acil durum çağrısı yapmak için telsizin Acil Durum Alarmı için yapılandırılması gerekir.

### 1 Programlanmış **Acil Durum Açık** düğmesine basın.

Ekranda **Tx Alarmı** bilgisi ve hedef telsizin adı görüntülenir. **Acil Durum** simgesi görüntülenir. Yeşil LED yanar.

#### **NOT:**

Programlanmışsa Acil Durum Arama Tonu duyulur. Bu ton, telsiz ses ilettiğinde veya aldığı anda sessize alınır ve telsiz Acil Durum kipinden çıktığında durdurulur.

Acil Durum Alarmı onayı başarıyla alınırsa:

- Acil Durum tonu duyulur.
- Yeşil LED yanıp söner.

- Ekranda Alarm Göm. bilgisi görüntülenir.
- Telsiz, ekranda Acil Durum bilgisi ve hedef grup adı görüldüğünde Acil Durum çağrısı kipine girer.

Acil Durum Alarmı onayı başarıyla alınmazsa:

- Tüm denemeler sona erer.
- Düşük perdeli bir ton duyulur.
- Ekranda Alarm Başarısız bilgisi görüntülenir.
- Telsiz Acil Durum Alarm kipinden çıkar.

### 2 Ses yayını başlatmak için **PTT** düğmesine basın.

Yeşil LED yanar. Ekranda **Grup Çağrısı** simgesi görüntülenir.

### 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 4 Dinlemek için **PTT** düğmesini bırakın.  
Ekranda arayan ve grup adları görüntülenir.

---

- 5 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

---

- 6 Acil Durum kipinden çıkmak için **Acil Durum Kapalı** düğmesine basın.  
Telsiz, Giriş ekranına geri döner.

### NOT:

Telsizinizin nasıl programlandığına bağlı olarak, Konuşma İzni tonunu duyabilir veya duymayabilirsiniz. Telsiz satıcınız veya sistem yöneticiniz telsizinizin Acil Durum için nasıl programlandığına dair size daha fazla bilgi verebilir.

Acil Durum Çağrısı başlatıcı,  düğmesine basarak sürmekte olan bir acil durum çağrısını sonlandırabilir. Telsiz çağrı boşta durumuna döner, fakat acil durum çağrısı ekranı açık kalır.

## Ses Takipli Acil Durum Alarmları Gönderme

Bu özellik, bir grup telsize Ses Takipli Acil Durum Alarmı göndermenizi sağlar. Telsizinizin mikrofonu otomatik olarak etkin hale gelir. Böylece **PTT** düğmesine basmadan telsiz grubuyla iletişim kurabilirsiniz. Mikrofonun bu etkin durumuna *hot mic* de denir.

**NOT:**

Telsiziniz arka aksesuar konektörüne bağlı, IMPRES olmayan mikrofonları algılayamaz. Belirtilen programlanmış konektörde mikrofon algılanmadığında, telsiziniz alternatif konektörü kontrol eder. Bu noktada telsiziniz algılanan mikrofona öncelik verir.

Telsizinizin Acil Durum Devir Kipi etkinse *hot mic* tekrarlama ve alma süresi önceden programlanmış süre kadardır. Acil Durum Devir Modundayken gelen çağrılar hoparlörden duyulur.

Programlanmış alma süresi içinde **PTT** düğmesine basarsanız **PTT** düğmesini bırakmanız gerektiğini bildiren yasak ton sesi duyarsınız. Telsiz **PTT** düğmesine basıldığını yok sayar ve Acil Durum kipinde kalır.

*Hot mic* sırasında **PTT** düğmesine basarsanız ve *hot mic* süresi dolduktan sonra da basmaya devam ederseniz telsiz **PTT** düğmesi bırakılana kadar yayın yapmayı sürdürür.

Acil Durum Alarmı talebi başarısız olursa telsiz yeniden talep göndermeyi denemez ve doğrudan *hot mic* durumuna geçer.

**NOT:**

Bazı aksesuarlar *hot mic* durumunu desteklemeyebilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Telsizinizden ses takipli Acil Durum Alarmları göndermek için bu prosedürü uygulayın.

- 1 Programlanmış **Acil Durum Açık** düğmesine ya da **Acil Durum** pedalına basın.

Şu sonuçlardan birini görürsünüz:

- Ekranda Tx Alarmı bilgisi ve hedef telsizin adı görüntülenir.
- Ekranda Tx Telgraf ve hedef telsizin adı görüntülenir.

Yeşil LED yanar. **Acil Durum** simgesi görünür.

- 2 Ekranda Alarm Gön. bilgisi görüldüğünde anlaşılır biçimde mikrofona doğru konuşun.

Telsiz aşağıdaki durumlarda yayın yapmayı otomatik olarak durdurur:

- Acil Durum Devir Kipi etkinse *hot mic* ile çağrı alma süreleri arasındaki devir sonlandığında.

- Acil Durum Devir Kipi'nin etkin olmadığı durumlarda *hot mic* süresi dolduğunda.

### 3 Acil Durum kipinden çıkmak için **Acil Durum Kapalı** düğmesine basın.

Telsiz, Giriş ekranına geri döner.

## Acil Durum Alarmları Alma

Alıcı telsiz tek seferde yalnızca bir tek Acil Durum Alarmını destekleyebilir. Başlatılması durumunda ikinci Acil Durum Alarmı, birinci alarmı geçersiz kılar. Telsizinizden Acil Durum Alarmları almak ve görüntülemek için bu prosedürü uygulayın.

Bir Acil Durum Alarmı aldığınızda:

- Bir ton duyulur.
- Kırmızı LED ışığı yanıp söner.
- Ekranda Acil Durum Alarmı Listesi, Acil Durum Konuşma Grubu Kimliği veya adı ile yayın yapan telsizin kimliği veya adı görüntülenir.

### 1 Alarmı görüntülemek için düğmesine basın.

### 2 İşlem seçeneklerini ve Alarm Listesindeki girişin ayrıntılarını görüntülemek için düğmesine basın.

### 3 Alarm listesinden çıkmak için düğmesine basın ve Evet seçeneğini belirleyin.

Telsiz giriş ekranına gönder ve üstte **Acil Durum Simgesi** görüntülenir. Bu simge çözülmemiş Acil Durum Alarmı olduğunu gösterir. Alarm Listesi'ndeki giriş silindiğinde **Acil Durum Simgesi** kaybolur.

### 4 Menüye erişmek için düğmesine basın.

### 5 Alarm listesini yeniden ziyaret etmek için Alarm Listesi öğesini seçin.

### 6 Ton duyulur ve Acil Durum kipinden çıkılıncaya kadar kırmızı LED yanıp söner. Ancak ton sessize alınabilir. Aşağıdakilerden birini yapın:

- Acil Durum Alarmını alan telsiz grubunu aramak için **PTT** düğmesine basın.
- Herhangi bir programlanabilir düğmeye basın.

## Acil Durum Alarmlarını Yanıtlama

Bir Acil Durum Alarmı alındığında, alıcı alarmı silmeyi veya Alarm Listesinden çıkmayı tercih edebilir ya da **PTT** düğmesine basarak ve acil olmayan ses yayını yaparak Acil Durum Alarmını yanıtlayabilir. Telsizinizden Acil Durum Alarmlarını yanıtlamak için buradaki prosedürü uygulayın.

- 1 Acil Durum Alarmı Göstergesi etkinleştirilmişse telsiz bir Acil Durum Alarmı aldığında Acil Durum Alarmı Listesi görünür. Gerekli ad veya kimlik için  ya da  düğmesine basın.

- 2 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Acil durum olmayan sesli yayınları, Acil Durum Alarmı'nın hedeflendiği gruba iletmek için **PTT** düğmesine basın.  
Yeşil LED yanar.

- 3 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
- **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

- 4 Dinlemek için **PTT** düğmesini bırakın.

Acil durumu başlatan telsiz yanıt verdiğinde:

- Kırmızı LED ışığı yanıp söner.
- Ekranda **Acil Durum Çağrısı** simgesi, Acil Durum Konuşma Grubu Kimliği veya adı ile yayını yapan telsizin kimliği veya adı görüntülenir.

### NOT:

Acil Durum Çağrısı Göstergesi etkin değilse ekranda **Grup Çağrısı** simgesi, Acil Durum Konuşma Grubu Kimliği veya adı ile yayını yapan telsizin kimliği veya adı görüntülenir.

## Acil Durum Alarmlarına Çağrı ile Yanıt Verme

Acil Durum Alarmlarına telsizinizden çağrı ile yanıt vermek için bu prosedürü uygulayın.

Bir Acil Durum Çağrısı aldığınızda:

- Acil Durum Çağrısı Göstergesi ve Acil Durum Çağrısı Kod Çözme Tonu etkinse Acil Durum Çağrısı Tonu duyulur. Acil Durum Çağrısı Göstergesi etkinse Acil Durum Çağrısı Tonu duyulur.
- Ekranın sağ üst köşesinde **Acil Durum Çağrısı** simgesi görüntülenir.
- Metin satırında Acil Durum Konuşma Grubu kimliği veya adı ve yayın yapan telsizin kimliği veya adı görüntülenir.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

- 1 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.  
Yeşil LED yanar.

- 2 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 3 Dinlemek için **PTT** düğmesini bırakın.

Acil durumu başlatan telsiz yanıt verdiğinde:

- Kırmızı LED ışığı yanıp söner.
- Ekranda **Acil Durum Çağrısı** simgesi, Acil Durum Konuşma Grubu Kimliği veya adı ile yayın yapan telsizin kimliği veya adı görüntülenir.

### NOT:

Acil Durum Çağrısı Göstergesi etkin değilse ekranda **Grup Çağrısı** simgesi, Acil Durum Konuşma Grubu Kimliği veya adı ile yayın yapan telsizin kimliği veya adı görüntülenir.

## Durum Mesajı

Bu özellik, kullanıcının başka telsizlere durum mesajı göndermesini sağlar.

Hızlı Durum listesi, CPS-RM kullanılarak yapılandırılır ve maksimum 99 durum içerir.

Durum mesajlarının maksimum uzunluğu, 16 karakterdir.

**NOT:**

Her durumun, 0-99 arasında ilgili bir dijital değeri bulunur. Referans kolaylığı için durumlara ad verilebilir.

## Durum Mesajları Gönderme

Durum mesajı göndermek için aşağıdaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Tek Tuşla Erişim** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  ile Durum seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Hızlı Yanıt seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 5 İstenen abone adı ya da kimliği veya grup adı ya da kimliği için  veya  düğmesine bakın. Seçmek için  düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- LED söner.
- Hızlı Durum ekranına dönmeye önce kısa bir süreliğine ekranda olumlu bir mini bilgi notu görüntülenir.
- Ekranda, gönderilen durum mesajının yanında  simgesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- LED söner.

- Hızlı Durum ekranına dönmeye önce kısa bir süreliğine ekranda işlemin başarısız olduğuna dair bilgi notu görüntülenir.

## Programlanabilir Düğmeyi Kullanarak Durum Mesajı Gönderme

Programlanabilir düğmeyi kullanarak durum mesajı göndermek için bu prosedürü uygulayın.

1 Programlanmış **Durum Mesajı** düğmesine basın.

2 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın. Kişi listesi görüntülenir.

3 İstenen abone adı ya da kimliği veya grup adı ya da kimliği için  veya  düğmesine bakın. Seçmek için  düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- LED söner.

- Hızlı Durum ekranına dönmeye önce kısa bir süreliğine ekranda olumlu bir mini bilgi notu görüntülenir.
- Ekranda, gönderilen durum mesajının yanında  simgesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- LED söner.
- Hızlı Durum ekranına dönmeye önce kısa bir süreliğine ekranda işlemin başarısız olduğuna dair bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Durum Mesajı Gönderme

Kişi listesini kullanarak durum mesajı göndermek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

3 İstenen abone adı ya da kimliği veya grup adı ya da kimliği için  veya  düğmesine bakın. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Durum Gönder seçeneğine gidin. Seçmek için  düğmesine basın.

5 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- LED söner.
- Hızlı Durum ekranına dönmeden önce kısa bir süreliğine ekranda olumlu bir mini bilgi notu görüntülenir.
- Ekranda, gönderilen durum mesajının yanında  simgesi görüntülenir.

İşlem başarısız olursa:

[Geribildirim Gönder](#)

- Bir olumsuz gösterge tonu duyulur.
- LED söner.
- Hızlı Durum ekranına dönmeden önce kısa bir süreliğine ekranda işlemin başarısız olduğuna dair bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Durum Mesajı Gönderme

Elle çevirmeyi kullanarak durum mesajı göndermek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile Telsiz Numarası seçeneğine gidin. Seçmek için  düğmesine basın.

---

5 İstenen abone adı veya kimliğini ya da grup adı veya kimliğini girin. Devam etmek için  düğmesine basın.

---

6  veya  düğmesine basarak Durum Gönder seçeneğine gidin. Seçmek için  düğmesine basın.

---

7 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- LED söner.
- Hızlı Durum ekranına dönmeden önce kısa bir süreliğine ekranda olumlu bir mini bilgi notu görüntülenir.

- Ekranda, gönderilen durum mesajının yanında  simgesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- LED söner.
- Hızlı Durum ekranına dönmeden önce kısa bir süreliğine ekranda işlemin başarısız olduğuna dair bilgi notu görüntülenir.

## Durum Mesajlarını Görüntüleme

Durum mesajlarını görüntülemek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  ile Durum seçeneğine gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

---

4 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Durum mesajının içeriği, telsiz kullanıcısına gösterilir.

---

Alınan durum mesajlarını, Bildirim Listesine erişerek de görüntüleyebilirsiniz. Daha fazla bilgi için bkz. [Bildirim Listesi sayfa 198](#).

## Durum Mesajlarını Yanıtlama

Durum mesajlarını yanıtlamak için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  ile Durum seçeneğine gidin. Seçmek için  düğmesine basın.

---

3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

---

4 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

5 Durum içeriği görüntülenir. Seçmek için  düğmesine basın.

---

6  veya  ile Yanıtla seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 7 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- LED söner.
- Gelen Kutusu ekranına dönmeden önce ekranda olumlu bir mini bilgi notu görüntülenir.
- Ekranda, gönderilen durum mesajının yanında  simgesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- LED söner.
- Gelen Kutusu ekranına dönmeden önce kısa bir süreliğine ekranda işlemin başarısız olduğuna dair bilgi notu görüntülenir.

## Durum Mesajı Silme

Telsinizdeki bir durum mesajını silmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  ile Durum seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 Gerekli durum mesajı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 5 Durum içeriği görüntülenir. Seçmek için  düğmesine basın.

- 6  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın.

7  veya  düğmesine basarak Evet seçeneğine gidin. Seçmek için  düğmesine basın.

- Gelen Kutusu ekranına dönmeden önce ekranda olumlu bir mini bilgi notu görüntülenir.

## Tüm Durum Mesajlarını Silme

Telsizinizdeki tüm durum mesajlarını silmek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  ile Durum seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın.

- Ekranda Liste Baş bilgisi görüntülenir.

## Yazılı Mesaj

Telsiziniz, başka telsizlerden ya da yazılı mesaj uygulamalarından yazılı mesaj gibi veriler alabilmektedir.

İki tür yazılı mesaj vardır: Dijital Mobil Telsiz (DMR) Kısa Metin Mesajı ve metin mesajı. Bir DMR Kısa Yazılı Mesajının maksimum uzunluğu 23 karakterdir. Bir yazılı mesajın maksimum uzunluğu, konu satırı dahil 280 karakterdir. Konu satırı yalnızca e-posta uygulamalarından mesaj aldığınızda görüntülenir.

**NOT:**

Maksimum karakter uzunluğu yalnızca en güncel yazılım ve donanıma sahip modeller için geçerlidir. Daha eski yazılım ve donanıma sahip telsiz modelleri için yazılı mesajın maksimum uzunluğu 140 karakterdir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Arapça için metin girişi yönü sağdan sola doğrudur.

## Metin Mesajları

Yazılı mesajlar Gelen Kutusu'nda saklanır ve en son alınma sırasına göre sıralanır.

Telsiz, faaliyetsizlik sayacının süresi dolduğunda geçerli ekrandan çıkar. İstedığınız zaman Giriş ekranına dönmek

için  düğmesine uzun basın.

## Yazılı Mesajları Görüntüleme

Telsizinizdeki yazılı mesajları görüntülemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

Gelen Kutusu boşsa:

- Ekranda *Liste Boş* bilgisi görüntülenir.
- Tuş Takımı Sesi özelliği açıksa bir ton duyulur.

- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Mesaj bir e-posta uygulamasından geliyorsa ekranda bir konu satırı görüntülenir.

## Telemetri Durumu Metin Mesajlarını Görüntüleme

Gelen kutusundaki telemetri durumu metin mesajını görüntülemek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  ile Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın. Telemetri Durumu yazılı mesajlarına yanıt veremezsiniz. Ekranda Telemetri: <Durum Metin Mesajı> bilgisi görüntülenir.

---

- 5 Giriş ekranına dönmek için  düğmesine uzun basın.

---

## Yazılı Mesajları Yanıtlama

Telsizinizden yazılı mesajları yanıtlamak için buradaki prosedürü uygulayın.

Bir yazılı mesaj aldığınızda:

- Ekranda gönderenin adı veya kimliğiyle birlikte Bildirim listesi görüntülenir.
- Ekranda, **Mesaj** simgesi görüntülenir.

### NOT:

**PTT** düğmesine basılırsa telsiz, Yazılı Mesaj uyarı ekranından çıkar ve mesajı gönderene Özel Çağrı ya da Grup Çağrısı yapar.

### 1 Aşağıdakilerden birini yapın:

-  veya  ile Oku seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda yazılı mesaj görüntülenir. Mesaj bir e-posta uygulamasından geliyorsa ekranda bir konu satırı görüntülenir.
-  veya  ile Sonra Oku seçeneğine gidin. Seçmek için  düğmesine basın.

Telsiz, yazılı mesajı almadan önce bulunduğunuz ekrana döner.

-  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın.

## 2 Aşağıdakilerden birini yapın:

- Gelen kutusuna dönmek için  düğmesine basın.
- Yazılı mesajı yanıtlamak, yönlendirmek veya silmek için ikinci defa  düğmesine basın.

## Yazılı Mesajları Hızlı Mesajlarla Yanıtlama

Telsizinizde yazılı mesajları Hızlı Yazılı mesajlarla yanıtlamak için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Yazılı Mesaj** düğmesine basın. 3. Adım'a geçin.
- Menüye erişmek için  düğmesine basın.

- 2  veya  ile Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın. Mesaj bir e-posta uygulamasından geliyorsa ekranda bir konu satırı görüntülenir.

- 5 Alt menüye erişmek için  düğmesine basın.

- 6  veya  ile Yanıtla seçeneğine gidin. Seçmek için  düğmesine basın.

- 7  veya  ile Hızlı Yanıt seçeneğine gidin. Seçmek için  düğmesine basın.

- 8 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ekranda mesajın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

- 9 Onay için bekleyin.

İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir ton duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.
- Telsiz, Tekr Gönder ekranına geri döner.

Tekr Gönder seçeneği ekranındayken:

Aynı abone veya grup adına ya da kimliğine aynı mesajı tekrar göndermek için  düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.
- Telsiz, Tekr Gönder seçeneği ekranına geri döner.

## Yazılı Mesajları Tekrar Gönderme

Telsizinizdeki yazılı mesajları tekrar göndermek için buradaki prosedürü uygulayın.

## Yazılı Mesajları Yönlendirme

Telsizinizdeki yazılı mesajları yönlendirmek için buradaki prosedürü uygulayın.

Tekrar Gönder ekranındayken:

1 Aynı mesajı başka bir abone veya grup adına ya da kimliğine göndermek için  veya  ile Yönlendir seçeneğine gidin ve  tuşuna basın.

2 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.  
Ekranında mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir ton duyulur.
- Ekranında olumsuz bir mini bilgi notu görüntülenir.

### NOT:

Hedef telsiz adresini manuel olarak seçebilirsiniz (bkz. [Elle Çevirmeyi Kullanarak Yazılı Mesajları Yönlendirme sayfa 448](#)).

## Elle Çevirmeyi Kullanarak Yazılı Mesajları Yönlendirme

Telsizinizde elle çevirmeyi kullanarak yazılı mesajları yönlendirmek için buradaki prosedürü uygulayın.

- 1  veya  düğmesine basarak Yönlendir'e gidin. Seçmek için  düğmesine basın.
- 2 Başka bir abone veya grup adına ya da kimliğine aynı mesajı göndermek için  düğmesine basın.
- 3  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranında Telsiz No: bilgisi görüntülenir.

- 4 Abone kimliğini girin ve devam etmek için  düğmesine basın.
- Ekranında mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

- 5 Onay için bekleyin.

İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir ton duyulur.
- Ekranında olumsuz bir mini bilgi notu görüntülenir.

## Metin Mesajlarını Düzenleme

Mesajı düzenlemek için **Düzenle** seçeneğini belirleyin.

### NOT:

Bir konu satırı varsa (e-posta uygulamalarından alınan mesajlarda) bu konu satırını düzenleyemezsiniz.

- 1  veya  ile **Düzenle** seçeneğine gidin.

Seçmek için  düğmesine basın.

Ekranında yanıp sönen bir imleç görüntülenir.

- 2 Tuş takımını kullanarak mesajınızı düzenleyin.

- Bir karakter sola gitmek için  düğmesine basın.
- Bir karakter sağa gitmek için  veya  düğmesine basın.
- İstenmeyen karakterleri silmek için  düğmesine basın.
- Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

- 3 Mesaj oluşturulduktan sonra  düğmesine basın.

- 4 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Gönder öğesine gidin ve mesajı göndermek için  düğmesine basın.
-  veya  ile Kaydet seçeneğine gidin ve mesajı Taslaklar klasörüne kaydetmek için  düğmesine basın.
- Mesajı düzenlemek için  düğmesine basın.
- Mesajı silmek veya Taslaklar klasörüne kaydetmek arasında seçim yapmak için  düğmesine basın.

## Metin Mesajları Yazma

Telsizinizde metin mesajı yazmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).

- Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Oluştur seçeneğine gidin. Seçmek için  düğmesine basın.

Yanıp sönen bir imleç görüntülenir.

- 4 Tuş takımını kullanarak mesajınızı yazın.

Bir karakter sola gitmek için  düğmesine basın.

Bir karakter sağa gitmek için  veya  düğmesine basın.

İstenmeyen karakterleri silmek için  düğmesine basın.

Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

5 Mesaj oluşturulduktan sonra  düğmesine basın.

Aşağıdakilerden birini yapın:

- Mesajı göndermek için  düğmesine basın.
-  düğmesine basın. Mesajı düzenleme, silme veya kaydetme seçenekleri arasından seçim yapmak için  veya  düğmesine basın. Seçmek için  düğmesine basın.

## Kısa Mesajlar Gönderme

Telsizinizden metin mesajı göndermek için bu prosedürü uygulayın.

Yeni yazdığınız bir metin mesajının veya kayıtlı bir metin mesajının bulunduğu varsayılır.

Mesaj alıcısını seçin. Aşağıdakilerden birini yapın:

- Gerekli ad veya kimlik için  veya  düğmesine basın. Seçmek için  düğmesine basın.
-  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın. Abone kimliğini girin. Ekranın ilk satırında Radio Number: (Telsiz No:) bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Abone adını veya kimliğini girin. .

Ekranında mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Düşük perdeli bir ton duyulur.
- Ekranında olumsuz mini bilgi notu görüntülenir.
- Mesaj, Gönderilen Öğeler klasörüne taşınır.

- Mesaj, Gönderme Başarısız simgesiyle işaretlenir.

### NOT:

Yeni yazılan bir metin mesajında telsiz sizi Tekr Gönder seçeneği ekranına döndürür.

## Gelen Kutusundaki Yazılı Mesajları Silme

Telsizinizde Gelen Kutusu'ndaki yazılı mesajları silmek için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Gelen Kutusu seçeneğine

gidin. Seçmek için  düğmesine basın.

Gelen Kutusu boşsa:

- Ekranda Liste Boş bilgisi görüntülenir.
- Bir ton duyulur.

- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Mesaj bir e-posta uygulamasından geliyorsa ekranda bir konu satırı görüntülenir.

- 5 Alt menüye erişmek için  düğmesine basın.

- 6  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın.

- 7  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın.
- Ekranla olumlu bir mini bilgi notu görüntülenir. Ekran gelen kutusuna döner.

## Gelen Kutusundaki Tüm Yazılı Mesajları Silme

Telsizinizde Gelen Kutusu'ndaki yazılı mesajlarının tamamını silmek için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
- Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  ile Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Gelen Kutusu seçeneğine gidin. Seçmek için  düğmesine basın.
- Gelen Kutusu boşsa:
- Ekranla Liste Boş bilgisi görüntülenir.
  - Bir ton duyulur.

- 4  veya  ile Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın.
- Ekranla olumlu bir mini bilgi notu görüntülenir.

## Gönderilen Yazılı Mesajlar

Bir mesaj başka bir telsize gönderildikten sonra Gönderilenler klasöründe saklanır. En son gönderilmiş yazılı mesaj her zaman Gönderilenler klasörünün en üstüne eklenir. Gönderilmiş bir yazılı mesajı yeniden

gönderebilir, yönlendirebilir, düzenleyebilir veya silebilirsiniz.

Gönderilenler klasörü en fazla 30 adet gönderilmiş mesaj saklayabilir. Klasör dolduktan sonra gönderilen her mesaj otomatik olarak klasördeki en eski tarihli mesajın yerini alır.

Mesaj gönderiliyorken mesaj gönderme ekranından çıkarsanız telsiz Gönderilenler klasöründeki mesajın durumunu ekranda ya da sesli olarak herhangi bir bildirimde bulunmaksızın günceller.

Gönderilenler klasöründe mesajın durumu güncellenmeden önce telsizin kipi değiştirilir ya da kapatılırsa telsiz Sürüyor durumundaki hiçbir mesaj işlemi tamamlayamaz ve mesajı otomatik olarak **Gönderim Başarısız** simgesiyle işaretler.

Telsiz bir defada en fazla beş adet Sürüyor durumundaki mesaj işlemi destekler. Bu süre boyunca telsiz hiçbir yeni mesaj gönderemez ve yeni mesajları otomatik olarak **Gönderim Başarısız** simgesiyle işaretler.

Herhangi bir anda  düğmesine uzun basarsanız telsiz, Giriş ekranına geri döner.

### NOT:

Kanal türü (geleneksel dijital veya Capacity Plus gibi) eşleşmiyorsa Gönderilen bir mesajı sadece düzenleyebilir, yönlendirebilir veya silebilirsiniz.

## Gönderilen Yazılı Mesajları Görüntüleme

Gönderilen yazılı mesajları telsizinizde görüntülemek için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  düğmesine basın.

### 2

 veya  ile Mesajlar seçeneğine gidin.

Seçmek için  düğmesine basın.

### 3

 veya  ile Gönderilenler seçeneğine

gidin. Seçmek için  düğmesine basın.

Gönderilenler klasörü boşa:

- Ekranda Liste Boş bilgisi görüntülenir.

- Tuş Takımı Sesi özelliği açıksa düşük bir ton duyulur.

4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Ekranın sağ üst köşesindeki simge mesajın durumunu belirtir. Bkz. [Gönderilenler Simgeleri](#).

## Gönderilen Yazılı Mesajları Gönderme

Telsizinizden metin mesajı göndermek için buradaki prosedürü uygulayın.

Gönderilmiş bir mesajı görüntülerken:

1 

2 Gönderilen metin mesajını tekrar gönderebilir veya yönlendirebilirsiniz. Aşağıdakilerden birini yapın:

-  ile Tekr. Gönder seçeneğine gidin. Seçmek için  düğmesine basın.

-  ile Yönlendir seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranla mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranla olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir ton duyulur.
- Ekranla olumsuz bir mini bilgi notu görüntülenir.
- Telsiz, Tekr. Gönder ekranına ilerler. Daha fazla bilgi için bkz. [Yazılı Mesajları Tekrar Gönderme sayfa 159](#).

## Gönderilen Yazılı Mesajları Gönderilenler Klasöründen Silme

Telsizinizde Gönderilenler klasörlerindeki gönderilmiş yazılı mesajları silmek için buradaki prosedürü uygulayın.

Gönderilmiş bir mesajı görüntülerken:

- 1 

---

- 2  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın.

## Gönderilen Tüm Yazılı Mesajları Gönderilenler Klasöründen Silme

Telsizinizde Gönderilenler klasörlerindeki gönderilmiş yazılı mesajların tamamını silmek için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).

- Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  ile Gönderilenler seçeneğine gidin. Seçmek için  düğmesine basın.

Gönderilenler klasörü boşa:

- Ekranda Liste Boş bilgisi görüntülenir.
- Bir ton duyulur.

- 4  veya  düğmesine basarak Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Aşağıdakilerden birini yapın:

-  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda olumlu bir mini bilgi notu görüntülenir.

-  veya  düğmesine basarak **Hayıır** seçeneğine gidin. Seçmek için  düğmesine basın. Telsiz önceki ekrana döner.

## Kayıtlı Metin Mesajları

Bir yazılı mesajı daha sonra göndermek üzere kaydedebilirsiniz.

**PTT** düğmesine basıldığında ya da kip değiştirildiğinde, telsiz metin mesajı yazdığınız ya da düzenlediğiniz sırada metin mesajı yazma/düzenleme ekranından çıkar ve geçerli metin mesajınız otomatik olarak Taslaklar klasörüne kaydedilir.

En son kaydedilmiş yazılı mesaj her zaman Taslaklar listesinin en üstüne eklenir.

Taslaklar klasörü son kaydedilen maksimum 10 mesajı saklar. Klasör dolduktan sonra kaydedilen her mesaj otomatik olarak klasörde yer alan en eski tarihli yazılı mesajın yerini alır.

## Kayıtlı Metin Mesajlarını Görüntüleme

Telsizinizde kayıtlı metin mesajını görüntülemek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Mesajlar** seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak **Taslaklar** seçeneğine gidin. Seçmek için  düğmesine basın.
- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

## Kayıtlı Metin Mesajlarını Düzenleme

Telsizinizde kayıtlı metin mesajını düzenlemek için bu prosedürü uygulayın.

1 Mesajı görüntülerken  düğmesine basın.

2  veya  düğmesine basarak **Düzenle** seçeneğine gidin. Seçmek için  düğmesine basın.

Yanıp sönen bir imleç görüntülenir.

3 Tuş takımını kullanarak mesajınızı yazın.

Bir karakter sola gitmek için  düğmesine basın.

Bir karakter sağa gitmek için  veya  düğmesine basın.

İstenmeyen karakterleri silmek için  düğmesine basın.

Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

4 Mesaj oluşturulduktan sonra  düğmesine basın. Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak **Gönder** seçeneğine gidin. Mesajı göndermek için  düğmesine basın.
-   veya  düğmesine basarak mesajın kaydedilmesi veya silinmesi arasında seçim yapın. Seçmek için  düğmesine basın.

## Kayıtlı Metin Mesajlarını Taslaklar Klasöründen Silme

Kayıtlı metin mesajlarını telsizinizdeki taslaklardan silmek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Taslaklar seçeneğine gidin. Seçmek için  düğmesine basın.

4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

5  veya  ile Sil seçeneğine gidin. Metin mesajını silmek için  düğmesine basın.

## Hızlı Yazılı Mesajlar

Telsiziniz satıcınız tarafından programlanan en fazla 50 Hızlı Metin Mesajını desteklemektedir.

Hızlı Yazılı mesajlar önceden tanımlanmıştır ancak göndermeden önce hepsini düzenleyebilirsiniz.

## Hızlı Yazılı Mesajlar Gönderme

Telsizinizden önceden tanımlanmış bir ada Hızlı Metin Mesajları göndermek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
- Programlanmış **Tek Tuşla Erişim** düğmesine basın. Şu adıma geçin: [adım 6](#). Ekranda mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.
- Menüye erişmek için  düğmesine basın.

2  veya  ile Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  ile Hızlı Mesaj seçeneğine gidin. Seçmek için  düğmesine basın.

4 Gerekli Hızlı Yazılı mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

5 Alıcıyı seçmek ve mesaj göndermek için aşağıdaki işlemi yapın.

Ekranla mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

6 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranla olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranla olumsuz bir mini bilgi notu görüntülenir.
- Telsiz, Tekr Gönder ekranına ilerler. Daha fazla bilgi için bkz. [Yazılı Mesajları Tekrar Gönderme sayfa 159](#).

## Metin Giriş Konfigürasyonu Yapma

Telsiziniz farklı metinleri yapılandırmanızı sağlar.

Telsizinize metin girmek için aşağıdaki ayarları yapılandırabilirsiniz:

- Kelime Tahmini
- Kelime Düzelt
- Cümle Byk Hrf
- Kelimelerim

Telsiziniz şu metin girişi yöntemlerini destekler:

- Sayılar
- Simgeler
- Tahmin veya Çok Dokunuşlu
- Dil (Programlanmışsa)

### NOT:

İstediğiniz zaman önceki ekrana dönmek için  düğmesine basın veya Giriş Ekranına dönmek için

 düğmesine uzun basın. Telsiz, faaliyetsizlik sayacının süresi dolduğunda geçerli ekrandan çıkar.

## Kelime Düzelt Özelliğini Etkinleştirme veya Devre Dışı Bırakma

Metin düzenleyiciye girilen kelime yerleşik sözlük tarafından tanınmadığında alternatif kelime seçenekleri önerir.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Metin Girişi seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Kelime Düzelt seçeneğine gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Kelime Düzelt seçeneğine gidin. Seçmek için  düğmesine basın.
- Kelime Düzelt özelliğini etkinleştirmek için düğmesine basın. Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Kelime Düzelt özelliğini devre dışı bırakmak için düğmesine basın. Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Kelime Tahmini Özelliğini Etkinleştirme veya Devre Dışı Bırakma

**Kelime Tahmini:** Telsiziniz sıklıkla girdiğiniz kelime sıralarını öğrenebilir. Ardından sık kullanılan kelime sırasının ilk kelimesini metin düzenleyiciye girdikten sonra kullanmak isteyebileceğiniz sonraki kelimeyi tamamlar.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Metin Girişi bölümüne gidin. Seçmek için  düğmesine basın.

---

5  veya  düğmesine basarak Kelime Tahmini bölümüne gidin. Seçmek için  düğmesine basın.

---

6 Aşağıdakilerden birini yapın:

- Kelime Tahmini özelliğini etkinleştirmek için  düğmesine basın. Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Mikrofon Dinamik Distorsiyon Kontrolünü devre dışı bırakmak için  düğmesine basın. Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.
- 

## Cümle Byk Hrf

Bu özellik her yeni cümlenin ilk kelimesinin ilk harfini otomatik olarak büyük harf yapmak için kullanılır.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Metin

Girişi bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Cümle Büyük

Harf seçeneğine gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

- Cümle Büyük Harf özelliğini etkinleştirmek için  düğmesine basın. Etkinleştirilmiş Etkin yazısının yanında  simgesi görüntülenir
- Cümle Büyük Harf özelliğini devre dışı bırakmak için  düğmesine basın. Devre dışı

birakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.

## Özel Kelimeleri Görüntüleme

Telsizinizin dahili sözlüğüne özel kelimeler ekleyebilirsiniz. Telsiziniz bu kelimelerin bulunduğu bir liste oluşturacaktır.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Metin Girişi bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  ile Kelimelerim seçeneğine gidin.  
Seçmek için  düğmesine basın.

---

6  veya  ile Kelime Listesi seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranda özel kelimeler listesi görüntülenir.

---

## Özel Kelimeleri Düzenleme

Telsizinize kaydedilen özel kelimeleri düzenleyebilirsiniz.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Metin Girişi bölümüne gidin. Seçmek için  düğmesine basın.

---

5  veya  ile Kelimelerim seçeneğine gidin.  
Seçmek için  düğmesine basın.

---

6  veya  ile Kelime Listesi seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranda özel kelimeler listesi görüntülenir.

---

7 İstenen kelime için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

8  veya  düğmesine basarak Düzenle seçeneğine gidin. Seçmek için  düğmesine basın.

---

9 Özel kelimenizi düzenlemek için tuş takımını kullanın.

- Bir karakter sola gitmek için  düğmesine basın.
- Bir karakter sağa gitmek için  düğmesine basın.
- Yanlış yazılan karakterleri silmek için  düğmesine basın.
- Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

10 Özel kelimeniz tamamlandığında bir kere  düğmesine basın.

Ekranda özel kelimenizin kaydedildiğini onaylayan geçici bir mini bilgi notu görüntülenir.

- Özel kelime kaydedilirse bir ton duyulur ve ekranda olumlu bir mini bilgi notu görüntülenir.
- Özel kelime kaydedilmezse düşük bir ton duyulur ve ekranda olumsuz bir mini bilgi notu görüntülenir.

## Özel Kelime Ekleme

Dahili telsiz sözlüğüne özel kelimeler ekleyebilirsiniz.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  düğmesine basarak Metin Girişi bölümüne gidin. Seçmek için  düğmesine basın.
- 5  veya  ile Kelimelerim seçeneğine gidin. Seçmek için  düğmesine basın.

- 6  veya  düğmesine basarak Yeni Klm Ek 1 e ögesine gidin. Seçmek için  düğmesine basın.
- Ekran da özel kelimeler listesi görüntülenir.

- 7 Özel kelimenizi düzenlemek için tuş takımını kullanın.
- Bir karakter sola gitmek için  düğmesine basın.
  - Bir karakter sağa gitmek için  düğmesine basın.
  - Yanlış yazılan karakterleri silmek için  düğmesine basın.
  - Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

- 8 Özel kelimeniz tamamlandığında bir kere  düğmesine basın.

Ekran da özel kelimenizin kaydedildiğini onaylayan geçici bir mini bilgi notu görüntülenir.

- Özel kelime kaydedilirse bir ton duyulur ve ekranda olumlu bir mini bilgi notu görüntülenir.
- Özel kelime kaydedilmezse düşük bir ton duyulur ve ekranda olumsuz bir mini bilgi notu görüntülenir.

## Özel Kelimeleri Silme

Telsizinize kaydedilen özel kelimeleri silmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayar lar ı bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak **Metin Girişi** bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  ile **Kelimelerim** seçeneğine gidin. Seçmek için  düğmesine basın.

6 İstenen kelime için  veya  düğmesine basın. Seçmek için  düğmesine basın.

7  veya  ile **Sil** seçeneğine gidin. Seçmek için  düğmesine basın.

8 Aşağıdakilerden birini seçin.

- **Giriş Silinsin Mi?** ekranında  düğmesine basarak **Evet** seçeneğini belirleyin. Ekranda, **Giriş Silindi** bilgisi görüntülenir.

-  veya  düğmesine basarak **Hayır** seçeneğine gidin. Önceki ekrana dönmek için  düğmesine basın.

## Tüm Özel Kelimeleri Silme

Telsizinizin dahili sözlüğünden tüm özel kelimeleri silmek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak **Telsiz Ayarları** bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak **Metin**

Girişi bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  ile **Kelimelerim** seçeneğine gidin.

Seçmek için  düğmesine basın.

6  veya  düğmesine basarak **Hepsini Sil**

seçeneğine gidin. Seçmek için  düğmesine basın.

7 Aşağıdakilerden birini yapın:

- **Giriş Silinsin Mi?** ekranında  düğmesine basarak **Evet** seçeneğini belirleyin. Ekranda **Tüm Kayıtlar Silindi** bilgisi gösterilir.
- Önceki ekrana dönmek için  veya  ile **Hayır** seçeneğine gidin. Seçmek için  düğmesine basın.

## İş Kartları

Bu özellik telsizinizin gerçekleştirilecek görevleri listeleyen dağıtıcıdan mesajları almasını sağlar.

### NOT:

Bu özellik kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

Farklı İş Kartları içeren iki klasör bulunur:

### Görevlerim klasörü

Oturum açtığınız kullanıcı kimliğine atanan kişiselleştirilmiş İş Kartları.

### Paylaşılan Görevler klasörü

Bir gruba atanmış paylaşılan İş Kartları.

İş Kartları Klasörlerinde sıralamak için İş Kartlarına yanıt verebilirsiniz. Varsayılan olarak, klasörler **Tümü**, **Yeni**, **Başlandı** ve **Tamamlandı** şeklindedir. Ek 10 klasör için satıcınızla veya sistem yöneticinizle iletişime geçin.

### NOT:

İş Kartları, telsiz kapatıldıktan ve tekrar açıldıktan sonra bile tutulur.

Tüm İş Kartları, **Tümü** klasöründe yer alır. Telsizinizin nasıl programlandığına bağlı olarak İş Kartları öncelik düzeyleri ve ardından alındıkları zamana göre sıralanır. Yeni İş

Kartları, son değişiklik durumuna sahip İş Kartları ve en yüksek önceliğe sahip İş Kartları önce listelenir. Maksimum sayıda İş Kartına ulaşılmasıyla, bir sonraki İş Kartı otomatik olarak telsizinizdeki en son İş Kartının yerini alır. Telsiziniz, telsiz modelinize bağlı olarak maksimum 100 veya 500 İş Kartını destekler. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün. Telsiziniz aynı İş Kartı Kimliğiyle yinelenen İş Kartlarını otomatik olarak tespit ederek siler.

İş Kartlarının önemine göre dağıtımçı kartlara Öncelik Seviyesi ekler. Üç adet öncelik seviyesi vardır: 1. Öncelik, 2. Öncelik ve 3. Öncelik. 1. Öncelik en yüksek önceliktir; 3. Öncelik ise en düşük önceliktir. Ayrıca, önceliği belirtilmemiş İş Kartları da bulunur.

Dağıtımçı aşağıdaki değişiklikleri yaptığında telsiziniz değişikliğe göre güncellenir:

- İş Kartlarının içeriğini değiştirme.
- İş Kartlarına Öncelik Seviyesi ekleme veya bunları düzenleme.
- İş Kartlarını bir klasörden başka bir klasöre taşıma.
- İş Kartını İptal Etme.

## İş Kartı Klasörüne Erişme

İş Kartı Klasörüne erişmek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **İş Kartı** düğmesine basın Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  düğmesine basın.

2

 veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

3

 veya  düğmesine basarak istenen klasöre gidin. Seçmek için  düğmesine basın.

4

 veya  düğmesine basarak istenen İş Kartına gidin. Seçmek için  düğmesine basın.

## Uzak Sunucuda Oturumu Açma veya Kapatma

Bu özellik, kullanıcı kimliğinizi kullanarak uzak sunucuda oturum açıp kapatmanızı sağlar.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Oturum Aç seçeneğine gidin. Seçmek için  düğmesine basın.

Zaten oturum açtıysanız menüde Oturumu Kapat seçeneği görüntülenir.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranında olumsuz bir mini bilgi notu görüntülenir.

## İş Kartları Oluşturma

Telsiziniz, bir İş Kartı şablonuna dayanan ve gerçekleştirilmesi gereken görevleri gönderen İş Kartları oluşturabilir.

İş Kartı şablonunu yapılandırmak için CPS programlama yazılımı gerekir.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Kart Oluştur seçeneğine gidin. Seçmek için  düğmesine basın.

## İş Kartlarına Yanıt Verme

Telsizinizden iş kartlarını yanıtlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak ilgili klasöre gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak ilgili iş kartına gidin. Seçmek için  düğmesine basın.

---

- 5 Alt menüye erişmek için bir kez daha  düğmesine basın.  
**Hızlı Yanıt'a** gitmek için karşılık gelen sayı tuşuna (1-9) da basabilirsiniz.

- 6  veya  düğmesine basarak ilgili iş kartına gidin. Seçmek için  düğmesine basın.  
 Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

- 7 Onay için bekleyin.  
 İşlem başarılı olursa:
  - Bir olumlu gösterge tonu duyulur.
  - Ekranda olumlu bir mini bilgi notu görüntülenir.
 İşlem başarısız olursa:
  - Bir olumsuz gösterge tonu duyulur.
  - Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Bir İş Kartı Şablonu Kullanarak İş Kartları Gönderme

Telsizinin bir İş Kartı şablonuyla yapılandırıldıysa İş Kartını göndermek için aşağıdaki işlemleri yapın.

1 Gerekli alan sayısını girmek için tuş takımını kullanın. Seçmek için  düğmesine basın.

---

2  veya  düğmesine basarak Alan Durumu seçeneğine gidin. Seçmek için  düğmesine basın.

---

3 İlgili seçenek için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Gönder seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

---

5 Onay için bekleyin. İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
  - Ekranda olumsuz bir mini bilgi notu görüntülenir.
- 

## Birden Fazla İş Kartı Şablonu Kullanarak İş Kartları Gönderme

Telsizinin birden fazla İş Kartı şablonuyla yapılandırıldıysa İş Kartlarını göndermek için aşağıdaki işlemleri yapın.

1 İlgili seçenek için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

2  veya  düğmesine basarak Gönder seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

---

- 3 Onay için bekleyin.  
İşlem başarılı olursa:
- Bir olumlu gösterge tonu duyulur.
  - Ekranda olumlu bir mini bilgi notu görüntülenir.
- İşlem başarısız olursa:
- Bir olumsuz gösterge tonu duyulur.
  - Ekranda olumsuz bir mini bilgi notu görüntülenir.

## İş Kartlarını Silme

Telsizinizden iş kartlarını silmek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
- Programlanmış **İş Kartı** düğmesine basın. Şu adıma geçin: [adım 4](#)
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak istenen klasöre gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Tümünü klasörüne gidin. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak ilgili İş Kartına gidin. Seçmek için  düğmesine basın.

- 6 İş Kartını görüntülerken tekrar  düğmesine basın.

7  veya  düğmesine basarak Sil

seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranada, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

8 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranada olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranada olumsuz bir mini bilgi notu görüntülenir.

## Tüm İş Kartlarını Silme

Telsizinizden tüm iş kartlarını silmek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **İş Kartı** düğmesine basın. Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak istenen klasöre gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tümünü klasörüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

-  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda olumlu bir mini bilgi notu görüntülenir.
-  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın. Telsiz önceki ekrana döner.

## Gizlilik

Bu özellik, yazılım tabanlı şifreleme çözümüyle bir kanaldaki yetkisiz kullanıcıların etkinlikleri dinlemelerini engeller. Bir yayının sinyal gönderme ve kullanıcı kimliği kısımları şifrelenemez.

Gizliliğin etkin olduğu yayınlar göndermek için telsiziniz kanaldaki gizliliği etkin hale getirilmiş olmalıdır; ancak yayını almak için bu işlem gerekli değildir. Telsiz, gizliliğin etkin olduğu kanaldayken açık veya şifrelenmemiş yayınları almaya devam eder.

Telsiziniz yalnızca Gelişmiş Gizlilik özelliğini destekler. Gizliliğin etkinleştirildiği bir çağrıyı çözmek için telsizinizin

yayın yapan telsizle aynı Gelişmiş Gizlilik için Anahtar Değerine ve Anahtar Kimliğine sahip olması gerekir.

Telsiziniz farklı bir Anahtar Değeri ve Anahtar Kimliğine sahip şifreli bir çağrı aldığında Gelişmiş Gizlilik için hiçbir şey duymazsınız.

Gizliliğin etkin olduğu bir kanalda telsiziniz programlanma şekline göre açık veya şifrelenmemiş çağrılar alabilir. Ayrıca telsiziniz programlanma şekline göre uyarı tonu çalabilir veya çalmayabilir.

### NOT:

Bu özellik aynı frekansta olan Halk Bandı Radyo kanallarında uygulanamaz.

Telsiz yayın gönderirken yeşil LED yanar ve gizliliğin etkin olduğu bir yayını almaya devam ediyorken hızla yanıp söner.

### NOT:

Bazı telsiz modelleri bu Gizlilik özelliğini sunmayabilir veya farklı bir yapılandırmaya sahip olabilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Gizliliği Açma veya Kapatma

Telsizinizde gizliliği açmak veya kapatmak için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Gizlilik** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  ile Gizlilik seçeneğine gidin. Seçmek için  düğmesine basın.

### 5 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Açık bilgisinin yanında  simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Kapalı bilgisinin yanında  simgesi görüntülenir.

## Yanıt Engelleme

Bu özellik, telsizinizin gelen yayınları yanıtlamasını engellemeye yardımcı olur.

### NOT:

Bu özelliği satın alabilirsiniz. Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

Bu özellik etkinleştirildiğinde telsiziniz Telsiz Kontrol, Çağrı Uyarısı, Telsizi Devre Dışı Bırakma, Uzaktan İzleme, Otomatik Kayıt Hizmeti (ARS), Özel Mesajları Yanıtlama ve GNSS konum raporları gönderme gibi gelen yayınları yanıtlamak üzere giden yayın üretmez. Bu özellik

etkinleştirildiğinde telsiziniz Onaylı Özel Çağrılar alamaz. Ancak telsiziniz yayını manuel olarak gönderebilir.

## Yanıt Engelleme Özelliğini Açma veya Kapatma

Telsizinizde Yanıt Engelleme özelliğini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

Programlanmış **Yanıt Engelleme** düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda kısa süreliğine olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda kısa süreliğine olumsuz bir mini bilgi notu görüntülenir.

## Duraklatma/Canlandırma

Bu özellik, sistemdeki herhangi bir telsizi etkinleştirmenize veya devre dışı bırakmanıza olanak tanır. Örneğin, bayi

veya sistem yöneticisi yetkisiz kullanıcıların kullanmasını engellemek üzere çalınan bir telsizi devre dışı bırakmak isteyebilir. Daha sonra telsiz geri alındığında etkinleştirilebilir.

Telsiz; konsol veya başka bir telsizden gelen komut yoluyla devre dışı bırakılabilir (duraklatılabilir) veya etkinleştirilebilir (canlandırılabilir).

Telsiz devre dışı bırakıldığında, olumsuz gösterge tonu duyulur ve giriş ekranında Kanal Reddedildi bilgisi gösterilir.

Bir telsiz şoka uğratıldığında Şok prosedürünü gerçekleştiren sistem üzerinde kullanıcı tarafından başlatılan hiçbir hizmeti talep edemez veya alamaz. Ancak telsiz başka bir sisteme geçiş yapabilir. Telsiz, GNSS konumu raporları göndermeye devam eder ve duraklatılmışken uzaktan izlenebilir.

### NOT:

Bayi veya sistem yöneticisi, telsizi kalıcı olarak devre dışı bırakabilir. Daha fazla bilgi için bkz. [Telsiz Öldürme sayfa 194](#).

## Telsizi Duraklatma

Telsizi devre dışı bırakmak için bu prosedürü uygulayın.

1 Programlanmış **Telsiz Devre Dışı** düğmesine basın.

---

2 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

Ekranada, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanıp söner.

---

3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranada olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
  - Ekranada olumsuz bir mini bilgi notu görüntülenir.
- 

## Kişi Listesini Kullanarak Telsizi Duraklatma

Kişi Listesini kullanarak telsizi devre dışı bırakmak için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

---

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

4  veya  ile **Tlsz Dev Dışı** seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranada, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanıp söner.

---

5 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Telsizi Duraklatma

Elle çevirmeyi kullanarak telsizi devre dışı bırakmak için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile **Telsiz Numarası** seçeneğine gidin. Seçmek için  düğmesine basın. İlk metin satırında **Telsiz No:** bilgisi görüntülenir.

5 Abone kimliğini girin ve devam etmek için  düğmesine basın.

6  veya  ile **Tlsz Dev Dışı** seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanıp söner.

7 Onay için bekleyin. İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
  - Ekranda olumlu bir mini bilgi notu görüntülenir.
- İşlem başarısız olursa:
- Bir olumsuz gösterge tonu duyulur.
  - Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Telsizi Canlandırma

Telsizi etkinleştirmek için bu prosedürü uygulayın.

1 Programlanmış **Telsiz Etkin** düğmesine basın.

2 Gerekli ad veya kimlik için  ya da 

düğmesine basın.Seçmek için  düğmesine basın.

Ekranda **Telsiz Etkin** bilgisi ile abone adı veya kimliği gösterilir.Yeşil LED yanar.

3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.

- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Telsizi Canlandırma

Kişi Listesini kullanarak telsizi etkinleştirmek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin.Seçmek için  düğmesine basın.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın.Seçmek için  düğmesine basın.

- 4  veya  ile Telsiz Etkin seçeneğine gidin. Seçmek için  düğmesine basın. Yeşil LED yanıp söner. Ekranda Telsiz Etkin bilgisi ile abone adı veya kimliği gösterilir. Yeşil LED yanar.

- 5 Onay için bekleyin.  
İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranda Telsiz Etkin Başarılı bilgisi görüntülenir.

İşlem başarısız olursa:

- Bir ton duyulur.
- Ekranda Telsiz Etkin Başarısız bilgisi görüntülenir.

## Elle Çevirmeyi Kullanarak Telsizi Canlandırma

Elle Çevirmeyi kullanarak telsizi etkinleştirmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın.
- 4  veya  ile Özel Çağrı seçeneğine gidin. Seçmek için  düğmesine basın. İlk metin satırında Telsiz No: bilgisi görüntülenir.

5 Abone kimliğini girin ve devam etmek için  düğmesine basın.

6  veya  ile Telsiz Etkin seçeneğine gidin. Seçmek için  düğmesine basın.

Yeşil LED yanıp söner.

Ekranda Telsiz Etkin bilgisi ile abone adı veya kimliği gösterilir. Yeşil LED yanar.

7 Onay için bekleyin.

İşlem başarılı olursa:

- Bir ton duyulur.
- Ekranda Telsiz Etkin Başarılı bilgisi görüntülenir.

İşlem başarısız olursa:

- Bir ton duyulur.
- Ekranda Telsiz Etkin Başarısız bilgisi görüntülenir.

## Telsiz Öldürme

Bu özellik, telsize yetkisiz erişimi kısıtlamak için alınan gelişmiş bir güvenlik önlemidir.

Telsiz Öldürme özelliğiyle telsiz kullanılamaz hale gelir. Örneğin, bayi veya sistem yöneticisi yetkisiz kullanımın önüne geçmek için çalınan veya kaybedilen bir telsizi öldürmek isteyebilir.

Sonlandırılan telsiz açıldığında, durumu belirtmek için ekranda kısa süreliğine Telsiz Sonlandırıldı bilgisi gösterilir.

### NOT:

Öldürülen bir telsiz yalnızca Motorola Solutions servis deposunda canlandırılabilir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Yalnız Çalışan

Bu özellik, önceden belirlenen süre boyunca telsiz düğmesine basma ya da kanal seçim aktivasyonu gibi hiçbir kullanıcı etkinliğinin olmadığı durumlarda acil durum çağırısı yapar.

Programlanan süre boyunca hiçbir kullanıcı etkinliği olmamasının ardından, telsiz faaliyetizlik süresi dolar dolmaz sesli bir göstergeyle sizi önceden uyarır.

Önceden belirlenen kalan süreden önce onay vermezseniz telsiz, bayinin veya sistem yöneticisinin programladığı şekilde bir acil durum koşulu başlatır.

Daha fazla bilgi için bkz. [Acil Durum İşlemi sayfa 140](#).

#### NOT:

Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Şifre Kilidi Özellikleri

Bu özellik, telsiz açıldığında şifre sorarak cihaza erişimi kısıtlamanızı sağlar.

Şifre girmek için tuş takımlı mikrofon ya da **Yukarı/Aşağı Kaydırma** düğmelerini kullanabilirsiniz.

## Telsizlere Şifre Kullanarak Erişme

Telsizinize bir şifre kullanarak erişmek için bu prosedürü uygulayın.

- 1 Dört basamaktan oluşan geçerli şifreyi girin.

#### NOT:

**Acil Durum** pedalı kullanıldığında telsizin açılması için şifre girme gerekliliği ortadan kalkar.

- Tuş takımlı bir mikrofon kullanın.
- Her bir rakamın sayısal değerini düzenlemek için  veya  düğmesine ve sonraki rakamı girmek ve diğer rakama geçmek için  düğmesine basın.

2

- Şifreyi girmek için  düğmesine basın.

İşlem başarılı olursa telsiz açılır.

İşlem başarısız olursa:

- Birinci ve ikinci denemeden sonra, ekranda **Yanlış Şifre uyarısı** görüntülenir. Şu adımları tekrarlayın: Adım [adım 1](#).
- Üçüncü denemeden sonra, ekranda **Yanlış Şifre, ardından Telsiz Kilitlendi** bilgisi görüntülenir. Bir ton duyulur. Sarı LED ışığı iki kez yanıp söner. Telsiz, 15 dakikalığına kilitlenir.

**NOT:**

Telsiziniz kilitli durumda sadece **Açma/Kapatma/Ses Kontrol Topuzu** ve programlanmış **Ekr Ayd** düğmesiyle yapılan girişlere yanıt verir.

## Kilitli Durumdaki Telsizlerin Kilidini Açma

Telsiziniz, kilitli durumdayken çağrı alamaz. Kilitli durumdaki telsizinizin kilidini açmak için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- Telsizin gücü açıksa 15 dakika bekleyin ve daha sonra [Telsizlere Şifre Kullanarak Erişme sayfa 195](#) bölümündeki adımları tekrarlayarak telsize erişin.
- Telsizin gücü kapalıysa gücü açın. Telsiziniz 15 dakikalık kilitli kalma süresini tekrar başlatır. Bir ton duyulur. Sarı LED ışığı iki kez yanıp söner. Ekranda Radio Locked (Telsiz Kilitlendi) bilgisi görüntülenir.

15 dakika bekleyin ve daha sonra [Telsizlere Şifre Kullanarak Erişme sayfa 195](#) bölümündeki adımları tekrarlayarak telsize erişin.

## Şifre Kilidini Açma ve Kapatma

Telsizinizde şifre kilidini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  düğmesine basarak Şifre Kilidi seçeneğine gidin. Seçmek için  düğmesine basın.

### 5 Dört basamaktan oluşan geçerli şifreyi girin.

- Tuş takımlı bir mikrofon kullanın.
- Her bir rakamın sayısal değerini düzenlemek için

 veya  düğmesine ve sonraki rakamı

girmek ve diğer rakama geçmek için  düğmesine basın.

Bastığınız her rakam için olumlu bir gösterge tonu duyulur.

### 6 Şifreyi girmek için düğmesine basın.

Şifre yanlışsa ekranda Yanlış Şifre mesajı görüntülenir ve ekran otomatik olarak önceki menüye döner.

### 7 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Aç seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Aç seçeneğinin yanında  simgesi görüntülenir.

-  veya  düğmesine basarak Kapat seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Kapat seçeneğinin yanında  simgesi görüntülenir.

## Şifre Değiştirme

Telsizinizdeki şifreleri değiştirmek için buradaki prosedürü uygulayın.

### 1 Menüye erişmek için düğmesine basın.

### 2 veya düğmesine basarak Programlar bölümüne gidin. Seçmek için düğmesine basın.

### 3 veya düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için düğmesine basın.

4  veya  ile Şifre Kilidi seçeneğine gidin. Seçmek için  düğmesine basın.

5 Geçerli dört haneli şifreyi girin ve devam etmek için  düğmesine basın.

Şifre yanlışsa ekranda Yanlış Şifre mesajı görüntülenir ve ekran otomatik olarak önceki menüye döner.

6  veya  ile ŞFR Değiştir seçeneğine gidin. Seçmek için  düğmesine basın.

7 Yeni bir dört haneli şifre girin ve devam etmek için  düğmesine basın.

8 Yeni dört haneli şifreyi tekrar girin ve devam etmek için  düğmesine basın.

İşlem başarılı olursa ekranda Şifre Değiştirdi mesajı görüntülenir.

Başarısız olursa ekranda Şifreler Eşleşmiyor bilgisi görüntülenir.

Ekran otomatik olarak önceki menüye döner.

## Bildirim Listesi

Telsizinizde, kanaldaki okunmamış metin mesajları, telemetri mesajları, cevapsız çağrılar ve çağrı uyarıları gibi okunmamış tüm olaylarınızı toplayan bir Bildirim listesi bulunur.

Bildirim listesinde bir veya daha fazla olay olduğunda ekranda, **Bildirim** simgesi görüntülenir.

Bu liste en fazla 40 okunmamış olayı destekler. Liste tam olarak dolduğunda, gerçekleşecek olan bir sonraki olay otomatik olarak en eski olayın yerini alır. Olaylar okunduktan sonra Bildirim listesinden kaldırılır.

Yazılı mesaj, cevapsız çağrı ve çağrı uyarısı olayları için maksimum bildirim sayısı; 30 yazılı mesaj ve 10 cevapsız çağrı veya çağrı uyarısıdır. Bu maksimum sayı ayrı özellik (iş kartları veya yazılı mesajlar ya da cevapsız çağrılar veya çağrı uyarıları) listesi kapasitesine bağlıdır.

## Bildirim Listesine Erişim

Telsizinizde Bildirim listesine erişmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  ile Bildirim seçeneğine gidin.  
Seçmek için  düğmesine basın.

---

- 3 Gerekli olay için  veya  düğmesine basın.  
Seçmek için  düğmesine basın.  
  
Giriş ekranına dönmek için  düğmesine uzun basın.

---

## Kablosuz Programlama

Bayınız telsizinizi Kablosuz Programlama (OTAP) kullanarak fiziksel bağlantı olmadan uzaktan güncelleyebilir. Ayrıca, bazı ayarlar OTAP kullanılarak yapılandırılabilir.

Telsizinize OTAP işlemi uygulandığında yeşil LED yanıp söner.

Telsiziniz yüksek hacimde veri aldığı anda:

- Ekranda, **Yüksek Hacimli Veri** simgesi görüntülenir.

- Kanal meşgul hale gelir.
- **PTT** düğmesine bastığınızda olumsuz bir ton duyulur.

OTAP tamamlandığında, yapılandırmaya bağlı olarak:

- Bir ton duyulur. Ekranda Güncelleme Yıdın Bşlııyor bilgisi görüntülenir. Telsiziniz kapanıp tekrar açılarak yeniden başlar.
- Şimdi Yn. Başlıt veya Ertele seçeneğini belirleyebilirsiniz. Ertele seçeneğini belirlediğinizde, telsiziniz önceki ekrana döner. Otomatik yeniden başlatma gerçekleştirilinceye kadar ekranda **OTAP Gecikme Zamanlayıcı** simgesi görüntülenir.

Telsiziniz otomatik yeniden başlatma sonrasında açıldığında:

- İşlem başarılı olursa ekranda Yazım Gncilleme Tamamlandı bilgisi görüntülenir.
- İşlem başarısız olursa ekranda Yazım Gncilleme Bşrısız bilgisi görüntülenir.

Güncellenmiş yazılım sürümü için bkz. [Yazılım Güncelleme Bilgilerini Kontrol Etme sayfa 229](#).

## Üçüncü Taraf Çevre Birimleri Bağlantı Kiplerini Seçme

Üçüncü taraf çevre birimleri bağlantı kiplerinden birini seçmek için bu prosedürü uygulayın:

- Motorola Solutions
- PC ve Ses
- Veri Aksesuarı
- Telemetri
- Genel

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Kablo Türü seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak istenen bağlantı kipine gidin. Seçmek için  düğmesine basın.

Seçilen bağlantı kipi ekranda görüntülenir. Ekran önceki menüye döner.

## Alınan Sinyal Güç Göstergesi

Bu özellik, Alınan Sinyal Güç Göstergesi (RSSI) değerlerini görüntülemenize olanak tanır.

Ekranın sağ üst köşesinde **RSSI** simgesi görüntülenir. **RSSI** simgesi hakkında daha fazla bilgi için bkz. [Ekran Simgeleri](#).

## RSSI Değerlerini Görüntüleme

Telsizinizdeki RSSI değerlerini görüntülemek için buradaki prosedürü uygulayın.

Giriş ekranındayken:

- 1 Tamamı 5 saniye içinde olmak üzere  düğmesine üç kez ve hemen ardından  düğmesine üç kez basın.  
Ekranında geçerli RSSI değerleri görüntülenir.

- 2 Giriş ekranına dönmek için  düğmesine uzun basın.

## Ön Panel Yapılandırma

Telsiz kullanımınızı iyileştirmek için Ön Panel Yapılandırma (FPC) bölümündeki belirli özellik parametrelerini özelleştirebilirsiniz.

## Ön Panel Yapılandırma Kipine Girme

Telsizinizde ön panel programlama kipine girmek için buradaki prosedürü uygulayın.

İstedığınız zaman Giriş ekranına dönmek için  düğmesine uzun basın.

[Geribildirim Gönder](#)

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  ile T1szi Prgrmla seçeneğine gidin. Seçmek için  düğmesine basın.

## FPP Kipi Parametrelerini Düzenleme

Özellik parametreleri arasında gezinirken gerektiğinde aşağıdaki düğmeleri kullanın.

-  ,  - Seçenekler arasında gezinmenizi, değerleri artırıp azaltmanızı ya da dikey olarak gezinmenizi sağlar.
-  – Seçeneği belirlemenizi ya da alt menüye girmenizi sağlar.
-  – Kısa basıldığında önceki menüye dönmenizi ya da seçim ekranından çıkmanızı sağlar. Giriş ekranına dönmek için bu düğmeye uzun basın.

## Wi-Fi Kullanımı

Wi-Fi®, Wi-Fi Alliance®'ın tescilli ticari markasıdır.

### NOT:

Bu özellik yalnızca DM4601e için geçerlidir.

Bu özellik bir Wi-Fi ağını ayarlamanızı ve bu ağa bağlanmanızı sağlar. Wi-Fi; telsiz ürün yazılımı, codeplug ve dil paketleri ile sesli anons gibi kaynak güncellemelerini destekler.

## Wi-Fi Özelliğini Açma veya Kapatma

Programlanmış **Wi-Fi Açık veya Kapalı** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için satıcınıza veya sistem yöneticinize başvurun.

Programlanmış **Wi-Fi Açık veya Kapalı** düğmesi için Sesli Anonslar, kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

Wi-Fi özelliğini, aşağıdaki işlemlerden birini gerçekleştirerek açabilir veya kapatabilirsiniz.

- Programlanmış **Wi-Fi Açık veya Kapalı** düğmesine basın. Sesli Anons, Wi-Fi Açma veya Wi-Fi Kapatma tonunu çalar.
- Bu özelliğe menüyü kullanarak erişin.
  - a.  ile menüye erişim düğmesine basın.
  - b.  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.
  - c.  ya da  düğmesine basarak Wi-Fi Açık seçeneğine gidin ve seçmek için  düğmesine basın.
 

 düğmesine basarak Wi-Fi özelliğini açın. Ekranda, Etkin yazısının yanında ✓ ögesi gösterilir.

 düğmesine basarak Wi-Fi özelliğini kapatın. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Ağ Erişim Noktasına Bağlanma

Wi-Fi özelliğini açtığınızda telsiz, ağ erişim noktalarını tarar ve bunlardan birine bağlanır.

Menüyü kullanarak da bir ağ erişim noktasına bağlanabilirsiniz.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 4  ya da  düğmesine basarak bir ağ erişim noktasına gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 5  ya da  düğmesine basarak **Bağlan** seçeneğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 6 Şifreyi girin ve  düğmesine basın.

---

Bağlantı başarıyla kurulursa telsizde bir bildirim görüntülenir ve ağ erişim noktası profil listesine kaydedilir.

## Wi-Fi Bağlantı Durumunu Kontrol Etme

Wi-Fi Bağlantı durumunu kontrol etmek için bu prosedürü uygulayın.

Sesli Anons üzerinden bağlantı durumu için programlanan **Wi-Fi Durumu Sorgusu** düğmesine basın. Sesli Anons; Wi-Fi Kapalı, Wi-Fi Açık fakat Bağlantı Yok veya Wi-Fi Açık ve Bağlı uyarılarını verir.

- Wi-Fi kapatıldığında, ekranda **Wi-Fi Kapalı** mesajı görüntülenir.
- Telsiz bir ağa bağlandığında, ekranda **Wi-Fi Açık, Bağlandı** mesajı görüntülenir.

- Wi-Fi açık olduğunda ancak telsiz herhangi bir ağa bağlanmadığında, ekranda Wi-Fi Açık, Bağlantı Kesildi mesajı görüntülenir.

Wi-Fi durumu sorgu sonuçları için Sesli Anonlar, kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

#### NOT:

Programlanmış **Wi-Fi Durumu Sorgusu** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

## Ağ Listesini Yenileme

Ağ listesini yenilemek için bu prosedürü uygulayın.

- Ağ listesini yenilemek için menüden aşağıdaki işlemleri gerçekleştirin.
  - a.  ile menüye erişim düğmesine basın.

- b.  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

- c.  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın. Ağlar menüsüne girdiğinizde telsiz ağ listesini otomatik olarak yeniler.

- Zaten Ağlar menüsündeyseniz ağ listesini yenilemek için aşağıdaki işlemi gerçekleştirin.

-  ya da  ögesine basarak Yenile'ye gidin ve seçmek için  düğmesine basın. Telsiz yenilenir ve en güncel ağ listesi görüntülenir.

## Ağ Ekleme

Kullanılabilir ağ listesinde tercih edilen bir ağ yoksa bir ağ eklemek için aşağıdaki işlemi gerçekleştirin.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 4  ya da  ögesine basarak Ağ Ekle'ye gidin ve seçmek için  düğmesine basın.

---

- 5 Hizmet Kümesi Tanımlayıcısını (SSID) girin ve  ögesine basın.

---

- 6  ya da  ögesine basarak Ağ'a gidin ve seçmek için  düğmesine basın.

---

- 7 Şifreyi girin ve  düğmesine basın.  
Ağ erişim noktalarının başarıyla kaydedildiğini belirtmek için telsiz ekranında olumlu bir mini bilgi notu görüntülenir.

---

## Ağ Erişim Noktaları Ayrıntılarını Görüntüleme

Ağ erişim noktaları ayrıntılarını görüntülemek için bu prosedürü uygulayın.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

4  ya da  düğmesine basarak bir ağ erişim noktasına gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

5  ya da  ögesine basarak Ayarları Görüntüle'ye gidin ve seçmek için  düğmesine basın.

Bağlantısı sağlanan bir ağ erişim noktasında Hizmet Kümesi Tanımlayıcısı (SSID), Güvenlik Modu, Ortam Erişim Kontrolü (MAC) adresi ve İnternet Protokolü (IP) adresi görüntülenir.

Bağlantısı olmayan bir ağ erişim noktasında Hizmet Kümesi Tanımlayıcısı (SSID) ve Güvenlik Modu görüntülenir.

## Ağ Erişim Noktalarını Çıkarma

Ağ erişim noktalarını profil listesinden kaldırmak için aşağıdaki işlemleri gerçekleştirin.

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

4  ya da  ögesine basarak seçilen ağ erişim noktasına gidin ve seçmek için  düğmesine basın.

5  ya da  ögesine basarak Kaldır'a gidin ve seçmek için  düğmesine basın.

- 6  ya da  ögesine basarak **Evet**'e gidin ve seçmek için  düğmesine basın.

Seçilen ağ erişim noktalarının başarıyla kaldırıldığını belirtmek için telsiz ekranında olumlu bir mini bilgi notu görüntülenir.

## Uygulamalar

Bu bölümde, telsizinizde bulunan uygulama işlevlerinin nasıl çalıştığı açıklanmaktadır.

### Güç Seviyeleri

Güç ayarını her kanal için ayrı ayrı yüksek ya da düşük olarak özelleştirebilirsiniz.

#### Yüksek

Bu ayar, bulunduğunuz yerden uzak bir mesafede bulunan telsizlerle haberleşmenizi sağlar.

#### Düşük

Bu ayar, daha yakındaki telsizlerle haberleşmenizi sağlar.

#### NOT:

Bu özellik aynı frekansta olan Halk Bandı Radyo kanallarında uygulanamaz.

## Güç Seviyelerini Ayarlama

Telsizinizde güç seviyelerini ayarlamak için buradaki prosedürü uygulayın.

- Aşağıdakilerden birini yapın:
  - Programlanmış **Güç Seviyesi** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
-  veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.
-  veya  düğmesine basarak **Telsiz Ayarları** bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  ile GÜÇ seçeneğine gidin. Seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  veya  ile YÜKSEK seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, YÜKSEK bilgisinin yanında ✓ simgesi görüntülenir.
- DÜŞÜK seçeneği için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ekranda, DÜŞÜK bilgisinin yanında ✓ simgesi görüntülenir.

6 Giriş ekranına dönmek için  düğmesine uzun basın.

## Telsiz Tonlarını/Uyarılarını Açma veya Kapatma

Gerekirse tüm telsiz tonlarını ve uyarılarını etkinleştirebilir ve gelen Acil Durum uyarı tonu haricinde hepsini devre dışı bırakabilirsiniz . Telsizinizde tonları ve uyarıları açmak veya kapatmak için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Tonlar/Uyarılar** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar

Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Tüm Tonlar bölümüne gidin. Seçmek için  düğmesine basın.

6 Tüm ton ve uyarıları etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Tuş Takımı Seslerini Açma veya Kapatma

Telsizinizde tuş takımı seslerini açmak veya kapatmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile Tuş Takımı Sesi seçeneğine gidin. Seçmek için  düğmesine basın.

6 Tuş takımı tonlarını etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Tonlar/Uyarılar Ses Ofseti Seviyelerini Ayarlama

Bu özellik, ton veya uyarıların seviyesini, geçerli ses seviyesinden daha düşük ya da yüksek olacak şekilde ayarlamanızı sağlar. Telsizinizde tonlar ve uyarılar ses ofseti seviyelerini ayarlamak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Tonlar/Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.
- 5  veya  ile Ses Ofseti seçeneğine gidin. Seçmek için  düğmesine basın.
- 6 Gereken ses ofseti seviyesi için  veya  düğmesine basın.  
Karşılıklı gelen her bir ses ofseti seviyesiyle bir geri bildirim tonu duyulur.

- 7 Aşağıdakilerden birini yapın:
  - Seçmek için  düğmesine basın. İstenen ses ofseti seviyesi kaydedilir.
  - Çıkmak için  düğmesine basın. Değişiklikler silinir.

## Konuşma İzni Tonunu Açma veya Kapatma

Telsizinizde Konuşma İzni Tonu özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5  veya  ile Konuşma İzni seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 6 Konuşma İzni Tonunu etkinleştirmek veya devre dışı bırakmak için  düğmesine basın.

Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.
- 

## Güç Verme Tonunu Açma veya Kapatma

Telsizinizde Güç Verme Tonu özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile Güç Açık seçeneğine gidin. Seçmek için  düğmesine basın.

6 Güç Verme Tonunu etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında  simgesi görüntülenir

- Devre dışı bırakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.

## Yazılı Mesaj Uyarı Tonlarını Ayarlama

Metin mesajı uyarı tonunu Kişiler listesindeki her giriş için Kısa veya Tekrarlayan olacak şekilde özelleştirebilirsiniz. Telsizinizde yazılı mesaj uyarı tonlarını ayarlamak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  ile Mesaj Uyarısı seçeneğine gidin. Seçmek için  düğmesine basın.

---

5 Aşağıdakilerden birini yapın:

-  veya  ile Anlık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Anlık bilgisinin yanında ✓ simgesi görüntülenir.
  -  veya  ile Sürekli seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Sürekli bilgisinin yanında ✓ simgesi görüntülenir.
- 

## Ekran Kiplerini Değiştirme

Telsizin ekran kipini ihtiyaç duyduğunuz şekilde Gündüz ya da Gece olarak değiştirebilirsiniz. Bu özellik ekranın renk paletini etkiler. Telsizinizin ekran kipini değiştirmek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

[Geribildirim Gönder](#)

- Programlanmış **Ekran Kipi** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
- 

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Ekran seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Gündüz Kipi ve Gece Kipi bilgileri görünür.

---

- 5 Gerekli ayar için  veya  düğmesine basın.
- Seçmek için  düğmesine basın.
- Ekranda, seçilen ayarın yanında ✓ simgesi görüntülenir.

## Ekran Parlaklığını Ayarlama

Telsizinizde ekran parlaklığını ayarlamak için buradaki prosedürü uygulayın. Ekran parlaklığı Oto Parlaklık etkin olduğunda ayarlanamaz.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Parlaklık** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Parlaklık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda ilerleme çubuğu görüntülenir.

- 5 Ekran parlaklığını azaltmak veya artırmak için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ayar değeri 1 ile 8 arasında değişir.

## Kornaları/Işıkları Açma veya Kapatma

Telsiziniz, korna ve ışık özelliği aracılığıyla çağrı geldiğini bildirebilir. Aktif hale getirildiğinde, gelen çağrı aracınızın kornasını çalar ve ışıklarını yakar. Bu özelliğin satıcınız tarafından telsizin arka aksesuar konektöründen monte

edilmesi gerekir. Telsizinizde tüm korna ve ışıklar özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Kornalar/Işıklar** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Kornalar/Işıklar seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Kornalar/Işıklar'ı etkinleştirmek/devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:
- Etkinleştirilmişse **Etkin** yazısının yanında  simgesi görüntülenir
  - Devre dışı bırakılmışsa **Etkin** yazısının yanındaki  simgesi kaybolur.

## LED Göstergelerini Açma ve Kapatma

Telsizinizde LED göstergelerini açmak veya kapatmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak **Telsiz** Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  ile **LED Göstergesi seçeneğine** gidin. Seçmek için  düğmesine basın.

---

5 **LED Göstergesini etkinleştirmek veya devre dışı bırakmak için**  düğmesine basın.  
Ekranı aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse **Etkin** yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa **Etkin** yazısının yanındaki ✓ simgesi kaybolur.

---

## Genel Yayın Sistemini Açma veya Kapatma

Telsizinizin dahili genel yayın (PA) sistemini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Genel Yayın** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
- 

2  veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak **Telsiz** Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak **Genel Yayın** seçeneğine gidin. Seçmek için  düğmesine basın.

---

5 **Genel Yayın özelliğini etkinleştirmek veya devre dışı bırakmak için**  düğmesine basın.

- Etkinleştirilmişse **Etkin** yazısının yanında ✓ simgesi görüntülenir

- Devre dışı bırakılmışsa **Etkin** yazısının yanındaki ✓ simgesi kaybolur.

## Harici Genel Yayın Sistemini Açma veya Kapatma

Telsizinizin harici genel yayın (PA) sistemini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Harici Genel Yayın** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Harici Genel Yayın seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Harici genel yayın özelliğini etkinleştirmek veya devre dışı bırakmak için  düğmesine basın.
  - Etkinleştirilmişse **Etkin** yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa **Etkin** yazısının yanındaki ✓ simgesi kaybolur.

## Giriş Ekranını Açma ve Kapatma

Bu prosedürü uygulayarak Giriş Ekranını etkinleştirebilir ve devre dışı bırakabilirsiniz.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Ekran

seçeneğine gidin. Seçmek için  düğmesine basın.

---

5  veya  düğmesine basarak Giriş

Ekranı seçeneğine gidin. Seçmek için  düğmesine basın.

---

6 Giriş Ekranını etkinleştirmek/devre dışı bırakmak için  düğmesine basın.

Ekranı aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.
- 

## Dilleri Ayarlama

Telsizinizde dilleri ayarlamak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  ile Diller seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5 Gerekli dil için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ekranda, seçilen dilin yanında ✓ simgesi görüntülenir.

- 4  veya  düğmesine basarak Kablo Türü bölümüne gidin. Seçmek için  düğmesine basın.

- 5 Geçerli kablo türü ✓ simgesi ile gösterilir.

## Kablo Türü Seçme

Telsizinizin kullandığı kablo türünü seçmek için aşağıdaki adımları izleyin.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

## Sesli Anonsu Açma veya Kapatma

Bu özellik, telsizin kullanıcının yeni atadığı geçerli bölge ya da kanalı veya kullanıcının az önce bastığı programlanabilir düğmeyi sesli bir şekilde bildirmesini sağlar.

Bu özellik, genellikle kullanıcının ekranda gösterilen içeriği okumakta güçlük çektiği durumlarda kullanışlıdır.

Bu sesli gösterge, müşterinin kendi ihtiyaçlarına göre özelleştirilebilir. Telsizinizde Sesli Anons özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

## Opsiyon Kartını Açma veya Kapatma

Her kanalın opsiyon kartı özellikleri vardır ve bunlar programlanabilir düğmelere atanabilir. Bir kanal en fazla 6 opsiyon kartı özelliğini destekleyebilir. Telsizinizde opsiyon

kartını açmak veya kapatmak için buradaki prosedürü uygulayın.

Programlanmış **Opsiyon Kartı** düğmesine basın.

## Konuşma Sentezleyici

Konuşma Sentezleyici özelliği yalnızca satıcınız veya sistem yöneticiniz tarafından etkinleştirilebilir. Konuşma Sentezleyici etkinse Sesli Anons özelliği otomatik olarak devre dışı bırakılır. Sesli Anons etkinse Konuşma Sentezleyici özelliği otomatik olarak devre dışı bırakılır.

Bu özellik, telsizin şu özellikleri sesli bir şekilde bildirmesini sağlar:

- Geçerli Kanal
- Geçerli Bölge
- Programlanmış düğme özelliği açık veya kapalı
- Alınan yazılı mesajların içeriği
- Alınan İş Kartlarının içeriği

Bu sesli gösterge, müşterinin kendi ihtiyaçlarına göre isteğe uyarlanabilir. Bu özellik, genellikle ekran üzerinde o an görünen içeriğin okunamadığı zor koşullarda kullanışlıdır.

## Konuşma Sentezleyiciyi Ayarlama

Konuşma Sentezleyici özelliğini ayarlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  düğmesine basarak Sesli Anons bölümüne gidin. Seçmek için  düğmesine basın.
- 5 Aşağıdaki özelliklerden herhangi biri için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Kullanılabilir özellikler aşağıdaki gibidir:

- Tümü
- Mesajlar
- İş Kartları
- Kanal
- Bölge
- Program DÜğmesi

Seçili ayarın yanında ✓ simgesi görüntülenir.

## Menü Zamanlayıcıyı Ayarlama

Telsizinizin otomatik olarak Giriş ekranına dönmeden önce menüde ne kadar süre kalacağını ayarlayabilirsiniz. Menü zamanlayıcıyı ayarlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Ekran seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Menü Zamanlayıcı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 6 Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın.

## Dijital Mikrofon OKK'yi Açma veya Kapatma

Dijital Mikrofon Otomatik Kazanç Kontrolü (OKK), dijital bir sistemde yayın yaparken telsizin mikrofon kazancını otomatik olarak kontrol eder.

Bu özellik, yüksek sesi baskılayarak veya yumuşak sesi bir ön ayar değerine göre artırarak tutarlı bir ses elde edilmesini sağlar. Telsizinizde Dijital Mikrofon OKK özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  ile Mik OKK-D seçeneğine gidin. Seçmek için  düğmesine basın.
- 5 Dijital Mikrofon AGC seçeneğini etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Akıllı Sesi Açma veya Kapatma

Telsiziniz, sabit ve sabit olmayan gürültü kaynaklarının bulunduğu ortamlarda mevcut arka plan gürültüsünü filtrelemek için ses ayarını otomatik olarak yapar. Bu, yalnız alıcıya özgü bir özelliktir ve yayın sesini etkilemez. Telsizinizde Akıllı Ses özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

### NOT:

Bu özellik, Bluetooth oturumunda uygulanamaz.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Akıllı Ses** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Akıllı Ses bölümüne gidin. Seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Açık bilgisinin yanında ✓ simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Kapalı bilgisinin yanında ✓ simgesi görüntülenir.

## Akustik Geri Besleme Supresörü Özelliğini Açma ve Kapatma

Bu özellik, gelen çağrılardaki akustik geri beslemeyi en aza indirmenizi sağlar.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak AF Supresörü seçeneğine gidin ve seçmek için  düğmesine basın.

Belirlenen seçeneği değiştirmek için veya düğmelerini de kullanabilirsiniz.

## 5 Aşağıdakilerden birini yapın:

- Akustik Geri Besleme Supresörünü etkinleştirmek için  düğmesine basın. Ekranda, Etkin yazısının yanında ✓ ögesi gösterilir.
- Akustik Geri Besleme Supresörünü devre dışı bırakmak için  düğmesine basın. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Titrek Sesi İyileştirmeyi Açma veya Kapatma

Çok fazla alveolar titrek ses (ör. alveolar "R") içeren sözcüğe sahip bir dilde konuşuyorsanız bu özelliği etkinleştirebilirsiniz. Telsizinizde Titrek Sesi İyileştirme özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

## 1 Aşağıdakilerden birini yapın:

- Programlanmış **Titrek Sesi İyileştirme** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

## 2

 veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

## 3

 veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

## 4

 veya  düğmesine basarak Titrek Sesi İyileştirme bölümüne gidin. Seçmek için  düğmesine basın.

## 5 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Açık bilgisinin yanında ✓ simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine

basın. Ekranda, **Kapalı** bilgisinin yanında ✓ simgesi görüntülenir.

## Ses Ortamı

Telsizinizin ses ortamını çevrenize göre özelleştirebilirsiniz.

### Varsayılan

Bu, varsayılan ayardır.

### Yüksek

Bu ayar, gürültülü ortamlarda Gürültü Supresörünü etkinleştirir ve hoparlörün ses seviyesini artırır.

### İş Grubu

Bu ayar, bir grup telsiz birbirinin yakınında bulunduğu AF Supresörünü etkinleştirir ve AGC'yi devre dışı bırakır.

## Ses Ortamını Ayarlama

Telsizinizin ses ortamını bulunduğunuz ortama göre ayarlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Ses Ortamı seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın.

Ayarlar aşağıdaki gibidir.

- Varsayılan fabrika ayarları için Varsayılan seçeneğini belirleyin.
- Gürültülü ortamlardayken hoparlörün ses seviyesini artırmak için Yüksek seçeneğini belirleyin.

- Birbirine yakın telsiz gruplarıyla kullanırken akustik geri beslemeyi azaltmak için Çalışma Grubu seçeneğini belirleyin.

Ekranda, seçilen ayarın yanında ✓ simgesi görüntülenir.

## Ses Profilleri

Telsizinizin ses profillerini tercihinize göre özelleştirebilirsiniz.

### Varsayılan

Bu, varsayılan ayardır.

### Seviye 1, Seviye 2 ve Seviye 3

Bu ayarlar, 40, 50, 60 yaş ve üzerindeki yetişkinler için yaygın olan gürültü kaynaklı işitme kaybını telafi etmeye yönelik ses profilleridir.

### Tiz Artırma, Mid Artırma ve Bass Artırma

Bu ayarlar, daha ince seslere, burundan gelen seslere ve daha derin seslere yöneliktir.

## Ses Profillerini Ayarlama

Telsizinizde ses profillerini ayarlamak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  ile Ses Profilleri seçeneğine gidin. Seçmek için  düğmesine basın.
- 5 Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ayarlar aşağıdaki gibidir.
  - Daha önceden seçilen ses profilini devre dışı bırakmak ve varsayılan fabrika ayarlarına dönmek için Varsayılan seçeneğini belirleyin.

- 40 yaşının üzerindeki yetişkinlerde yaygın olan gürültü kaynaklı işitme kaybını telafi etmek amacıyla oluşturulmuş ses profilleri için Seviye 1, Seviye 2 veya Seviye 3 seçeneğini belirleyin.
- Daha ince ses, burundan gelen ses veya derin ses tercihinize uyan ses profilleri için Tiz Artırma, Mid Artırma veya Bass Artırma seçeneğini belirleyin.

Ekranda, seçilen ayarın yanında ✓ simgesi görüntülenir.

## Küresel Navigasyon Uydu Sistemini Açma veya Kapatma

Küresel Navigasyon Uydu Sistemi (GNSS), telsizin yerini tam olarak tespit eden bir uydu navigasyon sistemidir. GNSS, Küresel Konumlandırma Sistemi (GPS) ve Küresel Navigasyon Uydu Sistemi (GLONASS) içerir.

### NOT:

Belirli telsiz modellerinde GPS ve GLONASS bulunabilir. GNSS kümelenmesi, CPS kullanılarak yapılandırılır. Telsizinizin nasıl programlandığını belirlemek için satıcınıza veya sistem yöneticinize başvurun.

- 1 Telsizinizde GNSS'yi açmak veya kapatmak için aşağıdaki adımlardan birini uygulayın.

- Programlanmış **GNSS** düğmesine basın.
- Menüye erişmek için  düğmesine basın. Bir sonraki adıma geçin.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak GNSS seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  tuşuna basarak GNSS özelliğini etkinleştirin veya devre dışı bırakın.
- Etkinleştirilmişse **Etkin** yazısının yanında  simgesi görüntülenir
- Devre dışı bırakılmışsa **Etkin** yazısının yanındaki  simgesi kaybolur.

## Genel Telsiz Bilgileri

Telsiziniz çeşitli genel parametrelerle ilgili bilgiler içerir.

Telsizinizin genel bilgileri aşağıdaki gibidir:

- Telsiz adı ve kimliği.
- Ürün yazılımı ve Codeplug sürümleri.
- Yazılım güncelleme.
- GNSS bilgileri.
- Saha bilgileri.

### NOT:

Önceki ekrana dönmek için  düğmesine basın.

Giriş ekranına dönmek için  düğmesine uzun basın. Telsiz, faaliyetsizlik sayacının süresi dolduğunda geçerli ekrandan çıkar.

## Telsiz Adını ve Kimliğini Kontrol Etme

Telsizinizdeki telsiz adını ve kimliğini kontrol etmek için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Telsiz Adı ve Kimliği** düğmesine basın. Aşağıdaki adımları atlayın. Bir olumlu gösterge tonu duyulur.
- Programlanmış **Telsiz Adı ve Kimliği** düğmesine basarak önceki ekrana dönebilirsiniz.
- Menüye erişmek için  düğmesine basın.

### 2

 veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  düğmelerine basarak Kimliğim

öğesine gidin. Seçmek için  düğmesine basın.

İlk metin satırında telsiz adı görüntülenir. İkinci metin satırında telsiz kimliği görüntülenir.

3  veya  düğmesine basarak Telsiz

Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile Sürümler seçeneğine gidin.

Seçmek için  düğmesine basın.

Ekranında geçerli ürün yazılımı ve codeplug sürümleri görüntülenir.

## Ürün Yazılımı ve Codeplug Sürümlerini Kontrol Etme

Telsizinizdeki ürün yazılımı ve codeplug sürümlerini kontrol etmek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

## Yazılım Güncelleme Bilgilerini Kontrol Etme

Bu özellik, OTAP veya Wi-Fi ile gerçekleştirilen en son yazılım güncellemesinin tarihini ve saatini görüntüler. Telsizinizdeki yazılım güncelleme bilgilerini kontrol etmek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile YZLM Güncelme seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda en son yazılım güncelleme tarihi ve saati görüntülenir.

Yazılım Güncelleme menüsü en az bir başarılı OTAP veya Wi-Fi oturumu gerçekleştirildikten sonra görüntülenir. Daha fazla bilgi için bkz. [Kablosuz Programlama sayfa 495](#).

## GNSS Bilgilerini Kontrol Etme

Telsizinizde aşağıdaki gibi GNSS bilgileri gösterilir:

- Enlem
- Boylam

- Rakım
- Yön
- Hız
- Yatay Duyarlılık Kaybı (HDOP)
- Uydular
- Sürüm

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak GNSS Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak ilgili öğeye gidin. Seçmek için  düğmesine basın. Ekranda istenen GNSS bilgileri görüntülenir.
- 

- 4  veya  düğmesine basarak Saha Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.
- 

Ekranda geçerli saha adı görüntülenir.

## Saha Bilgilerini Görüntüleme

Telsizinin açık olduğu geçerli saha adını görüntülemek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 
- 3  veya  düğmesine basarak Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.
-

Bu sayfa özellikle boş bırakılmıştır.

## Connect Plus Kullanımı

Connect Plus, DMR teknolojisini temel alan bir tam birleştirme çözümdür. Connect Plus, kanal talepleri ve atamaları için özel bir kontrol kanalı kullanır. Bu sistemde telsiz kullanıcılarına açık olan özellikler bu bölümde yer alır.

## Connect Plus Kipinde Ek Telsiz Kontrolleri

Bu bölümde programlanabilir düğmeler ve atanabilir telsiz işlevleri gibi önceden programlanmış yöntemlerle telsiz kullanıcısının kullanabileceği ek telsiz kontrolleri açıklanmaktadır.

### Bas Konuş (PTT) Düğmesi

Telsizin yan kısmındaki **PTT** düğmesi iki temel amaca hizmet eder:

- **PTT** düğmesi, çağrı yapılırken telsizin çağrıdaki diğer telsizlere yayın göndermesini sağlar.

Konuşmak için **PTT** düğmesini basılı tutun. Dinlemek için **PTT** düğmesini bırakın.

**PTT** düğmesine basıldığında mikrofon etkin hale gelir.

Geribildirim Gönder

- **PTT** düğmesi, çağrı yapılmadığında yeni bir çağrı yapmak için kullanılır (bkz. [Telsiz Çağrısı Yapma sayfa 250](#)).

Konuşma İzni Tonu etkinse konuşmadan önce kısa uyarı tonunun bitmesini bekleyin.

## Programlanabilir Düğmeler

Satıcınız programlanabilir düğmeleri, düğmelere basma süresine bağlı olarak telsiz işlevlerine atanmış kısayollar olarak programlayabilir:

### Kısa basma

Basma ve hızlıca bırakma.

### Uzun basma

Basma ve programlanan süre kadar basılı tutma.

### NOT:

Düğmeleri basılı tutma için programlanan süreler, atanabilir tüm telsiz/uygulama işlevleri veya ayarları için geçerlidir. *Acil durum* düğmesinin programlanmış süresi hakkında daha fazla bilgi için bkz. [Acil Durum İşlemi sayfa 286](#).

## Atanabilir Telsiz İşlevleri

### **Bluetooth® Ses Anahtarı**

Ses çıkış yolunu dahili telsiz hoparlörü ya da harici Bluetooth özellikli bir aksesuar olacak şekilde değiştirir.

### **Bluetooth Bağlantısı**

Bluetooth bulma ve bağlantı kurma işlemini başlatır.

### **Bluetooth Bağlantısını Kesme**

Telsiziniz ve Bluetooth özellikli cihazınız arasındaki mevcut tüm Bluetooth bağlantılarını keser.

### **Bluetooth Bulunabilir**

Telsizinizin Bluetooth Bulunabilirlik Moduna geçmesine olanak sağlar.

### **Meşgul Kuyruğu İptali**

Meşgul Kuyruğunda Acil Durum olmayan bir çağrı başlatıldığında meşgul kipinden çıkar. Acil durum çağrıları Meşgul Kuyruğuna kabul edildikten sonra iptal edilemez.

### **Çağrı Kaydı**

Arama geçmişi listesini seçer.

### **Kanal Anonsu**

Geçerli kanal için bölge ve kanal anonsu sesli mesajlarını çalar.

### **Kişiler**

Kişi listesine doğrudan erişim sağlar.

### **Acil Durum Açma/Kapatma**

Programlamaya bağlı olarak, acil durum başlatır veya iptal eder.

### **Kornalar/Işıklar**

Kornalar ve ışıklar özelliğini açar veya kapatır.

### **İç Konum**

İç Konum özelliğini açar veya kapatır.

### **Akıllı Ses**

Akıllı sesi açar veya kapatır.

### **Elle Çevirme**

Programlamaya bağlı olarak, bir abone kimliği veya telefon numarası tuşlanarak bir Özel çağrı veya Telefon çağrısı başlatır.

### **Tek Tuşla Erişim**

Doğrudan önceden tanımlanmış bir Özel Çağrı, Çağrı Uyarısı, Hızlı Metin mesajı veya Ev Dönüştürme başlatır.

### **Gizlilik**

Gizlilik özelliğini açar veya kapatır.

### **Telsiz Kontrolü**

Bir telsizin bir sistem içinde etkin olup olmadığını belirler.

**Telsiz Etkin**

Bir hedef telsizin uzaktan etkinleştirilmesini sağlar.

**Telsiz Devre Dışı**

Bir hedef telsizin uzaktan devre dışı bırakılmasını sağlar.

**Uzaktan İzleme**

Bir hedef telsizin mikrofonunu bu telsize hiçbir gösterge vermeden açar.

**Ana Kanalı Sıfırlama**

Yeni bir ana kanal ayarlar.

**Zil Uyarı Türü**

Zil Uyarı Tipi Ayarına doğrudan erişim sağlar.

**Dolaşım İsteği**

Farklı bir saha için arama yapmak ister.

**Tarama**

Taramayı açar veya kapatır.

**Ana Kanal Hatırlatıcıyı Sessize Alma**

Ana Kanal Hatırlatıcıyı sessize al.

**Saha Kilidi Açık/Kapalı**

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahaya birlikte diğer sahaları da arar.

**Metin Mesajı**

Yazılı mesaj menüsünü seçer.

**Sesli Anons Açık/Kapalı**

Sesli Anonsu açar veya kapatır.

**Wi-Fi**

Wi-Fi özelliğini açar veya kapatır.

**Bölge**

Bölge listesinden seçim yapılmasını sağlar.

## Atanabilir Ayarlar ya da Uygulama İşlevleri

**AF Engelleyici**

Akustik Geri Besleme Supresörü özelliğini açar veya kapatır.

**Tüm Tonlar/Uyarılar**

Tüm tonları ve uyarıları açar veya kapatır.

**Arka Aydınlatma Parlaklığı**

Parlaklık seviyesini ayarlar.

**Kanal Yukarı/Aşağı**

Programlamaya bağlı olarak, kanalı önceki ya da sonraki kanala değiştirir.

## Ekran Kipi

Gündüz/gece ekran kipini açar ya da kapatır.

## Global Navigasyon Uydu Sistemi (GNSS)

Uydu navigasyon sistemini açar veya kapatır.

## Güç Seviyesi

Güç seviyesini yüksek ile düşük ayarları arasında değiştirir.

## Atanmamış

Düğme işlevinin henüz atanmadığını gösterir.

## Connect Plus Kipindeki Durum Göstergelerini Tanımlama

### Ekran Simgeleri

Aşağıda, telsizin ekranında görünen simgeler gösterilmektedir.

Tablonun devamı...

Ekranında görünen çubuk sayısı, telsiz sinyalinin gücünü gösterir. Dört çubuk en güçlü sinyal seviyesini gösterir. Bu simge sadece sinyal alınırken görüntülenir.

### Bluetooth Cihazı Bağlı Değil

Bluetooth özelliği etkindir; ancak uzaktan bağlı herhangi bir Bluetooth cihazı yoktur.

### Bluetooth Bağlı

Bluetooth özelliği etkindir. Uzak bir Bluetooth cihazı bağlı olduğunda bu simge yanmaya devam eder.

### Yüksek Hacimli Veri

Telsiz yüksek hacimli veri almaktadır ve kanal meşguldür.

### İç Konum Kullanılabilir<sup>3</sup>

İç konum durumu açıktır ve kullanılabilir.

### İç Konum Kullanılamıyor<sup>3</sup>

Tablonun devamı...

<sup>3</sup> Yalnızca en son yazılım ve donanıma sahip modeller için geçerlidir

	İç konum durumu açıktır fakat Bluetooth devre dışı bırakıldığı veya İşaretleme Tarama işlevi Bluetooth tarafından askıya alındığı için kullanılamaz.
	<b>Sessize Alma Modu</b> Sessiz Kipi etkinleştirilir ve hoparlörün sesi kapatılır.
	<b>Bildirim</b> Bildirim Listesinde görülmesi gereken öğeler vardır.
	<b>Güç Seviyesi</b> Telsiz Düşük güce ayarlıdır veya Telsiz Yüksek güce ayarlıdır.
	<b>Tonlar Devre Dışı</b> Tonlar kapalıdır.
	<b>Opsiyon Kartı</b> Opsiyon Kartı etkindir.
	<b>Opsiyon Kartı Devre Dışı</b> Opsiyon Kartı devre dışıdır.

Tablonun devamı...

	<b>GNSS Kullanılabilir</b> GPS/GNSS özelliği etkindir. Bu simge, sabit bir pozisyona geçildiği durumlarda yanmaya devam eder.
	<b>GNSS Kullanılmıyor/Kapsam Dışı</b> GPS/GNSS özelliği etkindir; ancak uydudan veri almamaktadır.
	<b>Tarama</b> Tarama özelliği etkindir.
	<b>Acil Durum</b> Telsiz, Acil Durum kipindedir.
	<b>Güvenli</b> Gizlilik özelliği etkindir.
	<b>Güvenli Değil</b> Gizlilik özelliği devre dışıdır.
	<b>Saha Gezinme</b> Saha gezinme özelliği etkindir.

Tablonun devamı...

	<b>Kişi</b> Telsiz kişileri kullanılabilir.
	<b>Çağrı Kaydı</b> Telsiz çağrı kaydı.
	<b>Mesaj</b> Gelen mesajlar.
	<b>Sadece Zil</b> Zil sesi kipi etkindir.
	<b>Sessiz Zil</b> Sessiz zil kipi etkindir.
	<b>Titreşim</b> Titreşim kipi etkindir.
	<b>Titreşim ve Zil</b> Titreşim ve Zil kipi etkindir.

Tablonun devamı...

	<b>Wi-Fi Mükemmel</b> <sup>4</sup> Wi-Fi sinyali mükemmel.
	<b>Wi-Fi İyi</b> <sup>4</sup> Wi-Fi sinyali iyi.
	<b>Wi-Fi Orta</b> <sup>4</sup> Wi-Fi sinyali orta.
	<b>Wi-Fi Zayıf</b> <sup>4</sup> Wi-Fi sinyali zayıf.
	<b>Wi-Fi Kullanılmıyor</b> <sup>4</sup> Wi-Fi sinyali kullanılmıyor.

<sup>4</sup> Yalnızca DM4601e için geçerlidir

## Çağrı Simgeleri

Bir çağrı sırasında telsizinizin ekranında aşağıdaki simgeler görüntülenir. Bu simgeler aynı zamanda, kimlik türünü göstermek üzere Kişiler listesinde de görüntülenir.

	<p><b>Özel Çağrı</b></p> <p>Bir Özel Çağrının sürmekte olduğunu gösterir. Kişi listesinde bir abonenin adını (metin) ya da kimliğini (numara) gösterir.</p>
	<p><b>Grup Çağrısı/Sahadaki Herkese Çağrı</b></p> <p>Bir Grup Çağrısı ya da Sahadaki Herkese Çağrının sürmekte olduğunu gösterir. Kişi listesinde bir grup adını (metin) veya kimliğini (numara) gösterir.</p>
	<p><b>Özel Çağrı olarak Telefon Çağrısı</b></p> <p>Özel Çağrı olarak bir Telefon Çağrısının sürmekte olduğunu gösterir.</p>
	<p><b>Bluetooth PC Çağrısı</b></p>

Tablonun devamı...

Bir Bluetooth PC Çağrısının sürmekte olduğunu gösterir.

Kişiler listesinde bir Bluetooth PC Çağrısı adını (metin) veya kimliğini (numara) gösterir.

### Sevk Çağrısı

Sevk Çağrısı iletişim tipi, üçüncü taraf bir Yazılı Mesaj Sunucusu aracılığıyla sevk işlemi yapan bilgisayara yazılı mesaj göndermek için kullanılır.

## Geliştirilmiş Menü Simgeleri

Aşağıdaki simgeler, iki seçenek arasında tercih sunan menü öğelerinin yanında ya da iki seçeneikli tercih sunan bir alt menü olduğunun işareti olarak görüntülenir.

	<p><b>Onay kutusu (Boş)</b></p> <p>Seçeneğin belirlenmediğini gösterir.</p>
	<p><b>Onay kutusu (İşaretli)</b></p> <p>Seçeneğin belirlendiğini gösterir.</p>

Tablonun devamı...

### Koyu Siyah Kutu

Alt menü aracılığıyla menü için seçeneğin belirlendiğini gösterir.

## Gönderilenler Simgeleri

Aşağıdaki simgeler telsiz ekranının sağ üst köşesinde Gönderilenler klasöründe görüntülenir.

	<b>Başarıyla Gönderildi</b> Yazılı mesaj başarılı bir şekilde gönderilmiştir.
VEY A 	
	<b>Sürüyor</b> <ul style="list-style-type: none"> <li>Grup diğer adına ya da kimliğine gidecek yazılı mesaj iletmeyi beklemektedir.</li> </ul>
VEY	

Tablonun devamı...

A 	<ul style="list-style-type: none"> <li>Abone adına ya da kimliğine gidecek yazılı mesaj iletmeyi beklemektedir; gönderildikten sonra da alındı iletili beklenmektedir.</li> </ul>
	<b>Kişisel veya Grup Mesajı Okundu</b> Yazılı mesaj okunmuştur.
VEY A 	
VEY A 	<b>Kişisel veya Grup Mesajı Okunmadı</b> Yazılı mesaj okunmamıştır.
	<b>Gönderme Başarısız</b> Yazılı mesaj gönderilmemiştir.
VEY A 	

## Bluetooth Cihaz Simgeleri

Aşağıdaki simgeler de, cihaz türünü göstermek için Bluetooth özellikli kullanılabilir cihazlar listesinde öğelerin yanında görüntülenir.

	<b>Bluetooth Veri Cihazı</b> Tarayıcı gibi Bluetooth özellikli veri cihazları.
	<b>Bluetooth Ses Cihazı</b> Kulaklık gibi Bluetooth özellikli ses cihazları.
	<b>Bluetooth Bas-Konuş Cihazı</b> Yalnızca Bas-Konuş Cihazı (POD) gibi Bluetooth özellikli PTT cihazları.

## LED Göstergesi

LED göstergesi, telsizinizin çalışma durumunu gösterir.

<b>Yanıp sönen kırmızı</b>	Telsiz, düşük pil durumunda yayın göndermektedir, bir acil durum yayını
----------------------------	---

*Tablonun devamı...*

	almaktadır veya açılıştaki otomatik testte başarısız olmuştur ya da telsiz Otomatik Menzilli Aktarıcı Sistemiyle yapılandırıldığında menzilin dışına çıkmıştır. Sessiz Kipi etkindir.
<b>Hızlı yanıp sönen kırmızı</b>	Telsiz kablosuz dosya aktarımı (Opsiyon Kartı ürün yazılımı dosyası, Ağ Frekansı dosyası veya Opsiyon Kartı Codeplug dosyası) alıyordur veya yeni bir Opsiyon Kartı ürün yazılımı dosyasına yükseltiyordur.
<b>Yanıp sönen yeşil ve sarı</b>	Telsiz bir Çağrı Uyarısı alıyordur, yazılı mesaj almıştır veya Tarama etkindir ve faaliyet alıyordur.
<b>Devamlı sarı</b>	Telsiz, Bluetooth Bulunabilir Modundadır.
<b>İki kez yanıp sönen sarı</b>	Telsiz etkin olarak yeni saha aramaktadır.
<b>Yanıp sönen sarı</b>	Telsiz bir Çağrı Uyarısı almaktadır veya Tarama etkindir ve boşta (telsiz herhangi bir faaliyette sessizde kalır).

*Tablonun devamı...*

<b>Devamlı yeşil</b>	Telsiz açılıyor ya da yayın yapıyordur.
<b>Yanıp sönen yeşil</b>	Telsiz çalışıyor, bir çağrı veya veri alıyordur.
<b>İki kez yanıp sönen yeşil</b>	Telsiz gizliliği etkinleştirilmiş bir çağrı alıyordur.

## Gösterge Tonları

Aşağıda, telsiz hoparlörü aracılığıyla duyulan tonlar belirtilmektedir.

Yüksek perdeli ton  Düşük perdeli ton

Gösterge tonları, bir görevi gerçekleştirmek üzere bir işlem yapıldıktan sonra, durumun sesli bildirimini sağlar.

	Olumlu Gösterge Tonu
	Olumsuz Gösterge Tonu

## Uyarı Tonları

Uyarı tonları, telsizin durumu ya da telsizin alınan veriye yanıtı ile ilgili sesli göstergeler sağlar.

<b>Sürekli Ton</b> 	Monoton bir sestir. Durdurulana kadar sürekli ses verir.
<b>Sürekli Ton</b> 	Telsizde yapılan süre ayarına bağlı olarak sürekli ses verir. Ton kendi kendine başlar, durur ve tekrar eder.
<b>Tekrarlanan Ton</b> 	Kullanıcı tarafından durdurulana kadar kendi kendine tekrar eden tek bir tondur.
<b>Anlık Ton</b> 	Telsizde belirlenen kısa bir süre boyunca yalnız bir kez ses verir.

## Connect Plus ve Connect Plus Olmayan Kipler Arasında Geçiş Yapma

Bu özellik satıcınız veya sistem yöneticiniz tarafından programlanmışsa Connect Plus olmayan bir kipe geçmek için başka bir bölgeye geçmeniz gerekir. Telsizinizin Connect Plus olmayan bölgelere programlanıp programlanmadığını ve Connect Plus olmayan bölgelerde çalışırken hangi özelliklerin kullanılabilirliğini öğrenmek için satıcınıza veya sistem yöneticinize başvurun.

## Connect Plus Kipinde Çağrı Yapma ve Alma

Bu bölümde genel telsiz kullanımı ve telsizinizde bulunan çağrı özellikleri açıklanmaktadır.

## Saha Seçme

Bir saha belirli bir bölge için kapsama alanı sağlar. Bir Connect Plus sahasının bir saha denetleyicisi ve en çok 15 yineleyicisi vardır. Çok sahalı bir ağda, geçerli sahanın sinyal seviyesi kabul edilemez bir seviyeye düşerse Connect Plus telsizi otomatik olarak yeni saha arar.

## Dolaşım İsteği

Gezinme İsteği, mevcut sahanın sinyali uygun olsa bile telsizin farklı bir saha aramasını ister.

Mevcut saha yoksa:

- Telsizde Arama ve Seçili Kanal Adı bilgisi görüntülenir ve telsiz saha listesinde arama yapmaya devam eder.
- Önceki saha halen kullanılabiliriyorsa telsiz bu sahaya döner.

### NOT:

Bu özellik, satıcınız tarafından programlanır.

Programlanmış **Gezinme İsteği** düğmesine basın.

Telsizin yeni sahaya geçtiğini belirten bir ton duyulur. Ekranda, Saha Kimliği <Saha Numarası> bilgisi görüntülenir.

## Saha Kilidi Açık/Kapalı

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahaya birlikte diğer sahaları da arar.

Programlanmış **Saha Kilidi** düğmesine basın.

**Saha Kilidi** işlevi açıksa:

- Telsizin geçerli sahaya kilitletiğini belirten bir olumlu gösterge tonu duyulur.
- Ekranda, `Site Locked` (Saha Kilitlendi) bilgisi görüntülenir.

**Saha Kilidi** işlevi kapalıysa:

- Telsizin kilidinin açıldığını belirten bir olumsuz gösterge tonu duyulur.
- Ekranda, `Site Unlocked` (Saha Kilidi Açıldı) bilgisi görüntülenir.

değiştirmek için telsizinizin yeniden programlanmasına gerek yoktur. Telsizinizin izin verilmeyen bir sahaya kaydolmayı denerse şu mesaj görüntülenir: `Sahaya <verilen numara> İzin Verilmiyor. Telsiz daha sonra farklı bir ağ sahası arar.`

## Bölge Seçme

Telsiz, en çok 16 Connect Plus Bölgesine programlanabilir ve her Connect Plus bölgesi Kanal Seçim Topuzu üzerinde en çok 16 atanabilen konum içerir.

Atanabilir her topuz konumu şu sesli çağrı türlerinden birisini başlatmak için kullanılabilir:

- Grup Çağrısı
- Çoklu Grup Çağrısı
- Sahadaki Herkese Çağrı
- Özel Çağrı

1 Aşağıdakileri yaparak Bölge özelliğine erişin:

## Saha Kısıtlama

Connect Plus telsiz sistem yöneticinizin, telsizinizin hangi ağ sahalarını kullanma izni olup olmayacağını belirleme yetkisi bulunur. İzin verilen ve verilmeyen sahalar listesini

Telsiz Kontrolleri	Adımlar
<b>Programlanmış Bölge Seçimi düğmesi</b>	Programlanmış <b>Bölge Seçimi</b> düğmesine basın.
<b>Telsiz menüsü</b>	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak Bölge seçeneğine gidin ve seçmek için  düğmesine basın.</p>

Geçerli bölge ekranda görüntülenir ve bir ✓ simgesiyle belirtilir.

2 İstenen bölgeyi seçin.

Telsiz Kontrolü	Adımlar
 ya da 	 ya da  düğmesine basın ve ilgili bölgeye kaydırın.

3 Seçmek için  düğmesine basın.

Ekranda kısa süreliğine <Bölge> Seçildi yazısı görüntülenir ve seçilen bölge ekranına dönlür.

## Birden Fazla Ağ Kullanma

Telsiziniz birden fazla Connect Plus ağını kullanmak üzere programlanmışsa istenen ağa atanmış Connect Plus bölgesine geçerek farklı bir ağ seçebilirsiniz. Ağdan bölgeye yapılan bu atamalar, telsiz programlama aracılığıyla satıcınız tarafından yapılandırılır.

## Çağrı Tipi Seçme

Kanal Seçim Düğmesini kullanın. Telsizinizin nasıl programlandığına bağlı olarak bu bir Grup Çağrısı, Çoklu Grup Çağrısı, Sahadaki Herkese Çağrı veya Özel Çağrı olabilir. Kanal Seçim Düğmesini (kendisine bir çağrı tipi

atanmış olan) farklı bir konuma getirirseniz bu, telsizin Connect Plus sahasına yeniden kaydolmasına neden olur. Telsiz, yeni Kanal Seçim Düğmesi konumu çağrı tipi için programlanmış olan Kayıt Grubu Kimliği ile kaydolur.

Kendisine atanmış çağrı tipi olmayan bir konumu seçerseniz telsizin sürekli bir ses çıkarır ve ekranda Unprogrammed (Programlanmamış) mesajı görüntülenir. Programlanmamış bir kanal seçildiğinde telsizin çalışmaz, onun yerine programlanmış bir kanal seçmek için Kanal Seçim Düğmesini kullanın.

İstenen bölge görüntülediğinde (telsizinizde birden çok bölge varsa), programlanmış Kanal Seçim Düğmesini döndürerek çağrı tipini seçebilirsiniz.

## Telsiz Çağrısı Alma ve Yanıtlama

Kanal, abone kimliği ya da grup kimliği görüntüledikten sonra, grup kimliği almaya ve yanıtlamaya başlayabilirsiniz.

Telsiz yayın gönderirken LED devamlı yeşil yanar, yayın alırken ise yeşil yanıp söner.

### NOT:

Telsiz yayın yaparken LED devamlı yeşil yanar, gizliliği etkinleştirilmiş bir çağrı alırken iki kez yeşil renkte yanıp söner . Gizliliğin etkin olduğu bir çağrıyı çözebilmesi için telsizinizde yayını gönderen telsizle (çağrıyı aldığınız telsiz) aynı Gizlilik Anahtarı VEYA Anahtar Değeri ve Anahtar Kimliği (satıcınız tarafından programlanır) bulunmalıdır.

Daha fazla bilgi için bkz. [Gizlilik sayfa 306](#).

## Grup Çağrısı Alma ve Yanıtlama

Bir kullanıcı grubundan çağrı almak için telsiziniz o grubun parçası olarak yapılandırılmalıdır.

Grup Çağrısı aldığınızda (Giriş Ekranındayken) LED yeşil yanıp söner. Grup Çağrı simgesi sağ üst köşede görüntülenir. İlk metin satırında arayanın adı görüntülenir. İkinci metin satırında grup çağrısı adı görüntülenir. Telsiziniz, sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

- 1 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

LED ışıkları sürekli yeşil renkte yanar.

2 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofonu doğru konuşun.

3 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer.

**NOT:**

Grup Çağrısı yapma ile ilgili ayrıntılı bilgi için bkz. [Grup Çağrısı Yapma sayfa 250](#).

## Özel Çağrı Alma ve Yanıtlama

Bağımsız bir telsizle başka bir bağımsız telsiz arasında yapılan çağrılara Özel Çağrı denir.

Özel Çağrı aldığınızda LED yeşil yanıp söner. Ekranın ilk satırında abone adı veya kimliği ve RSSI simgesi görüntülenir. İkinci satırda, Özel Çağrı bilgisi ve Özel Çağrı simgesi görüntülenir. Telsiziniz sessiz kipinden çıkar ve telsizin hoparlöründen gelen çağrı sesi duyulur.

1 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

2 Çağrışı yanıtlamak için **PTT** düğmesine basın. LED ışıkları sürekli yeşil renkte yanar.

3 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofonu doğru konuşun.

4 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer.

Ekranında `Call Ended` (Çğr Son) bilgisi görüntülenir.

Özel Çağrı yapma ile ilgili ayrıntılı bilgi için bkz. [Özel Çağrı Yapma sayfa 251](#).

## Sahadaki Herkese Çağrı Alma

Sahadaki Herkese Çağrı, tek bir telsizin sahadaki her telsize yaptığı çağrıdır. Tüm kullanıcıların duyması gereken önemli anonsların yapılması için kullanılır.

Sahadaki Herkese Çağrı aldığınızda bir ton duyulur ve LED yeşil yanıp söner.

Grup Çağrısı simgesi sağ üst köşede görünür. İlk metin satırında çağrı yapanın adı görüntülenir. İkinci metin satırında Sahadaki Herkese Çağrı bilgisi görüntülenir.

Telsiziniz, sessiz kipten çıkar ve hoparlöründen gelen çağrı sesi duyulur.

Sahadaki Herkese Çağrı sonlandırıldığında, telsiz çağrıyı almadan önceki ekrana döner. Sahadaki Herkese Çağrı sona ermeden önce, önceden belirlenen bir süre boyunca beklemez.

Sahadaki Herkese Çağrıya yanıt verilemez.

### NOT:

Sahadaki Herkese Çağrı yapma ile ilgili ayrıntılı bilgi için bkz. [Sahadaki Herkese Çağrı Yapma sayfa 252](#).

Çağrı alınırken farklı bir kanala geçmeniz halinde telsiz Sahadaki Herkese Çağrıyı almayı durdurur. Sahadaki Herkese Çağrı sırasında, çağrı sona erene kadar hiçbir programlanmış düğme işlevini kullanamazsınız.

## Gelen Özel Telefon Çağrısı Alma

Gelen Özel Telefon Çağrısı aldığınızda sağ üst köşede Özel Çağrı olarak Telefon Çağrısı simgesi görünür. İlk metin satırında Phone Call (Tlf Çağrı) görüntülenir.

- 1 Yanıtlamak ve konuşmak için **PTT** düğmesini basılı tutun. Dinlemek için **PTT** düğmesini bırakın.

2

düğmesine uzun basarak çağrıyı sonlandırın.

Ekranın ilk satırında Ending (Sonlandırılıyor) bilgisi görüntülenir. Ekranın ikinci satırında Phone Call... (Tlf Çağrı...) bilgisi görüntülenir. Ekran, Tlf Çağrı ekranına geri döner.

Ekranında Tel Görüşmesi Bitti bilgisi görüntülenir.

## Gelen bir Özel Telefon Çağrısında Aralıklı Ekstra Rakam Girme

Çağrı boyunca Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk satırında Phone Call (Telf Arama) bilgisi görüntülenir.

1

Rakamları girmek için tuş takımını kullanın ve  düğmesine basın.

Duraklama eklemek için 2 saniye içinde  ve

ardından  düğmesine basın. F harfi, ekrandaki \* ve # simgelerinin yerini alır.

Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk satırında girilen rakamlar görüntülenir.

**2** Çağrıyı sonlandırmak için  düğmesine uzun basın.

Ekranın ilk satırında Ending (Sonlandırılıyor) bilgisi görüntülenir. Ekranın ikinci satırında Phone Call... (Tlf Çağr...) bilgisi görüntülenir. Ekran, Tlf Çağr ekranına geri döner.

Ekranında Tel Görüşmesi Bitti bilgisi görüntülenir.

## Gelen Özel Telefon Çağrısında Canlı Ekstra Rakam Girme

Çağrı boyunca Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk satırında Phone Call (Telf Arama) bilgisi görüntülenir.

**1** PTT düğmesine basın ve rakamları girmek için tuş takımını kullanın.

Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk satırında canlı ekstra rakamlar görüntülenir.

**2** Çağrıyı sonlandırmak için  düğmesine uzun basın.

Ekranın ilk satırında Ending (Sonlandırılıyor) bilgisi görüntülenir. Ekranın ikinci satırında Phone Call... (Tlf Çağr...) bilgisi görüntülenir. Ekran, Tlf Çağr ekranına geri döner.

Ekranında Tel Görüşmesi Bitti bilgisi görüntülenir.

### Gelen Konuşma Grubu Çağrısı Alma

Gelen Konuşma Grubu Çağrısı aldığınızda sağ üst köşede Grup Çağrısı simgesi görünür. İlk metin satırında C=111 (Çağrı1) görüntülenir.

Konuşmak için **PTT** düğmesine basın, dinlemek için düğmeyi bırakın.

### Gelen Çoklu Grup Çağrısı

Gelen Çoklu Grup Çağrısı aldığınızda sağ üst köşede Grup Çağrısı simgesi görüntülenir. İlk metin satırında Çoklu Grup Çağrısı görüntülenir. Telsiz sessiz kipinden çıkar ve gelen çoklu grup çağrısı, telsiz hoparlöründen duyulur.

### Telsiz Çağrısı Yapma

Kanalınızı seçtikten sonra, aşağıdakileri kullanarak abone adı ya da kimliğini veya grup adı ya da kimliğini seçebilirsiniz:

- Kanal Seçim Topuzu.
- Programlanmış **Tek Tuşla Erişim** düğmesi – Tek Tuşla Erişim özelliği önceden tanımlı bir kimlikle kolaylıkla Özel Çağrı yapmanızı sağlar. Bu özellik, kısa veya uzun

süre programlanabilir düğme basışlarına atanabilir. **Tek Tuşla Erişim** düğmesine yalnızca bir kimlik atayabilirsiniz. Telsizinizde birden fazla düğmeyi **Tek Tuşla Erişim** düğmesi olarak programlayabilirsiniz.

- Kişiler listesi (bkz. [Kişi Ayarları sayfa 273](#)).

#### NOT:

Gizliliğin etkin olduğu bir yayın gönderebilmek için telsizinizin kanal üzerindeki Gizlilik özelliğinin etkin olması gerekir. Yalnızca telsizinizle aynı Anahtar Değerine ve Anahtar Kimliğine sahip hedef telsizler bu yayının şifresini çözebilir.

Daha fazla bilgi için bkz. [Gizlilik sayfa 306](#).

### Kanal Seçim Topuzuyla Çağrı Yapma

Bu özellik, telsiz kullanıcılarının farklı çağrı türlerini gerçekleştirmesini sağlar: Grup Çağrısı, Özel Çağrı, Sahadaki Herkese Çağrı, Çoklu Grup Çağrısı.

### Grup Çağrısı Yapma

Bir kullanıcı grubuna çağrı göndermek için telsiziniz bu grubun bir parçası olarak yapılandırılmalıdır.

1 Aktif grup diğer adına ya da kimliğine sahip kanalı seçin. Bkz. [Çağrı Tipi Seçme sayfa 245](#)

---

2 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

---

3 Çağrı yapmak için **PTT** düğmesine basın.  
LED ışıkları aralıksız olarak yeşil renkte yanar. Sağ üst köşede Grup Çağrısı simgesi görüntülenir. İlk metin satırında grup çağrısı adı görüntülenir.

---

4 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

---

5 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde LED yeşil yanıp söner, telsiz sessiz kipinden çıkar ve telsiz hoparlöründen yanıt duyulur. Ekranınızda Grup Çağrısı simgesini, grup diğer adını ya da kimliğini ve yayın gönderen telsizin diğer adını ya da kimliğini görürsünüz.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer. Telsiz, çağrı başlatılmadan önce bulunduğunuz ekrana döner.

---

## Özel Çağrı Yapma

Yetkili bir bağımsız telsiz tarafından başlatılan bir Özel Çağrıyı almak ve/veya bu çağrıya yanıt vermek için telsizinizin Özel Çağrı başlatacak şekilde programlanmış olması gerekir.

Bu özellik etkin değilse **Tek Tuşla Erişim** düğmesi veya Kanal Seçim Topuzuyla Özel Çağrı yaptığınızda olumsuz bir gösterge tonu duyarsınız.

1 Aşağıdakilerden birini yapın:

- Aktif abone diğer adına veya kimliğine sahip olan kanalı seçin. Bkz. [Çağrı Tipi Seçme sayfa 245](#)
  - Programlanmış **Tek Tuşla Erişim** düğmesine basın.
- 

2 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

---

3 Çağrı yapmak için **PTT** düğmesine basın.

LED ışıkları aralıksız olarak yeşil yanar. Sağ üst köşede Özel Çağrı simgesi görüntülenir. İlk metin satırında hedef abone adı görüntülenir. İkinci metin satırında ise çağrı durumu görüntülenir

---

4 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

---

5 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde LED yeşil yanıp söner.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer. Kısa bir ton duyulur.

Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

---

Telsiziniz, Özel Çağrı bağlantısı kurmaya başlamadan önce telsiz varlığı kontrolü yapacak şekilde programlanabilir. Hedef telsiz mevcut değilse kısa bir ton duyulur ve ekranda olumsuz mini bilgi notu görüntülenir.

### Sahadaki Herkese Çağrı Yapma

Bu özellik, o sırada başka bir çağrıyla meşgul olmayan sahadaki tüm kullanıcılara yayın yapmanızı sağlar.

Telsiziniz, bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır.

Kanaldaki/sahadaki kullanıcılar Sahadaki Herkese Çağrıya yanıt veremezler.

1 Sahadaki Herkese Çağrı grup adı bulunan kanalı seçin. Bkz. [Çağrı Tipi Seçme sayfa 245](#).

---

2 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

---

3 Çağrı yapmak için **PTT** düğmesine basın.

LED ışıkları sürekli yeşil renkte yanar. Sağ üst köşede Grup Çağrısı simgesi görünür. İlk metin satırında Sahadaki Herkese Çağrı bilgisi görüntülenir.

---

4 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

---

### Çoklu Grup Çağrısı Yapma

Bu özellik, birden çok gruptaki tüm kullanıcılara yayın yapmanızı sağlar. Telsiziniz, bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır.

#### **NOT:**

Gruplardaki kullanıcılar Çoklu Grup Çağrısını yanıtlayamaz.

1 Çoklu grup adını veya kimliğini seçmek için Kanal Seçim Düğmesini döndürün.

---

- 2 Çağrı yapmak için **PTT** düğmesine basın.  
LED ışıkları sürekli yeşil renkte yanar. Ekranda çoklu grup adı veya kimliği görüntülenir.  
Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

## Tek Tuşla Çağrı Düğmesiyle Özel Çağrı Yapma

### NOT:

Programlanabilir düğme basışlarının Giriş ekranından başlatılması gerekir.

Tek Tuşla Çağrı özelliği, önceden tanımlanmış bir Özel Çağrı adına veya kimliğine kolayca Özel Çağrı yapmanızı sağlar. Bu özellik, kısa veya uzun süre programlanabilir düğme basışlarına atanabilir.

Tek Tuşla Çağrı düğmesine atanmış YALNIZCA bir adınız veya kimliğiniz olabilir. Telsizinizde birden fazla Tek Tuşla Çağrı düğmesi programlanabilir.

- 1 Programlanmış **Tek Tuşla Çağrı** düğmesine basarak önceden tanımlanmış bir Özel Çağrı adına veya kimliğine Özel Çağrı yapabilirsiniz.
- 2 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.
- 3 Çağrı yapmak için **PTT** düğmesine basın.  
LED ışıkları sürekli yeşil renkte yanar.  
Ekranda, Özel Çağrı adı veya kimliği görüntülenir.
- 4 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.
- 5 Dinlemek için **PTT** düğmesini bırakın.  
Hedef telsiz yanıt verdiğinde, LED yeşil renkte yanıp söner.  
Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer.

## Programlanabilir Elle Çevirme Düğmesiyle Çağrı Yapma

Bu özellik, telsiz kullanıcılarının programlanabilir manuel çevirme düğmesini kullanarak özel çağrı yapmasını sağlar.

### Özel Çağrı Yapma

- 1 Programlanmış **Elle Çevirme** düğmesine basarak Elle Çevirme ekranına gidebilirsiniz.

Ekran **Numara:** bilgisi görüntülenir.

- 2 Tuş takımını kullanarak yeni bir abone adı veya Özel Kimlik girin.

- 3 Mikrofonu ağzınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

- 4 Çağrı yapmak için **PTT** düğmesine basın.

LED ışıkları sürekli yeşil renkte yanar. Sağ üst köşede Özel Çağrı simgesi görüntülenir. İlk metin satırında abone adı görüntülenir. İkinci metin satırında ise çağrı durumu görüntülenir.

- 5 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

- 6 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde, LED yeşil renkte yanıp söner.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer. Kısa bir ton duyulur.

Ekran **Call Ended (Çğr Son)** bilgisi görüntülenir.

## Programlanabilir Elle Çevirme Düğmesiyle Giden Özel Telefon Çağrısı Yapma

- 1 Programlanmış **Elle Çevirme** düğmesine basarak Elle Çevirme ekranına gidebilirsiniz.

Ekran **Number:** (Numara:) bilgisi görüntülenir.

- 2 Bir telefon numarası girmek için tuş takımını kullanın ve girdiğiniz numarayı aramak için  düğmesine basın.

İstenmeyen karakterleri silmek için ◀ düğmesine basın. Duraklama eklemek için 2 saniye içinde \*↵ ve ardından \*# düğmesine basın. P harfi, ekrandaki \* ve # simgelerinin yerini alır.

İşlem başarılı olursa ekranda Phone Call (Telf Arama) bilgisi görüntülenir. Ekranın ikinci satırında çevrilen telefon numarası görüntülenir.

Geçersiz bir telefon numarası seçilirse ekranda Telf Arama Başarısız, Resource Not Available (Kaynak Kullanılmıyor) ya da Invalid Permissions (Geçersiz İzinler) olumsuz mini bilgi notu görüntülenir.

Telefon numarası girilmeden OK düğmesine basılırsa telsizden önce pozitif daha sonra negatif bir gösterge tonu duyulur. Ekran aynı kalır.

3 Çağrıyı sonlandırmak için ⏏ düğmesine uzun basın.

Ekranın ilk satırında Ending (Sonlandırılıyor) bilgisi görüntülenir. Ekranın ikinci satırında Phone Call... (Tlf Çağr...) bilgisi görüntülenir.

[Geribildirim Gönder](#)

Ekranında Tel Görüşmesi Bitti bilgisi görüntülenir.

## Telefon Menüsü Aracılığıyla Giden Özel Telefon Çağrısı Yapma

- 1  ile menüye erişim düğmesine basın.
- 2  ya da  düğmesine basarak Telefon seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  düğmesine basarak Elle Çevirme seçeneğini belirleyin.  
Ekranın ilk satırında Numara; ikinci satırında ise yanıp sönen bir imleç görüntülenir.
- 4 Bir telefon numarası girmek için tuş takımını kullanın ve girdiğiniz numarayı aramak için  düğmesine basın.

İstenmeyen karakterleri silmek için  düğmesine basın. Duraklama eklemek için 2 saniye içinde  ve ardından  düğmesine basın. P harfi, ekrandaki \* ve # simgelerinin yerini alır.

İşlem başarılı olursa ekrandaki ilk metin satırında Tlf Çağr bilgisi görüntülenir. Ekranın ikinci satırında çevrilen telefon numarası görüntülenir.

Geçersiz bir telefon numarası seçilirse ekranda Telf Arama Başrısız, Resource Not Available (Kaynak Kullanılmıyor) ya da Invalid Permissions (Geçersiz İzinler) olumsuz mini bilgi notu görüntülenir.

Telefon numarası girilmeden  düğmesine basılırsa telsizden önce olumlu daha sonra olumsuz bir gösterge tonu duyulur. Ekran aynı kalır.

- 5 Çağrıyla sonlandırmak için  düğmesine uzun basın.

Ekranın ilk satırında Sonlandırılıyor bilgisi görüntülenir. Ekranın ikinci satırında Tlf Çağr... bilgisi görüntülenir.

Ekranında Tel Görüşmesi Bitti bilgisi görüntülenir.

## Kişilerden Giden Özel Telefon Çağrısı Yapma

### NOT:

MOTOTRBO Connect Plus Option Board CPS'de Telefonu Elle Çevirme devre dışıysa Telefon No ögesi Menüde **görüntülenmez**.

- 1  ile menüye erişin düğmesine basın.

- 2  ya da  düğmesine basarak Kişiler seçeneğine gidin ve seçmek için  düğmesine basın.

- 3  ya da  düğmesine basarak Elle Çevirme seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Telefon

Numarası seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranın ilk satırında Numara; ikinci satırında ise yanıp sönen bir imleç görüntülenir.

5 Bir telefon numarası girmek için tuş takımını kullanın ve girdiğiniz numarayı aramak için  düğmesine basın.

**PTT** düğmesine basıldığında ekranda olumsuz bir mini bilgi notu ve Göndermek: OK'e basın bilgisi görüntülenir ve önceki ekrana geri dönlür.

İstenmeyen karakterleri silmek için  düğmesine basın. Duraklama eklemek için 2 saniye içinde 

ve ardından  düğmesine basın. P harfi, ekrandaki \* ve # simgelerinin yerini alır.

İşlem başarılı olursa ekrandaki ilk metin satırında Tlf Çağr bilgisi görüntülenir. Ekranın ikinci satırında çevrilen telefon numarası görüntülenir.

Telefon numarası girilmeden  düğmesine basılırsa telsizden önce olumlu daha sonra olumsuz bir gösterge tonu duyulur. Ekran aynı kalır.

6 Çağrıyı sonlandırmak için  düğmesine uzun basın.

Ekranın ilk satırında Sonlandırılıyor bilgisi görüntülenir. Ekranın ikinci satırında Tlf Çağr... bilgisi görüntülenir.

Ekranın Tel Görüşmesi Bitti bilgisi görüntülenir.

## Giden Bir Özel Telefon Çağrısında Kanal Onayı Bekleme

Özel bir Telefon Çağrısı yaparken ekranın ilk satırında Tlf Çağr bilgisi görüntülenir. Ekranın ikinci satırında çevrilen telefon numarası görüntülenir.

Çağrı bağlantısı yapıldığında Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk satırında telefon numarası görüntülenir.

Çağrı başarısız olursa ekranda Telf Arama Başarısız, Kaynak Kullanılamıyor ya da Geçersiz İzinler olumsuz mini bilgi notu görüntülenir.

Çağrıyı sonlandırmak için  düğmesine uzun basın.

Telsiz önceki ekrana döner.

## Bağlı Bir Giden Özel Telefon Çağrısında Aralıklı Ekstra Rakam Girme

Çağrı boyunca Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk metin satırında telefon numarası görüntülenir.

1 Tuş takımını kullanarak rakamları girin.

İstenmeyen karakterleri silmek için  düğmesine basın. Duraklama eklemek için 2 saniye içinde 

ve ardından  düğmesine basın. P harfi, ekrandaki \* ve # simgelerinin yerini alır.

Ekranın ilk metin satırında Extra Digits (Ekstra Basamaklar) bilgisi, ikinci metin satırında ise girilen ekstra rakamlar görüntülenir.

2  düğmesine basın.

PTT düğmesine basıldığında ekranda olumsuz bir mini bilgi notu ve Press OK to Send (Gönder: OK'e Basın) bilgisi görüntülenir ve önceki ekrana geri dönlür.

Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk metin satırı, ekstra rakamların da eklendiği telefon numarasını gösterir.

3 Aşağıdakilerden birini yapın:

-  ile Telefon Çağrısı Ekranına geri dönün.
- Çağrıyı sonlandırmak için  düğmesine uzun basın.

## Bağlı bir Giden Özel Telefon Çağrısında Canlı Ekstra Rakam Girme

Çağrı boyunca Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk metin satırında telefon numarası görüntülenir.

- 1 **PTT** düğmesine basın ve rakamları girmek için tuş takımını kullanın.

Özel Çağrı olarak Telefon Çağrısı simgesi sağ üst köşede görünür. Ekranın ilk metin satırı, ekstra rakamların da eklendiği telefon numarasını gösterir.

- 2 Çağrıyı sonlandırmak için  düğmesine uzun basın.

Ekranın ilk satırında Ending (Sonlandırılıyor) bilgisi görüntülenir. Ekranın ikinci satırında Phone Call... (Tlf Çağr...) bilgisi görüntülenir.

Ekranında Tel Görüşmesi Bitti bilgisi görüntülenir.

## Connect Plus Kipindeki Gelişmiş Özellikler

Bu bölümde, telsizinizde bulunan özelliklerin nasıl çalıştığı açıklanmaktadır.

### Ana Kanal Hatırlatıcısı

Bu özellik, telsiz belirli bir süre ana kanala ayarlı olmadığına bir hatırlatıcı sağlar.

Bu özellik CPS kullanılarak etkinleştirilirse Ana Kanal Hatırlatıcı tonu ve anonsu duyulur. Telsiz belirli bir süre ana kanala ayarlı olmadığına ekranın ilk satırında düzenli olarak Ana Kanal, ikinci satırında Olmayan mesajı görüntülenir.

Aşağıdaki işlemlerden birini gerçekleştirerek hatırlatıcıya yanıt verebilirsiniz:

- Ana kanal geri dönme.
- Programlanabilir düğmeyi kullanarak hatırlatıcıyı geçici olarak sessize alma.
- Programlanabilir düğmeyi kullanarak yeni bir ana kanal ayarlama.

### Otomatik Geri Dönüş

Otomatik Geri Dönüş, belirli türlerde Connect Plus sistem hataları olması durumunda, seçilen Grup Kişisi üzerinden acil durum olmayan çağrılar yapmaya ve almaya devam etmenizi sağlayan bir sistem özelliğidir.

Bu hatalardan birisi gerçekleştiğinde telsiziniz farklı bir Connect Plus sahasına gitmeyi dener. Bu arama işlemi, telsizinizde Otomatik Geri Dönüş etkinleştirilmişse telsizinizin çalışan bir Connect Plus sahası veya bir "Geri Dönüş Kanalı" bulmasıyla sonuçlanabilir. Geri Dönüş Kanalı, normalde çalışan bir Connect Plus sahasının bir parçası olan, ancak o sırada kendi saha denetleyicisiyle veya Connect Plus ağıyla iletişim kuramayan bir yineleyicidir. Geri Dönüş kipinde, bu yineleyici tek dijital yineleyici işlevi görür. Otomatik Geri Dönüş Kipi yalnızca acil durum olmayan Grup Çağrılarını destekler. Geri Dönüş Kipinde başka hiçbir çağrı tipi desteklenmez.

### Otomatik Geri Dönüş Kipi Göstergeleri

Telsiziniz Geri Dönüş kanalını kullanırken (yayın yaparken hariç) yaklaşık her 15 saniyede bir kesintili olarak "Geri Dönüş Tonu" duyulur. Ekranda düzenli aralıklarla "Geri Dönüş Kanalı" yazılı mesajı görüntülenir. Telsiziniz yalnızca seçilen Grup Kişisinde (Grup Çağrısı, Çoklu Grup Çağrısı

veya Sahadaki Herkese Çağrı) PTT'ye izin verir. Diğer tip çağrılar yapmanıza izin vermez.

## Geri Dönüş Kipinde Çağrı Yapma/Alma

### NOT:

Çağrılar yalnızca aynı Geri Dönüş kanalını izleyen ve aynı Gruba seçili telsizlerden duyulur. Çağrılar ağ üzerinden diğer sahalara veya diğer yineleyicilere iletilmez.

Acil Durum sesli çağrılar veya Acil Durum Uyarıları Geri Dönüş kipinde kullanılamaz. Geri Dönüş kipinde, acil durum düğmesine basarsanız telsiz geçersiz düğmeye basma sesi çıkarır. Ekranlı telsizler "Özellik kullanılamıyor" mesajını da gösterir.

Özel (telsizden telsize) çağrılar ve Telefon Çağruları Geri Dönüş kipinde kullanılamaz. Özel bir kişiyi aramayı denerseniz bir reddetme tonu alırsınız. Bu noktada, istenen grup kişisini seçmeniz gerekir. Desteklenmeyen diğer çağrılar Uzaktan İzleme, Çağrı Uyarısı, Telsiz Kontrolü, Telsiz Etkin, Telsiz Devre Dışı, Yazılı Mesaj, Konum Güncellemeleri ve paket veri çağrılarıdır.

Gelişmiş Trafik Kanalı Erişimi (ETCA) Otomatik Geri Dönüş kipinde desteklenmemektedir. İki veya daha fazla telsiz kullanıcısı aynı anda (veya hemen hemen aynı anda) **PTT**'ye basarsa **PTT** bırakılana kadar iki telsizin de yayın yapması mümkündür. Bu

durumda, iki yayın da alıcı telsizler tarafından anlaşılabilir.

Geri Dönüş kipinde çağrı yapmak normal çalışma şekline benzerdir. Kullanmak istediğiniz grup kişisini seçip (telsizin normal kanal seçim yöntemini kullanarak) ardından çağrıyı başlatmak için **PTT**'ye basmanız yeterlidir. Kanalin başka bir grup tarafından kullanılıyor olması mümkündür. Kanal kullanımdaysa bir meşgul sesi duyarsınız ve ekranda "Kanal Meşgul" bilgisi görüntülenir. Telsizinizin normal kanal seçme yöntemini kullanarak Grup, Çoklu Grup veya Sahadaki Herkese Çağrı kişilerini seçebilirsiniz. Telsiz, Geri Dönüş Kanalında çalışırken Çoklu Grup tıpkı diğer Gruplar gibi çalışır. Yalnızca o sırada aynı Çoklu Gruba seçilmiş olan telsizler tarafından duyulur.

## Normal Çalışmaya Dönme

Geri Dönüş yineleyicisinin kapsama alanında olduğunuz sırada saha, normal iletişim kanalı çalışmasına geri dönerse telsizinizin Otomatik Geri Dönüş kipinden otomatik olarak çıkar. Telsiz başarılı bir şekilde kaydedilirse bir kayıt "bip sesi" duyulur. Geri Dönüş kipinde olmayan çalışan bir sahanın kapsama alanındaysanız telsizinizi kullanılabilen bir sahayı arayıp ona kaydolmaya zorlamak için Gezinme İsteği düğmesine (telsizinizde programlanmışsa) basabilirsiniz. Kullanılabilen başka bir saha yoksa arama

tamamlandıktan sonra telsiziniz Otomatik Geri Dönüş kipine döner. Araç kullanırken Geri Dönüş yineleyicinizin kapsama alanı dışına çıkarsanız telsiziniz Arama kipine girer (ekranda **Aranıyor** bilgisi görüntülenir).

## Telsiz Kontrolü

Bu özellik etkinleştirildiğinde, sistemde başka bir telsizin aktif olup olmadığını o telsizin kullanıcılarını rahatsız etmeden tespit etmenizi sağlar. Hedef telsizde sesli ya da görsel bir bildirim yapılır.

Bu özellik, sadece abone adları ya da kimlikleri için geçerlidir.

## Telsiz Kontrolü Gönderme

- 1 Telsiz Kontrolü özelliğine erişin.

Telsiz Kontrolü	Adımlar
<b>Programlanmış Telsiz Kontrolü düğmesi</b>	<b>a</b> Programlanmış <b>Telsiz Kontrolü</b> düğmesine basın.

Telsiz Kontrolü	Adımlar
	<p><b>b</b>  ya da  düğmesine basarak istenen abone adına veya kimliğine gidin ve seçmek için  düğmesine basın.</p>
<b>Menü</b>	<p><b>a</b>  ile menüye erişin düğmesine basın.</p> <p><b>b</b>  ya da  düğmesine basarak <b>Kişiler</b> seçeneğine gidin ve seçmek için  düğmesine basın.</p> <p><b>c</b>  ya da  düğmesine basarak istenen abone adına veya kimliğine gidin ve</p>

Telsiz Kontrolü	Adımlar
	<p>seçmek için  OK düğmesine basın.</p> <p>d  ya da  düğmesine basarak Telsiz Kontrolü seçeneğine gidin ve seçmek için  OK düğmesine basın.</p>

Ekranda istenen işlemin sürdüğünü belirten Hedef Adı görüntülenir. LED ışıkları sürekli yeşil renkte yanar.

## 2 Onay için bekleyin.

Hedef telsiz sistemde etkinse bir ton duyulur ve ekranda kısa bir süreliğine Hedef Telsiz Müsait bilgisi görüntülenir.

Hedef telsiz sistemde etkin değilse bir ton duyulur ve ekranda kısa bir süreliğine Hedef Telsiz Müsait Değil bilgisi görüntülenir.

Telsiz, Menüden başlatıldığında abone adı ya da kimliği ekranına döner.

Telsiz, programlanabilir düğmeyle başlatılırsa Giriş Ekranına döner.

## Uzaktan İzleme

Hedef telsizin (sadece abone adları ya da kimlikleri) mikrofonunu açmak için Uzaktan İzleme özelliğini kullanın. Yeşil LED hedef abonedekeyken bir defa yanıp söner. Bu özelliği hedef telsiz civarındaki her türlü işitebilir faaliyeti uzaktan izlemek için kullanabilirsiniz.

Telsiziniz, bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır.

## Uzaktan İzleme Başlatma

### NOT:

Uzaktan İzleme, programlanmış süreden sonra veya bir yayın girişimi, kanal değişimi ya da telsizin gücünün kapatılması gibi faaliyetlerde otomatik olarak sona erer.

### 1 Uzaktan İzleme özelliğine erişin.

Telsiz Kontrolü	Adımlar
<b>Programlanmış Uzaktan İzleme Düğmesi</b>	<p>a Programlanmış <b>Uzaktan İzleme</b> düğmesine basın.</p> <p>b  ya da  düğmesine basarak istenen abone adına veya kimliğine gidin ve seçmek için  düğmesine basın.</p>
<b>Menü</b>	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak <b>Kişiler</b> seçeneğine gidin ve seçmek için  düğmesine basın.</p> <p>c  ya da  düğmesine basarak</p>

Telsiz Kontrolü	Adımlar
	<p>istenen abone adına veya kimliğine gidin ve seçmek için  düğmesine basın.</p> <p>d  ya da  düğmesine basarak <b>Elle Çevirme</b> seçeneğine gidin ve seçmek için  düğmesine basın.</p> <p>e  ya da  düğmesine basarak <b>Uzaktan İzlm.</b> seçeneğine gidin ve seçmek için  düğmesine basın.</p>

İlk metin satırında Uzaktan İzlm. bilgisi görüntülenir. İkinci metin satırında istenen işlemin sürdüğünü belirten **Hedef Adı** görüntülenir. LED ışıkları yeşil yanıp söner.

## 2 Onay için bekleyin.

İşlem başarılı olursa olumlu bir gösterge tonu çıkar ve ekranda Uzktn. İzleme Başarılı bilgisi görüntülenir. Telsiziniz, programlanmış süre boyunca izlenen telsizden alınan sesleri çalmaya başlar ve ekranda Uzktn. İzlm. bilgisi ve ardından hedef adları görüntülenir. Belirlenen süre dolduğunda telsiz, bir uyarı tonu verir ve LED söner.

İşlem başarısız olursa telsizden olumsuz bir gösterge tonu duyulur ve ekranda Uzktn. İzleme Başarısız bilgisi görüntülenir.

## Tarama

Bu özellik, telsizinizin önceden programlanmış tarama listesinde tanımlanan gruplar için çağrılarını izlemesini ve bu çağrılara katılmasını sağlar. Tarama etkinleştirildiğinde tarama simgesi, durum çubuğunun sağında görüntülenir ve LED sarı yanıp söner.

## Taramayı Başlatma ve Durdurma

### NOT:

Bu prosedür, telsizinizde o sırada seçili olan bölgeyle aynı Ağ Kimliğine sahip bütün Connect Plus bölgeleri için Tarama özelliğini açar ya da kapatır. Tarama özelliği bu prosedür aracılığıyla etkinleştirilse bile tarama listenizdeki bazı (ya da tüm) gruplar için taramanın devre dışı olabileceğini unutmayın. Daha fazla bilgi için bkz. [Tarama Listesini Düzenleme sayfa 268](#).

Programlanmış **Tarama** düğmesine basarak **YA DA** yan tarafta açıklanan prosedürü takip ederek prosedürü izleyin.

1

ile menüye erişim düğmesine basın.

2

ya da

düğmesine basarak Tarama

seçeneğine gidin ve seçmek için düğmesine basın.

- 3  ya da  düğmesine basarak Aç veya Kapat seçeneğine gidin ve seçmek için  düğmesine basın.
- Tarama etkinse ekranda Tarama Açık bilgisi görüntülenir.
  - Tarama etkinse Tarama menüsü Kapat seçeneğini görüntüler.
  - Tarama devre dışıysa ekranda Tarama Kapalı bilgisi görüntülenir.
  - Tarama devre dışıysa Tarama menüsü Aç seçeneğini görüntüler.

## Tarama Yapılırken Yayın Yanıtlama

Tarama sırasında telsiziniz etkinliğin algılandığı grupta durur. Telsiz kontrol kanalında boştayken devamlı olarak tarama listesinde herhangi bir üye olup olmadığını dinler.

- 1 Mikrofonu ağzınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

- 2 Kalma süresi boyunca **PTT** düğmesini basılı tutun. LED ışıkları sürekli yeşil renkte yanar.
- 
- 3 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.
- 
- 4 Dinlemek için **PTT** düğmesini bırakın. Kalma süresi içinde yanıt vermezseniz telsiz diğer grupları taramaya döner.

## Kullanıcı Tarafından Yapılandırılabilir Tarama

Liste Düzenle menüsü etkinse kullanıcı, Üye Ekle menüsünden tarama üyelerini Ekle ve Kaldır seçeneklerini kullanabilir. Tarama Listesi üyesi şu anda seçili Bölge ile aynı Ağ Kimliğine sahip Connect Plus Bölgesinde bir Kanal Seçici konumuna atanmış olan normal bir Grup Kişisi olmalıdır (ör. Çoklu Grup veya Sahadaki Herkese Çağrı/Ağ Genelinde Herkese Çağrı olmamalıdır). Konuşma Grubu diğer adı, geçerli Bölge Tarama Listesine dahil olan herhangi bir Konuşma Grubu ile eşleşmemelidir.

Tarama özelliği menüden veya programlanmış **Tarama Açma/Kapatma** düğmesine basılarak açılıp kapatılabilir.

Bu özellik, yalnızca telsiz o sırada çağrıda değilken çalışır. O sırada bir çağrıyı dinliyorsanız telsiziniz diğer grup çağrılarını tarayamaz ve bu nedenle bunların devam ettiğinin farkına varmaz. Çağrınız tamamlandığında telsiziniz, kontrol kanalı zaman aralığına geri döner ve tarama listesindeki grupları tarayabilir.

## Taramayı Açma veya Kapatma

### NOT:

Bu prosedür, telsizinizde o sırada seçili olan bölgeyle aynı Ağ Kimliğine sahip bütün bölgeler için Tarama özelliğini açar ya da kapatır. Tarama özelliği bu prosedür aracılığıyla etkinleştirilse bile tarama listenizdeki bazı (ya da tüm) gruplar için taramanın devre dışı olabileceğini unutmayın. Daha fazla bilgi için sonraki bölüme bakın.

Tarama açıksa ekranınızda Tarama simgesi görüntülenir. Tarama açıksa ve bir çağrı yapmıyorsanız, LED yeşil ve sarı yanıp söner.

Taramayı açma veya kapatma prosedürü telsizinizin nasıl programlandığına bağlıdır. Telsiziniz, Tarama Açma/ Kapatma düğmesiyle programlanmışsa özelliği açmak veya kapatmak için bu düğmeyi kullanın. Telsiziniz, Tarama

özelliği menüden açılıp kapatılabilecek şekilde programlanmışsa aşağıda açıklanan prosedürü izleyin.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Tarama seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Aç veya Kapat seçeneğine gidin ve seçmek için  düğmesine basın.
  - Tarama devre dışıysa ekranda kısa süreliğine Tarama Açık bilgisi görüntülenir.
  - Tarama etkinse ekranda kısa süreliğine Tarama Kapatılı bilgisi görüntülenir.

---

## Tarama Listesini Düzenleme

### NOT:

Tarama listesi girişi, o anda seçili olan grupsa liste girişinde onay işaretinin görünüp görünmediğine bakılmaksızın telsiz bu gruptaki etkinliği dinler. Bir telsiz çağrıda değilken, Seçili Grup, Çoklu Grup ve Sahadaki Herkese Çağrı ve Varsayılan Acil Durum Dönüştürme Grubundaki (yapılandırılmışsa) etkinliği dinler. Bu işlem, devre dışı bırakılamaz. Tarama etkinleştirilmişse telsiz, etkinleştirilmiş Bölge Tarama Listesi'nin üyelerinin etkinliğini de dinleyecektir.

Tarama listeniz hangi grupların taranabileceğini belirler. Bu liste, telsiziniz programlandığı sırada oluşturulur. Telsiziniz tarama listesini düzenlemenize izin verecek şekilde programlanmışsa şunları yapabilirsiniz:

- Listedeki her bir grup için taramayı etkinleştirebilir veya devre dışı bırakabilirsiniz.
- Üye Ekleme Menüsü aracılığıyla tarama üyeleri ekleyebilir ya da çıkarabilirsiniz. Bkz. [Üye Ekleme Menüsü aracılığıyla Grup Ekleme veya Silme sayfa 269](#).

### NOT:

Tarama Listesi üyesi şu anda seçili Bölge ile aynı Ağ Kimliğine sahip Connect Plus Bölgesinde bir Kanal Seçici konumuna atanmış olan normal bir Grup Kişisi olmalıdır (Çoklu Grup veya Sahadaki Herkese Çağrı/Ağ Genelinde Herkese Çağrı olmamalıdır). Konuşma Grubu diğer adı, geçerli Bölge Tarama Listesine dahil olan herhangi bir Konuşma Grubu ile eşleşmemelidir.

1

ile menüye erişin düğmesine basın.

2

ya da düğmesine basarak **Listeye Ekle**

Düzenleme seçeneğine gidin ve seçmek için **OK** düğmesine basın.

3

ya da düğmesine basarak istenen Grup adına gidin.

Grup adının önünde bir onay işareti varsa tarama o sırada bu Grup için etkin demektir.

Grup adının önünde onay işareti yoksa tarama o sırada bu Grup için devre dışı demektir.

4  ile istenen Grubu seçin.

Tarama, o sırada Grup için devre dışıysa ekranda Etkinleştir seçeneği görüntülenir.

Tarama o sırada Grup için etkin değilse ekranda Etksz Kıl seçeneği görüntülenir.

5 Görüntülenen seçeneği (Etkinleştir veya Etksz Kıl) belirleyin ve seçmek için  düğmesine basın.

Belirlenen seçeneğe bağlı olarak telsiz, ekranda kısa bir süre Tarama Etkinleştirildi veya Tarama Devre Dışı Bırakıldı seçeneklerini görüntüleyerek gerçekleşen işlemi onaylar.

Telsiz tekrar Bölge tarama listesini görüntüler. Tarama, Grup için etkinleştirilmişse Grup adının önünde onay işareti görüntülenir. Tarama, Grup için devre dışı bırakılmışsa Grup adının önündeki onay işareti kaybolur.

## Üye Ekleme Menüsü aracılığıyla Grup Ekleme veya Silme

Connect Plus telsiz, grup numaralarının ya da adlarının bölge tarama listesinde kopyalanmasına (ya da "tarama aday" olarak görüntülenmesine) izin vermez. Bu nedenle, şu adımlarda tanımlanan "tarama adayları", bölge tarama listesine grup ekledikten ya da bu listeden grup sildikten sonra bazen değişiklik gösterebilir: [adım 6](#) ve [adım 7](#).

Telsiziniz tarama listesini düzenlemenize izin verecek şekilde programlanmışsa mevcut durumda seçili bölgenin tarama listesine grup eklemek ya da bu listeden grup silmek için Üye Ekleme menüsünü kullanabilirsiniz.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Tarama seçeneğine gidin ve seçmek için  düğmesine basın.

- 3  ya da  düğmesine basarak <Üye Ekle> seçeneğine gidin ve seçmek için  düğmesine basın.
- Ekranın Bölgesinden Üye Ekle yazısı görüntülenir (n = telsizinizde seçili bölgeyle aynı Ağ Kimliğine sahip ilk Connect Plus bölgesinin Connect Plus bölge numarasıdır).

- 4 Aşağıdakilerden birini yapın:
- Tarama listesine eklemek istediğiniz grup bu bölgedeki kanal seçim konumuna atanmışsa şu adıma gidin: [adım 6](#).
  - Tarama listesine eklemek istediğiniz grup farklı bir Connect Plus bölgesindeki kanal seçim konumuna atanmışsa şu adıma gidin: [adım 5](#).

- 5  ya da  düğmesine basarak mevcut seçili bölgenizle aynı Ağ Kimliğine sahip Connect Plus bölgelerinin listesinde aşağı ya da yukarı gidebilirsiniz.

- 6 İstenilen grubun kanal seçim konumuna atandığı Connect Plus bölgesini bulduktan sonra seçmek için  düğmesine basın.

Telsiziniz bu bölgede kanal pozisyonuna atanmış grupların listesindeki ilk girdiyi görüntüler. Listedeki gruplar "tarama adayları" olarak adlandırılır; çünkü bu gruplar, mevcut seçili bölgenizdeki tarama listenize eklenebilir (ya da çoktan eklidir).

Bölgede, tarama listesine atanabilecek hiçbir grup yoksa Telsiz Aday Bulunmuyor bilgisini görüntüler.

- 7  ya da  düğmesine basarak aday gruplar listesinde yukarı ya da aşağı kaydırın.

Grup adından hemen önce artı (+) işareti görüntülenirse bu, grubun seçili bölgedeki tarama listesinde mevcut olduğunu gösterir.

Grup adından hemen önce artı (+) işareti görüntülenmiyorsa bu, grubun tarama listesinde bulunmadığını ama listeye eklenebileceğini gösterir.

- 8 İstenen grup adı görüntülendiğinde  düğmesine basın.

Bu grup o an seçili bölgenin tarama listesinde mevcut değilse **Ekle** (Grup Adı) mesajı görüntülenir.

Bu grup o an seçili bölgenin tarama listesinde mevcutsa **Sil** (Grup Adı) mesajı görüntülenir.

9 Görüntülenen mesajı kabul etmek için  (**Ekle** ya da **Sil**) düğmesine basın.

Bir grubu listeden silerseniz artı (+) işareti artık grup adından hemen önce görüntülenmez; böylece silme işleminin gerçekleştiği anlaşılır.

Bir grubu listeye eklerseniz artı (+) işareti, grup adından hemen önce görüntülenmeye başlar; böylece ekleme işleminin gerçekleştiği anlaşılır.

Listeye bir grup ekleme girişiminde bulunursanız ve liste tamamen doluyorsa **Liste Dolu** mesajı görüntülenir. Bu durumda yeni bir grup eklemeyen önce tarama listesinden bir grup silmeniz gerekecektir.

10 İşlemler bittiğinde, istediğiniz menüye dönene kadar

 düğmesine basın.

## Tarama İşlemini Anlama

### NOT:

Telsiziniz farklı bir Bölgeden Bölge Tarama Listesi üyesinin yaptığı çağrıya katılıyorsa ve Çağrı Kalma Süresi siz cevap vermeden sona eriyorsa cevap vermek için Tarama Listesi Üyesinin Bölgesine ve Kanalına gidip yeni bir çağrı başlatmanız gerekir.

Tarama listenizdeki grupların çağrılarını kaçırabileceğiniz bazı durumlar vardır. Aşağıdaki nedenlerden biriyle çağrıyı kaçırsanız bu telsizinizde bir sorun olduğu anlamına gelmez. Bu, Connect Plus'ın normal tarama çalışmasıdır.

- Tarama özelliği açık değil (ekranınızdaki tarama simgesine bakın).
- Tarama listesi üyesi, menüden devre dışı bırakılmış (bkz. [Tarama Listesini Düzenleme sayfa 268](#)).
- Zaten bir çağrıya katılmış durumdasınız.
- Taranan grubun hiçbir üyesi sahanıza kayıtlı değil (yalnızca Çoklu Saha sistemleri).

## Taranan Çağrıya Cevap Verme

Telsiziniz seçilebilir grup tarama listesindeki bir çağrıyı tarıyorsa ve taranan çağrı sırasında **PTT** düğmesine

basarsanız telsizinizin yapacağı işlem, telsiz programlama sırasında Taranan Çağrıya Cevap Verme özelliğinin etkinleştirilmiş ya da devre dışı bırakılmış olmasına bağlı olarak değişiklik gösterir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

### Taranan Çağrıya Cevap Verme Devre Dışı

Telsiz, taranan çağrıyı bırakır ve seçili olan geçerli kanal konumu kişisi üzerinden yayın yapmayı dener. Seçili olan geçerli kişinin Çağrı Kalma Süresi bittikten sonra telsiz giriş kanalına geri döner ve Tarama Kalma Süresi Sayacını Başlatır. Tarama Kalma Süresi bittikten sonra telsiz grup taramasına kaldığı yerden devam eder.

### Taranan Çağrıya Cevap Verme Etkin

Taranan çağrının Grup Kalma Süresinde **PTT** düğmesine basıldığında telsiz, taranan gruba yayın göndermeyi dener.

#### NOT:

O sırada seçili olan bölgenizdeki bir kanal konumuna atanmamış bir gruba yapılan çağrıyı tarıyorsanız ve çağrının Kalma Süresini kaçıırırsanız doğru bölgeye geçmeniz ve sonra o gruba cevap vermek üzere grubun kanal konumunu seçmeniz gerekir.

## Konuşma Grubu için Öncelik Düzenleme

Öncelikli İzleme özelliği, telsizin başka bir çağrıdayken daha yüksek öncelikli konuşma grubundan gelen yayınları otomatik olarak almasına olanak tanır. Telsiz, daha yüksek öncelikli çağrıya geçtiğinde bir ton duyulur. Konuşma grupları için iki öncelik düzeyi vardır: P1 ve P2. P1, P2'ye göre daha yüksek önceliğe sahiptir.

#### NOT:

MOTOTRBO Connect Plus Option Board CPS'de Varsayılan Acil Durum Dönüştürme Grubu Kimliği yapılandırıldıysa konuşma grupları için üç öncelik düzeyi olur: P0, P1 ve P2. P0, kalıcı Acil Durum Dönüştürme Grubu Kimliği'dir ve en yüksek önceliğe sahiptir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

1

Menüye erişmek için  düğmesine basın.

2

 ya da  düğmesine basarak Tarama

seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak **Listeye Ekle**

Düzeltilme seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak ilgili konuşma

grubuna gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak **Öncelikli**

Düzeltilme seçeneğine gidin ve seçmek için  düğmesine basın.

6  ya da  düğmesine basarak istenen öncelik

seviyesine gidin ve seçmek için  düğmesine basın.

Önceki sayfaya dönmeden önce ekranda olumlu bir mini bilgi notu görünür. Öncelik simgesi, konuşma grubunun solunda görüntülenir.

## Kişi Ayarları

### NOT:

Connect Plus Kişilerine abone kimlikleri ekleyebilir ya da bunları düzenleyebilirsiniz. Abone kimlikleri ancak satıcınız tarafından silinebilir.

Gizlilik özelliği etkin olan kanallar üzerinde gizliliğin etkin olduğu bir sesli çağrı yapabilirsiniz. Yayını sadece sizin telsizinizle aynı Gizlilik Anahtarına veya aynı Anahtar Değerine ve Anahtar kimliğine sahip olan hedef telsizler çözebilir.

Kişi Listelerine erişim, bölge yapılandırmasına bağlıdır:

- Telsizde yalnızca bir bölge yapılandırılmışsa Kişi Listesinde doğrudan mevcut seçili bölgenin listesi görüntülenir.
- Telsizde birden çok bölge yapılandırılmışsa Bölge Kişileri Klasöründe mevcut seçili bölge ile aynı ağ kimliklerine sahip tüm bölgeler görüntülenir. Kullanıcı, bu bölgelerdeki kişilere erişebilir.

Kişiler, telsizinizde "adres defteri" işlevi görür. Her giriş, çağrı başlatmak için kullandığınız bir ada ya da kimliğe karşılık gelir.

Her bölge 100 kişiye kadar bir Kişi Listesi sağlar. Kullanılabilir iletişim türleri şunlardır:

- Özel Çağrı
- Grup Çağrısı
- Çoklu Grup Çağrısı
- Sahadaki Herkese Sesli Çağrı
- Sahadaki Herkese Yazılı Çağrı
- Sevk Çağrısı

Sevk Çağrısı iletişim tipi, üçüncü taraf bir Yazılı Mesaj Sunucusu aracılığıyla sevk işlemini yapan bilgisayara yazılı mesaj göndermek için kullanılır.

## Kişilerden Özel Çağrı Yapma

- 1  ile menüye erişin düğmesine basın.
- 2  ya da  düğmesine basarak **Kişiler** seçeneğine gidin ve seçmek için  düğmesine basın.  
Girişler alfabetik olarak sıralanmıştır.
- 3 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

- 4 Çağrı yapmak için **PTT** düğmesine basın.  
LED ışıkları sürekli yeşil renkte yanar.

- 5 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

- 6 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde, LED yeşil renkte yanıp söner ve ekranda yayını gönderen kullanıcının kimliği görüntülenir.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer.

Kısa bir ton duyulur. Ekranda **Call Ended** (Çğr Son) bilgisi görüntülenir.

## Ad Aramasıyla Çağrı Yapma

Ad araması ya da alfasayısal arama yaparak da istediğiniz abone adlarına ulaşabilirsiniz.

Bu özellik, sadece Kişiler menüsündeyken kullanılabilir.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Kişiler seçeneğine gidin ve seçmek için  düğmesine basın.  
Girişler alfabetik olarak sıralanmıştır.

---

- 3 Gerekli adın ilk karakterini girin, ardından  ya da  düğmesine basarak ilgili adı bulun.

---

- 4 Mikrofonu ağızınızdan 2,5 - 5,0 cm (1-2 inç) uzakta tutun.

---

- 5 Çağrı yapmak için **PTT** düğmesine basın.  
LED ışıkları sürekli yeşil renkte yanar. Ekranda hedef adı görüntülenir.

---

- 6 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

---

- 7 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde, LED yeşil renkte yanıp söner.

Önceden belirlenen süre boyunca hiçbir ses faaliyeti olmazsa çağrı sona erer.

Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

## Yeni Kişi Ekleme

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Kişiler seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Yeni Kişi seçeneğine gidin ve seçmek için  düğmesine basın.

---

4 Kişi numarasını girmek için tuş takımını kullanın ve onaylamak için  düğmesine basın.

---

5 Kişi adını girmek için tuş takımını kullanın ve onaylamak için  düğmesine basın.

---

6 Telsiz Kişisi eklerken  ya da  düğmesine basarak istenen zil sesi tipine gidin ve seçmek için  düğmesine basın.

Telsiz olumlu bir gösterge tonu verir ve ekranda Kişi Kaydedildi bilgisi görüntülenir.

---

## Çağrı Göstergesi Ayarları

Bu özellik, telsiz kullanıcılarının çağrı veya yazılı mesaj zil tonlarını yapılandırmasını sağlar.

## Çağrı Uyarısı için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Alınan Çağrı Uyarıları için zil seslerini seçebilir ya da açıp kapatabilirsiniz.

1  ile menüye erişim düğmesine basın.

---

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

4  ya da  düğmesine basarak Tonlar Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.

---

5  ya da  düğmesine basarak Çağrı Zilleri seçeneğine gidin ve seçmek için  düğmesine basın.

6  ya da  düğmesine basarak Çağrı Uyarısı seçeneğine gidin ve seçmek için  düğmesine basın.  
Geçerli ton bir  simgesi ile belirtilir.

7  ya da  düğmesine basarak istenen tona gidin ve seçmek için  düğmesine basın.  
Seçilen tonun yanında  simgesi görüntülenir.

## Özel Çağrılar için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Alınan Özel Çağrılar için zil seslerini açıp kapatabilirsiniz.

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Tonlar Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak Çağrı Zilleri seçeneğine gidin ve seçmek için  düğmesine basın.

6  ya da  düğmesine basarak Özel Çağrı seçeneğine gidin ve seçmek için  düğmesine basın.

- 7 Özel Çağrı zil tonlarını etkinleştirmek/devre dışı bırakmak için  düğmesine basın.
- Özel Çağrı zil tonları etkinleştirilirse ekranda Etkin seçeneğinin yanında ✓ simgesi görüntülenir.
- Özel Çağrı zil tonları devre dışı bırakıldığında ✓ ögesi görüntülenmez.
- 

## Yazılı Mesaj için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Alınan Metin Mesajları için zil tonlarını açıp kapatabilirsiniz.

- 1  ile menüye erişin düğmesine basın.
- 
- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.
- 

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.
- 

- 4  ya da  düğmesine basarak Tonlar Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.
- 

- 5  ya da  düğmesine basarak Çağrı Zilleri seçeneğine gidin ve seçmek için  düğmesine basın.
- 

- 6  ya da  düğmesine basarak Yazılı Mesaj seçeneğine gidin ve seçmek için  düğmesine basın.
- Geçerli ton bir ✓ simgesi ile belirtilir.
-

- 7  ya da  düğmesine basarak istenen tona gidin ve seçmek için  düğmesine basın. Seçilen tonun yanında  simgesi görüntülenir.

## Bir Zil Uyarı Tipi seçme

### NOT:

Programlanmış **Zil Uyarı Tipi** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için satıcınıza veya sistem yöneticinize başvurun.

Telsiz çağrılarını, önceden belirlenmiş bir titreşim çağrısına programlayabilirsiniz. Tüm Tonlar durumu devre dışı bırakılırsa telsiz Tüm Tonlar Sessiz simgesini gösterir. Tüm Tonlar durumu etkinleştirilirse ilgili zil uyarı tipi gösterilir.

Anlık bir zil tipi kullanılıyorsa telsiz bir defa titreşir. Tekrarlanan bir zil tipini seçerseniz telsiz tekrar tekrar titreşir. Zil ve Titreşime ayarlandığında, gelen telsiz işlemi varsa (örn. Çağrı Uyarısı veya Mesaj) telsiz belirli bir zil tonu çıkarır. Bu ton, olumlu bir gösterge veya cevapsız çağrı gibi duyulur.

## Alarm Tonu Ses Seviyesini Yükseltme

Telsizinizi, yanıtsız kalan telsiz çağrılarını olduğunda sizi sürekli uyaracak şekilde programlayabilirsiniz. Alarm tonu ses seviyesi zaman içinde otomatik olarak yükselir. Bu özelliğe Kademeli Uyarı denir.

## Çağrı Kaydı Özellikleri

Telsiziniz giden, cevaplanan ve cevapsız tüm Özel Çağrılarını kaydını tutar. Çağrı kaydı özelliğini kullanarak son çağrılarını görebilir ve yönetebilirsiniz.

Her çağrı listenizde aşağıdaki görevleri gerçekleştirebilirsiniz:

- Silme
- Ayrıntıları Görme

## Son Çağrılarını Görüntüleme

Cevapsız, Cevaplanan ve Giden listeleri bulunmaktadır.

1

ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Çağrı Kaydı seçeneğine gidin ve seçmek için  düğmesine basın.

---

3  ya da  düğmesine basarak tercih edilen listeye gidin ve seçmek için  düğmesine basın. En son tutulan kayıt listenin en üstünde görüntülenir.

---

4 Listeyi görüntülemek için  ya da  düğmesine basın. Seçilen geçerli ad ya da kimlikle Özel Çağrı başlatmak için **PTT** düğmesine basın.

---

## Çağrı Listesinden Çağrı Silme

1  ile menüye erişin düğmesine basın.

---

2  ya da  düğmesine basarak Çağrı Kaydı seçeneğine gidin ve seçmek için  düğmesine basın.

---

3  ya da  düğmesine basarak ilgili listeye gidin ve seçmek için  düğmesine basın. Seçtiğiniz çağrı listesinde hiçbir giriş yoksa ekranda **Liste Boş** ve **Tuş Takımı Tonları** açıksa düşük perdeli bir ton duyulur.

---

4  ya da  düğmesine basarak ilgili ad veya kimliğe gidin ve seçmek için  düğmesine basın.

---

5  ya da  düğmesine basarak **Sil** seçeneğine gidin ve seçmek için  düğmesine basın.

---

6 Aşağıdakilerden birini yapın:

- Girişi silmek için  düğmesine basarak Evet'i seçin. Ekranda, Giriş Silindi bilgisi görüntülenir.
-  ya da  düğmesine basarak Hayır seçeneğine gidin ve önceki ekrana dönmek için  düğmesine basın düğmesine basın.

## Çağrı Listesindeki Ayrıntıları Görüntüleme

- 1  ile menüye erişin düğmesine basın.
- 2  ya da  düğmesine basarak Çağrı Kaydı seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak ilgili listeye gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak ilgili ad veya kimliğe gidin ve seçmek için  düğmesine basın.
- 5  ya da  düğmesine basarak Ayrıntıları Gör seçeneğine gidin ve seçmek için  düğmesine basın.  
Ekranda çağrı listesinin ayrıntıları gösterilir.

## Çağrı Uyarısı İşlemi

Çağrı Uyarısı mesaj gönderme sistemi sayesinde, belirli bir telsiz kullanıcıını müsait olduğunda sizi geri araması için uyarabilirsiniz.

Bu özelliğe menüden Kişiler, elle çevirme ya daprogramlanmış **Tek Tuşla Erişim** düğmesi kullanılarak erişilebilir.

## Çağrı Uyarılarına Yanıt Verme

Telsizinizde Çağrı Uyarılarını yanıtlamak için bu prosedürü uygulayın.

Çağrı Uyarısı aldığınızda:

- Tekrarlanan bir ton duyulur.
- Sarı LED yanıp söner.
- Ekranda çağrıyı yapan telsizin adı veya kimliğiyle bir Çağrı Uyarısının listelendiği bildirim listesi görüntülenir.

Satıcınızın veya sistem yöneticinizin yaptığı yapılandırmaya bağlı olarak aşağıdakilerden birini yaparak Çağrı Uyarısına yanıt verebilirsiniz:

- **PTT** düğmesine basın ve doğrudan çağrıyı yapan tarafa Özel Çağrı ile yanıt verin.
- Normal konuşma grubu iletişimine devam etmek için **PTT** düğmesine basın. Çağrı Uyarısı, Çağrı Kaydı menüsünde Cevapsız Çağrı seçeneğine taşınır. Cevapsız Çağrı kaydından size çağrı yapan kişiye yanıt verebilirsiniz.

Daha fazla bilgi için bkz. [Bildirim Listesi sayfa 198](#) ve [Çağrı Kaydı Özellikleri sayfa 132](#).

## Kişiler Listesinden Çağrı Uyarısı Yapma

- 1  ile menüye erişim düğmesine basın.
- 2  ya da  düğmesine basarak **Kişiler** seçeneğine gidin ve seçmek için  düğmesine basın.
- 3 İstenen abone adını veya kimliğini seçmek için aşağıda açıklanan adımlardan birini kullanın:
  - abone adını doğrudan seçin
    -  ya da  düğmesine basarak ilgili abone adına gidin ve seçmek için  düğmesine basın.
  - Elle Çevirme menüsünü kullanın
    -  ya da  düğmesine basarak **Elle Çevirme** seçeneğine gidin ve seçmek için  düğmesine basın.

- Elle Çevirme yazılı mesaj giriş ekranı görüntülenecektir. Abone kimliğini girin ve  düğmesine basın.

4  ya da  düğmesine basarak Çağrı

Uyarısı seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranda Çağrı Uyarısı: <Abone Adı veya Kimliği>Çağrı Uyarısı ile abone adı veya kimliği bilgileri görüntülenir ve bu bilgiler Çağrı Uyarısının gönderildiğini gösterir.

Telsiziniz Çağrı Uyarısı gönderirken LED ışığı devamlı yeşil yanmaya başlar.

Çağrı Uyarısı onayı alınırsa ekranda Çağrı Uyarısı Başarılı bilgisi görüntülenir.

Çağrı Uyarısı onayı alınmazsa ekranda Çağrı Uyarısı Başarısız bilgisi görüntülenir.

## Tek Tuşla Erişim Düğmesiyle Çağrı Uyarısı Yapma

Programlanmış **Tek Tuşla Erişim** düğmesine basarak önceden tanımlanmış bir adla Çağrı Uyarısı yapın.

Ekranda Çağrı Uyarısı ve abonenin adı ya da kimliği görüntülenir. Bu bilgi, Çağrı Uyarısının gönderildiğini gösterir. Telsiziniz Çağrı Uyarısı gönderirken LED ışığı devamlı yeşil yanmaya başlar.

Çağrı Uyarısı onayı alınırsa ekranda Çağrı Uyarısı Başarılı bilgisi görüntülenir.

Çağrı Uyarısı onayı alınmazsa ekranda Çağrı Uyarısı Başarısız bilgisi görüntülenir.

## Sessize Alma Modu

Sessiz Kipi sayesinde kullanıcı, telsizin tüm sesli göstergelerinin sesini kapatabilir.

Sessiz Kipi özelliği başlatıldığında, Acil Durum işlemleri gibi yüksek öncelikli özellikler haricinde tüm sesli göstergelerin sesi kapatılır.

Sessiz Kipinden çıktığında telsiz, devam eden tonları ve ses yayınlarını oynatmaya devam eder.

**NOT:**

Bu özelliği satın alabilirsiniz. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Sessiz Kipini Açma

Sessiz Kipini açmak için bu prosedürü uygulayın.

Bu özelliğe programlanmış **Sessiz Kipi** düğmesini kullanarak erişin.

Sessiz kipi etkinleştirildiğinde şunlar meydana gelir:

- Olumlu Gösterge Tonu duyulur.
- Ekranda Sessiz Kipi Açık bilgisi gösterilir.
- Kırmızı LED ışığı yanıp sönmeye başlar ve Sessiz Kipinden çıkılana kadar yanıp sönmeye devam eder.
- Giriş ekranında **Sessiz Kipi** simgesi gösterilir.
- Radyonun sesi kapatılır.
- Sessiz Kipi Zamanlayıcısı, ayarlanan süre dolana kadar geri saymaya başlar.

## Sessiz Kipi Zamanlayıcısını Ayarlama

Sessiz Kipi Zamanlayıcısının ayarlanmasıyla, Sessiz Kipi özelliği önceden belirlenmiş bir süre boyunca etkinleştirilebilir. Telsiz menüsünde yapılandırılan zamanlayıcı süresi, 0,5 ile 6 saat arasında değişebilir. Zamanlayıcının süresi dolduğunda, Sessiz Kipinden çıkarılır.

Zamanlayıcı 0'da bırakılırsa programlanan **Sessiz Kipi** düğmesi basılana kadar, telsiz süresiz olarak Sessiz kipinde kalır.

- 1 Menüye erişmek için  OK düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  OK düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  OK düğmesine basın.

4  veya  düğmesine basarak **Sessize Alma** Zamanlayıcısı seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak her bir hanenin sayısal değerini düzenleyin ve  düğmesine basın.

- Yanıp sönen kırmızı LED kapanır.
- Ekrandaki **Sessiz Kipi** simgesi kaybolur.
- Telsiziniz sessiz kipinden çıkar ve hoparlör durumu eskisine döner.
- Zamanlayıcının süresi dolmamışsa Sessiz kipi zamanlayıcısı durdurulur.

#### NOT:

Kullanıcı ses yayını yaptığında veya programlanmamış bir kanala geçtiğinde de Sessiz Kipinden çıkılır.

## Sessiz Kipinden Çıkma

Sessiz Kipi Zamanlayıcısının süresi dolduktan sonra bu özellikten otomatik olarak çıkılabilir.

Sessiz kipinden manuel olarak çıkmak için aşağıdakilerden birini yapın:

- Programlanmış **Sessiz Kipi** düğmesine basın.
- Her girişte **PTT** düğmesine basın.

Sessiz kipi devre dışı bırakıldığında şunlar meydana gelir:

- Olumsuz Gösterge Tonu duyulur.
- Ekranda **Sessiz Kipi Kapalı** bilgisi gösterilir.

## Acil Durum İşlemi

### NOT:

Telsiziniz Sessiz veya Sesli Sessiz acil durum göstergesiyle programlanmışsa çoğu durumda Acil Durum Çağrısı veya Acil Durum Uyarısı bittikten sonra otomatik olarak sessiz çalışmadan çıkar. Yapılandırılmış Acil Durum Kipi, Acil Durum Uyarısı olduğunda Acil Durum Tipinin de Sessiz olması bu kurala istisna getirir. Telsiziniz bu şekilde programlanmışsa **PTT**'ye veya Acil Durum Kapalı ayarı için yapılandırılmış düğmeye basılıp sessiz çalışma iptal edilene kadar sessiz çalışma devam eder.

Acil Durum sesli çağrıları ve Acil Durum Uyarıları, Connect Plus Otomatik Geri Dönüş kipinde çalışırken desteklenmez. Daha fazla bilgi için bkz. [Otomatik Geri Dönüş sayfa 260](#).

Acil Durum Çağrısı Uyarısı kritik durumları bildirmek için kullanılır. Geçerli kanalda etkinlik olsa bile istediğiniz zaman herhangi bir ekrandan Acil Durum başlatabilirsiniz.

**Acil Durum** düğmesine basılması, programlanmış Acil durum kipini başlatır. Programlanmış Acil Durum kipi, isteğe bağlı Man Down özelliğini tetikleyerek de başlatılabilir. Acil Durum özellikleri telsizinizde devre dışı bırakılmış olabilir.

Bayınız, programlanmış **Acil Durum** düğmesi için uzun basma haricinde tüm düğmelere benzer şekilde düğmeye basma süresi ayarlayabilir:

### Kısa basma

0,05 ile 0,75 saniye arasında.

### Uzun basma

1,00 - 3,75 saniye arasında.

**Acil Durum** düğmesine Acil Durum Açık/Kapalı özelliği atanmıştır. Bayınızden **Acil Durum** düğmesine atanan işlemi öğrenin.

- **Acil Durum** düğmesine kısa basma, Acil Durum kipini açacak şekilde ayarlandıysa **Acil Durum** düğmesine uzun basma için Acil Durumdan çıkma işlemi atanmıştır.
- **Acil Durum** düğmesine uzun basma, Acil Durum kipini açacak şekilde ayarlandıysa **Acil Durum** düğmesine kısa basma için Acil Durumdan çıkma işlemi atanmıştır.

Telsiziniz bir Connect Plus bölgesine seçildiğinde üç Acil Durum kipini destekler:

### Acil Durum Çağrısı

Atanmış acil durum zaman aralığında konuşmak için **PTT** düğmesine basmanız gerekir.

### Ses Takipli Acil Durum Çağrısı

Atanmış acil durum zaman aralığındaki ilk yayın için sessizde olan mikrofon otomatik olarak açılır ve böylece **PTT** düğmesine basmadan konuşabilirsiniz. Bu kullanım şeklinde, mikrofon telsizde programlanmış olan zaman aralığı boyunca "devrede" kalır. Aynı Acil Durum çağrısında yapılan sonraki yayınlarda **PTT** düğmesine basmanız gerekir.

### Acil Durum Uyarısı

Acil Durum Uyarısı sesli çağrı değildir. Bu uyarıları almak üzere yapılandırılmış telsizlere gönderilen bir acil durum bildirimidir. Telsiz o sırada kayıtlı olunan sahanın kontrol kanalını kullanarak bir acil durum uyarısı gönderir. Acil Durum Uyarısını, hangi ağ sahasına kayıtlı olduklarına bakılmaksızın Connect Plus ağında uyarı almaya programlanmış telsizler alır.

Acil Durum kiplerinden yalnızca biri her bölgenin Acil Durum düğmesine atanabilir. Ayrıca, her Acil Durum kipinin şu tipleri vardır:

#### Normal

Telsiz Acil Durum sinyali gönderir ve sesli ve/veya görsel göstergeler verir.

#### Sessiz

Telsiz, sesli veya görsel göstergeler vermeden Acil Durum sinyali gönderir. Telsiz, **PTT** düğmesine basıp

ses yayını başlatana kadar sesli veya görsel tüm Acil Durum göstergelerini kapatır.

#### Sesli Sessiz

Telsizin bazı ses gönderimlerinin de sesini kesmesi dışında Sessiz çalışma ile aynıdır.

## Gelen Acil Durum Sinyalini Alma

Telsiziniz bir uyarı tonu verecek ve aynı zamanda gelen Acil Durum sinyali ile ilgili bilgiler görüntüleyecek şekilde programlanabilir. Telsiz bu şekilde programlanmışsa gelen Acil Durum sinyali alındığında acil durum simgesi, Acil Durum isteğinde bulunan Ad veya kimliği, Acil Durum için kullanılan Grup Kişisi ve ek bir bilgi satırı ile birlikte Acil Durum Ayrıntıları ekranı görüntülenir. Grup Kişisini içeren bölgenin adı ek bilgidir.

Şimdilik telsiz yalnızca şifresi en son çözülen Acil Durumu görüntüler. Önceki Acil Durum silinmeden yeni bir Acil Durum alınırsa yeni Acil Durum ayrıntıları önceki Acil Durum ayrıntılarıyla değiştirilir.

Telsizinizi programlanma şekline bağlı olarak, Acil Durum Ayrıntıları ekranı (veya Alarm Listesi ekranı), Acil durum sona erdikten sonra bile telsizin ekranında kalır. Acil durum ayrıntılarını aşağıdaki bölümlerde açıklanan şekilde Alarm Listesine kaydedebilir veya silebilirsiniz:

## Acil Durum Ayrıntılarını Alarm Listesine Kaydetme

Acil durum ayrıntıları Alarm Listesine kaydedildiğinde daha sonra Ana Menü'den Alarm Listesini seçerek ayrıntıları tekrar görebilirsiniz.

- 1 Acil Durum Ayrıntıları (veya Alarm Listesi) ekranı açıkken  düğmesine basın.

**Alarm Listesinden Çık** ekranı görüntülenir.

---

- 2 Aşağıdaki işlemlerden birini gerçekleştirin:

- **Evet** seçeneğini belirleyin ve  düğmesine basarak acil durum ayrıntılarını Alarm Listesine kaydedin ve Acil Durum Ayrıntıları (veya Alarm Listesi) ekranından çıkın.
  - **Hayır** seçeneğini belirleyin ve  düğmesine basarak Acil Durum Ayrıntıları (veya Alarm Listesi) ekranına geri dönün.
- 

## Acil Durum Ayrıntılarını Silme

- 1 Acil Durum Ayrıntıları ekranı açıkken  düğmesine basın.

**Sil** ekranı görüntülenir.

---

- 2 Aşağıdaki işlemlerden birini gerçekleştirin:

- **Evet** seçeneğini belirleyin ve  düğmesine basarak acil durum ayrıntılarını silin.
  - **Hayır** seçeneğini belirleyin ve  düğmesine basarak Acil Durum Ayrıntıları ekranına geri dönün.
-

## Acil Durum Çağrısını Yanıtlama

### NOT:

Acil Durum çağrısına Acil Durum Çağrısının Kalma Süresi için ayrılan sürede yanıt vermezseniz Acil Durum çağrısı sona erer. Acil Durum Çağrısının Kalma Süresi dolduktan sonra grupla konuşmak isterseniz öncelikle gruba atanan kanal konumunu seçmelisiniz (daha önce seçilmemişse). Ardından, **PTT** düğmesine basarak grupla Acil Durum Çağrısı olmayan bir konuşma yapabilirsiniz.

- 1 Acil Durum çağrısı alırken, alınan tüm Acil Durum Çağrısı göstergelerini durdurmak için herhangi bir düğmeye basın.

- 2 Acil Durum grubunda bir ses yayını başlatmak için **PTT** düğmesine basın.

Bu grubu izleyen tüm telsizler yayınınızı duyar.

- 3 Konuşma İzni Tonunun (etkinse) bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun.

LED ışıkları yeşil yanar.

- 4 Dinlemek için **PTT** düğmesini bırakın.

Acil durumu başlatan telsiz yanıt verdiğinde LED yeşil yanıp söner. Ekranınızda, Grup Çağrı simgesini, grup kimliğini ve yayın gönderen telsizin kimliğini görürsünüz.

## Acil Durum Uyarısını Yanıtlama

### NOT:

Acil Durum Uyarısı için kullanılan Grup kişisi sesli iletişim için kullanılmamalıdır. Aksi durumda, diğer telsizlerin aynı gruba Acil Durum Uyarıları göndermesi ve uyarı alması engellenebilir.

Bir telsizden gelen Acil Durum Uyarısı kullanıcının acil bir durumda olduğunu gösterir. Acil durum bildiren telsizle özel çağrı başlatarak, özel bir konuşma grubuna grup çağrısı yaparak, telsize Çağrı Uyarısı göndererek, ilgili telsiz için Uzaktan İzleme başlatarak bu uyarıyı yanıtlayabilirsiniz. Uygun olan yanıt, kuruluşunuz ve durumun kendisi tarafından belirlenir.

## Acil Durum Dönüştürme Çağrısını Yoksayma

Bu özellik geliştirmesi telsizin etkin bir Acil Durum Dönüştürme Çağrısını yoksayması için seçenek sunar.

Acil Durum Dönüştürme Çağrısını Yoksayma özelliğini etkinleştirmek için telsizin Connect Plus Müşteri Programlama Yazılımı (CPCPS) üzerinde yapılandırılması gerekir.

Özellik etkinleştirildiğinde telsiz Acil Durum Araması göstergelerini görüntülemez ve varsayılan Acil Durum Dönüştürme Grubu Kimliğinde ses almaz.

Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Acil Durum Çağrısı Başlatma

### NOT:

Telsiziniz Sessiz kipine ayarlanmışsa sesli yayın başlatmak üzere **PTT** düğmesine basana kadar Acil Durum kipinde herhangi bir sesli veya görsel gösterge görüntülenmez.

Telsiziniz Sesli Sessiz konumuna ayarlanmışsa telsizin Acil Durum kipinde olduğuna dair başlangıçta herhangi bir sesli veya görsel gösterge görüntülenmez. Ancak, acil durumunuza yanıt veren telsizlerden yayınlar geldiğinde telsiziniz sesini kapatır. Acil durum göstergeleri yalnızca telsizinizden ses yayını başlatmak üzere **PTT** düğmesine basıldıktan sonra görüntülenir.

Hem "Sessiz", hem de "Sesli Sessiz" çalışmada Acil Durum Çağrısı bittikten sonra telsiz otomatik olarak sessiz çalışmadan çıkar.

1 Programlanmış **Acil Durum** düğmesine basın.

2 Acil Durum grubunda bir ses yayını başlatmak için **PTT** düğmesine basın.

**PTT** düğmesini bıraktığınızda Acil Durum çağrısı, Acil Durum Çağrısının Kalma Süresi ayarında ayrılan süre kadar devam eder.

Bu sırada **PTT** düğmesine basarsanız Acil Durum çağırısı devam eder.

## Ses Takipli Acil Durum Çağırısı Başlatma

Telsizinizin bu tip çalışma için programlanması gerekir.

Bu çalışma şekli etkinleştirildiğinde, programlanan **Acil Durum** düğmesine bastığınızda ve telsiziniz zaman aralığı bilgisini aldığı anda, **PTT** düğmesine basmadan mikrofon otomatik olarak etkinleşir. Bu etkinleştirilmiş mikrofon durumu, "hot mic" olarak da bilinir. Acil Durum çağırısı sırasında telsizinizden gönderilen ilk ses yayınına "hot mic" uygulanır. Aynı Acil Durum çağırısında yapılan sonraki yayınlarda **PTT** düğmesine basmanız gerekir.

- 1 Programlanmış **Acil Durum** düğmesine basın.
- 2 Mikrofon, telsizinizin codeplug programında belirtilen "hot mic" süresi kadar etkin kalır.  
Bu süre boyunca LED ışıkları yeşil yanar.
- 3 Programlanan süreden uzun konuşmak için **PTT** düğmesini basılı tutun.

Geribildirim Gönder

## Acil Durum Uyarısı Başlatma

### NOT:

Telsiziniz "Sessiz" veya "Sesli Sessiz" olarak programlanmışsa Acil Durum Uyarısı gönderdiğine dair hiçbir sesli veya görsel gösterge bulunmaz. "Sessiz" olarak programlanmışsa sessiz çalışma siz PTT'ye veya "Acil Durum Kapalı" için yapılandırılmış düğmeye basana kadar kesin olmayan bir süre boyunca devam eder. "Sesli Sessiz" olarak programlanmışsa saha denetleyicisi Acil Durum Uyarısını yayınladığında telsiz otomatik olarak sessiz çalışmayı iptal eder.

Turuncu **Acil Durum** düğmesine basın.

Acil Durum Uyarısı saha denetleyicisine iletildiğinde telsiz ekranında Acil Durum simgesi, Acil Durum Uyarısı için kullanılan grup kişisi ve TX Alarmı bilgisi görüntülenir.

Acil Durum Uyarısı başarıyla gönderilip diğer telsizlerin dinlemesi için yayınlanmaya başladıktan sonra olumlu bir gösterge tonu duyulur ve telsiz ekranında Alarm Gön. bilgisi görüntülenir. Acil Durum Uyarısı başarıyla gönderilemediğinde olumsuz bir gösterge tonu duyulur ve

telsizde Alarm Failed (Alarm Başarısız) bilgisi görüntülenir.

### Acil Durum Kipinden Çıkma

#### NOT:

Acil Durum Çağrısının Kalma Süresi sona erdiği için Acil Durum çağrısı bitirildiyse ancak acil durum henüz sona ermemişse işlemi yeniden başlatmak için tekrar **Acil Durum** düğmesine basın

Programlanmış **Acil Durum** düğmesine basarak bir Acil Durum Uyarısı başlattığınızda telsiziniz Connect Plus sisteminden yanıt aldıktan sonra otomatik olarak Acil durum kipinden çıkar.

Programlanmış **Acil Durum** düğmesine basarak bir Acil Durum çağrısı başlattığınızda telsizinize uygun olduğunda otomatik olarak bir kanal atanır. Telsiziniz acil durum mesajını ilettikten sonra, Acil Durum çağrınızı iptal edemezsiniz. Ancak, düğmeye yanlışlıkla bastıysanız veya acil durum ortadan kalktıysa bunu atanmış olan kanaldan söylemek isteyebilirsiniz. Acil Durum çağrısı, **PTT** düğmesi bırakıldıktan sonra Acil Durum Çağrısının Kalma Süresinin sonunda biter.

Telsiziniz Ses Takipli Acil Durum için yapılandırılmışsa hatanızı açıklamak için “hot mic” süresini kullanın, sonra

yayını kesmek için **PTT** düğmesine basıp düğmeyi bırakın. Acil Durum çağrısı, Acil Durum Çağrısının Kalma Süresinin sonunda biter.

### Yazılı Mesaj

Telsiziniz, başka telsizlerden ya da yazılı mesaj uygulamalarından yazılı mesaj gibi veriler alabilmektedir.

İki tür yazılı mesaj vardır: Dijital Mobil Telsiz (DMR) Kısa Metin Mesajı ve metin mesajı. Bir DMR Kısa Yazılı Mesajının maksimum uzunluğu 23 karakterdir. Bir yazılı mesajın maksimum uzunluğu, konu satırı dahil 280 karakterdir. Konu satırı yalnızca e-posta uygulamalarından mesaj aldığınızda görüntülenir.

#### NOT:

Maksimum karakter uzunluğu yalnızca en güncel yazılım ve donanıma sahip modeller için geçerlidir. Daha eski yazılım ve donanıma sahip telsiz modelleri için yazılı mesajın maksimum uzunluğu 140 karakterdir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Arapça için metin girişi yönü sağdan sola doğrudur.

## Hızlı Yazılı Mesaj Gönderme

Telsiziniz, satıcınız tarafından programlanan en fazla 10 Hızlı Yazılı mesaj desteklemektedir.

Hızlı Yazılı mesajlar önceden tanımlanmıştır ancak göndermeden önce hepsini düzenleyebilirsiniz.

Mesajı gönderiyorsanız aşağıdaki işlemi kullanarak bir alıcı seçin:

-  ya da  düğmesine basarak ilgili ada gidin ve seçmek için  düğmesine basın.
-  ya da  düğmesine basarak Elle Çevirme seçeneğine gidin ve seçmek için  düğmesine basın. Ekranın ilk satırında Numara: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Abone adını veya kimliğini girin ve  düğmesine basın.

Ekranı mesajınızın gönderilmekte olduğunu doğrulayan Mesaj Gönderiliyor bilgisi görüntülenir.

Mesaj başarıyla gönderilirse bir ton duyulur ve ekranda Mesaj Gönderildi bilgisi görüntülenir.

Mesaj gönderilemezse düşük bir ton duyulur ve ekranda Mesj. Gönderme Başarısız bilgisi görüntülenir.

Yazılı mesajın gönderilmesi başarısız olursa telsiziniz Resend (Tekr Gönder) seçeneği ekranına geri döner (bkz [Gönderilemeyen Yazılı Mesajları Yönetme sayfa 297](#)).

---

## Tek Tuşla Erişim Düğmesiyle Hızlı Yazılı Mesaj Gönderme

Satıcınız tarafından programlanan programlanabilir düğmeyi kullanarak Hızlı Metin Mesajları gönderebilirsiniz.

Programlanmış **Tek Tuşla Erişim** düğmesine basarak önceden tanımlanmış bir adla önceden tanımlanmış bir Hızlı Yazılı mesaj gönderebilirsiniz.

Ekranda mesajınızın gönderilmekte olduğunu doğrulayan **Mesaj Gönderiliyor** bilgisi görüntülenir.

Mesaj gönderilirse bir ton duyulur ve ekranda **Mesaj Gönderildi** bilgisi görüntülenir.

Mesaj gönderilemezse düşük bir ton duyulur ve ekranda **Mesj. Gönderme Başarısız** bilgisi görüntülenir.

Yazılı mesajın gönderilmesi başarısız olursa telsiziniz **Resend (Tekr Gönder)** seçeneği ekranına geri döner (bkz [Gönderilemeyen Yazılı Mesajları Yönetme sayfa 297](#)).

## Taslaklar Klasörüne Erişme

Taslaklar klasörü son kaydedilen maksimum on (10) mesajı saklar. Klasör dolduktan sonra kaydedilen her mesaj otomatik olarak klasörde yer alan en eski tarihli yazılı mesajın yerini alır.

### NOT:

Kaydedilmiş yazılı mesajları göndermeden önce düzenleyebilirsiniz. Sadece tuş takımlı mikrofonla kullanılabilir (bkz. [Kayıtlı Yazılı Mesajları Düzenleme ve Gönderme sayfa 295](#)). İstedığınız zaman Giriş ekranına dönmek için  düğmesine uzun basın.

## Kayıtlı Yazılı Mesajları Görüntüleme

### 1 Yazılı Mesaj özelliğine erişin.

Telsiz Kontrolleri	Adımlar
<b>Programlanmış Yazılı Mesaj düğmesi</b>	Programlanmış <b>Yazılı Mesaj</b> düğmesine basın.
<b>Menü</b>	<p><b>a</b>  ile menüye erişin düğmesine basın.</p> <p><b>b</b>  ya da  düğmesine basarak <b>Mesajlar</b> seçeneğine</p>

Telsiz Kontrolleri	Adımlar
	gidin ve seçmek için  düğmesine basın.

- 2  ya da  düğmesine basarak **Taslıklar** seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak ilgili mesaja gidin ve seçmek için  düğmesine basın.

## Kayıtlı Yazılı Mesajları Düzenleme ve Gönderme

- 1 Mesajı görüntülerken yeniden  düğmesine basın.

- 2  ya da  düğmesine basarak **Düzenle** seçeneğine gidin ve seçmek için  düğmesine basın.  
Yanıp sönen bir imleç görüntülenir.

- 3 Tuş takımını kullanarak mesajınızı yazın.

Bir karakter sola gitmek için  düğmesine basın. Bir karakter sağa gitmek için  ya da  düğmesine basın. Yanlış yazılan karakterleri silmek için  düğmesine basın. Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

- 4 Mesaj oluşturulduktan sonra  düğmesine basın.
- 5 Mesaj alıcısını seçmek için:
  -  ya da  düğmesine basarak ilgili ada gidin ve seçmek için  düğmesine basın.

-  ya da  düğmesine basarak **Elle Çevirme** seçeneğine gidin ve seçmek için  düğmesine basın. Ekranın ilk satırında **Numara:** bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Abone adını veya kimliğini girin ve  düğmesine basın.

Ekranı mesajınızın gönderilmekte olduğunu doğrulayan **Mesaj Gönderiliyor** bilgisi görüntülenir.

Mesaj başarıyla gönderilirse bir ton duyulur ve ekranda **Mesaj Gönderildi** bilgisi görüntülenir.

Mesaj gönderilemezse düşük bir ton duyulur ve ekranda **Mesj. Gönderme Başarısız** bilgisi görüntülenir.

Yazılı mesaj gönderilemezse **Gönderilenler** klasörüne taşınır ve **Gönderilemedi** simgesiyle işaretlenir.

## Kayıtlı Yazılı Mesajları Taslaklar Klasöründen Silme

### 1 Yazılı Mesaj özelliğine erişin.

Telsiz Kontrolleri	Adımlar
<b>Programlanmış Yazılı Mesaj düğmesi</b>	Programlanmış <b>Yazılı Mesaj</b> düğmesine basın.
<b>Menü</b>	<p><b>a</b>  ile menüye erişin düğmesine basın.</p> <p><b>b</b>  ya da  düğmesine basarak <b>Mesajlar</b> seçeneğine gidin ve seçmek için  düğmesine basın.</p>

- 2  ya da  düğmesine basarak **Taslaklar** seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak ilgili mesaja gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Sil seçeneğine gidin ve  düğmesine basarak yazılı mesajı silin.

## Gönderilemeyen Yazılı Mesajları Yönetme

Tekr. Gönder ekranındayken aşağıdaki seçeneklerden birini belirleyebilirsiniz:

- Tekrar Gönder
- İlet
- Düzenle

## Yazılı Mesajları Yeniden Gönderme

Aynı abone/grup adına veya kimliğine aynı mesajı yeniden göndermek için  düğmesine basın.

Mesajınız başarıyla gönderildiyse bir ton duyulur ve ekranda olumlu bir mini bilgi notu görüntülenir.

Mesajınız gönderilemezse ekranda olumsuz bir mini bilgi notu görüntülenir.

## Yazılı Mesajları İletme

Mesajı başka bir abone/grup adına ya da kimliğine göndermek için Yönlendir seçeneğini belirleyin.

1  ya da  düğmesine basarak Yönlendir seçeneğine gidin ve seçmek için  düğmesine basın.

- 2 Mesaj alıcısını seçmek için  ya da  düğmesine basarak ilgili ada veya kimliğe gidin ve seçmek için  düğmesine basın.

Ekranda mesajınızın gönderilmekte olduğunu doğrulayan Mesaj Gönderiliyor bilgisi görüntülenir.

Mesaj başarıyla gönderilirse bir ton duyulur ve ekranda Mesaj Gönderildi bilgisi görüntülenir.

Mesaj gönderilemezse düşük bir ton duyulur ve ekranda Mesj. Gönderme Başarısız bilgisi görüntülenir.

## Gönderilen Yazılı Mesajları Yönetme

Bir mesaj başka bir telsize gönderildikten sonra Gönderilenler klasöründe saklanır. En son gönderilmiş yazılı mesaj her zaman Gönderilenler listesinin en üstüne eklenir.

Gönderilenler klasörü en fazla 30 adet gönderilmiş mesaj saklayabilir. Klasör dolduktan sonra gönderilen her mesaj otomatik olarak klasördeki en eski tarihli mesajın yerini alır.

### NOT:

İstediğiniz zaman Giriş ekranına dönmek için  düğmesine uzun basın.

## Gönderilen Yazılı Mesajları Görüntüleme

- 1 Yazılı Mesaj özelliğine erişin.

Telsiz Kontrol eri	Adımlar
Program lanmış Yazılı Mesaj düğmesi	Programlanmış <b>Yazılı Mesaj</b> düğmesine basın.
Menü	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak Mesajlar seçeneğine gidin ve seçmek için  düğmesine basın.</p>

2  ya da  düğmesine basarak Gönderilenler seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  ögesine basarak ilgili mesaja gidin ve seçmek için  düğmesine basın.

Ekranın sağ üst köşesindeki simge mesajın durumunu belirtir (bkz. [Gönderilenler Simgeleri sayfa 240](#)).

## Gönderilen Yazılı Mesajları Gönderme

Ekranında görüntülenen gönderilmiş bir yazılı mesaj için aşağıdaki seçeneklerden birini belirleyebilirsiniz:

- Tekrar Gönder
- İlet
- Düzenle

### • Sil

1 Mesajı görüntülerken yeniden  düğmesine basın.

2  ya da  ile aşağıdaki seçeneklerden birini seçin ve seçmek için  düğmesine basın.

Seçenek	Adımlar
<b>İlet</b>	Seçili yazılı mesajı başka bir abone/grup adına veya kimliğine göndermek için Forward'ı (Yönlendir) seçin (bkz. <a href="#">Yazılı Mesajları İletme sayfa 297</a> ).
<b>Sil</b>	Yazılı mesajı silmek için Sil seçeneğini belirleyin.
<b>Tekrar Gönder</b>	Aynı abone/grup adı veya kimliğine seçili yazılı mesajı göndermek için Tekrar Gönder seçeneğini belirleyin.  Ekranında, aynı hedef telsize aynı mesajın gönderilmekte olduğunu

Seçenek	Adımlar
	<p>doğrulan Mesaj Gönderiliyor bilgisi görüntülenir.</p> <p>Mesaj başarıyla gönderilirse bir ton duyulur ve ekranda Mesaj Gönderildi bilgisi görüntülenir.</p> <p>Mesaj gönderilemezse düşük bir ton duyulur ve ekranda Mesj. Gönderme Başarısız bilgisi görüntülenir.</p> <p>Mesajınız gönderilemediyse telsiziniz Tekr. Gönder seçeneği ekranına döner. Aynı abone/grup adına veya kimliğine mesajı yeniden göndermek için  düğmesine basın.</p>

Mesaj gönderilirken mesaj gönderme ekranından çıkarsanız telsiz Gönderilenler klasöründeki mesajın durumunu ekranda ya da sesli olarak herhangi bir bildirimde bulunmaksızın günceller.

Gönderilenler klasöründe mesajın durumu güncellenmeden önce telsizin kipi değiştirilir ya da kapatılırsa telsiz Sürüyor durumundaki hiçbir mesaj

işlemini tamamlayamaz ve mesajı otomatik olarak **Gönderme Başarısız** simgesiyle işaretler.

Telsiz bir defada en fazla beş adet Sürüyor durumundaki mesaj işlemini destekler. Bu süre boyunca telsiz hiçbir yeni mesaj gönderemez ve yeni mesajları otomatik olarak **Gönderme Başarısız** simgesiyle işaretler.

## Gönderilen Tüm Yazılı Mesajları Gönderilenlerden Silme

### 1 Yazılı Mesaj özelliğine erişin.

Telsiz Kontrolleri	Adımlar
Programlanmış Yazılı Mesaj düğmesi	Programlanmış Yazılı Mesaj düğmesine basın.
Menü	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak</p>

Telsiz Kontrolleri	Adımlar
	Mesajlar seçeneğine gidin ve seçmek için  düğmesine basın.

- 2  ya da  düğmesine basarak Gönderilenler seçeneğine gidin ve seçmek için  düğmesine basın.

Gönderilmi öğesini seçerseniz ve burada yazılı mesaj bulunmuyorsa ekranda Liste Boş bilgisi görüntülenir ve Tuş Takımı Tonları açıksa düşük perdeli bir ton duyulur.

- 3  ya da  düğmesine basarak Hepsini Sil seçeneğine gidin ve seçmek için  düğmesine basın.

- 4 Aşağıdakilerden birini seçin.

-  ya da  düğmesine basarak Evet seçeneğine gidin ve seçmek için  düğmesine basın. Ekranda olumlu bir mini bilgi notu görüntülenir.
- Önceki ekrana dönmek için  ya da  düğmesine basarak Hayır seçeneğine gidin ve  düğmesine basın.

## Yazılı Mesaj Alma

Telsiziniz yazılı mesaj aldığı anda, ekranda gönderenin adı veya kimliğiyle birlikte Bildirim Listesi ve Mesaj Simgesi görüntülenir.

Yazılı mesajları alma ekranında aşağıdakilerden birini seçebilirsiniz:

- Okuma
- Sonra Oku
- Silme

## Yazılı Mesajları Okuma

1  ya da  düğmesine basarak Okunsun Mu?

seçeneğine gidin ve seçmek için  düğmesine basın.

Gelen Kutusunda seçili mesaj açılır.

2 Aşağıdakilerden birini yapın:

- Gelen Kutusuna dönmek için  düğmesine basın.
- Yazılı mesajı yanıtlamak, yönlendirmek veya silmek için ikinci defa  düğmesine basın.

## Alınan Yazılı Mesajları Yönetme

Yazılı mesajlarınızı yönetmek için Gelen Kutusunu kullanın. Gelen Kutusu en fazla otuz (30) mesaj saklama kapasitesine sahiptir.

Gelen Kutusundaki yazılı mesajlar en son alınma sırasına göre sıralanır.

Telsiziniz aşağıdaki yazılı mesaj seçeneklerini destekler:

- Yanıtlarla (Hızlı Metin ile)
- İlet
- Sil
- Hepsini Sil

### NOT:

Kanal türü eşleşmiyorsa Alınan mesajları sadece yönlendirebilir, silebilir ya da hepsini silebilirsiniz.

İstediğiniz zaman Giriş ekranına dönmek için  düğmesine uzun basın.

## Gelen Kutusundaki Yazılı Mesajları Görüntüleme

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Mesajlar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Gelen K. seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak mesajları görüntüleyin.

5 Aşağıdakilerden birini yapın:

- Mevcut mesajı silmek için  tuşuna basın ve mesajı yanıtlamak, , yönlendirmek ve silmek için  tuşuna yeniden basın.
- Giriş ekranına dönmek için  düğmesine uzun basın.

## Gelen Kutusundaki Yazılı Mesajları Yanıtlama

1 **Yazılı Mesaj** özelliğine erişin.

Telsiz Kontrol eri	Adımlar
<b>Programlanmış Yazılı Mesaj düğmesi</b>	Programlanmış <b>Yazılı Mesaj</b> düğmesine basın.
<b>Menü</b>	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak <b>Mesajlar</b> seçeneğine gidin ve seçmek için  düğmesine basın.</p>

2  ya da  düğmesine basarak Gelen K. seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak ilgili mesaja gidin ve seçmek için  düğmesine basın.

4 Alt menüye erişmek için bir kez daha  düğmesine basın.

5 Mesajınızı yazmak/düzenlemek için tuş takımınızı kullanın.

6 Mesaj oluşturulduktan sonra  düğmesine basın.

Ekranla mesajınızın gönderilmekte olduğunu doğrulayan Mesaj Gönderiliyor bilgisi görüntülenir.

Mesaj başarıyla gönderilirse bir ton duyulur ve ekranda Mesaj Gönderildi bilgisi görüntülenir.

Mesaj gönderilemezse düşük bir ton duyulur ve ekranda Mesj. Gönderme Başarısız bilgisi görüntülenir.

Mesaj gönderilemezse telsiziniz Resend (Tekr Gönder) seçeneği ekranına geri döner (bkz

Gönderilemeyen Yazılı Mesajları Yönetme sayfa 297).

## Gelen Kutusundaki Yazılı Mesajları Silme

1 Yazılı Mesaj özelliğine erişin.

Telsiz Kontrolleri	Adımlar
Programlanmış Yazılı Mesaj düğmesi	Programlanmış Yazılı Mesaj düğmesine basın.
Menü	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak Mesajlar seçeneğine gidin ve seçmek için  düğmesine basın.</p>

2  ya da  düğmesine basarak Gelen K. seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak ilgili mesaja gidin ve seçmek için  düğmesine basın.

4 Alt menüye erişmek için bir kez daha  düğmesine basın.

5  ya da  düğmesine basarak Sil seçeneğine gidin ve seçmek için  düğmesine basın.

6  ya da  düğmesine basarak Evet seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranında Mesaj Silindi bilgisi görüntülenir ve ekran Gelen Kutusuna döner.

## Gelen Kutusundaki Tüm Yazılı Mesajları Silme

1 Yazılı Mesaj özelliğine erişin.

Telsiz Kontrolleri	Adımlar
Programlanmış Yazılı Mesaj düğmesi	Programlanmış Yazılı Mesaj düğmesine basın.
Menü	<p>a  ile menüye erişin düğmesine basın.</p> <p>b  ya da  düğmesine basarak Mesajlar seçeneğine gidin ve seçmek için  düğmesine basın.</p>

- 2  ya da  düğmesine basarak Gelen K. seçeneğine gidin ve seçmek için  düğmesine basın.
- Gelen Kutusu öğesini seçtiğinizde hiç yazılı mesaj yoksa ekranda Liste Boş bilgisi görünür ve Tuş Takımı Ton Sesleri açıksa düşük bir ton sesi duyulur (bkz. [Tuş Takımı Seslerini Açma veya Kapatma sayfa 209](#)).

- 3  ya da  düğmesine basarak Hepsini Sil seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Evet seçeneğine gidin ve seçmek için  düğmesine basın.
- Ekranda, Gelen Kutusu Temizlendi bilgisi görüntülenir.

## Gizlilik

Bu özellik etkinse yazılım tabanlı şifreleme çözümüyle kanal üzerindeki yetkisiz kullanıcıların etkinlikleri gizlice dinlemelerinin engellenmesini sağlar. Bir yayının sinyal gönderme ve kullanıcı kimliği kısımları şifrelenemez.

Gizliliğin etkin olduğu yayınlar göndermek için telsizinizin geçerli kanal seçim konumu üzerindeki gizliliği etkin hale getirilmiş olmalıdır; ancak bu, yayın almak için gerekli değildir. Telsiz, gizliliğin etkin olduğu kanal seçim konumundayken açık (şifrelenmemiş) yayınları almaya devam eder.

Telsiziniz Gelişmiş Gizliliği destekler.

Gizliliğin etkinleştirildiği bir çağrıyı çözmek için telsizinizin yayın yapan telsizle aynı Anahtar Değerine ve Anahtar Kimliğine (Gelişmiş Gizlilik için) sahip olması gerekir.

Telsiziniz farklı bir Anahtar Değeri ve Anahtar Kimliğine sahip şifreli bir çağrı aldığında hiçbir şey duymazsınız (Gelişmiş Gizlilik).

Telsizinize bir gizlilik tipi atanmışsa telsizin Acil Durum çağrısı ya da alarmı gönderdiği ya da aldığı zamanlar dışında Giriş Ekranında Güvenli ya da Güvenli Değil simgesi görüntülenir.

Telsiz, yayın gönderirken LED sürekli yeşil yanar, gizliliğin etkin olduğu sürekli bir yayın alırken ise yeşil renkte hızla yanıp söner.

Bu özelliğe aşağıdaki işlemlerden birini yaparak erişebilirsiniz:

- Gizliliği açmak veya kapatmak için programlanmış **Gizlilik** düğmesine basın.
- Telsiz Menüsünü aşağıda açıklanan adımlara göre kullanın.

#### NOT:

Bazı telsiz modellerinde bu Gizlilik özelliği sunulmamaktadır. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları veya  ya da  düğmesine

[Geribildirim Gönder](#)

basarak Connect Plus seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Gelişmiş Gizlilik seçeneğine gidin.

Ekranında Aç seçeneği görünürse  düğmesine basarak Gizlilik seçeneğini etkinleştirin. Telsiz ekranında seçiminizin doğrulandığı bir mesaj gösterilir.

Ekranında Kapat seçeneği görünürse  düğmesine basarak Gizlilik seçeneğini devre dışı bırakın. Telsiz ekranında seçiminizin doğrulandığı bir mesaj gösterilir.

Telsizinize bir gizlilik tipi atanmışsa telsizin Acil Durum Uyarısı aldığı ya da gönderdiği zamanlar dışında, durum çubuğunda bir güvenli ya da güvenli değil simgesi görüntülenir.

## Gizliliği Etkinleştirilmiş (Şifreli) Çağrı Yapma

Programlanmış gizlilik düğmesini veya menüyü kullanarak gizliliği açın. O sırada seçili olan kanal konumunun gizliliği etkinleştirilmiş yayın gönderebilmesi için telsizinizde Gizlilik özelliğinin etkinleştirilmiş olması gerekir. O sırada seçili olan kanal konumu için gizlilik etkinleştirildiğinde, telsizinizin gönderdiği tüm ses yayınları şifrelenir. Grup Çağrısı, Çoklu Grup Çağrısı, çağrı tarama sırasında cevap verme, Sahadaki Herkese Çağrı, Acil Durum Çağrısı ve Özel Çağrı da buna dahildir. Yalnızca telsizinizle aynı Anahtar Değerine ve Anahtar Kimliğine sahip olan alıcı telsizler bu yayının şifresini çözebilir.

## Güvenlik

Sistemdeki her telsizi etkinleştirebilir ya da devre dışı bırakabilirsiniz. Örneğin, çalınan bir telsizin çalan kişi tarafından kullanılmasını engellemek için telsizi devre dışı bırakmak isteyebilir, bulduktan sonra da yeniden etkinleştirebilirsiniz.

### NOT:

Telsiz Devre Dışı ve Etkin işlemlerinin gerçekleştirilmesi yalnızca bu işlevlerin etkin olduğu telsizlerle sınırlıdır. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Telsiz Devre Dışı

- 1 Bu özelliğe aşağıdaki işlemlerden birini yaparak erişin:

Telsiz Kontrol eri	Adımlar
Telsiz Devre Dışı düğmesi	<p>a Programlanmış <b>Telsiz Devre Dışı</b> düğmesine basın.</p> <p>b  ya da  düğmesine basarak ilgili ad veya kimliğe gidin ve seçmek için  düğmesine basın.</p>

Telsiz Kontroll eri	Adımlar
<b>Telsiz menüsü</b>	<p><b>a</b>  ile menüye erişin düğmesine basın.</p> <p><b>b</b>  ya da  düğmesine basarak <b>Kişiler</b> seçeneğine gidin ve seçmek için  düğmesine basın. Girişler alfabetik olarak sıralanmıştır.</p> <p><b>c</b> İstenen abone adını veya kimliğini seçmek için aşağıda açıklanan adımlardan birini kullanın:</p> <ul style="list-style-type: none"> <li>İstenen adı veya kimliği doğrudan seçin.</li> <li> ya da  düğmesine basarak ilgili ad veya kimliğe gidin ve</li> </ul>

Telsiz Kontroll eri	Adımlar
	<p>seçmek için  düğmesine basın.</p> <ul style="list-style-type: none"> <li>Elle Çevirme menüsünü kullanın.</li> <li> ya da  düğmesine basarak <b>Elle Çevirme</b> seçeneğine gidin ve seçmek için  düğmesine basın.</li> <li> ya da  düğmesine basarak <b>Telsiz Numarası</b> seçeneğine gidin ve seçmek için  düğmesine basın.</li> </ul>

Telsiz Kontrolleri	Adımlar
	<ul style="list-style-type: none"> <li>Ekranın ilk satırında Radio Number: (Telsiz No:) bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Abone adı veya kimliğini girmek için tuş takımını kullanın ve  düğmesine basın.</li> </ul> <p><b>d</b>  ya da  düğmesine basarak Telsiz Dvrdışı seçeneğine gidin ve seçmek için  düğmesine basın.</p>

Ekranında Telsiz Dvrdışı: <Hedef Ad veya Kimlik> bilgisi görüntülenir ve LED yeşil yanıp söner.

## 2 Onay için bekleyin.

İşlem başarılı olursa olumlu bir gösterge tonu duyulur ve ekranda Tlsz Dev Dışı Başarılı bilgisi görüntülenir.

İşlem başarılı olmazsa olumsuz bir gösterge tonu duyulur ve ekranda Tlsz Dev Dışı Başarısız bilgisi görüntülenir.

## Telsiz Etkin

### 1 Bu özelliğe aşağıdaki işlemlerden birini yaparak erişin:

Telsiz Kontrolleri	Adımlar
<p><b>Telsiz Etkin düğmesi</b></p>	<p><b>a</b> Programlanmış <b>Telsiz Etkin</b> düğmesine basın.</p> <p><b>b</b>  ya da  düğmesine basarak ilgili ad veya kimliğe gidin ve seçmek için  düğmesine basın.</p>

Telsiz Kontrolleri	Adımlar
<b>Telsiz menüsü</b>	<p><b>a</b>  ile menüye erişin düğmesine basın.</p> <p><b>b</b>  ya da  düğmesine basarak <b>Kişiler</b> seçeneğine gidin ve seçmek için  düğmesine basın. Girişler alfabetik olarak sıralanmıştır.</p> <p><b>c</b> İstenen abone adını veya kimliğini seçmek için aşağıda açıklanan adımlardan birini kullanın</p> <ul style="list-style-type: none"> <li>İstenen adı veya kimliği doğrudan seçin.</li> <li> ya da  düğmesine basarak ilgili ad veya kimliğe gidin ve</li> </ul>

Telsiz Kontrolleri	Adımlar
	<p>seçmek için  düğmesine basın.</p> <ul style="list-style-type: none"> <li>Elle Çevirme menüsünü kullanın.</li> <li> ya da  düğmesine basarak Elle Çevirme seçeneğine gidin ve seçmek için  düğmesine basın.</li> <li> ya da  düğmesine basarak Telsiz Numarası seçeneğine gidin ve seçmek için  düğmesine basın.</li> </ul>

Telsiz Kontrolleri	Adımlar
	<ul style="list-style-type: none"> <li>• Ekranın ilk satırında Radio Number: (Telsiz No:) bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Abone adı veya kimliğini girmek için tuş takımını kullanın ve  düğmesine basın.</li> </ul> <p><b>d</b>  ya da  düğmesine basarak Telsiz Etkin seçeneğine gidin ve seçmek için  düğmesine basın.</p>

Ekranında Telsiz Etkin: <Abone Adı veya Kimliği> bilgisi görüntülenir ve LED aralıksız olarak yeşil yanar.

## 2 Onay için bekleyin.

İşlem başarılı olursa olumlu bir gösterge tonu duyulur ve ekranda Telsiz Etkin Başarılı bilgisi görüntülenir.

İşlem başarılı olmazsa olumsuz bir gösterge tonu duyulur ve ekranda Telsiz Etkin Başarısız bilgisi görüntülenir.

## Bluetooth Kullanma

### NOT:

CPS ile devre dışı bırakıldığında tüm Bluetooth ile ilişkili özellikler devre dışı kalır ve Bluetooth cihazı veri tabanı silinir.

Bu özellik, kablosuz Bluetooth bağlantısı yoluyla Bluetooth özelliği etkin bir cihaz (aksesuar) ile telsizinizi kullanmanızı sağlar. Telsiziniz hem Motorola Solutions'ın hem de piyasada bulunan diğer ticari markaların (COTS) Bluetooth özellikli cihazlarını desteklemektedir.

Bluetooth 10 metrelik (32 fit) bir görüş alanı menziline çalışır. Telsiziniz ve Bluetooth özellikli cihazınız arasındaki bu mesafenin engelsiz olması gerekir.

Telsizinizi yanınıza almadığınızda Bluetooth özellikli cihazınız yüksek güvenlikte çalışmayabileceğinden bu durumdan kaçınmanız önerilir.

Kapsama alanı sınırlarına yakın olduğunuz durumlarda hem konuşma, hem de ton kalitesi düşecek, sesler "karışık" ve "bozuk" çıkacaktır. Bu sorunu düzeltmek için net ses alımını yeniden kurmak amacıyla sadece telsizinizi ve Bluetooth özellikli cihazınızı birbirine (tanımlı menzilin 10 metre/23 fit dahilinde) yaklaştırın. Telsizinizin Bluetooth işlevi 10 metre/32 fit menzilde maksimum 2,5 mW (4 dBm) güce sahiptir.

Telsiziniz, birbirinden farklı türlerde Bluetooth özellikli cihazlarla aynı anda 4 Bluetooth bağlantısı gerçekleştirilmesini destekler. Örneğin, bir kulaklık ve bir Yalnızca PTT Cihazı (POD). Aynı tip Bluetooth özellikli cihazlarla çoklu bağlantı desteklenmemektedir.

Bluetooth özellikli cihazlarınızın tam kapasitelerine dair ayrıntılı bilgi için ilgili Bluetooth özellikli cihazınızın kullanım kılavuzuna bakın.

## Bluetooth'u Açık ve Kapalı Konuma Getirme

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Durumum bölümüne girin ve seçmek için  düğmesine basın.  
Ekranında Açık ve Kapalı seçenekleri görüntülenir. Geçerli durum, ✓ simgesiyle belirtilir.

---

- 4 Aşağıdakilerden birini yapın:
  -  ya da  düğmesine basarak Açık seçeneğine gidin ve seçmek için  düğmesine basın. Ekranında Açık bilgisi ve seçili durumun solunda bir ✓ ögesi görüntülenir.

-  ya da  düğmesine basarak **Kapalı** seçeneğine gidin ve seçmek için  düğmesine basın. Ekranda **Kapalı** bilgisi ve seçili durumun solunda bir  ögesi görüntülenir.

## Bluetooth Cihazı Bulma ve Bağlantı Kurma

Bulma ve bağlanma işlemleri sırasında Bluetooth özellikli cihazınızı kapatmayın veya  düğmesine basmayın. Bu eylemler, işlemi iptal eder.

- 1 Bluetooth özellikli cihazınızı açın ve eşleştirme modunda bırakın. İlgili Bluetooth özellikli cihazın kullanım kılavuzuna bakın.
- 2 Telsizinizdeki  ile menüye erişim basın.
- 3  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak **Cihazlar** seçeneğine gidin ve seçmek için  düğmesine basın.

### 5 Aşağıdakilerden birini yapın:

-  ya da  düğmesine basarak ilgili cihaza gidin ve seçmek için  düğmesine basın.
- Kullanılabilir cihazları bulmak için  ya da  düğmesine basarak **Cihazları Bul** seçeneğine gidin.  ya da  düğmesine basarak ilgili cihaza gidin ve seçmek için  düğmesine basın.

- 6  ya da  düğmesine basarak **Bağlan** seçeneğine gidin ve seçmek için  düğmesine basın. Ekranda **<Cihaza> Bağlanıyor** bilgisi görüntülenir. Eşleştirmenin tamamlanması için Bluetooth özellikli

cihazınızda başka işlemler yapılması gerekebilir. İlgili Bluetooth özellikli cihazın kullanım kılavuzuna bakın.

Başarılı olunursa telsiz ekranında <Cihaza> Bağlanıldı bilgisi görüntülenir. duyulur ve bağlı cihazın yanında ✓ simgesi belirir. Durum çubuğunda Bluetooth Bağlı simgesi görüntülenir.

İşlem başarılı olmazsa telsizde Bağlantı Başarısız bilgisi görüntülenir.

## Bluetooth Özellikli Cihazdan Bulma ve Bağlanma (Bulunabilir Kip)

Bulma ve bağlanma işlemi sırasında Bluetooth'u ya da telsizinizi kapatmayın. Bu eylemler işlemin iptal olmasına neden olabilir.

1 Bluetooth'u açın.

Bkz. [Bluetooth'u Açık ve Kapalı Konuma Getirme sayfa 313](#)

2  ile menüye erişin düğmesine basın.

3  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Beni Bul seçeneğine gidin ve seçmek için  düğmesine basın.

Telsiziniz artık programlanan süre boyunca diğer Bluetooth özellikli cihazlar tarafından bulunabilir. Buna, Bulunabilir Kip adı verilir.

5 Bluetooth özellikli cihazınızı açın ve telsizinizle eşleştirin.

İlgili Bluetooth özellikli cihazın kullanım kılavuzuna bakın.

## Bluetooth Cihazının Bağlantısını Kesme

1 Telsizinizdeki  ile menüye erişin basın.

2  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Cihazlar seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak ilgili cihaza gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak Bağlantıyı Kes seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranda <Cihaz Adı> Bağlantı Kesiliyor bilgisi görüntülenir. Bağlantının kesilmesi için Bluetooth özellikli cihazınızda başka işlemler yapılması

gerekebilir. İlgili Bluetooth özellikli cihazın kullanım kılavuzuna bakın.

Telsiz ekranında <Cihaz Adı> Bağlantı Kesildi bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur ve bağlı cihazın yanındaki ✓ simgesi kaybolur. Durum çubuğundaki Bluetooth Bağlı simgesi kaybolur.

## Ses Yönlendirmesini Dahili Telsiz Hoparlörü ve Bluetooth Cihazı Arasında Değiştirme

Ses çıkış yolunu dahili telsiz hoparlörü ya da harici Bluetooth özellikli bir aksesuar olacak şekilde değiştirebilirsiniz.

Programlanmış **Bluetooth Ses Anahtarı** düğmesine basın.

- Bir ton duyulur ve ekranda Route Audio to Radio (Sesi Telsize Yönlendir) bilgisi görüntülenir.
- Bir ton duyulur ve ekranda Route Audio to Bluetooth (Bluetooth'a Ses Ynlendir) bilgisi görüntülenir.

## Cihaz Ayrıntılarını Görüntüleme

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Cihazlar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak ilgili cihaza gidin ve seçmek için  düğmesine basın.

---

- 5  ya da  düğmesine basarak Ayrıntıları Gör seçeneğine gidin ve seçmek için  düğmesine basın.

---

## Cihaz Adını Silme

Bağlantısı kesilen bir cihazı Bluetooth özellikli cihazlar listesinden silebilirsiniz.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Cihazlar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak ilgili cihaza gidin ve seçmek için  düğmesine basın.

---

- 5  ya da  düğmesine basarak Sil seçeneğine gidin ve seçmek için  düğmesine basın.
- Ekranada Cihaz Silindi bilgisi görüntülenir.

## Bluetooth Mikrofon Kazancı

Bağlı Bluetooth özellikli cihazın mikrofon kazanç değerini kontrol etmenize olanak sağlar.

- 1  ile menüye erişim düğmesine basın.
- 2  ya da  düğmesine basarak Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak BT Mik Kazancı seçeneğine gidin ve seçmek için  düğmesine basın.

- 4 BT Mik Kazancı tipi ve geçerli değerler için  ya da  düğmesine basın.
- Değerleri düzenlemek için seçmek için  düğmesine basın.

- 5  ya da  düğmesine basarak değerleri artırın veya azaltın ve seçmek için  düğmesine basın.

## İç Konum

### NOT:

İç Konum özelliği en güncel yazılım ve donanıma sahip modeller için geçerlidir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

İç Konum, telsiz kullanıcılarını takip etmek için kullanılır. İç Konum etkinleştirildiğinde telsiz kısıtlı keşfedilebilir kipte olur. Telsizi bulmak ve konumunu belirlemek için özel işaretlemeler kullanılır.

## İç Konum Özelliğini Açma veya Kapatma

İç Konum özelliğini, aşağıdaki işlemlerden birini gerçekleştirerek açabilir veya kapatabilirsiniz.

- Bu özelliğe menüden erişin.
  - a.  ile menüye erişin düğmesine basın.
  - b.  ya da  ile Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.
  - c.  ya da  veya İç Konum seçeneğine gidin ve seçmek için  düğmesine basın.
  - d. İç Konum özelliğini açmak için  düğmesine basın.

Ekranında İç Konum Açık bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi görüntülenir.

- Başarısız olursa ekranda Açma İşlemi Başarısız bilgisi görüntülenir. Olumsuz gösterge tonu duyulur.

- e. İç Konum özelliğini kapatmak için  düğmesine basın.

Ekranında İç Konum Kapalı bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi kaybolur.
- Başarısız olursa ekranda Kapatma İşlemi Başarısız bilgisi görüntülenir. Olumsuz gösterge tonu duyulur.

- Bu özelliğe programlanmış düğmeyi kullanarak erişin.
  - a. İç Konum özelliğini açmak için programlanmış **İç Konum** düğmesine uzun basın.

Ekranında İç Konum Açık bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi görüntülenir.
  - Başarısız olursa ekranda Açma İşlemi Başarısız bilgisi görüntülenir. Başarısız olursa olumsuz gösterge tonu duyarsınız.
- b. İç Konum özelliğini kapatmak için programlanmış **İç Konum** düğmesine basın.

Ekranda İç Konum Kapalı bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur.

Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi kaybolur.
- Başarısız olursa ekranda Kapatma İşlemi Başarısız bilgisi görüntülenir. Başarısız olursa olumsuz gösterge tonu duyarsınız.

## İç Konum İşaretleme Bilgilerine Erişim

İç Konum işaretleri ile ilgili bilgilere erişmek için bu prosedürü uygulayın.

- 1  ile menüye erişim düğmesine basın.
- 2  ya da  ile Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  veya İç Konum seçeneğine gidin ve seçmek için  düğmesine basın.
- 4  ya da  düğmesine basarak İşaretleme öğesine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

Ekranda, işaretleme bilgileri görüntülenir.

## Bildirim Listesi

Telsizinizde, kanaldaki okunmamış yazılı mesajlar, cevapsız çağrılar ve çağrı uyarıları gibi "okunmamış" tüm olaylarınızı toplayan bir Bildirim Listesi bulunur.

Bildirim Listesinde bir ya da daha fazla olay olduğunda, durum çubuğunda Bildirim simgesi görüntülenir.

Bu liste en fazla 40 okunmamış olayı destekler. Liste tamamen dolduğunda en son gerçekleşen olay otomatik olarak en eski olayın yerini alır.

### NOT:

Olaylar okunduktan sonra Bildirim Listesinden kaldırılır.

## Bildirim Listesine Erişim

Bildirim listesine erişmek için bu prosedürü uygulayın.

- 1  ile menüye erişin düğmesine basın.
- 2  ya da  düğmesine basarak Bildirim seçeneğine gidin ve seçmek için  düğmesine basın.

[Geribildirim Gönder](#)

- 3  ya da  düğmesine basarak ilgili olaya gidin ve seçmek için  düğmesine basın.

Giriş Ekranına dönmek için  düğmesine uzun basın.

## Wi-Fi Kullanımı

Wi-Fi®, Wi-Fi Alliance®'ın tescilli ticari markasıdır.

### NOT:

Bu özellik yalnızca DM4601e için geçerlidir.

Bu özellik bir Wi-Fi ağını ayarlamanızı ve bu ağa bağlanmanızı sağlar. Wi-Fi; telsiz ürün yazılımı, codeplug ve dil paketleri ile sesli anons gibi kaynak güncellemelerini destekler.

## Wi-Fi Özelliğini Açma veya Kapatma

Programlanmış **Wi-Fi Açık veya Kapalı** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için satıcınıza veya sistem yöneticinize başvurun.

Programlanmış **Wi-Fi Açık veya Kapalı** düğmesi için Sesli Anonslar, kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

Wi-Fi özelliğini, aşağıdaki işlemlerden birini gerçekleştirerek açabilir veya kapatabilirsiniz.

- Programlanmış **Wi-Fi Açık veya Kapalı** düğmesine basın. Sesli Anons, Wi-Fi Açma veya Wi-Fi Kapatma tonunu çalar.
- Bu özelliğe menüyü kullanarak erişin.
  - a.  ile menüye erişin düğmesine basın.
  - b.  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.
  - c.  ya da  düğmesine basarak Wi-Fi Açık seçeneğine gidin ve seçmek için  düğmesine basın.

 düğmesine basarak Wi-Fi özelliğini açın. Ekranda, Etkin yazısının yanında  ögesi gösterilir.

 düğmesine basarak Wi-Fi özelliğini kapatın. Etkin yazısının yanındaki  simgesi kaybolur.

## Ağ Erişim Noktasına Bağlanma

Wi-Fi özelliğini açtığınızda telsiz, ağ erişim noktalarını tarar ve bunlardan birine bağlanır.

Menüyü kullanarak da bir ağ erişim noktasına bağlanabilirsiniz.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

4  ya da  düğmesine basarak bir ağ erişim noktasına gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

5  ya da  düğmesine basarak Bağlan seçeneğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

6 Şifreyi girin ve  düğmesine basın.

Bağlantı başarıyla kurulursa telsizde bir bildirim görüntülenir ve ağ erişim noktası profil listesine kaydedilir.

## Wi-Fi Bağlantı Durumunu Kontrol Etme

Wi-Fi Bağlantı durumunu kontrol etmek için bu prosedürü uygulayın.

Sesli Anons üzerinden bağlantı durumu için programlanan **Wi-Fi Durumu Sorgusu** düğmesine basın. Sesli Anons; Wi-Fi Kapalı, Wi-Fi Açık fakat Bağlantı Yok veya Wi-Fi Açık ve Bağlı uyarılarını verir.

- Wi-Fi kapatıldığında, ekranda Wi-Fi Kapalı mesajı görüntülenir.
- Telsiz bir ağa bağlandığında, ekranda Wi-Fi Açık, Bağlandı mesajı görüntülenir.
- Wi-Fi açık olduğunda ancak telsiz herhangi bir ağa bağlanmadığında, ekranda Wi-Fi Açık, Bağlantı Kesildi mesajı görüntülenir.

Wi-Fi durumu sorgu sonuçları için Sesli Anonslar, kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

### NOT:

Programlanmış **Wi-Fi Durumu Sorgusu** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

## Ağ Listesini Yenileme

Ağ listesini yenilemek için bu prosedürü uygulayın.

- Ağ listesini yenilemek için menüden aşağıdaki işlemleri gerçekleştirin.
  - a.  ile menüye erişim düğmesine basın.
  - b.  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.
  - c.  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.  
Ağlar menüsüne girdiğinizde telsiz ağ listesini otomatik olarak yeniler.
- Zaten Ağlar menüsündeyseniz ağ listesini yenilemek için aşağıdaki işlemi gerçekleştirin.

 ya da  ögesine basarak Yenile'ye gidin

ve seçmek için  düğmesine basın.

Telsiz yenilenir ve en güncel ağ listesi görüntülenir.

## Ağ Ekleme

Kullanılabilir ağ listesinde tercih edilen bir ağ yoksa bir ağ eklemek için aşağıdaki işlemi gerçekleştirin.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

4  ya da  öğesine basarak Ağ Ek 1'e'ye gidin ve seçmek için  düğmesine basın.

5 Hizmet Kümesi Tanımlayıcısını (SSID) girin ve  düğmesine basın.

6  ya da  öğesine basarak Ağ'a gidin ve seçmek için  düğmesine basın.

7 Şifreyi girin ve  düğmesine basın.

Ağ erişim noktalarının başarıyla kaydedildiğini belirtmek için telsiz ekranında olumlu bir mini bilgi notu görüntülenir.

## Ağ Erişim Noktaları Ayrıntılarını Görüntüleme

Ağ erişim noktaları ayrıntılarını görüntülemek için bu prosedürü uygulayın.

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

4  ya da  düğmesine basarak bir ağ erişim noktasına gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

- 5  ya da  ögesine basarak **Ayrıntıları** Görüntüle'ye gidin ve seçmek için  düğmesine basın.
- Bağlantısı sağlanan bir ağ erişim noktasında Hizmet Kümesi Tanımlayıcısı (SSID), Güvenlik Modu, Ortam Erişim Kontrolü (MAC) adresi ve İnternet Protokolü (IP) adresi görüntülenir.
- Bağlantısı olmayan bir ağ erişim noktasında Hizmet Kümesi Tanımlayıcısı (SSID) ve Güvenlik Modu görüntülenir.
- 

## Ağ Erişim Noktalarını Çıkarma

Ağ erişim noktalarını profil listesinden kaldırmak için aşağıdaki işlemleri gerçekleştirin.

- 1  ile menüye erişim düğmesine basın.
- 
- 2  ya da  düğmesine basarak **WiFi** özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.
- 

- 3  ya da  düğmesine basarak **Ağlar** bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.
- 

- 4  ya da  ögesine basarak seçilen ağ erişim noktasına gidin ve seçmek için  düğmesine basın.
- 

- 5  ya da  ögesine basarak **Kaldır**'a gidin ve seçmek için  düğmesine basın.
- 

- 6  ya da  ögesine basarak **Evet**'e gidin ve seçmek için  düğmesine basın.
- Seçilen ağ erişim noktalarının başarıyla kaldırıldığını belirtmek için telsiz ekranında olumlu bir mini bilgi notu görüntülenir.
-

## Uygulamalar

Bu bölümde, telsizinizde bulunan uygulama işlevlerinin nasıl çalıştığı açıklanmaktadır.

### Telsiz Tonlarını/Uyarılarını Açma veya Kapatma

Gerektiğinde tüm telsiz tonlarını ve uyarılarını (gelen Acil Durum uyarı tonu hariç) etkinleştirebilir ya da devre dışı bırakabilirsiniz.

Programlanmış **Tüm Tonlar/Uyarılar** düğmesine basın ile tüm tonları açın veya kapatın ya da telsiz menüsü üzerinden bu özelliğe erişmek için aşağıda açıklanan prosedürü izleyin.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak Tonlar/Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 5  ya da  düğmesine basarak Tüm Tonlar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 6 Tüm ton ve uyarıları etkinleştirmek/devre dışı bırakmak için  düğmesine basın.  
Ekranında, Etkin yazısının yanında  ögesi gösterilir.  
Etkin yazısının yanındaki  simgesi kaybolur.

---

## Tonlu Uyarı Ses Ofset Seviyesini Ayarlama

Tonlu Uyarı Ses Ofset Seviyesini gerektiğinde ayarlayabilirsiniz. Bu özellik, geçerli ses seviyesini kısacak ya da yükseltecek şekilde ton seslerinin/uyarılarda şiddetini ayarlar.

1  ile menüye erişim düğmesine basın.

---

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

4  ya da  düğmesine basarak Tonlar Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.

---

5  ya da  düğmesine basarak Ses Ofseti seçeneğine gidin ve seçmek için  düğmesine basın.

---

6  ya da  düğmesine basarak istenen ses düzeyi değerine gidin.  
Telsiz, üzerine geline her ses değerinde test ton sesi çıkarır.

---

7 Aşağıdakilerden birini yapın:

- Ekranda görünen istenen ses seviyesini korumak için  düğmesine basın.
  - Geçerli ses ofset ayarlarını değiştirmeden çıkmak için  düğmesine basın.
-

## Konuşma İzni Tonunu Açma veya Kapatma

Gerekirse Konuşma İzni Tonunu etkinleştirebilir ve devre dışı bırakabilirsiniz.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak Tonlar Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.

- 5  ya da  düğmesine basarak Konuşma İzni seçeneğine gidin ve seçmek için  düğmesine basın.

- 6 Konuşma İzni Tonunu etkinleştirmek/devre dışı bırakmak için  düğmesine basın. Ekranda, Etkin yazısının yanında ✓ ögesi gösterilir. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Açılış Uyarı Tonunu Açma veya Kapatma

Gerekirse Açılış Uyarı Tonunu etkinleştirebilir ve devre dışı bırakabilirsiniz.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Tonlar Uyarılar seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak Güç Açık seçeneğine gidin ve seçmek için  düğmesine basın.

6 Açılış Uyarı Tonunu etkinleştirmek/devre dışı bırakmak için  düğmesine basın.  
Ekranda, Etkin yazısının yanında  ögesi gösterilir.  
Etkin yazısının yanındaki  simgesi kaybolur.

## Güç Seviyesini Ayarlama

Telsizinizin güç ayarını ayrı her Connect Plus bölgesi için yüksek ya da düşük olarak belirleyebilirsiniz.

Yüksek ayarı, bulunduğunuz yerden uzak bir mesafede bulunan yüksek bölgelerle Connect Plus kipinde iletişim kurmanızı sağlar. Düşük ayarı, yakın çevredeki yüksek bölgelerle Connect Plus kipinde iletişim kurmanızı sağlar.

Programlanmış **Güç Seviyesi** düğmesine basın ile iletişim güç seviyesini yüksek ve düşük olarak değiştirin.

Telsiz menüsü aracılığıyla bu özelliğe erişmek için aşağıda açıklanan prosedürü izleyin.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Güç seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak istenen ayar ögesine gidin ve seçmek için  düğmesine basın. ✓ seçili ayarın yanında görüntülenir. İsteddiğiniz zaman Giriş ekranına dönmek için  düğmesine uzun basın. Ekran önceki menüye döner.

## Ekran Kipini Değiştirme

Telsiz ekran kipini ihtiyaç duyduğunuz şekilde Gündüz ya da Gece olarak değiştirebilirsiniz. Bu değişim ekranın renk paletini etkiler.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Ekran seçeneğine gidin ve seçmek için  düğmesine basın. Ekran Gündüz Kipi ve Gece Kipi bilgileri görüntülenir.

5  ya da  düğmesine basarak istenen ayara gidin ve etkinleştirmek için  düğmesine basın. ✓ Seçili ayarın yanında simgesi görüntülenir.

## Ekran Parlaklığını Ayarlama

Telsizinizin ekran parlaklığını istediğiniz şekilde ayarlayabilirsiniz.

### NOT:

Ekran parlaklığı Oto Parlaklık etkin olduğunda ayarlanamaz.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak Ekran seçeneğine gidin ve seçmek için  düğmesine basın.

- 5  ya da  düğmesine basarak Parlaklık seçeneğine gidin ve seçmek için  düğmesine basın.  
Ekranında bir ilerleme çubuğu görüntülenir.

- 6  düğmesine basarak ekran parlaklığını azaltın veya  düğmesine basarak ekran parlaklığını artırın. 1'den 8'e kadar olan ayarlardan birini seçin.  
Girişinizi onaylamak için  düğmesine basın.

## Giriş Ekranını Açma ve Kapatma

Gerektiğinde Giriş Ekranını etkinleştirebilir ve devre dışı bırakabilirsiniz.

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Ekran seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak Giriş Ekranı seçeneğine gidin ve seçmek için  düğmesine basın.

6 Giriş Ekranını etkinleştirmek/devre dışı bırakmak için  düğmesine basın.

Ekranı, Etkin yazısının yanında ✓ ögesi gösterilir. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Dil

Telsizinizin ekranını istediğiniz dile ayarlayabilirsiniz.

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Diller seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak istenen dile gidin ve etkinleştirmek için  düğmesine basın. Seçili dilin yanında ✓ simgesi görüntülenir.

## LED Göstergesini Açma ve Kapatma

Gerektiğinde, LED Göstergesini etkinleştirebilir ya da devre dışı bırakabilirsiniz.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak LED Göstergesi seçeneğine gidin ve seçmek için  düğmesine basın.

- 5 LED Göstergesini etkinleştirmek/devre dışı bırakmak için  düğmesine basın.  
Ekranında, Etkin yazısının yanında ✓ ögesi gösterilir. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Kablo Türü Seçme

Telsizinizin kullandığı kablo türünü seçebilirsiniz.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Kablo Türü seçeneğine gidin ve seçmek için  düğmesine basın.

- 5 Geçerli kablo türü  simgesi ile gösterilir.

## Sesli Anons

Bu özellik, telsizin kullanıcının biraz önce geçerli Bölge ya da Kanal seçmiş olduğunu veya programlanabilir düğmeye bastığını sesli bir şekilde bildirmesini sağlar. Bu sesli gösterge, müşterinin kendi ihtiyaçlarına göre isteğe uyarlanabilir. Bu özellik, genellikle ekran üzerinde o an görünen içeriğin okunamadığı zor koşullarda kullanışlıdır.

- 1  ile menüye erişim düğmesine basın.

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Sesli Anons seçeneğine gidin ve seçmek için  düğmesine basın.

Belirlenen seçeneği değiştirmek için veya düğmelerini de kullanabilirsiniz.

- 5 Aşağıdakilerden birini yapın:

-  düğmesine basarak Sesli Anons özelliğini etkinleştirin. Ekranda, Etkin yazısının yanında  ögesi gösterilir.
-  düğmesine basarak Sesli Anons özelliğini devre dışı bırakın. Etkin yazısının yanındaki  ögesi kaybolur.

## Menü Zamanlayıcı

Telsizinizin otomatik olarak Giriş ekranına dönmeden önce menüde ne kadar süre kalacağını belirler.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak Ekran seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 5  ya da  düğmesine basarak Menü Zamanlayıcı seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 6  ya da  düğmesine basarak ilgili ayara gidin ve seçmek için  düğmesine basın.

---

## Kornaları/Işıkları Açma veya Kapatma

Bu özelliğin, bayiniz tarafından telsizinizin arka aksesuar konektörü kullanılarak yüklenmesi gerekir.

Telsiziniz korna ve ışık özelliği aracılığıyla çağrı geldiğini bildirebilir. Aktif hale getirildiğinde, gelen çağrı aracınızın kornasını çalar ve ışıklarını yakar.

- 1 Aşağıdakilerden birini yapın:
    - Kornalar ve ışık özelliğini açmak veya kapatmak için programlanmış **Kornalar/Işıklar** düğmesine basın. Aşağıdaki adımları atlayın.
    -  ile menüye erişim düğmesine basın.
-

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Kornalar/Işıklar seçeneğine gidin ve seçmek için  düğmesine basın.

5 Kornalar/Işıklar özelliğini etkinleştirmek/devre dışı bırakmak için  düğmesine basın. Ekranda, Etkin yazısının yanında ✓ ögesi gösterilir. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Çift Düğme İşlemi Tercihini Ayarlama

Telsizinizin **Ses/Kanal Düğmesi** çift amaçlıdır. Çift amaçlı seçeneğini devre dışı bırakırsanız düğme sadece Ses Düğmesi olarak çalışır.

1  ile menüye erişin .

2  ya da  ile Yardımcı Programlar'a gidin ve seçmek için  düğmesine basın.

3  ya da  ile Telsiz Ayarları'na gidin ve seçmek için  düğmesine basın.

4  ya da  ile Çift Düğme'ye gidin ve seçmek için  düğmesine basın.

5 Ekranda Volume Only (Sadece Ses) ve Volume & Ch (Ses ve Kn) yazısı görüntülenir.  ya da 

ile istenen ayara gidin ve seçmek için  düğmesine basın.

Seçili ayarın yanında  simgesi görüntülenir.  
Ekran önceki menüye döner.

## Dijital Mikrofon OKK (Mik OKK-D)

Bu özellik, dijital sistemde yayın yaparken telsizinizi mikrofon kazancını otomatik olarak kontrol eder. Yüksek sesi baskılayarak veya yumuşak sesi bir ön ayar değerine göre artırarak tutarlı bir ses elde edilmesini sağlar.

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz

Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Mik OKK-D seçeneğine gidin ve seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  düğmesine basarak **Mik OKK-D** seçeneğini etkinleştirin. Ekranda **Etkin** ifadesinin yanında  simgesi görüntülenir.
-  düğmesine basarak **Mik OKK-D** seçeneğini devre dışı bırakın.  simgesi, **Etkin** ifadesinin yanından kaybolur.

## Akıllı Ses

Telsiziniz, tüm sabit ve sabit olmayan gürültü kaynakları dahil, ortamdaki arka plan gürültüsünün üstesinden gelmek

için ses seviyesini otomatik olarak ayarlayabilir. Bu özellik, Yalnız Alıcıya Özgü bir özelliktir ve ses yayını etkilemez.

- 1  ile menüye erişim düğmesine basın.

Telsiz Kontrolü	Adımlar
Menü	<p>a  ile menüye erişim düğmesine basın.</p> <p>b  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.</p> <p>c  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.</p>

## Telsiz Adımlar Kontrolü

- d  ya da  düğmesine basarak Akıllı Ses seçeneğine gidin ve seçmek için  düğmesine basın.
-  **NOT:** Belirlenen seçeneği değiştirmek için veya düğmelerini de kullanabilirsiniz.
- e Aşağıdakilerden birini yapın:
- Akıllı Ses özelliğini etkinleştirmek için  düğmesine basın. Ekranda, Etkin yazısının yanında  ögesi gösterilir.
  - Akıllı Ses özelliğini devre dışı bırakmak için 

Telsiz Kontrolü	Adımlar
	düğmesine basın. Etkin yazısının yanındaki ✓ simgesi kaybolur.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Akıllı Ses seçeneğine gidin ve seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

- Akıllı Ses özelliğini etkinleştirmek için  düğmesine basın. Ekranda, Etkin yazısının yanında ✓ ögesi gösterilir.
- Akıllı Ses özelliğini devre dışı bırakmak için  düğmesine basın. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Akustik Geri Besleme Supresörü Özelliğini Açma ve Kapatma

Bu özellik, gelen çağrılardaki akustik geri beslemeyi en aza indirmenizi sağlar.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

- 3  ya da  düğmesine basarak Telsiz Ayarları seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak AF Supresörü seçeneğine gidin ve seçmek için  düğmesine basın.

Belirlenen seçeneği değiştirmek için veya düğmelerini de kullanabilirsiniz.

- 5 Aşağıdakilerden birini yapın:
- Akustik Geri Besleme Supresörünü etkinleştirmek için  düğmesine basın. Ekranda, Etkin yazısının yanında ✓ ögesi gösterilir.
  - Akustik Geri Besleme Supresörünü devre dışı bırakmak için  düğmesine basın. Etkin yazısının yanındaki ✓ simgesi kaybolur.

## GNSS Özelliğini Açma veya Kapatma

Küresel Navigasyon Uydu Sistemi (GNSS), telsizin yerini tam olarak tespit eden bir uydu navigasyon sistemidir. GNSS; Küresel Konumlandırma Sistemi (GPS) ve Küresel Uydu Seyrüsefer Sistemi'ni (GLONASS) içinde barındırır.

### NOT:

Belirli telsiz modellerinde GPS ve GLONASS bulunabilir. GNSS kümelenmesi, CPS kullanılarak yapılandırılır. Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

- 1 Aşağıdakilerden birini yapın:
- Özelliği açmak veya kapatmak için programlanmış **GNSS** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak GNSS

seçeneğine gidin. Seçmek için  düğmesine basın.

5  düğmesine basarak GNSS özelliğini etkinleştirin veya devre dışı bırakın.

Etkinleştirilmişse Etkin yazısının yanında  simgesi görüntülenir

Devre dışı bırakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.

GNSS bilgilerinin alınması hakkında ayrıntılı bilgi için [GNSS Bilgilerini Kontrol Etme sayfa 354](#) bölümüne bakın.

## Genel Telsiz Bilgilerine Erişme

Telsiziniz aşağıdaki bilgileri içerir:

- Batarya
- Eğilme Derecesi (İvme Ölçer)
- Telsiz Model Numarası Dizini
- Opsiyon Kartı Kablosuz (OTA) Codeplug CRC
- Saha Numarası
- Saha Bilgileri
- Telsiz Diğer Adı ve Kimliği
- Ürün Yazılımı ve Codeplug Sürümleri
- GNSS Bilgileri

İstedığınız zaman önceki ekrana dönmek için  düğmesine basın veya Giriş ekranına dönmek için  düğmesine uzun basın. Telsiz, faaliyetsizlik sayacının süresi dolduğunda geçerli ekrandan çıkar.

## Telsiz Model Numarası Dizinini Kontrol Etme

Bu dizin numarası, telsizinizin modeline özel donanımı belirtir. Telsiz sistem yöneticiniz, telsiziniz için yeni bir

Opsiyon Kartı Codeplug dosyası hazırlarken bu numarayı isteyebilir.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak Model Dizini seçeneğine gidin ve seçmek için  düğmesine basın.  
Ekranında, Model Numarası Dizini görüntülenir.

## Opsiyon Kartı OTA Codeplug Dosyasının CRC'sini Kontrol Etme

Telsiz sistem yöneticiniz Opsiyon Kartı OTA Codeplug Dosyası CRC'sini (Döngüsel Artıklık Denetimi) görüntülemenizi isterse aşağıdaki talimatları uygulayın. Bu menü seçeneği yalnızca Opsiyon Kartı en son codeplug güncellemesini kablosuz olarak aldıysa görüntülenir.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak OB OTA

CPnc seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranında bazı harfler ve sayılar gösterilir. Bu bilgileri telsiz sistem yöneticinize tam gösterildiği gibi iletin.

## Saha Kimliğini (Saha Numarası) Görüntüleme

### NOT:

Şimdilik herhangi bir sahaya kayıtlı değilseniz ekranda **Kayıtlı Değil** yazar.

Telsiz, Connect Plus sahasına kaydolurken Saha Kimliğini kısa süreliğine gösterir. Kayıt işleminden sonra, telsiz genellikle Saha numarasını göstermez. Kayıtlı Saha numarasını görüntülemek için şunları yapın:

1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar

seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz

Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Saha

Numarası seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranında, Ağ Kimliği ve Saha Numarası görüntülenir.

## Saha Bilgilerini Kontrol Etme

### NOT:

Şimdilik herhangi bir sahaya kayıtlı değilseniz ekranda **Kayıtlı Değil** yazar.

Saha Bilgileri özelliği, servis teknisyenleri için yararlı olabilecek bilgiler sunar. Aşağıdaki bilgilerden oluşur:

- Geçerli Kontrol Kanalı yineleyicisinin yineleyici sayısı
- RSSI: Kontrol Kanalı yineleyicisinden ölçülen son sinyal gücü değeri.
- Kontrol Kanalı yineleyicisi tarafından gönderilen Komşu Listesi (virgüllerle ayrılmış beş rakam).

Bu özelliği kullanmanız istendiğinde lütfen görüntülenen bilgileri ekranda görüldüğü şekilde bildirin.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Saha

Bilgileri seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranda Saha Bilgileri görüntülenir.

## Telsiz Kimliğini Kontrol Etme

Bu özellik, telsizin kimliğini görüntüler.

Telsiz ekranı aracılığıyla bu özelliğe erişmek için aşağıda açıklanan prosedürü izleyin.

1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Kimlik No bölümüne girin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın. Ekranda, telsiz kimliği görüntülenir.

### Ürün Yazılımı Sürümünü ve Codeplug Sürümünü Kontrol Etme

Telsizinizdeki ürün yazılımının sürümünü görüntüler.

- 1  ile menüye erişim düğmesine basın.
- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Sürümler seçeneğine gidin ve seçmek için  düğmesine basın. Görüntüleme listesinde aşağıdaki bilgiler yer alır:
- (Telsiz) Ürün Yazılımı Sürümü
  - (Telsiz) Codeplug Sürümü
  - Opsiyon Kartı Ürün Yazılımı Sürümü
  - Opsiyon Kartı Frekans Dosyası Sürümü
  - Opsiyon Kartı Donanım Sürümü
  - Opsiyon Kartı Codeplug Sürümü

### Güncellemeleri Kontrol Etme

Connect Plus bazı dosyaları (Opsiyon Kartı Codeplug Dosyası, Ağ Frekans Dosyası ve Opsiyon Kartı Ürün Yazılımı Dosyası) Kablosuz Olarak (OTA) güncelleme özelliği sağlar.

#### NOT:

Bu özelliğin sizin telsizinizde etkin olup olmadığını öğrenmek için satıcınıza veya ağ yöneticinize başvurun.

Tüm ekranlı Connect Plus telsizlerinin mevcut Opsiyon Kartı OTA Codeplug CRC'sini, Frekans Dosyası sürümünü veya Opsiyon Kartı ürün yazılımı dosya sürümünü bir menü seçeneğinden gösterme özelliği vardır. Ayrıca, kablosuz dosya aktarımı özelliği etkinleştirilmiş ekranlı telsizler "bekleyen dosyanın" sürümünü görüntüleyebilir. "Bekleyen dosya", Connect Plus telsizinin sistem mesajları aracılığıyla tanıdığı ancak dosya paketlerinin tümünü henüz toplamadığı bir Frekans Dosyası veya Opsiyon Kartı ürün yazılımı dosyasıdır. Ekranlı bir Connect Plus telsizinde bekleyen dosya varsa menü şu seçenekleri sunar:

- Bekleyen dosyanın sürüm numarasını görme.
- Şimdiye kadar toplanan paketlerin yüzdesini görme.
- Connect Plus telsizinden dosya paketlerini toplamaya devam etmesini isteme.

Telsiz, Connect Plus kablosuz (OTA) dosya aktarımı için etkinleştirilmişse telsizin kullanıcıya önceden bilgi vermeden bir dosya aktarımına otomatik olarak katıldığı zamanlar olabilir. Telsiz dosya paketlerini toplarken, LED kırmızı renkte hızla yanıp söner ve telsizin Giriş Ekranındaki durum çubuğunda Yüksek Hacimli Veri simgesi görüntülenir.

#### NOT:

Connect Plus telsizi, dosya paketi toplama ve çağrı alma işlemlerini aynı anda yapamaz. Dosya aktarımını iptal etmek istiyorsanız **PTT** düğmesine basın ve bırakın. Bunu yapmak, telsizin seçilen Kişi Adında bir çağrı istemesine neden olur ve işlem daha sonra devam edene dek o telsizin dosya aktarımı da iptal edilir.

Dosya aktarımı işlemi yeniden başlatabilecek birkaç durum vardır. İlk örnek tüm kablosuz (OTA) dosya aktarımı tipleri için geçerlidir. Diğer örnekler, yalnızca Ağ Frekans Dosyası ve Opsiyon Kartı Ürün Yazılımı Dosyası için geçerlidir:

- Telsiz sistem yöneticisi, kablosuz (OTA) dosya aktarımını yeniden başlatır.
- Opsiyon Kartının önceden tanımlanmış zamanlayıcısının sona ermesi, Opsiyon Kartının otomatik olarak paket toplama işlemini yeniden başlatmasına neden olur.
- Zamanlayıcının süresi sona ermemiştir ancak telsiz kullanıcısı, menü seçeneği üzerinden dosya aktarımının devam etmesini ister.

Connect Plus telsizinin tüm dosya paketlerini indirmeyi bitirdikten sonra, yeni alınan bu dosyaya yükseltme

uygulaması gerekir. Ağ Frekans Dosyası için bu, otomatik bir işlemdir ve telsizin sıfırlanmasını gerektirmez. Opsiyon Kartı Codeplug Dosyası için bu, Opsiyon Kartı yeni codeplug bilgilerini yükleyip ağ sahasını geri alırken hizmetin kısa süreliğine kesintiye uğramasına neden olan otomatik bir işlemdir. Telsizin yeni Opsiyon Kartı ürün yazılımı dosyasına ne kadar hızlı yükseltildiği, telsizin satıcı veya sistem yöneticisi tarafından nasıl yapılandırıldığına bağlıdır. Telsiz ya tüm dosya paketlerini topladıktan hemen sonra yükseltilir ya da kullanıcının telsizi bir sonraki açışı beklenir.

### NOT:

Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

Yeni Opsiyon Kartı ürün yazılımı dosyasına yükseltme işlemi birkaç saniye sürer ve Connect Plus Opsiyon Kartının telsizi sıfırlamasını gerektirir. Yükseltme başladıktan sonra, işlem tamamlanana kadar telsiz kullanıcısı çağrı yapamaz veya alamaz. İşlem sırasında, telsiz ekranında kullanıcının telsizi kapatmaması istenir.

## Ürün Yazılımı Dosyası

Aşağıdaki bölümde telsizin ürün yazılımıyla ilgili bilgiler verilmektedir.

## Ürün Yazılımı Güncel

### NOT:

Opsiyon Kartı ürün yazılımı güncel değilse (ve telsiz en son Opsiyon Kartı ürün yazılımı dosya sürümünü kısmen toplamışsa) telsizde SÜRÜM, % Alındı ve İndirme ek seçeneklerinin bulunduğu bir liste görüntülenir.

1

ile menüye erişim düğmesine basın.

2

ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3

ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

4

ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.

- 5  ya da  düğmesine basarak Ürün Yazılımı seçeneğine gidin ve seçmek için  düğmesine basın.
- Ekranında, Ürün Yazılımı Güncel ifadesi gösterilir.

## Bekleyen Ürün Yazılımı – Sürüm

- 1  ile menüye erişin düğmesine basın.
- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.

- 5  ya da  düğmesine basarak Ürün Yazılımı seçeneğine gidin ve seçmek için  düğmesine basın.

- 6  ya da  düğmesine basarak Sürüm seçeneğine gidin ve seçmek için  düğmesine basın.
- Bekleyen bir Opsiyon Kartı ürün yazılımı dosyası varsa ekranda bekleyen ürün yazılımının sürüm numarası görüntülenir.
- Bekleyen bir Opsiyon Kartı ürün yazılımı dosyası varsa ekranda Aygıt Yazı Güncel bilgisi görüntülenir.

## Bekleyen Ürün Yazılımı – % Alındı

- 1  ile menüye erişin düğmesine basın.

---

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 4  ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 5  ya da  düğmesine basarak Ürün Yazılımı seçeneğine gidin ve seçmek için  düğmesine basın.

---

- 6  ya da  düğmesine basarak % Alındı seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranında, o ana dek toplanmış ürün yazılımı dosya paketlerinin yüzdesi görüntülenir.

### NOT:

%100 oranındayken ürün yazılımı yükseltme işlemini başlatmak için telsizin kapatılıp açılması gerekir.

## Bekleyen Ürün Yazılımı – İndir

Connect Plus telsizinde daha önceden kısmi bir OTA Opsiyon Kartı Ürün Yazılımı Dosyası Aktarımı kaldıysa iç zamanlayıcı süresi sona erdiğinde birim, otomatik olarak dosya aktarımı işlemine (halen sürüyorsa) yeniden katılır. Bu iç zamanlayıcı süresi sona ermeden önce birimin devam eden Opsiyon Kartı Ürün Yazılımı Dosyası aktarımına yeniden katılmasını istiyorsanız aşağıda açıklandığı gibi İndir seçeneğini kullanın.

- 1  ile menüye erişin düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak Ürün Yazılımı seçeneğine gidin ve seçmek için  düğmesine basın.

6  ya da  düğmesine basarak İndirme seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranı aşağıdaki seçenekler görüntülenir:

[Geribildirim Gönder](#)

İndirme İşlemi Kullanılabilir	İndirme İşlemini Başlat
İndirilecek Öğe Yok	İndirilecek öğe yok

7 Aşağıdakilerden birini yapın:

- İndirme işlemini başlatmak için Evet seçeneğini belirleyin ve  ögesine basın.
- Bir önceki menüye geri dönmek için Hayır seçeneğini belirleyip  düğmesine basın.

## Frekans Dosyası

Aşağıdaki bölümde telsizin frekans dosyası ile ilgili bilgiler verilmektedir.

## Frekans Dosyası Güncel

### NOT:

Frekans Dosyası güncel değilse (ve telsiz en son frekans dosyası sürümünü kısmen toplamışsa) telsizde Sürüm, %Alındı ve İndirme ek seçeneklerinin bulunduğu bir liste görüntülenir.

- 1  ile menüye erişin düğmesine basın.
- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.
- 4  ya da  düğmesine basarak Frekans seçeneğine gidin ve seçmek için  düğmesine basın.  
Ekranında Frek. Dosyası Güncel bilgisi görüntülenir.

## Frekans Dosyası Bekleniyor – Sürüm

- 1  ile menüye erişin düğmesine basın.

- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.
- 4  ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.
- 5  ya da  düğmesine basarak Frekans seçeneğine gidin ve seçmek için  düğmesine basın.

- 6  ya da  düğmesine basarak Sürüm seçeneğine gidin ve seçmek için  düğmesine basın.

Bekleyen bir Frekans Dosyası varsa ekranda bekleyen Frekans Dosyasının sürüm numarası görüntülenir.

### Frekans Dosyası Bekleniyor – Alınma Oranı

- 1  ile menüye erişim düğmesine basın.
- 2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

- 4  ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.

- 5  ya da  düğmesine basarak % Alındı seçeneğine gidin ve seçmek için  düğmesine basın.

Ekranda, şu ana dek toplanmış frekans dosyası paketlerinin yüzdesi görüntülenir.

### Frekans Dosyası Bekleniyor – İndir

Connect Plus telsizinde daha önceden kısmi bir OTA Ağ Frekans Dosyası Aktarımı kaldıysa iç zamanlayıcı süresi sona erdiğinde birim otomatik olarak dosya aktarımı işlemine yeniden katılır (halen devam ediyorsa). Bu iç zamanlayıcı süresi sona ermeden önce birimin devam eden Ağ Frekans Dosyası aktarımına yeniden katılmasını istiyorsanız aşağıda açıklandığı gibi İndir seçeneğini kullanın.

- 1  ile menüye erişim düğmesine basın.

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

4  ya da  düğmesine basarak Güncellemeler seçeneğine gidin ve seçmek için  düğmesine basın.

5  ya da  düğmesine basarak Frekans seçeneğine gidin ve seçmek için  düğmesine basın.

6  ya da  düğmesine basarak İndirme seçeneğine gidin ve seçmek için  düğmesine basın.

İndirme İşlemi Şu Anda Kullanılmıyor	İndirilecek öğe yok
İndirme İşlemi Şu Anda Kullanılabilir	İndirme İşlemini Başlat

7 Aşağıdakilerden birini yapın:

- İndirme işlemini başlatmak için Evet seçeneğine basın.
- Bir önceki menüye geri dönmek için Hayır seçeneğine basın.

## GNSS Bilgilerini Kontrol Etme

Telsizinizde aşağıdaki gibi GNSS bilgileri gösterilir:

- Enlem
- Boylam

- Rakım
- Yön
- Hız
- Yatay Duyarlılık Kaybı (HDOP)
- Uydular
- Sürüm

1  ile menüye erişin düğmesine basın.

---

2  ya da  düğmesine basarak Uygulamalar seçeneğine gidin ve seçmek için  düğmesine basın.

---

3  ya da  düğmesine basarak Telsiz Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

---

4  ya da  düğmesine basarak GNSS Bilgisi seçeneğine gidin ve seçmek için  düğmesine basın.

---

5  ya da  düğmesine basarak istenen öğeye gidin ve seçmek için  düğmesine basın. Ekranda istenen GNSS bilgileri görüntülenir.

---

GNSS hakkında daha fazla bilgi için bkz. [GNSS Özelliğini Açma veya Kapatma sayfa 341](#).

Bu sayfa özellikle boş bırakılmıştır.

## Diğer Sistemler

Bu sistemde telsiz kullanıcılarına açık olan özellikler bu bölümde yer alır.

### Bas Konuş Düğmesi

Bas Konuş (**PTT**) düğmesi iki temel amaca hizmet eder:

- **PTT** düğmesi, çağrı yapılırken telsizin çağrıdaki diğer telsizlere yayın göndermesini sağlar. **PTT** düğmesine basıldığında mikروفon etkin hale gelir.
- **PTT** düğmesi, çağrı yapılmadığında yeni bir çağrı yapmak için kullanılır .

Konuşmak için **PTT** düğmesine uzun basın. Dinlemek için **PTT** düğmesini bırakın.

Konuşma İzni Tonu veya PTT Yan Tonu  etkinse konuşmadan önce kısa uyarı tonunun bitmesini bekleyin.

 Telsizin üzerinde Kanal Boş Göstergesi özelliği (satıcınız tarafından programlanır) etkinse hedef telsiz (çağrınızı alan telsiz) **PTT** düğmesini bıraktığı anda kısa bir uyarı tonu duyarsınız. Bu ton kanalın yanıt vermeniz için boş olduğunu gösterir.

 Çağrınız kesilirse sürekli bir Konuşma Yasak Tonu duyarsınız. Sürekli bir Konuşma Yasak Tonu duyuyorsanız **PTT** düğmesini bırakmanız gerekir.

### Programlanabilir Düğmeler

Bir düğmeye basılma süresine bağlı olarak, satıcınız programlanabilir düğmeleri telsiz işlevlerinin kısayolları olarak programlayabilir.

#### Kısa basma

Basma ve hızlıca bırakma.

#### Uzun basma

Basma ve programlanan süre kadar basılı tutma.

#### NOT:

**Acil durum** düğmesinin programlanmış süresi hakkında daha fazla bilgi için bkz. [Acil Durum İşlemi sayfa 435](#).

### Atanabilir Telsiz İşlevleri

Aşağıdaki telsiz işlevleri, programlanabilir düğmelere atanabilir.

#### Ses Ortamı

Kullanıcının telsizin çalışacağı ortamı seçmesine izin verir.

### Ses Profilleri

Kullanıcının tercih edilen ses profilini seçmesine izin verir.

### Bluetooth® Ses Anahtarı

Ses yönlendirmesini dahili telsiz hoparlörü ya da harici Bluetooth özellikli bir aksesuar olacak şekilde değiştirir.

### Bluetooth Bağlantısı

Bluetooth bulma ve bağlantı kurma işlemini başlatır.

### Bluetooth Bağlantısını Kesme

Telsiziniz ve Bluetooth özellikli cihazınız arasındaki mevcut tüm Bluetooth bağlantılarını keser.

### Bluetooth Bulunabilir

Telsizinizin Bluetooth Bulunabilir Moduna geçmesine olanak sağlar.

### Çağrı Uyarısı

Çağrı Uyarısının gönderilebileceği kişileri seçmeniz için doğrudan kişi listesine ulaşmanızı sağlar.

### Çağrı Yönlendirme

Çağrı Yönlendirmeyi açar veya kapatır.

### Çağrı Kaydı

Çağrı kaydı listesini seçer.

### Kanal Anonsu

Geçerli kanal için bölge ve kanal anonsu sesli mesajlarını çalar.

### Kişiler

Kişi listesine doğrudan erişim sağlar.

### Acil Durum

Programlamaya bağlı olarak, acil durum başlatır veya iptal eder.

### Harici Genel Yayın (PA)

Bağlı PA hoparlör amplifikatörü ile telsizin dahili PA sistemi arasındaki ses yönlendirmesini değiştirir.

### İç Konum

İç Konum özelliğini açar veya kapatır.

### Akıllı Ses

Akıllı sesi açar veya kapatır.

### Manuel Çevirme

Bir abone kimliği tuşlayarak Özel Çağrı başlatır.

### Manuel Saha Dolaşımı<sup>5</sup>

Manuel saha araması başlatır.

<sup>5</sup> Capacity Plus için geçerli değildir.

**Mik AGC**

Dahili mikrofonun otomatik kazanç kontrolünü (AGC) açar ya da kapatır.

**İzleme**

Seçili kanaldaki faaliyetleri izler.

**Bildirimler**

Bildirimler listesine doğrudan erişim sağlar.

**İstenmeyen Kanal Silme<sup>5</sup>**

Seçili Kanal haricinde, istenmeyen bir kanalı tarama listesinden geçici olarak kaldırır. Seçili Kanal, kullanıcı tarafından seçilen, taramanın başlatıldığı bölge veya kanal kombinasyonudur.

**Tek Tuşla Erişim **

Doğrudan önceden tanımlanmış bir Özel Çağrı, Telefon veya Grup Çağrısı, Çağrı Uyarısı, Hızlı Metin mesajı ya da Ev Dönüşürme başlatır.

**Opsiyon Kartı Özelliği**

Opsiyon kartının etkin olduğu kanallar için opsiyon kartı özelliklerini açar ya da kapatır.

**Devamlı İzleme<sup>5</sup>**

İşlev devre dışı bırakılana kadar seçili kanalın tüm telsiz trafiğini izler.

**Telefon **

Telefondaki Kişi listesine doğrudan erişim sağlar.

**Gizlilik **

Gizlilik özelliğini açar veya kapatır.

**Genel Yayın (PA)**

Telsizin dahili PA sistemini kapatır veya açar.

**Telsiz Diğer Adı ve Kimliği**

Telsiz adı ve kimliğini gösterir.

**Telsiz Kontrolü **

Bir telsizin bir sistem içinde etkin olup olmadığını belirler.

**Telsiz Devre Dışı **

Bir hedef telsizin uzaktan devre dışı bırakılmasını sağlar.

**Telsiz Etkin **

Bir hedef telsizin uzaktan etkinleştirilmesini sağlar.

**Uzaktan İzleme**

Bir hedef telsizin mikrofonunu bu telsize hiçbir gösterge vermeden açar.

**Yineleyici/Talkaround<sup>5</sup>**

Yineleyici kullanma ile başka bir telsizle doğrudan iletişim kurma arasında seçim yapar.

### Ana Kanalı Sıfırlama

Yeni bir ana kanal ayarlar.

### Ana Kanal Hatırlatıcısı Sessize Alma

Ana Kanal Hatırlatıcısı sessize al.

### Tarama<sup>6</sup>

Taramayı açar veya kapatır.

### Saha Bilgileri

Capacity Plus - Çoklu Saha için geçerli saha adı ve kimliğini görüntüler.

Sesli Anons etkinleştirildiğinde geçerli saha için saha anonsu sesli mesajlarını çalar.

### Saha Kilidi<sup>5</sup>

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahayla birlikte diğer sahaları da arar.

### Telemetri Kontrolü

Yerel ya da uzak telsiz üzerinde Çıkış Pinini kontrol eder.

### Metin Mesajı

Metin mesajı menüsünü seçer.

### Yayın Kesme Uzaktan Devre Dışı Bırakma

Kanalı boşaltmak için devam eden kesilebilir bir çağrıyı durdurur.

### Titrek Ses İyileştirme

Titrek ses iyileştirmeyi açar veya kapatır.

### Sesli Anons Açık/Kapalı

Sesli Anonsu açar veya kapatır.

### Eller Serbest Kullanım (VOX)

VOX'u açar veya kapatır.

### Wi-Fi

Wi-Fi özelliğini açar veya kapatır.

### Bölge Seçimi

Bölge listesinden seçim yapılmasını sağlar.

## Atanabilir Ayarlar ya da Uygulama İşlevleri

Aşağıdaki telsiz ayarları veya uygulama işlevleri programlanabilir düğmelere atanabilir.

### Tonlar/Uyarılar

Tüm tonları ve uyarıları açar veya kapatır.

<sup>6</sup> Capacity Plus - Tek Saha için geçerli değildir.

### Arka Aydınlatma

Ekran arka aydınlatmasını açar veya kapatır.

### Kanal Yukarı/Aşağı

Programlamaya bağlı olarak, kanalı önceki ya da sonraki kanala değiştirir.

### Ekran Kipi

Gündüz/gece ekran kipini açar ya da kapatır.

### Güç Seviyesi

Güç seviyesini yüksek ile düşük ayarları arasında değiştirir.

## Programlanmış İşlemlere Erişim

Telsizinizde programlanmış işlemlere erişmek için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış düğmeye basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

- 2 Menü işlevi için  veya  düğmesine ve bir işlevi seçmek veya bir alt menüye girmek için  düğmesine basın.

- 3 Aşağıdakilerden birini yapın:

- Önceki ekrana dönmek için  düğmesine basın.
- Giriş ekranına dönmek için  düğmesine uzun basın.

Telsiziniz, belirli bir süre işlem yapılmadığında otomatik olarak menüden çıkar ve Giriş ekranına döner.

Tuş takımlı mikrofon sisteminde de Menü Gezinme Düğmeleri mevcuttur. Bkz. [Tuş Takımlı Mikrofon Düğmeleri sayfa 43](#)

## Durum Göstergeleri

Bu bölümde, telsizde kullanılan durum göstergeleri ve ses tonları açıklanmaktadır.

## Simgeler

Telsizinizin Likit Kristal Ekranı (LCD) telsizin durumunu, metin girişlerini ve menü girişlerini gösterir.

**Tablo 9: Ekran Simgeleri**

Aşağıda telsiz ekranının üst tarafındaki durum çubuğunda görülen simgeler yer almaktadır. Simgeler, görünüm veya kullanım sırasıyla en soldan başlayarak dizilmiştir ve kanala özeldir.

	<p><b>Bluetooth Bağlı</b> Bluetooth özelliği etkindir. Uzak bir Bluetooth cihazı bağlı olduğunda bu simge yanmaya devam eder.</p>
	<p><b>Bluetooth Cihazı Bağlı Değil</b> Bluetooth özelliği etkindir; ancak uzaktan bağlı herhangi bir Bluetooth cihazı yoktur.</p>
	<p><b>Çağrı Kaydı</b> Telsiz çağrı kaydı.</p>

*Tablonun devamı...*

	<p><b>Kişi</b> Telsiz kişileri kullanılabilir.</p>
	<p><b>Acil Durum</b> Telsiz, Acil Durum kipindedir.</p>
	<p><b>Esnek Alma Listesi</b> Esnek alma listesi etkindir.</p>
	<p><b>GNSS Kullanılabilir</b>  GNSS özelliği etkindir. Bu simge, sabit bir pozisyona geçildiği durumlarda yanmaya devam eder.</p>
	<p><b>GNSS Kullanılmıyor</b>  GNSS özelliği etkindir ancak uydudan veri almamaktadır.</p>
	<p><b>Yüksek Hacimli Veri</b> Telsiz yüksek hacimli veri almaktadır ve kanal meşguldür.</p>

*Tablonun devamı...*

	<b>İç Konum Kullanılabilir<sup>7</sup></b> İç konum durumu açıktır ve kullanılabilir.
	<b>İç Konum Kullanılamaz<sup>7</sup></b> İç konum durumu açıktır fakat Bluetooth devre dışı bırakıldığı veya İşaretleme Tarama işlevi Bluetooth tarafından askıya alındığı için kullanılamaz.
	<b>Mesaj</b> Gelen mesajlar.
	<b>İzleme</b> Seçili kanal izleniyordur.
	<b>Sessize Alma Modu</b> Sessiz Kipi etkinleştirilir ve hoparlörün sesi kapatılır.
	<b>Bildirim</b> Bildirim Listesinde bir veya daha fazla cevapsız olay vardır.

Tablonun devamı...

	<b>Opsiyon Kartı</b> Opsiyon Kartı etkindir. (Sadece Opsiyon kartı özelliği etkin modellerde.)
	<b>Opsiyon Kartı Devre Dışı</b> Opsiyon Kartı devre dışıdır.
	<b>Kablosuz Programlama Gecikme Zamanlayıcı</b> Telsizin otomatik olarak yeniden başlatılmasına kalan süreyi belirtir.
	<b>Alınan Sinyal Gücü Göstergesi (RSSI)</b> Ekranda görünen çubuk sayısı, telsiz sinyalinin gücünü gösterir. Dört çubuk en güçlü sinyal seviyesini gösterir. Bu simge sadece sinyal alınırken görüntülenir.
	<b>Yanıt Engelleme</b> Yanıt Engelleme etkindir.

Tablonun devamı...

<sup>7</sup> Yalnızca en güncel yazılım ve donanıma sahip modeller için geçerlidir.

	<b>Sadece Zil</b> Zil sesi kipi etkindir.
	<b>Tarama<sup>8</sup></b> Tarama özelliği etkindir.
	<b>Tarama - 1. Öncelik<sup>8</sup></b> Telsiz ayarlanmış kanalda/grupta Öncelik 1 olarak etkinlik belirler.
	<b>Tarama - 2. Öncelik<sup>8</sup></b> Telsiz ayarlanmış kanalda/grupta Öncelik 2 olarak etkinlik belirler.
	<b>Güvenli</b> Gizlilik özelliği etkindir.
	<b>Oturum Aç</b> Uzak sunucuda telsiz oturumu açılmıştır.

Tablonun devamı...

	<b>Oturumu Kapat</b> Uzak sunucudaki telsiz oturumu kapatılmıştır.
	<b>Sessiz Zil</b> Sessiz zil kipi etkindir.
	<b>Saha Gezinme<sup>9</sup></b> Saha gezinme özelliği etkindir.
	<b>Talkaround<sup>8</sup></b> Yineleyici olmadığında telsiz, doğrudan telsizden telsize iletişim için yapılandırılır.
	<b>Tonlar Devre Dışı</b> Tonlar kapalıdır.
	<b>Güvenli Değil</b> Gizlilik özelliği devre dışıdır.
	<b>Oylamalı Tarama</b> Oylamalı tarama özelliği etkindir.

Tablonun devamı...

<sup>8</sup> Capacity Plus için geçerli değildir.<sup>9</sup> Capacity Plus - Tek Saha için geçerli değildir.

	<b>Wi-Fi Mükemmel<sup>10</sup></b> Wi-Fi sinyali mükemmel.
	<b>Wi-Fi İyi<sup>10</sup></b> Wi-Fi sinyali iyi.
	<b>Wi-Fi Orta<sup>10</sup></b> Wi-Fi sinyali orta.
	<b>Wi-Fi Zayıf<sup>10</sup></b> Wi-Fi sinyali zayıf.
	<b>Wi-Fi Kullanılmıyor<sup>10</sup></b> Wi-Fi sinyali kullanılmıyor.

**Tablo 10: Geliştirilmiş Menü Simgeleri**

Aşağıdaki simgeler, iki seçenek arasında tercih sunan menü öğelerinin yanında ya da iki seçenekli tercih sunan bir alt menü olduğunun işareti olarak görüntülenir.

<sup>10</sup> Yalnızca DM4601e için geçerlidir.

	<b>Onay kutusu (İşaretli)</b> Seçeneğin belirlendiğini gösterir.
	<b>Onay kutusu (Boş)</b> Seçeneğin belirlenmediğini gösterir.
	<b>Koyu Siyah Kutu</b> Alt menü aracılığıyla menü için seçeneğin belirlendiğini gösterir.

**Tablo 11: Bluetooth Cihaz Simgeleri**

Aşağıdaki simgeler cihaz türünü göstermek için Bluetooth özelliği etkin kullanılabilir cihazlar listesinde öğelerin yanında görüntülenir.

	<b>Bluetooth Ses Cihazı</b> Kulaklık gibi Bluetooth özellikli ses cihazları.
	<b>Bluetooth Veri Cihazı</b> Tarayıcı gibi Bluetooth özellikli veri cihazları.

Tablonun devamı...

### Bluetooth Bas-Konuş Cihazı

Yalnızca Bas-Konuş Cihazı (POD) gibi Bluetooth özellikli PTT cihazları.

## Tablo 12: Çağrı Simgeleri

Bir çağrı sırasında ekranda aşağıdaki simgeler görüntülenir. Bu simgeler aynı zamanda, ad ya da kimlik tipini belirtecek şekilde Kişi listesinde de görüntülenir.

### Bluetooth PC Çağrısı

Bir Bluetooth PC Çağrısının sürmekte olduğunu gösterir.

Kişiler listesinde bir Bluetooth PC Çağrısı adını (metin) veya kimliğini (numara) gösterir.

### Sevk Çağrısı

Sevk Çağrısı iletişim tipi, üçüncü taraf bir Yazılı Mesaj Sunucusu aracılığıyla sevk işlemi yapan bilgisayara yazılı mesaj göndermek için kullanılır.

*Tablonun devamı...*

### Grup Çağrısı/Herkese Çağrı

Bir Grup Çağrısı ya da Herkese Çağrının sürmekte olduğunu gösterir.

Kişi listesinde bir grup adını (metin) veya kimliğini (numara) gösterir.

### Özel Çağrı

Bir Özel Çağrının sürmekte olduğunu gösterir. Kişi listesinde bir abonenin adını (metin) ya da kimliğini (numara) gösterir.

### Grup Çağrısı/Herkese Çağrı olarak Telefon Çağrısı

Bir Grup Çağrısı veya Herkese Çağrı olarak Telefon Çağrısının sürmekte olduğunu gösterir.

Kişi listesinde bir grup adını (metin) veya kimliğini (numara) gösterir.

### Özel Çağrı olarak Telefon Çağrısı

Özel Çağrı olarak bir Telefon Çağrısının sürmekte olduğunu gösterir.

Kişi listesinde bir telefon adı (metin) veya kimliğini (numara) gösterir.

**Tablo 13: İş Kartları Simgeleri**

İş Kartı klasöründe ekranda kısa süreliğine aşağıdaki simgeler görüntülenir.

	<b>Tüm İşler</b> Listelenen tüm işleri gösterir.
	<b>Yeni İşler</b> Yeni işleri gösterir.
	<b>Sürüyor</b> İşler iletiliyordur. Bu simge, İş Kartları Gönderme Başarısız veya Başarıyla Gönderildi göstergesinden önce görüntülenir.
	<b>Gönderme Başarısız</b> İşler gönderilememektedir.

Tablonun devamı...

	<b>Başarıyla Gönderildi</b> İşler başarıyla gönderilmiştir.
	<b>1. Öncelik</b> İşlerin Öncelik Seviyesinin 1 olduğunu gösterir.
	<b>2. Öncelik</b> İşlerin Öncelik Seviyesinin 2 olduğunu gösterir.
	<b>3. Öncelik</b> İşlerin Öncelik Seviyesinin 3 olduğunu gösterir.

**Tablo 14: Mini Bilgi Notu Simgeleri**

Aşağıdaki simgeler, bir görevi gerçekleştirmek için yapılan işlemten sonra ekranda kısa bir an için görüntülenir.

	<b>Başarısız Yayın (Olumsuz)</b> İşlem gerçekleştirilememiştir.
	<b>Başarılı Yayın (Olumlu)</b> İşlem başarıyla gerçekleştirilmiştir.

Tablonun devamı...

**Yayın Sürüyor (Geçici)**  
Yayın gönderilmektedir. Bu simge, Başarılı Yayın veya Başarısız Yayın göstergesinden önce görüntülenir.

**Tablo 15: Gönderilenler Simgeleri**

Aşağıdaki simgeler ekranın sağ üst köşesinde Gönderilenler klasöründe görüntülenir.

 ya da 	<p><b>Sürüyor</b> Abone adına ya da kimliğine gidecek yazılı mesaj iletmeyi beklemektedir; gönderildikten sonra da alındı iletisi beklenmektedir.</p> <p>Grup diğer adına ya da kimliğine gidecek yazılı mesaj iletmeyi beklemektedir.</p>
 ya  da	<p><b>Kişisel veya Grup Mesajı Okundu</b> Yazılı mesaj okunmuştur.</p>

Tablonun devamı...

 ya  da	<p><b>Kişisel veya Grup Mesajı Okunmadı</b> Yazılı mesaj okunmamıştır.</p>
 ya da 	<p><b>Gönderme Başarısız</b> Yazılı Mesaj gönderilememiştir.</p>
 ya da 	<p><b>Başarıyla Gönderildi</b> Yazılı mesaj başarılı bir şekilde gönderilmiştir.</p>

## LED Göstergeleri

LED göstergeleri, telsizinizin çalışma durumunu gösterir.

### Yanıp Sönen Kırmızı

Telsiz açıldığında otomatik testi geçememiştir.

Telsiz, bir acil durum yayını almaktadır.

Telsiz düşük pil durumunda yayın yapıyordur.

Otomatik Menzil Transponder Sistemi yapılandırıldıysa telsiz menzil dışına çıkmıştır.

Sessiz Kipi etkindir.

### **Aralıksız Yeşil**

Telsiz açılıyordur.

Telsiz yayın yapıyordur.

Telsiz bir Çağrı Uyarısı veya acil durum yayını göndermektedir.

### **Yanıp Sönen Yeşil**

Telsiz, bir çağrı veya veri alıyordur.

Telsiz, Kablosuz Programlama yayınlarını almaktadır.

Telsiz, kablosuz etkinlik tespit etmektedir.

#### **NOT:**

Bu etkinlik, dijital protokolün doğası nedeniyle telsizin programlanmış kanalını etkileyebilir veya etkilemeyebilir.

Telsiz Capacity Plus'ta kablosuz etkinlik algılarken LED göstergesi olmaz.

### **İki Kez Yanıp Sönen Yeşil**

Telsiz, gizliliği etkinleştirilmiş bir çağrı veya veri alıyordur.

### **Aralıksız Sarı**

Telsiz standart bir kanalı izliyordur.

Telsiz, Bluetooth Bulunabilir Modundadır.

### **Yanıp Sönen Sarı**

Telsiz, etkinlik taraması yapmaktadır.

Telsiz, bir Çağrı Uyarısına yanıt verecektir.

Telsizin Esnek Alma Listesi özelliği etkindir.

Tüm Capacity Plus-Çoklu Saha kanalları meşguldür.

### **İki Kez Yanıp Sönen Sarı**

Telsizde Otomatik Gezinme etkindir.

Telsiz etkin olarak yeni saha aramaktadır.

Telsiz, bir Grup Çağrısı Uyarısına yanıt verecektir.

Telsiz kilitlemiştir.

Telsiz, Capacity Plus'tayken yineleyiciye bağlı değildir.

Tüm Capacity Plus kanalları meşguldür.

## **Tonlar**

Aşağıda, telsiz hoparlörü aracılığıyla duyulan tonlar belirtilmektedir.

Yüksek Perdeli Ton

Düşük Perdeli Ton

## Gösterge Tonları

Gösterge tonları, bir görevi gerçekleştirmek üzere bir işlem yapıldıktan sonra, durumun sesli bildirimini sağlar.

Olumlu Gösterge Tonu

Olumsuz Gösterge Tonu

## Ses Tonları

Ses tonları, telsizin durumu ya da telsizin alınan veriye yanıtı ile ilgili sesli göstergeler sağlar.

### Sürekli Ton

Monoton bir sestir. Durdurulana kadar sürekli ses verir.

### Sürekli Ton

Telsizde yapılan süre ayarına bağlı olarak sürekli ses verir. Ton kendi kendine başlar, durur ve tekrar eder.

### Tekrarlanan Ton

Kullanıcı tarafından durdurulana kadar kendi kendine tekrar eden tek bir tondur.

### Anlık Ton

Telsiz tarafından ayarlanan kısa süre için bir kez ses verir.

## Standart Analog ve Dijital Modlar

Telsizinizdeki her kanal, standart analog veya standart dijital kanal olarak yapılandırılabilir.

Analog ya da dijital kanal arasında seçim yapmak için **Kanal Ayarlayıcı**'yı kullanın.

Dijital moddan analog moda geçildiğinde belirli özellikler kullanılamaz. Dijital özelliklere ilişkin simgeler, gri renkte görünerek bu değişikliği yansıtır. Devre dışı bırakılan özellikler menüde görünmez.

Telsizinizin hem analog hem de dijital modda çalışan özellikleri de vardır. Her özelliğin çalışma şeklindeki küçük farklılıklar telsizinizin performansını **etkilemez**.

**NOT:**

Telsiziniz çift kip tarama sırasında dijital ile analog modlar arasında geçiş yapar. Daha fazla bilgi için bkz. [Tarama sayfa 414](#).

## Simge Bilgileri

Bu yayının tümünde, standart analog veya standart dijital kipte desteklenen veya tuş takımlı bir mikrofonla kullanılabilir hale getirilen özellikleri belirtmek için, açıklanan simgeler kullanılmıştır.

Standart **Yalnız Analog Kip** özelliğini gösterir.

Standart **Yalnızca Dijital Kip** özelliğini gösterir.

Standart analog **ve** dijital modlarda kullanılabilen özellikler için simgelerin ikisi birden **görüntülenmez**.

## IP Saha Bağlantısı

Bu özellik sayesinde telsizinizi, bir İnternet Protokolü (IP) ağı kullanarak farklı mevcut sahalara bağlayıp standart iletişimi tek bir sahanın kapsama alanının ötesine taşıyabilirsiniz. Bu, çok sahalı bir standart moddur.

Telsiz bir sahanın menzilinden diğerinin menziline hareket ettiğinde, çağrılar veya veri iletimlerini göndermek veya almak için yeni sahanın yineleyicisine bağlanır. Bu işlem, ayarlarınıza bağlı olarak otomatik bir şekilde veya elle yapılır.

Bir otomatik saha aramasında telsiz, mevcut sahanın sinyali zayıf olduğunda ya da telsiz mevcut sahada hiçbir sinyal tespit edemediğinde kullanılabilir sahaların tümünü tarar. Telsiz, daha sonra, Alınan Sinyal Güç Göstergesi (RSSI) değeri en güçlü olan yineleyiciye kilitletlenir.

Manuel saha aramada, telsiz o an için menzilde olan gezinme listesindeki bir sonraki sahayı arar, ancak bu saha en güçlü sinyale sahip olmayabilir ve telsiz yineleyiciye kilitletlenir.

**NOT:**

Her kanalda ya Tarama ya da Gezinme etkindir; her ikisi aynı anda etkin olamaz.

Bu özelliğin etkin olduğu kanallar belirli bir gezinme listesine eklenebilir. Telsiz en iyi sahanın yerini saptamak için otomatik gezinme işlemi sırasında gezinme listesindeki kanalları arar. Bir gezinme listesi, seçili kanal dahil en fazla 16 kanalı destekler.

### NOT:

Gezinme listesine manuel olarak giriş ekleyemez ve listeden giriş silemezsiniz. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Capacity Plus - Tek Saha

Capacity Plus - Tek Saha, yüzlerce kullanıcıyı ve 254'e kadar Grubu desteklemek için bir kanal havuzu kullanan MOTOTRBO telsiz sistemi tek saha birleştirme yapılandırmasıdır. Bu özellik, telsizinizin Yineleyici Kipteyken mevcut tüm programlanmış kanallardan verimli bir şekilde yararlanmasına olanak sağlar.

Capacity Plus - Tek Saha'da kullanılmayan özelliklere, programlanabilir düğmelere basarak ulaşmak istediğinizde olumsuz bir gösterge tonu duyarsınız.

Telsiziniz standart dijital kipte, IP Site Connect'te ve Capacity Plus'ta kullanılabilen özelliklere sahiptir. Bununla birlikte, her özelliğin çalışmasındaki küçük farklılıklar telsizinizin performansını etkilemez.

Bu yapılandırmayla ilgili ayrıntılı bilgi almak için satıcınızla ya da sistem yöneticinizle görüşün.

## Capacity Plus - Çoklu Saha

Capacity Plus - Çoklu Saha, MOTOTRBO telsiz sisteminin en iyi Capacity Plus ve IP Site Connect yapılandırmalarını bir araya getiren çoklu kanal birleştirme yapılandırmasıdır.

Capacity Plus - Çoklu Saha özelliğine sahip telsizinizle bir IP ağıyla bağlı farklı mevcut sahalara bağlanarak ortak kullanımlı haberleşmeyi tek bir saha kapsama alanının ötesine genişletebilirsiniz. Linked Capacity Plus ayrıca, her mevcut saha tarafından desteklenen kombine edilmiş kullanılabilir mevcut kanallardan yararlanarak kapasitede de artış sağlar.

Telsiz bir sahanın menziline diğerinin menziline hareket ettiğinde, çağrı/veri iletimlerini göndermek veya almak için yeni sahanın yineleyicisine bağlanır. Bu işlem, ayarlarınıza bağlı olarak otomatik ya da manuel olarak gerçekleştirilir.

Telsiziniz bunu otomatik olarak uygulamaya ayarlıysa mevcut sahanın sinyali zayıf olduğunda ya da telsiz mevcut sahada hiçbir sinyal tespit edemediğinde kullanılabilir sahaların tümünü tarar. Ardından RSSI değeri en güçlü olan yineleyiciye kilitletir.

Manuel saha aramada, telsiz o an için menzilde olan gezinme listesindeki bir sonraki sahayı arar (ancak bu saha en güçlü sinyale sahip olmayabilir) ve bu sahaya kilitlenir.

Capacity Plus - Çoklu Saha özelliğinin etkin olduğu kanallar belirli bir gezinme listesine eklenebilir. Telsiz, en iyi sahanın yerini saptamak için otomatik gezinme işlemi sırasında bu kanalları arar.

### NOT:

Gezinme listesine manuel olarak giriş ekleyemez ve listeden giriş silemezsiniz. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Aynı Capacity Plus - Tek Saha'da olduğu gibi, Capacity Plus - Çoklu Saha'da da kullanılmayan özelliklerin simgeleri menüde yer almaz. Capacity Plus - Çoklu Saha'da kullanılmayan özelliklere programlanabilir düğmelere basarak ulaşmak istediğinizde olumsuz bir gösterge tonu duyarsınız.

## Bölge ve Kanal Seçimleri

Bu bölümde, telsizinizdeki bir bölgeyi veya kanalı seçmek için yapılacak işlemler açıklanmaktadır. Bölge, kanallardan oluşan gruptur.

telsiziniz 99 adede kadar kanalı ve 2 bölgeyi, bölge başına en fazla 99 kanal olacak şekilde destekler.

Her kanal farklı özelliklerle programlanabilir ve/veya farklı kullanıcı gruplarını destekleyebilir.

## Bölgeleri Seçme

Telsizinizde gerekli bölgeyi seçmek için bu prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Bölge Seçimi** düğmesine basın. Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  **OK** düğmesine basın.

### 2

 veya  düğmesine basarak Bölge

seçeneğine gidin. Seçmek için  **OK** düğmesine basın.

Ekranında, ✓ simgesi ve geçerli bölge görüntülenir.

- 3 Gerekli bölge için  veya  düğmesine basın. Seçmek için  düğmesine basın.
- Ekranda kısa süreliğine <Bölge> Seçildi yazısı görüntülenir ve seçili bölge ekranına dönlür.

## Ad Aramasını Kullanarak Bölgeleri Seçme

Telsizinizde ad aramasını kullanarak gerekli bölgeyi seçmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Bölge seçeneğine gidin. Seçmek için  düğmesine basın.
- Ekranda, ✓ simgesi ve geçerli bölge görüntülenir.

- 3 Gerekli adın ilk karakterini girin.
- Ekranda yanıp sönen bir imleç görüntülenir.

- 4 Gereken adın kalan karakterlerini girin.
- Diğer ad araması büyük-küçük harf duyarlı değildir. Aynı ada sahip iki ya da daha fazla giriş varsa ekranda listenin ilk sırasında olan giriş görüntülenir.
- İlk metin satırında, girdiğiniz karakterler görüntülenir. Sonraki metin satırlarında, kısa liste halinde arama sonuçları görüntülenir.

- 5 Seçmek için  düğmesine basın.
- Ekranda kısa süreliğine <Bölge> Seçildi yazısı görüntülenir ve seçilen bölge ekranına dönlür.

## Kanal Seçme

Bir bölge seçtikten sonra telsizinizde gereken kanalı seçmek için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- **Yukarı/Aşağı Kaydırma** düğmesine basın.

- **Ses/Kanal Topuzu**'nu kullanın.
- Programlanmış **Kanal Yukarı/Aşağı** düğmesine basın.

## Çağrılar

Bu bölümde çağrı alma, yanıtlama, yapma ve durdurma işlemleri açıklanmaktadır.

Şu özelliklerden birini kullanarak kanal seçtikten sonra bir abone adı/kimliği ya da grup adı/kimliği seçebilirsiniz:

### Ad Araması

Bu yöntem, yalnızca tuş takımlı mikrofonla yapılan Grup, Özel ve Tüm Çağrılar için kullanılır.

### Kişi Listesi

Bu yöntem, Kişi listesine doğrudan erişim sağlar.

### Manuel Çevirme (Kişiler öğesini kullanarak)

Bu yöntem, yalnızca tuş takımlı mikrofon ile yapılan Özel Çağrılar ve Telefon Çağrılar için kullanılır.

### Programlanmış Sayı Tuşları

Bu yöntem, yalnızca tuş takımlı mikrofonla yapılan Grup, Özel ve Tüm Çağrılar için kullanılır.

### NOT:

Bir sayı tuşuna yalnızca bir ad ya da kimlik atayabilirsiniz; ancak ad ya da kimlik atanmış birden fazla sayı tuşunuz olabilir. Bir tuş takımlı mikrofonun tüm sayı tuşları atanabilir. Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

### Programlanmış Tek Tuşla Erişim Düğmesi

Bu yöntem, yalnızca Grup, Özel ve Telefon Çağrılar için kullanılır.

Bir **Tek Tuşla Erişim** düğmesine, programlanabilir düğmeye kısa veya uzun basılarak atanmış yalnızca bir kimliğiniz olabilir. Telsizinizde birden fazla düğmeyi **Tek Tuşla Erişim** düğmesi olarak programlayabilirsiniz.

### Programlanabilir Düğme

Bu yöntem, yalnızca Telefon Çağrılar için kullanılır.

### Ses/Kanal Seçici Düğmesi

Bu yöntem manuel olarak bir abone adı veya kimliği ya da grup adı veya kimliği seçer.

Telsiz yayın gönderirken LED devamlı yeşil yanar, yayın alırken ise yeşil yanıp söner.

## NOT:

Telsiz yayın gönderirken LED sürekli yeşil yanar, gizliliğin etkin olduğu bir çağrı alırken ise iki kez yeşil yanıp söner.

Gizliliğin etkin olduğu bir çağrıyı çözebilmesi için telsizinizde yayını gönderen telsizle (çağrıyı aldığınız telsiz) aynı Gizlilik Anahtarı veya Tuş Değeri ve Tuş Kimliği (bayiniz tarafından programlanır) bulunmalıdır.

Daha fazla bilgi için bkz. [Gizlilik sayfa 474](#).

## Grup Çağrıları

Telsizinizin kullanıcı grubundan bir çağrı alması veya kullanıcı grubuna çağrı yapması için grubun bir parçası olarak yapılandırılmış olması gerekir.

## Grup Çağrıları Yapma

Telsizinizden Grup Çağrıları yapmak için bu prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Etkin grup adına veya kimliğine sahip olan bir kanal seçin.

- Programlanmış **Tek Tuşla Erişim** düğmesine basın.

### 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. Ekranda **Grup Çağrısı** simgesi ve grup çağrısı adı görüntülenir.

### 3 Dinlemek için **PTT** düğmesini bırakın.

Hedef telsiz yanıt verdiğinde yeşil LED yanar. Ekranda **Grup Çağrısı** simgesi, grup adı veya kimliği ile yayın gönderen telsizin adı veya kimliği görüntülenir.

- ### 4 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Telsiz, çağrı başlatılmadan önce bulunduğunuz ekrana döner.

## Kişi Listesini Kullanarak Grup Çağrılarını Yapma

Telsizinizde Kişi listesini kullanarak Grup Çağrılarını yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

- 4 Çağrı yapmak için **PTT** düğmesine basın. Yeşil LED yanar.

---

- 5 Dinlemek için **PTT** düğmesini bırakın. Gruptaki herhangi bir kullanıcı yanıt verdiğinde yeşil LED yanıp söner. Ekranda **Grup Çağrısı** simgesi ve

ad veya kimlik ile yayın yapan telsizin adı veya kimliği görüntülenir.

- 6  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

## Programlanabilir Sayı Tuşunu Kullanarak Grup Çağrılarını Yapma

Telsizinizde programlanabilir sayı tuşunu kullanarak Grup Çağrılarını yapmak için buradaki prosedürü uygulayın.

- 1 Giriş ekranındayken önceden tanımlanmış ad veya kimlik için programlanmış sayı tuşuna uzun basın. Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez. Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.

2 Çağrı yapmak için **PTT** düğmesine basın.  
Yeşil LED yanar.

---

3 Dinlemek için **PTT** düğmesini bırakın.  
Gruptaki herhangi bir kullanıcı yanıt verdiği anda yeşil LED yanıp söner.

---

4  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.  
Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Telsiz, çağrı başlatılmadan önce bulunduğu ekrana döner.

---

Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

## Grup Çağrılarını Yanıtlama

Bir kullanıcı grubundan çağrı almak için telsiziniz o grubun parçası olarak yapılandırılmalıdır. Telsizinizden Grup Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Grup Çağrısı aldığınızda:

- Yeşil LED yanıp söner.
- Ekranın sağ üst köşesinde **Grup Çağrısı** simgesi görüntülenir.
- İlk metin satırında arayanın adı görüntülenir.
- İkinci metin satırında grup çağrısı adı görüntülenir.
- Telsiziniz sessiz kipten çıkar ve hoparlörden gelen çağrı sesi duyulur.

1 Aşağıdakilerden birini yapın:

-  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.
-  Ses Kesintisi özelliği etkinse yayını gönderen telsizden gelen sesi kesmek ve kanalı yanıtlanmanız için ayırmak amacıyla boşaltmak üzere **PTT** düğmesine basın.

Yeşil LED yanar.

---

2 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
-  **PTT Yan Tonunun** bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

### 3 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

Telsiz, Giriş ekranında değilken bir Grup Çağrısı alırsa çağrıya cevap verilmeden önce geçerli ekranda kalır.

Cevap vermeden önce arayanın adını görmek üzere Giriş ekranına dönmek için  düğmesine uzun basın.

## Özel Çağrılar

Bağımsız bir telsizle başka bir bağımsız telsiz arasında yapılan çağrılara Özel Çağrı denir.

Özel Çağrı yapmanın iki yolu vardır. İlk yöntem çağrıyı bir telsiz varlığı kontrolü gerçekleştirdikten sonra, ikinci yöntem ise hemen yapar. Bu çağrı türlerinden sadece birisi satıcınız tarafından telsizinize programlanabilir.

## Özel Çağrılar Yapma

Özel Çağrı başlatabilmeniz için telsizinizin programlanmış olması gerekir. Bu özellik etkin değilse çağrıyı başlattığınızda olumsuz gösterge tonu duyulur. Telsizinizden Özel Çağrılar yapmak için bu prosedürü uygulayın.

Bireysel bir telsizle temas kurmak için Yazılı Mesaj ya da Çağrı Uyarısı özelliklerini kullanın. Daha fazla bilgi için bkz. [Yazılı Mesaj sayfa 155](#) veya [Çağrı Uyarısı İşlemi sayfa 430](#).

### 1 Aşağıdakilerden birini yapın:

- Etkin abone adına veya kimliğine sahip olan bir kanal seçin.
- Programlanmış **Tek Tuşla Erişim** düğmesine basın.

### 2 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. Ekranda **Özel Çağrı** simgesi, abone adı ve çağrı durumu görüntülenir.

### 3 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 4 Dinlemek için **PTT** düğmesini bırakın.  
Hedef telsiz yanıt verdiğiğinde yeşil LED yanıp söner.

- 5  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız.Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.Bir ton duyulur.Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

## Kişi Listesini Kullanarak Özel Çağrılar Yapma

Telsizinizde Kişi listesini kullanarak Özel Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Kişiler bölümüne gidin.Seçmek için  düğmesine basın.

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın.Seçmek için  düğmesine basın.

- 4 Çağrı yapmak için **PTT** düğmesine basın.  
Yeşil LED yanar. Ekranda hedef adı görüntülenir.

- 5 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 6 Dinlemek için **PTT** düğmesini bırakın.  
Hedef telsiz yanıt verdiğiğinde yeşil LED yanıp söner. Ekranda, yayını yapan kullanıcının adı veya kimliği görüntülenir.

- 7  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren

kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.

## Elle Çevirmeyi Kullanarak Özel Çağrılar Yapma

Telsizinizde elle çevirmeyi kullanarak Özel Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak **Telsiz Numarası** seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Aşağıdakilerden birini yapın:

- Abone kimliğini girin ve devam etmek için  düğmesine basın.
- Önceden çevrilmiş abone kimliğini düzenleyin ve devam etmek için  düğmesine basın.

- 6 Çağrı yapmak için **PTT** düğmesine basın. Yeşil LED yanar. Ekranda hedef ad görüntülenir.

- 7 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofona etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 8 Dinlemek için **PTT** düğmesini bırakın. Hedef telsiz yanıt verdiğinde yeşil LED yanar. Ekranda, yayını yapan kullanıcının adı veya kimliği görüntülenir.

- 9  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.
- Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.
- 

## Programlanabilir Sayı Tuşunu Kullanarak Özel Çağrılar Yapma

Telsizinizde programlanabilir sayı tuşunu kullanarak Özel Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Giriş ekranındayken önceden tanımlanmış ad veya kimlik için programlanmış sayı tuşuna uzun basın.
- Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.
- Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.
- 

- 2 Çağrı yapmak için **PTT** düğmesine basın.
- Yeşil LED yanar. Ekranın sağ üst köşesinde **Özel Çağrı** simgesi görüntülenir. İlk metin satırında çağrı yapanın adı görüntülenir. İkinci metin satırında ise çağrı durumu görüntülenir.
- 
- 3 Dinlemek için **PTT** düğmesini bırakın.
- Hedef telsiz yanıt verdiğinde yeşil LED yanıp söner. Ekranda hedef adı görüntülenir.
- 

- 4  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.
- Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Telsiz, çağrı başlatılmadan önce bulunduğu uz ekrana döner.
- 

Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

## Özel Çağrılarını Yanıtlama

Telsizinizden Özel Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Özel Çağrı aldığınızda:

- Yeşil LED yanıp söner.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

1 Aşağıdakilerden birini yapın:

- Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.
- İletim Kesintisi Uzaktan Devre Dışı Bırakma özelliği etkinse devam eden kesilebilir bir çağrıyı durdurmak ve kanalı yanıtlamak için ayırmak amacıyla boşaltmak üzere **PTT** düğmesine basın.

Yeşil LED yanar.

- 2 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 3 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

## Herkese Çağrılar

Bağımsız bir telsizle bir kanal üzerindeki tüm telsizler arasında yapılan çağrılara Herkese Çağrı denir. Herkese Çağrı, kullanıcının tüm dikkatini vermesini gerektiren önemli duyurular yapmak için kullanılır. Kanaldaki kullanıcılar Herkese Çağrılara yanıt veremez.

## Herkese Çağrılarını Alma

Herkese Çağrı aldığınızda:

- Bir ton duyulur.
- Yeşil LED yanıp söner.
- Ekranın sağ üst köşesinde **Grup Çağrısı** simgesi görüntülenir.

- İlk metin satırında çağrı yapanın adı ve kimliği görüntülenir.
- İkinci metin satırında Herkese Çağrı bilgisi görüntülenir.
- Telsizin sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

Telsiz, çağrı sonlandırıldığında Herkese Çağrı'yı almadan önce bulunduğunuz ekrana döner.

Herkese Çağrı sona ermeden önce, önceden belirlenen bir süre boyunca beklemez.

 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığında kanalın boş olduğunu ve artık kullanabileceğinizi gösteren kısa bir uyarı tonu duyarsınız.

Herkese Çağrıyı yanıtlamazsınız.

### NOT:

Çağrı alınırken farklı bir kanala geçmeniz halinde telsiz Herkese Çağrıyı almayı durdurur. Herkese Çağrı bitene kadar menüde gezinme veya düzenleme yapma işlemlerine devam edemezsiniz.

## Herkese Çağrılar Yapma

Herkese Çağrı yapmanız için telsizinizin programlanmış olması gerekir. Telsizinizden Herkese Çağrılar yapmak için bu prosedürü uygulayın.

**1** Etkin Herkese Çağrı grup adına veya kimliğine sahip olan kanalı seçin.

**2** Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. Ekranda **Grup Çağrısı** simgesi ve Herkese Çağrı bilgisi görüntülenir.

**3** Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.
-  **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofona doğru konuşun.

Kanaldaki kullanıcılar Herkese Çağrıya yanıt veremezler.

## Programlanabilir Sayı Tuşunu Kullanarak Herkese Çağrılar Yapma 🗣️

Telsizinizde programlanabilir sayı tuşunu kullanarak Herkese Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Giriş ekranındayken önceden tanımlanmış ad veya kimliğe atanan programlanmış sayı tuşuna uzun basın.

Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.

Sayı tuşu bir girişle ilişkilendirilmemişse olumsuz bir gösterge tonu duyulur.

- 2 Çağrı yapmak için **PTT** düğmesine basın. Yeşil LED yanar.

- 3 Dinlemek için **PTT** düğmesini bırakın. Hedef telsiz yanıt verdiğinde yeşil LED yanar. Şu anda Herkese Çağrılar yanıtlayamazsınız.

- 4 🗣️ Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmaz için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrılar yanıtlanmaz için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Telsiz, çağrı başlatılmadan önce bulunduğunuz ekrana döner. Özel Çağrıda, çağrı sonlandırıldığında kısa bir ton duyulur.

Daha fazla bilgi için bkz. [Programlanabilir Sayı Tuşlarına Giriş Atama sayfa 419](#).

## Seçici Çağrılar 📞

Bağımsız bir telsizle başka bir bağımsız telsiz arasında yapılan çağrılara Seçici Çağrı denir. Bu çağrı, analog sistem üzerinde gerçekleştirilen bir Özel Çağrıdır.

## Seçici Çağrılar Yapma

Seçici Çağrı başlatabilmeniz için telsizinizin programlanmış olması gerekir. Telsizinizden Seçici Çağrılar yapmak için bu prosedürü uygulayın.

- 1 Etkin abone adına veya kimliğine sahip olan bir kanal seçin.
- 2 Çağrı yapmak için **PTT** düğmesine basın.  
Yeşil LED yanar. Ekranda **Özel Çağrı** simgesi, abone adı ve çağrı durumu görüntülenir.
- 3 Aşağıdakilerden birini yapın:
  - Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
  - **PTT Yan** Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
- 4 Dinlemek için **PTT** düğmesini bırakın.  
Hedef telsiz yanıt verdiğiğinde yeşil LED yanar.
- 5 **Kanal Boş Göstergesi** özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

- 6 Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.

## Seçici Çağrıları Yanıtlama

Telsizinizden Seçici Çağrıları yanıtlamak için bu prosedürü uygulayın.

Seçici Çağrı aldığınızda:

- Yeşil LED yanıp söner.
- İlk metin satırında **Özel Çağrı** simgesi ve çağrıyı yapanın adı ya da **Seçici Çağrı** veya **Çağrıyla Uyarı** bilgisi görüntülenir.
- Telsiziniz sessiz kipinden çıkar ve hoparlörden gelen çağrı sesi duyulur.

- 1 Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Yeşil LED yanar.

- 2 Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

### 3 Dinlemek için **PTT** düğmesini bırakın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer. Bir ton duyulur. Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.

## Telefon Çağrıları

Telefon Çağrısı, bağımsız bir telsizden bir telefona yapılan çağrıdır.

Telefon Çağrısı özelliği telsizinizde etkinleştirilmemişse:

- Ekranda **Kullanılmıyor** bilgisi görüntülenir.
- Telsiziniz çağrının sesini kapatır.
- Çağrı sona erdiğinde telsiziniz önceki ekrana döner.

Telefon Çağrısı sırasında, telsiziniz şu durumlarda çağrıyı sonlandırmayı dener:

- Erişimi kaldırma kodu önceden yapılandırılmış **Tek Tuşla Erişim** düğmesine bastığınızda.
- Fazladan rakamlar için giriş olarak erişimi kaldırma kodunu girdiğinizde.

Kanal erişimi, erişim verme ya da erişimi kaldırma kodu veya ekstra basamak iletimi sırasında, telsiziniz yalnızca

**Açma/Kapatma** düğmesine, **Ses Düzeyi Kontrolü** düğmesine ve **Kanal Seçici** düğmesine veya topuzuna yanıt verir. Her geçersiz giriş için bir ton duyulur.

Kanal erişimi sırasında  düğmesine basılırsa çağrı denemesi geçersiz kalır. Bir ton duyulur.

### NOT:

Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.

Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Telefon Çağrıları Yapma

Telsizinizden Telefon Çağrıları yapmak için bu prosedürü uygulayın.

- 1 Önceden tanımlanmış ada veya kimliğe ilişkin programlanmış **Tek Tuşla Erişim** düğmesine basın.

**Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur. Erişim kodu Kişiler listesinde yapılandırılmamışsa ekranda **Erişim Kodu:** bilgisi görüntülenir.

2 Erişim kodunu girin ve devam etmek için  düğmesine basın.

Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.

3 Çağrıyı yanıtlamak için **PTT** düğmesine basın. Dinlemek için **PTT** düğmesini bırakın.

4 Çağrı tarafından talep edilirse tuş takımını kullanarak ekstra rakamlar girin ve devam etmek için  düğmesine basın.

Çağrı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğu ekrana döner.

Çift Tonlu Çoklu Frekans (DTMF) Tonu duyulur. Telsiziniz önceki ekrana döner.

5 Çağrıyı sonlandırmak için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

- Erişimi kaldırma kodu önceden yapılandırılmadıysa ekranda Erişimi Kaldır

Kodu: bilgisi gösterildiğinde erişimi kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner.

- Programlanmış **Tek Tuşla Erişim** düğmesine basın. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

DTMF Tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir. Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. Son iki adımı tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin.

## Kişi Listesini Kullanarak Telefon Çağruları Yapma

Telsizinizde Kişi listesini kullanarak Telefon Çağruları yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.

---

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.  
Telefon Kişileri ekranında **PTT** düğmesine bastığınızda:
  - Ekranın ilk satırında Phone Number: (Telefon No:) bilgisi görüntülenir.

- Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir.

Seçilen giriş boşsa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

- 4  veya  ile Telefon Ara seçeneğine gidin. Seçmek için  düğmesine basın. Erişim kodu önceden yapılandırılmamışsa ekranda Erişim Kodu: bilgisi görüntülenir.

---

- 5 Erişim kodunu girin ve devam etmek için  düğmesine basın.  
Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.  
İlk metin satırında Çağrı Yapıyor bilgisi görüntülenir. İkinci metin satırında abone adı veya kimliği ve **Telefon Çağrısı** simgesi görüntülenir. Çağrı başarılı olursa:

- DTMF Tonu duyulur.
- Telefon kullanıcısının çevirme sesi duyulur.
- İlk metin satırında abone adı veya kimliği ve **RSSI** simgesi görüntülenir.
- İkinci metin satırında, Tlf Çağr bilgisi ve **Telefon Çağrısı** simgesi görüntülenir.

Çağrı başarısız olursa:

- Bir ton duyulur.
- Ekranda Telf Arama Başrısız ve ardından, Erişim Kodu: bilgisi görüntülenir.
- Erişim kodu Kişi listesinde önceden yapılandırılmışsa telsiziniz, çağrı başlatılmadan önce bulunduğunuz ekrana geri döner.

---

**6** Çağrıyla yanıtlanmak için **PTT** düğmesine basın. **RSSI** simgesi kaybolur.

---

**7** Dinlemek için **PTT** düğmesini bırakın.

---

**8** Çağrı tarafından talep edilirse tuş takımını kullanarak ekstra rakamlar girin ve devam etmek için  düğmesine basın.

Çağrı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyla başlatılmadan önce bulunduğunuz ekrana döner.

DTMF Tonu duyulur. Telsiziniz önceki ekrana döner.

---

**9** Çağrıyla sonlandırmak için  düğmesine basın.

---

**10** Erişimi kaldırma kodu önceden yapılandırılmadıysa ekranda Erişimi Kaldır Kodu: bilgisi gösterildiğinde erişimi kaldırma kodunu girin ve devam etmek için  düğmesine basın.

Telsiz önceki ekrana döner. DTMF Tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. [adım 9](#) ve [adım 10](#) adımlarını tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin. Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir.

Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir.

Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

#### NOT:

Kanal erişimi sırasında  düğmesine basılırsa çağrı denemesi geçersiz kalır ve bir ton duyulur.

Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener.

Kanal erişimi ve erişim/erişimi kaldırma kodu veya ekstra rakam aktarımı sırasında, telsiziniz sadece **Açma/Kapatma** düğmesi, **Ses Düzeyi Topuzu** ve **Kanal Ayarlayıcı**'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Elle Çevirmeyi Kullanarak Telefon Çağrılarını Yapma

Telsizinizde elle çevirmeyi kullanarak Telefon Çağrılarını yapmak için buradaki prosedürü uygulayın.

1

Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.

---

4  veya  ile **Telefon No** seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda **Numara:** bilgisi ve yanıp sönen bir imleç görüntülenir.

---

5 Telefon numarasını girin ve devam etmek için  düğmesine basın. Erişim kodu önceden yapılandırılmamışsa ekranda **Erişim Kodu:** bilgisi ve yanıp sönen bir imleç görüntülenir.

---

6 Erişim kodunu girin ve devam etmek için  düğmesine basın.

Erişim veya erişimi kaldırma kodu 10 karakterden uzun olamaz.

---

7 Yeşil LED yanar. Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir. İlk metin satırında abone adı görüntülenir. İkinci metin satırında ise çağrı durumu görüntülenir. Çağrı başarılı olursa:

- DTMF Tonu duyulur.
- Telefon kullanıcısının çevirme sesi duyulur.
- İlk metin satırında abone adı görüntülenir.
- Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi gösterilmeye devam eder.

Çağrı başarısız olursa:

- Bir ton duyulur.
  - Ekranda **Telf Arama Başarısız** ve ardından, **Erişim Kodu:** bilgisi görüntülenir.
  - Erişim kodu Kişi listesinde önceden yapılandırılmamışsa telsiziniz, çağrı başlatılmadan önce bulunduğunuz ekrana geri döner.
-

8 Çağrıyı sonlandırmak için  düğmesine basın.

telefon kullanıcısının çağrıyı sonlandırmasını bekleyin.

9 Aşağıdakilerden birini yapın:

- Erişimi kaldırma kodu önceden yapılandırılmadıysa ekranda Erişimi Kaldır Kodu: bilgisi gösterildiğinde erişimi kaldırma

kodunu girin ve devam etmek için  düğmesine basın.

Telsiz önceki ekrana döner.

- Programlanmış **Tek Tuşla Erişim** düğmesine basın.  
**Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

DTMF Tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. [adım 8](#). adımı tekrarlayın veya

**NOT:**

Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Press OK to Place Phone Call (Telefon Çağrısı İçin OK'e Bas) bilgisi görüntülenir.

Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Çğr Son bilgisi görüntülenir.

Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

Kanal erişimi sırasında  düğmesine basılırsa çağrı denemesi geçersiz kalır ve bir ton duyulur.

Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener.

Kanal erişimi ve erişim/erişimi kaldırma kodu veya ekstra rakam iletimi sırasında, telsiziniz sadece **Açma/Kapatma** düğmesi, **Ses**

**Düzeyi Topuzu ve Kanal Ayarlayıcı**'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Ad Aramasını Kullanarak Grup, Özel, Telefon ya da Herkese Çağrı Yapma

Ad aramasını kullanarak dilediğiniz çağrıyı yapmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın. Ekranda, girişler alfabetik sırada görüntülenir.
- 3  veya  düğmesine basarak istenen abone adına veya kimliğe gidin. Ekranın ilk satırında Telefon No: bilgisi görüntülenir. Ekranın ikinci

satırında yanıp sönen bir imleç görüntülenir. Telefon numarasını girmek için tuş takımını kullanın.

4 Seçmek için  düğmesine basın. Seçilen giriş boşsa olumsuz bir gösterge tonu duyulur ve ekranda Telefon Çağrısı Geçersiz # bilgisi görüntülenir.

5  veya  düğmesine basarak Çağrı Telefonu

seçeneğine gidin ve Seçmek için  düğmesine basın. Erişim kodu Kişiler listesinde önceden yapılandırılmamışsa ekranın ilk satırında Erişim Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişim kodunu

girin ve devam etmek için  düğmesine basın. Çağrı başarılı olursa DTMF tonu duyulur. Telefon kullanıcısının çevirme sesi duyulur. Ekranın ilk satırında abone adı veya kimliği ve RSSI simgesi görüntülenir. Ekranın ikinci satırında Tlf Çağr bilgisi ve Telefon Çağrısı simgesi görüntülenir. Çağrı başarısız olursa bir ton duyulur ve ekranda Telf Arama Başarısız bilgisi görüntülenir. Telsiziniz, Erişim Kodu giriş ekranına döner. Erişim kodu Kişiler listesinde önceden yapılandırılmışsa telsiz çağrısı başlatmadan önce bulunduğunuz ekrana döner.

6 Konuşmak için **PTT** düğmesine basın, dinlemek için düğmeyi bırakın. RSSI simgesi yayın sırasında kaybolur.

7 Telefon Çağrısı tarafından ekstra rakam istenirse bu rakamları girmek için aşağıdakilerden birini yapın.

- Ekstra rakam girişini başlatmak için tuş takımındaki herhangi bir tuşa basın. Ekranın ilk satırında Extra Digit: (Ekstra Rakam:) bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Ekstra basamakları girin ve devam etmek için  düğmesine basın. DTMF tonu duyulur ve telsiz önceki ekrana geri döner.
- **Tek Tuşla Erişim** düğmesine basın. DTMF tonu duyulur. **Tek Tuşla Erişim** düğmesine ilişkin giriş boşsa olumsuz bir gösterge tonu duyulur.

8 Çağrısı sonlandırmak için  düğmesine basın. Erişimi kaldırma kodu Kişiler listesinde yapılandırılmamışsa ekranın ilk satırında Erişimi Kaldır Kodu: bilgisi görüntülenir. Ekranın ikinci satırında yanıp sönen bir imleç görüntülenir. Erişimi

kaldırma kodunu girin ve devam etmek için  düğmesine basın. Telsiz önceki ekrana döner. DTMF

tonu duyulur ve ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir. Bir ton duyulur ve ekranda Tel Görüşmesi Bitti bilgisi görüntülenir. Telsiziniz Telefon Çağrısı ekranına döner. Çağrı başarısız olursa telsiziniz Tlf Çağr ekranına döner. Telefon Kişileri ekranında **PTT** düğmesine bastığınızda bir ton duyulur ve ekranda Arama için OK'e bas bilgisi görüntülenir. Telefon kullanıcısı çağrıyı sonlandırdığında, bir ton duyulur ve ekranda Phone Call Ended (Tel Görüşmesi Bitti) bilgisi görüntülenir. Telefon Çağrısı tarafından istenen ekstra rakamları girerken çağrı sona ererse telsiziniz çağrıyı başlatmadan önce bulunduğunuz ekrana döner.

### NOT:

Kanal erişimi sırasında çağrı denemesini iptal etmek (bir ton duyulur) veya ad aramasından çıkmak için

 düğmesine basın. Ad aramasından çıkmak

için  veya  düğmesine basın. Çağrı sırasında, erişimi kaldırma kodu önceden yapılandırılmışken **Tek Tuşla Erişim** düğmesine bastığınızda veya erişimi kaldırma kodunu ekstra rakam olarak girdiğinizde telsiziniz çağrıyı sonlandırmayı dener. Kanal erişimi ve erişim/erişim engelleme kodu veya ekstra rakam aktarımı sırasında, telsiziniz sadece Açma/Kapatma düğmesi, Ses Düğmesi ve Kanal Ayarlayıcı'ya yanıt verir. Her geçersiz giriş için bir ton duyulur.

## Çift Tonlu Çoklu Frekans

Çift Tonlu Çoklu Frekans (DTMF) özelliği, telsizinizi telefon sistemlerine arabirimi olan telsiz sistemlerinde çalıştırmanızı sağlar.

Tüm telsiz tonlarını ve uyarılarını devre dışı bırakarak DTMF tonunu kapatabilirsiniz. Daha fazla bilgi için bkz. [Telsiz Tonlarını/Uyarılarını Açma veya Kapatma sayfa 208.](#)

## DTMF Çağrılarını Başlatma

Telsizinizden DTMF çağrılarını başlatmak için buradaki prosedürü uygulayın.

1 **PTT** düğmesini basılı tutun.

2 Aşağıdakilerden birini yapın:

- DTMF çağrısını başlatmak için istediğiniz numarayı girin.
- DTMF çağrısını başlatmak için  düğmesine basın.
- DTMF çağrısını başlatmak için  düğmesine basın.

## Telefon Çağrılarını Grup Çağrısı Olarak Yanıtlama

Telsizinizden Grup Çağrısı olarak Telefon Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Grup Çağrısı olarak bir Telefon Çağrısı aldığınızda:

- Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir.

Geribildirim Gönder

- Ekranda grup adı ve T1f Çağr bilgisi görüntülenir.

Telsizinizde Telefon Çağrısı özelliği etkinleştirilmemişse ekranın ilk satırında **Mevcut Değil** mesajı görüntülenir ve telsiziniz çağrıyı sessize alır. Çağrı sona erdiğinde telsiziniz önceki ekrana döner.

1 Çağrıyı yanıtlamak için **PTT** düğmesine basın. Dinlemek için **PTT** düğmesini bırakın.

2 Çağrıyı sonlandırmak için  düğmesine basın.

Ekranda **Tel Görüşmesi Bitiyor** bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. Çağrıyı sonlandırmak için bu adımı tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin

## Telefon Çağrılarını Herkese Çağrı Olarak Yanıtlama

Herkese Çağrı olarak bir Telefon Çağrısı aldığınızda, bu çağrıyı ancak kanala Herkese Çağrı tipi atandığında yanıtlayabilir veya sonlandırabilirsiniz. Telsizinizden Herkese Çağrı olarak Telefon Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Herkese Çağrı olarak bir Telefon Çağrısı aldığınızda:

- Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir.
- Ekranında Herkese Çağrı ve Tlf Çağrı bilgisi görüntülenir.

Telsizinizde Telefon Çağrısı özelliği etkinleştirilmemişse ekranın ilk satırında Mevcut Değil mesajı görüntülenir ve telsiziniz çağrıyı sessize alır.

Çağrı sona erdiğinde telsiziniz önceki ekrana döner.

**1** Çağrıyı yanıtlamak için **PTT** düğmesine basın.

**2** Dinlemek için **PTT** düğmesini bırakın.

**3** Çağrıyı sonlandırmak için  düğmesine basın.

Ekranında Tel Görüşmesi Bitiyor bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranında Herkese Çağrı ve Çağrı Son bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. **adım 3** adımını tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin.

## Telefon Çağrılarını Özel Çağrı Olarak Yanıtlama

Telsizinizden Özel Çağrı olarak Telefon Çağrılarını yanıtlamak için bu prosedürü uygulayın.

Özel Çağrı olarak bir Telefon Çağrısı aldığınızda:

- Ekranın sağ üst köşesinde **Telefon Çağrısı** simgesi görüntülenir.

- Ekranda çağrı yapanın adı veya Tlf Çağr bilgisi görüntülenir.

Telsizinizde Telefon Çağrısı özelliği etkinleştirilmemişse ekranın ilk satırında Mevcut Değil mesajı görüntülenir ve telsiziniz çağrıyı sessize alır. Çağrı sona erdiğinde telsiziniz önceki ekrana döner.

- 1 Çağrıyı yanıtlamak için **PTT** düğmesine basın. Dinlemek için **PTT** düğmesini bırakın.

- 2 Çağrıyı sonlandırmak için  düğmesine basın.

Ekranda Tel Görüşmesi Bitiyor bilgisi görüntülenir.

Çağrı başarıyla sonlandırılırsa:

- Bir ton duyulur.
- Ekranda Call Ended (Çğr Son) bilgisi görüntülenir.

Çağrı sonlandırılmazsa telsiz, Telefon Çağrısı ekranına döner. Çağrıyı sonlandırmak için bu adımı tekrarlayın veya telefon kullanıcısının çağrıyı sonlandırmasını bekleyin

## Telsiz Çağrılarını Durdurma

Bu özellik sayesinde, sürmekte olan Grup Çağrısını ya da Özel Çağrıyı durdurarak kanalı yayın için boşaltabilirsiniz. Örneğin, bir telsiz kullanıcı tarafından yanlışlıkla **PTT** düğmesine basılması nedeniyle "takılmış mikrofon" sorunu yaşadığında, Telsiziniz, bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır. Telsizinizdeki çağrıları durdurmak için bu prosedürü uygulayın.

- 1 Programlanmış **Yayın Kesme Uzaktan Devre Dışı Bırakma** düğmesine basın.

Ekranda Uzaktan Devre Dışı bilgisi görüntülenir.

- 2 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda Uzaktan Devre Dışı Başarılı bilgisi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.

- Ekranda Uzaktan Duv Dışı Başarısız bilgisi görüntülenir.

### NOT:

Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Talkaround

Bu özellik, yineleyicinizin çalışmadığı ya da telsiziniz yineleyicinin kapsama alanı dışında ancak diğer telsizlerin konuşma kapsamında bulunduğu durumlarda haberleşmeye devam etmenizi sağlar.

Talkaround ayarı telsiz kapatıldıktan sonra da korunur.

### NOT:

Bu özellik Capacity Plus - Tek Saha, Capacity Plus - Çoklu Saha ve aynı frekanstaki Halk Bandı Radyo kanallarında geçerli değildir.

## Yineleyici ve Talkaround Kipleri Arasında Geçiş Yapma

Telsizinizde Yineleyici ve Talkaround kipleri arasında geçiş yapmak için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Yineleyici/Talkaround** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

### 2

 veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

### 3

 veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

### 4

 veya  ile Talkaround seçeneğine gidin. Seçmek için  düğmesine basın.

Etkinleştirilmişse Etkin yazısının yanında  simgesi görüntülenir

Devre dışı bırakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.

Ekran otomatik olarak önceki ekrana döner.

## Gelişmiş Özellikler

Bu bölümde, telsizinizde bulunan özelliklerin nasıl çalıştığı açıklanmaktadır.

Bayiniz ya da sistem yöneticiniz, telsizinizi özel ihtiyaçlarınız doğrultusunda özelleştirmiş olabilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

### Ana Kanal Hatırlatıcısı

Bu özellik, telsiz belirli bir süre ana kanala ayarlı olmadığına bir hatırlatıcı sağlar.

Bu özellik CPS üzerinden etkinleştirilmişse telsiziniz bir süreliğine ana kanala ayarlanmadığında düzenli aralıklarla şu durum oluşur:

- Ana Kanal Anımsatıcı tonu ve anonsu duyulur.
- Ekranın ilk satırında Non (Güvenli Değil) bilgisi görüntülenir.
- İkinci satırda Ana Kanal bilgisi görüntülenir.

Aşağıdaki işlemlerden birini gerçekleştirerek hatırlatıcıya yanıt verebilirsiniz:

- Ana kanal geri dönme.

- Programlanabilir düğmeyi kullanarak hatırlatıcıyı geçici olarak sessize alma.
- Programlanabilir düğmeyi kullanarak yeni bir ana kanal ayarlama.

### Ana Kanal Hatırlatıcısını Susturma

Ana Kanal Hatırlatıcısı duyulduğunda hatırlatıcının sesini geçici olarak kapatabilirsiniz.

**Ana Kanal Hatırlatıcıyı Sessize Al** programlanabilir düğmesine basın.

Ekranın ilk satırında HCR, ikinci satırında Sessiz ifadesi görüntülenir.

### Yeni Ana Kanal Ayarlama

Ana Kanal Anımsatıcı duyulduğunda yeni bir ana kanal ayarlayabilirsiniz.

- 1 Aşağıdakilerden birini yapın:
  - Geçerli kanalı yeni Ana Kanal olarak ayarlamak için programlanabilir **Ana Kanalı Sıfırla** düğmesine basın. Aşağıdaki adımları atlayın.

Ekranın ilk satırında kanal adı, ikinci satırında Yeni Ana Kanal ifadesi gösterilir.

- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Ana Kanal bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak istenilen yeni ana kanal adına gidin. Seçmek için  düğmesine basın.  
Ekranı, seçilen ana kanal adının yanında  gösterilir.

## Telsiz Kontrolü

Bu özellik, sistemde başka bir telsizin aktif olup olmadığını telsiz kullanıcılarını rahatsız etmeden tespit etmenize olanak tanır. Hedef telsizde sesli ya da görsel bir bildirim yapılmaz. Bu özellik, sadece abone adları ya da kimlikleri için geçerlidir. Telsiziniz, bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır.

## Telsiz Kontrolleri Gönderme

Telsizinizden telsiz kontrolleri göndermek için buradaki prosedürü uygulayın.

1 Programlanmış **Telsiz Kontrolü** düğmesine basın.

2 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

Ekranı, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.

Onay için bekleyin.

Telsiz onay beklerken  düğmesine basarsanız bir ton duyulur, telsiz tüm denemeleri sonlandırır ve Telsiz Kontrolü kipinden çıkar.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

Telsiz, abone adı ya da kimliği ekranına döner.

## Manuel Çevirmeyi Kullanarak Telsiz Kontrolleri Gönderme

Elle çevirmeyi kullanarak telsizinizden telsiz kontrolleri göndermek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak **Telsiz Numarası** seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Aşağıdakilerden birini yapın:
  - Abone adını veya kimliğini girin ve devam etmek için  düğmesine basın.
  - Önceden çevrilmiş kimliği girin ve devam etmek için  düğmesine basın.

6  veya  düğmesine basarak Telsiz

Kontrol seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.

7 Onay için bekleyin.

Telsiz onay beklerken  düğmesine basarsanız bir ton duyulur, telsiz tüm yeniden denemeleri iptal eder ve Telsiz Kontrolü kipinden çıkar.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranında olumsuz bir mini bilgi notu görüntülenir.

Telsiz, abone adı ya da kimliği ekranına döner.

## Uzaktan İzleme

Bu özellik, bir abone adıyla veya kimliğiyle hedef telsizin mikrofonunu açmak için kullanılır. Bu özelliği hedef telsiz civarındaki her türlü işitilebilir faaliyeti uzaktan izlemek için kullanabilirsiniz.

İki tip Uzaktan İzleme vardır:

- Kimlik Doğrulamasız Uzaktan İzleme
- Kimlik Doğrulamalı Uzaktan İzleme.

Kimlik Doğrulamalı Uzaktan İzleme satın alınabilir bir özelliktir. Kimlik Doğrulamalı Uzaktan İzleme özelliğinde, telsizin bir hedef telsizin mikrofonunu açtığına doğrulama gerekir.

Telsiziniz, bu özelliği Kullanıcı Kimliği Doğrulamalı bir hedef telsizde başlattığında, parola gerekir. Hedef telsiz için parola, CPS üzerinden önceden programlanmıştır.

Hem telsiziniz hem de hedef telsiz bu özelliği kullanmanızı sağlayacak şekilde programlanmış olmalıdır.

Programlanan sürenin sonunda ya da hedef telsizde kullanıcı herhangi bir işlem yaptığında bu özellik durur.

## Uzaktan İzleme Başlatma

Telsizinizde Uzaktan İzleme özelliğini başlatmak için buradaki prosedürü uygulayın.

**1** Programlanmış **Uzaktan İzleme** düğmesine basın.

**2** Gerekli ad veya kimlik için  ya da  düğmesine basın.

**3** Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.

- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönülür.

**4** Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.
- İzlenen telsizin sesi, programlanan bir süre boyunca çalmaya başlar ve ekranda **Uzaktan İzleme** bilgisi görüntülenir. Zamanlayıcının süresi dolduğunda telsiz, bir uyarı tonu verir ve LED söner.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Uzaktan İzleme Başlatma

Telsizinizde Kişi listesini kullanarak Uzaktan İzleme başlatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

- 4  veya  ile Uzaktan İzlm. seçeneğine gidin.

---

- 5 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:
  - Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
  - Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönülür.

## 6 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.
- İzlenen telsizin sesi, programlanan bir süre boyunca çalmaya başlar ve ekranda Uzaktan İzleme (Uzaktan İzleme) bilgisi görüntülenir. Zamanlayıcının süresi dolduğunda telsiz, bir uyarı tonu verir ve LED söner.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Uzaktan İzleme Başlatma

Telsizinizde elle çevirmeyi kullanarak Uzaktan İzleme başlatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4  veya  ile **Telsiz Numarası** seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5 Aşağıdakilerden birini yapın:
  - Abone adını veya kimliğini girin ve devam etmek için  düğmesine basın.

- Önceden çevrilmiş kimliği girin ve devam etmek için  düğmesine basın.

- 6  veya  ile **Uzaktan İzlm.** seçeneğine gidin.

- 7 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Ekran, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönlür.

### 8 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.
- İzlenen telsizin sesi, programlanan bir süre boyunca çalmaya başlar ve ekranda Uzktn. Monitor (Uzktn İzleme) bilgisi görüntülenir. Zamanlayıcının süresi dolduğunda telsiz, bir uyarı tonu verir ve LED söner.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

Her tarama listesi, hem analog hem de dijital girişleri destekler.

Tarama listesini düzenleyerek kanal ekleyebilir, silebilir ve öncelik verebilirsiniz.

Ön Panelden Programlama özelliğini kullanarak telsizinize yeni tarama listeleri ekleyebilirsiniz. Daha fazla bilgi için bkz. [Ön Panel Yapılandırma sayfa 201](#).

**Öncelik** simgesi, ayarlanmışsa üye adının sol tarafında görünür ve üyenin 1. Öncelikli veya 2. Öncelikli kanal listesinden hangisinde olduğunu gösterir. Bir tarama listesinde birden fazla 1. Öncelikli ya da 2. Öncelikli kanal bulunamaz. Öncelik **Yok** olarak ayarlanmışsa hiçbir **Öncelik** simgesi görünmez.

#### NOT:

Bu özellik Capacity Plus'ta geçerli değildir.

## Tarama Listeleri

Tarama listeleri bireysel kanallar veya gruplar için oluşturulur ve bu kanallara veya gruplara atanır. Telsiziniz, geçerli kanalın veya grubun tarama listesinde belirtilen kanal veya grup sırasına göre bir döngü yaparak ses etkinliğini tarar.

Telsiziniz her listede en fazla 16 üye olacak şekilde 250 adede kadar tarama listesini destekleyebilir.

## Tarama Listesindeki Girişleri Görüntüleme

Telsizinizin Tarama listesindeki girişleri görüntülemek için buradaki prosedürü uygulayın.

1

Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Tarama seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Tarama Listesi seçeneğine gidin. Seçmek için  düğmesine basın.

4 Listedeki üyeleri tek tek görüntülemek için  veya  düğmesine basın.

## Ad Aramasını Kullanarak Tarama Listesindeki Girişleri Görüntüleme

Ad aramasını kullanarak telsizinizin Tarama listesindeki girişleri görüntülemek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Tarama seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Tarama Listesi seçeneğine gidin. Seçmek için  düğmesine basın.

4 Gerekli adın ilk karakterini girin.  
Ekranda yanıp sönen bir imleç görüntülenir.

5 Gereken adın kalan karakterlerini girin.  
Diğer ad araması büyük-küçük harf duyarlı değildir. Aynı ada sahip iki ya da daha fazla giriş varsa ekranda listenin ilk sırasında olan giriş görüntülenir. İlk metin satırında, girdiğiniz karakterler görüntülenir. Sonraki metin satırlarında, kısa liste halinde arama sonuçları görüntülenir.

## Tarama Listesine Yeni Girişler Ekleme

Telsizinizin Tarama listesine yeni girişler eklemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Tarama seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Tarama Listesi seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Üye Ekle seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

- 6  veya  düğmesine basarak gerekli öncelik seviyesine gidin. Seçmek için  düğmesine basın.  
Ekranda olumlu bir mini bilgi notu ve hemen ardından Başka Üye Ekle? yazısı görüntülenir.

---

- 7 Aşağıdakilerden birini yapın:

- Yeni bir giriş eklemek için  veya  düğmesine basarak Evet seçeneğine gidin. Seçmek için  düğmesine basın. [adım 5](#) ve [adım 6](#) adımlarını tekrarlayın.
  - Geçerli listeyi kaydetmek için  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın.
-

## Ad Aramasını Kullanarak Tarama Listesine Yeni Girişler Ekleme

Ad aramasını kullanarak telsizinizdeki Tarama listesine yeni girişler eklemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Tarama seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Tarama Listesi seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Üye Ekle seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Gerekli adın ilk karakterini girin.  
Ekranda yanıp sönen bir imleç görüntülenir.

- 6 Gereken adın kalan karakterlerini girin.  
Diğer ad araması büyük-küçük harf duyarlı değildir. Aynı ada sahip iki ya da daha fazla giriş varsa ekranda listenin ilk sırasında olan giriş görüntülenir.  
İlk metin satırında, girdiğiniz karakterler görüntülenir. Sonraki metin satırlarında, kısa liste halinde arama sonuçları görüntülenir.

- 7 Seçmek için  düğmesine basın.

- 8  veya  düğmesine basarak gerekli öncelik seviyesine gidin. Seçmek için  düğmesine basın.

Ekranda olumlu bir mini bilgi notu ve hemen ardından Başka Üye Ekle? yazısı görüntülenir.

- 9 Aşağıdakilerden birini yapın:

- Yeni bir giriş eklemek için  veya  düğmesine basarak **Evet** seçeneğine gidin.  
Seçmek için  düğmesine basın. **adım 5 - adım 8.** Adımları tekrarlayın.
- Geçerli listeyi kaydetmek için  veya  düğmesine basarak **Hayır** seçeneğine gidin.  
Seçmek için  düğmesine basın.

## Tarama Listesindeki Girişleri Silme

Tarama listesindeki girişleri silmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Tarama** seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak **Tarama** Listesi seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  ile **Sil** seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranada **Kayıtlı Sil?** mesajı görüntülenir.

- 6 Aşağıdakilerden birini yapın:

- Girişi silmek için  veya  düğmesine basarak **Evet** seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranada olumlu bir mini bilgi notu görüntülenir.

- Önceki ekrana dönmek için  veya  düğmesine basarak **HAÜYİR** seçeneğine gidin.

Seçmek için  düğmesine basın.

7 Diğer girişleri silmek için şu adımları tekrarlayın:  
[adım 4 - adım 6](#).

8 Gerekli tüm adları veya kimlikleri sildikten sonra Giriş ekranına geri dönmek için  düğmesine uzun basın.

## Tarama Listesindeki Girişlerin Önceliğini Ayarlama

Telsizinizin Tarama listesindeki girişlere ilişkin öncelikleri ayarlamak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Tarama** seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak **Tarama**

**Listesi** seçeneğine gidin. Seçmek için  düğmesine basın.

4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

5  veya  ile **Önceligi Dznle** seçeneğine gidin. Seçmek için  düğmesine basın.

6  veya  düğmesine basarak gerekli öncelik seviyesine gidin. Seçmek için  düğmesine basın.

Önceki sayfaya dönmeden önce ekranda olumlu bir mini bilgi notu görüntülenir. **Öncelik** simgesi, üye adının solunda görüntülenir.

## Tarama

Telsiziniz, bir tarama başlattığınızda ses etkinliği arayan geçerli kanal için programlanmış tarama listesini tarar.

### NOT:

Bu özellik Capacity Plus'ta geçerli değildir.

Çift kipli tarama yapılırken dijital bir kanaldaysanız ve telsiziniz analog bir kanala kilitlemişse çağrı sürdüğü sürece telsiz otomatik olarak dijital kipten analog kipe geçer. Bunun tam tersi de olabilir.

Taramayı iki şekilde başlatabilirsiniz:

### Ana Kanal Taraması (Manuel)

Telsiziniz tarama listenizdeki tüm kanalları veya grupları tarar. Telsiziniz taramaya geçtiğinde, ayarlarına bağlı olarak, en son taranan etkin kanaldan veya gruptan ya da taramanın başlatılmış olduğu kanaldan otomatik olarak taramaya başlayabilir.

### Otomatik Tarama (Otomatik)

Otomatik Taramanın etkin olduğu bir kanal veya grup seçtiğinizde, telsiziniz otomatik olarak taramaya başlar.

### NOT:

**Taramada Grup Mesajı AI** ayarını yapılandırduğunuzda telsiziniz ana olmayan kanallardan grup mesajları alabilir. Telsiziniz, ana kanallardaki grup mesajlarına yanıt verebilir ancak ana olmayan kanallardaki grup mesajlarına yanıt veremez. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Taramayı Açma veya Kapatma

Telsizinizde taramayı açmak veya kapatmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak **Tarama** seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  ile **Tarama Durumu** seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4 Gerekli tarama durumuna gitmek için  veya  düğmesine, seçim yapmak için  düğmesine basın.

Tarama etkinse:

- Ekranda **Tarama Açık** bilgisi ve **Tarama** simgesi görüntülenir.
- Sarı LED yanıp söner.

Tarama devre dışıysa:

- Ekranda, **Tarama Kapalı** bilgisi görüntülenir.
- **Tarama** simgesi kaybolur.
- LED söner.

## Tarama Sırasında Yayınları Yanıtlama

Tarama sırasında, telsiziniz etkinlik algıladığı bir kanalda veya grupta durur. Telsiz bu kanalda, kalma süresi olarak bilinen programlanmış süre boyunca kalır. Tarama sırasında yayınları yanıtlamak için bu prosedürü uygulayın.

- 1  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda

yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Kalma süresi boyunca **PTT** düğmesini basılı tutun.

Yeşil LED yanar.

- 2 Dinlemek için **PTT** düğmesini bırakın.

Kalma süresi boyunca yanıt vermezseniz telsiz, diğer kanalları veya grupları taramaya geri döner.

## İstenmeyen Kanalları Silme

Bir kanal sürekli olarak istenmeyen çağrılar ya da parazit üretiyorsa (bu kanallara "istenmeyen" kanal denir), bu istenmeyen kanalı tarama listesinden geçici olarak kaldırabilirsiniz. Bu özellik, Seçili Kanal olarak belirlenen kanal için geçerli değildir. Telsizinizden istenmeyen kanalları silmek için bu prosedürü uygulayın.

- 1 Telsiziniz istenmeyen ya da parazitli bir kanala kilitlendiğinde, bir ton duyana kadar programlanmış **İstenmeyen Kanalı Sil** düğmesine basın.

- 2 Programlanmış **İstenmeyen Kanalı Sil** düğmesini bırakın.

İstenmeyen kanal silinir.

## İstenmeyen Kanalları Geri Yükleme

Telsizinizde istenmeyen kanalları geri yüklemek için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- Telsizi kapatıp tekrar açın.
- Programlanmış **Tarama** düğmesini veya menüyü kullanarak taramayı durdurup yeniden başlatın.
- **Kanal Yukarı/Aşağı** düğmesini kullanarak kanalı değiştirin.

## Oylamalı Tarama

Oylamalı Tarama, farklı analog kanallar üzerinde aynı bilgileri ileten birden fazla baz istasyonu olan alanlarda geniş bir kapsama alanı sağlar.

Telsiziniz birden fazla baz istasyonunun analog kanallarını tarar ve alınan en güçlü sinyali seçmek için bir oylama

işlemi gerçekleştirir. Sinyal seçildikten sonra telsiziniz ilgili baz istasyonundan gelen yayınları alır.

Oylamalı tarama sırasında, sarı LED yanıp söner ve ekranda, **Oylamalı Tarama** simgesi görüntülenir.

Oylamalı tarama sırasında bir yayına yanıt vermek için [Tarama Sırasında Yayınları Yanıtlama sayfa 415](#) ile aynı prosedürleri uygulayın.

## Kişi Ayarları

Kişiler, telsizinizde adres defteri özellikleri sağlar. Her giriş, çağrı başlatmak için kullandığınız bir ada ya da kimliğe karşılık gelir. Girişler alfabetik olarak sıralanmıştır.

Her giriş, bağlamına göre farklı çağrı tipleriyle ilişkilendirilir: Grup Çağrısı, Özel Çağrı, Herkese Çağrı, PC Çağrı veya Sevk Çağrısı.

PC Çağrı ve Sevk Çağrısı veriyle ilişkili çağrılardır. Yalnızca uygulamalarla kullanılabilirler. Ayrıntılı bilgi almak için veri uygulamaları belgesine bakın.

 Ayrıca Kişiler menüsü, tuş takımlı mikrofondaki bir ya da daha fazla programlanabilir numara tuşuna giriş atamanızı sağlar. Sayı tuşlarına giriş atadığınızda telsiziniz girişler için hızlı arama yapabilir.

**NOT:**

Bir girişe atanan her sayı tuşunun önünde bir onay işareti görüntülenir. Boş öğesinin önünde bir onay işareti görünüyorsa girişe bir sayı tuşu atanmamıştır.

Kişilerde yer alan tüm girişler aşağıdaki bilgileri içerir:

- Çağrı Türü
- Çağrı Diğer Adı
- Çağrı Kimliği

**NOT:**

Gizlilik özelliği etkin olan kanallar üzerinde gizliliğin etkin olduğu Grup Çağruları, Özel Çağrılar ya da Herkese Çağrılar yapabilirsiniz. Yayını sadece sizin telsizinizle aynı Gizlilik Anahtarına ya da Anahtar Değerine ve Anahtar Kimliğine sahip olan hedef telsizler çözebilir.

## Kişi Listesini Kullanarak Grup Çağruları Yapma

Telsizinizde Kişi listesini kullanarak Grup Çağruları yapmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4 Çağrı yapmak için **PTT** düğmesine basın. Yeşil LED yanar.

5 Dinlemek için **PTT** düğmesini bırakın. Gruptaki herhangi bir kullanıcı yanıt verdiğinde yeşil LED yanıp söner. Ekranda **Grup Çağrısı** simgesi ve ad veya kimlik ile yayın yapan telsizin adı veya kimliği görüntülenir.

6  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren

kısa bir uyarı tonu duyarsınız.Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.

## Kişi Listesini Kullanarak Özel Çağrılar Yapma

Telsizinizde Kişi listesini kullanarak Özel Çağrılar yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin.Seçmek için  düğmesine basın.
- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın.Seçmek için  düğmesine basın.

- 4 Çağrı yapmak için **PTT** düğmesine basın.  
Yeşil LED yanar. Ekranda hedef adı görüntülenir.

- 5 Konuşma İzni Tonunun bitmesini bekleyin ve mikروفon etkinse anlaşılır biçimde mikrofona doğru konuşun.

- 6 Dinlemek için **PTT** düğmesini bırakın.  
Hedef telsiz yanıt verdiğinde yeşil LED yanıp söner. Ekranda, yayını yapan kullanıcının adı veya kimliği görüntülenir.

- 7  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağrıyı yanıtlamak için **PTT** düğmesine basın.

Önceden belirlenen bir süre boyunca herhangi bir ses etkinliği olmazsa çağrı sona erer.Bir ton duyulur.Ekranda **Call Ended (Çğr Son)** bilgisi görüntülenir.

## Programlanabilir Sayı Tuşlarına Giriş Atama

Telsizinizin programlanabilir sayı tuşlarına giriş atamak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

- 4  veya  ile Program Tuşu seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5 Aşağıdakilerden birini yapın:
  - İsteddiğiniz sayı tuşu bir girişe atanmadıysa istediğiniz sayı tuşu için  veya 

düğmesine basın. Seçmek için  düğmesine basın.

- İsteddiğiniz sayı tuşu bir girişe atandıysa ekranda Bu Tuş Atandı uyarısı ve ardından, ilk metin satırında Üstüne Yaz? metni görüntülenir. Aşağıdakilerden birini yapın:

 veya  ile Evet seçeneğine gidin.

Seçmek için  düğmesine basın.

Telsiz olumlu bir gösterge tonu verir ve ekranda Kişi Kaydedildi bilgisi ve olumlu bir mini bilgi notu görüntülenir.

Önceki adıma dönmek için  veya  ile Hayır seçeneğine gidin.

Her giriş farklı bir numara tuşuna atanabilir. Bir giriş atan her numara tuşunun önünde bir  ögesi görüntülenir.  ögesi Boş ifadesinin önünde yer alıyorsa bu sayı tuşu atanmamıştır. Sayı tuşu belirli bir kipteki girişe atanırsa başka bir kipte bu sayı tuşuna uzun bastığınızda bu özellik desteklenmez.

Ekran otomatik olarak önceki menüye döner.

## Girişler ve Programlanabilir Sayı Tuşları Arasındaki İlişkilendirmeyi Kaldırma

Telsizinizde girişler ve programlanabilir sayı tuşları arasındaki ilişkilendirmeleri kaldırmak için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Gerekli ad veya kimlik için programlanmış sayı tuşuna uzun basın. Şu adıma geçin: [adım 4](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 4  veya  ile **Program Tuşu** seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  ile **Boş** seçeneğine gidin. Seçmek için  düğmesine basın.

İlk metin satırında **Tüm Tuşları Temiz** mesajı görüntülenir.

- 6  veya  ile **Evet** seçeneğine gidin. Seçmek için  düğmesine basın.

### NOT:

Bir giriş silindiğinde, bu giriş ve onun için programlanmış sayı tuşu/tuşları arasındaki ilişki kaldırılmış olur.

Bir olumlu gösterge tonu duyulur. Ekranda **Kişi Kaydedildi** bilgisi görüntülenir. Ekran otomatik olarak önceki menüye döner.

## Yeni Kişiler Ekleme

Telsizinizde yeni kişiler eklemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  ile Yeni Kişi seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Telsiz Kişisi ya da Telefon Kişisi seçenekleri arasından kişi türünü seçin. Seçmek için  düğmesine basın.

---

- 5 Tuş takımıyla kişi numarasını girin ve devam etmek için  düğmesine basın.

---

- 6 Tuş takımıyla kişinin adını girin ve devam etmek için  düğmesine basın.

---

- 7 Gereken zil türü için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Bir olumlu gösterge tonu duyulur. Ekranda olumlu bir mini bilgi notu görüntülenir.

---

## Varsayılan Kişi Ayarlama

Telsizinizde varsayılan kişiyi ayarlamak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

---

3 Gerekli ad veya kimlik için  ya da  düğmesine basın.Seçmek için  düğmesine basın.

4  veya  ile Varsayılan Yap seçeneğine gidin. Seçmek için  düğmesine basın.  
Bir olumlu gösterge tonu duyulur.Ekranda olumlu bir mini bilgi notu görüntülenir. Ekranda, seçili varsayılan ad veya kimliğin yanında  simgesi görüntülenir.

## Çağrı Göstergesi Ayarları

Bu özellik, telsiz kullanıcılarının çağrı veya yazılı mesaj zil tonlarını yapılandırmasını sağlar.

## Çağrı Uyarısı için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Telsizinizde Çağrı Uyarıları için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin.Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin.Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar Uyarılar bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

6  veya  düğmesine basarak Çağrı

Uyarısı seçeneğine gidin. Seçmek için  düğmesine basın.

7 İstenen ton için  veya  düğmesine basın.

Seçmek için  düğmesine basın. Ekranda, seçilen dilin yanında  simgesi görüntülenir.

3  veya  düğmesine basarak Telsiz

Ayarıları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar

Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Çağrı

Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

6  veya  ile Özel Çağrı seçeneğine gidin.

Seçmek için  düğmesine basın.

Özel Çağrı zil tonları etkinleştirilirse ekranda Açık ögesinin yanında  simgesi görüntülenir.

Özel Çağrı zil tonları devre dışı bırakılırsa ekranda Kapalı ögesinin yanında  simgesi görüntülenir.

## Özel Çağrılar için Çağrı Zillerini Etkinleştirme veya Devre Dışı Bırakma

Telsizinizde Özel Çağrılar için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 7 İstenen ton için  veya  düğmesine basın.  
Seçmek için  düğmesine basın.  
Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenirDevre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.
- 

## Seçici Çağrılar için Çağrı Zillerini Etkinleştirme veya Devre Dışı Bırakma

Telsizinizde Seçici Çağrılar için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

- 1 Menüye erişmek için  düğmesine basın.
- 
- 2  veya  düğmesine basarak Programlar bölümüne gidin.Seçmek için  düğmesine basın.
- 

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin.Seçmek için  düğmesine basın.
- 

- 4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.
- 

- 5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.
- 

- 6  veya  düğmesine basarakSeçici Çağrı seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranada ✓ simgesi ve geçerli ton görüntülenir.
-

- 7 İstenen ton için  veya  düğmesine basın.  
Seçmek için  düğmesine basın. Ekranda, seçilen tonun yanında ✓ simgesi görüntülenir.

## Yazılı Mesajlar için Çağrı Zillerini Etkinleştirme veya Devre Dışı Bırakma

Telsizinizde yazılı mesajlara ilişkin çağrı zillerini etkinleştirmek veya devre dışı bırakmak için buradaki prosedürü kullanın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

- 6  veya  düğmesine basarak Metin Mesajı bölümüne gidin. Seçmek için  düğmesine basın. Ekranda ✓ simgesi ve geçerli ton görüntülenir.

- 7 İstenen ton için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ekranda, yeni seçilen tonun yanında ✓ simgesi görüntülenir.

## Yazılı Telemetri Durumu için Çağrı Zillerini Etkinleştirme ve Devre Dışı Bırakma

Telsizinizde metinli telemetri durumu için çağrı zillerini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Tonlar Uyarılar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 5  veya  düğmesine basarak Çağrı Zilleri seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 6  veya  ile Telemetri. Seçmek için  düğmesine basın.  
Geçerli ton bir  simgesi ile belirtilir.

---

## Zil Stilleri Atama

Telsiz belirli bir kişiden Çağrı Uyarısı veya Metin Mesajı alırken önceden tanımlanmış on adet zil sesinden birini çalacak şekilde programlanabilir. Listede gezindikçe, telsiz her zil stilinin sesini çıkarır. Telsizinizde zil stillerini atamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın. Girişler alfabetik olarak sıralanmıştır.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak **Düzenle** seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile **Zil Sesini Düzenle** seçeneğine gidin. Seçmek için  düğmesine basın.

6 İsteddiğiniz ton için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
✓ Seçili tonun yanında simgesi görüntülenir.

## Alarm Tonu Ses Seviyesini Yükseltme

Telsiz, bir telsiz çağrısı yanıtlanmadığında sürekli olarak uyarı verecek şekilde programlanabilir. Alarm tonu ses seviyesi zaman içinde otomatik olarak yükselir. Bu özelliğe Kademeli Uyarı denir.

## Çağrı Kaydı Özellikleri

Telsiziniz giden, cevaplanan ve cevapsız tüm Özel Çağrıların kaydını tutar. Arama geçmiş özelliği, son çağrıları görüntülemek ve yönetmek için kullanılır.

Sistem yapılandırmasına bağlı olarak telsizinizde Cevapsız Çağrı Uyarıları arama geçmişi kayıtlarına dahil edilebilir. Her çağrı listenizde aşağıdaki görevleri gerçekleştirebilirsiniz:

- Adı veya Kimliği Kişilerde Saklama
- Çağrıyı Silme

- Tüm Çağrılar Silme
- Ayrıntıları Görme

### Son Çağrılar Görüntüleme

Telsizinizdeki son çağrılar görüntülemek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Arama Geçmiş i seçeneğine gidin. Seçmek için  düğmesine basın.
- 3 Tercih edilen liste için  veya  düğmesine basın. Cevapsız, Cevaplanan ve Giden seçenekleri listelenir.  
Seçmek için  düğmesine basın.  
Ekranda en son yapılan giriş görüntülenir.

- 4 Listeyi görüntülemek için  veya  düğmesine basın.

**PTT** düğmesine basarak ekranda gösterilmekte olan ad veya kimlikle bir Özel Çağrı başlatabilirsiniz.

### Çağrı Listesindeki Çağrılar Silme

Çağrı listesindeki çağrılar silmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Arama Geçmiş i seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak istenen listeye gidin. Seçmek için  düğmesine basın.  
Liste boşsa:
  - Bir ton duyulur.

- Ekranda Liste Boş bilgisi görüntülenir.

4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Giriş Silinsin Mi? seçeneğine gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

- Girişi silmek için  düğmesine basarak Evet'i seçin.  
Ekranda, Giriş Silindi bilgisi görüntülenir.
-  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın.

Telsiz önceki ekrana döner.

## Çağrı Listesi Ayrıntılarını Görüntüleme

Telsizinizdeki çağrı ayrıntılarını görüntülemek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Arama Geçmiş'i seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak istenen listeye gidin. Seçmek için  düğmesine basın.

4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak Ayrıntıları Gör seçeneğine gidin. Seçmek için  düğmesine basın.
- Ekranı çağrı ayrıntıları görüntülenir.

## Çağrı Listesindeki Ad veya Kimlikleri Saklama

Çağrı listesindeki adları veya kimlikleri telsizinize kaydederek saklamak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Arama Geçmişi seçeneğine gidin. Seçmek için  düğmesine basın.
- 3 Gerekli liste için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 4 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  ile Sakla seçeneğine gidin. Seçmek için  düğmesine basın. Ekranı yanıp sönen bir imleç görüntülenir.

- 6 Gereken adın kalan karakterlerini girin. Seçmek için  düğmesine basın. Bir kimliği ad olmadan saklayabilirsiniz. Ekranı olumlu bir mini bilgi notu görüntülenir.

## Çağrı Uyarısı İşlemi

Çağrı Uyarısı gönderme sistemi, belirli bir telsiz kullanıcısını sizi geri araması için uyarmanızı sağlar.

Bu özellik sadece abone adları veya kimlikleri için geçerlidir ve özelliğe menüden Kişiler aracılığıyla ya da elle çevirerek

veya programlanmış bir **Tek Tuşla Erişim** düğmesi kullanılarak erişilebilir.

## Çağrı Uyarıları Yapma

Telsizinizde Çağrı Uyarıları yapmak için bu prosedürü uygulayın.

- 1 Programlanmış **Tek Tuşla Erişim** düğmesine basın.  
Ekranda, Çağrı Uyarısı ve abone adı veya kimliği görüntülenir. Yeşil LED yanar.

---

- 2 Onay için bekleyin.  
Çağrı Uyarısı onayı alınırsa ekranda olumlu bir mini bilgi notu görüntülenir.  
Çağrı Uyarısı onayı alınmazsa ekranda olumsuz bir mini bilgi notu görüntülenir.

---

## Kişi Listesini Kullanarak Çağrı Uyarıları Yapma

Telsizinizde Kişi listesini kullanarak Çağrı Uyarıları yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Çağrı Uyarısı seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranda, Çağrı Uyarısı ve abone adı veya kimliği görüntülenir. Yeşil LED yanar.

---

- 5 Onay için bekleyin.
  - Çağrı Uyarısı onayı alınırsa ekranda olumlu bir mini bilgi notu görüntülenir.

- Çağrı Uyarısı onayı alınmazsa ekranda olumsuz bir mini bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Çağrı Uyarıları Yapma

Telsizinizde elle çevirmeyi kullanarak Çağrı Uyarıları yapmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Kişiler** bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak **Elle Çevirme** seçeneğine gidin. Seçmek için  düğmesine basın.  
Ekranda yanıp sönen bir imleç görüntülenir.

- 4 Abone kimliğini girin ve devam etmek için  düğmesine basın.

- 5  veya  düğmesine basarak **Çağrı Uyarısı** seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda, **Çağrı Uyarısı** ve abone adı veya kimliği görüntülenir. Yeşil LED yanar.

- 6 Onay için bekleyin.
  - Çağrı Uyarısı onayı alınırsa ekranda olumlu bir mini bilgi notu görüntülenir.
  - Çağrı Uyarısı onayı alınmazsa ekranda olumsuz bir mini bilgi notu görüntülenir.

## Çağrı Uyarılarına Yanıt Verme

Telsizinizde Çağrı Uyarılarını yanıtlamak için bu prosedürü uygulayın.

Çağrı Uyarısı aldığınızda:

- Tekrarlanan bir ton duyulur.

- Sarı LED yanıp söner.
- Ekranda çağrıyı yapan telsizin adı veya kimliğiyle bir Çağrı Uyarısının listelendiği bildirim listesi görüntülenir.

Satıcınızın veya sistem yöneticinizin yaptığı yapılandırmaya bağlı olarak aşağıdakilerden birini yaparak Çağrı Uyarısına yanıt verebilirsiniz:

- **PTT** düğmesine basın ve doğrudan çağrıyı yapan tarafa Özel Çağrı ile yanıt verin.
- Normal konuşma grubu iletişimine devam etmek için **PTT** düğmesine basın. Çağrı Uyarısı, Çağrı Kaydı menüsünde Cevapsız Çağrı seçeneğine taşınır. Cevapsız Çağrı kaydından size çağrı yapan kişiye yanıt verebilirsiniz.

Daha fazla bilgi için bkz. [Bildirim Listesi sayfa 198](#) ve [Çağrı Kaydı Özellikleri sayfa 132](#).

## Sessize Alma Modu

Sessiz Kipi sayesinde kullanıcı, telsizin tüm sesli göstergelerinin sesini kapatabilir.

Sessiz Kipi özelliği başlatıldığında, Acil Durum işlemleri gibi yüksek öncelikli özellikler haricinde tüm sesli göstergelerin sesi kapatılır.

Sessiz Kipinden çıkıldığında telsiz, devam eden tonları ve ses yayınlarını oynatmaya devam eder.

### NOT:

Bu özelliği satın alabilirsiniz. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

## Sessiz Kipini Açma

Sessiz Kipini açmak için bu prosedürü uygulayın.

Bu özelliğe programlanmış **Sessiz Kipi** düğmesini kullanarak erişin.

Sessiz kipi etkinleştirildiğinde şunlar meydana gelir:

- Olumlu Gösterge Tonu duyulur.
- Ekranda Sessiz Kipi Açık bilgisi gösterilir.
- Kırmızı LED ışığı yanıp sönmeye başlar ve Sessiz Kipinden çıkılana kadar yanıp sönmeye devam eder.
- Giriş ekranında **Sessiz Kipi** simgesi gösterilir.
- Radyonun sesi kapatılır.

- Sessiz Kipi Zamanlayıcısı, ayarlanan süre dolana kadar geri saymaya başlar.

### Sessiz Kipi Zamanlayıcısını Ayarlama

Sessiz Kipi Zamanlayıcısının ayarlanmasıyla, Sessiz Kipi özelliği önceden belirlenmiş bir süre boyunca etkinleştirilebilir. Telsiz menüsünde yapılandırılan zamanlayıcı süresi, 0,5 ile 6 saat arasında değişebilir. Zamanlayıcının süresi dolduğunda, Sessiz Kipinden çıkılır.

Zamanlayıcı 0'da bırakılırsa programlanan **Sessiz Kipi** düğmesi basılana kadar, telsiz süresiz olarak Sessiz kipinde kalır.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Sessize Alma Zamanlayıcısı seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak her bir hanenin sayısal değerini düzenleyin ve  düğmesine basın.

### Sessiz Kipinden Çıkma

Sessiz Kipi Zamanlayıcısının süresi dolduktan sonra bu özellikten otomatik olarak çıkılabilir.

Sessiz kipinden manuel olarak çıkmak için aşağıdakilerden birini yapın:

- Programlanmış **Sessiz Kipi** düğmesine basın.
- Her girişte **PTT** düğmesine basın.

Sessiz kipi devre dışı bırakıldığında şunlar meydana gelir:

- Olumsuz Gösterge Tonu duyulur.
- Ekranda Sessiz Kipi Kapalı bilgisi gösterilir.

- Yanıp sönen kırmızı LED kapanır.
- Ekrandaki **Sessiz Kipi** simgesi kaybolur.
- Telsizin sessiz kipten çıkar ve hoparlör durumu eskisine döner.
- Zamanlayıcının süresi dolmamışsa Sessiz kipi zamanlayıcısı durdurulur.

**NOT:**

Kullanıcı ses yayını yaptığında veya programlanmamış bir kanala geçtiğinde de Sessiz Kipten çıkılır.

## Acil Durum İşlemi

Acil Durum Alarmı, kritik durumları bildirmek için kullanılır. İstedığınız zaman, geçerli kanalda faaliyet olduğunda bile bir Acil Durum başlatabilirsiniz.

Bayiniz, programlanmış **Acil Durum** düğmesi için uzun basma haricinde tüm düğmelere benzer şekilde düğmeye basma süresi ayarlayabilir:

**Kısa Basma**

0,05 ile 0,75 saniye arasındaki süre.

**Uzun Basma**

1,00 - 3,75 saniye arasındaki süre.

**Acil Durum** düğmesine Acil Durum Açık/Kapalı özelliği atanmıştır. Bayinizden **Acil Durum** düğmesine atanan işlemi öğrenin.

**NOT:**

**Acil Durum** düğmesine kısa basıldığında Acil Durum kipi başlıyorsa aynı düğmeye uzun basıldığında telsiz Acil Durum kipten çıkar.

**Acil Durum** düğmesine uzun basıldığında Acil Durum kipi başlıyorsa aynı düğmeye kısa basıldığında telsiz Acil Durum kipten çıkar.

Telsizin üç Acil Durum Alarmını destekler:

- Acil Durum Alarmı
- Çağrılı Acil Durum Alarmı
- Ses Takipli Acil Durum Alarmı

**NOT:**

Programlanmış **Acil Durum** düğmesine veya Acil Durum pedalına yukarıdaki Acil Durum Alarmlarının yalnızca biri atanabilir.

Ayrıca, her bir alarmın aşağıda belirtilen türleri bulunur:

**Normal**

Telsiz, bir alarm sinyali gönderir ve sesli ve/veya görsel gösterge verir.

## Sessiz

Telsiz, bir alarm sinyali gönderir ancak sesli veya görsel gösterge vermez. Telsiz, programlanmış *hot mic* yayın süresi doluncaya ve/veya **PTT** düğmesine basılıncaya kadar hoparlör üzerinden hiç ses duyulmadan çağrılar alır.

## Sesli Sessiz

Telsiz herhangi bir sesli veya görsel gösterge olmadan bir alarm sinyali gönderir; ancak gelen çağrılar hoparlörden duyulmasını sağlar.

## Acil Durum Alarmları Alma

Telsizinizden Acil Durum Alarmları almak için bu prosedürü uygulayın.

Bir Acil Durum Alarmı aldığınızda:

- Bir ton duyulur.
- Kırmızı LED ışığı yanıp söner.
- Ekranda **Acil Durum** simgesi görüntülenir ve Acil durum arayan adı veya birden fazla alarm varsa Alarm listesinde tüm acil durum arayan adları görüntülenir.

1 Aşağıdakilerden birini yapın:

- Yalnızca bir alarm varsa daha fazla ayrıntıyı görüntülemek için  düğmesine basın.
- Birden fazla alarm varsa gerekli adı almak için  veya  düğmesine ve daha fazla ayrıntı görüntülemek için  düğmesine basın.

2 İşlem seçeneklerini görüntülemek için  düğmesine basın.

3 Alarm listesinden çıkmak için  düğmesine basın ve Evet seçeneğini belirleyin.

4 Menüye erişmek için  düğmesine basın.

5 Alarm listesini yeniden ziyaret etmek için Alarm Listesi öğesini seçin.

6 Ton duyulur ve Acil Durum kipinden çıkılıncaya kadar LED kırmızı yanıp söner. Ancak ton sessize alınabilir. Aşağıdakilerden birini yapın:

- Acil Durum Alarmını alan telsiz grubunu aramak için **PTT** düğmesine basın.

- Herhangi bir programlanabilir düğmeye basın.
- Acil Durum kipinden çıkın. Bkz. [Acil Durum Alarını Aldıktan Sonra Acil Durum Modundan Çıkma sayfa 437](#)

## Acil Durum Alarlarını Yanıtlama

Telsizinizden Acil Durum Alarlarını yanıtlamak için buradaki prosedürü uygulayın.

- 1 Ekranda Alarm Listesinin görüntülediğinden emin olun. Gerekli ad veya kimlik için  ya da  düğmesine basın.

- 2  Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlamanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Acil durum olmayan sesli yayınları, Acil Durum Alarmı'nın hedeflendiği gruba iletmek için **PTT** düğmesine basın. Yeşil LED yanar. Telsiziniz Acil Durum kipinde kalır.

- 3 Aşağıdakilerden birini yapın:

[Geribildirim Gönder](#)

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
-  **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

- 4 Dinlemek için **PTT** düğmesini bırakın.

Acil durumu başlatan telsiz yanıt verdiğinde:

- Yeşil LED yanıp söner.
- Ekranda **Grup Çağrısı** simgesi ve kimliği, yayını yapan telsizin kimliği ve Alarm listesi görüntülenir.

Sadece acil durumu başlatan telsiz, Acil Durum sesli yayını gönderebilir. Acil durumu alan telsiz de dahil olmak üzere diğer tüm telsizler acil durum olmayan sesli yayınlar yapabilir.

## Acil Durum Alarını Aldıktan Sonra Acil Durum Modundan Çıkma

Bir Acil Durum alarmı aldıktan sonra Acil Durum kipinden çıkmak için aşağıdaki işlemlerden birini yapın:

- Alarm öğelerini silin.
- Telsizi kapatın.

## Acil Durum Alarmları Gönderme

Bu özellik, bir grup telsiz üzerinde uyarı göstergesi başlatan sessiz bir sinyal olan Acil Durum Alarmı göndermenizi sağlar. Telsiziniz Sessiz kipe ayarlandığında Acil Durum kipindeyken herhangi bir sesli veya görsel uyarı görüntülemez.

Telsizinizden Acil Durum Alarmları göndermek için bu prosedürü uygulayın.

### 1 Programlanmış **Acil Durum Açık** düğmesine basın.

Şu sonuçlardan birini görürsünüz:

- Ekranda Tx Alarmları bilgisi ve hedef telsizin adı görüntülenir.
-  Ekranda Tx Telgraf ve hedef telsizin adı görüntülenir.

Yeşil LED yanar. **Acil Durum** simgesi görünür.

### NOT:

Programlanmışsa Acil Durum Arama Tonu duyulur. Bu ton, telsiz ses ilettiğinde veya aldığıda sessize alınır ve telsiz Acil Durum kipinden çıktığında durdurulur. Acil Durum Araması tonu CPS üzerinden programlanabilir.

### 2 Onay için bekleyin.

İşlem başarılı olursa:

- Acil Durum tonu duyulur.
- Kırmızı LED ışığı yanıp söner.
- Ekranda Alarm Gön. bilgisi görüntülenir.

Tüm yeniden denemelere rağmen başarısız olunduysa:

- Bir ton duyulur.
- Ekranda Alarm Başarısız bilgisi görüntülenir.

Telsiz, Acil Durum Alarm kipinden çıkar ve Giriş ekranına döner.

## Çağrı ile Acil Durum Alarmları Gönderme

Bu özellik, bir grup telsize Çağrıyla Acil Durum Alarmı göndermenizi sağlar. Grup içerisindeki bir telsizden onay alındıktan sonra telsiz grubu programlanmış Acil Durum kanalı üzerinden iletişime geçebilir.

Telsizinizden çağrı ile Acil Durum Alarmları göndermek için bu prosedürü uygulayın.

- 1 Programlanmış **Acil Durum Açık** düğmesine ya da **Acil Durum** pedalına basın. Ekranda Alarm Gönderiliyor bilgisi ve ardından telsiz kimliğiniz görüntülenir.

Aşağıdaki bilgiler görüntülenir:

- Ekranda Tx Telgraf ve hedef telsizin adı görüntülenir.

Yeşil LED yanar. **Acil Durum** simgesi görünür.

### NOT:

Programlanmışsa Acil Durum Arama Tonu duyulur. Bu ton, telsiz ses ilettiğinde veya aldığıda sessize alınır ve telsiz Acil Durum kipinden çıktığında durdurulur. Acil Durum Arama tonu bayiniz veya sistem yöneticiniz tarafından programlanabilir.

- 2 Onay için bekleyin.

İşlem başarılı olursa:

- Acil Durum tonu duyulur.
- Kırmızı LED ışığı yanıp söner.
- Ekranda Alarm Gön. bilgisi görüntülenir.
- Telsiz, ekranda Acil Durum bilgisi ve hedef grup adı görüldüğünde Acil Durum çağrısı kipine girer.

- 3 Çağrı yapmak için **PTT** düğmesine basın.

Yeşil LED yanar. Ekranda **Grup Çağrısı** simgesi görüntülenir.

- 4 Aşağıdakilerden birini yapın:

- Konuşma İzni Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.
-  **PTT** Yan Tonunun bitmesini bekleyin ve mikrofon etkinse anlaşılır biçimde mikrofonu doğru konuşun.

---

### 5 Dinlemek için **PTT** düğmesini bırakın.

Ekranda arayan ve grup adları görüntülenir.

---

### 6 Kanal Boş Göstergesi özelliği etkinse yayını gönderen telsiz **PTT** düğmesini bıraktığı anda yanıtlanmanız için kanalın boş olduğunu gösteren kısa bir uyarı tonu duyarsınız. Çağırıyor yanıtlanmak için **PTT** düğmesine basın.

---

### 7 Çağrı sona erdiğinde Acil Durum kipinden çıkmak için **Acil Durum Kapalı** düğmesine basın.

Telsiz, Giriş ekranına geri döner.

etkin hale gelir. Böylece **PTT** düğmesine basmadan telsiz grubuyla iletişim kurabilirsiniz. Mikrofonun bu etkin durumuna *hot mic* de denir.

#### **NOT:**

Telsiziniz arka aksesuar konektörüne bağlı, IMPRES olmayan mikrofonları algılayamaz. Belirtilen programlanmış konektörde mikrofon algılanmadığında, telsiziniz alternatif konektörü kontrol eder. Bu noktada telsiziniz algılanan mikrofonu öncelik verir.

Telsizinizin Acil Durum Devir Kipi etkinse *hot mic* tekrarlama ve alma süresi önceden programlanmış süre kadardır. Acil Durum Devir Modundayken gelen çağrılar hoparlörden duyulur.

Programlanmış alma süresi içinde **PTT** düğmesine basarsanız **PTT** düğmesini bırakmanız gerektiğini bildiren yasak ton sesi duyarsınız. Telsiz **PTT** düğmesine basıldığını yok sayar ve Acil Durum kipinde kalır.

*Hot mic* sırasında **PTT** düğmesine basarsanız ve *hot mic* süresi dolduktan sonra da basmaya devam ederseniz telsiz **PTT** düğmesi bırakılana kadar yayını yapmayı sürdürür.

Acil Durum Alarmı talebi başarısız olursa telsiz yeniden talep göndermeyi denemez ve doğrudan *hot mic* durumuna geçer.

## Ses Takipli Acil Durum Alarmları

Bu özellik, bir grup telsize Ses Takipli Acil Durum Alarmı göndermenizi sağlar. Telsizinizin mikrofonu otomatik olarak

**NOT:**

Bazı aksesuarlar *hot mic* durumunu desteklemeyebilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Ses Takipli Acil Durum Alarmları Gönderme

Telsizinizden ses takipli Acil Durum Alarmları göndermek için bu prosedürü uygulayın.

- 1 Programlanmış **Acil Durum Açık** düğmesine ya da **Acil Durum** pedalına basın.

Şu sonuçlardan birini görürsünüz:

- Ekranda Tx Alarmı bilgisi ve hedef telsizin adı görüntülenir.
- Ekranda Tx Telgraf ve hedef telsizin adı görüntülenir.

Yeşil LED yanar. **Acil Durum** simgesi görünür.

- 2 Ekranda Alım Gön. bilgisi görüldüğünde anlaşılır biçimde mikrofonu doğru konuşun.

Telsiz aşağıdaki durumlarda yayın yapmayı otomatik olarak durdurur:

- Acil Durum Devir Kipi etkinse *hot mic* ile çağrı alma süreleri arasındaki devir sonlandığında.
- Acil Durum Devir Kipi'nin etkin olmadığı durumlarda *hot mic* süresi dolduğunda.

- 3 Acil Durum kipinden çıkmak için **Acil Durum Kapalı** düğmesine basın.

Telsiz, Giriş ekranına geri döner.

## Acil Durum Kipini Yeniden Başlatma

Bu özellik, sadece Acil Durum Alarmı gönderen telsiz için geçerlidir. Telsizinizde Acil Durum kipini yeniden başlatmak için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- Telsiz Acil Durum kipindeyken kanal değiştirin. Yeni kanalda Acil Durum Alarmı etkinleştirilmişse

telsiz Acil Durum kipinden çıkar ve Acil Durumu yeniden başlatır.

- Acil Durum başlatma veya yayın gönderme sırasında, programlanmış **Acil Durum Açık** düğmesine basın. Telsiz, bu durumdan çıkar ve Acil Durum'u yeniden başlatır.

## Acil Durum Alarmını Gönderdikten Sonra Acil Durum Modundan Çıkma

Bu özellik, sadece Acil Durum Alarmı gönderen telsiz için geçerlidir.

Telsiziniz şu durumlarda Acil Durum kipinden çıkar:

- Bir onay alındığında (yalnızca Acil Durum Alarmı için).
- Alarm göndermek için yapılan tüm yeniden denemeler sona erdiğinde.

### NOT:

Telsiziniz kapatıldığında Acil Durum kipinden çıkar. Telsiziniz yeniden açıldığında Acil Durum kipini otomatik olarak yeniden başlatmaz.

Telsizinizde Acil Durum kipinden çıkmak için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- Programlanmış **Acil Durum Kapalı** düğmesine basın.
- Kanalı, acil durum sistemi yapılandırılmamış yeni bir kanalla değiştirin.  
Ekranda **Acil Durum Yok** bilgisi görüntülenir.

## Alarm Listesinden Alarm Ögesini Silme

Acil Durum kipinden çıkmak üzere Alarm Listesinden alarm ögelerini silmek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Alarm Listesi seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak istenen alarm öğesine gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Sil seçeneğine gidin. Seçmek için  düğmesine basın.

#### NOT:

Maksimum karakter uzunluğu yalnızca en güncel yazılım ve donanıma sahip modeller için geçerlidir. Daha eski yazılım ve donanıma sahip telsiz modelleri için yazılı mesajın maksimum uzunluğu 140 karakterdir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Arapça için metin girişi yönü sağdan sola doğrudur.

## Yazılı Mesaj

Telsiziniz, başka telsizlerden ya da yazılı mesaj uygulamalarından yazılı mesaj gibi veriler alabilmektedir.

İki tür yazılı mesaj vardır: Dijital Mobil Telsiz (DMR) Kısa Metin Mesajı ve metin mesajı. Bir DMR Kısa Yazılı Mesajının maksimum uzunluğu 23 karakterdir. Bir yazılı mesajın maksimum uzunluğu, konu satırı dahil 280 karakterdir. Konu satırı yalnızca e-posta uygulamalarından mesaj aldığınızda görüntülenir.

## Yazılı Mesajlar

Yazılı mesajlar Gelen Kutusu'nda saklanır ve en son alınma sırasına göre sıralanır.

## Yazılı Mesajları Görüntüleme

Telsizinizdeki yazılı mesajları görüntülemek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  ile Gelen Kutusu seçeneğine

gidin. Seçmek için  düğmesine basın.

Gelen Kutusu boşsa:

- Ekranda Liste Boş bilgisi görüntülenir.
- Tuş Takımı Sesi özelliği açıksa bir ton duyulur.

4 Gerekli mesaj için  veya  düğmesine

basın. Seçmek için  düğmesine basın.

Mesaj bir e-posta uygulamasından geliyorsa ekranda bir konu satırı görüntülenir.

2  veya  ile Mesajlar seçeneğine gidin.

Seçmek için  düğmesine basın.

3  veya  ile Gelen Kutusu seçeneğine

gidin. Seçmek için  düğmesine basın.

4 Gerekli mesaj için  veya  düğmesine

basın. Seçmek için  düğmesine basın.

Telemetri Durumu yazılı mesajlarına yanıt veremezsiniz.

Ekranda Telemetri: <Durum Metin Mesajı> bilgisi görüntülenir.

5 Giriş ekranına dönmek için  düğmesine uzun basın.

## Telemetri Durumu Metin Mesajlarını Görüntüleme

Gelen kutusundaki telemetri durumu metin mesajını görüntülemek için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

## Yazılı Mesajları Yanıtlama

Telsizinizden yazılı mesajları yanıtlamak için buradaki prosedürü uygulayın.

Bir yazılı mesaj aldığınızda:

- Ekranda gönderenin adı veya kimliğiyle birlikte Bildirim listesi görüntülenir.
- Ekranda, **Mesaj** simgesi görüntülenir.

#### NOT:

**PTT** düğmesine basılırsa telsiz, Yazılı Mesaj uyarı ekranından çıkar ve mesajı gönderene Özel Çağrı ya da Grup Çağrısı yapar.

#### 1 Aşağıdakilerden birini yapın:

-  veya  ile **Oku** seçeneğine gidin.  
Seçmek için  düğmesine basın.  
Ekranda yazılı mesaj görüntülenir. Mesaj bir e-posta uygulamasından geliyorsa ekranda bir konu satırı görüntülenir.
-  veya  ile **Sonra Oku** seçeneğine gidin. Seçmek için  düğmesine basın.  
Telsiz, yazılı mesajı almadan önce bulunduğunuz ekrana döner.

-  veya  ile **Sil** seçeneğine gidin.  
Seçmek için  düğmesine basın.

#### 2 Aşağıdakilerden birini yapın:

- Gelen kutusuna dönmek için  düğmesine basın.
- Yazılı mesajı yanıtlamak, yönlendirmek veya silmek için ikinci defa  düğmesine basın.

## Metin Mesajlarını Hızlı Metin Mesajıyla Yanıtlama

Telsizinizde metin mesajlarını Hızlı Metin Mesajlarıyla yanıtlamak için bu prosedürü uygulayın.

- Ekranda Liste Boş bilgisi görüntülenir.
- Bir ton duyulur.

4  veya  ile Hepsini Sil seçeneğine gidin.

Seçmek için  düğmesine basın.

5  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda olumlu bir mini bilgi notu görüntülenir.

gönderebilir, yönlendirebilir, düzenleyebilir veya silebilirsiniz.

Gönderilenler klasörü en fazla 30 adet gönderilmiş mesaj saklayabilir. Klasör dolduktan sonra gönderilen her mesaj otomatik olarak klasördeki en eski tarihli mesajın yerini alır.

Mesaj gönderiliyorken mesaj gönderme ekranından çıkarsanız telsiz Gönderilenler klasöründeki mesajın durumunu ekranda ya da sesli olarak herhangi bir bildirimde bulunmaksızın günceller.

Gönderilenler klasöründe mesajın durumu güncellenmeden önce telsizin kipi değiştirilir ya da kapatılırsa telsiz Sürüyor durumundaki hiçbir mesaj işlemi tamamlayamaz ve mesajı otomatik olarak **Gönderme Başarısız** simgesiyle işaretler.

Telsiz bir defada en fazla beş adet Sürüyor durumundaki mesaj işlemi destekler. Bu süre boyunca telsiz hiçbir yeni mesaj gönderemez ve yeni mesajları otomatik olarak **Gönderme Başarısız** simgesiyle işaretler.

Herhangi bir anda  düğmesine uzun basarsanız telsiz, Giriş ekranına geri döner.

## Gönderilen Yazılı Mesajlar

Bir mesaj başka bir telsize gönderildikten sonra Gönderilenler klasöründe saklanır. En son gönderilmiş yazılı mesaj her zaman Gönderilenler klasörünün en üstüne eklenir. Gönderilmiş bir yazılı mesajı yeniden

**NOT:**

Kanal türü (geleneksel dijital veya Capacity Plus gibi) eşleşmiyorsa Gönderilen bir mesajı sadece düzenleyebilir, yönlendirebilir veya silebilirsiniz.

## Gönderilen Yazılı Mesajları Görüntüleme

Gönderilen yazılı mesajları telsizinizde görüntülemek için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
    - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
    - Menüye erişmek için  düğmesine basın.
- 
- 2  veya  düğmesine basarak **Mesajlar** seçeneğine gidin. Seçmek için  düğmesine basın.
- 
- 3  veya  ile **Gönderilenler** seçeneğine gidin. Seçmek için  düğmesine basın.

Gönderilenler klasörü boşa:

- Ekranda **Liste Boş** bilgisi görüntülenir.
- Tuş Takımı Sesi özelliği açıksa düşük bir ton duyulur.

- 
- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ekranın sağ üst köşesindeki simge, mesajın durumunu belirtir. Bkz. [Gönderilenler Simgeleri](#)
- 

## Gönderilen Yazılı Mesajları Gönderme

Telsizinizden yazılı mesaj göndermek için buradaki prosedürü uygulayın.

Gönderilmiş bir mesajı görüntülerken:

- 1 Mesajı görüntülerken  düğmesine basın.
- 
- 2 Gönderilen metin mesajını tekrar gönderebilir veya yönlendirebilirsiniz. Aşağıdakilerden birini yapın:

-  ile **Tekr. Gönder** seçeneğine gidin. Seçmek için  düğmesine basın.
-  ile **Yönlendir** seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

### 3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.
- Telsiz, **Tekr. Gönder** seçeneği ekranına ilerler. Daha fazla bilgi için bkz. [Yazılı Mesajları Tekrar Gönderme sayfa 159](#).

## Gönderilen Yazılı Mesajları Gönderilenler Klasöründen Silme

Telsizinizde Gönderilenler klasörlerindeki gönderilmiş yazılı mesajları silmek için buradaki prosedürü uygulayın.

Gönderilmiş bir mesajı görüntülerken:

1

2

veya  düğmesine basarak **Sil**

seçeneğine gidin. Seçmek için  düğmesine basın.

## Gönderilen Tüm Yazılı Mesajları Gönderilenler Klasöründen Silme

Telsizinizde Gönderilenler klasörlerindeki gönderilmiş yazılı mesajların tamamını silmek için buradaki prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).

- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  ile Gönderilenler seçeneğine gidin. Seçmek için  düğmesine basın.

Gönderilenler klasörü boşa:

- Ekranda Liste Boş bilgisi görüntülenir.
- Bir ton duyulur.

4  veya  düğmesine basarak Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda olumlu bir mini bilgi notu görüntülenir.

-  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın. Telsiz önceki ekrana döner.

## Kayıtlı Metin Mesajları

Bir yazılı mesajı daha sonra göndermek üzere kaydedebilirsiniz.

**PTT** düğmesine basıldığında ya da kip değiştirildiğinde, telsiz metin mesajı yazdığınız ya da düzenlediğiniz sırada metin mesajı yazma/düzenleme ekranından çıkar ve geçerli metin mesajınız otomatik olarak Taslaklar klasörüne kaydedilir.

En son kaydedilmiş yazılı mesaj her zaman Taslaklar listesinin en üstüne eklenir.

Taslaklar klasörü son kaydedilen maksimum 10 mesajı saklar. Klasör dolduktan sonra kaydedilen her mesaj otomatik olarak klasörde yer alan en eski tarihli yazılı mesajın yerini alır.

## Kayıtlı Metin Mesajlarını Görüntüleme

Telsizinizde kayıtlı metin mesajını görüntülemek için bu prosedürü uygulayın.

- Aşağıdakilerden birini yapın:
  - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.
-  veya  düğmesine basarak **Mesajlar** seçeneğine gidin. Seçmek için  düğmesine basın.
-  veya  düğmesine basarak **Taslaqlar** seçeneğine gidin. Seçmek için  düğmesine basın.
- Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

## Kayıtlı Metin Mesajlarını Düzenleme

Telsizinizde kayıtlı metin mesajını düzenlemek için bu prosedürü uygulayın.

- Mesajı görüntülerken  düğmesine basın.
-  veya  düğmesine basarak **Düzenle** seçeneğine gidin. Seçmek için  düğmesine basın.  
Yanıp sönen bir imleç görüntülenir.
- Tuş takımını kullanarak mesajınızı yazın.  
Bir karakter sola gitmek için  düğmesine basın.  
Bir karakter sağa gitmek için  veya  düğmesine basın.  
İstenmeyen karakterleri silmek için  düğmesine basın.  
Metin girişi yöntemini değiştirmek için  düğmesine uzun basın.

- 4 Mesaj oluşturulduktan sonra  düğmesine basın. Aşağıdakilerden birini yapın:
-  veya  düğmesine basarak Gönder seçeneğine gidin. Mesajı göndermek için  düğmesine basın.
  -   veya  düğmesine basarak mesajın kaydedilmesi veya silinmesi arasında seçim yapın. Seçmek için  düğmesine basın.

## Kayıtlı Metin Mesajlarını Taslaklar Klasöründen Silme

Kayıtlı metin mesajlarını telsizinizdeki taslaklardan silmek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
- Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Taslaklar seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 Gerekli mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 5  veya  ile Sil seçeneğine gidin. Metin mesajını silmek için  düğmesine basın.

## Hızlı Yazılı Mesajlar

Telsiziniz, satıcınız tarafından programlanan en fazla 50 Hızlı Yazılı Mesajı desteklemektedir.

Hızlı Yazılı mesajlar önceden tanımlanmıştır ancak göndermeden önce hepsini düzenleyebilirsiniz.

## Hızlı Yazılı Mesajlar Gönderme

Telsizinizden önceden tanımlanmış bir ada Hızlı Metin Mesajları göndermek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Yazılı Mesaj** düğmesine basın. Şu adıma geçin: [adım 6](#).
  - Programlanmış **Tek Tuşla Erişim** düğmesine basın. Ekranda mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir. Şu adıma geçin: [adım 6](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Mesajlar seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Hızlı Mesaj seçeneğine gidin. Seçmek için  düğmesine basın.

- 4 Gerekli Hızlı Mesaj için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 5 Alıcıyı seçmek ve mesaj göndermek için aşağıdaki işlemi yapın.

Ekranda mesajınızın gönderildiğini doğrulayan geçici bir mini bilgi notu görüntülenir.

- 6 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.
- Telsiz, Tekr. Gönder seçeneği ekranına ilerler. Daha fazla bilgi için bkz. [Yazılı Mesajları Tekrar Gönderme sayfa 159](#).

## Metin Giriş Konfigürasyonu Yapma

Telsiziniz farklı metinleri yapılandırmanızı sağlar.

Telsizinize metin girmek için aşağıdaki ayarları yapılandırabilirsiniz:

- Kelime Tahmini
- Kelime Düzelt
- Cümle Byk Hrf
- Kelimelerim

Telsiziniz şu metin girişi yöntemlerini destekler:

- Sayılar
- Simgeler
- Tahmin veya Çok Dokunuşlu
- Dil (Programlanmışsa)

### NOT:

İstediğiniz zaman önceki ekrana dönmek için  düğmesine basın veya Giriş Ekranına dönmek için

 düğmesine uzun basın. Telsiz, faaliyetsizlik sayacının süresi dolduğunda geçerli ekrandan çıkar.

## Kelime Düzelt Özelliğini Etkinleştirme veya Devre Dışı Bırakma

Metin düzenleyiciye girilen kelime yerleşik sözlük tarafından tanınmadığında alternatif kelime seçenekleri önerir.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  düğmesine basarak Metin Girişi seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak **Kelime**

Düzeltilme seçeneğine gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak **Kelime** Düzeltilme seçeneğine gidin. Seçmek için  düğmesine basın.
- **Kelime Düzeltilme** özelliğini etkinleştirmek için düğmesine basın. Etkinleştirilmişse **Etkin yazısının yanında** ✓ simgesi görüntülenir
- **Kelime Düzeltilme** özelliğini devre dışı bırakmak için düğmesine basın. Devre dışı bırakılmışsa **Etkin yazısının yanındaki** ✓ simgesi kaybolur.

## Kelime Tahmini Özelliğini Etkinleştirme veya Devre Dışı Bırakma

**Kelime Tahmini:** Telsiziniz sıklıkla girdiğiniz kelime sıralarını öğrenebilir. Ardından sık kullanılan kelime sırasının ilk kelimesini metin düzenleyiciye girdikten sonra kullanmak isteyebileceğiniz sonraki kelimeyi tamamlar.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak **Telsiz Ayarları** bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak **Metin Girişi** bölümüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak **Kelime Tahmini** bölümüne gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

- Kelime Tahmini özelliğini etkinleştirmek için  düğmesine basın. Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Mikrofon Dinamik Distorsiyon Kontrolünü devre dışı bırakmak için  düğmesine basın. Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Cümle Byk Hrf

Bu özellik her yeni cümlenin ilk kelimesinin ilk harfini otomatik olarak büyük harf yapmak için kullanılır.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Metin Girişi bölümüne gidin. Seçmek için  düğmesine basın.

- 5  veya  düğmesine basarak Cümle Byk Hrf seçeneğine gidin. Seçmek için  düğmesine basın.

- 6 Aşağıdakilerden birini yapın:
  - Cümle Büyük Harf özelliğini etkinleştirmek için  düğmesine basın. Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Cümle Büyük Harf özelliğini devre dışı bırakmak için  düğmesine basın. Devre dışı

birakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Özel Kelimeleri Görüntüleme

Telsizinizin dahili sözlüğüne özel kelimeler ekleyebilirsiniz. Telsiziniz bu kelimelerin bulunduğu bir liste oluşturacaktır.

5  veya  ile Kelimelerim seçeneğine gidin. Seçmek için  düğmesine basın.

---

6 İstenen kelime için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

7  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın.

---

8 Aşağıdakilerden birini seçin.

- Giriş Silinsin Mi? ekranında  düğmesine basarak Evet seçeneğini belirleyin. Ekranda, Giriş Silindi bilgisi görüntülenir.

-  veya  düğmesine basarak **Hayır** seçeneğine gidin. Önceki ekrana dönmek için  düğmesine basın.

## Tüm Özel Kelimeleri Silme

Telsizinizin dahili sözlüğünden tüm özel kelimeleri silmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak **Telsiz Ayarları** bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak **Metin Girişi** bölümüne gidin. Seçmek için  düğmesine basın.

- 5  veya  ile **Kelimelerim** seçeneğine gidin. Seçmek için  düğmesine basın.

- 6  veya  düğmesine basarak **Hepsini Sil** seçeneğine gidin. Seçmek için  düğmesine basın.

- 7 Aşağıdakilerden birini yapın:

- **Giriş Silinsin Mi?** ekranında  düğmesine basarak **Evet** seçeneğini belirleyin. Ekranda **Tüm Kayıtlar Silindi** bilgisi gösterilir.
- Önceki ekrana dönmek için  veya  ile **Hayır** seçeneğine gidin. Seçmek için  düğmesine basın.

## İş Kartları

Bu özellik telsizinizin gerçekleştirilecek görevleri listeleyen dağıtıcıdan mesajları almasını sağlar.

### NOT:

Bu özellik kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

Farklı İş Kartları içeren iki klasör bulunur:

### Görevlerim klasörü

Oturum açtığınız kullanıcı kimliğine atanan kişiselleştirilmiş İş Kartları.

### Paylaşılan Görevler klasörü

Bir gruba atanmış paylaşılan İş Kartları.

İş Kartları Klasörlerinde sıralamak için İş Kartlarına yanıt verebilirsiniz. Varsayılan olarak, klasörler **Tümü**, **Yeni**, **Başlandı** ve **Tamamlandı** şeklindedir. Ek 10 klasör için satıcınızla veya sistem yöneticinizle iletişime geçin.

### NOT:

İş Kartları, telsiz kapatıldıktan ve tekrar açıldıktan sonra bile tutulur.

Tüm İş Kartları, **Tümü** klasöründe yer alır. Telsizinizin nasıl programlandığına bağlı olarak İş Kartları öncelik düzeyleri ve ardından alındıkları zamana göre sıralanır. Yeni İş

Kartları, son değişiklik durumuna sahip İş Kartları ve en yüksek önceliğe sahip İş Kartları önce listelenir. Maksimum sayıda İş Kartına ulaşılmasıyla, bir sonraki İş Kartı otomatik olarak telsizinizdeki en son İş Kartının yerini alır. Telsiziniz, telsiz modelinize bağlı olarak maksimum 100 veya 500 İş Kartını destekler. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün. Telsiziniz aynı İş Kartı Kimliğiyle yinelenen İş Kartlarını otomatik olarak tespit ederek siler.

İş Kartlarının önemine göre dağıtımçı kartlara Öncelik Seviyesi ekler. Üç adet öncelik seviyesi vardır: 1. Öncelik, 2. Öncelik ve 3. Öncelik. 1. Öncelik en yüksek önceliklidir; 3. Öncelik ise en düşük önceliklidir. Ayrıca, önceliği belirtilmemiş İş Kartları da bulunur.

Dağıtımçı aşağıdaki değişiklikleri yaptığında telsiziniz değişikliğe göre güncellenir:

- İş Kartlarının içeriğini değiştirme.
- İş Kartlarına Öncelik Seviyesi ekleme veya bunları düzenleme.
- İş Kartlarını bir klasörden başka bir klasöre taşıma.
- İş Kartını İptal Etme.

## İş Kartı Klasörüne Erişme

İş Kartı Klasörüne erişmek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **İş Kartı** düğmesine basın Şu adıma geçin: [adım 3](#).
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak istenen klasöre gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak istenen İş Kartına gidin. Seçmek için  düğmesine basın.

## Uzak Sunucuda Oturumu Açma veya Kapatma

Bu özellik, kullanıcı kimliğinizi kullanarak uzak sunucuda oturum açıp kapatmanızı sağlar.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Oturum Aç seçeneğine gidin. Seçmek için  düğmesine basın.

Zaten oturum açtıysanız menüde Oturumu Kapat seçeneği görüntülenir.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

- 3 Onay için bekleyin.  
İşlem başarılı olursa:
  - Bir olumlu gösterge tonu duyulur.
  - Ekranında olumlu bir mini bilgi notu görüntülenir.
 İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## İş Kartları Oluşturma

Telsiniziz, bir İş Kartı şablonuna dayanan ve gerçekleştirilmesi gereken görevleri gönderen İş Kartları oluşturabilir.

İş Kartı şablonunu yapılandırmak için CPS programlama yazılımı gerekir.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Kart Oluştur seçeneğine gidin. Seçmek için  düğmesine basın.

## İş Kartlarına Yanıt Verme

Telsinizizden iş kartlarını yanıtlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak ilgili klasöre gidin. Seçmek için  düğmesine basın.
- 4  veya  düğmesine basarak ilgili iş kartına gidin. Seçmek için  düğmesine basın.
- 5 Alt menüye erişmek için bir kez daha  düğmesine basın.  
**Hızlı Yanıt'a** gitmek için karşılık gelen sayı tuşuna (1-9) da basabilirsiniz.

6  veya  düğmesine basarak ilgili iş kartına gidin. Seçmek için  düğmesine basın.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

7 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranında olumsuz bir mini bilgi notu görüntülenir.

## Bir İş Kartı Şablonu Kullanarak İş Kartları Gönderme

Telsizinin bir İş Kartı şablonuyla yapılandırıldıysa İş Kartını göndermek için aşağıdaki işlemleri yapın.

1 Gerekli alan sayısını girmek için tuş takımını kullanın. Seçmek için  düğmesine basın.

2  veya  düğmesine basarak Alan Durumu seçeneğine gidin. Seçmek için  düğmesine basın.

3 İlgili seçenek için  veya  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Gönder seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

5 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Birden Fazla İş Kartı Şablonu Kullanarak İş Kartları Gönderme

Telsizinin birden fazla İş Kartı şablonuyla yapılandırıldıysa İş Kartlarını göndermek için aşağıdaki işlemleri yapın.

- 1 İlgili seçenek için  veya  düğmesine basın. Seçmek için  düğmesine basın.

- 2  veya  düğmesine basarak Gönder seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

- 3 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## İş Kartlarını Silme

Telsizinizden iş kartlarını silmek için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:

- Programlanmış **İş Kartı** düğmesine basın. Şu adıma geçin: [adım 4](#)
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak İş Kartlarını seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak istenen klasöre gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tümünü klasörüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak ilgili İş Kartına gidin. Seçmek için  düğmesine basın.

6 İş Kartını görüntülerken tekrar  düğmesine basın.

7  veya  düğmesine basarak Sil seçeneğine gidin. Seçmek için  düğmesine basın.

Ekranında, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir.

8 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranında olumsuz bir mini bilgi notu görüntülenir.

## Tüm İş Kartlarını Silme

Telsizinizden tüm iş kartlarını silmek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **İş Kartı** düğmesine basın. Şu adıma geçin: [adım 3](#).
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak İş Kartları seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak istenen klasöre gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tümünü klasörüne gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Hepsini Sil seçeneğine gidin. Seçmek için  düğmesine basın.

6 Aşağıdakilerden birini yapın:

-  veya  ile Evet seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda olumlu bir mini bilgi notu görüntülenir.
-  veya  düğmesine basarak Hayır seçeneğine gidin. Seçmek için  düğmesine basın. Telsiz önceki ekrana döner.

## Gizlilik

Bu özellik, yazılım tabanlı şifreleme çözümüyle bir kanaldaki yetkisiz kullanıcıların etkinlikleri dinlemelerini engeller. Bir yayının sinyal gönderme ve kullanıcı kimliği kısımları şifrelenemez.

Gizliliğin etkin olduğu yayınlar göndermek için telsizinizin kanaldaki gizliliği etkin hale getirilmiş olmalıdır; ancak yayın almak için bu işlem gerekli değildir. Telsiz, gizliliğin etkin olduğu kanaldayken açık veya şifrelenmemiş yayınları almaya devam eder.

Bazı telsiz modelleri Gizlilik özelliğini sunmayabilir veya farklı bir yapılandırmaya sahip olabilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

Telsiziniz iki gizlilik türünü destekler ancak yalnızca biri telsizinize atanabilir. Bu türler şunlardır:

- Temel Gizlilik
- Gelişmiş Gizlilik

Gizliliğin etkin olduğu bir çağrıyı veya veri yayınına çözmek için telsizinizin yayını gönderen telsizle Temel Gizlilik için aynı Gizlilik Anahtarına veya Gelişmiş Gizlilik için aynı Anahtar Değerine ve Anahtar Kimliğine sahip olması gerekir.

Telsiziniz farklı bir Gizlilik Anahtarına veya farklı bir Anahtar Değeri ve Anahtar Kimliğine sahip şifrelenmiş bir çağrı alırsa Temel Gizlilikte karıştırılmış bir yayın duyarsınız ya da Gelişmiş Gizlilikte hiçbir şey duymazsınız.

Gizliliğin etkin olduğu bir kanalda telsiziniz programlanma şekline göre açık veya şifrelenmemiş çağrılar alabilir. Ayrıca telsiziniz programlanma şekline göre uyarı tonu çalabilir veya çalmayabilir.

Telsiz yayın gönderirken yeşil LED yanar ve gizliliğin etkin olduğu bir yayını almaya devam ediyorken hızla yanıp söner.

#### NOT:

Bu özellik aynı frekansta olan Halk Bandı Radyo kanallarında uygulanamaz.

## Gizliliği Açma veya Kapatma

Telsizinizde gizliliği açmak veya kapatmak için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Gizlilik** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için düğmesine basın.

### 2

 veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için düğmesine basın.

### 3

 veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için düğmesine basın.

### 4

 veya  düğmesine basarak Gizlilik seçeneğine gidin. Seçmek için düğmesine basın.

### 5 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak **Açık** seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, **Açık** bilgisinin yanında  simgesi görüntülenir.
-  veya  düğmesine basarak **Kapalı** seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, **Kapalı** bilgisinin yanında  simgesi görüntülenir.

## Yanıt Engelleme

Bu özellik, telsizinizin gelen yayınları yanıtlamasını engellemeye yardımcı olur.

### NOT:

Bu özelliği satın alabilirsiniz. Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

Bu özellik etkinleştirildiğinde telsiziniz Telsiz Kontrol, Çağrı Uyarısı, Telsizi Devre Dışı Bırakma, Uzaktan İzleme, Otomatik Kayıt Hizmeti (ARS), Özel Mesajları Yanıtlama ve GNSS konum raporları gönderme gibi gelen yayınları

yanıtlamak üzere giden yayın üretmez. Bu özellik etkinleştirildiğinde telsiziniz Onaylı Özel Çağrılar alamaz. Ancak telsiziniz yayını manuel olarak gönderebilir.

## Yanıt Engelleme Özelliğini Açma veya Kapatma

Telsizinizde Yanıt Engelleme özelliğini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

Programlanmış **Yanıt Engelleme** düğmesine basın.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda kısa süreliğine olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda kısa süreliğine olumsuz bir mini bilgi notu görüntülenir.

## Çoklu Saha Kontrolleri

Bu özellikler ancak geçerli telsiz kanalınız IP Site Connect veya Capacity Plus—Çoklu Saha yapılandırmasının bir parçasıysa geçerlidir.

### Manuel Saha Araması Başlatma

Alınan sinyal gücü düşükse daha iyi sinyale sahip başka bir saha bulmak üzere manuel saha araması başlatmak için bu prosedürü uygulayın.

Telsiz yeni bir saha bulursa:

- Bir olumlu gösterge tonu duyulur.

Telsiz yeni bir saha bulamazsa:

- Bir olumsuz gösterge tonu duyulur.

## Saha Kilidi Açık/Kapalı

Açıldığında, telsiz yalnızca geçerli sahayı arar. Telsiz, kapatıldığında geçerli sahayla birlikte diğer sahaları da arar.

Programlanmış **Saha Kilidi** düğmesine basın.

**Saha Kilidi** işlevi açıksa:

- Telsizin geçerli sahaya kilitlendiğini belirten bir olumlu gösterge tonu duyulur.
- Ekranda, *Site Locked* (Saha Kilitlendi) bilgisi görüntülenir.

**Saha Kilidi** işlevi kapalıysa:

- Telsizin kilidinin açıldığını belirten bir olumsuz gösterge tonu duyulur.
- Ekranda, *Site Unlocked* (Saha Kilidi Açıldı) bilgisi görüntülenir.

---

## Komşu Saha Listesine Erişme

Bu özellik kullanıcının geçerli ana sahanın yanında bulunan sahaların listesini kontrol etmesini sağlar. Komşu Saha Listesine erişmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  ile Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.
- 4  veya  ile Komşu Sahalar seçeneğine gidin. Seçmek için  düğmesine basın.

## Güvenlik

Bu özellik, sistemdeki herhangi bir telsizi etkinleştirmenize veya devre dışı bırakmanıza olanak tanır.

Örneğin, yetkisiz kullanıcıların kullanmasını önlemek için, çalınan bir telsizi devre dışı bırakmak ve yeniden elinize geçtiğinde telsizi etkinleştirmek isteyebilirsiniz.

Telsizi etkinleştirmek veya devre dışı bırakmak için biri kimlik doğrulamalı diğeri kimlik doğrulamasız olmak üzere iki yol vardır.

Telsizi Kimlik Doğrulamasıyla Devre Dışı Bırakma satın alınabilir bir özelliktir. Telsizi Kimlik Doğrulamasıyla Devre Dışı Bırakma özelliğinde, telsizi etkinleştirir veya devre dışı bırakırken doğrulama gerekir. Telsiziniz, bu özelliği Kullanıcı Kimliği Doğrulamalı bir hedef telsizde başlattığınızda, parola gerekir. Hedef telsiz için parola, CPS üzerinden önceden programlanmıştır.

Telsiz Etkinleştirme veya Telsiz Devre Dışı Bırakma işlemi sırasında  düğmesine basarsanız onay almazsınız.

### NOT:

Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Telsizleri Devre Dışı Bırakma

Telsizinizi devre dışı bırakmak için buradaki prosedürü uygulayın.

- 1 Programlanmış **Telsiz Devre Dışı** düğmesine basın.
- 2 Gerekli ad veya kimlik için  ya da  düğmesine basın.

3 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanıp söner.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönülür.

4 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.

- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Telsizleri Devre Dışı Bırakma

Telsizinizde Kişi listesini kullanarak telsizi devre dışı bırakmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  ile Tlsz Dev Dışı seçeneğine gidin.

5 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanıp söner.
- Parola ekranı görüntülenir.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönülür.

6 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.

- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Telsizleri Devre Dışı Bırakma

Telsizinizde elle çevirmeyi kullanarak telsizi devre dışı bırakmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile Telsiz Numarası seçeneğine gidin. Seçmek için  düğmesine basın. İlk metin satırında Telsiz No: bilgisi görüntülenir.

5 Abone kimliğini girin ve devam etmek için  düğmesine basın.

6  veya  ile Tlsz Dev Dışı seçeneğine gidin.

7 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Ekranda, istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanıp söner.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönülür.

8 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Telsizleri Etkinleştirme

Telsizinizi etkinleştirmek için buradaki prosedürü uygulayın.

1 Programlanmış **Telsiz Etkin** düğmesine basın.

- 2 Gerekli ad veya kimlik için  ya da  düğmesine basın.

- 3 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Ekranda Telsiz Etkin bilgisi ile abone adı veya kimliği gösterilir. Yeşil LED yanar.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönlür.

- 4 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Kişi Listesini Kullanarak Telsizleri Etkinleştirme

Kişi listesini kullanarak telsizinizi etkinleştirmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

- 3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  ile Telsiz Etkin seçeneğine gidin.

5 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Yeşil LED yanıp söner.Ekranda Telsiz Etkin bilgisi ile abone adı veya kimliği gösterilir. Yeşil LED yanar.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
- Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönlür.

6 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.

- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Elle Çevirmeyi Kullanarak Telsizleri Etkinleştirme

Elle çevirmeyi kullanarak telsizi etkinleştirmek için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Kişiler bölümüne gidin.Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Elle Çevirme seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile Özel Çağrı seçeneğine gidin.

Seçmek için  düğmesine basın.

İlk metin satırında Telsiz No: bilgisi görüntülenir.

---

5 Abone kimliğini girin ve devam etmek için  düğmesine basın.

---

6  veya  ile Telsiz Etkin seçeneğine gidin.

---

7 Seçmek için  düğmesine basın. Aşağıdaki senaryolardan biri gerçekleşir:

- Yeşil LED yanıp söner. Ekranda Telsiz Etkin bilgisi ile abone adı veya kimliği gösterilir. Yeşil LED yanar.
- Parola ekranı görünür.

Parolayı girin. Devam etmek için  düğmesine basın.

- Parola doğruysa ekranda istenen işlemin sürdüğünü belirten geçici bir mini bilgi notu görüntülenir. Yeşil LED yanar.
  - Parola yanlışsa ekranda olumsuz bir mini bilgi notu görüntülenir ve önceki ekrana geri dönülür.
- 

8 Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda olumlu bir mini bilgi notu görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
  - Ekranda olumsuz bir mini bilgi notu görüntülenir.
- 

## Yalnız Çalışan

Bu özellik, önceden belirlenen süre boyunca telsiz düğmesine basma ya da kanal seçimi gibi hiçbir kullanıcı etkinliğinin olmadığı durumlarda acil durum çağrısı yapar.

Programlanan süre boyunca hiçbir kullanıcı etkinliği olmamasının ardından, telsiz faaliyetizlik süresi dolar dolmaz sesli bir göstergeyle sizi önceden uyarır.

Önceden belirlenen süre boyunca yine onay vermezseniz telsiz bir Acil Durum Alarmı başlatır.

Bu özelliğe aşağıdaki Acil Durum Alarmlarından yalnız biri atanabilir:

- Acil Durum Alarmı
- Çağrılı Acil Durum Alarmı
- Ses Takipli Acil Durum Alarmı 

Telsiz, sesli mesajların işlem yapılana dek devam edebilmesine olanak tanıyacak şekilde acil durumda kalır. Acil Durum'dan çıkma yolları hakkında daha fazla bilgi için bkz. [Acil Durum İşlemi sayfa 435](#).

#### **NOT:**

Bu özellik, sadece bu işlevin etkinleştirildiği telsizlerde kullanılabilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Bluetooth

Bu özellik sayesinde telsizinizi Bluetooth bağlantısı aracılığıyla Bluetooth özellikli cihazlarla (aksesuar)

kullanabilirsiniz. Telsiziniz hem Motorola Solutions'ın hem de piyasada bulunan diğer ticari markaların (COTS) Bluetooth özellikli cihazlarını desteklemektedir.

Bluetooth 10 metrelik (32 ft) bir görüş alanı menziline çalışır. Telsiziniz ve Bluetooth özellikli cihazınız arasındaki bu mesafenin engelsiz olması gerekir. Motorola Solutions, yüksek güvenilirlik için telsiz ve aksesuarı ayırmamanızı önerir.

Kapsama alanı sınırlarına yakın olduğunuz durumlarda hem konuşma hem de ton kalitesi düşer, sesler "karışık" ve "bozuk" çıkar. Bu sorunu çözerken yeniden net ses alımı sağlamak için telsizinizle Bluetooth özellikli cihazınızı birbirlerine yaklaştırın (tanımlanmış 10 metrelik menzil içine alın). Telsizinizin Bluetooth işlevinin maksimum gücü, 10 metrelik menzil içerisinde 2,5 mW'dir (4 dBm).

Telsiziniz, birbirinden farklı türlerde Bluetooth özellikli cihazlarla aynı anda üç Bluetooth bağlantısı gerçekleştirilmesini destekler. Örneğin kulaklık, tarayıcı ve bir Yalnızca Bas Konuş Cihazı (POD). Aynı tip Bluetooth özellikli cihazlarla çoklu bağlantı desteklenmemektedir.

Bluetooth özellikli cihazınızın tüm özellikleri hakkında ayrıntılar için Bluetooth özellikli cihazınızın kullanım kılavuzuna bakın.

**NOT:**

CPS ile devre dışı bırakıldığında Bluetooth ile ilgili tüm özellikler devre dışı kalır ve Bluetooth cihazı veritabanı silinir.

## Bluetooth'u Açık ve Kapalı Konuma Getirme

Bluetooth'u açıp kapatmak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 3  veya  ile Durumum seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda On (Açık) ve Off (Kapalı) seçenekleri görüntülenir. Geçerli durum bir  simgesi ile belirtilir.

---

- 4 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Açık bilgisinin yanında  simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Kapalı bilgisinin yanında  simgesi görüntülenir.

## Bluetooth Cihazlarına Bağlanma

Bluetooth cihazlarını bağlamak için bu prosedürü uygulayın.

Bluetooth özellikli cihazınızı açın ve eşleştirme modunda bırakın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Cihazlar ögesine gidin. Seçmek için  düğmesine basın.

4 Aşağıdakilerden birini yapın:

- İstene cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.
- Kullanılabilir cihazları bulmak için  veya  düğmesine basarak Cihazları Bul ögesine gidin. İstene cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Bağlan ögesine gidin. Seçmek için  düğmesine basın. Eşleştirmenin tamamlanması için Bluetooth özellikli cihazınızda başka işlemler yapılması gerekebilir.

Bluetooth özellikli cihazınızın kullanım kılavuzuna bakın.

Ekranında <Cihaza> Bağlanıyor bilgisi görüntülenir.

Onay için bekleyin.

İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranında <Cihaz> Bağlandı bilgisi ve **Bluetooth Bağlandı** simgesi görüntülenir.
- Ekranında bağlı cihazın yanında ✓ ögesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranında Bağlantı Başarısız bilgisi görüntülenir.

**NOT:**

Pin kodu gerekirse bkz. [Telsizlere Şifre Kullanarak Erişme sayfa 195](#).

## Keşfedilebilir Kipinde Bluetooth Cihazlarına Bağlanma

Bulunabilirlik modundaki Bluetooth cihazlarını bağlamak için bu prosedürü uygulayın.

Bluetooth özellikli cihazınızı açın ve eşleştirme modunda bırakın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Bluetooth öğesine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmelerine basarak Beni Bul öğesine gidin. Seçmek için  düğmesine basın. Telsiz artık programlanan süre boyunca diğer Bluetooth özellikli cihazlar tarafından bulunabilir. Buna, Bulunabilir Kip adı verilir.

Onay için bekleyin.  
İşlem başarılı olursa:

- Bir olumlu gösterge tonu duyulur.
- Ekranda <Cihaz> Bağlandı bilgisi ve **Bluetooth Bağlandı** simgesi görüntülenir.
- Ekranda bağlı cihazın yanında  ögesi görüntülenir.

İşlem başarısız olursa:

- Bir olumsuz gösterge tonu duyulur.
- Ekranda Bağlantı Başarısız bilgisi görüntülenir.

## Bluetooth Cihazlarının Bağlantısını Kesme

Bluetooth cihazlarının bağlantısını kesmek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Cihazlar öğesine gidin. Seçmek için  düğmesine basın.
- 4 İstenen cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Bağlantıyı

Kes öğesine gidin. Seçmek için  düğmesine basın.

Ekranda <Cihaz> Bağlantı Kesiliyor bilgisi görüntülenir.

#### NOT:

Bağlantının kesilmesi için Bluetooth özellikli cihazınızda başka işlemler yapılması gerekebilir. Bluetooth özellikli cihazlarınızın ilgili kullanım kılavuzuna bakın.

Onay için bekleyin.

- Bir ton duyulur.
- Ekranda <Cihaz Adı> Bağlantı Kesildi bilgisi görüntülenir ve **Bluetooth Bağlandı** simgesi kaybolur.
- Bağlı cihazın yanındaki  öğesi kaybolur.

## Ses Yönlendirmesini Dahili Telsiz Hoparlörü ve Bluetooth Cihazı Arasında Değiştirme

Ses yönlendirmesini telsizin dahili hoparlörü ve Bluetooth özellikli harici cihaz arasında değiştirmek için bu prosedürü uygulayın.

Programlanmış **Bluetooth Ses Anahtarı** düğmesine basın.

Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Bir ton duyulur. Ekranda Sesi Telsize Yönlendir bilgisi görüntülenir.
- Bir ton duyulur. Ekranda Sesi Bluetooth'a Yönlendir bilgisi görüntülenir.

## Cihaz Ayrıntılarını Görüntüleme

Telsiziniz hakkındaki cihaz ayrıntılarını görüntülemek için bu prosedürü uygulayın.

1

Menüye erişmek için  düğmesine basın.

2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.

---

3  veya  ile Cihazlar seçeneğine gidin. Seçmek için  düğmesine basın.

---

4 İstenen cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

5  veya  ile Ayrıntıları Gör seçeneğine gidin. Seçmek için  düğmesine basın.

---

## Cihaz Adını Silme

Bağlantısı kesilen bir cihazı Bluetooth özellikli cihazlar listesinden silebilirsiniz.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  ile Bluetooth seçeneğine gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Cihazlar ögesine gidin. Seçmek için  düğmesine basın.

---

4 İstenen cihaz için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

5  veya  ile Sil seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Cihaz Silindi bilgisi görüntülenir.

---

## Bluetooth Mikrofon Kazancı

Bu özellik kullanıcının bağlı Bluetooth özellikli cihazının mikrofon kazancı değerini kontrol etmesini sağlar.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  ile Bluetooth seçeneğine gidin.

Seçmek için  düğmesine basın.

3  veya  düğmesine basarak BT Mik

Kazancı seçeneğini görebilirsiniz. Seçmek için  düğmesine basın.

4 BT Mik Kazancı tipi ve geçerli değerler için 

veya  düğmesine basın. Seçmek için  düğmesine basın. Değerleri buradan düzenleyebilirsiniz.

5 Değerleri artırmak ya da azaltmak için  veya

 düğmesine basın. Seçmek için  düğmesine basın.

## İç Konum

### NOT:

İç Konum özelliği en güncel yazılım ve donanıma sahip modeller için geçerlidir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

İç Konum, telsiz kullanıcılarını takip etmek için kullanılır. İç Konum etkinleştirildiğinde telsiz kısıtlı keşfedilebilir kipte olur. Telsizi bulmak ve konumunu belirlemek için özel işaretlemeler kullanılır.

## İç Konum Özelliğini Açma veya Kapatma

İç Konum özelliğini, aşağıdaki işlemlerden birini gerçekleştirerek açabilir veya kapatabilirsiniz.

- Bu özelliğe menüden erişin.
  - a.  ile menüye erişim düğmesine basın.
  - b.  ya da  ile Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.

- c.  ya da  veya İç Konum seçeneğine gidin ve seçmek için  düğmesine basın.
- d. İç Konum özelliğini açmak için  düğmesine basın.
- Ekranında İç Konum Açık bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur. Aşağıdaki senaryolardan biri gerçekleşir:
- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi görüntülenir.
  - Başarısız olursa ekranda Açma İşlemi Başarısız bilgisi görüntülenir. Olumsuz gösterge tonu duyulur.
- e. İç Konum özelliğini kapatmak için  düğmesine basın.
- Ekranında İç Konum Kapalı bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur. Aşağıdaki senaryolardan biri gerçekleşir:
- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi kaybolur.

- Başarısız olursa ekranda Kapatma İşlemi Başarısız bilgisi görüntülenir. Olumsuz gösterge tonu duyulur.
- Bu özelliğe programlanmış düğmeyi kullanarak erişin.
- a. İç Konum özelliğini açmak için programlanmış **İç Konum** düğmesine uzun basın.
- Ekranında İç Konum Açık bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur. Aşağıdaki senaryolardan biri gerçekleşir:
- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi görüntülenir.
  - Başarısız olursa ekranda Açma İşlemi Başarısız bilgisi görüntülenir. Başarısız olursa olumsuz gösterge tonu duyarsınız.
- b. İç Konum özelliğini kapatmak için programlanmış **İç Konum** düğmesine basın.
- Ekranında İç Konum Kapalı bilgisi görüntülenir. Olumlu bir gösterge tonu duyulur. Aşağıdaki senaryolardan biri gerçekleşir:

- Başarılı olursa Giriş ekranında İç Konum Kullanılabilir simgesi kaybolur.
- Başarısız olursa ekranda Kapatma İşlemi Başarısız bilgisi görüntülenir. Başarısız olursa olumsuz gösterge tonu duyarsınız.

- 4  ya da  düğmesine basarak İşaretler öğesine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

Ekranda, işaretleme bilgileri görüntülenir.

## İç Konum İşaretleme Bilgilerine Erişim

İç Konum işaretleri ile ilgili bilgilere erişmek için bu prosedürü uygulayın.

- 1  ile menüye erişin düğmesine basın.
- 2  ya da  ile Bluetooth seçeneğine gidin ve seçmek için  düğmesine basın.
- 3  ya da  veya İç Konum seçeneğine gidin ve seçmek için  düğmesine basın.

## Bildirim Listesi

Telsizinizde, kanaldaki okunmamış metin mesajları, telemetri mesajları, cevapsız çağrılar ve çağrı uyarıları gibi okunmamış tüm olaylarınızı toplayan bir Bildirim listesi bulunur.

Bildirim listesinde bir veya daha fazla olay olduğunda ekranda, **Bildirim** simgesi görüntülenir.

Bu liste en fazla 40 okunmamış olayı destekler. Liste tam olarak dolduğunda, gerçekleşecek olan bir sonraki olay otomatik olarak en eski olayın yerini alır. Olaylar okunduktan sonra Bildirim listesinden kaldırılır.

Yazılı mesaj, cevapsız çağrı ve çağrı uyarısı olayları için maksimum bildirim sayısı; 30 yazılı mesaj ve 10 cevapsız çağrı veya çağrı uyarısıdır. Bu maksimum sayı ayrı özellik (iş kartları veya yazılı mesajlar ya da cevapsız çağrılar veya çağrı uyarıları) listesi kapasitesine bağlıdır.

## Bildirim Listesine Erişim

Telsizinizde Bildirim listesine erişmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  ile Bildirim seçeneğine gidin.  
Seçmek için  düğmesine basın.

---

- 3 Gerekli olay için  veya  düğmesine basın.  
Seçmek için  düğmesine basın.  
  
Giriş ekranına dönmek için  düğmesine uzun basın.

---

## Otomatik Menzilli Aktarıcı Sistemi

Otomatik Menzilli Aktarıcı Sistemi (ARTS), telsiziniz diğer ARTS özellikli telsizlerin menzilinin dışına çıktığında sizi uarmak üzere tasarlanan ve yalnızca analog olarak çalışan bir özelliktir.

ARTS özellikli telsizler birbirlerinin kapsama alanı içinde olup olmadıklarını belirlemek için periyodik olarak sinyal yayınlar veya alır.

Telsiziniz aşağıdaki durum göstergelerini sağlar:

### İlk Kez Uyarısı

Bir ton duyulur.

Ekranda, kanal adından sonra Menzilde bilgisi görüntülenir.

### ARTS Kapsama Alanı İçinde Uyarısı

Bir ton sesi duyulur (bu şekilde programlandıysa).

Ekranda, kanal adından sonra Menzilde bilgisi görüntülenir.

### ARTS Kapsama Alanı Dışında Uyarısı

Bir ton duyulur. Kırmızı LED ışığı hızla yanıp söner.

Ekranda, Giriş ekranıyla dönüşümlü olarak Kapsam Dışı bilgisi görüntülenir.

### NOT:

Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Kablosuz Programlama

Bayınız telsizinizi Kablosuz Programlama (OTAP) aracılığıyla hiçbir fiziksel bağlantı olmadan uzaktan güncelleyebilir. Ayrıca, bazı ayarlar OTAP kullanılarak yapılandırılabilir.

Telsizinize OTAP işlemi uygulandığında yeşil LED yanıp söner.

Telsiziniz yüksek hacimde veri aldığı anda:

- Ekranda, **Yüksek Hacimli Veri** simgesi görüntülenir.
- Kanal meşgul hale gelir.
- **PTT** düğmesine bastığınızda olumsuz bir ton duyulur.

OTAP tamamlandığında, yapılandırmaya bağlı olarak:

- Bir ton duyulur. Ekranda **Güncelleme Ynđn Bşltiyor** bilgisi görüntülenir. Telsiziniz kapanıp tekrar açılarak yeniden başlar.
- Şimdi Yn. Başlıt veya Ertele seçeneğini belirleyebilirsiniz. Ertele seçeneğini belirlediğinizde, telsiziniz önceki ekrana döner. Otomatik yeniden başlatma gerçekleştirilinceye kadar ekranda **OTAP Gecikme Zamanlayıcı** simgesi görüntülenir.

Telsiziniz otomatik yeniden başlatma sonrasında açıldığında:

[Geribildirim Gönder](#)

- İşlem başarılı olursa ekranda **Yzlm Gncllme Tmamındı** bilgisi görüntülenir.
- İşlem başarısız olursa ekranda **Yzlm Gncllme Bşrısız** bilgisi görüntülenir.

Güncellenmiş yazılım sürümü için bkz. [Yazılım Güncelleme Bilgilerini Kontrol Etme sayfa 229](#).

## Yayın Engelleme

Yayın engelleme özelliği, kullanıcının telsizden gelen tüm yayını engellemesini sağlar.

### NOT:

Yayın Engelleme kipinde Bluetooth ve Wi-Fi özellikleri kullanılabilir.

## Yayın Engelleme İşlevini Etkinleştirme

Yayın Engelleme özelliğini etkinleştirmek için bu prosedürü uygulayın.

Aşağıdaki işlemlerden birini gerçekleştirin:

-  ya da  düğmesine basarak Tx Engeli seçeneğine gidin ve seçmek için  düğmesine basın.
- Programlanabilir **Yayın Engelleme** düğmesine basın.

- Bir olumlu gösterge tonu duyulur.
- Ekranda Tx Engelleme Açık bilgisi gösterilir.

### NOT:

Yayın Engelleme durumu telsiz açıldıktan sonra değişmez.

## Yayın Engelleme İşlevini Devre Dışı Bırakma

Yayın Engelleme özelliğini devre dışı bırakmak için bu prosedürü uygulayın.

Aşağıdaki işlemlerden birini gerçekleştirin:

-  ya da  düğmesine basarak Tx Engeli seçeneğine gidin ve seçmek için  düğmesine basın.

- Programlanabilir **Yayın Engelleme** düğmesine basın.

- Bir olumsuz gösterge tonu duyulur. Yayın normal kullanıma döner.
- Ekranda Tx Engelleme Kapalı bilgisi gösterilir.

## Üçüncü Taraf Çevre Birimleri Bağlantı Kiplerini Seçme

Üçüncü taraf çevre birimleri bağlantı kiplerinden birini seçmek için bu prosedürü uygulayın:

- Motorola Solutions
- PC ve Ses
- Veri Aksesuarı
- Telemetri
- Genel

1

Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Kablo Türü seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak istenen bağlantı kipine gidin. Seçmek için  düğmesine basın.

Seçilen bağlantı kipi ekranda görüntülenir. Ekran önceki menüye döner.

## Alınan Sinyal Güç Göstergesi

Bu özellik, Alınan Sinyal Güç Göstergesi (RSSI) değerlerini görüntülemenize olanak tanır.

Ekranın sağ üst köşesinde **RSSI** simgesi görüntülenir. **RSSI** simgesi hakkında daha fazla bilgi için bkz. [Ekran Simgeleri](#).

## RSSI Değerlerini Görüntüleme

Telsizinizdeki RSSI değerlerini görüntülemek için buradaki prosedürü uygulayın.

Giriş ekranındayken:

1 Tamamı 5 saniye içinde olmak üzere  düğmesine üç kez ve hemen ardından  düğmesine üç kez basın.  
Ekranda geçerli RSSI değerleri görüntülenir.

2 Giriş ekranına dönmek için  düğmesine uzun basın.

## Şifre Kilidi Özellikleri

Bu özellik, telsiz açıldığında şifre sorarak cihaza erişimi kısıtlamanızı sağlar.

Şifre girmek için tuş takımlı mikrofon ya da **Yukarı/Aşağı Kaydırma** düğmelerini kullanabilirsiniz.

## Telsizlere Şifre Kullanarak Erişme

Telsizinize bir şifre kullanarak erişmek için bu prosedürü uygulayın.

- 1 Dört basamaktan oluşan geçerli şifreyi girin.

**NOT:**

**Acil Durum** pedalı kullanıldığında telsizin açılması için şifre girme gerekliliği ortadan kalkar.

- Tuş takımlı bir mikrofon kullanın.
- Her bir rakamın sayısal değerini düzenlemek için

veya  düğmesine ve sonraki rakamı

girmek ve diğer rakama geçmek için  düğmesine basın.

- 2 Şifreyi girmek için  düğmesine basın.

İşlem başarılı olursa telsiz açılır.

İşlem başarısız olursa:

- Birinci ve ikinci denemeden sonra, ekranda **Yanlış Şifre** uyarısı görüntülenir. Şu adımları tekrarlayın: Adım **adım 1**.
- Üçüncü denemeden sonra, ekranda **Yanlış Şifre**, ardından **Telsiz Kilitlendi** bilgisi görüntülenir. Bir ton duyulur. Sarı LED ışığı iki kez yanıp söner. Telsiz, 15 dakikalığına kilitlenir.

**NOT:**

Telsiziniz kilitli durumda sadece **Açma/Kapatma/Ses Kontrol Topuzu** ve programlanmış **Ekr Ayd** düğmesiyle yapılan girişlere yanıt verir.

## Kilitli Durumdaki Telsizlerin Kilidini Açma

Telsiziniz, kilitli durumdayken çağrı alamaz. Kilitli durumdaki telsizinizin kilidini açmak için bu prosedürü uygulayın.

Aşağıdakilerden birini yapın:

- Telsizin gücü açıksa 15 dakika bekleyin ve daha sonra [Telsizlere Şifre Kullanarak Erişme sayfa 195](#) bölümündeki adımları tekrarlayarak telsize erişin.
- Telsizin gücü kapalıysa gücü açın. Telsiziniz 15 dakikalık kilitli kalma süresini tekrar başlatır. Bir ton duyulur. Sarı LED ışığı iki kez yanıp söner. Ekranda Radio Locked (Telsiz Kilitlendi) bilgisi görüntülenir.  
15 dakika bekleyin ve daha sonra [Telsizlere Şifre Kullanarak Erişme sayfa 195](#) bölümündeki adımları tekrarlayarak telsize erişin.

## Şifre Kilidini Açma ve Kapatma

Telsizinizde şifre kilidini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Şifre Kilidi seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Dört basamaktan oluşan geçerli şifreyi girin.
  - Tuş takımlı bir mikrofon kullanın.
  - Her bir rakamın sayısal değerini düzenlemek için  veya  düğmesine ve sonraki rakamı girmek ve diğer rakama geçmek için  düğmesine basın. Bastığınız her rakam için olumlu bir gösterge tonu duyulur.

- 6 Şifreyi girmek için  düğmesine basın.

Şifre yanlışsa ekranda Yanlış Şifre mesajı görüntülenir ve ekran otomatik olarak önceki menüye döner.

## 7 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Aç seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Aç seçeneğinin yanında  simgesi görüntülenir.
-  veya  düğmesine basarak Kapat seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Kapat seçeneğinin yanında  simgesi görüntülenir.

## Şifre Değiştirme

Telsizinizdeki şifreleri değiştirmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Şifre Kilidi seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Geçerli dört haneli şifreyi girin ve devam etmek için  düğmesine basın. Şifre yanlışsa ekranda Yanlış Şifre mesajı görüntülenir ve ekran otomatik olarak önceki menüye döner.

- 6  veya  ile ŞFR Değiştir seçeneğine gidin. Seçmek için  düğmesine basın.

7 Yeni bir dört haneli şifre girin ve devam etmek için  düğmesine basın.

8 Yeni dört haneli şifreyi tekrar girin ve devam etmek için  düğmesine basın.

İşlem başarılı olursa ekranda Şifre Değiştirdi mesajı görüntülenir.

Başarısız olursa ekranda Şifreler Eşleşmiyor bilgisi görüntülenir.

Ekran otomatik olarak önceki menüye döner.

İstediğiniz zaman Giriş ekranına dönmek için  düğmesine uzun basın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  ile Telsiz Programla seçeneğine gidin. Seçmek için  düğmesine basın.

## Ön Panel Yapılandırma

Telsiz kullanımınızı iyileştirmek için Ön Panel Yapılandırma (FPC) bölümündeki belirli özellik parametrelerini özelleştirebilirsiniz.

## Ön Panel Yapılandırma Kipine Girme

Telsizinizde ön panel programlama kipine girmek için buradaki prosedürü uygulayın.

## FPP Kipi Parametrelerini Düzenleme

Özellik parametreleri arasında gezinirken gerektiğinde aşağıdaki düğmeleri kullanın.

-  ,  - Seçenekler arasında gezinmenizi, değerleri artırıp azaltmanızı ya da dikey olarak gezinmenizi sağlar.
-  – Seçeneği belirlemenizi ya da alt menüye girmenizi sağlar.

-  – Kısa basıldığında önceki menüye dönmenizi ya da seçim ekranından çıkmanızı sağlar. Giriş ekranına dönmek için bu düğmeye uzun basın.

## Wi-Fi Kullanımı

Wi-Fi®, Wi-Fi Alliance®'ın tescilli ticari markasıdır.

### NOT:

Bu özellik yalnızca DM4601e için geçerlidir.

Bu özellik bir Wi-Fi ağını ayarlamanızı ve bu ağa bağlanmanızı sağlar. Wi-Fi; telsiz ürün yazılımı, codeplug ve dil paketleri ile sesli anons gibi kaynak güncellemelerini destekler.

## Wi-Fi Özelliğini Açma veya Kapatma

Programlanmış **Wi-Fi Açık veya Kapalı** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için satıcınıza veya sistem yöneticinize başvurun.

Programlanmış **Wi-Fi Açık veya Kapalı** düğmesi için Sesli Anonslar, kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi almak için bayinizle ya da sistem yöneticinizle görüşün.

Wi-Fi özelliğini, aşağıdaki işlemlerden birini gerçekleştirerek açabilir veya kapatabilirsiniz.

- Programlanmış **Wi-Fi Açık veya Kapalı** düğmesine basın. Sesli Anons, Wi-Fi Açma veya Wi-Fi Kapatma tonunu çalar.
- Bu özelliğe menüyü kullanarak erişin.

- a.  ile menüye erişim düğmesine basın.
- b.  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.
- c.  ya da  düğmesine basarak Wi-Fi Açık seçeneğine gidin ve seçmek için  düğmesine basın.

 düğmesine basarak Wi-Fi özelliğini açın. Ekranda, Etkin yazısının yanında  ögesi gösterilir.

 düğmesine basarak Wi-Fi özelliğini kapatın. Etkin yazısının yanındaki  simgesi kaybolur.

## Ağ Erişim Noktasına Bağlanma

Wi-Fi özelliğini açtığınızda telsiz, ağ erişim noktalarını tarar ve bunlardan birine bağlanır.

Menüyü kullanarak da bir ağ erişim noktasına bağlanabilirsiniz.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 4  ya da  düğmesine basarak bir ağ erişim noktasına gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 5  ya da  düğmesine basarak **Bağlan** seçeneğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 6 Şifreyi girin ve  düğmesine basın.

---

Bağlantı başarıyla kurulursa telsizde bir bildirim görüntülenir ve ağ erişim noktası profil listesine kaydedilir.

## Wi-Fi Bağlantı Durumunu Kontrol Etme

Wi-Fi Bağlantı durumunu kontrol etmek için bu prosedürü uygulayın.

Sesli Anons üzerinden bağlantı durumu için programlanan **Wi-Fi Durumu Sorgusu** düğmesine basın. Sesli Anons; Wi-Fi Kapalı, Wi-Fi Açık fakat Bağlantı Yok veya Wi-Fi Açık ve Bağlı uyarılarını verir.

- Wi-Fi kapatıldığında, ekranda **Wi-Fi Kapalı** mesajı görüntülenir.
- Telsiz bir ağa bağlandığında, ekranda **Wi-Fi Açık, Bağlandı** mesajı görüntülenir.

- Wi-Fi açık olduğunda ancak telsiz herhangi bir ağa bağlanmadığında, ekranda Wi-Fi Açık, Bağlantı Kesildi mesajı görüntülenir.

Wi-Fi durumu sorgu sonuçları için Sesli Anonlar, kullanıcı gereksinimlerine göre CPS üzerinden özelleştirilebilir. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

#### NOT:

Programlanmış **Wi-Fi Durumu Sorgusu** düğmesi, satıcınız veya sistem yöneticiniz tarafından atanır. Telsizinizin nasıl programlandığını belirlemek için bayinize veya sistem yöneticinize başvurun.

## Ağ Listesini Yenileme

Ağ listesini yenilemek için bu prosedürü uygulayın.

- Ağ listesini yenilemek için menüden aşağıdaki işlemleri gerçekleştirin.
  - a.  ile menüye erişim düğmesine basın.

- b.  ya da  düğmesine basarak Wi-Fi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

- c.  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın. Ağlar menüsüne girdiğinizde telsiz ağ listesini otomatik olarak yeniler.

- Zaten Ağlar menüsündeyseniz ağ listesini yenilemek için aşağıdaki işlemi gerçekleştirin.

-  ya da  ögesine basarak Yenile'ye gidin ve seçmek için  düğmesine basın. Telsiz yenilenir ve en güncel ağ listesi görüntülenir.

## Ağ Ekleme

Kullanılabilir ağ listesinde tercih edilen bir ağ yoksa bir ağ eklemek için aşağıdaki işlemi gerçekleştirin.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

- 4  ya da  ögesine basarak Ağ Ekle'ye gidin ve seçmek için  düğmesine basın.

---

- 5 Hizmet Kümesi Tanımlayıcısını (SSID) girin ve  ögesine basın.

- 6  ya da  ögesine basarak Ağ'a gidin ve seçmek için  düğmesine basın.

- 7 Şifreyi girin ve  düğmesine basın.  
Ağ erişim noktalarının başarıyla kaydedildiğini belirtmek için telsiz ekranında olumlu bir mini bilgi notu görüntülenir.

## Ağ Erişim Noktaları Ayrıntılarını Görüntüleme

Ağ erişim noktaları ayrıntılarını görüntülemek için bu prosedürü uygulayın.

- 1  ile menüye erişim düğmesine basın.

---

- 2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

4  ya da  düğmesine basarak bir ağ erişim noktasına gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

5  ya da  öğesine basarak Ayarları Görüntüle'ye gidin ve seçmek için  düğmesine basın.

Bağlantısı sağlanan bir ağ erişim noktasında Hizmet Kümesi Tanımlayıcısı (SSID), Güvenlik Modu, Ortam Erişim Kontrolü (MAC) adresi ve İnternet Protokolü (IP) adresi görüntülenir.

Bağlantısı olmayan bir ağ erişim noktasında Hizmet Kümesi Tanımlayıcısı (SSID) ve Güvenlik Modu görüntülenir.

---

## Ağ Erişim Noktalarını Çıkarma

Ağ erişim noktalarını profil listesinden kaldırmak için aşağıdaki işlemleri gerçekleştirin.

1  ile menüye erişim düğmesine basın.

---

2  ya da  düğmesine basarak WiFi özelliğine gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

3  ya da  düğmesine basarak Ağlar bölümüne gidin ve seçmek için  düğmesine basın düğmesine basarak seçim yapın.

---

4  ya da  öğesine basarak seçilen ağ erişim noktasına gidin ve seçmek için  düğmesine basın.

---

5  ya da  öğesine basarak Kaldır'a gidin ve seçmek için  düğmesine basın.

---

- 6  ya da  öğesine basarak **Evet**'e gidin ve seçmek için  düğmesine basın.

Seçilen ağ erişim noktalarının başarıyla kaldırıldığını belirtmek için telsiz ekranında olumlu bir mini bilgi notu görüntülenir.

## Uygulamalar

Bu bölümde, telsizinizde bulunan uygulama işlevlerinin nasıl çalıştığı açıklanmaktadır.

## Susturucu Seviyeleri

Sinyal gücü düşük istenmeyen çağrılar ya da normal arka plandan yüksek olan seslerin bulunduğu kanalları filtreleyip elemek için susturucu seviyesini ayarlayabilirsiniz.

### Normal

Bu, varsayılan ayardır.

### Hassas

Bu ayar, istenmeyen çağrılar ve/veya arka plan sesini filtreleyip eler. Uzak konumlardan alınan çağrılar da filtrelenip elenebilir.

### NOT:

Bu özellik aynı frekansta olan Halk Bandı Radyo kanallarında uygulanamaz.

## Susturucu Seviyelerini Ayarlama

Telsizinizde susturucu seviyelerini ayarlamak için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:

- Programlanmış **Susturucu** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

- 2

 veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.

- 3

 veya  düğmesine basarak **Telsiz Ayarları** bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile **Susturucu** seçeneğine gidin.  
Seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  veya  ile **Normal** seçeneğine gidin.  
Seçmek için  düğmesine basın.  
Ekranı, **Normal** öğesinin yanında ✓ simgesi görüntülenir.
  -  veya  ile **Hassas** seçeneğine gidin.  
Seçmek için  düğmesine basın.  
Ekranı, **Hassas** bilgisinin yanında ✓ simgesi görüntülenir.
- Ekran otomatik olarak önceki menüye döner.

## Güç Seviyeleri

Güç ayarını her kanal için ayrı ayrı yüksek ya da düşük olarak özelleştirebilirsiniz.

### Yüksek

Bu ayar, bulunduğunuz yerden uzak bir mesafede bulunan telsizlerle haberleşmenizi sağlar.

### Düşük

Bu ayar, daha yakındaki telsizlerle haberleşmenizi sağlar.

### NOT:

Bu özellik aynı frekansta olan Halk Bandı Radyo kanallarında uygulanamaz.

## Güç Seviyelerini Ayarlama

Telsizinizde güç seviyelerini ayarlamak için buradaki prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Güç Seviyesi** düğmesine basın.  
Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

2

 veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  ile Güç seçeneğine gidin. Seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  veya  ile Yüksek seçeneğine gidin.

Seçmek için  düğmesine basın.  
Ekran, Yüksek bilgisinin yanında ✓ simgesi görüntülenir.

- Düşük seçeneği için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Ekran, Düşük bilgisinin yanında ✓ simgesi görüntülenir.

6 Giriş ekranına dönmek için  düğmesine uzun basın.

## Telsiz Tonlarını/Uyarılarını Açma veya Kapatma

Gerekirse tüm telsiz tonlarını ve uyarılarını etkinleştirebilir ve gelen Acil Durum uyarı tonu haricinde hepsini devre dışı bırakabilirsiniz . Telsizinizde tonları ve uyarıları açmak veya kapatmak için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Tonlar/Uyarılar** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar✓

Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Tüm Tonlar bölümüne gidin. Seçmek için  düğmesine basın.

6 Tüm ton ve uyarıları etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Tuş Takımı Seslerini Açma veya Kapatma

Telsizinizde tuş takımı seslerini açmak veya kapatmak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar✓ Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile Tuş Takımı Sesi seçeneğine gidin. Seçmek için  düğmesine basın.

6 Tuş takımı tonlarını etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Tonlar/Uyarılar Ses Ofseti Seviyelerini Ayarlama

Bu özellik, ton veya uyarıların seviyesini, geçerli ses seviyesinden daha düşük ya da yüksek olacak şekilde ayarlamanızı sağlar. Telsizinizde tonlar ve uyarılar ses ofseti seviyelerini ayarlamak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Tonlar/Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  veya  ile Ses Ofseti seçeneğine gidin. Seçmek için  düğmesine basın.

- 6 Gereken ses ofseti seviyesi için  veya  düğmesine basın.  
Karşılıklı gelen her bir ses ofseti seviyesiyle bir geri bildirim tonu duyulur.

- 7 Aşağıdakilerden birini yapın:
  - Seçmek için  düğmesine basın. İstenen ses ofseti seviyesi kaydedilir.
  - Çıkmak için  düğmesine basın. Değişiklikler silinir.

## Konuşma İzni Tonunu Açma veya Kapatma

Telsizinizde Konuşma İzni Tonu özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 5  veya  ile Konuşma İzni seçeneğine gidin. Seçmek için  düğmesine basın.

---

- 6 Konuşma İzni Tonunu etkinleştirmek veya devre dışı bırakmak için  düğmesine basın.

Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.
- 

## Güç Verme Tonunu Açma veya Kapatma

Telsizinizde Güç Verme Tonu özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Tonlar Uyarılar seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  ile Güç Açık seçeneğine gidin. Seçmek için  düğmesine basın.

6 Güç Verme Tonunu etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında  simgesi görüntülenir

- Devre dışı bırakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.

## Yazılı Mesaj Uyarı Tonlarını Ayarlama

Metin mesajı uyarı tonunu Kişiler listesindeki her giriş için Kısa veya Tekrarlayan olacak şekilde özelleştirebilirsiniz. Telsizinizde yazılı mesaj uyarı tonlarını ayarlamak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Kişiler bölümüne gidin. Seçmek için  düğmesine basın.

3 Gerekli ad veya kimlik için  ya da  düğmesine basın. Seçmek için  düğmesine basın.

4  veya  ile Mesaj Uyarısı seçeneğine gidin. Seçmek için  düğmesine basın.

---

5 Aşağıdakilerden birini yapın:

-  veya  ile Anlık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Anlık bilgisinin yanında ✓ simgesi görüntülenir.
  -  veya  ile Sürekli seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Sürekli bilgisinin yanında ✓ simgesi görüntülenir.
- 

## Ekran Kiplerini Değiştirme

Telsizin ekran kipini ihtiyaç duyduğunuz şekilde Gündüz ya da Gece olarak değiştirebilirsiniz. Bu özellik ekranın renk paletini etkiler. Telsizinizin ekran kipini değiştirmek için bu prosedürü uygulayın.

1 Aşağıdakilerden birini yapın:

- Programlanmış **Ekran Kipi** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
- 

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Ekran seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda Gündüz Kipi ve Gece Kipi bilgileri görünür.

---

- 5 Gerekli ayar için  veya  düğmesine basın.
- Seçmek için  düğmesine basın.
- Ekran, seçilen ayarın yanında  simgesi görüntülenir.

## Ekran Parlaklığını Ayarlama

Telsizinizde ekran parlaklığını ayarlamak için buradaki prosedürü uygulayın. Ekran parlaklığı Oto Parlaklık etkin olduğunda ayarlanamaz.

- 1 Aşağıdakilerden birini yapın:
- Programlanmış **Parlaklık** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Parlaklık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranı ilerleme çubuğu görüntülenir.

- 5 Ekran parlaklığını azaltmak veya artırmak için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ayar değeri 1 ile 8 arasında değişir.

## Kornaları/Işıkları Açma veya Kapatma

Telsiziniz, korna ve ışık özelliği aracılığıyla çağrı geldiğini bildirebilir. Aktif hale getirildiğinde, gelen çağrı aracınızın kornasını çalar ve ışıklarını yakar. Bu özelliğin satıcınız tarafından telsizin arka aksesuar konektöründen monte

edilmesi gerekir. Telsizinizde tüm korna ve ışıklar özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Kornalar/Işıklar** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Kornalar/Işıklar seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Kornalar/Işıklar'ı etkinleştirmek/devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:
  - Etkinleştirilmişse **Etkin** yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa **Etkin** yazısının yanındaki ✓ simgesi kaybolur.

## LED Göstergelerini Açma ve Kapatma

Telsizinizde LED göstergelerini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak **Telsiz** Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile **LED Göstergesi seçeneğine** gidin. Seçmek için  düğmesine basın.

- 5 **LED Göstergesini etkinleştirmek veya devre dışı bırakmak için**  düğmesine basın.  
Ekranı aşağıdaki sonuçlardan biri görüntülenir:
- Etkinleştirilmişse **Etkin** yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa **Etkin** yazısının yanındaki ✓ simgesi kaybolur.

## Genel Yayın Sistemini Açma veya Kapatma

Telsizinizin dahili genel yayın (PA) sistemini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
- Programlanmış **Genel Yayın** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak **Telsiz** Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  düğmesine basarak **Genel Yayın** seçeneğine gidin. Seçmek için  düğmesine basın.
- 5 **Genel Yayın özelliğini etkinleştirmek veya devre dışı bırakmak için**  düğmesine basın.
- Etkinleştirilmişse **Etkin** yazısının yanında ✓ simgesi görüntülenir

- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Harici Genel Yayın Sistemini Açma veya Kapatma

Telsizinizin harici genel yayın (PA) sistemini etkinleştirmek veya devre dışı bırakmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Harici Genel Yayın** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak Harici Genel Yayın seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Harici genel yayın özelliğini etkinleştirmek veya devre dışı bırakmak için  düğmesine basın.
  - Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Giriş Ekranını Açma ve Kapatma

Bu prosedürü uygulayarak Giriş Ekranını etkinleştirebilir ve devre dışı bırakabilirsiniz.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Ekran

seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak Giriş

Ekranı seçeneğine gidin. Seçmek için  düğmesine basın.

6 Giriş Ekranını etkinleştirmek/devre dışı bırakmak için

 düğmesine basın.

Ekranı aşağıdaki sonuçlardan biri görüntülenir:

- Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Dilleri Ayarlama

Telsizinizde dilleri ayarlamak için buradaki prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  ile Diller seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Gerekli dil için  veya  düğmesine basın.  
Seçmek için  düğmesine basın.  
Ekranda, seçilen dilin yanında ✓ simgesi görüntülenir.

- 4  veya  düğmesine basarak Kablo Türü bölümüne gidin. Seçmek için  düğmesine basın.
- 5 Geçerli kablo türü ✓ simgesi ile gösterilir.

## Kablo Türü Seçme

Telsizinizin kullandığı kablo türünü seçmek için aşağıdaki adımları izleyin.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

## Eller Serbest Kullanım

Eller Serbest Kullanım (ESK), programlanmış bir kanalda ellerinizi kullanmadan, sesle etkinleştirilmiş bir çağrı başlatmanıza olanak tanır. ESK özellikli aksesuarın üzerindeki mikrofon, ses tespit ettiği anda telsiz, programlanmış süre boyunca otomatik olarak yayın gönderir.

### NOT:

Bu özellik aynı frekansta olan Halk Bandı Radyo kanallarında uygulanamaz.

ESK özelliğini aşağıdakilerden birini yaparak etkinleştirebilir veya devre dışı bırakabilirsiniz:

- ESK özelliğini etkinleştirmek için telsizi kapatıp tekrar açın.
- VOX özelliğini etkinleştirmek için **Yukarı/Aşağı Kaydırma** düğmelerini kullanarak kanalı değiştirin.

- VOX özelliğini etkinleştirmek için **Ses/Kanal Topuzu**'nu kullanarak kanalı değiştirin.
- VOX özelliğini, programlanmış **VOX** düğmesini veya VOX özelliğini etkinleştirme ya da devre dışı bırakmayla ilgili menüyü kullanarak açıp kapatın.
- VOX özelliğini devre dışı bırakmak için telsiz çalışırken **PTT** düğmesine basın.

#### NOT:

Bu özelliği ancak, bu işlevin etkin olduğu telsizlerde açıp kapatabilirsiniz. Daha fazla bilgi için bayinizle ya da sistem yöneticinizle görüşün.

## Eller Serbest Kullanımı Açma veya Kapatma

Telsizinizde VOX özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **VOX** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmesine basarak ESK seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  tuşuna basarak **VOX** özelliğini etkinleştirin veya devre dışı bırakın.

#### NOT:

Konuşma İzni Tonu etkinse çağrıyı başlatmak için bir tetikleme sözcüğü kullanın. Konuşma İzni Tonunun bitmesini bekleyin ve anlaşılır biçimde mikrofona doğru konuşun. Daha fazla bilgi için bkz. [Konuşma İzni Tonunu Açma veya Kapatma sayfa 211.](#)

## Sesli Anonsu Açma veya Kapatma

Bu özellik, telsizin kullanıcının yeni atadığı geçerli bölge ya da kanalı veya kullanıcının az önce bastığı programlanabilir düğmeyi sesli bir şekilde bildirmesini sağlar.

Bu özellik, genellikle kullanıcının ekranda gösterilen içeriği okumakta güçlük çektiği durumlarda kullanışlıdır.

Bu sesli gösterge, müşterinin kendi ihtiyaçlarına göre özelleştirilebilir. Telsizinizde Sesli Anons özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

## Opsiyon Kartını Açma veya Kapatma

Her kanalın opsiyon kartı özellikleri vardır ve bunlar programlanabilir düğmelere atanabilir. Bir kanal en fazla 6 opsiyon kartı özelliğini destekleyebilir. Telsizinizde opsiyon kartını açmak veya kapatmak için buradaki prosedürü uygulayın.

Programlanmış **Opsiyon Kartı** düğmesine basın.

## Konuşma Sentezleyici

Konuşma Sentezleyici özelliği yalnızca satıcınız veya sistem yöneticiniz tarafından etkinleştirilebilir. Konuşma Sentezleyici etkinse Sesli Anons özelliği otomatik olarak devre dışı bırakılır. Sesli Anons etkinse Konuşma Sentezleyici özelliği otomatik olarak devre dışı bırakılır.

Bu özellik, telsizin şu özellikleri sesli bir şekilde bildirmesini sağlar:

- Geçerli Kanal
- Geçerli Bölge
- Programlanmış düğme özelliği açık veya kapalı
- Alınan yazılı mesajların içeriği
- Alınan İş Kartlarının içeriği

Bu sesli gösterge, müşterinin kendi ihtiyaçlarına göre isteğe uyarlanabilir. Bu özellik, genellikle ekran üzerinde o an görünen içeriğin okunamadığı zor koşullarda kullanışlıdır.

## Konuşma Sentezleyiciyi Ayarlama

Konuşma Sentezleyici özelliğini ayarlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

- 4  veya  düğmesine basarak Sesli Anons bölümüne gidin. Seçmek için  düğmesine basın.

---

- 5 Aşağıdaki özelliklerden herhangi biri için  veya  düğmesine basın. Seçmek için  düğmesine basın.  
Kullanılabilir özellikler aşağıdaki gibidir:
  - Tümü
  - Mesajlar
  - İş Kartları

[Geribildirim Gönder](#)

- Kanal
- Bölge
- Program Düğmesi

Seçili ayarın yanında ✓ simgesi görüntülenir.

## Otomatik Çağrı Yönlendirmeyi Açma veya Kapatma

Telsizinizi sesli çağrıları otomatik olarak başka telsizlere yönlendirebilecek duruma getirebilirsiniz.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4 Çağrı Yönlendirme için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

5 Aşağıdakilerden birini yapın:

- Çağrı Yönlendirmeyi etkinleştirmek için  veya  düğmesine basın. Etkinleştirilmişse Etkin yazısının yanında  simgesi görüntülenir
  - Çağrı Yönlendirmeyi devre dışı bırakmak için  veya  düğmesine basın. Devre dışı bırakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.
- 

## Menü Zamanlayıcıyı Ayarlama

Telsizinizin otomatik olarak Giriş ekranına dönmeyi önce menüde ne kadar süre kalacağını ayarlayabilirsiniz. Menü zamanlayıcıyı ayarlamak için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

---

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

---

4  veya  düğmesine basarak Ekran seçeneğine gidin. Seçmek için  düğmesine basın.

---

5 Men Zamanlayıcı için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

6 Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın.

---

## Analog Mikrofon OKK'yi Açma veya Kapatma

Analog Mikrofon Otomatik Kazanç Kontrolü (OKK), analog bir sistemde yayın yaparken telsizin mikrofon kazancını otomatik olarak kontrol eder.

Bu özellik, yüksek sesi baskılayarak veya yumuşak sesi bir ön ayar değerine göre artırarak tutarlı bir ses elde edilmesini sağlar. Telsizinizde Analog Mikrofon OKK özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Mik OKK-A seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Analog Mikrofon OKK seçeneğini etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:
  - Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
  - Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Dijital Mikrofon OKK'yi Açma veya Kapatma

Dijital Mikrofon Otomatik Kazanç Kontrolü (OKK), dijital bir sistemde yayın yaparken telsizin mikrofon kazancını otomatik olarak kontrol eder.

Bu özellik, yüksek sesi baskılayarak veya yumuşak sesi bir ön ayar değerine göre artırarak tutarlı bir ses elde edilmesini sağlar. Telsizinizde Dijital Mikrofon OKK

özelliğini açmak veya kapatmak için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
- 4  veya  ile Mik OKK-D seçeneğine gidin. Seçmek için  düğmesine basın.
- 5 Dijital Mikrofon AGC seçeneğini etkinleştirmek veya devre dışı bırakmak için  düğmesine basın. Ekranda aşağıdaki sonuçlardan biri görüntülenir:
  - Etkinleştirilmişse Etkin yazısının yanında  simgesi görüntülenir

- Devre dışı bırakılmışsa Etkin yazısının yanındaki  simgesi kaybolur.

## Akıllı Sesi Açma veya Kapatma

Telsiziniz, sabit ve sabit olmayan gürültü kaynaklarının bulunduğu ortamlarda mevcut arka plan gürültüsünü filtrelemek için ses ayarını otomatik olarak yapar. Bu, yalnız alıcıya özgü bir özelliktir ve yayın sesini etkilemez. Telsizinizde Akıllı Ses özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

### NOT:

Bu özellik, Bluetooth oturumunda uygulanamaz.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Akıllı Ses** düğmesine basın. Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak Akıllı Ses bölümüne gidin. Seçmek için  düğmesine basın.

5 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Açık bilgisinin yanında ✓ simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Kapalı bilgisinin yanında ✓ simgesi görüntülenir.

## Akustik Geri Besleme Supresörü Özelliğini Açma ve Kapatma

Bu özellik, gelen çağrılardaki Akustik Geri Besleme Supresörünü en aza indirmenizi sağlar. Telsizinizde Akustik Geri Besleme Supresörü özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın..

3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak AF Supresörü seçeneğine gidin. Seçmek için  düğmesine basın.

### 5 Aşağıdakilerden birini yapın:

- Akustik Geri Besleme Supresörünü etkinleştirmek için düğmesine basın. Etkinleştirilmişse Etkin yazısının yanında ✓ simgesi görüntülenir
- Akustik Geri Besleme Supresörünü devre dışı bırakmak için düğmesine basın. Devre dışı bırakılmışsa Etkin yazısının yanındaki ✓ simgesi kaybolur.

## Titrek Sesi İyileştirmeyi Açma veya Kapatma

Çok fazla alveolar titrek ses (ör. alveolar "R") içeren sözcüğe sahip bir dilde konuşuyorsanız bu özelliği etkinleştirebilirsiniz. Telsizinizde Titrek Sesi İyileştirme özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Titrek Sesi İyileştirme** düğmesine basın. Aşağıdaki adımları atlayın.
- Menüye erişmek için  düğmesine basın.

### 2

 veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

### 3

 veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

### 4

 veya  düğmesine basarak Titrek Sesi İyileştirme bölümüne gidin. Seçmek için  düğmesine basın.

### 5 Aşağıdakilerden birini yapın:

-  veya  düğmesine basarak Açık seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda, Açık bilgisinin yanında ✓ simgesi görüntülenir.
-  veya  düğmesine basarak Kapalı seçeneğine gidin. Seçmek için  düğmesine

basın. Ekranda, **Kapalı** bilgisinin yanında ✓ simgesi görüntülenir.

## Ses Ortamı

Telsizinizin ses ortamını çevrenize göre özelleştirebilirsiniz.

### Varsayılan

Bu, varsayılan ayardır.

### Yüksek

Bu ayar, gürültülü ortamlarda Gürültü Supresörünü etkinleştirir ve hoparlörün ses seviyesini artırır.

### İş Grubu

Bu ayar, bir grup telsiz birbirinin yakınında bulunduğu AF Supresörünü etkinleştirir ve AGC'yi devre dışı bırakır.

## Ses Ortamını Ayarlama

Telsizinizin ses ortamını bulunduğunuz ortama göre ayarlamak için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Ses Ortamı seçeneğine gidin. Seçmek için  düğmesine basın.

- 5 Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ayarlar aşağıdaki gibidir.

- Varsayılan fabrika ayarları için Varsayılan seçeneğini belirleyin.
- Gürültülü ortamlardayken hoparlörün ses seviyesini artırmak için Yüksek seçeneğini belirleyin.

- Birbirine yakın telsiz gruplarıyla kullanırken akustik geri beslemeyi azaltmak için Çalışma Grubu seçeneğini belirleyin.

Ekranda, seçilen ayarın yanında ✓ simgesi görüntülenir.

## Ses Profilleri

Telsizinizin ses profillerini tercihinize göre özelleştirebilirsiniz.

### Varsayılan

Bu, varsayılan ayardır.

### Seviye 1, Seviye 2 ve Seviye 3

Bu ayarlar, 40, 50, 60 yaş ve üzerindeki yetişkinler için yaygın olan gürültü kaynaklı işitme kaybını telafi etmeye yönelik ses profilleridir.

### Tiz Artırma, Mid Artırma ve Bass Artırma

Bu ayarlar, daha ince seslere, burundan gelen seslere ve daha derin seslere yöneliktir.

## Ses Profillerini Ayarlama

Telsizinizde ses profillerini ayarlamak için buradaki prosedürü uygulayın.

- Menüye erişmek için  düğmesine basın.
-  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
-  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.
-  veya  ile Ses Profilleri seçeneğine gidin. Seçmek için  düğmesine basın.
- Gerekli ayar için  veya  düğmesine basın. Seçmek için  düğmesine basın. Ayarlar aşağıdaki gibidir.
  - Daha önceden seçilen ses profilini devre dışı bırakmak ve varsayılan fabrika ayarlarına dönmek için Varsayılan seçeneğini belirleyin.

- 40 yaşının üzerindeki yetişkinlerde yaygın olan gürültü kaynaklı işitme kaybını telafi etmek amacıyla oluşturulmuş ses profilleri için Seviye 1, Seviye 2 veya Seviye 3 seçeneğini belirleyin.
- Daha ince ses, burundan gelen ses veya derin ses tercihinize uyan ses profilleri için Tiz Artırma, Mid Artırma veya Bass Artırma seçeneğini belirleyin.

Ekranda, seçilen ayarın yanında ✓ simgesi görüntülenir.

#### NOT:

Belirli telsiz modellerinde GPS ve GLONASS bulunabilir. GNSS kümelenmesi, CPS kullanılarak yapılandırılır. Telsizinizin nasıl programlandığını belirlemek için satıcınıza veya sistem yöneticinize başvurun.

- 1 Telsizinizde GNSS'yi açmak veya kapatmak için aşağıdaki adımlardan birini uygulayın.

- Programlanmış **GNSS** düğmesine basın.
- Menüye erişmek için  düğmesine basın. Bir sonraki adıma geçin.

- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

- 3  veya  düğmesine basarak Telsiz Ayarları bölümüne gidin. Seçmek için  düğmesine basın.

## Küresel Navigasyon Uydu Sistemini Açma veya Kapatma

Küresel Navigasyon Uydu Sistemi (GNSS), telsizin yerini tam olarak tespit eden bir uydu navigasyon sistemidir. GNSS, Küresel Konumlandırma Sistemi (GPS) ve Küresel Navigasyon Uydu Sistemi (GLONASS) içerir.

- 4  veya  düğmesine basarak GNSS seçeneğine gidin. Seçmek için  düğmesine basın.

- 5  tuşuna basarak GNSS özelliğini etkinleştirin veya devre dışı bırakın.
- Etkinleştirilmişse **Etkin** yazısının yanında  simgesi görüntülenir
- Devre dışı bırakılmışsa **Etkin** yazısının yanındaki  simgesi kaybolur.

## Esnek Alma Listesi

Esnek Alma Listesi, çoklu alma listelerinde üye oluşturmanızı ve atamanızı sağlayan bir özelliktir. Telsiziniz listede maksimum 16 üye destekleyebilir. Bu özellik Capacity Plus'ta desteklenir.

## Esnek Alma Listesi Özelliğini Açma veya Kapatma

Esnek Alma Listesi özelliğini açmak veya kapatmak için bu prosedürü uygulayın.

- 1 Aşağıdakilerden birini yapın:
  - Programlanmış **Esnek Alma Listesi** düğmesine basın Aşağıdaki adımları atlayın.
  - Menüye erişmek için  düğmesine basın.

- 2  veya  ile **Esnek Rx List.** seçeneğine gidin. Seçmek için  düğmesine basın.

- 3 Aşağıdakilerden birini yapın:
  -  veya  düğmesine basarak **Aç** seçeneğine gidin. Seçmek için  düğmesine basın.

Bir olumlu gösterge tonu duyulur.

Ekranında olumlu bir mini bilgi notu görüntülenir.

-  veya  düğmesine basarak **Kapat** seçeneğine gidin. Seçmek için  düğmesine basın. Bir olumsuz gösterge tonu duyulur. Ekranda olumsuz bir mini bilgi notu görüntülenir.

## Genel Telsiz Bilgileri

Telsiziniz çeşitli genel parametrelerle ilgili bilgiler içerir.

Telsizinizin genel bilgileri aşağıdaki gibidir:

- Telsiz adı ve kimliği.
- Ürün yazılımı ve Codeplug sürümleri.
- Yazılım güncelleme.
- GNSS bilgileri.
- Saha bilgileri.

### NOT:

Önceki ekrana dönmek için  düğmesine basın.

Giriş ekranına dönmek için  düğmesine uzun basın. Telsiz, faaliyetsizlik sayacının süresi dolduğunda geçerli ekrandan çıkar.

## Telsiz Adını ve Kimliğini Kontrol Etme

Telsizinizdeki telsiz adını ve kimliğini kontrol etmek için buradaki prosedürü uygulayın.

### 1 Aşağıdakilerden birini yapın:

- Programlanmış **Telsiz Adı ve Kimliği** düğmesine basın. Aşağıdaki adımları atlayın. Bir olumlu gösterge tonu duyulur.

Programlanmış **Telsiz Adı ve Kimliği** düğmesine basarak önceki ekrana dönebilirsiniz.

- Menüye erişmek için  düğmesine basın.

### 2

 veya  düğmesine basarak **Programlar** bölümüne gidin. Seçmek için  düğmesine basın.

### 3

 veya  düğmesine basarak **Telsiz Bilgisi** seçeneğine gidin. Seçmek için  düğmesine basın.

- 4  veya  düğmelerine basarak Kimliğim ögesine gidin. Seçmek için  düğmesine basın. İlk metin satırında telsiz adı görüntülenir. İkinci metin satırında telsiz kimliği görüntülenir.

## Ürün Yazılımı ve Codeplug Sürümlerini Kontrol Etme

Telsizinizdeki ürün yazılımı ve codeplug sürümlerini kontrol etmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.
- 3  veya  düğmesine basarak Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

- 4  veya  ile Sürümler seçeneğine gidin. Seçmek için  düğmesine basın. Ekranda geçerli ürün yazılımı ve codeplug sürümleri görüntülenir.

## Yazılım Güncelleme Bilgilerini Kontrol Etme

Bu özellik, OTAP veya Wi-Fi ile gerçekleştirilen en son yazılım güncellemesinin tarihini ve saatini görüntüler. Telsizinizdeki yazılım güncelleme bilgilerini kontrol etmek için buradaki prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz

Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  ile YZLM Gnc1m seçeneğine gidin.

Seçmek için  düğmesine basın.

Ekranda en son yazılım güncelleme tarihi ve saati görüntülenir.

Yazılım Güncelleme menüsü en az bir başarılı OTAP veya Wi-Fi oturumu gerçekleştirildikten sonra görüntülenir. Daha fazla bilgi için bkz. [Kablosuz Programlama sayfa 495](#).

## GNSS Bilgilerini Kontrol Etme

Telsizinizde aşağıdaki gibi GNSS bilgileri gösterilir:

- Enlem
- Boylam
- Rakım
- Yön
- Hız

- Yatay Duyarlılık Kaybı (HDOP)
- Uydular
- Sürüm

1 Menüye erişmek için  düğmesine basın.

2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

3  veya  düğmesine basarak Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

4  veya  düğmesine basarak GNSS Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

5  veya  düğmesine basarak ilgili öğeye gidin. Seçmek için  düğmesine basın. Ekranda istenen GNSS bilgileri görüntülenir.

## Saha Bilgilerini Görüntüleme

Telsizinin açık olduğu geçerli saha adını görüntülemek için bu prosedürü uygulayın.

- 1 Menüye erişmek için  düğmesine basın.

---
- 2  veya  düğmesine basarak Programlar bölümüne gidin. Seçmek için  düğmesine basın.

---
- 3  veya  düğmesine basarak Telsiz Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

---
- 4  veya  düğmesine basarak Saha Bilgisi seçeneğine gidin. Seçmek için  düğmesine basın.

---

Ekranda geçerli saha adı görüntülenir.

## Sınırlı Garanti

### MOTOROLA SOLUTIONS İLETİŞİM ÜRÜNLERİ

#### I. BU GARANTİNİN KAPSAMI VE SÜRESİ:

Motorola Solutions, Inc. ("Motorola Solutions"), aşağıdaki listede belirtilen Motorola Solutions imalatı İletişim Ürünlerine, ("Ürün") satın alma tarihinden itibaren geçerli olmak kaydıyla aşağıdaki tabloda belirtilen süreler boyunca normal kullanım ve servis koşullarında malzeme ve işçilik kusurlarına karşı garanti vermektedir:

DM Serisi Dijital Mobil Telsizler	24 Ay
Ürün Aksesuarları	12 Ay

Motorola Solutions, ücretsiz olmak kaydıyla, garanti süresi içerisinde bu garantinin şartlarına uygun olarak gönderilmiş Ürünü, tamamen kendi takdirine bağlı olmak kaydıyla onaracak (yeni ya da yenilenmiş parçalarla), değiştirecek

(yeni ya da yenilenmiş Ürün ile) ya da Ürün'ün satın alma fiyatını iade edecektir. Değiştirilen parçalar ya da kartlar, ilgili orijinal garanti süresinin geri kalan kısmı boyunca garanti kapsamındadır. Ürün'ün değiştirilen tüm parçaları Motorola Solutions malı olacaktır.

Bu sınırlı açık garanti, Motorola Solutions tarafından yalnızca orijinal son kullanıcıya verilmektedir; bunun haricinde başka hiçbir şahsa devredilemez ya da aktarılamaz. İşbu garanti, Motorola Solutions tarafından imal edilmiş Ürün için verilen garantinin tamamını oluşturur. Motorola Solutions, yazılı ve yetkili bir Motorola Solutions görevlisi tarafından imzalanmış olarak yapılmadığı sürece, işbu garantide yapılan hiçbir değişiklik ya da ilave ile ilgili bir sorumluluk kabul etmez.

Motorola Solutions ve orijinal son kullanıcı arasında ayrı bir sözleşme yapılmadığı sürece, Motorola Solutions, Ürün'ün kurulum, bakım ya da servisine ilişkin bir garanti vermemektedir.

Motorola Solutions hiçbir şekilde, Ürün'e bağlı olan ya da Ürün ile bağlantılı olarak kullanılan, Motorola Solutions tarafından verilmemiş hiçbir yan ekipmandan ya da Ürün'ün yan ekipmanlarla birlikte çalışmasından sorumlu tutulamaz ve bu tür tüm ekipmanlar kesinlikle işbu garantinin kapsamı dışındadır. Ürün'ü kullanan her sistem kendine özgü olduğu için Motorola Solutions işbu garanti kapsamında sistemin

bir bütün olarak menzili, kapsama alanı veya çalışmasıyla ilgili sorumlulukları kabul etmemektedir.

## II. GENEL HÜKÜMLER

İşbu garanti, Motorola Solutions'ın bu Ürünle ilgili tüm sorumluluklarını eksiksiz bir şekilde ortaya koymaktadır. Tamamen Motorola Solutions'ın inisiyatifinde olmak kaydıyla, onarım, değiştirme ya da satın alma fiyatının iadesi, yegane çözüm yollarıdır. İŞBU GARANTİ, DİĞER TÜM AÇIK GARANTİLERİN YERİNE VERİLMEKTEDİR. PAZARLANABİLİRLİK VE BELLİ BİR AMACA UYGUNLUK İÇİN VERİLEN ZİMNİ GARANTİLER DE DAHİL, ANCAK BUNLARLA SINIRLI OLMAMAK KAYDIYLA, HER TÜRLÜ ZİMNİ GARANTİ İŞBU SINIRLI GARANTİNİN SÜRESİYLE SINIRLIDIR. MOTOROLA SOLUTIONS YASALARIN İZİN VERDİĞİ ÖLÇÜDE, HİÇBİR DURUMDA, ÜRÜNÜN SATIŞ FİYATINI AŞAN HASARLARDAN, HERHANGİ BİR KULLANIM KAYBINDAN, ZAMAN KAYBINDAN, UYGUNSUZLUKTAN, TİCARİ KAYIPTAN, KÂR YA DA TASARRUF KAYBINDAN VEYA BU TÜR ÜRÜNLERİN KULLANILAMAMASINDAN YA DA ARIZASINDAN DOĞAN DİĞER TESADÜFİ, ÖZEL YA DA DOLAYLI HASARLARDAN SORUMLU TUTULAMAZ.

## III. EYALET YASALARI:

BAZI EYALETLERDE TESADÜFİ YA DA DOLAYLI HASARLARIN MUAF TUTULMASINA YA DA SINIRLANMASINA VEYA ZİMNİ GARANTİNİN SÜRESİYLE İLGİLİ SINIRLAMALARA İZİN VERİLMEMEKTEDİR; DOLAYISIYLA YUKARIDA BELİRTİLEN SINIRLAMALAR YA DA MUAFİYETLER GEÇERLİ OLMAYABİLİR.

İşbu garanti bazı özel haklar vermektedir ve eyaletten eyalete değişen başka haklar da veriyor olabilir.

## IV. GARANTİ SERVİSİNDEN YARARLANMA

Garanti servisinden yararlanabilmeniz için satın alma belgenizi (üzerinde satın alma tarihi ve söz konusu Ürünün seri numarası olan) ibraz etmeniz, ayrıca söz konusu Ürünü taşıma ve sigorta ücreti önceden ödenmiş olarak yetkili garanti servisi merkezine göndermeniz ya da teslim etmeniz gerekir. Garanti servisi Motorola Solutions tarafından yetkili garanti servis yerlerinden biri aracılığıyla sağlanacaktır. İlk önce Ürünü satın aldığınız şirketle (ör. satıcı ya da haberleşme hizmet sağlayıcısı) temas kurarsanız, bu şirket, garanti servisinizden yararlanmanızı

kolaylaştırabilir. Motorola Solutions'ı ABD ve Kanada'da 1-800-927-2744 numaralı telefondan da arayabilirsiniz.

## V. BU GARANTİ'NİN KAPSAMI DIŞINDA KALANLAR:

- 1 Ürünün normal ve olağan şekil dışında kullanılmasından kaynaklanan arızalar veya hasar.
- 2 Hatalı kullanımdan, kaza, su veya ihmal nedeniyle ortaya çıkan arızalar veya hasar.
- 3 Uygunsuz test, kullanım, bakım, kurulum, değişiklik, modifikasyon veya ayarlama nedeniyle ortaya çıkan arızalar veya hasar.
- 4 Antenlerde doğrudan malzeme işçiliğindeki kusurların neden olmadığı kırılmalar veya hasar.
- 5 Yetkisiz ve Ürünün performansını olumsuz şekilde etkileyen veya Motorola Solutions'ın normal garanti incelemesine ve her türlü garanti iddiasını doğrulamak için Ürünün test edilmesine engel olan Ürün modifikasyonlarına, sökölme işlemlerine veya tamirlere maruz kalan (Ürüne Motorola Solutions tarafından sağlanmamış bir ekipmanın eklenmesi de dahil olmak ancak bununla sınırlı olmamak kaydıyla) her türlü Ürün.
- 6 Seri numarası silinmiş veya okunmaz hale gelmiş olan her türlü ürün.
- 7 Şu şartlar altındaki şarj edilebilir bataryalar:
  - bataryanın batarya kapağındaki mühürlerden herhangi biri kırılmışsa veya kurcalandığına dair kanıt varsa.
  - bataryanın özel olarak üretilmiş olduğu Ürün dışındaki ekipmanla veya hizmet ile şarj edilmesinden veya kullanılmasından kaynaklanan hasar veya arıza.
- 8 Onarım deposuna gönderim maliyetleri.
- 9 Üründeki yazılımın/bellenimin yasa dışı olarak veya yetkisiz şekilde değiştirilmesi nedeniyle, Motorola Solutions'ın yayınlanmış teknik özelliklerine veya Motorola Solutions tarafından ilk olarak dağıtıldığında Ürün için geçerli olan FCC sertifikası etiketine uygun şekilde çalışmayan her türlü Ürün.
- 10 Ürünün yüzeylerindeki çizikler veya diğer kozmetik hasarlar Ürünün çalışmasını etkilemez.
- 11 Normal ve alışılmış yıpranma.

## VI. PATENT VE YAZILIM HÜKÜMLERİ

Motorola Solutions, masrafları kendine ait olmak üzere, Ürünün ya da parçaların herhangi bir ABD patentini ihlal ettiği iddiasıyla satın alan son kullanıcıya karşı açılmış davalarda kendisini savunacaktır ve Motorola Solutions bu türden taleplerle ilgili olan herhangi bir davanın sonucunda satın alan son kullanıcı aleyhinde tahakkuk eden masrafları ve zararları kendisi ödeyecektir. Ancak hukuki savunma ve ödemeler aşağıda açıklanan koşullara bağlı olacaktır:

- 1 Böyle bir iddiayla ilgili olarak yapılan her türlü bildirim söz konusu satın alan kişi tarafından yazılı olarak Motorola Solutions'a derhal bildirilmesi,
- 2 Söz konusu davayla ilgili olarak savunmanın ve anlaşma veya uzlaşmaya yönelik her türlü görüşmenin tek başına Motorola Solutions tarafından kontrol edilmesi ve
- 3 Ürünün ya da parçaların herhangi bir ABD patentini ihlal ettiği iddiasının gündeme geldiği ya da Motorola Solutions'ın fikrine göre gündeme gelmesinin olduğu durumlarda, ilgili satın alan kişi, Motorola Solutions'ın, bütün masrafları ve tercih hakkı Motorola Solutions'a ait olmak üzere satın alan kişiye ya Ürünü veya parçaları kullanmaya devam etme hakkını

tanınmasına veya ihlali ortadan kaldıracak şekilde Ürünü/parçayı benzeri ile değiştirmesine veya Üründe/parçada değişiklik yapmasına ya da ilgili satın alan kişiye Ürünün/parçalarının değeri düşen kısmının parasını ödemesine ve ürünün iadesini kabul etmesine izin verecektir. Amortisman, Motorola Solutions tarafından belirlenen şekilde, Ürünün veya parçalarının ömürleri süresince her yıl eşit miktarlarda yapılacaktır.

Motorola Solutions, bu sözleşme ile birlikte verilen Ürün ya da parçaların, Motorola Solutions tarafından sağlanmamış yazılım, cihaz ya da aygıtlarla kombinasyon halinde kullanılmasından kaynaklanan patent ihlali talepleriyle ilgili hiçbir sorumluluk kabul etmez; ayrıca Motorola Solutions, Ürüne bağlanan ya da Ürünle bir arada kullanılan, Motorola Solutions tarafından sağlanmamış yardımcı ekipmanlarla kullanıma dair bir sorumluluk taşımaz. Motorola Solutions'ın, Ürünün ya da parçalarının patent ihlaline neden olmasıyla ilgili tüm sorumluluğu yukarıda belirtilenlerden ibarettir.

Amerika Birleşik Devletleri ve diğer ülkelerdeki kanunlar, ilgili Motorola Solutions yazılımlarının kopyalarını çoğaltmak ve dağıtmak için münhasır haklar gibi, telif hakkıyla korunan Motorola Solutions yazılımları için belirli münhasır hakları Motorola Solutions'a vermektedir. Motorola Solutions yazılımı yalnızca yazılımın yerleşik olduğu Üründe kullanılabilir ve ilgili Üründeki ilgili yazılım

herhangi bir şekilde yenisiyle değiştirilemez, kopyalanamaz, dağıtılamaz, değişiklik yapılamaz ya da bu yazılımın herhangi bir şekilde türevinin üretilmesi için kullanılamaz. Söz konusu Motorola Solutions yazılımının değiştirilmesi, modifiye edilmesi, çoğaltılması, dağıtılması veya tersine mühendisliği dahil olmak, ancak bunlarla sınırlı olmamak kaydıyla diğer hiçbir kullanıma veya söz konusu Motorola Solutions yazılımı üzerindeki hakların kullanılmasına izin verilmez. Motorola Solutions patent hakları ya da telif hakları kapsamında, zımnen, hukuki engele bağlı olarak ya da başka yollarla hiçbir şekilde lisans verilmemektedir.

## معلومات مهمة عن الأمان

دليل أمان المنتج والتعرض لطاقة التردد اللاسلكي الخاص بأجهزة  
راديو السيارة ثنائية الاتجاه

### تنبيه!

يقتصر هذا الراديو على الاستخدام المهني فقط. قبل استخدام الراديو، اقرأ دليل أمان المنتج والتعرض لطاقة التردد اللاسلكي الخاص بأجهزة راديو السيارة ثنائية الاتجاه الذي يتضمن تعليمات التشغيل المهمة للاستخدام الآمن والتعريف بطاقة التردد اللاسلكي والتحكم فيها للتوافق مع المعايير واللوائح السارية.

للحصول على قائمة بالهوائيات وغيرها من الملحقات المعتمدة من شركة Motorola Solutions، يرجى زيارة موقع الويب التالي:

<http://www.motorolasolutions.com>

تم ترك هذه الصفحة فارغة عمدًا.

## إصدار البرنامج

كالميزات الموضحة فالي لأقساا ملتالية مدعومة من إصدار البرنامج R02.08.05.0000 أو لأحدث.

راجع التحقق من إصدارات البرنامج الثابت وCodeplug في صفحة 190 لتحديد إصدار البرنامج الخاص بالراديو.

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

الرجاء الرجوع إلى جهة اتصال Motorola Solutions للحصول على مزيد من المعلومات.

### العلامات التجارية

كل من MOTOROLA SOLUTIONS و MOTO و MOTOROLA كل من شعار M النمطي هي علامات تجارية أو علامات تجارية مسجلة لشركة Motorola Trademark Holdings, LLC وتستخدم بموجب ترخيص. كل العلامات التجارية الأخرى خاصةً بمالكها المعنيين.

### توجيه الاتحاد الأوروبي (EU) بشأن نفايات المعدات الكهربائية والإلكترونية (WEEE)

يتطلب توجيه الاتحاد الأوروبي بشأن نفايات المعدات الكهربائية والإلكترونية وجود ملصق صندوق النفايات ذي الخططين المتقاطعين على المنتج نفسه للمنتجات المبيعة في دول الاتحاد الأوروبي (أو على العبوة في بعض الحالات). وطبقاً لما ينص عليه توجيه نفايات المعدات الكهربائية والإلكترونية (WEEE)، فإن ملصق صندوق النفايات المرسوم عليه خطان متقاطعان هذا يعني أنه يجب على العملاء والمستخدمين في دول الاتحاد الأوروبي عدم التخلص من المعدات الإلكترونية والكهربائية أو ملحقاتها بطرحها في النفايات المنزلية.

يجب على العملاء أو المستخدمين المقيمين في دول الاتحاد الأوروبي الاتصال بمندوب مُورد الأجهزة أو مركز الخدمة المحلي للحصول على معلومات حول نظام تجميع النفايات في بلادهم.

قد تتضمن منتجات Motorola Solutions الموصوفة في هذا المستند برامج كمبيوتر محمية بحقوق النشر من Motorola Solutions. تحتفظ القوانين في الولايات المتحدة ودول أخرى لشركة Motorola Solutions بحقوق حصرية معينة لبرامج الكمبيوتر المحمية بحقوق النشر. وبناءً عليه، لا يجوز نسخ أي برامج كمبيوتر لشركة Motorola Solutions محمية بموجب حقوق الطبع والنشر تكون مضمنة في منتجات Motorola Solutions الموضحة في هذا المستند أو إعادة إنتاجها بأي طريقة دون إذن كتابي صريح من Motorola Solutions.

## حقوق الطبع والنشر الخاصة ببرامج الكمبيوتر

قد تتضمن منتجات Motorola Solutions الموضحة في هذا الدليل برامج كمبيوتر لشركة Motorola Solutions محمية بموجب حقوق الطبع والنشر مخزنة في ذاكرات أشباه الموصلات أو وسائط أخرى. تحتفظ شركة Motorola Solutions بموجب قوانين الولايات المتحدة وبلدان أخرى بحقوق حصرية معينة فيما يتعلق ببرامج الكمبيوتر المحمية بموجب حقوق الطبع والنشر، بما في ذلك - على سبيل المثال لا الحصر - الحق الحصري في نسخ البرنامج المحمي بموجب حقوق الطبع والنشر أو إعادة إنتاجه بأي شكل من الأشكال. وبناءً عليه، لا يجوز نسخ أي برامج كمبيوتر لشركة Motorola Solutions محمية بموجب حقوق الطبع والنشر تكون مضمنة في منتجات Motorola Solutions الموضحة في هذا الدليل أو إعادة إنتاجها أو تعديلها أو تطبيق هندسة عكسية عليها أو توزيعها بأية طريقة بدون إذن كتابي صريح من Motorola Solutions. بالإضافة إلى ذلك، لا يعتبر شراء منتجات Motorola Solutions أنه يمنح، بشكل مباشر أو ضمني أو حكمي أو خلاف ذلك، أي ترخيص بموجب حقوق الطبع والنشر أو براءات الاختراع أو طلبات تسجيل براءات الاختراع الخاصة بشركة Motorola Solutions، باستثناء ترخيص الاستخدام العادي غير الحصري الذي ينشأ بموجب القانون الذي يحكم عملية بيع المنتج.

تقنية الترميز الصوتي AMBE+2™ المضمنة في هذا المنتج محمية بموجب حقوق الملكية الفكرية بما في ذلك حقوق براءة الاختراع وحقوق الطبع والنشر والأسرار التجارية الخاصة بشركة Digital Voice Systems, Inc.

تم ترخيص تقنية الترميز الصوتي هذه فقط للاستخدام في جهاز الاتصال هذا. يحظر صراحة على مستخدم هذه التقنية محاولة إلغاء تحويل كود الكائن برمجيًا أو تطبيق

تم ترك هذه الصفحة فارغة عمدًا.

## احتياطات التعامل

يتوافق الراديو اليدوي الرقمي MOTOTRBO Series مع مواصفات معيار IP67، مما يتيح للراديو لديك تحمل التعرض للظروف السيئة مثل غمره في الماء. يوضح هذا القسم بعض احتياطات التعامل الأساسية.

### تنبيه:

- لا تقم بفك الراديو. قد يؤدي ذلك إلى تلف سدادات الراديو وينتج عنه فتحات تسريب في الراديو. يجب عدم صيانة الراديو إلا في مركز خدمة جهاز لاختبار غطاء الراديو واستبداله.
- إذا تم غمر الراديو في الماء، فقم برجه جيدًا حتى يتم إخراج الماء الذي قد يكون عالقا داخل شبكة السماع ومنفذ الميكروفون. ويمكن أن يؤدي الماء الذي تخلله إلى خفض مستوى أداء الصوت.
- إذا تعرضت منطقة الاتصال ببطارية الراديو للماء، فقم بتنظيف وتحفيف مناطق الاتصال بالبطارية الموجودة على الراديو والبطارية قبل توصيل البطارية بالراديو. قد تتسبب المياه المتبقية في حدوث قصر في دائرة الراديو.
- إذا تم غمر الراديو في مادة مسببة للتآكل (على سبيل المثال، المياه المالحة)، فاشطف الراديو والبطارية بالماء العذب، ثم جففهما جيدًا.
- لتنظيف الأسطح الخارجية للراديو، استخدم محلولًا مخففًا من منظف أطباق معتدل وماء عذب (على سبيل المثال، ملعقة صغيرة من المنظف لغالون واحد من الماء).
- لا تثقب مطلقًا المنفذ (الفتحة) الموجود في الهيكل الواقي للراديو أسفل منطقة الاتصال بالبطارية. يسمح هذا المنفذ بموازنة الضغط داخل الراديو. وقد يؤدي تثقبه إلى إحداث فتحة تسريب في الراديو، ومن ثم يفقد قدرته على مقاومة الغمر في الماء.

- لا تسد المنفذ أو تغطيه مطلقًا، ولو حتى بملصق.
- تأكد من عدم ملامسة أية مواد زيتية للمنفذ.
- تم تصميم الراديو الذي يتضمن هوائيًا مركبًا بصورة صحيحة ليتم غمره في الماء على عمق 1 متر (3.28 أقدام) كحد أقصى، ولمدة 30 دقيقة كحد أقصى. قد يؤدي تجاوز أي من الحدين أو الاستخدام بدون الهوائي إلى تلف الراديو.
- عند تنظيف الراديو، لا تستخدم بخاخة رش ذات ضغط مرتفع على الراديو؛ لأن هذا سوف يتجاوز الضغط على عمق 1 m وقد يتسبب في تسرب الماء إلى داخل الراديو.

تم ترك هذه الصفحة فارغة عمدًا.

## العمليات الأساسية

يشرح هذا الفصل عمليات بدء استخدام الراديو.

### تشغيل الراديو

اتبع الإجراء لتشغيل الراديو.

اضغط على زر تشغيل/إيقاف تشغيل.

إذا تم بنجاح:

- تصدر نغمة.
- يضيء مؤشر LED الأخضر.
- تعرض الشاشة MOTOTRBO (TM)، متبوعة برسالة أو صورة ترحيب.
- تضيء الشاشة الرئيسية.

إذا تم تعطيل وظيفة النغمة/التنبيه، فإن تصدر نغمة عند التشغيل.

قم بفحص البطارية إذا تعذر تشغيل الراديو. تأكد من أنها مشحونة وتم تركيبها بشكل صحيح. اتصل بالوكيل إذا استمر تعذر تشغيل الراديو.

### إيقاف تشغيل الراديو

اتبع الإجراء لإيقاف تشغيل الراديو.

اضغط مع الاستمرار على زر تشغيل/إيقاف.

قد يستغرق الراديو ما يصل إلى سبع ثوانٍ حتى يتم إيقاف تشغيله تمامًا.

تعرض الشاشة إيقاف التشغيل.

### ضبط مستوى الصوت

اتبع الإجراء لتغيير مستوى صوت الراديو الخاص بك.

قم بأحد الإجراءات التالية:

- أدر قرص تشغيل/إيقاف تشغيل/التحكم في مستوى الصوت باتجاه عقارب الساعة لزيادة مستوى الصوت.
- أدر قرص تشغيل/إيقاف تشغيل/التحكم في مستوى الصوت عكس اتجاه عقارب الساعة لخفض مستوى الصوت.

إشعار:

يمكن برمجة الراديو الخاص بك ليحتوي على حد أدنى لإزاحة مستوى الصوت بحيث يتعذر خفض مستوى الصوت لدرجة أقل من الحد الأدنى لمستوى الصوت المبرمج. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

تم ترك هذه الصفحة فارغة عمدًا.

## عناصر التحكم في الراديو

يشرح هذا الفصل أزرار ووظائف التحكم في الراديو.

1 زر تشغيل/إيقاف/المعلومات

2 قرص مستوى الصوت/القنوات

3 الشاشة

4 زر القائمة/موافق

5 أزرار التمرير لأعلى/لأسفل

6 مكبر الصوت

7 زر إرجاع/الرئيسية

8 الأزرار الأمامية القابلة للبرمجة

9 موصل الملحقات

10 مؤشرات LED

### قرص مستوى الصوت/القنوات

يمكن برمجة قرص مستوى الصوت/القنوات للتحكم في مستوى الصوت والقنوات أو للتحكم في مستوى الصوت فقط.

لضبط مستوى الصوت، راجع [ضبط مستوى الصوت في صفحة 33](#).

لتغيير القنوات، اضغط مع الاستمرار على قرص مستوى الصوت/القنوات حتى يتم عرض حالة تحديد القناة. أدر قرص مستوى الصوت/القنوات لتحديد القناة. نفذ أحد الإجراءات التالية للخروج من حالة تحديد القناة:

- اضغط على قرص مستوى الصوت/القنوات.

- اضغط على .

- اضغط على .

- انتظر حتى ينتهي موقت القائمة.

### تعيين تفضيلات تشغيل القرص ثنائي الأغراض

اتبع الإجراءات لتعيين تفضيلات تشغيل القرص ثنائي الأغراض للراديو.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة.اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعداداتالراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى قرص ثنائي. اضغطعلى  للتحديد.

تعرض الشاشة صوت فقط وصوت وقناة.

5

اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغطعلى  للتحديد.

تظهر علامة ✓ بجانب الإعدادات المحددة. ستعود الشاشة إلى القائمة السابقة.

## أزرار الميكروفون المزود بلوحة مفاتيح

يمكنك استخدام لوحة المفاتيح الأبجدية الرقمية 3 × 4 على الميكروفون المزود بلوحة مفاتيح تنقل ذات 4 اتجاهات (رقم قطعة Motorola Solutions هو RMN5127\_) للوصول إلى ميزات الراديو. تتطلب الكثير من الحروف الضغط على أحد المفاتيح مرات متعددة. يعرض الجدول عدد المرات المطلوبة للضغط على أحد المفاتيح لإظهار الحرف المطلوب.

المفتاح ح	عدد مرات الضغط على مفتاح												
	1	2	3	4	5	6	7	8	9	10	11	12	13
① .,?	1	.	,	?	!	@	&	'	%	—	:	*	#
② ABC	A	!	و	2									
③ DEF	D	E	F	3									
④ GHI	G	H	I	4									
⑤ JKL	J	K	L	5									

الجدول يتبع...

المفتاح	عدد مرات الضغط على مفتاح												
ح	1	2	3	4	5	6	7	8	9	10	11	12	13
	M	N	O	6									
	P	Q	R	S	7								
	T	U	V	8									
	W	X	Y	Z	9								
	0												
	إشعار: اضغط لإدخال "0" واضغط مطولاً لتنشيط الحروف الكبيرة والصغيرة. اضغط لفترة طويلة مجددًا لإيقاف تشغيل CAPS lock.												
	* أو حذف												
	إشعار: اضغط أثناء إدخال النص لحذف الحرف. اضغط أثناء إدخال الأرقام لإدخال "*" .												
	# أو مسافة												
	إشعار: اضغط أثناء إدخال النص لإدراج مسافة. اضغط أثناء إدخال الأرقام لإدخال "#" .												

## ضبط قنوات WAVE النشطة

يتم تكوين قنوات WAVE عبر CPS. اتبع الإجراء لتحديد قناة WAVE المطلوبة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى قنوات WAVE. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى قناة WAVE المطلوبة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تعيين كمنشط. اضغط على  للتحديد.

ستعرض الشاشة  بجانب القناة المحددة.

## عرض معلومات قناة WAVE

اتبع الإجراء لعرض معلومات قناة WAVE.

## WAVE

تقدم البيئة الصوتية واسعة النطاق (WAVE™) طريقة جديدة لإجراء المكالمات بين جهازي راڊيو.

كما تدعم هذه الميزة المكالمات بين أجهزة الراديو والأجهزة الأخرى المزودة بإمكانيات WAVE. ومع ذلك، يجب إعداد قناة WAVE لاستخدام هذه الميزة.

لن يتمكن الراديو من استقبال المكالمات من أنظمة أخرى ويستقبل فقط مكالمات WAVE، عند وجوده على قناة WAVE.

إذا وضع الراديو على قناة WAVE، يمكن الراديو ميزة Wi-Fi تلقائيًا ويتابع تسجيل الدخول إلى خادم WAVE. يتم إجراء مكالمات WAVE عند اتصال الراديو بشبكة بروتوكول الإنترنت IP من خلال Wi-Fi.

إشعار:

تنطبق هذه الميزة على DM4601e فقط.

### الجدول 1: رموز عرض WAVE

تظهر الرموز التالية للحظة على الشاشة عند تمكين WAVE.

متصل WAVE WAVE متصل.	
WAVE /فصل اتصال WAVE /فصل اتصال.	

1 قم بأحد الإجراءات التالية:

- اضغط على زر قائمة قناة **WAVE** المبرمج. قم بتخطي الخطوات التالية.

- اضغط على  للوصول إلى القائمة.

2

- اضغط على  أو  للوصول إلى قنوات **WAVE**. اضغط على  للتحديد.

3

- اضغط على  أو  للوصول إلى قناة **WAVE** المطلوبة. اضغط على  للتحديد.

4

- اضغط على  أو  للوصول إلى عرض التفاصيل. اضغط على  للتحديد.

تعرض الشاشة تفاصيل قناة **WAVE**.

## عرض معلومات نقاط نهاية **WAVE**

اتبع الإجراءات لعرض معلومات نقاط نهاية **WAVE**.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **جهة الاتصال** المبرمج. قم بالتخطي إلى **خطوة 3**.

- اضغط على  للوصول إلى القائمة.

2

- اضغط على  أو  للوصول إلى نقاط نهاية. اضغط على  للتحديد.

3

- اضغط على  أو  للوصول إلى نقطة نهاية **WAVE** المطلوبة. اضغط على  للتحديد.

4

- اضغط على  لتحديد عرض التفاصيل.

تعرض الشاشة تفاصيل نقاط نهاية **WAVE**.

## تغيير تكوين **WAVE**

اتبع الإجراءات لضبط عنوان بروتوكول الإنترنت (IP) للخادم ومعرف المستخدم وكلمة المرور الخاصين بـ **WAVE**.

1

- اضغط على  للوصول إلى القائمة.

8 اضغط على  للوصول إلى تطبيق. اضغط على  لتطبيق جميع التغييرات التي حدثت.

تعرض شاشة العرض إشعارًا إيجابيًا صغيرًا مؤقتًا قبل العودة إلى شاشة إعدادات الراديو.

## إجراء مكالمات جماعية

اتبع الإجراء لإجراء مكالمات جماعية على قناة WAVE.

1 حدد قناة WAVE باستخدام الاسم المستعار أو المعرف المطلوب الخاص بالمجموعة.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED الأخضر. يعرض سطر النص الأول رمز **مكالمة جماعية** والاسم المستعار. يعرض سطر النص الثاني الاسم المستعار لمجموعة WAVE.

3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة **PTT** الجانبية وتحديث بوضوح في الميكروفون إذا كان مُمكنًا

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى WAVE. اضغط على  للتحديد.

5 اضغط على  لتحديد عنوان خادم. اضغط على  لتغيير عنوان الخادم. اضغط على  للتحديد.

6 اضغط على  للوصول إلى معرف المستخدم. اضغط على  لتغيير معرف المستخدم. اضغط على  للتحديد.

7 اضغط على  للوصول إلى كلمة المرور. اضغط على  لعرض أو تغيير كلمة المرور الخاصة بـ WAVE. اضغط على  للتحديد.

**4** حرر زر **PTT** للاستماع.

يضيء مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة رمز **مكالمة جماعية**، والاسم المستعار أو المعرف، والاسم المستعار أو المعرف الخاص بالراديو المرسل.

---

**5** عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

---

## الأزرار القابلة للبرمجة

حسب مدة الضغط على الزر، يمكن للوكيل برمجة الأزرار القابلة للبرمجة كاختصارات في وظائف الراديو.

### اضغط لفترة قصيرة

الضغط والتحرير سريعاً.

### الضغط لفترة طويلة

الضغط مع الاستمرار للمدة المبرمجة.

إشعار:

راجع تشغيل الطوارئ في صفحة 358 للحصول على مزيد من المعلومات حول المدة المبرمجة لزر الطوارئ.

## وظائف الراديو القابلة للتعين

يمكن للوكيل أو مسؤول النظام تعيين وظائف الراديو التالية للأزرار القابلة للبرمجة.

### بيئة الصوت

السماح للمستخدم بتحديد بيئة يعمل فيها الراديو.

### ملفات تعريف الصوت

السماح للمستخدم بتحديد ملف تعريف الصوت المفضل.

### تبديل صوت بلوتوث®

لتبديل التوجيه الصوتي بين سماعة الراديو الداخلية والملحق الخارجي الذي يدعم البلوتوث.

## عمليات Capacity Max

إن Capacity Max عبارة عن نظام راديو ترنك قائم على قناة التحكم. تتوفر المميزات المتاحة لمستخدمي الراديو وفقاً لهذا النظام في هذا الفصل.

## الزر اضغط للتحدث (PTT)

يعمل الزر PTT لغرضين أساسيين.

- أثناء إجراء مكالمة، يتيح زر PTT للراديو الإرسال إلى أجهزة الراديو الأخرى في المكالمة. يتم تنشيط الميكروفون عند الضغط على زر PTT.
- عند عدم وجود مكالمة جارية، يُستخدم زر PTT لإجراء مكالمة جديدة.

الضغط مع الاستمرار على الزر PTT للتحدث. حرر زر PTT للاستماع.

في حالة تمكين ميزة نغمة إذن بالكلام أو تمكين النغمة الجانبية لزر PTT انتظر حتى تنتهي نغمة التنبيه القصيرة قبل التحدث.

إذا تم تمكين ميزة الإشارة إلى قناة حرة على الراديو (تتم برمجتها من قبل الوكيل)، فستسمع نغمة تنبيه قصيرة عند قيام الراديو المستهدف (الراديو الذي يتلقى المكالمة) بتحرير زر PTT، مما يشير إلى أن القناة متاحة لك للرد.

تسمع نغمة منع تحديث مستمرة إذا تمت مقاطعة مكالمتك، على سبيل المثال عندما يتلقى الراديو مكالمة طوارئ. يجب عليك تحرير الزر PTT.

**اتصال بلوتوث**

بدء عملية بحث واتصال بلوتوث.

**قطع اتصال بلوتوث**

لإنهاء جميع اتصالات بلوتوث الموجودة بين الراديو والأجهزة الممكن بها تقنية بلوتوث.

**اكتشاف بلوتوث**

لتمكين الراديو من الدخول في وضع قابلية اكتشاف بلوتوث.

**التأريض**

توفير الوصول المباشر إلى قائمة جهات الاتصال.

**تنبيه المكالمات**

توفير الوصول المباشر إلى قائمة جهات الاتصال لتحديد جهة اتصال يمكن إرسال تنبيه مكالمة إليها.

**سجل المكالمات**

تحديد قائمة سجل المكالمات.

**الطوارئ**

بدء أو إلغاء طوارئ وفقاً للبرمجة.

**العنوان العام (PA) الخارجي**

لتبديل التوجيه الصوتي بين مضخم مكبر صوت العنوان العام (PA) المتصل ونظام العنوان العام (PA) الداخلي بالراديو.

**إعادة تعيين قناة رئيسية**

لتعيين قناة رئيسية جديدة.

**كتم صوت رسالة تذكير القناة الرئيسية**

لكتم صوت رسالة تذكير القناة الرئيسية.

**موقع داخلي**

للتبديل بين تشغيل الموقع الداخلي أو إيقاف تشغيله.

**صوت ذكي**

التبديل بين تشغيل الصوت الذكي أو إيقاف تشغيله.

**اتصال يدوي**

لبداء مكالمة خاصة من خلال إدخال أي معرف مشترك.

**تجوال يدوي للموقع**

بدء بحث يدوي عن المواقع.

**Mic AGC**

للتبديل بين تشغيل تحكم الكسب الآلي في الميكروفون الداخلي أو إيقافه.

**الإعلامات**

لتوفير الوصول المباشر إلى قائمة الإعلانات.

**الوصول بلمسة واحدة**

للبدء مباشرة في مكالمة بث أو مكالمة خاصة أو مكالمة هاتفية أو مكالمة جماعية محددة مسبقاً أو تنبيه مكالمات محدد مسبقاً أو رسالة نصية سريعة محددة مسبقاً.

**ميزة لوحة الاختيار**

التبديل بين تشغيل ميزة (ميزات) لوحة الاختيار أو إيقاف تشغيلها للفتوات التي تدعم ميزة لوحة الاختيار.

**Phone (الهاتف)**

لتوفير الوصول المباشر إلى قائمة جهات اتصال الهاتف.

**السرية**

للتبديل بين تشغيل السرية أو إيقاف تشغيلها.

**بيان الصوت للقناة**

تشغيل الرسائل الصوتية لبيان المنطقة والقناة الخاصة بالقناة الحالية. لا تتوفر هذه الوظيفة عندما يكون بيان الصوت معطلاً.

**Wi-Fi**

للتبديل بين تشغيل Wi-Fi أو إيقاف تشغيله.

**تحديد منطقة**

السماح بالتحديد من قائمة المناطق.

## الإعدادات أو وظائف الأدوات المساعدة القابلة للتعين

يمكن تعيين إعدادات الراديو أو وظائف أدوات المساعدة التالية إلى الأزرار القابلة للبرمجة.

**نغمات/ تنبيهات**

للتبديل بين تشغيل جميع النغمات والتنبيهات أو إيقاف تشغيلها.

**الإضاءة الخلفية**

لتشغيل الإضاءة الخلفية للشاشة أو لإيقاف تشغيلها.

**القناة التالية/السابقة**

للتغيير إلى القناة السابقة أو التالية بحسب البرمجة.

**وضع الشاشة**

للتبديل بين تشغيل وضع الشاشة في النهار/الليل أو إيقافه.

**مستوى الطاقة**

للتبديل مستوى طاقة الإرسال بين عالية ومنخفضة.

**العنوان العام (PA)**

للتبديل بين تشغيل أو إيقاف تشغيل نظام العنوان العام (PA) للراديو.

**الاسم المستعار للراديو ومعرفة**

توفير الاسم المستعار للراديو ومعرفة.

**مراقب عن بُعد**

تشغيل ميكروفون الراديو المستهدف دون تقديم أي مؤشرات.

**معلومات الموقع**

يعرض اسم ومعرف موقع Capacity Max الحالي.

لتشغيل الرسائل الصوتية لبيان الموقع الخاصة بالموقع الحالي عند تمكين بيان الصوت.

**قفل الموقع**

عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

**التحكم في القياس عن بُعد**

التحكم في رقم التعريف الشخصي الخاص بالإخراج الموجود في الراديو البعيد أو المحلي.

**الرسالة النصية**

تحديد قائمة الرسائل النصية.

**تحسين الاهتزاز**

للتبديل بين تشغيل تحسين الاهتزاز وإيقاف تشغيله.

**تشغيل/إيقاف تشغيل بيان الصوت**

التبديل بين تشغيل بيان الصوت أو إيقاف تشغيله.

## الوصول إلى الوظائف المبرمجة

اتبع الإجراء للوصول إلى الوظائف المبرمجة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر المبرمج. تابع إلى **خطوة 3**.
- اضغط على **OK** للوصول إلى القائمة.

2

اضغط على **▲** أو **▼** للوصول إلى وظيفة القائمة، واضغط على **OK** لتحديد وظيفة أو الدخول إلى قائمة فرعية.

3 قم بأحد الإجراءات التالية:

- اضغط على **↻** للعودة إلى الشاشة السابقة.
- اضغط لفترة طويلة على **↻** للعودة إلى الشاشة الرئيسية. سيخرج الراديو تلقائيًا من القائمة بعد فترة من عدم النشاط ويعود إلى الشاشة الرئيسية.
- تتوفر أيضًا أزرار التنقل عبر القائمة على الميكروفون المزود بلوحة مفاتيح. راجع أزرار الميكروفون المزود بلوحة مفاتيح في **صفحة 37**.

## مؤشرات الحالة

يشرح هذا الفصل مؤشرات الحالة والنعيمات الصوتية المستخدمة في الراديو.

### الرموز

تعرض شاشة الكريستال السائل (LCD) بالراديو حالة الراديو، والإدخالات النصية وإدخالات القائمة.

#### الجدول 2: رموز الشاشة

الرموز التالية هي رموز تظهر على شريط الحالة في أعلى شاشة الراديو. الرموز مُرتبة أقصى اليمين حسب المظهر أو الاستخدام، وهي مخصصة للقنوات.

<p><b>بلوتوث متصل</b></p> <p>ميزة بلوتوث ممكنة. يظل الرمز مضاءً عند اتصال جهاز بلوتوث بعيد.</p>	
<p><b>Bluetooth غير متصل</b></p> <p>ميزة Bluetooth ممكنة، لكن لا يوجد جهاز Bluetooth بعيد متصل.</p>	
<p><b>الطوارئ</b></p> <p>الراديو في وضع الطوارئ.</p>	

الجدول يتبع...

إعلام		تحتوي قائمة الإعلامات على حدث فائت واحد أو أكثر.
لوحة الاختيار		تم تمكين لوحة الاختيار. (للطرز الممكن بها لوحة الاختيار فقط)
إلغاء وظيفة لوحة الاختيار		تم تعطيل لوحة الاختيار.
موقت تأخير البرمجة عبر الأثير		للإشارة إلى الوقت المتبقي قبل إعادة التشغيل التلقائية للراديو.
الأولوية 1		للإشارة إلى مجموعة التحدث ذات الأولوية 1.
الأولوية 2		للإشارة إلى مجموعة التحدث ذات الأولوية 2.

الجدول يتبع...

<b>GNSS متوفر</b>		تم تمكين ميزة GNSS. يظل الرمز مضاءً عند توفر تحديد الموضع.
<b>نظام GNSS غير متوفر</b>		تم تمكين ميزة GNSS لكن لا يتم استقبال بيانات من القمر الصناعي.
<b>بيانات كبيرة الحجم</b>		يقوم الراديو باستلام بيانات كبيرة الحجم والقناة مشغولة.
<b>الموقع الداخلي متوفر 1</b>		ميزة حالة الموقع الداخلي تعمل ومتوفرة.
<b>ميزة الموقع الداخلي غير متوفرة 1</b>		ميزة حالة الموقع الداخلي تعمل لكنها غير متوفرة لأن Bluetooth معطل أو أن Bluetooth قام بتعليق مسح الإشارات.
<b>وضع كتم الصوت</b>		وضع كتم الصوت منشط والسماعة الخارجية تم كتم صوتها.

الجدول يتبع...

1 تنطبق فقط على الطرز المزودة بأحدث البرامج والأجهزة.

تعطيل النغمات تم إيقاف تشغيل النغمات.	
غير آمن تم تعطيل ميزة السرية.	
إشارة Wi-Fi ممتازة <sup>2</sup> إشارة Wi-Fi ممتازة.	
Wi-Fi جيد <sup>2</sup> إشارة Wi-Fi جيدة.	
Wi-Fi متوسط <sup>2</sup> إشارة Wi-Fi متوسطة.	
Wi-Fi ضعيف <sup>2</sup> إشارة Wi-Fi ضعيفة.	
Wi-Fi غير متاح <sup>2</sup> إشارة Wi-Fi غير متاحة.	

مؤشر قوة الإشارة المستلمة (RSSI) يمثل عدد الأشرطة المعروضة قوة إشارة الراديو. يشير وجود أربعة أشرطة إلى أقوى إشارة. يظهر هذا الرمز عند الاستلام فقط.	
منع الاستجابة يتم تمكين منع الاستجابة.	
رنين فقط تم تمكين وضع الرنين.	
Secure (آمن) تم تمكين ميزة السرية.	
كتم صوت الرنين تم تمكين وضع كتم صوت الرنين.	
تجوال الموقع تم تمكين ميزة تجوال الموقع.	
Status (الحالة) للإشارة إلى رسالة حالة جديدة.	

الجدول يتبع...

<sup>2</sup> تنطبق فقط على DM4601e.

## الجدول 5: رموز المكالمات

تظهر الرموز التالية على الشاشة أثناء إجراء مكالمة. كما أنها تظهر ضمن قائمة جهات الاتصال للإشارة إلى الاسم المستعار أو نوع المُعرّف.

<p><b>مكالمة كمبيوتر عبر بلوتوث</b></p> <p>للإشارة إلى وجود مكالمة كمبيوتر عبر بلوتوث قيد التقدم.</p> <p>في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرّف (الرقم) الخاص بمكالمة كمبيوتر عبر بلوتوث.</p>	
<p><b>مكالمة إرسال</b></p> <p>يتم استخدام نوع جهة الاتصال "مكالمة إرسال" لإرسال رسالة نصية إلى كمبيوتر المُرسِل عن طريق خادم الرسائل النصية لجهة أخرى.</p>	
<p><b>مكالمة جماعية/مكالمة شاملة</b></p> <p>للإشارة إلى وجود مكالمة جماعية أو مكالمة شاملة قيد التقدم.</p> <p>في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرّف (الرقم) الخاص بمجموعة.</p>	
<p><b>اتصال خاص</b></p> <p>للإشارة إلى وجود مكالمة خاصة قيد التقدم.</p>	

الجدول يتبع...

## الجدول 3: رموز القائمة المتقدمة

تظهر الرموز التالية بجوار عناصر القائمة، والتي توفر إمكانية الاختيار بين خيارين أو تعمل كمؤشر على أن هناك قائمة فرعية توفر خيارين.

<p><b>خانة الاختيار (محددة)</b></p> <p>يشير إلى أن الخيار تم تحديده.</p>	
<p><b>خانة الاختيار (فارغة)</b></p> <p>يشير إلى عدم تحديد الخيار.</p>	
<p><b>مربع أسود ثابت</b></p> <p>يشير إلى الخيار المحدد لعنصر القائمة مع قائمة فرعية.</p>	

## الجدول 4: رموز أجهزة بلوتوث

تظهر الرموز التالية بجوار العناصر الموجودة في قائمة الأجهزة الممكنة بها تقنية Bluetooth، والتي تتوفر للإشارة إلى نوع الجهاز.

<p><b>جهاز صوت بلوتوث</b></p> <p>جهاز صوت يدعم بلوتوث، كسماعة الرأس.</p>	
<p><b>جهاز بيانات بلوتوث</b></p> <p>جهاز يدعم بلوتوث، كالماسحة الضوئية.</p>	
<p><b>جهاز PTT بلوتوث</b></p> <p>جهاز PTT يدعم بلوتوث، كجهاز PTT فقط.</p>	

<p><b>قيد التقدم</b></p> <p>جاري إرسال المهام. تتم رؤية هذا قبل الإشارة إلى فشل إرسال تذاكر العمل أو إرسالها بنجاح.</p>	
<p><b>فشل الإرسال</b></p> <p>لا يمكن إرسال المهام.</p>	
<p><b>تم الإرسال بنجاح</b></p> <p>تم إرسال المهام بنجاح.</p>	
<p><b>الأولوية 1</b></p> <p>يشير إلى مستوى الأولوية 1 للمهام.</p>	
<p><b>الأولوية 2</b></p> <p>يشير إلى مستوى الأولوية 2 للمهام.</p>	
<p><b>الأولوية 3</b></p> <p>يشير إلى مستوى الأولوية 3 للمهام.</p>	

في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو المعرف (الرقم) الخاص بالمشارك.

**مكالمة هاتفية كمكالمة جماعية/شاملة**  
للإشارة إلى وجود مكالمة هاتفية كمكالمة جماعية أو مكالمة شاملة قيد التقدم.

في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرف (الرقم) الخاص بمجموعة.

**مكالمة هاتفية كمكالمة خاصة**  
للإشارة إلى أن مكالمة هاتفية كمكالمة خاصة قيد التقدم.

في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرف (الرقم) الخاص بهاتف.

### الجدول 6: رموز تذاكر العمل

تظهر الرموز التالية للحظة على الشاشة في مجلد تذاكر العمل.

<p><b>كل المهام</b></p> <p>للإشارة إلى كل المهام المدرجة.</p>	
<p><b>المهام الجديدة</b></p> <p>للإشارة إلى المهام الجديدة.</p>	

الجدول يتبع...

رسالة فردية أو جماعية مقروءة تمت قراءة الرسالة النصية.	أو  
رسالة فردية أو جماعية غير مقروءة لم تتم قراءة الرسالة النصية.	أو  
فشل الإرسال يتعذر إرسال الرسالة النصية.	أو  
تم الإرسال بنجاح تم إرسال الرسالة النصية بنجاح.	أو  

## مؤشر LED

يوضح مؤشر LED الحالة التشغيلية للراديو.

## الجدول 7: رموز الإشعارات الصغيرة

تظهر الرموز التالية لحظيًا على الشاشة بعد القيام بإجراء لأداء إحدى المهام.

إرسال فاشل (سلبي) فشل اتخاذ إجراء.	
إرسال ناجح (إيجابي) تم اتخاذ إجراء ناجح.	
الإرسال قيد التقدم (مؤقت) جار الإرسال. يظهر هذا الرمز قبل الإشارة إلى نجاح الإرسال أو فشله.	

## الجدول 8: رموز العناصر المرسلّة

تظهر الرموز التالية في الزاوية العليا اليسرى من الشاشة في مجلد العناصر المرسلّة.

قيد التقدم الرسالة النصية إلى الاسم المستعار أو المعرف الخاص بأحد المشتركين في انتظار الإرسال وسيكون متبوعًا بانتظار لرسالة الإعلام.	أو  
الرسالة النصية إلى الاسم المستعار أو المعرف الخاص بإحدى المجموعات في انتظار الإرسال.	

الجدول يتبع...

**أحمر وامض**

فشل الراديو في الاختبار الذاتي عند التشغيل.

يستقبل الراديو إرسال طوارئ.

يقوم الراديو بالإرسال والبطارية منخفضة.

انتقل الراديو خارج النطاق إذا تم تكوين نظام الإرسال/الاستقبال تلقائي النطاق.

تم تمكين وضع كتم الصوت.

**أخضر راسخ**

يقوم الراديو ببدء التشغيل.

يقوم جهاز الراديو بالإرسال.

يقوم الراديو بإرسال تنبيه مكالمة أو إرسال طوارئ.

**أخضر وامض**

الجهاز اللاسلكي مكالمة أو بيانات.

يسترد الراديو عمليات إرسال البرمجة عبر الأثير.

يكتشف الراديو نشاطًا عبر الأثير.

**إشعار:**

قد يؤثر هذا النشاط على القناة المبرمجة في الراديو أو لا يؤثر عليها

بحسب طبيعة البروتوكول الرقمي.

**أخضر وامض بطريقة ازدواجية**

يستقبل الراديو مكالمة أو بيانات مدعومة بالخصوصية.

**أصفر راسخ**

الراديو في وضع قابلية اكتشاف Bluetooth.

**أصفر وامض**

لم يستجب الراديو بعد لتنبيه المكالمات.

**أصفر وامض بطريقة ازدواجية**

التجوال التلقائي ممكن في الراديو.

يبحث الراديو بشكل فعال عن موقع جديد.

لم يستجب الراديو بعد إلى تنبيه مكالمة جماعية.

الراديو مؤمن.

**النعمة**

فيما يلي النعمت التي تصدر عبر سماعة الراديو.

نعمة عالية

نعمة منخفضة

**النعمة الصوتية**

توفر النعمت الصوتية إشارات صوتية عن حالة الراديو أو استجابة الراديو للبيانات المتلقاة.

## التسجيل

هناك عدد من الرسائل المتعلقة بالتسجيل يمكن أن تستقبلها.

### تسجيل

عادة ما يتم إرسال التسجيل إلى النظام أثناء تشغيل النظام أو تغيير مجموعة التحدث أو أثناء تجوال الموقع. في حالة فشل أحد أجهزة الراديو في التسجيل بموقع ما، سيحاول الراديو التجوال تلقائيًا لموقع آخر. يزيل الراديو مؤقتًا الموقع الذي تمت محاولة التسجيل فيه من قائمة التجوال.

يعني المؤشر أن الراديو مشغول بالبحث عن موقع للتجوال أو أن الراديو نجح في العثور على موقع لكنه ينتظر الرد على رسائل التسجيل من الراديو.

عند عرض تسجيل على الراديو، تصدر نغمة وبيضيء مؤشر LED الأصفر مرتين ليبدل على البحث عن موقع.

إذا استمرت المؤشرات، فيجب على المستخدم تغيير المواقع، أو يمكنه التجوال يدويًا لموقع آخر إذا كان مسموحًا له بذلك.

### Out Of Range (خارج النطاق)

يُعتبر الراديو خارج النطاق عندما لا يتمكن من اكتشاف إشارة من النظام أو من الموقع الحالي. عادة ما يدل هذا المؤشر على أن الراديو خارج نطاق التغطية الجغرافية للتردد اللاسلكي الصادر.

عند عرض خارج النطاق على الراديو، تصدر نغمة متكررة وبيضيء مؤشر LED الأحمر.

### نغمة مستمرة

صوت أحادي النغمة. تصدر بشكل مستمر حتى الإنهاء.

### نغمة دورية

تصدر بشكل دوري بناءً على المدة التي تم تعيينها بواسطة الراديو. تبدأ النغمة، وتتوقف، وتعيد نفسها.

### نغمة متكررة

نغمة فردية تعيد نفسها حتى يتم إنهاؤها بواسطة المستخدم.

### نغمة مؤقتة

تصدر مرة واحدة للفترة القصيرة التي تم تعيينها بواسطة الراديو.

## نغمات المؤشرات

توفر لك نغمات المؤشرات إشارات صوتية تعبر عن الحالة بعد اتخاذ إجراء لأداء مهمة.

### نغمة مؤشر إيجابية

### نغمة مؤشر سلبية

يمكن برمجة الراديو باستخدام 250 منطقة Capacity Max بحد أقصى مع 160 قناة بحد أقصى لكل منطقة. تشمل كل منطقة Capacity Max على 16 موضعًا قابلاً للتعيين بحد أقصى.

## تحديد مناطق

اتبع الإجراء لتحديد المنطقة المطلوبة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **T**. **منطقة الميرمج**. تابع إلى **خطوة 3**.
- اضغط على **OK** للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى منطقة. اضغط على **OK** للتحديد.

تعرض الشاشة  والمنطقة الحالية.

3

اضغط على  أو  للوصول إلى المنطقة المطلوبة. اضغط على **OK** للتحديد.

تعرض الشاشة تم تحديد **< المنطقة >** مؤقتًا وتعود إلى شاشة المنطقة المحددة.

اتصل بالوكيل أو مسؤول النظام إذا استمر الراديو في استقبال مؤشرات الخروج عن النطاق أثناء وجوده في منطقة بها تغطية تردد لاسلكي جيدة.

## فشل الانضمام إلى مجموعة التحدث

يحاول راديو الانضمام إلى مجموعة التحدث المحددة في القنوات أو موضع القرص الموحد (UKP) أثناء التسجيل.

لا يتمكن راديو في حالة فشل الانضمام من إجراء أو استقبال مكالمات من مجموعة التحدث التي يحاول الراديو الانضمام إليها.

عندما يفشل راديو في الانضمام إلى مجموعة تحدث، تظهر كلمة الاسم المستعار UKP على الشاشة الرئيسية مع خلفية مضيئة.

اتصل بالوكيل أو مسؤول النظام إذا كان الراديو يتلقى مؤشرات فشل الانضمام.

## رفض التسجيل

يتم استلام مؤشرات رفض التسجيل عند عدم قبول التسجيل في النظام.

لا يبيّن الراديو للمستخدم السبب المحدد وراء رفض التسجيل. عادة يتم رفض التسجيل عندما يكون مشغل النظام قد عطل وصول الراديو إلى النظام.

عند رفض تسجيل راديو، تظهر رفض التسجيل على الراديو وبضوء مؤشر LED الأصفر مرتين ليدل على البحث عن موقع.

## تحديدات المنطقة والقناة

يشرح هذا الفصل عمليات تحديد منطقة أو قناة على الراديو الخاص بك.

## تحديد مناطق باستخدام البحث عن الاسم المستعار

اتبع الإجراء لتحديد المنطقة المطلوبة على الراديو الخاص بك باستخدام البحث عن الاسم المستعار.

5

اضغط على  للتحديد.

تعرض الشاشة تم تحديد « المنطقة » للحظة وتنتقل إلى شاشة المنطقة المحددة.

## تحديد نوع مكالمة

استخدم قرص محدد القناة لتحديد نوع مكالمة. ويمكن أن تكون مكالمة جماعية أو مكالمة بث أو مكالمة شاملة أو مكالمة خاصة، بناءً على طريقة برمجة الراديو الخاص بك. إذا قمت فقم بتغيير قرص محدد القناة إلى موضع مختلف (معين له نوع مكالمة)، حيث قد يؤدي هذا إلى إعادة تسجيل الراديو في نظام Capacity Max. يقوم الراديو بالتسجيل باستخدام معرف مجموعة التحديث الذي تمت برمجته لموضع قرص محدد القناة لنوع المكالمة الجديد.

لا يعمل الراديو عند تحديده على قناة غير مبرمجة، لذلك استخدم قرص محدد القناة لتحديد قناة مبرمجة.

بمجرد عرض المنطقة المطلوبة (في حالة وجود مناطق متعددة في الراديو)، قم بإدارة قرص محدد القناة المبرمج لتحديد نوع المكالمة.

## تحديد موقع

يوفر الموقع تغطية لمنطقة معينة. في شبكة متعددة المواقع، سيبحث راديو Capacity Max تلقائياً عن موقع جديد عندما ينخفض مستوى الإشارة من الموقع الحالي إلى مستوى غير مقبول.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى منطقة. اضغط على  للتحديد.

تعرض الشاشة ✓ والمنطقة الحالية.

3

أدخل الحرف الأول من الاسم المستعار المطلوب.  
ستعرض الشاشة مؤشراً وامضاً.

4

أدخل باقي أحرف الاسم المستعار المطلوب.

البحث عن الاسم المستعار غير حساس لحالة الأحرف. إذا كان هناك إدخالان أو أكثر بنفس الاسم، تعرض الشاشة الإدخال الذي تم إدراجه أولاً في القائمة.

يعرض سطر النص الأول الأحرف التي أدخلتها. تعرض أسطر النص التالية القائمة المختصرة لنتائج البحث.

يمكن لنظام السعة القصوى أن يدعم ما يصل إلى 250 موقعًا.

## طلب تجوال

يعمل طلب التجوال على إخبار الراديو بالبحث عن موقع مختلف، حتى إذا كانت الإشارة من الموقع الحالي مقبولة.

إذا لم تكن هناك مواقع متوفرة:

- تعرض شاشة الراديو جاري البحث ويتابع البحث عبر قائمة المواقع.
- سيعود الراديو إلى الموقع السابق، إذا كان الموقع السابق ما زال متوفرًا.

إشعار:

تتم برمجة هذه الميزة من قبل الوكيل.

اضغط على زر تجوال يدوي للموقع المبرمج.

ستسمع نغمة، تشير إلى أن الراديو قام بالتبديل إلى موقع جديد. وستعرض الشاشة معرف الموقع «رقم الموقع».

## تشغيل/إيقاف قفل الموقع

عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

اضغط على الزر المبرمج قفل الموقع.

إذا تم تشغيل وظيفة قفل الموقع:

- ستسمع نغمة مؤشر إيجابية، تشير إلى قفل الراديو للموقع الحالي.
- ستعرض الشاشة تم قفل الموقع.

إذا تم إيقاف تشغيل وظيفة قفل الموقع:

- ستسمع نغمة مؤشر سلبية للإشارة إلى فتح قفل الراديو.
- وتعرض الشاشة تم فتح قفل الموقع.

## تقييد الموقع

في نظام Capacity Max، يمكن لمسؤول نظام الراديو تحديد مواقع الشبكة المسموح وغير المسموح للراديو باستخدامها.

ولن يتعين إعادة برمجة الراديو لتغيير قائمة المواقع المسموح بها وغير المسموح بها. إذا حاول الراديو التسجيل في موقع غير مسموح به، فسوف يتلقى الراديو إشارة بأن الموقع مرفوض. ويبحث الراديو بعد ذلك عن موقع شبكة مختلف.

عند مواجهة تقييدات بالموقع، يعرض الراديو رفض التسجيل وبضوء مؤشر LED الأصفر مرتين للإشارة إلى البحث عن الموقع.

## ترنك الموقع

يجب أن يتمكن الموقع من الاتصال بوحدة التحكم بالترنك لكي يكون في وضع " ترنك النظام".

فإذا لم يتمكن الموقع من الاتصال بوحدة التحكم بالترنك في النظام، يدخل الراديو في وضع "ترنك الموقع". أثناء وجود الراديو في وضع "ترنك الموقع"، فإنه يصدر إشارة صوتية ومرئية دورية للمستخدم لإعلامه بمحدودية التشغيل.

عندما يكون الراديو في وضع "ترنك الموقع"، يعرض الراديو ترنك الموقع وتصدر نغمة متكررة.

يظل الراديو وهو في وضع "ترنك الموقع" قادرًا على إجراء مكالمات صوتية جماعية وفردية إلى جانب إرسال رسائل نصية إلى أجهزة الراديو الأخرى الموجودة في نفس الموقع. لا يمكن لوحدة التحكم بالصوت وأجهزة تسجيل التشغيل وبوابات الهاتف وتطبيقات البيانات الاتصال بأجهزة الراديو في الموقع.

بمجرد الدخول في وضع "ترنك الموقع"، لن يتمكن الراديو المستخدم في مكالمات عبر مواقع متعددة إلا من الاتصال بأجهزة الراديو الأخرى الموجودة في نفس الموقع. سيتم فقد الاتصال من وإلى المواقع الأخرى.

إشعار:

في حالة وجود مواقع متعددة تغطي الموقع الحالي للراديو ودخول أحد المواقع في وضع "ترنك الموقع"، تقوم أجهزة الراديو بالتحوّل إلى موقع آخر إن كان داخل نطاق التغطية.

## المكالمات

يشرح هذا الفصل عمليات استقبال المكالمات والرد عليها وإجرائها وإيقاها.

يمكنك تحديد اسم مستعار أو معرف للمشارك، أو اسم مستعار أو معرف للمجموعة بعد تحديد قناة باستخدام إحدى الميزات التالية:

### البحث عن الاسم المستعار

تستخدم هذه الطريقة للمكالمات الجماعية والخاصة والشاملة فقط باستخدام ميكروفون مزوّد بلوحة مفاتيح.

### قائمة جهات الاتصال

توفر هذه الطريقة وصولاً مباشراً إلى قائمة جهات الاتصال.

### الاتصال اليدوي (عن طريق استخدام جهات الاتصال)

تستخدم هذه الطريقة للمكالمات الخاصة والهاتفية فقط باستخدام ميكروفون مزوّد بلوحة مفاتيح.

### مفاتيح الأرقام المبرمجة

تستخدم هذه الطريقة للمكالمات الجماعية والخاصة والشاملة فقط باستخدام ميكروفون مزوّد بلوحة مفاتيح.

إشعار:

يمكنك فقط تخصيص اسم مستعار أو معرف واحد لمفتاح رقم، ولكن يمكنك إقران أكثر من مفتاح رقم واحد بالاسم المستعار أو المعرف. يمكن تخصيص كل مفاتيح الأرقام على الميكروفون المزوّد بلوحة مفاتيح. راجع [تخصيص إدخلات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344](#) لمزيد من المعلومات.

### زر الوصول بلمسة واحدة المبرمج

تستخدم هذه الطريقة للمكالمات والجماعية والخاصة والهاتفية فقط.

يمكن أن يكون لديك معرف واحد فقط مخصص لزر الوصول بلمسة واحدة بالضغط لفترة طويلة أو قصيرة على زر قابل للبرمجة. يمكن أن يحتوي الراديو على العديد من أزرار [الوصول بلمسة واحدة](#) المبرمجة.

## الزر القابل للبرمجة

تستخدم هذه الطريقة للمكالمات الهاتفية فقط.

## قرص تحديد مستوى الصوت/القتوات

يمكن عبر هذه الطريقة تحديد الاسم المستعار أو المعرف الخاص بالمشارك أو الاسم المستعار أو المعرف الخاص بالمجموعة.

يضئ مؤشر LED بلون أخضر ثابت عند قيام الراديو بالإرسال ويومض بلون أخضر عند قيام الراديو بالتلقي.

## إشعار:

يضئ مؤشر LED بلون أخضر ثابت عند قيام الراديو بالإرسال ويومض مرتين باللون الأخضر عند تلقي مكالمة تدعم السرية.

لفك تشفير مكالمة تدعم السرية، يجب أن يكون للراديو الخاص بك نفس مفتاح السرية، أو نفس قيمة المفتاح ومعرف المفتاح (تتم برمجته من قبل الوكيل) الخاص بالراديو المرسل (الراديو الذي تتلقى المكالمة منه).

راجع السرية في صفحة 391 لمزيد من المعلومات.

## المكالمات الجماعية

يجب تكوين الراديو الخاص بك كجزء من مجموعة لتلقي مكالمة من أو إجراء مكالمة إلى مجموعة من المستخدمين.

## إجراء مكالمات جماعية

لإجراء مكالمة إلى مجموعة مستخدمين، يجب تكوين الراديو كجزء من هذه المجموعة. اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك.

## 1 قم بأحد الإجراءات التالية:

- حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بالمجموعة. راجع تحديد نوع مكالمة في صفحة 55.
- اضغط على زر الوصول بلمسة واحدة المبرمج.

## 2 اضغط على زر PTT لإجراء المكالمة.

يضئ مؤشر LED الأخضر. يعرض سطر النص الأول رمز مكالمة جماعية والاسم المستعار.

## 3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة PTT الجانبية وتحديث بوضوح في الميكروفون إذا كان مُمكنًا.

## 4 حرر زر PTT للاستماع.

يضئ مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة رمز مكالمة جماعية، والاسم المستعار أو المعرف، والاسم المستعار أو المعرف الخاص بالراديو المرسل.

5 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر PTT في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر PTT للرد على المكالمة.

## 5 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة PTT الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

## 6 حرر زر PTT للاستماع.

يومض مؤشر LED الأخضر عندما يستجيب أي مستخدم في المجموعة. تعرض الشاشة رمز **مكالمة جماعية**، والاسم المستعار أو المعرف، والاسم المستعار أو المعرف الخاص بالراديو المُرسِل.

7 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر PTT في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر PTT للرد على المكالمة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

يمكن للمتصل أن يضغط على  لإنهاء المكالمة الجماعية.

تسمع نغمة قصيرة. وتعرض الشاشة انتهت المكالمة.

## إجراء مكالمات جماعية باستخدام مفتاح الرقم المبرمج

اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

يمكن للمتصل أن يضغط على  لإنهاء مكالمة جماعية.

## إجراء مكالمات جماعية باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على زر PTT لإجراء المكالمة.

يضيء مؤشر LED الأخضر.

يعرض السطر الأول الاسم المستعار أو المعرف الخاص بالمشارك.

يعرض السطر الثاني مكالمة جماعية ورمز مكالمة جماعية.

## إجراء مكالمات جماعية باستخدام البحث عن الاسم المستعار

يمكنك أيضًا استخدام البحث حسب الاسم المستعار أو البحث الأبجدي الرقمي لاسترجاع الاسم المستعار للمشارك المطلوب. هذه الميزة قابلة للتطبيق فقط من جهات الاتصال. اتبع الإجراء لإجراء أي مكالمات باستخدام البحث عن الاسم المستعار.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المحدد مسبقًا عندما تكون على الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترنًا بإدخال.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED الأخضر.

3 حرر زر **PTT** للاستماع.

يومض مؤشر LED الأخضر عندما يستجيب أي مستخدم في المجموعة.

4 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

يمكن للمتصل أن يضغط على **(5)** لإنهاء المكالمة الجماعية.

راجع تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344 لمزيد من المعلومات.

1 اضغط على **OK** للوصول إلى القائمة.

2 اضغط على **▲** أو **▼** للوصول إلى جهات الاتصال.  
اضغط على **OK** للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

3 اضغط على **▲** أو **▼** للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشارك. يعرض السطر الأول من الشاشة رقم الهاتف. يعرض السطر الثاني من الشاشة مؤشرًا وامضًا. استخدم لوحة المفاتيح لإدخال رقم هاتف.

- اضغط على أي مفتاح على لوحة المفاتيح لبدء إدخال الأرقام الإضافية. يعرض السطر الأول من الشاشة أرقام إضافية. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الأرقام الإضافية واضغط على الزر  للمتابعة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF) ويعود الراديو إلى الشاشة السابقة.
- اضغط على زر **الوصول بلمسة واحدة**. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغاً، فستصدر نغمة مؤشر سلبية.

8

- اضغط على  لإنهاء المكالمات. في حال لم يتم تكوين رمز إلغاء الوصول مسبقاً في قائمة جهات الاتصال، يعرض السطر الأول من الشاشة إزالة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز إلغاء الوصول ثم اضغط على  للمتابعة. يعود الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة. إذا تم بنجاح، ستصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. يعود الراديو إلى شاشة اتصال هاتفي. إذا لم يتم بنجاح، فسيعود الراديو إلى شاشة اتصال هاتفي. عند الضغط على زر **PTT** أثناء التواجد في شاشة جهات اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغط موافق لإجراء المكالمة. عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

- 4 اضغط على  للتحديد. في حال كان الإدخال المحدد خالياً، يتم إصدار نغمة مؤشر سلبية، وتعرض الشاشة # Phone Call Invalid (رقم مكالمة هاتفية غير صالح).

5

- اضغط على  أو  للوصول إلى الاتصال بالهواتف واضغط على  للتحديد. في حال لم يتم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، سيعرض السطر الأول من الشاشة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز الوصول، واضغط على الزر  للمتابعة. إذا تم بنجاح، تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). تسمع نغمة الطلب الخاصة بمستخدم الهاتف. يعرض السطر الأول من الشاشة الاسم المستعار أو المعرف الخاص بالمشارك ورمز مؤشر قوة الإشارة المتلقاة (RSSI). يعرض السطر الثاني من الشاشة اتصال هاتفي ورمز المكالمة الهاتفية. إذا لم يتم بنجاح، فستصدر نغمة وتعرض الشاشة فشلت المكالمة الهاتفية. يعود الراديو إلى شاشة إدخال رمز الوصول. في حال تم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، يعود الراديو إلى الشاشة التي كنت فيها قبل بدء المكالمة.

- 6 اضغط على زر **PTT** للتحدث وقم بتحريه للاستماع. يختفي رمز **RSSI** أثناء الإرسال.

7

- لإدخال أرقام إضافية، إذا طلبتها المكالمة الهاتفية، قم بأحد الإجراءات التالية.

- 9 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.
- تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. تصدر نغمة. وتعرض الشاشة انتهت المكالمات.

يمكن للمتصل أن يضغط على (📞) لإنهاء المكالمات الجماعية.

إشعار:

أثناء الوصول إلى القناة، اضغط على (📞) لتجاهل محاولة الاتصال وعندها ستصدر نغمة أو للخروج من البحث عن الاسم المستعار. اضغط

على الزر **OK** أو (📞) للخروج من البحث عن الاسم المستعار. أثناء المكالمات، عند الضغط على زر الوصول بلمسة واحدة مع تكوين رمز إلغاء الوصول مسبقًا أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمات. أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر التشغيل/إيقاف التشغيل وقرص مستوى الصوت وزر القناة فقط. يتم إصدار نغمة لكل إدخال غير صالح.

## الرد على المكالمات الجماعية

اتبع الإجراء للرد على مكالمات جماعية على الراديو الخاص بك.

عند تلقي مكالمة جماعية:

- يومض مؤشر LED الأخضر.

- تعرض الشاشة رمز **مكالمة جماعية** في الركن العلوي الأيسر.
- يعرض سطر النص الأول الاسم المستعار للمتصل.
- يعرض سطر النص الثاني الاسم المستعار للمكالمة الجماعية.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمات الواردة من خلال السماعة.

1 قم بأحد الإجراءات التالية:

- عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.
- عند تمكين ميزة قطع الصوت، اضغط على زر **PTT** لقطع الصوت من الراديو المرسل وإخلاء القناة من أجل الرد. يضيء مؤشر LED الأخضر.

2 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة **PTT** الجانبية وتحديث بوضوح في الميكروفون إذا كان مُمكنًا.

3 حرر زر **PTT** للاستماع.

تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة PTT الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

يمكن للمتصل أن يضغط على  لإنهاء مكالمة البث.

## إجراء مكالمات بث باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات بث على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المرفق المطلوب. اضغط على  للتحديد.

4 اضغط على زر PTT لإجراء المكالمة. يومض مؤشر LED الأخضر.

## مكالمة البث

مكالمة البث هي مكالمة صوتية أحادية الاتجاه من أي مستخدم لمجموعة تحدث بالكامل.

تتيح ميزة مكالمة البث للمستخدم الذي بدأ الاتصال فقط أن يرسل إلى مجموعة التحدث، بينما لا يمكن للمستقبلين الرد.

يمكن لبداي البث أيضًا إنهاء مكالمة البث. لاستقبال مكالمة من مجموعة مستخدمين، أو للاتصال بمجموعة مستخدمين، يجب تكوين الراديو كجزء من مجموعة.

## إجراء مكالمات البث

اتبع الإجراء لإجراء مكالمات بث على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- حدد قناة باستخدام الاسم المستعار النشط أو المرفق النشط الخاص بالمجموعة. راجع تحديد نوع مكالمة في صفحة 55.
- اضغط على زر الوصول بلمسة واحدة المبرمج.

2 اضغط على زر PTT لإجراء المكالمة.

يضيء مؤشر LED الأخضر. تعرض الشاشة رمز مكالمة جماعية والاسم المستعار.

3 قم بأحد الإجراءات التالية:

يعرض السطر الأول الاسم المستعار أو المعرف الخاص بالمستخدم.  
يعرض السطر الثاني مكالمة جماعية ورمز مكالمة جماعية.

## 2 اضغط على زر PTT لإجراء المكالمة.

يضئ مؤشر LED الأخضر. تعرض الشاشة رمز مكالمة جماعية في الركن العلوي الأيسر. يعرض سطر النص الأول الاسم المستعار للمتصل.

## 5 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة PTT الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

يمكن للمتصل أن يضغط على (5) لإنهاء مكالمة البث.

## 3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة PTT الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

يمكن للمتصل أن يضغط على (5) لإنهاء مكالمة البث.

## إجراء مكالمات بث باستخدام مفتاح الرقم القابل للبرمجة

اتبع الإجراء لإجراء مكالمات بث على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

## استقبال مكالمات بث

اتبع الإجراء لاستقبال مكالمة بث على الراديو الخاص بك.

عند تلقي مكالمة بث:

- يومض مؤشر LED الأخضر.
- تعرض الشاشة رمز مكالمة جماعية في الركن العلوي الأيسر.
- يعرض سطر النص الأول الاسم المستعار للمتصل.
- يعرض سطر النص الثاني الاسم المستعار للمكالمة الجماعية.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المحدد مسبقًا عندما تكون على الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترنًا بإدخال.

## إجراء مكالمات خاصة

يجب برمجة الراديو الخاص بك لبدء مكالمات خاصة. إذا لم يتم تمكين هذه الميزة، فستسمع نغمة مؤشر سلبية عند بدأ المكالمات. اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك. في حالة عدم وجود الراديو المستهدف، ستصدر نغمة قصيرة وتعرض الشاشة الحفلة غير متاحة.

### 1 قم بأحد الإجراءات التالية:

- حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بالمستخدم. راجع [تحديد نوع مكالمات في صفحة 55](#).
- اضغط على زر الوصول بلمسة واحدة المبرمج.

### 2 اضغط على زر PTT لإجراء المكالمات.

يضيء مؤشر LED الأخضر. تعرض الشاشة رمز مكالمات خاصة والاسم المستعار للمستخدم وحالة المكالمات.

### 3 انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان ممكناً.

### 4 حرر زر PTT للاستماع.

يضيء مؤشر LED الأخضر عندما يستجيب الراديو المستهدف.

### 5 تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقاً. تستمع نغمة قصيرة. وتعرض الشاشة انتهت المكالمات.

### إشعار:

لا يُسمح للمستخدمين المستقبلين برد الاتصال أثناء مكالمات البث. تعرض الشاشة منع رد الاتصال. ستصدر نغمة منع رد الاتصال سريعاً إذا تم الضغط على زر PTT أثناء مكالمات بث.

## اتصال خاص

المكالمة الخاصة هي مكالمات من راديو فردي إلى راديو فردي آخر.

توجد طريقتان لإعداد مكالمات خاصة.

- يسمى نوع الاتصال الأول إعداد المكالمات دون بث (OACSU). يمكن إعداد المكالمات عبر إعداد المكالمات دون بث (OACSU) بعد إجراء فحص وجود الراديو ثم إكمال المكالمات تلقائياً.
- يسمى النوع الثاني الإعداد الكامل للمكالمات دون بث (FOACSU). كما يمكن عبر الإعداد الكامل للمكالمات دون بث (FOACSU) إعداد المكالمات بعد إجراء فحص وجود الراديو. ومع ذلك، تتطلب المكالمات عبر الإعداد الكامل للمكالمات دون بث (FOACSU) إعلام المستخدم لاستكمال المكالمات والسماح للمستخدم بقبول المكالمات أو رفضها.

يتولى مسؤول النظام تكوين نوع المكالمات.

### إشعار:

يمكن لكل من المتصل والمستقبل إنهاء مكالمات خاصة جارية عبر الضغط

على  .

يمكن لكل من المتصل والمستقبل إنهاء مكالمة خاصة جارية عبر الضغط على .

## إجراء مكالمات خاصة باستخدام مفتاح الرقم القابل للبرمجة

اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المحدد مسبقًا عندما تكون على الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترنًا بإدخال.

2 اضغط على زر PTT لإجراء المكالمة.

يضيء مؤشر LED الأخضر. ستعرض الشاشة رمز **مكالمة خاصة** في الركن العلوي الأيسر. يعرض سطر النص الأول الاسم المستعار للمتصل. يعرض سطر النص الثاني حالة المكالمة.

3 حرر زر PTT للاستماع.

يومض مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة الاسم المستعار للوجهة.

4 تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. تستمع نغمة قصيرة. وتعرض الشاشة انتهت المكالمة.

يمكن لكل من المتصل والمستقبل إنهاء مكالمة خاصة جارية عبر الضغط على .

راجع **تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344** لمزيد من المعلومات.

## إجراء مكالمات خاصة باستخدام البحث عن الاسم المستعار

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

6 اضغط على زر **PTT** للتحدث وقم بتحريره للاستماع. يخفي رمز **RSSI** أثناء الإرسال.

7 لإدخال أرقام إضافية، إذا طلبتها المكالمات الهاتفية، قم بأحد الإجراءات التالية.

- اضغط على أي مفتاح على لوحة المفاتيح لبدء إدخال الأرقام الإضافية. يعرض السطر الأول من الشاشة أرقام إضافية. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الأرقام الإضافية واضغط على الزر **OK** للمتابعة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF) ويعود الراديو إلى الشاشة السابقة.
- اضغط على زر **الوصول بلمسة واحدة**. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغاً، فستصدر نغمة مؤشر سلبية.

8 اضغط على **5** لإنهاء المكالمات. في حال لم يتم تكوين رمز إلغاء الوصول مسبقاً في قائمة جهات الاتصال، يعرض السطر الأول من الشاشة إزالة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز إلغاء الوصول ثم اضغط على **OK** للمتابعة. يعود الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمات. إذا تم بنجاح، فستصدر نغمة وتعرض الشاشة تم إنهاء المكالمات. يعود الراديو إلى شاشة اتصال هاتفي. إذا لم يتم بنجاح، فسيعود الراديو إلى شاشة اتصال هاتفي. عند الضغط على زر **PTT** أثناء التواجد في شاشة جهات

3 اضغط على **▲** أو **▼** للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمستعار. يعرض السطر الأول من الشاشة رقم الهاتف. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. استخدم لوحة المفاتيح لإدخال رقم هاتف.

4 اضغط على **OK** للتحديد. في حال كان الإدخال المحدد خالياً، يتم إصدار نغمة مؤشر سلبية، وتعرض الشاشة **Phone Call Invalid** (رقم مكالمات هاتفية غير صالح).

5 اضغط على **▲** أو **▼** للوصول إلى الاتصال بالهواتف واضغط على **OK** للتحديد. في حال لم يتم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، سيعرض السطر الأول من الشاشة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز الوصول، واضغط على الزر **OK** للمتابعة. إذا تم بنجاح، تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). تسمع نغمة الطلب الخاصة بمستخدم الهاتف. يعرض السطر الأول من الشاشة الاسم المستعار أو المعرف الخاص بالمستعار ورمز **RSSI**. يعرض السطر الثاني من الشاشة اتصال هاتفي ورمز **المكالمات الهاتفية**. إذا لم يتم بنجاح، فستصدر نغمة وتعرض الشاشة فشلت المكالمات الهاتفية. يعود الراديو إلى شاشة إدخال رمز الوصول. في حال تم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، يعود الراديو إلى الشاشة التي كنت فيها قبل بدء المكالمات.

اتصال الهاتف، ستصدر نغمة وستعرض الشاشة ا ضغط مو افق لإجراء المكالمة . عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمة . في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

9 تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. يستمع نغمة قصيرة. وتعرض الشاشة انتهت المكالمة . يمكن لكل من المتصل والمستقبل إنهاء مكالمة خاصة جارية عبر الضغط على (5\*) .

إشعار:

أثناء الوصول إلى القناة، اضغط على (5\*) لتجاهل محاولة الاتصال وعندها ستصدر نغمة أو للخروج من البحث عن الاسم المستعار. اضغط على الزر (OK) أو (5\*) للخروج من البحث عن الاسم المستعار. أثناء المكالمة، عند الضغط على زر الوصول بلمسة واحدة مع تكوين رمز إلغاء الوصول مسبقًا أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمة.

## إجراء مكالمة خاصة باستخدام الزر مكالمة بلمسة واحدة

تتيح لك الميزة مكالمة بلمسة واحدة إجراء مكالمة خاصة بسهولة إلى اسم مستعار أو معرف خاص بمكالمة خاصة محدد مسبقًا. يمكن تعيين هذه الميزة إلى الضغط لفترة قصيرة أو طويلة على زر قابل للبرمجة.

يمكنك تعيين اسم مستعار أو معرف واحد فقط إلى زر مكالمة بلمسة واحدة. يمكن أن يحتوي الراديو على العديد من الأزرار المبرمجة لميزة مكالمة بلمسة واحدة.

1 اضغط على زر **مكالمة بلمسة واحدة** المبرمج لإجراء مكالمة خاصة إلى الاسم المستعار أو المعرف الخاص بالمكالمة الخاصة المحدد مسبقًا.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضئي مؤشر LED باللون الأخضر الثابت.

ستعرض الشاشة الاسم المستعار أو المعرف الخاص بالمكالمة الخاصة.

3 انتظر حتى تنتهي نغمة إذن بالكلام (في حالة تمكينها) وتحدث بوضوح في الميكروفون.

4 حرر زر **PTT** للاستماع.

عند رد الراديو المستهدف، يومض مؤشر LED باللون الأخضر.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، ستنتهي المكالمة.

يمكن لكل من المتصل والمستقبل إنهاء مكالمة خاصة جارية عبر الضغط

على (5\*) .

## إجراء مكالمات خاصة باستخدام الاتصال اليدوي

اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- أدخل معرف المشترك واضغط على  للمتابعة.
- حرر المعرف الخاص بالمشترك الذي قمت بطلبه مسبقاً واضغط على  للمتابعة.

6 اضغط على زر **PTT** لإجراء المكالمات.

يضئ مؤشر LED الأخضر. تعرض الشاشة الاسم المستعار للوجهة.

7 انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان مُكتمًا.

8 حرر زر **PTT** للاستماع.

يضئ مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة الاسم المستعار أو المعرف الخاص بالمستخدم المرسل.

9 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.

تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقاً. تصدر نغمة وتعرض الشاشة انتهت المكالمات.

يمكن لكل من المتصل والمستقبل إنهاء مكالمات خاصة جارية عبر الضغط على .

## تلقي المكالمات الخاصة

عندما تتلقى مكالمات خاصة مكونة بإعداد المكالمات دون بث (OACSU):

- يومض مؤشر LED الأخضر.

- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

إشعار:

قد يتطلب الرد على مكالمة خاصة إعلام المستخدم أو قد لا يتطلب وذلك وفقاً لطريقة تكوين الراديو الخاص بك، إما مع ميزة OACSU أو ميزة الإعداد الكامل للمكالمة دون بث (FOACSU).

بالنسبة إلى التكوين مع ميزة إعداد المكالمة دون بث (OACSU)، يتم إلغاء كتم صوت وتتصل المكالمة تلقائياً.

## قبول المكالمات الخاصة

عندما تتلقى مكالمات خاصة مكونة بالإعداد الكامل للمكالمة دون بث (FOACSU):

- يومض مؤشر LED الأخضر.

1 لقبول مكالمة خاصة مكونة بالإعداد FOACSU، نفذ أحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى قبول واضغط على  للرد على مكالمة خاصة.
- اضغط على زر PTT عند أي إدخال.
- يضيء مؤشر LED الأخضر.

2 انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

3 حرر زر PTT للاستماع.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقاً. تصدر نغمة. وتعرض الشاشة انتهاء المكالمة.

إشعار:

يمكن لكل من المتصل والمستقبل إنهاء مكالمة خاصة جارية عبر

الضغط على .

## رفض المكالمات الخاصة

عندما تتلقى مكالمات خاصة مكونة بالإعداد الكامل للمكالمة دون بث (FOACSU):

- يومض مؤشر LED الأخضر.

لرفض مكالمة خاصة مكونة بالإعداد FOACSU، نفذ أحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى رفض واضغط على  لرفض مكالمة خاصة.
- اضغط على  لرفض مكالمة خاصة.

## المكالمات الشاملة

المكالمة الشاملة هي مكالمة من راديو واحد لكل راديو بالموقع أو كل راديو بمجموعة مواقع وفقاً لتكوين النظام.

تُستخدم المكالمات الشاملة لإجراء بيانات هامة، تتطلب الانتباه التام من المستخدم. لا يمكن للمستخدمين الموجودين على النظام الرد على مكالمة شاملة.

يُدمج نظام **Capacity Max** المكالمة الشاملة للموقع والمكالمة الشاملة متعددة المواقع. يمكن لمسؤول النظام تكوين أحد هذين الخيارين أو كليهما في الراديو الخاص بك.

إشعار:

يمكن للمستخدمين دعم مكالمات شاملة على مستوى النظام لكن بنية **Motorola Solutions** الأساسية لا تدعم المكالمات الشاملة على مستوى النظام.

## إجراء مكالمات شاملة

يجب برمجة الراديو الخاص بك لكي تتمكن من إجراء مكالمة شاملة. اتبع الإجراء لإجراء مكالمات شاملة على الراديو الخاص بك.

1 حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بمجموعة مكالمة شاملة. راجع تحديد نوع مكالمة في صفحة 55.

## 2 اضغط على زر **PTT** لإجراء المكالمة.

يضئ مؤشر **LED** الأخضر. تعرض الشاشة رمز مكالمة جماعية وإما كل المكالمات أو كل مكالمات الموقع أو اتصال متعدد بناء على نوع التكوين.

## 3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
  - انتظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- لا يمكن للمستخدمين الموجودين على القناة الرد على مكالمة شاملة. يمكن للمتصل أن يضغط على **(5)** لإنهاء مكالمة شاملة.

## إجراء مكالمات شاملة باستخدام مفتاح الرقم القابل للبرمجة

اتبع الإجراء لإجراء مكالمات شاملة على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج المعين للاسم المستعار أو المعرف المحدد مسبقاً عندما تكون في الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترنًا بإدخال.

## 2 اضغط على زر PTT لإجراء المكالمة.

يضيء مؤشر LED الأخضر. تعرض الشاشة رمز **مكالمة جماعية** وإما كل المكالمات أو كل مكالمات الموقع أو اتصال متعدد بناء على نوع التكوين.

## 3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

يمكن للمتصل أن يضغط على **(5\*)** لإنهاء مكالمة شاملة.

راجع تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344 لمزيد من المعلومات.

## إجراء مكالمات شاملة باستخدام البحث عن الاسم المستعار

1 اضغط على **OK** للوصول إلى القائمة.

2 اضغط على **▲** أو **▼** للوصول إلى جهات الاتصال.  
اضغط على **OK** للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

3 اضغط على **▲** أو **▼** للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشارك. يعرض السطر الأول من الشاشة رقم الهاتف. يعرض السطر الثاني من الشاشة مؤشرًا وامضًا. استخدم لوحة المفاتيح لإدخال رقم هاتف.

4 اضغط على **OK** للتحديد. في حال كان الإدخال المحدد خاليًا، يتم إصدار نغمة مؤشر سلبية، وتعرض الشاشة **# Phone Call Invalid** (رقم مكالمة هاتفية غير صالح).

5 اضغط على **▲** أو **▼** للوصول إلى اتصال بالهاتف. اضغط على **OK** للتحديد. في حال لم يتم تكوين رمز الوصول مسبقًا في قائمة جهات الاتصال، سيرعرض السطر الأول من الشاشة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشرًا وامضًا. أدخل رمز الوصول، واضغط على الزر **OK** للمتابعة. إذا تم بنجاح، تصدر نغمة تردد متعدد

8

اضغط على **(5\*)** لإنهاء المكالمة. في حال لم يتم تكوين رمز إلغاء الوصول مسبقًا في قائمة جهات الاتصال، يعرض السطر الأول من الشاشة إزالة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشرًا

وامضًا. أدخل رمز إلغاء الوصول ثم اضغط على **OK** للمتابعة. يعود الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة. إذا تم بنجاح، ستصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. يعود الراديو إلى شاشة اتصال هاتفي. إذا لم يتم بنجاح، فسيعود الراديو إلى شاشة اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغط موافق لإجراء المكالمة. عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

إشعار:

يمكن للمتصل أن يضغط على **(5\*)** لإنهاء مكالمة شاملة.

### تلقي مكالمات شاملة

عند استقبال مكالمة شاملة، يحدث التالي:

- تصدر نغمة.
- يومض مؤشر LED الأخضر.

ثنائي النغمة (DTMF). تسمع نغمة الطلب الخاصة بمستخدم الهاتف. يعرض السطر الأول من الشاشة الاسم المستعار أو المعرف الخاص بالمشترك ورمز مؤشر قوة الإشارة المتلقاة (RSSI). يعرض السطر الثاني من الشاشة اتصال هاتفي ورمز المكالمة الهاتفية. إذا لم يتم بنجاح، فتصدر نغمة وتعرض الشاشة فشلت المكالمة الهاتفية. يعود الراديو إلى شاشة إدخال رمز الوصول. في حال تم تكوين رمز الوصول مسبقًا في قائمة جهات الاتصال، يعود الراديو إلى الشاشة التي كنت فيها قبل بدء المكالمة.

6

اضغط على زر **PTT** للتحدث وقم بتحريره للاستماع. يختفي رمز مؤشر قوة الإشارة المتلقاة (RSSI) أثناء الإرسال.

7

لإدخال أرقام إضافية، إذا طلبتها المكالمة الهاتفية، قم بأحد الإجراءات التالية.

- اضغط على أي مفتاح على لوحة المفاتيح لبدء إدخال الأرقام الإضافية. يعرض السطر الأول من الشاشة أرقام إضافية. يعرض السطر الثاني من الشاشة مؤشرًا وامضًا. أدخل الأرقام الإضافية واضغط على الزر **OK** للمتابعة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF) ويعود الراديو إلى الشاشة السابقة.
- اضغط على زر الوصول بلمسة واحدة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). إذا كان الإدخال الخاص بزر الوصول بلمسة واحدة فارغًا، فتصدر نغمة مؤشر سلبية.

## إجراء مكالمات هاتفية

اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك.

- 1 اضغط على زر **الوصول بلمسة واحدة** المبرمج للوصول إلى الاسم المستعار أو المعرف المحدد مسبقاً.  
إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغاً، فستصدر نغمة مؤشر سلبية.  
في حالة لم تتم تهيئة رمز الوصول مسبقاً في قائمة جهات الاتصال، تعرض الشاشة رمز الوصول.

2 أدخل رمز الوصول، واضغط على **OK** للمتابعة.

لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.

3 اضغط على زر **PTT** للرد على المكالمة.

4 حرر زر **PTT** للاستماع.

5 أدخل أرقاماً إضافية باستخدام لوحة المفاتيح إذا طلبت المكالمة ذلك،

واضغط على **OK** للمتابعة.

- تعرض الشاشة رمز **مكالمة جماعية** في الركن العلوي الأيسر.
- يعرض سطر النص الأول معرف الاسم المستعار للمتصل.
- يعرض سطر النص الثاني كل المكالمات أو كل مكالمات الموقع أو اتصال متعدد حسب نوع التكوين.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماعة.  
يعود الراديو إلى الشاشة التي كان عليها قبل تلقي المكالمة الشاملة عند انتهاء المكالمة.

في حالة تمكين ميزة الإشارة إلى قناة حرة، سستمع نغمة تنبيه قصيرة عند تحرير زر **PTT** في الراديو المُرسَل، للإشارة إلى أن القناة متاحة لك للاستخدام. لا يمكنك الرد على مكالمة شاملة.

إشعار:

يتوقف الراديو عن تلقي المكالمة الشاملة في حالة التبديل إلى قناة مختلفة أثناء تلقي المكالمة. لن تتمكن من متابعة أي عملية انتقال في القائمة أو أي عملية تحرير حتى تنتهي المكالمة الشاملة.

## المكالمات الهاتفية

المكالمة الهاتفية هي مكالمة من راديو فردي إلى هاتف.

في نظام **Capacity Max**، يمكن للراديو استقبال المكالمات ورد الاتصال حتى إذا تم تعطيل ميزة الاتصال الهاتفي.

يمكن تمكين ميزة الاتصال الهاتفي عبر تعيين أرقام الهاتف وإعدادها على النظام. راجع الأمر مع مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

## إجراء مكالمات هاتفية باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

عندما تضغط على زر **PTT** أثناء وجودك في شاشة جهات اتصال الهاتف:

- يعرض السطر الأول من الشاشة رقم الهاتف.
- يعرض السطر الثاني من الشاشة مؤشراً وامضاً.
- إذا كان الإدخال المحدد فارغاً:
- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة مكالمات هاتفية غير صالحة #.

في حالة انتهاء المكالمات أثناء إدخال الأرقام الإضافية التي طلبتها المكالمات، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمات.

تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). يعود الراديو إلى الشاشة السابقة.

6 اضغط على  لإنهاء المكالمات.

7 قم بأحد الإجراءات التالية:

- إذا لم يتم تكوين رمز إلغاء الوصول مسبقاً، فأدخل رمز إلغاء الوصول عندما تعرض الشاشة إزالة رمز الوصول؛، واضغط على

 للمتابعة. يعود الراديو إلى الشاشة السابقة.

- اضغط على زر الوصول بلمسة واحدة المبرمج. إذا كان الإدخال الخاص بزر الوصول بلمسة واحدة فارغاً، فستصدر نغمة مؤشر سلبية.

تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم

الآن إنهاء مكالمات.

إذا انتهت المكالمات بنجاح:

- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمات.

إذا فشل إنهاء المكالمات، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر الخطوتين الأخيرتين أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمات.

- يعود الراديو إلى الشاشة التي كان عليها قبل بدء المكالمة إذا تم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال.

6 اضغط على زر **PTT** للرد على المكالمة.  
يختفي رمز **RSSI**.

7 حرر زر **PTT** للاستماع.

8 أدخل أرقامًا إضافية باستخدام لوحة المفاتيح إذا طلبت المكالمة ذلك، واضغط على **OK** للمتابعة.

في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.  
تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). يعود الراديو إلى الشاشة السابقة.

9 اضغط على **Ⓢ** لإنهاء المكالمة.

4 اضغط على **▲** أو **▼** للوصول إلى الاتصال بالهواتف.  
اضغط على **OK** للتحديد.

تعرض الشاشة رمز الوصول ؛ إذا لم يتم تكوين رمز الوصول مسبقاً.

5 أدخل رمز الوصول، واضغط على **OK** للمتابعة.  
لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.  
يعرض سطر النص الأول الاتصال. يعرض سطر النص الثاني الاسم المستعار أو المعرف الخاص بالمشارك ورمز اتصال هاتفي.  
إذا كانت المكالمة ناجحة:

- تصدر نغمة تردد متعدد ثنائي النغمة (DTMF).
- تسمع نغمة الطلب الخاصة بمستخدم الهاتف.
- يعرض سطر النص الأول الاسم المستعار أو المعرف الخاص بالمشارك ورمز **RSSI**.
- يعرض سطر النص الثاني اتصال هاتفي، ورمز اتصال هاتفي.  
إذا لم تكن المكالمة ناجحة:
- تصدر نغمة.
- تعرض الشاشة فشلت المكالمة الهاتفية ثم رمز الوصول ؛.

## إشعار:

أثناء الوصول إلى القناة، اضغط على  لتجاهل محاولة الاتصال وعندها ستصدر نغمة.

أثناء المكالمات، عند الضغط على زر **الوصول بلمسة واحدة** مع تكوين رمز إلغاء الوصول مسبقاً أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمات.

أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر **التشغيل/إيقاف التشغيل** و**قرص مستوى الصوت** وزر **القناة** فقط. يتم إصدار نغمة لكل إدخال غير صالح.

## إجراء مكالمات هاتفية باستخدام البحث عن الاسم المستعار

يمكنك أيضاً استخدام البحث حسب الاسم المستعار أو البحث الأبجدي الرقمي لاسترجاع الاسم المستعار للمشارك المطلوب. هذه الميزة قابلة للتطبيق فقط من جهات الاتصال. اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك باستخدام البحث عن الاسم المستعار.

1

اضغط على  للوصول إلى القائمة.

**10** إذا لم يتم تكوين رمز إلغاء الوصول مسبقاً، فأدخل رمز إلغاء الوصول عندما تعرض الشاشة إزالة رمز الوصول، واضغط على

 للمتابعة.

يعود الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمات. إذا انتهت المكالمات بنجاح:

- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمات.

إذا فشل إنهاء المكالمات، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر **خطوة 9** و**خطوة 10**، أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمات. عند الضغط على زر PTT أثناء التواجد في شاشة جهات اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغط موافق لإجراء المكالمات.

عندما يقوم مستخدم الهاتف بإنهاء المكالمات، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمات.

في حالة انتهاء المكالمات أثناء إدخال الأرقام الإضافية التي طلبتها المكالمات الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمات.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب الخاص بالمشارك. يعرض السطر الأول من الشاشة رقم الهاتف. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. استخدم لوحة المفاتيح لإدخال رقم هاتف.

4 اضغط على  للتحديد. في حال كان الإدخال المحدد خالياً، يتم إصدار

نغمة مؤشر سلبية، وتعرض الشاشة # Phone Call Invalid (رقم مكالمة هاتفية غير صالح).

5 اضغط على  أو  للوصول إلى الاتصال بالهواتف واضغط

على  للتحديد. في حال لم يتم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، سيرعرض السطر الأول من الشاشة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز الوصول،

واضغط على الزر  للمتابعة. إذا تم بنجاح، تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). تسمع نغمة الطلب الخاصة بمستخدم الهاتف.

يعرض السطر الأول من الشاشة الاسم المستعار أو المعرف الخاص بالمشارك ورمز RSSI. يعرض السطر الثاني من الشاشة اتصال

هاتف ورمز المكالمة الهاتفية. إذا لم يتم بنجاح، فستصدر نغمة وتعرض الشاشة فشلت المكالمة الهاتفية. يعود الراديو إلى شاشة إدخال رمز الوصول. في حال تم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، يعود الراديو إلى الشاشة التي كنت فيها قبل بدء المكالمة.

6 اضغط على زر PTT للتحدث وقم بتحريره للاستماع. يختفي رمز RSSI أثناء الإرسال.

7 لإدخال أرقام إضافية، إذا طلبتها المكالمة الهاتفية، قم بأحد الإجراءات التالية.

- اضغط على أي مفتاح على لوحة المفاتيح لبدء إدخال الأرقام الإضافية. يعرض السطر الأول من الشاشة أرقام إضافية. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الأرقام الإضافية
- واضغط على الزر  للمتابعة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF) ويعود الراديو إلى الشاشة السابقة.
- اضغط على زر الوصول بلمسة واحدة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). إذا كان الإدخال الخاص بزر الوصول بلمسة واحدة فارغاً، فستصدر نغمة مؤشر سلبية.

8 اضغط على  لإنهاء المكالمة. في حال لم يتم تكوين رمز إلغاء الوصول مسبقاً في قائمة جهات الاتصال، يعرض السطر الأول من الشاشة إزالة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز إلغاء الوصول ثم اضغط على  للمتابعة. يعود

## إجراء مكالمات هاتفية باستخدام الاتصال اليدوي

اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم الهاتف. اضغط على  للتحديد.  
تعرض الشاشة الرقم  ومؤشرًا وامضًا.

الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة. إذا تم بنجاح، ستصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. يعود الراديو إلى شاشة اتصال هاتفي. إذا لم يتم بنجاح، فسيعود الراديو إلى شاشة اتصال هاتفي. عند الضغط على زر **PTT** أثناء التواجد في شاشة جهات اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغط موافق لإجراء المكالمة. عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

### إشعار:

أثناء الوصول إلى القناة، اضغط على  لتجاهل محاولة الاتصال وعندها ستصدر نغمة أو للخروج من البحث عن الاسم المستعار. اضغط

على الزر  أو  للخروج من البحث عن الاسم المستعار. أثناء المكالمة، عند الضغط على زر الوصول بلمسة واحدة مع تكوين رمز إلغاء الوصول مسبقاً أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمة. أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر التشغيل/إيقاف التشغيل وقرص مستوى الصوت وزر القناة فقط. يتم إصدار نغمة لكل إدخال غير صالح.

- يعود الراديو إلى الشاشة التي كان عليها قبل بدء المكالمة إذا تم تكوين رمز الوصول مسبقًا في قائمة جهات الاتصال.

7 اضغط على  لإنهاء المكالمة.

8 قم بأحد الإجراءات التالية:

- إذا لم يتم تكوين رمز إلغاء الوصول مسبقًا، فأدخل رمز إلغاء الوصول عندما تعرض الشاشة إزالة رمز الوصول؛ واضغط على  للمتابعة. يعود الراديو إلى الشاشة السابقة.
- اضغط على زر الوصول بلمسة واحدة المبرمج. إذا كان الإدخال الخاص بزر الوصول بلمسة واحدة فارغًا، فستصدر نغمة مؤشر سلبية.
- تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة.
- إذا انتهت المكالمة بنجاح:
- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمة.
- إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر **خطوة 7** أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة.

5 أدخل رقم الهاتف، واضغط على  للمتابعة.

تعرض الشاشة رمز الوصول؛ ومؤشرًا وامضًا إذا لم يتم تكوين رمز الوصول مسبقًا.

6 أدخل رمز الوصول، واضغط على  للمتابعة. لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.

يضيء مؤشر LED الأخضر. ستعرض الشاشة رمز اتصال هاتفي في الركن العلوي لجهة اليسار. يعرض سطر النص الأول الاسم المستعار للمشارك. يعرض سطر النص الثاني حالة المكالمة. إذا كانت المكالمة ناجحة:

- تصدر نغمة تردد متعدد ثنائي النغمة (DTMF).
- تسمع نغمة الطلب الخاصة بمستخدم الهاتف.
- يعرض سطر النص الأول الاسم المستعار للمشارك.
- تستمر الشاشة في عرض رمز اتصال هاتفي في الركن العلوي الأيسر.
- إذا لم تكن المكالمة ناجحة:
- تصدر نغمة.
- تعرض الشاشة فشلت المكالمة الهاتفية ثم رمز الوصول؛.

إشعار:

عند الضغط على زر **PTT** أثناء التواجد في شاشة جهات اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغظ موافق لإجراء المكالمة.

عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة انتهت المكالمة.

في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

أثناء الوصول إلى القناة، اضغظ على **(5)** لتجاهل محاولة الاتصال وعندها ستصدر نغمة.

أثناء المكالمة، عند الضغط على زر **الوصول بلمسة واحدة** مع تكوين رمز إلغاء الوصول مسبقاً أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمة.

أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر **التشغيل/إيقاف التشغيل** و**قرص مستوى الصوت** و**زر القناة** فقط. يتم إصدار نغمة لكل إدخال غير صالح.

## التردد المتعدد الثنائي النغمة

تتيح ميزة التردد المتعدد الثنائي النغمة (DTMF) للراديو العمل في نظام لاسلكي مع واجهة لأنظمة هاتفية.

يمكنك إيقاف تشغيل نغمة التردد المتعدد الثنائي النغمة (DTMF) من خلال تعطيل جميع نغمات وتنبيهات الراديو. راجع **تشغيل تنبيهات/نغمات الراديو أو إيقاف تشغيلها في صفحة 173** لمزيد من المعلومات.

## بدء مكالمات DTMF

اتبع الإجراء لبدء مكالمات DTMF على الراديو الخاص بك.

1 اضغظ مع الاستمرار على زر **PTT**.

2 قم بأحد الإجراءات التالية:

- أدخل الرقم المطلوب لبدء مكالمة التردد المتعدد الثنائي النغمة (DTMF).
- اضغظ على **(\*)** لبدء مكالمة تردد متعدد ثنائي النغمة (DTMF).
- اضغظ على **(#)** لبدء مكالمة تردد متعدد ثنائي النغمة (DTMF).

## الرد على مكالمات هاتفية كمكالمات جماعية

اتبع الإجراء للرد على مكالمات هاتفية كمكالمات جماعية على الراديو الخاص بك.

إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر **خطوة 3** أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة.

عند تلقي مكالمة هاتفية كمكالمة جماعية:

- ستعرض الشاشة رمز **اتصال هاتفي** في الركن العلوي لجهة اليسار.
- تعرض الشاشة اتصال هاتفي.
- يومض مؤشر LED الأخضر.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

## الرد على مكالمات هاتفية كمكالمات شاملة

حينما تستقبل اتصالاً هاتفيًا كمكالمة شاملة، لا يمكن للراديو المستقبل رد الاتصال أو الرد. كما لا يُسمح للمستخدم المستقبل بإنهاء المكالمة الشاملة.

عند تلقي مكالمة هاتفية كمكالمة شاملة:

- ستعرض الشاشة رمز **اتصال هاتفي** في الركن العلوي لجهة اليسار.
- تعرض الشاشة إما كل المكالمات أو كل مكالمات الموقع أو اتصال متعدد بناء على نوع التكوين واتصال هاتفي.
- يومض مؤشر LED الأخضر.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

## الرد على مكالمات هاتفية كمكالمات خاصة

اتبع الإجراء للرد على مكالمات هاتفية كمكالمات خاصة على الراديو الخاص بك.

عند تلقي مكالمة هاتفية كمكالمة خاصة:

- ستعرض الشاشة رمز **اتصال هاتفي** في الركن العلوي لجهة اليسار.
- تعرض الشاشة اتصال هاتفي.
- يومض مؤشر LED الأخضر.

1 اضغط على زر **PTT** للرد على المكالمة.

2 حرر زر **PTT** للاستماع.

3 اضغط على **(5\*)** لإنهاء المكالمة.

تعرض الشاشة يتم الآن إنهاء مكالمة.

**إشعار:**

إذا لم يتم تمكين ميزة الاتصال الهاتفي في الراديو الخاص بك، فلن يتمكن الراديو من إنهاء الاتصال الهاتفي كمكالمة جماعية. يجب على مستخدم الهاتف إنهاء المكالمة. ولا يُسمح للمستخدم المستقبل إلا برد الاتصال أثناء المكالمة.

إذا انتهت المكالمة بنجاح:

- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمة.

## اعتراض المكالمات

تتيح ميزة اعتراض المكالمات للراديو إيقاف أي إرسال صوتي قيد التقدم وبدء إرسال ذي أولوية.

مع ميزة اعتراض المكالمات، يمكن للنظام مقاطعة المكالمات الجارية واعتراضها في حالات عدم توافر قنوات اتصال.

تعرض المكالمات ذات الأولوية الأعلى، مثل مكالمات الطوارئ أو المكالمات الشاملة، الراديو المُرسِل لإجراء المكالمات ذات الأولوية الأعلى. إذا لم تكن هناك قنوات تردد لاسلكي متوفرة، فإن مكالمات الطوارئ تعرض المكالمات الشاملة كذلك.

## قطع الصوت

تتيح ميزة قطع الصوت للمستخدم قفل إرسال صوتي قيد التقدم.

تستخدم هذه الميزة إشارة القناة العكسية لإيقاف الإرسال الصوتي قيد التقدم من الراديو، إذا تم تهيئة الراديو القاطع على قطع الصوت، وتم تهيئة الراديو المرسل لإجراء مكالمات صوتية قابلة للانقطاع. يسمح للراديو القاطع بعد ذلك بإجراء إرسال صوتي للمشاركة في المكالمات المتوقفة.

تحسين ميزة قطع الصوت بصورة كبيرة احتمالية نجاح نقل إرسال جديد إلى الأطراف المستهدفين عندما تكون المكالمات قيد التقدم.

يمكن للمستخدم الوصول إلى ميزة قطع الصوت فقط في حالة إعداد هذه الميزة في الراديو. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

• يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمات الواردة من خلال السماع.

1 اضغط على زر **PTT** للرد على المكالمات.

2 حرر زر **PTT** للاستماع.

3 اضغط على  لإنهاء المكالمات.

تعرض الشاشة يتم الآن إنهاء مكالمات.

إشعار:

إذا لم يتم تمكين ميزة الاتصال الهاتفي في الراديو الخاص بك، فلن يتمكن الراديو من إنهاء الاتصال الهاتفي كمكالمات خاصة. يجب على مستخدم الهاتف إنهاء المكالمات. ولا يُسمح للمستخدم المستقبل إلا ببدء الاتصال أثناء المكالمات.

إذا انتهت المكالمات بنجاح:

- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمات.

إذا فشل إنهاء المكالمات، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر **خطوة 3** أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمات.

## تمكين ميزة قطع الصوت

اتبع الإجراء لبدء ميزة قطع الصوت على الراديو الخاص بك.

يجب برمجة الراديو للسماح لك باستخدام هذه الميزة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

### 1 لقطع الإرسال أثناء مكالمة جارية، اضغط على زر PTT.

في الراديو المقطوع، تعرض الشاشة تم قطع الاتصال. يصدر الراديو صوت نغمة مؤشر سلبية حتى يتم تحرير زر PTT.

### 2 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.

### 3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان مُكتمًا.

- انتظر حتى تنتهي نغمة PTT الجانبية وتحديث بوضوح في الميكروفون إذا كان مُكتمًا.

## الميزات المتقدمة

يشرح هذا الفصل عمليات الميزات المتوفرة في الراديو.

قد يكون الوكيل أو مسؤول النظام قام بتخصيص الراديو الخاص بك وفقًا لاحتياجاتك المحددة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## قائمة انتظار المكالمات

حينما لا تكون هناك موارد متوفرة لمعالجة مكالمات، تتيح ميزة قائمة انتظار المكالمات وضع طلب المكالمات في قائمة انتظار النظام لحين توافر الموارد في وقت لاحق.

ستسمع نغمة قائمة انتظار المكالمات بعد الضغط على زر PTT لتشير إلى أن الراديو قد دخل حالة قائمة انتظار المكالمات. يمكن تحرير زر PTT بعد سماع نغمة قائمة انتظار المكالمات.

عند نجاح إعداد المكالمات، يحدث التالي:

- يومض مؤشر LED الأخضر.
- تصدر نغمة الإذن بالكلام إذا كان قد تم تمكينها.
- تعرض الشاشة رمز نوع المكالمات أو المعرف أو الاسم المستعار.
- أمام مستخدم الراديو مهلة أقصاها 4 ثوان للضغط على زر PTT لبدء الإرسال الصوتي.
- عند فشل إعداد المكالمات، يحدث التالي:
- تصدر نغمة الرفض إذا كان قد تم تمكينها.

- تعرض الشاشة رسالة الإشعار بالفشل للحظات.
- يتم إنهاء المكالمة ويخرج الراديو من إعداد المكالمة.

## المسح بحثاً عن مجموعات التحدث

تتيح هذه الميزة للراديو مراقبة المكالمات والانضمام إليها للمجموعات المعروفة بواسطة قائمة مجموعة الاستلام.

عند تمكين المسح، يظهر رمز المسح على شريط الحالة ويومض مؤشر LED باللون الأصفر. يقوم الراديو بإلغاء كتم صوت أي عضو في قائمة مجموعة الاستلام الخاصة به.

عند تعطيل الفحص، لا يتلقى الراديو الإرسال من أي أعضاء في مجموعة قائمة مجموعة الاستلام باستثناء "كل المكالمات" ومجموعة التحدث المحددة.

إشعار:

يمكن تكوين المسح بحثاً عن مجموعات التحدث باستخدام GPS. راجع الأمر مع مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

## تشغيل فحص مجموعة التحدث أو إيقاف تشغيله

اتبع الإجراء لتشغيل فحص مجموعة التحدث أو إيقاف تشغيله على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3 قم بأحد الإجراءات التالية:

• اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد.

• اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد.

إذا تم تمكين المسح:

- تعرض الشاشة تشغيل المسح ورمز المسح.
- يومض مؤشر LED الأصفر.
- تصدر نغمة مؤشر إيجابية.

إذا تم تعطيل المسح:

- تعرض الشاشة إيقاف المسح.
- ويختفي رمز المسح.
- ينطفئ مؤشر LED.
- تصدر نغمة مؤشر سلبية.

## قائمة مجموعة الاستلام

قائمة مجموعة الاستلام هي ميزة تسمح لك بإنشاء أعضاء وتعيينهم في قائمة فحص مجموعة التحدث.

يتم إنشاء هذه القائمة عند برمجة الراديو لديك، وهي تحدد المجموعات التي يمكن فحصها. يمكن أن يدعم الراديو الخاص بك 16 عضواً بحد أقصى في هذه القائمة.

إذا تمت برمجة الراديو لتحرير قائمة الفحص، يمكنك:

- إضافة/إزالة مجموعات التحدث.
- إضافة أولوية لمجموعات التحدث أو إزالتها أو تحريرها أو كل ما سبق. راجع [تحرير الأولوية لمجموعة التحدث في صفحة 87](#).
- إضافة مجموعات تحدث الانضمام أو إزالتها أو تحريرها أو كل ما سبق. راجع [إضافة الانضمام إلى مجموعات التحدث في صفحة 88 وإزالة الانضمام إلى مجموعات التحدث في صفحة 89](#).
- استبدال قائمة الفحص الموجودة بقائمة فحص جديدة.

هام:

لإضافة عضو إلى القائمة، يجب أولاً تكوين مجموعة التحدث في الراديو.

إشعار:

تتم برمجة قائمة مجموعة الاستلام بواسطة مسؤول النظام. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## Priority Monitor (مراقبة الأولوية)

تسمح ميزة مراقبة الأولوية للراديو بتلقي الإرسال تلقائياً من مجموعات التحدث ذات الأولوية الأعلى حتى عندما يكون الراديو في وضع مكالمات مجموعات تحدث.

يغادر الراديو مكالمات مجموعة التحدث ذات الأولوية الأدنى لأجل مكالمات مجموعة التحدث ذات الأولوية الأعلى.

إشعار:

لا يمكن الوصول إلى هذه الميزة إلا عند تمكين ميزة فحص مجموعة التحدث.

تسري ميزة مراقبة الأولوية فقط على الأعضاء في قائمة مجموعة الاستلام. هناك نوعان من مجموعات التحدث ذات الأولوية: الأولوية 1 (P1) والأولوية 2 (P2). P1 يتميز بأولوية أعلى من P2. في نظام السعة القصوى، يتلقى الراديو الإرسال وفقاً لترتيب الأولوية أدناه:

1 مكالمات الطوارئ لمجموعة التحدث ذات الأولوية P1

2 مكالمات الطوارئ لمجموعة التحدث ذات الأولوية P2

3 مكالمات الطوارئ لمجموعات التحدث بدون أولوية في قائمة مجموعة الاستلام

4 مكالمات شاملة

5 مكالمات مجموعة التحدث ذات الأولوية P1

6 مكالمات مجموعة التحدث ذات الأولوية P2

7 مجموعات التحدث بدون أولوية في قائمة مجموعة الاستلام

تتم الإشارة إلى الأولوية الحالية بواسطة رمز الأولوية 1 أو الأولوية 2 بجانب مجموعة التحدث.

5

اضغط على  أو  للوصول إلى تحرير الأولوية.  
اضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى مستوى الأولوية المطلوبة.  
اضغط على  للتحديد.

إذا تم تعيين مجموعة تحدث أخرى على الأولوية 1 أو الأولوية 2، يمكنك اختيار الكتابة فوق الأولوية الحالية. عندما تعرض الشاشة استبدال الموجود؟، اضغط على  أو  للوصول إلى الخيارات التالية:

- لا للعودة إلى الخطوة السابقة.
- نعم للاستبدال.

تعرض الشاشة إشعارًا إيجابيًا صغيرًا قبل العودة إلى الشاشة السابقة. يظهر رمز الأولوية بجانب مجموعة التحدث.

## الانضمام إلى مجموعات تحدث متعددة

في نظام السعة القصوى، يمكن تكوين الراديو لديك لما يصل إلى سبع مجموعات تحدث في موقع واحد.

راجع تحرير الأولوية لمجموعة التحدث في صفحة 87 لمزيد من المعلومات بشأن كيفية إضافة أولوية مجموعات تحدث في قائمة الفحص أو إزالتها أو تحريرها، أو كل ما سبق.

إشعار:

تتم برمجة هذه الميزة بواسطة مسؤول النظام. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## تحرير الأولوية لمجموعة التحدث

في قائمة فحص مجموعة التحدث، يمكنك عرض أولوية مجموعة تحدث أو تحريرها.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى قائمة القائمة.  
اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى مجموعة التحدث المطلوبة.  
اضغط على  للتحديد.

يتم عرض حالة الانضمام في عمت القائمة. تعرض الشاشة ■ بجانب معرف مجموعة التحدث المحددة أو اسمها المستعار.

5

اضغط على  أو  للوصول إلى تحرير الانضمام.  
اضغط على  للتحديد.

6

قم بأحد الإجراءات التالية:

• اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد.

• اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد.

عند تحديد تشغيل، تظهر ■ بجانب معرف مجموعة التحدث أو اسمها المستعار.

إذا تم الانضمام بنجاح، تعرض الشاشة ✓ بجانب معرف مجموعة التحدث المحددة أو اسمها المستعار.

إذا لم يتم الانضمام بنجاح، تظل ■ بجانب معرف مجموعة التحدث أو اسمها المستعار.

من بين 16 مجموعة تحدثت تضمها قائمة مجموعة الاستلام، يمكن تعيين ما يصل إلى سبع مجموعات تحدثت منها كمجموعات تحدثت للانضمام. يتم الانضمام تلقائيًا إلى مجموعة التحدث المحددة ومجموعات التحدث ذات الأولوية.

إشعار:

تتم برمجة هذه الميزة بواسطة مسؤول النظام. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## إضافة الانضمام إلى مجموعات التحدث

اتبع هذا الإجراء لإضافة انضمام إلى مجموعة تحدثت.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى عمت القائمة.  
اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى معرف مجموعة التحدث أو اسمها المستعار المطلوب. اضغط على  للتحديد.

## إشعار:

يعرض الراديو القائمة مملوءة عند تحديد حد أقصى يبلغ سبعة مجموعات تحدث للانضمام في قائمة الفحص. لتحديد مجموعة تحدث جديدة للانضمام إليها، قم بإزالة مجموعة التحدث الموجودة التي تم الانضمام إليها لإتاحة مجال للإضافة الجديدة. راجع إزالة الانضمام إلى مجموعات التحدث في صفحة 89 لمزيد من المعلومات.

## إزالة الانضمام إلى مجموعات التحدث

عندما تكون قائمة الانضمام كاملة وتريد تحديد مجموعة تحدث جديدة للانضمام إليها، قم بإزالة مجموعة التحدث التي تم الانضمام إليها الموجودة لإتاحة مجال للإضافة الجديدة. اتبع الإجراء لإزالة الانضمام إلى مجموعة تحدث.

1 اضغط على للوصول إلى القائمة.

2 اضغط على أو للوصول إلى مسح. اضغط على للتحديد.

3 اضغط على أو للوصول إلى قائمة. اضغط على للتحديد.

4

اضغط على أو للوصول إلى معرف مجموعة التحدث أو اسمها المستعار المطلوب. اضغط على للتحديد.

يتم عرض حالة الانضمام في قائمة الشاشة. تعرض الشاشة ■ بجانب معرف مجموعة التحدث المحددة أو اسمها المستعار.

5

اضغط على أو للوصول إلى تحرير الانضمام. اضغط على للتحديد.

6

اضغط على أو للوصول إلى إيقاف. اضغط على للتحديد.

عند تحديد إيقاف تشغيل، تختفي ■ من جانب معرف مجموعة التحدث أو اسمها المستعار.

## منع

تسمح لك ميزة نظام الاتصال المغلق بالاستجابة لإرسال أثناء الفحص.

إذا قام الراديو بالمسح في مكاملة من قائمة مسح مجموعة قابلة للتحديد، وإذا الضغط على زر PTT أثناء المكاملة التي تم مسحها، فإن تشغيل الراديو يعتمد على ما إذا تم تمكين ميزة نظام الاتصال المغلق أو تعطيلها أثناء برمجة الراديو. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

### تم تعطيل نظام الاتصال المغلق

يترك الراديو المكالمة التي تم مسحها ويحاول إرسال جهة الاتصال إلى موضع القناة المحددة حاليًا. بعد انتهاء وقت تعليق المكالمة على جهة الاتصال المحددة حاليًا، يعود الراديو إلى القناة الرئيسية ويبدأ مؤقت وقت تعليق المسح. يستأنف الراديو المسح الجماعي بعد انتهاء مؤقت وقت تعليق المسح.

### تم تمكين نظام الاتصال المغلق

إذا تم الضغط على زر **PTT** أثناء وقت تعليق المجموعة للمكالمة التي تم مسحها، يحاول الراديو الإرسال إلى المجموعة التي تم مسحها.

#### إشعار:

إذا قمت بمسح مكالمة لمجموعة غير معينة لموضع قناة في المنطقة المحددة حاليًا وانتهت المكالمة، فقم بالتبديل إلى المنطقة المناسبة ثم حدد موضع قناة المجموعة لمعاودة التحدث إلى تلك المجموعة.

#### إشعار:

إن تم تعطيله عن طريق **CPS**، يتم تعطيل جميع الميزات المتعلقة بـ **Bluetooth** ويتم مسح قاعدة بيانات **Bluetooth**.

## تشغيل بلوتوث وإيقاف تشغيله

اتبع الإجراء لتشغيل البلوتوث وإيقاف تشغيله.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى بلوتوث. اضغط على

 للتحديد.

## Bluetooth

تتيح لك هذه الميزة استخدام الراديو مع جهاز يدعم **Bluetooth** (ملحق) عبر اتصال **Bluetooth**. يدعم الراديو كلاً من أجهزة **Motorola Solutions** والأجهزة المتوفرة في الأسواق (COTS) الممكنة لتقنية **Bluetooth**.

يعمل البلوتوث في نطاق 10 أمتار (32 قدمًا) من خط الرؤية. ويكون ذلك عبارة عن مسار خالٍ من العوائق بين الراديو والجهاز الذي يدعم البلوتوث. توصي **Motorola Solutions** بعدم فصل الراديو والملحق لضمان درجة موثوقية عالية.

عند حواف مناطق الاستقبال، تظهر جودة الصوت والنغمة على أنها "مشوشة" أو "مقطعة". لحل هذه المشكلة، قم بوضع الراديو والجهاز الذي يدعم **Bluetooth** بالقرب من بعضهما (ضمن النطاق المحدد بـ 10 أمتار) لإعادة إنشاء استقبال

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

4 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.
- اضغط على  أو  للوصول إلى بحث عن أجهزة لتحديد موقع الأجهزة المتاحة. اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى اتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى حالتى. اضغط على  للتحديد.

ستعرض الشاشة تشغيل وإيقاف. تتم الإشارة إلى الحالة الحالية بالعلامة .

4 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد. ستعرض الشاشة علامة  بجانب تشغيل.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد. ستعرض الشاشة علامة  بجانب إيقاف تشغيل.

## التوصيل بأجهزة بلوتوث

اتبع الإجراء للاتصال بأجهزة Bluetooth.  
قم بتشغيل الجهاز الذي يدعم بلوتوث ووضعه في وضع الأزواج.

1 اضغط على  للوصول إلى القائمة.

قد يتطلب الجهاز الذي يدعم بلوتوث خطوات إضافية لإكمال الأزواج.  
راجع دليل مستخدم الجهاز الذي يدعم بلوتوث.

تعرض الشاشة اتصال بـ «الجهاز».

انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- تعرض الشاشة «الجهاز» متصل ورمز البلوتوث متصل.
- تعرض الشاشة ✓ بجانب الجهاز المتصل.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة الاتصال فشل.

إشعار:

إذا كان رمز pin مطلوبًا، فانظر الوصول إلى أجهزة الراديو باستخدام  
كلمات المرور في صفحة 162.

## الاتصال بأجهزة البلوتوث في وضع قابلية الاكتشاف

اتبع الإجراء للاتصال بأجهزة Bluetooth في وضع قابل للاكتشاف.

قم بتشغيل الجهاز الذي يدعم بلوتوث ووضعه في وضع الأزواج.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاكتشاف. اضغط على  للتحديد. يمكن حينئذ العثور على الراديو من خلال الأجهزة الأخرى التي تدعم Bluetooth لمدة مبرمجة. يسمى ذلك وضع قابلية الاكتشاف.

انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- تعرض الشاشة «الجهاز» متصل ورمز البلوتوث متصل.
- تعرض الشاشة ✓ بجانب الجهاز المتصل.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة الاتصال فشل.

## قطع الاتصال عن أجهزة البلوتوث

اتبع الإجراء لفصل أجهزة Bluetooth.

### إشعار:

قد يتطلب الجهاز الذي يدعم بلوتوث خطوات إضافية لقطع الاتصال. راجع أدلة المستخدم ذات الصلة الخاصة بأجهزة تدعم البلوتوث.

انتظر حتى تصلك رسالة إعلام.

- تصدر نغمة.
- تعرض الشاشة «الجهاز» غير متصل ويختفي رمز البلوتوث متصل.
- يختفي ✓ الموجود بجوار الجهاز المتصل.

## تبديل توجيه الصوت بين سماعة الراديو الداخلية وجهاز بلوتوث

اتبع الإجراء لتبديل توجيه الصوت بين سماعة الراديو الداخلية وجهاز بلوتوث الخارجي.

اضغط على زر م.ص. بلوتوث المبرمج.

تعرض الشاشة أياً من النتائج التالية:

- تصدر نغمة. تعرض الشاشة يوجه الصوت إلى الراديو.
- تصدر نغمة. تعرض الشاشة يوجه الصوت إلى البلوتوث.

1 اضغط على للوصول إلى القائمة.

2 اضغط على أو للوصول إلى بلوتوث. اضغط على للتحديد.

3 اضغط على أو للوصول إلى الأجهزة. اضغط على للتحديد.

4 اضغط على أو للوصول إلى الجهاز المطلوب. اضغط على للتحديد.

5 اضغط على أو للوصول إلى قطع الاتصال. اضغط على للتحديد.

تعرض الشاشة قطع الاتصال عن «الجهاز».

## عرض تفاصيل الجهاز

اتبع الإجراء لعرض تفاصيل الجهاز على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى عرض التفاصيل. اضغط على  للتحديد.

## حذف اسم الجهاز

يمكنك إزالة جهاز تم قطع الاتصال به من قائمة الأجهزة التي تدعم بلوتوث.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد. ستعرض الشاشة تم حذف اسم الجهاز.

## موقع داخلي

إشعار:

تتطبق ميزة الموقع الداخلي على الطرز المزودة بأحدث البرامج والأجهزة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يُستخدم الموقع الداخلي لتتبع موقع مستخدم الراديو. عند تنشيط الموقع الداخلي، يكون الراديو في وضع قابلية اكتشاف محدودة. تُستخدم إشارات مخصصة لتحديد موقع الراديو والتعرف على موضعه.

## تشغيل الموقع الداخلي أو إيقاف تشغيله

يمكنك تشغيل ميزة الموقع الداخلي أو إيقاف تشغيلها عبر تنفيذ أحد الإجراءات التالية.

- انتقل إلى هذه الميزة عبر القائمة.

a. اضغط على  للوصول إلى القائمة.

b. اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى موقع داخلي واضغط على  للتحديد.

## اكتساب الميكروفون عبر بلوتوث

تسمح هذه الميزة للمستخدم بالتحكم في قيمة اكتساب الميكروفون للجهاز المتصل الذي يدعم بلوتوث.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اكتساب ميك BT. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع اكتساب ميكروفون بلوتوث والقيم الحالية. اضغط على  للتحديد. يمكنك تحرير القيم هنا.

5 اضغط على  أو  لزيادة القيم أو خفضها. اضغط على  للتحديد.

a. اضغط لفترة طويلة على زر الموقع الداخلي لتشغيل الموقع الداخلي.

تعرض الشاشة تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح تشغيل الموقع الداخلي فسيظهر رمز "الموقع الداخلي متوفر" على الشاشة الرئيسية.
- إذا لم ينجح تشغيل الموقع الداخلي فستعرض الشاشة فشل التشغيل. إذا لم ينجح، فستسمع نغمة مؤشر سلبية.

b. اضغط على زر الموقع الداخلي المبرمج لإيقاف تشغيل الموقع الداخلي.

تعرض الشاشة إيقاف تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح إيقاف تشغيل الموقع الداخلي فسيختفي رمز "الموقع الداخلي متوفر" من الشاشة الرئيسية.
- إذا لم ينجح إيقاف تشغيل الموقع الداخلي فستعرض الشاشة فشل إيقاف التشغيل. إذا لم ينجح، فستسمع نغمة مؤشر سلبية.

d. اضغط على  لتشغيل الموقع الداخلي.

تعرض الشاشة تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح تشغيل الموقع الداخلي فسيظهر رمز "الموقع الداخلي متوفر" على الشاشة الرئيسية.
- إذا لم ينجح تشغيل الموقع الداخلي فستعرض الشاشة فشل التشغيل. ستسمع نغمة مؤشر سلبية.

e. اضغط على  لإيقاف تشغيل الموقع الداخلي.

تعرض الشاشة إيقاف تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح إيقاف تشغيل الموقع الداخلي فسيختفي رمز "الموقع الداخلي متوفر" من الشاشة الرئيسية.
- إذا لم ينجح إيقاف تشغيل الموقع الداخلي فستعرض الشاشة فشل إيقاف التشغيل. ستسمع نغمة مؤشر سلبية.

- انتقل إلى هذه الميزة باستخدام الزر المبرمج.

## بدء البحث اليدوي عن المواقع

اتبع الإجراء لبدء البحث اليدوي عن المواقع حينما تكون قوة الإشارة المستلمة ضعيفة لمحاولة العثور على موقع به إشارة أفضل.

إذا عثر الراديو على موقع جديد:

- تصدر نغمة مؤشر إيجابية.
- إذا فشل الراديو في العثور على موقع جديد:
- تصدر نغمة مؤشر سلبية.

## تشغيل/إيقاف قفل الموقع

عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

اضغط على الزر المبرمج قفل الموقع.

إذا تم تشغيل وظيفة قفل الموقع:

- ستسمع نغمة مؤشر إيجابية، تشير إلى قفل الراديو للموقع الحالي.
- ستعرض الشاشة تم قفل الموقع.

إذا تم إيقاف تشغيل وظيفة قفل الموقع:

- ستسمع نغمة مؤشر سلبية للإشارة إلى فتح قفل الراديو.

## الوصول إلى معلومات إشارات الموقع الداخلي

اتبع الإجراء للوصول إلى معلومات إشارات الموقع الداخلي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى موقع داخلي واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إشارات واضغط على  للتحديد.

ستعرض الشاشة معلومات الإشارات.

## عناصر التحكم في المواقع المتعددة

تنطبق هذه الميزات عند تكوين قناة الراديو الحالية الخاصة بك إلى نظام Capacity Max.

- وتعرض الشاشة تم فتح قفل الموقع.

## رسالة تذكير القناة الرئيسية

توفر هذه الميزة رسالة تذكير في حالة عدم تعيين الراديو على القناة الرئيسية لفترة زمنية.

إذا تم تمكين هذه الميزة أثناء عدم تعيين الراديو الخاص بك إلى القناة الرئيسية لفترة زمنية، يحدث ما يلي بشكل دوري:

- تصدر نغمة رسالة تذكير القناة الرئيسية وبيان.
- يعرض السطر الأول من الشاشة قناة .
- يعرض السطر الثاني غير رئيسية .

## كتم صوت رسالة تذكير القناة الرئيسية

عند صدور رسالة تذكير القناة الرئيسية، يمكنك كتم صوت رسالة التذكير مؤقتًا.

اضغط على زر كتم تنبيه القناة الرئيسية القابل للبرمجة.

يعرض السطر الأول من الشاشة HCF ويعرض السطر الثاني كتم .

## إعداد قنوات رئيسية جديدة

عند ظهور رسالة تذكير القناة الرئيسية، يمكنك تعيين قناة رئيسية جديدة.

- 1 قم بأحد الإجراءات التالية:

## الوصول إلى قائمة المواقع المجاورة

تتيح هذه الميزة للمستخدم فحص قائمة المواقع القريبة من الموقع الحالي للمستخدم. اتبع الإجراء للوصول إلى قائمة المواقع المجاورة:

- 1 اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى م = الراديو. اضغط

على  للتحديد.

- 4 اضغط على  أو  للوصول إلى موقع مجاور. اضغط

على  للتحديد.

## مراقب عن بُعد

تُستخدم هذه الميزة لتشغيل الميكروفون الخاص بالراديو المستهدف مع الاسم المستعار أو المعرف الخاص بالمشارك. يمكنك استخدام هذه الميزة لمراقبة أي نشاط صوتي محيط بالراديو المستهدف عن بُعد.

يجب برمجة كل من الراديو الخاص بك والراديو المستهدف للسماح لك باستخدام هذه الميزة.

وفي حالة بنئه، يرمض مؤشر LED الأخضر مرة واحدة على الراديو المستهدف. تتوقف هذه الميزة تلقائيًا بعد مدة زمنية مبرمجة أو عندما يتم التشغيل بواسطة أحد المستخدمين للراديو المستهدف.

## بدء تشغيل ميزة مراقب عن بُعد

اتبع الإجراء لبدء المراقب عن بعد على الراديو الخاص بك.

1 اضغط على زر مراقب عن بعد المبرمج.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

• اضغط على زر إعادة تعيين قناة رئيسية القابل للبرمجة لتعيين القناة الحالية كقناة رئيسية جديدة. قم بتخطي الخطوات التالية. يعرض السطر الأول من الشاشة الاسم المستعار للقناة ويعرض السطر الثاني قناة رئيسية جديدة.

• اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى قناة رئيسية.

اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى الاسم المستعار المطلوب

للقناة الرئيسية الجديدة. اضغط على  للتحديد.

تعرض الشاشة  بجانب الاسم المستعار المحدد للقناة الرئيسية.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- يبدأ تشغيل الصوت من الراديو المراقب لمدة مبرمجة وتعرض الشاشة مراقب عن بعد. بمجرد انتهاء المؤقت، تصدر نغمة تحذير ويتوقف مؤشر LED.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مراقبة عن بعد. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

5 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- يبدأ تشغيل الصوت من الراديو المراقب لمدة مبرمجة وتعرض الشاشة مراقب عن بعد. بمجرد انتهاء المؤقت، تصدر نغمة تحذير ويتوقف مؤشر LED.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## بدء المراقبة عن بعد باستخدام قائمة جهات الاتصال

اتبع الإجراء لبدء المراقبة عن بعد على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

## بدء المراقبة عن بعد باستخدام الاتصال اليدوي

اتبع الإجراء لبدء المراقبة عن بعد على الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط

على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط

على  للتحديد.

5 قم بأحد الإجراءات التالية:

- أدخل المعرف أو الاسم المستعار الخاص بالمشارك واضغط على  للمتابعة.

- قم بتحرير المعرف الذي طلبته مسبقًا واضغط على  للمتابعة.

6

اضغط على  أو  للوصول إلى مراقبة عن بعد.

اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

7 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- يبدأ تشغيل الصوت من الراديو المراقب لمدة مبرمجة وتعرض الشاشة مراقب عن بعد. بمجرد انتهاء المؤقت، تصدر نغمة تحذير ويتوقف مؤشر LED.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إعدادات جهات الاتصال

توفر جهات الاتصال إمكانيات دفتر العناوين على الراديو الخاص بك. ويتطابق كل إدخال من الإدخالات مع اسم مستعار أو معرف تستخدمه لبدء مكالمة. يتم فرز الإدخالات أبديًا.

يرتبط كل إدخال، حسب السياق، بأنواع المكالمات المختلفة: مكالمة جماعية أو مكالمة خاصة أو مكالمة بث أو كل مكالمات الموقع أو مكالمة شاملة متعددة المواقع أو مكالمة كمبيوتر أو مكالمة إرسال.

مكالمة الكمبيوتر ومكالمة الإرسال مرتبطتان بالبيانات. وتتوفران مع التطبيقات فقط. راجع وثائق تطبيقات البيانات لمزيد من التفاصيل.

علاوةً على ذلك، تتيح لك قائمة جهات الاتصال تخصيص كل إدخال إلى مفتاح رقم قابل للبرمجة واحد أو أكثر على الميكروفون المزود بلوحة مفاتيح. ومتى تم تخصيص إدخال لمفتاح رقم، يتمكن الراديو من إجراء اتصال سريع بهذا الإدخال.

## إشعار:

تظهر علامة اختيار قبل كل مفتاح رقم مخصص لأحد الإدخالات. فإذا كانت علامة الاختيار قبله فارغ، فهذا يعني أنك لم تقم بتخصيص مفتاح رقم لهذا الإدخال.

يعرض كل إدخال في جهات الاتصال المعلومات التالية:

- نوع المكالمة
- الاسم المستعار للمكالمة
- معرف المكالمة

## إشعار:

إذا تم تمكين ميزة السرية على إحدى القنوات، فيمكنك إجراء مكالمات جماعية ومكالمات سرية ومكالمات شاملة ومكالمات هاتفية تدعم السرية على هذه القناة. لن تتمكن سوى أجهزة الراديو المستهدفة التي لها مفتاح سرية أو قيمة مفتاح ومعرف مفتاح مماثل للراديو الخاص بك من فك تشفير الإرسال.

## تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة

اتبع الإجراء لتخصيص الإدخالات إلى مفاتيح الأرقام القابلة للبرمجة من الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مفتاح برامج. اضغط على  للتحديد.

## إزالة الإقرانات بين الإدخالات ومفاتيح الأرقام القابلة للبرمجة

اتبع الإجراء لإزالة الإقرانات بين الإدخالات ومفاتيح الأرقام القابلة للبرمجة من الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المطلوب. تابع إلى خطوة 4.
- اضغط على  للوصول إلى القائمة.

2

- اضغط على  أو  للوصول إلى جهات الاتصال.
- اضغط على  للتحديد.

3

- اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4

- اضغط على  أو  للوصول إلى مفتاح برامج.
- اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- إذا لم يتم تخصيص مفتاح الرقم المطلوب إلى أحد الإدخالات، فاضغط على  أو  للوصول إلى مفتاح الرقم المطلوب. اضغط على  للتحديد.
- إذا لم يتم تخصيص مفتاح الرقم المطلوب إلى أحد الإدخالات، فستعرض الشاشة المفتاح مخصص لأن ثم يعرض سطر النص الأول استبدال؟. قم بأحد الإجراءات التالية:  
اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

يصدر الراديو نغمة مؤثر إيجابية، وتعرض الشاشة تم حفظ جهة اتصال وإشعارًا إيجابيًا صغيرًا.

اضغط على  أو  للوصول إلى لا للعودة إلى الخطوة السابقة.

- يمكن أن يتم ربط كل إدخال من الإدخالات بمفتاح رقم مختلف. تظهر ✓ أمام كل مفتاح رقم مخصص لأحد الإدخالات. في حالة وجود ✓ أمام فارغ، يكون مفتاح الرقم هذا غير مخصص.
- إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.
- ستعود الشاشة تلقائيًا إلى القائمة السابقة.

5 اضغط على  أو  للوصول إلى فارغ. اضغط على  للتحديد.

يعرض سطر النص الأول مسح من كل المفاتيح.

6 اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

إشعار:

عند حذف أحد الإدخالات، تتم إزالة الاقتران بين الإدخال ومفتاح (مفاتيح) الرقم المبرمج الخاص به.

تصدر نغمة مؤشر إيجابية. ستعرض الشاشة تم حفظ جهة اتصال. ستعود الشاشة تلقائيًا إلى القائمة السابقة.

## إضافة جهات اتصال جديدة

اتبع الإجراء لإضافة جهات اتصال جديدة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى ج = اتصال جديدة. اضغط على  للتحديد.

4 اضغط على  أو  لتحديد نوع جهة الاتصال جهة لاسلكية أو جهة هاتفية. اضغط على  للتحديد.

5 أدخل رقم جهة الاتصال باستخدام لوحة المفاتيح واضغط على  للمتابعة.

6 أدخل اسم جهة اتصال باستخدام لوحة المفاتيح واضغط على  للمتابعة.

7 اضغط على  أو  للوصول إلى نوع الرنين المطلوب. اضغط على  للتحديد.

تصدر نغمة مؤشر إيجابية. ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

## إعدادات مؤشر المكالمات

تسمح هذه الميزة لمستخدمي الراديو بتكوين نغمات رنين المكالمات أو الرسالة النصية.

## تنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات الخاصة

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات الخاصة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى م . النغمات. اضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى مكالمات خاصة. اضغط على  للتحديد.

7

اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد.

عند تمكينها، تظهر علامة ✓ بجوار ممكن. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تنشيط مشغل النغمات أو إلغاء تنشيطه للرسائل النصية

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه للرسائل النصية على الراديو الخاص بك.

1

اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة .  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات  
الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه . اضغط  
على  للتحديد.

5 اضغط على  أو  للوصول إلى م . النغمات. اضغط  
على  للتحديد.

6 اضغط على  أو  للوصول إلى رسالة نصية . اضغط  
على  للتحديد.

تعرض الشاشة  والنغمة الحالية.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  
 للتحديد. تعرض الشاشة  بجانب النغمة المحددة.

## تنشيط مشغل النغمات أو إلغاء تنشيطه لتنبيهات المكالمات

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه لتنبيهات المكالمات على الراديو  
الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات  
مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات  
الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه . اضغط  
على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى ت = مكالمات. اضغط على  للتحديد.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد. تعرض الشاشة  بجانب النغمة المحددة.

### تنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات المنتقاة

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات المنتقاة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى م = منتقاه. اضغط على  للتحديد. تعرض الشاشة  والنغمة الحالية.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد. تعرض الشاشة  بجانب النغمة المحددة.

## تنشيط مشغل النغمات أو إلغاء تنشيطه لحالة تتبع الاستخدام بالنص

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه لحالة القياس عن بعد بواسطة رسالة نصية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات. اضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى القياس عن بعد. اضغط على  للتحديد. تتم الإشارة إلى النغمة الحالية بعلامة ✓.

## تعيين أنماط الرنين

يمكنك برمجة الراديو الخاص بك على إحدى نغمات الرنين العشرة المحددة مسبقًا عند تلقي تنبيه مكالمات أو رسالة نصية من جهة اتصال معينة. يصدر الراديو صوتًا بكل نمط من أنماط الرنين أثناء تنقلك عبر القائمة. اتبع الإجراء لتعيين أنماط الرنين على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد. يتم فرز الإدخالات أبجديًا.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

يمكن إدراج تنبيهات المكالمات الفائتة في سجلات المكالمات حسب تكوين النظام على الراديو الخاص بك. يمكنك تنفيذ المهام التالية في كل قائمة من قوائم المكالمات:

- حفظ اسم مستعار أو معرف في جهات الاتصال
- حذف مكالمات
- حذف كل المكالمات
- عرض التفاصيل

## عرض المكالمات الأخيرة

اتبع الإجراء لعرض المكالمات الأخيرة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المفضلة. الخيارات هي القوائم الفائتة وتم الرد والصادر.

اضغط على  للتحديد.

ستعرض الشاشة أحدث الإدخالات.

4 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تحرير نغمة الرنين. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد.

تظهر علامة  بجانب النغمة المحددة.

## مستوى صوت نغمة التنبيه التصاعدي

يمكنك برمجة الراديو للتنبيه باستمرار عند وجود مكالمات راديو لم يتم الرد عليها. ويتم ذلك عن طريق زيادة مستوى صوت نغمة التنبيه تلقائيًا بمرور الوقت. وتُعرف هذه الميزة باسم رفع التنبيه.

## ميزات سجل المكالمات

يحتفظ الراديو بسجل لكافة المكالمات الخاصة الأخيرة الصادرة والتي تم الرد عليها والفائتة. تُستخدم ميزة سجل المكالمات لعرض المكالمات الأخيرة وإدارتها.

4

اضغط على  أو  لعرض القائمة.

يمكنك بدء مكالمة خاصة باستخدام الاسم المستعار أو المعرف الذي تعرضه الشاشة حاليًا عن طريق الضغط على زر PTT.

5

اضغط على  أو  للوصول إلى تخزين. اضغط على

 للتحديد.

ستعرض الشاشة مؤشرًا وامضًا.

## تخزين أسماء مستعارة أو معرفات من قائمة المكالمات

اتبع الإجراء لتخزين أسماء مستعارة أو معرفات على الراديو الخاص بك من قائمة المكالمات.

6

أدخل باقي أحرف الاسم المستعار المطلوب. اضغط على  للتحديد.

يمكنك تخزين معرف بدون اسم مستعار.

ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

## حذف مكالمات من قائمة المكالمات

اتبع الإجراء لحذف مكالمات من قائمة المكالمات على الراديو الخاص بك.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى سجل المكالمات.

اضغط على  للتحديد.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى سجل المكالمات.

اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على

 للتحديد.

4

اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

## حذف المكالمات الشاملة من قائمة المكالمات

اتبع الإجراء لحذف المكالمات الشاملة من قائمة المكالمات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  لتحديد نعم لحذف كل الإدخالات.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على  للتحديد.

إذا كانت القائمة فارغة:

- تصدر نغمة.
- تعرض الشاشة القائمة فارغة.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى حذف إدخال؟. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  لتحديد نعم لحذف الإدخال.
- ستعرض الشاشة تم حذف مدخل.

• اضغط على  أو  للوصول إلى لا. اضغط على  للتحديد.  
يعود الراديو إلى الشاشة السابقة.

ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

- اضغط على  أو  للوصول إلى لا. اضغط على  للتحديد.
- يعود الراديو إلى الشاشة السابقة.

5

اضغط على  أو  للوصول إلى عرض التفاصيل.

اضغط على  للتحديد.

تعرض الشاشة التفاصيل.

## عرض التفاصيل من قائمة المكالمات

اتبع الإجراء لعرض تفاصيل على الراديو الخاص بك من قائمة المكالمات.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى سجل المكالمات.

اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على

 للتحديد.

4

اضغط على  أو  للوصول إلى الاسم المستعار أو المرفق

المطلوب. اضغط على  للتحديد.

## تشغيل تنبيه المكالمات

يعمل نداء تنبيه المكالمات على تمكينك من تنبيه مستخدم راديو معين للاتصال بك متى استطاع ذلك.

تتطبق هذه الميزة فقط على الأسماء المستعارة أو المعارف الخاصة بالمستخدمين ويمكن الوصول إليها عن طريق استخدام القائمة عبر جهات الاتصال أو الاتصال اليدوي أو زر الوصول بلمسة واحدة المبرمج.

في نظام Capacity Max، تتيح ميزة تنبيه المكالمات لمستخدم الراديو أو المرسل إرسال تنبيه لمستخدم راديو آخر يطلب من مستخدم الراديو معاودة الاتصال بمستخدم الراديو البائد متى أمكن. لا يتوافر الاتصال الصوتي في هذه الميزة.

يمكن تكوين عملية تنبيه المكالمات عبر الوكيل أو مسؤول النظام بطريقتين:

- تم تكوين الراديو ليُتيح للمستخدم الضغط على زر **PTT** للاستجابة بشكل مباشر للمتصل عبر إجراء مكالمة خاصة.

- تم تكوين الراديو ليُتيح للمستخدم الضغط على زر **PTT** ومتابعة الاتصال بمجموعة تحدث أخرى. لن يُتيح الضغط على زر **PTT** عند إدخال تنبيه المكالمات للمستخدم الاستجابة للمتصل. يجب على المستخدم الانتقال إلى خيار سجل المكالمات الفاتئة في قائمة سجل المكالمات والاستجابة لتنبيه المكالمات من هناك.

## إجراء تنبيهات مكالمات باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء تنبيهات مكالمات على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى ت = مكالمات. اضغط

على  للتحديد.

تعرض الشاشة ت = مكالمات والاسم المستعار للمشارك أو معرفه.  
يضيء مؤشر LED الأخضر.

5 انتظر حتى تصلك رسالة إعلام.

- إذا تم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

تتيح المكالمات الخاصة عبر ميزة إعداد المكالمات دون بث (OACSU) للمستخدم الاستجابة على الفور، بينما تتطلب المكالمات الخاصة عبر ميزة الإعداد الكامل للمكالمات دون بث (FOACSU) إعلام المستخدم للمكالمة. وبالتالي، يوصى باستخدام المكالمات من نوع إعداد المكالمات دون بث (OACSU) لميزة تنبيه المكالمات. راجع اتصال خاص في صفحة 65.

## إجراء تنبيهات مكالمات

اتبع الإجراء لإجراء تنبيهات المكالمات على الراديو الخاص بك.

1 اضغط على زر الوصول بلمسة واحدة المبرمج.

تعرض الشاشة ت = مكالمات والاسم المستعار للمشارك أو معرفه.  
يضيء مؤشر LED الأخضر.

2 انتظر حتى تصلك رسالة إعلام.

إذا تم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا سلبيًا صغيرًا.

- إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## وضع كتم الصوت

يوفر وضع كتم الصوت خيارًا للمستخدم لكتم صوت كل المؤشرات الصوتية الخاصة بالراديو.

بمجرد بدء ميزة وضع كتم الصوت، يتم كتم صوت كل المؤشرات الصوتية باستثناء الميزات الأعلى أولوية، مثل عمليات الطوارئ.

عند إنهاء وضع كتم الصوت، يستأنف الراديو تشغيل النغمات وعمليات إرسال الصوت الحالية.

### إشعار:

هذه الميزة قابلة للشراء. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## تشغيل وضع كتم الصوت

اتبع الإجراء لتشغيل وضع كتم الصوت.

انتقل إلى هذه الميزة عبر زر **وضع كتم الصوت** المبرمج.

يحدث ما يلي عند تمكين وضع كتم الصوت:

- تصدر نغمة المؤشر الإيجابية.
- تعرض الشاشة تشغيل وضع كتم الصوت.
- يبدأ مصباح LED الأحمر في الوميض ويظل يومض إلى أن يتم إنهاء وضع كتم الصوت.
- تعرض شاشة العرض رمز **وضع كتم الصوت** في الشاشة الرئيسية.

## الاستجابة لتنبيهات المكالمات

اتبع الإجراء للرد على تنبيهات المكالمات على الراديو الخاص بك.

عند تلقي تنبيه مكالمات:

- تصدر نغمة متكررة.
- يومض مؤشر LED الأصفر.
- تعرض الشاشة قائمة إعلانات تسرد تنبيه مكالمات مع الاسم المستعار أو المعرف الخاص بالراديو المتصل.

وفقًا للتهيئة التي يقوم بها الوكيل أو مسؤول النظام، يمكنك الرد على تنبيه المكالمات بتنفيذ أحد الإجراءات التالية:

- اضغط على زر **PTT** وقم بالرد على المتصل مباشرة بمكالمة خاصة.
- اضغط على زر **PTT** لمتابعة الاتصال العادي بمجموعة التحدث. ينتقل تنبيه المكالمات إلى خيار مكالمة فائتة في قائمة سجل المكالمات. يمكنك الرد على المتصل من سجل المكالمات الفائتة.

راجع قائمة الإعلانات في صفحة 165 وميزات سجل المكالمات في صفحة 109 للحصول على مزيد من المعلومات.

4 اضغط على  أو  للوصول إلى مؤقت كتم الصوت.  
اضغط على  للتحديد.

5 اضغط على  أو  لتحرير القيمة الرقمية لكل رقم، واضغط على .

## الخروج من وضع كتم الصوت

يمكن الخروج من هذه الميزة تلقائيًا بمجرد انتهاء مدة مؤقت وضع كتم الصوت.

نفذ أحد الإجراءات التالية لإنهاء وضع كتم الصوت يدويًا:

- اضغط على زر **وضع كتم الصوت** المبرمج.
- اضغط على زر **PTT** عند أي إدخال.

يحدث ما يلي عند تعطيل وضع كتم الصوت:

- تنطلق نغمة المؤشر السلبية.
- تعرض الشاشة كتم إيقاف.
- ينطفئ مصباح LED الأحمر الوامض.
- يختفي رمز **وضع كتم الصوت** من الشاشة الرئيسية.
- يلغي الراديو كتم الصوت وتتم استعادة حالة السماع الخارجية.

• يتم كتم صوت الراديو.

• يبدأ مؤقت وضع كتم الصوت في عد المدة الزمنية التي يتم تكوينها تنازليًا.

## ضبط مؤقت وضع كتم الصوت

يمكن تمكين ميزة وضع كتم الصوت لمدة زمنية مكونة مسبقًا عبر ضبط مؤقت وضع كتم الصوت. يتم تكوين المدة الزمنية الخاصة بالمؤقت في قائمة الراديو ويمكن أن تتراوح بين 0.5 ساعة و6 ساعات. يتم إنهاء وضع كتم الصوت بمجرد انتهاء مدة المؤقت.

إذا تُرك المؤقت على القيمة 0، فسيظل الراديو في وضع كتم الصوت لمدة زمنية غير محدودة إلى أن يتم الضغط على زر **وضع كتم الصوت** المبرمج.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

- إذا لم يكن المؤقت قد انتهت صلاحيته، يتم إيقاف مؤقت وضع كتم الصوت.

إشعار:

يتم أيضاً إنهاء وضع كتم الصوت إذا قام المستخدم بإرسال الصوت أو بالتحويل إلى قناة غير مبرمجة.

## تشغيل الطوارئ

يُستخدم تنبيه الطوارئ للإشارة إلى وجود حالة حرجة. وبإمكانك بدء الطوارئ في أي وقت حتى في حالة وجود نشاط على القناة الحالية.

في نظام Capacity Max، لا يمكن للراديو المستقبل أن يدعم إلا تنبيه طوارئ واحد في كل مرة. في حالة بدء تنبيه طوارئ ثان، فإنه سيتجاوز تنبيه الطوارئ الأول.

عند استقبال تنبيه طوارئ، يمكن للمستقبل اختيار حذف التنبيه والخروج من قائمة التنبيه، أو الاستجابة لتنبيه الطوارئ عبر الضغط على زر PTT وإرسال صوت ليس طوارئ.

يستطيع الوكيل أو مسؤول النظام تعيين مدة الضغط على زر الطوارئ المبرمج، فيما عدا الضغط لفترة طويلة، حيث يعتبر ذلك مشابهاً لكل الأزرار الأخرى:

### الضغط لفترة قصيرة

الفترة ما بين 0.05 ثانية إلى 0.75 ثانية.

### الضغط لفترة طويلة

الفترة ما بين 1.00 ثانية إلى 3.75 ثوان.

يتم تخصيص زر الطوارئ بواسطة ميزة تشغيل/إيقاف تشغيل الطوارئ. راجع الوكيل بشأن التشغيل المخصص لزر الطوارئ.

إشعار:

إذا كان الضغط لفترة قصيرة على زر الطوارئ مخصصاً لتشغيل وضع الطوارئ، فيكون الضغط لفترة طويلة على زر الطوارئ مخصصاً للخروج من وضع الطوارئ.

وإذا كان الضغط لفترة طويلة على زر الطوارئ مخصصاً لتشغيل وضع الطوارئ، فيكون الضغط لفترة قصيرة على زر الطوارئ مخصصاً للخروج من وضع الطوارئ.

يدعم الراديو ثلاثة تنبيهات للطوارئ:

- تنبيه طوارئ
- تنبيه طوارئ مع مكالمات
- تنبيه طوارئ مع صوت للتتبع

بالإضافة إلى ذلك، يحتوي كل تنبيه على الأنواع التالية:

### عادي

يرسل الراديو إشارة تنبيه ويعرض مؤشرات صوتية و/أو مرئية.

### صامت

يرسل الراديو إشارة تنبيه من دون أي مؤشرات صوتية أو مرئية. يستقبل الراديو مكالمات بدون أي صوت من خلال السماع، حتى تنتهي فترة إرسال الميكروفون النشط المبرمجة و/أو تضغط على زر PTT.

### صامت مع صوت

يرسل الراديو إشارة تنبيه بدون أي مؤشرات صوتية أو مرئية، ولكنه يسمح للمكالمات الواردة بإصدار الصوت من خلال السماع الخارجية.

**إشعار:**

يمكن تخصيص تنبيه واحد فقط من تنبيهات الطوارئ الواردة أعلاه لزر الطوارئ المبرمج أو مفتاح الطوارئ الخاص بالقدم.

**إرسال تنبيهات الطوارئ**

تتيح لك هذه الميزة إرسال تنبيه طوارئ، أي إشارة غير صوتية، يشغل إشارة تنبيه على مجموعة من أجهزة الراديو. اتبع الإجراء لإرسال تنبيهات الطوارئ على الراديو الخاص بك.

لا يشغل الراديو أي مؤشرات صوتية أو مرئية أثناء وضع الطوارئ عند تعيينه على صامت.

**1 اضغط على زر تشغيل الطوارئ المبرمج.**

سترى نتيجة واحدة من النتائج التالية:

- تعرض الشاشة تنبيه الإرسال والاسم المستعار للوجهة.
  - تعرض الشاشة برقية الإرسال والاسم المستعار للوجهة.
- بضيء مؤشر LED الأخضر. يظهر رمز الطوارئ.

**إشعار:**

تصدر نغمة بحث الطوارئ عند برمجتها. يتم كتم هذه النغمة عندما يرسل الراديو الصوت أو يستقبله، وتتوقف عندما يخرج الراديو من وضع الطوارئ. يمكن للوكيل أو مسؤول النظام برمجة نغمة بحث الطوارئ.

**2 انتظر حتى تصلك رسالة إعلام.**

إذا تم بنجاح:

- تصدر نغمة الطوارئ.
  - يومض مؤشر LED الأخضر.
  - وتعرض الشاشة تنبيه مرسل.
- إذا لم يتم بنجاح بعد استنفاد كافة المحاولات:
- تصدر نغمة.
  - وتعرض الشاشة فشل إشعار تنبيه.

يخرج الراديو من وضع تنبيه الطوارئ ويعود إلى الشاشة الرئيسية.

**إشعار:**

عند تهيئة عملية الطوارئ لتنبيه الطوارئ فقط، فإنها تتألف فقط من إرسال تنبيه الطوارئ فقط. تنتهي الطوارئ عند تلقي إشعار بالاستلام من النظام، أو عند استنفاد محاولات الوصول إلى القناة.

لا يصاحب إرسال تنبيه الطوارئ أي مكالمات صوتية عند التشغيل كتنبيه طوارئ فقط.

**إرسال تنبيهات طوارئ مع مكالمة**

تتيح لك هذه الميزة إرسال تنبيه طوارئ مع إجراء مكالمة إلى مجموعة من أجهزة الراديو أو إلى مرسل. عند صدور إشعار بالاستلام من البنية الأساسية داخل المجموعة، يمكن أن تتصل مجموعة أجهزة الراديو عبر قناة طوارئ مبرمجة.

يجب تهيئة الراديو لتنبيه طوارئ ومكالمة طوارئ لإجراء مكالمة الطوارئ بعد عملية التنبيه.

## 1 اضغط على زر تشغيل الطوارئ المبرمج.

تعرض الشاشة تنبيه الإرسال والاسم المستعار للوجهة. يظهر رمز الطوارئ بوضوح مؤشر LED الأخضر.

### إشعار:

تصدر نغمة بحث الطوارئ عند برمجتها. يتم كتم هذه النغمة عندما يرسل الراديو الصوت أو يستقبله، وتتوقف عندما يخرج الراديو من وضع الطوارئ.

إذا تم تلقي إشعار باستلام تنبيه طوارئ بنجاح:

- تصدر نغمة الطوارئ.

- يوميض مؤشر LED الأخضر.

- وتعرض الشاشة تنبيه مرسل.

- يدخل الراديو في وضع مكالمة الطوارئ عندما تعرض الشاشة الطوارئ والاسم المستعار لمجموعة الوجهة.

إذا لم يتم تلقي إشعار باستلام تنبيه طوارئ بنجاح:

- تم استنفاد كافة المحاولات.

- تصدر نغمة منخفضة.

- وتعرض الشاشة فشل التنبيه.

- يخرج الراديو من وضع تنبيه الطوارئ.

## 2 اضغط على زر PTT لبدء إرسال صوتي.

يضيء مؤشر LED الأخضر. تعرض الشاشة رمز مكالمة جماعية.

## 3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

- انتظر حتى تنتهي نغمة PTT الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

## 4 حرر زر PTT للاستماع.

تعرض الشاشة الاسمين المستعارين للمتصل والمجموعة.

5 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر PTT في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر PTT للرد على المكالمة.

## 6 اضغط على زر إيقاف الطوارئ للخروج من وضع الطوارئ.

سيعود الراديو إلى الشاشة الرئيسية.

إذا قمت بالضغط على زر **PTT** أثناء فترة الاستقبال المبرمجة، فستسمع نغمة منع، تشير إلى وجوب تحرير زر **PTT**. يتجاهل الراديو الضغط على زر **PTT** ويبقى في وضع الطوارئ.

إذا ضغطت على زر **PTT** أثناء الميكروفون النشط، وتابعت الضغط عليه حتى انتهاء مدة الميكروفون النشط، فسيستمر الراديو في الإرسال حتى تحرير زر **PTT**. في حالة فشل طلب تنبيه الطوارئ، لن يقوم الراديو بإعادة محاولة إرسال الطلب، ويدخل إلى حالة الميكروفون النشط مباشرة.

#### إشعار:

قد لا تدعم بعض الملحقات الميكروفون النشط. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

اتبع الإجراء لإرسال تنبيهات طوارئ مع صوت للتنبيه على الراديو الخاص بك.

**1** اضغط على زر تشغيل الطوارئ المبرمج أو مفتاح القدم للطوارئ. سترى أحد هذه النتائج:

- تعرض الشاشة تنبيه الإرسال والاسم المستعار للوجهة.
  - تعرض الشاشة برقية الإرسال والاسم المستعار للوجهة.
- يضئ مؤشر LED الأخضر. يظهر رمز الطوارئ.

**2** بمجرد أن تعرض الشاشة تنبيه مرسل، تحدث بوضوح في الميكروفون.

يتوقف الراديو تلقائيًا عن الإرسال في الحالات التالية:

#### إشعار:

بناءً على طريقة برمجة الراديو، قد تسمع نغمة الإذن بالكلام أو لا تسمعها. يمكن لوكيل أو مسؤول نظام الراديو أن يزودك بمعلومات إضافية حول طريقة برمجة الراديو للطوارئ.

يمكن أن يضغط بادئ مكالمات الطوارئ على زر **(5\*)** لإنهاء مكالمات طوارئ جارية. يعود الراديو إلى حالة خموم المكالمات لكن تظل شاشة مكالمات الطوارئ مفتوحة.

## إرسال تنبيهات طوارئ مع صوت للتنبيه

تتيح لك هذه الميزة إرسال تنبيه طوارئ مع صوت للتنبيه إلى مجموعة من أجهزة الراديو. يتم تنشيط ميكروفون الراديو تلقائيًا مما يتيح لك الاتصال بمجموعة أجهزة الراديو بدون الضغط على زر **PTT**. وتعرف هذه الحالة النشطة للميكروفون باسم الميكروفون النشط.

#### إشعار:

لا يمكن للراديو اكتشاف ميكروفون غير IMPRES مرتبط بموصل الملحق الخلفي.

إذا لم يتم اكتشاف أي ميكروفون في الموصل المبرمج المحدد، فسيقوم الراديو بالتحقق من الموصل البديل. هنا، يعطي الراديو الأولوية للميكروفون الذي تم اكتشافه.

إذا كان وضع دورة الطوارئ ممكّنًا في الراديو، فسيتم إجراء تكرارات الميكروفون النشط ولفترات الاستقبال طوال فترة مبرمجة. أثناء وضع دورة الطوارئ، تصدر أصوات المكالمات المتلقاة من السماعة.

- انتهاء مدة التنقل بين الميكروفون النشط واستقبال المكالمات، عند تمكين وضع دورة الطوارئ.
- انتهاء مدة الميكروفون النشط، عند تعطيل وضع دورة الطوارئ.

2 اضغط على  لعرض خيارات الإجراءات وتفاصيل الإدخال في قائمة التنبيه.

3 اضغط على  وحدد نعم للخروج من قائمة التنبيه. يعود الراديو للشاشة الرئيسية مع عرض رمز الطوارئ في الأعلى ليشير إلى تنبيه الطوارئ المُعلّق. يختفي رمز الطوارئ بعد حذف الإدخال في قائمة التنبيه.

3 اضغط على زر إيقاف الطوارئ للخروج من وضع الطوارئ. سيعود الراديو إلى الشاشة الرئيسية.

4 اضغط على  للوصول إلى القائمة.

5 حدد قائمة تنبيه لزيارة قائمة التنبيهات مرة أخرى.

6 يصدر صوت النغمة ويومض مؤشر LED الأحمر حتى تخرج من وضع الطوارئ. مع ذلك يمكن كتم صوت النغمة. قم بأحد الإجراءات التالية:

- اضغط على زر **PTT** للاتصال بمجموعة أجهزة الراديو التي تلقت تنبيه الطوارئ.
- اضغط على أي زر قابل للبرمجة.

## تلقي تنبيهات الطوارئ

لا يمكن للراديو المستقبل أن يدعم إلا تنبيه طوارئ واحد في كل مرة. في حالة بدء تنبيه طوارئ ثان، فإنه سيتجاوز تنبيه الطوارئ الأول. اتبع الإجراء لتلقي وعرض تنبيهات الطوارئ على الراديو الخاص بك.

عند تلقي تنبيه طوارئ:

- تصدر نغمة.
- يومض مؤشر LED الأحمر.
- تعرض الشاشة قائمة تنبيه الطوارئ، والمعرف والاسم المستعار لمجموعة تحدث الطوارئ، والمعرف والاسم المستعار للراديو المرسل.

1 اضغط على  لعرض التنبيه.

## الاستجابة لتنبيهات الطوارئ

عند استقبال تنبيه طوارئ، يمكن للمستقبل اختيار حذف التنبيه والخروج من قائمة التنبيه، أو الاستجابة لتنبيه الطوارئ عبر الضغط على زر **PTT** وإرسال صوت ليس طوارئ. اتبع الإجراء للاستجابة لتنبيهات الطوارئ على الراديو الخاص بك.

1 عند تمكين مؤشر تنبيه الطوارئ، تظهر قائمة تنبيه الطوارئ عندما يستقبل الراديو تنبيه طوارئ. اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب.

2 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** لإرسال صوت ليس طوارئ إلى المجموعة ذاتها التي تم توجيه تنبيه الطوارئ إليها.  
بضيء مؤشر LED الأخضر.

3 قم بأحد الإجراءات التالية:

- انظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

4 حرر زر **PTT** للاستماع.

عندما يستجيب الراديو الذي بدأ الطوارئ:

- يومض مؤشر LED الأحمر.
- تعرض الشاشة رمز **مكالمة طوارئ**، والمعرف والاسم المستعار لمجموعة تحدث الطوارئ، والمعرف والاسم المستعار للراديو المرسل.

إشعار:

إذا لم يتم تمكين مؤشر تنبيه الطوارئ، فتعرض الشاشة رمز **مكالمة جماعية**، والمعرف والاسم المستعار لمجموعة تحدث الطوارئ، والمعرف والاسم المستعار للراديو المرسل.

## الاستجابة لتنبيهات الطوارئ مع مكالمة

اتبع الإجراء للاستجابة لتنبيهات الطوارئ مع مكالمة على الراديو الخاص بك.

عند تلقي مكالمة طوارئ:

- تصدر نغمة مكالمة الطوارئ إذا تم تمكين مؤشر مكالمة الطوارئ ونغمة فك ترميز مكالمة الطوارئ. لن تصدر نغمة مكالمة الطوارئ إلا إذا تم تمكين مؤشر مكالمة الطوارئ.
- تعرض الشاشة رمز **مكالمة طوارئ** في الركن العلوي الأيسر.
- يعرض سطر النص المعرف والاسم المستعار لمجموعة تحدث الطوارئ، والمعرف والاسم المستعار للراديو المرسل.

- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

**1** عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.  
يضيء مؤشر LED الأخضر.

**2** انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

**3** حرر زر **PTT** للاستماع.

عندما يستجيب الراديو الذي بدأ الطوارئ:

- يومض مؤشر LED الأحمر.
- تعرض الشاشة رمز **مكالمة طوارئ**، والمعرف والاسم المستعار لمجموعة تحدث الطوارئ، والمعرف والاسم المستعار للراديو المرسل.

**إشعار:**

إذا لم يتم تمكين مؤشر تنبيه الطوارئ، فتعرض الشاشة رمز **مكالمة جماعية**، والمعرف والاسم المستعار لمجموعة تحدث الطوارئ، والمعرف والاسم المستعار للراديو المرسل.

## رسالة الحالة

تسمح هذه الميزة للمستخدم بإرسال رسائل رسائل الحالة إلى أجهزة الراديو الأخرى.

يتم تكوين قائمة الحالة السريعة باستخدام CPS-RM وتشكل ما يصل إلى 99 حالة كحد أقصى.

الحد الأقصى لطول كل رسالة حالة هو 16 حرفًا.

**إشعار:**

كل حالة تتميز بقيمة رقمية مقابلة تتراوح بين 0-99. يمكن تحديد اسم مستعار لكل حالة لتسهيل الرجوع إليها.

## إرسال رسائل الحالة

اتبع الإجراء أدناه لإرسال رسالة حالة.

**1** قم بأحد الإجراءات التالية:

- اضغط على زر **الوصول بلمسة واحدة** المبرمج. قم بتخطي الخطوات التالية.
- اضغط على **OK** للوصول إلى القائمة.

**2** اضغط على **▲** أو **▼** للوصول إلى الحالة. اضغط على

**OK** للتحديد.

- تعرض شاشة العرض إشعار الفشل مؤقتًا قبل العودة إلى شاشة الحالة السريعة.

## إرسال رسالة الحالة باستخدام زر قابل للبرمجة

اتبع الإجراء لإرسال رسالة الحالة باستخدام الزر القابل للبرمجة.

1 اضغط على زر رسالة الحالة المبرمج.

2 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة.

اضغط على  للتحديد. يتم عرض قائمة جهات الاتصال.

3 اضغط على  أو  للوصول إلى الاسم المستعار للمشارك أو معرفه أو الاسم المستعار للمجموعة أو معرفه المطلوب. اضغط على

 للتحديد.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ينطفئ مؤشر LED.
- تعرض شاشة العرض إشعارًا إيجابيًا صغيرًا مؤقتًا قبل العودة إلى شاشة الحالة السريعة.
- تعرض شاشة العرض  بجانب رسالة الحالة المرسله.

3 اضغط على  أو  للوصول إلى حالة سريعة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى الاسم المستعار للمشارك أو معرفه أو الاسم المستعار للمجموعة أو معرفه المطلوب. اضغط على  للتحديد.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ينطفئ مؤشر LED.
- تعرض شاشة العرض إشعارًا إيجابيًا صغيرًا مؤقتًا قبل العودة إلى شاشة الحالة السريعة.
- تعرض شاشة العرض  بجانب رسالة الحالة المرسله.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
- ينطفئ مؤشر LED.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ينطفئ مؤشر LED.
- تعرض شاشة العرض إشعار الفشل مؤقتًا قبل العودة إلى شاشة الحالة السريعة.

4 اضغط على  أو  للوصول إلى ارسـل حالة. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

## إرسال رسالة حالة باستخدام قائمة جهات الاتصال

اتبع الإجراء لإرسال رسالة حالة باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار للمشارك أو معرفه أو الاسم المستعار للمجموعة أو معرفه المطلوب. اضغط على  للتحديد.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ينطفئ مؤشر LED.
- تعرض شاشة العرض إشعارًا إيجابيًا صغيرًا مؤقتًا قبل العودة إلى شاشة الحالة السريعة.
- تعرض شاشة العرض  بجانب رسالة الحالة المرسله.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ينطفئ مؤشر LED.
- تعرض شاشة العرض إشعار الفشل مؤقتًا قبل العودة إلى شاشة الحالة السريعة.

## إرسال رسالة الحالة باستخدام الاتصال اليدوي

اتبع الإجراء لإرسال رسالة الحالة باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط على  للتحديد.

5 أدخل الاسم المستعار أو المعرف المطلوب الخاص بالمشارك أو الاسم المستعار أو المعرف المطلوب الخاص بالمجموعة واضغط على  للمتابعة.

6 اضغط على  أو  للوصول إلى ارسـل حالة. اضغط على  للتحديد.

7 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ينطفئ مؤشر LED.
  - تعرض شاشة العرض إشعاراً إيجابياً صغيراً مؤقتاً قبل العودة إلى شاشة الحالة السريعة.
  - تعرض شاشة العرض ✓ بجانب رسالة الحالة المرسلة.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ينطفئ مؤشر LED.
  - تعرض شاشة العرض إشعار الفشل مؤقتاً قبل العودة إلى شاشة الحالة السريعة.

## عرض رسائل الحالة

اتبع الإجراء لعرض رسائل الحالة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الحالة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

يتم عرض محتوى رسالة الحالة لمستخدم الراديو.

يمكن أيضًا عرض رسالة الحالة المستلمة عبر الوصول إلى قائمة الإشعارات. راجع قائمة الإعلانات في صفحة 165 لمزيد من المعلومات.

## الرد على رسائل الحالة

اتبع الإجراء للرد على رسائل الحالة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الحالة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

5 يتم عرض محتوى الحالة. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى رد. اضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى الحالة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

5 يتم عرض محتوى الحالة. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.

7 اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

• تعرض الشاشة إشعارًا إيجابيًا صغيرًا قبل العودة إلى شاشة بريد واردة.

7 اضغط على  أو  للوصول إلى رسالة الحالة المطلوبة. اضغط على  للتحديد.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ينطفئ مؤشر LED.
  - تعرض الشاشة إشعارًا إيجابيًا صغيرًا قبل العودة إلى شاشة بريد واردة.
  - تعرض شاشة العرض ✓ بجانب رسالة الحالة المرسلّة.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ينطفئ مؤشر LED.
  - تعرض شاشة العرض إشعار الفشل مؤقتًا قبل العودة إلى شاشة بريد واردة.

## حذف رسالة حالة

اتبع الإجراء لحذف رسالة حالة من الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

## حذف كل رسائل الحالة

اتبع الإجراء لحذف كل رسائل الحالة من الراديو الخاص بك.

## الرسائل النصية

الراديو الخاص بك قادر على تلقي البيانات، مثل الرسالة النصية، من راديو آخر أو من أحد تطبيقات الرسائل النصية.

يوجد نوعان من الرسائل النصية، رسالة نصية قصيرة لراديو نقال رقمي (DMR) ورسالة نصية. الحد الأقصى لطول الرسالة النصية القصيرة للراديو النقال الرقمي (DMR) هو 23 حرفًا. الحد الأقصى لطول الرسالة النصية هو 280 حرفًا، متضمنة سطر الموضوع. لا يظهر سطر الموضوع إلا عندما تستقبل رسائل من تطبيقات البريد الإلكتروني.

## إشعار:

ينطبق الحد الأقصى للطول فقط على الطرز التي تحتوي على أحدث البرامج والأجهزة. وبالنسبة إلى طرز الراديو التي تحتوي على برامج وأجهزة قديمة، يبلغ الحد الأقصى لطول الرسالة النصية 140 حرفًا. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات. بالنسبة للغة العربية، يكون اتجاه إدخال النصوص من اليمين إلى اليسار.

## رسائل نصية

يتم تخزين الرسائل النصية في صندوق الوارد ويتم تصنيفها حسب أحدث ما تم استلامه.

يخرج الراديو من الشاشة الحالية بمجرد انتهاء مؤقت عدم النشاط. اضغط لفترة

طويلة على  في أي وقت للعودة إلى الشاشة الرئيسية.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الحالة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

• تعرض الشاشة القائمة فارغة.

## عرض الرسائل النصية

اتبع الإجراء لعرض الرسائل النصية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

إذا كان صندوق الوارد فارغاً:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة إذا كانت نغمة لوحة المفاتيح قيد التشغيل.

4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

## عرض رسائل نصية لحالة القياس عن بعد

اتبع الإجراء لعرض رسائل نصية لحالة القياس عن بعد من صندوق الوارد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

لا يمكنك الرد على رسالة نصية لحالة القياس عن بُعد.

تعرض الشاشة قياس عن بعد «رسالة نصية للحالة».

5 اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## الرد على رسائل نصية

اتبع الإجراء للرد على رسائل نصية على الراديو الخاص بك.

عند تلقي رسالة نصية:

- تعرض الشاشة قائمة الإعلانات مع الاسم المستعار أو المعرف الخاص بالمرسل.
- تعرض الشاشة رمز رسالة.

إشعار:

يقوم الراديو بالخروج من شاشة تنبيه الرسالة النصية وإعداد مكالمة خاصة أو جماعية إلى مرسل الرسالة في حالة الضغط على زر PTT.

1 قم بأحد الإجراءات التالية:

- اضغط على أو للوصول إلى قائمة. اضغط على للتحديد.
- تعرض الشاشة الرسالة النصية. تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

- اضغط على أو للوصول إلى القراءة لاحقًا.

اضغط على للتحديد.

يعود الراديو إلى الشاشة التي كنت عليها قبل استلام الرسالة النصية.

- اضغط على أو للوصول إلى حذف. اضغط على للتحديد.

2 قم بأحد الإجراءات التالية:

- اضغط على للعودة إلى صندوق الوارد.
- اضغط على مرة أخرى للرد على الرسالة النصية أو توجيهها أو حذفها.

## الرد على رسائل نصية بالرسائل النصية السريعة

اتبع الإجراء للرد على رسائل نصية باستخدام الرسائل النصية السريعة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى الخطوة 3.

- اضغط على للوصول إلى القائمة.

2

- اضغط على أو للوصول إلى الرسائل. اضغط على للتحديد.

8 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

9 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.
- يعود الراديو إلى شاشة الخيار إعادة إرسال.

### إعادة إرسال رسائل نصية

اتبع الإجراء لإعادة إرسال رسائل نصية على الراديو الخاص بك.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

5 اضغط على  للوصول إلى القائمة الفرعية.

6 اضغط على  أو  للوصول إلى رد. اضغط على  للتحديد.

7 اضغط على  أو  للوصول إلى رد سريع. اضغط على  للتحديد.

عندما تكون في شاشة الاختيار إعادة إرسال:

اضغط على  لإعادة إرسال نفس الرسالة إلى نفس الاسم المستعار أو المعرف الخاص بالمشارك أو المجموعة.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.
- يعود الراديو إلى شاشة الخيار إعادة إرسال.

## توجيه الرسائل النصية

اتبع الإجراء لتوجيه الرسائل النصية على الراديو الخاص بك.

عندما تكون في شاشة الاختيار إعادة إرسال:

1 اضغط على  أو  للوصول إلى تقديم، واضغط على  لإرسال نفس الرسالة إلى اسم مستعار أو معرف خاص بمشارك أو مجموعة.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

4 أدخل معرف المشترك واضغط على  للمتابعة.  
ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

5 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## تحرير الرسائل النصية

حدد تحرير لتحرير الرسالة.

إشعار:

في حالة وجود سطر الموضوع (للرسائل المستلمة من أحد تطبيقات البريد الإلكتروني)، لن تتمكن من تحريره.

إشعار:

يمكنك أيضًا تحديد عنوان راديو هدف يدويًا (راجع توجيه الرسائل النصية باستخدام الاتصال اليدوي في صفحة 369).

## توجيه الرسائل النصية باستخدام الاتصال اليدوي

اتبع الإجراء لتوجيه الرسائل النصية باستخدام الاتصال اليدوي على الراديو الخاص بك.

1 اضغط على  أو  للوصول إلى تقديم. اضغط على  للتحديد.

2 اضغط على  لإرسال نفس الرسالة إلى الاسم المستعار أو المعرف الخاص بمشترك آخر أو مجموعة أخرى.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.  
تعرض الشاشة رقم لاسلكي.

1 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.

ستعرض الشاشة مؤشراً وامضاً.

2 استخدم لوحة المفاتيح لتحرير الرسالة.

• اضغط على  للانتقال مسافة واحدة إلى اليسار.

• اضغط على  أو  للانتقال مسافة واحدة إلى اليمين.

• اضغط على  لحذف أي أحرف غير مرغوب فيها.

• الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

3 اضغط على  بمجرد إنشاء الرسالة.

4 قم بأحد الإجراءات التالية:

• اضغط على  أو  للوصول إلى إرسال و اضغط على

 لإرسال الرسالة.

• اضغط على  أو  للوصول إلى حفظ و اضغط على  لحفظ الرسالة إلى المجلد مسودات.

• اضغط على  لتحرير الرسالة.

• اضغط على  للاختيار من بين حذف الرسالة أو حفظها إلى مجلد المسودات.

## كتابة الرسائل النصية

اتبع الإجراء لكتابة رسالة نصية على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.

• اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

### إرسال رسائل نصية

اتبع الإجراء لإرسال رسالة نصية على الراديو الخاص بك.  
من المفترض أن يكون لديك رسالة نصية مكتوبة حديثاً أو رسالة نصية محفوظة.

حدد مستلم الرسالة. قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.
  - اضغط على  أو  للوصول إلى اتصال يدوي.
- اضغط على  للتحديد. أدخل معرف المشترك. يعرض السطر الأول من الشاشة رقم لاسلكي #. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الاسم المستعار أو المعرف الخاص بالمشترك.
- اضغط على .

ستعرض الشاشة إشعاراً مؤقتاً صغيراً، لتأكيد إرسال الرسالة.

إذا تم بنجاح:

- تصدر نغمة.
  - تعرض الشاشة إشعاراً إيجابياً صغيراً.
- إذا لم يتم بنجاح:
- تصدر نغمة منخفضة.

3 اضغط على  أو  للوصول إلى تكوين. اضغط على

 للتحديد.

يظهر مؤشر وامض.

4 استخدم لوحة المفاتيح لكتابة الرسالة.

اضغط على  للانتقال مسافة واحدة إلى اليسار.

اضغط على  أو  للانتقال مسافة واحدة إلى اليمين.

اضغط على  لحذف أي أحرف غير مرغوب فيها.

الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

5 اضغط على  بمجرد إنشاء الرسالة.

قم بأحد الإجراءات التالية:

- اضغط على  لإرسال الرسالة.
- اضغط على . اضغط على  أو  للاختيار بين تحرير الرسالة أو مسحها أو حفظها. اضغط على  للتحديد.

إذا كان صندوق الوارد فارغًا:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة.

4

اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

5

اضغط على  للوصول إلى القائمة الفرعية.

6

اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.

7

اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

ستعرض الشاشة إشعارًا إيجابيًا صغيرًا. تعود الشاشة إلى صندوق الوارد.

- تعرض الشاشة إشعارًا سلبيًا صغيرًا.
- تنتقل الرسالة إلى مجلد العناصر المرسله.
- تتميز الرسالة برمز فشل الإرسال.

إشعار:

في حالة الرسالة النصية المكتوبة حديثًا، سيعود الراديو إلى شاشة الخيار إعادة إرسال.

## حذف الرسائل النصية من صندوق الوارد

اتبع الإجراء لحذف الرسائل النصية من صندوق الوارد على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى [خطوة 3](#).

- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

## حذف كل الرسائل النصية من صندوق الوارد

اتبع الإجراء لحذف جميع الرسائل النصية من صندوق الوارد على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.

• اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الرسائل. اضغط على

 للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد.

اضغط على  للتحديد.

إذا كان صندوق الوارد فارغاً:

• تعرض الشاشة القائمة فارغة.

• تصدر نغمة.

4 اضغط على  أو  للوصول إلى حذف الكل. اضغط على

 للتحديد.

5

اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

## الرسائل النصية المرسلة

بمجرد إرسال رسالة إلى راديو آخر، يتم حفظها في مجلد العناصر المرسلة. وتتم دائمًا إضافة أحدث رسالة نصية مرسلة في أعلى مجلد العناصر المرسلة. يمكنك إعادة إرسال رسالة نصية مرسلة أو توجيهها أو تحريرها أو حذفها.

يكون لمجلد العناصر المرسلة تخزين آخر 30 رسالة مرسلة كحد أقصى. عندما يمتلئ المجلد، ستحل تلقائيًا الرسالة النصية المرسلة التالية محل أقدم رسالة نصية في المجلد.

إذا قمت بإنهاء شاشة إرسال الرسالة أثناء إرسال الرسالة، فسيقوم الراديو بتحديث حالة الرسالة في مجلد العناصر المرسلة دون تقديم أية إشارة على الشاشة أو من خلال الصوت.

إذا تغير وضع الراديو أو تم إيقاف تشغيله قبل تحديث حالة الرسالة في العناصر المرسلة، فسيتعذر على الراديو إكمال أي رسائل قيد التقدم وسيقوم بتعليمها تلقائيًا برمز فشل الإرسال.

يدعم الراديو خمس رسائل قيد التقدم كحد أقصى في المرة الواحدة. خلال هذه الفترة، يتعذر على الراديو إرسال أية رسالة جديدة ويقوم بتعليمها تلقائيًا برمز فشل الإرسال.

إذا ضغطت لفترة طويلة على  في أي وقت، يعود الراديو إلى الشاشة الرئيسية.

إشعار:

إذا كان نوع القناة، مثل تقليدي رقمي أو سعة إضافية، غير متطابق، فيمكنك فقط تحرير رسالة مرسله أو توجيهها أو حذفها.

## عرض الرسائل النصية المرسله

اتبع الإجراء لعرض رسائل نصية مرسله على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى [خطوة 3](#).
- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى العناصر المرسله. اضغط على  للتحديد.

إذا كان مجلد العناصر المرسله فارغًا:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة منخفضة إذا كانت نغمة لوحة المفاتيح مشغلة.

4

اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

يشير الرمز الموجود في الركن الأيسر العلوي إلى حالة الرسالة. راجع رموز العناصر المرسله.

## إرسال الرسائل النصية المرسله

اتبع الإجراء لإرسال رسائل نصية مرسله على الراديو الخاص بك. عند عرض رسالة مرسله:

1

اضغط على .

2

يمكنك إما إعادة إرسال الرسالة النصية المرسله أو تقديمها. قم بأحد الإجراءات التالية:

-  للوصول إلى إعادة إرسال. اضغط على  للتحديد.
-  للوصول إلى تقديم. اضغط على  للتحديد. ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

## حذف كل الرسائل النصية المرسلة من مجلد العناصر المرسلة

اتبع الإجراء لحذف كل الرسائل النصية المرسلة من مجلد العناصر المرسلة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى العناصر المرسلة. اضغط على  للتحديد.

إذا كان مجلد العناصر المرسلة فارغاً:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة.

4 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.
- إذا لم يتم بنجاح:
- تصدر نغمة.
- ستعرض الشاشة إشعاراً سلبياً صغيراً.
- يتابع الراديو إلى شاشة الخيار إعادة إرسال. راجع إعادة إرسال رسائل نصية في صفحة 131 لمزيد من المعلومات.

## حذف الرسائل النصية المرسلة من مجلد العناصر المرسلة

اتبع الإجراء لحذف الرسائل النصية المرسلة من مجلد العناصر المرسلة على الراديو الخاص بك.

عند عرض رسالة مرسلة:

1 اضغط على .

2 اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.

## 5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم . اضغط على  للتحديد.  
ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

- اضغط على  أو  للوصول إلى لا . اضغط على  للتحديد.  
يعود الراديو إلى الشاشة السابقة.

## رسائل نصية محفوظة

يمكنك حفظ رسالة نصية لإرسالها في وقت لاحق.

إذا أدى الضغط على زر **PTT** أو تغيير الوضع إلى قيام الراديو بإنهاء شاشة كتابة/ تحرير الرسالة النصية أثناء عملية كتابة أو تحرير رسالة نصية، فسيتم حفظ الرسالة النصية الحالية تلقائيًا في المجلد مسودات.

وتتم دائمًا إضافة أحدث رسالة نصية محفوظة في أعلى القائمة مسودات.

يخزن المجلد مسودات آخر 10 رسائل محفوظة كحد أقصى. عند امتلاء المجلد، ستحل الرسالة النصية المحفوظة التالية تلقائيًا محل أقدم رسالة نصية في المجلد.

## عرض رسائل نصية محفوظة

اتبع الإجراء لعرض رسالة نصية محفوظة على الراديو الخاص بك.

## 1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.
- اضغط على  للوصول إلى القائمة.

- 
- 2 اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

- 
- 3 اضغط على  أو  للوصول إلى المسودات. اضغط على  للتحديد.

- 
- 4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

## تحرير رسائل نصية محفوظة

اتبع الإجراء لتحرير رسائل نصية محفوظة على الراديو الخاص بك.

- 
- 1 اضغط على  أثناء عرض الرسالة.

- اضغط على  أو  للاختيار بين حفظ الرسالة أو حذفها. اضغط على  للتحديد.

## حذف رسائل نصية محفوظة من مجلد المسودات

اتبع الإجراء لحذف رسالة نصية محفوظة من المسودات على الراديو الخاص بك.

- 1 قم بأحد الإجراءات التالية:
  - اضغط على زر رسالة نصية المبرمج. تابع إلى [خطوة 3](#).
  - اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى المسودات. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

- 2 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.  
يظهر مؤشر وامض.

- 3 استخدم لوحة المفاتيح لكتابة الرسالة.
  - اضغط على  للانتقال مسافة واحدة إلى اليسار.
  - اضغط على  أو  للانتقال مسافة واحدة إلى اليمين.
  - اضغط على  لحذف أي أحرف غير مرغوب فيها.
  - الضغظ لفترة طويلة على  لتغيير طريقة إدخال النصوص.

- 4 اضغط على  بمجرد إنشاء الرسالة.  
قم بأحد الإجراءات التالية:
  - اضغط على  أو  للوصول إلى إرسال. اضغط على  لإرسال الرسالة.

5

اضغط على  أو  للوصول إلى حذف. اضغط على  لحذف الرسالة النصية.

## الرسائل النصية السريعة

يدعم الراديو 50 رسالة نصية سريعة كحد أقصى، كما هو مبرمج من قبل الوكيل. على الرغم من تحديد الرسائل النصية السريعة مسبقًا، يمكنك تحرير كل رسالة قبل إرسالها.

## إرسال رسائل نصية سريعة

اتبع الإجراء لإرسال رسائل نصية سريعة محددة سابقًا على الراديو الخاص بك للاستمرار المحدد سابقًا.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.
- اضغط على زر الوصول بلمسة واحدة المبرمج. تابع إلى خطوة 6.
- ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.
- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى نص سريع. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى الرسالة النصية السريعة المطلوبة. اضغط على  للتحديد.

5

قم بما يلي لتحديد المستلم وأرسل الرسالة. ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

6

- انتظر حتى تصلك رسالة إعلام.
- إذا تم بنجاح:
- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

إشعار:

اضغط على  في أي وقت للعودة إلى الشاشة السابقة أو اضغط

لفترة طويلة على  للعودة إلى الشاشة الرئيسية. يخرج الراديو من الشاشة الحالية بمجرد انتهاء مؤقت عدم النشاط.

## تمكين أو تعطيل كلمة صحيحة

توفر خيارات بديلة للكلمة عند عدم تعرف القاموس المضمّن على الكلمة التي تم إدخالها في محرر النص.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

- يتابع الراديو إلى شاشة الخيار إعادة إرسال. راجع إعادة إرسال رسائل نصية في صفحة 131 لمزيد من المعلومات.

## تكوين إدخال النصوص

يتمتع لك الراديو تكوين نص مختلف.

يمكنك تكوين الإعدادات التالية لإدخال النصوص في الراديو:

- تنبؤ الكلمات
- كلمة صحيحة
- كتابة بأحرف كبيرة
- كلماتي
- يدعم الراديو أساليب إدخال النصوص التالية:
- أرقام
- رموز
- تنبؤي أو ضغط متعدد
- اللغة (في حالة برمجتها)

5 اضغط على  أو  للوصول إلى كلمة صحيحة. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى كلمة صحيحة. اضغط على  للتحديد.
- اضغط على لتمكين كلمة صحيحة. عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- اضغط على لتعطيل كلمة صحيحة. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تمكين أو تعطيل تنبؤ الكلمات

**تنبؤ الكلمات:** يمكن أن يتعرّف الراديو على تسلسلات الكلمات الشائعة التي تُدخلها كثيراً. ثم يتنبأ بالكلمة التالية التي قد تريد استخدامها بعد إدخال الكلمة الأولى من تسلسل الكلمات الشائعة في محرر النص.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تنبؤ الكلمات. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  لتمكين تنبؤ الكلمات. عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- اضغط على  لتعطيل التحكم في التشويه الديناميكي للميكروفون. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## كتابة بأحرف كبيرة

تستخدم هذه الميزة للتمكين التلقائي للكتابة بأحرف كبيرة بالنسبة للحرف الأول من الكلمة الأولى في كل جملة جديدة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كـ بأحرف كبيرة. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

• اضغط على  لتمكين الكتابة بأحرف كبيرة. عند تمكينها، تظهر علامة ✓ بجوار ممكن.

• اضغط على  لتعطيل الكتابة بأحرف كبيرة. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## عرض كلمات مخصصة

يمكنك إضافة كلماتك المخصصة إلى القاموس المضمّن في الراديو الخاص بك. يحتفظ الراديو بقائمة لتحتوي على هذه الكلمات.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى قائمة الكلمات.  
اضغط على  للتحديد.  
تعرض الشاشة قائمة الكلمات المخصصة.

## تحرير الكلمات المخصصة

يمكنك تحرير الكلمات المخصصة المحفوظة في الراديو.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات  
مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات  
الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى قائمة الكلمات.  
اضغط على  للتحديد.  
ستعرض الشاشة قائمة الكلمات المخصصة.

7 اضغط على  أو  للوصول إلى الكلمة المطلوبة. اضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى كلمة جديدة. اضغط على  للتحديد. ستعرض الشاشة قائمة الكلمات المخصصة.

8 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.

9 استخدم لوحة المفاتيح لتحرير كلمة مخصصة.

- اضغط على  للانتقال مسافة واحدة إلى اليسار.
- اضغط على المفتاح  للانتقال مسافة واحدة إلى اليمين.
- اضغط على المفتاح  لحذف أي أحرف غير مرغوب فيها.
- الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

10 اضغط على  بمجرد اكتمال الكلمة المخصصة.

- ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد حفظ الكلمة المخصصة.
- إذا تم حفظ الكلمة المخصصة، ستصدر نغمة وستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
  - إذا لم يتم حفظ الكلمة المخصصة، فستصدر نغمة منخفضة وستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إضافة كلمات مخصصة

يمكنك إضافة كلمات مخصصة إلى القاموس المضمّن في الراديو.

7 استخدم لوحة المفاتيح لتحرير كلمة مخصصة.

• اضغط على ◀ للانتقال مسافة واحدة إلى اليسار.

• اضغط على المفاتيح ▶ للانتقال مسافة واحدة إلى اليمين.

• اضغط على المفاتيح \*◀ لحذف أي أحرف غير مرغوب فيها.

• الضغط لفترة طويلة على Ⓜ لتغيير طريقة إدخال النصوص.

8 اضغط على OK بمجرد اكتمال الكلمة المخصصة.

ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد حفظ الكلمة المخصصة.

• إذا تم حفظ الكلمة المخصصة، فستصدر نغمة وستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

• إذا لم يتم حفظ الكلمة المخصصة، فستصدر نغمة منخفضة وستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## حذف كلمة مخصصة

اتبع الإجراء لحذف الكلمات المخصصة المحفوظة في الراديو.

1 اضغط على OK للوصول إلى القائمة.

2 اضغط على ▲ أو ▼ للوصول إلى أدوات

مساعدة. اضغط على OK للتحديد.

3 اضغط على ▲ أو ▼ للوصول إلى إعدادات

الراديو. اضغط على OK للتحديد.

4 اضغط على ▲ أو ▼ للوصول إلى إدخال النصوص.

اضغط على OK للتحديد.

5 اضغط على ▲ أو ▼ للوصول إلى كلماتي. اضغط على

OK للتحديد.

6 اضغط على ▲ أو ▼ للوصول إلى الكلمة المطلوبة. اضغط على

OK للتحديد.

7 اضغط على ▲ أو ▼ للوصول إلى حذف. اضغط على OK

للتحديد.

8 اختر أيًا مما يلي.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

7 قم بأحد الإجراءات التالية:

- في حذف إدخال؟، اضغط على  لتحديد نعم. تعرض الشاشة تم حذف جميع المدخلات.
- اضغط على  أو  للوصول إلى لا للعودة إلى الشاشة السابقة. اضغط على  للتحديد.

## تذاكر عمل

تتيح هذه الميزة للراديو استقبال رسائل من المرسل تسرد مهام يلزم أداؤها.

• في حذف إدخال؟، اضغط على  لتحديد نعم. ستعرض الشاشة تم حذف مدخل.

• اضغط على  أو  للوصول إلى لا. اضغط على  للعودة إلى الشاشة السابقة.

## حذف كل الكلمات المخصصة

اتبع الإجراء لحذف جميع الكلمات المخصصة من القاموس المضمن في الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

**إشعار:**

يمكن تخصيص هذه الميزة عبر CPS وفقًا لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يوجد مجلدان يحتويان على تذاكر عمل مختلفة:

**مجلد مهام**

تذاكر عمل شخصية مخصصة لمعرفة المستخدم الخاص بك لتسجيل الدخول.

**مجلد مهام مشتركة**

تذاكر عمل مشتركة مخصصة لمجموعة من الأفراد.

يمكنك الرد على تذاكر العمل من أجل ترتيبها في مجلدات تذاكر العمل. بشكل افتراضي، تكون المجلدات **الكل** و**جديد** وتم **البدء به** و**اكتمل**. للحصول على 10 مجلدات إضافية، راجع الأمر مع الوكيل أو مسؤول النظام.

**إشعار:**

يتم الاحتفاظ بتذاكر العمل حتى بعد إيقاف تشغيل الراديو وتشغيله مرة أخرى.

توجد كل تذاكر العمل في مجلد **الكل**. وفقًا لطريقة برمجة الراديو الخاص بك، يتم فرز تذاكر العمل حسب مستوى الأولوية يتبعه وقت الاستقبال. يتم عرض تذاكر العمل الجديدة، وتذاكر العمل مع أحدث التغييرات في الحالة، والتذاكر ذات مستوى الأولوية الأعلى أولاً. عند الوصول إلى العدد الأقصى لتذاكر العمل، تحل تذكرة العمل التالية تلقائيًا محل آخر تذكرة عمل في الراديو. يدعم الراديو الخاص بك 100 أو 500 تذكرة مهمة كحد أقصى، بناءً على طراز الراديو الخاص بك. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات. سيكتشف الراديو تلقائيًا تذاكر العمل المكررة التي لها معرف المهمة نفسه ويتجاهلها.

ووفقًا لأهمية تذاكر العمل، يضيف المرسل مستوى الأولوية إليها. توجد ثلاثة مستويات أولوية: الأولوية 1 والأولوية 2 والأولوية 3. تكون الأولوية 1 أعلى أولوية والأولوية 3 أقل أولوية. توجد أيضًا تذاكر عمل بدون أولوية.

ومن ثم، يقوم الراديو الخاص بك بالتحديث عندما يجري المرسل التغييرات التالية:

- يعدل محتوى تذاكر العمل.
- يضيف مستوى الأولوية لتذاكر العمل أو يحرره.
- ينقل تذاكر العمل من مجلد إلى مجلد.
- يلغي تذاكر العمل.

**الوصول إلى مجلد تذكرة العمل**

اتبع الإجراء للوصول إلى مجلد تذاكر العمل.

**1** قم بأحد الإجراءات التالية:

- اضغط على زر **تذكرة عمل المبرمج**. تابع إلى **خطوة 3**.
- اضغط على **OK** للوصول إلى القائمة.

**2**

- اضغط على **▲** أو **▼** للوصول إلى تذاكر العمل.
- اضغط على **OK** للتحديد.

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

### إنشاء تذاكر العمل

يستطيع الراديو إنشاء تذاكر عمل تستند إلى قالب تذكرة عمل وإرسال المهام التي يجب تنفيذها.

يلزم وجود برنامج برمجة CPS لتكوين قالب تذكرة العمل.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى تذاكر العمل.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إنشاء تذكرة.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى المجلد المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تذاكر العمل المطلوبة. اضغط على  للتحديد.

### تسجيل الدخول أو الخروج من الخادم عن بعد

تسمح لك هذه الميزة بتسجيل الدخول والخروج من الخادم عن بعد باستخدام معرف المستخدم.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى تسجيل الدخول. اضغط على  للتحديد.

إذا قمت بتسجيل الدخول بالفعل، ستعرض القائمة تسجيل الخروج. تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

## الرد على تذاكر العمل

اتبع الإجراء للرد على تذاكر العمل على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى تذاكر العمل.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى المجلد المطلوب. اضغط

على  للتحديد.

4 اضغط على  أو  للوصول إلى تذاكر العمل المطلوبة.

اضغط على  للتحديد.

5 اضغط على  مرة أخرى للوصول إلى القائمة الفرعية.

يمكنك أيضًا الضغط على مفتاح الرقم المناظر (من 1 إلى 9) للرد السريع.

6

اضغط على  أو  للوصول إلى تذاكر العمل المطلوبة.

اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

7

انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إرسال تذاكر العمل باستخدام نموذج واحد لتذاكر العمل

إذا تمت تهيئة الراديو الخاص بك باستخدام نموذج واحد لتذاكر العمل، فقم بتنفيذ الإجراءات التالية لإرسال تذكرة العمل.

1

1 استخدم لوحة المفاتيح لكتابة رقم الغرفة المطلوب. اضغط على  للتحديد.

## إرسال تذاكر العمل باستخدام أكثر من نموذج لتذاكر العمل

إذا تمت تهيئة الراديو الخاص بك باستخدام أكثر من نموذج لتذاكر العمل، فقم بتنفيذ الإجراءات التالية لإرسال تذاكر العمل.

1 اضغط على  أو  للوصول إلى الخيار المطلوب. اضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى إرسال. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

3 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

2 اضغط على  أو  للوصول إلى حالة الغرفة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الخيار المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إرسال. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

5 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## حذف تذاكر العمل

اتبع الإجراء لحذف تذاكر العمل من الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر **تذكرة عمل** المبرمج. تابع إلى **خطوة 4**

• اضغط على **OK** للوصول إلى القائمة.

2

اضغط على **▲** أو **▼** للوصول إلى تذاكر العمل.

اضغط على **OK** للتحديد.

3

اضغط على **▲** أو **▼** للوصول إلى المجلد المطلوب. اضغط

على **OK** للتحديد.

4

اضغط على **▲** أو **▼** للوصول إلى مجلد الكل. اضغط على

**OK** للتحديد.

5

اضغط على **▲** أو **▼** للوصول إلى تذاكر العمل المطلوبة.

اضغط على **OK** للتحديد.

6

اضغط على **OK** مرة أخرى أثناء عرض تذكرة العمل.

7

اضغط على **▲** أو **▼** للوصول إلى حذف. اضغط على **OK** للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

8

انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## حذف كل تذاكر العمل

اتبع الإجراء لحذف كل تذاكر العمل من الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر **تذكرة عمل** المبرمج. تابع إلى **خطوة 3**.

- اضغط على  للوصول إلى القائمة. أو  أو  للوصول إلى لا. اضغط على  للتحديد.
- يعود الراديو إلى الشاشة السابقة.

## السرية

تساعدك هذه الميزة على منع تنصت المستخدمين غير المسموح لهم على إحدى القنوات من خلال استخدام أحد حلول التشفير القائمة على البرامج. لا يتم تشفير أجزاء الإشارات ومعرف المستخدم الخاصة بالرسالة.

يجب تمكين السرية في الراديو الخاص بك على القناة لإجراء إرسال يدعم السرية، إلا أن ذلك ليس مطلبًا ضروريًا لتلقي الإرسال. أثناء التواجد على قناة تدعم السرية، يظل الراديو قادرًا على تلقي إرسالات واضحة أو غير مشفرة.

يدعم الراديو السرية المعززة فقط. لفك تشفير إرسال مكاملة أو بيانات يدعم السرية، تجب برمجة الراديو لتكون قيمة المفتاح ومعرف المفتاح للسرية المعززة الخاصين به مماثلين للراديو المُرسَل.

إذا تلقى الراديو مكاملة مشفرة ذات قيمة مفتاح مختلفة ومعرف مفتاح مختلف، فلن تسمع شيئًا على الإطلاق للسرية المعززة.

على قناة تم تمكين الخصوصية عليها، يكون الراديو لديك قادرًا على تلقي مكالمات واضحة أو نقية بناءً على طريقة برمجة الراديو لديك. فوق ذلك، قد يقوم الراديو لديك بتشغيل نغمة تحذير أو قد لا يفعل، وذلك بناءً على طريقة برمجته.

إشعار:

لا تنطبق هذه الميزة على قنوات النطاق الترددي المدني الموجودة في نفس التردد.

- اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى تذاكر العمل. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى المجلد المطلوب. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى مجلد الكل. اضغط على  للتحديد.

- 5 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

يضئ مؤشر LED الأخضر عندما يقوم الراديو بالإرسال ويومض بسرعة عند تلقي الراديو لعملية إرسال مستمرة تدعم السرية.

إشعار:

قد لا توفر بعض طرز الراديو ميزة السرية هذه، أو قد يكون لها تكوين مختلف. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

4 اضغط على أو للوصول إلى سرية. اضغط على للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على أو للوصول إلى تشغيل. اضغط على للتحديد. ستعرض الشاشة علامة بجانب تشغيل.
- اضغط على أو للوصول إلى إيقاف. اضغط على للتحديد. ستعرض الشاشة علامة بجانب إيقاف تشغيل.

## تشغيل الخصوصية أو إيقاف تشغيلها

اتبع الإجراء لتشغيل السرية أو إيقاف تشغيلها على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر السرية المبرمج. قم بتخطي الخطوات التالية.
- اضغط على للوصول إلى القائمة.

## منع الاستجابة

تساعد هذه الميزة في منع الراديو من الاستجابة لأي عمليات إرسال واردة.

إشعار:

هذه الميزة قابلة للشراء. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

عند تمكينها، لا يقوم جهاز الراديو لديك بإنشاء أي عمليات إرسال صادرة استجابة لعمليات الإرسال الواردة، مثل التحقق من الراديو وتنبيه المكالمات وتعطيل الراديو والمراقبة عن بعد وخدمة التسجيل التلقائي (ARS) والرد على الرسائل الخاصة

2 اضغط على أو للوصول إلى أدوات مساعدة.

اضغط على للتحديد.

3 اضغط على أو للوصول إلى إعدادات

الراديو. اضغط على للتحديد.

بمجرد تعطيل الراديو، يطلق صوت نغمة مؤشر سلبية وتعرض الشاشة الرئيسية تم رفض القناة.

عند إيقاف الراديو، لا يمكنه طلب أو استقبال أي خدمات يدها المستخدمون على النظام الذي قام بتنفيذ إجراء الإيقاف. مع ذلك، يمكن للراديو التحويل إلى نظام آخر. يستمر الراديو في إرسال تقارير موقع GNSS ويمكن مراقبته عن بُعد عند إيقافه.

إشعار:

يمكن للوكيل أو مسؤول النظام تعطيل الراديو بصورة دائمة. راجع الإيقاف الدائم للراديو في صفحة 161 لمزيد من المعلومات.

## إيقاف راديو مؤقتًا

اتبع الإجراء لتعطيل راديو.

1 اضغط على زر تعطيل الراديو المبرمج.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يومض مؤشر LED الأخضر.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

وإرسال تقارير موقع GNSS. لا يمكن أن يتسلم الراديو لديك مكالمة خاصة مؤكدة عند تمكين هذه الميزة. مع ذلك، يكون الراديو قادرًا على تنفيذ الإرسال يدويًا.

## تشغيل إيقاف الاستجابة أو إيقاف تشغيلها

اتبع الإجراء لتمكين إيقاف الاستجابة على الراديو لديك أو تعطيلها.

اضغط على زر إيقاف الاستجابة المبرمج.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- تعرض الشاشة إشعارًا إيجابيًا صغيرًا مؤقتًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة إشعارًا سلبيًا صغيرًا مؤقتًا.

## إيقاف مؤقت/إعادة تشغيل

تسمح لك هذه الميزة بتمكين أي راديو في النظام أو تعطيله. على سبيل المثال، يتعين على الوكيل أو مسؤول النظام تعطيل راديو مسروق لمنع المستخدمين غير المصرح لهم باستخدامه، وتمكين الراديو عند استعادته.

يمكن تعطيل الراديو (أي إيقافه مؤقتًا) أو تمكينه (إعادة تشغيله) إما عبر وحدة التحكم أو عبر أمر تتم تهيئته بواسطة راديو آخر.

- 4 اضغط على  أو  للوصول إلى تعطيل الراديو.  
اضغط على  للتحديد.  
تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.  
يومض مؤشر LED الأخضر.

- 5 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إيقاف راديو مؤقتًا باستخدام الاتصال اليدوي

اتبع الإجراء لتعطيل راديو باستخدام الاتصال اليدوي.

- 1 اضغط على  للوصول إلى القائمة.

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## الإيقاف المؤقت للراديو باستخدام قائمة جهات الاتصال

اتبع الإجراء لتعطيل الراديو باستخدام قائمة جهات الاتصال.

- 1 اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

7 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعاراً سلبياً صغيراً.

## إعادة تشغيل راديو

اتبع الإجراء لتمكين راديو.

1 اضغط على زر تمكين الراديو المبرمج.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

تعرض الشاشة تمكين الراديو والاسم المستعار أو المعرف الخاص بالمشارك. يضيء مؤشر LED الأخضر.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط على  للتحديد.

يعرض سطر النص الأول رقم لاسلكي.:

5 أدخل معرف المشترك واضغط على  للمتابعة.

6 اضغط على  أو  للوصول إلى تعطيل الراديو. اضغط على  للتحديد.

تعرض الشاشة إشعاراً مؤقتاً صغيراً، للإشارة إلى أن الطلب قيد التقدم. يومض مؤشر LED الأخضر.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعاراً سلبياً صغيراً.

4

اضغط على  أو  للوصول إلى تمكين الراديو.

اضغط على  للتحديد.

يومض مؤشر LED الأخضر.

تعرض الشاشة تمكين الراديو والاسم المستعار أو المعرف الخاص بالمشارك. يضيء مؤشر LED الأخضر.

5 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- تعرض الشاشة تمكين الراديو ناجح.

إذا لم يتم بنجاح:

- تصدر نغمة.
- تعرض الشاشة تمكين الراديو فشل.

## إعادة تشغيل راديو باستخدام قائمة جهات الاتصال

اتبع الإجراء لتمكين الراديو باستخدام قائمة جهات الاتصال.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى جهات الاتصال. اضغط

على  للتحديد.

3

اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

## إعادة تشغيل راديو باستخدام الاتصال اليدوي

اتبع الإجراء لتمكين راديو باستخدام الاتصال اليدوي.

1

اضغط على  للوصول إلى القائمة.

## 7 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- تعرض الشاشة تمكين الراديو ناجح.
- إذا لم يتم بنجاح:
- تصدر نغمة.
- تعرض الشاشة تمكين الراديو فشل.

## الإيقاف الدائم للراديو

هذه الميزة هي إجراء أمان محسن لتقييد الوصول غير المصرح به إلى راديو ما.

تؤدي ميزة الإيقاف الدائم للراديو إلى جعل الراديو غير قابل للتشغيل. على سبيل المثال، قد يرغب الوكيل أو مسؤول النظام في إيقاف راديو مسروق أو ضائع بشكل دائم لتفادي أي استخدام غير مصرح به.

عند تشغيله، تعرض شاشة عرض الراديو الذي تم إيقافه إيقاف الراديو على الشاشة مؤقتًا لتشير إلى حالة الإيقاف.

## إشعار:

لا يمكن إعادة تشغيل أي راديو تم إيقافه بشكل دائم إلا في مستودع صيانة تابع لشركة Motorola Solutions. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

2 اضغط على أو للوصول إلى جهات الاتصال. اضغط على للتحديد.

3 اضغط على أو للوصول إلى اتصال يدوي. اضغط على للتحديد.

4 اضغط على أو للوصول إلى مكالمة خاصة. اضغط على للتحديد.  
يعرض سطر النص الأول رقم لاسلكي.:

5 أدخل معرف المشترك واضغط على للمتابعة.

6 اضغط على أو للوصول إلى تمكين الراديو. اضغط على للتحديد.

يومض مؤشر LED الأخضر.  
تعرض الشاشة تمكين الراديو والاسم المستعار أو المعرف الخاص بالمشترك. يضيء مؤشر LED الأخضر.

## العامل المنفرد

تتطلب هذه الميزة رفع حالة الطوارئ في حالة عدم وجود نشاط للمستخدم، مثل الضغط على أي زر للراديو أو تنشيط محدد القناة، لمدة محددة مسبقًا.

بعد عدم وجود نشاط للمستخدم خلال مدة مبرمجة، يقوم الراديو بتحذيرك مسبقًا باستخدام مؤشر صوتي بمجرد انتهاء مؤقت عدم النشاط.

في حالة عدم وجود إشعار بالاستلام منك قبل انتهاء مؤقت التنكير المحدد مسبقًا، يبدأ الراديو في إصدار حالة طوارئ كما هو مبرمج من قبل الوكيل أو مسؤول النظام.

راجع تشغيل الطوارئ في صفحة 116 لمزيد من المعلومات.

إشعار:

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## ميزات التأمين بكلمة مرور

تتيح لك هذه الميزة تقييد الوصول إلى الراديو من خلال المطالبة بكلمة مرور عند تشغيل الجهاز.

يمكنك استخدام الميكروفون المزود بلوحة مفاتيح أو زر التمرير لأعلى/أسفل لإدخال كلمة المرور.

## الوصول إلى أجهزة الراديو باستخدام كلمات المرور

اتبع الإجراء للوصول إلى الراديو الخاص بك باستخدام كلمة مرور.

1 أدخل كلمة المرور الحالية المكونة من أربعة أرقام.

إشعار:

يؤدي استخدام مفتاح القدم للطوارئ إلى إلغاء إدخال كلمة المرور للوصول إلى الراديو.

• استخدم الميكروفون المزود بلوحة مفاتيح.

• اضغط على  أو  لتحديد القيمة الرقمية لكل رقم،

واضغط على  للدخول والانتقال إلى الرقم التالي.

2

اضغط على  لإدخال كلمة المرور.

إذا تم بنجاح، يتم تشغيل الراديو.

إذا لم يتم بنجاح:

• بعد المحاولتين الأولى والثانية تعرض الشاشة كلمة مرور خاطئة. كرر خطوة 1.

• بعد المحاولة الثالثة، تعرض الشاشة كلمة مرور خاطئة ثم تم قفل الراديو. تصدر نغمة. يومض مؤشر LED الأصفر بطريقة ازدواجية. يدخل الراديو في حالة القفل لمدة 15 دقيقة.

إشعار:

في حالة القفل، يستجيب الراديو للإدخال من قرص تشغيل/إيقاف تشغيل/التحكم في مستوى الصوت المبرمج وزر إضاءة خ. فقط.

## إلغاء تأمين أجهزة الراديو في حالة القفل

لا يكون الراديو قادرًا على تلقي أي مكالمة في حالة القفل. اتبع الإجراء لإلغاء تأمين الراديو الخاص بك في حالة القفل.

قم بأحد الإجراءات التالية:

- إذا تم تشغيل الراديو، فانتظر لمدة 15 دقيقة ثم كرر الخطوات الواردة في الوصول إلى أجهزة الراديو باستخدام كلمات المرور في صفحة 162 للوصول إلى الراديو.
  - وإذا تم إيقاف تشغيل الراديو، فقم بتشغيله. يقوم الراديو بإعادة تشغيل مؤقت 15 دقيقة لحالة القفل. تصدر نغمة. يومض مؤشر LED الأصفر بطريقة ازدواجية. تعرض الشاشة تم قفل الراديو.
- انتظر لمدة 15 دقيقة ثم كرر الخطوات الواردة في الوصول إلى أجهزة الراديو باستخدام كلمات المرور في صفحة 162 للوصول إلى الراديو.

## تشغيل التأمين بكلمة مرور أو إيقاف تشغيله

اتبع الإجراء لتشغيل تأمين المرور أو إيقاف تشغيله على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى تأمين المرور. اضغط على  للتحديد.

5

أدخل كلمة المرور الحالية المكونة من أربعة أرقام.

- استخدم الميكروفون المزود بلوحة مفاتيح.

- اضغط على  أو  لتحرير القيمة الرقمية لكل رقم،

واضغط على  للدخول والانتقال إلى الرقم التالي. تصدر نغمة مؤشر إيجابية لكل رقم تقوم بالضغط عليه.

6

اضغط على  لإدخال كلمة المرور.

إذا كانت كلمة المرور غير صحيحة، فستعرض الشاشة كلمة مرور خاطئة وستعود تلقائيًا إلى القائمة السابقة.

7 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد.
- تعرض الشاشة  بجانب تشغيل.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد.
- تعرض الشاشة  بجانب إيقاف.

## تغيير كلمات المرور

اتبع الإجراء لتغيير كلمات المرور على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تأمين المرور. اضغط على  للتحديد.

5 أدخل كلمة المرور الحالية المكونة من أربعة أرقام، واضغط على  للمتابعة.  
إذا كانت كلمة المرور غير صحيحة، فستعرض الشاشة كلمة مرور خاطئة وستعود تلقائيًا إلى القائمة السابقة.

6 اضغط على  أو  للوصول إلى كلمة المرور. اضغط على  للتحديد.

7 أدخل كلمة مرور جديدة مكونة من أربعة أرقام، واضغط على  للمتابعة.

8 أعد إدخال كلمة المرور الجديدة المكونة من أربعة أرقام، واضغط على  للمتابعة.

إذا تم بنجاح، فستعرض الشاشة تم تغيير كلمة المرور. إذا لم يتم بنجاح، فستعرض الشاشة كلمات المرور غير مطابقة.

ستعود الشاشة تلقائيًا إلى القائمة السابقة.

2 اضغط على  أو  للوصول إلى إ علام . اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الحدث المطلوب. اضغط على  للتحديد.

اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## البرمجة عبر الأثير

يمكن للوكيل تحديث الراديو الخاص بك عن بعد باستخدام البرمجة عبر الأثير (OTAP) دون الاتصال الفعلي. بالإضافة إلى ذلك، يمكن تكوين بعض الإعدادات باستخدام البرمجة عبر الأثير (OTAP).

عندما يمر الراديو ببرمجة عبر الأثير (OTAP)، يومض مؤشر LED الأخضر.

عندما يتلقى الراديو الخاص بك بيانات كبيرة الحجم:

- تعرض الشاشة رمز بيانات كبيرة الحجم.
  - وتصبح القناة مشغولة.
  - تصدر نغمة سلبية إذا ضغطت على زر PTT.
- عند انتهاء OTAP، بناءً على التكوين:

## قائمة الإعلّامات

يحتوي الراديو على قائمة إشعارات تجمع كل الأحداث غير المقروءة على القناة، مثل الرسائل النصية غير المقروءة ورسائل تتبع الاستخدام والمكالمات الفائتة وتنبهات المكالمات.

تعرض الشاشة رمز إ علام عندما يكون في قائمة الإعلّامات حدث واحد أو أكثر.

تدعم القائمة 40 حدثًا غير مقروء كحد أقصى. عندما تكون القائمة ممتلئة، يحل الحدث التالي محل أقدم حدث تلقائيًا. بعد قراءة الأحداث، تتم إزالتها من قائمة الإعلّامات.

بالنسبة إلى الرسائل النصية والمكالمات الفائتة وتنبه المكالمات، فإن العدد الأقصى للإعلّامات هو 30 رسالة نصية و10 مكالمات فائتة أو تنبيهات مكالمات. يعتمد العدد الأقصى هذا على سعة قائمة الميزة الفردية (تذاكر العمل أو الرسائل النصية أو المكالمات الفائتة أو تنبيهات المكالمات).

## الوصول إلى قائمة الإعلّامات

اتبع الإجراء للوصول إلى قائمة الإعلّامات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع الكبل. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى وضع التوصيل المطلوب. اضغط على  للتحديد. تعرض الشاشة وضع التوصيل المحدد. ستعود الشاشة إلى القائمة السابقة.

## مؤشر قوة الإشارة المستلمة

تسمح لك هذه الميزة بعرض قيم مؤشر قوة الإشارة المستلمة (RSSI).

تعرض الشاشة رمز **RSSI** في الزاوية العليا اليسرى. راجع [رموز الشاشة](#) للحصول على مزيد من المعلومات حول رمز **RSSI**.

- تصدر نغمة. تعرض الشاشة تحديث إعادة التشغيل. تتم إعادة تشغيل الراديو عن طريق إيقاف التشغيل والتشغيل مرة أخرى.
- يمكنك تحديد إعداد تشغيل الآن أو تأجيل. عندما تحدد تأجيل، يعود الراديو إلى الشاشة السابقة. تعرض الشاشة رمز مؤقت تأخير **OTAP** حتى تحدث إعادة التشغيل التلقائية.
- عندما يتم تشغيل الراديو بعد إعادة التشغيل التلقائية:
  - إذا تم بنجاح، فستعرض الشاشة تحديث البرنامج مكتمل.
  - إذا لم يتم بنجاح، فستعرض الشاشة تحديث البرنامج فشل.
- راجع التحقق من معلومات تحديث البرنامج في صفحة 191 للحصول على إصدار البرنامج المحدث.

## تحديد أوضاع توصيل الأجهزة الطرفية الخارجية

اتبع الإجراء لتحديد أحد أوضاع توصيل الأجهزة الطرفية التالية:

- Motorola Solutions
- PC وصوت
- ملحق بيانات
- القياس عن بعد
- عام

1 اضغط على  للوصول إلى القائمة.

## عرض قيم RSSI

اتبع الإجراء لعرض قيم RSSI على الراديو الخاص بك.  
عندما تكون في الشاشة الرئيسية:

- 1 اضغط على  ثلاث مرات واضغط فوراً على  ثلاث مرات، كل هذا في خمس ثوان.  
تعرض الشاشة قيم مؤشر قوة الإشارة المتلقاة (RSSI) الحالية.

- 2 اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## تكوين اللوحة الأمامية

بإمكانك تخصيص معلمات ميزة معينة في تكوين اللوحة الأمامية (FPC) لتحسين استخدام الراديو الخاص بك.

## الدخول في وضع تكوين اللوحة الأمامية

اتبع الإجراء للدخول إلى وضع برمجة اللوحة الأمامية على الراديو الخاص بك.

اضغط لفترة طويلة على  في أي وقت للعودة إلى الشاشة الرئيسية.

- 1 اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى برنامج الراديو. اضغط على  للتحديد.

## تحرير معلمات وضع FPP

استخدم الأزرار التالية حسب الحاجة أثناء التنقل عبر معلمات الميزة.

-  ،  - التمرير عبر الخيارات أو زيادة/خفض القيم أو الانتقال بطريقة رأسية.
-  - تحديد الخيار أو الدخول إلى قائمة فرعية.
-  - الضغط لفترة قصيرة للعودة إلى القائمة السابقة أو للخروج من شاشة الاختيار. اضغط لفترة طويلة للعودة إلى الشاشة الرئيسية.

## تشغيل ميزة Wi-Fi

علامة Wi-Fi® هي علامة تجارية مسجلة لصالح Wi-Fi Alliance®.

إشعار:

تنطبق هذه الميزة على DM4601e فقط.

تسمح لك هذه الميزة بإعداد شبكة Wi-Fi والاتصال بها. تدعم ميزة Wi-Fi تحديثات للبرامج الثابتة للراديو وبرنامج codeplug والموارد مثل حزم اللغات وبيان الصوت.

## تشغيل ميزة Wi-Fi أو إيقاف تشغيلها

تم تعيين زر تشغيل أو إيقاف تشغيل Wi-Fi المبرمج بواسطة الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

يمكن تخصيص إعلانات صوتية لزر تشغيل أو إيقاف تشغيل Wi-Fi من خلال CPS وفقاً لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يمكنك تشغيل ميزة Wi-Fi أو إيقاف تشغيلها عبر تنفيذ أحد الإجراءات التالية.

- اضغط على زر تشغيل أو إيقاف تشغيل Wi-Fi المبرمج. يصدر بيان صوت عند تشغيل ميزة Wi-Fi أو إيقاف تشغيل Wi-Fi.
- انتقل إلى هذه الميزة باستخدام القائمة.

a. اضغط على  للوصول إلى القائمة.

b. اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى تشغيل Wi-Fi واضغط على  للتحديد.

اضغط على  لتشغيل Wi-Fi. ستعرض الشاشة علامة ✓ بجانب ممكن.

اضغط على  لإيقاف تشغيل Wi-Fi. تختفي علامة ✓ من جانب ممكن.

## التوصيل بنقطة وصول إلى شبكة

عند تشغيل Wi-Fi، يقوم الراديو بالمشح للوصول إلى نقطة وصول إلى شبكة والاتصال بها.

كما يمكنك الاتصال بنقطة وصول إلى شبكة بواسطة القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

اضغط على زر **الاستعلام عن حالة Wi-Fi** المبرمج لمعرفة حالة الاتصال باستخدام بيان الصوت. يعلن بيان الصوت أنه قد تم إيقاف تشغيل Wi-Fi، أو أن Wi-Fi قيد التشغيل لكن لا اتصال، أو أن Wi-Fi قيد التشغيل ومتصل.

- تعرض الشاشة تم إيقاف تشغيل Wi-Fi عندما يتم إيقاف تشغيل Wi-Fi.
  - تعرض الشاشة تم تشغيل Wi-Fi، متمل عند اتصال الراديو بشبكة.
  - تعرض الشاشة تم تشغيل Wi-Fi، غير متمل عند تشغيل Wi-Fi دون اتصال الراديو بأي شبكة.
- يمكن تخصيص إعلانات صوتية لنتائج الاستعلام عن حالة Wi-Fi عبر CPS وفقاً لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

**إشعار:** 

يتم تعيين زر **الاستعلام عن حالة Wi-Fi** المبرمج بواسطة الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

## تحديث قائمة الشبكة

اتبع الإجراء لتحديث قائمة الشبكة.

- قم بتنفيذ الإجراءات التالية لتحديث قائمة الشبكة عبر القائمة.

a. اضغط على  للوصول إلى القائمة.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقطة وصول إلى شبكة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى اتصال واضغط على  للتحديد.

6 أدخل كلمة المرور واضغط على .

عند نجاح الاتصال، يعرض الراديو إشعاراً ويتم حفظ نقطة الوصول إلى الشبكة في قائمة ملفات التعريف.

## التحقق من حالة اتصال Wi-Fi

اتبع الإجراء للتحقق من حالة اتصال Wi-Fi.

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إضافة شبكة واضغط على  للتحديد.

5 أدخل معرف مجموعة الخدمات (SSID) واضغط على  .

6 اضغط على  أو  للوصول إلى فتح واضغط على  للتحديد.

7 أدخل كلمة المرور واضغط على  .  
يعرض الراديو إشعارًا إيجابيًا صغيرًا للإشارة إلى أنه قد تم حفظ الشبكة بنجاح.

b. اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

عند دخول قائمة الشبكات، يقوم الراديو تلقائيًا بتحديث قائمة الشبكة.

- إذا كنت موجودًا في قائمة الشبكات بالفعل، فقم بتنفيذ الإجراء التالي لتحديث قائمة الشبكة.

اضغط على  أو  للوصول إلى تحديث واضغط على  للتحديد.

يقوم الراديو بتحديث أحدث قائمة للشبكة وعرضها.

## إضافة شبكة

إذا لم تتوفر شبكة مفضلة في قائمة الشبكات المتاحة، فقم بتنفيذ الإجراءات التالية لإضافة شبكة.

1 اضغط على  للوصول إلى القائمة.

بالنسبة لنقطة الوصول إلى الشبكة غير المتصلة، يتم عرض معرف مجموعة الخدمات (SSID) ووضع الأمان.

## عرض تفاصيل نقاط الوصول إلى الشبكة

اتبع الإجراء لعرض تفاصيل نقاط الوصول إلى الشبكة.

### إزالة نقاط الوصول إلى الشبكة

قم بتنفيذ الإجراءات التالية لإزالة نقاط الوصول إلى الشبكة من قائمة ملف التعريف.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقاط الوصول إلى الشبكة المحددة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إزالة واضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقطة وصول إلى شبكة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى عرض التفاصيل واضغط على  للتحديد.

بالنسبة لنقطة الوصول إلى الشبكة المتصلة، يتم عرض معرف مجموعة الخدمات (SSID) ووضع الأمان وعنوان وحدة تحكم وصول الوسائط (MAC) وبروتوكول الإنترنت (IP).

- 1 قم بأحد الإجراءات التالية:
- اضغط على زر **مستوى الطاقة** المبرمج. قم بتخطي الخطوات التالية.
  - اضغط على **OK** للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على **OK** للتحديد.

- 3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على **OK** للتحديد.

- 4 اضغط على  أو  للوصول إلى الطاقة. اضغط على **OK** للتحديد.

- 5 قم بأحد الإجراءات التالية:
- اضغط على  أو  للوصول إلى عالية. اضغط على **OK** للتحديد.
  - ستعرض الشاشة  بجانب عالية.

- 6 اضغط على  أو  للوصول إلى نعم واضغط على **OK** للتحديد.

يعرض الراديو إشعارًا إيجابيًا صغيرًا للإشارة إلى أنه قد تمت إزالة نقطة الوصول إلى الشبكة المحددة بنجاح.

## الأدوات المساعدة

يشرح هذا الفصل عمليات وظائف الأدوات المساعدة المتوفرة في الراديو.

## مستويات الطاقة

يمكنك تخصيص إعداد الطاقة على عالية أو منخفضة لكل قناة.

### عالية

يتيح هذا تمكين الاتصال بأجهزة الراديو الموجودة على مسافة بعيدة منك.

### منخفضة

يتيح هذا تمكين الاتصال بأجهزة الراديو الموجودة على مسافة أقرب.

### إشعار:

لا تنطبق هذه الميزة على قنوات النطاق الترددي المدني الموجودة في نفس التردد.

## تعيين مستويات الطاقة

اتبع الإجراء لتعيين مستويات الطاقة على الراديو الخاص بك.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى جميع النغمات. اضغط على  للتحديد.

6 اضغط على  لتعطيل أو تمكين كل النغمات والتنبيهات. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة  بجوار ممكن.
- في حالة التعطيل، تختفي علامة  من جانب ممكن.

## تشغيل نغمات لوحة المفاتيح أو إيقاف تشغيلها

اتبع الإجراء لتشغيل نغمات لوحة المفاتيح أو إيقاف تشغيلها على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

• اضغط على  أو  للوصول إلى منخفضة. اضغط على  للتحديد. ستعرض الشاشة  بجانب منخفضة.

6 اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## تشغيل تنبيهات/نغمات الراديو أو إيقاف تشغيلها

بوسعك تمكين جميع نغمات وتنبيهات الراديو وتعطيلها، إذا لزم الأمر، باستثناء نغمة تنبيه الطوارئ الواردة. اتبع الإجراء لتشغيل النغمات والتنبيهات أو إيقاف تشغيلها على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على الزر **نغمة/تنبيه المبرمج**. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مسأعدة. اضغط على  للتحديد.

## تعيين مستويات إزاحة مستوى صوت النغمات/ التنبيهات

تعمل هذه الميزة على ضبط مستوى صوت النغمات أو التنبيهات، مما يتيح رفعه أو خفضه عن مستوى الصوت. اتبع الإجراء لتعيين مستويات إزاحة مستوى صوت النغمات والتنبيهات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إزاحة الصوت. اضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى نغمة المفاتيح. اضغط على  للتحديد.

6 اضغط على  لتمكين أو تعطيل نغمات لوحة المفاتيح. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

6 اضغط على  أو  للوصول إلى مستوى إزاحة مستوى الصوت المطلوب.

تصدر نغمة تغذية راجعة مع كل مستوى إزاحة مستوى صوت مقابل.

7 قم بأحد الإجراءات التالية:

- اضغط على  للتحديد. تم حفظ مستوى إزاحة الصوت المطلوب.
- اضغط على  للخروج. تم تجاهل التغييرات.

## تشغيل نغمة إذن بالكلام أو إيقاف تشغيلها

اتبع الإجراء لتشغيل نغمة إذن بالكلام أو إيقاف تشغيلها على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إذن بالكلام. اضغط على  للتحديد.

6 اضغط على  لتمكين أو تعطيل نغمة الإذن بالكلام. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل نغمة التشغيل أو إيقاف تشغيلها

اتبع الإجراء لتشغيل نغمة التشغيل أو إيقاف تشغيلها على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

## تعيين نغمات تنبيه الرسائل النصية

يمكنك تخصيص نغمة تنبيه الرسائل النصية لتصبح "سريع" أو "متكرر" لأي إدخال في قائمة جهات الاتصال. اتبع الإجراء لتعيين نغمات تنبيه الرسائل النصية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تنبيه الرسائل. اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى سريع. اضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد.

6 اضغط على  لتمكين نغمة التشغيل أو تعطيلها. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

ستعرض الشاشة ✓ بجانب سريع.

- اضغط على  أو  للوصول إلى متكرر. اضغط على  للتحديد.
- ستعرض الشاشة ✓ بجانب متكرر.

## تغيير أوضاع العرض

يمكنك تغيير وضع العرض الخاص بالراديو بين "نهار" أو "ليل"، حسب الحاجة. ستؤثر هذه الميزة على عرض مجموعة الألوان الخاصة بالشاشة. اتبع الإجراء لتغيير وضع العرض للراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر وضع العرض المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى عرض. اضغط على  للتحديد.

ستعرض الشاشة وضع النهار ووضع الليل.

5

اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط على  للتحديد.

ستعرض الشاشة ✓ بجانب الإعداد المحدد.

## ضبط سطوع الشاشة

اتبع الإجراء لضبط سطوع الشاشة على الراديو الخاص بك. لا يمكن ضبط سطوع الشاشة عند تمكين "سطوع تلقائي".

1 قم بأحد الإجراءات التالية:

- اضغط على زر السطوع المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى السطوع. اضغط على

 للتحديد.

ستعرض الشاشة شريط التقدم.

5

اضغط على  أو  لتقليل سطوع الشاشة أو زيادته. اضغط

على  للتحديد.

تتفاوت قيمة الإعداد من 1 إلى 8.

## تشغيل الأبواق/الأضواء أو إيقاف تشغيلها

بإمكان الراديو إخطارك بمكالمة واردة من خلال ميزة الأبواق والأضواء. عند تنشيطها، تصدر مكالمة واردة صوت الأبواق وتشغل أضواء المركبة الخاصة بك. يجب تركيب هذه الميزة من قبل الوكيل من خلال موصل الملحقات الخلفي بالراديو. اتبع الإجراء لتشغيل جميع الأبواق والأضواء أو إيقاف تشغيلها على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر **الأبواق/الأضواء** المبرمج. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى أبواق/أضواء.

اضغط على  للتحديد.

5

اضغط على  لتمكين الأبواق/الأضواء أو تعطيلها. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل مؤشرات LED أو إيقاف تشغيلها

اتبع الإجراء لتشغيل مؤشرات LED أو إيقاف تشغيلها على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مؤشر LED. اضغط على  للتحديد.

5 اضغط على  لتمكين أو تعطيل مؤشر LED.

تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل نظام العنوان العام أو إيقاف تشغيله

اتبع الإجراءات لتمكين نظام العنوان العام الداخلي (PA) أو تعطيله في الراديو.

1 قم بأحد الإجراءات التالية:

- اضغط على زر العنوان العام المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى العنوان العام. اضغط على  للتحديد.

5 اضغط على  لتمكين العنوان العام أو تعطيله.

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.

- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

5 اضغط على  لتمكين العنوان العام الخارجي أو تعطيله.

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل نظام العنوان العام الخارجي أو إيقاف تشغيله

اتبع الإجراءات لتمكين نظام العنوان العام الخارجي (PA) أو تعطيله في الراديو.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **العنوان العام الخارجي** المبرمج. قم بتخطي الخطوات التالية.

- اضغط على  للوصول إلى القائمة.

## تشغيل شاشة المقدمة أو إيقاف تشغيلها

يمكنك تمكين شاشة المقدمة و تعطيلها باستخدام الإجراء التالي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة .

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى عرض. اضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى أدوات مساعدة .

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى العنوان العام

الخارجي. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى اللغات . اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى اللغة المطلوبة. اضغط على  للتحديد.  
ستعرض الشاشة  بجانب اللغة المحددة.

## تحديد نوع الكبل

نقذ الخطوات التالية لتحديد نوع الكبل الذي يستخدمه الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة .  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى شاشة المقدمة .  
اضغط على  للتحديد.

6 اضغط على  لتمكين شاشة المقدمة أو تعطيلها.  
تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة  بجوار ممكن.
- في حالة التعطيل، تختفي علامة  من جانب ممكن.

## تعيين اللغات

اتبع الإجراء لتعيين اللغات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة .  
اضغط على  للتحديد.

## تشغيل لوحة الاختيار أو إيقاف تشغيلها

يمكن تخصيص إمكانات لوحة الاختيار ضمن كل قناة للأزرار القابلة للبرمجة. يمكن للقناة أن تدعم حتى 6 ميزات للوحة الاختيار. اتبع الإجراء لتشغيل لوحة الاختيار أو إيقاف تشغيلها على الراديو الخاص بك.

اضغط على زر **لوحة الاختيار المبرمج**.

## نص إلى كلام

لا يمكن تمكين ميزة نص إلى كلام إلا بواسطة الوكيل أو مسؤول النظام. إذا تم تمكين ميزة نص إلى كلام، فسيتم تعطيل ميزة بيان الصوت تلقائيًا. إذا تم تمكين ميزة بيان الصوت، فسيتم تعطيل ميزة نص إلى كلام تلقائيًا.

تتمكن هذه الميزة الراديو من الإشارة بشكل مسموع إلى الميزات التالية:

- القناة الحالية
- المنطقة الحالية
- تشغيل ميزة الزر المبرمج أو إيقاف تشغيلها
- محتوى الرسائل النصية المتلقاة
- محتوى تذاكر العمل المتلقاة

يمكن تخصيص هذا المؤشر الصوتي وفقًا لمتطلبات العميل. وعادةً تكون هذه الميزة مفيدة عندما يكون المستخدم في وضع صعب يمنعه من قراءة المحتوى المعروض على الشاشة.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع الكبل. اضغط

على  للتحديد.

5 تتم الإشارة إلى نوع الكبل الحالي بعلامة ✓.

## تشغيل بيان الصوت أو إيقاف تشغيله

تتمكن هذه الميزة الراديو من توضيح المنطقة أو القناة الحالية التي قام المستخدم بتعيينها للتو أو الزر المبرمج الذي ضغط عليه المستخدم للتو صوتيًا. ويكون ذلك مفيدًا عادةً عندما يجد المستخدم صعوبة في قراءة المحتوى المعروض على الشاشة.

يمكن تخصيص هذا المؤشر الصوتي وفقًا لمتطلبات العميل. اتبع الإجراء لتشغيل بيان الصوت أو إيقاف تشغيله على الراديو الخاص بك.

- الرسائل
  - تذاكر عمل
  - تباعد
  - Zone
  - زر البرنامج
- تظهر علامة ✓ بجانب الإعداد المحدد.

## تعيين مؤقت القائمة

يمكنك تعيين فترة بقاء الراديو الخاص بك في القائمة قبل أن يقوم بالتبديل تلقائيًا إلى الشاشة الرئيسية. اتبع الإجراء لتعيين مؤقت القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

## تعيين النص إلى كلام

اتبع الإجراء لتعيين ميزة نص إلى كلام.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى بيان الصوت. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى أي من الميزات التالية. اضغط على  للتحديد.

الميزات المتوفرة هي كما يلي:

- الكل

2 اضغط على  أو  للوصول إلى أدوات مساعدة .  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى Mic AGC-D. اضغط على  للتحديد.

5 اضغط على  لتمكين أو تعطيل AGC للميكروفون الرقمي. تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل الصوت الذكي أو إيقاف تشغيله

يضبط الراديو مستوى الصوت تلقائياً للتغلب على الضوضاء الخلفية الحالية في البيئة المحيطة، بما في ذلك مصادر الضوضاء الثابتة وغير الثابتة. هذه ميزة تلقى فقط ولا

4 اضغط على  أو  للوصول إلى عرض. اضغط على  للتحديد.

5 اضغط على  أو  لتعيين مؤقت القائمة. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط على  للتحديد.

## تشغيل AGC للميكروفون الرقمي أو إيقاف تشغيله

يتحكم التحكم في الكسب التلقائي (AGC) للميكروفون الرقمي في كسب الميكروفون من الراديو تلقائياً أثناء الإرسال على نظام رقمي. وتعمل هذه الميزة على كتم الأصوات العالية أو رفع الأصوات المنخفضة إلى قيمة معينة مسبقاً للحفاظ على مستوى صوت ثابت. اتبع الإجراء لتشغيل AGC للميكروفون الرقمي أو إيقاف تشغيله على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد. ستعرض الشاشة علامة ✓ بجانب تشغيل.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد. ستعرض الشاشة علامة ✓ بجانب إيقاف تشغيل.

## تشغيل ميزة كاتم تردد الصوت أو إيقاف تشغيلها

تتيح لك هذه الميزة تقليل تردد الصوت في المكالمات المتلقاة.

- 1 اضغط على  للوصول إلى القائمة.
- 2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.
- 3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

تؤثر على صوت الإرسال. اتبع الإجراء لتشغيل الصوت الذكي أو إيقاف تشغيله على الراديو الخاص بك.

إشعار:

لا تنطبق هذه الميزة أثناء جلسة بلوتوث.

- 1 قم بأحد الإجراءات التالية:
  - اضغط على زر صوت ذكي المبرمج. قم بتخطي الخطوات التالية.
  - اضغط على  للوصول إلى القائمة.
- 2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.
- 3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.
- 4 اضغط على  أو  للوصول إلى صوت ذكي. اضغط على  للتحديد.
- 5 قم بأحد الإجراءات التالية:

- 4 اضغط على  أو  للوصول إلى كاتم تردد الصوت واضغط على  للتحديد.
- يمكنك أيضًا استخدام أو لتغيير الخيار المحدد.

5 قم بأحد الإجراءات التالية:

- اضغط على  لتمكين كاتم تردد الصوت. ستعرض الشاشة علامة ✓ بجانب ممكن.
- اضغط على  لتعطيل كاتم تردد الصوت. تختفي علامة ✓ من جانب ممكن.

## التبديل بين تشغيل تحسين الاهتزاز أو إيقاف تشغيله

يمكنك تمكين هذه الميزة عندما تتحدث بلغة تحتوي على العديد من الكلمات التي تحتوي على أصوات لثوية تكرارية. اتبع الإجراء لتشغيل تحسين الاهتزاز أو إيقاف تشغيله على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر تحسين الاهتزاز المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى تحسين الاهتزاز. اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد. ستعرض الشاشة علامة ✓ بجانب تشغيل.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد. ستعرض الشاشة علامة ✓ بجانب إيقاف تشغيل.

## بيئة الصوت

يمكنك تخصيص بيئة الصوت للراديو الخاص بك وفقاً للبيئة المحيطة بك.

### تم تحديد

هذا هو الإعداد الافتراضي.

### مرتفع

يمكن هذا الإعداد كاتم الضوضاء ويزيد من ارتفاع صوت السماعات الخارجية لاستخدامها في البيئة الصاخبة.

### مجموعة عمل

يمكن هذا الإعداد كاتم تردد الصوت ويعطل التحكم في الكسب التلقائي (AGC) للاستخدام عندما تكون مجموعة من أجهزة الراديو قريبة من بعضها البعض.

## تعيين بيئة الصوت

اتبع الإجراء لإعداد بيئة الصوت على الراديو وفقاً للبيئة المحيطة بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى بيئة الصوت. اضغط

على  للتحديد.

5

اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط

على  للتحديد.

الإعدادات كالتالي.

- اختر افتراضي لإعدادات المصنع الافتراضية.
  - اختر مرتفع لزيادة مستوى صوت السماع الخارجية عند الاستخدام في الأجواء الصاخبة.
  - اختر مجموعة عمل لتقليل الارتداد الصوتي عند استخدام مجموعة من أجهزة الراديو قريبة من بعضها.
- ستعرض الشاشة  بجانب الإعداد المحدد.

## ملفات تعريف الصوت

يمكنك تخصيص ملفات تعريف الصوت للراديو الخاص بك حسب تفضيلك.

## تم تحديد

هذا هو الإعداد الافتراضي.

## مستوى 1، ومستوى 2، ومستوى 3

تهدف هذه الإعدادات إلى التعويض عن فقدان السمع الناتج عن الضوضاء والذي عادةً ما يحدث للبالغين في سن 40 و50 و60 أو أكبر.

## تحسين ثلاثي وتحسين متوسط وتحسين الصوت

تهدف هذه الإعدادات إلى الحصول على صوت أدق وصوت أنفي وصوت أعمق.

## تعيين ملفات تعريف الصوت

اتبع الإجراء لتعيين ملفات تعريف الصوت على الراديو الخاص بك.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى Audio Profiles.

اضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط

على  للتحديد.

الإعدادات كالتالي.

- اختر افتراضي لتعطيل ملف تعريف الصوت المحدد سابقًا والعودة إلى إعدادات المصنع الافتراضية.
  - اختر مستوى 1 أو مستوى 2 أو مستوى 3 لملفات تعريف الصوت لتعويض فقدان السمع بسبب الضوضاء المعتاد لدى البالغين الذين تجاوزوا سن 40 عامًا.
  - اختر تحسين ثلاثي أو تحسين متوسط أو تحسين الصوت لملفات تعريف الصوت التي تتماشى مع تفضيلاتك للحصول على صوت رنان أو صوت أغن أو صوت عميق.
- ستعرض الشاشة  بجانب الإعداد المحدد.

## تشغيل النظام العالمي للملاحة عبر الأقمار الصناعية وإيقاف تشغيله

النظام العالمي للملاحة عبر الأقمار الصناعية (GNSS) هو نظام تنقل عبر الأقمار الصناعية يحدد الموقع الجغرافي الدقيق للراديو. يتضمن نظام تحديد الموقع العالمي (GPS)، والنظام العالمي للملاحة عبر الأقمار الصناعية (GLONASS).

إشعار:

قد توفر بعض طرز الراديو المحددة نظام GPS ونظام GLONASS. يتم تكوين مجموعة الأقمار لنظام GNSS باستخدام برنامج برمجة العميل (CPS). راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

1 نفذ إحدى الخطوات التالية للتبديل بين تشغيل GNSS أو إيقاف تشغيله في الراديو.

• اضغط على الزر **GNSS** المبرمج.

• اضغط على **OK** للوصول إلى القائمة. تابع إلى الخطوة التالية.

2 اضغط على **▲** أو **▼** للوصول إلى أدوات مساعدة.

اضغط على **OK** للتحديد.

3 اضغط على **▲** أو **▼** للوصول إلى إعدادات

الراديو. اضغط على **OK** للتحديد.

4 اضغط على **▲** أو **▼** للوصول إلى GNSS. اضغط على **OK** للتحديد.

5 اضغط على **OK** لتمكين GNSS أو تعطيله.

عند تمكينها، تظهر علامة **✓** بجوار ممكن. في حالة التعطيل، تختفي علامة **✓** من جانب ممكن.

### معلومات عامة عن الراديو

يحتوي الراديو على معلومات حول معلمات عامة متنوعة.

فيما يلي المعلومات العامة الخاصة بالراديو:

- الاسم المستعار والمعرف الخاص بالراديو.
- إصدار البرنامج الثابت وإصدار Codeplug.
- تحديث البرنامج.
- معلومات GNSS.
- معلومات الموقع.

إشعار:

اضغط على  للعودة إلى الشاشة السابقة. اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية. يخرج الراديو من الشاشة الحالية بمجرد انتهاء مؤقت عدم النشاط.

## التحقق من الاسم المستعار والمعرف الخاص بالراديو

اتبع الإجراء للتحقق من الاسم المستعار للراديو ومعرفه على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر الاسم المستعار للراديو ومعرفه المبرمج. قم بتخطي الخطوات التالية.  
تصدر نغمة مؤشر إيجابية.
- يمكنك الضغط على زر الاسم المستعار للراديو ومعرفه المبرمج للعودة إلى الشاشة السابقة.

• اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى هويتي. اضغط على  للتحديد.

يعرض سطر النص الأول الاسم المستعار للراديو. يعرض سطر النص الثاني معرف الراديو.

## التحقق من إصدارات البرنامج الثابت وCodeplug

اتبع الإجراء للتحقق من البرنامج الثابت وإصدارات Codeplug على الراديو الخاص بك.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديث برنامج. اضغط على  للتحديد. تعرض الشاشة تاريخ ووقت آخر تحديث للبرامج.

لا تكون القائمة تحديث البرنامج متاحة إلا بعد إجراء جلسة برمجة عبر الأثير (OTAP) أو Wi-Fi واحدة ناجحة على الأقل. راجع البرمجة عبر الأثير في [صفحة 408](#) لمزيد من المعلومات.

## التحقق من معلومات GNSS

لعرض معلومات نظام GNSS على الراديو مثل قيم:

- خط العرض
- خط الطول
- الارتفاع
- الاتجاه
- السرعة
- التخفيف الأفقي للدقة (HDOP)

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إصدارات. اضغط على  للتحديد. تعرض الشاشة الإصدار الحالي للبرنامج الثابت وإصدار codeplug.

## التحقق من معلومات تحديث البرنامج

تعرض هذه الميزة تاريخ ووقت آخر تحديث للبرنامج تم عن طريق البرمجة عبر الأثير (OTAP) أو Wi-Fi. اتبع الإجراء للتحقق من معلومات تحديث البرنامج على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

- الأرقام الاصطناعية
- الإصدار

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط  
على  للتحديد.

4 اضغط على  أو  للوصول إلى معل = موقع. اضغط  
على  للتحديد.

تعرض الشاشة اسم الموقع الحالي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط  
على  للتحديد.

4 اضغط على  أو  للوصول إلى معلومات GNSS.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى العنصر المطلوب. اضغط  
على  للتحديد. تعرض الشاشة معلومات نظام GNSS المطلوبة.

## عرض معلومات الموقع

اتبع الإجراء لعرض اسم الموقع الحالي عندما يكون الراديو قيد التشغيل.

في حالة تمكين نغمة إذن بالكلام ، انتظر حتى تنتهي نغمة التنبيه القصيرة قبل التحدث.

## الأزرار القابلة للبرمجة

يستطيع الوكيل برمجة الأزرار القابلة للبرمجة كاختصارات إلى وظائف الراديو بناءً على مدة الضغط على الزر:

### اضغط لفترة قصيرة على

الضغط والتحرير سريعاً.

### اضغط مطولاً على

الضغط مع الاستمرار للمدة المبرمجة.

إشعار:

يمكن تطبيق المدة المبرمجة للضغط على أحد الأزرار على كل إعدادات أو وظائف الراديو/الأداة المساعدة القابلة للتخصيص. راجع [تشغيل الطوارئ في صفحة 237](#) للحصول على مزيد من المعلومات حول المدة المبرمجة لزر الطوارئ.

## وظائف الراديو القابلة للتعين

### تبديل صوت بلوتوث®

لتبديل التوجيه الصوتي بين سماعة الراديو الداخلية والملحق الخارجي الذي يدعم البلوتوث.

### اتصال بلوتوث

بدء عملية بحث واتصال بلوتوث.

## عمليات Connect Plus

إن Connect Plus عبارة عن حل الترنك الكامل القائم على تكنولوجيا DMR. يستخدم Connect Plus قناة تحكم مخصصة لطبقات القناة ومخصصاتها. تتوفر المميزات المتاحة لمستخدمي الراديو وفقاً لهذا النظام في هذا الفصل.

## عناصر تحكم إضافية في الراديو في وضع Connect Plus

يشرح هذا الفصل عناصر التحكم الإضافية المتاحة في الراديو لمستخدم الراديو من خلال طرق مبرمجة مسبقاً مثل الأزرار القابلة للبرمجة أو وظائف الراديو القابلة للتعين.

## الزر اضغط للتحدث (PTT)

يقوم الزر PTT الموجود على جانب الراديو بغرضين أساسيين:

- أثناء إجراء مكالمة، يتيح زر PTT للراديو إرسال إلى أجهزة الراديو الأخرى في المكالمة.
- الضغط مع الاستمرار على الزر PTT للتحدث. حرر زر PTT للاستماع.
- يتم تنشيط الميكروفون عند الضغط على زر PTT.
- عند عدم وجود مكالمة جارية، يُستخدم زر PTT لإجراء مكالمة جديدة (راجع إجراء مكالمة راديو في صفحة 207).

**قطع اتصال بلوتوث**

لإنهاء جميع اتصالات بلوتوث الموجودة بين الراديو والأجهزة الممكن بها تقنية بلوتوث.

**اكتشاف بلوتوث**

لتمكين الراديو من الدخول في وضع قابلية اكتشاف بلوتوث.

**إلغاء قائمة انتظار الانشغال**

للخروج من وضع الانشغال عند بدء مكالمات غير الطوارئ في قائمة انتظار الانشغال. لا يمكن إلغاء مكالمات الطوارئ بمجرد قبولها في قائمة انتظار الانشغال.

**سجل المكالمات**

تحديد قائمة سجل المكالمات.

**بيان القناة**

تشغيل الرسائل الصوتية لبيان المنطقة والقناة الخاصة بالقناة الحالية.

**التأريض**

توفير الوصول المباشر إلى قائمة جهات الاتصال.

**تشغيل/إيقاف الطوارئ**

بدء أو إلغاء طوارئ وفقاً للبرمجة.

**أبواق/أضواء**

للتبديل بين تشغيل الأبواق والأضواء أو إيقافها.

**موقع داخلي**

للتبديل بين تشغيل الموقع الداخلي أو إيقاف تشغيله.

**صوت ذكي**

للتبديل بين تشغيل الصوت الذكي أو إيقاف تشغيله.

**اتصال يدوي**

لبدء مكالمات خاصة أو مكالمات هاتفية من خلال إدخال أي مُعرّف مشترك أو رقم هاتف، وذلك حسب البرمجة.

**الوصول بلمسة واحدة**

للبدء مباشرة في مكالمات خاصة محددة مسبقاً أو تنبيه مكالمات محدد مسبقاً أو رسالة نصية سريعة محددة مسبقاً، أو إرجاع الشاشة الرئيسية.

**السرية**

للتبديل بين تشغيل السرية أو إيقاف تشغيلها.

**التحقق من الراديو**

تحديد ما إذا كان الراديو نشطاً في أحد الأنظمة.

**تمكين الراديو**

السماح بتمكين الراديو المستهدف عن بُعد.

**تعطيل الراديو**

السماح بتعطيل الراديو المستهدف عن بُعد.

**مراقب عن بُعد**

تشغيل ميكروفون الراديو المستهدف دون تقديم أي مؤشرات.

**إعادة تعيين قناة رئيسية**

لتعيين قناة رئيسية جديدة.

**نوع التنبيه**

لتوفير وصول مباشر إلى إعدادات نوع التنبيه.

**طلب تجوال**

لطلب البحث عن موقع مختلف.

**سطوع الإضاءة الخلفية**  
ضبط مستوى السطوع.

**القناة التالية/السابقة**  
للتغيير إلى القناة السابقة أو التالية بحسب البرمجة.

**وضع الشاشة**  
للتبديل بين تشغيل وضع الشاشة في النهار/الليل أو إيقافه.

**نظام الأقمار الصناعية للملاحة العالمية (GNSS)**  
للتبديل بين تشغيل نظام التنقل عبر الأقمار الاصطناعية أو إيقاف تشغيله.

**مستوى الطاقة**  
للتبديل مستوى طاقة الإرسال بين عالية ومنخفضة.

**غير معين**  
للاشارة إلى أن أنه لم يتم تعيين وظيفة الزر بعد.

## التعرف على مؤشرات الحالة في وضع Connect Plus

### الفحص

للتبديل بين تشغيل المسح و إيقاف تشغيله.

**كتم صوت رسالة تذكير القناة الرئيسية**  
لكتم صوت رسالة تذكير القناة الرئيسية.

**تشغيل/إيقاف قفل الموقع**  
عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

**الرسالة النصية**  
تحديد قائمة الرسائل النصية.

**تشغيل/إيقاف تشغيل بيان الصوت**  
التبديل بين تشغيل بيان الصوت أو إيقاف تشغيله.

**Wi-Fi**  
للتبديل بين تشغيل Wi-Fi أو إيقاف تشغيله.

**Zone**  
السماح بالتحديد من قائمة المناطق.

## الإعدادات أو وظائف الأدوات المساعدة القابلة للتعين

**كاتم تردد الصوت**  
التبديل بين تشغيل ميزة كاتم تردد الصوت أو إيقاف تشغيلها.

**جميع النغمات/ التنبيهات**  
للتبديل بين تشغيل جميع النغمات والتنبيهات أو إيقاف تشغيلها.

## رموز الشاشة

فيما يلي الرموز التي تظهر على شاشة الراديو.

	<b>مؤشر قوة الإشارة المستلمة (RSSI)</b> يمثل عدد الأشرطة المعروضة قوة إشارة الراديو. يشير وجود أربعة أشرطة إلى أقوى إشارة. يظهر هذا الرمز عند الاستلام فقط.
	<b>Bluetooth غير متصل</b> ميزة Bluetooth ممكنة، لكن لا يوجد جهاز Bluetooth بعيد متصل.
	<b>بلوتوث متصل</b> ميزة بلوتوث ممكنة. يظل الرمز مضاءً عند اتصال جهاز بلوتوث بعيد.
	<b>بيانات كبيرة الحجم</b> يقوم الراديو باستلام بيانات كبيرة الحجم والقناة مشغولة.
	<b>ميزة الموقع الداخلي متوفرة 3</b> ميزة حالة الموقع الداخلي تعمل ومتوفرة.

الجدول يتبع...

	<b>ميزة الموقع الداخلي غير متوفرة 3</b> ميزة حالة الموقع الداخلي تعمل لكنها غير متوفرة لأن Bluetooth معطل أو أن Bluetooth قام بتعليق مسح الإشارات.
	<b>وضع كتم الصوت</b> وضع كتم الصوت منشط والسماعة الخارجية تم كتم صوتها.
	<b>إعلام</b> تحتوي قائمة الإعلانات على عناصر للمراجعة.
	<b>مستوى الطاقة</b> يتم تعيين الراديو على طاقة منخفضة أو يتم تعيينه على طاقة مرتفعة.
	<b>تعطيل النغمات</b> تم إيقاف تشغيل النغمات.
	<b>لوحة الخيارات</b> تم تمكين لوحة الاختيار.
	<b>إلغاء وظيفة لوحة الاختيار</b>

الجدول يتبع...

## رموز القائمة المتقدمة

تظهر الرموز التالية بجوار عناصر القائمة، والتي توفر إمكانية الاختيار بين خيارين أو تعمل كمؤشر على أن هناك قائمة فرعية توفر خيارين.

خانة الاختيار (فارغة)	
يشير إلى عدم تحديد الخيار.	
خانة الاختيار (محددة)	
يشير إلى تحديد الخيار.	
مربع أسود ثابت	
يشير إلى الخيار المحدد لعنصر القائمة مع قائمة فرعية.	

## رموز العناصر المرسله

تظهر الرموز التالية في الركن العلوي الأيمن من شاشة الراديو في مجلد العناصر المرسله.

أحمر وامض	يقوم الراديو بالإرسال في حالة انخفاض البطارية أو يتلقى إرسال طوارئ أو فشل في إجراء الاختبار الذاتي عند بدء التشغيل أو خرج عن النطاق في حال تهيئة الراديو بنظام الإرسال/الاستقبال تلقائي النطاق. تم تمكين وضع كتم الصوت.
أحمر وامض سريع	يشير إلى أن الراديو يقوم بتلقي نقل ملف عبر الأثير (ملف البرنامج الثابت للوحة الاختبار أو ملف تردد الشبكة أو ملف Codeplug للوحة الاختبار) أو يقوم بالترقية إلى ملف برنامج ثابت جديد للوحة الاختبار.
أخضر وأصفر وامض	يقوم الراديو بتلقي تنبيه مكالمات أو تلقى رسالة نصية أو تم تمكين المسح ويتلقى نشاطاً.
أصفر راسخ	الراديو في وضع قابلية اكتشاف Bluetooth.
أصفر وامض بطريقة ازدواجية	يبحث الراديو بشكل فعال عن موقع جديد.
أصفر وامض	يقوم الراديو بتلقي تنبيه مكالمات أو تم تمكين المسح وهو حامل (سيظل صوت الراديو مكتوماً لأي نشاط).
أخضر راسخ	يقوم الراديو ببدء التشغيل أو الإرسال.
أخضر وامض	يقوم الراديو ببدء التشغيل أو باستقبال مكالمات أو بيانات.
وامض سريع بطريقة مزدوجة	يقوم الراديو بتلقي مكالمات تدعم السرية.

## فشل الإرسال

لم يتم إرسال الرسالة النصية.

أو

## رموز أجهزة بلوتوث

تظهر أيضاً الرموز التالية بجوار العناصر الموجودة في قائمة الأجهزة التي تدعم بلوتوث، والتي تتوفر للإشارة إلى نوع الجهاز.

جهاز بيانات بلوتوث	
جهاز يدعم بلوتوث، كالماسحة الضوئية.	
جهاز صوت بلوتوث	
جهاز صوت يدعم بلوتوث، كسماعة الرأس.	
جهاز PTT بلوتوث	
جهاز PTT يدعم بلوتوث، كجهاز PTT فقط.	

## مؤشر LED

يوضح مؤشر LED الحالة التشغيلية للراديو.

## نغمات المؤشرات

فيما يلي النغمات التي تصدر عبر سماعة الراديو.

نغمة عالية  نغمة منخفضة

توفر لك نغمات المؤشرات إشارات صوتية تعبر عن الحالة بعد اتخاذ إجراء لأداء مهمة.

## التبديل بين وضعي Connect Plus وغير Connect Plus

للتبديل إلى وضع غير Connect Plus، يتعين عليك التغيير إلى منطقة أخرى، في حال برمجة ذلك من قبل الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لمعرفة ما إذا كان قد تمت برمجة الراديو الخاص بك بمناطق غير Connect Plus، ولمعرفة الميزات المتوفرة أثناء التشغيل في مناطق غير Connect Plus.

## إجراء المكالمات وتلقيها في وضع Connect Plus

تشرح هذه المادة عمليات الراديو العامة وميزات الاتصال المتوفرة في الراديو الخاص بك.

نغمة متكررة

نغمة فردية تعيد نفسها حتى يتم إنهاؤها بواسطة المستخدم.

نغمة مؤقتة

تصدر مرة واحدة فقط لمدة قصيرة يتم تحديدها بواسطة الراديو.

نغمة مؤشر إيجابية

نغمة مؤشر سلبية

## نغمات التنبيه

توفر نغمات التنبيه إشارات صوتية عن حالة الراديو أو استجابة الراديو للبيانات التي يستلمها.

نغمة مستمرة

صوت أحادي النغمة. تصدر بشكل مستمر حتى الإنهاء.

نغمة دورية

تصدر بشكل دوري بناءً على المدة التي تم تعيينها بواسطة الراديو. تبدأ النغمة، وتتوقف، وتعيد نفسها.

الجدول يتبع...

## تحديد موقع

يوفر الموقع تغطية لمنطقة معينة. يحتوي موقع Connect Plus على وحدة تحكم في الموقع و 15 معيد تقوية بحد أقصى. في شبكة متعددة المواقع، سيبحث راديو Connect Plus تلقائيًا عن موقع جديد عندما ينخفض مستوى الإشارة من الموقع الحالي إلى مستوى غير مقبول.

## طلب تجوال

يعمل طلب التجوال على إخبار الراديو بالبحث عن موقع مختلف، حتى إذا كانت الإشارة من الموقع الحالي مقبولة.

إذا لم تكن هناك مواقع متوفرة:

- ستعرض شاشة الراديو جاري البحث والاسم المستعار المحدد للقناة ويتابع البحث عبر قائمة المواقع.
- سيعود الراديو إلى الموقع السابق، إذا كان الموقع السابق ما زال متوفرًا.

إشعار:

تتم برمجة هذه الميزة من قبل الوكيل.

اضغط على زر **طلب التجوال** المبرمج.

ستسمع نغمة، تشير إلى أن الراديو قام بالتبديل إلى موقع جديد. وستعرض الشاشة معرف الموقع «رقم الموقع».

## تشغيل/إيقاف قفل الموقع

عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

اضغط على الزر المبرمج **قفل الموقع**.

إذا تم تشغيل وظيفة **قفل الموقع**:

- ستسمع نغمة مؤشر إيجابية، تشير إلى قفل الراديو للموقع الحالي.
- ستعرض الشاشة تم قفل الموقع.

إذا تم إيقاف تشغيل وظيفة **قفل الموقع**:

- ستسمع نغمة مؤشر سلبية للإشارة إلى فتح قفل الراديو.
- وتعرض الشاشة تم فتح قفل الموقع.

## تقييد الموقع

يمكن لمسؤول نظام الراديو Connect Plus تحديد مواقع الشبكة المسموح/غير المسموح للراديو باستخدامها. ولن يتعين إعادة برمجة الراديو لتغيير قائمة المواقع المسموح بها وغير المسموح بها. إذا حاول الراديو التسجيل في موقع غير مسموح به، فسترى رسالة قصيرة تقول: لا يسمح بالموقع «رقم محدد». ويبحث الراديو بعد ذلك عن موقع شبكة مختلف.

## تحديد منطقة

يمكن برمجة الراديو بـ 16 منطقة من مناطق Connect Plus كحد أقصى، وتحتوي كل منطقة Connect Plus على 16 موضعًا قابلًا للتعيين كحد أقصى على قرص محدد القناة.

يمكن استخدام كل موضع قابل للتعيين على القرص لبدء نوع من أنواع المكالمات الصوتية التالية:

- المكالمات الجماعية
- مكالمات مجموعات متعددة
- مكالمات شاملة للموقع
- اتصال خاص

1 يمكنك الوصول إلى ميزة المنطقة عبر الإجراء التالي:

عناصر التحكم في الراديو	الخطوات
زر تحديد المنطقة المبرمج	اضغط على زر ت. منطقة المبرمج.
قائمة الراديو	a اضغط على  للوصول إلى القائمة.

عناصر التحكم في الراديو  
الخطوات

b اضغط على  أو  للوصول

إلى المنطقة واضغط على  للتحديد.

يتم عرض المنطقة الحالية والإشارة إليها بواسطة .

## 2 حدد المنطقة المطلوبة.

عناصر التحكم في الراديو  
الخطوات

 أو  اضغط على  أو  وقم بالتمرير إلى المنطقة المطلوبة.

3 اضغط على  للتحديد.

تعرض الشاشة تم تحديد < المنطقة > مؤقتًا وتعود إلى شاشة المنطقة المحددة.

## استخدام الشبكات المتعددة

إذا كان الراديو مبرمجاً لاستخدام شبكات Connect Plus متعددة، فيمكنك تحديد شبكة مختلفة عن طريق التبديل إلى منطقة Connect Plus التي تم تعيينها للشبكة المطلوبة. ويتم تكوين عمليات تعيين الشبكة إلى المنطقة هذه بواسطة الوكيل من خلال برمجة الراديو.

## تحديد نوع مكالمة

استخدم قرص محدد القناة لتحديد نوع مكالمة. يمكن أن تكون مكالمة جماعية أو مكالمة مجموعات متعددة أو مكالمة شاملة للموقع أو مكالمة خاصة، بناءً على طريقة برمجة الراديو الخاص بك. إذا قمت بتغيير قرص محدد القناة إلى موضع مختلف (معين له نوع مكالمة)، فقد يؤدي هذا إلى إعادة تسجيل الراديو في موقع Connect Plus. يقوم الراديو بالتسجيل باستخدام معرف مجموعة التسجيل الذي تمت برمجته لموضع قرص محدد القناة لنوع المكالمة الجديد.

إذا قمت بتحديد موضع لم يتم تعيين نوع مكالمة له، فسيُصدر الراديو نغمة مستمرة وتعرض الشاشة غير مبرمج. لا يعمل الراديو عند تحديده على قناة غير مبرمجة، لذلك استخدم قرص محدد القناة لتحديد قناة مبرمجة.

بمجرد عرض المنطقة المطلوبة (في حالة وجود مناطق متعددة في الراديو)، قم بإدارة قرص محدد القناة المبرمج لتحديد نوع المكالمة.

## تلقي مكالمة راديو والرد عليها

بمجرد عرض القناة أو معرف المشترك أو نوع المكالمة، يمكنك المتابعة لاستقبال المكالمات والرد عليها. يضيء مؤشر LED بلون أخضر ثابت عند قيام الراديو بالإرسال ويومض بلون أخضر عند قيام الراديو بالتلقي.

إشعار:

يضيء مؤشر LED بلون أخضر ثابت عند قيام الراديو بالإرسال ويومض مرتين باللون الأخضر عند استقبال الراديو لمكالمة تدعم السرية. لفك تشفير مكالمة تدعم السرية، يجب أن يكون للراديو الخاص بك نفس مفتاح السرية، أو نفس قيمة المفتاح ومعرف المفتاح (تتم برمجته من قبل الوكيل) الخاص بالراديو المرسل (الراديو الذي تتلقى المكالمة منه). راجع السرية في صفحة 253 لمزيد من المعلومات.

## تلقي مكالمة جماعية والرد عليها

لتلقي مكالمة من مجموعة مستخدمين، يجب تكوين الراديو كجزء من هذه المجموعة. عندما تتلقى مكالمة جماعية (أثناء وجودك في الشاشة الرئيسية)، يومض مؤشر LED باللون الأخضر. يظهر رمز مكالمة جماعية في الركن العلوي الأيسر. يعرض سطر النص الأول الاسم المستعار للمتصل. يعرض سطر النص الثاني الاسم

السطر الثاني مكالمة خاصة ورمز المكالمة الخاصة. يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع الخارجية للراديو.

المستعار للمكالمة الجماعية. يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع الخارجية للراديو.

1 احمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

1 احمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

2 اضغط على زر **PTT** للرد على المكالمة.  
يضىء مؤشر LED باللون الأخضر الثابت.

يضىء مؤشر LED باللون الأخضر الثابت.

3 انتظر حتى تنتهي نغمة إذن بالكلام (عند تمكينها) وتحدث بوضوح في الميكروفون.

2 انتظر حتى تنتهي إحدى نغمات إذن بالكلام (عند تمكينها) وتحدث بوضوح في الميكروفون.

4 حرر زر **PTT** للاستماع.

3 حرر زر **PTT** للاستماع.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، سننتهي المكالمة.

إشعار:

راجع إجراء مكالمة جماعية في صفحة 208 للحصول على تفاصيل حول إجراء مكالمة جماعية.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، سننتهي المكالمة. وتعرض الشاشة انتهت المكالمة.  
راجع إجراء مكالمة خاصة في صفحة 208 للحصول على تفاصيل حول إجراء "مكالمة خاصة".

## تلقي مكالمة خاصة والرد عليها

المكالمة الخاصة هي مكالمة من راديو فردي إلى راديو فردي آخر.

عند تلقي مكالمة خاصة، يومض مؤشر LED باللون الأخضر. يعرض السطر الأول من الشاشة الاسم المستعار أو المعرف الخاص بالمشارك ورمز **RSSI**. يعرض

## تلقي مكالمة شاملة للموقع

المكالمة الشاملة للموقع هي مكالمة من راديو فردي إلى جميع أجهزة الراديو في الموقع. يتم استخدامها للبيانات الهامة التي تتطلب الانتباه الكامل من المستخدم.

عند تلقي مكالمة شاملة للموقع، تصدر نغمة ويومض مؤشر LED باللون الأخضر.

ويظهر رمز المكالمة الجماعية في الركن العلوي الأيسر. يعرض سطر النص الأول الاسم المستعار للمتصل. يعرض سطر النص الثاني كل مكالمات الموقع. يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماعة الخارجية للراديو.

بمجرد انتهاء المكالمة الشاملة للموقع، يعود الراديو إلى الشاشة السابقة قبل تلقي المكالمة. لا تنتظر المكالمة الشاملة للموقع فترة زمنية محددة مسبقاً قبل الانتهاء.

لا يمكنك الرد على كل مكالمات الموقع.

إشعار:

راجع إجراء مكالمة شاملة للموقع في صفحة 209 للحصول على تفاصيل حول إجراء مكالمة شاملة للموقع.

يتوقف الراديو عن تلقي المكالمة الشاملة للموقع في حالة التبديل لقناة مختلفة أثناء تلقي المكالمة. أثناء كل مكالمات الموقع، لن تتمكن من استخدام أي من وظائف الأزرار المبرمجة حتى تنتهي المكالمة.

## تلقي مكالمة هاتفية خاصة واردة

عند تلقي مكالمة هاتفية خاصة واردة، يظهر رمز مكالمة هاتفية كمكالمة خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول اتصال هاتفي.

1 اضغط مع الاستمرار على زر PTT للرد والتحدث. حرر زر PTT للاستماع.

2

اضغط لفترة طويلة على  لإنهاء المكالمة.

يعرض السطر الأول من الشاشة يتم الآن إنهاء المكالمة. يعرض السطر الثاني من الشاشة إنهاء مكالمة... تعود الشاشة إلى شاشة اتصال هاتفي. تعرض الشاشة تم إنهاء المكالمة.

## إجراء أرقام إضافية مخزنة في مكالمة هاتفية واردة خاصة

أثناء المكالمة، يظهر رمز مكالمة هاتفية كمكالمة خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة اتصال هاتفي.

1

استخدم لوحة المفاتيح لإدخال الأرقام واضغط على الزر .

اضغط على  يتبعه  خلال ثانيتين للتوقف مؤقتًا. تحل P محل \* و# على الشاشة.

يظهر رمز مكالمة هاتفية كمكالمة خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة الأرقام التي تم إدخالها.

## تلقي مكالمة مجموعة تحدث هاتفية واردة

عند تلقي مكالمة مجموعة تحدث هاتفية واردة، يظهر رمز مكالمة جماعية في الركن العلوي الأيمن. يعرض سطر النص الأول المكالمة 1.

اضغط على زر **PTT** للتحدث وقم بتحريره للاستماع.

## مكالمات مجموعات متعددة هاتفية واردة

عند تلقي مكالمات مجموعات متعددة هاتفية واردة، يظهر رمز مكالمات جماعية في الركن العلوي الأيسر. يعرض سطر النص الأول Multigroup Call (مكالمات مجموعات متعددة). يتم إلغاء كتم صوت الراديو ويصدر صوت مكالمات المجموعات المتعددة الواردة من خلال السماعة الخارجية للراديو.

## إجراء مكالمات راديو

بعد تحديد القناة الخاصة بك، يمكنك تحديد الاسم المستعار أو المعرف الخاص بالمشارك أو الاسم المستعار أو المعرف الخاص بالمجموعة باستخدام:

- قرص محدد القناة.
- زر **الوصول بلمسة واحدة** المبرمج – تتيح لك ميزة الوصول بلمسة واحدة إجراء مكالمات خاصة لمعرف محدد مسبقاً بسهولة. يمكن تعيين هذه الميزة إلى الضغط لفترة قصيرة أو طويلة على زر قابل للبرمجة. يمكن تخصيص معرف واحد فقط لزر **الوصول بلمسة واحدة**. يمكن أن يحتوي الراديو على العديد من أزرار **الوصول بلمسة واحدة** المبرمجة.
- قائمة جهات الاتصال (راجع إعدادات جهات الاتصال في صفحة 226).

2

اضغط لفترة طويلة على **(5)** لإنهاء المكالمات.

يعرض السطر الأول من الشاشة يتم الآن إنهاء المكالمات. يعرض السطر الثاني من الشاشة إنهاء مكالمات... تعود الشاشة إلى شاشة اتصال هاتفي.

تعرض الشاشة تم إنهاء المكالمات.

## إجراء أرقام إضافية مباشرة في مكالمات هاتفية واردة خاصة

أثناء المكالمات، يظهر رمز مكالمات هاتفية كمكالمات خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة اتصال هاتفي.

1

اضغط على زر **PTT** واستخدم لوحة المفاتيح لإدخال الأرقام.

يظهر رمز مكالمات هاتفية كمكالمات خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة أرقام المكالمات المباشرة.

2

اضغط لفترة طويلة على **(5)** لإنهاء المكالمات.

يعرض السطر الأول من الشاشة يتم الآن إنهاء المكالمات. يعرض السطر الثاني من الشاشة إنهاء مكالمات... تعود الشاشة إلى شاشة اتصال هاتفي.

تعرض الشاشة تم إنهاء المكالمات.

## إشعار:

يجب تمكين ميزة السرية في الراديو على القناة لإرسال عملية إرسال تدعم السرية. لن تتمكن سوى أجهزة الراديو المستهدفة التي لها قيمة مفتاح ومعرف مفتاح مماثلان للراديو الخاص بك من إلغاء تشفير الإرسال. راجع السرية في صفحة 253 لمزيد من المعلومات.

## إجراء مكالمة باستخدام قرص محدد القناة

تسمح هذه الميزة لمستخدمي الراديو بإجراء أنواع مختلفة من المكالمات: مكالمة جماعية أو مكالمة خاصة أو مكالمة جماعية للموقع أو مكالمة مجموعات متعددة.

## إجراء مكالمة جماعية

لإجراء مكالمة إلى مجموعة مستخدمين، يجب تكوين الراديو كجزء من هذه المجموعة.

1 حدد القناة باستخدام الاسم المستعار أو المعرف الخاص بالمجموعة النشطة. راجع تحديد نوع مكالمة في صفحة 204.

2 احمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

## إجراء مكالمة خاصة

بينما يمكنك تلقي و/أو الرد على مكالمة خاصة بدأت بواسطة راديو فردي مرخص، يجب برمجة الراديو الخاص بك لبدء مكالمة خاصة.

ستسمع نغمة مؤشر سلبية، عند إجراء مكالمة خاصة باستخدام زر الوصول بلمسة واحدة أو قرص محدد القناة في حالة عدم تمكين هذه الميزة.

## 3 اضغط على زر PTT لإجراء المكالمة.

يضيء مؤشر LED باللون الأخضر الثابت. يظهر رمز مكالمة جماعية في الركن العلوي الأيسر. يعرض سطر النص الأول الاسم المستعار للمكالمة الجماعية.

4 انتظر حتى تنتهي نغمة إنذار بالكلام (عند تمكينها) وتحديث بوضوح في الميكروفون.

## 5 حرر زر PTT للاستماع.

عندما يرد جهاز الراديو المستهدف، سيومض مؤشر LED باللون الأخضر، وسيتم إلغاء كتم صوت جهاز الراديو ويصدر صوت الرد من خلال السماعة الخارجية لجهاز الراديو. يظهر رمز المكالمة الجماعية والاسم المستعار أو المعرف الخاص بالمجموعة، والاسم المستعار أو المعرف الخاص بالراديو المرسل على الشاشة.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقاً، ستنتهي المكالمة. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

قد يكون الراديو مبرمجًا لإجراء فحص وجود الراديو قبل إعداد المكالمات الخاصة. إذا لم يكن الراديو المستهدف متاحًا، فستسمع نغمة قصيرة وت ترى إشعاعًا سلبياً صغيرًا على الشاشة.

## إجراء مكالمات شاملة للموقع

تتيح لك هذه الميزة الإرسال إلى جميع المستخدمين على الموقع غير المشغولين حاليًا في مكالمات أخرى. يجب برمجة الراديو للسماح لك باستخدام هذه الميزة.

لا يمكن للمستخدمين الموجودين على القناة/الموقع الرد على مكالمات شاملة للموقع.

1 حدد القناة باستخدام الاسم المستعار لمجموعة المكالمات الشاملة النشطة للموقع. راجع تحديد نوع مكالمات في صفحة 204.

2 حمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

3 اضغط على زر **PTT** لإجراء المكالمات.

يضيء مؤشر LED باللون الأخضر الثابت. يظهر رمز مكالمات جماعية في الركن العلوي الأيسر. يعرض سطر النص الأول Site All Call (مكالمة شاملة للموقع).

4 انتظر حتى تنتهي نغمة إذن بالكلام (عند تمكينها) وتحدث بوضوح في الميكروفون.

1 قم بأحد الإجراءات التالية.

- حدد القناة باستخدام الاسم المستعار أو المعرف الخاص بالمشارك النشط. راجع تحديد نوع مكالمات في صفحة 204.
- اضغط على زر الوصول بللمسة واحدة المبرمج.

2 حمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

3 اضغط على زر **PTT** لإجراء المكالمات.

يضيء مؤشر LED باللون الأخضر الثابت. يظهر رمز المكالمات الخاصة في الركن العلوي الأيمن. يعرض سطر النص الأول الاسم المستعار للمشارك المستهدف. يعرض سطر النص الثاني حالة المكالمات.

4 انتظر حتى تنتهي نغمة إذن بالكلام (عند تمكينها) وتحدث بوضوح في الميكروفون.

5 حرر زر **PTT** للاستماع.

عندما يرد جهاز الراديو المستهدف، سيومض مؤشر LED باللون الأخضر.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، ستنتهي المكالمات. تسمع نغمة قصيرة. وتعرض الشاشة انتهت المكالمات.

## إجراء مكالمة مجموعة متعددة

تتيح لك هذه الميزة الإرسال إلى جميع المستخدمين في مجموعات متعددة. يجب برمجة الراديو للسماح لك باستخدام هذه الميزة.

إشعار:

لا يمكن للمستخدمين في المجموعات الرد على مكالمة مجموعة متعددة.

1 أدر قرص محدد القناة لتحديد الاسم المستعار أو المعرف الخاص بالمجموعة المتعددة.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED باللون الأخضر الثابت. تعرض الشاشة الاسم المستعار أو المعرف الخاص بالمجموعة المتعددة.

انتظر حتى تنتهي نغمة إذن بالكلام (في حالة تمكينها) وتحدث بوضوح في الميكروفون.

## إجراء مكالمة خاصة باستخدام الزر مكالمة بلمسة واحدة

إشعار:

يجب بدء الضغط على الأزرار القابلة للبرمجة من الشاشة الرئيسية.

تتيح لك الميزة مكالمة بلمسة واحدة إجراء مكالمة خاصة بسهولة إلى اسم مستعار أو معرف خاص بمكالمة خاصة محدد مسبقًا. يمكن تعيين هذه الميزة إلى الضغط لفترة قصيرة أو طويلة على زر قابل للبرمجة.

يمكنك تعيين اسم مستعار أو معرف واحد فقط إلى زر مكالمة بلمسة واحدة. يمكن أن يحتوي الراديو على العديد من الأزرار المبرمجة لميزة مكالمة بلمسة واحدة.

1 اضغط على زر **مكالمة بلمسة واحدة** المبرمج لإجراء مكالمة خاصة إلى الاسم المستعار أو المعرف الخاص بالمكالمة الخاصة المحدد مسبقًا.

2 احمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

3 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED باللون الأخضر الثابت.

ستعرض الشاشة الاسم المستعار أو المعرف الخاص بالمكالمة الخاصة.

4 انتظر حتى تنتهي نغمة إذن بالكلام (في حالة تمكينها) وتحدث بوضوح في الميكروفون.

5 حرر زر **PTT** للاستماع.

عند رد الراديو المستهدف، يومض مؤشر LED باللون الأخضر.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، ستنتهي المكالمة.

عند رد الراديو المستهدف، يومض مؤشر LED باللون الأخضر.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، ستنتهي المكالمة. تسمع نغمة قصيرة. وتعرض الشاشة انتهت المكالمة.

## إجراء مكالمة هاتفية صادرة خاصة باستخدام زر الاتصال اليدوي القابل للبرمجة

1 اضغط على الزر اتصال يدوي المبرمج لدخول شاشة الاتصال اليدوي. تعرض الشاشة الرقم:.

2 استخدم لوحة المفاتيح لإدخال رقم هاتف واضغط على  لإجراء مكالمة إلى الرقم الذي تم إدخاله.

اضغط على  لحذف أي أحرف غير مرغوب فيها. اضغط على  يتبعه  خلال ثانيتين للتوقف مؤقتًا. تحل F محل \* و # على الشاشة.

إذا تم بنجاح، سيعرض السطر الأول من الشاشة اتصال هاتفية. يعرض السطر الثاني من الشاشة رقم الهاتف الذي تم الاتصال به.

في حال تحديد رقم هاتف غير صالح، تعرض الشاشة إشعارًا سلبيًا صغيرًا، فشلت المكالمة الهاتفية أو المورد غير متوفر أو Invalid Permissions (أذونات غير صالحة).

## إجراء مكالمة باستخدام زر الاتصال اليدوي القابل للبرمجة

تسمح هذه الميزة لمستخدمي الراديو بإجراء مكالمات خاصة باستخدام زر الاتصال اليدوي القابل للبرمجة.

### إجراء مكالمة خاصة

1 اضغط على الزر اتصال يدوي المبرمج لدخول شاشة الاتصال اليدوي. تعرض الشاشة الرقم:.

2 استخدم لوحة المفاتيح لإدخال اسم مستعار أو معرف خاص بالمستخدم.

3 حمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

4 اضغط على زر PTT لإجراء المكالمة.

يضيء مؤشر LED باللون الأخضر الثابت. يظهر رمز المكالمة الخاصة في الركن العلوي الأيمن. يعرض سطر النص الأول الاسم المستعار للمستخدم. يعرض سطر النص الثاني حالة المكالمة.

5 انتظر حتى تنتهي نغمة إذن بالكلام (في حالة تمكينها) وتحدث بوضوح في الميكروفون.

6 حرر زر PTT للاستماع.

في حالة الضغط على  من دون إدخال رقم هاتف، يصدر الراديو نغمة مؤشر إيجابية ثم نغمة مؤشر سلبية. تبقى الشاشة على حالها.

4 استخدم لوحة المفاتيح لإدخال رقم هاتف واضغط على  لإجراء مكالمة إلى الرقم الذي تم إدخاله.

3 اضغط لفترة طويلة على  لإنهاء المكالمة.

يعرض السطر الأول من الشاشة يتم الآن إنهاء المكالمة.  
يعرض السطر الثاني من الشاشة إنهاء مكالمة...  
تعرض الشاشة تم إنهاء المكالمة.

اضغط على  لحذف أي أحرف غير مرغوب فيها. اضغط على  يتبعه  خلال ثانيتين للتوقف مؤقتًا. تحل F محل \* و# على الشاشة.

إذا تم بنجاح، فسيعرض السطر الأول من الشاشة اتصال هاتفي.  
يعرض السطر الثاني من الشاشة رقم الهاتف الذي تم الاتصال به.  
في حال تحديد رقم هاتف غير صالح، تعرض الشاشة إشعارًا سلبيًا صغيرًا، فشلت المكالمة الهاتفية أو المورد غير متوفر أو أذونات غير صالحة.

## إجراء مكالمة هاتفية صادرة خاصة عبر قائمة الهاتف

1 اضغط على  للوصول إلى القائمة.

في حالة الضغط على  من دون إدخال رقم هاتف، يصدر الراديو نغمة مؤشر إيجابية ثم نغمة مؤشر سلبية. تبقى الشاشة على حالها.

2 اضغط على  أو  للوصول إلى الهاتف واضغط على  للتحديد.

5 اضغط لفترة طويلة على  لإنهاء المكالمة.

يعرض السطر الأول من الشاشة يتم الآن إنهاء مكالمة.  
يعرض السطر الثاني من الشاشة اتصال هاتفي...  
تعرض الشاشة تم إنهاء المكالمة.

3 اضغط على  لتحديد اتصال يدوي.

يعرض السطر الأول من الشاشة الرقم، ويعرض السطر الثاني من الشاشة مؤشرًا وامضًا.

## إجراء مكالمة هاتفية صادرة خاصة من جهات الاتصال

إشعار:

في حال كان الاتصال الهاتفي اليدوي معطلاً في MOTOTRBO Connect Plus لوحة خيارات CPS، لن يتم عرض رقم الهاتف في القائمة.

5 استخدم لوحة المفاتيح لإدخال رقم هاتف واضغط على **OK** لإجراء مكالمة إلى الرقم الذي تم إدخاله.

في حالة الضغط على زر **PTT**، تعرض الشاشة إشعارًا سلبياً صغيراً، اضغط على موافق لإرسال وتعود إلى الشاشة السابقة.

اضغط على **◀** لحذف أي أحرف غير مرغوب فيها. اضغط على **\*>** يتبعه **#** خلال ثانيتين للتوقف مؤقتًا. تحل **F** محل **\*** و **#** على الشاشة.

إذا تم بنجاح، فسيعرض السطر الأول من الشاشة اتصال هاتفي. يعرض السطر الثاني من الشاشة رقم الهاتف الذي تم الاتصال به.

في حالة الضغط على **OK** من دون إدخال رقم هاتف، يصدر الراديو نغمة مؤشر إيجابية ثم نغمة مؤشر سلبية. تبقى الشاشة على حالها.

6 اضغط لفترة طويلة على **⏏** لإنهاء المكالمة.

يعرض السطر الأول من الشاشة يتم الآن إنهاء مكالمة. يعرض السطر الثاني من الشاشة اتصال هاتفي... .

تعرض الشاشة تم إنهاء المكالمة.

1 اضغط على **OK** للوصول إلى القائمة.

2 اضغط على **▲** أو **▼** للوصول إلى جهات الاتصال واضغط على **OK** للتحديد.

3 اضغط على **▲** أو **▼** للوصول إلى اتصال يدوي واضغط على **OK** للتحديد.

4 اضغط على **▲** أو **▼** للوصول إلى رقم الهاتف واضغط على **OK** للتحديد.

يعرض السطر الأول من الشاشة الرقم، ويعرض السطر الثاني من الشاشة مؤشرًا وامضًا.

## انتظار كسب القناة في مكالمة هاتفية صادرة خاصة

عند إجراء مكالمة هاتفية خاصة، يعرض السطر الأول من الشاشة اتصال هاتفي. يعرض السطر الثاني من الشاشة رقم الهاتف الذي تم الاتصال به. أثناء الاتصال يظهر رمز مكالمة هاتفية كمكالمة خاصة في الركن العلوي الأيمن. يعرض السطر الأول من الشاشة رقم الهاتف.

إذا لم يتم بنجاح، ستعرض الشاشة إشعارًا سلبياً صغيراً، فشلت المكالمة الهاتفية أو المورد غير متوفر أو Invalid Permissions (أذونات غير صالحة).

اضغط لفترة طويلة على  لإنهاء المكالمة.

تعود الشاشة إلى الشاشة السابقة.

## إجراء أرقام إضافية مخزنة في مكالمة هاتفية صادرة خاصة متصلة

أثناء المكالمة، يظهر رمز مكالمة هاتفية كمكالمة خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة رقم الهاتف.

1 استخدم لوحة المفاتيح لإدخال الأرقام.

اضغط على  لحذف أي أحرف غير مرغوب فيها. اضغط على .

يتبعه  خلال ثانيتين للتوقف مؤقتًا. تحل F محل \* و ## على الشاشة.

يعرض سطر النص الأول من الشاشة أرقام إضافية، ويعرض سطر النص الثاني من الشاشة الأرقام الإضافية التي تم إدخالها.

2

اضغط على الزر .

في حالة الضغط على زر **PTT** تعرض الشاشة إشعارًا سلبياً صغيراً، اضغط على موافق لإرسال وتعود إلى الشاشة السابقة.

يظهر رمز مكالمة هاتفية كمكالمة خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة رقم الهاتف مع إلحاق الأرقام الإضافية.

3

قم بأحد الإجراءات التالية.

• اضغط على  للعودة إلى شاشة اتصال هاتفي.

• اضغط لفترة طويلة على  لإنهاء المكالمة.

## رسالة تذكير القناة الرئيسية

توفر هذه الميزة رسالة تذكير في حالة عدم تعيين الراديو على القناة الرئيسية لفترة زمنية.

إذا تم تمكين هذه الميزة باستخدام CPS، فسيتم إصدار صوت نغمة رسالة تذكير القناة الرئيسية وصوت الإعلان، ويعرض السطر الأول من الشاشة قناة ويعرض السطر الثاني من الشاشة غير رئيسية بصفة دورية في حالة عدم تعيين الراديو على القناة الرئيسية لفترة زمنية.

يمكنك الاستجابة لرسالة التذكير عن طريق تنفيذ أحد الإجراءات التالية:

- الرجوع إلى القناة الرئيسية.
- كتم صوت رسالة التذكير بصفة مؤقتة باستخدام الزر القابل للبرمجة.
- تعيين قناة رئيسية جديدة باستخدام الزر القابل للبرمجة.

## Fallback تلقائي

وضع Fallback التلقائي هو إحدى ميزات النظام التي تتيح لك الاستمرار في إجراء مكالمات غير مكالمات الطوارئ وتلقبها على جهة اتصال المجموعة المحددة في حالة أنواع معينة من حالات فشل نظام Connect Plus.

في حال حدوث إحدى حالات الفشل هذه، سيحاول الراديو التجوال إلى موقع Connect Plus مختلف. قد تؤدي عملية البحث هذه إلى عثور الراديو على موقع Connect Plus قابل للتشغيل، أو قد يؤدي إلى عثور الراديو على "قناة Fallback" (في حال تمكين الراديو لتشغيل وضع Fallback تلقائي). وقناة Fallback هي معيد تقوية بشكل عادة جزءاً من موقع Connect Plus قابل للتشغيل، لكنه غير قادر حالياً على الاتصال بوحدة التحكم الخاصة بموقعه أو بشبكة

## إجراء أرقام إضافية مباشرة في مكالمات هاتفية صادرة خاصة متصلة

أثناء المكالمات، يظهر رمز مكالمات هاتفية كمكالمات خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة رقم الهاتف.

- 1 اضغط على زر PTT واستخدم لوحة المفاتيح لإدخال الأرقام. يظهر رمز مكالمات هاتفية كمكالمات خاصة في الركن العلوي الأيمن. يعرض سطر النص الأول من الشاشة رقم الهاتف مع الحاق الأرقام الإضافية.

- 2 اضغط لفترة طويلة على  لإنهاء المكالمات. يعرض السطر الأول من الشاشة يتم الآن إنهاء المكالمات. يعرض السطر الثاني من الشاشة إنهاء مكالمات... تعرض الشاشة تم إنهاء المكالمات.

## الميزات المتقدمة في وضع Connect Plus

يشرح هذا الفصل عمليات الميزات المتوفرة في الراديو.

## إجراء/تلقي مكالمات في وضع Fallback

إشعار:

لا يتم سماع المكالمات إلا بواسطة أجهزة الراديو التي تراقب نفس قناة Fallback والتي تم تحديدها لنفس المجموعة. ولا تصل المكالمات عبر الشبكة إلى المواقع الأخرى أو معيدات التغطية الأخرى. لا تتوفر مكالمات الطوارئ الصوتية أو تنبيهات الطوارئ في وضع Fallback. إذا قمت بالضغط على زر الطوارئ في وضع Fallback، فسيوفر الراديو نغمة ضغطة مفتاح غير صالحة. كما ستعرض أجهزة الراديو المزودة بشاشة الرسالة "الميزة غير متوفرة".

لا تتوفر المكالمات الخاصة (راديو إلى راديو) والمكالمات الهاتفية في وضع Fallback. إذا حاولت إجراء مكالمة لجهة اتصال خاصة، فستتلقى نغمة رفض. وفي هذه الحالة، يتعين عليك تحديد جهة اتصال المجموعة المطلوبة. تتضمن المكالمات الأخرى غير المعتمدة المراقب عن بُعد وتنبيه المكالمات وفحص الراديو وتمكين الراديو وتعطيل الراديو والرسائل النصية وتحديثات الموقع ومكالمات بيانات الحزمة.

الوصول المحسن لقناة حركة المرور (ETCA) غير معتمد في وضع Fallback تلقائي. إذا قام اثنان أو أكثر من مستخدمي الراديو بالضغط على PTT في الوقت نفسه (أو في الوقت نفسه تقريباً)، فيمكن أن يقوم كلا جهازي الراديو بالإرسال حتى يتم تحرير PTT. في هذه الحالة، قد لا تستوعب أجهزة الراديو المتلقية أيًا من عمليتي الإرسال.

يتم إجراء المكالمات في وضع Fallback بنفس طريقة العمل العادية. ما عليك سوى تحديد جهة اتصال المجموعة التي ترغب في استخدامها (باستخدام طريقة تحديد قناة الراديو العادية) ثم الضغط على PTT لبدء مكالمتك. ومن الممكن أن تكون القناة قيد الاستخدام بالفعل من قبل مجموعة أخرى. وإذا كانت القناة قيد

Connect Plus. في وضع Fallback، يعمل معيد التغطية كمعيد تغطية رقمي فردي. يدعم وضع Fallback التلقائي مكالمات المجموعة لغير الطوارئ فقط. ولا يتم دعم أي أنواع مكالمات أخرى في وضع Fallback.

## دلالات وضع Fallback تلقائي

عندما يستخدم الراديو الخاص بك قناة Fallback، ستسمع "نغمة Fallback" مقطوعة مرة واحدة تقريباً كل 15 ثانية (ما عدا أثناء الإرسال). تعرض الشاشة دورياً رسالة سريعة، "قناة Fallback". لا يسمح الراديو بالضغط للتحديث (PTT) إلا على جهة اتصال المجموعة المحددة (مكالمة جماعية أو مكالمة المجموعات المتعددة أو المكالمة الشاملة للموقع). ولا يسمح لك بإجراء أنواع أخرى من المكالمات.

## إرسال فحص راديو

1 قم بالوصول إلى ميزة فحص الراديو.

عناصر التحكم في الراديو	الخطوات
زر فحص الراديو المبرمج	a اضغط على زر فحص الراديو المبرمج.
المبرمج	b اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشارك واضغط على  للتحديد.
Menu (القائمة)	a اضغط على  للوصول إلى القائمة.
	b اضغط على  أو  للوصول إلى جهات الاتصال واضغط على  للتحديد.
	c اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشارك واضغط على  للتحديد.

الاستخدام، فستتلقى نغمة انشغال وستعرض الشاشة "قناة مشغولة". يمكنك تحديد جهات اتصال مكالمة جماعية أو مكالمة مجموعات متعددة أو مكالمة شاملة للموقع باستخدام طريقة تحديد قناة الراديو العادية. أثناء تشغيل الراديو على قناة Fallback، تعمل المجموعة المتعددة تمامًا مثل المجموعات الأخرى. ويمكن سماعها فقط بواسطة أجهزة الراديو التي تم تحديدها حاليًا لنفس المجموعة المتعددة.

## العودة إلى التشغيل العادي

إذا عاد الموقع إلى تشغيل الترنك العادي أثناء وجودك في نطاق معيد تقوية Fallback الخاص بك، فسيخرج الراديو تلقائيًا من وضع Fallback تلقائيًا. تسمع "إشارة صوتية" للتسجيل عند نجاح تسجيل الراديو. إذا كنت داخل نطاق موقع قابل للتشغيل (ليس في وضع Fallback)، فيمكنك الضغط على زر طلب التجوال المبرمج (إذا كان مبرمجًا للراديو) لإجبار الراديو على البحث عن موقع متوفر والتسجيل فيه. إذا لم يتوفر أي موقع آخر، فسيعود الراديو إلى وضع Fallback تلقائيًا بعد اكتمال البحث. إذا كنت تقود خارج نطاق تغطية معيد تقوية Fallback الخاص بك، فسيدخل الراديو الخاص بك في وضع البحث (وتعرض الشاشة جاري البحث).

## فحص الراديو

في حال تمكين هذه الميزة، فإنها تتيح لك تحديد ما إذا كان هناك راديو آخر نشط على النظام، دون إزعاج مستخدم هذا الراديو. لا تظهر أية إعلانات مسموعة أو مرئية على الراديو المستهدف.

تنطبق هذه الميزة على الأسماء المستعارة للمشاركين ومعرفاتهم فقط.

## مراقب عن بُعد

استخدم ميزة مراقب عن بُعد لتشغيل الميكروفون الخاص بالراديو المستهدف (معرف المشترك أو اسمه المستعار فقط). سيومض مؤشر LED الأخضر مرة واحدة على المشترك المستهدف. يمكنك استخدام هذه الميزة لمراقبة أي نشاط صوتي محيط بالراديو المستهدف عن بُعد.

يجب برمجة الراديو للسماح لك باستخدام هذه الميزة.

## بدء تشغيل ميزة مراقب عن بُعد

إشعار:

تتوقف ميزة مراقب عن بُعد تلقائيًا بعد مدة مبرمجة أو عند إجراء محاولة لبدء الإرسال أو تغيير القنوات أو إيقاف تشغيل الراديو.

1 الوصول إلى ميزة مراقب عن بعد.

عناصر التحكم في الراديو	الخطوات
زر مراقب عن بعد	a اضغط على زر مراقبة عن بعد المبرمج.
المبرمج	b اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشترك واضغط على  للتحديد.

## الخطوات

## عنصر التحكم في الراديو

d اضغط على  أو  للوصول إلى

فحص الراديو واضغط على  للتحديد.

تعرض الشاشة الاسم المستعار المستهدف، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED باللون الأخضر الثابت.

2 انتظر حتى تصلك رسالة إعلام.

إذا كان الراديو المستهدف نشطًا في النظام، فستصدر نغمة وستعرض الشاشة لفترة قصيرة راديو مستهدف متوفر.

إذا كان الراديو المستهدف غير نشط في النظام، فستصدر نغمة وستعرض الشاشة لفترة قصيرة راديو مستهدف غير متوفر.

يعود الراديو إلى شاشة الاسم المستعار أو المعرف الخاص بالمشترك عند بدئه عبر القائمة.

يعود الراديو إلى الشاشة الرئيسية إذا تم بدئه عبر الزر القابل للبرمجة.

عنصر التحكم في الراديو	الخطوات
e	اضغط على  أو  للوصول إلى مراقبة عن بعد واضغط على  للتحديد

يعرض سطر النص الأول مراقب عن بعد. يعرض سطر النص الثاني الاسم المستعار المستهدف، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED باللون الأخضر الوامض.

## 2 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح، فستصدر نغمة مؤشر إيجابية وستعرض الشاشة لفترة وجيزة مراقب عن بعد ناجح. يبدأ الراديو في تشغيل الصوت الصادر من الراديو المراقب لمدة مبرمجة، وتعرض الشاشة مراقب عن بعد، يتبعها الاسم المستعار المستهدف. بمجرد انتهاء المؤقت، يصدر الراديو نغمة تحذير ويتوقف مؤشر LED.

في حالة عدم النجاح، يصدر الراديو نغمة مؤشر سلبية، وتعرض الشاشة مراقب عن بعد فشل.

عنصر التحكم في الراديو	الخطوات
Menu (القائمة)	a اضغط على  للوصول إلى القائمة.
b	اضغط على  أو  للوصول إلى جهات الاتصال واضغط على  للتحديد.
c	اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشترك واضغط على  للتحديد.
d	اضغط على  أو  للوصول إلى اتصال يدوي واضغط على  للتحديد.

## مسح

تتيح هذه الميزة للراديو مراقبة المكالمات والانضمام إليها للمجموعات المعرفة في قائمة المسح المبرمجة مسبقًا. عند تمكين المسح، يظهر رمز المسح على شريط الحالة ويومض مؤشر LED باللون الأصفر عند الخمول.

## بدء المسح وإيقافه

إشعار:

يقوم هذا الإجراء بتشغيل ميزة المسح أو إيقافها لجميع مناطق Connect Plus التي لها نفس معرف شبكة المنطقة المحددة حاليًا. من الضروري ملاحظة أنه حتى عند تشغيل ميزة المسح عبر هذا الإجراء، يظل بالإمكان تعطيل المسح لبعض المجموعات (أو كلها) في قائمة المسح. راجع تحرير قائمة المسح في صفحة 222 لمزيد من المعلومات.

يمكنك بدء المسح وإيقافه عن طريق الضغط على زر مسح المبرمج أو اتباع الإجراء الموضح التالي.

3 اضغط على  أو  للوصول إلى تشغيل أو إيقاف

واضغط على  للتحديد.

- تعرض الشاشة تشغيل المسح عند تمكين المسح.
- تعرض قائمة المسح إيقاف في حالة تمكين المسح.
- تعرض الشاشة إيقاف المسح في حالة تعطيل المسح.
- تعرض قائمة المسح تشغيل في حالة تعطيل المسح.

## الرد على إرسال أثناء المسح

أثناء المسح، يتوقف الراديو عند أي مجموعة يتم اكتشاف نشاط فيها. يستمع الراديو باستمرار لأي عضو في قائمة المسح عندما يكون خاملاً على قناة التحكم.

1 احمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

2 اضغط على زر PTT أثناء وقت التوقف.

يضيء مؤشر LED باللون الأخضر الثابت.

3 انتظر حتى تنتهي نغمة إذن بالكلام (عند تمكينها) وتحدث بوضوح في الميكروفون.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح واضغط على  للتحديد.

## تشغيل المسح أو إيقاف تشغيله

إشعار:

يقوم هذا الإجراء بتشغيل ميزة المسح أو إيقافها لجميع المناطق التي لها معرف شبكة مماثل للمنطقة المحددة حاليًا. من الضروري ملاحظة أنه حتى عند تشغيل ميزة المسح عبر هذا الإجراء، يظل بالإمكان تعطيل المسح لبعض المجموعات (أو كلها) في قائمة المسح. راجع القسم التالي لمزيد من المعلومات.

إذا تم تشغيل المسح، فسيظهر رمز المسح على الشاشة. عند تشغيل المسح وعدم مشاركتك في مكالمة، يومض مؤشر LED باللون الأصفر والأخضر.

يعتمد إجراء تشغيل المسح أو إيقاف تشغيله على كيفية برمجة الراديو الخاص بك. إذا تمت برمجته بزر لتشغيل/إيقاف تشغيل المسح، فاستخدم الزر للتبديل بين تشغيل الميزة أو إيقاف تشغيلها. وإذا كان الراديو الخاص بك مبرمجًا بحيث يمكن تشغيل المسح أو إيقاف تشغيله من خلال القائمة، فاتبع الإجراء الموضح أدناه.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح واضغط على  للتحديد.

## 4 حرر زر PTT للاستماع.

إذا لم تقم بالرد خلال وقت التوقف، فسيعود الراديو إلى مسح مجموعات أخرى.

## المسح المكوّن من قبل المستخدم

في حالة تمكين قائمة "ت القائمة"، يستطيع المستخدم إضافة أعضاء المسح أو إزالتهم من القائمة "إضافة عضو". يجب أن يكون عضو قائمة المسح جهة اتصال مجموعة معتادة (على سبيل المثال، ليس مكالمة مجموعات متعددة أو مكالمة شاملة للموقع/مكالمة شاملة للشبكة) معينة حاليًا لموضع في محدد القناة في منطقة Connect Plus ذات معرف شبكة مماثل للمنطقة المحددة حاليًا. يجب ألا يكون الاسم المستعار لمجموعة التحدث مطابقًا لأي مجموعة تحدث تم تضمينها في قائمة المسح الخاصة بالمنطقة الحالية.

يمكن تشغيل المسح أو إيقاف تشغيله من القائمة، أو عن طريق الضغط على الزر ت/ق بحث المبرمج.

لا تعمل هذه الميزة إلا عندما لا يكون الراديو مشاركًا حاليًا في مكالمة. إذا كنت تستمع حاليًا إلى مكالمة، فلا يمكن للراديو مسح مكالمات مجموعة أخرى، وبالتالي فإنه لا يكون على علم بأنها قيد التقدم. وبمجرد انتهاء مكالمتك، يعود الراديو إلى الجزء الزمني لقناة التحكم، ويتمكن من مسح المجموعات المدرجة في قائمة المسح.

3 اضغط على  أو  للوصول إلى تشغيل أو إيقاف

واضغط على  للتحديد.

- تعرض الشاشة تشغيل المسح لفترة وجيزة في حالة تعطيل المسح.
- تعرض الشاشة إيقاف تشغيل المسح لفترة وجيزة في حالة تمكين المسح.

## تحرير قائمة المسح

إشعار:

إذا حدث أن إدخال قائمة المسح كان هو المجموعة المحددة حاليًا، فإن الراديو يستمع للنشاط على هذه المجموعة بصرف النظر عما إذا كان إدخال القائمة يعرض حاليًا علامة اختيار أم لا. عندما لا يكون الراديو مشاركًا في مكالمة، يستمع للنشاط على مكالمة المجموعة المحددة أو مكالمة المجموعة المتعددة أو المكالمة الشاملة للموقع ومجموعة إرجاع الطوارئ الافتراضية (إذا تم تكوينه لإحداها). ولا يمكن تعطيل هذه العملية. في حال تمكين المسح سيستمع الراديو أيضًا للنشاط على أعضاء قائمة مسح المنطقة الممكنين.

تحدد قائمة المسح الخاصة بك المجموعات التي يمكن مسحها. ويتم إنشاء القائمة عند برمجة الراديو الخاص بك. إذا تمت برمجة الراديو للسماح بتحرير قائمة المسح، فيمكنك:

- تمكين/تعطيل المسح لمجموعات فردية في القائمة.

- إضافة أعضاء المسح وإزالتهم من قائمة إضافة عضو. راجع إضافة مجموعة أو حذفها عبر القائمة إضافة أعضاء في صفحة 223.

إشعار:

يجب أن يكون عضو قائمة المسح جهة اتصال مجموعة معتادة (وليس بمكالمة مجموعات متعددة أو مكالمة شاملة للموقع/مكالمة شاملة للشبكة) معينة حاليًا لموضع في محدد القناة في منطقة Connect Plus ذات معرف شبكة مماثل للمنطقة المحددة حاليًا. يجب ألا يكون الاسم المستعار لمجموعة التحدث مطابقًا لأي مجموعة تحدث تم تضمينها في قائمة المسح الخاصة بالمنطقة الحالية.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى عنصر القائمة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اسم المجموعة المطلوبة.

إذا كانت هناك علامة اختيار قبل اسم المجموعة، فيدل هذا على تمكين المسح حاليًا لهذه المجموعة.

إذا لم تكن هناك علامة اختيار قبل اسم المجموعة، فيدل على تعطيل المسح حاليًا لهذه المجموعة.

4  لتحديد المجموعة المطلوبة.

تعرض الشاشة تمكين إذا كان المسح معطلاً حالياً للمجموعة.

تعرض الشاشة تعطيل إذا كان المسح ممكناً حالياً للمجموعة.

2 اضغط على  أو  للوصول إلى خيار المسح واضغط على  للتحديد.

5 حدد الخيار المعروف (تمكين أو تعطيل) واضغط على  للتحديد.  
تبعاً للخيار المحدد، يعرض الراديو لفترة وجيزة المسح ممكناً أو المسح معطل كتنأكيد.

3 اضغط على  أو  للوصول إلى < إضافة الأعضاء > واضغط على  للتحديد.

يعرض الراديو قائمة مسح المنطقة مرة أخرى. في حالة تمكين المسح للمجموعة، يتم عرض علامة اختيار قبل اسم المجموعة. في حالة تعطيل المسح للمجموعة، تتم إزالة علامة الاختيار قبل اسم المجموعة.

تعرض الشاشة Add Members from Zone n (إضافة أعضاء من المنطقة n) (حيث إن n = رقم منطقة Connect Plus لمنطقة الشبكة الخاص بالمنطقة المحددة حالياً).

## إضافة مجموعة أو حذفها عبر القائمة إضافة أعضاء

4 قم بأحد الإجراءات التالية.

لا يسمح راديو Connect Plus بوضع رقم مجموعة مكرر أو اسم مستعار مكرر لمجموعة في قائمة مسح منطقة (أو عرضه كـ "مرشح مسح"). ومن ثم، تتغير أحياناً قائمة "مرشحو المسح" الموضحة في **خطوة 6** و**خطوة 7** بعد إضافة مجموعة أو حذفها من قائمة مسح المنطقة.

- إذا تم تعيين المجموعة التي تريد إضافتها إلى قائمة المسح لموضع محدد قناة في هذه المنطقة، فانقل إلى **خطوة 6**.
- إذا تم تعيين المجموعة التي تريد إضافتها إلى قائمة المسح لموضع محدد قناة في منطقة Connect Plus مختلفة، فانقل إلى **خطوة 5**.

إذا تمت برمجة الراديو للسماح لك بتحرير قائمة المسح، فيمكنك استخدام قائمة "إضافة أعضاء" لإضافة مجموعة إلى قائمة المسح الخاصة بالمنطقة المحددة حالياً أو لحذف مجموعة من قائمة المسح الخاصة بالمنطقة المحددة حالياً.

5 اضغط على  أو  لتمرير قائمة بمناطق Connect Plus التي لها معرف شبكة مماثل للمعرف الخاص بالمنطقة المحددة حالياً.

6 بعد تحديد موقع منطقة Connect Plus حيث تم تعيين المجموعة

1 اضغط على  للوصول إلى القائمة.

المطلوبة لموضع محدد قناة، اضغط على  للتحديد.

في حالة إضافة مجموعة إلى القائمة، ستعلم ما إذا كانت العملية ناجحة لأن علامة الجمع (+) ستظهر قبل الاسم المستعار مباشرة.

إذا كنت تحاول إضافة مجموعة، وكانت القائمة ممتلئة بالفعل، فسيعرض الراديو القائمة ممتلئة. إذا حدث ذلك، فسيكون من الضروري حذف مجموعة من قائمة المسح قبل إضافة مجموعة جديدة.

يعرض الراديو الإدخال الأول في قائمة بالمجموعات المعينة لموضع قناة في تلك المنطقة. تسمى المجموعات الموجودة في القائمة "مرشحو المسح"، لأنه يمكن إضافتها إلى قائمة المسح للمنطقة المحددة حاليًا (أو لأنها موجودة بالفعل في قائمة مسح المنطقة).

إذا لم تكن المنطقة تشتمل على أي مجموعات يمكن إضافتها إلى قائمة المسح، فسيعرض الراديو لا يوجد مرشجون.

10 عند الانتهاء من ذلك، اضغط على  بما يلزم من مرات للعودة إلى القائمة المطلوبة.

## فهم عملية المسح

إشعار:

إذا انضم الراديو إلى مكالمات أعضاء قائمة مسح منطقة من منطقة مختلفة وانتهى وقت تعليق المكالمات قبل أن تتمكن من الرد، فعليك التنقل عبر منطقة عضو قائمة المسح وقناته وبدء مكالمات جديدة.

ثمة بعض الظروف التي قد تفوتك فيها مكالمات للمجموعات المدرجة في قائمة المسح الخاصة بك. وعندما تفوتك مكالمات لأحد الأسباب التالية، فهذا لا يُشير إلى وجود مشكلة في الراديو الخاص بك. فهذه عملية مسح عادية يقوم بها Connect Plus.

- ميزة المسح ليست قيد التشغيل (تحقق من رمز المسح على الشاشة).
- تم تعطيل عضو قائمة المسح عبر القائمة (راجع تحرير قائمة المسح في صفحة 222).
- أنت مشارك في مكالمات بالفعل.

7

اضغط على  أو  للتمرير خلال قائمة المجموعات المرشحة.

في حالة عرض علامة الجمع (+) مباشرة قبل الاسم المستعار للمجموعة، يشير هذا إلى أن المجموعة موجودة حاليًا في قائمة المسح للمنطقة المحددة.

إذا لم يتم عرض علامة الجمع (+) قبل الاسم المستعار مباشرة، فيعني هذا أن المجموعة ليست موجودة حاليًا في قائمة المسح ولكن يمكن إضافتها.

8

اضغط على  عند عرض الاسم المستعار للمجموعة المطلوبة.

إذا لم تكن هذه المجموعة موجودة حاليًا في قائمة المسح للمنطقة المحددة حاليًا، فسيتم عرض رسالة إضافة (الاسم المستعار للمجموعة).

إذا كانت هذه المجموعة موجودة بالفعل في قائمة المسح للمنطقة المحددة حاليًا، فسيتم عرض رسالة حذف (الاسم المستعار للمجموعة).

9

اضغط على  لقبول الرسالة المعروضة (إضافة أو حذف).

في حالة حذف مجموعة من القائمة، ستعلم ما إذا كانت العملية ناجحة لأن علامة الجمع (+) لن تظهر قبل الاسم المستعار مباشرة.

## تحرير الأولوية لمجموعة التحدث

تسمح ميزة مراقبة الأولوية للراديو بتلقي الإرسال تلقائيًا من مجموعة التحدث ذات الأولوية الأعلى أثناء إجرائه مكالمة أخرى. تصدر نغمة عند انتقال الراديو إلى المكالمات ذات الأولوية الأعلى.

يوجد مستويان للأولوية الخاصة بمجموعات التحدث: P1 و P2. يتميز P1 بأولوية أعلى من P2.

إشعار:

إذا تمت تهيئة مجموعة إرجاء الطوارئ الافتراضية في MOTOTRBO Connect Plus Option Board CPS، فسوف يكون هناك ثلاثة مستويات للأولوية لمجموعات التحدث: P0 و P1 و P2. تمثل P0 معرف مجموعة إرجاء الطوارئ الدائمة ذات مستوى الأولوية الأعلى. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى قائمة واضغط على  للتحديد.

- لم يتم تسجيل أي عضو من أعضاء المجموعة التي تم مسحها في موقع (الأنظمة متعددة المواقع فقط).

## مسح Talkback

إذا قام الراديو بالمشح في مكالمة من قائمة مسح مجموعة قابلة للتحديد، وإذا تم الضغط على زر **PTT** أثناء المكالمة التي تم مسحها، فإن تشغيل الراديو يعتمد على ما إذا تم تمكين ميزة "مسح Talkback" أو تعطيلها أثناء برمجة الراديو. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

### تعطيل مسح Talkback

يتك الراديو المكالمة التي تم مسحها ويحاول إرسال جهة الاتصال إلى موضع القناة المحددة حاليًا. بعد انتهاء وقت تعليق المكالمة على جهة الاتصال المحددة حاليًا، يعود الراديو إلى القناة الرئيسية ويبدأ مؤقت وقت تعليق المسح. يستأنف الراديو المسح الجماعي بعد انتهاء مؤقت وقت تعليق المسح.

### تمكين مسح Talkback

إذا تم الضغط على زر **PTT** أثناء وقت تعليق المجموعة للمكالمة التي تم مسحها، يحاول الراديو الإرسال إلى المجموعة التي تم مسحها.

إشعار:

إذا قمت ب مسح مكالمة لمجموعة غير معينة لموضع قناة في المنطقة المحددة حاليًا وفاتك وقت تعليق المكالمة، فقم بالتبديل إلى المنطقة المناسبة ثم حدد موضع قناة المجموعة لمعاودة التحدث إلى تلك المجموعة.

4 اضغط على  أو  للوصول إلى مجموعة التحدث المطلوبة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تحرير الأولوية واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى مستوى الأولوية المطلوب واضغط على  للتحديد.

تعرض الشاشة إشعارًا إيجابيًا صغيرًا قبل العودة إلى الشاشة السابقة. يظهر رمز الأولوية يمين مجموعة التحدث.

## إعدادات جهات الاتصال

إشعار:

يمكنك إضافة معرفات مشتركين أو تحريرها لجهات اتصال Connect Plus. يمكن حذف معرفات المشتركين من قبل الوكيل فقط. إذا كانت ميزة السرية ممكنة بالقناة، فيمكنك إجراء مكالمة صوتية تدعم السرية على هذه القناة. لن تتمكن سوى أجهزة الراديو المستهدفة التي لها مفتاح سرية أو قيمة مفتاح ومعرف مماثل للراديو الخاص بك من فك تشفير الإرسال.

يعتمد الوصول إلى قوائم جهات الاتصال على تكوين المنطقة:

- في حال وجود منطقة واحدة في الراديو، تعرض قائمة جهات الاتصال مباشرة القائمة الخاصة بالمنطقة الحالية المحددة.
- إذا تم تكوين مناطق متعددة، فسيعرض مجلد جهات اتصال المنطقة كل المناطق ذات معرفات الشبكة المتماثلة كالمجموعة الحالية المحددة. يستطيع المستخدم الوصول إلى جهات الاتصال في هذه المناطق.
- توفر جهات الاتصال إكسيلات "دفتر العناوين" على الراديو الخاص بك. ويتطابق كل إدخال من الإدخالات مع اسم مستعار أو معرف تستخدمه لبدء مكالمة.
- توفر كل منطقة قائمة جهات اتصال بها ما يصل إلى 100 جهة اتصال. تتوفر أنواع جهات الاتصال التالية:

• اتصال خاص

• المكالمة الجماعية

• مكالمة مجموعات متعددة

• مكالمة صوتية شاملة للموقع

• مكالمة نصية شاملة للموقع

• مكالمة إرسال

يتم استخدام نوع جهة الاتصال "مكالمة إرسال" لإرسال رسالة نصية إلى كمبيوتر المرسل عن طريق خادم الرسائل النصية لجهة أخرى.

## إجراء مكالمة خاصة من جهات الاتصال

1 اضغط على  للوصول إلى القائمة.

## إجراء بحث عن الاسم المستعار للكلمة

يمكنك أيضاً استخدام البحث حسب الاسم المستعار أو البحث الأبجدي الرقمي لاسترجاع الاسم المستعار للمشارك المطلوب.

هذه الميزة قابلة للتطبيق فقط من جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال واضغط

على  للتحديد.

يتم فرز الإدخالات أبجدياً.

3 أدخل الحرف الأول من الاسم المستعار المطلوب، ثم اضغط على الزر

 أو  لتحديد موقع الاسم المستعار المطلوب.

4 حمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

5 اضغط على زر **PTT** لإجراء الكلمة.

يضيء مؤشر LED باللون الأخضر الثابت. تعرض الشاشة الاسم المستعار للوجهة.

2 اضغط على  أو  للوصول إلى جهات الاتصال واضغط

على  للتحديد.

يتم فرز الإدخالات أبجدياً.

3 حمل الميكروفون على مسافة تتراوح من بوصة إلى بوصتين (2,5 إلى 5 سم) من فمك.

4 اضغط على زر **PTT** لإجراء الكلمة.

يضيء مؤشر LED باللون الأخضر الثابت.

5 انتظر حتى تنتهي نغمة إذن بالكلام (عند تمكينها) وتحديث بوضوح في الميكروفون.

6 حرر زر **PTT** للاستماع.

عند رد الراديو المستهدف، يومض مؤشر LED باللون الأخضر، وتعرض الشاشة معرف المستخدم المُرسِل.

في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقاً، تنتهي الكلمة.

تسمع نغمة قصيرة. وتعرض الشاشة انتهت الكلمة.

6 انتظر حتى تنتهي نغمة إذن بالكلام (عند تمكينها) وتحديث بوضوح في الميكروفون.

7 حرر زر PTT للاستماع.

عند رد الراديو المستهدف، يومض مؤشر LED باللون الأخضر. في حالة عدم وجود نشاط صوتي لفترة زمنية محددة مسبقًا، ستنتهي المكالمة.

وتعرض الشاشة انتهت المكالمة.

## إضافة جهة اتصال جديدة

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى ج = اتصال جديدة واضغط على  للتحديد.

4 استخدم لوحة المفاتيح لإدخال رقم جهة الاتصال، واضغط على  للتأكيد.

5 استخدم لوحة المفاتيح لإدخال اسم جهة الاتصال، واضغط على  للتأكيد.

6 عند إضافة جهة اتصال لاسلكية، اضغط على  أو  للوصول إلى نوع مشغل النغمات المطلوب واضغط على  للتحديد. يصدر الراديو نغمة مؤشر إيجابي وتعرض الشاشة تم حفظ جهة اتصال.

## إعدادات مؤشر المكالمات

تسمح هذه الميزة لمستخدمي الراديو بتكوين نغمات رنين المكالمة أو الرسالة النصية.

## تنشيط مشغلات النغمات وتعطيها لتنبيه المكالمات

يمكنك تحديد نغمات الرنين أو تشغيلها أو إيقاف تشغيلها لتنبيه مكالمات متلقى.

1 اضغط على  للوصول إلى القائمة.

تظهر علامة ✓ بجانب النغمة المحددة.

## تنشيط مشغلات النغمات وإلغاء تنشيطها للمكالمات الخاصة

يمكنك تشغيل نغمات الرنين أو إيقاف تشغيلها لمكالمة خاصة متلقاة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيهه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م النغمات واضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيهه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م النغمات واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى م مكالمات واضغط على  للتحديد.

تتم الإشارة إلى النغمة الحالية بعلامة ✓.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى مكالمة خاصة واضغط على  للتحديد.

7 اضغط على  لتمكين/تعطيل نغمات رنين المكالمة الخاصة. تعرض الشاشة علامة  بجانب ممكن، إذا تم تمكين نغمات رنين المكالمة الخاصة. لا يتم عرض  عند تعطيل نغمات رنين المكالمة الخاصة.

## تنشيط مشغلات النغمات وتعطيلها للرسائل النصية

يمكنك تشغيل نغمات الرنين أو إيقاف تشغيلها للرسائل النصية المستلمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى رسالة نصية واضغط على  للتحديد. تتم الإشارة إلى النغمة الحالية بعلامة .

7 اضغط على  أو  للوصول إلى النغمة المطلوبة واضغط على  للتحديد. تظهر علامة  بجانب النغمة المحددة.

## تحديد نوع تنبيه الرنين

إشعار:

يقوم الوكيل أو مسؤول النظام بتعيين زر **نوع التنبيه** المبرمج. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

يمكنك برمجة مكالمات الراديو على اهتزاز محدد مسبقًا. إذا كانت حالة جميع النغمات معطلة، فسيعرض الراديو رمز كتم صوت جميع النغمات. إذا كانت حالة جميع النغمات ممكنة، فسيتم عرض نوع تنبيه الرنين المرتبط.

يهتز الراديو مرة واحدة في حالة اختيار نمط رنين مؤقت. سيهتز الراديو بشكل متكرر في حالة اختيار نمط الرنين المتكرر. عند تعيين الراديو على رنين واهتزاز، فسيصدر الراديو نغمة رنين معينة في حالة وردت أي معاملة للراديو (على سبيل المثال، تنبيه مكالمة أو رسالة). وتكون النغمة الصادرة من الراديو كنغمة المؤشر الإيجابية أو مكالمة فائتة.

## مستوى صوت نغمة التنبيه التصاعدي

يمكنك برمجة الراديو الخاص بك لتنبيهك باستمرار عند وجود مكالمة راديو لم يتم الرد عليها. ويتم ذلك عن طريق زيادة مستوى صوت نغمة التنبيه تلقائيًا بمرور الوقت. وتُعرف هذه الميزة باسم رفع التنبيه.

## ميزات سجل المكالمات

يحتفظ الراديو بسجل لكافة المكالمات الخاصة الأخيرة الصادرة والتي تم الرد عليها والفائتة. استخدم ميزة سجل المكالمات لعرض المكالمات الأخيرة وإدارتها.

يمكنك تنفيذ المهام التالية في كل قائمة من قوائم المكالمات:

- حذف
- عرض التفاصيل

## عرض المكالمات الأخيرة

القوائم هي فائتة وتم الرد والصادر.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات واضغط على  للتحديد.

عند تحديد قائمة مكالمات لا تحتوي على أية إدخالات، ستعرض الشاشة القائمة فارغة، ويتم إصدار نغمة منخفضة في حالة تشغيل نغمات لوحة المفاتيح.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى حذف واضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  لتحديد نعم لحذف الإدخال. ستعرض الشاشة تم حذف مدخل.
- اضغط على  أو  للوصول إلى لا، واضغط على الزر  للعودة إلى الشاشة السابقة.

## عرض التفاصيل من قائمة المكالمات

1 اضغط على  للوصول إلى القائمة.

3 اضغط على  أو  للوصول إلى القائمة المفضلة واضغط على  للتحديد.

ستعرض الشاشة أحدث الإدخالات في أعلى القائمة.

4 اضغط على  أو  لعرض القائمة.

اضغط على زر **PTT** لبدء مكالمة خاصة باستخدام الاسم المستعار أو المعرف المحدد حاليًا.

## حذف مكالمة من قائمة مكالمات

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة واضغط على  للتحديد.

## الاستجابة لتنبيهات المكالمات

اتبع الإجراء للرد على تنبيهات المكالمات على الراديو الخاص بك.

عند تلقي تنبيه مكالمات:

- تصدر نغمة متكررة.
- يومض مؤشر LED الأصفر.
- تعرض الشاشة قائمة إعلانات تسرد تنبيه مكالمات مع الاسم المستعار أو المعرف الخاص بالراديو المتصل.

وفقًا للتهيئة التي يقوم بها الوكيل أو مسؤول النظام، يمكنك الرد على تنبيه المكالمات بتنفيذ أحد الإجراءات التالية:

- اضغط على زر **PTT** وقم بالرد على المتصل مباشرة بمكالمة خاصة.
- اضغط على زر **PTT** لمتابعة الاتصال العادي بمجموعة التحدث. ينتقل تنبيه المكالمات إلى خيار مكالمة فائتة في قائمة سجل المكالمات. يمكنك الرد على المتصل من سجل المكالمات الفائتة.

راجع قائمة الإعلانات في صفحة 165 وميزات سجل المكالمات في صفحة 109 للحصول على مزيد من المعلومات.

## إجراء تنبيه مكالمات من قائمة جهات الاتصال

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى عرض التفاصيل واضغط على  للتحديد. تعرض الشاشة تفاصيل قائمة المكالمات.

## تشغيل تنبيه المكالمات

يعمل نداء تنبيه المكالمات على تمكينك من تنبيه مستخدم راديو معين للاتصال بك متى استطاع ذلك.

يمكن الوصول إلى هذه الميزة من خلال القائمة عبر جهات الاتصال أو الاتصال اليدوي أوزر الوصول بلمسة واحدة المبرمج.

2

اضغط على  أو  للوصول إلى جهات الاتصال واضغط على  للتحديد.

3

استخدم إحدى الخطوات الموضحة أدناه لتحديد الاسم المستعار أو المعرف الخاص بالمشارك المطلوب:

- حدد الاسم المستعار للمشاركة مباشرة

- اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمشارك. اضغط على  للتحديد.

- استخدم قائمة اتصال يدوي

- اضغط على  أو  للوصول إلى اتصال يدوي واضغط على  للتحديد.

- سيتم عرض شاشة إدخال النصوص اتصال يدوي. أدخل معرف المشارك واضغط على .

4

اضغط على  أو  للوصول إلى ت. مكالمات واضغط على  للتحديد.

تعرض الشاشة ت. مكالمات: > الاسم أو المعرف الخاص بالمشارك. مكالمات والاسم المستعار أو المعرف الخاص بالمشارك، للإشارة إلى أنه قد تم إرسال تنبيه المكالمات.

يضيء مؤشر LED بلون أخضر ثابت أثناء قيام الراديو بإرسال تنبيه المكالمات.

إذا تم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة ت. مكالمات ناجح.

إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة ت. مكالمات فشل.

## إجراء تنبيه مكالمات باستخدام زر الوصول بلمسة واحدة

اضغط على زر الوصول بلمسة واحدة المبرمج لإرسال تنبيه مكالمات إلى الاسم المستعار المحدد مسبقاً.

تعرض الشاشة ت. مكالمات والاسم المستعار أو المعرف الخاص بالمشارك، للإشارة إلى أنه قد تم إرسال تنبيه المكالمات. يضيء مؤشر LED بلون أخضر ثابت أثناء قيام الراديو بإرسال تنبيه المكالمات.

انتقل إلى هذه الميزة عبر زر **وضع كتم الصوت** المبرمج.

يحدث ما يلي عند تمكين وضع كتم الصوت:

- تصدر نغمة المؤشر الإيجابية.
- تعرض الشاشة تشغيل وضع كتم الصوت.
- يبدأ مصباح LED الأحمر في الوميض ويظل يومض إلى أن يتم إنهاء وضع كتم الصوت.
- تعرض شاشة العرض رمز **وضع كتم الصوت** في الشاشة الرئيسية.
- يتم كتم صوت الراديو.
- يبدأ مؤقت وضع كتم الصوت في عد المدة الزمنية التي يتم تكوينها تنازليًا.

## ضبط مؤقت وضع كتم الصوت

يمكن تمكين ميزة وضع كتم الصوت لمدة زمنية مكوّنة مسبقًا عبر ضبط مؤقت وضع كتم الصوت. يتم تكوين المدة الزمنية الخاصة بالمؤقت في قائمة الراديو ويمكن أن تتراوح بين 0.5 ساعة و6 ساعات. يتم إنهاء وضع كتم الصوت بمجرد انتهاء مدة المؤقت.

إذا أترك المؤقت على القيمة 0، فسيظل الراديو في وضع كتم الصوت لمدة زمنية غير محدودة إلى أن يتم الضغط على زر **وضع كتم الصوت** المبرمج.

1 اضغط على  للوصول إلى القائمة.

إذا تم تلقي إشعار باستلام تنبيه المكالمات، ستعرض الشاشة تـ  
مكالمات ناجح.

إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة تـ  
مكالمات فشل.

## وضع كتم الصوت

يوفر وضع كتم الصوت خيارًا للمستخدم لكتم صوت كل المؤشرات الصوتية الخاصة بالراديو.

بمجرد بدء ميزة وضع كتم الصوت، يتم كتم صوت كل المؤشرات الصوتية باستثناء الميزات الأعلى أولوية، مثل عمليات الطوارئ.

عند إنهاء وضع كتم الصوت، يستأنف الراديو تشغيل النغمات وعمليات إرسال الصوت الحالية.

إشعار:

هذه الميزة قابلة للشراء. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## تشغيل وضع كتم الصوت

اتبع الإجراء لتشغيل وضع كتم الصوت.

- اضغط على زر **PTT** عند أي إدخال.

يحدث ما يلي عند تعطيل وضع كتم الصوت:

- تنطلق نغمة المؤشر السلبية.
- تعرض الشاشة كتم إيقاف.
- ينطفئ مصباح LED الأحمر الومض.
- يختفي رمز **وضع كتم الصوت** من الشاشة الرئيسية.
- يلغي الراديو كتم الصوت وتتم استعادة حالة السماع الخارجية.
- إذا لم يكن المؤقت قد انتهت صلاحيته، يتم إيقاف مؤقت وضع كتم الصوت.

**إشعار:**

يتم أيضاً إنهاء وضع كتم الصوت إذا قام المستخدم بإرسال الصوت أو بالتحويل إلى قناة غير مبرمجة.

**2** اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

**3** اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

**4** اضغط على  أو  للوصول إلى مؤقت كتم الصوت. اضغط على  للتحديد.

**5** اضغط على  أو  لتحديد القيمة الرقمية لكل رقم، واضغط على .

## الخروج من وضع كتم الصوت

يمكن الخروج من هذه الميزة تلقائياً بمجرد انتهاء مدة مؤقت وضع كتم الصوت.

نفذ أحد الإجراءات التالية لإنهاء وضع كتم الصوت يدوياً:

- اضغط على زر **وضع كتم الصوت** المبرمج.

## تشغيل الطوارئ

## إشعار:

إذا كان الراديو الخاص بك مبرمجًا لبدء الطوارئ في الوضع "صامت" أو "صامت مع صوت"، ففي معظم الحالات سيقوم بالخروج تلقائيًا من التشغيل الصامت بعد انتهاء مكالمات الطوارئ أو تنبيه الطوارئ، والاستثناء في هذه القاعدة عندما يكون "تنبيه الطوارئ" هو وضع الطوارئ المكوّن و"صامت" هو نوع الطوارئ المكوّن. إذا كان الراديو الخاص بك مبرمجًا بهذه الطريقة، فسيستمر التشغيل الصامت حتى تقوم بإلغاء التشغيل الصامت عن طريق الضغط على زر **PTT** أو على الزر المكوّن لـ "إيقاف الطوارئ".

مكالمات الطوارئ الصوتية وتنبيهات الطوارئ غير معتمدة عند التشغيل في وضع **Fallback** تلقائي في **Connect Plus**. لمزيد من المعلومات راجع **Fallback تلقائي في صفحة 215**.

يُستخدم تنبيه الطوارئ للإشارة إلى وجود حالة حرجة. يمكنك بدء الطوارئ في أي وقت على أية شاشة، حتى في حال وجود نشاط على القناة الحالية. يؤدي الضغط على زر الطوارئ إلى بدء وضع الطوارئ المبرمج. يمكن أيضًا بدء وضع الطوارئ المبرمج عن طريق تشغيل ميزة **Man Down** الاختيارية. وقد تكون ميزة الطوارئ معطلة في الراديو لديك.

يستطيع الوكيل تعيين مدة الضغط على زر الطوارئ المبرمج، فيما عدا الضغط لفترة طويلة، حيث يعتبر ذلك مشابهًا لكل الأزرار الأخرى:

## اضغط لفترة قصيرة على

ما بين 0.05 ثانية إلى 0.75 ثانية.

## الضغط لفترة طويلة

ما بين 1.00 ثانية إلى 3.75 ثانية.

يتم تخصيص زر الطوارئ بواسطة ميزة تشغيل/إيقاف تشغيل الطوارئ. راجع الوكيل بشأن التشغيل المخصص لزر الطوارئ.

- إذا تم تعيين الضغط لفترة قصيرة على زر الطوارئ لتشغيل وضع الطوارئ، فسيتم تعيين الضغط لفترة طويلة على زر الطوارئ لإنهاء وضع الطوارئ.
  - إذا تم تعيين الضغط لفترة طويلة على زر الطوارئ لتشغيل وضع الطوارئ، فسيتم تعيين الضغط لفترة قصيرة على زر الطوارئ لإنهاء وضع الطوارئ.
- عند تحديد الراديو الخاص بك إلى منطقة **Connect Plus**، فإنها تدعم ثلاثة أوضاع للطوارئ:

## مكالمة طوارئ

يجب الضغط على زر **PTT** للتحديث على الجزء الزمني للطوارئ المعين.

## مكالمة طوارئ مع صوت للاتباع

بالنسبة إلى الإرسال الأول على الجزء الزمني للطوارئ المعين، سيتم إلغاء كتم صوت الميكروفون تلقائيًا ويمكنك التحدث من دون الضغط على زر **PTT**. سيظل الميكروفون "نشطًا" بهذه الطريقة لفترة الزمنية المبرمجة في الراديو. وفي حالة عمليات الإرسال اللاحقة في نفس مكالمة الطوارئ، سبتعين عليك الضغط على الزر **PTT**.

## تنبيه الطوارئ

تنبيه الطوارئ ليس مكالمة صوتية. إنه إعلام بالطوارئ يتم إرساله إلى أجهزة الراديو التي تم تكوينها لاستلام هذه التنبيهات. يرسل الراديو تنبيه طوارئ باستخدام قناة التحكم الخاصة بالموقع المسجل حاليًا. ويتم تلقي تنبيه الطوارئ بواسطة أجهزة الراديو في شبكة **Connect Plus** المبرمجة لتلقيه (بصرف النظر عن موقع الشبكة المسجلة فيه).

يمكن تخصيص واحد فقط من أوضاع الطوارئ لزر الطوارئ لكل منطقة. بالإضافة إلى ذلك، يتضمن كل وضع من أوضاع الطوارئ الأنواع التالية:

## حفظ تفاصيل الطوارئ في قائمة التنبيه

يسمح لك حفظ تفاصيل الطوارئ في قائمة التنبيه بعرض التفاصيل مرة أخرى في وقت لاحق عن طريق تحديد "قائمة تنبيه" من القائمة الرئيسية.

- 1 أثناء عرض شاشة تفاصيل الطوارئ (أو قائمة تنبيه)، اضغط على  .  
يتم عرض شاشة خروج قائمة تنبيه.

### 2 قم بتنفيذ أحد الإجراءات التالية:

- حدد **نعم** واضغط على  لحفظ تفاصيل الطوارئ في قائمة تنبيه وللخروج من شاشة تفاصيل الطوارئ (أو قائمة تنبيه).
- حدد **لا** واضغط على  للرجوع إلى شاشة تفاصيل الطوارئ (أو قائمة تنبيه).

## حذف تفاصيل الطوارئ

- 1 أثناء عرض شاشة تفاصيل الطوارئ، اضغط على  .  
يتم عرض شاشة حذف.

### 2 قم بتنفيذ أحد الإجراءات التالية:

## عادي

يبدأ الراديو حالة الطوارئ ويعرض مؤشرات صوتية وأو مرئية.

## صامت

يبدأ الراديو حالة الطوارئ من دون أي مؤشرات صوتية أو مرئية. ويقوم الراديو بتعطيل جميع الإشارات الصوتية أو المرئية للطوارئ حتى تقوم بالضغط على زر **PTT** لبدء الإرسال الصوتي.

## صامت مع صوت

مثل التشغيل الصامت، فيما عدا أنه يتم إلغاء كتم صوت الراديو أيضاً لبعض عمليات الإرسال الصوتي.

## تلقي حالة طوارئ واردة

قد يكون الراديو مبرمجاً على إصدار نغمة تنبيه وعرض معلومات أيضاً عن حالة الطوارئ الواردة. إذا كان مبرمجاً على ذلك، فعند تلقي حالة طوارئ واردة، تعرض شاشة تفاصيل الطوارئ وبها رمز الطوارئ والاسم المستعار أو المعرف الخاص بالراديو الذي طلب الطوارئ وجهة اتصال المجموعة المستخدمة للطوارئ وسطر معلومات إضافي. المعلومات الإضافية هي اسم المنطقة التي تحتوي على جهة اتصال المجموعة.

في الوقت الحالي، يعرض الراديو أحدث حالة طوارئ تم فك ترميزها فقط. إذا تم تلقي حالة طوارئ جديدة قبل مسح حالة الطوارئ السابقة، فستحل تفاصيل حالة الطوارئ الجديدة محل تفاصيل حالة الطوارئ السابقة.

تبعاً لكيفية برمجة الراديو، تظل شاشة تفاصيل الطوارئ (أو شاشة قائمة تنبيه) معروضة على شاشة الراديو حتى يبعد انتهاء حالة الطوارئ. يمكنك حفظ تفاصيل الطوارئ في قائمة تنبيه أو يمكنك حذف تفاصيل الطوارئ كما هو موضح في الأقسام التالية.

#### 4 حرر زر PTT للاستماع.

عندما يستجيب الراديو الذي بدأ الطوارئ، يومض مؤشر LED باللون الأخضر. يظهر رمز المكالمة الجماعية، ومعرف المجموعة، ومعرف الراديو المُرسَل على الشاشة.

• حدد نعم واضغط على  لحذف تفاصيل الطوارئ.

• حدد لا واضغط على  للرجوع إلى شاشة تفاصيل الطوارئ.

## الرد على مكالمة طوارئ

إشعار:

إذا لم ترد على مكالمة الطوارئ خلال الوقت المخصص لوقت تعليق مكالمة الطوارئ، فسيتم إنهاء مكالمة الطوارئ. إذا أردت التحدث إلى المجموعة بعد انتهاء وقت تعليق مكالمة الطوارئ، فيجب أولاً تحديد موضع القناة المعين لهذه المجموعة (إذا لم يكن محددًا بالفعل). بعد ذلك، اضغط على **PTT** لبدء مكالمة غير الطوارئ إلى المجموعة.

1 عند تلقي مكالمة طوارئ، اضغط على أي زر لإيقاف جميع إشارات تلقي مكالمة طوارئ.

2 اضغط على زر **PTT** لبدء إرسال صوتي على مجموعة الطوارئ.

ستسمع جميع أجهزة الراديو التي تراقب هذه المجموعة عملية الإرسال التي قمت بها.

3 انتظر حتى تنتهي نغمة إذن بالكلام (في حالة تمكينها) وتحدث بوضوح في الميكروفون.

بضيء مؤشر LED باللون الأخضر.

## الاستجابة لتنبيه طوارئ

إشعار:

يجب ألا تُستخدم جهة اتصال المجموعة المستخدمة لتنبيه الطوارئ في الاتصال الصوتي. قد يؤدي هذا إلى منع أجهزة الراديو الأخرى من إرسال تنبيهات الطوارئ وتلقيها على نفس المجموعة.

يشير تنبيه الطوارئ من الراديو إلى أن المستخدم في موقف حرج. يمكنك الاستجابة للتنبيه عن طريق بدء مكالمة خاصة إلى الراديو الذي أعلن الطوارئ، أو بدء مكالمة جماعية إلى مجموعة تحدث مخصصة، أو إرسال تنبيه مكالمة إلى الراديو، أو بدء مراقب عن بُعد لهذا الراديو، إلخ. تحدد مؤسستك والموقف الفردي الاستجابة المناسبة.

## تجاهل مكالمة إرجاع الطوارئ

يتمثل الغرض من تحسين هذه الميزة في توفير خيار للراديو لتجاهل مكالمة إرجاع طوارئ نشطة.

لتمكين تجاهل مكالمة إرجاع الطوارئ، يجب أن يتم تكوين الراديو عبر برنامج (CPCPS) Connect Plus Customer Programming Software.

إذا قمت بالضغط على زر **PTT** خلال هذا الوقت، فستستمر مكالمة الطوارئ.

## بدء مكالمة طوارئ مع صوت للتتبع

يجب برمجة الراديو الخاص بك لهذا النوع من التشغيل.

عند تمكين الراديو لهذا التشغيل، عندما تقوم بالضغط على زر **الطوارئ المبرمج**، وعندما يتلقى الراديو تعيين جزء الوقت، يتم تنشيط الميكروفون تلقائيًا دون الضغط على زر **PTT**. وتعرف هذه الحالة النشطة للميكروفون باسم "الميكروفون النشط". ينطبق "الميكروفون النشط" على أول إرسال صوتي من الراديو أثناء مكالمة الطوارئ. وفي حالة عمليات الإرسال اللاحقة في نفس مكالمة الطوارئ، سيتعين عليك الضغط على الزر **PTT**.

1 اضغط على زر **الطوارئ المبرمج**.

2 يظل الميكروفون نشطًا خلال زمن "الميكروفون النشط" المحدد في برمجة **codeplug** الخاصة بالراديو.

وخلال هذا الوقت، يضيء مؤشر **LED** باللون الأخضر.

3 اضغط مع الاستمرار على زر **PTT** للتحدث لفترة أطول من المدة المبرمجة.

عند تمكين الميزة، لا يعرض الراديو مؤشرات مكالمة الطوارئ ولا يتلقى أي صوت على معرف مجموعة إرجاع الطوارئ الافتراضية.

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## بدء مكالمة طوارئ

إشعار:

إذا تم تعيين الراديو على صامت، فلن يعرض أية مؤشرات صوتية أو مرئية خلال وضع الطوارئ حتى تقوم بالضغط على زر **PTT** لبدء الإرسال الصوتي.

إذا تم تعيين الراديو على صامت مع صوت، فلن يعرض في البداية أي مؤشرات صوتية أو مرئية تشير إلى أن الراديو في وضع الطوارئ. لكن، سيقوم الراديو بإلغاء كتم صوت عمليات الإرسال الخاصة بأجهزة الراديو التي تستجيب إلى مكالمة الطوارئ الخاصة بك. ولن تظهر مؤشرات الطوارئ إلا عند الضغط على زر **PTT** لبدء الإرسال الصوتي من الراديو.

وفي حالة التشغيل في الوضعين "صامت" و"صامت مع صوت"، سيقوم الراديو بالخروج تلقائيًا من التشغيل الصامت بعد انتهاء مكالمة الطوارئ.

1 اضغط على زر **الطوارئ المبرمج**.

2 اضغط على زر **PTT** لبدء إرسال صوتي على مجموعة الطوارئ.

عند تحرير زر **PTT**، تستمر مكالمة الطوارئ للمدة المخصصة لوقت تعليق مكالمة الطوارئ.

## بدء تنبيه طوارئ

إشعار:

إذا تمت برمجة الراديو على "صامت" أو "صامت مع صوت"، فلن يوفّر أي إشارات صوتية أو مرئية تدل على أنه يقوم بإرسال تنبيه طوارئ. وإذا تمت برمجته على "صامت"، فسيستمر التشغيل الصامت لمدة غير محددة حتى تقوم بالضغط على PTT أو الزر الذي تم تكوينه من أجل "إيقاف الطوارئ". إذا تمت برمجة الراديو على "صامت مع صوت"، فسيقوم تلقائيًا بإلغاء التشغيل الصامت عندما تقوم وحدة التحكم في الموقع ببيت تنبيه الطوارئ.

اضغط على زر الطوارئ البرتقالي.

عند إرسال تنبيه الطوارئ إلى وحدة تحكم في الموقع، تعرض شاشة الراديو رمز الطوارئ وجهة اتصال المجموعة المستخدمة لتنبيه الطوارئ وتنبيه الإرسال.

بمجرد إرسال تنبيه الطوارئ بنجاح وأثناء بثه لأجهزة الراديو الأخرى لسماعه، تصدر نغمة مؤشر إيجابية ويعرض الراديو تنبيه مرسل. إذا لم ينجح تنبيه الطوارئ، فستصدر نغمة مؤشر سلبية ويعرض الراديو فشل !-تنبيه.

## الخروج من وضع الطوارئ

إشعار:

إذا انتهت مكالمة الطوارئ نتيجة لانتهاء وقت تعليق الطوارئ، لكن لم تنته حالة الطوارئ، فاضغط على زر الطوارئ مرة أخرى لبدء العملية من جديد.

إذا قمت ببدء تنبيه طوارئ بالضغط على زر الطوارئ المبرمج، فسيقوم الراديو بالخروج تلقائيًا من وضع الطوارئ بعد تلقي استجابة من نظام Connect Plus.

إذا قمت ببدء مكالمة طوارئ بالضغط على زر الطوارئ المبرمج، فسيتم تعيين قناة للراديو الخاص بك تلقائيًا عند توفرها. وبمجرد أن يقوم الراديو بإرسال رسالة تشير إلى الطوارئ، لن يمكنك إلغاء مكالمة الطوارئ. لكن، إذا قمت بالضغط على الزر مصادفةً أو لم تعد حالة الطوارئ موجودة، فقد ترغب في قول ذلك خلال القناة المعيّنة. عند تحرير زر PTT، يتم إيقاف مكالمة الطوارئ بعد انتهاء وقت تعليق مكالمة الطوارئ.

في حالة تكوين الراديو لمكالمة طوارئ مع صوت للتتبع، استخدم فترة "الميكروفون النشط" لبيان خطئك، ثم اضغط على زر PTT وحرره لإيقاف الإرسال. يتم إيقاف مكالمة الطوارئ بعد انتهاء وقت تعليق مكالمة الطوارئ.

## الرسائل النصية

الراديو الخاص بك قادر على تلقي البيانات، مثل الرسالة النصية، من راديو آخر أو من أحد تطبيقات الرسائل النصية.

يوجد نوعان من الرسائل النصية، رسالة نصية قصيرة لراديو نقال رقمي (DMR) ورسالة نصية. الحد الأقصى لطول الرسالة النصية القصيرة للراديو النقال الرقمي (DMR) هو 23 حرفًا. الحد الأقصى لطول الرسالة النصية هو 280 حرفًا، متضمنة سطر الموضوع. لا يظهر سطر الموضوع إلا عندما تستقبل رسائل من تطبيقات البريد الإلكتروني.

## إشعار:

ينطبق الحد الأقصى للطول فقط على الطرز التي تحتوي على أحدث البرامج والأجهزة. وبالنسبة إلى طرز الراديو التي تحتوي على برامج وأجهزة قديمة، يبلغ الحد الأقصى لطول الرسالة النصية 140 حرفًا. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات. بالنسبة للغة العربية، يكون اتجاه إدخال النصوص من اليمين إلى اليسار.

## إرسال رسالة نصية سريعة

يدعم الراديو 10 رسائل نصية سريعة كحد أقصى، كما هو مبرمج من قبل الوكيل. على الرغم من تحديد الرسائل النصية السريعة مسبقًا، يمكنك تحرير كل رسالة قبل إرسالها.

إذا كنت ترسل الرسالة، فقم بما يلي لتحديد المستلم:

- اضغط على  أو  للوصول إلى الاسم المستعار المطلوب واضغط على  للتحديد.
- اضغط على  أو  للوصول إلى اتصال يدوي، واضغط على  للتحديد. سيعرض السطر الأول من الشاشة الرقم. يعرض السطر الثاني من الشاشة مؤشرًا وامضًا. أدخل

الاسم المستعار للمشارك أو المعرف الخاص به ثم اضغط على

تعرض الشاشة إرسال رسالة لتأكيد أنه يتم الآن إرسال رسالتك. إذا تم إرسال الرسالة بنجاح، فستصدر نغمة وستعرض الشاشة تم إرسال الرسالة.

إذا تعذر إرسال الرسالة، فستصدر نغمة منخفضة وتعرض الشاشة فشل إرسال الرسالة.

في حالة فشل إرسال الرسالة النصية، سيعود جهاز الراديو إلى شاشة خيار إعادة إرسال (راجع إدارة الرسائل النصية التي فشل إرسالها في صفحة 245).

## إرسال رسالة نصية سريعة باستخدام زر الوصول بلمسة واحدة

يمكنك إرسال رسائل نصية سريعة باستخدام الزر القابل للبرمجة الذي برمجته الوكيل.

## عرض رسالة نصية محفوظة

1 قم بالوصول إلى ميزة رسالة نصية.

الخطوات	عناصر التحكم في الراديو
	زر رسالة نصية المبرمج
	اضغط على زر رسالة نصية المبرمج.
	Menu (القائمة)
a	اضغط على  للوصول إلى القائمة.
b	اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى مسودات واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الرسالة المطلوبة واضغط على  للتحديد.

اضغط على زر الوصول بلمسة واحدة المبرمج لإرسال رسالة نصية سريعة محددة مسبقًا إلى اسم مستعار محدد مسبقًا.

تعرض الشاشة إرسال رسالة لتأكيد أنه يتم الآن إرسال رسالتك.

إذا تم إرسال الرسالة، فستصدر نغمة وتعرض الشاشة تم إرسال الرسالة بنجاح .

إذا تعذر إرسال الرسالة، فستصدر نغمة منخفضة وتعرض الشاشة فشل إرسال الرسالة .

في حالة فشل إرسال الرسالة النصية، سيعود جهاز الراديو إلى شاشة خيار إعادة إرسال (راجع إدارة الرسائل النصية التي فشل إرسالها في صفحة 245).

## الوصول إلى مجلد المسودات

يخزن المجلد مسودات آخر عشر (10) رسائل محفوظة كحد أقصى. عند امتلاء المجلد، ستحل الرسالة النصية المحفوظة التالية تلقائيًا محل أقدم رسالة نصية في المجلد.

إشعار:

يمكنك تحرير رسالة نصية محفوظة قبل إرسالها. يكون ذلك متاحًا فقط مع الميكروفون المزود ببلوحة مفاتيح (راجع تحرير رسالة نصية محفوظة

وإرسالها في صفحة 244. اضغط لفترة طويلة على  في أي وقت للعودة إلى الشاشة الرئيسية.

## تحرير رسالة نصية محفوظة وإرسالها

- اضغط على  أو  للوصول إلى اتصال يدوي، واضغط على  للتحديد. سيرعرض السطر الأول من الشاشة الرقم #: يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الاسم المستعار للمشارك أو المعرف الخاص به ثم اضغط على .

تعرض الشاشة إرسال رسالة لتأكيد أنه يتم الآن إرسال رسالتك. إذا تم إرسال الرسالة بنجاح، فستصدر نغمة وستعرض الشاشة تم إرسال الرسالة. إذا تعذر إرسال الرسالة، فستصدر نغمة منخفضة وتعرض الشاشة فشل إرسال الرسالة. إذا تعذر إرسال الرسالة النصية، سيتم نقلها إلى مجلد العناصر المرسله وتمييزها برمز فشل الإرسال.

## حذف رسالة نصية محفوظة من المسودات

- 1 قم بالوصول إلى ميزة رسالة نصية.

1 اضغط على  مرة أخرى أثناء عرض الرسالة.

2 اضغط على  أو  للوصول إلى تحرير واضغط على  للتحديد. يظهر مؤشر وامض.

3 استخدم لوحة المفاتيح لكتابة الرسالة.

اضغط على  للانتقال مسافة إلى اليسار. اضغط على المفتاح  أو  للانتقال مسافة واحدة إلى اليمين. اضغط على المفتاح  لحذف أي أحرف غير مرغوب فيها. اضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

4 اضغط على  بمجرد إنشاء الرسالة.

5 حدد مستلم الرسالة بواسطة:

- اضغط على  أو  للوصول إلى الاسم المستعار المطلوب واضغط على  للتحديد.

## إدارة الرسائل النصية التي فشل إرسالها

يمكنك تحديد أحد الخيارات التالية أثناء التواجد في شاشة الخيار إعادة إرسال:

- إعادة إرسال
- تقديم
- تحرير

## إعادة إرسال رسالة نصية

اضغط على  لإعادة إرسال نفس الرسالة إلى نفس الاسم المستعار أو المعرف الخاص بالمشارك/المجموعة.

إذا تم إرسال الرسالة بنجاح، فستصدر نغمة وستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا تعذر إرسال رسالة، تعرض الشاشة إشعار سلبي صغير.

عناصر التحكم في الراديو	الخطوات
زر رسالة نصية المبرمج	اضغط على زر رسالة نصية المبرمج.
<b>Menu (القائمة)</b>	<p><b>a</b> اضغط على  للوصول إلى القائمة.</p> <p><b>b</b> اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.</p>

2 اضغط على  أو  للوصول إلى مسودات واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الرسالة المطلوبة واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى حذف واضغط على  لحذف الرسالة النصية.

## إعادة توجيه رسالة نصية

حدد تقديم لإرسال الرسالة إلى الاسم المستعار أو المعرف الخاص بمشترك آخر/ مجموعة أخرى.

1 اضغط على  أو  للوصول إلى تقديم واضغط على  للتحديد.

2 لتحديد مستلم الرسالة، اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.

تعرض الشاشة إرسال رسالة لتأكيد أنه يتم الآن إرسال رسالتك.

إذا تم إرسال الرسالة بنجاح، فستصدر نغمة وستعرض الشاشة تم إرسال الرسالة.

إذا تعذر إرسال الرسالة، فستصدر نغمة منخفضة وتعرض الشاشة فشل إرسال الرسالة =

## إدارة الرسائل النصية المرسلة

بمجرد إرسال رسالة إلى راديو آخر، يتم حفظها في العناصر المرسلة. وتتم دائماً إضافة أحدث رسالة نصية مرسلة في أعلى قائمة العناصر المرسلة.

يكون لمجلد العناصر المرسلة تخزين آخر 30 رسالة مرسلة كحد أقصى. عندما يمتلئ المجلد، ستحل تلقائياً الرسالة النصية المرسلة التالية محل أقدم رسالة نصية في المجلد.

إشعار:

اضغط لفترة طويلة على  في أي وقت للعودة إلى الشاشة الرئيسية.

## عرض رسالة نصية مرسلة

1 قم بالوصول إلى ميزة رسالة نصية.

عناصر التحكم في الراديو	الخطوات
زر رسالة نصية المبرمج	اضغط على زر رسالة نصية المبرمج.
Menu (القائمة)	a اضغط على  للوصول إلى القائمة. b اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.

الخيار	الخطوات
تقديم	حدد تقديم لإرسال الرسالة النصية المحددة إلى الاسم المستعار أو المعرف الخاص بمشارك آخر/ مجموعة أخرى (راجع إعادة توجيه رسالة نصية في صفحة 246).
حذف	حدد حذف لحذف الرسالة النصية.
إعادة إرسال	حدد إعادة إرسال لإعادة إرسال الرسالة النصية المحددة إلى الاسم المستعار أو المعرف الخاص بنفس المشارك/المجموعة. تعرض الشاشة إرسال رسالة للتأكيد على أنه يتم إرسال نفس الرسالة إلى نفس الراديو المستهدف. إذا تم إرسال الرسالة بنجاح، فستصدر نغمة وستعرض الشاشة تم إرسال الرسالة. إذا تعذر إرسال الرسالة، فستصدر نغمة منخفضة وتعرض الشاشة فشل إرسال الرسالة. في حال فشل إرسال الرسالة، سيعود الراديو إلى شاشة الخيار إعادة إرسال. اضغط على  لإعادة إرسال الرسالة إلى الاسم المستعار أو المعرف الخاص بنفس المشارك/المجموعة.

2 اضغط على  أو  للوصول إلى العناصر المرسله واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الرسالة المطلوبة واضغط على  للتحديد.  
يشير الرمز الموجود في الركن العلوي الأيمن من الشاشة إلى حالة الرسالة (راجع رموز العناصر المرسله في صفحة 199).

## إرسال رسالة نصية مرسله

يمكنك تحديد أحد الخيارات التالية أثناء عرض رسالة نصية مرسله:

- إعادة إرسال
- تقديم
- تحرير
- حذف

1 اضغط على  مرة أخرى أثناء عرض الرسالة.

2  أو  للوصول إلى أحد الخيارات التالية واضغط على  للتحديد.

إذا قمت بإنهاء شاشة إرسال الرسالة أثناء إرسال الرسالة، فسيقوم الراديو بتحديث حالة الرسالة في مجلد العناصر المرسله بدون أي إشارة صوتية أو مرئية.

إذا تغير وضع الراديو أو تم إيقاف تشغيله قبل تحديث حالة الرسالة في العناصر المرسله، فسيُتعدَر على الراديو إكمال أي رسائل قيد التقدم وسيُقوم بتعليمها تلقائيًا برمز فشل الإرسال.

يدعم الراديو خمس رسائل قيد التقدم كحد أقصى في المرة الواحدة. خلال هذه الفترة، يتعدَر على الراديو إرسال أي رسالة جديدة ويقوم بتعليمها تلقائيًا برمز فشل الإرسال.

## حذف كل الرسائل النصية المرسله من العناصر المرسله

1 قم بالوصول إلى ميزة رسالة نصية.

عناصر التحكم في الراديو	الخطوات
زر رسالة نصية المبرمج	اضغط على زر رسالة نصية المبرمج.
Menu (القائمة)	a اضغط على  للوصول إلى القائمة.

### عناصر التحكم في الراديو الخطوات

b اضغط على  أو  للوصول

إلى الرسائل واضغط على  للتحديد.

2

اضغط على  أو  للوصول إلى العناصر المرسله واضغط على  للتحديد.

عند تحديد عناصر مرسله وعدم احتوائها على أية رسائل نصية، ستعرض الشاشة القائمة فارغة، ويتم إصدار نغمة منخفضة في حالة تشغيل نغمات لوحة المفاتيح.

3

اضغط على  أو  للوصول إلى حذف الكل واضغط على  للتحديد.

4

اختر أيًا مما يلي.

•  أو  للوصول إلى نعم واضغط على  للتحديد. تعرض الشاشة إشعارًا إيجابيًا صغيرًا.

- اضغط على  للعودة إلى صندوق الوارد.
- اضغط على  مرة أخرى للرد على الرسالة النصية أو توجيهها أو حذفها.

## إدارة الرسائل النصية المتلقاة

- استخدم صندوق الوارد لإدارة الرسائل النصية. يمكن لصندوق الوارد تخزين 30 رسالة كحد أقصى.
- يتم فرز الرسائل النصية في صندوق الوارد وفقًا لآخر رسالة متلقاة.
- يدعم الراديو الخيارات التالية الخاصة بالرسائل النصية:
  - الرد (عبر النص السريع)
  - تقديم
  - حذف
  - حذف الكل

إشعار:

إذا كان نوع القناة غير متطابق، فيمكنك فقط إعادة توجيه كل الرسائل المستلمة أو حذفها.

اضغط لفترة طويلة على  في أي وقت للعودة إلى الشاشة الرئيسية.

-  أو  للوصول إلى لا واضغط على  للعودة للشاشة السابقة.

## تلقي رسالة نصية

- عندما يتلقى الراديو رسالة، تعرض الشاشة قائمة الإعلانات مع الاسم المستعار أو المعرف الخاص بالمرسل ورمز الرسالة.
- يمكنك تحديد أحد الخيارات التالية عند تلقي رسالة نصية:
  - قراءة
  - Read Later (قراءة لاحقًا)
  - حذف

## قراءة رسالة نصية

- 1 اضغط على  أو  للوصول إلى قراءة ؟ واضغط على  للتحديد.
- سيتم فتح الرسالة المحددة في صندوق الوارد.

2 قم بأحد الإجراءات التالية:

## عرض رسالة نصية من صندوق الوارد

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى عرض الرسائل.

5 قم بأحد الإجراءات التالية:

- اضغط على  لتحديد الرسالة الحالية، ثم اضغط على  مرة أخرى للرد، أو إعادة توجيهها أو حذفها.
- اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## الرد على رسالة نصية من صندوق الوارد

1 قم بالوصول إلى ميزة رسالة نصية.

عناصر التحكم في الراديو	الخطوات
زر رسالة نصية المبرمج	اضغط على زر رسالة نصية المبرمج.
Menu (القائمة)	a اضغط على  للوصول إلى القائمة. b اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى صندوق الوارد واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الرسالة المطلوبة واضغط على  للتحديد.

عناصر التحكم في الراديو	الخطوات
زر رسالة نصية المبرمج	اضغط على زر رسالة نصية المبرمج.
<b>Menu (القائمة)</b>	<p><b>a</b> اضغط على  للوصول إلى القائمة.</p> <p><b>b</b> اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.</p>

2 اضغط على  أو  للوصول إلى صندوق الوارد واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الرسالة المطلوبة واضغط على  للتحديد.

4 اضغط على  مرة أخرى للوصول إلى القائمة الفرعية.

4 اضغط على  مرة أخرى للوصول إلى القائمة الفرعية.

5 استخدم لوحة المفاتيح لكتابة/تحرير الرسالة.

6 اضغط على  بمجرد إنشاء الرسالة.  
تعرض الشاشة إرسال رسالة لتأكيد أنه يتم الآن إرسال رسالتك.  
إذا تم إرسال الرسالة بنجاح، فستصدر نغمة وستعرض الشاشة تم إرسال الرسالة.  
إذا تعذر إرسال الرسالة، فستصدر نغمة منخفضة وتعرض الشاشة فشل إرسال الرسالة.

إذا تعذر إرسال الرسالة، فسيعود الراديو إلى شاشة الخيار إعادة إرسال (راجع إدارة الرسائل النصية التي فشل إرسالها في صفحة 245).

## حذف رسالة نصية من صندوق الوارد

1 قم بالوصول إلى ميزة رسالة نصية.

عناصر التحكم في الراديو	الخطوات
	<b>b</b> اضغط على  أو  للوصول إلى الرسائل واضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى صندوق الوارد  
واضغط على  للتحديد.

عند تحديد صندوق الوارد وعدم احتوائه على أي رسائل نصية،  
ستعرض الشاشة القائمة فارغة، وتصدر نغمة منخفضة في حالة  
تشغيل نغمات لوحة المفاتيح (راجع تشغيل نغمات لوحة المفاتيح أو إيقاف  
تشغيلها في صفحة 173).

3 اضغط على  أو  للوصول إلى حذف الكل واضغط على  
 للتحديد.

5 اضغط على  أو  للوصول إلى حذف واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى نعم واضغط على  للوصول إلى حدد.  
تعرض الشاشة تم حذف رسالة وتعود الشاشة إلى صندوق الوارد.

## حذف كل الرسائل النصية من صندوق الوارد

1 قم بالوصول إلى ميزة رسالة نصية.

عناصر التحكم في الراديو	الخطوات
زر رسالة نصية المبرمج	اضغط على زر رسالة نصية المبرمج.
Menu (القائمة)	<b>a</b> اضغط على  للوصول إلى القائمة.

يمكنك الوصول إلى هذه الميزة عن طريق تنفيذ أحد الإجراءات التالية:

- اضغط على زر السريّة المبرمج للتبديل بين تشغيل السريّة أو إيقاف تشغيلها.
- استخدام قائمة الراديو كما هو موضح في الخطوات التالية.

إشعار:

قد لا توفر بعض طرز الراديو ميزة السريّة هذه. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو أو  أو  للوصول إلى Connect Plus واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تعزيز السريّة.

في حالة عرض الشاشة تشغيل، اضغط على  لتمكين السريّة. سيعرض الراديو رسالة للتأكيد على التحديد.

4 اضغط على  أو  للوصول إلى نعم واضغط على  للوصول إلى حدد.

تعرض الشاشة تم مسح صندوق الوارد.

## السريّة

تساعدك هذه الميزة – إذا تم تمكينها – على منع تنصت المستخدمين غير المسموح لهم على إحدى القنوات من خلال استخدام أحد حلول التشفير القائمة على البرامج. لا يتم تشفير أجزاء الإشارات ومعرف المستخدم الخاصة بالإرسال.

يجب تمكين السريّة في الراديو الخاص بك على موضع محدد القناة الحالي لإجراء إرسال يدعم السريّة، إلا أن ذلك ليس مطلباً ضرورياً لتلقي الإرسال. أثناء التواجد على موضع محدد قناة يدعم السريّة، يظل الراديو قادراً على تلقي إرسالات واضحة (غير مشفرة).

يدعم الراديو الخاص بك السريّة المعززة.

لفك تشفير إرسال مكاملة يدعم السريّة، تجب برمجة الراديو لتكون قيمة المفتاح ومعرف المفتاح (السريّة المعززة) الخاصين به مماثلين للراديو المرسل.

إذا تلقي الراديو مكاملة مشفرة ذات قيمة مفتاح مختلفة ومعرف مفتاح مختلف، فلن تسمع شيئاً على الإطلاق (السريّة المعززة).

إذا كان الراديو معيّنًا به نوع سريّة، فستعرض الشاشة الرئيسية رمز أمن أو غير أمن، إلا أثناء قيام الراديو بإرسال أو تلقي مكاملة أو تنبيه طوارئ.

يضيء مؤشر LED باللون الأخضر الثابت أثناء قيام الراديو بالإرسال ويومض باللون الأخضر بشكل سريع أثناء قيام الراديو بتلقي إرسال مستمر يدعم السريّة.

## تعطيل الراديو

1 قم بالوصول إلى هذه الميزة عن طريق تنفيذ أحد الإجراءات التالية:

عناصر التحكم في الراديو	الخطوات
زر تعطيل الراديو	<p><b>a</b> اضغط على زر تعطيل الراديو المبرمج.</p> <p><b>b</b> اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.</p>
قائمة الراديو	<p><b>a</b> اضغط على  للوصول إلى القائمة.</p> <p><b>b</b> اضغط على  أو  للوصول إلى جهات الاتصال واضغط على  للتحديد. يتم فرز الإدخالات أبجديًا.</p> <p><b>c</b> استخدم إحدى الخطوات الموضحة أدناه لتحديد الاسم المستعار أو المعرف الخاص بالمشارك المطلوب:</p>

في حالة عرض الشاشة إيقاف تشغيل، اضغط على  لتعطيل السرية. سيعرض الراديو رسالة للتأكيد على التحديد.

إذا كان الراديو معيّنًا به نوع سرية، فسيظهر رمز آمن أو غير آمن في شريط الحالة، إلا أثناء قيام الراديو بإرسال أو تلقي تنبيه طوارئ.

## إجراء مكالمة (مشفرة) تدعم السرية

قم بالتبديل إلى تشغيل السرية باستخدام زر السرية المبرمج أو باستخدام القائمة. يجب تمكين ميزة السرية على الراديو الخاص بك لكي يقوم موضع القناة المحددة حاليًا بإجراء إرسال يدعم السرية. عند تمكين السرية لموضع القناة المحددة حاليًا، سيتم تشفير جميع عمليات الإرسال الصوتي التي يتم إجراؤها بواسطة الراديو الخاص بك. ويشمل هذا المكالمة الجماعية ومكالمة المجموعات المتعددة والرد أثناء المكالمات التي تم مسحها والمكالمة الشاملة للموقع ومكالمة الطوارئ والمكالمة الخاصة. لن تتمكن سوى أجهزة الراديو المتلقية التي لها قيمة مفتاح ومعرف مفتاح ممتلئان للراديو الخاص بك من إلغاء تشفير الإرسال.

## الأمان

يمكنك تمكين أي راديو أو تعطيله في النظام. على سبيل المثال، قد تريد تعطيل راديو تمت سرقة، لمنع اللص من استخدامه، ثم تمكين هذا الراديو عند استعادته.

إشعار:

يقتصر إجراء تعطيل الراديو وتمكينه على أجهزة الراديو التي تدعم هاتين الوظيفتين. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

عناصر التحكم في الراديو	الخطوات
	<ul style="list-style-type: none"> <li>• يعرض السطر الأول من الشاشة رقم لاسلكي. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. استخدم لوحة المفاتيح لإدخال الاسم المستعار للمشارك أو معرفه واضغط على  .</li> </ul> <p><b>d</b> اضغط على  أو  للوصول إلى تعطيل الراديو واضغط على  للتحديد.</p>

تعرض الشاشة تعطيل الراديو: «الاسم المستعار أو المعرف المستهدف» ويومض مؤشر LED باللون الأخضر.

## 2 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح، فستصدر نغمة مؤشر إيجابية وستعرض الشاشة تعطيل الراديو ناجح.

عناصر التحكم في الراديو	الخطوات
	<ul style="list-style-type: none"> <li>• حدد الاسم المستعار أو المعرف المطلوب مباشرة.</li> <li>• اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.</li> <li>• استخدم قائمة اتصال يدوي.</li> <li>• اضغط على  أو  للوصول إلى اتصال يدوي واضغط على  للتحديد.</li> <li>• اضغط على  أو  للوصول إلى رقم لاسلكي واضغط على  للتحديد.</li> </ul>

إذا لم يتم بنجاح، فستصدر نغمة مؤشر سلبية وستعرض الشاشة تعطيل الراديو فشل.

## تمكين الراديو

1 قم بالوصول إلى هذه الميزة عن طريق تنفيذ أحد الإجراءات التالية:

عناصر التحكم في الراديو	الخطوات
زر تمكين الراديو	<p><b>a</b> اضغط على زر تمكين الراديو المبرمج.</p> <p><b>b</b> اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.</p>
قائمة الراديو	<p><b>a</b> اضغط على  للوصول إلى القائمة.</p> <p><b>b</b> اضغط على  أو  للوصول إلى جهات الاتصال واضغط على  للتحديد. يتم فرز الإدخالات أجددًا.</p>

## عناصر التحكم في الراديو

**c** استخدم إحدى الخطوات الموضحة أدناه لتحديد الاسم المستعار أو المعرف الخاص بالمشارك المطلوب

- حدد الاسم المستعار أو المعرف المطلوب مباشرة.
- اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب واضغط على  للتحديد.
- استخدم قائمة اتصال يدوي.
- اضغط على  أو  للوصول إلى اتصال يدوي واضغط على  للتحديد.

## 2 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح، فستصدر نغمة مؤشر إيجابية وستعرض الشاشة تمكين الراديو ناجح.

إذا لم يتم بنجاح، فستصدر نغمة مؤشر سلبية وستعرض الشاشة فشل تمكين الراديو.

## تشغيل بلوتوث

### إشعار:

إن تم تعطيله عن طريق CPS، يتم تعطيل جميع الميزات المتعلقة ببلوتوث ويتم مسح قاعدة بيانات بلوتوث.

تتيح لك هذه الميزة استخدام جهاز الراديو مع جهاز ممكن به تقنية بلوتوث (ملحق) عبر اتصال بلوتوث لاسلكي. يدعم الراديو كلاً من أجهزة Motorola Solutions والأجهزة المتوفرة في الأسواق (COTS) الممكنة لتقنية Bluetooth.

يعمل البلوتوث في نطاق 10 أمتار (32 قدم) من خط الرؤية. ويكون ذلك عبارة عن مسار خالٍ من العوائق بين الراديو والجهاز الذي يدعم البلوتوث.

لا يوصى بترك الراديو الخاص بك خلف عائق ما وتتوقع أن يعمل جهازك الذي يدعم بلوتوث بدرجة موثوقة عالية عند فصلهما.

عند حواف مناطق الاستقبال، ستظهر جودة الصوت والنغمة على أنها "مشوشة" أو "مقطعة". لحل هذه المشكلة، قم فقط بوضع جهاز الراديو والجهاز الممكن به تقنية Bluetooth بالقرب من بعضهما (ضمن النطاق المحدد 10 أمتار/32 قدمًا) لإعادة

## عناصر التحكم في الراديو

### الخطوات

• اضغط على  أو  للوصول إلى رقم لاسلكي واضغط على  للتحديد.

• يعرض السطر الأول من الشاشة رقم لاسلكي. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. استخدم لوحة المفاتيح لإدخال الاسم المستعار للمشارك أو معرفه واضغط على .

d اضغط على  أو  للوصول إلى تمكين الراديو واضغط على  للتحديد.

تعرض الشاشة تمكين الراديو: الاسم المستعار أو المعرف الخاص بالمشارك ويضيء مؤشر LED بلون أخضر ثابت.

## 4 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل واضغط على  للتحديد. تعرض الشاشة تشغيل وتظهر العلامة ✓ على يسار الحالة المحددة.
- اضغط على  أو  للوصول إلى إيقاف واضغط على  للتحديد. تعرض الشاشة إيقاف وتظهر العلامة ✓ على يسار الحالة المحددة.

## البحث عن جهاز بلوتوث والاتصال به

لا تقم بإيقاف تشغيل الجهاز الذي يدعم Bluetooth أو الضغط على  أثناء إجراء عملية البحث والاتصال حيث يؤدي ذلك إلى إلغاء التشغيل.

1 قم بتشغيل الجهاز الذي يدعم بلوتوث وضعه في وضع الأزواج. راجع دليل المستخدم الخاص بالجهاز الذي يدعم بلوتوث.

2 في الراديو، اضغط على  للوصول إلى القائمة.

إنشاء استقبال صوتي واضح. تتميز وظيفة البلوتوث الخاصة بالراديو بطاقة قصوى تبلغ 2.5 ميجاوات (4 ديسيبل) في نطاق 10 أمتار/32 قدمًا.

بإمكان الراديو دعم ما يصل إلى 4 اتصالات بلوتوث في وقت واحد مع أجهزة تدعم بلوتوث من أنواع فريدة. على سبيل المثال، سماعة رأس وجهاز اضغط للتحديث فقط (POD). لكنه لا يدعم الاتصالات المتعددة مع الأجهزة التي تدعم بلوتوث من النوع ذاته.

راجع دليل مستخدم الجهاز الذي يدعم Bluetooth للحصول على مزيد من التفاصيل حول الإمكانيات الكاملة لجهازك الذي يدعم Bluetooth.

## تشغيل بلوتوث وإيقاف تشغيله

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى حالتني واضغط على  للتحديد.

ستعرض الشاشة تشغيل وإيقاف. تتم الإشارة إلى الحالة الحالية بالعلامة ✓.

6 اضغط على  أو  للوصول إلى اتصال واضغط على  للتحديد.

تعرض الشاشة اتصال بـ «الجهاز». قد يتطلب الجهاز الذي يدعم بلوتوث خطوات إضافية لإكمال الازدواج. راجع دليل المستخدم الخاص بالجهاز الذي يدعم بلوتوث.

إذا تم بنجاح، فستعرض شاشة الراديو «الجهاز» متصل. تصدر نغمة وتظهر علامة و✓ بجانب الجهاز المتصل. سيظهر رمز Bluetooth متصل على شريط الحالة..  
إذا لم يتم بنجاح، فستعرض شاشة الراديو الاتصال فشل.

## البحث عن جهاز بلوتوث والاتصال منه (وضع قابلية الاكتشاف)

لا تقم بإيقاف تشغيل بلوتوث أو الراديو الخاص بك أثناء إجراء عملية البحث والاتصال حيث إن ذلك قد يؤدي إلى إلغاء العملية.

1 قم بتشغيل بلوتوث.

راجع تشغيل بلوتوث وإيقاف تشغيله في صفحة 258.

2 اضغط على  للوصول إلى القائمة.

3 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الأجهزة واضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى الجهاز المطلوب واضغط على  للتحديد.
- اضغط على  أو  للوصول إلى بحث عن أجهزة لتحديد موقع الأجهزة المتاحة. اضغط على  أو  للوصول إلى الجهاز المطلوب واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الاكتشاف واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الجهاز المطلوب واضغط على  للتحديد.

يمكن حينئذٍ العثور على الراديو الخاص بك من خلال الأجهزة الأخرى التي تدعم بلوتوث لمدة مبرمجة. يسمى ذلك وضع قابلية الاكتشاف.

5 اضغط على  أو  للوصول إلى قطع الاتصال واضغط على  للتحديد.

5 قم بتشغيل الجهاز الذي يدعم بلوتوث وقم بإقرانه مع الراديو. راجع دليل المستخدم الخاص بالجهاز الذي يدعم بلوتوث.

تعرض الشاشة قطع الاتصال عن «الجهاز». قد يتطلب الجهاز الذي يدعم بلوتوث خطوات إضافية لقطع الاتصال. راجع دليل المستخدم الخاص بالجهاز الذي يدعم بلوتوث.

## قطع الاتصال عن جهاز بلوتوث

1 في الراديو، اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

ستعرض شاشة الراديو «الجهاز» غير متصل. تصدر نغمة مؤشر إيجابية و✓ تختفي من جانب الجهاز المتصل. يختفي رمز بلوتوث متصل على شريط الحالة.

## تبديل توجيه الصوت بين سماعة الراديو الداخلية وجهاز بلوتوث

يمكنك تبديل التوجيه الصوتي بين سماعة الراديو الداخلية والملحق الخارجي الذي يدعم البلوتوث.

- 5 اضغط على  أو  للوصول إلى عرض التفاصيل واضغط على  للتحديد.

## حذف اسم الجهاز

يمكنك إزالة جهاز تم قطع الاتصال به من قائمة الأجهزة التي تدعم بلوتوث.

- 1 اضغط على  للوصول إلى القائمة.
- 2 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.
- 3 اضغط على  أو  للوصول إلى الأجهزة واضغط على  للتحديد.
- 4 اضغط على  أو  للوصول إلى الجهاز المطلوب واضغط على  للتحديد.

اضغط على زر م.ص. بلوتوث المبرمج.

- تصدر نغمة وتعرض الشاشة يوجه الصوت إلى الراديو.
- تصدر نغمة وتعرض الشاشة يوجه الصوت إلى البلوتوث.

## عرض تفاصيل الجهاز

- 1 اضغط على  للوصول إلى القائمة.
- 2 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.
- 3 اضغط على  أو  للوصول إلى الأجهزة واضغط على  للتحديد.
- 4 اضغط على  أو  للوصول إلى الجهاز المطلوب واضغط على  للتحديد.

5 اضغط على ▲ أو ▼ لزيادة أو خفض القيم واضغط على OK للتحديد.

## موقع داخلي

إشعار:

تتطبق ميزة الموقع الداخلي على الطرز المزودة بأحدث البرامج والأجهزة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يُستخدم الموقع الداخلي لتتبع موقع مستخدم الراديو. عند تنشيط الموقع الداخلي، يكون الراديو في وضع قابلية اكتشاف محدودة. تُستخدم إشارات مخصصة لتحديد موقع الراديو والتعرف على موضعه.

## تشغيل الموقع الداخلي أو إيقاف تشغيله

يمكنك تشغيل ميزة الموقع الداخلي أو إيقاف تشغيلها عبر تنفيذ أحد الإجراءات التالية.

- انتقل إلى هذه الميزة عبر القائمة.

a. اضغط على OK للوصول إلى القائمة.

b. اضغط على ▲ أو ▼ للوصول إلى بلوتوث واضغط على OK للتحديد.

5 اضغط على ▲ أو ▼ للوصول إلى حذف واضغط على OK للتحديد.

ستعرض الشاشة تم حذف اسم الجهاز.

## اكتساب الميكروفون عبر بلوتوث

يتيح التحكم في قيمة اكتساب ميكروفون الجهاز المتصل الذي يدعم بلوتوث.

1 اضغط على OK للوصول إلى القائمة.

2 اضغط على ▲ أو ▼ للوصول إلى بلوتوث واضغط على OK للتحديد.

3 اضغط على ▲ أو ▼ للوصول إلى اكتساب ميك BT واضغط على OK للتحديد.

4 اضغط على ▲ أو ▼ أو للوصول إلى نوع اكتساب ميكروفون BT والقيم الحالية.

لتحرير القيم، اضغط على OK للتحديد.

- انتقل إلى هذه الميزة باستخدام الزر المبرمج.
  - a. اضغط لفترة طويلة على زر الموقع الداخلي لتشغيل الموقع الداخلي. تعرض الشاشة تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية. يحدث أحد الأمور التالية.
    - إذا نجح تشغيل الموقع الداخلي فسيظهر رمز "الموقع الداخلي متوفر" على الشاشة الرئيسية.
    - إذا لم ينجح تشغيل الموقع الداخلي فستعرض الشاشة فشل التشغيل. إذا لم ينجح، فستسمع نغمة مؤشر سلبية.
  - b. اضغط على زر الموقع الداخلي المبرمج لإيقاف تشغيل الموقع الداخلي. تعرض الشاشة إيقاف تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية. يحدث أحد الأمور التالية.
    - إذا نجح إيقاف تشغيل الموقع الداخلي فسيختفي رمز "الموقع الداخلي متوفر" من الشاشة الرئيسية.
    - إذا لم ينجح إيقاف تشغيل الموقع الداخلي فستعرض الشاشة فشل إيقاف التشغيل. إذا لم ينجح، فستسمع نغمة مؤشر سلبية.

- c. اضغط على  أو  للوصول إلى موقع داخلي واضغط على  للتحديد.
- d. اضغط على  لتشغيل الموقع الداخلي. تعرض الشاشة تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية. يحدث أحد الأمور التالية.
  - إذا نجح تشغيل الموقع الداخلي فسيظهر رمز "الموقع الداخلي متوفر" على الشاشة الرئيسية.
  - إذا لم ينجح تشغيل الموقع الداخلي فستعرض الشاشة فشل التشغيل. ستسمع نغمة مؤشر سلبية.
- e. اضغط على  لإيقاف تشغيل الموقع الداخلي. تعرض الشاشة إيقاف تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية. يحدث أحد الأمور التالية.
  - إذا نجح إيقاف تشغيل الموقع الداخلي فسيختفي رمز "الموقع الداخلي متوفر" من الشاشة الرئيسية.
  - إذا لم ينجح إيقاف تشغيل الموقع الداخلي فستعرض الشاشة فشل إيقاف التشغيل. ستسمع نغمة مؤشر سلبية.

سيظهر رمز الإعلام على شريط الحالة عندما تحتوي قائمة الإعلام على حدث واحد أو أكثر.

تدعم القائمة 40 حدثًا غير مقروء كحد أقصى. عندما تكون القائمة ممتلئة، يحل الحدث التالي تلقائيًا محل أقدم حدث.

إشعار:

بعد قراءة الأحداث، تتم إزالتها من قائمة الإعلام.

## الوصول إلى قائمة الإعلام

اتبع الإجراء للوصول إلى قائمة الإعلام.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى إعلام واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى الحدث المطلوب واضغط على  للتحديد.

اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## الوصول إلى معلومات إشارات الموقع الداخلي

اتبع الإجراء للوصول إلى معلومات إشارات الموقع الداخلي.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى موقع داخلي واضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى إشارات واضغط على  للتحديد.

ستعرض الشاشة معلومات الإشارات.

## قائمة الإعلام

يحتوي الراديو على قائمة إعلام تجمع كل الأحداث "غير المقروءة" على القناة، مثل الرسائل النصية غير المقروءة والمكالمات الفائتة وتنبهات المكالمات.

## تشغيل ميزة Wi-Fi

علامة Wi-Fi® هي علامة تجارية مسجلة لصالح Wi-Fi Alliance®.

إشعار:

تنطبق هذه الميزة على DM4601e فقط.

تسمح لك هذه الميزة بإعداد شبكة Wi-Fi والاتصال بها. تدعم ميزة Wi-Fi تحديثات البرامج الثابتة للراديو وبرنامج codeplug والموارد مثل حزم اللغات وبيان الصوت.

## تشغيل ميزة Wi-Fi أو إيقاف تشغيلها

تم تعيين زر تشغيل أو إيقاف تشغيل Wi-Fi المبرمج بواسطة الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

يمكن تخصيص إعلانات صوتية لزر تشغيل أو إيقاف تشغيل Wi-Fi من خلال CPS وفقاً لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يمكنك تشغيل ميزة Wi-Fi أو إيقاف تشغيلها عبر تنفيذ أحد الإجراءات التالية.

- اضغط على زر تشغيل أو إيقاف تشغيل Wi-Fi المبرمج. يصدر بيان صوت عند تشغيل ميزة Wi-Fi أو إيقاف تشغيل Wi-Fi.
- انتقل إلى هذه الميزة باستخدام القائمة.

a. اضغط على  للوصول إلى القائمة.

b. اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى تشغيل Wi-Fi واضغط على  للتحديد.

اضغط على  لتشغيل Wi-Fi. ستعرض الشاشة علامة ✓ بجانب ممكن.

اضغط على  لإيقاف تشغيل Wi-Fi. تختفي علامة ✓ من جانب ممكن.

## التوصيل بنقطة وصول إلى شبكة

عند تشغيل Wi-Fi، يقوم الراديو بالمشح للوصول إلى نقطة وصول إلى شبكة والاتصال بها.

كما يمكنك الاتصال بنقطة وصول إلى شبكة بواسطة القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

اضغط على زر **الاستعلام عن حالة Wi-Fi** المبرمج لمعرفة حالة الاتصال باستخدام بيان الصوت. يعلن بيان الصوت أنه قد تم إيقاف تشغيل Wi-Fi، أو أن Wi-Fi قيد التشغيل لكن لا اتصال، أو أن Wi-Fi قيد التشغيل ومتصل.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقطة وصول إلى شبكة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى اتصال واضغط على  للتحديد.

6 أدخل كلمة المرور واضغط على .

عند نجاح الاتصال، يعرض الراديو إشعاراً ويتم حفظ نقطة الوصول إلى الشبكة في قائمة ملفات التعريف.

## التحقق من حالة اتصال Wi-Fi

اتبع الإجراء للتحقق من حالة اتصال Wi-Fi.

- تعرض الشاشة تم إيقاف تشغيل Wi-Fi عندما يتم إيقاف تشغيل Wi-Fi.
  - تعرض الشاشة تم تشغيل Wi-Fi، متمل عند اتصال الراديو بشبكة.
  - تعرض الشاشة تم تشغيل Wi-Fi، غير متمل عند تشغيل Wi-Fi دون اتصال الراديو بأي شبكة.
- يمكن تخصيص إعلانات صوتية لنتائج الاستعلام عن حالة Wi-Fi عبر CPS وفقاً لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

إشعار: 

يتم تعيين زر **الاستعلام عن حالة Wi-Fi** المبرمج بواسطة الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

## تحديث قائمة الشبكة

اتبع الإجراء لتحديث قائمة الشبكة.

- قم بتنفيذ الإجراءات التالية لتحديث قائمة الشبكة عبر القائمة.

a. اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إضافة شبكة واضغط على  للتحديد.

5 أدخل معرف مجموعة الخدمات (SSID) واضغط على .

6 اضغط على  أو  للوصول إلى فتح واضغط على  للتحديد.

7 أدخل كلمة المرور واضغط على  .  
يعرض الراديو إشعارًا إيجابيًا صغيرًا للإشارة إلى أنه قد تم حفظ الشبكة بنجاح.

b. اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

عند دخول قائمة الشبكات، يقوم الراديو تلقائيًا بتحديث قائمة الشبكة.

- إذا كنت موجودًا في قائمة الشبكات بالفعل، فقم بتنفيذ الإجراء التالي لتحديث قائمة الشبكة.

اضغط على  أو  للوصول إلى تحديث واضغط على  للتحديد.

يقوم الراديو بتحديث أحدث قائمة للشبكة وعرضها.

## إضافة شبكة

إذا لم تتوفر شبكة مفضلة في قائمة الشبكات المتاحة، فقم بتنفيذ الإجراءات التالية لإضافة شبكة.

1 اضغط على  للوصول إلى القائمة.

## عرض تفاصيل نقاط الوصول إلى الشبكة

اتبع الإجراء لعرض تفاصيل نقاط الوصول إلى الشبكة.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى نقطة وصول إلى شبكة واضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى عرض التفاصيل واضغط على  للتحديد.

بالنسبة لنقطة الوصول إلى الشبكة المتصلة، يتم عرض معرف مجموعة الخدمات (SSID) ووضع الأمان وعنوان وحدة تحكم وصول الوسائط (MAC) وبروتوكول الإنترنت (IP).

بالنسبة لنقطة الوصول إلى الشبكة غير المتصلة، يتم عرض معرف مجموعة الخدمات (SSID) ووضع الأمان.

## إزالة نقاط الوصول إلى الشبكة

قم بتنفيذ الإجراءات التالية لإزالة نقاط الوصول إلى الشبكة من قائمة ملف التعريف.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى نقاط الوصول إلى الشبكة المحددة واضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى إزالة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيهه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى جميع النغمات واضغط على  للتحديد.

6 اضغط على  لتعطيل/تمكين كل النغمات والتنبيهات. ستعرض الشاشة علامة  بجانب ممكن. تختفي علامة  من جانب ممكن.

6 اضغط على  أو  للوصول إلى نعم واضغط على  للتحديد.

يعرض الراديو إشعارًا إيجابيًا صغيرًا للإشارة إلى أنه قد تمت إزالة نقطة الوصول إلى الشبكة المحددة بنجاح.

## الأدوات المساعدة

يشرح هذا الفصل عمليات وظائف الأدوات المساعدة المتوفرة في الراديو.

## تشغيل نغمات/تنبيهات الراديو أو إيقاف تشغيلها

يمكنك تمكين جميع نغمات وتنبيهات الراديو وتعطيلها (باستثناء نغمة تنبيه الطوارئ الواردة) إذا لزم الأمر.

اضغط على زر **جميع النغمات/التنبيهات** المبرمج للتبديل بين تشغيل جميع النغمات أو إيقاف تشغيلها، أو اتبع الإجراء الموضح أدناه للوصول إلى هذه الميزة عبر قائمة الراديو.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

## تعيين إزاحة مستوى صوت النغمة/التنبيه

يمكنك ضبط إزاحة مستوى صوت النغمة/التنبيه إذا لزم الأمر. تعمل هذه الميزة على ضبط مستوى صوت النغمات/التنبيهات، مما يتيح رفعه أو خفضه عن مستوى الصوت.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إزاحة الصوت واضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى قيمة مستوى الصوت المطلوبة.

سيصدر الراديو نغمة استجابة عند كل قيمة مناظرة لمستوى الصوت.

7 قم بأحد الإجراءات التالية:

- اضغط على  للاحتفاظ بالقيمة المعروضة المطلوبة لمستوى الصوت.
- اضغط على  للإنتهاء بدون تغيير الإعدادات الحالية الخاصة بإزاحة مستوى الصوت.

## تشغيل نغمة إذن بالكلام أو إيقاف تشغيلها

يمكنك تمكين نغمة إذن بالكلام أو تعطيلها، إذا لزم الأمر.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إذن بالكلام واضغط على  للتحديد.

6 اضغط على  لتمكين/تعطيل نغمة الإذن بالكلام. ستعرض الشاشة علامة ✓ بجانب ممكن. تختفي علامة ✓ من جانب ممكن.

## تشغيل نغمة تنبيه التشغيل أو إيقاف تشغيلها

يمكنك تمكين نغمة تنبيه التشغيل أو تعطيلها، إذا لزم الأمر.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تشغيل واضغط على  للتحديد.

6 اضغط على  لتمكين/تعطيل نغمة تنبيه التشغيل. ستعرض الشاشة علامة ✓ بجانب ممكن. تختفي علامة ✓ من جانب ممكن.

## تعيين مستوى الطاقة

يمكنك تخصيص إعدادات طاقة الراديو على عالية أو منخفضة لكل منطقة Connect Plus.

عالية لتمكين الاتصال بمواقع البرج في وضع Connect Plus الموجودة على مسافة بعيدة منك. منخفضة لتمكين الاتصال بمواقع البرج في وضع Connect Plus الموجودة على مسافة أقرب.

اضغط على زر مستوى الطاقة المبرمج لتبديل مستوى طاقة الإرسال بين عالية ومنخفضة.

اتبع الإجراء الموضح أدناه للوصول إلى هذه الميزة عبر قائمة الراديو.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الطاقة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى الإعداد المطلوب واضغط على  للتحديد.

✓ تظهر بجانب الإعداد المحدد. في أي وقت، اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية. ستعود الشاشة إلى القائمة السابقة.

## تغيير وضع العرض

يمكنك تغيير وضع العرض الخاص بالراديو بين "نهار" أو "ليل"، حسب الحاجة. سيؤثر ذلك على عرض مجموعة الألوان الخاصة بالشاشة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات الراديو  
واضغط على  للتحديد.

2

اضغط على  أو  للوصول إلى أدوات مساعدة  
واضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى عرض واضغط على  للتحديد.  
ستعرض الشاشة وضع النهار ووضع الليل.

3

اضغط على  أو  للوصول إلى إعدادات الراديو  
واضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى الإعداد المطلوب واضغط  
على  لتمكينه. ✓ تظهر علامة بجانب الإعداد المحدد.

4

اضغط على  أو  للوصول إلى عرض واضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى السطوع واضغط على  
 للتحديد.

ستعرض الشاشة شريط التقدم.

6

قم بخفض سطوع الشاشة من خلال الضغط على  أو زيادة سطوع  
الشاشة من خلال الضغط على . حدد من الإعداد 1 إلى 8. اضغط  
على  لتأكيد الإدخال.

## ضبط سطوع الشاشة

يمكنك ضبط مستوى سطوع شاشة الراديو حسب الحاجة.

إشعار:

لا يمكن ضبط سطوع الشاشة عند تمكين "سطوع تلقائي".

1

اضغط على  للوصول إلى القائمة.

## تشغيل شاشة المقدمة أو إيقاف تشغيلها

يمكنك تمكين شاشة المقدمة و تعطيلها حسب الحاجة.

تختفي علامة ✓ من جانب ممكن.

## اللغة

1 اضغط على  للوصول إلى القائمة.

يمكنك تعيين شاشة الراديو لتكون بلغتك المطلوبة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى عرض واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى شاشة المقدمة واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى اللغات واضغط على  للتحديد.

6 اضغط على  لتمكين/تعطيل شاشة المقدمة.

5 اضغط على  أو  للوصول إلى اللغة المطلوبة واضغط على  لتمكينها. تظهر علامة ✓ بجانب اللغة المحددة.

ستعرض الشاشة علامة ✓ بجانب ممكن.

## تشغيل مؤشر LED أو إيقاف تشغيله

يمكنك تمكين مؤشر LED أو تعطيله، إذا لزم الأمر.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مؤشر LED واضغط على  للتحديد.

5 اضغط على  لتمكين/تعطيل مؤشر LED.

ستعرض الشاشة علامة ✓ بجانب ممكن.

تختفي علامة ✓ من جانب ممكن.

## تحديد نوع الكبل

يمكنك تحديد نوع الكبل الذي يستخدمه الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع الكبل واضغط على  للتحديد.

5 تتم الإشارة إلى نوع الكبل الحالي بعلامة ✓.

## بيان الصوت

تعمل هذه الميزة على تمكين الراديو من الإشارة بشكل مسموع إلى المنطقة أو القناة الحالية التي قام المستخدم بتعيينها، أو الضغط على الزر القابل للبرمجة. يمكن

- اضغط على  لتعطيل بيان الصوت. تختفي علامة ✓ من جانب ممكن.

## مؤقت القائمة

يمكنك تعيين الفترة الزمنية لبقاء الراديو الخاص بك في القائمة قبل أن يقوم بالتبديل تلقائيًا إلى الشاشة الرئيسية.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى عرض واضغط على  للتحديد.

تخصيص هذا المؤشر الصوتي وفقًا لمتطلبات العميل. ويكون ذلك مفيدًا عادةً عندما يكون المستخدم في حالة صعبة تمنعه من قراءة المحتوى المعروض على الشاشة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى بيان الصوت واضغط على  للتحديد.  
يمكنك أيضًا استخدام أو لتغيير الخيار المحدد.

5 قم بأحد الإجراءات التالية:

- اضغط على  لتمكين بيان الصوت. ستعرض الشاشة علامة ✓ بجانب ممكن.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى أبواق أضواء واضغط على  للتحديد.

5 اضغط على  لتمكين/لتعطيل أبواق/أضواء. ستعرض الشاشة علامة ✓ بجانب ممكن. تختفي علامة ✓ من جانب ممكن.

## تعيين تفضيلات تشغيل القرص ثنائي الأغراض

يتضمن الراديو قرص مستوى الصوت/القتوات ثنائي الأغراض. يؤدي تعطيل خيار ثنائية الأغراض إلى تعيين القرص إلى العمل كقرص لمستوى الصوت فقط.

1  للوصول إلى القائمة.

5 اضغط على  أو  للوصول إلى مؤقت القائمة واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى الإعداد المطلوب واضغط على  للتحديد.

## تشغيل الأبواق/الأضواء أو إيقاف تشغيلها

يجب أن يقوم الوكيل بتركيب هذه الميزة من خلال موصل الملحقات الخلفي بالراديو. بإمكان الراديو إخطارك بمكالمة واردة من خلال ميزة الأبواق والأضواء. عند تنشيط هذه الميزة، تعمل المكالمة الواردة على إصدار صوت البوق بسيارتك وإضاءة أضوانها.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر أبواق/أضواء المبرمج للتبديل بين تشغيل ميزة الأبواق والأضواء أو إيقاف تشغيلها. قم بتخطي الخطوات التالية.

- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

## Mic AGC الرقمي (Mic AGC-D)

تتحكم هذه الميزة في مستوى اكتساب ميكروفون الراديو تلقائيًا أثناء الإرسال على نظام رقمي. وتعمل على كتم الأصوات العالية أو رفع الأصوات المنخفضة إلى قيمة معينة مسبقًا للحفاظ على مستوى صوت ثابت.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى Mic AGC-D واضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  لتمكين Mic AGC-D. ستعرض الشاشة علامة ✓ بجانب ممكن.

2  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

4  أو  للوصول إلى قرص ثنائي واضغط على  للتحديد.

5 تعرض الشاشة صوت فقط وصوت وقناة.  أو  للوصول إلى الإعداد المطلوب واضغط على  للتحديد. تظهر علامة ✓ بجانب الإعداد المحدد. ستعود الشاشة إلى القائمة السابقة.

- اضغط على  لتعطيل Mic AGC-D . تختفي  من جانب ممكن .

## صوت ذكي

يستطيع الراديو الخاص بك ضبط مستوى الصوت تلقائيًا للتغلب على ضجيج الخلفية في البيئة المحيطة، بما في ذلك جميع مصادر الضجيج الثابتة وغير الثابتة. هذه ميزة "تلقي فقط" ولا تؤثر على صوت الإرسال.

1 اضغط على  للوصول إلى القائمة.

عناصر التحكم في الراديو	الخطوات
<b>Menu (القائمة)</b>	<p><b>a</b> اضغط على  للوصول إلى القائمة.</p> <p><b>b</b> اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.</p>

### عناصر التحكم في الراديو

#### الخطوات

**c** اضغط على  أو  للوصول إلى إعدادات الراديو واضغط على  للتحديد.

**d** اضغط على  أو  للوصول إلى صوت ذكي واضغط على  للتحديد.

 **إشعار:**  
يمكنك أيضًا استخدام أو لتغيير الخيار المحدد.

**e** قم بأحد الإجراءات التالية:

- اضغط على  لتمكين ميزة صوت ذكي. ستعرض الشاشة علامة  بجانب ممكن.
- اضغط على  لتعطيل ميزة صوت ذكي. تختفي علامة  من جانب ممكن.

## تشغيل ميزة كاتم تردد الصوت أو إيقاف تشغيلها

تتيح لك هذه الميزة تقليل تردد الصوت في المكالمات المتلقاة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة

واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو

واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى كاتم تردد الصوت

واضغط على  للتحديد.

يمكنك أيضًا استخدام أو لتغيير الخيار المحدد.

5 قم بأحد الإجراءات التالية.

- اضغط على  لتمكين كاتم تردد الصوت. ستعرض الشاشة علامة ✓ بجانب ممكن.

2 اضغط على  أو  للوصول إلى أدوات مساعدة

واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو

واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى صوت ذكي واضغط على

 للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  لتمكين ميزة صوت ذكي. ستعرض الشاشة علامة ✓ بجانب ممكن.
- اضغط على  لتعطيل ميزة صوت ذكي. تختفي علامة ✓ من جانب ممكن.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى GNSS. اضغط على  للتحديد.

5 اضغط على  لتمكين/تعطيل GNSS. عند تمكينها، تظهر علامة  بجوار ممكن. في حالة التعطيل، تختفي علامة  من جانب ممكن.

راجع التحقق من معلومات GNSS في صفحة 292 للحصول على تفاصيل حول استرجاع معلومات GNSS.

## الوصول إلى المعلومات العامة للراديو

يحتوي الراديو على معلومات حول يلي:

- البطارية
- درجة الإمالة (مقياس التسارع)
- فهرس رقم طراز الراديو

- اضغط على  لتعطيل كاتم تردد الصوت. تختفي علامة  من جانب ممكن.

## تشغيل GNSS أو إيقاف تشغيله

النظام العالمي للملاحة عبر الأقمار الصناعية (GNSS) هو نظام تنقل عبر الأقمار الصناعية يحدد الموقع الجغرافي الدقيق للراديو. يشمل GNSS نظام تحديد المواقع العالمي (GPS) والنظام العالمي للملاحة عبر الأقمار الصناعية (GLONASS).

إشعار:

قد توفر بعض طرز الراديو GPS و GLONASS. يتم تكوين مجموعة الأقمار لنظام GNSS باستخدام برنامج برمجة العميل (CPS). راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **GNSS** المبرمج للتبديل بين تشغيل الميزة وإيقاف تشغيلها. قم بتخطي الخطوات التالية.

- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

- التدقيق الدوري عن الأخطاء (CRC) - Codeplug الخاصة بلوحة الاختبار عبر الأثير
- رقم الموقع
- معلومات الموقع
- الاسم المستعار للراديو ومعرفه
- إصدار البرنامج الثابت وإصدار Codeplug
- معلومات GNSS

اضغط على  في أي وقت للعودة إلى الشاشة السابقة أو اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية. يخرج الراديو من الشاشة الحالية بمجرد انتهاء مؤقت عدم النشاط.

## التحقق من فهرس رقم طراز الراديو

يحدد رقم الفهرس هذا أجهزة الراديو حسب الطراز. قد يطلب مسؤول نظام الراديو هذا الرقم عند إعداد codeplug جديدة للوحة الاختيار للراديو.

3 اضغط على  أو  للوصول إلى م. الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى فهرس الطراز واضغط على  للتحديد.  
تعرض الشاشة فهرس رقم الطراز.

## التحقق من CRC الخاص بملف Option Board OTA Codeplug

اتبع التعليمات أدناه إذا طلب منك مسؤول نظام الراديو عرض التدقيق الدوري عن الأخطاء (CRC) لملف Option Board OTA Codeplug (عبر الأثير). يظهر خيار القائمة هذا فقط في حال تلقي لوحة الاختيار آخر تحديث لملف codeplug الخاص بها عبر الأثير (OTA).

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى م = الراديو واضغط على  للتحديد.

2

اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى OB OTA CPcrc واضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى م = الراديو واضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى رقم الموقع واضغط على  للتحديد.  
تعرض الشاشة معرف الشبكة ورقم الموقع.

تعرض الشاشة بعض الأحرف والأرقام. قم بإبلاغ هذه المعلومات إلى مسؤول نظام الراديو لديك كما هي معروضة بالضبط.

## عرض معرف الموقع (رقم الموقع)

إشعار:

إذا لم تكن مسجلاً في أحد المواقع حالياً، فستعرض الشاشة غير مسجل.

يعرض الراديو لفترة قصيرة معرف الموقع أثناء تسجيله في موقع Connect Plus. بعد التسجيل، لا يشير الراديو إلى رقم الموقع بصفة عامة. لعرض رقم الموقع المسجل، قم بتنفيذ التالي:

1

اضغط على  للوصول إلى القائمة.

## التحقق من معلومات الموقع

إشعار:

إذا لم تكن مسجلاً في أحد المواقع حالياً، فستعرض الشاشة غير مسجل.

توفر ميزة معلومات الموقع معلومات قد تكون مفيدة لفني الصيانة. وتتألف من المعلومات التالية:

- رقم معيد التقوية الخاص بمعيد تقوية قناة التحكم الحالية.
- RSSI: القيمة الأخيرة لقوة الإشارة التي تم قياسها من معيد تقوية قناة التحكم.

- قائمة الجوار التي أرسلها معيد تقوية قناة التحكم (خمسة أرقام مفصولة بفواصل).

إذا كنت بحاجة لاستخدام هذه الميزة، فيرجى الإبلاغ عن المعلومات المعروضة كما تظهر تمامًا على الشاشة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى معل = موقع واضغط على  للتحديد.

تعرض الشاشة معلومات الموقع.

## التحقق من معرف الراديو

تعرض هذه الميزة معرف الراديو الخاص بك.

اتبع الإجراء الموضح فيما يلي للوصول إلى هذه الميزة عبر شاشة الراديو.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى هويتي واضغط على  للتحديد.

ستعرض الشاشة معرف الراديو.

## التحقق من إصدار البرنامج الثابت وإصدار Codeplug

عرض إصدار البرنامج الثابت على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

## التحقق من التحديثات

يتيح Connect Plus إمكانية تحديث ملفات معينة (ملف Codeplug للوحة الاختيار وملف تردد الشبكة وملف البرنامج الثابت للوحة الاختيار) عبر الأثير (OTA).

إشعار:

راجع الأمر مع الوكيل أو مسؤول الشبكة لمعرفة ما إذا تم تمكين هذه الميزة للراديو الخاص بك.

يتميز أي راديو Connect Plus مزود بشاشة بإمكانية عرض التدقيق الدوري الحالي عن الأخطاء لملف Option Board OTA Codeplug الحالي أو إصدار ملف التردد أو إصدار الملف الثابت للوحة الاختيار عن طريق خيار القائمة. بالإضافة إلى ذلك، يمكن لأجهزة الراديو المزودة بشاشة التي تم تمكينها لنقل الملفات عبر الأثير عرض إصدار "الملف المعلق". "الملف المعلق" هو ملف تردد أو ملف برنامج ثابت للوحة الاختيار يتم إخطار راديو Connect Plus به عن طريق رسائل النظام، لكن لا يكون الراديو قد جمع كل حزم الملف بعد. إذا كان راديو Connect Plus المزود بشاشة يحتوي على ملف معلق، فستوفر القائمة خيارات لـ:

- معرفة رقم إصدار الملف المعلق.
- معرفة النسبة المئوية للحزم التي تم جمعها حتى الآن.
- مطالبة راديو Connect Plus باستئناف جمع حزم الملفات.

إذا تم تمكين الراديو لنقل ملف Connect Plus OTA، فقد ينضم الراديو تلقائيًا في بعض الأوقات إلى عملية نقل ملف دون إخطار مستخدم الراديو أولاً. وأثناء جمع الراديو لحزم الملفات، يومض مؤشر LED سريعًا باللون الأحمر ويعرض الراديو رمز بيانات كبيرة الحجم على شريط حالة الشاشة الرئيسية.

2 اضغط على أو للوصول إلى أدوات مساعدة واضغط على للتحديد.

3 اضغط على أو للوصول إلى م = الراديو واضغط على للتحديد.

4 اضغط على أو للوصول إلى إصدارات واضغط على للتحديد.

تعرض الشاشة قائمة بالمعلومات التالية:

- (الراديو) إصدار البرنامج الثابت
- (الراديو) إصدار Codeplug
- إصدار البرنامج الثابت للوحة الاختيار
- إصدار تردد لوحة الاختيار
- إصدار أجهزة لوحة الاختيار
- إصدار Codeplug للوحة الاختيار

**إشعار:**

لا يمكن لراديو Connect Plus جمع حزم الملفات وتلقي مكالمات في آن واحد. إذا كنت ترغب في إلغاء نقل الملف، فاضغط على زر PTT ثم حرره. بناءً على ذلك، سيطلب الراديو مكالمة على اسم جهة الاتصال المحددة، كما سيقوم بإلغاء نقل الملف لهذا الراديو حتى يستأنف العملية في وقت لاحق.

هناك عدة طرق لبدء عملية نقل الملف مجدداً. ينطبق المثال الأول على كل أنواع ملفات OTA. بينما تنطبق الأمثلة الأخرى على ملف تردد الشبكة وملف البرنامج الثابت للوحة الاختيار فقط:

- قيام مسؤول نظام الراديو بإعادة بدء نقل ملف OTA.
- انتهاء مهلة المؤقت المحدد مسبقاً للوحة الاختيار، مما يؤدي إلى استئناف لوحة الاختيار تلقائياً لعملية جمع الحزم.
- عدم انتهاء مهلة المؤقت بعد، في حين أن مستخدم الراديو يطلب استئناف نقل الملف عن طريق خيار القائمة.

بعد أن ينتهي راديو Connect Plus من تنزيل جميع حزم الملفات، يجب أن يقوم بالترقية إلى الملف الذي تم الحصول عليه حديثاً. بالنسبة لملف تردد الشبكة، تتم هذه العملية تلقائياً ولا تتطلب إعادة تعيين الراديو. بالنسبة لملف Option Board Codeplug، تتم هذه العملية تلقائياً وستؤدي إلى انقطاع الخدمة لفترة وجيزة بينما تقوم لوحة الاختيار بتحميل معلومات codeplug الجديدة وإعادة الحصول على موقع شبكة. تعتمد سرعة الراديو في الترقية إلى ملف برنامج ثابت جديد للوحة الاختيار على طريقة تكوين الراديو من قبل الوكيل أو مسؤول النظام. سيقوم الراديو إما بالترقية فوراً بعد جمع كل حزم الملفات، أو سينتظر حتى يقوم المستخدم بتشغيل الراديو في المرة القادمة.

**إشعار:**

راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

ستستغرق عملية الترقية إلى ملف برنامج ثابت جديد للوحة الاختيار بضع ثوانٍ، وستطلب أن تقوم لوحة اختيار Connect Plus بإعادة تعيين الراديو. بمجرد أن تبدأ الترقية، لن يتمكن مستخدم الراديو من إجراء مكالمات أو تلقيها حتى اكتمال العملية. أثناء العملية، تطلب شاشة الراديو المستخدم بعدم إيقاف تشغيل الراديو.

**ملف البرنامج الثابت**

توفر المادة التالية معلومات عن البرنامج الثابت للراديو.

**تحديث البرنامج الثابت****إشعار:**

إذا لم يكن ملف البرنامج الثابت للوحة الاختيار محدثاً (وفي حالة قيام الراديو بجمع إصدار ملف برنامج ثابت للوحة الاختيار أحدث كثيراً) فإن الراديو يعرض قائمة بخيارات إضافية؛ إصدار وتم استلام والتنزيل.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة

واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م . الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى برنامج ثابت واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى إصدار واضغط على  للتحديد.

في حالة وجود ملف برنامج ثابت معلق للوحة الاختيار، تعرض الشاشة رقم إصدار البرنامج الثابت المعلق.

في حال وجود ملف برنامج ثابت معلق للوحة الاختيار، ستعرض الشاشة البرنامج الثابت محدث.

3 اضغط على  أو  للوصول إلى م . الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى برنامج ثابت واضغط على  للتحديد.

تعرض الشاشة البرنامج الثابت محدث.

## البرنامج الثابت المعلق - إصدار

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

## البرنامج الثابت المعلق – تم استلام %

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م. الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى برنامج ثابت واضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى يتم استلام واضغط على  للتحديد.

تعرض الشاشة النسبة المئوية لحزم ملفات البرنامج الثابت التي تم جمعها حتى الآن.

إشعار:

 عند الوصول إلى 100%، سيتعين إيقاف تشغيل الراديو ثم تشغيله لبدء ترقية البرنامج الثابت.

## البرنامج الثابت المعلق – التنزيل

إذا كان راديو Connect Plus قد ترك سابقًا عملية نقل ملف برنامج ثابت للوحة الاختيار عبر الأثير دون اكتمال الملف، فستقوم الوحدة تلقائيًا بإعادة الانضمام إلى عملية نقل الملف (إذا كانت لا تزال مستمرة) عند انتهاء مهلة المؤقت الداخلي. إذا كنت تريد أن تقوم الوحدة بإعادة الانضمام إلى عملية نقل مستمرة لملف البرنامج الثابت للوحة الاختيار قبل انتهاء مهلة هذا المؤقت الداخلي، فاستخدم خيار التنزيل كما هو موضح أدناه.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

- حدد نعم واضغط  لبدء التنزيل.
- حدد لا واضغط  للعودة إلى القائمة السابقة.

### ملف التردد

توفر المادة التالية معلومات عن ملف التردد الخاص بالراديو.

### تحديث ملف التردد

إشعار:

إذا لم يكن ملف التردد محدثًا (وفي حالة قيام الراديو بجمع إصدار ملف تردد أحدث كثيرًا)، فإن الراديو يعرض قائمة بخيارات إضافية؛ إصدار وتم استلام ٪ والتنزيل.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعده واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى برنامج ثابت واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى التنزيل واضغط على  للتحديد.

تعرض الشاشة ما يلي:

التنزيل متوفر	بدء التنزيل
التنزيل غير متوفر	التنزيل غير متوفر

7 قم بأحد الإجراءات التالية:

4 اضغط على  أو  للوصول إلى التردد واضغط على  OK للتحديد.

ستعرض الشاشة ملف التردد = الملف محدث.

### ملف التردد المعلق - الإصدار

1 اضغط على  OK للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  OK للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو واضغط على  OK للتحديد.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  OK للتحديد.

5 اضغط على  أو  للوصول إلى التردد واضغط على  OK للتحديد.

6 اضغط على  أو  للوصول إلى إصدار واضغط على  OK للتحديد.

في حالة وجود ملف تردد معلق، ستعرض الشاشة رقم إصدار ملف التردد المعلق.

### ملف التردد المعلق - تم استلام %

1 اضغط على  OK للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  OK للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو واضغط على  OK للتحديد.

3 اضغط على  أو  للوصول إلى م . الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى التردد واضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى التنزيل واضغط على  للتحديد.

التنزيل غير متوفر حالياً	التنزيل غير متوفر
التنزيل متوفر حالياً	بدء التنزيل

7 قم بأحد الإجراءات التالية:

- حدد نعم واضغط لبدء التنزيل.

4 اضغط على  أو  للوصول إلى تحديثات واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى يتم استلام واضغط على  للتحديد.

تعرض الشاشة النسبة المئوية لحزم ملفات التردد التي تم جمعها حتى الآن.

### ملف التردد المعلق - التنزيل

إذا كان راديو Connect Plus قد ترك سابقاً عملية نقل ملف تردد شبكة عبر الأثير (OTA) دون اكتمال الملف، فستقوم الوحدة تلقائياً بإعادة الانضمام إلى عملية نقل الملف (إذا كانت لا تزال مستمرة) عند انتهاء مهلة المؤقت الداخلي. إذا كنت تريد أن تقوم الوحدة بإعادة الانضمام إلى عملية نقل مستمرة لملف تردد الشبكة قبل انتهاء مهلة هذا المؤقت الداخلي، فاستخدم خيار التنزيل كما هو موضح أعلاه.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة واضغط على  للتحديد.

- حدد لا واضغط للعودة إلى القائمة السابقة.

## التحقق من معلومات GNSS

لعرض معلومات نظام GNSS على الراديو مثل قيم:

- خط العرض
- خط الطول
- الارتفاع
- الاتجاه
- السرعة
- التخفيف الأفقي للدقة (HDOP)
- الأقمار الاصطناعية
- الإصدار

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة

واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م. الراديو واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى معلومات GNSS واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى العنصر المطلوب واضغط على  للتحديد.

تعرض الشاشة معلومات نظام GNSS المطلوبة.

راجع تشغيل GNSS أو إيقاف تشغيله في صفحة 281 للحصول على تفاصيل حول نظام GNSS.

## أنظمة أخرى

تتوفر المميزات المتاحة لمستخدمي الراديو وفقا لهذا النظام في هذا الفصل.

## زر اضغط للتحدث

يعمل زر اضغط للتحدث PTT لغرضين أساسيين:

- أثناء إجراء مكالمة، يتيح زر PTT للراديو الإرسال إلى أجهزة الراديو الأخرى أثناء المكالمة. يتم تنشيط الميكروفون عند الضغط على زر PTT.
  - عند عدم وجود مكالمة جارية، يُستخدم زر PTT لإجراء مكالمة جديدة.
- اضغط على زر PTT للتحدث. حرر زر PTT للاستماع.

في حالة تمكين ميزة نغمة إذن بالكلام أو تمكين النغمة الجانبية لزر PTT<sup>®</sup> انتظر حتى تنتهي نغمة التنبيه القصيرة قبل التحدث.

📌 إذا تم تمكين ميزة الإشارة إلى قناة حرة على الراديو (تتم برمجتها من قبل الوكيل)، فستسمع نغمة تنبيه قصيرة عند قيام الراديو المستهدف (الراديو الذي يتلقى المكالمة) بتحرير زر PTT، مما يشير إلى أن القناة متاحة لك للرد.

📌 ستسمع نغمة حظر التحدث مستمرة إذا انقطعت مكالمتك. يجب أن تحرر زر PTT إذا سمعت نغمة منع التحدث مستمرة.

## الأزرار القابلة للبرمجة

حسب مدة الضغط على الزر، يمكن للوكيل برمجة الأزرار القابلة للبرمجة كاختصارات في وظائف الراديو.

### اضغط لفترة قصيرة

الضغط والتحرير سريعًا.

### الضغط لفترة طويلة

الضغط مع الاستمرار للمدة المبرمجة.

إشعار:

راجع تشغيل الطوارئ في صفحة 358 للحصول على مزيد من المعلومات حول المدة المبرمجة لزر الطوارئ.

## وظائف الراديو القابلة للتعين

يمكن تعيين وظائف الراديو التالية إلى الأزرار القابلة للبرمجة.

### بيئة الصوت

السماح للمستخدم بتحديد بيئة يعمل فيها الراديو.

### ملفات تعريف الصوت

السماح للمستخدم بتحديد ملف تعريف الصوت المفضل.

### تبديل صوت بلوتوث®

لتبديل التوجيه الصوتي بين سماعة الراديو الداخلية والملحق الخارجي الذي يدعم البلوتوث.

### اتصال بلوتوث

بدء عملية بحث واتصال بلوتوث.

### قطع اتصال بلوتوث

لإنهاء جميع اتصالات بلوتوث الموجودة بين الراديو والأجهزة الممكن بها تقنية بلوتوث.

**اكتشاف بلوتوث**

لتمكن الراديو من الدخول في وضع قابلية اكتشاف بلوتوث.

**تنبيه المكالمات**

توفير الوصول المباشر إلى قائمة جهات الاتصال لتحديد جهة اتصال يمكن إرسال تنبيه مكالمة إليها.

**توجيه المكالمات**

للتبديل بين تشغيل توجيه المكالمات أو إيقاف تشغيله.

**سجل المكالمات**

تحديد قائمة سجل المكالمات.

**بيان القناة**

تشغيل الرسائل الصوتية لبيان المنطقة والقناة الخاصة بالقناة الحالية.

**التأريض**

توفير الوصول المباشر إلى قائمة جهات الاتصال.

**الطوارئ**

بدء أو إلغاء طوارئ وفقاً للبرمجة.

**العنوان العام (PA) الخارجي**

لتبديل التوجيه الصوتي بين مضخم مكبر صوت العنوان العام (PA) المتصل ونظام العنوان العام (PA) الداخلي بالراديو.

**موقع داخلي**

للتبديل بين تشغيل الموقع الداخلي أو إيقاف تشغيله.

**صوت ذكي**

التبديل بين تشغيل الصوت الذكي أو إيقاف تشغيله.

**اتصال يدوي**

لبداء مكالمة خاصة من خلال إدخال أي معرف مشترك.

**تجوال يدوي للموقع 5**

بدء بحث يدوي عن المواقع.

**Mic AGC**

للتبديل بين تشغيل تحكم الكسب الآلي في الميكروفون الداخلي أو إيقافه.

**المراقبة**

مراقبة قناة محددة بالنشاط.

**الإعلامات**

لتوفير الوصول المباشر إلى قائمة الإعلانات.

**حذف قناة إزعاج 5**

إزالة قناة غير مرغوب فيها مؤقتاً، باستثناء القناة المحددة، من قائمة المسح. تشير القناة المحددة إلى مجموعة المنطقة أو القناة المحددة للمستخدم الذي تم بدء المسح منها.

**الوصول بلمسة واحدة**

للبدء مباشرة في مكالمة خاصة أو مكالمة هاتفية أو مكالمة جماعية محددة مسبقاً أو تنبيه مكالمات محدد مسبقاً أو رسالة نصية سريعة محددة مسبقاً أو إرجاع إلى القائمة الرئيسية.

**ميزة لوحة الاختيار**

التبديل بين تشغيل ميزة (ميزات) لوحة الاختيار أو إيقاف تشغيلها لل قنوات التي تدعم ميزة لوحة الاختيار.

**مراقب دائم<sup>5</sup>**

لمراقبة قناة محددة لمعرفة كل حركة المرور على الراديو إلى أن يتم تعطيل هذه الوظيفة.

**Phone (الهاتف)**

لتوفير الوصول المباشر إلى قائمة جهات اتصال الهاتف.

**السرية**

للتبديل بين تشغيل السرية أو إيقاف تشغيلها.

**العنوان العام (PA)**

للتبديل بين تشغيل أو إيقاف تشغيل نظام العنوان العام (PA) للراديو.

**الاسم المستعار للراديو ومعرفه**

توفير الاسم المستعار للراديو ومعرفه.

**التحقق من الراديو**

تحديد ما إذا كان الراديو نشطاً في أحد الأنظمة.

**تعطيل الراديو**

السماح بتعطيل الراديو المستهدف عن بُعد.

**تمكين الراديو**

السماح بتمكين الراديو المستهدف عن بُعد.

**مراقب عن بُعد**

تشغيل ميكروفون الراديو المستهدف دون تقديم أي مؤشرات.

**معيد<sup>5</sup>Talkaround**

التبديل بين استخدام معيد تقوية والاتصال مباشرةً براديو آخر.

**إعادة تعيين قناة رئيسية**

لتعيين قناة رئيسية جديدة.

**كتم صوت رسالة تذكير القناة الرئيسية**

لكتم صوت رسالة تذكير القناة الرئيسية.

**الفحص 6**

للتبديل بين تشغيل المسح و إيقاف تشغيله.

**معلومات الموقع**

لعرض اسم الموقع الحالي ومعرف السعة الإضافية-متعددة المواقع.

لتشغيل الرسائل الصوتية لبيان الموقع الخاصة بالموقع الحالي عند تمكين بيان الصوت.

**قفل الموقع<sup>5</sup>**

عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

**التحكم في القياس عن بُعد**

التحكم في رقم التعريف الشخصي الخاص بالإخراج الموجود في الراديو البعيد أو المحلي.

6 لا ينطبق في السعة الإضافية – الموقع الواحد.

الرسالة النصية 

تحديد قائمة الرسائل النصية.

قطع إرسال Dekey عن بُعد 

إيقاف مكالمة جارية قابلة للقطع لإخلاء القناة.

## تحسين الاهتزاز

للتبديل بين تشغيل تحسين الاهتزاز وإيقاف تشغيله.

## تشغيل/إيقاف تشغيل بيان الصوت

التبديل بين تشغيل بيان الصوت أو إيقاف تشغيله.

## الإرسال بالتشغيل الصوتي (VOX)

التبديل بين تشغيل VOX أو إيقاف تشغيله.

## Wi-Fi

للتبديل بين تشغيل Wi-Fi أو إيقاف تشغيله.

## تحديد منطقة

السماح بالتحديد من قائمة المناطق.

## الإعدادات أو وظائف الأدوات المساعدة القابلة للتعين

يمكن تعيين إعدادات الراديو أو وظائف أدوات المساعدة التالية إلى الأزرار القابلة للبرمجة.

## نغمات/ تنبيهات

للتبديل بين تشغيل جميع النغمات والتنبيهات أو إيقاف تشغيلها.

## الإضاءة الخلفية

لتشغيل الإضاءة الخلفية للشاشة أو لإيقاف تشغيلها.

## القناة التالية/السابقة

للتغيير إلى القناة السابقة أو التالية بحسب البرمجة.

## وضع الشاشة

للتبديل بين تشغيل وضع الشاشة في النهار/الليل أو إيقافه.

## مستوى الطاقة

لتبديل مستوى طاقة الإرسال بين عالية ومنخفضة.

## الوصول إلى الوظائف المبرمجة

اتباع الإجراء للوصول إلى الوظائف المبرمجة على الراديو الخاص بك.

## 1 قم بأحد الإجراءات التالية:

- اضغط على الزر المبرمج. تابع إلى **خطوة 3**.
- اضغط على  للوصول إلى القائمة.

## 2

اضغط على  أو  للوصول إلى وظيفة القائمة، واضغط على

 لتحديد وظيفة أو الدخول إلى قائمة فرعية.

## 3 قم بأحد الإجراءات التالية:

<p><b>بلوتوث متصل</b></p> <p>ميزة بلوتوث ممكنة. يظل الرمز مضاءً عند اتصال جهاز بلوتوث بعيد.</p>	
<p><b>Bluetooth غير متصل</b></p> <p>ميزة Bluetooth ممكنة، لكن لا يوجد جهاز Bluetooth بعيد متصل.</p>	
<p><b>سجل المكالمات</b></p> <p>سجل المكالمات الخاص بالراديو.</p>	
<p><b>اتصال</b></p> <p>جهة الاتصال الخاصة بالراديو متاحة.</p>	
<p><b>الطوارئ</b></p> <p>الراديو في وضع الطوارئ.</p>	
<p><b>قائمة استلام مرنة</b></p> <p>يتم تمكين قائمة الاستلام المرنة.</p>	
<p><b>GNSS متوفر</b></p> <p>تم تمكين ميزة GNSS. يظل الرمز مضاءً عند توفر تحديد الموضع.</p>	

الجدول يتبع...

• اضغط على  للعودة إلى الشاشة السابقة.

• اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية. سيخرج الراديو تلقائيًا من القائمة بعد فترة من عدم النشاط ويعود إلى الشاشة الرئيسية.

تتوفر أيضًا أزرار التنقل عبر القائمة على الميكروفون المزود بلوحة مفاتيح. راجع أزرار الميكروفون المزود بلوحة مفاتيح في صفحة 37.

## مؤشرات الحالة

يشرح هذا الفصل مؤشرات الحالة والنعجمات الصوتية المستخدمة في الراديو.

## الرموز

تعرض شاشة الكريستال السائل (LCD) بالراديو حالة الراديو، والإدخالات النصية وإدخالات القائمة.

### الجدول 9: رموز الشاشة

تظهر الرموز التالية على شريط الحالة في أعلى شاشة الراديو. الرموز مُرتبة أقصى اليمين حسب المظهر أو الاستخدام، وهي مخصصة للقنوات.

<p><b>وضع كتم الصوت</b> وضع كتم الصوت منشط والسماعة الخارجية تم كتم صوتها.</p>	
<p><b>إعلام</b> تحتوي قائمة الإعلامات على حدث فائت واحد أو أكثر.</p>	
<p><b>لوحة الخيارات</b> تم تمكين لوحة الاختيار. (للطرز الممكن بها لوحة الاختيار فقط).</p>	
<p><b>إلغاء وظيفة لوحة الاختيار</b> تم تعطيل لوحة الاختيار.</p>	
<p><b>مؤقت تأخير البرمجة عبر الأثير</b> للإشارة إلى الوقت المتبقي قبل إعادة التشغيل التلقائية للراديو.</p>	
<p><b>مؤشر قوة الإشارة المستلمة (RSSI)</b> يمثل عدد الأشرطة المعروضة قوة إشارة الراديو. يشير وجود أربعة أشرطة إلى أقوى إشارة. يظهر هذا الرمز عند الاستلام فقط.</p>	

الجدول يتبع...

<p><b>نظام GNSS غير متوفر</b> تم تمكين ميزة GNSS لكن لا يتم استقبال بيانات من القمر الصناعي.</p>	
<p><b>بيانات كبيرة الحجم</b> يقوم الراديو باستلام بيانات كبيرة الحجم والقناة مشغولة.</p>	
<p><b>الموقع الداخلي متوفر 7</b> ميزة حالة الموقع الداخلي تعمل ومتوفرة.</p>	
<p><b>ميزة الموقع الداخلي غير متوفرة 7</b> ميزة حالة الموقع الداخلي تعمل لكنها غير متوفرة لأن Bluetooth معطل أو أن Bluetooth قام بتعليق مسح الإشارات.</p>	
<p><b>Message (رسالة)</b> رسالة واردة.</p>	
<p><b>المراقبة</b> تتم مراقبة القناة المحددة.</p>	

الجدول يتبع...

7 تنطبق فقط على الطرز المزودة بأحدث البرامج والأجهزة.

تسجيل خروج تم تسجيل خروج الراديو من الخادم عن بعد.	
كتم صوت الرنين تم تمكين وضع كتم صوت الرنين.	
تجوال الموقع <sup>9</sup> تم تمكين ميزة تجوال الموقع.	
كلام غير مباشر <sup>8</sup> في حالة عدم وجود محطة إعادة تقوية، يتم تكوين الراديو لاتصال مباشر بين جهازي راديو.	
تعطيل النغمات تم إيقاف تشغيل النغمات.	
غير آمن تم تعطيل ميزة السرية.	
المسح بالاقتراع تم تمكين ميزة المسح بالاقتراع.	

الجدول يتبع...

منع الاستجابة يتم تمكين منع الاستجابة.	
رنين فقط تم تمكين وضع الرنين.	
الفحص <sup>8</sup> تم تمكين ميزة المسح.	
المسح - الأولوية <sup>18</sup> يكتشف جهاز الراديو النشاط الموجود في القناة/ المجموعة المخصصة كأولوية 1.	
المسح - الأولوية <sup>28</sup> يكتشف جهاز الراديو النشاط الموجود في القناة/ المجموعة المخصصة كأولوية 2.	
أمن تم تمكين ميزة السرية.	
تسجيل دخول تم تسجيل دخول الراديو إلى الخادم عن بعد.	

الجدول يتبع...

8 غير قابل للتطبيق على السعة الإضافية.

9 غير قابل للتطبيق في السعة الإضافية - الموقع الواحد.

خانة الاختيار (فارغة) يشير إلى عدم تحديد الخيار.	
مربع أسود ثابت يشير إلى الخيار المحدد لعنصر القائمة مع قائمة فرعية.	

### الجدول 11: رموز أجهزة بلوتوث

تظهر الرموز التالية بجوار العناصر الموجودة في قائمة الأجهزة الممكنة بها تقنية Bluetooth، والتي تتوفر للإشارة إلى نوع الجهاز.

جهاز صوت بلوتوث جهاز صوت يدعم بلوتوث، كسماعة الرأس.	
جهاز بيانات بلوتوث جهاز يدعم بلوتوث، كالماسحة الضوئية.	
جهاز PTT بلوتوث جهاز PTT يدعم بلوتوث، كجهاز PTT فقط.	

إشارة Wi-Fi ممتازة <sup>10</sup> إشارة Wi-Fi ممتازة.	
Wi-Fi جيد <sup>10</sup> إشارة Wi-Fi جيدة.	
Wi-Fi متوسط <sup>10</sup> إشارة Wi-Fi متوسطة.	
Wi-Fi ضعيف <sup>10</sup> إشارة Wi-Fi ضعيفة.	
Wi-Fi غير متاح <sup>10</sup> إشارة Wi-Fi غير متاحة.	

### الجدول 10: رموز القائمة المتقدمة

تظهر الرموز التالية بجوار عناصر القائمة، والتي توفر إمكانية الاختيار بين خيارين أو تعمل كمؤشر على أن هناك قائمة فرعية توفر خيارين.

خانة الاختيار (محددة) يشير إلى أن الخيار تم تحديده.	
--	---

الجدول يتبع...

<sup>10</sup> تنطبق فقط على DM4601e.

<p><b>اتصال خاص</b></p> <p>للإشارة إلى وجود مكالمة خاصة قيد التقدم. في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو المعرف (الرقم) الخاص بالمشارك.</p>	
<p><b>مكالمة هاتفية كمكالمة جماعية/شاملة</b></p> <p>للإشارة إلى وجود مكالمة هاتفية كمكالمة جماعية أو مكالمة شاملة قيد التقدم.</p> <p>في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرف (الرقم) الخاص بمجموعة.</p>	
<p><b>مكالمة هاتفية كمكالمة خاصة</b></p> <p>للإشارة إلى أن مكالمة هاتفية كمكالمة خاصة قيد التقدم.</p> <p>في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرف (الرقم) الخاص بهاتف.</p>	

### الجدول 13: رموز تذاكر العمل

تظهر هذه الرموز للحظة على الشاشة في مجلد تذاكر العمل.

<p><b>كل المهام</b></p> <p>للإشارة إلى كل المهام المدرجة.</p>	
---	---

الجدول يتبع...

### الجدول 12: رموز المكالمات

تظهر الرموز التالية على الشاشة أثناء إجراء مكالمة. كما أنها تظهر ضمن قائمة جهات الاتصال للإشارة إلى الاسم المستعار أو نوع المعرف.

<p><b>مكالمة كمبيوتر عبر بلوتوث</b></p> <p>للإشارة إلى وجود مكالمة كمبيوتر عبر بلوتوث قيد التقدم.</p> <p>في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرف (الرقم) الخاص بمكالمة كمبيوتر عبر بلوتوث.</p>	
<p><b>مكالمة إرسال</b></p> <p>يتم استخدام نوع جهة الاتصال "مكالمة إرسال" لإرسال رسالة نصية إلى كمبيوتر المرسل عن طريق خادم الرسائل النصية لجهة أخرى.</p>	
<p><b>مكالمة جماعية/مكالمة شاملة</b></p> <p>للإشارة إلى وجود مكالمة جماعية أو مكالمة شاملة قيد التقدم.</p> <p>في قائمة جهات الاتصال، يشير إلى الاسم المستعار (الاسم) أو إلى المعرف (الرقم) الخاص بمجموعة.</p>	

الجدول يتبع...

إرسال فاشل (سلبى) فشل اتخاذ إجراء.	
إرسال ناجح (إيجابي) تم اتخاذ إجراء ناجح.	
الإرسال قيد التقدم (موقت) جار الإرسال. يظهر هذا الرمز قبل الإشارة إلى نجاح الإرسال أو فشله.	

### الجدول 15: رموز العناصر المرسلة

تظهر الرموز التالية في الزاوية العليا اليسرى من الشاشة في مجلد العناصر المرسلة.

قيد التقدم الرسالة النصية إلى الاسم المستعار أو المعرف الخاص بأحد المشتركين في انتظار الإرسال وسيكون متبوعًا بانتظار لرسالة الإعلام. الرسالة النصية إلى الاسم المستعار أو المعرف الخاص بإحدى المجموعات في انتظار الإرسال.	 أو 
---	--

الجدول يتبع...

المهام الجديدة للإشارة إلى المهام الجديدة.	
قيد التقدم جاري إرسال المهام. تتم رؤية هذا قبل الإشارة إلى فشل إرسال تذاكر العمل أو إرسالها بنجاح.	
فشل الإرسال لا يمكن إرسال المهام.	
تم الإرسال بنجاح تم إرسال المهام بنجاح.	
الأولوية 1 يشير إلى مستوى الأولوية 1 للمهام.	
الأولوية 2 يشير إلى مستوى الأولوية 2 للمهام.	
الأولوية 3 يشير إلى مستوى الأولوية 3 للمهام.	

### الجدول 14: رموز الإشعارات الصغيرة

تظهر الرموز التالية لحظيًا على الشاشة بعد القيام بإجراء لأداء إحدى المهام.

**أحمر وامض**

فشل الراديو في الاختبار الذاتي عند التشغيل.

يستقبل الراديو إرسال طوارئ.

يقوم الراديو بالإرسال والبطارية منخفضة.

انتقل الراديو خارج النطاق إذا تم تكوين نظام الإرسال/الاستقبال تلقائي النطاق.

تم تمكين وضع كتم الصوت.

**أخضر راسخ**

يقوم الراديو ببدء التشغيل.

يقوم جهاز الراديو بالإرسال.

يقوم الراديو بإرسال تنبيه مكالمة أو إرسال طوارئ.

**أخضر وامض**

الجهاز اللاسلكي مكالمة أو بيانات.

يستعيد الراديو عمليات إرسالات البرمجة عبر الأثير.

يكشف الراديو نشاطاً عبر الأثير.

**إشعار:**

قد يؤثر هذا النشاط على القناة المبرمجة في الراديو أو لا يؤثر عليها

بحسب طبيعة البروتوكول الرقمي.

لا يُصدر مؤشر LED أي إشارة عندما يحاول الراديو اكتشاف نشاط

عبر الأثير في السعة الإضافية.

**أخضر وامض بطريقة ازدواجية**

يستقبل الراديو مكالمة أو بيانات مدعومة بالخصوصية.

رسالة فردية أو جماعية مقروءة  
تمت قراءة الرسالة النصية.

أو

رسالة فردية أو جماعية غير مقروءة  
لم تتم قراءة الرسالة النصية.

أو

**فشل الإرسال**

يتعذر إرسال الرسالة النصية.

أو

تم الإرسال بنجاح  
تم إرسال الرسالة النصية بنجاح.

أو

**مؤشرات LED**

توضح مؤشرات LED الحالة التشغيلية للراديو.

## أصفر راسخ

يراقب الراديو قناة تقليدية.

الراديو في وضع قابلية اكتشاف Bluetooth.

## أصفر وامض

يقوم الراديو بالمسح بحثًا عن نشاط.

لم يستجب الراديو بعد لتنبيه المكالمات.

قائمة الاستقبال المرنة ممكنة في الراديو.

جميع قنوات السعة الإضافية-متعددة المواقع مشغولة.

## أصفر وامض بطريقة ازدواجية

التجوال التلقائي ممكن في الراديو.

يبحث الراديو بشكل فعال عن موقع جديد.

لم يستجب الراديو بعد إلى تنبيه مكالمات جماعية.

الراديو مؤمن.

الراديو غير متصل بمعيد التقوية أثناء وجوده في السعة الإضافية.

جميع قنوات السعة الإضافية مشغولة.

## النعجمات

فيما يلي النعجمات التي تصدر عبر سماعة الراديو.

نعمة عالية

نعمة منخفضة

## نعجمات المؤشرات

توفر لك نعجمات المؤشرات إشارات صوتية تعبر عن الحالة بعد اتخاذ إجراء لأداء مهمة.

نعمة مؤشر إيجابية

نعمة مؤشر سلبية

## النعجمات الصوتية

توفر النعجمات الصوتية إشارات صوتية عن حالة الراديو أو استجابة الراديو للبيانات المتلقاة.

نعمة مستمرة

صوت أحادي النعمة. تصدر بشكل مستمر حتى الإنهاء.

نعمة دورية

تصدر بشكل دوري بناءً على المدة التي تم تعيينها بواسطة الراديو. تبدأ النعمة، وتتوقف، وتعيد نفسها.

## معلومات الرمز

نغمة متكررة

نغمة فردية تعيد نفسها حتى يتم إنهاؤها بواسطة المستخدم.

نغمة مؤقتة

تصدر مرة واحدة للفترة القصيرة التي تم تعيينها بواسطة الراديو.

## الأوضاع التقليدية التناظرية والرقمية

يمكن تكوين كل قناة في الراديو كقناة تناظرية تقليدية أو رقمية تقليدية.

استخدم زر القناة للتبديل بين قناة تناظرية أو رقمية.

لا تتوفر ميزات معينة عند التبديل من الوضع الرقمي إلى الوضع التناظري. تعكس رموز الميزات الرقمية هذا التغيير بأن تظهر "رمادية". تكون الميزات المعطلة مخفية في القائمة.

يتضمن الراديو أيضًا ميزات متوفرة في كل من الوضعين التناظري والرقمي. لا تؤثر الاختلافات البسيطة في طريقة عمل كل ميزة على أداء الراديو.

إشعار:

يقوم الراديو أيضًا بالتبديل بين الوضع الرقمي والوضع التناظري أثناء المسح في الوضع التناظري. راجع الفصل في صفحة 340 لمزيد من المعلومات.

في هذا المنشور، تُستخدم الرموز المبيّنة لتوضيح الميزات المدعومة في الوضع التناظري التقليدي أو الوضع الرقمي التقليدي، أو التي تم توفيرها مع ميكروفون مزود بلوحة مفاتيح.

للإشارة إلى ميزة الوضع التناظري فقط التقليدي.

للإشارة إلى ميزة الوضع الرقمي فقط التقليدي.

أما الميزات المتاحة في كلا الوضعين التقليدي التناظري والتقليدي الرقمي، لا يتم عرض كلا الرمزين.

## الاتصال بالمواقع عبر بروتوكول الإنترنت

(IP)

تتيح هذه الميزة للراديو توسعة الاتصال التقليدي بشكل يتخطى نطاق موقع واحد، من خلال الاتصال بالمواقع المختلفة المتاحة عبر استخدام شبكة تعمل ببروتوكول الإنترنت (IP). وهذا وضع تقليدي متعدد المواقع.

عندما ينتقل الراديو خارج النطاق من موقع ما إلى نطاق موقع آخر، يتصل الراديو بمعيد التقوية الخاص بالموقع الجديد لإرسال أو تلقي مكالمات أو عمليات إرسال البيانات. ويتم هذا إما تلقائيًا أو يدويًا حسب إعداداتك.

في البحث التلقائي عن المواقع، يقوم الراديو بمسح جميع المواقع المتوفرة عندما تكون الإشارة الصادرة من الموقع الحالي ضعيفة أو عندما يكون الراديو غير قادر على اكتشاف أية إشارة من الموقع الحالي. ثم يتصل الراديو بمعيد التقوية الذي يتمتع بأعلى قيمة لمؤشر قوة الإشارة المستلمة (RSSI).

في البحث اليدوي عن المواقع، يقوم الراديو بالبحث عن الموقع التالي في قائمة التجوال الموجودة حاليًا ضمن النطاق، ولكن قد لا يكون لديها أقوى إشارة، ويقوم بالاتصال بمعيد التقوية.

#### إشعار:

يمكن تمكين إما المسح أو التجوال فقط لكل قناة، لكن ليس كلاهما في الوقت ذاته.

يمكن إضافة القنوات التي تدعم هذه الميزة إلى قائمة تجوال خاصة. يبحث الراديو عن القنوات في قائمة التجوال أثناء عملية التجوال التلقائي لتحديد أفضل موقع. تدعم قائمة التجوال 16 قناة كحد أقصى، بما في ذلك القناة المحددة.

#### إشعار:

لا يمكنك إضافة إدخال في قائمة التجوال أو حذفه يدويًا. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## السعة الإضافية-أحادية الموقع

السعة الإضافية-أحادية الموقع هي تكوين ترنك أحادي الموقع لنظام راديو MOTOTRBO، يستخدم مجموعة من القنوات لدعم مئات المستخدمين وما يصل إلى 254 مجموعة. تسمح هذه الميزة للراديو الخاص بك بالاستفادة بشكل فعال من العدد المتاح من القنوات المبرمجة أثناء الوجود في وضع معيد التقوية.

ستسمع نغمة مؤشر سلبية إذا حاولت الوصول إلى إحدى الميزات غير القابلة للتطبيق على السعة الإضافية-أحادية الموقع عبر الضغط على زر قابل للبرمجة.

كذلك، يحتوي جهاز الراديو على ميزات متوفرة في الوضع الرقمي التقليدي والاتصال بالمواقع عبر بروتوكول الإنترنت (IP) والسعة الإضافية. على الرغم من ذلك، لن تؤثر الاختلافات البسيطة في طريقة عمل كل ميزة على أداء جهاز الراديو.

للحصول على مزيد من المعلومات حول هذا التكوين، راجع الأمر مع الوكيل أو مسؤول النظام.

## السعة الإضافية-متعددة المواقع

السعة الإضافية-متعددة المواقع هي تكوين ترنك متعدد القنوات لنظام راديو MOTOTRBO، وتجمع أفضل ما في تكوينات السعة الإضافية والاتصال بالمواقع عبر بروتوكول الإنترنت (IP).

تتيح السعة الإضافية-متعددة المواقع للراديو توسعة اتصال الترنك بشكل يتخطى نطاق موقع واحد، من خلال الاتصال بالمواقع المختلفة المتاحة المتصلة بواسطة شبكة تعمل بـ IP. وتوفر أيضًا زيادة في السعة من خلال الاستفادة بشكل فعال من مجموع العدد المتاح من القنوات المبرمجة التي يدعمها كل موقع من المواقع المتاحة.

عندما ينتقل الراديو خارج النطاق من موقع ما إلى نطاق موقع آخر، يتصل بمعيد التقوية الخاص بالموقع الجديد لإرسال أو استقبال أو إرسال المكالمات/البيانات. يتم ذلك تلقائيًا أو يدويًا، وفقًا للإعدادات الخاصة بك.

إذا تم تعيين الراديو ليقيم بذلك تلقائيًا، فإنه يقوم بمسح جميع المواقع المتوفرة عندما تكون الإشارة الصادرة من الموقع الحالي ضعيفة أو عندما يكون الراديو غير قادر على اكتشاف أية إشارة من الموقع الحالي. ثم يتصل بعد ذلك بمعيد التقوية الذي يتمتع بأعلى قيمة لـ (RSSI).

في البحث اليدوي عن المواقع، يقوم الراديو بالبحث عن الموقع التالي في قائمة التجوال الموجودة حاليًا ضمن النطاق (والتي قد لا يكون لديها أقوى إشارة) ويقوم بالاتصال بها.

- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى منطقة . اضغط على

 للتحديد.

تعرض الشاشة  والمنطقة الحالية.

3 اضغط على  أو  للوصول إلى المنطقة المطلوبة. اضغط

على  للتحديد.

تعرض الشاشة تم تحديد < المنطقة > مؤقتًا وتعود إلى شاشة المنطقة المحددة.

## تحديد مناطق باستخدام البحث عن الاسم المستعار

اتبع الإجراء لتحديد المنطقة المطلوبة على الراديو الخاص بك باستخدام البحث عن الاسم المستعار.

- 1 اضغط على  للوصول إلى القائمة.

يمكن إضافة أي قناة تدعم السعة الإضافية-متعددة المواقع إلى قائمة تجوال خاصة. يقوم الراديو بالبحث عن هذه القنوات أثناء عملية التجوال التلقائي لتحديد أفضل موقع.

إشعار:

لا يمكنك إضافة إدخال إلى قائمة التجوال أو حذفه يدويًا. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

وعلى غرار السعة الإضافية-أحادية الموقع، لا تتوفر رموز الميزات غير المنطبقة على السعة الإضافية-متعددة المواقع في القائمة. ستسمع نغمة مؤشر سلبية إذا حاولت الوصول إلى إحدى الميزات غير القابلة للتطبيق على السعة الإضافية-متعددة المواقع من خلال الضغط على زر قابل للبرمجة.

## تحديدات المنطقة والقناة

يشرح هذا الفصل عمليات تحديد منطقة أو قناة على الراديو الخاص بك. المنطقة هي مجموعة من القنوات.

يدعم الراديو ما يصل إلى 99 قناة و2 منطقة، بحد أقصى 99 قناة في كل منطقة. يمكن برمجة كل قناة بميزات مختلفة و/أو تدعم مجموعات مختلفة من المستخدمين.

## تحديد مناطق

اتبع الإجراء لتحديد المنطقة المطلوبة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر ت. منطقة الميرمج. تابع إلى خطوة 3.

## تحديد قنوات

اتبع الإجراء لتحديد القناة المطلوبة على الراديو الخاص بك بعد أن تحدد منطقة.

قم بأحد الإجراءات التالية:

- اضغط على زر التمرير لأعلى/الأسفل.
- استخدم قرص مستوى الصوت/القنوات.
- اضغط على زرَيّ القناة السابقة/التالية المبرمجة.

## المكالمات

يشرح هذا الفصل عمليات استقبال المكالمات والرد عليها وإجرائها وإيقافها.

يمكنك تحديد اسم مستعار أو معرف للمشارك، أو اسم مستعار أو معرف للمجموعة بعد تحديد قناة باستخدام إحدى الميزات التالية:

### البحث عن الاسم المستعار

تستخدم هذه الطريقة للمكالمات الجماعية والخاصة والشاملة فقط باستخدام ميكروفون مزود بلوحة مفاتيح.

### قائمة جهات الاتصال

توفر هذه الطريقة وصولاً مباشراً إلى قائمة جهات الاتصال.

### الاتصال اليدوي (عن طريق استخدام جهات الاتصال)

تستخدم هذه الطريقة للمكالمات الخاصة والهاتفية فقط باستخدام ميكروفون مزود بلوحة مفاتيح.

2

اضغط على  أو  للوصول إلى منطقة. اضغط على  للتحديد.

تعرض الشاشة  والمنطقة الحالية.

3

أدخل الحرف الأول من الاسم المستعار المطلوب.

سنعرض الشاشة مؤشراً وامضاً.

4

أدخل باقي أحرف الاسم المستعار المطلوب.

البحث عن الاسم المستعار غير حساس لحالة الأحرف. إذا كان هناك إدخالان أو أكثر بنفس الاسم، تعرض الشاشة الإدخال الذي تم إدراجه أولاً في القائمة.

يعرض سطر النص الأول الأحرف التي أدخلتها. تعرض أسطر النص التالية القائمة المختصرة لنتائج البحث.

5

اضغط على  للتحديد.

تعرض الشاشة تم تحديد < المنطقة > للحظة وتنتقل إلى شاشة المنطقة المحددة.

## إشعار:

يضيء مؤشر LED بلون أخضر ثابت عند قيام الراديو بالإرسال ويومض مرتين باللون الأخضر عند تلقي مكالمة تدعم السرية.

لك تشفير مكالمة تدعم السرية، يجب أن يكون للراديو الخاص بك نفس مفتاح السرية، أو نفس قيمة المفتاح ومعرف المفتاح (تتم برمجته من قبل الوكيل) الخاص بالراديو المُرسِل (الراديو الذي تتلقى المكالمة منه).

راجع السرية في صفحة 391 لمزيد من المعلومات.

## المكالمات الجماعية

يجب تكوين الراديو الخاص بك كجزء من مجموعة لتلقي مكالمة من أو إجراء مكالمة إلى مجموعة من المستخدمين.

## إجراء مكالمات جماعية

اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك.

## 1 قم بأحد الإجراءات التالية:

- حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بالمجموعة.
- اضغط على زر الوصول بلمسة واحدة المبرمج.

## مفاتيح الأرقام المبرمجة

تستخدم هذه الطريقة للمكالمات الجماعية والخاصة والشاملة فقط باستخدام ميكروفون مزوّد بلوحة مفاتيح.

## إشعار:

يمكنك فقط تخصيص اسم مستعار أو معرف واحد لمفتاح رقم، ولكن يمكنك إقران أكثر من مفتاح رقم واحد بالاسم المستعار أو المعرف. يمكن تخصيص كل مفاتيح الأرقام على الميكروفون المزوّد بلوحة مفاتيح. راجع تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344 لمزيد من المعلومات.

## زر الوصول بلمسة واحدة المبرمج

تستخدم هذه الطريقة للمكالمات والجماعية والخاصة والهاتفية فقط.

يمكن أن يكون لديك معرف واحد فقط مخصص لزر الوصول بلمسة واحدة بالضغط لفترة طويلة أو قصيرة على زر قابل للبرمجة. يمكن أن يحتوي الراديو على العديد من أزرار الوصول بلمسة واحدة المبرمجة.

## الزر القابل للبرمجة

تستخدم هذه الطريقة للمكالمات الهاتفية فقط.

## قرص تحديد مستوى الصوت/القنوات

يمكن عبر هذه الطريقة تحديد الاسم المستعار أو المعرف الخاص بالمشارك أو الاسم المستعار أو المعرف الخاص بالمجموعة.

يضيء مؤشر LED بلون أخضر ثابت عند قيام الراديو بالإرسال ويومض بلون أخضر عند قيام الراديو بالتلقي.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على زر **PTT** لإجراء المكالمة. يضيء مؤشر LED الأخضر.

5 حرر زر **PTT** للاستماع. يومض مؤشر LED الأخضر عندما يستجيب أي مستخدم في المجموعة. تعرض الشاشة رمز **مكالمة جماعية**، والاسم المستعار أو المعرف، والاسم المستعار أو المعرف الخاص بالراديو المُرسِل.

6 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة. تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED الأخضر. وتعرض الشاشة رمز **مكالمة جماعية** والاسم المستعار للمكالمة الجماعية.

3 حرر زر **PTT** للاستماع.

يضيء مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة رمز **مكالمة جماعية**، والاسم المستعار أو المعرف الخاص بالمجموعة، والاسم المستعار أو المعرف الخاص بالراديو المُرسِل.

4 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة. تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

## إجراء مكالمات جماعية باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

راجع تخصيص إشارات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344 لمزيد من المعلومات.

## الرد على المكالمات الجماعية

لتلقي مكالمة من مجموعة مستخدمين، يجب تكوين الراديو كجزء من هذه المجموعة. اتبع الإجراء للرد على مكالمات جماعية على الراديو الخاص بك.

عند تلقي مكالمة جماعية:

- يومض مؤشر LED الأخضر.
- تعرض الشاشة رمز **مكالمة جماعية** في الركن العلوي الأيسر.
- يعرض سطر النص الأول الاسم المستعار للمتصل.
- يعرض سطر النص الثاني الاسم المستعار للمكالمة الجماعية.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

1 قم بأحد الإجراءات التالية:

- عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.
- عند تمكين ميزة قطع الصوت، اضغط على زر **PTT** لقطع الصوت من الراديو المرسل وإخلاء القناة من أجل الرد. يضيء مؤشر LED الأخضر.

## إجراء مكالمات جماعية باستخدام مفتاح الرقم المبرمج

اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المحدد مسبقًا عندما تكون على الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترنًا بإدخال.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED الأخضر.

3 حرر زر **PTT** للاستماع.

يومض مؤشر LED الأخضر عندما يستجيب أي مستخدم في المجموعة.

4 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

## 2 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
- انتظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

3 حرر زر **PTT** للاستماع.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

عندما يتلقى الراديو مكالمة جماعية بينما لا يكون في الشاشة الرئيسية، فإنه يظل في الشاشة الحالية التي كان فيها قبل الرد على المكالمة.

اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية لعرض الاسم المستعار للمتصل قبل الرد.

مكالمات خاصة 

المكالمة الخاصة هي مكالمة من راديو فردي إلى راديو فردي آخر.

توجد طريقتان لإعداد مكالمة خاصة. النوع الأول هو إعداد المكالمة بعد إجراء فحص وجود الراديو، والنوع الآخر هو إعداد المكالمة على الفور. يمكن للوكيل برمجة نوع واحد فقط من هذين النوعين في الراديو.

إجراء مكالمات خاصة 

يجب برمجة الراديو الخاص بك لبدء مكالمة خاصة. إذا لم يتم تمكين هذه الميزة، فستصدر نغمة مؤشر سلبية عند بدء المكالمة. اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك.

استخدم ميزتي رسالة نصية أو ت. المكالمات للاتصال بجهاز راديو فردي. لمزيد من المعلومات، راجع الرسائل النصية في صفحة 128 أو تشغيل تنبيه المكالمات في صفحة 354.

## 1 قم بأحد الإجراءات التالية:

- حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بالمشارك.
- اضغط على زر الوصول بلمسة واحدة المبرمج.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED الأخضر. تعرض الشاشة رمز مكالمة خاصة والاسم المستعار للمشارك وحالة المكالمة.

3 انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

4 حرر زر **PTT** للاستماع.

يومض مؤشر LED الأخضر عندما يستجيب الراديو المستهدف.

5 انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

6 حرر زر **PTT** للاستماع.

يومض مؤشر **LED** الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة الاسم المستعار أو المعرف الخاص بالمستخدم المرسل.

7 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.

تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. تصدر نغمة وتعرض الشاشة انتهت المكالمات.

## إجراء مكالمات خاصة باستخدام الاتصال اليدوي

اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

5 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.

تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. تصدر نغمة وتعرض الشاشة انتهت المكالمات.

## إجراء مكالمات خاصة باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على زر **PTT** لإجراء المكالمات. يضيء مؤشر **LED** الأخضر. تعرض الشاشة الاسم المستعار للوجهة.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- أدخل معرف المشترك واضغط على  للمتابعة.
- حرر المعرف الخاص بالمشترك الذي قمت بطلبه مسبقاً واضغط على  للمتابعة.

6 اضغط على زر **PTT** لإجراء المكالمة. يضيء مؤشر LED الأخضر. تعرض الشاشة الاسم المستعار للوجهة.

7 انتظر حتى انتهاء نغمة الإذن بالكلام وتحديث بوضوح في الميكروفون إذا كان ممكناً.

8 حرر زر **PTT** للاستماع.

يضيء مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة الاسم المستعار أو المعرف الخاص بالمستخدم المرسل.

9  عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقاً. تصدر نغمة. وتعرض الشاشة انتهاء المكالمة.

## إجراء مكالمات خاصة باستخدام مفتاح الرقم القابل للبرمجة

اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المحدد مسبقاً عندما تكون على الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصاً لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترناً بإدخال.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضيء مؤشر LED الأخضر. ستعرض الشاشة رمز **مكالمة خاصة** في الركن العلوي الأيسر. يعرض سطر النص الأول الاسم المستعار للمتصل. يعرض سطر النص الثاني حالة المكالمة.

يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.

- عند تمكين ميزة قطع إرسال **Dekey** عن بُعد، اضغط على زر **PTT** لإيقاف مكالمة صادرة قابلة للقطع وإخلاء القناة لتتمكن من الرد.

يضئ مؤشر **LED** الأخضر.

**2** انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

**3** حرر زر **PTT** للاستماع.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

**3** حرر زر **PTT** للاستماع.

يوميض مؤشر **LED** الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة الاسم المستعار للوجهة.

**4** عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. تصدر نغمة. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

راجع تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة في صفحة **344** لمزيد من المعلومات.

## المكالمات الشاملة

المكالمة الشاملة هي مكالمة من راديو فردي إلى كل راديو موجود على القناة. تُستخدم المكالمات الشاملة لإجراء بيانات هامة، تتطلب الانتباه التام من المستخدم. لا يمكن للمستخدمين الموجودين على القناة الرد على مكالمات شاملة.

## تلقي مكالمات شاملة

عند تلقي مكالمات شاملة:

- تصدر نغمة.
- يوميض مؤشر **LED** الأخضر.

## الرد على مكالمات خاصة

اتبع الإجراء للرد على مكالمات خاصة على الراديو الخاص بك.

عند تلقي مكالمات خاصة:

- يوميض مؤشر **LED** الأخضر.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمات الواردة من خلال السماع.

**1** قم بأحد الإجراءات التالية:

- عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما

• تعرض الشاشة رمز **مكالمة جماعية** في الركن العلوي الأيسر.

• يعرض سطر النص الأول معرف الاسم المستعار للمتصل.

• يعرض سطر النص الثاني كل المكالمات.

• يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماعة.

• يعود الراديو إلى الشاشة التي كان عليها قبل تلقي المكالمة الشاملة عند انتهاء المكالمة.

• لا تنتظر المكالمة الشاملة فترة محددة مسبقاً قبل الانتهاء.

• في حالة تمكين ميزة الإشارة إلى قناة حرة، ستسمع نغمة تنبيه قصيرة عند تحرير زر **PTT** في الراديو المُرسَل، للإشارة إلى أن القناة متاحة لك للاستخدام.

• لا يمكنك الرد على مكالمة شاملة.

إشعار:

يتوقف الراديو عن تلقي المكالمة الشاملة في حالة التبديل إلى قناة مختلفة أثناء تلقي المكالمة. لن تتمكن من متابعة أي عملية انتقال في القائمة أو أي عملية تحرير حتى تنتهي المكالمة الشاملة.

## إجراء مكالمات شاملة

يجب برمجة الراديو الخاص بك لكي تتمكن من إجراء مكالمة شاملة. اتبع الإجراء لإجراء مكالمات شاملة على الراديو الخاص بك.

1 حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بمجموعة مكالمة شاملة.

2 اضغط على زر **PTT** لإجراء المكالمة.

يضئ مؤشر LED الأخضر. تعرض الشاشة رمز **مكالمة جماعية** وكل المكالمات.

3 قم بأحد الإجراءات التالية:

• انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُكتمًا.

•  انتظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان مُكتمًا.

• لا يمكن للمستخدمين الموجودين على القناة الرد على مكالمة شاملة.

## إجراء مكالمات شاملة باستخدام مفتاح الرقم القابل للبرمجة

اتبع الإجراء لإجراء مكالمات شاملة على الراديو الخاص بك باستخدام مفتاح الرقم القابل للبرمجة.

1 اضغط لفترة طويلة على مفتاح الرقم المبرمج المعين للاسم المستعار أو المعرف المحدد مسبقًا عندما تكون في الشاشة الرئيسية.

إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.

تصدر نغمة مؤشر سلبية إذا لم يكن مفتاح الرقم مقترنًا بإدخال.

## إجراء مكالمات منتقاة

يجب برمجة الراديو الخاص بك لبدء مكالمات منتقاة. اتبع الإجراء لإجراء مكالمات منتقاة على الراديو الخاص بك.

1 حدد قناة باستخدام الاسم المستعار النشط أو المعرف النشط الخاص بالمستخدم.

2 اضغط على زر **PTT** لإجراء المكالمات.

يضيء مؤشر LED الأخضر. تعرض الشاشة رمز **مكالمة خاصة** والاسم المستعار للمستخدم وحالة المكالمات.

3 قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.
-  انتظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

4 حرر زر **PTT** للاستماع.

يضيء مؤشر LED الأخضر عندما يستجيب الراديو المستهدف.

5 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.

2 اضغط على زر **PTT** لإجراء المكالمات.

يضيء مؤشر LED الأخضر.

3 حرر زر **PTT** للاستماع.

يضيء مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. لا يمكن الرد على مكالمات شاملة في نفس اللحظة.

4  عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمات.

تنتهي المكالمات عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمات. بالنسبة للمكالمة الخاصة، ستسمع نغمة قصيرة عند انتهاء المكالمات.

راجع تخصيص إدخالات إلى مفاتيح أرقام قابلة للبرمجة في صفحة 344 لمزيد من المعلومات.

## مكالمات منتقاة

المكالمة المنتقاة هي مكالمات من راديو فردي إلى راديو فردي آخر. هي مكالمات خاصة في نظام تناظري.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

## المكالمات الهاتفية

المكالمة الهاتفية هي مكالمة من راديو فردي إلى هاتف. إذا لم تكن إمكانية المكالمات الهاتفية ممكنة في الراديو الخاص بك:

6 وتعرض الشاشة انتهت المكالمة.

## الرد على مكالمات منتقاة

اتبع الإجراء للرد على مكالمات منتقاة على الراديو الخاص بك. عند تلقي مكالمة منتقاة:

- يومض مؤشر LED الأخضر.
- يعرض سطر النص الأول رمز مكالمة خاصة والاسم المستعار للمتصل أو م . منتقاه أوت. مع اتصال.
- يتم إلغاء كتم صوت الراديو ويصدر صوت المكالمة الواردة من خلال السماع.

1 اضغط على زر PTT للرد على المكالمة.

يضيء مؤشر LED الأخضر.

2 انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

3 حرر زر PTT للاستماع.

تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا. تصدر نغمة. وتعرض الشاشة انتهت المكالمة.

- تعرض الشاشة غير متاح.
- يكتم الراديو صوت المكالمة.
- يعود الراديو إلى الشاشة السابقة عند انتهاء المكالمة.
- أثناء المكالمة الهاتفية، يحاول الراديو إنهاء المكالمة عندما:
- تضغط على زر الوصول بلمسة واحدة مع وجود رمز إلغاء الوصول المكون مسبقًا.
- تُدخل رمز إلغاء الوصول كإدخال لأرقام إضافية.
- أثناء الوصول إلى القناة، وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو الخاص بك فقط لزر التشغيل/إيقاف التشغيل، والتحكم في مستوى الصوت، وأزرار أو أقراص محدد القناة. يتم إصدار نغمة لكل إدخال غير صالح.

أثناء الوصول إلى القناة، اضغط على (5) لتجاهل محاولة الاتصال. تصدر نغمة.

إشعار:

لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## إجراء مكالمات هاتفية

اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك.

**1** اضغط على زر **الوصول بلمسة واحدة** المبرمج للوصول إلى الاسم المستعار أو المعرف المحدد مسبقًا.

إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغًا، فستصدر نغمة مؤشر سلبية. في حالة لم تتم تهيئة رمز الوصول مسبقًا في قائمة جهات الاتصال، تعرض الشاشة رمز الوصول.

**2** أدخل رمز الوصول، واضغط على **OK** للمتابعة.

لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.

**3** اضغط على زر **PTT** للرد على المكالمات. حرر زر **PTT** للاستماع.

**4** أدخل أرقامًا إضافية باستخدام لوحة المفاتيح إذا طلبت المكالمات ذلك، واضغط على **OK** للمتابعة.

في حالة انتهاء المكالمات أثناء إدخال الأرقام الإضافية التي طلبتها المكالمات، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمات.

تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). يعود الراديو إلى الشاشة السابقة.

**5**

اضغط على **5** لإنهاء المكالمات.

**6**

قم بأحد الإجراءات التالية:

- إذا لم يتم تكوين رمز إلغاء الوصول مسبقًا، فأدخل رمز إلغاء الوصول عندما تعرض الشاشة إزالة رمز الوصول، واضغط على

**OK** للمتابعة.

يعود الراديو إلى الشاشة السابقة.

- اضغط على زر **الوصول بلمسة واحدة** المبرمج. إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغًا، فستصدر نغمة مؤشر سلبية.

تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمات. إذا انتهت المكالمات بنجاح:

- تصدر نغمة.

- وتعرض الشاشة انتهت المكالمات.

إذا فشل إنهاء المكالمات، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر الخطوتين الأخيرتين أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمات.

## إجراء مكالمات هاتفية باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

عندما تضغط على زر **PTT** أثناء وجودك في شاشة جهات اتصال الهاتف:

• يعرض السطر الأول من الشاشة رقم الهاتف. #.

• يعرض السطر الثاني من الشاشة مؤشراً وامضاً.

إذا كان الإدخال المحدد فارغاً:

• تصدر نغمة مؤشر سلبية.

• تعرض الشاشة مكالمات هاتفية غير صالحة #.

4

اضغط على  أو  للوصول إلى اتصال بالهواتف.

اضغط على  للتحديد.

تعرض الشاشة رمز الوصول # إذا لم يتم تكوين رمز الوصول مسبقاً.

5

أدخل رمز الوصول، واضغط على  للمتابعة.

لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.

يعرض سطر النص الأول الاتصال. يعرض سطر النص الثاني الاسم المستعار أو المعرف الخاص بالمشارك ورمز اتصال هاتفي. إذا كانت المكالمات ناجحة:

• تصدر نغمة تردد متعدد ثنائي النغمة (DTMF).

• تسمع نغمة الطلب الخاصة بمستخدم الهاتف.

• يعرض سطر النص الأول الاسم المستعار أو المعرف الخاص بالمشارك ورمز **RSSI**.

• يعرض سطر النص الثاني اتصال هاتفي، ورمز اتصال هاتفي.

إذا لم تكن المكالمات ناجحة:

• تصدر نغمة.

• تعرض الشاشة فشلت المكالمات الهاتفية ثم رمز

الوصول #.

**10** إذا لم يتم تكوين رمز إلغاء الوصول مسبقاً، فأدخل رمز إلغاء الوصول عندما تعرض الشاشة إزالة رمز الوصول، واضغط على

 للمتابعة.

يعود الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة. إذا انتهت المكالمة بنجاح:

- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمة.

إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر **خطوة 9 وخطوة 10**، أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة. عند الضغط على زر **PTT** أثناء التواجد في شاشة جهات اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغط موافق لإجراء المكالمة.

عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمة.

في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

- يعود الراديو إلى الشاشة التي كان عليها قبل بدء المكالمة إذا تم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال.

**6** اضغط على زر **PTT** للرد على المكالمة.  
يختفي رمز **RSSI**.

**7** حرر زر **PTT** للاستماع.

**8** أدخل أرقامًا إضافية باستخدام لوحة المفاتيح إذا طلبت المكالمة ذلك، واضغط على  للمتابعة.

في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). يعود الراديو إلى الشاشة السابقة.

**9** اضغط على  لإنهاء المكالمة.

## إشعار:

أثناء الوصول إلى القناة، اضغط على  لتجاهل محاولة الاتصال وعندها ستصدر نغمة.

أثناء المكالمة، عند الضغط على زر **الوصول بلمسة واحدة** مع تكوين رمز إلغاء الوصول مسبقاً أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمة.

أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر **التشغيل/إيقاف التشغيل** و**قرص مستوى الصوت** وزر **القناة فقط**. يتم إصدار نغمة لكل إدخال غير صالح.

## إجراء مكالمات هاتفية باستخدام الاتصال اليدوي

اتبع الإجراء لإجراء مكالمات هاتفية على الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم الهاتف. اضغط على  للتحديد.

تعرض الشاشة الرقم: ومؤشراً وامضاً.

5 أدخل رقم الهاتف، واضغط على  للمتابعة.

تعرض الشاشة رمز الوصول: ومؤشراً وامضاً إذا لم يتم تكوين رمز الوصول مسبقاً.

6 أدخل رمز الوصول، واضغط على  للمتابعة.

لا يمكن أن يتجاوز رمز الوصول أو إلغاء الوصول 10 أحرف.

7 يضيء مؤشر LED الأخضر. ستعرض الشاشة رمز اتصال هاتفي في الركن العلوي لجهة اليسار. يعرض سطر النص الأول الاسم المستعار للمشارك. يعرض سطر النص الثاني حالة المكالمة. إذا كانت المكالمة ناجحة:

- تصدر نغمة تردد متعدد ثنائي النغمة (DTMF).

- إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغًا، فستصدر نغمة مؤشر سلبية.
- تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة.
- إذا انتهت المكالمة بنجاح:
- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمة.
- إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر **خطوة 8** أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة.

- تسمع نغمة الطلب الخاصة بمستخدم الهاتف.
- يعرض سطر النص الأول الاسم المستعار للمشارك.
- تستمر الشاشة في عرض رمز **اتصال هاتفي** في الركن العلوي الأيسر. إذا لم تكن المكالمة ناجحة:
- تصدر نغمة.
- تعرض الشاشة فشلت المكالمة الهاتفية ثم رمز الوصول ❗.
- يعود الراديو إلى الشاشة التي كان عليها قبل بدء المكالمة إذا تم تكوين رمز الوصول مسبقًا في قائمة جهات الاتصال.

8

اضغط على  لإنهاء المكالمة.

9

قم بأحد الإجراءات التالية:

- إذا لم يتم تكوين رمز إلغاء الوصول مسبقًا، فأدخل رمز إلغاء الوصول عندما تعرض الشاشة إزالة رمز الوصول ❗، واضغط على  للمتابعة.
- يعود الراديو إلى الشاشة السابقة.
- اضغط على زر **الوصول بلمسة واحدة** المبرمج.

إشعار:

عند الضغط على زر **PTT** أثناء التواجد في شاشة جهات اتصال الهاتف، ستصدر نغمة وستعرض الشاشة اضغظ موافق لإجراء المكالمة.

عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة انتهت المكالمة.

في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

أثناء الوصول إلى القناة، اضغظ على **(5)** لتجاهل محاولة الاتصال وعندها ستصدر نغمة.

أثناء المكالمة، عند الضغط على زر **الوصول بلمسة واحدة** مع تكوين رمز إلغاء الوصول مسبقاً أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمة.

أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر **التشغيل/إيقاف التشغيل** وقرص مستوى الصوت وزر القناة فقط. يتم إصدار نغمة لكل إدخال غير صالح.

## إجراء مكالمة جماعية أو خاصة أو هاتفية أو شاملة عن طريق البحث عن الاسم المستعار

اتبع الإجراء لإجراء أي مكالمات باستخدام البحث عن الاسم المستعار.

1 اضغظ على **OK** للوصول إلى القائمة.

2 اضغظ على **▲** أو **▼** للوصول إلى جهات الاتصال. اضغظ على **OK** للتحديد.

تعرض الشاشة الإدخالات بترتيب أبجدي.

3 اضغظ على **▲** أو **▼** للوصول إلى الاسم المستعار أو المعرف المطلوب الخاص بالمستترك. يعرض السطر الأول من الشاشة رقم الهاتف. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. استخدم لوحة المفاتيح لإدخال رقم هاتف.

4 اضغظ على **OK** للتحديد. في حال كان الإدخال المحدد خالياً، يتم إصدار نغمة مؤشر سلبية، وتعرض الشاشة **Phone Call Invalid #** (رقم مكالمة هاتفية غير صالح).

5 اضغط على  أو  للوصول إلى الاتصال بالهواتف واضغط

على  للتحديد. في حال لم يتم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، سيعرض السطر الأول من الشاشة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل رمز الوصول،

واضغط على الزر  للمتابعة. إذا تم بنجاح، تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). تسمع نغمة الطلب الخاصة بمستخدم الهاتف. يعرض السطر الأول من الشاشة الاسم المستعار أو المعرف الخاص بالمشارك ورمز مؤشر قوة الإشارة المتلقاة (RSSI). يعرض السطر الثاني من الشاشة اتصال هاتفى ورمز المكالمة الهاتفية. إذا لم يتم بنجاح، فستصدر نغمة وتعرض الشاشة فشلت المكالمة الهاتفية. يعود الراديو إلى شاشة إدخال رمز الوصول. في حال تم تكوين رمز الوصول مسبقاً في قائمة جهات الاتصال، يعود الراديو إلى الشاشة التي كنت فيها قبل بدء المكالمة.

6 اضغط على زر **PTT** للتحدث وقم بتحريره للاستماع. يخفي رمز مؤشر قوة الإشارة المتلقاة (RSSI) أثناء الإرسال.

7 لإدخال أرقام إضافية، إذا طلبتها المكالمة الهاتفية، قم بأحد الإجراءات التالية.

- اضغط على أي مفتاح على لوحة المفاتيح لبدء إدخال الأرقام الإضافية. يعرض السطر الأول من الشاشة أرقام إضافية. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الأرقام الإضافية

واضغط على الزر  للمتابعة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF) ويعود الراديو إلى الشاشة السابقة.

- اضغط على زر **الوصول بلمسة واحدة**. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF). إذا كان الإدخال الخاص بزر **الوصول بلمسة واحدة** فارغاً، فستصدر نغمة مؤشر سلبية.

8

اضغط على  لإنهاء المكالمة. في حال لم يتم تكوين رمز إلغاء الوصول مسبقاً في قائمة جهات الاتصال، يعرض السطر الأول من الشاشة إزالة رمز الوصول. يعرض السطر الثاني من الشاشة مؤشراً

وامضاً. أدخل رمز إلغاء الوصول ثم اضغط على  للمتابعة. يعود الراديو إلى الشاشة السابقة. تصدر نغمة تردد متعدد ثنائي النغمة (DTMF)، وتعرض الشاشة يتم الآن إنهاء مكالمة. إذا تم بنجاح، ستصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. يعود الراديو إلى شاشة اتصال هاتفى. إذا لم يتم بنجاح، فسيعود الراديو إلى شاشة اتصال الهاتف. ستصدر نغمة وتعرض الشاشة اضغط موافق لإجراء المكالمة. عندما يقوم مستخدم الهاتف بإنهاء المكالمة، تصدر نغمة وتعرض الشاشة تم إنهاء المكالمة. في حالة انتهاء المكالمة أثناء إدخال الأرقام الإضافية التي طلبتها المكالمة الهاتفية، يعود الراديو إلى الشاشة التي كنت بها قبل بدء المكالمة.

## إشعار:

أثناء الوصول إلى القناة، اضغط على **(5\*)** لتجاهل محاولة الاتصال وعندها ستصدر نغمة أو للخروج من البحث عن الاسم المستعار. اضغط على **[OK]** أو **(5\*)** للخروج من البحث عن الاسم المستعار. أثناء المكالمات، عند الضغط على زر **الوصول بلمسة واحدة** مع تكوين رمز إلغاء الوصول مسبقاً أو إدخال رمز إلغاء الوصول كإدخال للأرقام الإضافية، سيحاول الراديو إنهاء المكالمات. أثناء الوصول إلى القناة وإرسال رمز الوصول/إلغاء الوصول أو الأرقام الإضافية، يستجيب الراديو لزر التشغيل/إيقاف التشغيل وقرص مستوى الصوت وزر القناة فقط. يتم إصدار نغمة لكل إدخال غير صالح.

## التردد المتعدد الثنائي النغمة

تتيح ميزة التردد المتعدد الثنائي النغمة (DTMF) للراديو العمل في نظام لاسلكي مع واجهة لأنظمة هاتفية.

يمكنك إيقاف تشغيل نغمة التردد المتعدد الثنائي النغمة (DTMF) من خلال تعطيل جميع نغمات وتنبهات الراديو. راجع **تشغيل تنبيهات/نغمات الراديو أو إيقاف تشغيلها في صفحة 173** لمزيد من المعلومات.

## بدء مكالمات DTMF

اتبع الإجراء لبدء مكالمات DTMF على الراديو الخاص بك.

1 اضغط مع الاستمرار على زر **PTT**.

## 2 قم بأحد الإجراءات التالية:

- أدخل الرقم المطلوب لبدء مكالمات التردد المتعدد الثنائي النغمة (DTMF).
- اضغط على **(\*)** لبدء مكالمات تردد متعدد ثنائي النغمة (DTMF).
- اضغط على **(#)** لبدء مكالمات تردد متعدد ثنائي النغمة (DTMF).

## الرد على مكالمات هاتفية كمكالمات جماعية

اتبع الإجراء للرد على مكالمات هاتفية كمكالمات جماعية على الراديو الخاص بك.

عند تلقي مكالمات هاتفية كمكالمات جماعية:

- ستعرض الشاشة رمز **اتصال هاتفي** في الركن العلوي لجهة اليسار.
  - تعرض الشاشة الاسم المستعار للمجموعة واتصال هاتفي.
- إذا لم يتم تمكين إمكانية المكالمات الهاتفية في الراديو، فسيعرض السطر الأول من الشاشة غير متاح ويكتم الراديو صوت المكالمات. يعود الراديو إلى الشاشة السابقة عند انتهاء المكالمات.

1 اضغط على زر **PTT** للرد على المكالمات. حرر زر **PTT** للاستماع.

2

اضغط على **(5\*)** لإنهاء المكالمات.

تعرض الشاشة يتم الآن إنهاء مكالمات.

إذا انتهت المكالمة بنجاح:

- تصدر نغمة.
  - وتعرض الشاشة انتهت المكالمة.
- إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر هذه الخطوة أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة.

3 اضغط على (5) لإنهاء المكالمة.

تعرض الشاشة يتم الآن إنهاء مكالمة.  
إذا انتهت المكالمة بنجاح:

- تصدر نغمة.
  - تعرض الشاشة كل المكالمات وانتهت المكالمة.
- إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر خطوة 3 أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة.

## الرد على مكالمات هاتفية كمكالمات شاملة

عند تلقي مكالمة هاتفية كمكالمة شاملة، يكون بإمكانك الرد على المكالمة أو إنهاؤها فقط في حالة تعيين نوع المكالمة الشاملة للقناة. اتبع الإجراء للرد على مكالمات هاتفية كمكالمات شاملة على الراديو الخاص بك.

عند تلقي مكالمة هاتفية كمكالمة شاملة:

- ستعرض الشاشة رمز اتصال هاتفي في الركن العلوي لجهة اليسار.
- تعرض الشاشة كل المكالمات واتصال هاتفي.

إذا لم يتم تمكين إمكانية المكالمات الهاتفية في الراديو، فسيعرض السطر الأول من الشاشة غير متاح ويكتم الراديو صوت المكالمة.  
يعود الراديو إلى الشاشة السابقة عند انتهاء المكالمة.

1 اضغط على زر PTT للرد على المكالمة.

2 حرر زر PTT للاستماع.

## الرد على مكالمات هاتفية كمكالمات خاصة

اتبع الإجراء للرد على مكالمات هاتفية كمكالمات خاصة على الراديو الخاص بك.

عند تلقي مكالمة هاتفية كمكالمة خاصة:

- ستعرض الشاشة رمز اتصال هاتفي في الركن العلوي لجهة اليسار.
- تعرض الشاشة الاسم المستعار للمتلصل أو اتصال هاتفي.

إذا لم يتم تمكين إمكانية المكالمات الهاتفية في الراديو، فسيعرض السطر الأول من الشاشة غير متاح ويكتم الراديو صوت المكالمة. يعود الراديو إلى الشاشة السابقة عند انتهاء المكالمة.

1 اضغط على زر PTT للرد على المكالمة. حرر زر PTT للاستماع.

اضغط على (5) لإنهاء المكالمة.

تعرض الشاشة يتم الآن إنهاء مكالمة.  
إذا انتهت المكالمة بنجاح:

- تصدر نغمة.
- وتعرض الشاشة انتهت المكالمة.

إذا فشل إنهاء المكالمة، يعود الراديو إلى شاشة الاتصال الهاتفي. كرر هذه الخطوة أو انتظر حتى يقوم مستخدم الهاتف بإنهاء المكالمة.

إشعار:

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## مباشر

تسمح لك هذه الميزة بالاستمرار في الاتصال عندما لا يعمل معيد التقوية أو عندما يكون الراديو خارج نطاق معيد التقوية ولكنه في نطاق التحدث لأجهزة الراديو الأخرى.

يتم الاحتفاظ بالإعداد مباشر حتى بعد إيقاف التشغيل.

إشعار:

لا تنطبق هذه الميزة في السعة الإضافية-أحادية الموقع والسعة الإضافية-متعددة المواقع وقنوات النطاق الترددي المدني الموجودة في نفس التردد.

## التبديل بين وضعي معيد التقوية ومباشر

اتبع الإجراء للتبديل بين وضعي معيد التقوية ومباشر على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

## إيقاف مكالمات الراديو

تتيح لك هذه الميزة إيقاف مكالمة جماعية أو خاصة جارية لإخلاء القناة للإرسال. على سبيل المثال، عندما يواجه جهاز الراديو حالة "تعليق الميكروفون" عندما يتم الضغط على زر PTT بدون قصد من قبل المستخدم. يجب برمجة الراديو للسماح لك باستخدام هذه الميزة. اتبع الإجراء لإيقاف المكالمات على الراديو الخاص بك.

1 اضغط على زر قطع إرسال Dekey عن بُعد المبرمج.

تعرض الشاشة Dekey عن بُعد.

2 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.

قد يكون الوكيل أو مسؤول النظام قام بتخصيص الراديو الخاص بك وفقًا لاحتياجاتك المحددة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## رسالة تذكير القناة الرئيسية

توفر هذه الميزة رسالة تذكير في حالة عدم تعيين الراديو على القناة الرئيسية لفترة زمنية.

إذا تم تمكين هذه الميزة عبر برنامج برمجة العميل (CPS)، فعند عدم تعيين الراديو الخاص بك إلى القناة الرئيسية لفترة زمنية، يحدث ما يلي بشكل دوري:

- تصدر نغمة رسالة تذكير القناة الرئيسية وبيان.
- يعرض السطر الأول من الشاشة قناة.
- يعرض السطر الثاني غير رئيسية.
- يمكنك الاستجابة لرسالة التذكير عن طريق تنفيذ أحد الإجراءات التالية:
- الرجوع إلى القناة الرئيسية.
- كتم صوت رسالة التذكير بصفة مؤقتة باستخدام الزر القابل للبرمجة.
- تعيين قناة رئيسية جديدة بواسطة الزر القابل للبرمجة.

## كتم صوت رسالة تذكير القناة الرئيسية

عند صدور رسالة تذكير القناة الرئيسية، يمكنك كتم صوت رسالة التذكير مؤقتًا.

• اضغط على الزر **Repeater/Talkaround** المبرمج. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مباشر. اضغط على

 للتحديد.

عند تمكينها، تظهر علامة ✓ بجوار ممكن.

في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

ستعود الشاشة تلقائيًا إلى الشاشة السابقة.

## الميزات المتقدمة

يشرح هذا الفصل عمليات الميزات المتوفرة في الراديو.

اضغط على زر **كتم** **تنبيه القناة الرئيسية** القابل للبرمجة.  
يعرض السطر الأول من الشاشة HCFR ويعرض السطر الثاني كتم .

## إعداد قنوات رئيسية جديدة

عند ظهور رسالة تذكير القناة الرئيسية، يمكنك تعيين قناة رئيسية جديدة.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **إعادة تعيين قناة رئيسية** القابل للبرمجة لتعيين القناة الحالية كقناة رئيسية جديدة. قم بتخطي الخطوات التالية.  
يعرض السطر الأول من الشاشة الاسم المستعار للقناة ويعرض السطر الثاني قناة رئيسية جديدة .
- اضغط على **OK** للوصول إلى القائمة.

2

اضغط على **▲** أو **▼** للوصول إلى أدوات  
مساعدة. اضغط على **OK** للتحديد.

3

اضغط على **▲** أو **▼** للوصول إلى إعدادات  
الراديو. اضغط على **OK** للتحديد.

4

اضغط على **▲** أو **▼** للوصول إلى قناة رئيسية .  
اضغط على **OK** للتحديد.

5

اضغط على **▲** أو **▼** للوصول إلى الاسم المستعار المطلوب  
للقناة الرئيسية الجديدة. اضغط على **OK** للتحديد.  
تعرض الشاشة **✓** بجانب الاسم المستعار المحدد للقناة الرئيسية.

## فحص الراديو

تسمح لك هذه الميزة بتحديد ما إذا كان راديو آخر نشطاً في نظام دون إزعاج  
مستخدم الراديو. لا تظهر أية إعلانات مسموعة أو مرئية على الراديو المستهدف.  
تنطبق هذه الميزة على الأسماء المستعارة للمشاركين ومعرفاتهم فقط. يجب برمجة  
الراديو للسماح لك باستخدام هذه الميزة.

## إرسال عمليات فحص الراديو

اتبع الإجراءات لإرسال عمليات فحص الراديو على الراديو الخاص بك.

1

اضغط على زر **فحص الراديو** المبرمج.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- أدخل المعرف أو الاسم المستعار الخاص بالمشارك واضغط على  للمتابعة.
- قم بتحرير المعرف الذي طلبته مسبقاً واضغط على  للمتابعة.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

تعرض الشاشة إشعاراً مؤقتاً صغيراً، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

انتظر حتى تصلك رسالة إعلام.

إذا ضغطت  أثناء انتظار الراديو للإشعار، فستصدر نغمة وينتهي الراديو كل المحاولات ويخرج من وضع فحص الراديو.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعاراً سلبياً صغيراً.
- يعود الراديو إلى شاشة الاسم المستعار أو المعرف الخاص بالمشارك.

## إرسال عمليات فحص الراديو باستخدام الاتصال اليدوي

اتبع الإجراء لإرسال عمليات فحص الراديو على الراديو الخاص بك باستخدام الاتصال اليدوي.

اضغط على  أو  للوصول إلى فحص الراديو.

اضغط على  للتحديد.

تعرض الشاشة إشعاراً مؤقتاً صغيراً، للإشارة إلى أن الطلب قيد التقدم.  
بضيء مؤشر LED الأخضر.

انتظر حتى تصلك رسالة إعلام.

إذا ضغطت على  أثناء انتظار الراديو لرسالة إعلام، فستصدر نغمة وينتهي الراديو جميع المحاولات ويخرج من وضع فحص الراديو.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعاراً سلبياً صغيراً.

يعود الراديو إلى شاشة الاسم المستعار أو المعرف الخاص بالمستخدم.

## مراقب عن بُعد

تُستخدم هذه الميزة لتشغيل الميكروفون الخاص براديو مستهدف باستخدام الاسم المستعار أو المعرف الخاص بالمستخدم. يمكنك استخدام هذه الميزة لمراقبة أي نشاط صوتي محيط بالراديو المستهدف عن بُعد.

يوجد نوعان من المراقبة عن بُعد:

- المراقبة عن بُعد بدون مصادقة
- المراقبة عن بُعد بمصادقة.

ميزة المراقبة عن بُعد المصدّق عليها هي ميزة يمكن شراؤها. في ميزة المراقبة عن بُعد المصدّق عليها، يكون التحقق من الصحة مطلوباً عندما يقوم الراديو لديك بتشغيل ميكروفون الراديو المستهدف.

عندما يبدأ الراديو لديك هذه الميزة على راديو مستهدف عبر مصادقة المستخدم، تكون عبارة مرور مطلوبة. تتم برمجة عبارة المرور مسبقاً إلى الراديو المستهدف عبر CPS.

يجب برمجة كل من الراديو الخاص بك والراديو المستهدف للسماح لك باستخدام هذه الميزة.

تتوقف هذه الميزة تلقائياً بعد مدة زمنية مبرمجة أو عندما يتم التشغيل بواسطة أحد المستخدمين للراديو المستهدف.

## بدء تشغيل ميزة مراقب عن بُعد

اتبع الإجراء لبدء المراقب عن بُعد على الراديو الخاص بك.

- يبدأ تشغيل الصوت من الراديو المراقب لمدة مبرمجة وتعرض الشاشة مراقب مراقبة. بمجرد انتهاء المؤقت، تصدر نغمة تحذير ويتوقف مؤشر LED.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## بدء المراقبة عن بعد باستخدام قائمة جهات الاتصال

اتبع الإجراء لبدء المراقبة عن بعد على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

- 1 اضغط على  للوصول إلى القائمة.
- 2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.
- 3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

1 اضغط على زر مراقبة عن بعد المبرمج.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب.

3 اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبيًا صغيرًا، وتعود إلى الشاشة السابقة.

4 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

4

اضغط على  أو  للوصول إلى مراقبة عن بعد.

5

اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبياً صغيرًا، وتعود إلى الشاشة السابقة.

6

انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- يبدأ تشغيل الصوت من الراديو المراقب لمدة مبرمجة وتعرض الشاشة مراقب عن بعد. بمجرد انتهاء المؤقت، تصدر نغمة تحذير ويتوقف مؤشر LED.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبياً صغيرًا.

## بدء المراقبة عن بعد باستخدام الاتصال اليدوي

اتبع الإجراء لبدء المراقبة عن بعد على الراديو الخاص بك باستخدام الاتصال اليدوي.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى اتصال يدوي. اضغط

على  للتحديد.

4

اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط

على  للتحديد.

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- يبدأ تشغيل الصوت من الراديو المراقب لمدة مبرمجة وتعرض الشاشة مراقب عن بعد. بمجرد انتهاء المؤقت، تصدر نغمة تحذير ويتوقف مؤشر LED.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## قوائم المسح

يتم إنشاء قوائم المسح وتخصيصها لقنوات أو مجموعات فردية. يقوم الراديو بالمسح بحثًا عن نشاط صوتي من خلال التنقل عبر تسلسل القنوات أو المجموعات المحدد في قائمة المسح الخاصة بالقناة أو المجموعة الحالية.

يمكن للراديو أن يدعم ما يصل إلى 250 قائمة فحص، بحد أقصى 16 عضوًا في القائمة.

وتدعم كل قائمة مسح مزيجًا من الإدخالات التناظرية والرقمية.

يمكنك إضافة قنوات أو حذفها أو ترتيب أولويتها من خلال تحرير قائمة مسح.

يمكنك إرفاق قائمة مسح جديدة بالراديو عن طريق برمجة اللوحة الأمامية. راجع تكوين اللوحة الأمامية في صفحة 167 لمزيد من المعلومات.

### 5 قم بأحد الإجراءات التالية:

- أدخل المعرف أو الاسم المستعار الخاص بالمشارك واضغط على  للمتابعة.
- قم بتحرير المعرف الذي طلبته مسبقًا واضغط على  للمتابعة.

### 6

اضغط على  أو  للوصول إلى مراقبة عن بعد.

### 7

اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبيًا صغيرًا، وتعود إلى الشاشة السابقة.

### 8 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

## عرض الإدخالات في قائمة المسح باستخدام البحث عن الاسم المستعار

اتبع الإجراء لعرض إدخالات إلى قائمة المسح على الراديو الخاص بك باستخدام البحث عن الاسم المستعار.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى قائمة الفحص. اضغط على  للتحديد.

4 أدخل الحرف الأول من الاسم المستعار المطلوب. ستعرض الشاشة مؤشراً وامضاً.

5 أدخل باقي أحرف الاسم المستعار المطلوب.

يظهر رمز أولوية على يمين الاسم المستعار للعضو، إذا تم تعيينه، للإشارة إلى ما إذا كان هذا العضو في قائمة قنوات ذات الأولوية 1 أو الأولوية 2. لا يمكن أن يكون لديك عدة قنوات ذات الأولوية 1 أو الأولوية 2 في نفس قائمة المسح. لا يوجد رمز أولوية إذا تم تعيين الأولوية على لا يوجد.

إشعار:

هذه الميزة غير قابلة للتطبيق في السعة الإضافية.

## عرض الإدخالات في قائمة المسح

اتبع الإجراء لعرض الإدخالات في قائمة المسح على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى قائمة الفحص. اضغط على  للتحديد.

4 اضغط على  أو  لعرض كل عضو في القائمة.

5 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى مستوى الأولوية المطلوب. اضغط على  للتحديد.

تعرض الشاشة إشعارًا إيجابيًا صغيرًا ثم إضافة آخر؟.

7 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم لإضافة إدخال جديد. اضغط على  للتحديد. كرر خطوة 5 وخطوة 6.
- اضغط على  أو  للوصول إلى لا لحفظ القائمة الحالية. اضغط على  للتحديد.

## إضافة إدخال جديدة إلى قائمة المسح باستخدام البحث

### عن الاسم المستعار

اتبع الإجراء لإضافة إدخال جديدة إلى قائمة المسح على الراديو الخاص بك باستخدام البحث عن الاسم المستعار.

البحث عن الاسم المستعار غير حساس لحالة الأحرف. إذا كان هناك إدخالان أو أكثر بنفس الاسم، تعرض الشاشة الإدخال الذي تم إدراجه أولاً في القائمة.

يعرض سطر النص الأول الأحرف التي أدخلتها. تعرض أسطر النص التالية القائمة المختصرة لنتائج البحث.

## إضافة إدخال جديدة إلى قائمة المسح

اتبع الإجراء لإضافة إدخال جديدة إلى قائمة المسح على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى قائمة الفحص. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إضافة عضو. اضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى قائمة الفحص. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إضافة عضو. اضغط على  للتحديد.

5 أدخل الحرف الأول من الاسم المستعار المطلوب. ستعرض الشاشة مؤشراً وامضاً.

6 أدخل باقي أحرف الاسم المستعار المطلوب.

البحث عن الاسم المستعار غير حساس لحالة الأحرف. إذا كان هناك إدخالان أو أكثر بنفس الاسم، تعرض الشاشة الإدخال الذي تم إدراجه أولاً في القائمة.

يعرض سطر النص الأول الأحرف التي أدخلتها. تعرض أسطر النص التالية القائمة المختصرة لنتائج البحث.

7 اضغط على  للتحديد.

8 اضغط على  أو  للوصول إلى مستوى الأولوية المطلوب. اضغط على  للتحديد.

تعرض الشاشة إشعاراً إيجابياً صغيراً ثم إضافة آخر؟.

9 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم لإضافة إدخال جديد. اضغط على  للتحديد. كرر من خطوة **خطوة 5** لخطوة **خطوة 8**.

- اضغط على  أو  للوصول إلى لا لحفظ القائمة الحالية. اضغط على  للتحديد.

## حذف إدخالات من قائمة المسح

اتبع الإجراء لحذف إدخالات من قائمة المسح.

1 اضغط على  للوصول إلى القائمة.

- اضغط على  أو  للوصول إلى لا للعودة إلى الشاشة السابقة. اضغط على  للتحديد.

7 كرر من خطوة 4 إلى خطوة 6 لحذف إدخلات أخرى.

- 8 اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية بعد حذف جميع الأسماء المستعارة أو المعارف المطلوبة.

## تعيين الأولوية للإدخلات في قائمة المسح

اتبع الإجراء لتعيين الأولويات للإدخلات في قائمة المسح على الراديو الخاص بك.

- 1 اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى قائمة الفحص. اضغط على  للتحديد.

- 2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى قائمة الفحص. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

- 5 اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.  
تعرض الشاشة حذف إدخال؟.

6 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم لحذف الإدخال. اضغط على  للتحديد.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تحرير الأولوية. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى مستوى الأولوية المطلوب. اضغط على  للتحديد.

تعرض الشاشة إشعارًا إيجابيًا صغيرًا قبل العودة إلى الشاشة السابقة. يظهر رمز الأولوية يسار الاسم المستعار للعضو.

## الفحص

يقوم الراديو الخاص بك بالتنقل خلال قائمة المسح المبرمجة للقناة الحالية، للبحث عن نشاط صوتي عند بدء المسح.

إشعار:

هذه الميزة غير قابلة للتطبيق في السعة الإضافية.

أثناء المسح في الوضع الثنائي، إذا كنت متواجدًا على قناة رقمية وكان الراديو متصلًا بقناة تناظرية، فسيقوم بالتبديل تلقائيًا من الوضع الرقمي إلى الوضع التناظري طوال مدة المكالمة. والعكس صحيح أيضًا.

هناك طريقتان لبدء المسح:

### المسح الرئيسي للقنوات (يدوي)

يقوم الراديو بمسح جميع القنوات أو المجموعات في قائمة المسح. عند بدء المسح، قد يبدأ الراديو، بحسب الإعدادات، تلقائيًا من القناة أو المجموعة النشطة التي تم مسحها آخر مرة أو من القناة التي بدأ منها المسح.

### المسح التلقائي

يقوم جهاز الراديو تلقائيًا ببدء المسح عند قيامك باختيار قناة أو مجموعة تم تمكين ميزة المسح التلقائي بها.

إشعار:

عندما تقوم بتكوين تلقي رسالة جماعية أثناء الفحص، سيتمكن الراديو من تلقي رسائل جماعية من قنوات غير رئيسية. ثم سيتمكن الراديو من الرد على الرسائل الجماعية في القناة الرئيسية، لكنه لا يمكن من الرد في القنوات غير الرئيسية. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## تشغيل المسح أو إيقاف تشغيله

اتبع الإجراء لتشغيل المسح أو إيقاف تشغيله على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى مسح. اضغط على  للتحديد.

1 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** أثناء وقت التوقف. يضيء مؤشر LED الأخضر.

2 حرر زر **PTT** للاستماع.

يعود الراديو إلى مسح قنوات أو مجموعات أخرى إذا لم تستجب خلال وقت التوقف.

## حذف قنوات إساءة

إذا كانت إحدى القنوات تصدر باستمرار مكالمات أو ضوضاء غير مرغوب فيها (تُعرف بقناة "إساءة")، فيمكنك إزالة القناة غير المرغوب فيها من قائمة المسح بشكل مؤقت. لا تنطبق هذه الإمكانية على القناة المخصصة على أنها القناة المحددة. اتبع الإجراء لحذف قنوات الإساءة من الراديو الخاص بك.

1 إذا اتصل الراديو بقناة غير مرغوب فيها أو قناة إساءة، فاضغط على زر **حذف قناة إزعاج** المبرمج حتى تسمع نغمة.

2 حرر زر **حذف قناة إساءة** المبرمج.

تم حذف قناة الإساءة.

3 اضغط على  أو  للوصول إلى حالة المسح. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى حالة المسح المطلوبة و اضغط على  للتحديد.

إذا تم تمكين المسح:

- تعرض الشاشة تشغيل المسح ورمز المسح.
- يومض مؤشر LED الأصفر.
- إذا تم تعطيل المسح:
- تعرض الشاشة إيقاف المسح.
- ويختفي رمز المسح.
- ينطفئ مؤشر LED.

## الاستجابة لعمليات الإرسال أثناء المسح

أثناء المسح، يتوقف الراديو عند أي قناة أو مجموعة يتم اكتشاف نشاط فيها. يظل الراديو على هذه القناة لمدة مبرمجة تعرف بوقت التوقف. اتبع الإجراء للاستجابة لعمليات الإرسال أثناء المسح.

## استعادة قنوات الإساءة

اتبع الإجراء لاستعادة قنوات الإساءة على الراديو الخاص بك.

قم بأحد الإجراءات التالية:

- قم بإيقاف تشغيل الراديو ثم تشغيله مرة أخرى.
- قم بإيقاف المسح وإعادة تشغيله عبر زر **مسح** المبرمج أو القائمة.
- قم بتغيير القناة باستخدام زر **القناة السابقة/التالية**.

## إعدادات جهات الاتصال

توفر جهات الاتصال إمكانيات دفتر العناوين على الراديو الخاص بك. ويتطابق كل إدخال من الإدخالات مع اسم مستعار أو معرف تستخدمه لبدء مكالمة. يتم فرز الإدخالات أبجديًا.

يرتبط كل إدخال، حسب السياق، بأنواع المكالمات المختلفة: مكالمة جماعية أو مكالمة خاصة أو مكالمة شاملة أو مكالمة كمبيوتر أو مكالمة إرسال. مكالمة الكمبيوتر ومكالمة الإرسال مرتبطتان بالبيانات. وتتوفران مع التطبيقات فقط. راجع وثائق تطبيقات البيانات لمزيد من التفاصيل.

🔗 علاوةً على ذلك، تتيح لك قائمة جهات الاتصال تخصيص كل إدخال إلى مفتاح رقم قابل للبرمجة واحد أو أكثر على الميكروفون المزوّد بلوحة مفاتيح. ومتى تم تخصيص إدخال لمفتاح رقم، يتمكن الراديو من إجراء اتصال سريع بهذا الإدخال.

### إشعار:

وتظهر علامة اختيار قبل كل مفتاح رقم مخصص لأحد الإدخالات. فإذا كانت علامة الاختيار قبله فا رغ، فهذا يعني أنك لم تقم بتخصيص مفتاح رقم لهذا الإدخال.

يعرض كل إدخال في جهات الاتصال المعلومات التالية:

- نوع المكالمة
- الاسم المستعار للمكالمة
- معرف المكالمة

## المسح بالاقتراع

يوفر لك المسح بالاقتراع تغطية واسعة في المناطق حيث تتوفر محطات بث أساسية متعددة ترسل معلومات مماثلة على قنوات تناظرية مختلفة.

يقوم الراديو بمسح القنوات التناظرية لعدة محطات بث أساسية وإجراء عملية اقتراع لتحديد أقوى إشارة يتم تلقيها. عند تحديد تلك الإشارة، يستقبل الراديو الخاص بك إرسالات من محطة البث الأساسية تلك.

أثناء المسح بالاقتراع، يومض مؤشر LED الأصفر وتعرض الشاشة رمز **المسح بالاقتراع**.

اتبع الإجراءات نفسها مثل الاستجابة لعمليات الإرسال أثناء المسح في صفحة 341 للاستجابة إلى إرسال أثناء المسح بالاقتراع.

إشعار:

إذا كانت ميزة السرية ممكّنة بالقناة، فيمكنك إجراء مكالمات جماعية ومكالمات خاصة ومكالمات شاملة تدعم السرية على هذه القناة. لن تتمكن سوى أجهزة الراديو المستهدفة التي لها مفتاح سرية أو قيمة مفتاح ومعرف مفتاح مماثل للراديو الخاص بك من فك تشفير الإرسال.

## 5 حرر زر PTT للاستماع.

يومض مؤشر LED الأخضر عندما يستجيب أي مستخدم في المجموعة. تعرض الشاشة رمز **مكالمة جماعية**، والاسم المستعار أو المعرف، والاسم المستعار أو المعرف الخاص بالراديو المُرسِل.

## إجراء مكالمات جماعية باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات جماعية على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

- 6 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة. تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقًا.

## إجراء مكالمات خاصة باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء مكالمات خاصة على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

- 1 اضغط على للوصول إلى القائمة.
- 2 اضغط على أو للوصول إلى جهات الاتصال. اضغط على للتحديد.

- 1 اضغط على للوصول إلى القائمة.
- 2 اضغط على أو للوصول إلى جهات الاتصال. اضغط على للتحديد.
- 3 اضغط على أو للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على للتحديد.
- 4 اضغط على زر **PTT** لإجراء المكالمة. يضيء مؤشر LED الأخضر.

## تخصيص إدخلات إلى مفاتيح أرقام قابلة للبرمجة

اتبع الإجراء لتخصيص الإدخالات إلى مفاتيح الأرقام القابلة للبرمجة من الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مفتاح برامج.  
اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- إذا لم يتم تخصيص مفتاح الرقم المطلوب إلى أحد الإدخالات، فاضغط على  أو  للوصول إلى مفتاح الرقم المطلوب. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على زر **PTT** لإجراء المكالمة.  
يضيء مؤشر LED الأخضر. تعرض الشاشة الاسم المستعار للوجهة.

5 انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان ممكناً.

6 حرر زر **PTT** للاستماع.  
يومض مؤشر LED الأخضر عندما يستجيب الراديو المستهدف. تعرض الشاشة الاسم المستعار أو المعرف الخاص بالمستخدم المرسل.

7 عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** للرد على المكالمة.  
تنتهي المكالمة عند عدم وجود نشاط صوتي لفترة محددة مسبقاً. تصدر نغمة. وتعرض الشاشة انتهت المكالمة.

- إذا لم يتم تخصيص مفتاح الرقم المطلوب إلى أحد الإدخالات، فستعرض الشاشة المفتاح مخصص الآن ثم يعرض سطر النص الأول استبد ال؟. قم بأحد الإجراءات التالية:

اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

يصدر الراديو نغمة مؤشر إيجابية، وتعرض الشاشة تم حفظ جهة اتصال وإشعارًا إيجابيًا صغيرًا.

اضغط على  أو  للوصول إلى لا للعودة إلى الخطوة السابقة.

- يمكن أن يتم ربط كل إدخال من الإدخالات بمفتاح رقم مختلف. تظهر  أمام كل مفتاح رقم مخصص لأحد الإدخالات. في حالة وجود  أمام فارغ، يكون مفتاح الرقم هذا غير مخصص.
- إذا كان أحد مفاتيح الأرقام مخصصًا لإدخال في وضع معين، فلن يتم دعم هذه الميزة عند الضغط لفترة طويلة على مفتاح الرقم في وضع آخر.
- ستعود الشاشة تلقائيًا إلى القائمة السابقة.

## إزالة الإقرانات بين الإدخالات ومفاتيح الأرقام القابلة للبرمجة

اتبع الإجراء لإزالة الإقرانات بين الإدخالات ومفاتيح الأرقام القابلة للبرمجة من الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط لفترة طويلة على مفتاح الرقم المبرمج للاسم المستعار أو المعرف المطلوب. تابع إلى **خطوة 4**.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مفتاح برنامج. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى فارغ. اضغط على  للتحديد.

يعرض سطر النص الأول مسح من كل المفاتيح.

6 اضغط على  أو  للوصول إلى نعم . اضغط على  للتحديد.

إشعار:

عند حذف أحد الإدخالات، تتم إزالة الاقتران بين الإدخال ومفتاح (مفاتيح) الرقم المبرمج الخاص به.

تصدر نغمة مؤشر إيجابية. ستعرض الشاشة تم حفظ جهة اتصال. ستعود الشاشة تلقائيًا إلى القائمة السابقة.

## إضافة جهات اتصال جديدة

اتبع الإجراء لإضافة جهات اتصال جديدة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى ج = اتصال جديدة . اضغط على  للتحديد.

4 اضغط على  أو  لتحديد نوع جهة الاتصال جهة لاسلكية أو جهة هاتفية. اضغط على  للتحديد.

5 أدخل رقم جهة الاتصال باستخدام لوحة المفاتيح واضغط على  للمتابعة.

6 أدخل اسم جهة اتصال باستخدام لوحة المفاتيح واضغط على  للمتابعة.

7 اضغط على  أو  للوصول إلى نوع الرنين المطلوب. اضغط على  للتحديد.

تصدر نغمة مؤشر إيجابية. ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

## تعيين جهة الاتصال الافتراضية

اتبع الإجراء لتعيين جهة الاتصال الافتراضية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط

على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات. اضغط

على  للتحديد.

6 اضغط على  أو  للوصول إلى ت = مكالمات. اضغط

على  للتحديد.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى كافتراضي. اضغط على

 للتحديد.

تصدر نغمة مؤشر إيجابية. ستعرض الشاشة إشعارًا إيجابيًا صغيرًا. تعرض الشاشة  بجانب الاسم المستعار أو المعرف الافتراضي المحدد.

## إعدادات مؤشر المكالمات

تسمح هذه الميزة لمستخدمي الراديو بتكوين نغمات رنين المكالمات أو الرسالة النصية.

## تنشيط مشغل النغمات أو إلغاء تنشيطه لتنبيهات المكالمات

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه لتنبيهات المكالمات على الراديو الخاص بك.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد. تعرض الشاشة ✓ بجانب النغمة المحددة.

## تنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات الخاصة

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات الخاصة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعده. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيهه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م . النغمات. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى مكالمه خاصة. اضغط على  للتحديد.

تعرض الشاشة علامة ✓ بجانب تشغيل إذا تم تمكين نغمات رنين المكالمه الخاصة.

تعرض الشاشة علامة ✓ بجانب إيقاف تشغيل إذا تم تعطيل نغمات رنين المكالمه الخاصة.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد.

عند تمكينها، تظهر علامة ✓ بجوار ممكن. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات المنتقاة

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه للمكالمات المنتقاة على الراديو الخاص بك.

1 اضغط على للوصول إلى القائمة.

2 اضغط على أو للوصول إلى أدوات مساعدة. اضغط على للتحديد.

3 اضغط على أو للوصول إلى إعدادات الراديو. اضغط على للتحديد.

4 اضغط على أو للوصول إلى نغمة تنبيه. اضغط على للتحديد.

5 اضغط على أو للوصول إلى م = النغمات. اضغط على للتحديد.

6

اضغط على أو للوصول إلى م = منتقاه. اضغط على للتحديد.  
تعرض الشاشة ✓ والنغمة الحالية.

7

اضغط على أو للوصول إلى النغمة المطلوبة. اضغط على للتحديد. تعرض الشاشة ✓ بجانب النغمة المحددة.

## تنشيط مشغل النغمات أو إلغاء تنشيطه للرسائل النصية

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه للرسائل النصية على الراديو الخاص بك.

1 اضغط على للوصول إلى القائمة.

2 اضغط على أو للوصول إلى أدوات مساعدة. اضغط على للتحديد.

3 اضغط على أو للوصول إلى إعدادات الراديو. اضغط على للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى رسالة نصية. اضغط على  للتحديد. تعرض الشاشة  والنغمة الحالية.

7 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على  للتحديد. تعرض الشاشة  بجانب النغمة المحددة حديثاً.

## تنشيط مشغل النغمات أو إلغاء تنشيطه لحالة تتبع الاستخدام بالنص

اتبع الإجراء لتنشيط مشغل النغمات أو إلغاء تنشيطه لحالة القياس عن بعد بواسطة رسالة نصية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى م = النغمات. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى القياس عن بعد. اضغط على  للتحديد.

تتم الإشارة إلى النغمة الحالية بعلامة  .

## تعيين أنماط الرنين

يمكنك برمجة الراديو الخاص بك على إحدى نغمات الرنين العشرة المحددة مسبقًا عند تلقي تنبيه مكالمات أو رسالة نصية من جهة اتصال معينة. يصدر الراديو صوتًا بكل نمط من أنماط الرنين أثناء تنقلك عبر القائمة. اتبع الإجراء لتعيين أنماط الرنين على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

يتم فرز الإدخالات أجيديًا.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحرير. اضغط على

 للتحديد.

5 اضغط على  أو  للوصول إلى تحرير نغمة

الرنين. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى النغمة المطلوبة. اضغط على

 للتحديد.

تظهر علامة ✓ بجانب النغمة المحددة.

## مستوى صوت نغمة التنبيه التصاعدي

يمكنك برمجة الراديو للتنبيه باستمرار عند وجود مكالمات راديو لم يتم الرد عليها. ويتم ذلك عن طريق زيادة مستوى صوت نغمة التنبيه تلقائيًا بمرور الوقت. وتُعرف هذه الميزة باسم رفع التنبيه.

## ميزات سجل المكالمات

يحتفظ الراديو بسجل لكافة المكالمات الخاصة الأخيرة الصادرة والتي تم الرد عليها والفائتة. تُستخدم ميزة سجل المكالمات لعرض المكالمات الأخيرة وإدارتها.

يمكن إدراج تنبيهات المكالمات الفائتة في سجلات المكالمات حسب تكوين النظام على الراديو الخاص بك. يمكنك تنفيذ المهام التالية في كل قائمة من قوائم المكالمات:

- حفظ اسم مستعار أو معرف في جهات الاتصال

يمكنك بدء مكالمة خاصة باستخدام الاسم المستعار أو المعرف الذي تعرضه الشاشة حاليًا عن طريق الضغط على زر **PTT**.

## حذف مكالمات من قائمة المكالمات

اتبع الإجراء لحذف مكالمات من قائمة المكالمات.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على  للتحديد.

إذا كانت القائمة فارغة:

- تصدر نغمة.
- تعرض الشاشة القائمة فارغة.

- حذف مكالمة
- حذف كل المكالمات
- عرض التفاصيل

## عرض المكالمات الأخيرة

اتبع الإجراء لعرض المكالمات الأخيرة على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المفضلة. الخيارات هي القوائم فائتة وتم الرد والصادر.

اضغط على  للتحديد.

ستعرض الشاشة أحدث الإذخالات.

4 اضغط على  أو  لعرض القائمة.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى حذف إدخال؟. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  لتحديد نعم لحذف الإدخال. ستعرض الشاشة تم حذف مدخل.

- اضغط على  أو  للوصول إلى لا. اضغط على  للتحديد. يعود الراديو إلى الشاشة السابقة.

## عرض تفاصيل قائمة المكالمات

اتبع الإجراء لعرض تفاصيل المكالمات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى سجل المكالمات. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى عرض التفاصيل. اضغط على  للتحديد. تعرض الشاشة تفاصيل المكالمات.

## تخزين أسماء مستعارة أو معرفات من قائمة المكالمات

اتبع الإجراء لتخزين أسماء مستعارة أو معرفات على الراديو الخاص بك من قائمة المكالمات.

1 اضغط على  للوصول إلى القائمة.

## تشغيل تنبيه المكالمات

يعمل نداء تنبيه المكالمات على تمكينك من تنبيه مستخدم راديو معين للاتصال بك. تنطبق هذه الميزة فقط على الأسماء المستعارة أو المعارف الخاصة بالمستخدمين ويمكن الوصول إليها من خلال القائمة عبر جهات الاتصال أو الاتصال اليدوي أو زر الوصول بلمسة واحدة المبرمج.

## إجراء تنبيهات مكالمات

اتبع الإجراء لإجراء تنبيهات المكالمات على الراديو الخاص بك.

### 1 اضغط على زر الوصول بلمسة واحدة المبرمج.

تعرض الشاشة تـ مكالمات والأسماء المستعارة للمشارك أو معرفه. يضيء مؤشر LED الأخضر.

### 2 انتظر حتى تصلك رسالة إعلام.

إذا تم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعاراً إيجابياً صغيراً.

إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعاراً سلبياً صغيراً.

2 اضغط على  أو  للوصول إلى سجل المكالمات. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى القائمة المطلوبة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تخزين. اضغط على  للتحديد.

ستعرض الشاشة مؤشراً وامضاً.

6 أدخل باقي أحرف الاسم المستعار المطلوب. اضغط على  للتحديد. يمكنك تخزين معرف بدون اسم مستعار. ستعرض الشاشة إشعاراً إيجابياً صغيراً.

- إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إجراء تنبيهات مكالمات باستخدام الاتصال اليدوي

اتبع الإجراء لإجراء تنبيهات مكالمات على الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد. ستعرض الشاشة مؤشرًا وامضًا.

4 أدخل معرف المشترك واضغط على  للمتابعة.

## إجراء تنبيهات مكالمات باستخدام قائمة جهات الاتصال

اتبع الإجراء لإجراء تنبيهات مكالمات على الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى ت = مكالمات. اضغط على  للتحديد. تعرض الشاشة ت = مكالمات والاسم المستعار للمشارك أو معرفه. يضيء مؤشر LED الأخضر.

5 انتظر حتى تصلك رسالة إعلام.

- إذا تم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

5

اضغط على  أو  للوصول إلى ت. مكالمات. اضغط

على  للتحديد.

تعرض الشاشة ت. مكالمات والاسم المستعار للمشارك أو معرفه. يضيء مؤشر LED الأخضر.

6

انتظر حتى تصلك رسالة إعلام.

- إذا تم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم تلقي إشعار باستلام تنبيه المكالمات، فستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## الاستجابة لتنبيهات المكالمات

اتبع الإجراء للرد على تنبيهات المكالمات على الراديو الخاص بك.

عند تلقي تنبيه مكالمات:

- تصدر نغمة متكررة.
- يومض مؤشر LED الأصفر.

- تعرض الشاشة قائمة إعلانات تسرد تنبيه مكالمات مع الاسم المستعار أو المعرف الخاص بالراديو المتصل.

وفقًا للتهيئة التي يقوم بها الوكيل أو مسؤول النظام، يمكنك الرد على تنبيه المكالمات بتنفيذ أحد الإجراءات التالية:

- اضغط على زر **PTT** وقم بالرد على المتصل مباشرة بمكالمة خاصة.
- اضغط على زر **PTT** لمتابعة الاتصال العادي بمجموعة التحدث. ينتقل تنبيه المكالمات إلى خيار مكالمة فائتة في قائمة سجل المكالمات. يمكنك الرد على المتصل من سجل المكالمات الفائتة.

راجع قائمة الإعلانات في صفحة 165 وميزات سجل المكالمات في صفحة 109 للحصول على مزيد من المعلومات.

## وضع كتم الصوت

يوفر وضع كتم الصوت خيارًا للمستخدم لكتم صوت كل المؤشرات الصوتية الخاصة بالراديو.

بمجرد بدء ميزة وضع كتم الصوت، يتم كتم صوت كل المؤشرات الصوتية باستثناء الميزات الأعلى أولوية، مثل عمليات الطوارئ.

عند إنهاء وضع كتم الصوت، يستأنف الراديو تشغيل النغمات وعمليات إرسال الصوت الحالية.

إشعار:

هذه الميزة قابلة للشراء. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

إذا تُرك المؤقت على القيمة 0، فسيظل الراديو في وضع كتم الصوت لمدة زمنية غير محدودة إلى أن يتم الضغط على زر **وضع كتم الصوت** المبرمج.

## تشغيل وضع كتم الصوت

اتبع الإجراء لتشغيل وضع كتم الصوت.

انتقل إلى هذه الميزة عبر زر **وضع كتم الصوت** المبرمج.

يحدث ما يلي عند تمكين وضع كتم الصوت:

- تصدر نغمة المؤشر الإيجابية.
- تعرض الشاشة تشغيل وضع كتم الصوت.
- يبدأ مصباح LED الأحمر في الوميض ويظل يومض إلى أن يتم إنهاء وضع كتم الصوت.
- تعرض شاشة العرض رمز **وضع كتم الصوت** في الشاشة الرئيسية.
- يتم كتم صوت الراديو.
- يبدأ مؤقت وضع كتم الصوت في عد المدة الزمنية التي يتم تكوينها تنازليًا.

## ضبط مؤقت وضع كتم الصوت

يمكن تمكين ميزة وضع كتم الصوت لمدة زمنية مكوّنة مسبقًا عبر ضبط مؤقت وضع كتم الصوت. يتم تكوين المدة الزمنية الخاصة بالمؤقت في قائمة الراديو ويمكن أن تتراوح بين 0.5 ساعة و6 ساعات. يتم إنهاء وضع كتم الصوت بمجرد انتهاء مدة المؤقت.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مؤقت كتم الصوت. اضغط على  للتحديد.

5 اضغط على  أو  لتحرير القيمة الرقمية لكل رقم، واضغط على .

## الخروج من وضع كتم الصوت

يمكن الخروج من هذه الميزة تلقائيًا بمجرد انتهاء مدة مؤقت وضع كتم الصوت.

نفذ أحد الإجراءات التالية لإنهاء وضع كتم الصوت يدويًا:

- اضغط على زر **وضع كتم الصوت** المبرمج.
- اضغط على زر **PTT** عند أي إدخال.

يحدث ما يلي عند تعطيل وضع كتم الصوت:

- تنطلق نغمة المؤشر السلبية.
- تعرض الشاشة كتم إيقاف.
- ينطفئ مصباح LED الأحمر الواصل.
- يختفي رمز **وضع كتم الصوت** من الشاشة الرئيسية.
- يلغي الراديو كتم الصوت وتتم استعادة حالة السماع الخارجية.
- إذا لم يكن المؤقت قد انتهت صلاحيته، يتم إيقاف مؤقت وضع كتم الصوت.

**إشعار:**

يتم أيضًا إنهاء وضع كتم الصوت إذا قام المستخدم بإرسال الصوت أو بالتحويل إلى قناة غير مبرمجة.

## تشغيل الطوارئ

يُستخدم تنبيه الطوارئ للإشارة إلى وجود حالة حرجة. وبإمكانك بدء الطوارئ في أي وقت حتى في حالة وجود نشاط على القناة الحالية.

يستطيع الوكيل تعيين مدة الضغط على زر **الطوارئ** المبرمج، فيما عدا الضغط لفترة طويلة، حيث يعتبر ذلك مشابهًا لكل الأزرار الأخرى:

### الضغط لفترة قصيرة

الفترة ما بين 0.05 ثانية إلى 0.75 ثانية.

### الضغط لفترة طويلة

الفترة ما بين 1.00 ثانية إلى 3.75 ثوان.

يتم تخصيص زر **الطوارئ** بواسطة ميزة تشغيل/إيقاف تشغيل الطوارئ. راجع الوكيل بشأن التشغيل المخصص لزر **الطوارئ**.

**إشعار:**

إذا كانت الضغطة القصيرة على زر **الطوارئ** تؤدي إلى بدء وضع الطوارئ، فعندئذ سيؤدي الضغط مطولاً على الزر نفسه إلى خروج الراديو من وضع الطوارئ.

إذا كان الضغط مطولاً على زر **الطوارئ** يؤدي إلى بدء وضع الطوارئ، فعندئذ ستؤدي الضغطة القصيرة على الزر نفسه إلى خروج الراديو من وضع الطوارئ.

يدعم الراديو ثلاثة تنبيهات للطوارئ:

- تنبيه طوارئ
- تنبيه طوارئ مع مكالمة
- تنبيه طوارئ مع صوت للتتبع 

**إشعار:**

يمكن تخصيص تنبيه واحد فقط من تنبيهات الطوارئ الواردة أعلاه لزر **الطوارئ** المبرمج أو مفتاح الطوارئ الخاص بالقدم.

بالإضافة إلى ذلك، يحتوي كل تنبيه على الأنواع التالية:

## عادي

يرسل الراديو إشارة تنبيه ويعرض مؤشرات صوتية و/أو مرئية.

- إذا كان أكثر من تنبيه، فاضغط على  أو  للوصول إلى الاسم المستعار المطلوب، واضغط على  لعرض المزيد من التفاصيل.

## صامت

يرسل الراديو إشارة تنبيه من دون أي مؤشرات صوتية أو مرئية. يستقبل الراديو مكالمات بدون أي صوت من خلال السماع، حتى تنتهي فترة إرسال الميكروفون *النشط المبرمجة* و/أو تضغط على زر **PTT**.

## صامت مع صوت

يرسل الراديو إشارة تنبيه بدون أي مؤشرات صوتية أو مرئية، ولكنه يسمح للمكالمات الواردة بإصدار الصوت من خلال السماع.

## تلقي تنبيهات الطوارئ

اتبع الإجراء لتلقي تنبيهات الطوارئ على الراديو الخاص بك.

عند تلقي تنبيه طوارئ:

- تصدر نغمة.
- يومض مؤشر LED الأحمر.
- تعرض الشاشة رمز **الطوارئ** والاسم المستعار لمتصل الطوارئ، أو في حالة وجود أكثر من تنبيه، يتم عرض كل الأسماء المستعارة لمتصلي الطوارئ في قائمة تنبيه.

1 قم بأحد الإجراءات التالية:

- إذا كان تنبيهًا واحدًا فقط، فاضغط على  لعرض المزيد من التفاصيل.

2

اضغط على  لعرض خيارات الإجراء.

3

اضغط على  وحدد نعم للخروج من قائمة التنبيه.

4

اضغط على  للوصول إلى القائمة.

5

حدد قائمة التنبيه لزيارة قائمة التنبيهات مرة أخرى.

6

يتم إصدار صوت النغمة ويومض مؤشر LED باللون الأحمر حتى تخرج من وضع الطوارئ. مع ذلك يمكن كتم صوت النغمة. قم بأحد الإجراءات التالية:

- اضغط على زر **PTT** للاتصال بمجموعة أجهزة الراديو التي تلقت تنبيه الطوارئ.
- اضغط على أي زر قابل للبرمجة.
- اخرج من وضع الطوارئ. راجع **الخروج من وضع الطوارئ بعد تلقي تنبيه الطوارئ في صفحة 360**.

## الاستجابة لتنبيهات الطوارئ

اتبع الإجراء للاستجابة لتنبيهات الطوارئ على الراديو الخاص بك.

1

تأكد من أن الشاشة تعرض قائمة التنبيه. اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب.

2

عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر **PTT** في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر **PTT** لإرسال صوت ليس طوارئ إلى المجموعة ذاتها التي تم توجيه تنبيه الطوارئ إليها. يضيء مؤشر LED الأخضر. يظل الراديو في وضع الطوارئ.

3

قم بأحد الإجراءات التالية:

- انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان ممكناً.
- انتظر حتى تنتهي نغمة **PTT** الجانبية وتحدث بوضوح في الميكروفون إذا كان ممكناً.

4

حرر زر **PTT** للاستماع.

عندما يستجيب الراديو الذي بدأ الطوارئ:

- يومض مؤشر LED الأخضر.

- تعرض الشاشة رمز **مكالمة جماعية** والمعرف، ومعرف الراديو المرسل، وقائمة التنبيه.

يمكن إرسال صوت الطوارئ من خلال الراديو الذي بدأ وضع الطوارئ فقط. وسترسل جميع أجهزة الراديو الأخرى، بما في ذلك الراديو المتلقي للطوارئ صوتاً ليس طوارئ.

## الخروج من وضع الطوارئ بعد تلقي تنبيه الطوارئ

قم بأحد الإجراءات التالية للخروج من وضع الطوارئ بعد تلقي تنبيه طوارئ:

- احذف عناصر التنبيه.
- قم بإيقاف الراديو.

## إرسال تنبيهات الطوارئ

تتيح لك هذه الميزة إرسال تنبيه طوارئ، أي إشارة غير صوتية، يشغل إشارة تنبيه على مجموعة من أجهزة الراديو. لا يشغل الراديو أي مؤشرات صوتية أو مرئية أثناء وضع الطوارئ عند تعيينه على صامت.

اتبع الإجراء لإرسال تنبيهات الطوارئ على الراديو الخاص بك.

1 اضغط على زر **تشغيل الطوارئ** المبرمج.

سترى أحد هذه النتائج:

- تعرض الشاشة تنبيه الإرسال والاسم المستعار للوجهة.

## إرسال تنبيهات طوارئ مع مكالمة

تتيح لك هذه الميزة إرسال تنبيه طوارئ مع إجراء مكالمة إلى مجموعة من أجهزة الراديو. عند صدور إعلام بالاستلام من أحد أجهزة الراديو داخل المجموعة، يمكن أن تتصل مجموعة أجهزة الراديو عبر قناة طوارئ مبرمجة. اتبع الإجراء لإرسال تنبيهات طوارئ مع مكالمة على الراديو الخاص بك.

**1** اضغط على زر تشغيل الطوارئ المبرمج أو مفتاح القدم للطوارئ. تعرض الشاشة إرسال تنبيه بالتبادل مع معرف الراديو.

سترى ما يلي:

- تعرض الشاشة برقية الإرسال والاسم المستعار للوجهة. يضيء مؤشر LED الأخضر. يظهر رمز الطوارئ.

إشعار:

تصدر نغمة بحث الطوارئ عند برمجتها. يتم كتم هذه النغمة عندما يرسل الراديو الصوت أو يستقبله، وتتوقف عندما يخرج الراديو من وضع الطوارئ. يمكن للوكيل أو مسؤول النظام الذي تتعامل معه برمجة نغمة بحث الطوارئ.

**2** انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة الطوارئ.
- يومض مؤشر LED الأحمر.

- تعرض الشاشة برقية الإرسال والاسم المستعار للوجهة. يضيء مؤشر LED الأخضر. يظهر رمز الطوارئ.

إشعار:

تصدر نغمة بحث الطوارئ عند برمجتها. يتم كتم هذه النغمة عندما يرسل الراديو الصوت أو يستقبله، وتتوقف عندما يخرج الراديو من وضع الطوارئ. يمكن برمجة نغمة بحث الطوارئ عبر برنامج CPS.

**2** انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة الطوارئ.
- يومض مؤشر LED الأحمر.
- وتعرض الشاشة تنبيه مرسل.
- إذا لم يتم بنجاح بعد استنفاد كافة المحاولات:
- تصدر نغمة.
- وتعرض الشاشة فشل إشعار تنبيه.
- يخرج الراديو من وضع تنبيه الطوارئ ويعود إلى الشاشة الرئيسية.

• وتعرض الشاشة تنبيه مرسل.

• يدخل الراديو في وضع مكالمة الطوارئ عندما تعرض الشاشة الطوارئ والاسم المستعار لمجموعة الوجهة.

3 اضغط على زر PTT لإجراء المكالمة.

يضئ مؤشر LED الأخضر. تعرض الشاشة رمز مكالمة جماعية.

4 قم بأحد الإجراءات التالية:

• انتظر حتى انتهاء نغمة الإذن بالكلام وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

•  انتظر حتى تنتهي نغمة PTT الجانبية وتحدث بوضوح في الميكروفون إذا كان مُمكنًا.

5 حرر زر PTT للاستماع.

تعرض الشاشة الاسمين المستعارين للمتصل والمجموعة.

6  عند تمكين ميزة الإشارة إلى قناة حرة، تسمع نغمة تنبيه قصيرة في اللحظة التي يتم فيها تحرير الزر PTT في الراديو المرسل، مما يوضح أن القناة متاحة لك للرد. اضغط على زر PTT للرد على المكالمة.

7 للخروج من وضع الطوارئ بمجرد إنهاء المكالمة، اضغط على زر إيقاف الطوارئ.

سيعود الراديو إلى الشاشة الرئيسية.

## تنبيهات طوارئ مع صوت للتنب

تتيح لك هذه الميزة إرسال تنبيه طوارئ مع صوت للتنب إلى مجموعة من أجهزة الراديو. يتم تنشيط ميكروفون الراديو تلقائيًا مما يتيح لك الاتصال بمجموعة أجهزة الراديو بدون الضغط على زر PTT. وتعرف هذه الحالة النشطة للميكروفون باسم الميكروفون النشط.

إشعار:

لا يمكن للراديو اكتشاف ميكروفون غير IMPRES مرتبط بموصل الملحق الخلفي.

إذا لم يتم اكتشاف أي ميكروفون في الموصل المبرمج المحدد، فسيقوم الراديو بالتحقق من الموصل البديل. هنا، يعطي الراديو الأولوية للميكروفون الذي تم اكتشافه.

إذا كان وضع دورة الطوارئ ممكّنًا في الراديو، فسيتم إجراء تكرارات الميكروفون النشط ولفترات الاستقبال طوال فترة مبرمجة. أثناء وضع دورة الطوارئ، تصدر أصوات المكالمات المتلقاة من السماعه.

إذا قمت بالضغط على زر PTT أثناء فترة الاستقبال المبرمجة، فستسمع نغمة منع، تشير إلى وجوب تحرير زر PTT. يتجاهل الراديو الضغط على زر PTT ويبقى في وضع الطوارئ.

- انتهاء مدة التنقل بين الميكروفون *النشط* واستقبال المكالمات، عند تمكين وضع دورة الطوارئ.
- انتهاء مدة الميكروفون *النشط*، عند تعطيل وضع دورة الطوارئ.

**3** اضغط على زر إيقاف الطوارئ للخروج من وضع الطوارئ.  
سيعود الراديو إلى الشاشة الرئيسية.

## إعادة بدء وضع الطوارئ

لا تنطبق هذه الميزة إلا على الراديو الذي يقوم بإرسال تنبيه الطوارئ. اتبع الإجراء لإعادة بدء وضع الطوارئ على الراديو الخاص بك.

قم بأحد الإجراءات التالية:

- قم بتغيير القناة أثناء وجود الراديو في وضع الطوارئ. يخرج الراديو من وضع الطوارئ، ويعيد بدء الطوارئ، إذا كان تنبيه الطوارئ مُمكنًا في القناة الجديدة.
- اضغط على زر تشغيل الطوارئ المبرمج أثناء حالة بدء أو إرسال الطوارئ. يخرج الراديو من هذه الحالة ويعيد بدء الطوارئ.

## الخروج من وضع الطوارئ بعد إرسال تنبيه الطوارئ

لا تنطبق هذه الميزة إلا على الراديو الذي يقوم بإرسال تنبيه الطوارئ.

إذا ضغطت على زر **PTT** أثناء الميكروفون *النشط*، وتابعت الضغط عليه حتى انتهاء مدة الميكروفون *النشط*، فسيستمر الراديو في الإرسال حتى تحرير زر **PTT**. في حالة فشل طلب تنبيه الطوارئ، لن يقوم الراديو بإعادة محاولة إرسال الطلب، ويدخل إلى حالة الميكروفون *النشط* مباشرة.

إشعار:

قد لا تدعم بعض الملحقات الميكروفون *النشط*. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## إرسال تنبيهات طوارئ مع صوت للتتبع

اتبع الإجراء لإرسال تنبيهات طوارئ مع صوت للتتبع على الراديو الخاص بك.

**1** اضغط على زر تشغيل الطوارئ المبرمج أو مفتاح القدم للطوارئ.

سترى أحد هذه النتائج:

- تعرض الشاشة تنبيه الإرسال والاسم المستعار للوجهة.
  - تعرض الشاشة برقية الإرسال والاسم المستعار للوجهة.
- يضيء مؤشر LED الأخضر. يظهر رمز الطوارئ.

**2** بمجرد أن تعرض الشاشة تنبيه مرسل، تحدث بوضوح في الميكروفون.

يتوقف الراديو تلقائيًا عن الإرسال في الحالات التالية:

يخرج الراديو من وضع الطوارئ عند:

- تلقي رسالة إعلام (لتنبية الطوارئ فقط).
- تم استنفاد كافة محاولات إرسال التنبيه.

**إشعار:**

في حالة إيقاف تشغيل الراديو، يتم الخروج من وضع الطوارئ. ولا يُعيد الراديو بدء وضع الطوارئ تلقائيًا عند تشغيله ثانية.

اتبع الإجراء للخروج من وضع الطوارئ على الراديو الخاص بك.

قم بأحد الإجراءات التالية:

- اضغط على زر إيقاف الطوارئ المبرمج.
- قم بتغيير القناة إلى قناة جديدة ليس بها نظام طوارئ مكون. تعرض الشاشة لا توجد طوارئ.

## حذف عنصر تنبيه من قائمة تنبيه

اتبع الإجراء لحذف عناصر التنبيه من قائمة تنبيه والخروج من وضع الطوارئ.

1 اضغط على للوصول إلى القائمة.

2 اضغط على أو للوصول إلى قائمة تنبيه.

اضغط على للتحديد.

3 اضغط أو للوصول إلى عنصر التنبيه المطلوب. اضغط على للتحديد.

4 اضغط على أو للوصول إلى حذف. اضغط على للتحديد.

## الرسائل النصية

الراديو الخاص بك قادر على تلقي البيانات، مثل الرسالة النصية، من راديو آخر أو من أحد تطبيقات الرسائل النصية.

يوجد نوعان من الرسائل النصية، رسالة نصية قصيرة لراديو نقال رقمي (DMR) ورسالة نصية. الحد الأقصى لطول الرسالة النصية القصيرة للراديو النقال الرقمي (DMR) هو 23 حرفًا. الحد الأقصى لطول الرسالة النصية هو 280 حرفًا، متضمنة سطر الموضوع. لا يظهر سطر الموضوع إلا عندما تستقبل رسائل من تطبيقات البريد الإلكتروني.

**إشعار:**

ينطبق الحد الأقصى للطول فقط على الطرز التي تحتوي على أحدث البرامج والأجهزة. وبالنسبة إلى طرز الراديو التي تحتوي على برامج وأجهزة قديمة، يبلغ الحد الأقصى لطول الرسالة النصية 140 حرفًا. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات. بالنسبة للغة العربية، يكون اتجاه إدخال النصوص من اليمين إلى اليسار.

## الرسائل النصية

يتم تخزين الرسائل النصية في صندوق الوارد ويتم تصنيفها حسب أحدث ما تم استلامه.

## عرض الرسائل النصية

اتبع الإجراء لعرض الرسائل النصية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد. إذا كان صندوق الوارد فارغًا:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة إذا كانت نغمة لوحة المفاتيح قيد التشغيل.

4

اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

## عرض رسائل نصية لحالة القياس عن بعد

اتبع الإجراء لعرض رسائل نصية لحالة القياس عن بعد من صندوق الوارد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

لا يمكنك الرد على رسالة نصية لحالة القياس عن بُعد.

تعرض الشاشة قياس عن بعد: «رسالة نصية للحالة».

- تعرض الشاشة الرسالة النصية. تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.
- اضغط على  أو  للوصول إلى القراءة لاحقًا.
- اضغط على  للتحديد.
- يعود الراديو إلى الشاشة التي كنت عليها قبل استلام الرسالة النصية.
- اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.

2 قم بأحد الإجراءات التالية:

- اضغط على  للعودة إلى صندوق الوارد.
- اضغط على  مرة أخرى للرد على الرسالة النصية أو توجيهها أو حذفها.

### الرد على رسائل نصية بالرسائل النصية السريعة

اتبع الإجراءات للرد على رسائل نصية بالرسائل النصية السريعة على جهاز الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى الخطوة 3.

5

اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

### الرد على رسائل نصية

اتبع الإجراءات للرد على رسائل نصية على الراديو الخاص بك.

عند تلقي رسالة نصية:

- تعرض الشاشة قائمة الإعلانات مع الاسم المستعار أو المعرف الخاص بالمرسل.
- تعرض الشاشة رمز رسالة.

إشعار:

يقوم الراديو بالخروج من شاشة تنبيه الرسالة النصية وإعداد مكاملة خاصة أو جماعية إلى مرسل الرسالة في حالة الضغط على زر PTT.

1 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى القراءة. اضغط على  للتحديد.

7 اضغط على  أو  للوصول إلى رد سريع. اضغط على  للتحديد.

8 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد. ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

9 انتظر حتى تصلك رسالة إعلام. إذا تم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.
- يعود الراديو إلى شاشة الخيار إعادة إرسال.

### إعادة إرسال رسائل نصية

اتبع الإجراء لإعادة إرسال رسائل نصية على الراديو الخاص بك.

• اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد. تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

5 اضغط على  للوصول إلى القائمة الفرعية.

6 اضغط على  أو  للوصول إلى رد. اضغط على  للتحديد.

عندما تكون في شاشة الاختيار إعادة إرسال:

اضغط على  لإعادة إرسال نفس الرسالة إلى نفس الاسم المستعار أو المعرف الخاص بالمشارك أو المجموعة.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.
- يعود الراديو إلى شاشة الخيار إعادة إرسال.

## توجيه الرسائل النصية

اتبع الإجراء لتوجيه الرسائل النصية على الراديو الخاص بك.

عندما تكون في شاشة الاختيار إعادة إرسال:

1 اضغط على  أو  للوصول إلى تقديم، واضغط على  لإرسال نفس الرسالة إلى اسم مستعار أو معرف خاص بمشارك أو مجموعة.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

3 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

4 أدخل معرف المشترك واضغط على  للمتابعة.  
ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

5 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## تحرير الرسائل النصية

حدد تحرير لتحرير الرسالة.

إشعار:

في حالة وجود سطر الموضوع (للمراسل المستلمة من أحد تطبيقات البريد الإلكتروني)، لن تتمكن من تحريره.

إشعار:

يمكنك أيضًا تحديد عنوان راديو هدف يدويًا (راجع توجيه الرسائل النصية باستخدام الاتصال اليدوي في صفحة 369).

## توجيه الرسائل النصية باستخدام الاتصال اليدوي

اتبع الإجراء لتوجيه الرسائل النصية باستخدام الاتصال اليدوي على الراديو الخاص بك.

1 اضغط على  أو  للوصول إلى تقديم. اضغط على  للتحديد.

2 اضغط على  لإرسال نفس الرسالة إلى الاسم المستعار أو المعرف الخاص بمشترك آخر أو مجموعة أخرى.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

تعرض الشاشة رقم لاسلكي.

- اضغط على  أو  للوصول إلى حفظ واضغط على  لحفظ الرسالة إلى المجلد مسودات.
- اضغط على  لتحرير الرسالة.
- اضغط على  للاختيار من بين حذف الرسالة أو حفظها إلى مجلد المسودات.

## كتابة الرسائل النصية

اتبع الإجراء لكتابة رسالة نصية على الراديو الخاص بك.

- 1 قم بأحد الإجراءات التالية:
  - اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.
  - اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

- 1 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.  
ستعرض الشاشة مؤشراً وامضاً.

2 استخدم لوحة المفاتيح لتحرير الرسالة.

- اضغط على  للانتقال مسافة واحدة إلى اليسار.
- اضغط على  أو  للانتقال مسافة واحدة إلى اليمين.
- اضغط على  لحذف أي أحرف غير مرغوب فيها.
- الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

3 اضغط على  بمجرد إنشاء الرسالة.

4 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى إرسال واضغط على  لإرسال الرسالة.

### إرسال رسائل نصية

اتبع الإجراء لإرسال رسالة نصية على الراديو الخاص بك.  
من المفترض أن يكون لديك رسالة نصية مكتوبة حديثاً أو رسالة نصية محفوظة.  
حدد مستلم الرسالة. قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.
  - اضغط على  أو  للوصول إلى اتصال يدوي.
- اضغط على  للتحديد. أدخل معرف المشترك. يعرض السطر الأول من الشاشة رقم لاسلكي #. يعرض السطر الثاني من الشاشة مؤشراً وامضاً. أدخل الاسم المستعار أو المعرف الخاص بالمشترك.
- اضغط على .

ستعرض الشاشة إشعاراً مؤقتاً صغيراً، لتأكيد إرسال الرسالة.

إذا تم بنجاح:

- تصدر نغمة.
  - تعرض الشاشة إشعاراً إيجابياً صغيراً.
- إذا لم يتم بنجاح:
- تصدر نغمة منخفضة.

3 اضغط على  أو  للوصول إلى تكوين. اضغط على  للتحديد.  
يظهر مؤشر وامض.

4 استخدم لوحة المفاتيح لكتابة الرسالة.

اضغط على  للانتقال مسافة واحدة إلى اليسار.

اضغط على  أو  للانتقال مسافة واحدة إلى اليمين.

اضغط على  لحذف أي أحرف غير مرغوب فيها.

الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

5 اضغط على  بمجرد إنشاء الرسالة.

قم بأحد الإجراءات التالية:

- اضغط على  لإرسال الرسالة.
- اضغط على . اضغط على  أو  للاختيار بين تحرير الرسالة أو مسحها أو حفظها. اضغط على  للتحديد.

إذا كان صندوق الوارد فارغًا:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة.

4

اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

تعرض الشاشة سطر الموضوع إذا كانت الرسالة مرسله من أحد تطبيقات البريد الإلكتروني.

5

اضغط على  للوصول إلى القائمة الفرعية.

6

اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.

7

اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.

ستعرض الشاشة إشعارًا إيجابيًا صغيرًا. تعود الشاشة إلى صندوق الوارد.

- تعرض الشاشة إشعارًا سلبيًا صغيرًا.
- تنتقل الرسالة إلى مجلد العناصر المرسله.
- تتميز الرسالة برمز فشل الإرسال.

إشعار:

في حالة الرسالة النصية المكتوبة حديثًا، سيعود الراديو إلى شاشة الخيار إعادة إرسال.

## حذف الرسائل النصية من صندوق الوارد

اتبع الإجراء لحذف الرسائل النصية من صندوق الوارد على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى [خطوة 3](#).

- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى نعم . اضغط على  للتحديد.

ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

## الرسائل النصية المرسلة

بمجرد إرسال رسالة إلى راديو آخر، يتم حفظها في مجلد العناصر المرسلة. وتتم دائمًا إضافة أحدث رسالة نصية مرسلة في أعلى مجلد العناصر المرسلة. يمكنك إعادة إرسال رسالة نصية مرسلة أو توجيهها أو تحريرها أو حذفها.

يكون لمجلد العناصر المرسلة تخزين آخر 30 رسالة مرسلة كحد أقصى. عندما يمتلئ المجلد، ستحل تلقائيًا الرسالة النصية المرسلة التالية محل أقدم رسالة نصية في المجلد.

إذا قمت بإنهاء شاشة إرسال الرسالة أثناء إرسال الرسالة، فسيقوم الراديو بتحديث حالة الرسالة في مجلد العناصر المرسلة دون تقديم أية إشارة على الشاشة أو من خلال الصوت.

إذا تغير وضع الراديو أو تم إيقاف تشغيله قبل تحديث حالة الرسالة في العناصر المرسلة، فسيتعذر على الراديو إكمال أي رسائل قيد التقدم وسيقوم بتعليمها تلقائيًا برمز فشل الإرسال.

يدعم الراديو خمس رسائل قيد التقدم كحد أقصى في المرة الواحدة. خلال هذه الفترة، يتعذر على الراديو إرسال أي رسالة جديدة ويقوم بتعليمها تلقائيًا برمز فشل الإرسال.

إذا ضغطت لفترة طويلة على  في أي وقت، فسيعود الراديو إلى الشاشة الرئيسية.

## حذف كل الرسائل النصية من صندوق الوارد

اتبع الإجراء لحذف جميع الرسائل النصية من صندوق الوارد على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.

- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى صندوق الوارد. اضغط على  للتحديد.

إذا كان صندوق الوارد فارغًا:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة.

4

اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

إشعار:

إذا كان نوع القناة، مثل تقليدي رقمي أو سعة إضافية، غير متطابق، فيمكنك فقط تحرير رسالة مرسله أو توجيهها أو حذفها.

## عرض الرسائل النصية المرسله

اتبع الإجراء لعرض رسائل نصية مرسله على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى [خطوة 3](#).
- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى العناصر المرسله. اضغط على  للتحديد.

إذا كان مجلد العناصر المرسله فارغًا:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة منخفضة إذا كانت نغمة لوحة المفاتيح مشغلة.

4

اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

يشير الرمز الموجود في أعلى الركن الأيمن من الشاشة إلى حالة الرسالة. راجع [رموز العناصر المرسله](#).

## إرسال الرسائل النصية المرسله

اتبع الإجراء لإرسال رسالة نصية مرسله على الراديو الخاص بك. عند عرض رسالة مرسله:

1

اضغط على  أثناء عرض الرسالة.

2

يمكنك إما إعادة إرسال الرسالة النصية المرسله أو تقديمها. قم بأحد الإجراءات التالية:

- للوصول إلى إعادة إرسال. اضغط على  للتحديد.
- للوصول إلى تقديم. اضغط على  للتحديد. ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

## حذف كل الرسائل النصية المرسلّة من مجلد العناصر المرسلّة

اتبع الإجراء لحذف كل الرسائل النصية المرسلّة من مجلد العناصر المرسلّة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى العناصر المرسلّة. اضغط على  للتحديد.

إذا كان مجلد العناصر المرسلّة فارغاً:

- تعرض الشاشة القائمة فارغة.
- تصدر نغمة.

4 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعاراً سلبياً صغيراً.
- يتابع الراديو إلى شاشة الخيار إعادة إرسال. راجع إعادة إرسال رسائل نصية في صفحة 131 لمزيد من المعلومات.

## حذف الرسائل النصية المرسلّة من مجلد العناصر المرسلّة

اتبع الإجراء لحذف الرسائل النصية المرسلّة من مجلد العناصر المرسلّة على الراديو الخاص بك.

عند عرض رسالة مرسلّة:

1 اضغط على .

2 اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد.

## 5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم . اضغط على  للتحديد.  
ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

- اضغط على  أو  للوصول إلى لا . اضغط على  للتحديد.  
يعود الراديو إلى الشاشة السابقة.

## رسائل نصية محفوظة

يمكنك حفظ رسالة نصية لإرسالها في وقت لاحق.

إذا أدى الضغط على زر **PTT** أو تغيير الوضع إلى قيام الراديو بإنهاء شاشة كتابة/ تحرير الرسالة النصية أثناء عملية كتابة أو تحرير رسالة نصية، فسيتم حفظ الرسالة النصية الحالية تلقائيًا في المجلد مسودات.

وتتم دائمًا إضافة أحدث رسالة نصية محفوظة في أعلى القائمة مسودات.

يخزن المجلد مسودات آخر 10 رسائل محفوظة كحد أقصى. عند امتلاء المجلد، ستحل الرسالة النصية المحفوظة التالية تلقائيًا محل أقدم رسالة نصية في المجلد.

## عرض رسائل نصية محفوظة

اتبع الإجراء لعرض رسالة نصية محفوظة على الراديو الخاص بك.

## 1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 3.
- اضغط على  للوصول إلى القائمة.

- 
- 2 اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

- 
- 3 اضغط على  أو  للوصول إلى المسودات. اضغط على  للتحديد.

- 
- 4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

## تحرير رسائل نصية محفوظة

اتبع الإجراء لتحرير رسائل نصية محفوظة على الراديو الخاص بك.

- 
- 1 اضغط على  أثناء عرض الرسالة.

- اضغط على  أو  للاختيار بين حفظ الرسالة أو حذفها. اضغط على  للتحديد.

## حذف رسائل نصية محفوظة من مجلد المسودات

اتبع الإجراء لحذف رسالة نصية محفوظة من المسودات على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى [خطوة 3](#).
- اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى الرسائل. اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى المسودات. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى الرسالة المطلوبة. اضغط على  للتحديد.

- 2 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.

يظهر مؤشر وامض.

3 استخدم لوحة المفاتيح لكتابة الرسالة.

اضغط على  للانتقال مسافة واحدة إلى اليسار.

اضغط على  أو  للانتقال مسافة واحدة إلى اليمين.

اضغط على  لحذف أي أحرف غير مرغوب فيها.

الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

4 اضغط على  بمجرد إنشاء الرسالة.

قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى إرسال. اضغط على  لإرسال الرسالة.

2 اضغط على  أو  للوصول إلى رسائل. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى نص سريع. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الرسالة النصية السريعة المطلوبة. اضغط على  للتحديد.

5 قم بما يلي لتحديد المستلم وأرسل الرسالة.  
ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.

6 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

5 اضغط على  أو  للوصول إلى حذف. اضغط على  لحذف الرسالة النصية.

## الرسائل النصية السريعة

يدعم الراديو 50 رسائل نصية سريعة كحد أقصى، كما هو مبرمج من قبل الوكيل. على الرغم من تحديد الرسائل النصية السريعة مسبقًا، يمكنك تحرير كل رسالة قبل إرسالها.

## إرسال رسائل نصية سريعة

اتبع الإجراء لإرسال رسائل نصية سريعة محددة سابقًا على الراديو الخاص بك للاستمرار المحدد سابقًا.

1 قم بأحد الإجراءات التالية:

- اضغط على زر رسالة نصية المبرمج. تابع إلى خطوة 6.
- اضغط على زر الوصول بلمسة واحدة المبرمج.  
ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد إرسال الرسالة.  
تابع إلى خطوة 6.

- اضغط على  للوصول إلى القائمة.

إشعار:

اضغط على  في أي وقت للعودة إلى الشاشة السابقة أو اضغط

لفترة طويلة على  للعودة إلى الشاشة الرئيسية. يخرج الراديو من الشاشة الحالية بمجرد انتهاء مؤقت عدم النشاط.

## تمكين أو تعطيل كلمة صحيحة

توفر خيارات بديلة للكلمة عند عدم تعرف القاموس المضمّن على الكلمة التي تم إدخالها في محرر النص.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

- يتابع الراديو إلى شاشة الخيار إعادة إرسال. راجع إعادة إرسال رسائل نصية في صفحة 131 لمزيد من المعلومات.

## تكوين إدخال النصوص

يُنتج لك الراديو تكوين نص مختلف.

يمكنك تكوين الإعدادات التالية لإدخال النصوص في الراديو:

- تنبؤ الكلمات
- كلمة صحيحة
- كتابة بأحرف كبيرة
- كلماتي
- يدعم الراديو أساليب إدخال النصوص التالية:
- أرقام
- رموز
- تنبؤي أو ضغط متعدد
- اللغة (في حالة برمجتها)

5 اضغط على  أو  للوصول إلى كلمة صحيحة. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى كلمة صحيحة. اضغط على  للتحديد.
- اضغط على لتمكين كلمة صحيحة. عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- اضغط على لتعطيل كلمة صحيحة. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تمكين أو تعطيل تنبؤ الكلمات

**تنبؤ الكلمات:** يمكن أن يتعرّف الراديو على تسلسلات الكلمات الشائعة التي تُدخلها كثيرًا. ثم يتنبأ بالكلمة التالية التي قد تريد استخدامها بعد إدخال الكلمة الأولى من تسلسل الكلمات الشائعة في محرر النص.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تنبؤ الكلمات. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  لتمكين تنبؤ الكلمات. عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- اضغط على  لتعطيل التحكم في التشويه الديناميكي للميكروفون. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## كتابة بأحرف كبيرة

تستخدم هذه الميزة للتمكين التلقائي للكتابة بأحرف كبيرة بالنسبة للحرف الأول من الكلمة الأولى في كل جملة جديدة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كـ بأحرف كبيرة. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

• اضغط على  لتمكين الكتابة بأحرف كبيرة. عند تمكينها، تظهر علامة ✓ بجوار ممكن.

• اضغط على  لتعطيل الكتابة بأحرف كبيرة. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## عرض كلمات مخصصة

يمكنك إضافة كلماتك المخصصة إلى القاموس المضمّن في الراديو الخاص بك. يحتفظ الراديو بقائمة لتحتوي على هذه الكلمات.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى قائمة الكلمات.  
اضغط على  للتحديد.  
تعرض الشاشة قائمة الكلمات المخصصة.

## تحرير الكلمات المخصصة

يمكنك تحرير الكلمات المخصصة المحفوظة في الراديو.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات  
مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات  
الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى قائمة الكلمات.  
اضغط على  للتحديد.  
ستعرض الشاشة قائمة الكلمات المخصصة.

7 اضغط على  أو  للوصول إلى الكلمة المطلوبة. اضغط على  للتحديد.

8 اضغط على  أو  للوصول إلى تحرير. اضغط على  للتحديد.

9 استخدم لوحة المفاتيح لتحرير كلمة مخصصة.

• اضغط على  للانتقال مسافة واحدة إلى اليسار.

• اضغط على المفتاح  للانتقال مسافة واحدة إلى اليمين.

• اضغط على المفتاح  لحذف أي أحرف غير مرغوب فيها.

• الضغط لفترة طويلة على  لتغيير طريقة إدخال النصوص.

10 اضغط على  بمجرد اكتمال الكلمة المخصصة.

ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد حفظ الكلمة المخصصة.

• إذا تم حفظ الكلمة المخصصة، ستصدر نغمة وستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

• إذا لم يتم حفظ الكلمة المخصصة، فستصدر نغمة منخفضة وستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إضافة كلمات مخصصة

يمكنك إضافة كلمات مخصصة إلى القاموس المضمّن في الراديو.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إدخال النصوص. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى كلمة جديدة. اضغط على  للتحديد. ستعرض الشاشة قائمة الكلمات المخصصة.

7 استخدم لوحة المفاتيح لتحرير كلمة مخصصة.

• اضغط على ◀ للانتقال مسافة واحدة إلى اليسار.

• اضغط على المفاتيح ▶ للانتقال مسافة واحدة إلى اليمين.

• اضغط على المفاتيح \*◀ لحذف أي أحرف غير مرغوب فيها.

• الضغط لفترة طويلة على ⌘ لتغيير طريقة إدخال النصوص.

8 اضغط على ⌘ OK بمجرد اكتمال الكلمة المخصصة.

ستعرض الشاشة إشعارًا مؤقتًا صغيرًا، لتأكيد حفظ الكلمة المخصصة.

• إذا تم حفظ الكلمة المخصصة، فستصدر نغمة وستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

• إذا لم يتم حفظ الكلمة المخصصة، فستصدر نغمة منخفضة وستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## حذف كلمة مخصصة

اتبع الإجراء لحذف الكلمات المخصصة المحفوظة في الراديو.

1 اضغط على ⌘ OK للوصول إلى القائمة.

2 اضغط على ▲ أو ▼ للوصول إلى أدوات

مساعدة. اضغط على ⌘ OK للتحديد.

3 اضغط على ▲ أو ▼ للوصول إلى إعدادات

الراديو. اضغط على ⌘ OK للتحديد.

4 اضغط على ▲ أو ▼ للوصول إلى إدخال النصوص.

اضغط على ⌘ OK للتحديد.

5 اضغط على ▲ أو ▼ للوصول إلى كلماتي. اضغط على

⌘ OK للتحديد.

6 اضغط على ▲ أو ▼ للوصول إلى الكلمة المطلوبة. اضغط على

⌘ OK للتحديد.

7 اضغط على ▲ أو ▼ للوصول إلى حذف. اضغط على ⌘ OK

للتحديد.

8 اختر أيًا مما يلي.

4 اضغط على  أو  للوصول إلى إدخال النصوص.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى كلماتي. اضغط على  للتحديد.

6 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

7 قم بأحد الإجراءات التالية:

- في حذف إدخال؟، اضغط على  لتحديد نعم. تعرض الشاشة تم حذف جميع المدخلات.
- اضغط على  أو  للوصول إلى لا للعودة إلى الشاشة السابقة. اضغط على  للتحديد.

## تذاكر عمل

تتيح هذه الميزة للراديو استقبال رسائل من المرسل تسرد مهام يلزم أداؤها.

• في حذف إدخال؟، اضغط على  لتحديد نعم. ستعرض الشاشة تم حذف مدخل.

• اضغط على  أو  للوصول إلى لا. اضغط على  للعودة إلى الشاشة السابقة.

## حذف كل الكلمات المخصصة

اتبع الإجراء لحذف جميع الكلمات المخصصة من القاموس المضمن في الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

**إشعار:**

يمكن تخصيص هذه الميزة عبر CPS وفقًا لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يوجد مجلدان يحتويان على تذاكر عمل مختلفة:

**مجلد مهام**

تذاكر عمل شخصية مخصصة لمعرفة المستخدم الخاص بك لتسجيل الدخول.

**مجلد مهام مشتركة**

تذاكر عمل مشتركة مخصصة لمجموعة من الأفراد.

يمكنك الرد على تذاكر العمل من أجل ترتيبها في مجلدات تذاكر العمل. بشكل افتراضي، تكون المجلدات **الكل** و**جديد** و**تم البدء به** و**اكتمل**. للحصول على 10 مجلدات إضافية، راجع الأمر مع الوكيل أو مسؤول النظام.

**إشعار:**

يتم الاحتفاظ بتذاكر العمل حتى بعد إيقاف تشغيل الراديو وتشغيله مرة أخرى.

توجد كل تذاكر العمل في مجلد **الكل**. وفقًا لطريقة برمجة الراديو الخاص بك، يتم فرز تذاكر العمل حسب مستوى الأولوية يتبعه وقت الاستقبال. يتم عرض تذاكر العمل الجديدة، وتذاكر العمل مع أحدث التغييرات في الحالة، والتذاكر ذات مستوى الأولوية الأعلى أولاً. عند الوصول إلى العدد الأقصى لتذاكر العمل، تحل تذكرة العمل التالية تلقائيًا محل آخر تذكرة عمل في الراديو. يدعم الراديو الخاص بك 100 أو 500 تذكرة مهمة كحد أقصى، بناءً على طراز الراديو الخاص بك. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات. سيكتشف الراديو تلقائيًا تذاكر العمل المكررة التي لها معرف المهمة نفسه ويتجاهلها.

ووفقًا لأهمية تذاكر العمل، يضيف المرسل مستوى الأولوية إليها. توجد ثلاثة مستويات أولوية: الأولوية 1 والأولوية 2 والأولوية 3. تكون الأولوية 1 أعلى أولوية والأولوية 3 أقل أولوية. توجد أيضًا تذاكر عمل بدون أولوية.

ومن ثم، يقوم الراديو الخاص بك بالتحديث عندما يجري المرسل التغييرات التالية:

- يعدل محتوى تذاكر العمل.
- يضيف مستوى الأولوية لتذاكر العمل أو يحرره.
- ينقل تذاكر العمل من مجلد إلى مجلد.
- يلغي تذاكر العمل.

**الوصول إلى مجلد تذكرة العمل**

اتبع الإجراء للوصول إلى مجلد تذاكر العمل.

**1** قم بأحد الإجراءات التالية:

- اضغط على زر **تذكرة عمل** المبرمج. تابع إلى **خطوة 3**.
- اضغط على **OK** للوصول إلى القائمة.

**2**

- اضغط على  أو  للوصول إلى تذاكر العمل.
- اضغط على **OK** للتحديد.

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

### إنشاء تذاكر العمل

يستطيع الراديو إنشاء تذاكر عمل تستند إلى قالب تذكرة عمل وإرسال المهام التي يجب تنفيذها.

يلزم وجود برنامج برمجة CPS لتكوين قالب تذكرة العمل.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى تذاكر العمل.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إنشاء تذكرة.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى المجلد المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تذاكر العمل المطلوبة. اضغط على  للتحديد.

### تسجيل الدخول أو الخروج من الخادم عن بعد

تسمح لك هذه الميزة بتسجيل الدخول والخروج من الخادم عن بعد باستخدام معرف المستخدم.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى تسجيل الدخول. اضغط على  للتحديد.

إذا قمت بتسجيل الدخول بالفعل، ستعرض القائمة تسجيل الخروج. تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

3 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

## الرد على تذاكر العمل

اتبع الإجراء للرد على تذاكر العمل على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى تذاكر العمل.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى المجلد المطلوب. اضغط

على  للتحديد.

4 اضغط على  أو  للوصول إلى تذاكر العمل المطلوبة.

اضغط على  للتحديد.

5 اضغط على  مرة أخرى للوصول إلى القائمة الفرعية.

يمكنك أيضًا الضغط على مفتاح الرقم المناظر (من 1 إلى 9) للرد السريع.

6

اضغط على  أو  للوصول إلى تذاكر العمل المطلوبة.

اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

7

انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## إرسال تذاكر العمل باستخدام نموذج واحد لتذاكر العمل

إذا تمت تهيئة الراديو الخاص بك باستخدام نموذج واحد لتذاكر العمل، فقم بتنفيذ الإجراءات التالية لإرسال تذكرة العمل.

1

1 استخدم لوحة المفاتيح لكتابة رقم الغرفة المطلوب. اضغط على  للتحديد.

## إرسال تذاكر العمل باستخدام أكثر من نموذج لتذاكر العمل

إذا تمت تهيئة الراديو الخاص بك باستخدام أكثر من نموذج لتذاكر العمل، فقم بتنفيذ الإجراءات التالية لإرسال تذاكر العمل.

1 اضغط على  أو  للوصول إلى الخيار المطلوب. اضغط على  للتحديد.

2 اضغط على  أو  للوصول إلى إرسال. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

3 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

2 اضغط على  أو  للوصول إلى حالة الغرفة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الخيار المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إرسال. اضغط على  للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

5 انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## حذف تذاكر العمل

اتبع الإجراء لحذف تذاكر العمل من الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر **تذكرة عمل** المبرمج. تابع إلى **خطوة 4**

• اضغط على **OK** للوصول إلى القائمة.

2

اضغط على **▲** أو **▼** للوصول إلى تذاكر العمل.

اضغط على **OK** للتحديد.

3

اضغط على **▲** أو **▼** للوصول إلى المجلد المطلوب. اضغط

على **OK** للتحديد.

4

اضغط على **▲** أو **▼** للوصول إلى مجلد الكل. اضغط على

**OK** للتحديد.

5

اضغط على **▲** أو **▼** للوصول إلى تذاكر العمل المطلوبة.

اضغط على **OK** للتحديد.

6

اضغط على **OK** مرة أخرى أثناء عرض تذكرة العمل.

7

اضغط على **▲** أو **▼** للوصول إلى حذف. اضغط على **OK** للتحديد.

تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم.

8

انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## حذف كل تذاكر العمل

اتبع الإجراء لحذف كل تذاكر العمل من الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر **تذكرة عمل** المبرمج. تابع إلى **خطوة 3**.

- اضغط على  للوصول إلى القائمة. اضغط على  أو  للوصول إلى لا. اضغط على  للتحديد.  
يعود الراديو إلى الشاشة السابقة.

## السرية

تساعدك هذه الميزة على منع تنصت المستخدمين غير المسموح لهم على إحدى القنوات من خلال استخدام أحد حلول التشفير القائمة على البرامج. لا يتم تشفير أجزاء الإشارات ومعرف المستخدم الخاصة بالإرسال.

يجب تمكين السرية في الراديو الخاص بك على القناة لإجراء إرسال يدعم السرية، إلا أن ذلك ليس مطلبًا ضروريًا لتلقي الإرسال. أثناء التواجد على قناة تدعم السرية، يظل الراديو قادرًا على تلقي إرسالات واضحة أو غير مشفرة.

قد لا توفر بعض طرز الراديو ميزة السرية، أو قد يكون لها تكوين مختلف. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يدعم الراديو الخاص بك نوعين من السرية، ولكن يمكن تخصيص أحدهما فقط إلى الراديو. هما كالتالي:

- سرية أساسية
- سرية معززة

لفك تشفير إرسال مكاملة أو بيانات ممكن بها السرية، يجب برمجة الراديو ليكون له مفتاح السرية ذاته للسرية الأساسية، أو قيمة المفتاح ومعرف المفتاح ذاته للسرية المعززة الخاص بالراديو المرسل.

- اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى تذاكر العمل.  
اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى المجلد المطلوب. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى مجلد الكل. اضغط على  للتحديد.

- 5 اضغط على  أو  للوصول إلى حذف الكل. اضغط على  للتحديد.

6 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى نعم. اضغط على  للتحديد.  
ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

في حالة تلقي الراديو لمكالمة مشفرة لها مفتاح سرية مختلف، أو قيمة مفتاح ومعرف مفتاح مختلفان، ستسمع إما إرسالاً مشوشاً للسرية الأساسية أو لا شيء على الإطلاق للسرية المعززة.

على قناة تم تمكين الخصوصية عليها، يكون الراديو لديك قادراً على تلقي مكالمات واضحة أو نغمة بناءً على طريقة برمجة الراديو لديك. فوق ذلك، قد يقوم الراديو لديك بتشغيل نغمة تحذير أو قد لا يفعل، وذلك بناءً على طريقة برمجته.

يضيء مؤشر LED الأخضر عندما يقوم الراديو بالإرسال ويومض بسرعة عند تلقي الراديو لعملية إرسال مستمرة تدعم السرية.

إشعار:

لا تنطبق هذه الميزة على قنوات النطاق الترددي المدني الموجودة في نفس التردد.

## تشغيل الخصوصية أو إيقاف تشغيلها

اتبع الإجراء لتشغيل السرية أو إيقاف تشغيلها على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر السرية المبرمج. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى سرية. اضغط على

 للتحديد.

5

قم بأحد الإجراءات التالية:

• اضغط على  أو  للوصول إلى تشغيل. اضغط على

 للتحديد. ستعرض الشاشة علامة  بجانب تشغيل.

• اضغط على  أو  للوصول إلى إيقاف. اضغط على

 للتحديد. ستعرض الشاشة علامة  بجانب إيقاف

تشغيل.

## منع الاستجابة

تساعد هذه الميزة في منع الراديو من الاستجابة لأي عمليات إرسال واردة.

إشعار:

هذه الميزة قابلة للشراء. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

## بدء البحث اليدوي عن المواقع

اتبع الإجراء لبدء البحث اليدوي عن المواقع حينما تكون قوة الإشارة المستلمة ضعيفة لمحاولة العثور على موقع به إشارة أفضل.

إذا عثر الراديو على موقع جديد:

- تصدر نغمة مؤشر إيجابية.
- إذا فشل الراديو في العثور على موقع جديد:
- تصدر نغمة مؤشر سلبية.

## تشغيل/إيقاف قفل الموقع

عند تشغيلها، يبحث الراديو في الموقع الحالي فقط. عند التبديل إلى إيقاف التشغيل، يبحث الراديو في مواقع أخرى بالإضافة إلى الموقع الحالي.

اضغط على الزر المبرمج قفل الموقع.

إذا تم تشغيل وظيفة قفل الموقع:

- ستسمع نغمة مؤشر إيجابية، تشير إلى قفل الراديو للموقع الحالي.
- ستعرض الشاشة تم قفل الموقع.

إذا تم إيقاف تشغيل وظيفة قفل الموقع:

- ستسمع نغمة مؤشر سلبية للإشارة إلى فتح قفل الراديو.

عند تمكينها، لا يقوم جهاز الراديو لديك بإنشاء أي عمليات إرسال صادرة استجابة لعمليات الإرسال الواردة، مثل التحقق من الراديو وتنبيه المكالمات وتعطيل الراديو والمراقبة عن بعد وخدمة التسجيل التلقائي (ARS) والرد على الرسائل الخاصة وإرسال تقارير موقع GNSS. لا يمكن أن يتسلم الراديو لديك مكالمات خاصة مؤكدة عند تمكين هذه الميزة. مع ذلك، يكون الراديو قادرًا على تنفيذ الإرسال يدويًا.

## تشغيل إيقاف الاستجابة أو إيقاف تشغيلها

اتبع الإجراء لتمكين إيقاف الاستجابة على الراديو لديك أو تعطيلها.

اضغط على زر إيقاف الاستجابة المبرمج.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- تعرض الشاشة إشعارًا إيجابيًا صغيرًا مؤقتًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة إشعارًا سلبيًا صغيرًا مؤقتًا.

## عناصر التحكم في المواقع المتعددة

تنطبق هذه الميزات عندما تكون قناة الراديو الحالية جزءًا من تكوين الاتصال بالمواقع عبر بروتوكول الإنترنت (IP) أو تكوين السعة الإضافية-متعددة المواقع.

- وتعرض الشاشة تم فتح قفل الموقع.

## الآمان

تسمح لك هذه الميزة بتمكين أي راديو في النظام أو تعطيله.

على سبيل المثال، قد تريد تعطيل راديو مسروق لمنع المستخدمين غير المصرح لهم باستخدامه، وتمكين الراديو عند استعادته.

هناك طريقتان لتمكين راديو أو تعطيله، باستخدام المصادقة وبدونها.

ميزة التعطيل المصنق عليه للراديو هي ميزة يمكن شراؤها. في التعطيل المصنق عليه للراديو، يكون التحقق من الصحة مطلوباً عند تمكين راديو أو تعطيله. عندما يبدأ الراديو لديك هذه الميزة على راديو مستهدف عبر مصادقة المستخدم، تكون عبارة مرور مطلوبة. تتم برمجة عبارة المرور مسبقاً في الراديو المستهدف عبر CPS.

لن تتلقى إشعاراً إذا ضغطت على  أثناء عملية تمكين الراديو أو تعطيل الراديو.

إشعار:

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## تعطيل أجهزة الراديو

اتبع الإجراء لتعطيل الراديو.

1 اضغط على زر تعطيل الراديو المبرمج.

## الوصول إلى قائمة المواقع المجاورة

تتيح هذه الميزة للمستخدم فحص قائمة المواقع القريبة من الموقع الحالي للمستخدم. اتبع الإجراء للوصول إلى قائمة المواقع المجاورة:

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى موقع مجاور. اضغط على  للتحديد.

- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## تعطيل أجهزة الراديو باستخدام قائمة جهات الاتصال

اتبع الإجراء لتعطيل الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تعطيل الراديو.

5 اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يومض مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب.

3 اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يومض مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبيًا صغيرًا، وتعود إلى الشاشة السابقة.

4 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى رقم لاسلكي. اضغط على  للتحديد. يعرض سطر النص الأول رقم لاسلكي.

5 أدخل معرف المشترك واضغط على  للمتابعة.

6 اضغط على  أو  للوصول إلى تعطيل الراديو.

7 اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يومض مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبيًا صغيرًا، وتعود إلى الشاشة السابقة.

6 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## تعطيل أجهزة الراديو باستخدام الاتصال اليدوي

اتبع الإجراء لتعطيل الراديو الخاص بك باستخدام الاتصال اليدوي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب.

3 اضغط على  للتحديد. يحدث أحد الأمور التالية:

- تعرض الشاشة تمكين الراديو والاسم المستعار أو المعرف الخاص بالمشارك. يضيء مؤشر LED الأخضر.
- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعاراً مؤقتاً صغيراً، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعاراً سلبياً صغيراً، وتعود إلى الشاشة السابقة.

4 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعاراً إيجابياً صغيراً.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعاراً مؤقتاً صغيراً، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.
- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعاراً سلبياً صغيراً، وتعود إلى الشاشة السابقة.

8 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
  - ستعرض الشاشة إشعاراً إيجابياً صغيراً.
- إذا لم يتم بنجاح:
- تصدر نغمة مؤشر سلبية.
  - ستعرض الشاشة إشعاراً سلبياً صغيراً.

## تمكين أجهزة الراديو

اتبع الإجراء لتمكين الراديو الخاص بك.

1 اضغط على زر تمكين الراديو المبرمج.

- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبيًا صغيرًا، وتعود إلى الشاشة السابقة.

6 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## تمكين أجهزة الراديو باستخدام الاتصال اليدوي

اتبع الإجراء لتمكين الراديو الخاص بك باستخدام الاتصال اليدوي.

## تمكين أجهزة الراديو باستخدام قائمة جهات الاتصال

اتبع الإجراء لتمكين الراديو الخاص بك باستخدام قائمة جهات الاتصال.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تمكين الراديو.

5 اضغط على  للتحديد. يحدث أحد الأمور التالية:

- يومض مؤشر LED الأخضر. تعرض الشاشة تمكين الراديو والاسم المستعار أو المعرف الخاص بالمشارك. يضيء مؤشر LED الأخضر.

- يومض مؤشر LED الأخضر. تعرض الشاشة تمكين الراديو والاسم المستعار أو المعرف الخاص بالمشارك. يضيء مؤشر LED الأخضر.

- تظهر شاشة عبارة المرور.

أدخل عبارة المرور. اضغط على  للمتابعة.

- إذا كانت عبارة المرور صحيحة، تعرض الشاشة إشعارًا مؤقتًا صغيرًا، للإشارة إلى أن الطلب قيد التقدم. يضيء مؤشر LED الأخضر.

- في حالة كانت عبارة المرور غير صحيحة، تعرض الشاشة إشعارًا سلبياً صغيرًا، وتعود إلى الشاشة السابقة.

8 انتظر حتى تصلك رسالة إعلام.

إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعارًا إيجابيًا صغيرًا.

إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- ستعرض الشاشة إشعارًا سلبياً صغيرًا.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى اتصال يدوي. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مكالمة خاصة. اضغط على  للتحديد.

يعرض سطر النص الأول رقم لاسلكي. #.

5 أدخل معرف المشترك واضغط على  للمتابعة.

6 اضغط على  أو  للوصول إلى تمكين الراديو.

7 اضغط على  للتحديد. يحدث أحد الأمور التالية:

## العامل المنفرد

تتطلب هذه الميزة رفع حالة الطوارئ في حالة عدم وجود نشاط للمستخدم، مثل الضغط على أي زر للراديو أو تحديد القناة، لمدة محددة مسبقًا.

بعد عدم وجود نشاط للمستخدم خلال مدة مبرمجة، يقوم الراديو بتحذيرك مسبقًا باستخدام مؤشر صوتي بمجرد انتهاء مؤقت عدم النشاط.

في حالة عدم وجود إشعار بالاستلام من المستخدم قبل انتهاء مؤقت التذكير المحدد مسبقًا، يبدأ الراديو في إصدار تنبيه طوارئ.

يتم تخصيص تنبيه واحد فقط من تنبيهات الطوارئ التالية لهذه الميزة:

- تنبيه طوارئ
- تنبيه طوارئ مع مكالمة
- تنبيه طوارئ مع صوت للتتبع 

يظل الراديو في حالة الطوارئ مما يسمح بمتابعة الرسائل الصوتية حتى يتم اتخاذ إجراء. راجع [تشغيل الطوارئ في صفحة 358](#) للمزيد من المعلومات حول طرق الخروج من الطوارئ.

## إشعار:

تقتصر هذه الميزة على أجهزة الراديو التي تدعم هذه الوظيفة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## Bluetooth

تتيح لك هذه الميزة استخدام الراديو مع جهاز يدعم Bluetooth (ملحق) عبر اتصال Bluetooth. يدعم الراديو كلا من أجهزة Motorola Solutions والأجهزة المتوفرة في الأسواق (COTS) الممكنة لتقنية Bluetooth.

يعمل البلوتوث في نطاق 10 أمتار (32 قدمًا) من خط الرؤية. ويكون ذلك عبارة عن مسار خالٍ من العوائق بين الراديو والجهاز الذي يدعم البلوتوث. توصي Motorola Solutions بعدم فصل الراديو والملحق لضمان درجة موثوقية عالية.

عند حواف مناطق الاستقبال، تظهر جودة الصوت والنعمة على أنها "مشوشة" أو "مقطعة". لحل هذه المشكلة، قم بوضع الراديو والجهاز الذي يدعم Bluetooth بالقرب من بعضهما (ضمن النطاق المحدد بـ 10 أمتار) لإعادة إنشاء استقبال صوتي واضح. تعمل وظيفة Bluetooth في الراديو الخاص بك بطاقة حدها الأقصى يبلغ 2.5 مللي واط (4 ديسيبل مللي واط) في النطاق البالغ 10 أمتار.

بإمكان الراديو دعم ما يصل إلى ثلاثة اتصالات بلوتوث في وقت واحد مع أجهزة تدعم البلوتوث من أنواع فريدة. على سبيل المثال، سماعة الرأس والمساحة الضوئية وجهاز مزود بخاصية PTT فقط (POD). لكنه لا يدعم الاتصالات المتعددة مع الأجهزة التي تدعم بلوتوث من النوع ذاته.

راجع دليل مستخدم الجهاز الذي يدعم بلوتوث للحصول على مزيد من التفاصيل حول الإمكانيات الكاملة التي يتمتع بها الجهاز الذي يدعم بلوتوث.

## إشعار:

إن تم تعطيله عن طريق CPS، يتم تعطيل جميع الميزات المتعلقة Bluetooth- ويتم مسح قاعدة بيانات Bluetooth.

## تشغيل بلوتوث وإيقاف تشغيله

اتبع الإجراء لتشغيل البلوتوث وإيقاف تشغيله.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى حالتى. اضغط على  للتحديد.

ستعرض الشاشة تشغيل وإيقاف. تتم الإشارة إلى الحالة الحالية بالعلامة .

4 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد. ستعرض الشاشة علامة  بجانب تشغيل.

- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد. ستعرض الشاشة علامة  بجانب إيقاف تشغيل.

## التوصيل بأجهزة بلوتوث

اتبع الإجراء للاتصال بأجهزة Bluetooth.

قم بتشغيل الجهاز الذي يدعم بلوتوث وضَعه في وضع الأزواج.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

4 قم بأحد الإجراءات التالية:

- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة الاتصال فشل.

إشعار:  
إذا كان رمز pin مطلوبًا، فانظر الوصول إلى أجهزة الراديو باستخدام  
كلمات المرور في صفحة 162.

## الاتصال بأجهزة البلوتوث في وضع قابلية الاكتشاف

اتبع الإجراء للاتصال بأجهزة Bluetooth في وضع قابل للاكتشاف.  
قم بتشغيل الجهاز الذي يدعم بلوتوث وضَعه في وضع الأزواج.

1 اضغط على للوصول إلى القائمة.

2 اضغط على أو للوصول إلى بلوتوث. اضغط على للتحديد.

3 اضغط على أو للوصول إلى الاكتشاف. اضغط على للتحديد. يمكن حينئذٍ العثور على الراديو من خلال الأجهزة الأخرى التي تدعم Bluetooth لمدة مبرمجة. يسمى ذلك وضع قابلية الاكتشاف.

انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

• اضغط على أو للوصول إلى الجهاز المطلوب.  
• اضغط على للتحديد.

• اضغط على أو للوصول إلى بحث عن أجهزة لتحديد موقع الأجهزة المتاحة. اضغط على أو للوصول إلى الجهاز المطلوب. اضغط على للتحديد.

5 اضغط على أو للوصول إلى اتصال. اضغط على للتحديد.

قد يتطلب الجهاز الذي يدعم بلوتوث خطوات إضافية لإكمال الأزواج.  
راجع دليل مستخدم الجهاز الذي يدعم بلوتوث.  
تعرض الشاشة اتصال بـ «الجهاز».

انتظر حتى تصلك رسالة إعلام.  
إذا تم بنجاح:

- تصدر نغمة مؤشر إيجابية.
- تعرض الشاشة «الجهاز» متصل ورمز البلوتوث متصل.
- تعرض الشاشة بجانب الجهاز المتصل.

إذا لم يتم بنجاح:

4 اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى قطع الاتصال. اضغط على  للتحديد. تعرض الشاشة قطع الاتصال عن «الجهاز».

#### إشعار:

قد يتطلب الجهاز الذي يدعم بلوتوث خطوات إضافية لقطع الاتصال. راجع أدلة المستخدم ذات الصلة الخاصة بأجهزة تدعم البلوتوث.

انتظر حتى تصلك رسالة إعلام.

- تصدر نغمة.
- تعرض الشاشة «الجهاز» غير متصل ويختفي رمز البلوتوث متصل.
- يختفي  الموجود بجوار الجهاز المتصل.

• تصدر نغمة مؤشر إيجابية.

- تعرض الشاشة «الجهاز» متصل ورمز البلوتوث متصل.
  - تعرض الشاشة  بجانب الجهاز المتصل.
- إذا لم يتم بنجاح:

- تصدر نغمة مؤشر سلبية.
- تعرض الشاشة الاتصال فشل.

## قطع الاتصال عن أجهزة البلوتوث

اتبع الإجراء لفصل أجهزة Bluetooth.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

## تبدیل توجيه الصوت بين سماعة الراديو الداخلية وجهاز بلوتوث

اتبع الإجراء لتبديل توجيه الصوت بين سماعة الراديو الداخلية وجهاز بلوتوث الخارجي.

اضغط على زر م.ص. بلوتوث المبرمج.

تعرض الشاشة أياً من النتائج التالية:

- تصدر نغمة. تعرض الشاشة يوجه الصوت إلى الراديو.
- تصدر نغمة. تعرض الشاشة يوجه الصوت إلى البلوتوث.

### عرض تفاصيل الجهاز

اتبع الإجراء لعرض تفاصيل الجهاز على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى عرض التفاصيل. اضغط على  للتحديد.

### حذف اسم الجهاز

يمكنك إزالة جهاز تم قطع الاتصال به من قائمة الأجهزة التي تدعم بلوتوث.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الأجهزة. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى الجهاز المطلوب. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى حذف. اضغط على  للتحديد. ستعرض الشاشة تم حذف اسم الجهاز.

3 اضغط على  أو  للوصول إلى اكتساب ميكBT. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع اكتساب ميكروفون بلوتوث والقيم الحالية. اضغط على  للتحديد. يمكنك تحرير القيم هنا.

5 اضغط على  أو  لزيادة القيم أو خفضها. اضغط على  للتحديد.

## اكتساب الميكروفون عبر بلوتوث

تسمح هذه الميزة للمستخدم بالتحكم في قيمة اكتساب الميكروفون للجهاز المتصل الذي يدعم بلوتوث.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث. اضغط على  للتحديد.

## موقع داخلي

إشعار: 

تنطبق ميزة الموقع الداخلي على الطرز المزودة بأحدث البرامج والأجهزة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يُستخدم الموقع الداخلي لتتبع موقع مستخدم الراديو. عند تنشيط الموقع الداخلي، يكون الراديو في وضع قابلية اكتشاف محدودة. تُستخدم إشارات مخصصة لتحديد موقع الراديو والتعرف على موضعه.

## تشغيل الموقع الداخلي أو إيقاف تشغيله

يمكنك تشغيل ميزة الموقع الداخلي أو إيقاف تشغيلها عبر تنفيذ أحد الإجراءات التالية.

- انتقل إلى هذه الميزة عبر القائمة.

a. اضغط على  للوصول إلى القائمة.

b. اضغط على  أو  للوصول إلى بلوتوث واضغط

على  للتحديد.

c. اضغط على  أو  للوصول إلى موقع داخلي

واضغط على  للتحديد.

d. اضغط على  لتشغيل الموقع الداخلي.

تعرض الشاشة تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح تشغيل الموقع الداخلي فسيظهر رمز "الموقع الداخلي متوفر" على الشاشة الرئيسية.

- إذا لم ينجح تشغيل الموقع الداخلي فستعرض الشاشة فشل التشغيل. ستسمع نغمة مؤشر سلبية.

e. اضغط على  لإيقاف تشغيل الموقع الداخلي.

تعرض الشاشة إيقاف تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح إيقاف تشغيل الموقع الداخلي فسيختفي رمز "الموقع الداخلي متوفر" من الشاشة الرئيسية.
- إذا لم ينجح إيقاف تشغيل الموقع الداخلي فستعرض الشاشة فشل إيقاف التشغيل. ستسمع نغمة مؤشر سلبية.

- انتقل إلى هذه الميزة باستخدام الزر المبرمج.

a. اضغط لفترة طويلة على زر **الموقع الداخلي** لتشغيل الموقع الداخلي.

تعرض الشاشة تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية.  
يحدث أحد الأمور التالية.

- إذا نجح تشغيل الموقع الداخلي فسيظهر رمز "الموقع الداخلي متوفر" على الشاشة الرئيسية.
- إذا لم ينجح تشغيل الموقع الداخلي فستعرض الشاشة فشل التشغيل. إذا لم ينجح، فستسمع نغمة مؤشر سلبية.

3 اضغط على  أو  للوصول إلى موقع داخلي واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إشارات واضغط على  للتحديد.

ستعرض الشاشة معلومات الإشارات.

## قائمة الإعلانات

يحتوي الراديو على قائمة إشعارات تجمع كل الأحداث غير المقروءة على القناة، مثل الرسائل النصية غير المقروءة ورسائل تتبع الاستخدام والمكالمات الفائتة وتنبهات المكالمات.

تعرض الشاشة رمز إعلام عندما يكون في قائمة الإعلانات حدث واحد أو أكثر.

تدعم القائمة 40 حدثًا غير مقروء كحد أقصى. عندما تكون القائمة ممتلئة، يحل الحدث التالي محل أقدم حدث تلقائيًا. بعد قراءة الأحداث، تتم إزالتها من قائمة الإعلانات.

بالنسبة إلى الرسائل النصية والمكالمات الفائتة وتنبه المكالمات، فإن العدد الأقصى للإعلانات هو 30 رسالة نصية و10 مكالمات فائتة أو تنبيهات مكالمات. يعتمد العدد الأقصى هذا على سعة قائمة الميزة الفردية (تذاكر العمل أو الرسائل النصية أو المكالمات الفائتة أو تنبيهات المكالمات).

b. اضغط على زر الموقع الداخلي المبرمج لإيقاف تشغيل الموقع الداخلي.

تعرض الشاشة إيقاف تشغيل الموقع الداخلي. ستسمع نغمة مؤشر إيجابية. يحدث أحد الأمور التالية.

- إذا نجح إيقاف تشغيل الموقع الداخلي فسيختفي رمز "الموقع الداخلي متوفر" من الشاشة الرئيسية.
- إذا لم ينجح إيقاف تشغيل الموقع الداخلي فستعرض الشاشة فشل إيقاف التشغيل. إذا لم ينجح، فستسمع نغمة مؤشر سلبية.

## الوصول إلى معلومات إشارات الموقع الداخلي

اتبع الإجراء للوصول إلى معلومات إشارات الموقع الداخلي.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى بلوتوث واضغط على  للتحديد.

## الوصول إلى قائمة الإعلانات

اتبع الإجراء للوصول إلى قائمة الإعلانات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى إلام. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الحدث المطلوب. اضغط على  للتحديد.

اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

تنبيه للمرة الأولى  
تصدر نغمة.

تعرض الشاشة داخل النطاق بعد الاسم المستعار للقناة.

تنبيه ARTS داخل النطاق  
تصدر نغمة، إذا تمت برمجتها.

تعرض الشاشة داخل النطاق بعد الاسم المستعار للقناة.

تنبيه ARTS خارج النطاق  
تصدر نغمة. يومض مؤشر LED الأحمر سريعاً.

تعرض الشاشة خارج النطاق مع التبديل إلى الشاشة الرئيسية.

إشعار:

راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## البرمجة عبر الأثير

يمكن للوكيل تحديث الراديو الخاص بك عن طريق البرمجة عبر الأثير (OTAP) دون أي اتصال فعلي. بالإضافة إلى ذلك، يمكن تكوين بعض الإعدادات باستخدام البرمجة عبر الأثير (OTAP).

عندما يمر الراديو ببرمجة عبر الأثير (OTAP)، يومض مؤشر LED الأخضر.

عندما يتلقى الراديو الخاص بك بيانات كبيرة الحجم:

- تعرض الشاشة رمز بيانات كبيرة الحجم.
- وتصيح القناة مشغولة.

## نظام الإرسال/الاستقبال تلقائي النطاق

يعتبر نظام الإرسال/الاستقبال تلقائي النطاق (ARTS) ميزة تناظرية فقط مصممة لإخبارك بوقت خروج الراديو من نطاق أجهزة الراديو الأخرى المجهزة بنظام ARTS.

تقوم أجهزة الراديو المجهزة بنظام ARTS بإرسال إشارات أو تلقيها بشكل دوري للتأكيد على أنها ضمن نطاق الأجهزة الأخرى.

يوفر الراديو إشارات للحالات كما يلي:

قم بتنفيذ أحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى منع الإرسال واضغط على  للتحديد.
- اضغط على زر **منع الإرسال** القابل للبرمجة.

- تصدر نغمة مؤشر إيجابية.
- تعرض الشاشة تشغيل منع الإرسال.

إشعار:

لا تتغير حالة منع الإرسال بعد تشغيل الراديو.

## تعطيل منع الإرسال

اتبع الإجراء لتعطيل إيقاف الإرسال.

قم بتنفيذ أحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى منع الإرسال واضغط على  للتحديد.
- اضغط على زر **منع الإرسال** القابل للبرمجة.

• تصدر نغمة مؤشر سلبية. تم إرجاع الإرسال إلى التشغيل العادي.

• تعرض الشاشة إيقاف منع الإرسال.

• تصدر نغمة سلبية إذا ضغطت على زر **PTT**.

عند انتهاء **OTAP**، بناءً على التكوين:

- تصدر نغمة. تعرض الشاشة تحديث إعادة التشغيل. تتم إعادة تشغيل الراديو عن طريق إيقاف التشغيل والتشغيل مرة أخرى.
- يمكنك تحديد إعادة تشغيل الآن أو تأجيل. عندما تحدد تأجيل، يعود الراديو إلى الشاشة السابقة. تعرض الشاشة رمز مؤقت تأخير **OTAP** حتى تحدث إعادة التشغيل التلقائية.

عندما يتم تشغيل الراديو بعد إعادة التشغيل التلقائية:

- إذا تم بنجاح، فستعرض الشاشة تحديث البرنامج مكتمل.
- إذا لم يتم بنجاح، فستعرض الشاشة تحديث البرنامج فشل.

راجع التحقق من معلومات تحديث البرنامج في صفحة 191 للحصول على إصدار البرنامج المحدث.

## منع الإرسال

تتيح ميزة منع الإرسال للمستخدمين حظر الإرسال من الراديو.

إشعار:

تتوفر ميزات البلوتوث وWi-Fi في وضع منع الإرسال.

## تمكين منع الإرسال

اتبع الإجراء لتمكين إيقاف الإرسال.

## تحديد أوضاع توصيل الأجهزة الطرفية الخارجية

اتبع الإجراء لتحديد أحد أوضاع توصيل الأجهزة الطرفية التالية:

- Motorola Solutions
- PC وصوت
- ملحق بيانات
- القياس عن بعد
- عام

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع الكبل. اضغط على  للتحديد.

5

اضغط على  أو  للوصول إلى وضع التوصيل المطلوب. اضغط على  للتحديد.

تعرض الشاشة وضع التوصيل المحدد. ستعود الشاشة إلى القائمة السابقة.

## مؤشر قوة الإشارة المستلمة

تسمح لك هذه الميزة بعرض قيم مؤشر قوة الإشارة المستلمة (RSSI).

تعرض الشاشة رمز **RSSI** في الزاوية العليا اليسرى. راجع [رموز الشاشة](#) للحصول على مزيد من المعلومات حول رمز **RSSI**.

## عرض قيم RSSI

اتبع الإجراء لعرض قيم RSSI على الراديو الخاص بك. عندما تكون في الشاشة الرئيسية:

1 اضغط على  ثلاث مرات واضغط فوراً على  ثلاث مرات، كل هذا في خمس ثوان.

تعرض الشاشة قيم مؤشر قوة الإشارة المتلقاة (RSSI) الحالية.

2 اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## ميزات التأمين بكلمة مرور

- تتيح لك هذه الميزة تقييد الوصول إلى الراديو من خلال المطالبة بكلمة مرور عند تشغيل الجهاز.
- يمكنك استخدام الميكروفون المزود بلوحة مفاتيح أو زر التمرير لأعلى/الأسفل لإدخال كلمة المرور.

- بعد المحاولتين الأولى والثانية تعرض الشاشة كلمة مرور خاطئة. كرر خطوة 1.
- بعد المحاولة الثالثة، تعرض الشاشة كلمة مرور خاطئة ثم تم قفل الراديو. تصدر نغمة. يومض مؤشر LED الأصفر بطريقة ازدواجية. يدخل الراديو في حالة القفل لمدة 15 دقيقة.

إشعار:

في حالة القفل، يستجيب الراديو للإدخال من قرص تشغيل/إيقاف تشغيل/التحكم في مستوى الصوت المبرمج وزر إضاءة خ. فقط.

## الوصول إلى أجهزة الراديو باستخدام كلمات المرور

اتبع الإجراء للوصول إلى الراديو الخاص بك باستخدام كلمة مرور.

1 أدخل كلمة المرور الحالية المكونة من أربعة أرقام.

إشعار:

يؤدي استخدام مفتاح القدم للطوارئ إلى إلغاء إدخال كلمة المرور للوصول إلى الراديو.

- استخدم الميكروفون المزود بلوحة مفاتيح.
- اضغط على  أو  لتحرير القيمة الرقمية لكل رقم، واضغط على  للدخول والانتقال إلى الرقم التالي.

## إلغاء تأمين أجهزة الراديو في حالة القفل

لا يكون الراديو قادرًا على تلقي أي مكالمات في حالة القفل. اتبع الإجراء لإلغاء تأمين الراديو الخاص بك في حالة القفل.

قم بأحد الإجراءات التالية:

- إذا تم تشغيل الراديو، فانتظر لمدة 15 دقيقة ثم كرر الخطوات الواردة في الوصول إلى أجهزة الراديو باستخدام كلمات المرور في صفحة 162 للوصول إلى الراديو.
- وإذا تم إيقاف تشغيل الراديو، فقم بتشغيله. يقوم الراديو بإعادة تشغيل مؤقت 15 دقيقة لحالة القفل. تصدر نغمة. يومض مؤشر LED الأصفر بطريقة ازدواجية. تعرض الشاشة تم قفل الراديو.

2 اضغط على  لإدخال كلمة المرور.

إذا تم بنجاح، يتم تشغيل الراديو.  
إذا لم يتم بنجاح:

انتظر لمدة 15 دقيقة ثم كرر الخطوات الواردة في الوصول إلى أجهزة الراديو باستخدام كلمات المرور في صفحة 162 للوصول إلى الراديو.

## تشغيل التأمين بكلمة مرور أو إيقاف تشغيله

اتبع الإجراء لتشغيل تأمين المرور أو إيقاف تشغيله على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تأمين المرور. اضغط على  للتحديد.

5 أدخل كلمة المرور الحالية المكونة من أربعة أرقام. • استخدم الميكروفون المزود بلوحة مفاتيح.

- اضغط على  أو  لتحرير القيمة الرقمية لكل رقم، واضغط على  للدخول والانتقال إلى الرقم التالي. تصدر نغمة مؤشر إيجابية لكل رقم تقوم بالضغط عليه.

6 اضغط على  لإدخال كلمة المرور.

إذا كانت كلمة المرور غير صحيحة، فستعرض الشاشة كلمة مرور خاطئة وستعود تلقائيًا إلى القائمة السابقة.

7 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد. تعرض الشاشة  بجانب تشغيل.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد. تعرض الشاشة  بجانب إيقاف.

## تغيير كلمات المرور

اتبع الإجراء لتغيير كلمات المرور على الراديو الخاص بك.

7 أدخل كلمة مرور جديدة مكونة من أربعة أرقام، واضغط على  للمتابعة.

8 أعد إدخال كلمة المرور الجديدة المكونة من أربعة أرقام، واضغط على  للمتابعة.

إذا تم بنجاح، فستعرض الشاشة تم تغيير كلمة المرور. إذا لم يتم بنجاح، فستعرض الشاشة كلمات المرور غير مطابقة.

ستعود الشاشة تلقائيًا إلى القائمة السابقة.

## تكوين اللوحة الأمامية

بإمكانك تخصيص معالم ميزة معينة في تكوين اللوحة الأمامية (FPC) لتحسين استخدام الراديو الخاص بك.

## الدخول في وضع تكوين اللوحة الأمامية

اتبع الإجراء للدخول إلى وضع برمجة اللوحة الأمامية على الراديو الخاص بك.

اضغط لفترة طويلة على  في أي وقت للعودة إلى الشاشة الرئيسية.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تأمين المرور. اضغط على  للتحديد.

5 أدخل كلمة المرور الحالية المكونة من أربعة أرقام، واضغط على  للمتابعة.

إذا كانت كلمة المرور غير صحيحة، فستعرض الشاشة كلمة مرور خاطئة وستعود تلقائيًا إلى القائمة السابقة.

6 اضغط على  أو  للوصول إلى كلمة المرور. اضغط على  للتحديد.

## تشغيل ميزة Wi-Fi

علامة Wi-Fi® هي علامة تجارية مسجلة لصالح Wi-Fi Alliance®.

إشعار: تنطبق هذه الميزة على DM4601e فقط.

تسمح لك هذه الميزة بإعداد شبكة Wi-Fi والاتصال بها. تدعم ميزة Wi-Fi تحديثات البرامج الثابتة للراديو وبرنامج codeplug والموارد مثل حزم اللغات وبيان الصوت.

## تشغيل ميزة Wi-Fi أو إيقاف تشغيلها

تم تعيين زر تشغيل أو إيقاف تشغيل Wi-Fi المبرمج بواسطة الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

يمكن تخصيص إعلانات صوتية لزر تشغيل أو إيقاف تشغيل Wi-Fi من خلال CPS وفقاً لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

يمكنك تشغيل ميزة Wi-Fi أو إيقاف تشغيلها عبر تنفيذ أحد الإجراءات التالية.

- اضغط على زر تشغيل أو إيقاف تشغيل Wi-Fi المبرمج. يصدر بيان صوت عند تشغيل ميزة Wi-Fi أو إيقاف تشغيل Wi-Fi.
- انتقل إلى هذه الميزة باستخدام القائمة.

a. اضغط على  للوصول إلى القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعده. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى برنامج الراديو. اضغط على  للتحديد.

## تحرير معلمات وضع FPP

استخدم الأزرار التالية حسب الحاجة أثناء التنقل عبر معلمات الميزة.

-  ،  - التمرير عبر الخيارات أو زيادة/خفض القيم أو الانتقال بطريقة رأسية.
-  - تحديد الخيار أو الدخول إلى قائمة فرعية.
-  - الضغط لفترة قصيرة للعودة إلى القائمة السابقة أو للخروج من شاشة الاختيار. اضغط لفترة طويلة للعودة إلى الشاشة الرئيسية.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقطة وصول إلى شبكة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى اتصال واضغط على  للتحديد.

6 أدخل كلمة المرور واضغط على .

عند نجاح الاتصال، يعرض الراديو إشعارًا ويتم حفظ نقطة الوصول إلى الشبكة في قائمة ملفات التعريف.

## التحقق من حالة اتصال Wi-Fi

اتبع الإجراء للتحقق من حالة اتصال Wi-Fi.

b. اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى تشغيل Wi-Fi واضغط على  للتحديد.

اضغط على  لتشغيل Wi-Fi. ستعرض الشاشة علامة ✓ بجانب ممكن.

اضغط على  لإيقاف تشغيل Wi-Fi. تختفي علامة ✓ من جانب ممكن.

## التوصيل بنقطة وصول إلى شبكة

عند تشغيل Wi-Fi، يقوم الراديو بالبحث للوصول إلى نقطة وصول إلى شبكة والاتصال بها.

كما يمكنك الاتصال بنقطة وصول إلى شبكة بواسطة القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

اضغط على زر **الاستعلام عن حالة Wi-Fi** المبرمج لمعرفة حالة الاتصال باستخدام بيان الصوت. يعلن بيان الصوت أنه قد تم إيقاف تشغيل Wi-Fi، أو أن Wi-Fi قيد التشغيل لكن لا اتصال، أو أن Wi-Fi قيد التشغيل ومتصل.

- تعرض الشاشة تم إيقاف تشغيل Wi-Fi عندما يتم إيقاف تشغيل Wi-Fi.
- تعرض الشاشة تم تشغيل Wi-Fi، متمل عند اتصال الراديو بشبكة.
- تعرض الشاشة تم تشغيل Wi-Fi، غير متمل عند تشغيل Wi-Fi دون اتصال الراديو بأي شبكة.

يمكن تخصيص إعلانات صوتية لنتائج الاستعلام عن حالة Wi-Fi عبر CPS وفقاً لمتطلبات المستخدم. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

إشعار:

يتم تعيين زر **الاستعلام عن حالة Wi-Fi** المبرمج بواسطة الوكيل أو مسؤول النظام. راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

## تحديث قائمة الشبكة

اتبع الإجراءات لتحديث قائمة الشبكة.

- قم بتنفيذ الإجراءات التالية لتحديث قائمة الشبكة عبر القائمة.

a. اضغط على  للوصول إلى القائمة.

b. اضغط على  أو  للوصول إلى Wi-Fi واضغط على  للتحديد.

c. اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

عند دخول قائمة الشبكات، يقوم الراديو تلقائيًا بتحديث قائمة الشبكة.

- إذا كنت موجودًا في قائمة الشبكات بالفعل، فقم بتنفيذ الإجراء التالي لتحديث قائمة الشبكة.

اضغط على  أو  للوصول إلى تحديث واضغط على  للتحديد.

يقوم الراديو بتحديث أحدث قائمة للشبكة وعرضها.

## إضافة شبكة

إذا لم تتوفر شبكة مفضلة في قائمة الشبكات المتاحة، فقم بتنفيذ الإجراءات التالية لإضافة شبكة.

1 اضغط على  للوصول إلى القائمة.

## عرض تفاصيل نقاط الوصول إلى الشبكة

اتبع الإجراء لعرض تفاصيل نقاط الوصول إلى الشبكة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقطة وصول إلى شبكة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى عرض التفاصيل واضغط على  للتحديد.

بالنسبة لنقطة الوصول إلى الشبكة المتصلة، يتم عرض معرف مجموعة الخدمات (SSID) ووضع الأمان وعنوان وحدة تحكم وصول الوسائط (MAC) وبروتوكول الإنترنت (IP).

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إضافة شبكة واضغط على  للتحديد.

5 أدخل معرف مجموعة الخدمات (SSID) واضغط على .

6 اضغط على  أو  للوصول إلى فتح واضغط على  للتحديد.

7 أدخل كلمة المرور واضغط على .  
يعرض الراديو إشعارًا إيجابيًا صغيرًا للإشارة إلى أنه قد تم حفظ الشبكة بنجاح.

بالنسبة لنقطة الوصول إلى الشبكة غير المتصلة، يتم عرض معرف مجموعة الخدمات (SSID) ووضع الأمان.

## إزالة نقاط الوصول إلى الشبكة

قم بتنفيذ الإجراءات التالية لإزالة نقاط الوصول إلى الشبكة من قائمة ملف التعريف.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى WiFi واضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الشبكات واضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نقاط الوصول إلى الشبكة المحددة واضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إزالة واضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى نعم واضغط على  للتحديد.

يعرض الراديو إشعارًا إيجابيًا صغيرًا للإشارة إلى أنه قد تمت إزالة نقطة الوصول إلى الشبكة المحددة بنجاح.

## الأدوات المساعدة

يشرح هذا الفصل عمليات وظائف الأدوات المساعدة المتوفرة في الراديو.

### مستويات الإخماد

يمكنك ضبط مستوى الإخماد لترشيح المكالمات غير المرغوب فيها التي تتسم بانخفاض قوة الإشارة أو القنوات التي تتسم بضوضاء أعلى من المعتاد في الخلفية.

#### Normal (عادي)

هذا هو الإعداد الافتراضي.

#### محكم

يعمل هذا الإعداد على ترشيح المكالمات و/أو الضوضاء الخلفية غير المرغوب فيها. قد يتم ترشيح المكالمات الواردة من المواقع البعيدة أيضًا.

#### إشعار:

لا تنطبق هذه الميزة على قنوات النطاق الترددي المدني الموجودة في نفس التردد.

## تعيين مستويات الإخماد

اتبع الإجراء لتعيين مستويات الإخماد على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على الزر الإخماد المبرمج. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

• اضغط على  أو  للوصول إلى عا دي. اضغط على

 للتحديد.

ستعرض الشاشة  بجانب عا دي.

• اضغط على  أو  للوصول إلى مشد و د. اضغط على

 للتحديد.

ستعرض الشاشة  بجانب مشد و د.

ستعود الشاشة تلقائيًا إلى القائمة السابقة.

## مستويات الطاقة

يمكنك تخصيص إعداد الطاقة على عالية أو منخفضة لكل قناة.

### عالية

يتيح هذا تمكين الاتصال بأجهزة الراديو الموجودة على مسافة بعيدة منك.

### منخفضة

يتيح هذا تمكين الاتصال بأجهزة الراديو الموجودة على مسافة أقرب.

### إشعار:

لا تنطبق هذه الميزة على قنوات النطاق الترددي المدني الموجودة في نفس التردد.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إخماد. اضغط على

 للتحديد.

5 قم بأحد الإجراءات التالية:

## تعيين مستويات الطاقة

اتبع الإجراء لتعيين مستويات الطاقة على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر مستوى الطاقة المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2

- اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3

- اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4

- اضغط على  أو  للوصول إلى الطاقة. اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى عالية. اضغط على  للتحديد.  
ستعرض الشاشة ✓ بجانب عالية.

- اضغط على  أو  للوصول إلى منخفضة. اضغط على  للتحديد.  
ستعرض الشاشة ✓ بجانب منخفضة.

6

- اضغط لفترة طويلة على  للعودة إلى الشاشة الرئيسية.

## تشغيل تنبيهات/نغمات الراديو أو إيقاف تشغيلها

بوسعك تمكين جميع نغمات وتنبيهات الراديو وتعطيلها، إذا لزم الأمر، باستثناء نغمة تنبيه الطوارئ الواردة. اتبع الإجراء لتشغيل النغمات والتنبيهات أو إيقاف تشغيلها على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر نغمة/تنبيه المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

## تشغيل نغمات لوحة المفاتيح أو إيقاف تشغيلها

اتبع الإجراء لتشغيل نغمات لوحة المفاتيح أو إيقاف تشغيلها على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط

على  للتحديد.

5 اضغط على  أو  للوصول إلى نغمة المفاتيح.

اضغط على  للتحديد.

6 اضغط على  لتمكين أو تعطيل نغمات لوحة المفاتيح. تعرض الشاشة

أيًا من النتائج التالية:

2 اضغط على  أو  للوصول إلى أدوات

مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط

على  للتحديد.

5 اضغط على  أو  للوصول إلى جميع النغمات.

اضغط على  للتحديد.

6 اضغط على  لتعطيل أو تمكين كل النغمات والتنبيهات. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تعيين مستويات إزاحة مستوى صوت النغمات/ التنبهات

تعمل هذه الميزة على ضبط مستوى صوت النغمات أو التنبهات، مما يتيح رفعه أو خفضه عن مستوى الصوت. اتبع الإجراء لتعيين مستويات إزاحة مستوى صوت النغمات والتنبهات على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط

على  للتحديد.

5

اضغط على  أو  للوصول إلى إزاحة الصوت.

اضغط على  للتحديد.

6

اضغط على  أو  للوصول إلى مستوى إزاحة مستوى

الصوت المطلوب.

تصدر نغمة تغذية راجعة مع كل مستوى إزاحة مستوى صوت مقابل.

7 قم بأحد الإجراءات التالية:

• اضغط على  للتحديد. تم حفظ مستوى إزاحة الصوت المطلوب.

• اضغط على  للخروج. تم تجاهل التغييرات.

## تشغيل نغمة إذن بالكلام أو إيقاف تشغيلها

اتبع الإجراء لتشغيل نغمة إذن بالكلام أو إيقاف تشغيلها على الراديو الخاص بك.

1

اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد.

6 اضغط على  لتمكين نغمة التشغيل أو تعطيلها. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نغمة تنبيه. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى إذن بالكلام. اضغط على  للتحديد.

6 اضغط على  لتمكين أو تعطيل نغمة الإذن بالكلام. تعرض الشاشة أيًا من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل نغمة التشغيل أو إيقاف تشغيلها

اتبع الإجراء لتشغيل نغمة التشغيل أو إيقاف تشغيلها على الراديو الخاص بك.

## تعيين نغمات تنبيه الرسائل النصية

يمكنك تخصيص نغمة تنبيه الرسائل النصية لتصبح "سريع" أو "متكرر" لأي إدخال في قائمة جهات الاتصال. اتبع الإجراء لتعيين نغمات تنبيه الرسائل النصية على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى جهات الاتصال.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى الاسم المستعار أو المعرف

المطلوب. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تنبيه الرسائل.

اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

• اضغط على  أو  للوصول إلى سريع. اضغط على

 للتحديد.

ستعرض الشاشة  بجانب سريع.

• اضغط على  أو  للوصول إلى متكرر. اضغط على

 للتحديد.

ستعرض الشاشة  بجانب متكرر.

## تغيير أوضاع العرض

يمكنك تغيير وضع العرض الخاص بالراديو بين "نهار" أو "ليل"، حسب الحاجة. ستؤثر هذه الميزة على عرض مجموعة الألوان الخاصة بالشاشة. اتبع الإجراء لتغيير وضع العرض للراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

• اضغط على زر وضع العرض المبرمج. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى السطوع. اضغط على  للتحديد. ستعرض الشاشة شريط التقدم.

5 اضغط على  أو  لتقليل سطوع الشاشة أو زيادته. اضغط على  للتحديد. تتفاوت قيمة الإعداد من 1 إلى 8.

## تشغيل الأبواق/الأضواء أو إيقاف تشغيلها

بإمكان الراديو إخطارك بمكالمة واردة من خلال ميزة الأبواق والأضواء. عند تنشيطها، تصدر مكالمة واردة صوت الأبواق وتشغل أضواء المركبة الخاصة بك. يجب تركيب هذه الميزة من قبل الوكيل من خلال موصل الملحقات الخلفي بالراديو. اتبع الإجراء لتشغيل جميع الأبواق والأضواء أو إيقاف تشغيلها على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

4 اضغط على  أو  للوصول إلى عرض. اضغط على  للتحديد. ستعرض الشاشة وضع النهار ووضع الليل.

5 اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط على  للتحديد. ستعرض الشاشة  بجانب الإعداد المحدد.

## ضبط سطوع الشاشة

اتبع الإجراء لضبط سطوع الشاشة على الراديو الخاص بك. لا يمكن ضبط سطوع الشاشة عند تمكين "سطوع تلقائي".

1 قم بأحد الإجراءات التالية:

- اضغط على زر السطوع المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

## تشغيل مؤشرات LED أو إيقاف تشغيلها

اتبع الإجراء لتشغيل مؤشرات LED أو إيقاف تشغيلها على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى مؤشر LED. اضغط على  للتحديد.

5 اضغط على  لتمكين أو تعطيل مؤشر LED. تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

• اضغط على زر الأبواق/الأضواء المبرمج. قم بتخطي الخطوات التالية.

• اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى أبواق/أضواء. اضغط على  للتحديد.

5 اضغط على  لتمكين الأبواق/الأضواء أو تعطيلها. تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل نظام العنوان العام الخارجي أو إيقاف تشغيله

اتبع الإجراءات لتمكين نظام العنوان العام الخارجي (PA) أو تعطيله في الراديو.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **العنوان العام الخارجي** المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2

- اضغط على  أو  للوصول إلى أدوات مساعدة.
- اضغط على  للتحديد.

3

- اضغط على  أو  للوصول إلى إعدادات الراديو.
- اضغط على  للتحديد.

4

- اضغط على  أو  للوصول إلى العنوان العام الخارجي.
- اضغط على  للتحديد.

## تشغيل نظام العنوان العام أو إيقاف تشغيله

اتبع الإجراءات لتمكين نظام العنوان العام الداخلي (PA) أو تعطيله في الراديو.

1 قم بأحد الإجراءات التالية:

- اضغط على زر **العنوان العام** المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2

- اضغط على  أو  للوصول إلى أدوات مساعدة.
- اضغط على  للتحديد.

3

- اضغط على  أو  للوصول إلى إعدادات الراديو.
- اضغط على  للتحديد.

4

- اضغط على  أو  للوصول إلى العنوان العام.
- اضغط على  للتحديد.

5

- اضغط على  لتمكين العنوان العام أو تعطيله.
- عند تمكينها، تظهر علامة ✓ بجوار ممكن.

- 5 اضغط على  لتمكين العنوان العام الخارجي أو تعطيله.
- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
  - في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل شاشة المقدمة أو إيقاف تشغيلها

يمكنك تمكين شاشة المقدمة و تعطيلها باستخدام الإجراء التالي.

- 1 اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى أدوات مساعدة.
- اضغط على  للتحديد.

- 3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

- 4 اضغط على  أو  للوصول إلى عرض. اضغط على  للتحديد.

- 5 اضغط على  أو  للوصول إلى شاشة المقدمة.
- اضغط على  للتحديد.

- 6 اضغط على  لتمكين شاشة المقدمة أو تعطيلها.
- تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تعيين اللغات

اتبع الإجراء لتعيين اللغات على الراديو الخاص بك.

- 1 اضغط على  للوصول إلى القائمة.

- 2 اضغط على  أو  للوصول إلى أدوات مساعدة.
- اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى نوع الكبل. اضغط على  للتحديد.

5 تتم الإشارة إلى نوع الكبل الحالي بعلامة ✓.

## الإرسال بالتشغيل الصوتي

يسمح لك الإرسال بالتشغيل الصوتي (VOX) بدء مكالمة لاسلكية منشط بها الصوت على قناة مبرمجة. يقوم الراديو بالإرسال تلقائيًا، لفترة مبرمجة، متى يكتشف الميكروفون الموجود في الملحق الذي يدعم ميزة VOX وجود صوت.

إشعار:

لا تنطبق هذه الميزة على قنوات النطاق الترددي المدني الموجودة في نفس التردد.

يمكنك تمكين VOX أو تعطيله عن طريق القيام بأحد الإجراءات التالية:

- إيقاف تشغيل الراديو ثم تشغيله مرة أخرى لتمكين VOX.
- قم بتغيير القناة باستخدام أزرار التمرير لأعلى/أسفل لتمكين VOX.
- قم بتغيير القناة باستخدام قرص مستوى الصوت/القنوات لتمكين VOX.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى اللغات. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى اللغة المطلوبة. اضغط على  للتحديد.

ستعرض الشاشة ✓ بجانب اللغة المحددة.

## تحديد نوع الكبل

نفذ الخطوات التالية لتحديد نوع الكبل الذي يستخدمه الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

- تشغيل أو إيقاف تشغيل VOX باستخدام زر VOX المبرمج أو القائمة لتمكين أو تعطيل VOX.
- اضغط على زر PTT أثناء تشغيل الراديو لتعطيل (VOX).

إشعار:

يقتصر تشغيل هذه الميزة أو إيقاف تشغيلها على أجهزة الراديو التي تدعم هذه الوظيفة. راجع الوكيل أو مسؤول النظام لديك للحصول على مزيد من المعلومات.

## تشغيل الإرسال بالتشغيل الصوتي أو إيقاف تشغيله

اتبع الإجراء لتشغيل نظام VOX أو إيقاف تشغيله على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر VOX المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعده. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى VOX. اضغط على  للتحديد.

5

اضغط على  لتمكين أو تعطيل VOX.

إشعار:

في حال تمكين نغمة إذن بالكلام، استخدم كلمة التشغيل لبدء المكالمة. انتظر حتى انتهاء نغمة الإذن بالكلام قبل التحدث بوضوح في الميكروفون. راجع تشغيل نغمة إذن بالكلام أو إيقاف تشغيلها في صفحة 175 لمزيد من المعلومات.

## تشغيل بيان الصوت أو إيقاف تشغيله

تمكن هذه الميزة الراديو من توضيح المنطقة أو القناة الحالية التي قام المستخدم بتعيينها للتو أو الزر المبرمج الذي ضغط عليه المستخدم للتو صوتيًا. ويكون ذلك مفيدًا عادةً عندما يجد المستخدم صعوبة في قراءة المحتوى المعروض على الشاشة.

يمكن تخصيص هذا المؤشر الصوتي وفقًا لمتطلبات العميل. اتبع الإجراء لتشغيل بيان الصوت أو إيقاف تشغيله على الراديو الخاص بك.

## تشغيل لوحة الاختيار أو إيقاف تشغيلها

يمكن تخصيص إمكانيات لوحة الاختيار ضمن كل قناة للأزرار القابلة للبرمجة. يمكن للقناة أن تدعم حتى 6 ميزات للوحة الاختيار. اتبع الإجراء لتشغيل لوحة الاختيار أو إيقاف تشغيلها على الراديو الخاص بك.

اضغط على زر لوحة الاختيار المبرمج.

## نص إلى كلام

لا يمكن تمكين ميزة نص إلى كلام إلا بواسطة الوكيل أو مسؤول النظام. إذا تم تمكين ميزة نص إلى كلام، فسيتم تعطيل ميزة بيان الصوت تلقائيًا. إذا تم تمكين ميزة بيان الصوت، فسيتم تعطيل ميزة نص إلى كلام تلقائيًا. تمكن هذه الميزة الراديو من الإشارة بشكل مسموع إلى الميزات التالية:

- القناة الحالية
- المنطقة الحالية
- تشغيل ميزة الزر المبرمج أو إيقاف تشغيلها
- محتوى الرسائل النصية المتلقاة
- محتوى تذاكر العمل المتلقاة

يمكن تخصيص هذا المؤشر الصوتي وفقًا لمتطلبات العميل. وعادةً تكون هذه الميزة مفيدة عندما يكون المستخدم في وضع صعب يمنعه من قراءة المحتوى المعروض على الشاشة.

## تعيين النص إلى كلام

اتبع الإجراء لتعيين ميزة نص إلى كلام.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى بيان الصوت. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى أي من الميزات التالية. اضغط على  للتحديد.

الميزات المتوفرة هي كما يلي:

- الكل

4 اضغط على  أو  للوصول إلى توجيه م . . اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  أو  لتمكين توجيه المكالمات. عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- اضغط على  أو  لتعطيل توجيه المكالمات. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تعيين مؤقت القائمة

يمكنك تعيين فترة بقاء الراديو الخاص بك في القائمة قبل أن يقوم بالتبديل تلقائيًا إلى الشاشة الرئيسية. اتبع الإجراء لتعيين مؤقت القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

- الرسائل
- تذاكر عمل
- تباعد
- Zone
- زر البرنامج
- تظهر علامة ✓ بجانب الإعداد المحدد.

## تشغيل توجيه المكالمات تلقائيًا أو إيقاف تشغيله

يمكنك تمكين الراديو ليقوم بتوجيه المكالمات الصوتية تلقائيًا إلى راديو آخر.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

وتعمل هذه الميزة على كتم الأصوات العالية أو رفع الأصوات المنخفضة إلى قيمة معينة مسبقًا للحفاظ على مستوى صوت ثابت. اتبع الإجراء لتشغيل AGC للميكروفون التناظري أو إيقاف تشغيله على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى Mic AGC-A. اضغط

على  للتحديد.

5 اضغط على  لتمكين أو تعطيل AGC للميكروفون التناظري.

تعرض الشاشة أياً من النتائج التالية:

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى عرض. اضغط على  للتحديد.

5 اضغط على  أو  لتعيين مؤقت القائمة. اضغط

على  للتحديد.

6 اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط

على  للتحديد.

## تشغيل AGC للميكروفون التناظري أو إيقاف تشغيله

يتحكم التحكم في الكسب التلقائي (AGC) للميكروفون التناظري في كسب الميكروفون الخاص بالراديو تلقائيًا أثناء الإرسال على نظام تناظري.

- عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## تشغيل الصوت الذكي أو إيقاف تشغيله

يُضبط الراديو مستوى الصوت تلقائيًا للتغلب على الضوضاء الخلفية الحالية في البيئة المحيطة، بما في ذلك مصادر الضوضاء الثابتة وغير الثابتة. هذه ميزة تلقى فقط ولا تؤثر على صوت الإرسال. اتبع الإجراء لتشغيل الصوت الذكي أو إيقاف تشغيله على الراديو الخاص بك.

إشعار:

لا تنطبق هذه الميزة أثناء جلسة بلوتوث.

### 1 قم بأحد الإجراءات التالية:

- اضغط على زر صوت ذكي المبرمج. قم بخطى الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

### 2

- اضغط على  أو  للوصول إلى أدوات مساعدة.
- اضغط على  للتحديد.

## تشغيل AGC للميكروفون الرقمي أو إيقاف تشغيله

يتحكم التحكم في الكسب التلقائي (AGC) للميكروفون الرقمي في كسب الميكروفون من الراديو تلقائيًا أثناء الإرسال على نظام رقمي. وتعمل هذه الميزة على كتم الأصوات العالية أو رفع الأصوات المنخفضة إلى قيمة معينة مسبقًا للحفاظ على مستوى صوت ثابت. اتبع الإجراء لتشغيل AGC للميكروفون الرقمي أو إيقاف تشغيله على الراديو الخاص بك.

### 1

اضغط على  للوصول إلى القائمة.

### 2

اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

### 3

اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

### 4

اضغط على  أو  للوصول إلى Mic AGC-0. اضغط

على  للتحديد.

### 5

اضغط على  لتمكين أو تعطيل AGC للميكروفون الرقمي.

تعرض الشاشة أياً من النتائج التالية:

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد..

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى كاتم تردد الصوت.

اضغط على  للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على لتمكين كاتم تردد الصوت. عند تمكينها، تظهر علامة ✓ بجوار ممكن.
- اضغط على لتعطيل كاتم تردد الصوت. في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى صوت ذكي. اضغط على

 للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد. ستعرض الشاشة علامة ✓ بجانب تشغيل.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد. ستعرض الشاشة علامة ✓ بجانب إيقاف تشغيل.

## تشغيل ميزة كاتم تردد الصوت أو إيقاف تشغيلها

تتيح لك هذه الميزة تقليل كاتم تردد الصوت في المكالمات المتلقاة. اتبع الإجراء لتشغيل كاتم تردد الصوت أو إيقافه على الراديو الخاص بك.

## التبديل بين تشغيل تحسين الاهتزاز أو إيقاف تشغيله

يمكنك تمكين هذه الميزة عندما تتحدث بلغة تحتوي على العديد من الكلمات التي تحتوي على أصوات لثوية تكرارية. اتبع الإجراء لتشغيل تحسين الاهتزاز أو إيقاف تشغيله على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر **تحسين الاهتزاز المبرمج**. قم بتخطي الخطوات التالية.

- اضغط على **OK** للوصول إلى القائمة.

2

- اضغط على **▲** أو **▼** للوصول إلى أدوات مساعدة. اضغط على **OK** للتحديد.

3

- اضغط على **▲** أو **▼** للوصول إلى إعدادات الراديو. اضغط على **OK** للتحديد.

4

- اضغط على **▲** أو **▼** للوصول إلى تحسين الاهتزاز. اضغط على **OK** للتحديد.

5 قم بأحد الإجراءات التالية:

- اضغط على **▲** أو **▼** للوصول إلى تشغيل. اضغط على **OK** للتحديد. ستعرض الشاشة علامة **✓** بجانب تشغيل.
- اضغط على **▲** أو **▼** للوصول إلى إيقاف. اضغط على **OK** للتحديد. ستعرض الشاشة علامة **✓** بجانب إيقاف تشغيل.

## بيئة الصوت

يمكنك تخصيص بيئة الصوت للراديو الخاص بك وفقًا للبيئة المحيطة بك.

### تم تحديد

هذا هو الإعداد الافتراضي.

### مرتفع

يمكن هذا الإعداد كاتم الضوضاء ويزيد من ارتفاع صوت السماعات الخارجية لاستخدامها في البيئة الصاخبة.

### مجموعة عمل

يمكن هذا الإعداد كاتم تردد الصوت ويعطل التحكم في الكسب التلقائي (AGC) للاستخدام عندما تكون مجموعة من أجهزة الراديو قريبة من بعضها البعض.

## تعيين بيئة الصوت

اتبع الإجراء لإعداد بيئة الصوت على الراديو وفقًا للبيئة المحيطة بك.

- اختر مجموعة عمل لتقليل الارتداد الصوتي عند استخدام مجموعة من أجهزة الراديو قريبة من بعضها.  
ستعرض الشاشة ✓ بجانب الإعداد المحدد.

## ملفات تعريف الصوت

يمكنك تخصيص ملفات تعريف الصوت للراديو الخاص بك حسب تفضيلك.  
تم تحديد هذا هو الإعداد الافتراضي.

### مستوى 1، ومستوى 2، ومستوى 3

تهدف هذه الإعدادات إلى التعويض عن فقدان السمع الناتج عن الضوضاء والذي عادةً ما يحدث للبالغين في سن 40 و50 و60 أو أكبر.

### تحسين ثلاثي وتحسين متوسط وتحسين الصوت

تهدف هذه الإعدادات إلى الحصول على صوت أدق وصوت أنفي وصوت أعمق.

## تعيين ملفات تعريف الصوت

اتبع الإجراء لتعيين ملفات تعريف الصوت على الراديو الخاص بك.

- 1 اضغط على  للوصول إلى القائمة.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى بيئة الصوت. اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى الإعداد المطلوب. اضغط على  للتحديد.  
الإعدادات كالتالي.

- اختر افتراضي لإعدادات المصنع الافتراضية.
- اختر مرتفع لزيادة مستوى صوت السماع الخارجية عند الاستخدام في الأجواء الصاخبة.

- اختر تحسين ثلاثي أو تحسين متوسط أو تحسين الصوت لملفات تعريف الصوت التي تتماشى مع تفضيلاتك للحصول على صوت رنان أو صوت أغن أو صوت عميق.
- ستعرض الشاشة ✓ بجانب الإعداد المحدد.

## تشغيل النظام العالمي للملاحة عبر الأقمار الصناعية وإيقاف تشغيله

النظام العالمي للملاحة عبر الأقمار الصناعية (GNSS) هو نظام تنقل عبر الأقمار الصناعية يحدد الموقع الجغرافي الدقيق للراديو. يتضمن GNSS نظام تحديد الموقع العالمي (GPS)، والنظام العالمي للملاحة عبر الأقمار الصناعية (GLONASS).

إشعار:

قد توفر بعض طرز الراديو المحددة نظام GPS ونظام GLONASS. يتم تكوين مجموعة الأقمار لنظام GNSS باستخدام برنامج برمجة العميل (CPS). راجع الأمر مع الوكيل أو مسؤول النظام لتحديد الطريقة التي تمت بها برمجة الراديو الخاص بك.

- 1 نفذ إحدى الخطوات التالية للتبديل بين تشغيل GNSS أو إيقاف تشغيله في الراديو.
  - اضغط على الزر **GNSS** المبرمج.
  - اضغط على للوصول إلى القائمة. تابع إلى الخطوة التالية.

- 2 اضغط على أو للوصول إلى أدوات مساعدة. اضغط على للتحديد.

- 3 اضغط على أو للوصول إلى إعدادات الراديو. اضغط على للتحديد.

- 4 اضغط على أو للوصول إلى Audio Profiles. اضغط على للتحديد.

- 5 اضغط على أو للوصول إلى الإعداد المطلوب. اضغط على للتحديد. الإعدادات كالتالي.

- اختر افتراضي لتعطيل ملف تعريف الصوت المحدد سابقًا والعودة إلى إعدادات المصنع الافتراضية.
- اختر مستوى 1 أو مستوى 2 أو مستوى 3 لملفات تعريف الصوت لتعويض فقدان السمع بسبب الضوضاء المعتاد لدى البالغين الذين تجاوزوا سن 40 عامًا.

## تشغيل قائمة الاستلام المرنة أو إيقاف تشغيلها

اتبع الإجراء لتشغيل قائمة الاستلام المرنة أو إيقاف تشغيلها.

1 قم بأحد الإجراءات التالية:

- اضغط على الزر قائمة الاستلام المرنة المبرمج. قم بتخطي الخطوات التالية.
- اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى قائمة Rxx مرنة.

اضغط على  للتحديد.

3 قم بأحد الإجراءات التالية:

- اضغط على  أو  للوصول إلى تشغيل. اضغط على  للتحديد.  
تصدر نغمة مؤشر إيجابية.
- ستعرض الشاشة إشعاراً إيجابياً صغيراً.
- اضغط على  أو  للوصول إلى إيقاف. اضغط على  للتحديد.  
تصدر نغمة مؤشر سلبية.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.

اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى إعدادات

الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى GNSS. اضغط على  للتحديد.

5 اضغط على  لتمكين GNSS أو تعطيله.

عند تمكينها، تظهر علامة ✓ بجوار ممكن.

في حالة التعطيل، تختفي علامة ✓ من جانب ممكن.

## قائمة استلام مرنة

قائمة الاستلام المرنة هي ميزة تسمح لك بإنشاء أعضاء وتعيينهم في قائمة الاستلام الخاصة بمجموعة التحدث. يدعم الراديو الخاص بك 16 عضواً بحد أقصى في القائمة. هذه الميزة مدعومة في السعة الإضافية.

ستعرض الشاشة إشعارًا سلبيًا صغيرًا.

## معلومات عامة عن الراديو

يحتوي الراديو على معلومات حول معلمات عامة متنوعة.

فيما يلي المعلومات العامة الخاصة بالراديو:

- الاسم المستعار والمعرف الخاص بالراديو.
- إصدار البرنامج الثابت وإصدار Codeplug.
- تحديث البرنامج.
- معلومات GNSS.
- معلومات الموقع.

إشعار:

اضغط على  للعودة إلى الشاشة السابقة. اضغط لفترة طويلة على

 للعودة إلى الشاشة الرئيسية. يخرج الراديو من الشاشة الحالية بمجرد انتهاء مؤقت عدم النشاط.

## التحقق من الاسم المستعار والمعرف الخاص بالراديو

اتبع الإجراء للتحقق من الاسم المستعار للراديو ومعرفه على الراديو الخاص بك.

1 قم بأحد الإجراءات التالية:

- اضغط على زر الاسم المستعار للراديو ومعرفه المبرمج. قم بتخطي الخطوات التالية. تصدر نغمة مؤشر إيجابية.

يمكنك الضغط على زر الاسم المستعار للراديو ومعرفه المبرمج للعودة إلى الشاشة السابقة.

- اضغط على  للوصول إلى القائمة.

2

اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3

اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4

اضغط على  أو  للوصول إلى هويتي. اضغط على  للتحديد.

يعرض سطر النص الأول الاسم المستعار للراديو. يعرض سطر النص الثاني معرف الراديو.

## التحقق من معلومات تحديث البرنامج

تعرض هذه الميزة تاريخ ووقت آخر تحديث للبرنامج تم عن طريق البرمجة عبر الأثير (OTAP) أو Wi-Fi. اتبع الإجراء للتحقق من معلومات تحديث البرنامج على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى تحديث برنامج. اضغط على  للتحديد. تعرض الشاشة تاريخ ووقت آخر تحديث للبرامج.

لا تكون القائمة تحديث البرنامج متاحة إلا بعد إجراء جلسة برمجة عبر الأثير (OTAP) أو Wi-Fi واحدة ناجحة على الأقل. راجع البرمجة عبر الأثير في [صفحة 408](#) لمزيد من المعلومات.

## التحقق من إصدارات البرنامج الثابت وCodeplug

اتبع الإجراء للتحقق من البرنامج الثابت وإصدارات Codeplug على الراديو الخاص بك.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة. اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى إصدارات. اضغط على  للتحديد.

تعرض الشاشة الإصدار الحالي للبرنامج الثابت وإصدار codeplug.

## التحقق من معلومات GNSS

لعرض معلومات نظام GNSS على الراديو مثل قيم:

- خط العرض
- خط الطول
- الارتفاع
- الاتجاه
- السرعة
- التخفيف الأفقي للدقة (HDOP)
- الأقمار الاصطناعية
- الإصدار

4 اضغط على  أو  للوصول إلى معلومات GNSS.  
اضغط على  للتحديد.

5 اضغط على  أو  للوصول إلى العنصر المطلوب. اضغط على  للتحديد. تعرض الشاشة معلومات نظام GNSS المطلوبة.

## عرض معلومات الموقع

اتبع الإجراء لعرض اسم الموقع الحالي عندما يكون الراديو قيد التشغيل.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

1 اضغط على  للوصول إلى القائمة.

2 اضغط على  أو  للوصول إلى أدوات مساعدة.  
اضغط على  للتحديد.

3 اضغط على  أو  للوصول إلى م = الراديو. اضغط على  للتحديد.

4 اضغط على  أو  للوصول إلى معل . موقع . اضغط

على  للتحديد.

---

تعرض الشاشة اسم الموقع الحالي.

تم ترك هذه الصفحة فارغة عمدًا.

## الضمان المحدود

### تضمن شركة MOTOROLA SOLUTIONS منتجات الاتصال

#### 1. ما الذي يغطيه هذا الضمان وما مدته:

تضمن شركة Motorola Solutions Inc. (المشار إليها فيما بعد باسم "Motorola Solutions") منتجات الاتصالات التي تم تصنيعها بواسطة شركة Motorola Solutions والمدرجة أدناه (المشار إليها فيما يلي باسم "المنتج") ضد عيوب المواد والصناعة في ظل الخدمة والاستخدام العادي لفترة زمنية تبدأ من تاريخ الشراء كما هو محدد أدناه:

أجهزة الراديو البيدوي الرقمية DM	24 شهرًا
ملحقات المنتج	12 شهرًا

ستقوم شركة Motorola Solutions، حسب تقديرها الخاص ومجانًا، بإصلاح المنتج (باستخدام أجزاء جديدة أو أجزاء تم إصلاحها)، أو استبداله (بمنتج جديد أو منتج تم إصلاحه)، أو إعادة سعر شراء المنتج أثناء فترة الضمان بشرط أن تتم إعادته وفقًا للبنود الواردة في هذا الضمان. ويتم ضمان الأجزاء أو اللوحات المستبدلة خلال باقي فترة الضمان الأصلية المعمول بها. تصبح جميع الأجزاء المستبدلة من المنتج ملكية خاصة لشركة Motorola Solutions.

تتمدد شركة Motorola Solutions هذا الضمان الصريح والمحدود للمشتري (المستخدم النهائي) الأصلي فقط ولا يمكن تحويل هذا الضمان أو نقله إلى أي طرف آخر. هذا هو الضمان الكامل للمنتج المُصنع بواسطة شركة Motorola Solutions. لا تتحمل شركة Motorola Solutions أي التزامات أو أي مسؤولية عن الإضافات أو التعديلات الداخلة على هذا الضمان ما لم تكن مكتوبة وموقعة بواسطة أحد مسؤولي شركة Motorola Solutions.

لا تضمن شركة Motorola Solutions تركيب المنتج أو صيانته أو توفير الخدمة الخاصة به، ما لم يكن ذلك واردًا في اتفاقية مستقلة بين شركة Motorola Solutions والمشتري (المستخدم النهائي) الأصلي.

لا تتحمل شركة Motorola Solutions المسؤولية بأي حال من الأحوال عن أي جهاز إضافي لم تقم شركة Motorola Solutions بتقديره ويكون مرفقًا بالمنتج أو يتم استخدامه معه، أو عن تشغيل المنتج مع أي جهاز إضافي، وتُسنتنى جميع هذه الأجهزة صراحة من هذا الضمان. نظرًا لأن كل نظام قد يستخدم المنتج هو نظام فريد من نوعه، فإن شركة Motorola Solutions تخلي مسؤوليتها عن نطاق النظام أو تغطيته أو تشغيله بالكامل بموجب هذا الضمان.

#### 2. بنود عامة

ينص هذا الضمان على المدى الكامل لمسؤوليات شركة Motorola Solutions بشأن المنتج. الإصلاح أو الاستبدال أو إعادة سعر الشراء هو التعويض الحصري، حسبما تختار شركة Motorola Solutions. يحل هذا الضمان محل جميع الضمانات الصريحة الأخرى. تقتصر الضمانات الضمنية، بما في ذلك على سبيل المثال لا الحصر، الضمانات الضمنية للقابلية للتسويق والملاءمة لغرض معين، على فترة هذا الضمان المحدود. لا تتحمل شركة MOTOROLA SOLUTIONS بأي حال من الأحوال المسؤولية عن الأضرار التي تتجاوز سعر شراء المنتج، أو عن أي خسارة للاستخدام أو ضياع للوقت، أو إزعاج، أو خسارة تجارية، أو خسارة

## 5. ما الذي لا يغطيه هذا الضمان

- 1 العيوب أو الأضرار الناتجة عن استخدام المنتج بأسلوب آخر غير الأسلوب المعتاد والمألوف.
- 2 العيوب أو الأضرار الناتجة عن سوء الاستخدام أو التعرض لحادث أو الماء أو الإهمال.
- 3 العيوب أو الأضرار الناتجة عن اختبار المنتج أو تشغيله أو صيانته أو تركيبه أو تغييره أو تعديله أو ضبطه بشكل غير صحيح.
- 4 كسر الهوائيات أو تلفها ما لم يكن ذلك نتيجة مباشرة عن عيوب في مادة التصنيع.
- 5 أي منتج يخضع لتعديلات أو عمليات تفكيك أو إصلاح بشكل غير مرخص (بما في ذلك على سبيل المثال لا الحصر، إضافة أجهزة غير مدعومة من شركة Motorola Solutions إلى المنتج) والتي تؤثر سلبًا في أداء المنتج أو تتعارض مع فحص شركة Motorola Solutions المعتاد للضمان واختبارها للمنتج وذلك للتحقق من أي مطالبات تتعلق بالضمان.
- 6 المنتج الذي يحتوي على رقم تسلسلي ممسوح أو غير مقروء.
- 7 البطاريات القابلة لإعادة الشحن إذا:
  - كانت أي من الأختام الموجودة على علبة خلايا البطارية منزوعة أو تم العبث بها بشكل واضح.
  - كان هناك ضرر أو عيب نتج عن شحن البطارية أو استخدامها في جهاز أو خدمة أخرى غير المنتج المخصصة له.
- 8 تكاليف الشحن إلى محطة الإصلاح.

في الأرباح أو المدخرات، أو الأضرار العارضة أو الخاصة أو التبعية الأخرى التي تنشأ عن استخدام المنتج أو عدم القدرة على استخدامه، وذلك إلى الحد الأقصى الذي يجيز فيه القانون إخلاء المسؤولية عن أي مما سبق.

## 3. الحقوق المكفولة بموجب قانون الولاية:

لا تسمح بعض الولايات بالاستثناء أو التحديد الخاص بالأضرار العارضة أو التبعية أو تحديد مدة سريان أي ضمان ضمني، ولذلك قد لا ينطبق التحديد أو الاستثناء الوارد أعلاه.

يمنح هذا الضمان حقوقًا قانونية محددة وقد تكون هناك حقوق أخرى والتي قد تختلف من ولاية إلى أخرى.

## 4. كيفية الحصول على خدمة الضمان

يجب عليك تقديم دليل الشراء (يحمل تاريخ الشراء والرقم التسلسلي الخاص بالمنتج) من أجل الحصول على خدمة الضمان ويجب أن تقوم بتسليم عنصر المنتج أو إرساله، ودفع رسوم نقله والتأمين الخاص به مسبقًا، إلى مكان خدمة ضمان معتمد. ستقوم شركة Motorola Solutions بتقديم خدمة الضمان من خلال أحد أماكن خدمة الضمان المعتمدة الخاصة بها. إذا قمت أولاً بالاتصال بالشركة التي قامت ببيع المنتج لك (على سبيل المثال، الوكيل أو موفر خدمة الاتصالات)، فقد يسهل ذلك حصولك على خدمة الضمان. يمكنك أيضًا الاتصال بشركة Motorola Solutions على الرقم 1-800-927-2744 الولايات المتحدة/كندا.

المتحدة، فيسمح المشتري لشركة Motorola Solutions - على حسب تقديرها الخاص وعلى نفقتها - بأن تمنح المشتري الحق في مواصلة استخدام المنتج أو أجزائه، أو أن تستبدله أو تعدله بحيث لا يمثل انتهاكاً لبراءات الاختراع، أو أن تمنح هذا المشتري مقابلاً للمنتج أو أجزائه حسب حالة الاستهلاك وتقبل بإعادته. وتكون قيمة الاستهلاك مبلغاً ثابتاً لكل سنة على مدار العمر الافتراضي للمنتج أو أجزائه حسبما تحدد شركة Motorola Solutions.

لن تتحمل شركة Motorola Solutions مسؤولية أي دعوى بخصوص انتهاك براءة الاختراع تكون قائمة على أساس دمج المنتج أو أجزائه التي تم تقديمها بموجب هذا المستند مع أي برامج أو أدوات أو أجهزة غير مقدمة من شركة Motorola Solutions، كما لن تتحمل شركة Motorola Solutions مسؤولية عن استخدام أجهزة أو برامج إضافية غير مقدمة من شركة Motorola Solutions وتم إرفاقها مع المنتج أو استخدامها معه. ينص ما سبق على المسؤولية الكاملة التي تتحملها شركة Motorola Solutions فيما يتعلق بانتهاك براءات الاختراع بواسطة المنتج أو أي أجزاء منه.

تحفظ شركة Motorola Solutions بموجب قوانين الولايات المتحدة وقوانين بلدان أخرى بحقوق حصريّة معينة فيما يتعلق ببرامج شركة Motorola Solutions المحمية بموجب حقوق الطبع والنشر، مثل الحقوق الحصريّة في إعادة إنتاج برامج شركة Motorola Solutions في نسخ وتوزيع نسخ منها. لا يجوز استخدام برامج شركة Motorola Solutions إلا على المنتج المضمنة به هذه البرامج في الأصل ولا يجوز استبدال هذه البرامج الموجودة على هذا المنتج أو نسخها أو توزيعها أو تعديلها بأي شكل من الأشكال، أو استخدامها لإنتاج أي مشتق منها. ولا يصرّح بأي استخدام آخر لبرامج شركة Motorola Solutions بما في ذلك - على سبيل المثال لا الحصر - تغيير هذه البرامج أو تعديلها أو إعادة إنتاجها أو توزيعها أو إجراء هندسة عكسية لها أو ممارسة أي حقوق بصدها. لا يتم منح أي

9 أي منتج لا يعمل - بسبب تعديل غير قانوني أو غير مصرح به في البرامج/ البرامج الثابتة للمنتج - وفقاً للمواصفات التي نشرتها شركة Motorola Solutions أو الشهادة الصادرة عن لجنة الاتصالات الفيدرالية (FCC) والسارية على المنتج في الوقت الذي تم فيه توزيع المنتج من شركة Motorola Solutions لأول مرة.

10 الخدوش أو الأضرار الشكلية الأخرى على أسطح المنتج التي لا تؤثر على تشغيل المنتج.

11 التلف الذي ينتج عن الاستعمال العادي.

## 6. بنود البرنامج وبراءة الاختراع

تدافع شركة Motorola Solutions، على نفقتها الخاصة، عن المشتري (المستخدم النهائي) في أية دعوى قضائية يتم رفعها ضده إذا كان أساس هذه الدعوى قائماً على ادعاء بأن المنتج أو أجزاء منه ينتهك براءات الاختراع في الولايات المتحدة، فيستدد شركة Motorola Solutions التكاليف والتعويضات التي يتم الحكم بها نهائياً على المشتري (المستخدم النهائي) في أي دعوى قضائية تستند إلى أي ادعاء من هذا القبيل، لكن يُشترط ما يلي لهذا الدفاع والمدفوعات:

1 يخطر المشتري شركة Motorola Solutions كتابياً وعلى الفور بأي دعوى قضائية من هذا القبيل.

2 تخصص شركة Motorola Solutions وحدها بالإشراف على الدفاع في أي دعوى قضائية من هذا القبيل وكافة المداولات التي تتعلق بأي تسوية أو اتفاق في هذه الدعوى القضائية؛

3 وإذا أصبح المنتج أو أجزاؤه، أو حسب رأي شركة Motorola Solutions من المرجح أن يصبح، موضوعاً لدعوى بانتهاك براءات الاختراع في الولايات

ترخيص ضمناً أو بالوقف أو بغير ذلك بموجب حقوق براءة الاختراع لشركة Motorola Solutions أو حقوق الطبع والنشر الخاصة بها.

## 7. القانون الحاكم
