# Important Safety Information

## RF Energy Exposure and Product Safety Guide for Mobile Two-Way Radios

### ATTENTION!

**This radio is restricted to Occupational use only.** Before using the radio, read the RF Energy Exposure and Product Safety Guide for Mobile Two-Way Radios which contains important operating instructions for safe usage and RF energy awareness and control for Compliance with applicable standards and Regulations.

For a list of Motorola Solutions-approved antennas and other accessories, visit the following website:

<http://www.motorolasolutions.com>

This page intentionally left blank.

## Software Version

All the features described in the following sections are supported by the software version **R02.08.05.0000** or later.

See [Checking Firmware and Codeplug Versions on page 205](#) to determine the software version of your radio.

Check with your dealer or system administrator for more information.

## European Union (EU) Waste of Electrical and Electronic Equipment (WEEE) directive

■ The European Union's WEEE directive requires that products sold into EU countries must have the crossed out trash bin label on the product (or the package in some cases).

As defined by the WEEE directive, this cross-out trash bin label means that customers and end-users in EU countries

should not dispose of electronic and electrical equipment or accessories in household waste.

Customers or end-users in EU countries should contact their local equipment supplier representative or service centre for information about the waste collection system in their country.

## Computer Software Copyrights

The Motorola Solutions products described in this manual may include copyrighted Motorola Solutions computer programs stored in semiconductor memories or other media. ## Handling Precautions

The MOTOTRBO Series Digital Portable radio meets IP67 specifications, allowing your radio to withstand adverse field conditions such as being submersed in water. This section describes some basic handling precautions.

### CAUTION:

Do not disassemble your radio. This could damage radio seals and result in leak paths into the radio. Radio maintenance should only be done in service depot that is equipped to test and replace the seal on the radio.

- If your radio has been submersed in water, shake your radio well to remove any water that may be trapped inside the speaker grille and microphone port. Trapped water could cause decreased audio performance.
- If your radio's battery contact area has been exposed to water, clean and dry battery contacts on both your radio and the battery before attaching the battery to radio. The residual water could short-circuit the radio.
- If your radio has been submersed in a corrosive substance (for example, saltwater), rinse radio and battery in fresh water then dry radio and battery.
- To clean the exterior surfaces of your radio, use a diluted solution of mild dishwashing detergent and fresh water (for example, one teaspoon of detergent to one gallon of water).
- Never poke the vent (hole) located on the radio chassis below the battery contact. This vent allows for pressure equalization in the radio. Doing so may create a leak path into radio and your radio's submersibility may be lost.
- Never obstruct or cover the vent, even with a label.
- Ensure that no oily substances come in contact with the vent.
- Your radio with antenna attached properly is designed to be submersible to a maximum depth of 1 m (3.28 ft) and a maximum submersion time of 30 minutes. Exceeding either maximum limit or use without antenna may result in damage to your radio.
- When cleaning your radio, do not use a high pressure jet spray on radio as this will exceed the 1 m depth pressure and may cause water to leak into your radio.

This page intentionally left blank.

## Basic Operations

This chapter explains the operations to get you started on using the radio.

### Powering Up the Radio

Follow the procedure to power up your radio.

Press the **On/Off** button.

---

If successful:

- A tone sounds.
- The green LED lights up.
- The display shows MOTOTRBO (TM), followed by a welcome message or image.
- The Home screen lights up.

If the Tones/Alerts function is disabled, there is no tone upon powering up.

Check your battery if your radio does not power up. Make sure that it is charged and properly attached. Contact your dealer if your radio still does not power up.

### Powering Off the Radio

Follow the procedure to power off your radio.

Press and hold the **On/Off** button.

The radio may take up to seven seconds to completely turn off.

The display shows Powering Down.

---

### Adjusting the Volume

Follow the procedure to change the volume level of your radio.

Do one of the following:

- Turn the **On/Off/Volume Control Knob** clockwise to increase the volume.
- Turn the **On/Off/Volume Control Knob** counterclockwise to decrease the volume.

**NOTICE:**

Your radio can be programmed to have a minimum volume offset where the volume level cannot be lowered past the programmed minimum volume. Check with your dealer or system administrator for more information.

---

# Radio Controls

This chapter explains the buttons and functions to control the radio.

- 1 On/Off/Information Button
- 2 Volume/Channel Knob
- 3 Display
- 4 Menu/OK Button
- 5 Scroll Up/Down Buttons
- 6 Speaker

- 7 Return/Home Button
- 8 Front Programmable Buttons
- 9 Accessory Connector
- 10 LED Indicators

## Volume/Channel Knob

The **Volume/Channel Knob** can be programmed for dual volume and channel control, or for volume control only.

To adjust the volume, see [Adjusting the Volume on page 37](#).

To change the channels, press and hold the **Volume/Channel Knob** until the channel selection state is displayed. Turn the **Volume/Channel Knob** to select the channel. Do one of the following to exit the channel selection state:

- Press the **Volume/Channel Knob**.
- Press  .
- Press  .
- Wait for the menu timer to expire.

## Setting Dual Knob Operation Preference

Follow the procedure to set the dual knob operation preference of the radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Dual Knob. Press  to select.

The display shows Volume Only and Volume & Channel.

---

- 5 Press  or  to the required setting. Press  to select.

A ✓ appears beside the selected settings. The screen returns to the previous menu.

---

# Keypad Microphone Buttons

You can use the 3 x 4 alphanumeric keypad on the 4-Way Navigation Keypad Microphone (Motorola Solutions part number RMN5127\_) to access your radio features. Many characters require that you press a key multiple times. The table shows the number of times a key needs to be pressed to generate the required character.

Key	Number of Times Key is Pressed												
	1	2	3	4	5	6	7	8	9	10	11	12	13
1 <small>.,?</small>	1	.	,	?	!	@	&	'	%	—	:	*	#
2 <small>ABC</small>	A	B	C	2									
3 <small>DEF</small>	D	E	F	3									
4 <small>GHI</small>	G	H	I	4									
5 <small>JKL</small>	J	K	L	5									

*Table continued...*

Key	Number of Times Key is Pressed												
	1	2	3	4	5	6	7	8	9	10	11	12	13
	M	N	O	6									
	P	Q	R	S	7								
	T	U	V	8									
	W	X	Y	Z	9								
	0		<b>NOTICE:</b> Press to enter "0" and long press to activate the CAPS lock. Another long press to turn off the CAPS lock.										
	* or del		<b>NOTICE:</b> Press during text entry to delete the character. Press during numeric entry to enter a "*".										
	# or spac e		<b>NOTICE:</b> Press during text entry to insert a space. Press during numeric entry to enter a "#".										

# WAVE

Wide Area Voice Environment (WAVE™) provides a new method of making calls between two radios.

This feature also supports calls between radios and other devices with WAVE capabilities. However, a WAVE channel must be set up to use this feature.

When in a WAVE channel, the radio is unable to receive calls from other systems and can only receive WAVE calls.

If the radio is in a WAVE channel, the radio enables Wi-Fi automatically and proceeds to log into the WAVE server. WAVE calls are made when the radio is connected to an IP network through Wi-Fi.

## NOTICE:

This feature is applicable to DM4601e only.

## Table 1: WAVE Display Icons

The following icons appear momentarily on the display when WAVE is enabled.

	<p><b>WAVE Connected</b> WAVE is connected.</p>
--	---

Table continued...

## WAVE Disconnected

WAVE is disconnected.

## Setting Active WAVE Channel

WAVE channels are configured through CPS. Follow the procedure to select the required WAVE channel.

- 1 Press to access the menu.

---

- 2 Press or to WAVE Channels. Press to select.

---

- 3 Press or to the required WAVE channel. Press to select.

---

- 4 Press or to Set As Active. Press to select.

---

The display shows beside the selected channel.

## Viewing WAVE Channel Information

Follow the procedure to view WAVE channel information.

- 1 Do one of the following:
  - Press the programmed **WAVE Channel List** button. Skip the following steps.
  - Press  to access the menu.

- 2 Press  or  to WAVE Channels. Press  to select.

- 3 Press  or  to the required WAVE channel. Press  to select.

- 4 Press  or  to View Details. Press  to select.

The display shows the WAVE channel details.

## Viewing WAVE Endpoints Information

Follow the procedure to view WAVE Endpoints information.

- 1 Do one of the following:
  - Press the programmed **Contact** button. Skip to [step 3](#).
  - Press  to access the menu.

- 2 Press  or  to Endpoints. Press  to select.

- 3 Press  or  to the required WAVE Endpoint. Press  to select.

- 4 Press  to select View Details.

The display shows the WAVE Endpoint details.

## Changing WAVE Configuration

Follow the procedure to set the WAVE server IP address, user ID, and password.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to WAVE. Press  to select.

---

- 5 Press  to select Server Address. Press  to change the server address. Press  to select.

---

- 6 Press  to User ID. Press  to change the user ID. Press  to select.

---

- 7 Press  to Password. Press  to view or change the WAVE password. Press  to select.

---

- 8 Press  to Apply. Press  to apply all the changes made.

---

The display shows the positive mini notice momentarily before returning to the Radio Settings screen.

## Making Group Calls

Follow the procedure to make group calls on a WAVE Channel.

- 1 Select the WAVE channel with the required group alias or ID.

---

- 2 Press the **PTT** button to make the call.  
The green LED lights up. The first text line displays the **Group Call** icon and alias. The second text line displays the WAVE group alias.

---

- 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
  - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled
- 

#### 4 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

---

#### 5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on prior to initiating the call.

---

## Capacity Max Operations

Capacity Max is a control channel-based trunked radio system. Features that are available to the radio users under this system are available in this chapter.

## Push-To-Talk (PTT) Button

The **PTT** button serves two basic purposes.

- While a call is in progress, the **PTT** button allows the radio to transmit to other radios in the call. The microphone is activated when the **PTT** button is pressed.
- While a call is not in progress, the **PTT** button is used to make a new call.

Press and hold the **PTT** button to talk. Release the **PTT** button to listen.

If the Talk Permit Tone or the **PTT** Sidetone is enabled, wait until the short alert tone ends before talking.

If the Channel Free Indication feature is enabled on your radio (programmed by your dealer), you will hear a short alert tone the moment the target radio (the radio that is receiving your call) releases the **PTT** button, indicating the channel is free for you to respond.

You hear a continuous Talk Prohibit Tone if your call is interrupted, for example when the radio receives an Emergency call. You should release the **PTT** button.

## Programmable Buttons

Depending on the duration of a button press, your dealer can program the programmable buttons as shortcuts to radio functions.

### Short press

Pressing and releasing rapidly.

### Long press

Pressing and holding for the programmed duration.

### NOTICE:

See [Emergency Operation on page 391](#) for more information on the programmed duration of the **Emergency** button.

## Assignable Radio Functions

The following radio functions can be assigned to the programmable buttons by your dealer or system administrator.

### **Audio Ambience**

Allows the user to select an environment the radio is operating in.

### **Audio Profiles**

Allows the user to select the preferred audio profile.

### **Bluetooth® Audio Switch**

Toggles audio routing between internal radio speaker and external Bluetooth-enabled accessory.

### **Bluetooth Connect**

Initiates a Bluetooth find-and-connect operation.

### **Bluetooth Disconnect**

Terminates all existing Bluetooth connections between your radio and any Bluetooth-enabled devices.

### **Bluetooth Discoverable**

Enables your radio to enter Bluetooth Discoverable Mode.

### **Contacts**

Provides direct access to the Contacts list.

### **Call Alert**

Provides direct access to the contacts list for you to select a contact to whom a Call Alert can be sent.

### **Call Log**

Selects the call log list.

### **Emergency**

Depending on the programming, initiates or cancels an emergency.

### **Ext Public Address (PA)**

Toggles audio routing between the connected PA loudspeaker amplifier and the internal PA system of the radio.

### **Reset Home Channel**

Sets a new home channel.

### **Silence Home Channel Reminder**

Mutes the Home Channel Reminder.

### **Indoor Location**

Toggles Indoor Location on or off.

### **Intelligent Audio**

Toggles intelligent audio on or off.

### **Manual Dial**

Initiates a Private Call by keying in any subscriber ID.

### **Manual Site Roam**

Starts the manual site search.

### **Mic AGC**

Toggles the internal microphone automatic gain control (AGC) on or off.

**Notifications**

Provides direct access to the Notifications list.

**One Touch Access**

Directly initiates a predefined Broadcast, Private, Phone or Group Call, a Call Alert, or a Quick Text message.

**Option Board Feature**

Toggles option board feature(s) on or off for option board-enabled channels.

**Phone**

Provides direct access to the Phone Contacts list.

**Privacy**

Toggles privacy on or off.

**Public Address (PA)**

Toggles the internal PA system of the radio on or off.

**Radio Alias and ID**

Provides radio alias and ID.

**Remote Monitor**

Turns on the microphone of a target radio without it giving any indicators.

**Site Info**

Displays the current Capacity Max site name and ID.

Plays site announcement voice messages for the current site when Voice Announcement is enabled.

**Site Lock**

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

**Telemetry Control**

Controls the Output Pin on a local or remote radio.

**Text Message**

Selects the text message menu.

**Trill Enhancement**

Toggles trill enhancement on or off.

**Voice Announcement On/Off**

Toggles voice announcement on or off.

**Voice Announcement for Channel**

Plays zone and channel announcement voice messages for the current channel. This function is unavailable when Voice Announcement is disabled.

**Wi-Fi**

Toggles Wi-Fi on or off.

**Zone Selection**

Allows selection from a list of zones.

## Assignable Settings or Utility Functions

The following radio settings or utility functions can be assigned to the programmable buttons.

### Tones/Alerts

Toggles all tones and alerts on or off.

### Backlight

Toggles display backlight on or off.

### Channel Up/Down

Depending on the programming, changes channel to previous or next channel.

### Display Mode

Toggles the day/night display mode on or off.

### Power Level

Toggles transmit power level between high and low.

## Accessing Programmed Functions

Follow the procedure to access programmed functions in your radio.

- Do one of the following:
  - Press the programmed button. Proceed to [step 3](#).
  - Press  to access the menu.

---
- Press  or  to the menu function, and press  to select a function or enter a sub-menu.

---

- Do one of the following:
  - Press  to return to the previous screen.
  - Long press  to return to the Home screen.

Your radio automatically exits the menu after a period of inactivity and returns to the Home screen.

The Menu Navigation Buttons are also available on a keypad microphone. See [Keypad Microphone Buttons on page 41](#).

---

## Status Indicators

This chapter explains the status indicators and audio tones used in the radio.

# Icons

The Liquid Crystal Display (LCD) of your radio shows the radio status, text entries, and menu entries.

**Table 2: Display Icons**

The following icons appear on the status bar at the top of the radio display. The icons are arranged left most in order of appearance or usage, and are channel-specific.

	<p><b>Bluetooth Connected</b> The Bluetooth feature is enabled. The icon stays lit when a remote Bluetooth device is connected.</p>
	<p><b>Bluetooth Not Connected</b> The Bluetooth feature is enabled but there is no remote Bluetooth device connected.</p>
	<p><b>Emergency</b> Radio is in Emergency mode.</p>

*Table continued...*

	<p><b>GNSS Available</b> GNSS feature is enabled. The icon stays lit when a position fix is available.</p>
	<p><b>GNSS Not Available</b> GNSS feature is enabled but is not receiving data from the satellite.</p>
	<p><b>High Volume Data</b> Radio is receiving high volume data and channel is busy.</p>
	<p><b>Indoor Location Available<sup>1</sup></b> Indoor location status is on and available.</p>
	<p><b>Indoor Location Unavailable<sup>1</sup></b> Indoor location status is on but unavailable due to Bluetooth disabled or Beacons Scan suspended by Bluetooth.</p>

*Table continued...*

<sup>1</sup> Only applicable for models with the latest software and hardware.

	<p><b>Mute Mode</b> Mute Mode is enabled and speaker is muted.</p>
	<p><b>Notification</b> Notification List has one or more missed events.</p>
	<p><b>Option Board</b> The Option Board is enabled. (Option board enabled models only)</p>
	<p><b>Option Board Non-Function</b> The Option Board is disabled.</p>
	<p><b>Over-the-Air Programming Delay Timer</b> Indicates time left before automatic restart of radio.</p>
	<p><b>Priority 1</b> Indicates Priority Talkgroup 1.</p>
	<p><b>Priority 2</b> Indicates Priority Talkgroup 2.</p>

Table continued...

	<p><b>Received Signal Strength Indicator (RSSI)</b> The number of bars displayed represents the radio signal strength. Four bars indicate the strongest signal. This icon is only displayed while receiving.</p>
	<p><b>Response Inhibit</b> Response Inhibit is enabled.</p>
	<p><b>Ring Only</b> Ringing mode is enabled.</p>
	<p><b>Secure</b> The Privacy feature is enabled.</p>
	<p><b>Silent Ring</b> Silent ring mode is enabled.</p>
	<p><b>Site Roaming</b> The site roaming feature is enabled.</p>
	<p><b>Status</b> Indicates a new status message.</p>

Table continued...

	<b>Tones Disable</b> Tones are turned off.
	<b>Unsecure</b> The Privacy feature is disabled.
	<b>Wi-Fi Excellent<sup>2</sup></b> Wi-Fi signal is excellent.
	<b>Wi-Fi Good<sup>2</sup></b> Wi-Fi signal is good.
	<b>Wi-Fi Average<sup>2</sup></b> Wi-Fi signal is average.
	<b>Wi-Fi Poor<sup>2</sup></b> Wi-Fi signal is poor.
	<b>Wi-Fi Unavailable<sup>2</sup></b> Wi-Fi signal is unavailable.

**Table 3: Advance Menu Icons**

The following icons appear beside menu items that offer a choice between two options or as an indication that there is a sub-menu offering two options.

	<b>Checkbox (Checked)</b> Indicates that the option is selected.
	<b>Checkbox (Empty)</b> Indicates that the option is not selected.
	<b>Solid Black Box</b> Indicates that the option selected for the menu item with a sub-menu.

<sup>2</sup> Only applicable for DM4601e.

**Table 4: Bluetooth Device Icons**

The following icons appear next to items in the list of Bluetooth-enabled devices available to indicate the device type.

	<b>Bluetooth Audio Device</b> Bluetooth-enabled audio device, such as a headset.
	<b>Bluetooth Data Device</b> Bluetooth-enabled data device, such as a scanner.
	<b>Bluetooth PTT Device</b> Bluetooth-enabled PTT device, such as a PTT-Only Device (POD).

**Table 5: Call Icons**

The following icons appear on the display during a call. These icons also appear in the Contacts list to indicate alias or ID type.

	<b>Bluetooth PC Call</b> Indicates a Bluetooth PC Call in progress.
---	--

*Table continued...*

	In the Contacts list, it indicates a Bluetooth PC Call alias (name) or ID (number).
	<b>Dispatch Call</b> The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.
	<b>Group Call/All Call</b> Indicates a Group Call or All Call in progress.  In the Contacts list, it indicates a group alias (name) or ID (number).
	<b>Private Call</b> Indicates a Private Call in progress.  In the Contacts list, it indicates a subscriber alias (name) or ID (number).
	<b>Phone Call as Group/All Call</b> Indicates a Phone Call as Group Call or All Call in progress.

*Table continued...*

	In the Contacts list, it indicates a group alias (name) or ID (number).
	<b>Phone Call as Private Call</b> Indicates a Phone Call as Private Call in progress.  In the Contacts list, it indicates a phone alias (name) or ID (number).

**Table 6: Job Tickets Icons**

The following icons appear momentarily on the display in the Job Ticket folder.

	<b>All Jobs</b> Indicates all jobs listed.
	<b>New Jobs</b> Indicates new jobs.
	<b>In Progress</b> Jobs are transmitting. This is seen before indication for Job Tickets Send Failed or Sent Successfully.

*Table continued...*

	<b>Send Failed</b> Jobs cannot be sent.
	<b>Sent Successfully</b> Jobs have been successfully sent.
	<b>Priority 1</b> Indicates Priority Level 1 for jobs.
	<b>Priority 2</b> Indicates Priority Level 2 for jobs.
	<b>Priority 3</b> Indicates Priority Level 3 for jobs.

**Table 7: Mini Notice Icons**

The following icons appear momentarily on the display after an action to perform a task is taken.

	<b>Failed Transmission (Negative)</b> Failed action taken.
	<b>Successful Transmission (Positive)</b> Successful action taken.

*Table continued...*

### Transmission in Progress (Transitional)

Transmitting. This is seen before indication for Successful Transmission or Failed Transmission.

**Table 8: Sent Items Icons**

The following icons appear at the top right corner of the display in the Sent Items folder.

### In Progress

The text message to a subscriber alias or ID is pending transmission, followed by waiting for acknowledgement.

The text message to a group alias or ID is pending transmission.

### Individual or Group Message Read

The text message has been read.

### Individual or Group Message Unread

The text message has not been read.

### Send Failed

The text message cannot be sent.

### Sent Successfully

The text message has been successfully sent.

## LED Indicator

The LED indicator shows the operational status of your radio.

### Blinking Red

Radio has failed the self-test upon powering up.

Radio is receiving an emergency transmission.

Radio is transmitting in low battery state.

*Table continued...*

Radio has moved out of range if Auto-Range Transponder System is configured.

Mute Mode is enabled.

### **Solid Green**

Radio is powering up.

Radio is transmitting.

Radio is sending a Call Alert or an emergency transmission.

### **Blinking Green**

Radio is receiving a call or data.

Radio is retrieving Over-the-Air Programming transmissions over the air.

Radio is detecting activity over the air.

#### **NOTICE:**

This activity may or may not affect the programmed channel of the radio due to the nature of the digital protocol.

### **Double Blinking Green**

Radio is receiving a privacy-enabled call or data.

### **Solid Yellow**

Radio is in Bluetooth Discoverable Mode.

### **Blinking Yellow**

Radio has yet to respond to a Call Alert.

### **Double Blinking Yellow**

Radio has Auto Roaming enabled.

Radio is actively searching for a new site.

Radio has yet to respond to a Group Call Alert.

Radio is locked.

## **Tones**

The following are the tones that sound through on the radio speaker.

High Pitched Tone

Low Pitched Tone

## **Audio Tones**

Audio tones provide you with audible indications of the status, or response to data received on the radio.

### Continuous Tone

A monotone sound. Sounds continuously until termination.

### Periodic Tone

Sounds periodically depending on the duration set by the radio. Tone starts, stops, and repeats itself.

### Repetitive Tone

A single tone that repeats itself until it is terminated by the user.

### Momentary Tone

Sounds once for a short duration set by the radio.

## Indicator Tones

Indicator tones provide you with audible indications of the status after an action to perform a task is taken.

Positive Indicator Tone

Negative Indicator Tone

## Registration

There are a number of registration-related messages that you may receive.

### Registering

Typically, registration is sent to the system during power-up, Talkgroup change, or during site roaming. If a radio fails registration on a site, the radio automatically attempts to roam to another site. The radio temporarily removes the site where registration was attempted from the roaming list.

The indication means that the radio is busy searching for a site to roam, or that the radio has found a site successfully but is waiting for a response to the registration messages from the radio.

When `Registering` is displayed on the radio, a tone sounds and the yellow LED double flashes to indicate a site search.

If the indications persist, the user should change locations or if allowed, manually roam to another site.

## Out of Range

A radio is deemed to be out of range when the radio is unable to detect a signal from the system or from the current site. Typically, this indication means that the radio is outside of the geographic outbound radio frequency (RF) coverage range.

When `Out of Range` is displayed on the radio, a repetitive tone sounds and the red LED flashes.

Contact your dealer or system administrator if the radio still receives out of range indications while being in an area with good RF coverage.

## Talkgroup Affiliation Failed

A radio tries to affiliate to the Talkgroup specified in the channels or Unified Knob Position (UKP) during registration.

A radio that is in affiliation fail state is unable to make or receive calls from the Talkgroup that the radio is trying to affiliate to.

When a radio fails to affiliate with a Talkgroup, `UKP Alias` is displayed in the home screen with a highlighted background.

Contact your dealer or system administrator if the radio receives affiliation failure indications.

## Register Denied

Registration denied indicators are received when the registration with the system is not accepted.

The radio does not indicate to the radio user the specific reason the registration was denied. Normally, a registration is denied when the system operator has disabled the access of the radio to the system.

When a radio is denied registration, `Register Denied` is displayed on the radio and the yellow LED double flashes to indicate a site search.

## Zone and Channel Selections

This chapter explains the operations to select a zone or channel on your radio.

The radio can be programmed with a maximum of 250 Capacity Max Zones with a maximum of 160 Channels per zone. Each Capacity Max zone contains a maximum of 16 assignable positions.

## Selecting Zones

Follow the procedure to select the required zone on your radio.

- 1 Do one of the following:
  - Press the programmed **Zone Selection** button. Proceed to [step 3](#).
  - Press  to access the menu.

- 2 Press  or  to Zone. Press  to select. The display shows  and the current zone.

- 3 Press  or  to the required zone. Press  to select. The display shows <Zone> Selected momentarily and returns to the selected zone screen.

## Selecting Zones by Using the Alias Search

Follow the procedure to select the required zone on your radio by using the alias search.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Zone. Press  to select. The display shows  and the current zone.
- 
- 3 Enter the first character of the required alias. The display shows a blinking cursor.
- 
- 4 Enter the rest of the characters of the required alias. The alias search is case-insensitive. If there are two or more entries with the same name, the display shows the entry listed first in the list. The first text line shows the characters you entered. The following text lines show the shortlisted search results.
-

5 Press  to select.

The display shows <Zone> Selected momentarily and returns to the selected zone screen.

---

## Selecting a Call Type

Use the Channel Selector Knob to select a call type. This can be a Group Call, Broadcast Call, All Call, or Private Call, depending on how your radio is programmed. If you change the Channel Selector Knob to a different position (that has a call type assigned to it), this causes the radio to re-register with the Capacity Max System. The radio registers with the Talkgroup ID that has been programmed for the new Channel Selector Knob position call type.

Your radio does not operate when selected to an unprogrammed channel, use the Channel Selector Knob to select a programmed channel instead.

Once the required zone is displayed (if you have multiple zones in your radio), turn the programmed Channel Selector Knob to select the call type.

---

## Selecting a Site

A site provides coverage for a specific area. In a multi-site network, the Capacity Max radio will automatically search for a new site when the signal level from the current site drops to an unacceptable level.

The Capacity Max system can support up to 250 sites.

## Roam Request

A Roam Request tells the radio to search for a different site, even if the signal from the current site is acceptable.

If there are no sites available:

- The radio display shows Searching and continues to search through the list of sites.
- The radio will return to the previous site, if the previous site is still available.

**NOTICE:**

This is programmed by your dealer.

Press the programmed **Manual Site Roam** button.

You hear a tone, indicating the radio has switched to a new site. The display shows `Site ID <Site Number>`.

---

## Site Lock On/Off

When toggled on, the radio searches the current site only.  
When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.

- The display shows `Site Unlocked`.
- 

## Site Restriction

In Capacity Max system, your radio administrator has the ability to decide which network sites your radio is and is not allowed to use.

The radio does not have to be reprogrammed to change the list of allowed and disallowed sites. If your radio attempts to register at a disallowed site, your radio receives indication that the site is denied. The radio then searches for a different network site.

When experiencing site restrictions, your radio displays `Register Denied` and the yellow LED double flashes to indicate a site search.

## Site Trunking

A site must be able to communicate with the Trunk Controller to be considered as System Trunking.

If the site cannot communicate with the Trunk Controller in the system, a radio enters Site Trunking mode. While in Site Trunking, the radio provides a periodic audible and

visual indication to the user to inform the user of their limited functionality.

When a radio is in Site Trunking, the radio displays `Site Trunking` and a repetitive tone sounds.

The radios in Site Trunking are still able to make group and individual voice calls as well as send text messages to other radios within the same site. Voice consoles, logging recorders, phone gateways, and data applications cannot communicate to the radios at the site.

Once in Site Trunking, a radio that is involved in calls across multiple sites will only be able to communicate with other radios within the same site. Communication to and from other sites would be lost.

**NOTICE:**

If there are multiple sites that cover the current location of the radio and one of the sites enters Site Trunking, the radio roams to another site if within coverage.

## Calls

This chapter explains the operations to receive, respond to, make, and stop calls.

You can select a subscriber alias or ID, or group alias or ID after you have selected a channel by using one of these features:

### Alias Search

This method is used for Group, Private, and All Calls only with a keypad microphone.

### Contacts List

This method provides direct access to the Contacts list.

### Manual Dial (by using Contacts)

This method is used for Private and Phone Calls only with a keypad microphone.

### Programmed Number Keys

This method is used for Group, Private, and All Calls only with a keypad microphone.

**NOTICE:**

You can only have one alias or ID assigned to a number key, but you can have more than one number key associated to an alias or ID. All the number keys on a keypad microphone can be assigned. See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

### Programmed One Touch Access Button

This method is used for Group, Private, and Phone Calls only.

You can only have one ID assigned to a **One Touch Access** button with a short or long programmable button press. Your radio can have multiple **One Touch Access** buttons programmed.

### Programmable Button

This method is used for Phone Calls only.

### Volume/Channel Selector Knob

This method manually selects a subscriber alias or ID, or group alias or ID.

The LED lights up solid green while the radio is transmitting and blinks green when the radio is receiving.

#### NOTICE:

The LED lights up solid green while the radio is transmitting and double blinks green when the radio is receiving a privacy-enabled call.

To unscramble a privacy-enabled call, your radio must have the same Privacy Key, or the same Key Value and Key ID (programmed by your dealer), as the transmitting radio (the radio you are receiving the call from).

See [Privacy on page 426](#) for more information.

## Group Calls

Your radio must be configured as part of a group to receive a call from or make a call to the group of users.

## Making Group Calls

To make a call to a group of users, your radio must be configured as part of that group. Follow the procedure to make Group Calls on your radio.

- 1 Do one of the following:
  - Select a channel with the active group alias or ID. See [Selecting a Call Type on page 61](#).
  - Press the programmed **One Touch Access** button.

---
- 2 Press the **PTT** button to make the call.  
The green LED lights up. The first text line shows the **Group Call** icon and alias.

---
- 3 Do one of the following:
  - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

#### 4 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

- #### 5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

The call initiator can press  to end a Group Call.

## Making Group Calls by Using the Contacts List

Follow the procedure to make Group Calls on your radio by using the Contacts list.

- #### 1 Press to access the menu.

- #### 2 Press or to **Contacts**. Press to select.

- #### 3 Press or to the required alias or ID. Press to select.

- #### 4 Press the **PTT** button to make the call.

The green LED lights up.

The first line displays the subscriber alias or ID. The second line displays **Group Call** and the **Group Call** icon.

- #### 5 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

- 6 Release the **PTT** button to listen.

The green LED blinks when any user in the group responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

---

- 7 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

The call initiator can press  to end the Group Call.

You hear a short tone. The display shows `Call Ended`.

---

## Making Group Calls by Using the Programmable Number Key

Follow the procedure to make Group Calls on your radio by using the programmable number key.

- 1 Long press the programmed number key to the predefined alias or ID when you are on the Home screen.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

A negative indicator tone sounds if the number key is not associated to an entry.

---

- 2 Press the **PTT** button to make the call.

The green LED lights up.

---

- 3 Release the **PTT** button to listen.

The green LED blinks when any user in the group responds.

---

- 4 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on before initiating the call.

The call initiator can press  to end the Group Call.

See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

## Making Group Calls by Using the Alias Search

You can also use alias or alphanumeric search to retrieve the required subscriber alias. This feature is only applicable while in Contacts. Follow the procedure to make any calls by using the alias search.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.  
The display shows the entries in alphabetical order.

---

- 3 Press  or  to the required subscriber alias or ID. The first line of the display shows Phone Number: . The second line of the display shows a blinking cursor. Use the keypad to enter a telephone number.

---

- 4 Press  to select. If the entry selected is empty, a negative indicator tone sounds and the display shows Phone Call Invalid #.

---

- 5 Press  or  to Call Phone and Press  to select. If the access code was not preconfigured in the Contacts list, the first line of the display shows Access Code: . The second line of the display shows a blinking cursor. Enter the access code and press the  button to proceed. If successful, the DTMF tone sounds. You hear the dialing tone of the telephone user. The first line of the display shows the subscriber alias or ID, and the RSSI icon. The second line of the display shows Phone Call and the Phone Call icon. If unsuccessful, a tone sounds and the display shows Phone Call Failed. Your radio returns to the Access Code input screen. If the access code was preconfigured in the Contacts list,

the radio returns to the screen you were on prior to initiating the call.

- 
- 6 Press the **PTT** button to talk and release it to listen. The **RSSI** icon disappears during transmission.
- 
- 7 To enter extra digits, if requested by the Phone Call, do one of the following.
- Press any keypad key to begin the input of the extra digits. The first line of the display shows `Extra Digits:`. The second line of the display shows a blinking cursor. Enter the extra digits and press the  button to proceed. The DTMF tone sounds and the radio returns to the previous screen.
  - Press **One Touch Access** button. The DTMF tone sounds. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.
- 
- 8 Press  to end the call. If deaccess code was not preconfigured in the Contacts list, the first line of the display shows `De-Access Code:`. The second line of the display shows a blinking cursor. Enter the

deaccess code and press  to proceed. The radio returns to the previous screen. The DTMF tone sounds and the display shows `Ending Phone Call`. If successful, a tone sounds and the display shows `Phone Call Ended`. Your radio returns to the Phone Call screen. If unsuccessful, your radio returns to the Phone Call screen. When you press the **PTT** button while in the Phone Contacts screen, as tone sounds and the display shows `Press OK to Place Phone Call`. When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`. If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on prior to initiating the call.

- 
- 9 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

The call initiator can press  to end the Group Call.

#### NOTICE:

During the channel access, press  to dismiss the call attempt and a tone sounds button or to exit

alias search. Press  button or  to exit alias search. During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call. During channel access and access/deaccess code or extra digits transmission, you radio responds to On/Off button, Volume Knob, and Channel Rocker only. A tone sounds for every invalid input.

## Responding to Group Calls

Follow the procedure to respond to Group Calls on your radio.

When you receive a Group Call:

- The green LED blinks.

- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias.
- The second text line displays the group call alias.
- Your radio unmutes and the incoming call sounds through the speaker.

#### 1 Do one of the following:

- If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.
- If the Voice Interrupt feature is enabled, press the **PTT** button to interrupt the audio from the transmitting radio and free the channel for you to respond.

The green LED lights up.

#### 2 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.
- 

### 3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period.

---

## Broadcast Call

A Broadcast Call is a one-way voice call from any user to an entire talkgroup.

The Broadcast Call feature allows only the call initiating user to transmit to the talkgroup, while the recipients of the call cannot respond.

The broadcast initiator can also end the broadcast call. To receive a call from a group of users, or to call a group of users, the radio must be configured as part of a group.

## Making Broadcast Calls

Follow the procedure to make Broadcast Calls on your radio.

### 1 Do one of the following:

- Select a channel with the active group alias or ID. See [Selecting a Call Type on page 61](#).
  - Press the programmed **One Touch Access** button.
- 

### 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and alias.

---

### 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

The call initiator can press  to end the Broadcast Call.

---

## Making Broadcast Calls Using the Contact List

Follow the procedure to make Broadcast Calls on your radio using the Contacts list.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to the required alias or ID.  
Press  to select.

---

- 4 Press the **PTT** button to make the call.  
The green LED blinks.  
The first line displays the subscriber alias or ID. The second line displays **Group Call** and the **Group Call** icon.

---

- 5 Do one of the following:
  - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
  - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

The call initiator can press  to end the Broadcast Call.

## Making Broadcast Calls Using the Programmable Number Key

Follow the procedure to make Broadcast Calls on your radio using the programmable number key.

- 1 Long press the programmed number key to the predefined alias or ID when you are on the Home screen.  
  
If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.  
  
A negative indicator tone sounds if the number key is not associated to an entry.

---

- 2 Press the **PTT** button to make the call.  
  
The green LED lights up. The display shows the **Group Call** icon at the top right corner. The first text line shows the caller alias.

- 3 Do one of the following:
- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
  - Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

The call initiator can press  to end the Broadcast Call.

---

## Receiving Broadcast Calls

Follow the procedure to receive a Broadcast Call on your radio.

When you receive a Broadcast Call:

- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias.
- The second text line displays the group call alias.
- Your radio unmutes and the incoming call sounds through the speaker.

### NOTICE:

Recipient users are not allowed to Talkback during a Broadcast Call. The display shows **Talkback Prohibit**. The Talkback Prohibit Tone will sound momentarily if the **PTT** button is pressed during a Broadcast Call.

## Private Call

A Private Call is a call from an individual radio to another individual radio.

There are two ways to set up a Private Call.

- The first call type is called Off Air Call Set-Up (OACSU). OACSU sets up the call after performing a radio presence check and completes the call automatically.
- The second type is called Full Off Air Call Set-Up (FOACSU). FOACSU also sets up the call after performing a radio presence check. However, FOACSU calls require user acknowledgment to complete the call and allows the user to either Accept or Decline the call.

The type of call is configured by the system administrator.

**NOTICE:**

Both the call initiator and recipient are able to terminate an on-going Private Call by pressing

## Making Private Calls

Your radio must be programmed for you to initiate a Private Call. If this feature is not enabled, you hear a negative indicator tone when you initiate the call. Follow the procedure to make Private Calls on your radio. If the target radio is not available, a short tone sounds and the display show `Party Not Available`.

- 1 Do one of the following:
  - Select a channel with the active subscriber alias or ID. See [Selecting a Call Type on page 61](#).
  - Press the programmed **One Touch Access** button.

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Private Call** icon, the subscriber alias, and call status.

- 3 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

- 4 Release the **PTT** button to listen.

The green LED lights up when the target radio responds.

- 5 The call ends when there is no voice activity for a predetermined period. You will hear a short tone. The display shows `Call Ended`.

Both the call initiator and recipient are able to

terminate an on-going Private Call by pressing .

## Making Private Calls by Using the Programmable Number Key

Follow the procedure to make Private Calls on your radio by using the programmable number key.

- 1 Long press the programmed number key to the predefined alias or ID when you are on the Home screen.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

A negative indicator tone sounds if the number key is not associated to an entry.

---

### 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Private Call** icon at the top right corner. The first text line shows the caller alias. The second text line shows the call status.

---

### 3 Release the **PTT** button to listen.

The green LED blinks when the target radio responds. The display shows the destination alias.

---

### 4 The call ends when there is no voice activity for a predetermined period. You will hear a short tone. The display shows `Call Ended`.

Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

## Making Private Calls by Using the Alias Search

---

### 1 Press to access the menu.

---

### 2 Press or to `Contacts`. Press to select.

The display shows the entries in alphabetical order.

---

### 3 Press or to the required subscriber alias or ID. The first line of the display shows `Phone Number:`. The second line of the display shows a blinking cursor. Use the keypad to enter a telephone number.

---

### 4 Press to select. If the entry selected is empty, a negative indicator tone sounds and the display shows `Phone Call Invalid #`.

---

### 5 Press or to `Call Phone` and Press to select. If the access code was not preconfigured

in the Contacts list, the first line of the display shows `Access Code:`. The second line of the display shows a blinking cursor. Enter the access code and

press the  button to proceed. If successful, the DTMF tone sounds. You hear the dialing tone of the telephone user. The first line of the display shows the subscriber alias or ID, and the **RSSI** icon. The second line of the display shows `Phone Call` and the **Phone Call** icon. If unsuccessful, a tone sounds and the display shows `Phone Call Failed`. Your radio returns to the Access Code input screen. If the access code was preconfigured in the Contacts list, the radio returns to the screen you were on before initiating the call.

- 
- 6 Press the **PTT** button to talk and release it to listen. The **RSSI** icon disappears during transmission.
- 
- 7 To enter extra digits, if requested by the Phone Call, do one of the following.
- Press any keypad key to begin the input of the extra digits. The first line of the display shows `Extra Digits:`. The second line of the display shows a blinking cursor. Enter the extra digits and press the  button to proceed. The DTMF

tone sounds and the radio returns to the previous screen.

- Press **One Touch Access** button. The DTMF tone sounds. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

- 
- 8 Press  to end the call. If deaccess code was not preconfigured in the Contacts list, the first line of the display shows `De-Access Code:`. The second line of the display shows a blinking cursor. Enter the deaccess code and press  to proceed. The radio returns to the previous screen. The DTMF tone sounds and the display shows `Ending Phone Call`. If successful, a tone sounds and the display shows `Phone Call Ended`. Your radio returns to the Phone Call screen. If unsuccessful, your radio returns to the Phone Call screen. When you press the **PTT** button while in the Phone Contacts screen, as tone sounds and the display shows `Press OK to Place Phone Call`. When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`. If the call ends while you are entering the extra digits

requested by the Phone Call, your radio returns to the screen you were on before initiating the call.

- 9 The call ends when there is no voice activity for a predetermined period. You will hear a short tone. The display shows `Call Ended`.

Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

#### NOTICE:

During the channel access, press  to dismiss the call attempt and a tone sounds button or to exit

alias search. Press  button or  to exit alias search. During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

## Making a Private Call with a One Touch Call Button

The One Touch Call feature allows you to easily make a Private Call to a pre-defined Private Call alias or ID. This

feature can be assigned to a short or long programmable button press.

You can only have one alias or ID assigned to a One Touch Call button. Your radio can have multiple One Touch Call buttons programmed.

- 1 Press the programmed **One Touch Call** button to make a Private Call to the pre-defined Private Call alias or ID.

- 2 Press the **PTT** button to make the call.

The LED lights up solid green.

The display shows the Private Call alias or ID.

- 3 Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.

- 4 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends.

Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

## Making Private Calls by Using the Manual Dial

Follow the procedure to make Private Calls on your radio by using the manual dial.

- 1 Press  to access the menu.

---

- 2 Press  or  to **Contacts**. Press  to select.

---

- 3 Press  or  to **Manual Dial**. Press  to select.

---

- 4 Press  or  to **Radio Number**. Press  to select.

---

- 5 Do one of the following:

- Enter the subscriber ID, and press  to proceed.
- Edit the previously dialed subscriber ID, and press  to proceed.

- 6 Press the **PTT** button to make the call.  
The green LED lights up. The display shows the destination alias.

---

- 7 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

---

- 8 Release the **PTT** button to listen.  
The green LED lights up when the target radio responds. The display shows the transmitting user alias or ID.

---

- 9 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows **Call Ended**.

Both the call initiator and recipient are able to terminate an on-going Private Call by pressing .

---

## Receiving Private Calls

When you receive Private Calls configured as Off Air Call Set-Up (OACSU):

- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

### NOTICE:

Depending on how your radio is configured, either OACSU or Full Off Air Call Set-Up (FOACSU), responding to Private Calls may or may not require user acknowledgment.

For the OACSU configuration, your radio unmutes and the call connects automatically.

## Accepting Private Calls

When you receive Private Calls configured as Full Off Air Call Set-Up (FOACSU):

- The green LED blinks.
- 1 To accept a Private Call configured as FOACSU, do one of the following:
    - Press  or  to Accept and press  to answer a Private Call.
    - Press the **PTT** button on any entry.

The green LED lights up.

- 
- 2 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
-

### 3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows **Call Ended**.

#### **NOTICE:**

Both the call initiator and recipient are able to terminate an on-going Private Call by

pressing .

## Declining Private Calls

When you receive Private Calls configured as Full Off Air Call Set-Up (FOACSU):

- The green LED blinks.

To decline a Private Call configured as FOACSU, do one of the following:

- Press  or  to **Reject** and press  to decline a Private Call.
- Press  to decline a Private Call.

## All Calls

An All Call is a call from an individual radio to every radio on the site or every radio at a group of sites, depending on system configuration.

An All Call is used to make important announcements, requiring full attention from the user. The users on the system cannot respond to an All Call.

Capacity Max supports Site All Call and Multi-site All Call. The system administrator may configure one or both of these in your radio.

#### **NOTICE:**

Subscribers can support System-Wide All Calls but Motorola Solutions infrastructure does not support System-Wide All Calls.

## Making All Calls

Your radio must be programmed for you to make an All Call. Follow the procedure to make All Calls on your radio.

- Select a channel with the active All Call group alias or ID. See [Selecting a Call Type on page 61](#).

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration.

---

- 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

Users on the channel cannot respond to an All Call.

The call initiator can press  to end the All Call.

---

## Making All Calls by Using the Programmable Number Key

Follow the procedure to make All Calls on your radio by using the programmable number key.

- 1 Long press the programmed number key assigned to the predefined alias or ID when you are on the Home screen.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

A negative indicator tone sounds if the number key is not associated to an entry.

---

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration.

---

- 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

The call initiator can press  to end the All Call.

---

See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

## Making All Calls by Using the Alias Search

- 1 Press  to access the menu.

---

- 2 Press  or  to `Contacts`. Press  to select.  
The display shows the entries in alphabetical order.

---

- 3 Press  or  to the required subscriber alias or ID. The first line of the display shows `Phone Number:`. The second line of the display shows a blinking cursor. Use the keypad to enter a telephone number.

---

- 4 Press  to select. If the entry selected is empty, a negative indicator tone sounds and the display shows `Phone Call Invalid #`.

---

- 5 Press  or  to `Call Phone`. Press  to select. If the access code was not preconfigured in

the `Contacts` list, the first line of the display shows `Access Code:`. The second line of the display shows a blinking cursor. Enter the access code and

press the  button to proceed. If successful, the DTMF tone sounds. You hear the dialing tone of the telephone user. The first line of the display shows the subscriber alias or ID, and the RSSI icon. The second line of the display shows `Phone Call` and the `Phone Call` icon. If unsuccessful, a tone sounds and the display shows `Phone Call Failed`. Your radio returns to the `Access Code` input screen. If the access code was preconfigured in the `Contacts` list, the radio returns to the screen you were on prior to initiating the call.

- 6 Press the **PTT** button to talk and release it to listen. The RSSI icon disappears during transmission.

---

- 7 To enter extra digits, if requested by the `Phone Call`, do one of the following.
  - Press any keypad key to begin the input of the extra digits. The first line of the display shows `Extra Digits:`. The second line of the display shows a blinking cursor. Enter the extra digits and press the  button to proceed. The DTMF

tone sounds and the radio returns to the previous screen.

- Press **One Touch Access** button. The DTMF tone sounds. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

8

Press  to end the call. If deaccess code was not preconfigured in the Contacts list, the first line of the display shows `De-Access Code:`. The second line of the display shows a blinking cursor. Enter the

deaccess code and press  to proceed. The radio returns to the previous screen. The DTMF tone sounds and the display shows `Ending Phone Call`. If successful, a tone sounds and the display shows `Phone Call Ended`. Your radio returns to the Phone Call screen. If unsuccessful, your radio returns to the Phone Call screen. When you press the **PTT** button while in the Phone Contacts screen, a tone sounds and the display shows `Press OK to Place Phone Call`. When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`. If the call ends while you are entering the extra digits

requested by the Phone Call, your radio returns to the screen you were on prior to initiating the call.

#### NOTICE:

The call initiator can press  to end the All Call.

## Receiving All Calls

When you receive an All Call, the following occur:

- A tone sounds.
- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias ID.
- The second text line displays either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration.
- Your radio unmutes and the incoming call sounds through the speaker.

The radio returns to the screen before receiving the All Call when the call ends.

If the Channel Free Indication feature is enabled, you hear a short alert tone when the transmitting radio releases the

**PTT** button, indicating the channel is free for you to use. You cannot respond to an All Call.

**NOTICE:**

The radio stops receiving the All Call if you switch to a different channel while receiving the call. You are not able to continue with any menu navigation or editing until the call ends during an All Call.

## Phone Calls

A Phone Call is a call from an individual radio to a telephone.

In Capacity Max, your radio is able to receive calls and talkback even if the Phone Call capability is disabled.

The Phone Call capability can be enabled by assigning and setting up phone numbers on the system. Check with your system administrator to determine how your radio has been programmed.

## Making Phone Calls

Follow the procedure to make Phone Calls on your radio.

- 1 Press the programmed **One Touch Access** button to the predefined alias or ID.

If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

If the access code is not preconfigured in the Contact List, the display shows `Access Code:`.

- 
- 2 Enter the access code, and press  to proceed.  
The access or deaccess code cannot be more than 10 characters.

---

  - 3 Press the **PTT** button to respond to the call.

---

  - 4 Release the **PTT** button to listen.

---

  - 5 Enter extra digits with the keypad if requested by the call, and press  to proceed.  
If the call ends while you are entering the extra digits requested by the call, your radio returns to the screen you were on before initiating the call.  
The DTMF Tone sounds. Your radio returns to the previous screen.

---

  - 6 Press  to end the call.

---

## 7 Do one of the following:

- If the deaccess code was not preconfigured, enter the deaccess code when the display shows De-Access Code:, and press  to proceed. The radio returns to the previous screen.
- Press the programmed **One Touch Access** button. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

The DTMF Tone sounds and the display shows Ending Phone Call.

If the call ends successfully:

- A tone sounds.
- The display shows Call Ended.

If the call fails to end, the radio returns to the Phone Call screen. Repeat the last two steps or wait for the telephone user to end the call.

## Making Phone Calls by Using the Contacts List

Follow the procedure to make Phone Calls on your radio by using the Contacts list.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Contacts. Press  to select.  
The display shows the entries in alphabetical order.
- 
- 3 Press  or  to the required alias or ID.  
Press  to select.  
When you press the **PTT** button while on the Phone Contacts screen:
    - The first line of the display shows Phone Number:.
    - The second line of the display shows a blinking cursor.
 If the selected entry is empty:

- A negative indicator tone sounds.
- The display shows Phone Call Invalid #.

---

4 Press  or  to Call Phone. Press  to select.

The display shows Access Code: if the access code was not preconfigured.

---

5 Enter the access code, and press  to proceed.

The access or deaccess code cannot be more than 10 characters.

The first text line shows Calling. The second text line shows the subscriber alias or ID, and the **Phone Call** icon.

If the call is successful:

- The DTMF Tone sounds.
- You hear the dialing tone of the telephone user.
- The first text line shows the subscriber alias or ID, and the **RSSI** icon.
- The second text line shows Phone Call, and the **Phone Call** icon.

[Send Feedback](#)

If the call is unsuccessful:

- A tone sounds.
- The display shows Phone Call Failed and then, Access Code:.
- Your radio returns to the screen you were on prior to initiating the call if the access code has been preconfigured in the Contacts list.

---

6 Press the **PTT** button to respond to the call.

The **RSSI** icon disappears.

---

7 Release the **PTT** button to listen.

---

8 Enter extra digits with the keypad if requested by the call, and press  to proceed.

If the call ends while you are entering the extra digits requested by the call, your radio returns to the screen you were on prior to initiating the call.

The DTMF Tone sounds. Your radio returns to the previous screen.

9 Press  to end the call.

10 If the deaccess code was not preconfigured, enter the deaccess code when the display shows De-

Access Code:, and press  to proceed.

The radio returns to the previous screen. The DTMF Tone sounds and the display shows Ending Phone Call.

If the call ends successfully:

- A tone sounds.
- The display shows Call Ended.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 9](#) and [step 10](#), or wait for the telephone user to end the call. When you press the PTT button while in the Phone Contacts screen, a tone sounds and the display shows Press OK to Place Phone Call.

When the telephone user ends the call, a tone sounds and the display shows Phone Call Ended.

If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on prior to initiating the call.

#### NOTICE:

During the channel access, press  to dismiss the call attempt and a tone sounds.

During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

During channel access and access/deaccess code or extra digits transmission, your radio responds to **On/Off** button, **Volume Knob**, and **Channel Rocker** only. A tone sounds for every invalid input.

## Making Phone Calls by Using the Alias Search

You can also use alias or alphanumeric search to retrieve the required subscriber alias. This feature is only applicable while in Contacts. Follow the procedure to make Phone Calls on your radio by using the alias search.

- 1 Press  to access the menu.

---

- 2 Press  or  to **Contacts**. Press  to select.  
The display shows the entries in alphabetical order.

---

- 3 Press  or  to the required subscriber alias or ID. The first line of the display shows **Phone Number:**. The second line of the display shows a blinking cursor. Use the keypad to enter a telephone number.

---

- 4 Press  to select. If the entry selected is empty, a negative indicator tone sounds and the display shows **Phone Call Invalid #**.

---

- 5 Press  or  to **Call Phone** and Press  to select. If the access code was not preconfigured in the **Contacts** list, the first line of the display shows **Access Code:**. The second line of the display shows a blinking cursor. Enter the access code and

press the  button to proceed. If successful, the DTMF tone sounds. You hear the dialing tone of the telephone user. The first line of the display shows the subscriber alias or ID, and the **RSSI** icon. The second line of the display shows **Phone Call** and the **Phone Call** icon. If unsuccessful, a tone sounds and the display shows **Phone Call Failed**. Your radio returns to the **Access Code** input screen. If the access code was preconfigured in the **Contacts** list, the radio returns to the screen you were on prior to initiating the call.

- 6 Press the **PTT** button to talk and release it to listen. The **RSSI** icon disappears during transmission.

---

- 7 To enter extra digits, if requested by the **Phone Call**, do one of the following.
  - Press any keypad key to begin the input of the extra digits. The first line of the display shows **Extra Digits:**. The second line of the display shows a blinking cursor. Enter the extra digits  
and press the  button to proceed. The DTMF tone sounds and the radio returns to the previous screen.

- Press **One Touch Access** button. The DTMF tone sounds. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

- 
- 8 Press  to end the call. If deaccess code was not preconfigured in the Contacts list, the first line of the display shows `De-Access Code:`. The second line of the display shows a blinking cursor. Enter the deaccess code and press  to proceed. The radio returns to the previous screen. The DTMF tone sounds and the display shows `Ending Phone Call`. If successful, a tone sounds and the display shows `Phone Call Ended`. Your radio returns to the Phone Call screen. If unsuccessful, your radio returns to the Phone Call screen. When you press the **PTT** button while in the Phone Contacts screen, as tone sounds and the display shows `Press OK to Place Phone Call`. When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`. If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on prior to initiating the call.
- 

#### NOTICE:

During the channel access, press  to dismiss the call attempt and a tone sounds button or to exit

alias search. Press  button or  to exit alias search. During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call. During channel access and access/deaccess code or extra digits transmission, you radio responds to On/Off button, Volume Knob, and Channel Rocker only. A tone sounds for every invalid input.

## Making Phone Calls by Using the Manual Dial

Follow the procedure to make Phone Calls on your radio by using the manual dial.

- 1 Press  to access the menu.
-

2 Press  or  to `Contacts`. Press  to select.

---

3 Press  or  to `Manual Dial`. Press  to select.

---

4 Press  or  to `Phone Number`. Press  to select.

The display shows `Number:` and a blinking cursor.

---

5 Enter the telephone number, and press  to proceed.

The display shows `Access Code:` and a blinking cursor if the access code was not preconfigured.

---

6 Enter the access code, and press  to proceed. The access or deaccess code cannot be more than 10 characters.

The green LED lights up. The display shows the **Phone Call** icon at the top right corner. The first text

line shows the subscriber alias. The second text line shows the call status.

If the call is successful:

- The Dual Tone Multi Frequency (DTMF) Tone sounds.
- You hear the dialing tone of the telephone user.
- The first text line shows the subscriber alias.
- The display continues to show the **Phone Call** icon at the top right corner.

If the call is unsuccessful:

- A tone sounds.
  - The display shows `Phone Call Failed` and then, `Access Code:`.
  - Your radio returns to the screen you were on before initiating the call if the access code has been preconfigured in the Contacts list.
- 

7 Press  to end the call.

---

8 Do one of the following:

- If the deaccess code was not preconfigured, enter the deaccess code when the display shows  
`De-Access Code:`, and press  to proceed. The radio returns to the previous screen.
- Press the programmed **One Touch Access** button. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

The DTMF Tone sounds and the display shows  
`Ending Phone Call`.

If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 7](#), or wait for the telephone user to end the call.

### NOTICE:

When you press **PTT** button while in the Phone Contacts screen, a tone sounds and the display shows `Press OK to Place Phone Call`.

When the telephone user ends the call, a tone sounds and the display shows `Call Ended`.

If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on before initiating the call.

During the channel access, press  to dismiss the call attempt and a tone sounds.

During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

During channel access and access/deaccess code or extra digits transmission, your radio responds to **On/Off** button, **Volume Knob**,

and **Channel Rocker** only. A tone sounds for every invalid input.

---

## Dual Tone Multi Frequency

The Dual Tone Multi Frequency (DTMF) feature allows the radio to operate in a radio system with an interface to the telephone systems.

You can turn off the DTMF tone by disabling all radio tones and alerts. See [Turning Radio Tones/Alerts On or Off on page 187](#) for more information.

## Initiating DTMF Calls

Follow the procedure to initiate DTMF calls on your radio.

- 1 Press and hold the **PTT** button.
- 
- 2 Do one of the following:
    - Enter the desired number to initiate a DTMF call.
    - Press  to initiate a DTMF call.
    - Press  to initiate a DTMF call.
- 

## Responding to Phone Calls as Group Calls

Follow the procedure to respond to Phone Calls as Group Calls on your radio.

When you receive a Phone Call as a Group Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows Phone Call.
- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

- 1 Press the **PTT** button to respond to the call.

---

- 2 Release the **PTT** button to listen.

---

- 3 Press  to end the call.

The display shows Ending Phone Call.

**NOTICE:**

If Phone Call capability is not enabled in your radio, the radio is not able to terminate a phone call as a group call. The telephone user must end the call. The recipient user is only allowed to talkback during the call.

If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 3](#) or wait for the telephone user to end the call.

---

## Responding to Phone Calls as All Calls

When you receive a Phone Call as an All Call, the receiving radio is unable to talkback or respond. The recipient user is also not allowed to end the All Call.

When you receive a Phone Call as an All Call:

- The display shows the **Phone Call** icon at the top right corner.

- The display shows either `All Call`, `Site All Call`, or `Multi Site Call` depending on the type of configuration and Phone Call.
- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

## Responding to Phone Calls as Private Calls

Follow the procedure to respond to Phone Calls as Private Calls on your radio.

When you receive a Phone Call as a Private Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows `Phone Call`.
- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

---

**1** Press the **PTT** button to respond to the call.

---

**2** Release the **PTT** button to listen.

---

- 3 Press  to end the call.

The display shows `Ending Phone Call`.

**NOTICE:**

If Phone Call capability is not enabled in your radio, the radio is not able to terminate a phone call as a private call. The telephone user must end the call. The recipient user is only allowed to talkback during the call.

If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 3](#) or wait for the telephone user to end the call.

---

## Call Preemption

Call Preemption allows a radio to stop any in-progress voice transmission and initiate a priority transmission.

With the Call Preemption feature, the system interrupts and preempts ongoing calls in instances where trunked channels are unavailable.

Higher priority calls such as an Emergency Call or an All Call preempt the transmitting radio to accommodate the higher priority call. If no other Radio Frequency (RF) channels are available, an Emergency Call preempts an All Call as well.

## Voice Interrupt

Voice Interrupt allows the user to shut down an in-progress voice transmission.

This feature uses reverse channel signaling to stop the in-progress voice transmission of a radio, if the interrupting radio is configured to Voice Interrupt, and the transmitting radio is configured to be Voice Call Interruptible. The interrupting radio is then allowed to make a voice transmission to the participant in the stopped call.

The Voice Interrupt feature significantly improves the probability of successfully delivering a new transmission to the intended parties when a call is in progress.

Voice Interrupt is accessible to the user only if this feature has been set up in the radio. Check with your dealer or system administrator for more information.

## Enabling Voice Interrupt

Follow the procedure to initiate Voice Interrupt on your radio.

Your radio must be programmed to allow you to use this feature. Check with your dealer or system administrator for more information.

- 1 To interrupt the transmission during an on-going call, press the **PTT** button.

On the interrupted radio, the display shows `Call Interrupted`. The radio sounds a negative indicator tone until the **PTT** button is released.

- 2 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.

If unsuccessful:

- A negative indicator tone sounds.

- 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

## Advanced Features

This chapter explains the operations of the features available in your radio.

Your dealer or system administrator may have customized your radio for your specific needs. Check with your dealer or system administrator for more information.

### Call Queue

When there are no resources available to process a call, Call Queue enables the call request to be placed in the system queue for the next available resources.

You hear a Call Queue Tone after pressing the **PTT** button indicating that the radio has entered Call Queue State. The **PTT** button may be released once the Call Queue Tone is heard.

If the call setup is successful, the following occur:

- The green LED blinks.
- If enabled, the Talk Permit Tone sounds.
- The display shows the call type icon, ID or alias.

- The radio user has up to 4 seconds to press the **PTT** button to begin voice transmission.

If the call setup is unsuccessful, the following occur:

- If enabled, the Reject Tone sounds.
- The display shows the failure notice screen momentarily.
- The call is terminated and the radio exits the call setup.

## Talkgroup Scan

This feature allows your radio to monitor and join calls for groups defined by a Receive Group List.

When scan is enabled, the scan icon appears on the status bar and the LED blinks yellow. Your radio unmutes to any member in its Receive Group List.

When scan is disabled, your radio does not receive transmission from any members of the Receive Group List, except for All Call and the selected Talkgroup.

### NOTICE:

Talkgroup Scan can be configured by using CPS. Check with your system administrator to determine how your radio has been programmed.

## Turning Talkgroup Scan On or Off

Follow the procedure to turn Talkgroup Scan on or off on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan. Press  to select.

---

- 3 Do one of the following:
  - Press  or  to Turn On. Press  to select.
  - Press  or  to Turn Off. Press  to select.

If scan is enabled:

- The display shows Scan On and **Scan** icon.
- The yellow LED blinks.
- A positive indicator tone sounds.

If scan is disabled:

- The display shows Scan Off.

- The **Scan** icon disappears.
- The LED turns off.
- A negative indicator tone sounds.

## Receive Group List

Receive Group List is a feature that allows you to create and assign members on the talkgroup scan list.

This list is created when your radio is programmed and it determines which groups can be scanned. Your radio can support a maximum of 16 members in this list.

If your radio has been programmed to edit the scan list, you can:

- Add/remove talkgroups.
- Add, remove, and/or edit priority for talkgroups. Refer to [Editing Priority for a Talkgroup on page 97](#).
- Add, remove, and/or edit affiliation talkgroups. Refer to [Adding Talkgroup Affiliation on page 98](#) and [Removing Talkgroup Affiliation on page 99](#).
- Replace the existing scan list with a new scan list.

### **IMPORTANT:**

To add member into the list, the talkgroup must first be configured in the radio.

### **NOTICE:**

Receive Group List is programmed by the system administrator. Check with your dealer or system administrator for more information.

## Priority Monitor

The Priority Monitor feature allows the radio to automatically receive transmission from talkgroups with higher priority even when radio is in a talkgroup call.

Radio leaves lower priority talkgroup call for higher priority talkgroup call.

### **NOTICE:**

This feature can only be accessed when Talkgroup Scan feature is enabled.

Priority Monitor feature applies only to members in the Receive Group List. There are two Priority Talkgroups: Priority 1 (P1) and Priority 2 (P2). P1 has higher priority than P2. In Capacity Max system, the radio receives transmission according to the priority order below:

- 1 Emergency Call for P1 Talkgroup
- 2 Emergency Call for P2 Talkgroup
- 3 Emergency Call for non-priority Talkgroups in the Receive Group List

- 4 All Call
- 5 P1 Talkgroup Call
- 6 P2 Talkgroup Call

#### 7 Non-priority Talkgroups in the Receive Group List

See [Editing Priority for a Talkgroup on page 97](#) for more information on how to add, remove, and/or edit the priority of the talkgroups in the scan list.

#### NOTICE:

This feature is programmed by the system administrator. Check with your dealer or system administrator for more information.

## Editing Priority for a Talkgroup

In the Talkgroup Scan Menu, you can view or edit the priority of a talkgroup.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Scan. Press  to select.

- 3 Press  or  to View/Edit List. Press  to select.

- 4 Press  or  to the required talkgroup. Press  to select.

The current priority is indicated by a **Priority 1** or **Priority 2** icon beside the talkgroup.

- 5 Press  or  to Edit Priority. Press  to select.

- 6 Press  or  to the required priority level. Press  to select.

If another talkgroup has been assigned to Priority 1 or Priority 2, you can choose to overwrite the current priority. When the display shows **Overwrite**

**Existing?**, press  or  to the following options:

- No to return to the previous step.

- Yes to overwrite.

The display shows positive mini notice before returning to the previous screen. The priority icon appears beside the talkgroup.

## Multi-Talkgroup Affiliation

In a Capacity Max system, your radio can be configured for up to seven talkgroups at a site.

Of the 16 talkgroups in the Receive Group List, up to seven talkgroups can be assigned as affiliation talkgroups. The selected talkgroup and the priority talkgroups are automatically affiliated.

### NOTICE:

This feature is programmed by the system administrator. Check with your dealer or system administrator for more information.

## Adding Talkgroup Affiliation

Follow the procedure to add a talkgroup affiliation.

- 1 Press  to access the menu.

- 2 Press  or  to Scan. Press  to select.

- 3 Press  or  to View/Edit List. Press  to select.

- 4 Press  or  to the required talkgroup ID or alias. Press  to select.

The affiliation status is displayed at the View/Edit List. The display shows  beside the selected talkgroup ID or alias.

- 5 Press  or  to Edit Affiliation. Press  to select.

- 6 Do one of the following:
  - Press  or  to On. Press  to select.

- Press  or  to Off. Press  to select.

When On is selected,  appears beside the talkgroup ID or alias.

If affiliation is successful, the display shows  beside the selected talkgroup ID or alias.

If affiliation is unsuccessful,  remains beside the talkgroup ID or alias.

**NOTICE:**

The radio displays List Full when a maximum of seven talkgroups are selected for affiliation in the scan list. To select a new talkgroup for affiliation, remove an existing affiliated talkgroup to make way for the new addition. See [Removing Talkgroup Affiliation on page 99](#) for more information.

## Removing Talkgroup Affiliation

When the affiliation list is full and you want to select a new talkgroup for affiliation, remove an existing affiliated talkgroup to make way for the new addition. Follow the procedure to remove a talkgroup affiliation.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan. Press  to select.

---

- 3 Press  or  to View/Edit List. Press  to select.

---

- 4 Press  or  to the required talkgroup ID or alias. Press  to select.  
The affiliation status is displayed at the View/Edit List. The display shows  beside the selected talkgroup ID or alias.

---

- 5 Press  or  to Edit Affiliation. Press  to select.

---

- 6 Press  or  to Off. Press  to select.  
When Off is selected,  disappears from beside the talkgroup ID or alias.

---

## Talkback

The Talkback feature allows you to respond to a transmission while scanning.

If your radio scans into a call from the selectable group scan list, and if the **PTT** button is pressed during the scanned call, the operation of the radio depends on whether Talkback was enabled or disabled during radio programming. Check with your dealer or system administrator for more information.

### Talkback Disabled

The radio leaves the scanned call and attempts to transmit on the contact for the currently selected channel position. After the Call Hang Time on the currently selected contact expires, the radio returns to the home channel and starts the Scan Hang Time Timer. The radio resumes group scan after its Scan Hang Time Timer expires.

### Talkback Enabled

If the **PTT** button is pressed during the Group Hang Time of the scanned call, the radio attempts to transmit to the scanned group.

### NOTICE:

If you scan into a call for a group that is not assigned to a channel position in the currently selected zone and the call ends, switch to the proper zone and then select the channel position of the group to talk back to that group.

## Bluetooth

This feature allows you to use your radio with a Bluetooth-enabled device (accessory) through a Bluetooth connection. Your radio supports both Motorola Solutions and Commercially available Off-The-Shelf (COTS) Bluetooth-enabled devices.

Bluetooth operates within a range of 10 m (32 ft) line of sight. This is an unobstructed path between your radio and your Bluetooth-enabled device. For high degree of reliability, Motorola Solutions recommends to not separate the radio and the accessory.

At the fringe areas of reception, both voice and tone quality start to sound "garbled" or "broken". To correct this problem, position your radio and Bluetooth-enabled device closer to each other (within the 10 m defined range) to re-establish clear audio reception. The Bluetooth function of your radio has maximum power of 2.5 mW (4 dBm) at the 10 m range.

Your radio can support up to three simultaneous Bluetooth connections with Bluetooth-enabled devices of unique types. For example, a headset, a scanner, and a PTT-Only Device (POD). Multiple connections with Bluetooth-enabled devices of the same type are not supported.

Refer to the user manual of your respective Bluetooth-enabled device for more details on the full capabilities of your Bluetooth-enabled device.

**NOTICE:**

If disabled through CPS, all Bluetooth-related features are disabled and the Bluetooth device database is erased.

## Turning Bluetooth On and Off

Follow the procedure to turn Bluetooth on and off.

- 1 Press  to access the menu.

---

- 2 Press  or  to Bluetooth. Press  to select.

---

- 3 Press  or  to My Status. Press  to select.

The display shows On and Off. The current status is indicated by a .

- 4 Do one of the following:

- Press  or  to On. Press  to select. The display shows  beside On.
- Press  or  to Off. Press  to select. The display shows  beside Off.

## Connecting to Bluetooth Devices

Follow the procedure to connect to Bluetooth devices.

Turn on your Bluetooth-enabled device and place it in pairing mode.

- 1 Press  to access the menu.

---

2 Press  or  to Bluetooth. Press  to select.

---

3 Press  or  to Devices. Press  to select.

---

4 Do one of the following:

- Press  or  to the required device. Press  to select.
  - Press  or  to Find Devices to locate available devices. Press  or  to the required device. Press  to select.
- 

5 Press  or  to Connect. Press  to select.

Your Bluetooth-enabled device may require additional steps to complete the pairing. Refer to the user manual of your Bluetooth-enabled device.

The display shows Connecting to <Device>.

---

Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows <Device> Connected and the **Bluetooth Connected** icon.
- The display shows  beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows Connecting Failed.

**NOTICE:**

If pin code is required, see [Accessing Radios by Using Passwords on page 175](#).

## Connecting to Bluetooth Devices in Discoverable Mode

Follow the procedure to connect to Bluetooth devices in discoverable mode.

Turn on your Bluetooth-enabled device and place it in pairing mode.

- 1 Press  to access the menu.

---

- 2 Press  or  to Bluetooth. Press  to select.

---

- 3 Press  or  to Find Me. Press  to select. The radio can now be found by other Bluetooth-enabled devices for a programmed duration. This is called Discoverable Mode.

Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows <Device> Connected and the **Bluetooth Connected** icon.

- The display shows  beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows **Connecting Failed**.

## Disconnecting from Bluetooth Devices

Follow the procedure to disconnect from Bluetooth devices.

- 1 Press  to access the menu.

---

- 2 Press  or  to Bluetooth. Press  to select.

---

- 3 Press  or  to Devices. Press  to select.

---

- 4 Press  or  to the required device. Press  to select.

- 5 Press  or  to Disconnect. Press  to select.

The display shows Disconnecting from <Device>.

**NOTICE:**

Your Bluetooth-enabled device may require additional steps to disconnect. Refer to respective user manuals of any Bluetooth-enabled devices.

Wait for acknowledgment.

- A tone sounds.
- The display shows <Device> Disconnected and the **Bluetooth Connected** icon disappears.
- The  disappears beside the connected device.

## Switching Audio Route between Internal Radio Speaker and Bluetooth Device

Follow the procedure to toggle audio routing between internal radio speaker and external Bluetooth device.

Press the programmed **Bluetooth Audio Switch** button.

The display shows one of the following results:

- A tone sounds. The display shows Route Audio to Radio.
- A tone sounds. The display shows Route Audio to Bluetooth.

## Viewing Device Details

Follow the procedure to view device details on your radio.

- 1 Press  to access the menu.
- 2 Press  or  to Bluetooth. Press  to select.
- 3 Press  or  to Devices. Press  to select.

4 Press  or  to the required device. Press  to select.

---

5 Press  or  to View Details. Press  to select.

---

## Deleting Device Name

You can remove a disconnected device from the list of Bluetooth-enabled devices.

1 Press  to access the menu.

---

2 Press  or  to Bluetooth. Press  to select.

---

3 Press  or  to Devices. Press  to select.

---

4 Press  or  to the required device. Press  to select.

---

5 Press  or  to Delete. Press  to select. The display shows Device Deleted.

---

## Bluetooth Mic Gain

This feature allows the user to control the microphone gain value of the connected Bluetooth-enabled device.

1 Press  to access the menu.

---

2 Press  or  to Bluetooth. Press  to select.

---

3 Press  or  to BT Mic Gain. Press  to select.

---

4 Press  or  to the BT Mic Gain type and the current values. Press  to select. You can edit the values here.

---

- 5 Press  or  to increase or to decrease values. Press  to select.

## Indoor Location

### NOTICE:

Indoor Location feature is applicable for models with the latest software and hardware. Check with your dealer or system administrator for more information.

Indoor Location is be used to keep track of the location of radio users. When Indoor Location is activated, the radio is in a limited discoverable mode. Dedicated beacons are used to locate the radio and determine its position.

## Turning Indoor Location On or Off

You can turn on or turn off Indoor Location by performing one of the following actions.

- Access this feature through the menu.
  - a. Press  to access the menu.

- b. Press  or  to Bluetooth and press  to select.

- c. Press  or  to Indoor Location and press  to select.

- d. Press  to turn on Indoor Location.

The display shows `Indoor Location On`. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows `Turning On Failed`. You hear a negative indicator tone.

- e. Press  to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.

- If unsuccessful, the display shows `Turning Off Failed`. You hear a negative indicator tone.
- Access this feature by using the programmed button.
  - a. Long press the programmed **Indoor Location** button to turn on Indoor Location.

The display shows `Indoor Location On`. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
  - If unsuccessful, the display shows `Turning On Failed`. If unsuccessful, you hear a negative indicator tone.
- b. Press the programmed **Indoor Location** button to turn off Indoor Location.

The display shows `Indoor Location Off`. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.

- If unsuccessful, the display shows `Turning Off Failed`. If unsuccessful, you hear a negative indicator tone.

## Accessing Indoor Location Beacons Information

Follow the procedure to access Indoor Location beacons information.

- 1 Press  to access the menu.

---

- 2 Press  or  to Bluetooth and press  to select.

---

- 3 Press  or  to Indoor Location and press  to select.

---

- 4 Press  or  to Beacons and press  to select.

---

The display shows the beacons information.

## Multi-Site Controls

These features are applicable when your current radio channel is configured to a Capacity Max system.

### Starting Manual Site Search

Follow the procedure to start manual site search when the received signal strength is poor in order to attempt to find a site with better signal.

If the radio finds a new site:

- A positive indicator tone sounds.

If the radio fails to find a new site:

- A negative indicator tone sounds.

### Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.
- The display shows `Site Unlocked`.

## Accessing Neighbor Sites List

This feature allows the user to check the adjacent sites list of the current home site. Follow the procedure to access the Neighbor Sites List:

- 1 Press  to access the menu.
- 2 Press  or  to Utilities. Press  to select.
- 3 Press  or  to Radio Info. Press  to select.

- 4 Press  or  to Neighbor Sites. Press  to select.
- 

Press the **Silence Home Channel Reminder** programmable button.

The first line of the display shows HCR and the second line shows Silenced.

---

## Home Channel Reminder

This feature provides a reminder when the radio is not set to the home channel for a period of time.

If this feature is enabled when your radio is not set to the home channel for a period of time, the following occurs periodically:

- The Home Channel Reminder tone and announcement sound.
- The first line of the display shows Non.
- The second line shows Home Channel.

## Muting the Home Channel Reminder

When the Home Channel Reminder sounds, you can temporarily mute the reminder.

## Setting New Home Channels

When the Home Channel Reminder occurs, you can set a new home channel.

- 1 Do one of the following:
    - Press the **Reset Home Channel** programmable button to set the current channel as the new Home Channel. Skip the following steps. The first line of the display shows the channel alias and the second line shows New Home Ch.
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
-

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Home Channel. Press  to select.

---

5 Press  or  to the desired new home channel alias. Press  to select.  
The display shows  beside the selected home channel alias.

---

## Remote Monitor

This feature is used to turn on the microphone of a target radio with a subscriber alias or ID. You can use this feature to remotely monitor any audible activity surrounding the target radio.

Both your radio and the target radio must be programmed to allow you to use this feature.

If initiated, the green LED blinks once on the target radio. This feature automatically stops after a programmed

duration or when there is any user operation on the target radio.

## Initiating Remote Monitor

Follow the procedure to initiate Remote Monitor on your radio.

1 Press the programmed **Remote Monitor** button.

---

2 Press  or  to the required alias or ID.  
Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

---

3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display

shows *Rem. Monitor*. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

---

## Initiating Remote Monitor by Using the Contacts List

Follow the procedure to initiate Remote Monitor on your radio by using the Contacts list.

- 1 Press  to access the menu.
  - 2 Press  or  to *Contacts*. Press  to select.
  - 3 Press  or  to the required alias or ID.  
Press  to select.
- 

- 4 Press  or  to *Remote Mon.*. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

---

- 5 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows *Rem. Monitor*. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
-

## Initiating Remote Monitors by Using the Manual Dial

Follow the procedure to initiate Remote Monitor on your radio by using the manual dial.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to Manual Dial. Press  to select.

---

- 4 Press  or  to Radio Number. Press  to select.

---

- 5 Do one of the following:
  - Enter the subscriber alias or ID, and press  to proceed.

- Edit the previously dialed ID, and press  to proceed.

- 6 Press  or  to Remote Mon.. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

- 7 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows Rem. Monitor. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

## Contacts Settings

Contacts provides address book capabilities on your radio. Each entry corresponds to an alias or ID that you use to initiate a call. The entries are alphabetically sorted.

Each entry, depending on context, associates with the different call types: Group Call, Private Call, Broadcast Call, Site All Call, Multi-site All Call, PC Call, or Dispatch Call.

PC Call and Dispatch Call are data-related. They are only available with the applications. Refer to the data applications documentation for further details.

Additionally, Contacts menu allows you to assign each entry to a programmable number key or more on a keypad microphone. If an entry is assigned to a number key, your radio can perform a quick dial on the entry.

### NOTICE:

You see a checkmark before each number key that is assigned to an entry. If the checkmark is before Empty, you have not assign a number key to the entry.

Each entry within Contacts displays the following information:

- Call Type
- Call Alias

- Call ID

### NOTICE:

If the Privacy feature is enabled on a channel, you can make privacy-enabled Group Calls, Private Calls, All Calls, and Phone Calls on that channel. Only target radios with the same Privacy Key, or the same Key Value and Key ID as your radio will be able to decrypt the transmission.

## Assigning Entries to Programmable Number Keys

Follow the procedure to assign entries to programmable number keys on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to the required alias or ID. Press  to select.

---

- 4 Press  or  to Program Key. Press  to select.

- 5 Do one of the following:

- If the desired number key has not been assigned to an entry, press  or  to the desired number key. Press  to select.
- If the desired number key has been assigned to an entry, the display shows `The Key is Already Assigned` and then, the first text line shows `Overwrite?`. Do one of the following:

Press  or  to Yes. Press  to select.

The radio sounds a positive indicator tone and the display shows `Contact Saved` and a positive mini notice.

Press  or  to No to return to the previous step.

Each entry can be associated to different number keys. You see a ✓ before each number key that is

assigned to an entry. If the ✓ is before `Empty`, that number key is not assigned.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

The screen automatically returns to the previous menu.

## Removing Associations Between Entries and Programmable Number Keys

Follow the procedure to remove the associations between entries and programmable number keys on your radio.

- 1 Do one of the following:

- Long press the programmed number key to the required alias or ID. Proceed to [step 4](#).
- Press  to access the menu.

- 2 Press  or  to `Contacts`. Press  to select.

3 Press  or  to the required alias or ID.

Press  to select.

---

4 Press  or  to Program Key. Press  to select.

---

5 Press  or  to Empty. Press  to select.

The first text line shows Clear from all keys.

---

6 Press  or  to Yes. Press  to select.

**NOTICE:**

When an entry is deleted, the association between the entry and its programmed number key(s) is removed.

A positive indicator tone sounds. The display shows Contact Saved.

The screen automatically returns to the previous menu.

---

## Adding New Contacts

Follow the procedure to add new contacts on your radio.

1 Press  to access the menu.

---

2 Press  or  to Contacts. Press  to select.

---

3 Press  or  to New Contact. Press  to select.

---

4 Press  or  to select contact type Radio Contact or Phone Contact. Press  to select.

---

5 Enter the contact number with the keypad, and press  to proceed.

---

6 Enter the contact name with the keypad, and press  to proceed.

---

- 7 Press  or  to the required ringer type.  
Press  to select.  
A positive indicator tone sounds. The display shows a positive mini notice.
- 

## Call Indicator Settings

This feature allows the radio users to configure call or text message ringing tones.

### Activating or Deactivating Call Ringers for Private Calls

Follow the procedure to activate or deactivate call ringers for Private Calls on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Tones/Alerts. Press  to select.
- 

- 5 Press  or  to Call Ringers. Press  to select.
- 

- 6 Press  or  to Private Call. Press  to select.
- 

- 7 Press  or  to the required tone. Press  to select.

If enabled, ✓ appears beside Enabled. If disabled, ✓ disappears beside Enabled.

---

## Activating or Deactivating Call Ringers for Text Messages

Follow the procedure to activate or deactivate call ringers for text messages on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Tones/Alerts. Press  to select.

---

- 5 Press  or  to Call Ringers. Press  to select.

---

- 6 Press  or  to Text Message. Press  to select.  
The display shows  and the current tone.

---

- 7 Press  or  to the required tone. Press  to select. The display shows  beside the selected tone.

---

## Activating or Deactivating Call Ringers for Call Alerts

Follow the procedure to activate or deactivate call ringers for Call Alerts on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Tones/Alert. Press  to select.

---

5 Press  or  to Call Ringers. Press  to select.

---

6 Press  or  to Call Alert. Press  to select.

---

7 Press  or  to the required tone. Press  to select. The display shows  beside the selected tone.

---

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Tones/Alerts. Press  to select.

---

5 Press  or  to Call Ringers. Press  to select.

---

6 Press  or  to Selective Call. Press  to select.

The display shows  and the current tone.

---

## Activating or Deactivating Call Ringers for Selective Calls

Follow the procedure to activate or deactivate call ringers for Selective Calls on your radio.

- 7 Press  or  to the required tone. Press  to select. The display shows ✓ beside the selected tone.
- 

## Activating or Deactivating Call Ringers for Telemetry Status with Text

Follow the procedure to activate or deactivate call ringers for telemetry status with text on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 
- 3 Press  or  to Radio Settings. Press  to select.
- 
- 4 Press  or  to Tones/Alert. Press  to select.
- 

- 5 Press  or  to Call Ringers. Press  to select.
- 

- 6 Press  or  to Telemetry. Press  to select.

The current tone is indicated by a ✓.

---

## Assigning Ring Styles

The radio can be programmed to sound one of ten predefined ringing tones when receiving a Call Alert or a Text Message from a particular contact. The radio sounds out each ring style as you navigate through the list. Follow the procedure to assign ring styles on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Contacts. Press  to select.

The entries are alphabetically sorted.

---

3 Press  or  to the required alias or ID.

Press  to select.

---

4 Press  or  to Edit. Press  to select.

---

5 Press  or  to Edit Ringtone. Press  to select.

---

6 Press  or  to the required tone. Press  to select.

A  appears beside the selected tone.

---

## Escalating Alarm Tone Volume

The radio can be programmed to continually alert, when a radio call remains unanswered. This is done by automatically increasing the alarm tone volume over time. This feature is known as Escalart.

## Call Log Features

Your radio keeps track of all recent outgoing, answered, and missed Private Calls. The call log feature is used to view and manage recent calls.

Missed Call Alerts may be included in the call logs, depending on the system configuration on your radio. You can perform the following tasks in each of your call lists:

- Store Alias or ID to Contacts
- Delete Call
- Delete All Calls
- View Details

## Viewing Recent Calls

Follow the procedure to view recent calls on your radio.

1 Press  to access the menu.

---

2 Press  or  to Call Log. Press  to select.

---

- 3 Press  or  to the preferred list. The options are Missed, Answered, and Outgoing lists.

Press  to select.

The display shows the most recent entry.

---

- 4 Press  or  to view the list.

You can start a Private Call with the alias or ID the display is currently showing by pressing the **PTT** button.

---

## Storing Aliases or IDs from the Call List

Follow the procedure to store aliases or IDs on your radio from the Call list.

- 1 Press  to access the menu.
- 

- 2 Press  or  to Call Log. Press  to select.
- 

- 3 Press  or  to the required list. Press  to select.
- 

- 4 Press  or  to the required alias or ID. Press  to select.
- 

- 5 Press  or  to Store. Press  to select. The display shows a blinking cursor.
- 

- 6 Enter the rest of the characters of the required alias. Press  to select. You can store an ID without an alias. The display shows a positive mini notice.
- 

## Deleting Calls from the Call List

Follow the procedure to delete calls on your radio from the Call list.

- 1 Press  to access the menu.
-

2 Press  or  to Call Log. Press  to select.

3 Press  or  to the required list. Press  to select.

If the list is empty:

- A tone sounds.
- The display shows `List Empty`.

4 Press  or  to the required alias or ID.  
Press  to select.

5 Press  or  to `Delete Entry?`. Press  to select.

6 Do one of the following:

- Press  to select `Yes` to delete the entry. The display shows `Entry Deleted`.
- Press  or  to `No`. Press  to select.

The radio returns to the previous screen.

## Deleting All Calls from the Call List

Follow the procedure to delete all calls on your radio from the Call list.

1 Press  to access the menu.

2 Press  or  to Call Log. Press  to select.

3 Press  or  to the required list. Press  to select.

4 Press  or  to the required alias or ID.  
Press  to select.

5 Press  or  to `Delete All`. Press  to select.

6 Do one of the following:

- Press  to select Yes to delete all entries. The display shows a positive mini notice.
- Press  or  to No. Press  to select. The radio returns to the previous screen.

## Viewing Details from the Call List

Follow the procedure to view details on your radio from the Call list.

- 1 Press  to access the menu.
- 2 Press  or  to Call Log. Press  to select.
- 3 Press  or  to the required list. Press  to select.
- 4 Press  or  to the required alias or ID. Press  to select.

- 5 Press  or  to View Details. Press  to select.

The display shows the details.

## Call Alert Operation

Call Alert paging enables you to alert a specific radio user to call you back when they are able to do so.

This feature is applicable for subscriber aliases or IDs only and is accessible through the menu by using Contacts, manual dial, or a programmed **One Touch Access** button.

In Capacity Max, the Call Alert feature allows a radio user or a dispatcher to send an alert to another radio user requesting the radio user to call back the initiating radio user when available. Voice communication is not involved in this feature.

The Call Alert Operation can be configured by the dealer or the system administrator in two ways:

- The radio is configured to allow the user to press the **PTT** button to respond directly to the call initiator by making a Private Call.

- The radio is configured to allow the user to press the **PTT** button and continue with other Talkgroup communication. Pressing the **PTT** button on the call alert entry will not allow the user to respond to the call initiator. The user must navigate to the Missed Call Log option at the Call Log menu and respond to the Call Alert from there.

An Off Air Call Set-Up (OACSU) private call allows the user to respond immediately while a Full Off Air Call Set-Up (FOACSU) private call requires user acknowledgment for the call. OACSU type calls are therefore, recommended being used for the call alert feature. See [Private Call on page 72](#).

## Making Call Alerts

Follow the procedure to make Call Alerts on your radio.

- 1 Press the programmed **One Touch Access** button.

The display shows **Call Alert** and the subscriber alias or ID. The green LED lights up.

- 2 Wait for acknowledgment.

If the Call Alert acknowledgment is received, the display shows a positive mini notice.

If the Call Alert acknowledgment is not received, the display shows a negative mini notice.

## Making Call Alerts by Using the Contacts List

Follow the procedure to make Call Alerts on your radio by using the Contacts list.

- 1 Press  to access the menu.

- 2 Press  or  to **Contacts**. Press  to select.

- 3 Press  or  to the required alias or ID. Press  to select.

- 4 Press  or  to **Call Alert**. Press  to select.

The display shows **Call Alert** and the subscriber alias or ID. The green LED lights up.

- 5 Wait for acknowledgment.
    - If the Call Alert acknowledgment is received, the display shows a positive mini notice.
    - If the Call Alert acknowledgment is not received, the display shows a negative mini notice.
- 

- Press the **PTT** button to continue normal talkgroup communication. The Call Alert is moved to the Missed Call option at the Call Log menu. You can respond to the caller from the Missed Called log.
- 

See [Notification List on page 178](#) and [Call Log Features on page 120](#) for more information.

## Responding to Call Alerts

Follow the procedure to respond to Call Alerts on your radio.

When you receive a Call Alert:

- A repetitive tone sounds.
- The yellow LED blinks.
- The display shows the notification list listing a Call Alert with the alias or ID of the calling radio.

Depending on the configuration by your dealer or system administrator, you can respond to a Call Alert by doing one of the following:

- Press the **PTT** button and respond with a Private Call directly to the caller.

## Mute Mode

Mute Mode provides an option to the user to silence all audio indicators of the radio.

Once Mute Mode feature is initiated, all audio indicators are muted except higher priority features such as Emergency operations.

When Mute Mode is exited, the radio resumes playing ongoing tones and audio transmissions.

### NOTICE:

This is a purchasable feature. Check with your dealer or system administrator for more information.

## Turning On Mute Mode

Follow the procedure to turn on Mute Mode.

Access this feature by using the programmed **Mute Mode** button.

---

The following occurs when Mute mode is enabled:

- Positive Indicator Tone sounds.
- Display shows `Mute Mode On.`
- The red LED light starts blinking and remains blinking until Mute Mode is exited.
- Display shows **Mute Mode** icon on home screen.
- Radio is muted.
- Mute Mode Timer begins counting down the duration that is configured.

## Setting Mute Mode Timer

Mute Mode feature can be enabled for a pre-configured amount of time by setting the Mute Mode Timer. The timer duration is configured in the radio menu and can range between 0.5–6 hours. Mute Mode is exited once the timer expires.

If the timer is left at 0, the radio remains in Mute mode for an indefinite period until the programmed **Mute Mode** button is pressed.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Mute Timer. Press  to select.

---

- 5 Press  or  to edit the numeric value of each digit, and press .

---

## Exiting Mute Mode

This feature can be exited automatically once the Mute Mode Timer expires.

Do one of the following to exit Mute mode manually:

- Press the programmed **Mute Mode** button.
- Press the **PTT** button on any entry.

The following occurs when Mute mode is disabled:

- Negative Indicator Tone sounds.
- Display shows `Mute Mode Off`.
- The blinking red LED turns off.
- **Mute Mode** icon disappears from home screen.
- Your radio unmutes and speaker state is restored.
- If the timer has not expired, Mute mode timer is stopped.

**NOTICE:**

Mute Mode is also exited if the user transmits voice or switches to an unprogrammed channel.

## Emergency Operation

An Emergency Alarm is used to indicate a critical situation. You are able to initiate an Emergency at any time even when there is activity on the current channel.

In Capacity Max, the receiving radio can only support a single Emergency Alarm at a time. If initiated, a second Emergency Alarm will override the first alarm.

When an Emergency Alarm is received, the recipient may choose to either delete the alarm and exit the Alarm List, or respond to the Emergency Alarm by pressing the **PTT** button and transmitting non-emergency voice.

Your dealer or system administrator can set the duration of a button press for the programmed **Emergency** button, except for long press, which is similar with all other buttons:

### Short Press

Duration between 0.05 seconds and 0.75 seconds.

### Long Press

Duration between 1.00 second and 3.75 seconds.

The **Emergency** button is assigned with the Emergency On/Off feature. Check with your dealer for the assigned operation of the **Emergency** button.

**NOTICE:**

If short press the **Emergency** button is assigned to turn on the Emergency mode, then long press the **Emergency** button is assigned to exit the Emergency mode.

If long press the **Emergency** button is assigned to turn on the Emergency mode, then short press the **Emergency** button is assigned to exit the Emergency mode.

Your radio supports three Emergency Alarms:

- Emergency Alarm
- Emergency Alarm with Call
- Emergency Alarm with Voice to Follow

In addition, each alarm has the following types:

**Regular**

Radio transmits an alarm signal and shows audio and/or visual indicators.

**Silent**

Radio transmits an alarm signal without any audio or visual indicators. Radio receives calls without any sound through the speaker, until the programmed *hot mic* transmission period is over and/or you press the **PTT** button.

**Silent with Voice**

Radio transmits an alarm signal without any audio or visual indicators, but allow incoming calls to sound through the speaker.

**NOTICE:**

Only one of the Emergency Alarms above can be assigned to the programmed **Emergency** button or the **Emergency** footswitch.

## Sending Emergency Alarms

This feature allows you to send an Emergency Alarm, a non-voice signal, which triggers an alert indication on a group of radios. Follow the procedure to send Emergency Alarms on your radio.

Your radio does not display any audio or visual indicators during Emergency mode when it is set to Silent.

- 1 Press the programmed **Emergency On** button.

You see one of these results:

- The display shows Tx Alarms and the destination alias.
- The display shows Tx Telegram and the destination alias.

The green LED lights up. The **Emergency** icon appears.

**NOTICE:**

If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode. The Emergency Search tone can be programmed by the dealer or system administrator.

## 2 Wait for acknowledgment.

If successful:

- The Emergency tone sounds.
- The green LED blinks.
- The display shows `Alarm Sent`.

If unsuccessful after all retries have been exhausted:

- A tone sounds.
- The display shows `Alarm Failed`.

The radio exits the Emergency Alarm mode and returns to the Home screen.

**NOTICE:**

When configured for Emergency Alarm only, the emergency process consists only of the Emergency Alarm delivery. The emergency ends when an acknowledgment is received from the system, or when channel access attempts have been exhausted.

No voice call is associated with the sending of an Emergency Alarm when operating as Emergency Alarm Only.

## Sending Emergency Alarms with Call

This feature allows you to send an Emergency Alarm with Call to a group of radios or a dispatcher. Upon acknowledgment by the infrastructure within the group, a group of radios can communicate over a programmed Emergency channel.

The radio must be configured for Emergency Alarm and Call to perform an emergency call after the alarm process.

## 1 Press the programmed **Emergency On** button.

The display shows Tx Alarm and the destination alias. The **Emergency** icon appears. The green LED lights up.

### NOTICE:

If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode.

If an Emergency Alarm acknowledgment is successfully received:

- The Emergency tone sounds.
- The green LED blinks.
- The display shows Alarm Sent.
- Your radio enters the Emergency call mode when the display shows Emergency and the destination group alias.

If an Emergency Alarm acknowledgment is not successfully received:

- All retries are exhausted.
- A low-pitched tone sounds.
- The display shows Alarm Failed.

- The radio exits the Emergency Alarm mode.

---

## 2 Press the **PTT** button to initiate a voice transmission.

The green LED lights up. The display shows the **Group Call** icon.

---

## 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

---

## 4 Release the **PTT** button to listen.

The display shows the caller and group aliases.

---

## 5 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

---

- 6 Press the **Emergency Off** button to exit the Emergency mode.

The radio returns to the Home screen.

**NOTICE:**

Depending on how your radio is programmed, you may or may not hear a Talk Permit tone. Your radio dealer or system administrator can provide more information on how your radio has been programmed for Emergency.

The Emergency Call initiator may press  to end an on-going emergency call. The radio returns to a call idle state but the emergency call screen remains open.

**NOTICE:**

Your radio cannot detect a non-IMPRES microphone that is attached to the rear accessory connector.

When no microphone is detected at the specified programmed connector, your radio checks the alternative connector. Here, your radio gives priority to the detected microphone.

If your radio has Emergency Cycle Mode enabled, repetitions of *hot mic* and receiving period are made for a programmed duration. During Emergency Cycle Mode, received calls sound through the speaker.

If you press the **PTT** button during the programmed receiving period, you hear a prohibit tone, indicating that you should release the **PTT** button. The radio ignores the **PTT** button press and remains in Emergency mode.

If you press the **PTT** button during *hot mic*, and continue to press it after the *hot mic* duration expires, the radio continues to transmit until you release the **PTT** button.

If the Emergency Alarm request fails, the radio does not retry to send the request, and enters the *hot mic* state directly.

## Sending Emergency Alarms with Voice to Follow

This feature allows you to send an Emergency Alarm with Voice to Follow to a group of radios. Your radio microphone is automatically activated, allowing you to communicate with the group of radios without pressing the **PTT** button. This activated microphone state is also known as *hot mic*.

**NOTICE:**

Some accessories may not support *hot mic*. Check with your dealer or system administrator for more information.

Follow the procedure to send Emergency Alarms with voice to follow on your radio.

- 1 Press the programmed **Emergency On** button or the **Emergency** footswitch.

You see one of these results:

- The display shows Tx Alarm and the destination alias.
- The display shows Tx Telegram and the destination alias.

The green LED lights up. The **Emergency** icon appears.

- 
- 2 Once the display shows Alarm Sent, speak clearly into the microphone.

The radio automatically stops transmitting when:

- The cycling duration between *hot mic* and receiving calls expires, if Emergency Cycle Mode is enabled.

- The *hot mic* duration expires, if Emergency Cycle Mode is disabled.

- 
- 3 Press the **Emergency Off** button to exit the Emergency mode.

The radio returns to the Home screen.

---

## Receiving Emergency Alarms

The receiving radio can only support a single Emergency Alarm at a time. If initiated, a second Emergency Alarm will override the first alarm. Follow the procedure to receive and view Emergency Alarms on your radio.

When you receive an Emergency Alarm:

- A tone sounds.
- The red LED blinks.
- The display shows the Emergency Alarm List, the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

- 1 Press  to view the alarm.
-

2 Press  to view the action options and details of the entry in the Alarm List.

---

3 Press  and select Yes to exit the Alarm list.

The radio returns to the home screen with an **Emergency Icon** displayed at the top, indicating the unresolved Emergency Alarm. The **Emergency Icon** disappears once the entry in the Alarm List is deleted.

---

4 Press  to access the menu.

---

5 Select `Alarm List` to revisit the Alarm list.

---

6 The tone sounds and the red LED blinks until you exit the Emergency mode. However, the tone can be silenced. Do one of the following:

- Press the **PTT** button to call the group of radios which received the Emergency Alarm.
  - Press any programmable button.
- 

## Responding to Emergency Alarms

When an Emergency Alarm is received, the recipient may choose to either delete the alarm and exit the Alarm List, or respond to the Emergency Alarm by pressing the **PTT** button and transmitting non-emergency voice. Follow the procedure to respond to Emergency Alarms on your radio.

1 If the Emergency Alarm Indication is enabled, the Emergency Alarm List appears when the radio

receives an Emergency Alarm. Press  or  to the required alias or ID.

---

2 If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to transmit non-emergency voice to the same group the Emergency Alarm targeted.

The green LED lights up.

---

3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

- Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.
- 

**4** Release the **PTT** button to listen.

When the emergency initiating radio responds:

- The red LED blinks.
- The display shows the **Emergency Call** icon, the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

**NOTICE:**

If the Emergency Call Indication is not enabled, the display shows the **Group Call** icon, Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

---

## Responding to Emergency Alarms with Call

Follow the procedure to respond to Emergency Alarms with Call on your radio.

When you receive an Emergency Call:

- The Emergency Call Tone sounds if the Emergency Call Indication and Emergency Call Decode Tone is enabled. The Emergency Call Tone will not sound if only the Emergency Call Indication is enabled.
- The display shows the **Emergency Call** icon at the top right corner.
- The text line shows the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.
- Your radio unmutes and the incoming call sounds through the speaker.

- 1** If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The green LED lights up.

---

- 2** Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- 

**3** Release the **PTT** button to listen.

When the emergency initiating radio responds:

- The red LED blinks.

- The display shows the **Emergency Call** icon, the Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

**NOTICE:**

If the Emergency Call Indication is not enabled, the display shows the **Group Call** icon, Emergency Talkgroup ID or alias, and the ID or alias of the transmitting radio.

---

## Status Message

This feature allows the user to send status messages to other radios.

The Quick Status list is configured by using CPS-RM and comprises up to a maximum of 99 statuses.

The maximum length for each status message is 16 characters.

**NOTICE:**

Every status has a corresponding digital value ranging from 0–99. An alias can be specified to each status for ease of reference.

## Sending Status Messages

Follow the procedure below to send a status message.

- Do one of the following:
  - Press the programmed **One Touch Access** button. Skip the following steps.
  - Press  to access the menu.
- Press  or  to **Status**. Press  to select.
- Press  or  to **Quick Status**. Press  to select.
- Press  or  to the required status message. Press  to select.
- Press  or  to the required subscriber alias or ID, or group alias or ID. Press  to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.
- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

## Sending Status Message by Using Programmable Button

Follow the procedure to send a status message by using the programmable button.

1 Press the programmed **Status Message** button.

---

2 Press  or  to the required status message.  
Press  to select. The contact list is displayed.

---

3 Press  or  to the required subscriber alias or ID, or group alias or ID. Press  to select.

---

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.
- The display shows ✓ beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

## Sending a Status Message by Using the Contacts List

Follow the procedure to send a status message by using the contacts list.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Contacts`. Press  to select.

---

- 3 Press  or  to the required subscriber alias or ID, or group alias or ID. Press  to select.

---

- 4 Press  or  to `Send Status`. Press  to select.

---

- 5 Press  or  to the required status message.  
Press  to select.

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the `Quick Status` screen.
- The display shows  beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the `Quick Status` screen.

## Sending Status Message by Using Manual Dial

Follow the procedure to send a status message by using the manual dial.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Contacts`. Press  to select.

---

- 3 Press  or  to `Manual Dial`. Press  to select.

---

- 4 Press  or  to `Radio Number`. Press  to select.

5 Enter the required subscriber alias or ID, or group alias or ID, and press  to proceed.

---

6 Press  or  to Send Status. Press  to select.

---

7 Press  or  to the required status message. Press  to select.

---

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice momentarily before returning to the Quick Status screen.
- The display shows  beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the Quick Status screen.

## Viewing Status Messages

Follow the procedure to view status messages.

1 Press  to access the menu.

---

2 Press  or  to Status. Press  to select.

---

3 Press  or  to Inbox. Press  to select.

---

4 Press  or  to the required status message. Press  to select.

The content of the status message is displayed to the radio user.

---

Received status messages can also be viewed by accessing the Notification List. See [Notification List on page 178](#) for more information.

## Responding to Status Messages

Follow the procedure to reply status messages.

1 Press  to access the menu.

---

2 Press  or  to **Status**. Press  to select.

---

3 Press  or  to **Inbox**. Press  to select.

---

4 Press  or  to the required status message.  
Press  to select.

---

5 The content of the status is displayed. Press  to select.

---

6 Press  or  to **Reply**. Press  to select.

---

7 Press  or  to the required status message.

Press  to select.

---

If successful:

- A positive indicator tone sounds.
- The LED turns off.
- The display shows a positive mini notice before returning to the **Inbox** screen.
- The display shows  beside the sent status message.

If unsuccessful:

- A negative indicator tone sounds.
- The LED turns off.
- The display shows the failure notice momentarily before returning to the **Inbox** screen.

## Deleting a Status Message

Follow the procedure to delete a status message from your radio.

1 Press  to access the menu.

---

2 Press  or  to **Status**. Press  to select.

---

3 Press  or  to **Inbox**. Press  to select.

---

4 Press  or  to the required status message.  
Press  to select.

---

5 The content of the status is displayed. Press  to select.

---

6 Press  or  to **Delete**. Press  to select.

---

7 Press  or  to **Yes**. Press  to select.

---

- The display shows a positive mini notice before returning to the **Inbox** screen.

## Deleting All Status Messages

Follow the procedure to delete all status messages from your radio.

1 Press  to access the menu.

---

2 Press  or  to **Status**. Press  to select.

---

3 Press  or  to **Inbox**. Press  to select.

---

4 Press  or  to **Delete All**. Press  to select.

---

5 Press  or  to **Yes**. Press  to select.

---

- The display shows **List Empty**.

## Text Messaging

Your radio is able to receive data, for example a text message, from another radio or a text message application.

There are two types of text messages, Digital Mobile Radio (DMR) Short Text Message and text message. The maximum length of a DMR Short Text Message is 23 characters. The maximum length of a text message is 280 characters, including the subject line. The subject line only appears when you receive messages from e-mail applications.

**NOTICE:**

The maximum character length is only applicable for models with the latest software and hardware. For radio models with older software and hardware, the maximum length of a text message is 140 characters. Check with your dealer or system administrator for more information.

For the Arabic language, the text entry orientation is from right to left.

## Text Messages

The text messages are stored in an Inbox, and sorted according to the most recently received.

The radio exits the current screen once the inactivity timer expires. Long press  at any time to return to the Home screen.

## Viewing Text Messages

Follow the procedure to view text messages on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Messages. Press  to select.

---

- 3 Press  or  to Inbox. Press  to select.  
If the Inbox is empty:
  - The display shows List Empty.
  - A tone sounds, if the Keypad Tone is turned on.

---

- 4 Press  or  to the required message. Press  to select.  
The display shows a subject line if the message is from an e-mail application.

---

## Viewing Telemetry Status Text Messages

Follow the procedure to view a telemetry status text message from the inbox.

- 1 Press  to access the menu.

---

- 2 Press  or  to Messages. Press  to select.

---

- 3 Press  or  to Inbox. Press  to select.

---

- 4 Press  or  to the required message. Press  to select.

You cannot reply to a Telemetry Status text message.

The display shows Telemetry: <Status Text Message>.

- 5 Long press  to return to the Home screen.

## Responding to Text Messages

Follow the procedure to respond to text messages on your radio.

When you receive a text message:

- The display shows the Notification list with the alias or ID of the sender.
- The display shows the **Message** icon.

### NOTICE:

The radio exits the Text Message alert screen and sets up a Private or Group Call to the sender of the message if the **PTT** button is pressed.

- 1 Do one of the following:
  - Press  or  to Read. Press  to select.  
The display shows the text message. The display shows a subject line if the message is from an e-mail application.
  - Press  or  to Read Later. Press  to select.  
The radio returns to the screen you were on prior to receiving the text message.

- Press  or  to Delete. Press  to select.
- 

2 Do one of the following:

- Press  to return to inbox.
  - Press  a second time to reply, forward, or delete the text message.
- 

## Responding to Text Messages with Quick Text

Follow the procedure to respond to text messages with Quick Text messages on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to Step 3.
  - Press  to access the menu.
- 

2 Press  or  to Messages. Press  to select.

---

3 Press  or  to Inbox. Press  to select.

---

4 Press  or  to the required message. Press  to select.

The display shows a subject line if the message is from an e-mail application.

---

5 Press  to access the sub-menu.

---

6 Press  or  to Reply. Press  to select.

---

7 Press  or  to Quick Reply. Press  to select.

---

8 Press  or  to the required message. Press  to select.

The display shows a transitional mini notice, confirming the message is being sent.

---

9 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
  - The display shows a negative mini notice.
  - The radio returns to the Resend option screen.
- 

## Resending Text Messages

Follow the procedure to resend text messages on your radio.

When you are at the Resend option screen:

Press  to resend the same message to the same subscriber or group alias or ID.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
  - The radio returns to the Resend option screen.
- 

## Forwarding Text Messages

Follow the procedure to forward text messages on your radio.

When you are at the Resend option screen:

- 1 Press  or  to Forward, and press  to send the same message to another subscriber or group alias or ID.
- 

- 2 Press  or  to the required alias or ID.  
Press  to select.

The display shows a transitional mini notice, confirming your message is being sent.

---

**3** Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.

**NOTICE:**

You can also manually select a target radio address (see [Forwarding Text Messages by Using the Manual Dial on page 403](#)).

## Forwarding Text Messages by Using the Manual Dial

Follow the procedure to forward text messages by using the manual dial on your radio.

- 1 Press  or  to Forward. Press  to select.

- 2 Press  to send the same message to another subscriber or group alias or ID.

- 3 Press  or  to Manual Dial. Press  to select.

The display shows Radio Number:.

- 4 Enter the subscriber ID, and press  to proceed.

The display shows a transitional mini notice, confirming your message is being sent.

- 5 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.

## Editing Text Messages

Select **Edit** to edit the message.

### NOTICE:

If a subject line is present (for messages received from an e-mail application), you cannot edit it.

- 1 Press or to **Edit**. Press to select.  
The display shows a blinking cursor.

- 2 Use the keypad to edit your message.
  - Press to move one space to the left.
  - Press or to move one space to the right.
  - Press to delete any unwanted characters.
  - Long press to change text entry method.

- 3 Press once message is composed.

- 4 Do one of the following:

- Press or to **Send** and press to send the message.
- Press or to **Save** and press to save the message to the Drafts folder.
- Press to edit the message.
- Press to choose between deleting the message or saving it to the Drafts folder.

## Writing Text Messages

Follow the procedure to write text message on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button. Proceed to [step 3](#).
  - Press to access the menu.

- 2 Press or to **Messages**. Press to select.

- 3 Press  or  to Compose. Press  to select.

A blinking cursor appears.

- 4 Use the keypad to type your message.

Press  to move one space to the left.

Press  or  to move one space to the right.

Press  to delete any unwanted characters.

Long press  to change text entry method.

- 5 Press  once message is composed.

Do one of the following:

- Press  to send the message.
- Press . Press  or  to choose among editing, deleting, or saving the message.  
Press  to select.

## Sending Text Messages

Follow the procedure to send text message on your radio.

It is assumed that you have a newly written text message or a saved text message.

Select the message recipient. Do one of the following:

- Press  or  to the required alias or ID. Press  to select.
- Press  or  to Manual Dial. Press  to select. Key in the subscriber ID. The first line of the display shows Radio Number: . The second line of the display shows a blinking cursor. Key in the subscriber alias or ID. Press .

The display shows transitional mini notice, confirming your message is being sent.

If successful:

- A tone sounds.
- The display shows positive mini notice.

If unsuccessful:

- A low tone sounds.
- The display shows negative mini notice.
- The message is moved to the Sent Items folder.
- The message is marked with a Send Failed icon.

**NOTICE:**

For a newly written text message, the radio returns you to the **Resend** option screen.

## Deleting Text Messages from the Inbox

Follow the procedure to delete text messages from the Inbox on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button. Proceed to [step 3](#).
  - Press  to access the menu.

- 2 Press  or  to **Messages**. Press  to select.

- 3 Press  or  to **Inbox**. Press  to select.

If the Inbox is empty:

- The display shows **List Empty**.
- A tone sounds.

- 4 Press  or  to the required message. Press  to select.

The display shows a subject line if the message is from an e-mail application.

- 5 Press  to access the sub-menu.

- 6 Press  or  to **Delete**. Press  to select.

- 7 Press  or  to **Yes**. Press  to select.

The display shows a positive mini notice. The screen returns to the Inbox.

## Deleting All Text Messages from the Inbox

Follow the procedure to delete all text messages from the Inbox on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button. Proceed to [step 3](#).
  - Press  to access the menu.

---
- 2 Press  or  to `Messages`. Press  to select.

---

- 3 Press  or  to `Inbox`. Press  to select.  
If the Inbox is empty:
  - The display shows `List Empty`.
  - A tone sounds.

---
- 4 Press  or  to `Delete All`. Press  to select.

---

- 5 Press  or  to `Yes`. Press  to select.  
The display shows a positive mini notice.
- 

## Sent Text Messages

Once a message is sent to another radio, it is saved in Sent Items folder. The most recent sent text message is always added to the top of the Sent Items folder. You can resend, forward, edit, or delete a Sent text message.

The Sent Items folder is capable of storing a maximum of 30 last sent messages. When the folder is full, the next sent text message automatically replaces the oldest text message in the folder.

If you exit the message sending screen while the message is being sent, the radio updates the status of the message in the Sent Items folder without providing any indication in the display or via sound.

If the radio changes mode or powers down before the status of the message in Sent Items folder is updated, the radio cannot complete any In-Progress messages and automatically marks it with a **Send Failed** icon.

The radio supports a maximum of five In-Progress messages at one time. During this period, the radio cannot

send any new message and automatically marks it with a **Send Failed** icon.

If you long press  at any time, the radio returns to the Home screen.

### NOTICE:

If the channel type, for example a conventional digital or Capacity Plus channel, is not a match, you can only edit, forward, or delete a Sent message.

## Viewing Sent Text Messages

Follow the procedure to view sent text messages on your radio.

- 1 Do one of the following:
    - Press the programmed **Text Message** button. Proceed to [step 3](#).
    - Press  to access the menu.
- 

- 2 Press  or  to **Messages**. Press  to select.
- 

- 3 Press  or  to **Sent Items**. Press  to select.

If the Sent Items folder is empty:

- The display shows **List Empty**.
  - A low tone sounds, if the Keypad Tone is turned on.
- 

- 4 Press  or  to the required message. Press  to select.

The icon at the top right corner of the screen indicates the status of the message. See [Sent Item Icons](#).

---

## Sending Sent Text Messages

Follow the procedure to send a sent text messages on your radio.

When you are viewing a Sent message:

- 1 Press  .
-

2 You can either resend or forward the sent text message. Do one of the following:

-  to Resend. Press  to select.
-  to Forward. Press  to select.

The display shows a transitional mini notice, confirming your message is being sent.

3 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the Resend option screen. See [Resending Text Messages on page 144](#) for more information.

## Deleting Sent Text Messages from the Sent Items Folder

Follow the procedure to delete sent text messages from the Sent Items folder on your radio.

When you are viewing a Sent message:

1 Press  .

2 Press  or  to Delete. Press  to select.

## Deleting All Sent Text Messages from the Sent Items Folder

Follow the procedure to delete all sent text messages from the Sent Items folder on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to [step 3](#).
- Press  to access the menu.

2 Press  or  to `Messages`. Press  to select.

---

3 Press  or  to `Sent Items`. Press  to select.

If the `Sent Items` folder is empty:

- The display shows `List Empty`.
  - A tone sounds.
- 

4 Press  or  to `Delete All`. Press  to select.

---

5 Do one of the following:

- Press  or  to `Yes`. Press  to select.  
The display shows a positive mini notice.
  - Press  or  to `No`. Press  to select.  
The radio returns to the previous screen.
- 

## Saved Text Messages

You can save a text message to send it at a later time.

If a **PTT** button press or a mode change causes the radio to exit the text message writing/editing screen while you are in the process of writing or editing a text message, your current text message is automatically saved to the `Drafts` folder.

The most recent saved text message is always added to the top of the `Drafts` list.

The `Drafts` folder stores a maximum of 10 last saved messages. When the folder is full, the next saved text message automatically replaces the oldest text message in the folder.

## Viewing Saved Text Messages

Follow the procedure to view saved text message on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button.  
Proceed to [step 3](#).
  - Press  to access the menu.
-

2 Press  or  to Messages. Press  to select.

---

3 Press  or  to Drafts. Press  to select.

---

4 Press  or  to the required message. Press  to select.

---

## Editing Saved Text Messages

Follow the procedure to edit saved text message on your radio.

1 Press  while viewing the message.

---

2 Press  or  to Edit. Press  to select.  
A blinking cursor appears.

---

3 Use the keypad to type your message.

Press  to move one space to the left.

Press  or  to move one space to the right.

Press  to delete any unwanted characters.

Long press  to change text entry method.

---

4 Press  once message is composed.

Do one of the following:

- Press  or  to Send. Press  to send the message.
  - Press . Press  or  to choose between saving or deleting the message. Press  to select.
- 

## Deleting Saved Text Messages from the Drafts Folder

Follow the procedure to delete saved text message from drafts on your radio.

- 1 Do one of the following:
    - Press the programmed **Text Message** button. Proceed to [step 3](#).
    - Press  to access the menu.
- 

- 2 Press  or  to Messages. Press  to select.
- 

- 3 Press  or  to Drafts. Press  to select.
- 

- 4 Press  or  to the required message. Press  to select.
- 

- 5 Press  or  to Delete. Press  to delete the text message.
- 

## Quick Text Messages

Your radio supports a maximum of 50 Quick Text messages as programmed by your dealer.

While Quick Text messages are predefined, you can edit each message before sending it.

## Sending Quick Text Messages

Follow the procedure to send predefined Quick Text messages on your radio to a predefined alias.

- 1 Do one of the following:
    - Press the programmed **Text Message** button. Proceed to [step 3](#).
    - Press the programmed **One Touch Access** button. Proceed to [step 6](#).  
The display shows a transitional mini notice, confirming your message is being sent.
    - Press  to access the menu.
- 

- 2 Press  or  to Messages. Press  to select.
- 

- 3 Press  or  to Quick Text. Press  to select.
-

4 Press  or  to the required Quick Text message. Press  to select.

5 Do the following to select the recipient and send the message.

The display shows a transitional mini notice, confirming that your message is being sent.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the Resend option screen. See [Resending Text Messages on page 144](#) for more information.

## Text Entry Configuration

Your radio allows you to configure different text.

You can configure the following settings for entering text on your radio:

- Word Predict
- Word Correct
- Sentence Cap
- My Words

Your radio supports the following text entry methods:

- Numbers
- Symbols
- Predictive or Multi-Tap
- Language (If programmed)

### NOTICE:

Press  at any time to return to the previous screen or long press  to return to the Home Screen. The radio exits the current screen once the inactivity timer expires.

## Enabling or Disabling Word Correct

Supplies alternative word choices when the word entered into the text editor is not recognized by the in-built dictionary.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Text Entry. Press  to select.

---

- 5 Press  or  to Word Correct. Press  to select.

---

- 6 Do one of the following:

- Press  or  to Word Correct. Press  to select.
- Press to enable Word Correct. If enabled, ✓ appears beside Enabled.
- Press to disable Word Correct. If disabled, ✓ disappears beside Enabled.

## Enabling or Disabling Word Predict

**Word Predict:** Your radio can learn common word sequences that you often enter. It then predicts the next word you may want to use after you enter the first word of a common word sequence into the text editor.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to Word Predict. Press  to select.

---

6 Do one of the following:

- Press  to enable the Word Predict. If enabled, ✓ appears beside Enabled.
  - Press  to disable Microphone Dynamic Distortion Control. If disabled, ✓ disappears beside Enabled.
- 

## Sentence Cap

This feature is used to automatically enable capitalization of the first letter in the first word for every new sentence.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to Sentence Cap. Press  to select.

---

6 Do one of the following:

- Press  to enable Sentence Cap. If enabled, ✓ appears beside Enabled.
  - Press  to disable Sentence Cap. If disabled, ✓ disappears beside Enabled.
-

## Viewing Custom Words

You can add your own custom words into the in-built dictionary of your radio. Your radio maintains a list to contain these words.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Text Entry. Press  to select.

---

- 5 Press  or  to My Words. Press  to select.

---

- 6 Press  or  to List of Words. Press  to select.

The display shows the list of custom words.

---

## Editing Custom Words

You can edit custom words saved in your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to List of Words. Press  to select.  
Display shows the list of custom words.

---

7 Press  or  to the required word. Press  to select.

---

8 Press  or  to Edit. Press  to select.

---

9 Use the keypad to edit your custom word.

- Press  to move one space to the left.
  - Press  key to move one space to the right.
  - Press the  key to delete any unwanted characters.
  - Long press  to change text entry method.
- 

10 Press  once your custom word is completed.

---

The display shows transitional mini notice, confirming your custom word is being saved.

- If the custom word is saved, a tone sounds and the display shows positive mini notice.
- If the custom word is not saved, a low tone sounds and the display show negative mini notice.

## Adding Custom Words

You can add custom words into the in-built radio dictionary.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to Add New Word. Press  to select.

Display shows the list of custom words.

---

7 Use the keypad to edit your custom word.

- Press  to move one space to the left.
  - Press  key to move one space to the right.
  - Press the  key to delete any unwanted characters.
  - Long press  to change text entry method.
- 

8 Press  once your custom word is completed.

---

The display shows transitional mini notice, confirming your custom word is being saved.

- If the custom word is saved, a tone sounds and the display show positive mini notice.
- If the custom word is not saved, a low tone sounds and the display show negative mini notice.

## Deleting a Custom Word

Follow the procedure to delete the custom words saved in your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to the required word. Press  to select.

---

7 Press  or  to Delete. Press  to select.

---

8 Choose one of the following.

- At Delete Entry?, press  to select Yes. The display shows Entry Deleted.
  - Press  or  to No. Press  to return to the previous screen.
- 

## Deleting All Custom Words

Follow the procedure to delete all custom words from the in-built dictionary of your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to Delete All. Press  to select.

---

7 Do one of the following:

- At Delete Entry?, press  to select Yes. The display shows All Entries Deleted.
- Press  or  to No to return to the previous screen. Press  to select.

## Job Tickets

This feature allows your radio to receive messages from the dispatcher listing out tasks to perform.

### NOTICE:

This feature can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

There are two folders that contain different Job Tickets:

### My Tasks folder

Personalized Job Tickets assigned to your signed in user ID.

### Shared Tasks folder

Shared Job Tickets assigned to a group of individuals.

You can respond to Job Tickets in order to sort them into Job Ticket Folders. By default, the folders are **All**, **New**, **Started**, and **Completed**. Check with your dealer or system administrator for an additional 10 folders.

### NOTICE:

Job Tickets are retained even after the radio is powered down and powered up again.

All Job Tickets are located in the **All** folder. Depending on how your radio is programmed, Job Tickets are sort by their priority level followed by time received. New Job Tickets, Job Tickets with recent changes in state, and Job Tickets with the highest priority are listed first. Upon reaching the maximum number of Job Tickets, the next Job Ticket automatically replaces the last Job Ticket in your radio. Your radio supports a maximum of 100 or 500 Job Tickets, depending on your radio model. Check with your dealer or system administrator for more information. Your radio automatically detects and discards duplicated Job Tickets with the same Job Ticket ID.

Depending on the importance of the Job Tickets, the dispatcher adds a Priority Level to them. There are three priority levels: Priority 1, Priority 2, and Priority 3. Priority 1 has the highest priority and Priority 3 has the lowest priority. There are also Job Tickets with no priority.

Your radio updates accordingly when dispatcher makes the following changes:

- Modify content of Job Tickets.
- Add or edit Priority Level of Job Tickets.
- Move Job Tickets from folder to folder.
- Canceling of Job Tickets.

## Accessing the Job Ticket Folder

Follow the procedure to access the Job Ticket folder.

- 1 Do one of the following:
    - Press the programmed **Job Ticket** button. Proceed to [step 3](#).
    - Press  to access the menu.
- 
- 2 Press  or  to Job Tickets. Press  to select.
- 
- 3 Press  or  to the required folder. Press  to select.

- 4 Press  or  to the required Job Ticket. Press  to select.

## Logging In or Out of the Remote Server

This feature allows you to log in and log out of the remote server by using your user ID.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Log In. Press  to select.
 

If you are already logged in, menu displays Log Out. The display shows a transitional mini notice, indicating the request is in progress.
- 
- 3 Wait for acknowledgment.
 

If successful:

    - A positive indicator tone sounds.
    - The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

## Creating Job Tickets

Your radio is able to create Job Tickets, which are based on a Job Ticket template and send out tasks that need to be performed.

CPS programming software is required to configure the Job Ticket template.

- 1 Press  to access the menu.
- 2 Press  or  to Job Tickets. Press  to select.
- 3 Press  or  to Create Ticket. Press  to select.

## Responding to Job Tickets

Follow the procedure to respond to job tickets on your radio.

- 1 Press  to access the menu.
- 2 Press  or  to Job Tickets. Press  to select.
- 3 Press  or  to the required folder. Press  to select.
- 4 Press  or  to the required job ticket. Press  to select.
- 5 Press  once more to access the sub-menu.  
You can also press the corresponding number key (1–9) to **Quick Reply**.

- 6 Press  or  to the required job ticket. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress.

---

- 7 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Sending Job Tickets Using One Job Ticket Template

If your radio is configured with one Job Ticket template, perform the following actions to send the Job Ticket.

- 1 Use the keypad to type the required room number. Press  to select.
- 

- 2 Press  or  to Room Status. Press  to select.
- 

- 3 Press  or  to the required option. Press  to select.
- 

- 4 Press  or  to Send. Press  to select. The display shows a transitional mini notice, indicating the request is in progress.
- 

- 5 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.

- The display shows a negative mini notice.

---

## Sending Job Tickets Using More Than One Job Ticket Template

If your radio is configured with more than one Job Ticket template, perform the following actions to send the Job Tickets.

- 1 Press  or  to the required option. Press  to select.

- 
- 2 Press  or  to Send. Press  to select.  
The display shows a transitional mini notice, indicating the request is in progress.

- 
- 3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

---

## Deleting Job Tickets

Follow the procedure to delete job tickets on your radio.

- 1 Do one of the following:

- Press the programmed **Job Ticket** button. Proceed to [step 4](#)
- Press  to access the menu.

- 
- 2 Press  or  to Job Tickets. Press  to select.

- 
- 3 Press  or  to the required folder. Press  to select.
-

4 Press  or  to All folder. Press  to select.

5 Press  or  to the required Job Ticket.  
Press  to select.

6 Press  again while viewing the Job Ticket.

7 Press  or  to Delete. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress.

8 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.

- The display shows a negative mini notice.

## Deleting All Job Tickets

Follow the procedure to delete all job tickets on your radio.

1 Do one of the following:

- Press the programmed **Job Ticket** button.  
Proceed to [step 3](#).
- Press  to access the menu.

2 Press  or  to Job Tickets. Press  to select.

3 Press  or  to the required folder. Press  to select.

4 Press  or  to All folder. Press  to select.

5 Press  or  to Delete All. Press  to select.

6 Do one of the following:

- Press  or  to Yes. Press  to select.  
The display shows a positive mini notice.
- Press  or  to No. Press  to select.  
The radio returns to the previous screen.

## Privacy

This feature helps to prevent eavesdropping by unauthorized users on a channel by the use of a software-based scrambling solution. The signaling and user identification portions of a transmission are not scrambled.

Your radio must have privacy enabled on the channel to send a privacy-enabled transmission, although this is not a necessary requirement for receiving a transmission. While on a privacy-enabled channel, the radio is still able to receive clear or unscrambled transmissions.

Your radio only supports Enhanced Privacy. To unscramble a privacy-enabled call or data transmission, your radio must be programmed to have the same Key Value and Key ID for Enhanced Privacy as the transmitting radio.

If your radio receives a scrambled call that is of a different Key Value and Key ID, you hear nothing at all for Enhanced Privacy.

On a privacy-enabled channel, your radio is able to receive clear or unscrambled calls, depending on how your radio is programmed. In addition, your radio may play a warning tone or not, depending on how it is programmed.

### NOTICE:

This feature is not applicable in Citizens Band channels that are in the same frequency.

The green LED lights up when the radio is transmitting, and blinks rapidly when the radio is receiving an ongoing privacy-enabled transmission.

### NOTICE:

Some radio models may not offer this Privacy feature, or may have a different configuration. Check with your dealer or system administrator for more information.

## Turning Privacy On or Off

Follow the procedure to turn privacy on or off on your radio.

1 Do one of the following:

- Press the programmed **Privacy** button. Skip the steps below.
- Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Privacy. Press  to select.

5 Do one of the following:

- Press  or  to On. Press  to select. The display shows  beside On.

- Press  or  to Off. Press  to select. The display shows  beside Off.

## Response Inhibit

This feature helps prevent your radio from responding to any incoming transmissions.

### NOTICE:

This is a purchasable feature. Check with your dealer or system administrator to determine how your radio has been programmed.

If enabled, your radio does not generate any outgoing transmissions in respond to incoming transmissions, such as Radio Check, Call Alert, Radio Disable, Remote Monitor, Automatic Registration Service (ARS), Responding to Private Messages, and Sending GNSS location reports. Your radio cannot receive Confirmed Private Calls when this feature is enabled. However, your radio is able to manually send transmission.

## Turning Response Inhibit On or Off

Follow the procedure to enable or disable Response Inhibit on your radio.

Press the programmed **Response Inhibit** button.

---

If successful:

- A positive indicator tone sounds.
- The display shows a momentary positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a momentary negative mini notice.

## Stun/Revive

This feature allows you to enable or disable any radio in the system. For example, the dealer or system administrator may want to disable a stolen radio to prevent unauthorized users from using it, and enable the radio when it is recovered.

A radio can be disabled (stunned) or enabled (revived) either through the console or through a command initiated by another radio.

Once a radio is disabled, the radio sounds a negative indicator tone and the home screen shows `Channel Denied`.

When a radio is stunned, the radio cannot request nor receive any user initiated services on the system that performed the Stun procedure. However, the radio can switch to another system. The radio continues to send GNSS location reports and can be monitored remotely when it was stunned.

### NOTICE:

The dealer or system administrator may permanently disable a radio. See [Radio Kill on page 174](#) for more information.

## Stunning a Radio

Follow the procedure to disable a radio.

**1** Press the programmed **Radio Disable** button.

---

**2** Press  or  to the required alias or ID.

Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.

---

**3** Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Stunning a Radio by Using the Contacts List

Follow the procedure to disable a radio by using the Contacts List.

**1** Press  to access the menu.

---

**2** Press  or  to **Contacts**. Press  to select.

---

**3** Press  or  to the required alias or ID.

Press  to select.

---

**4** Press  or  to **Radio Disable**. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.

---

**5** Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
-

## Stunning a Radio by Using the Manual Dial

Follow the procedure to disable a radio by using the manual dial.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to Manual Dial. Press  to select.

---

- 4 Press  or  to Radio Number. Press  to select.  
The first text line shows Radio Number:.

---

- 5 Enter the subscriber ID, and press  to proceed.

- 6 Press  or  to Radio Disable. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.

- 7 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

## Reviving a Radio

Follow the procedure to enable a radio.

- 1 Press the programmed **Radio Enable** button.

2 Press  or  to the required alias or ID.

Press  to select.

The display shows `Radio Enable` and the subscriber alias or ID. The green LED lights up.

---

3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Reviving a Radio by Using the Contacts List

Follow the procedure to enable a radio by using the Contacts List.

1 Press  to access the menu.

---

2 Press  or  to `Contacts`. Press  to select.

---

3 Press  or  to the required alias or ID.  
Press  to select.

---

4 Press  or  to `Radio Enable`. Press  to select.

The green LED blinks.

The display shows `Radio Enable` and the subscriber alias or ID. The green LED lights up.

---

5 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows `Radio Enable Successful`.

If unsuccessful:

- A tone sounds.

- The display shows `Radio Enable Failed`.

## Reviving a Radio by Using the Manual Dial

Follow the procedure to enable a radio by using the Manual Dial.

1 Press  to access the menu.

2 Press  or  to `Contacts`. Press  to select.

3 Press  or  to `Manual Dial`. Press  to select.

4 Press  or  to `Private Call`. Press  to select.

The first text line shows `Radio Number:`.

5 Enter the subscriber ID, and press  to proceed.

6 Press  or  to `Radio Enable`. Press  to select.

The green LED blinks.

The display shows `Radio Enable` and the subscriber alias or ID. The green LED lights up.

7 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows `Radio Enable Successful`.

If unsuccessful:

- A tone sounds.
- The display shows `Radio Enable Failed`.

## Radio Kill

This feature is an enhanced security measure to restrict unauthorized access to a radio.

Radio Kill causes a radio to be rendered inoperable. For example, the dealer or system administrator may want to kill a stolen or misplaced radio to prevent unauthorized usage.

When powered on, a killed radio displays `Radio Killed` on the screen momentarily to indicate the killed state.

**NOTICE:**

A killed radio can only be revived at a Motorola Solutions service depot. Check with your dealer or system administrator for more information.

## Lone Worker

This feature prompts an emergency to be raised if there is no user activity, such as any radio button press or activation of the channel selector, for a predefined time.

Following no user activity for a programmed duration, the radio pre-warns you using an audio indicator once the inactivity timer expires.

If there is still no acknowledgment by you before the predefined reminder timer expires, the radio initiates an emergency condition as programmed by the dealer or system administrator.

See [Emergency Operation on page 127](#) for more information.

**NOTICE:**

Check with your dealer or system administrator for more information.

## Password Lock Features

This feature allows you to restrict access to the radio by asking for a password when the device is turned on.

You can use a keypad microphone or **Scroll Up/Down** buttons to enter the password.

## Accessing Radios by Using Passwords

Follow the procedure to access your radio by using a password.

- 1 Enter the current four-digit password.

**NOTICE:**

The use of **Emergency** footswitch cancels out password input to access the radio.

- Use a keypad microphone.

- Press  or  to edit the numeric value of each digit, and press  to enter and move to the next digit.

2 Press  to enter the password.

If successful, the radio powers up.

If unsuccessful:

- After the first and second attempt, the display shows `Wrong Password`. Repeat [step 1](#).
- After the third attempt, the display shows `Wrong Password` and then, `Radio Locked`. A tone sounds. The yellow LED double blinks. Your radio enters into locked state for 15 minutes.

**NOTICE:**

In locked state, your radio responds to inputs from the **On/Off/Volume Control Knob** and programmed **Backlight** button only.

## Unlocking Radios in Locked State

Your radio is unable to receive calls in locked state. Follow the procedure to unlock your radio in locked state.

Do one of the following:

- If the radio is powered on, wait for 15 minutes and then repeat the steps in [Accessing Radios by Using Passwords on page 175](#) to access the radio.
- If the radio is powered off, power up the radio. Your radio restarts the 15-minute timer for locked state. A tone sounds. The yellow LED double blinks. The display shows `Radio Locked`.

Wait for 15 minutes and then repeat the steps in [Accessing Radios by Using Passwords on page 175](#) to access the radio.

## Turning Password Lock On or Off

Follow the procedure to turn password lock on or off on your radio.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Passwd Lock. Press  to select.

---

5 Enter the current four-digit password.

- Use a keypad microphone.
  - Press  or  to edit the numeric value of each digit, and press  to enter and move to the next digit.  
A positive indicator tone sounds for every digit pressed.
- 

6 Press  to enter the password.  
If the password is incorrect, the display shows Wrong Password and automatically returns to the previous menu.

---

7 Do one of the following:

- Press  or  to Turn On. Press  to select.

The display shows  beside Turn On.

- Press  or  to Turn Off. Press  to select.

The display shows  beside Turn Off.

---

## Changing Passwords

Follow the procedure to change passwords on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Passwd Lock. Press  to select.

---

- 5 Enter the current four-digit password, and press

 to proceed.

If the password is incorrect, the display shows Wrong Password and automatically returns to the previous menu.

---

- 6 Press  or  to Change PWD. Press  to select.
- 

- 7 Enter a new four-digit password, and press  to proceed.
- 

- 8 Re-enter the new four-digit password, and press

 to proceed.

If successful, the display shows Password Changed.  
If unsuccessful, the display shows Passwords Do Not Match.

The screen automatically returns to the previous menu.

---

## Notification List

Your radio has a Notification list that collects all your unread events on the channel, such as unread text messages, telemetry messages, missed calls, and call alerts.

The display shows the **Notification** icon when the Notification list has one or more events.

The list supports a maximum of 40 unread events. When the list is full, the next event automatically replaces the oldest event. After the events are read, they are removed from the Notification list.

For text messages, missed calls, and call alert events, the maximum number of notifications are 30 text messages and 10 missed calls or call alerts. This maximum number depends on individual feature (job tickets or text messages or missed calls or call alerts) list capability.

## Accessing Notification List

Follow the procedure to access the Notification list on your radio.

- 1 Press  to access the menu.
-

2 Press  or  to Notification. Press  to select.

3 Press  or  to the required event. Press  to select.

Long press  to return to the Home screen.

- A tone sounds. The display shows **Updating** **Restarting**. Your radio restarts by powering off and on again.
- You can select **Restart Now** or **Postpone**. When you select **Postpone**, your radio returns to the previous screen. The display shows the **OTAP Delay Timer** icon until the automatic restart occurs.

When your radio powers up after automatic restart:

- If successful, the display shows **Sw Update Completed**.
- If unsuccessful, the display shows **Sw Update Failed**.

See [Checking Software Update Information on page 205](#) for the updated software version.

## Over-the-Air Programming

Your dealer can remotely update your radio by using Over-the-Air Programming (OTAP) without physical connection. Additionally, some settings can also be configured by using OTAP.

When your radio undergoes OTAP, the green LED blinks.

When your radio receives high volume data:

- The display shows the **High Volume Data** icon.
- The channel becomes busy.
- A negative tone sounds if you press the **PTT** button.

When OTAP completes, depending on the configuration:

## Selecting Third-Party Peripherals Connection Modes

Follow the procedure to select one of the following third-party peripherals connection modes:

- Motorola Solutions
- PC and Audio
- Data Accessory

- Telemetry
- Generic

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Cable Type. Press  to select.

---

5 Press  or  to the required connection mode. Press  to select.

The display shows the selected connection mode.  
The screen returns to the previous menu.

---

## Received Signal Strength Indicator

This feature allows you to view the Received Signal Strength Indicator (RSSI) values.

The display shows the **RSSI** icon at the top right corner. See [Display Icons](#) for more information on the **RSSI** icon.

## Viewing RSSI Values

Follow the procedure to view RSSI values on your radio.

When you are at the Home screen:

1 Press  three times and immediately press  three times, all in 5 seconds.

The display shows the current RSSI values.

---

2 Long press  to return to the Home screen.

---

## Front Panel Configuration

You are able to customize certain feature parameters in Front Panel Configuration (FPC) to enhance the use of your radio.

## Entering Front Panel Configuration Mode

Follow the procedure to enter front panel programming mode on your radio.

Long press  at any time to return to the Home screen.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Program Radio. Press  to select.

---

## Editing FPP Mode Parameters

Use the following buttons as required while navigating through the feature parameters.

-  ,  – Scroll through options, increase/decrease values, or navigate vertically.

-  – Select the option or enter a sub-menu.
-  – Short-press to return to previous menu or to exit the selection screen. Long-press to return to Home screen.

## Wi-Fi Operation

Wi-Fi® is a registered trademark of Wi-Fi Alliance®.

### NOTICE:

This feature is applicable to DM4601e only.

This feature allows you to setup and connect to a Wi-Fi network. Wi-Fi supports updates for radio firmware, codeplug, and resources such as language packs and voice announcement.

## Turning Wi-Fi On or Off

The programmed **Wi-Fi On or Off** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Voice Announcements for the programmed **Wi-Fi On or Off** button can be customized through CPS according to

user requirements. Check with your dealer or system administrator for more information.

You can turn on or turn off Wi-Fi by performing one of the following actions.

- Press the programmed **Wi-Fi On or Off** button. Voice Announcement sounds Turning On Wi-Fi or Turning Off Wi-Fi.
- Access this feature using the menu.
  - a. Press  to access the menu.
  - b. Press  or  to Wi-Fi and press  to select.
  - c. Press  or  to Wi-Fi On and press  to select.

Press  to turn on Wi-Fi. The display shows  beside Enabled.

Press  to turn off Wi-Fi. The  disappears from beside Enabled.

## Connecting to a Network Access Point

When you turn on Wi-Fi, the radio scans and connects to a network access point.

You can also connect to a network access point using the menu.

- 1 Press  to access the menu.
 

---
- 2 Press  or  to Wi-Fi and press  to select.
 

---
- 3 Press  or  to Networks and press  to select.
 

---
- 4 Press  or  to a network access point and press  to select.
 

---
- 5 Press  or  to Connect and press  to select.
 

---

- 6 Enter the password and press  .

When the connection is successful, the radio displays a notice and the network access point is saved into the profile list.

## Checking Wi-Fi Connection Status

Follow the procedure to check the Wi-Fi Connection status.

Press the programmed **Wi-Fi Status Query** button for the connection status by using Voice Announcement. Voice Announcement sounds Wi-Fi is Off, Wi-Fi is On but No Connection, or Wi-Fi is On with Connection.

- The display shows `WiFi Off` when the Wi-Fi is turned off.
- The display shows `WiFi On, Connected` when the radio is connected to a network.
- The display shows `WiFi On, Disconnected` when the Wi-Fi is turned on but the radio is not connected to any network.

Voice Announcements for the Wi-Fi status query results can be customized through CPS according to

user requirements. Check with your dealer or system administrator for more information.

### NOTICE:

The programmed **Wi-Fi Status Query** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

## Refreshing the Network List

Follow the procedure to refresh the network list.

- Perform the following actions to refresh the network list through the menu.
  - a. Press  to access the menu.
  - b. Press  or  to `WiFi` and press  to select.
  - c. Press  or  to `Networks` and press  to select.

When you enter the Networks menu, the radio automatically refreshes the network list.

- If you are already in the Networks menu, perform the following action to refresh the network list.

Press  or  to Refresh and press  to select.

The radio refreshes and displays the latest network list.

## Adding a Network

If a preferred network is not in the available network list, perform the following actions to add a network.

- 1 Press  to access the menu.

---

- 2 Press  or  to WiFi and press  to select.

---

- 3 Press  or  to Networks and press  to select.

---

- 4 Press  or  to Add Network and press  to select.

---

- 5 Enter the Service Set Identifier (SSID) and press .

---

- 6 Press  or  to Open and press  to select.

---

- 7 Enter the password and press .

The radio displays a positive mini notice to indicate that the network is successfully saved.

---

## Viewing Details of Network Access Points

Follow the procedure to view details of network access points.

- 1 Press  to access the menu.

---

2 Press  or  to **WiFi** and press  to select.

---

3 Press  or  to **Networks** and press  to select.

---

4 Press  or  to a network access point and press  to select.

---

5 Press  or  to **View Details** and press  to select.

For a connected network access point, the Service Set Identifier (SSID), Security Mode, Media Access Control (MAC) address, and Internet Protocol (IP) address are displayed.

For a non-connected network access point, the Service Set Identifier (SSID) and Security Mode are displayed.

---

## Removing Network Access Points

Perform the following actions to remove network access points from the profile list.

1 Press  to access the menu.

---

2 Press  or  to **WiFi** and press  to select.

---

3 Press  or  to **Networks** and press  to select.

---

4 Press  or  to the selected network access point and press  to select.

---

5 Press  or  to **Remove** and press  to select.

---

- 6 Press  or  to Yes and press  to select.

The radio displays a positive mini notice to indicate that the selected network access point is successfully removed.

---

## Utilities

This chapter explains the operations of the utility functions available in your radio.

### Power Levels

You can customize the power setting to high or low for each channel.

#### High

This enables communication with radios located at a considerable distance from you.

#### Low

This enables communication with radios in closer proximity.

#### NOTICE:

This feature is not applicable in Citizens Band channels that are in the same frequency.

## Setting Power Levels

Follow the procedure to set the power levels on your radio.

- 1 Do one of the following:
    - Press the programmed **Power Level** button. Skip the steps below.
    - Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 
- 3 Press  or  to Radio Settings. Press  to select.
- 
- 4 Press  or  to Power. Press  to select.
- 
- 5 Do one of the following:

- Press  or  to High. Press  to select.  
The display shows ✓ beside High.
- Press  or  to Low. Press  to select.  
The display shows ✓ beside Low.

- 
- 6 Long press  to return to the Home screen.
- 

## Turning Radio Tones/Alerts On or Off

You can enable and disable all radio tones and alerts, if needed, except for incoming Emergency alert tone . Follow the procedure to turn tones and alerts on or off on your radio.

- 1 Do one of the following:
    - Press the programmed **Tones/Alerts** button. Skip the following steps.
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Tones/Alerts. Press  to select.
- 

- 5 Press  or  to All Tones. Press  to select.
- 

- 6 Press  to enable or disable all tones and alerts. The display shows one of the following results:
    - If enabled, ✓ appears beside Enabled.
    - If disabled, ✓ disappears beside Enabled.
- 

## Turning Keypad Tones On or Off

Follow the procedure to turn keypad tones on or off on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Tones/Alerts. Press  to select.

---

- 5 Press  or  to Keypad Tones. Press  to select.

---

- 6 Press  to enable or disable keypad tones. The display shows one of the following results:
  - If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.

## Setting Tones/Alerts Volume Offset Levels

This feature adjusts the volume of the tones or alerts, allowing it to be higher or lower than the voice volume. Follow the procedure to set the tones and alerts volume offset levels on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Tones/Alerts. Press  to select.

---

- 5 Press  or  to Vol. Offset. Press  to select.

- 6 Press  or  to the required volume offset level.

A feedback tone sounds with each corresponding volume offset level.

---

- 7 Do one of the following:

- Press  to select. The required volume offset level is saved.
  - Press  to exit. The changes are discarded.
- 

## Turning Talk Permit Tone On or Off

Follow the procedure to turn Talk Permit Tone on or off on your radio.

- 1 Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Tones/Alerts. Press  to select.
- 

- 5 Press  or  to Talk Permit. Press  to select.
- 

- 6 Press  to enable or disable the Talk Permit Tone.

The display shows one of the following results:

- If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.
- 

## Turning Power Up Tone On or Off

Follow the procedure to turn Power Up Tone on or off on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Tones/Alerts. Press  to select.

---

- 5 Press  or  to Power Up. Press  to select.

---

- 6 Press  to enable or disable the Power Up Tone. The display shows one of the following results:
  - If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.

## Setting Text Message Alert Tones

You can customize the text message alert tone to Momentary or Repetitive for each entry in the Contacts list. Follow the procedure to set the text message alert tones on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to the required alias or ID. Press  to select.

---

- 4 Press  or  to Message Alert. Press  to select.

---

- 5 Do one of the following:
  - Press  or  to Momentary. Press  to select. The display shows  beside Momentary.

- Press  or  to Repetitive. Press  to select.

The display shows  beside Repetitive.

---

## Changing Display Modes

You can change the display mode of the radio between Day or Night, as needed. This feature affects the color palette of the display. Follow the procedure to change the display mode of your radio.

- 1 Do one of the following:
    - Press the programmed **Display Mode** button. Skip the following steps.
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Display. Press  to select.

The display shows Day Mode and Night Mode.

---

- 5 Press  or  to the required setting. Press  to select.

The display shows  beside the selected setting.

---

## Adjusting Display Brightness

Follow the procedure to adjust the display brightness on your radio. Display brightness cannot be adjusted when Auto Brightness is enabled.

- 1 Do one of the following:
    - Press the programmed **Brightness** button. Skip the following steps.
    - Press  to access the menu.
-

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Brightness. Press  to select.  
The display shows the progress bar.

---

5 Press  or  to decrease or increase the display brightness. Press  to select.  
The setting value is varied from 1 to 8.

---

## Turning Horns/Lights On or Off

Your radio is able to notify you of an incoming call through the horns and lights feature. When activated, an incoming call sounds the horn and turns on the lights of your vehicle. This feature needs to be installed through your radio rear

accessory connector by your dealer. Follow the procedure to turn all horns and lights on or off on your radio.

1 Do one of the following:

- Press the programmed **Horns/Lights** button. Skip the steps below.
  - Press  to access the menu.
- 

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Horns/Lights. Press  to select.

---

5 Press  to enable or disable Horns/Lights. The display shows one of the following results:

- If enabled,  appears beside Enabled.
- If disabled,  disappears beside Enabled.

---

## Turning LED Indicators On or Off

Follow the procedure to turn the LED indicators on or off on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to LED Indicator. Press  to select.

---

- 5 Press  to enable or disable the LED indicator. The display shows one of the following results:
  - If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.

## Turning Public Address System On or Off

Follow the procedure to enable or disable the internal public address (PA) system of your radio.

- 1 Do one of the following:
  - Press the programmed **Public Address** button. Skip the following steps.
  - Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Public Address. Press  to select.

- 5 Press  to enable or disable Public Address.
- If enabled, ✓ appears beside Enabled.
  - If disabled, ✓ disappears beside Enabled.
- 

## Turning External Public Address System On or Off

Follow the procedure to enable or disable the external public address (PA) system of your radio.

- 1 Do one of the following:
- Press the programmed **Ext Public Address** button. Skip the following steps.
  - Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to External Public Address. Press  to select.
- 

- 5 Press  to enable or disable external public address.
- If enabled, ✓ appears beside Enabled.
  - If disabled, ✓ disappears beside Enabled.
- 

## Turning Introduction Screen On or Off

You can enable and disable the Introduction Screen by following the procedure.

- 1 Press  to access the menu.
-

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Display. Press  to select.

---

5 Press  or  to Intro Screen. Press  to select.

---

6 Press  to enable or disable the Introduction Screen.

The display shows one of the following results:

- If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.
- 

## Setting Languages

Follow the procedure to set the languages on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Languages. Press  to select.

---

5 Press  or  to the required language. Press  to select.

The display shows  beside the selected language.

---

## Identifying Cable Type

Do the following steps to select the type of cable your radio uses.

- 1 Press  to access the menu.

---
- 2 Press  or  to Utilities. Press  to select.

---
- 3 Press  or  to Radio Settings. Press  to select.

---
- 4 Press  or  to Cable Type. Press  to select.

---
- 5 The current cable type is indicated by a .

## Turning Voice Announcement On or Off

This feature enables the radio to audibly indicate the current zone or channel the user has just assigned, or the programmable button the user has just pressed.

This is typically useful when the user has difficulty reading the content shown on the display.

This audio indicator can be customized according to customer requirements. Follow the procedure to turn Voice Announcement on or off on your radio.

## Turning Option Board On or Off

Option board capabilities within each channel can be assigned to programmable buttons. A channel can support up to 6 option board features. Follow the procedure to turn option board on or off on your radio.

---

Press the programmed **Option Board** button.

---

## Text-to-Speech

The Text-to-Speech feature can only be enabled by your dealer or system administrator. If Text-to-Speech is enabled, the Voice Announcement feature is automatically disabled. If Voice Announcement is enabled, then the Text-to-Speech feature is automatically disabled.

This feature enables the radio to audibly indicate the following features:

- Current Channel
- Current Zone
- Programmed button feature on or off
- Content of received text messages
- Content of received Job Tickets

This audio indicator can be customized per customer requirements. This feature is typically useful when the user is in a difficult condition to read the content shown on the display.

## Setting Text-to-Speech

Follow the procedure to set the Text-to-Speech feature.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Voice Announcement. Press  to select.

---

- 5 Press  or  to any of the following features. Press  to select.  
The available features are as follows:
  - All
  - Messages
  - Job Tickets
  - Channel
  - Zone

- Program Button
- ✓ appears beside the selected setting.

## Setting Menu Timer

You can set the time your radio stays in the menu before it automatically switches to the Home screen. Follow the procedure to set the menu timer.

- 1 Press  to access the menu.
- 2 Press  or  to Utilities. Press  to select.
- 3 Press  or  to Radio Settings. Press  to select.
- 4 Press  or  to Display. Press  to select.

- 5 Press  or  to Menu Timer. Press  to select.

- 6 Press  or  to the required setting. Press  to select.

## Turning Digital Microphone AGC On or Off

The Digital Microphone Automatic Gain Control (AGC) controls the microphone gain of the radio automatically while transmitting on a digital system.

This feature suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio. Follow the procedure to turn Digital Microphone AGC on or off on your radio.

- 1 Press  to access the menu.
- 2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Mic AGC-D. Press  to select.

---

5 Press  to enable or disable Digital Microphone AGC.

The display shows one of the following results:

- If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.
- 

## Turning Intelligent Audio On or Off

Your radio automatically adjusts the audio volume to overcome current background noise in the environment, inclusive of both stationary and non-stationary noise sources. This is a receive-only feature and does not affect transmission audio. Follow the procedure to turn Intelligent Audio on or off on your radio.

### NOTICE:

This feature is not applicable during a Bluetooth session.

1 Do one of the following:

- Press the programmed **Intelligent Audio** button. Skip the steps below.

- Press  to access the menu.
- 

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Intelligent Audio. Press  to select.

---

5 Do one of the following:

- Press  or  to On. Press  to select. The display shows  beside On.
- Press  or  to Off. Press  to select. The display shows  beside Off.

## Turning the Acoustic Feedback Suppressor Feature On or Off

This feature allows you to minimize acoustic feedback in received calls.

- 1 Press  to access the menu.
- 2 Press  or  to Utilities and press  to select.
- 3 Press  or  to Radio Settings and press  to select.

- 4 Press  or  to AF Suppressor and press  to select.  
You can also use  or  buttons to change the selected option.

- 5 Do one of the following.
  - Press  to enable Acoustic Feedback Suppressor. The display shows  beside Enabled.
  - Press  to disable Acoustic Feedback Suppressor. The  disappears from beside Enabled.

## Turning Trill Enhancement On or Off

You can enable this feature when you are speaking in a language that contains many words with alveolar trill (rolling "R") pronunciations. Follow the procedure to turn Trill Enhancement on or off on your radio.

- 1 Do one of the following:

- Press the programmed **Trill Enhancement** button. Skip the steps below.
- Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Trill Enhance. Press  to select.

5 Do one of the following:

- Press  or  to On. Press  to select. The display shows  beside On.
- Press  or  to Off. Press  to select. The display shows  beside Off.

## Audio Ambience

You can customize the audio ambience for your radio according to your environment.

### Default

This is the default setting.

### Loud

This setting enables Noise Suppressor and increases speaker loudness for use in noisy surroundings.

### Work Group

This setting enables AF Suppressor and disables AGC for use when a group of radios are near to each other.

## Setting Audio Ambience

Follow the procedure to set the audio ambience on your radio according to your environment.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Audio Ambience. Press  to select.

---

5 Press  or  to the required setting. Press  to select.

The settings are as follows.

- Choose **Default** for the default factory settings.
- Choose **Low** to increase speaker loudness when using in noisy surroundings.
- Choose **Work Group** to reduce acoustic feedback when using with a group of radios that are near to each other.

The display shows  beside the selected setting.

---

## Audio Profiles

You can customize the audio profiles for your radio according to your preference.

### Default

This is the default setting.

### Level 1, Level 2, and Level 3

These settings are intended to compensate for noise-induced hearing loss that is typical for adults in their 40's, 50's, and 60's or over.

### Treble Boost, Mid Boost, and Bass Boost

These settings are intended for a tinnier sound, a more nasal sound, and a deeper sound.

## Setting Audio Profiles

Follow the procedure to set audio profiles on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Audio Profiles. Press  to select.

5 Press  or  to the required setting. Press  to select.

The settings are as follows.

- Choose `Default` to disable the previously selected audio profile and return to the default factory settings.
- Choose `Level 1`, `Level 2`, or `Level 3` for audio profiles intended to compensate for noise-induced hearing loss that is typical for adults over 40 years of age.
- Choose `Treble Boost`, `Mid Boost`, or `Bass Boost` for audio profiles that align with your

preference for tinnier, more nasal, or deeper sounds.

The display shows  beside the selected setting.

## Turning Global Navigation Satellite System On or Off

Global Navigation Satellite System (GNSS) is a satellite navigation system that determines the radio precise location. GNSS includes Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS).

### NOTICE:

Selected radio models may offer GPS and GLONASS. GNSS constellation is configured by using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

- 1 Do one of the following steps to toggle GNSS on or off on your radio.
  - Press the programmed **GNSS** button.

- Press  to access the menu. Proceed to the next step.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to GNSS. Press  to select.

5 Press  to enable or disable GNSS.  
 If enabled,  appears beside Enabled.  
 If disabled,  disappears beside Enabled.

## General Radio Information

Your radio contains information on various general parameters.

The general information of your radio is as follows:

- Radio alias and ID.
- Firmware and Codeplug versions.
- Software update.
- GNSS information.
- Site information.

### NOTICE:

Press  to return to the previous screen. Long press  to return to the Home screen. The radio exits the current screen once the inactivity timer expires.

## Checking Radio Alias and ID

Follow the procedure to check the radio alias and ID on your radio.

- 1 Do one of the following:
  - Press the programmed **Radio Alias and ID** button. Skip the following steps. A positive indicator tone sounds.  
 You can press the programmed **Radio Alias and ID** button to return to the previous screen.

- Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Info. Press  to select.

4 Press  or  to My ID. Press  to select.  
The first text line shows the radio alias. The second text line shows the radio ID.

## Checking Firmware and Codeplug Versions

Follow the procedure to check the firmware and codeplug versions on your radio.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Info. Press  to select.

4 Press  or  to Versions. Press  to select.

The display shows the current firmware and codeplug versions.

## Checking Software Update Information

This feature shows the date and time of the latest software update carried out through OTAP or Wi-Fi. Follow the procedure to check the software update information on your radio.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Info. Press  to select.

---

4 Press  or  to SW Update. Press  to select.

The display shows the date and time of the latest software update.

---

Software Update menu is only available after at least one successful OTAP or Wi-Fi session. See [Over-the-Air Programming on page 444](#) for more information.

## Checking GNSS Information

Displays the GNSS information on your radio, such as values of:

- Latitude
- Longitude
- Altitude
- Direction
- Velocity
- Horizontal Dilution of Precision (HDOP)

- Satellites
- Version

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Info. Press  to select.

---

4 Press  or  to GNSS Info. Press  to select.

---

5 Press  or  to the required item. Press  to select. The display shows the requested GNSS information.

---

## Displaying Site Information

Follow the procedure to display the current site name your radio is on.

- 1 Press  to access the menu.

---
- 2 Press  or  to Utilities. Press  to select.

---
- 3 Press  or  to Radio Info. Press  to select.

---
- 4 Press  or  to Site Info. Press  to select.

---

The display shows the current site name.

This page intentionally left blank.

## Connect Plus Operations

Connect Plus is a full trunking solution based on DMR technology. Connect Plus uses a dedicated control channel for channel requests and allocations. Features that are available to the radio users under this system are available in this chapter.

## Additional Radio Controls in Connect Plus Mode

This chapter explains the additional radio controls available to the radio user through preprogrammed means such as programmable buttons and assignable radio functions.

### Push-To-Talk (PTT) Button

The **PTT** button on the side of the radio serves two basic purposes:

- While a call is in progress, the **PTT** button allows the radio to transmit to other radios in the call.

Press and hold the **PTT** button to talk. Release the **PTT** button to listen.

The microphone is activated when the **PTT** button is pressed.

- While a call is not in progress, the **PTT** button is used to make a new call (see [Making a Radio Call on page 225](#)).

If the Talk Permit Tone is enabled, wait until the short alert tone ends before talking.

## Programmable Buttons

Your dealer can program the programmable buttons as shortcuts to radio functions depending on the duration of a button press:

### Short press

Pressing and releasing rapidly.

### Long press

Pressing and holding for the programmed duration.

### NOTICE:

The programmed duration of a button press is applicable for all assignable radio/utility functions or settings. See [Emergency Operation on page 258](#) for more information on the programmed duration of the *Emergency* button.

## Assignable Radio Functions

### **Bluetooth® Audio Switch**

Toggles audio routing between internal radio speaker and external Bluetooth-enabled accessory.

### **Bluetooth Connect**

Initiates a Bluetooth find-and-connect operation.

### **Bluetooth Disconnect**

Terminates all existing Bluetooth connections between your radio and any Bluetooth-enabled devices.

### **Bluetooth Discoverable**

Enables your radio to enter Bluetooth Discoverable Mode.

### **Busy Queue Cancellation**

Exits the busy mode when a non-Emergency call in the Busy Queue was initiated. Emergency calls, once accepted into the Busy Queue, cannot be cancelled.

### **Call Log**

Selects the call log list.

### **Channel Announcement**

Plays zone and channel announcement voice messages for the current channel.

### **Contacts**

Provides direct access to the Contacts list.

### **Emergency On/Off**

Depending on the programming, initiates or cancels an emergency.

### **Horns/Lights**

Toggles horns and lights feature on or off.

### **Indoor Location**

Toggles Indoor Location on or off.

### **Intelligent Audio**

Toggles intelligent audio on or off.

### **Manual Dial**

Depending on the programming, initiates a Private or Phone Call by keying in any subscriber ID or phone number.

### **One Touch Access**

Directly initiates a predefined Private Call, a Call Alert, a Quick Text message, or Home Revert.

### **Privacy**

Toggles privacy on or off.

### **Radio Check**

Determines if a radio is active in a system.

**Radio Enable**

Allows a target radio to be remotely enabled.

**Radio Disable**

Allows a target radio to be remotely disabled.

**Remote Monitor**

Turns on the microphone of a target radio without it giving any indicators.

**Reset Home Channel**

Sets a new home channel.

**Ring Alert Type**

Provides direct access to the Ring Alert Type Setting.

**Roam Request**

Requests to search for a different site.

**Scan**

Toggles scan on or off.

**Silence Home Channel Reminder**

Mutes the Home Channel Reminder.

**Site Lock On/Off**

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

**Text Message**

Selects the text message menu.

**Voice Announcement On/Off**

Toggles voice announcement on or off.

**Wi-Fi**

Toggles Wi-Fi on or off.

**Zone**

Allows selection from a list of zones.

## Assignable Settings or Utility Functions

**AF Suppressor**

Toggles the Acoustic Feedback Suppressor feature on or off.

**All Tones/Alerts**

Toggles all tones and alerts on or off.

**Backlight Brightness**

Adjusts the brightness level.

**Channel Up/Down**

Depending on the programming, changes channel to previous or next channel.

**Display Mode**

Toggles the day/night display mode on or off.

**Global Navigation Satellite System (GNSS)**

Toggles the satellite navigation system on or off.

**Power Level**

Toggles transmit power level between high and low.

**Unassigned**

Indicates that the button function has not yet been assigned.

## Identifying Status Indicators in Connect Plus Mode

### Display Icons

The following are icons that appear on the display of the radio.

	<p><b>Received Signal Strength Indicator (RSSI)</b></p>
<p>The number of bars displayed represents the radio signal strength. Four bars indi-</p>	

*Table continued...*

	<p>cate the strongest signal. This icon is only displayed while receiving.</p>
	<p><b>Bluetooth Not Connected</b></p> <p>The Bluetooth feature is enabled but there is no remote Bluetooth device connected.</p>
	<p><b>Bluetooth Connected</b></p> <p>The Bluetooth feature is enabled. The icon stays lit when a remote Bluetooth device is connected.</p>
	<p><b>High Volume Data</b></p> <p>Radio is receiving high volume data and channel is busy.</p>
	<p><b>Indoor Location Available</b><sup>3</sup></p> <p>Indoor location status is on and available.</p>
	<p><b>Indoor Location Unavailable</b><sup>3</sup></p> <p>Indoor location status is on but unavailable due to Bluetooth disabled or Beacons Scan suspended by Bluetooth.</p>

*Table continued...*

<sup>3</sup> Only applicable for models with the latest software and hardware

	<b>Mute Mode</b> Mute Mode is enabled and speaker is muted.
	<b>Notification</b> Notification List has items to review.
<b>L</b> or <b>H</b>	<b>Power Level</b> Radio is set at Low power or Radio is set at High power.
	<b>Tones Disable</b> Tones are turned off.
	<b>Option Board</b> The Option Board is enabled.
	<b>Option Board Non-Function</b> The Option Board is disabled.
	<b>GNSS Available</b> The GPS/GNSS feature is enabled. The icon stays lit when a position fix is available.

Table continued...

	<b>GNSS Not Available/Out of Range</b> The GPS/GNSS feature is enabled but is not receiving data from the satellite.
	<b>Scan</b> Scan feature is enabled.
	<b>Emergency</b> Radio is in Emergency mode.
	<b>Secure</b> The Privacy feature is enabled.
	<b>Unsecure</b> The Privacy feature is disabled.
	<b>Site Roaming</b> The site roaming feature is enabled.
	<b>Contact</b> Radio contact is available.
	<b>Call Log</b> Radio call log.

Table continued...

	<b>Message</b> Incoming message.
	<b>Ring Only</b> Ringing mode is enabled.
	<b>Silent Ring</b> Silent ring mode is enabled.
	<b>Vibrate</b> Vibrate mode is enabled.
	<b>Vibrate and Ring</b> Vibrate and Ring mode is enabled.
	<b>Wi-Fi Excellent</b> <sup>4</sup> Wi-Fi signal is excellent.
	<b>Wi-Fi Good</b> <sup>4</sup> Wi-Fi signal is good.

Table continued...

	<b>Wi-Fi Average</b> <sup>4</sup> Wi-Fi signal is average.
	<b>Wi-Fi Poor</b> <sup>4</sup> Wi-Fi signal is poor.
	<b>Wi-Fi Unavailable</b> <sup>4</sup> Wi-Fi signal is unavailable.

## Call Icons

The following icons appear on your radio display during a call. These icons also appear in the Contacts list to indicate ID type.

	<b>Private Call</b> Indicates a Private Call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).
---	---

Table continued...

<sup>4</sup> Only applicable for DM4601e

### Group Call/Site All Call

Indicates a Group Call or Site All Call in progress. In the Contacts list, it indicates a group alias (name) or ID (number).

### Phone Call as Private Call

Indicates a Phone Call as Private Call in progress.

### Bluetooth PC Call

Indicates a Bluetooth PC Call in progress.

In the Contacts list, it indicates a Bluetooth PC Call alias (name) or ID (number).

### Dispatch Call

The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.

## Advanced Menu Icons

The following icons appear beside menu items that offer a choice between two options or as an indication that there is a sub-menu offering two options.

### Checkbox (Empty)

Indicates the option is not selected.

### Checkbox (Checked)

Indicates the option is selected.

### Solid Black Box

Indicates the option selected for the menu item with a sub-menu.

## Sent Item Icons

The following icons appear at the top right corner of the radio display in the Sent Items folder.

 OR 	<p><b>Sent Successfully</b> The text message is sent successfully.</p>
 OR 	<p><b>In-Progress</b></p> <ul style="list-style-type: none"> <li>• The text message to a group alias or ID is pending transmission.</li> <li>• The text message to a subscriber alias or ID is pending transmission, followed by waiting for acknowledgement.</li> </ul>
 OR 	<p><b>Individual or Group Message Read</b> The text message has been read.</p>

*Table continued...*

OR 	<p><b>Individual or Group Message Unread</b> The text message has not been read.</p>
 OR 	<p><b>Send Failed</b> The text message has not been sent.</p>

## Bluetooth Device Icons

The following icons also appear next to items in the list of Bluetooth-enabled devices available to indicate the device type.

	<p><b>Bluetooth Data Device</b> Bluetooth-enabled data device, such as a scanner.</p>
	<p><b>Bluetooth Audio Device</b> Bluetooth-enabled audio device, such as a headset.</p>

*Table continued...*

**Bluetooth PTT Device**

Bluetooth-enabled PTT device, such as a PTT-Only Device (POD).

**LED Indicator**

The LED indicator shows the operational status of your radio.

<b>Blinking red</b>	Radio is transmitting at low battery condition, receiving an emergency transmission or has failed the self-test upon powering up, or has moved out of range if radio is configured with Auto-Range Transponder System. Mute Mode is enabled.
<b>Rapidly blinking red</b>	Radio is receiving over-the-air file transfer (Option Board firmware file, Network Frequency file or Option Board Codeplug file) or upgrading to a new Option Board firmware file.

*Table continued...*

<b>Blinking green and yellow</b>	Radio is receiving a Call Alert, received a text message or Scan is enabled and is receiving activity.
<b>Solid yellow</b>	Radio is in Bluetooth Discoverable Mode.
<b>Double blinking yellow</b>	Radio is actively searching for a new site.
<b>Blinking yellow</b>	Radio is receiving a Call Alert or Scan is enabled and is idle (radio will remain muted to any activity).
<b>Solid green</b>	Radio is powering up or transmitting.
<b>Blinking green</b>	Radio is powering up, receiving a call or data.
<b>Double blinking green</b>	Radio is receiving a privacy-enabled call.

## Indicator Tones

The following are the tones that sound through the radio speaker.

High pitched tone  Low pitched tone

Indicator tones provide you with audible indications of the status after an action to perform a task is taken.

	Positive Indicator Tone
	Negative Indicator Tone

## Alert Tones

Alert tones provide you with audible indications of the status, or response to data received on the radio.

<b>Continuous Tone</b> 	A monotone sound. Sounds continuously until termination.
---	---

*Table continued...*

<b>Periodic Tone</b> 	Sounds periodically depending on the duration set by the radio. Tone starts, stops, and repeats itself.
<b>Repetitive Tone</b> 	A single tone that repeats itself until it is terminated by the user.
<b>Momentary Tone</b> 	Sounds only once for a short period of time defined by the radio.

## Switching Between Connect Plus and Non-Connect Plus Modes

To switch to a non-Connect Plus mode, you must change to another zone, if programmed by your dealer or system administrator. Check with your dealer or system administrator to see if your radio has been programmed with non-Connect Plus zones, and what features are available while operating in non-Connect Plus zones.

# Making and Receiving Calls in Connect Plus Mode

This section explains general radio operations and call features that are available in your radio.

## Selecting a Site

A site provides coverage for a specific area. A Connect Plus site has a site controller and a maximum of 15 repeaters. In a multi-site network, the Connect Plus radio will automatically search for a new site when the signal level from the current site drops to an unacceptable level.

## Roam Request

A Roam Request tells the radio to search for a different site, even if the signal from the current site is acceptable.

If there are no sites available:

- The radio displays `Searching` and `Selected Channel Alias` and continues to search through the list of sites.
- The radio will return to the previous site, if the previous site is still available.

### NOTICE:

This is programmed by your dealer.

Press the programmed **Roam Request** button.

You hear a tone, indicating the radio has switched to a new site. The display shows `Site ID <Site Number>`.

---

## Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.

- The display shows `Site Unlocked`.

## Site Restriction

Your Connect Plus radio system administrator has the ability to decide which network sites your radio is and is not allowed to use. Your radio does not need to be reprogrammed to change the list of allowed and disallowed sites. If your radio attempts to register at a disallowed site, you see a brief message stating: `Site <number given> Not Allowed`. The radio then searches for a different network site.

## Selecting a Zone

The radio can be programmed with a maximum of 16 Connect Plus Zones and each Connect Plus zone contains a maximum of 16 assignable positions on the Channel Selector Knob.

Each assignable knob position can be used to start one of the following voice call types:

- Group Call
- Multi-group Call

- Site All Call
- Private Call

- 1 Access the Zone feature by performing the following:

Radio Controls	Steps
<b>Programmed Zone Selection button</b>	Press the programmed <b>Zone Selection</b> button.
<b>Radio menu</b>	<ol style="list-style-type: none"> <li>a Press  to access the menu.</li> <li>b Press  or  to Zone and press  to select.</li> </ol>

The current zone is displayed and indicated by a .

- 2 Select the required zone.

Radio Control	Steps
 or 	Press  or  and scroll to the required zone.

- 3 Press  to select.

The display shows <Zone> Selected momentarily and returns to the selected zone screen.

## Using Multiple Networks

If your radio has been programmed to use multiple Connect Plus networks, you can select a different network by switching to the Connect Plus zone that is assigned to the desired network. These network-to-zone assignments are configured by your dealer through radio programming.

## Selecting a Call Type

Use the Channel Selector Knob to select a call type. This can be a Group Call, Multi-group Call, Site All Call or Private Call, depending on how your radio is programmed. If you change the Channel Selector Knob to a different position (that has a call type assigned to it), this causes the

radio to re-register with the Connect Plus site. The radio registers with the Registration Group ID that has been programmed for the new Channel Selector Knob position call type.

If you select a position that has no call type assigned to it, your radio sounds a continuous tone and the display shows Unprogrammed. Your radio does not operate when selected to an unprogrammed channel, use the Channel Selector Knob to select a programmed channel instead.

Once the required zone is displayed (if you have multiple zones in your radio), turn the programmed Channel Selector Knob to select the call type.

## Receiving and Responding to a Radio Call

Once the channel, subscriber ID or call type is displayed, you can proceed to receive and respond to calls.

The LED lights up solid green while the radio is transmitting and blinks green when the radio is receiving.

**NOTICE:**

The LED lights up solid green while the radio is transmitting and double blinks green when the radio is receiving a privacy-enabled call. To unscramble a privacy-enabled call, your radio must have the same Privacy Key, OR the same Key Value and Key ID (programmed by your dealer), as the transmitting radio (the radio you are receiving the call from).

See [Privacy on page 277](#) for more information.

## Receiving and Responding to a Group Call

To receive a call from a group of users, your radio must be configured as part of that group.

When you receive a Group Call (while on the Home screen), the LED blinks green. The Group Call icon appears in the top right corner. The first text line shows the caller alias. The second text line displays the group call alias.

Your radio unmutes and the incoming call sounds through the radio speaker.

- 1 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

The LED lights up solid green.

---

- 2 Wait for one of the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.
- 

- 3 Release the **PTT** button to listen.

If there is no voice activity for a predetermined period of time, the call ends.

---

**NOTICE:**

See [Making a Group Call on page 226](#) for details on making a Group Call.

## Receiving and Responding to a Private Call

A Private Call is a call from an individual radio to another individual radio.

When you receive a Private Call, the LED blinks green. The first line of the display shows the subscriber alias or ID, and the RSSI icon. The second line displays `Private Call` and the Private Call icon. Your radio unmutes and the incoming call sounds through the speaker of the radio.

- 1 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

---

- 2 Press the **PTT** button to respond to the call.  
The LED lights up solid green.

---

- 3 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

---

- 4 Release the **PTT** button to listen.

If there is no voice activity for a predetermined period of time, the call ends.

The display shows `Call Ended`.

See [Making a Private Call on page 227](#) for details on making a Private Call.

## Receiving a Site All Call

A Site All Call is a call from an individual radio to every radio on the site. It is used to make important announcements requiring the user's full attention.

When you receive an Site All Call, a tone sounds and the LED blinks green.

The Group Call icon appears in the top right corner. The first text line shows the caller alias. The second text line displays `Site All Call`. Your radio unmutes and the incoming call sounds through the radio speaker.

Once the Site All Call ends, the radio returns to the previous screen before receiving the call. A Site All Call does not wait for a predetermined period of time before ending.

You cannot respond to a Site All Call.

### NOTICE:

See [Making a Site All Call on page 227](#) for details on making a Site All Call.

The radio stops receiving the Site All Call if you switch to a different channel while receiving the call. During a Site All Call, you will not be able to use any programmed button functions until the call ends.

## Receiving an Inbound Private Phone Call

When you receive an Inbound Private Phone Call, the Phone Call as Private Call icon appears in the top right corner. The first text line shows Phone Call.

- 1 Press and hold the **PTT** button to answer and talk. Release the **PTT** button to listen.
- 

- 2 Long press  to end the call.

The first line of the display shows Ending. The second line of the display shows Phone Call.... The display returns to the Phone Call screen. The display shows Phone Call Ended.

---

## Making a Buffered Over-Dial in an Inbound Phone Private Call

During the call, the Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows Phone Call.

- 1 Use the keypad to enter the digits and press the  button.

Press  followed by  within 2 seconds to insert a pause. The P replaces \* and # on the display.

The Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows the entered digits.

---

- 2 Long press  to end the call.

The first line of the display shows Ending. The second line of the display shows Phone Call.... The display returns to the Phone Call screen. The display shows Phone Call Ended.

---

## Making a Live Over-Dial in an Inbound Phone Private Call

During the call, the Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows `Phone Call`.

- 1 Press the **PTT** button and use the keypad to enter the digits.

The Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows the Live Dial digits.

- 2 Long press  to end the call.

The first line of the display shows `Ending`. The second line of the display shows `Phone Call....`. The display returns to the Phone Call screen.

The display shows `Phone Call Ended`.

## Receiving an Inbound Phone Talkgroup Call

When you receive an Inbound Phone Talkgroup Call, the Group Call icon appears in the top right corner. The first text line shows `Call11`.

---

Press the **PTT** button to talk and release it to listen.

## Inbound Phone Multi-Group Call

When you receive an Inbound Phone Multi-Group Call, the Group Call icon appears in the top right corner. The first text line shows `Multigroup Call`. The radio unmutes and the incoming multi-group call sounds through the radio speaker.

## Making a Radio Call

After selecting your channel, you can select a subscriber alias or ID, or group alias or ID by using:

- The Channel Selector Knob.
- A programmed **One Touch Access** button – The One Touch Access feature allows you to make a Private Call to a predefined ID easily. This feature can be assigned

to a short or long programmable button press. You can only have one ID assigned to a **One Touch Access** button. Your radio can have multiple **One Touch Access** buttons programmed.

- The Contacts list (see [Contacts Settings on page 247](#)).

**NOTICE:**

Your radio must have the Privacy feature enabled on the channel to send a privacy-enabled transmission. Only target radios with the same Key Value and Key ID as your radio will be able to unscramble the transmission.

See [Privacy on page 277](#) for more information.

## Making a Call with the Channel Selector Knob

This feature allows the radio users to make different call types : Group Call, Private Call, Site All Call, Multi-group Call.

## Making a Group Call

To make a call to a group of users, your radio must be configured as part of that group.

---

1 Select the channel with the active group alias or ID. See [Selecting a Call Type on page 221](#).

---

2 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

---

3 Press the **PTT** button to make the call.

The LED lights up solid green. The Group Call icon appears in the top right corner. The first text line shows the group call alias.

---

4 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

---

5 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green, the radio unmutes and the response sounds through the radio speaker. You see the Group Call icon, the group alias or ID, and transmitting radio alias or ID on your display.

If there is no voice activity for a predetermined period of time, the call ends. Radio returns to the screen you were on prior to initiating the call.

---

## Making a Private Call

While you can receive and/or respond to a Private Call initiated by an authorized individual radio, your radio must be programmed for you to initiate a Private Call.

You will hear a negative indicator tone, when you make a Private Call using the **One Touch Access** button, or the Channel Selector Knob, if this feature is not enabled.

- 1 Do one of the following.
  - Select the channel with the active subscriber alias or ID. See [Selecting a Call Type on page 221](#).
  - Press the programmed **One Touch Access** button.

- 2 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

- 3 Press the **PTT** button to make the call.

The LED lights up solid green. The Private Call icon appears on the top right corner. The first text line shows the target subscriber alias. The second text line displays the call status.

- 4 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

- 5 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends. You hear a short tone. The display shows `Call Ended`.

Your radio may be programmed to perform a radio presence check prior to setting up the Private Call. If the target radio is not available, you hear a short tone and see negative mini notice on the display.

## Making a Site All Call

This feature allows you to transmit to all users on the site that are currently not engaged in another call. Your radio must be programmed to allow you to use this feature.

Users on the channel/site cannot respond to an Site All Call.

- 1 Select the channel with the active Site All Call group alias. See [Selecting a Call Type on page 221](#).

- 2 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

---
- 3 Press the **PTT** button to make the call.  
The LED lights up solid green. The Group Call icon appears in the top right corner. The first text line shows `Site All Call`.

---
- 4 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

---

### Making a Multi-group Call

This feature allows you to transmit to all users on multiple groups. Your radio must be programmed to allow you to use this feature.

#### **NOTICE:**

Users on the groups cannot respond to a Multi-group Call.

- 1 Turn the Channel Selector Knob to select the Multi-group alias or ID.

---

- 2 Press the **PTT** button to make the call.

The LED lights up solid green. The display shows the Multi-group alias or ID.

Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.

---

### Making a Private Call with a One Touch Call Button

#### **NOTICE:**

Programmable buttons press must be initiated from the Home screen.

The One Touch Call feature allows you to easily make a Private Call to a pre-defined Private Call alias or ID. This feature can be assigned to a short or long programmable button press.

You can **ONLY** have one alias or ID assigned to a One Touch Call button. Your radio can have multiple One Touch Call buttons programmed.

- 1 Press the programmed **One Touch Call** button to make a Private Call to the pre-defined Private Call alias or ID.
- 

- 2 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.
- 

- 3 Press the **PTT** button to make the call.  
The LED lights up solid green.  
The display shows the Private Call alias or ID.
- 

- 4 Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.
- 

- 5 Release the **PTT** button to listen.  
When the target radio responds, the LED blinks green.  
If there is no voice activity for a predetermined period of time, the call ends.
- 

## Making a Call with the Programmable Manual Dial Button

This feature allows the radio users to make private calls using the programmable manual dial button.

### Making a Private Call

- 1 Press the programmed **Manual Dial** button to enter into the Manual Dial screen.

The display shows `Number: .`

---

- 2 Use the keypad to enter a subscriber alias or Private ID.
- 

- 3 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.
- 

- 4 Press the **PTT** button to make the call.  
The LED lights up solid green. The Private Call icon appears in the top right corner. The first text line shows the subscriber alias. The second text line displays the call status.
-

- 5 Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.
- 

- 6 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends. You hear a short tone. The display shows `Call Ended`.

---

## Making an Outbound Private Phone Call with the Programmable Manual Dial Button

- 1 Press the programmed **Manual Dial** button to enter into the Manual Dial screen.

The display shows `Number:.`

---

- 2 Use the keypad to enter a telephone number, and press  to place a call to the entered number.

Press  to delete any unwanted characters. Press  followed by  within 2 seconds to insert a pause. The P replaces \* and # on the display.

If successful, the first line of the display shows `Phone Call`. The second line of the display shows the dialed telephone number.

If an invalid telephone number is selected, the display shows a negative mini notice, `Phone Call Failed, Resource Not Available, or Invalid Permissions`.

If  is pressed with no telephone number entered, the radio sounds a positive indicator tone then a negative indicator tone. The display remains the same.

---

- 3 Long press  to end the call.

The first line of the display shows `Ending`. The second line of the display shows `Phone Call....`

The display shows `Phone Call Ended`.

---

## Making an Outbound Private Phone Call via the Phone Menu

- 1 Press  to access the menu.

---

- 2 Press  or  to Phone and press  to select.

---

- 3 Press  to select Manual Dial.  
The first line of the display shows `Number`, the second line of the display shows a blinking cursor.

---

- 4 Use the keypad to enter a telephone number, and press  to place a call to the entered number.

Press  to delete any unwanted characters. Press  followed by  within 2 seconds to insert a pause. The P replaces \* and # on the display.

If successful, the first line of the display shows `Phone Call`. The second line of the display shows the dialed telephone number.

If an invalid telephone number is selected, the display shows a negative mini notice, `Phone Call Failed, Resource Not Available, or Invalid Permissions`.

If  is pressed with no telephone number entered, the radio sounds a positive indicator tone then a negative indicator tone. The display remains the same.

- 5 Long press  to end the call.  
The first line of the display shows `Ending`. The second line of the display shows `Phone Call....`  
The display shows `Phone Call Ended`.

## Making an Outbound Private Phone Call from Contacts

### NOTICE:

If the Phone Manual Dial is disabled in MOTOTRBO Connect Plus Option Board CPS, the `Phone Number` item will **not** be displayed in the Menu.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts and press  to select.

---

- 3 Press  or  to Manual Dial and press  to select.

---

- 4 Press  or  to Phone Number and press  to select.

The first line of the display shows Number, the second line of the display shows a blinking cursor.

- 5 Use the keypad to enter a telephone number, and press  to place a call to the entered number.  
If the **PTT** button is pressed, the display shows a negative mini notice, Press OK to Send and returns to the previous screen.

Press  to delete any unwanted characters. Press  followed by  within 2 seconds to insert a pause. The P replaces \* and # on the display.

If successful, the first line of the display shows Phone Call. The second line of the display shows the dialed telephone number.

If  is pressed with no telephone number entered, the radio sounds a positive indicator tone then a negative indicator tone. The display remains the same.

- 6 Long press  to end the call.  
The first line of the display shows Ending. The second line of the display shows Phone Call....  
The display shows Phone Call Ended.

## Waiting for the Channel Grant in an Outbound Private Phone Call

When you make a Private Phone Call, the first line of the display shows `Phone Call`. The second line of the display shows the dialed telephone number.

When the call is connected, the Phone Call as Private Call icon appears in the top right corner. The first line of the display shows the telephone number.

If unsuccessful, the display shows a negative mini notice, `Phone Call Failed, Resource Not Available, or Invalid Permissions`.

Long press  to end the call.

The display returns to the previous screen.

## Making a Buffered Over-Dial in a Connected Outbound Private Phone Call

During the call, the Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows the telephone number.

- 1 Use the keypad to enter the digits.

Press  to delete any unwanted characters. Press

 followed by  within 2 seconds to insert a pause. The P replaces \* and # on the display.

The first text line of the display shows `Extra Digits`, the second text line of the display shows the entered extra digits.

- 2 Press the  button.

If the **PTT** button is pressed, the display shows a negative mini notice, `Press OK to Send` and returns to the previous screen.

The Phone Call as Private Call icon appears in the top right corner. The first text line of the display

shows the telephone number with the over-dial digits appended.

### 3 Do one of the following.

- Press  to return to the Phone Call screen.
- Long press  to end the call.

## Making a Live Over-Dial in a Connected Outbound Private Phone Call

During the call, the Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows the telephone number.

### 1 Press the **PTT** button and use the keypad to enter the digits.

The Phone Call as Private Call icon appears in the top right corner. The first text line of the display shows the telephone number with the over-dial digits appended.

### 2 Long press to end the call.

The first line of the display shows `Ending`. The second line of the display shows `Phone Call....`

The display shows `Phone Call Ended`.

## Advanced Features in Connect Plus Mode

This chapter explains the operations of the features available in your radio.

### Home Channel Reminder

This feature provides a reminder when the radio is not set to the home channel for a period of time.

If this feature is enabled by using the CPS, the Home Channel Reminder tone and announcement sound, the first line of the display shows `Non` and the second line shows `Home Channel` periodically when the radio is not set to the home channel for a period of time.

You can respond to the reminder by performing one of the following actions:

- Return to the home channel.
- Mute the reminder temporarily by using the programmable button.
- Set a new home channel by using the programmable button.

## Auto Fallback

Auto Fallback is a system feature that allows you to continue to make and receive non-emergency calls on the selected Group Contact in the event of certain types of Connect Plus system failures.

If one of these failures occurs, your radio attempts to roam to a different Connect Plus site. This search process may result in your radio finding an operable Connect Plus site, or it may result in your radio finding a “Fallback Channel” (if your radio is enabled for Auto Fallback). A Fallback Channel is a repeater that is normally part of an operable Connect Plus site, but is currently unable to communicate with either its site controller or the Connect Plus network. In Fallback mode, the repeater operates as a single digital repeater. Auto Fallback Mode supports non-emergency Group Calls only. No other call types are supported in Fallback Mode.

## Indications of Auto Fallback Mode

When your radio is using a Fallback channel, you hear the intermittent “Fallback Tone” approximately once every 15 seconds (except while transmitting). The display periodically shows a brief message, “Fallback Channel”. Your radio only permits PTT on the selected Group Contact (Group Call, Multigroup Call, or Site All Call). It does not allow you to make other types of calls.

## Making/Receiving Calls in Fallback Mode

### NOTICE:

Calls are heard only by radios that are monitoring the same Fallback channel and selected to the same Group. Calls are not networked to other sites or other repeaters.

Emergency voice calls or Emergency Alerts are not available in Fallback mode. If you press the emergency button in Fallback mode, the radio provides an invalid key press tone. Display-equipped radios also show the message, "Feature not available".

Private (radio to radio) and Phone calls are not available in Fallback mode. If you attempt a call to a private contact, you will receive a denial tone. At this point you should select a desired group contact. Other non-supported calls include Remote Monitor, Call Alert, Radio Check, Radio Enable, Radio Disable, Text messaging, Location Updates, and packet data calls.

Enhanced Traffic Channel Access (ETCA) is not supported in Auto Fallback mode. If two or more radio users press **PTT** at the same time (or at

almost the same time), it is possible that both radios transmit until **PTT** is released. In this event, it is possible that none of the transmissions will be understood by receiving radios.

Making calls in Fallback mode is similar to normal functioning. Simply select the group contact you wish to use (using the radio's normal channel selection method), and then press the **PTT** to start your call. It is possible that the channel may be in use already by another group. If the channel is in use, you receive a busy tone and the display will say "Channel Busy". You may select Group, Multi-group or Site All Call contacts using your radio's normal channel selection method. While the radio is operating on the Fallback Channel, the Multigroup operates just like other Groups. It is only heard by radios that are currently selected to the same Multi-group.

## Returning to Normal Operation

If the site returns to normal trunking operation while you are in range of your Fallback repeater, your radio automatically exits Auto Fallback mode. You hear a registration "beep" when the radio successfully registers. If you are in the range of an operable site (that is not in Fallback mode), you may press the Roam Request button (if programmed for your radio) to force your radio to search for and register on

an available site. If no other site is available, your radio returns to Auto Fallback mode after searching is complete. If you drive out of coverage of your Fallback repeater, your radio enters Search mode (display indicates Searching).

### Radio Check

If enabled, this feature allows you to determine if another radio is active in a system without disturbing the user of that radio. No audible or visual notification is shown on the target radio.

This feature is only applicable for subscriber aliases or IDs.

### Sending a Radio Check

- 1 Access the Radio Check feature.

Radio Control	Steps
Programmed Radio Check button	a Press the programmed <b>Radio Check</b> button.

Radio Control	Steps
	b Press  or  to the required subscriber alias or ID and press  to select.
Menu	<ul style="list-style-type: none"> <li>a Press  to access the menu.</li> <li>b Press  or  to <b>Contacts</b> and press  to select.</li> <li>c Press  or  to the required subscriber alias or ID and press  to select.</li> <li>d Press  or  to <b>Radio Check</b> and press  to select.</li> </ul>

The display shows the Target Alias, indicating the request is in progress. The LED lights up solid green.

## 2 Wait for acknowledgment.

If the target radio is active in the system, a tone sounds and the display briefly shows `Target Radio Available`.

If the target radio is not active in the system, a tone sounds and the display briefly shows `Target Radio Not Available`.

Radio returns to the subscriber alias or ID screen when initiated via Menu.

Radio returns to the Home Screen if initiated via the programmable button.

## Remote Monitor

Use the Remote Monitor feature to turn on the microphone of a target radio (subscriber alias or IDs only). The green LED will blink once on the target subscriber. You can use this feature to monitor, remotely, any audible activity surrounding the target radio.

Your radio must be programmed to allow you to use this feature.

## Initiating Remote Monitor

### NOTICE:

Remote Monitor automatically stops after a programmed duration or when there is any attempt to initiate transmission, change channels or power down the radio.

### 1 Access the Remote Monitor feature.

Radio Control	Steps
<b>Programmed Remote Monitor Button</b>	<p><b>a</b> Press the programmed <b>Remote Monitor</b> button.</p> <p><b>b</b> Press  or  to the required subscriber alias or ID and press  to select.</p>
<b>Menu</b>	<p><b>a</b> Press  to access the menu.</p> <p><b>b</b> Press  or  to Contacts and press  to select.</p>

Radio Control	Steps
	<p><b>c</b> Press  or  to the required subscriber alias or ID and press  to select.</p> <p><b>d</b> Press  or  to Manual Dial and press  to select.</p> <p><b>e</b> Press  or  to Remote Mon. and press  to select.</p>

The first text line shows Rem. Monitor. The second text line displays the Target Alias, indicating the request is in progress. The LED lights up blinking green.

## 2 Wait for acknowledgment.

If successful, a positive indicator tone sounds and the display momentarily shows Rem. Monitor Successful. Your radio starts playing audio from the monitored radio for a programmed duration and

display shows Rem. Monitor, followed by target alias. Once the timer expires, the radio sounds an alert tone and the LED turns off.

If unsuccessful, the radio sounds a negative indicator tone the display shows Rem. Monitor Failed.

## Scan

This feature allows your radio to monitor and join calls for groups defined in a pre-programmed scan list. When scan is enabled, the scan icon appears on the status bar and the LED blinks yellow when idle.

## Starting and Stopping Scan

### NOTICE:

This procedure turns the Scan feature On or Off for all Connect Plus zones with the same Network ID as your currently selected zone. It is important to note that even when the Scan feature is turned on via this procedure, scan may still be disabled for some (or all) groups on your scan list. See [Editing the Scan List on page 242](#) for more information.

You can start and stop scanning by pressing the programmed **Scan** button **OR** follow the procedure described next.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan and press  to select.

---

- 3 Press  or  to Turn On or Turn Off and press  to select.
  - The display shows Scan On if scan is enabled.
  - The Scan menu shows Turn Off if scan is enabled.
  - The display shows Scan Off if scan is disabled.
  - The Scan menu shows Turn On if scan is disabled.

## Responding to a Transmission During a Scan

During scanning, your radio stops on a group where activity is detected. The radio continuously listens for any member in the scan list when idle on the control channel.

- 1 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

---

- 2 Press the **PTT** button during hang time.  
The LED lights up solid green.

---

- 3 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

---

- 4 Release the **PTT** button to listen.  
If you do not respond within the hang time, the radio returns to scanning other groups.

## User Configurable Scan

If the Edit List menu is enabled, a user is able to Add and Remove the scan members from the Add Member menu. A

Scan List member must be a regular Group Contact (for example, not Multi-group or Site All Call/Network Wide All Call) that is currently assigned to a Channel Selector position in a Connect Plus Zone with the same Network ID as the currently selected Zone. The Talkgroup alias must not match any Talkgroup that has been included in the current Zone Scan List.

Scan can be turned on or off from the menu or by pressing a programmed **Scan On/Off** button.

This feature functions only when the radio is not currently involved in a call. If you are presently listening to a call, your radio cannot scan for other group calls, and is therefore unaware they are in progress. Once your call is finished, your radio returns to the control channel time slot and is able to scan for groups that are in the scan list.

## Turning Scan On or Off

### NOTICE:

This procedure turns the Scan feature On or Off for all zones with the same Network ID as your currently selected zone. It is important to note that even when the Scan feature is turned on via this procedure, scan may still be disabled for some (or all) groups on your scan list. See the next section for more information.

If Scan is turned on, the Scan icon appears on your display. When Scan is on and you are not participating in a call, the LED blinks green and yellow.

The procedure for turning Scan on or off depends on how your radio is programmed. If programmed with a Scan On/Off button, use the button to toggle the feature on or off. If your radio has been programmed so that Scan can be turned on or off via the menu, follow the procedure described next.

1 Press  to access the menu.

2 Press  or  to Scan and press  to select.

- 3 Press  or  to Turn On or Turn Off and press  to select.
- The display shows `Scan On` momentarily if scan is disabled.
  - The display shows `Scan Off` momentarily if scan is enabled.

## Editing the Scan List

### NOTICE:

If the scan list entry happens to be the currently selected group, the radio listens for activity on this group regardless of whether the list entry currently shows a check mark or not. Whenever a radio is not in a call, the radio listens for activity on its Selected Group, Multi-group, the Site All Call, and its Default Emergency Revert Group (if configured for one). This operation cannot be disabled. If Scan is enabled the radio will also listen for activity on enabled Zone Scan List members.

Your scan list determines which groups can be scanned. The list is created when your radio is programmed. If your

radio has been programmed to allow you to edit the scan list, you can:

- Enable/disable scan for individual groups on the list.
- Add and Remove the scan members from the Add Member menu. Refer to [Add or Delete a Group via the Add Members Menu on page 243](#).

### NOTICE:

A Scan List member must be a regular Group Contact (not Multi-group or Site All Call/Network Wide All Call) that is currently assigned to a Channel Selector position in a Connect Plus Zone with the same Network ID as the currently selected Zone. The Talkgroup alias must not match any Talkgroup that has been included in the current Zone Scan List.

- 1 Press  to access the menu.
- 
- 2 Press  or  to View/Edit List and press  to select.
- 
- 3 Press  or  to the desired Group name.

If a check mark precedes the Group name, then scan is currently enabled for this Group.

If there is no check mark preceding the Group name, then scan is currently disabled for this Group.

- 4  to select the desired Group.

The display shows `Enable` if scan is currently disabled for the Group.

The display shows `Disable` if scan is currently enabled for the Group.

- 5 Select the displayed option (`Enable` or `Disable`) and press  to select.

Depending on which option was selected, the radio momentarily displays `Scan Enabled` or `Scan Disabled` as confirmation.

The radio displays the Zone scan list again. If scan was enabled for the Group, the check mark displays before the Group name. If scan was disabled for the Group, the check mark is removed before the Group name.

## Add or Delete a Group via the Add Members Menu

The Connect Plus radio does not allow a duplicate group number or a duplicate group alias to be placed on a zone scan list (or to be shown as a "scan candidate"). Thus, the list of "scan candidates" described in [step 6](#) and [step 7](#) sometimes changes after adding or deleting a group from the zone scan list.

If your radio has been programmed to allow you to edit the scan list, you can use the Add Members menu to add a group to the scan list of the currently selected zone, or to delete a group from the scan list of the currently selected zone.

- 1 Press  to access the menu.

- 2 Press  or  to Scan option and press  to select.

- 3 Press  or  to <Add Members> and press  to select.

The display shows Add Members from Zone n (n = the Connect Plus zone number of the first Connect Plus zone in your radio with the same Network ID as your currently selected zone).

- 4 Do one of the following.

- If the group you want to add to the scan list is assigned to a channel selector position in that zone, go to [step 6](#).
- If the group you want to add to the scan list is assigned to a channel selector position in a different Connect Plus zone, go to [step 5](#).

- 5 Press  or  to scroll a list of Connect Plus zones that have the same Network ID as the currently selected zone.

- 6 After locating the Connect Plus zone where the desired group is assigned to a channel selector position, press  to select.

Your radio displays the first entry in a list of groups assigned to a channel position in that zone. The groups on the list are called "scan candidates", because they can be added to the scan list of your currently selected zone (or they are already on the zone scan list).

If the zone does not have any groups that can be added to the scan list, the radio displays No Candidates.

- 7 Press  or  to scroll through the list of candidate groups.

If a plus sign (+) is displayed immediately before the group alias, this indicates the group is currently on the scan list for the selected zone.

If the plus sign (+) is not displayed immediately before the alias, the group is not currently on the scan list, but can be added.

- 8 Press  when the desired group alias is displayed.

If this group is not currently on the scan list for the currently selected zone, the **Add (Group Alias)** message is displayed.

If this group is already on the scan list for the currently selected zone, the **Delete (Group Alias)** message is displayed.

- 9 Press  to accept the displayed message (**Add** or **Delete**).

If deleting a group from the list, you will know the operation is successful because the plus sign (+) will no longer display immediately before the alias.

If adding a group to the list, you will know the operation is successful because the plus sign (+) will display before the alias.

If you are attempting to add a group, and the list is already full, the radio displays **List Full**. If this should occur, it will be necessary to delete a group from the scan list prior to adding a new one.

- 10 When finished, press  as many times as necessary to return to the desired menu.

## Understanding Scan Operation

### NOTICE:

If the Radio joins a call for a Zone Scan List member from a different Zone and Call Hang Timer expires before you are able to respond, in order to respond, you must navigate to the Zone and Channel of the Scan List Member and start a new call.

There are some circumstances in which you can miss calls for groups that are in your scan list. When you miss a call for one of the following reasons, this does not indicate a problem with your radio. This is a normal scan operation for Connect Plus.

- Scan feature is not turned on (check for the scan icon on the display).
- Scan list member has been disabled via the menu (see [Editing the Scan List on page 242](#)).
- You are participating in a call already.
- No member of the scanned group is registered at your site (Multisite systems only).

## Scan Talkback

If your radio scans into a call from the selectable group scan list, and if the **PTT** button is pressed during the scanned call, the operation of the radio depends on whether Scan Talkback was enabled or disabled during radio programming. Check with your dealer or system administrator for more information.

### Scan Talkback Disabled

The radio leaves the scanned call and attempts to transmit on the contact for the currently selected channel position. After the Call Hang Time on the currently selected contact expires, the radio returns to the home channel and starts the Scan Hang Time Timer. The radio resumes group scan after its Scan Hang Time Timer expires.

### Scan Talkback Enabled

If the **PTT** button is pressed during the Group Hang Time of the scanned call, the radio attempts to transmit to the scanned group.

#### NOTICE:

If you scan into a call for a group that is not assigned to a channel position in the currently selected zone and you miss the Hang Time of the call, switch to the proper zone and then select the channel position of the group to talk back to that group.

## Editing Priority for a Talkgroup

The Priority Monitor feature allows the radio to automatically receive transmission from the talkgroup with higher priority when it is in another call. A tone sounds when the radio switches to the call with higher priority. There are two levels of priority for the talkgroups: P1 and P2. P1 has higher priority than P2.

#### NOTICE:

If Default Emergency Revert Group ID is configured in MOTOTRBO Connect Plus Option Board CPS, there are three levels of priority for talkgroups: P0, P1, and P2. P0 is the permanent Emergency Revert Group ID and the highest priority. Check with your dealer or system administrator for more information.

1

Press  to access the menu.

2 Press  or  to Scan and press  to select.

---

3 Press  or  to View/Edit List and press  to select.

---

4 Press  or  to the required talkgroup and press  to select.

---

5 Press  or  to Edit Priority and press  to select.

---

6 Press  or  to the required priority level and press  to select.

The display shows positive mini notice before returning to the previous screen. The priority icon appears on the left of the talkgroup.

---

## Contacts Settings

### NOTICE:

You can add, or edit subscriber IDs for Connect Plus Contacts. Deleting subscriber IDs can only be performed by your dealer.

If the Privacy feature is enabled on a channel, you can make a privacy-enabled voice call on that channel. Only target radios with the same Privacy Key, or the same Key Value and Key ID as your radio are able to unscramble the transmission.

Access to Contact Lists depends on the zone configuration:

- If only one zone is configured in the radio, the Contact List directly displays the list from the current selected zone.
- If multiple zones are configured in the radio, the Zone Contact Folder displays all zones with identical network IDs as the current selected zone. The user can access the contacts in these zones.

Contacts provide “address-book” capabilities on your radio. Each entry corresponds to an alias or ID that you use to initiate a call.

Each zone provides a Contact List with up to 100 contacts. The following contact types are available:

- Private Call
- Group Call
- Multigroup Call
- Site All Call Voice
- Site All Call Text
- Dispatch Call

The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.

### Making a Private Call from Contacts

- 1 Press  to access the menu.
- 2 Press  or  to `Contacts` and press  to select.  
The entries are alphabetically sorted.
- 3 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

- 4 Press the **PTT** button to make the call.  
The LED lights up solid green.

- 5 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

- 6 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green and the display shows the transmitting user's ID.

If there is no voice activity for a predetermined period of time, the call ends.

You hear a short tone. The display shows `Call Ended`.

### Making a Call Alias Search

You can also use alias or alphanumeric search to retrieve the required subscriber alias.

This feature is only applicable while in Contacts.

- 1 Press  to access the menu.
- 
- 2 Press  or  to `Contacts` and press  to select.

The entries are alphabetically sorted.

- 3 Key in the first character of the required alias, and then press the  or  button to locate the required alias.

- 4 Hold the microphone 1 to 2 inches (2.5 to 5.0 cm) from your mouth.

- 5 Press the **PTT** button to make the call.  
The LED lights up solid green. The display shows the destination alias.

- 6 Wait for the Talk Permit Tone to finish (if enabled), and speak clearly into the microphone.

- 7 Release the **PTT** button to listen.

When the target radio responds, the LED blinks green.

If there is no voice activity for a predetermined period of time, the call ends.

The display shows `Call Ended`.

## Adding a New Contact

- 1 Press  to access the menu.
- 
- 2 Press  or  to `Contacts` and press  to select.

- 3 Press  or  to `New Contact` and press  to select.

- 4 Use the keypad to enter the contact number and press  to confirm.

- 5 Use the keypad to enter the contact name and press  to confirm.

- 6 If adding a Radio Contact, press  or  to the required ringer type and press  to select. The radio sounds a positive indicator tone and the display shows `Contact Saved`.
- 

## Call Indicator Settings

This feature allows the radio users to configure call or text message ringing tones.

### Activating and Deactivating Call Ringers for Call Alert

You can select, or turn on or off ringing tones for a received Call Alert.

- 1 Press  to access the menu.
- 
- 2 Press  or  to `Utilities` and press  to select.
- 

- 3 Press  or  to `Radio Settings` and press  to select.
- 

- 4 Press  or  to `Tones/Alert` and press  to select.
- 

- 5 Press  or  to `Call Ringers` and press  to select.
- 

- 6 Press  or  to `Call Alert` and press  to select.

The current tone is indicated by a .

---

- 7 Press  or  to the required tone and press  to select.

 appears beside selected tone.

---

## Activating and Deactivating Call Ringers for Private Calls

You can turn on or off the ringing tones for a received Private Call.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Utilities` and press  to select.

---

- 3 Press  or  to `Radio Settings` and press  to select.

---

- 4 Press  or  to `Tones/Alerts` and press  to select.

---

- 5 Press  or  to `Call Ringers` and press  to select.

---

- 6 Press  or  to `Private Call` and press  to select.

---

- 7 Press  to enable/disable the Private Call ringing tones.

The display shows  beside `Enabled`, if Private Call ringing tones are enabled.

The  is not displayed when Private Call ringing tones are disabled.

---

## Activating and Deactivating Call Ringers for Text Message

You can turn on or off the ringing tones for a received Text Message.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Utilities` and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to Tones/Alerts and press  to select.

---

5 Press  or  to Call Ringers and press  to select.

---

6 Press  or  to Text Message and press  to select.

The current tone is indicated by a .

---

7 Press  or  to the required tone and press  to select.

 appears beside selected tone.

---

## Selecting a Ring Alert Type

### NOTICE:

The programmed **Ring Alert Type** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

You can program the radio calls to one predetermined vibrate call. If All Tones status is disabled, the radio displays the All Tone Mute icon. If All Tones status is enabled, the related ring alert type is displayed.

The radio vibrates once if it is a momentary ring style. The radio vibrates repetitively if it is a repetitive ring style. When set to Ring and Vibrate, the radio sounds a specific ring tone if there is any incoming radio transaction (for example, Call Alert or Message). It sounds like a positive indicator tone or missed call.

## Escalating Alarm Tone Volume

You can program your radio to continually alert you when a radio call remains unanswered. This is done by

automatically increasing the alarm tone volume over time. This feature is known as Escalert.

## Call Log Features

Your radio keeps track of all recent outgoing, answered, and missed Private Calls. Use the call log feature to view and manage recent calls.

You can perform the following tasks in each of your call lists:

- Delete
- View Details

## Viewing Recent Calls

The lists are Missed, Answered, and Outgoing.

- 1 Press  to access the menu.

---

- 2 Press  or  to Call Log and press  to select.

- 3 Press  or  to preferred list and press  to select.

The display shows the most recent entry at the top of the list.

- 4 Press  or  to view the list.  
Press the **PTT** button to start a Private Call with the current selected alias or ID.

## Deleting a Call from a Call List

- 1 Press  to access the menu.

---

- 2 Press  or  to Call Log and press  to select.

---

- 3 Press  or  to the required list and press  to select.

When you select a call list and it contains no entries, the display shows **List Empty**, and sounds a low tone if Keypad Tones are turned on .

4 Press  or  to the required alias or ID and press  to select.

5 Press  or  to **Delete** and press  to select.

6 Do one of the following:

- Press  to select **Yes** to delete the entry. The display shows **Entry Deleted**.
- Press  or  to **No**, and press the  button to return to the previous screen.

## Viewing Details from a Call List

1 Press  to access the menu.

2 Press  or  to **Call Log** and press  to select.

3 Press  or  to the required list and press  to select.

4 Press  or  to the required alias or ID and press  to select.

5 Press  or  to **View Details** and press  to select.  
Display shows details of call list.

## Call Alert Operation

Call Alert paging enables you to alert a specific radio user to call you back when they are able to do so.

This feature is accessible through the menu by using **Contacts**, manual dial or a programmed **One Touch Access** button.

## Responding to Call Alerts

Follow the procedure to respond to Call Alerts on your radio.

When you receive a Call Alert:

- A repetitive tone sounds.
- The yellow LED blinks.
- The display shows the notification list listing a Call Alert with the alias or ID of the calling radio.

Depending on the configuration by your dealer or system administrator, you can respond to a Call Alert by doing one of the following:

- Press the **PTT** button and respond with a Private Call directly to the caller.
- Press the **PTT** button to continue normal talkgroup communication. The Call Alert is moved to the Missed Call option at the Call Log menu. You can respond to the caller from the Missed Called log.

See [Notification List on page 178](#) and [Call Log Features on page 120](#) for more information.

## Making a Call Alert from the Contact List

- 1 Press  to access the menu.

---

- 2 Press  or  to `Contacts` and press  to select.

---

- 3 Use one of the steps described next to select the required subscriber alias or ID:
  - select the subscriber alias directly
    - Press  or  to the required subscriber alias and press  to select.
  - use the `Manual Dial` menu
    - Press  or  to `Manual Dial` and press  to select.
    - The `Manual Dial` text entry screen shall be displayed. Enter the Subscriber ID and press  .

- 4 Press  or  to Call Alert and press  to select.

The display shows Call Alert: <Subscriber Alias or ID>Call Alert and the subscriber alias or ID, indicating that the Call Alert has been sent.

The LED lights up solid green when your radio is sending the Call Alert.

If the Call Alert acknowledgement is received, the display shows Call Alert Successful.

If the Call Alert acknowledgement is not received, the display shows Call Alert Failed.

---

## Making a Call Alert with the One Touch Access Button

Press the programmed **One Touch Access** button to make a Call Alert to the predefined alias.

The display shows Call Alert and the subscriber alias or ID, indicating that the Call Alert has been sent.

The LED lights up solid green when your radio is sending the Call Alert.

If the Call Alert acknowledgement is received, the display shows Call Alert Successful.

If the Call Alert acknowledgement is not received, the display shows Call Alert Failed.

---

## Mute Mode

Mute Mode provides an option to the user to silence all audio indicators of the radio.

Once Mute Mode feature is initiated, all audio indicators are muted except higher priority features such as Emergency operations.

When Mute Mode is exited, the radio resumes playing ongoing tones and audio transmissions.

### NOTICE:

This is a purchasable feature. Check with your dealer or system administrator for more information.

## Turning On Mute Mode

Follow the procedure to turn on Mute Mode.

Access this feature by using the programmed **Mute Mode** button.

---

The following occurs when Mute mode is enabled:

- Positive Indicator Tone sounds.
- Display shows `Mute Mode On.`
- The red LED light starts blinking and remains blinking until Mute Mode is exited.
- Display shows **Mute Mode** icon on home screen.
- Radio is muted.
- Mute Mode Timer begins counting down the duration that is configured.

## Setting Mute Mode Timer

Mute Mode feature can be enabled for a pre-configured amount of time by setting the Mute Mode Timer. The timer duration is configured in the radio menu and can range between 0.5–6 hours. Mute Mode is exited once the timer expires.

If the timer is left at 0, the radio remains in Mute mode for an indefinite period until the programmed **Mute Mode** button is pressed.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Mute Timer. Press  to select.

---

- 5 Press  or  to edit the numeric value of each digit, and press .

---

## Exiting Mute Mode

This feature can be exited automatically once the Mute Mode Timer expires.

Do one of the following to exit Mute mode manually:

- Press the programmed **Mute Mode** button.
- Press the **PTT** button on any entry.

---

The following occurs when Mute mode is disabled:

- Negative Indicator Tone sounds.
- Display shows `Mute Mode Off`.
- The blinking red LED turns off.
- **Mute Mode** icon disappears from home screen.
- Your radio unmutes and speaker state is restored.
- If the timer has not expired, Mute mode timer is stopped.

**NOTICE:**

Mute Mode is also exited if the user transmits voice or switches to an unprogrammed channel.

## Emergency Operation

**NOTICE:**

If your radio is programmed for Silent or Silent with Voice emergency initiation, in most cases it automatically exits silent operation after the Emergency Call or Emergency Alert is finished. The exception to this rule is when Emergency Alert is the configured Emergency Mode and Silent is the configured Emergency Type. If your radio is programmed in this manner, the silent operation continues until you cancel silent operation by pressing **PTT** or the button configured for Emergency Off.

Emergency voice calls and Emergency Alerts are not supported when operating in Connect Plus Auto Fallback mode. For more information see the [Auto Fallback on page 235](#).

An Emergency Alert is used to indicate a critical situation. You can initiate an Emergency at any time on any screen display, even when there is activity on the current channel. Pressing the **Emergency** button initiates the programmed Emergency mode. The programmed Emergency mode may also be initiated by triggering the optional Man Down feature. The Emergency feature may be disabled in your radio.

Your dealer can set the duration of a button press for the programmed **Emergency** button, except for long press, which is similar with all other buttons:

#### **Short press**

Between 0.05 seconds and 0.75 seconds.

#### **Long press**

Between 1.00 second and 3.75 seconds.

The **Emergency** button is assigned with the Emergency On/Off feature. Check with your dealer for the assigned operation of the **Emergency** button.

- If the short press for the **Emergency** button is assigned to turn on the Emergency mode, then the long press for the **Emergency** button is assigned to exit the Emergency mode.
- If the long press for the **Emergency** button is assigned to turn on the Emergency mode, then the short press for the **Emergency** button is assigned to exit the Emergency mode.

When your radio is selected to a Connect Plus zone, it supports three Emergency modes:

#### **Emergency Call**

You must press the **PTT** button to talk on the assigned emergency time slot.

#### **Emergency Call with Voice to Follow**

For the first transmission on the assigned emergency time slot, the microphone is automatically unmuted and you may talk without pressing the **PTT** button. The microphone stays “hot” in this fashion for a time period programmed into the radio. For subsequent transmissions in the same Emergency call, you must press the **PTT** button.

#### **Emergency Alert**

An Emergency Alert is not a voice call. It is an emergency notification that is sent to radios that are configured to receive these alerts. The radio sends an emergency alert by using the control channel of the currently registered site. The Emergency Alert is received by radios in the Connect Plus network that are programmed to receive them (no matter which network site they are registered to).

Only one of the Emergency Modes can be assigned to the Emergency button per zone. In addition, each Emergency mode has the following types:

#### **Regular**

Radio initiates an Emergency and shows audio and/or visual indicators.

## Silent

Radio initiates an Emergency without any audio or visual indicators. The radio suppresses all audio or visual indications of the Emergency until you press the **PTT** button to start a voice transmission.

## Silent with Voice

The same as Silent operation, except that the radio also unmutes for some voice transmissions.

## Receiving an Incoming Emergency

Your radio may be programmed to sound an alert tone and also display information about the incoming Emergency. If so programmed, upon receiving the incoming Emergency, the display shows the Emergency Details screen with the emergency icon, the Alias or ID of the radio that requested the Emergency, the Group Contact being used for the Emergency, and one additional line of information. The additional information is the name of the zone that contains the Group Contact.

At the present time, the radio displays only the most recently decoded Emergency. If a new Emergency is received before the prior Emergency is cleared, the details for the new Emergency replace the details of the previous Emergency.

Depending on how your radio has been programmed, the Emergency Details screen (or Alarm List screen) will stay on your radio display even after the Emergency ends. You can save the emergency details to the Alarm List, or you can delete the emergency details as described in the following sections.

## Saving the Emergency Details to the Alarm List

Saving the emergency details to the Alarm List allows you to view the details again at a later time by selecting Alarm List from the Main Menu.

- 1 While the Emergency Details (or Alarm List) screen is displayed, press  .  
The **Exit Alarm List** screen displays.

- 
- 2 Perform one of the following actions:
    - Select **Yes** and press  to save the emergency details to the Alarm List, and to exit the Emergency Details (or Alarm List) screen.

- Select **No** and press  to return to the Emergency Details (or Alarm List) screen.
- 

## Deleting the Emergency Details

- 1 While the Emergency Details screen is displayed, press  .

The **Delete** screen displays.

---

- 2 Perform one of the following actions:

- Select **Yes** and press  to delete the emergency details.
  - Select **No** and press  to return to the Emergency Details screen.
- 

## Responding to an Emergency Call

### NOTICE:

If you do not respond to the Emergency Call within the time allotted for the Emergency Call Hang Time, the Emergency call will end. If you want to speak to the group after the Emergency Call Hang Time expires, you must first select the channel position assigned to the group (if not already selected). Then, press **PTT** to start a non-Emergency Call to the group.

- 1 When receiving an Emergency Call, press any button to stop all Emergency Call received indications.
- 
- 2 Press the **PTT** button to initiate a voice transmission on the Emergency group.  
All radios that are monitoring this group hear your transmission.
- 
- 3 Wait for the Talk Permit Tone to finish (if enabled) and speak clearly into the microphone.  
The LED lights up green.
-

**4** Release the **PTT** button to listen.

When the emergency initiating radio responds, the LED blinks green. You see the Group Call icon, the group ID, and transmitting radio ID on your display.

---

## Responding to an Emergency Alert

**NOTICE:**

The Group contact used for the Emergency Alert should not be used for voice communication. This could prevent other radios from sending and receiving Emergency Alerts on the same group.

An Emergency Alert from a radio indicates that the user is in an urgent situation. You may respond to the alert by initiating a private call to the radio who declared the emergency, initiating a group call to a designated talk group, sending the radio a Call Alert, initiating a Remote Monitor of that radio, etc. The proper response is determined by your organization and the individual situation.

## Ignore Emergency Revert Call

This feature enhancement is to provide an option for the radio to ignore an active Emergency Revert Call.

To enable Ignore Emergency Revert Call, the radio must be configured at the Connect Plus Customer Programming Software (CPCPS).

When the feature is enabled, the radio does not display Emergency Call indications and does not receive any audio on the default Emergency Revert Group ID.

Check with your dealer or system administrator for more information.

## Initiating an Emergency Call

### NOTICE:

If your radio is set to Silent, it does not display any audio or visual indicators during Emergency mode until you press the **PTT** button to initiate a voice transmission.

If your radio is set to Silent with Voice, it does not initially display any audio or visual indicators that the radio is in Emergency mode. However, your radio unmutes for the transmissions of radios responding to your emergency. The emergency indicators only appear once you press the **PTT** button to initiate a voice transmission from your radio.

For both "Silent" and "Silent with Voice" operation, the radio automatically exits silent operation after the Emergency Call is finished.

- 1 Press the programmed **Emergency** button.
- 2 Press the **PTT** button to initiate a voice transmission on the Emergency group.

When you release the **PTT** button, the Emergency call continues for the time allotted for the Emergency Call Hang Time.

If you press the **PTT** button during this time, the Emergency call continues.

## Initiating an Emergency Call with Voice to Follow

Your radio must be programmed for this type of operation.

When enabled for this operation, when you press the programmed **Emergency** button, and when your radio receives the time slot assignment, the microphone is automatically activated without pressing the **PTT** button. This activated microphone state is also known as "hot mic". The "hot mic" applies to the first voice transmission from your radio during the Emergency call. For subsequent transmissions in the same Emergency call, you must press the **PTT** button.

- 1 Press the programmed **Emergency** button.
- 2 The microphone remains active for the "hot mic" time specified in your radio codeplug programming.  
During this time, the LED lights up green.

- 3 Press and hold the **PTT** button to talk longer than the programmed duration.
- 

## Initiating an Emergency Alert

### NOTICE:

If your radio is programmed for "Silent" or "Silent with Voice", it will not provide any audio or visual indications that it is sending an Emergency Alert. If programmed for "Silent", the silent operation continues indefinitely until you press PTT or the button configured for "Emergency Off". If programmed for "Silent with Voice", the radio automatically cancels silent operation when the site controller broadcasts the Emergency Alert.

Press the orange **Emergency** button.

Upon transmitting the Emergency Alert to the site controller, the radio display shows the Emergency icon, the Group contact used for the Emergency Alert, and TX Alarm.

---

Once the Emergency Alert is successfully sent and is being broadcast for other radios to hear, a positive indicator tone sounds and the radio displays Alarm Sent. If the

Emergency Alert is unsuccessful, a negative indicator tone sounds and the radio displays Alarm Failed.

## Exiting Emergency Mode

### NOTICE:

If the Emergency call ends due to the expiration of the Emergency Hang Time, but the emergency condition is not over, press the **Emergency** button again to restart the process.

If you initiate an Emergency Alert by pressing the programmed **Emergency** button, your radio automatically exits Emergency mode after receiving a response from the Connect Plus system.

If you initiate an Emergency call by pressing the programmed **Emergency** button, your radio will be assigned a channel automatically when one becomes available. Once your radio has transmitted a message indicating the emergency, you cannot cancel your Emergency call. However, if you pressed the button by accident or the emergency no longer exists, you may wish to say this over the assigned channel. When you release the **PTT** button, the Emergency call is discontinued after the Emergency Call Hang Time expires.

If your radio was configured for Emergency with Voice to Follow, use the “hot mic” period to explain your error, then press and release the **PTT** button to discontinue the transmission. The Emergency call is discontinued after the Emergency Call Hang Time expires.

## Text Messaging

Your radio is able to receive data, for example a text message, from another radio or a text message application.

There are two types of text messages, Digital Mobile Radio (DMR) Short Text Message and text message. The maximum length of a DMR Short Text Message is 23 characters. The maximum length of a text message is 280 characters, including the subject line. The subject line only appears when you receive messages from e-mail applications.

### NOTICE:

The maximum character length is only applicable for models with the latest software and hardware. For radio models with older software and hardware, the maximum length of a text message is 140 characters. Check with your dealer or system administrator for more information.

For the Arabic language, the text entry orientation is from right to left.

## Sending a Quick Text Message

Your radio supports a maximum of 10 Quick Text messages as programmed by your dealer.

While Quick Text messages are predefined, you can edit each message before sending it.

If you are sending the message, perform the following to select a recipient:

- Press  or  to the required alias and press  to select.

- Press  or  to Manual Dial, and press  to select. The first line of the display shows Number: . The second line of the display shows a blinking cursor. Key in the subscriber alias or ID and press .

The display shows *Sending Message*, confirming your message is being sent.

If the message is sent successfully, a tone sounds and the display shows *Message Sent*.

If the message cannot be sent, a low tone sounds and the display shows *Message Send Failed*.

If the text message fails to send, the radio returns you to the *Resend* option screen (see [Managing Fail-to-Send Text Messages on page 269](#)).

---

## Sending a Quick Text Message with the One Touch Access Button

You can send Quick Text messages using the programmable button programmed by your dealer.

Press the programmed **One Touch Access** button to send a predefined Quick Text message to a predefined alias.

The display shows *Sending Message*, confirming your message is being sent.

---

If the message is sent, a tone sounds and the display shows *Message Sent*.

If the message cannot be sent, a low tone sounds and the display shows *Message Send Failed*.

If the text message fails to send, the radio returns you to the *Resend* option screen (see [Managing Fail-to-Send Text Messages on page 269](#)).

## Accessing the Drafts Folder

The Drafts folder stores a maximum of ten (10) last saved messages. When the folder is full, the next saved text message automatically replaces the oldest text message in the folder.

**NOTICE:**

You can edit saved text message before sending it. Only available with a keypad microphone (see [Editing and Sending a Saved Text Message on](#)

[page 267](#). Long press  at any time to return to the Home screen.

## Viewing a Saved Text Message

- 1 Access the **Text Message** feature.

Radio Controls	Steps
<b>Programmed Text Message button</b>	Press the programmed <b>Text Message</b> button.
<b>Menu</b>	<ol style="list-style-type: none"> <li>a Press  to access the menu.</li> <li>b Press  or  to <b>Messages</b> and press  to select.</li> </ol>

[Send Feedback](#)

- 2 Press  or  to **Drafts** and press  to select.

- 3 Press  or  to the required message and press  to select.

## Editing and Sending a Saved Text Message

- 1 Press  again while viewing the message.
- 2 Press  or  to **Edit** and press  to select.  
A blinking cursor appears.
- 3 Use the keypad to type your message.  
Press  to move one space to the left. Press  or the  key to move one space to the right. Press

the  key to delete any unwanted characters.

Long press  to change text entry method.

4 Press  once message is composed.

5 Select the message recipient by:

- Press  or  to the required alias and press  to select.
- Press  or  to Manual Dial, and press  to select. The first line of the display shows Number#. The second line of the display shows a blinking cursor. Key in the subscriber alias or ID and press .

The display shows `Sending Message`, confirming your message is being sent.

If the message is sent successfully, a tone sounds and the display shows `Message Sent`.

If the message cannot be sent, a low tone sounds and the display shows `Message Send Failed`.

If the text message cannot be sent, it is moved to the Sent Items folder and marked with a Send Failed icon.

## Deleting a Saved Text Message from Drafts

1 Access the **Text Message** feature.

Radio Controls	Steps
<b>Programmed Text Message button</b>	Press the programmed <b>Text Message</b> button.
<b>Menu</b>	<p>a Press  to access the menu.</p> <p>b Press  or  to Messages and press  to select.</p>

2 Press  or  to **Drafts** and press  to select.

---

3 Press  or  to the required message and press  to select.

---

4 Press  or  to **Delete** and press  to delete the text message.

---

## Managing Fail-to-Send Text Messages

You can select one of the following options while at the **Resend** option screen:

- Resend
- Forward
- Edit

## Resending a Text Message

Press  to resend the same message to the same subscriber/group alias or ID.

If the message is sent successfully, a tone sounds and the display shows the positive mini notice.

If the message cannot be sent, the display shows the negative mini notice.

---

## Forwarding a Text Message

Select **Forward** to send the message to another subscriber/group alias or ID.

1 Press  or  to **Forward** and press  to select.

---

- 2 To select the message recipient, press  or  to the required alias or ID and press  to select.

The display shows `Sending Message`, confirming your message is being sent.

If the message is sent successfully, a tone sounds and the display shows `Message Sent`.

If the message cannot be sent, a low tone sounds and the display shows `Message Send Failed`.

## Managing Sent Text Messages

Once a message is sent to another radio, it is saved in Sent Items. The most recent sent text message is always added to the top of the Sent Items list.

The Sent Items folder is capable of storing a maximum of 30 last sent messages. When the folder is full, the next sent text message automatically replaces the oldest text message in the folder.

### NOTICE:

Long press  at any time to return to the Home screen.

## Viewing a Sent Text Message

- 1 Access the **Text Message** feature.

Radio Controls	Steps
<b>Programmed Text Message button</b>	Press the programmed <b>Text Message</b> button.
<b>Menu</b>	<p>a Press  to access the menu.</p> <p>b Press  or  to <code>Messages</code> and press  to select.</p>

- 2 Press  or  to `Sent Items` and press  to select.

- 3 Press  or  to the required message and press  to select.

The icon at the top right corner of the screen indicates the status of the message (see [Sent Item Icons on page 216](#)).

## Sending a Sent Text Message

You can select one of the following options while viewing a sent text message:

- Resend
- Forward
- Edit
- Delete

- 1 Press  again while viewing the message.

- 2  or  to one of the following options and press  to select.

Option	Steps
<b>Forward</b>	Select Forward to send the selected text message to another subscriber/group alias or ID (see <a href="#">Forwarding a Text Message on page 269</a> ).
<b>Delete</b>	Select Delete to delete the text message.
<b>Resend</b>	<p>Select Resend to resend the selected text message to the same subscriber/group alias or ID.</p> <p>The display shows <code>Sending Message</code>, confirming that the same message is being sent to the same target radio.</p> <p>If the message is sent successfully, a tone sounds and the display shows <code>Message Sent</code>.</p> <p>If the message cannot be sent, a low tone sounds and the display shows <code>Message Send Failed</code>.</p>

Option	Steps
	If the message fails to send, the radio returns you to the Resend option screen. Press  to resend the message to the same subscriber/group alias or ID.

If you exit the message sending screen while the message is being sent, the radio updates the status of the message in the Sent Items folder without any audio or visual indication.

If the radio changes mode or powers down before the status of the message in Sent Items is updated, the radio cannot complete any In-Progress messages and automatically marks it with a **Send Failed** icon.

The radio supports a maximum of five In-Progress messages at one time. During this period, the radio cannot send any new message and automatically marks it with a **Send Failed** icon.

## Deleting All Sent Text Messages from Sent Items

- 1 Access the **Text Message** feature.

Radio Controls	Steps
<b>Programmed Text Message button</b>	Press the programmed <b>Text Message</b> button.
<b>Menu</b>	<p>a Press  to access the menu.</p> <p>b Press  or  to Messages and press  to select.</p>

- 2 Press  or  to **Sent Items** and press  to select.

When you select **Sent Items** and it contains no text messages, the display shows **List Empty**, and sounds a low tone if Keypad Tones are turned on.

- 3 Press  or  to **Delete All** and press  to select.

- 4 Choose one of the following.

- Press  or  to **Yes** and press  to select. The display shows positive mini notice.
- Press  or  to **No** and press  to return to the previous screen.

## Receiving a Text Message

When your radio receives a message, the display shows the Notification List with the alias or ID of the sender and the Message icon.

You can select one of the following options when receiving a text message:

- Read
- Read Later
- Delete

## Reading a Text Message

- 1 Press  or  to **Read?** and press  to select.

Selected message in the Inbox opens.

- 2 Do one of the following:

- Press  to return to the Inbox.
- Press  a second time to reply, forward, or delete the text message.

## Managing Received Text Messages

Use the Inbox to manage your text messages. The Inbox is capable of storing a maximum of 30 messages.

Text messages in the Inbox are sorted according to the most recently received.

Your radio supports the following options for text messages:

- Reply (via Quick Text)
- Forward
- Delete
- Delete All

### NOTICE:

If the channel type is not a match, you can only forward, delete, or delete all Received messages.

Long press  at any time to return to the Home screen.

## Viewing a Text Message from the Inbox

- 1 Press  to access the menu.
- 

- 2 Press  or  to Messages and press  to select.
- 

- 3 Press  or  to Inbox and press  to select.
- 

- 4 Press  or  to view the messages.
- 

- 5 Do one of the following:

- Press  to select the current message, and press  again to reply, forward, or delete that message.
  - Long press  to return to the Home screen.
- 

## Replying to a Text Message from the Inbox

- 1 Access the **Text Message** feature.

Radio Controls	Steps
Programmed Text Message button	Press the programmed <b>Text Message</b> button.
Menu	<p>a Press  to access the menu.</p> <p>b Press  or  to Messages and press  to select.</p>

2 Press  or  to Inbox and press  to select.

3 Press  or  to the required message and press  to select.

4 Press  once more to access the sub-menu.

5 Use your keypad to write/edit your message.

6 Press  once message is composed.

The display shows *Sending Message*, confirming your message is being sent.

If the message is sent successfully, a tone sounds and the display shows *Message Sent*.

If the message cannot be sent, a low tone sounds and the display shows *Message Send Failed*.

If the message cannot be sent, the radio returns you to the *Resend* option screen (see [Managing Fail-to-Send Text Messages on page 269](#)).

## Deleting a Text Message from the Inbox

1 Access the **Text Message** feature.

Radio Controls	Steps
<b>Programmed Text Message button</b>	Press the programmed <b>Text Message</b> button.
<b>Menu</b>	<p><b>a</b> Press  to access the menu.</p> <p><b>b</b> Press  or  to Messages and press  to select.</p>

**2** Press  or  to **Inbox** and press  to select.

**3** Press  or  to the required message and press  to select.

**4** Press  once more to access the sub-menu.

**5** Press  or  to **Delete** and press  to select.

**6** Press  or  to **Yes** and press  to select.

The display shows **Message Deleted**, and the screen returns to the **Inbox**.

## Deleting All Text Messages from the Inbox

**1** Access the **Text Message** feature.

Radio Controls	Steps
<b>Programmed Text Message button</b>	Press the programmed <b>Text Message</b> button.
<b>Menu</b>	<p><b>a</b> Press  to access the menu.</p>

Radio Controls	Steps
	<p><b>b</b> Press  or  to Messages and press  to select.</p>

- 2** Press  or  to `Inbox` and press  to select.

When you select `Inbox` and it contains no text messages, the display shows `List Empty`, and sounds a low tone if Keypad Tones are turned on (see [Turning Keypad Tones On or Off on page 187](#)).

- 3** Press  or  to `Delete All` and press  to select.

- 4** Press  or  to `Yes` and press  to select.

The display shows `Inbox Cleared`.

## Privacy

If enabled, this feature helps to prevent eavesdropping by unauthorized users on a channel by the use of a software-based scrambling solution. The signaling and user identification portions of a transmission are not scrambled.

Your radio must have privacy enabled on the current channel selector position to send a privacy-enabled transmission, although this is not a necessary requirement for receiving a transmission. While on a privacy-enabled channel selector position, the radio is still able to receive clear (unscrambled) transmissions.

Your radio supports Enhanced Privacy.

To unscramble a privacy-enabled call transmission, your radio must be programmed to have the same Key Value and Key ID (for Enhanced Privacy) as the transmitting radio.

If your radio receives a scrambled call that is of a different Key Value and Key ID, you hear nothing at all (Enhanced Privacy).

If the radio has a privacy type assigned, the Home screen shows the Secure or Unsecure icon, except when the radio is sending or receiving an Emergency call or alarm.

The LED lights up solid green while the radio is transmitting and blinks green rapidly when the radio is receiving an ongoing privacy-enabled transmission.

You can access this feature by performing one of the following actions:

- Press the programmed **Privacy** button to toggle privacy on or off.
- Using the Radio Menu as described by the steps described next.

### NOTICE:

Some radio models may not offer this Privacy feature. Check with your dealer or system administrator for more information.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings or  or  to Connect Plus and press  to select.

- 4 Press  or  to Enhanced Privacy.

If the display shows Turn On, press  to enable Privacy. The radio displays a message confirming your selection.

If the display shows Turn Off, press  to disable Privacy. The radio displays a message confirming your selection.

If the radio has a privacy type assigned, the secure or unsecure icon appears on the status bar, except when the radio is sending or receiving an Emergency Alert.

---

## Making a Privacy-Enabled (Scrambled) Call

Toggle privacy on using the programmed privacy button or by using the menu. Your radio must have the Privacy feature enabled for the currently selected channel position to send a privacy-enabled transmission. When privacy is enabled for the currently selected channel position, all voice transmissions made by your radio will be scrambled. This includes Group Call, Multigroup Call, talk-back during

scanned calls, Site All Call, Emergency Call, and Private Call. Only receiving radios with the same Key Value and Key ID as your radio will be able to unscramble the transmission.

## Security

You can enable or disable any radio in the system. For example, you might want to disable a stolen radio, to prevent the thief from using it, and enable that radio, when it is recovered.

### NOTICE:

Performing Radio Disable and Enable is limited to radios with these functions enabled. Check with your dealer or system administrator for more information.

## Radio Disable

- 1 Access this feature by performing one of the following actions:

Radio Controls	Steps
<b>Radio Disable button</b>	<ol style="list-style-type: none"> <li>a Press the programmed <b>Radio Disable</b> button.</li> <li>b Press  or  to the required alias or ID and press  to select.</li> </ol>
<b>Radio menu</b>	<ol style="list-style-type: none"> <li>a Press  to access the menu.</li> <li>b Press  or  to <b>Contacts</b> and press  to select. The entries are alphabetically sorted.</li> <li>c Use one of the steps described next to select the required subscriber alias or ID: <ul style="list-style-type: none"> <li>• Select the required alias or ID directly.</li> </ul> </li> </ol>

Radio Controls	Steps
	<ul style="list-style-type: none"> <li>• Press  or  to the required alias or ID and press  to select.</li> <li>• Use the Manual Dial menu.</li> <li>• Press  or  to Manual Dial and press  to select.</li> <li>• Press  or  to Radio Number and press  to select.</li> <li>• The first line of the display shows Radio Number:!. The second line of the display shows a blinking cursor. Use the keypad to en-</li> </ul>

Radio Controls	Steps
	<p>ter the subscriber alias or ID and press  .</p> <p><b>d</b> Press  or  to Radio Disable and press  to select.</p>

The display shows Radio Disable: <Target Alias or ID> and the LED blinks green.

---

## 2 Wait for acknowledgement.

If successful, a positive indicator tone sounds and the display shows Radio Disable Successful.

If not successful, a negative indicator tone sounds and the display shows Radio Disable Failed.

---

## Radio Enable

- 1 Access this feature by performing one of the following actions:

Radio Controls	Steps
Radio Enable button	<p>a Press the programmed <b>Radio Enable</b> button.</p> <p>b Press  or  to the required alias or ID and press  to select.</p>
Radio menu	<p>a Press  to access the menu.</p> <p>b Press  or  to <b>Contacts</b> and press  to select. The entries are alphabetically sorted.</p>

### Radio Controls Steps

- c Use one of the steps described next to select the required subscriber alias or ID
- Select the required alias or ID directly.
    - Press  or  to the required alias or ID and press  to select.
  - Use the **Manual Dial** menu.
    - Press  or  to **Manual Dial** and press  to select.

Radio Controls	Steps
	<ul style="list-style-type: none"> <li>• Press  or  to Radio Number and press  to select.</li> <li>• The first line of the display shows Radio Number!. The second line of the display shows a blinking cursor. Use the keypad to enter the subscriber alias or ID and press .</li> </ul> <p><b>d</b> Press  or  to Radio Enable and press  to select.</p>

The display shows Radio Enable: <Subscriber Alias or ID> and the LED lights up solid green.

## 2 Wait for acknowledgement.

If successful, a positive indicator tone sounds and the display shows Radio Enable Successful.

If not successful, a negative indicator tone sounds and the display shows Radio Enable Failed.

## Bluetooth Operation

### NOTICE:

If disabled via the CPS, all Bluetooth-related features are disabled and the Bluetooth device database is erased.

This feature allows you to use your radio with a Bluetooth-enabled device (accessory) via a wireless Bluetooth connection. Your radio supports both Motorola Solutions and Commercially available Off-The-Shelf (COTS) Bluetooth-enabled devices.

Bluetooth operates within a range of 10 meters (32 feet) line of sight. This is an unobstructed path between your radio and your Bluetooth-enabled device.

It is not recommended that you leave your radio behind and expect your Bluetooth-enabled device to work with a high degree of reliability when they are separated.

At the fringe areas of reception, both voice and tone quality will start to sound "garbled" or "broken". To correct this problem, simply position your radio and Bluetooth-enabled device closer to each other (within the 10-meter/32 feet defined range) to re-establish clear audio reception. Your radio's Bluetooth function has a maximum power of 2.5 mW (4 dBm) at the 10-meter/32 feet range.

Your radio can support up to 4 simultaneous Bluetooth connections with Bluetooth-enabled devices of unique types. For example, a headset, and a PTT-Only Device (POD). Multiple connections with Bluetooth-enabled devices of the same type are not supported.

Refer to your respective Bluetooth-enabled device's user manual for more details on your Bluetooth-enabled device's full capabilities.

## Turning Bluetooth On and Off

- 1 Press  to access the menu.

---

- 2 Press  or  to Bluetooth and press  to select.

---

- 3 Press  or  to My Status and press  to select.

The display shows On and Off. The current status is indicated by a .

- 4 Do one of the following:

- Press  or  to On and press  to select. The display shows On and a  appears left of the selected status.
- Press  or  to Off and press  to select. The display shows Off and a  appears left of the selected status.

## Finding and Connecting to a Bluetooth Device

Do not turn off your Bluetooth-enabled device or press

 during the finding and connecting operation as this cancels the operation.

1 Turn on your Bluetooth-enabled device and place it in pairing mode. Refer to respective Bluetooth-enabled device user manual.

---

2 On your radio, press  to access the menu.

---

3 Press  or  to Bluetooth and press  to select.

---

4 Press  or  to Devices and press  to select.

---

5 Do one of the following:

- Press  or  to the required device and press  to select.
  - Press  or  to Find Devices to locate available devices. Press  or  to the required device and press  to select.
- 

6 Press  or  to Connect and press  to select.

Display shows Connecting to <Device>. Your Bluetooth-enabled device may require additional steps to complete the pairing. Refer to respective Bluetooth-enabled device user manual.

---

If successful, the radio display shows <Device>Connected. A tone sounds and ✓ appears besides the connected device. The Bluetooth Connected icon appears on the status bar.

If unsuccessful, the radio display shows Connecting Failed.

## Finding and Connecting from a Bluetooth Device (Discoverable Mode)

Do not turn off your Bluetooth or your radio during the finding and connecting operation as this may cancel the operation.

1 Turn Bluetooth On.

See [Turning Bluetooth On and Off on page 283](#).

---

2 Press  to access the menu.

---

3 Press  or  to Bluetooth and press  to select.

---

4 Press  or  to Find Me and press  to select.

Your radio can now be found by other Bluetooth-enabled devices for a programmed duration. This is called Discoverable Mode.

---

5 Turn on your Bluetooth-enabled device and pair it with your radio.

Refer to respective Bluetooth-enabled device user manual.

---

## Disconnecting from a Bluetooth Device

1 On your radio, press  to access the menu.

---

2 Press  or  to Bluetooth and press  to select.

---

3 Press  or  to Devices and press  to select.

---

4 Press  or  to the required device and press  to select.

---

5 Press  or  to Disconnect and press  to select.

Display shows Disconnecting from <Device>. Your Bluetooth-enabled device may require additional steps to disconnect. Refer to respective Bluetooth-enabled device user manual.

---

The radio display shows <Device> Disconnected. A positive indicator tone sounds and ✓ disappears beside the connected device. The Bluetooth Connected icon disappears on the status bar.

## Switching Audio Route between Internal Radio Speaker and Bluetooth Device

You can toggle audio routing between internal radio speaker and external Bluetooth-enabled accessory.

Press the programmed **Bluetooth Audio Switch** button.

- A tone sounds and display shows Route Audio to Radio.
- A tone sounds and display shows Route Audio to Bluetooth.

### Viewing Device Details

- 1 Press  to access the menu.
- 2 Press  or  to Bluetooth and press  to select.

- 3 Press  or  to Devices and press  to select.
- 4 Press  or  to the required device and press  to select.
- 5 Press  or  to View Details and press  to select.

### Deleting Device Name

You can remove a disconnected device from the list of Bluetooth-enabled devices.

- 1 Press  to access the menu.
- 2 Press  or  to Bluetooth and press  to select.

3 Press  or  to `Devices` and press  to select.

---

4 Press  or  to the required device and press  to select.

---

5 Press  or  to `Delete` and press  to select.  
The display shows `Device Deleted`.

---

## Bluetooth Mic Gain

Allows control of the connected Bluetooth-enabled device microphone gain value.

1 Press  to access the menu.

---

2 Press  or  to `Bluetooth` and press  to select.

---

3 Press  or  to `BT Mic Gain` and press  to select.

---

4 Press  or  to the BT Mic Gain type and the current values.

To edit values, press  to select.

---

5 Press  or  to increase or to decrease values and press  to select.

---

## Indoor Location

### NOTICE:

Indoor Location feature is applicable for models with the latest software and hardware. Check with your dealer or system administrator for more information.

Indoor Location is used to keep track of the location of radio users. When Indoor Location is activated, the radio is in a limited discoverable mode. Dedicated beacons are used to locate the radio and determine its position.

## Turning Indoor Location On or Off

You can turn on or turn off Indoor Location by performing one of the following actions.

- Access this feature through the menu.
  - a. Press  to access the menu.
  - b. Press  or  to Bluetooth and press  to select.
  - c. Press  or  to Indoor Location and press  to select.
  - d. Press  to turn on Indoor Location.

The display shows Indoor Location On. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.

- If unsuccessful, the display shows Turning On Failed. You hear a negative indicator tone.

- e. Press  to turn off Indoor Location.

The display shows Indoor Location Off. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.
- If unsuccessful, the display shows Turning Off Failed. You hear a negative indicator tone.

- Access this feature by using the programmed button.
  - a. Long press the programmed **Indoor Location** button to turn on Indoor Location.

The display shows Indoor Location On. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.

- If unsuccessful, the display shows **Turning On Failed**. If unsuccessful, you hear a negative indicator tone.
- b. Press the programmed **Indoor Location** button to turn off Indoor Location.

The display shows **Indoor Location Off**. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.
- If unsuccessful, the display shows **Turning Off Failed**. If unsuccessful, you hear a negative indicator tone.

## Accessing Indoor Location Beacons Information

Follow the procedure to access Indoor Location beacons information.

- 1 Press  to access the menu.
- 

- 2 Press  or  to **Bluetooth** and press  to select.
- 

- 3 Press  or  to **Indoor Location** and press  to select.
- 

- 4 Press  or  to **Beacons** and press  to select.
- 

The display shows the beacons information.

## Notification List

Your radio has a Notification List that collects all your "unread" events on the channel, such as unread text messages, missed calls, and call alerts.

The Notification icon appears on the status bar when the Notification List has one or more events.

The list supports a maximum of 40 unread events. When it is full, the next event automatically replaces the oldest event.

**NOTICE:**

After the events are read, they are removed from the Notification List.

## Accessing the Notification List

Follow the procedure to access the notification list.

- 1 Press  to access the menu.

---

- 2 Press  or  to Notification and press  to select.

---

- 3 Press  or  to the required event and press  to select.  
  
Long press  to return to the Home Screen.

---

## Wi-Fi Operation

Wi-Fi® is a registered trademark of Wi-Fi Alliance®.

**NOTICE:**

This feature is applicable to DM4601e only.

This feature allows you to setup and connect to a Wi-Fi network. Wi-Fi supports updates for radio firmware, codeplug, and resources such as language packs and voice announcement.

## Turning Wi-Fi On or Off

The programmed **Wi-Fi On or Off** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Voice Announcements for the programmed **Wi-Fi On or Off** button can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

You can turn on or turn off Wi-Fi by performing one of the following actions.

- Press the programmed **Wi-Fi On or Off** button. Voice Announcement sounds Turning On Wi-Fi or Turning Off Wi-Fi.
- Access this feature using the menu.

- a. Press  to access the menu.
- b. Press  or  to WiFi and press  to select.
- c. Press  or  to WiFi On and press  to select.

Press  to turn on Wi-Fi. The display shows  beside Enabled.

Press  to turn off Wi-Fi. The  disappears from beside Enabled.

## Connecting to a Network Access Point

When you turn on Wi-Fi, the radio scans and connects to a network access point.

You can also connect to a network access point using the menu.

- 1 Press  to access the menu.
- 

- 2 Press  or  to WiFi and press  to select.
- 

- 3 Press  or  to Networks and press  to select.
- 

- 4 Press  or  to a network access point and press  to select.
- 

- 5 Press  or  to Connect and press  to select.
- 

- 6 Enter the password and press  .
- 

When the connection is successful, the radio displays a notice and the network access point is saved into the profile list.

## Checking Wi-Fi Connection Status

Follow the procedure to check the Wi-Fi Connection status.

Press the programmed **Wi-Fi Status Query** button for the connection status by using Voice Announcement. Voice Announcement sounds Wi-Fi is Off, Wi-Fi is On but No Connection, or Wi-Fi is On with Connection.

- The display shows `WiFi Off` when the Wi-Fi is turned off.
- The display shows `WiFi On, Connected` when the radio is connected to a network.
- The display shows `WiFi On, Disconnected` when the Wi-Fi is turned on but the radio is not connected to any network.

Voice Announcements for the Wi-Fi status query results can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

**NOTICE:**

The programmed **Wi-Fi Status Query** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

## Refreshing the Network List

Follow the procedure to refresh the network list.

- Perform the following actions to refresh the network list through the menu.
  - a. Press  to access the menu.
  - b. Press  or  to `WiFi` and press  to select.
  - c. Press  or  to `Networks` and press  to select.

When you enter the Networks menu, the radio automatically refreshes the network list.

- If you are already in the Networks menu, perform the following action to refresh the network list.

Press  or  to `Refresh` and press  to select.

The radio refreshes and displays the latest network list.

## Adding a Network

If a preferred network is not in the available network list, perform the following actions to add a network.

- 1 Press  to access the menu.

---

- 2 Press  or  to WiFi and press  to select.

---

- 3 Press  or  to Networks and press  to select.

---

- 4 Press  or  to Add Network and press  to select.

---

- 5 Enter the Service Set Identifier (SSID) and press .

---

- 6 Press  or  to Open and press  to select.

---

- 7 Enter the password and press .

The radio displays a positive mini notice to indicate that the network is successfully saved.

## Viewing Details of Network Access Points

Follow the procedure to view details of network access points.

- 1 Press  to access the menu.

---

- 2 Press  or  to WiFi and press  to select.

---

- 3 Press  or  to Networks and press  to select.

---

- 4 Press  or  to a network access point and press  to select.

---

- 5 Press  or  to `View Details` and press  to select.

For a connected network access point, the Service Set Identifier (SSID), Security Mode, Media Access Control (MAC) address, and Internet Protocol (IP) address are displayed.

For a non-connected network access point, the Service Set Identifier (SSID) and Security Mode are displayed.

---

## Removing Network Access Points

Perform the following actions to remove network access points from the profile list.

- 1 Press  to access the menu.
- 
- 2 Press  or  to `WiFi` and press  to select.
- 

- 3 Press  or  to `Networks` and press  to select.
- 

- 4 Press  or  to the selected network access point and press  to select.
- 

- 5 Press  or  to `Remove` and press  to select.
- 

- 6 Press  or  to `Yes` and press  to select.

The radio displays a positive mini notice to indicate that the selected network access point is successfully removed.

---

## Utilities

This chapter explains the operations of the utility functions available in your radio.

## Turning the Radio Tones/Alerts On or Off

You can enable and disable all radio tones and alerts (except for the incoming Emergency alert tone) if needed.

Press the programmed **All Tones/Alerts** button to toggle all tones on or off, or follow the procedure described next to access this feature via the radio menu.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Tones/Alerts and press  to select.

---

- 5 Press  or  to All Tones and press  to select.

---

- 6 Press  to enable/disable all tones and alerts.  
The display shows  beside Enabled.  
The  disappears from beside Enabled.

---

## Setting the Tone Alert Volume Offset Level

You can adjust the Tone Alert Volume Offset level if needed. This feature adjusts the volume of the tones/alerts, allowing it to be higher or lower than the voice volume.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to Tones/Alerts and press  to select.

---

5 Press  or  to Vol. Offset and press  to select.

---

6 Press  or  to the required volume value.  
The radio sounds a feedback tone with each corresponding volume value.

---

7 Do one of the following:

- Press  to keep the required displayed volume value.
  - Press  to exit without changing the current volume offset settings.
- 

## Turning the Talk Permit Tone On or Off

You can enable and disable the Talk Permit Tone if needed.

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to Tones/Alerts and press  to select.

---

5 Press  or  to Talk Permit and press  to select.

---

6 Press  to enable/disable the Talk Permit Tone.  
The display shows  beside Enabled.

The ✓ disappears from beside Enabled.

---

## Turning the Power Up Alert Tone On or Off

You can enable and disable the Power Up Alert Tone if needed.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Tones/Alerts and press  to select.

---

- 5 Press  or  to Power Up and press  to select.

---

- 6 Press  to enable/disable the Power Up Alert Tone.  
The display shows ✓ beside Enabled.  
The ✓ disappears from beside Enabled.

---

## Setting the Power Level

You can customize your radio power setting to high or low for each Connect Plus zone.

High enables communication with tower sites in Connect Plus mode located at a considerable distance from you.  
Low enables communication with tower sites in Connect Plus mode in closer proximity.

Press the programmed **Power Level** button to toggle transmit power level between high and low.

Follow the procedure described next to access this feature via the radio menu.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Power and press  to select.

---

- 5 Press  or  to the required setting and press  to select.  
 ✓ appears beside selected setting. At any time, long press  to return to the Home screen.  
 Screen returns to the previous menu.

## Changing the Display Mode

You can change radio display mode between Day or Night, as needed. This affects the color palette of the display.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Display and press  to select.  
 The display shows Day Mode and Night Mode.

---

- 5 Press  or  to the required setting and press  to enable. ✓ appears besides selected setting.

## Adjusting the Display Brightness

You can adjust the display brightness of the radio as needed.

### NOTICE:

Display brightness cannot be adjusted when Auto Brightness is enabled.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Utilities` and press  to select.

---

- 3 Press  or  to `Radio Settings` and press  to select.

---

- 4 Press  or  to `Display` and press  to select.

---

- 5 Press  or  to `Brightness` and press  to select.

The display shows a progress bar.

- 6 Decrease display brightness by pressing  or increase the display brightness by pressing  .  
Select from setting of 1 to 8. Press  to confirm your entry.

## Turning the Introduction Screen On or Off

You can enable and disable the Introduction Screen if needed.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Utilities` and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to Display and press  to select.

---

5 Press  or  to Intro Screen and press  to select.

---

6 Press  to enable/disable the Introduction Screen.

The display shows  beside Enabled.

The  disappears from beside Enabled.

---

## Language

You can set your radio display to be in your required language.

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to Languages and press  to select.

---

5 Press  or  to the required language and press  to enable.  appears beside selected language.

---

## Turning the LED Indicator On or Off

You can enable and disable the LED Indicator if needed.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to LED Indicator and press  to select.

---

- 5 Press  to enable/disable the LED Indicator.  
The display shows  beside Enabled.  
The  disappears from beside Enabled.

---

## Identifying Cable Type

You can select the type of cable your radio uses.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Cable Type and press  to select.

---

- 5 The current cable type is indicated by a .

---

## Voice Announcement

This feature enables the radio to audibly indicate the current Zone or Channel the user has just assigned, or programmable button press. This audio indicator can be customized per customer requirements. This is typically

useful when the user is in a difficult condition to read the content shown on the display.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Voice Announcement and press  to select.  
You can also use  or  to change the selected option.

---

- 5 Do one of the following:
  - Press  to enable Voice Announcement. The display shows  beside Enabled.
  - Press  to disable Voice Announcement. The  disappears from beside Enabled.

## Menu Timer

Set the period of time your radio stays in the menu before it automatically switches to the Home screen.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Settings and press  to select.

---

- 4 Press  or  to Display and press  to select.

---

- 5 Press  or  to Menu Timer and press  to select.

---

- 6 Press  or  to the required setting and press  to select.

## Turning Horns/Lights On or Off

This feature needs to be installed through the rear accessory connector of your radio by your dealer.

Your radio is able to notify you of an incoming call via the horns and lights feature. When activated, an incoming call sounds your vehicle's horn and turns on its lights.

- 1 Do one of the following:
  - Press the programmed **Horns/Lights** button to toggle horns and light feature on or off. Skip the following steps.
  - Press  to access the menu.

- 2 Press  or  to Utilities and press  to select.

- 3 Press  or  to Radio Settings and press  to select.

- 4 Press  or  to Horn/Lights and press  to select.

- 5 Press  to enable/disable Horns/Lights.  
The display shows  beside Enabled.  
The  disappears from beside Enabled.

## Setting Dual Knob Operation Preference

Your radio has a dual-purpose **Volume/Channel Knob**. Disabling the dual-purpose option sets the knob to work as a Volume Knob only.

- 1  to access the menu.

- 2  or  to Utilities and press  to select.

3  or  to Radio Settings and press  to select.

---

4  or  to Dual Knob and press  to select.

---

5 The display shows Volume Only and Volume & Ch.  
 or  to the required setting and press  to select.

✓ appears beside selected setting.

Screen returns to the previous menu.

---

## Digital Mic AGC (Mic AGC-D)

This feature controls the your radio's microphone gain automatically while transmitting on a digital system. It suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio.

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to Mic AGC-D and press  to select.

---

5 Do one of the following:

- Press  to enable **Mic AGC-D** . The display shows ✓ beside Enabled .
  - Press  to disable **Mic AGC-D** . The ✓ disappears from beside Enabled .
- 

## Intelligent Audio

Your radio can automatically adjust its audio volume to overcome background noise in the environment, inclusive of all stationary and non-stationary noise sources. This

feature is a Receive-only feature and does not affect Transmit audio.

- 1 Press  to access the menu.

Radio Control	Steps
<b>Menu</b>	<ol style="list-style-type: none"> <li>a Press  to access the menu.</li> <li>b Press  or  to Radio Settings and press  to select.</li> <li>c Press  or  to Radio Settings and press  to select.</li> <li>d Press  or  to Intelligent Audio and press  to select.</li> </ol>

## Radio Control Steps

### NOTICE:

You can also use or to change the selected option.

- e Do one of the following:
  - Press  to enable Intelligent Audio. The display shows  beside Enabled.
  - Press  to disable Intelligent Audio. The  disappears from beside Enabled.

- 2 Press  or  to Utilities and press  to select.

- 3 Press  or  to Radio Settings and press  to select.

4 Press  or  to Intelligent Audio and press  to select.

---

5 Do one of the following:

- Press  to enable Intelligent Audio. The display shows  beside Enabled.
  - Press  to disable Intelligent Audio. The  disappears from beside Enabled.
- 

## Turning the Acoustic Feedback Suppressor Feature On or Off

This feature allows you to minimize acoustic feedback in received calls.

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Settings and press  to select.

---

4 Press  or  to AF Suppressor and press  to select.

You can also use  or  to change the selected option.

---

5 Do one of the following.

- Press  to enable Acoustic Feedback Suppressor. The display shows  beside Enabled.
  - Press  to disable Acoustic Feedback Suppressor. The  disappears from beside Enabled.
- 

## Turning GNSS On or Off

Global Navigation Satellite System (GNSS) is a satellite navigation system that determines the radio precise location. GNSS includes Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS).

**NOTICE:**

Selected radio models may offer GPS and GLONASS. GNSS constellation is configured by using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

- 1 Do one of the following:
  - Press the programmed **GNSS** button to toggle the feature on or off. Skip the following steps.
  - Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to GNSS. Press  to select.

---

- 5 Press  to enable/disable GNSS.
  - If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.

See [Checking the GNSS Information on page 318](#) for details on retrieving GNSS information.

## Accessing General Radio Information

Your radio contains information on the following:

- Battery
- Degree of Tilt (Accelerometer)
- Radio Model Number Index
- Option Board Over-the-Air (OTA) Codeplug CRC
- Site Number
- Site Info
- Radio Alias and ID
- Firmware and Codeplug Versions
- GNSS Information

Press  at any time to return to the previous screen or long press  to return to the Home screen. The radio exits the current screen once the inactivity timer expires.

## Checking the Radio Model Number Index

This index number identifies your radio model-specific hardware. Your radio system administrator may ask for this number when preparing a new Option Board codeplug for your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

- 4 Press  or  to Model Index and press  to select.  
The display shows the Model Number Index.

## Checking the CRC of the Option Board OTA Codeplug File

Follow the instructions below if your radio system administrator asks you to view the Option Board OTA Codeplug File CRC (Cyclic Redundancy Check). This menu option only appears if the Option Board received its last codeplug update OTA.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

- 4 Press  or  to OE OTA CPorc and press  to select.

The display shows some letters and numbers. Communicate this information to your radio system administrator exactly as shown.

---

## Displaying the Site ID (Site Number)

### NOTICE:

If you are not currently registered at a site, the display shows `Not Registered`.

The radio briefly shows the Site ID as it registers with a Connect Plus site. Following registration, the radio does not generally indicate the Site number. To display the registered Site number, do the following:

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities and press  to select.
- 

- 3 Press  or  to Radio Info and press  to select.
- 

- 4 Press  or  to Site Number and press  to select.
- The display shows the Network ID and the Site Number.
- 

## Checking the Site Info

### NOTICE:

If you are not currently registered at a site, the display shows `Not Registered`.

The Site Info feature provides information that can be useful to a service technician. It consists of the following information:

- Repeater number of current Control Channel repeater.
- RSSI: Last signal strength value measured from Control Channel repeater.
- Neighbor List sent by Control Channel repeater (five numbers separated by commas).

If you are requested to use this feature, please report the displayed information exactly as it appears on the screen.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

---

- 4 Press  or  to Site Info and press  to select.  
The display shows the Site Info.

### Checking the Radio ID

This feature displays the ID of your radio.

Follow the procedure described next to access this feature via the radio screen.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

---

- 4 Press  or  to My ID and press  to select.  
The display shows the radio ID.

### Checking the Firmware Version and Codeplug Version

Displays the firmware version on your radio.

- 1 Press  to access the menu.

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Info and press  to select.

---

4 Press  or  to Versions and press  to select.

The display a list with the following information:

- (Radio) Firmware Version
  - (Radio) Codeplug Version
  - Option Board Firmware Version
  - Option Board Frequency Version
  - Option Board Hardware Version
  - Option Board Codeplug Version
- 

## Checking for Updates

Connect Plus provides the ability to update certain files (Option Board Codeplug, Network Frequency File, and Option Board Firmware File) Over-The-Air (OTA).

### NOTICE:

Check with the dealer or network administrator to determine whether this feature has been enabled for your radio.

Any display Connect Plus radio has the ability to show its current Option Board OTA Codeplug CRC, Frequency File version or Option Board firmware file version by using a menu option. In addition, display radios that have been enabled for over-the-air file transfer can display the version of a "pending file". A "pending file" is a Frequency File or Option Board firmware file that the Connect Plus radio knows about through system messaging, but the radio has not yet collected all of the file packets. If a display Connect Plus radio has a pending file, the menu provides options to:

- See the version number of the pending file.
- See what percentage of packets has been collected so far.
- Request the Connect Plus radio to resume collecting file packets.

If the radio is enabled for Connect Plus OTA file transfer, there may be times when the radio automatically joins a file transfer without first notifying the radio user. While the radio is collecting file packets, the LED rapidly blinks red and the radio displays the High Volume Data icon on the Home Screen status bar.

### NOTICE:

The Connect Plus radio cannot collect file packets and receive calls at the same time. If you wish to cancel the file transfer, press and release the **PTT** button. This causes the radio to request a call on the selected Contact Name, and it will also cancel the file transfer for that radio until the process resumes at a later time.

There are several things that can make the file transfer process start again. The first example applies to all OTA file types. The other examples apply only to the Network Frequency File and Option Board Firmware File:

- The radio system administrator re-initiates the OTA file transfer.
- The Option Board pre-defined timer expires, which causes the Option Board to automatically resume the process of collecting packets.

- The timer has not yet expired, but the radio user requests the file transfer to resume through the menu option.

After the Connect Plus radio finishes downloading all file packets, it must upgrade to the newly acquired file. For the Network Frequency File, this is an automatic process and does not require a radio reset. For the Option Board Codeplug File, this is an automatic process that will cause a brief interruption to service as the Option Board loads the new codeplug information and re-acquires a network site. How quickly the radio upgrades to a new Option Board firmware file depend on how the radio has been configured by the dealer or system administrator. The radio will either upgrade immediately after collecting all file packets, or it will wait until the next time that the user turns the radio on.

### NOTICE:

Check with your dealer or system administrator to determine how your radio has been programmed.

The process of upgrading to a new Option Board firmware file takes several seconds, and it requires the Connect Plus Option Board to reset the radio. Once the upgrade starts, the radio user will not be able to make or receive calls until the process is completed. During the process, radio display prompts user to not turn off the radio.

## Firmware File

The following section provides information on the radio firmware.

### Firmware Up to Date

#### NOTICE:

If the Option Board firmware file is not Up to Date (and if the radio has partially collected a more recent Option Board firmware file version) the radio displays a list with additional options; Version, %Received, and Download.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

---

- 4 Press  or  to Updates and press  to select.

---

- 5 Press  or  to Firmware and press  to select.

The display shows Firmware is Up to Date.

---

### Pending Firmware – Version

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

---

- 4 Press  or  to Updates and press  to select.

---

- 5 Press  or  to Firmware and press  to select.

---

- 6 Press  or  to `Version` and press  to select.

If there is a pending Option Board firmware file, the display shows the pending firmware version number.

If there is a pending Option Board firmware file, the display shows `Firmware is Up to Date`.

---

## Pending Firmware – % Received

- 1 Press  to access the menu.
- 

- 2 Press  or  to `Utilities` and press  to select.
- 

- 3 Press  or  to `Radio Info` and press  to select.
- 

- 4 Press  or  to `Updates` and press  to select.
- 

- 5 Press  or  to `Firmware` and press  to select.
- 

- 6 Press  or  to `%Received` and press  to select.

The screen displays the percentage of firmware file packets collected so far.

### NOTICE:

When at 100%, the radio needs to be power cycled Off and then On to initiate the firmware upgrade.

---

## Pending Firmware – Download

If the Connect Plus radio has previously left an OTA Option Board Firmware File Transfer with a partial file, the unit automatically rejoins the file transfer (if still ongoing) when an internal timer expires. If you want the unit to rejoin an ongoing Option Board Firmware File transfer prior to

expiration of this internal timer, use the Download option as described below.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities and press  to select.

---

- 3 Press  or  to Radio Info and press  to select.

---

- 4 Press  or  to Updates and press  to select.

---

- 5 Press  or  to Firmware and press  to select.

---

- 6 Press  or  to Download and press  to select.

The display shows the following:

Download Available	Start Download
No Download Available	Download not available

- 7 Do one of the following:
  - Select Yes and press  to start the download.
  - Select No and press  to return to the previous menu.

## Frequency File

The following section provides information on the frequency file of the radio.

### Frequency File Up to Date

#### NOTICE:

If the Frequency File is not Up to Date (and if the radio has partially collected a more recent frequency file version) the radio displays a list with additional options; Version, %Received, and Download.

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Info and press  to select.

---

4 Press  or  to Frequency and press  to select.

The display shows Freq. File is Up to Date.

---

### Frequency File Pending – Version

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Info and press  to select.

---

4 Press  or  to Updates and press  to select.

---

5 Press  or  to Frequency and press  to select.

---

6 Press  or  to Version and press  to select.

If there is a pending Frequency File, the display shows the pending Frequency File version number.

---

### Frequency File Pending – % Received

1 Press  to access the menu.

---

2 Press  or  to Utilities and press  to select.

---

3 Press  or  to Radio Info and press  to select.

4 Press  or  to Updates and press  to select.

5 Press  or  to %Received and press  to select.

The screen displays the percentage of frequency file packets collected so far.

### Frequency File Pending – Download

If the Connect Plus radio has previously left an OTA Network Frequency File Transfer with a partial file, the unit automatically rejoins the file transfer (if still ongoing) when an internal timer expires. If you want the unit to rejoin an ongoing Network Frequency File transfer prior to expiration of this internal timer, use the Download option as described below.

1 Press  to access the menu.

2 Press  or  to Utilities and press  to select.

3 Press  or  to Radio Info and press  to select.

4 Press  or  to Updates and press  to select.

5 Press  or  to Frequency and press  to select.

6 Press  or  to Download and press  to select.

Download Currently Unavailable	Download not available
Download Currently Available	Start Download

7 Do one of the following:

- Select **Yes** and press to start the download.
  - Select **No** and press to return to the previous menu.
- 

## Checking the GNSS Information

Displays the GNSS information on your radio, such as values of:

- Latitude
- Longitude
- Altitude
- Direction
- Velocity
- Horizontal Dilution of Precision (HDOP)
- Satellites
- Version

**1** Press  to access the menu.

---

**2** Press  or  to **Utilities** and press  to select.

---

**3** Press  or  to **Radio Info** and press  to select.

---

**4** Press  or  to **GNSS Info** and press  to select.

---

**5** Press  or  to the required item and press  to select.

The display shows the requested GNSS information.

---

See [Turning GNSS On or Off on page 306](#) for details on GNSS.

## Other Systems

Features that are available to the radio users under this system are available in this chapter.

### Push-To-Talk Button

The Push-to-Talk (**PTT**) button serves two basic purposes:

- While a call is in progress, the **PTT** button allows the radio to transmit to other radios in the call. The microphone is activated when the **PTT** button is pressed.
- While a call is not in progress, the **PTT** button is used to make a new call.

Long press the **PTT** button to talk. Release the **PTT** button to listen.

If the Talk Permit Tone or the PTT Sidetone  is enabled, wait until the short alert tone ends before talking.

 If the Channel Free Indication feature is enabled on your radio (programmed by your dealer), you hear a short alert tone the moment the target radio (the radio that is receiving your call) releases the **PTT** button, indicating the channel is free for you to respond.

 You hear a continuous Talk Prohibit Tone if your call is interrupted. You should release the **PTT** button if you hear a continuous Talk Prohibit Tone.

## Programmable Buttons

Depending on the duration of a button press, your dealer can program the programmable buttons as shortcuts to radio functions.

### Short press

Pressing and releasing rapidly.

### Long press

Pressing and holding for the programmed duration.

### NOTICE:

See [Emergency Operation on page 391](#) for more information on the programmed duration of the **Emergency** button.

## Assignable Radio Functions

The following radio functions can be assigned to the programmable buttons.

### Audio Ambience

Allows the user to select an environment the radio is operating in.

### **Audio Profiles**

Allows the user to select the preferred audio profile.

### **Bluetooth® Audio Switch**

Toggles audio routing between internal radio speaker and external Bluetooth-enabled accessory.

### **Bluetooth Connect**

Initiates a Bluetooth find-and-connect operation.

### **Bluetooth Disconnect**

Terminates all existing Bluetooth connections between your radio and any Bluetooth-enabled devices.

### **Bluetooth Discoverable**

Enables your radio to enter Bluetooth Discoverable Mode.

### **Call Alert**

Provides direct access to the contacts list for you to select a contact to whom a Call Alert can be sent.

### **Call Forwarding**

Toggles Call Forwarding on or off.

### **Call Log**

Selects the call log list.

### **Channel Announcement**

Plays zone and channel announcement voice messages for the current channel.

### **Contacts**

Provides direct access to the Contacts list.

### **Emergency**

Depending on the programming, initiates or cancels an emergency.

### **Ext Public Address (PA)**

Toggles audio routing between the connected PA loudspeaker amplifier and the internal PA system of the radio.

### **Indoor Location**

Toggles Indoor Location on or off.

### **Intelligent Audio**

Toggles intelligent audio on or off.

### **Manual Dial**

Initiates a Private Call by keying in any subscriber ID.

### **Manual Site Roam** <sup>5</sup>

Starts the manual site search.

---

<sup>5</sup> Not applicable in Capacity Plus.

**Mic AGC**

Toggles the internal microphone automatic gain control (AGC) on or off.

**Monitor**

Monitors a selected channel for activity.

**Notifications**

Provides direct access to the Notifications list.

**Nuisance Channel Delete<sup>5</sup>**

Temporarily removes an unwanted channel, except for the Selected Channel, from the scan list. The Selected Channel refers to the selected zone or channel combination of the user from which scan is initiated.

**One Touch Access **

Directly initiates a predefined Private, Phone or Group Call, a Call Alert, a Quick Text message, or Home Revert.

**Option Board Feature**

Toggles option board feature(s) on or off for option board-enabled channels.

**Permanent Monitor<sup>5</sup>**

Monitors a selected channel for all radio traffic until function is disabled.

**Phone **

Provides direct access to the Phone Contacts list.

**Privacy **

Toggles privacy on or off.

**Public Address (PA)**

Toggles the internal PA system of the radio on or off.

**Radio Alias and ID**

Provides radio alias and ID.

**Radio Check **

Determines if a radio is active in a system.

**Radio Disable **

Allows a target radio to be remotely disabled.

**Radio Enable **

Allows a target radio to be remotely enabled.

**Remote Monitor**

Turns on the microphone of a target radio without it giving any indicators.

**Repeater/Talkaround<sup>5</sup>**

Toggles between using a repeater and communicating directly with another radio.

**Reset Home Channel**

Sets a new home channel.

### **Silence Home Channel Reminder**

Mutes the Home Channel Reminder.

### **Scan**<sup>6</sup>

Toggles scan on or off.

### **Site Info**

Displays the current site name and ID of Capacity Plus-Multi-Site.

Plays site announcement voice messages for the current site when Voice Announcement is enabled.

### **Site Lock**<sup>5</sup>

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

### **Telemetry Control**

Controls the Output Pin on a local or remote radio.

### **Text Message**

Selects the text message menu.

### **Transmit Interrupt Remote Dekey**

Stops an ongoing interruptible call to free the channel.

### **Trill Enhancement**

Toggles trill enhancement on or off.

### **Voice Announcement On/Off**

Toggles voice announcement on or off.

### **Voice Operating Transmission (VOX)**

Toggles VOX on or off.

### **Wi-Fi**

Toggles Wi-Fi on or off.

### **Zone Selection**

Allows selection from a list of zones.

## **Assignable Settings or Utility Functions**

The following radio settings or utility functions can be assigned to the programmable buttons.

### **Tones/Alerts**

Toggles all tones and alerts on or off.

### **Backlight**

Toggles display backlight on or off.

### **Channel Up/Down**

Depending on the programming, changes channel to previous or next channel.

---

<sup>6</sup> Not applicable in Capacity Plus–Single-Site.

**Display Mode**

Toggles the day/night display mode on or off.

**Power Level**

Toggles transmit power level between high and low.

## Accessing Programmed Functions

Follow the procedure to access programmed functions in your radio.

- 1 Do one of the following:
  - Press the programmed button. Proceed to [step 3](#).
  - Press  to access the menu.

- 
- 2 Press  or  to the menu function, and press  to select a function or enter a sub-menu.

- 
- 3 Do one of the following:
    - Press  to return to the previous screen.
    - Long press  to return to the Home screen.

Your radio automatically exits the menu after a period of inactivity and returns to the Home screen.

The Menu Navigation Buttons are also available on a keypad microphone. See [Keypad Microphone Buttons on page 41](#).

---

## Status Indicators

This chapter explains the status indicators and audio tones used in the radio.

## Icons

The Liquid Crystal Display (LCD) of your radio shows the radio status, text entries, and menu entries.

**Table 9: Display Icons**

The following icons appear on the status bar at the top of the radio display. The icons are arranged left most in order of appearance or usage, and are channel-specific.

	<p><b>Bluetooth Connected</b> The Bluetooth feature is enabled. The icon stays lit when a remote Bluetooth device is connected.</p>
	<p><b>Bluetooth Not Connected</b> The Bluetooth feature is enabled but there is no remote Bluetooth device connected.</p>
	<p><b>Call Log</b> Radio call log.</p>

*Table continued...*

	<p><b>Contact</b> Radio contact is available.</p>
	<p><b>Emergency</b> Radio is in Emergency mode.</p>
	<p><b>Flexible Receive List</b> Flexible receive list is enabled.</p>
	<p><b>GNSS Available</b>  GNSS feature is enabled. The icon stays lit when a position fix is available.</p>
	<p><b>GNSS Not Available</b>  GNSS feature is enabled but is not receiving data from the satellite.</p>
	<p><b>High Volume Data</b> Radio is receiving high volume data and channel is busy.</p>

*Table continued...*

	<b>Indoor Location Available<sup>7</sup></b> Indoor location status is on and available.
	<b>Indoor Location Unavailable<sup>7</sup></b> Indoor location status is on but unavailable due to Bluetooth disabled or Beacons Scan suspended by Bluetooth.
	<b>Message</b> Incoming message.
	<b>Monitor</b> Selected channel is being monitored.
	<b>Mute Mode</b> Mute Mode is enabled and speaker is muted.
	<b>Notification</b> Notification List has one or more missed events.

Table continued...

	<b>Option Board</b> The Option Board is enabled. (Option board enabled models only.)
	<b>Option Board Non-Function</b> The Option Board is disabled.
	<b>Over-the-Air Programming Delay Timer</b> Indicates time left before automatic restart of radio.
	<b>Received Signal Strength Indicator (RSSI)</b> The number of bars displayed represents the radio signal strength. Four bars indicate the strongest signal. This icon is only displayed while receiving.
	<b>Response Inhibit</b> Response Inhibit is enabled.

Table continued...

<sup>7</sup> Only applicable for models with the latest software and hardware.

	<b>Ring Only</b> Ringing mode is enabled.
	<b>Scan</b> <sup>8</sup> Scan feature is enabled.
	<b>Scan-Priority 1</b> <sup>8</sup> Radio detects activity on channel/ group designated as Priority 1.
	<b>Scan-Priority 2</b> <sup>8</sup> Radio detects activity on channel/ group designated as Priority 2.
	<b>Secure</b> The Privacy feature is enabled.
	<b>Sign In</b> Radio is signed in to the remote server.

*Table continued...*

	<b>Sign Out</b> Radio is signed out of the remote server.
	<b>Silent Ring</b> Silent ring mode is enabled.
	<b>Site Roaming</b> <sup>9</sup> The site roaming feature is enabled.
	<b>Talkaround</b> <sup>8</sup> In the absence of a repeater, the radio is configured for direct radio to radio communication.
	<b>Tones Disable</b> Tones are turned off.
	<b>Unsecure</b> The Privacy feature is disabled.
	<b>Vote Scan</b> Vote scan feature is enabled.

*Table continued...*

<sup>8</sup> Not applicable in Capacity Plus.

<sup>9</sup> Not applicable in Capacity Plus–Single-Site.

	<b>Wi-Fi Excellent</b> <sup>10</sup> Wi-Fi signal is excellent.
	<b>Wi-Fi Good</b> <sup>10</sup> Wi-Fi signal is good.
	<b>Wi-Fi Average</b> <sup>10</sup> Wi-Fi signal is average.
	<b>Wi-Fi Poor</b> <sup>10</sup> Wi-Fi signal is poor.
	<b>Wi-Fi Unavailable</b> <sup>10</sup> Wi-Fi signal is unavailable.

**Table 10: Advance Menu Icons**

The following icons appear beside menu items that offer a choice between two options or as an indication that there is a sub-menu offering two options.

	<b>Checkbox (Checked)</b> Indicates that the option is selected.
	<b>Checkbox (Empty)</b> Indicates that the option is not selected.
	<b>Solid Black Box</b> Indicates that the option selected for the menu item with a sub-menu.

**Table 11: Bluetooth Device Icons**

The following icons appear next to items in the list of Bluetooth-enabled devices available to indicate the device type.

	<b>Bluetooth Audio Device</b> Bluetooth-enabled audio device, such as a headset.
	<b>Bluetooth Data Device</b> Bluetooth-enabled data device, such as a scanner.

*Table continued...*

<sup>10</sup> Only applicable for DM4601e .

### Bluetooth PTT Device

Bluetooth-enabled PTT device, such as a PTT-Only Device (POD).

### Group Call/All Call

Indicates a Group Call or All Call in progress.

In the Contacts list, it indicates a group alias (name) or ID (number).

### Private Call

Indicates a Private Call in progress. In the Contacts list, it indicates a subscriber alias (name) or ID (number).

### Phone Call as Group/All Call

Indicates a Phone Call as Group Call or All Call in progress.

In the Contacts list, it indicates a group alias (name) or ID (number).

### Phone Call as Private Call

Indicates a Phone Call as Private Call in progress.

In the Contacts list, it indicates a phone alias (name) or ID (number).

**Table 12: Call Icons**

The following icons appear on the display during a call. These icons also appear in the Contacts list to indicate alias or ID type.

### Bluetooth PC Call

Indicates a Bluetooth PC Call in progress.

In the Contacts list, it indicates a Bluetooth PC Call alias (name) or ID (number).

### Dispatch Call

The Dispatch Call contact type is used to send a text message to a dispatcher PC through a third-party Text Message Server.

*Table continued...*

**Table 13: Job Tickets Icons**

The following icons appear momentarily on the display in the Job Ticket folder.

	<b>All Jobs</b> Indicates all jobs listed.
	<b>New Jobs</b> Indicates new jobs.
	<b>In Progress</b> Jobs are transmitting. This is seen before indication for Job Tickets Send Failed or Sent Successfully.
	<b>Send Failed</b> Jobs cannot be sent.
	<b>Sent Successfully</b> Jobs have been successfully sent.
	<b>Priority 1</b> Indicates Priority Level 1 for jobs.

*Table continued...*

	<b>Priority 2</b> Indicates Priority Level 2 for jobs.
	<b>Priority 3</b> Indicates Priority Level 3 for jobs.

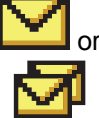

**Table 14: Mini Notice Icons**

The following icons appear momentarily on the display after an action to perform a task is taken.

	<b>Failed Transmission (Negative)</b> Failed action taken.
	<b>Successful Transmission (Positive)</b> Successful action taken.
	<b>Transmission in Progress (Transitional)</b> Transmitting. This is seen before indication for Successful Transmission or Failed Transmission.

**Table 15: Sent Items Icons**

The following icons appear at the top right corner of the display in the Sent Items folder.

	<p><b>In Progress</b></p> <p>The text message to a subscriber alias or ID is pending transmission, followed by waiting for acknowledgment.</p> <p>The text message to a group alias or ID is pending transmission.</p>
	<p><b>Individual or Group Message Read</b></p> <p>The text message has been read.</p>
	<p><b>Individual or Group Message Unread</b></p> <p>The text message has not been read.</p>

*Table continued...*

	<p><b>Send Failed</b></p> <p>The text message cannot be sent.</p>
	<p><b>Sent Successfully</b></p> <p>The text message has been successfully sent.</p>

## LED Indicators

LED indicators show the operational status of your radio.

### Blinking Red

Radio has failed the self-test upon powering up.

Radio is receiving an emergency transmission.

Radio is transmitting in low battery state.

Radio has moved out of range if Auto-Range Transponder System is configured.

Mute Mode is enabled.

### Solid Green

Radio is powering up.

Radio is transmitting.

Radio is sending a Call Alert or an emergency transmission.

**Blinking Green**

Radio is receiving a call or data.

Radio is retrieving Over-the-Air Programming transmissions.

Radio is detecting activity over the air.

**NOTICE:**

This activity may or may not affect the programmed channel of the radio due to the nature of the digital protocol.

There is no LED indication when the radio is detecting activity over the air in Capacity Plus.

**Double Blinking Green**

Radio is receiving a privacy-enabled call or data.

**Solid Yellow**

Radio is monitoring a conventional channel.

Radio is in Bluetooth Discoverable Mode.

**Blinking Yellow**

Radio is scanning for activity.

Radio has yet to respond to a Call Alert.

Radio has Flexible Receive List enabled.

All Capacity Plus-Multi-Site channels are busy.

**Double Blinking Yellow**

Radio has Auto Roaming enabled.

Radio is actively searching for a new site.

Radio has yet to respond to a Group Call Alert.

Radio is locked.

Radio is not connected to the repeater while in Capacity Plus.

All Capacity Plus channels are busy.

**Tones**

The following are the tones that sound through on the radio speaker.

High Pitched Tone

Low Pitched Tone

## Indicator Tones

Indicator tones provide you with audible indications of the status after an action to perform a task is taken.

Positive Indicator Tone

Negative Indicator Tone

## Audio Tones

Audio tones provide you with audible indications of the status, or response to data received on the radio.

### Continuous Tone

A monotone sound. Sounds continuously until termination.

### Periodic Tone

Sounds periodically depending on the duration set by the radio. Tone starts, stops, and repeats itself.

### Repetitive Tone

A single tone that repeats itself until it is terminated by the user.

### Momentary Tone

Sounds once for a short duration set by the radio.

## Conventional Analog and Digital Modes

Each channel in your radio can be configured as a conventional analog or conventional digital channel.

Use the **Channel Rocker** to switch between an analog or a digital channel.

Certain features are unavailable when switching from digital to analog mode. The icons for digital features reflect this change by appearing “grayed out”. The disabled features are hidden in the menu.

Your radio also has features available in both analog and digital modes. The minor differences in the way each feature works do **not** affect the performance of your radio.

**NOTICE:**

Your radio also switches between digital and analog modes during a dual mode scan. See [Scan on page 372](#) for more information.

## Icon Information

Throughout this publication, the icons described are used to indicate features supported in either the conventional analog or conventional digital mode, or made available with a keypad-enabled microphone.

Indicates a conventional **Analog Mode-Only** feature.

Indicates a conventional **Digital Mode-Only** feature.

For features that are available in **both** conventional analog and digital modes, both icons are **not** shown.

## IP Site Connect

This feature allows your radio to extend conventional communication beyond the reach of a single site by

connecting to different available sites by using an Internet Protocol (IP) network. This is a conventional multi-site mode.

When the radio moves out of range from one site and into the range of another, the radio connects to the repeater of the new site to send or receive calls or data transmissions. This is done either automatically or manually depending on your settings.

In an automatic site search, the radio scans through all available sites when the signal from the current site is weak or when the radio is unable to detect any signal from the current site. The radio then locks on to the repeater with the strongest Received Signal Strength Indicator (RSSI) value.

In a manual site search, the radio searches for the next site in the roam list that is currently in range but which may not have the strongest signal and locks on to the repeater.

**NOTICE:**

Each channel can only have either Scan or Roam enabled, not both at the same time.

Channels with this feature enabled can be added to a particular roam list. The radio searches the channels in the roam list during the automatic roam operation to locate the

best site. A roam list supports a maximum of 16 channels, including the selected channel.

**NOTICE:**

You cannot manually add or delete an entry in the roam list. Check with your dealer or system administrator for more information.

## Capacity Plus–Single-Site

Capacity Plus–Single-Site is a single-site trunking configuration of the MOTOTRBO radio system, which uses a pool of channels to support hundreds of users and up to 254 Groups. This feature allows your radio to efficiently utilize the available number of programmed channels while in Repeater Mode.

You hear a negative indicator tone if you try to access a feature not applicable to Capacity Plus–Single-Site by using a programmable button press.

Your radio also has features that are available in conventional digital mode, IP Site Connect, and Capacity Plus. However, the minor differences in the way each feature works does not affect the performance of your radio.

Check with your dealer or system administrator for more information on this configuration.

## Capacity Plus–Multi-Site

Capacity Plus–Multi-Site is a multi-channel trunking configuration of the MOTOTRBO radio system, combining the best of both Capacity Plus and IP Site Connect configurations.

Capacity Plus–Multi-Site allows your radio to extend trunking communication beyond the reach of a single site, by connecting to different available sites which are connected with an IP network. It also provides an increase in capacity by efficiently utilizing the combined available number of programmed channels supported by each of the available sites.

When the radio moves out of range from one site and into the range of another, it connects to the repeater of the new site to send or receive calls/data transmissions. Depending on your settings, this is done automatically or manually.

If the radio is set to do this automatically, it scans through all available sites when the signal from the current site is weak or when the radio is unable to detect any signal from the current site. It then locks on to the repeater with the strongest RSSI value.

In a manual site search, the radio searches for the next site in the roam list that is currently in range (but which may not have the strongest signal) and locks on to it.

Any channel with Capacity Plus–Multi-Site enabled can be added to a particular roam list. The radio searches these channels during the automatic roam operation to locate the best site.

#### NOTICE:

You cannot manually add or delete an entry to the roam list. Check with your dealer or system administrator for more information.

Similar to Capacity Plus–Single Site, icons of features not applicable to Capacity Plus–Multi-Site are not available in the menu. You hear a negative indicator tone if you try to access a feature not applicable to Capacity Plus–Multi-Site by using a programmable button press.

## Zone and Channel Selections

This chapter explains the operations to select a zone or channel on your radio. A zone is a group of channels.

Your radio supports up to 99 channels and 2 zones, with a maximum of 99 channels per zone.

Each channel can be programmed with different features and/or support different groups of users.

## Selecting Zones

Follow the procedure to select the required zone on your radio.

- 1 Do one of the following:
  - Press the programmed **Zone Selection** button. Proceed to [step 3](#).
  - Press  to access the menu.

---
- 2 Press  or  to Zone. Press  to select. The display shows  and the current zone.
 

---
- 3 Press  or  to the required zone. Press  to select. The display shows <Zone> Selected momentarily and returns to the selected zone screen.
 

---

## Selecting Zones by Using the Alias Search

Follow the procedure to select the required zone on your radio by using the alias search.

- 1 Press  to access the menu.

---

- 2 Press  or  to Zone. Press  to select.  
The display shows  and the current zone.

---

- 3 Enter the first character of the required alias.  
The display shows a blinking cursor.

---

- 4 Enter the rest of the characters of the required alias.  
The alias search is case-insensitive. If there are two or more entries with the same name, the display shows the entry listed first in the list.  
The first text line shows the characters you entered.  
The following text lines show the shortlisted search results.

---

- 5 Press  to select.

The display shows <Zone> Selected momentarily and returns to the selected zone screen.

---

## Selecting Channels

Follow the procedure to select the required channel on your radio after you have selected a zone.

Do one of the following:

- Press the **Scroll Up/Down** button.
  - Use the **Volume/Channel Knob**.
  - Press the programmed **Channel Up/Down** buttons.
- 

## Calls

This chapter explains the operations to receive, respond to, make, and stop calls.

You can select a subscriber alias or ID, or group alias or ID after you have selected a channel by using one of these features:

**Alias Search**

This method is used for Group, Private, and All Calls only with a keypad microphone.

**Contacts List**

This method provides direct access to the Contacts list.

**Manual Dial (by using Contacts)**

This method is used for Private and Phone Calls only with a keypad microphone.

**Programmed Number Keys**

This method is used for Group, Private, and All Calls only with a keypad microphone.

**NOTICE:**

You can only have one alias or ID assigned to a number key, but you can have more than one number key associated to an alias or ID. All the number keys on a keypad microphone can be assigned. See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

**Programmed One Touch Access Button**

This method is used for Group, Private, and Phone Calls only.

You can only have one ID assigned to a **One Touch Access** button with a short or long programmable

button press. Your radio can have multiple **One Touch Access** buttons programmed.

**Programmable Button**

This method is used for Phone Calls only.

**Volume/Channel Selector Knob**

This method manually selects a subscriber alias or ID, or group alias or ID.

The LED lights up solid green while the radio is transmitting and blinks green when the radio is receiving.

**NOTICE:**

The LED lights up solid green while the radio is transmitting and double blinks green when the radio is receiving a privacy-enabled call.

To unscramble a privacy-enabled call, your radio must have the same Privacy Key, or the same Key Value and Key ID (programmed by your dealer), as the transmitting radio (the radio you are receiving the call from).

See [Privacy on page 426](#) for more information.

**Group Calls**

Your radio must be configured as part of a group to receive a call from or make a call to the group of users.

## Making Group Calls

Follow the procedure to make Group Calls on your radio.

- 1 Do one of the following:
  - Select a channel with the active group alias or ID.
  - Press the programmed **One Touch Access** button.

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and the group call alias.

- 3 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the **Group Call** icon, the group alias or ID, and the transmitting radio alias or ID.

- 4  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on prior to initiating the call.

## Making Group Calls by Using the Contacts List

Follow the procedure to make Group Calls on your radio by using the Contacts list.

- 1 Press  to access the menu.

- 2 Press  or  to Contacts. Press  to select.

- 3 Press  or  to the required alias or ID.  
Press  to select.

- 4 Press the **PTT** button to make the call.  
The green LED lights up.

- 5 Release the **PTT** button to listen.

The green LED blinks when any user in the group responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.

---

- 6  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

---

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

A negative indicator tone sounds if the number key is not associated to an entry.

---

- 2 Press the **PTT** button to make the call.

The green LED lights up.

---

- 3 Release the **PTT** button to listen.

The green LED blinks when any user in the group responds.

---

- 4  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on before initiating the call.

---

## Making Group Calls by Using the Programmable Number Key

Follow the procedure to make Group Calls on your radio by using the programmable number key.

- 1 Long press the programmed number key to the predefined alias or ID when you are on the Home screen.

See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

## Responding to Group Calls

To receive a call from a group of users, your radio must be configured as part of that group. Follow the procedure to respond to Group Calls on your radio.

When you receive a Group Call:

- The green LED blinks.
- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias.
- The second text line displays the group call alias.
- Your radio unmutes and the incoming call sounds through the speaker.

### 1 Do one of the following:

-  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.
-  If the Voice Interrupt feature is enabled, press the **PTT** button to interrupt the audio from the

transmitting radio and free the channel for you to respond.

The green LED lights up.

---

### 2 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
-  Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

---

### 3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period.

If the radio receives a Group Call while not on the Home screen, it remains on its current screen prior to answering the call.

Long press  to return to the Home screen to view the caller alias before replying.

## Private Calls

A Private Call is a call from an individual radio to another individual radio.

There are two ways to set up a Private Call. The first type sets up the call after performing a radio presence check, while the second type sets up the call immediately. Only one of these types can be programmed to your radio by your dealer.

## Making Private Calls

Your radio must be programmed to initiate a Private Call. If this feature is not enabled, a negative indicator tone sounds when you initiate the call. Follow the procedure to make Private Calls on your radio.

Use the Text Message or Call Alert features to contact an individual radio. For more information, see [Text Messaging on page 140](#) or [Call Alert Operation on page 387](#).

- 1 Do one of the following:
  - Select a channel with the active subscriber alias or ID.

- Press the programmed **One Touch Access** button.
- 

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Private Call** icon, the subscriber alias, and call status.

---

- 3 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- 

- 4 Release the **PTT** button to listen.

The green LED blinks when the target radio responds.

---

- 5  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows **Call Ended**.

---

## Making Private Calls by Using the Contacts List

Follow the procedure to make Private Calls on your radio by using the Contacts list.

- 1 Press  to access the menu.

---

- 2 Press  or  to **Contacts**. Press  to select.

---

- 3 Press  or  to the required alias or ID.  
Press  to select.

---

- 4 Press the **PTT** button to make the call.  
The green LED lights up. The display shows the destination alias.

---

- 5 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

---

- 6 Release the **PTT** button to listen.  
The green LED blinks when the target radio responds. The display shows the transmitting user alias or ID.
- 

- 7  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows **Call Ended**.

---

## Making Private Calls by Using the Manual Dial

Follow the procedure to make Private Calls on your radio by using the manual dial.

- 1 Press  to access the menu.
-

2 Press  or  to **Contacts**. Press  to select.

---

3 Press  or  to **Manual Dial**. Press  to select.

---

4 Press  or  to **Radio Number**. Press  to select.

---

5 Do one of the following:

- Enter the subscriber ID, and press  to proceed.
  - Edit the previously dialed subscriber ID, and press  to proceed.
- 

6 Press the **PTT** button to make the call.  
The green LED lights up. The display shows the destination alias.

---

7 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

---

8 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. The display shows the transmitting user alias or ID.

---

9  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows **Call Ended**.

---

## Making Private Calls by Using the Programmable Number Key

Follow the procedure to make Private Calls on your radio by using the programmable number key.

1 Long press the programmed number key to the predefined alias or ID when you are on the Home screen.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

A negative indicator tone sounds if the number key is not associated to an entry.

---

## 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Private Call** icon at the top right corner. The first text line shows the caller alias. The second text line shows the call status.

---

## 3 Release the **PTT** button to listen.

The green LED blinks when the target radio responds. The display shows the destination alias.

---

- 4  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The radio

returns to the screen you were on before initiating the call.

---

See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

## Responding to Private Calls

Follow the procedure to respond to Private Calls on your radio.

When you receive a Private Call:

- The green LED blinks.
- Your radio unmutes and the incoming call sounds through the speaker.

### 1 Do one of the following:

-  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.
-  If the Transmit Interrupt Remote Dekey feature is enabled, press the **PTT** button to stop an

ongoing interruptible call and free the channel for you to respond.

The green LED lights up.

---

**2** Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

---

**3** Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period.

---

- The display shows the **Group Call** icon at the top right corner.
- The first text line shows the caller alias ID.
- The second text line displays **All Call**.
- Your radio unmutes and the incoming call sounds through the speaker.

The radio returns to the screen before receiving the All Call when the call ends.

An All Call does not wait for a predetermined period before ending.

 If the Channel Free Indication feature is enabled, you hear a short alert tone when the transmitting radio releases the **PTT** button, indicating the channel is free for you to use.

You cannot respond to an All Call.

**NOTICE:**

The radio stops receiving the All Call if you switch to a different channel while receiving the call. You are not able to continue with any menu navigation or editing until the end of an All Call.

## All Calls

An All Call is a call from an individual radio to every radio on the channel. An All Call is used to make important announcements, requiring full attention from the user. The users on the channel cannot respond to an All Call.

## Receiving All Calls

When you receive an All Call:

- A tone sounds.
- The green LED blinks.

## Making All Calls

Your radio must be programmed for you to make an All Call. Follow the procedure to make All Calls on your radio.

- 1 Select a channel with the active All Call group alias or ID.
- 

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon and All Call.

---

- 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
-  Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

Users on the channel cannot respond to an All Call.

---

## Making All Calls by Using the Programmable Number Key

Follow the procedure to make All Calls on your radio by using the programmable number key.

- 1 Long press the programmed number key assigned to the predefined alias or ID when you are on the Home screen.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

A negative indicator tone sounds if the number key is not associated to an entry.

---

- 2 Press the **PTT** button to make the call.

The green LED lights up.

---

- 3 Release the **PTT** button to listen.

The green LED lights up when the target radio responds. You cannot respond to an All Call at the moment.

---

- 4  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. The radio returns to the screen you were on prior to initiating the call. For a Private Call, you hear a short tone when the call ends.

---

See [Assigning Entries to Programmable Number Keys on page 377](#) for more information.

## Selective Calls

A Selective Call is a call from an individual radio to another individual radio. It is a Private Call on an analog system.

## Making Selective Calls

Your radio must be programmed for you to initiate a Selective Call. Follow the procedure to make Selective Calls on your radio.

- 1 Select a channel with the active subscriber alias or ID.
- 

- 2 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Private Call** icon, the subscriber alias, and call status.

---

- 3 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
  -  Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.
- 

- 4 Release the **PTT** button to listen.

The green LED lights up when the target radio responds.

---

- 5  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period.

---

6 The display shows `Call Ended`.

---

## Responding to Selective Calls

Follow the procedure to respond to Selective Calls on your radio.

When you receive a Selective Call:

- The green LED blinks.
- The first text line shows the **Private Call** icon and the caller alias or `Selective Call` or `Alert with Call`.
- Your radio unmutes and the incoming call sounds through the speaker.

1 Press the **PTT** button to respond to the call.  
The green LED lights up.

---

2 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.

---

3 Release the **PTT** button to listen.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

---

## Phone Calls

A Phone Call is a call from an individual radio to a telephone.

If Phone Call capability is not enabled in your radio:

- The display shows `Unavailable`.
- Your radio mutes the call.
- Your radio returns to the previous screen when the call ends.

During the Phone Call, your radio attempts to end the call when:

- You press the **One Touch Access** button with the deaccess code preconfigured.
- You enter the deaccess code as the input for extra digits.

During channel access, access or deaccess code, or extra digits transmission, your radio responds to the **On/Off**, **Volume Control**, and **Channel Selector** buttons or knobs only. A tone sounds for every invalid input.

During channel access, press  to dismiss the call attempt. A tone sounds.

**NOTICE:**

The access or deaccess code cannot be more than 10 characters.

Check with your dealer or system administrator for more information.

## Making Phone Calls

Follow the procedure to make Phone Calls on your radio.

- 1 Press the programmed **One Touch Access** button to the predefined alias or ID.

If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds. If the access code is not preconfigured in the Contact List, the display shows `Access Code:`.

- 2 Enter the access code, and press  to proceed.  
The access or deaccess code cannot be more than 10 characters.

- 3 Press the **PTT** button to respond to the call. Release the **PTT** button to listen.

- 4 Enter extra digits with the keypad if requested by the call, and press  to proceed.

If the call ends while you are entering the extra digits requested by the call, your radio returns to the screen you were on before initiating the call.

The Dual Tone Multi Frequency (DTMF) Tone sounds. Your radio returns to the previous screen.

- 5 Press  to end the call.

- 6 Do one of the following:
  - If the deaccess code was not preconfigured, enter the deaccess code when the display shows `De-Access Code:`, and press  to proceed. The radio returns to the previous screen.
  - Press the programmed **One Touch Access** button.

If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

The DTMF Tone sounds and the display shows Ending Phone Call.

If the call ends successfully:

- A tone sounds.
- The display shows Call Ended.

If the call fails to end, the radio returns to the Phone Call screen. Repeat the last two steps or wait for the telephone user to end the call.

## Making Phone Calls by Using the Contacts List

Follow the procedure to make Phone Calls on your radio by using the Contacts list.

- 1 Press  to access the menu.

- 2 Press  or  to Contacts. Press  to select.

The display shows the entries in alphabetical order.

- 3 Press  or  to the required alias or ID. Press  to select.

When you press the **PTT** button while on the Phone Contacts screen:

- The first line of the display shows Phone Number:.
- The second line of the display shows a blinking cursor.

If the selected entry is empty:

- A negative indicator tone sounds.
- The display shows Phone Call Invalid #.

- 4 Press  or  to Call Phone. Press  to select.

The display shows Access Code: if the access code was not preconfigured.

- 5 Enter the access code, and press  to proceed.

The access or deaccess code cannot be more than 10 characters.

The first text line shows Calling. The second text line shows the subscriber alias or ID, and the **Phone Call** icon.

If the call is successful:

- The DTMF Tone sounds.
- You hear the dialing tone of the telephone user.
- The first text line shows the subscriber alias or ID, and the **RSSI** icon.
- The second text line shows Phone Call, and the **Phone Call** icon.

If the call is unsuccessful:

- A tone sounds.

- The display shows Phone Call Failed and then, Access Code:.
- Your radio returns to the screen you were on prior to initiating the call if the access code has been preconfigured in the Contacts list.

- 6 Press the **PTT** button to respond to the call.

The **RSSI** icon disappears.

- 7 Release the **PTT** button to listen.

- 8 Enter extra digits with the keypad if requested by the call, and press  to proceed.

If the call ends while you are entering the extra digits requested by the call, your radio returns to the screen you were on prior to initiating the call.

The DTMF Tone sounds. Your radio returns to the previous screen.

- 9 Press  to end the call.

**10** If the deaccess code was not preconfigured, enter the deaccess code when the display shows De-

Access Code:, and press  to proceed.

The radio returns to the previous screen. The DTMF Tone sounds and the display shows Ending Phone Call.

If the call ends successfully:

- A tone sounds.
- The display shows Call Ended.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 9](#) and [step 10](#), or wait for the telephone user to end the call. When you press the **PTT** button while in the Phone Contacts screen, as tone sounds and the display shows Press OK to Place Phone Call.

When the telephone user ends the call, a tone sounds and the display shows Phone Call Ended.

If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on prior to initiating the call.

## NOTICE:

During the channel access, press  to dismiss the call attempt and a tone sounds.

During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

During channel access and access/ deaccess code or extra digits transmission, your radio responds to **On/Off** button, **Volume Knob**, and **Channel Rocker** only. A tone sounds for every invalid input.

## Making Phone Calls by Using the Manual Dial

Follow the procedure to make Phone Calls on your radio by using the manual dial.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Contacts. Press  to select.

3 Press  or  to Manual Dial. Press  to select.

---

4 Press  or  to Phone Number. Press  to select.

The display shows `Number:` and a blinking cursor.

---

5 Enter the telephone number, and press  to proceed.

The display shows `Access Code:` and a blinking cursor if the access code was not preconfigured.

---

6 Enter the access code, and press  to proceed.  
The access or deaccess code cannot be more than 10 characters.

---

7 The green LED lights up. The display shows the **Phone Call** icon at the top right corner. The first text line shows the subscriber alias. The second text line shows the call status.  
If the call is successful:

- The DTMF Tone sounds.
- You hear the dialing tone of the telephone user.
- The first text line shows the subscriber alias.
- The display continues to show the **Phone Call** icon at the top right corner.

If the call is unsuccessful:

- A tone sounds.
  - The display shows `Phone Call Failed` and then, `Access Code:`.
  - Your radio returns to the screen you were on before initiating the call if the access code has been preconfigured in the Contacts list.
- 

8 Press  to end the call.

---

9 Do one of the following:

- If the deaccess code was not preconfigured, enter the deaccess code when the display shows `De-Access Code:`, and press  to proceed. The radio returns to the previous screen.

- Press the programmed **One Touch Access** button.  
If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

The DTMF Tone sounds and the display shows  
Ending Phone Call.

If the call ends successfully:

- A tone sounds.
- The display shows Call Ended.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 8](#), or wait for the telephone user to end the call.

### NOTICE:

When you press **PTT** button while in the Phone Contacts screen, a tone sounds and the display shows Press OK to Place Phone Call.

When the telephone user ends the call, a tone sounds and the display shows Call Ended.

If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on before initiating the call.

During the channel access, press  to dismiss the call attempt and a tone sounds.

During the call, when you press **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call.

During channel access and access/deaccess code or extra digits transmission, your radio responds to **On/Off** button, **Volume Knob**,

and **Channel Rocker** only. A tone sounds for every invalid input.

## Making Group, Private, Phone or All Calls by Using the Alias Search

Follow the procedure to make any calls by using the alias search.

- 1 Press  to access the menu.

---

- 2 Press  or  to **Contacts**. Press  to select.  
The display shows the entries in alphabetical order.

---

- 3 Press  or  to the required subscriber alias or ID. The first line of the display shows **Phone Number:**. The second line of the display shows a blinking cursor. Use the keypad to enter a telephone number.

- 4 Press  to select. If the entry selected is empty, a negative indicator tone sounds and the display shows **Phone Call Invalid #**.

---

- 5 Press  or  to **Call Phone** and Press  to select. If the access code was not preconfigured in the **Contacts** list, the first line of the display shows **Access Code:**. The second line of the display shows a blinking cursor. Enter the access code and press the  button to proceed. If successful, the DTMF tone sounds. You hear the dialing tone of the telephone user. The first line of the display shows the subscriber alias or ID, and the **RSSI** icon. The second line of the display shows **Phone Call** and the **Phone Call** icon. If unsuccessful, a tone sounds and the display shows **Phone Call Failed**. Your radio returns to the **Access Code** input screen. If the access code was preconfigured in the **Contacts** list, the radio returns to the screen you were on prior to initiating the call.

---

- 6 Press the **PTT** button to talk and release it to listen. The **RSSI** icon disappears during transmission.

- 7 To enter extra digits, if requested by the Phone Call, do one of the following.
- Press any keypad key to begin the input of the extra digits. The first line of the display shows `Extra Digits:`. The second line of the display shows a blinking cursor. Enter the extra digits and press the  button to proceed. The DTMF tone sounds and the radio returns to the previous screen.
  - Press **One Touch Access** button. The DTMF tone sounds. If the entry for the **One Touch Access** button is empty, a negative indicator tone sounds.

- 8 Press  to end the call. If deaccess code was not preconfigured in the Contacts list, the first line of the display shows `De-Access Code:`. The second line of the display shows a blinking cursor. Enter the deaccess code and press  to proceed. The radio returns to the previous screen. The DTMF tone sounds and the display shows `Ending Phone Call`. If successful, a tone sounds and the display shows `Phone Call Ended`. Your radio returns to the Phone

Call screen. If unsuccessful, your radio returns to the Phone Call screen. When you press the **PTT** button while in the Phone Contacts screen, as tone sounds and the display shows `Press OK to Place Phone Call`. When the telephone user ends the call, a tone sounds and the display shows `Phone Call Ended`. If the call ends while you are entering the extra digits requested by the Phone Call, your radio returns to the screen you were on prior to initiating the call.

#### NOTICE:

During the channel access, press  to dismiss the call attempt and a tone sounds button or to exit alias search. Press  or  to exit alias search. During the call, when you press the **One Touch Access** button with the deaccess code preconfigured or enter the deaccess code as the input for extra digits, your radio attempts to end the call. During channel access and access/ deaccess code or extra digits transmission, you radio responds to On/Off button, Volume Knob, and Channel Rocker only. A tone sounds for every invalid input.

## Dual Tone Multi Frequency

The Dual Tone Multi Frequency (DTMF) feature allows the radio to operate in a radio system with an interface to the telephone systems.

You can turn off the DTMF tone by disabling all radio tones and alerts. See [Turning Radio Tones/Alerts On or Off on page 187](#) for more information.

## Initiating DTMF Calls

Follow the procedure to initiate DTMF calls on your radio.

- 1 Press and hold the **PTT** button.

---

  - 2 Do one of the following:
    - Enter the desired number to initiate a DTMF call.
    - Press  to initiate a DTMF call.
    - Press  to initiate a DTMF call.
- 

## Responding to Phone Calls as Group Calls

Follow the procedure to respond to Phone Calls as Group Calls on your radio.

When you receive a Phone Call as a Group Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows the group alias and Phone Call.

If Phone Call capability is not enabled on your radio, the first line of the display shows `Unavailable` and your radio mutes the call. Your radio returns to the previous screen when the call ends.

- 1 Press the **PTT** button to respond to the call. Release the **PTT** button to listen.

---

- 2 Press  to end the call.

The display shows `Ending Phone Call`.  
If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat this step or wait for the telephone user to end the call.

---

## Responding to Phone Calls as All Calls

When you receive a Phone Call as an All Call, you can respond to or end the call, only if an All Call type is assigned to the channel. Follow the procedure to respond to Phone Calls as All Calls on your radio.

When you receive a Phone Call as an All Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows `All Call` and `Phone Call`.

If Phone Call capability is not enabled on your radio, the first line of the display shows `Unavailable` and your radio mutes the call.

Your radio returns to the previous screen when the call ends.

- 1 Press the **PTT** button to respond to the call.
- 

- 2 Release the **PTT** button to listen.
- 

- 3 Press  to end the call.

The display shows `Ending Phone Call`.  
If the call ends successfully:

- A tone sounds.
- The display shows `All Call` and `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat [step 3](#) or wait for the telephone user to end the call.

---

## Responding to Phone Calls as Private Calls

Follow the procedure to respond to Phone Calls as Private Calls on your radio.

When you receive a Phone Call as a Private Call:

- The display shows the **Phone Call** icon at the top right corner.
- The display shows the caller alias or `Phone Call`.

If Phone Call capability is not enabled on your radio, the first line of the display shows `Unavailable` and your radio mutes the call. Your radio returns to the previous screen when the call ends.

- 1 Press the **PTT** button to respond to the call. Release the **PTT** button to listen.

- 2 Press  to end the call.

The display shows `Ending Phone Call`.

If the call ends successfully:

- A tone sounds.
- The display shows `Call Ended`.

If the call fails to end, the radio returns to the Phone Call screen. Repeat this step or wait for the telephone user to end the call.

## Stopping Radio Calls

This feature allows you to stop an ongoing Group or Private Call to free the channel for transmission. For example, when a radio experiences a "stuck microphone" condition where the **PTT** button is inadvertently pressed by the user.

[Send Feedback](#)

Your radio must be programmed to allow you to use this feature. Follow the procedure to stop calls on your radio.

- 1 Press the programmed **Transmit Interrupt Remote Dekey** button.

The display shows `Remote Dekey`.

- 2 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows `Remote Dekey Success`.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Remote Dekey Failed`.

### NOTICE:

Check with your dealer or system administrator for more information.

## Talkaround

This feature allows you to continue communication when your repeater is not operational, or when your radio is out of range from the repeater but within talking range of other radios.

The talkaround setting is retained even after powering down.

### NOTICE:

This feature is not applicable in Capacity Plus–Single-Site, Capacity Plus–Multi-Site, and Citizens Band channels that are in the same frequency.

## Toggling Between Repeater and Talkaround Modes

Follow the procedure to toggle between Repeater and Talkaround modes on your radio.

- 1 Do one of the following:
    - Press the programmed **Repeater/Talkaround** button. Skip the following steps.
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Talkaround. Press  to select.

If enabled, ✓ appears beside Enabled.

If disabled, ✓ disappears beside Enabled.

The screen automatically returns to the previous screen.

---

## Advanced Features

This chapter explains the operations of the features available in your radio.

Your dealer or system administrator may have customized your radio for your specific needs. Check with your dealer or system administrator for more information.

## Home Channel Reminder

This feature provides a reminder when the radio is not set to the home channel for a period of time.

If this feature is enabled through CPS, when your radio is not set to the home channel for a period of time, the following occurs periodically:

- The Home Channel Reminder tone and announcement sound.
- The first line of the display shows `Non.`
- The second line shows `Home Channel.`

You can respond to the reminder by performing one of the following actions:

- Return to the home channel.
- Mute the reminder temporarily using the programmable button.
- Set a new home channel using the programmable button.

## Muting the Home Channel Reminder

When the Home Channel Reminder sounds, you can temporarily mute the reminder.

Press the **Silence Home Channel Reminder** programmable button.

The first line of the display shows `HCR` and the second line shows `Silenced.`

---

## Setting New Home Channels

When the Home Channel Reminder occurs, you can set a new home channel.

- 1 Do one of the following:
    - Press the **Reset Home Channel** programmable button to set the current channel as the new Home Channel. Skip the following steps. The first line of the display shows the channel alias and the second line shows `New Home Ch.`
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
-

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Home Channel. Press  to select.

---

5 Press  or  to the desired new home channel alias. Press  to select.  
The display shows  beside the selected home channel alias.

---

## Radio Check

This feature allows you to determine if another radio is active in a system without disturbing the radio user. No audible or visual notification is shown on the target radio. This feature is only applicable for subscriber aliases or IDs. Your radio must be programmed to allow you to use this feature.

## Sending Radio Checks

Follow the procedure to send radio checks on your radio.

1 Press the programmed **Radio Check** button.

---

2 Press  or  to the required alias or ID.  
Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

---

Wait for acknowledgment.

If you press  when the radio is waiting for acknowledgment, a tone sounds, the radio terminates all retries, and exits Radio Check mode.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

The radio returns to the subscriber alias or ID screen.

## Sending Radio Checks by Using the Manual Dial

Follow the procedure to send radio checks on your radio by using the manual dial.

- 1 Press  to access the menu.

---

- 2 Press  or  to **Contacts**. Press  to select.

---

- 3 Press  or  to **Manual Dial**. Press  to select.

---

- 4 Press  or  to **Radio Number**. Press  to select.

---

- 5 Do one of the following:
  - Enter the subscriber alias or ID, and press  to proceed.

- Edit the previously dialed ID, and press  to proceed.

- 6 Press  or  to **Radio Check**. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

- 7 Wait for acknowledgment.

If you press  when the radio is waiting for acknowledgement, a tone sounds, the radio terminates all retries, and exits Radio Check mode.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

The radio returns to the subscriber alias or ID screen.

---

## Remote Monitor

This feature is used to turn on the microphone of a target radio with a subscriber alias or ID. You can use this feature to remotely monitor any audible activity surrounding the target radio.

There are two types of Remote Monitor:

- Remote Monitor without Authentication
- Remote Monitor with Authentication.

Authenticated Remote Monitor is a purchasable feature. In Authenticated Remote Monitor, verification is required when your radio turns on the microphone of a target radio.

When your radio initiates this feature on a target radio with User Authentication, a passphrase is required. The passphrase is preprogrammed into the target radio through CPS.

Both your radio and the target radio must be programmed to allow you to use this feature.

This feature stops after a programmed duration or when there is any user operation on the target radio.

## Initiating Remote Monitor

Follow the procedure to initiate Remote Monitor on your radio.

---

1 Press the programmed **Remote Monitor** button.

---

2 Press  or  to the required alias or ID.

---

3 Press  to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

#### 4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows *Rem. Monitor*. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

## Initiating Remote Monitor by Using the Contacts List

Follow the procedure to initiate Remote Monitor on your radio by using the Contacts list.

1 Press  to access the menu.

2 Press  or  to *Contacts*. Press  to select.

3 Press  or  to the required alias or ID. Press  to select.

4 Press  or  to *Remote Mon..*

5 Press  to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the

request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

---

## 6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows *Rem. Monitor*. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Initiating Remote Monitor by Using the Manual Dial

Follow the procedure to initiate Remote Monitor on your radio by using the manual dial.

- 1 Press  to access the menu.

---

- 2 Press  or  to *Contacts*. Press  to select.

---

- 3 Press  or  to *Manual Dial*. Press  to select.

---

- 4 Press  or  to *Radio Number*. Press  to select.

---

- 5 Do one of the following:
  - Enter the subscriber alias or ID, and press  to proceed.

- Edit the previously dialed ID, and press  to proceed.

---

6 Press  or  to Remote Mon..

---

7 Press  to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

---

8 Wait for acknowledgment.

If successful:

[Send Feedback](#)

- A positive indicator tone sounds.
- The display shows a positive mini notice.
- The audio from the monitored radio starts playing for a programmed duration, and the display shows Rem. Monitor. Once the timer expires, an alert tone sounds, and the LED turns off.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Scan Lists

Scan lists are created and assigned to individual channels or groups. Your radio scans for voice activity by cycling through the channel or group sequence specified in the scan list for the current channel or group.

Your radio can support up to 250 scan lists, with a maximum of 16 members in a list.

Each scan list supports a mixture of both analog and digital entries.

You can add, delete, or prioritize channels by editing a scan list.

You can attach a new scan list to your radio by using Front Panel Programming. See [Front Panel Configuration on page 180](#) for more information.

The **Priority** icon appears on the left of the member alias, if set, to indicate whether the member is on a Priority 1 or Priority 2 channel list. You cannot have multiple Priority 1 or Priority 2 channels in a scan list. There is no **Priority** icon if priority is set to **None**.

**NOTICE:**

This feature is not applicable in Capacity Plus.

## Viewing Entries in the Scan List

Follow the procedure to view the entries in the Scan list on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan. Press  to select.

---

- 3 Press  or  to Scan List. Press  to select.

---

- 4 Press  or  to view each member on the list.

---

## Viewing Entries in the Scan List by Using the Alias Search

Follow the procedure to view entries in the Scan list on your radio by using the alias search.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan. Press  to select.

---

- 3 Press  or  to Scan List. Press  to select.

---

- 4 Enter the first character of the required alias.  
The display shows a blinking cursor.

---

- 5 Enter the rest of the characters of the required alias.

The alias search is case-insensitive. If there are two or more entries with the same name, the display shows the entry listed first in the list.

The first text line shows the characters you entered. The following text lines show the shortlisted search results.

## Adding New Entries to the Scan List

Follow the procedure to add new entries to the Scan list on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan. Press  to select.

---

- 3 Press  or  to Scan List. Press  to select.

---

- 4 Press  or  to Add Member. Press  to select.

- 5 Press  or  to the required alias or ID.

Press  to select.

- 6 Press  or  to the required priority level.

Press  to select.

The display shows a positive mini notice and then, Add Another?.

- 7 Do one of the following:

- Press  or  to Yes to add another entry. Press  to select. Repeat [step 5](#) and [step 6](#).
- Press  or  to No to save the current list. Press  to select.

## Adding New Entries to the Scan List by Using the Alias Search

Follow the procedure to add new entries to the Scan list on your radio by using the alias search.

- 1 Press  to access the menu.

---

- 2 Press  or  to Scan. Press  to select.

---

- 3 Press  or  to Scan List. Press  to select.

---

- 4 Press  or  to Add Member. Press  to select.

---

- 5 Enter the first character of the required alias.  
The display shows a blinking cursor.

---

- 6 Enter the rest of the characters of the required alias.  
The alias search is case-insensitive. If there are two or more entries with the same name, the display shows the entry listed first in the list.  
The first text line shows the characters you entered.  
The following text lines show the shortlisted search results.

- 7 Press  to select.

---

- 8 Press  or  to the required priority level.  
Press  to select.  
The display shows a positive mini notice and then, Add Another?.

---

- 9 Do one of the following:
  - Press  or  to Yes to add another entry.  
Press  to select. Repeat Step [step 5](#) to Step [step 8](#).
  - Press  or  to No to save the current list.  
Press  to select.

## Deleting Entries from the Scan List

Follow the procedure to delete entries from the Scan list.

- 1 Press  to access the menu.

2 Press  or  to Scan. Press  to select.

---

3 Press  or  to Scan List. Press  to select.

---

4 Press  or  to the required alias or ID.  
Press  to select.

---

5 Press  or  to Delete. Press  to select.  
The display shows Delete Entry?.

---

6 Do one of the following:

- Press  or  to Yes to delete the entry.  
Press  to select.  
The display shows a positive mini notice.
  - Press  or  to No to return to the previous screen. Press  to select.
- 

7 Repeat [step 4](#) to [step 6](#) to delete other entries.

---

8 Long press  to return to the Home screen after deleting all required aliases or IDs.

---

## Setting Priority for Entries in the Scan List

Follow the procedure to set priorities for entries in the Scan list on your radio.

1 Press  to access the menu.

---

2 Press  or  to Scan. Press  to select.

---

3 Press  or  to Scan List. Press  to select.

---

4 Press  or  to the required alias or ID.  
Press  to select.

---

5 Press  or  to Edit Priority. Press  to select.

6 Press  or  to the required priority level.

Press  to select.

The display shows a positive mini notice before returning to the previous screen. The **Priority** icon appears on the left of the member alias.

## Scan

Your radio cycles through the programmed scan list for the current channel looking for voice activity when you start a scan.

### NOTICE:

This feature is not applicable in Capacity Plus.

During a dual-mode scan, if you are on a digital channel, and your radio locks onto an analog channel, it automatically switches from digital mode to analog mode for the duration of the call. This is also true for the reverse.

There are two ways of initiating scan:

### Main Channel Scan (Manual)

Your radio scans all the channels or groups in your scan list. On entering scan, your radio may, depending on the settings, automatically start on the last scanned active channel or group, or on the channel where scan was initiated.

### Auto Scan (Automatic)

Your radio automatically starts scanning when you select a channel or group that has Auto Scan enabled.

### NOTICE:

When you configure **Receive Group Message In Scan**, your radio is able to receive group messages from non-home channels. Your radio is able to reply the group messages on home channel but is not able to reply on non-home channels. Check with your dealer or system administrator for more information.

## Turning Scan On or Off

Follow the procedure to turn scan on or off on your radio.

1 Press  to access the menu.

2 Press  or  to Scan. Press  to select.

---

3 Press  or  to Scan State. Press  to select.

---

4 Press  or  to the required scan state and press  to select.

---

If scan is enabled:

- The display shows Scan On and **Scan** icon.
- The yellow LED blinks.

If scan is disabled:

- The display shows Scan Off.
- The **Scan** icon disappears.
- The LED turns off.

## Responding to Transmissions During Scanning

During scanning, your radio stops on a channel or group where activity is detected. The radio stays on that channel

for a programmed duration known as hang time. Follow the procedure to respond to transmissions during scanning.

- 1  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button during hang time.

The green LED lights up.

---

- 2 Release the **PTT** button to listen.

The radio returns to scanning other channels or groups if you do not respond within the hang time.

---

## Deleting Nuisance Channels

If a channel continually generates unwanted calls or noise, (termed a "nuisance" channel), you can temporarily remove the unwanted channel from the scan list. This capability does not apply to the channel designated as the Selected Channel. Follow the procedure to delete nuisance channels on your radio.

1 When your radio locks on to an unwanted or nuisance channel, press the programmed **Nuisance Channel Delete** button until you hear a tone.

---

2 Release the programmed **Nuisance Channel Delete** button.

The nuisance channel is deleted.

---

## Restoring Nuisance Channels

Follow the procedure to restore nuisance channels on your radio.

Do one of the following:

- Turn the radio off and then power it on again.
  - Stop and restart a scan using the programmed **Scan** button or menu.
  - Change the channel using the **Channel Up/Down** button.
- 

## Vote Scan

Vote Scan provides you with wide area coverage in areas where there are multiple base stations transmitting identical information on different analog channels.

Your radio scans analog channels of multiple base stations and performs a voting process to select the strongest received signal. Once that is established, your radio receives transmissions from that base station.

During a vote scan, the yellow LED blinks and the display shows the **Vote Scan** icon.

Follow the same procedures as [Responding to Transmissions During Scanning on page 373](#), to respond to a transmission during a vote scan.

## Contacts Settings

Contacts provides address book capabilities on your radio. Each entry corresponds to an alias or ID that you use to initiate a call. The entries are alphabetically sorted.

Each entry, depending on context, associates with the different call types: Group Call, Private Call, All Call, PC Call, or Dispatch Call.

PC Call and Dispatch Call are data-related. They are only available with the applications. Refer to the data applications documentation for further details.

 Additionally, Contacts menu allows you to assign each entry to a programmable number key or more on a keypad microphone. If an entry is assigned to a number key, your radio can perform a quick dial on the entry.

**NOTICE:**

You see a checkmark before each number key that is assigned to an entry. If the checkmark is before `Empty`, you have not assign a number key to the entry.

Each entry within Contacts displays the following information:

- Call Type
- Call Alias
- Call ID

**NOTICE:**

If the Privacy feature is enabled on a channel, you can make privacy-enabled Group Calls, Private Calls, and All Calls on that channel. Only target radios with the same Privacy Key, or the same Key Value and Key ID as your radio will be able to decrypt the transmission.

## Making Group Calls by Using the Contacts List

Follow the procedure to make Group Calls on your radio by using the Contacts list.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Contacts`. Press  to select.

---

- 3 Press  or  to the required alias or ID. Press  to select.

---

- 4 Press the **PTT** button to make the call.  
The green LED lights up.
- 

- 5 Release the **PTT** button to listen.  
The green LED blinks when any user in the group responds. The display shows the **Group Call** icon, and alias or ID, and the transmitting radio alias or ID.
- 

- 6  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.  
The call ends when there is no voice activity for a predetermined period.
- 

## Making Private Calls by Using the Contacts List

Follow the procedure to make Private Calls on your radio by using the Contacts list.

- 1 Press  to access the menu.

---

  - 2 Press  or  to **Contacts**. Press  to select.

---

  - 3 Press  or  to the required alias or ID.  
Press  to select.
- 

- 4 Press the **PTT** button to make the call.  
The green LED lights up. The display shows the destination alias.

---

  - 5 Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
- 

- 6 Release the **PTT** button to listen.  
The green LED blinks when the target radio responds. The display shows the transmitting user alias or ID.
- 

- 7  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the

transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to respond to the call.

The call ends when there is no voice activity for a predetermined period. A tone sounds. The display shows `Call Ended`.

## Assigning Entries to Programmable Number Keys

Follow the procedure to assign entries to programmable number keys on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Contacts`. Press  to select.

---

- 3 Press  or  to the required alias or ID.  
Press  to select.

---

- 4 Press  or  to `Program Key`. Press  to select.

- 5 Do one of the following:
  - If the desired number key has not been assigned to an entry, press  or  to the desired number key. Press  to select.
  - If the desired number key has been assigned to an entry, the display shows `The Key is Already Assigned` and then, the first text line shows `Overwrite?`. Do one of the following:  
Press  or  to `Yes`. Press  to select.

The radio sounds a positive indicator tone and the display shows `Contact Saved` and a positive mini notice.

Press  or  to `No` to return to the previous step.

Each entry can be associated to different number keys. You see a  before each number key that is

assigned to an entry. If the ✓ is before Empty, that number key is not assigned.

If a number key is assigned to an entry in a particular mode, this feature is not supported when you long press the number key in another mode.

The screen automatically returns to the previous menu.

## Removing Associations Between Entries and Programmable Number Keys

Follow the procedure to remove the associations between entries and programmable number keys on your radio.

- 1 Do one of the following:
  - Long press the programmed number key to the required alias or ID. Proceed to [step 4](#).
  - Press  to access the menu.

- 2 Press  or  to Contacts. Press  to select.

- 3 Press  or  to the required alias or ID.

Press  to select.

- 4 Press  or  to Program Key. Press  to select.

- 5 Press  or  to Empty. Press  to select.

The first text line shows Clear from all keys.

- 6 Press  or  to Yes. Press  to select.

### NOTICE:

When an entry is deleted, the association between the entry and its programmed number key(s) is removed.

A positive indicator tone sounds. The display shows Contact Saved.

The screen automatically returns to the previous menu.

## Adding New Contacts

Follow the procedure to add new contacts on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to New Contact. Press  to select.

---

- 4 Press  or  to select contact type Radio Contact or Phone Contact. Press  to select.

---

- 5 Enter the contact number with the keypad, and press  to proceed.

---

- 6 Enter the contact name with the keypad, and press  to proceed.

---

- 7 Press  or  to the required ringer type.

Press  to select.

A positive indicator tone sounds. The display shows a positive mini notice.

---

## Setting Default Contact

Follow the procedure to set the default contact on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Contacts. Press  to select.

---

- 3 Press  or  to the required alias or ID.  
Press  to select.

---

- 4 Press  or  to Set as Default. Press  to select.

A positive indicator tone sounds. The display shows a positive mini notice. The display shows  beside the selected default alias or ID.

## Call Indicator Settings

This feature allows the radio users to configure call or text message ringing tones.

### Activating or Deactivating Call Ringers for Call Alerts

Follow the procedure to activate or deactivate call ringers for Call Alerts on your radio.

- 1 Press  to access the menu.
- 2 Press  or  to Utilities. Press  to select.

- 3 Press  or  to Radio Settings. Press  to select.

- 4 Press  or  to Tones/Alert. Press  to select.

- 5 Press  or  to Call Ringers. Press  to select.

- 6 Press  or  to Call Alert. Press  to select.

- 7 Press  or  to the required tone. Press  to select. The display shows  beside the selected tone.

### Activating or Deactivating Call Ringers for Private Calls

Follow the procedure to activate or deactivate call ringers for Private Calls on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Tones/Alerts. Press  to select.

---

- 5 Press  or  to Call Ringers. Press  to select.

---

- 6 Press  or  to Private Call. Press  to select.  

The display shows  beside On if Private Call ringing tones are enabled.

The display shows  beside Off if Private Call ringing tones are disabled.

- 7 Press  or  to the required tone. Press  to select.  

If enabled,  appears beside Enabled. If disabled,  disappears beside Enabled.

## Activating or Deactivating Call Ringers for Selective Calls

Follow the procedure to activate or deactivate call ringers for Selective Calls on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Tones/Alerts. Press  to select.

---

5 Press  or  to Call Ringers. Press  to select.

---

6 Press  or  to Selective Call. Press  to select.

The display shows  and the current tone.

---

7 Press  or  to the required tone. Press  to select. The display shows  beside the selected tone.

---

## Activating or Deactivating Call Ringers for Text Messages

Follow the procedure to activate or deactivate call ringers for text messages on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Tones/Alerts. Press  to select.

---

5 Press  or  to Call Ringers. Press  to select.

---

6 Press  or  to Text Message. Press  to select.

The display shows  and the current tone.

---

- 7 Press  or  to the required tone. Press  to select.
- The display shows  beside the newly selected tone.
- 

## Activating or Deactivating Call Ringers for Telemetry Status with Text

Follow the procedure to activate or deactivate call ringers for telemetry status with text on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 
- 3 Press  or  to Radio Settings. Press  to select.
- 
- 4 Press  or  to Tones/Alert. Press  to select.
- 

[Send Feedback](#)

- 5 Press  or  to Call Ringers. Press  to select.
- 
- 6 Press  or  to Telemetry. Press  to select.
- The current tone is indicated by a .
- 

## Assigning Ring Styles

The radio can be programmed to sound one of ten predefined ringing tones when receiving a Call Alert or a Text Message from a particular contact. The radio sounds out each ring style as you navigate through the list. Follow the procedure to assign ring styles on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Contacts. Press  to select.
- The entries are alphabetically sorted.
-

3 Press  or  to the required alias or ID.

Press  to select.

---

4 Press  or  to Edit. Press  to select.

---

5 Press  or  to Edit Ringtone. Press  to select.

---

6 Press  or  to the required tone. Press  to select.

A ✓ appears beside the selected tone.

---

## Escalating Alarm Tone Volume

The radio can be programmed to continually alert, when a radio call remains unanswered. This is done by automatically increasing the alarm tone volume over time. This feature is known as Escalart.

## Call Log Features

Your radio keeps track of all recent outgoing, answered, and missed Private Calls. The call log feature is used to view and manage recent calls.

Missed Call Alerts may be included in the call logs, depending on the system configuration on your radio. You can perform the following tasks in each of your call lists:

- Store Alias or ID to Contacts
- Delete Call
- Delete All Calls
- View Details

## Viewing Recent Calls

Follow the procedure to view recent calls on your radio.

1 Press  to access the menu.

---

2 Press  or  to Call Log. Press  to select.

---

- 3 Press  or  to the preferred list. The options are Missed, Answered, and Outgoing lists.

Press  to select.

The display shows the most recent entry.

---

- 4 Press  or  to view the list.

You can start a Private Call with the alias or ID the display is currently showing by pressing the **PTT** button.

---

## Deleting Calls from the Call List

Follow the procedure to delete calls from the Call list.

- 1 Press  to access the menu.
- 

- 2 Press  or  to Call Log. Press  to select.
- 

- 3 Press  or  to the required list. Press  to select.

If the list is empty:

- A tone sounds.
  - The display shows `List Empty`.
- 

- 4 Press  or  to the required alias or ID. Press  to select.
- 

- 5 Press  or  to Delete Entry?. Press  to select.
- 

- 6 Do one of the following:
- Press  to select Yes to delete the entry. The display shows `Entry Deleted`.
  - Press  or  to No. Press  to select. The radio returns to the previous screen.
-

## Viewing Call List Details

Follow the procedure to view call details on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Call Log. Press  to select.

---

- 3 Press  or  to the required list. Press  to select.

---

- 4 Press  or  to the required alias or ID.  
Press  to select.

---

- 5 Press  or  to View Details. Press  to select.  
The display shows the call details.

---

## Storing Aliases or IDs from the Call List

Follow the procedure to store aliases or IDs on your radio from the Call list.

- 1 Press  to access the menu.

---

- 2 Press  or  to Call Log. Press  to select.

---

- 3 Press  or  to the required list. Press  to select.

---

- 4 Press  or  to the required alias or ID.  
Press  to select.

---

- 5 Press  or  to Store. Press  to select.  
The display shows a blinking cursor.

---

- 6 Enter the rest of the characters of the required alias.

Press  to select.

You can store an ID without an alias.

The display shows a positive mini notice.

---

- 2 Wait for acknowledgment.

If the Call Alert acknowledgment is received, the display shows a positive mini notice.

If the Call Alert acknowledgment is not received, the display shows a negative mini notice.

---

## Call Alert Operation

Call Alert paging enables you to alert a specific radio user to call you back.

This feature is applicable for subscriber aliases or IDs only and is accessible through the menu using Contacts, manual dial, or a programmed **One Touch Access** button.

## Making Call Alerts

Follow the procedure to make Call Alerts on your radio.

- 1 Press the programmed **One Touch Access** button.

The display shows **Call Alert** and the subscriber alias or ID. The green LED lights up.

---

## Making Call Alerts by Using the Contacts List

Follow the procedure to make Call Alerts on your radio by using the Contacts list.

- 1 Press  to access the menu.
- 

- 2 Press  or  to **Contacts**. Press  to select.
- 

- 3 Press  or  to the required alias or ID.  
Press  to select.
-

- 4 Press  or  to Call Alert. Press  to select.

The display shows Call Alert and the subscriber alias or ID. The green LED lights up.

---

- 5 Wait for acknowledgment.

- If the Call Alert acknowledgment is received, the display shows a positive mini notice.
  - If the Call Alert acknowledgment is not received, the display shows a negative mini notice.
- 

## Making Call Alerts by Using the Manual Dial

Follow the procedure to make Call Alerts on your radio by using the manual dial.

- 1 Press  to access the menu.
- 

- 2 Press  or  to Contacts. Press  to select.
- 

- 3 Press  or  to Manual Dial. Press  to select.

The display shows a blinking cursor.

---

- 4 Enter the subscriber ID and press  to proceed.
- 

- 5 Press  or  to Call Alert. Press  to select.

The display shows Call Alert and the subscriber alias or ID. The green LED lights up.

---

- 6 Wait for acknowledgment.

- If the Call Alert acknowledgment is received, the display shows a positive mini notice.
  - If the Call Alert acknowledgment is not received, the display shows a negative mini notice.
- 

## Responding to Call Alerts

Follow the procedure to respond to Call Alerts on your radio.

When you receive a Call Alert:

- A repetitive tone sounds.
- The yellow LED blinks.
- The display shows the notification list listing a Call Alert with the alias or ID of the calling radio.

Depending on the configuration by your dealer or system administrator, you can respond to a Call Alert by doing one of the following:

- Press the **PTT** button and respond with a Private Call directly to the caller.
- Press the **PTT** button to continue normal talkgroup communication. The Call Alert is moved to the Missed Call option at the Call Log menu. You can respond to the caller from the Missed Called log.

See [Notification List on page 178](#) and [Call Log Features on page 120](#) for more information.

## Mute Mode

Mute Mode provides an option to the user to silence all audio indicators of the radio.

Once Mute Mode feature is initiated, all audio indicators are muted except higher priority features such as Emergency operations.

When Mute Mode is exited, the radio resumes playing ongoing tones and audio transmissions.

### NOTICE:

This is a purchasable feature. Check with your dealer or system administrator for more information.

## Turning On Mute Mode

Follow the procedure to turn on Mute Mode.

Access this feature by using the programmed **Mute Mode** button.

The following occurs when Mute mode is enabled:

- Positive Indicator Tone sounds.
- Display shows Mute Mode On.
- The red LED light starts blinking and remains blinking until Mute Mode is exited.
- Display shows **Mute Mode** icon on home screen.
- Radio is muted.

- Mute Mode Timer begins counting down the duration that is configured.

## Setting Mute Mode Timer

Mute Mode feature can be enabled for a pre-configured amount of time by setting the Mute Mode Timer. The timer duration is configured in the radio menu and can range between 0.5–6 hours. Mute Mode is exited once the timer expires.

If the timer is left at 0, the radio remains in Mute mode for an indefinite period until the programmed **Mute Mode** button is pressed.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Mute Timer. Press  to select.

---

- 5 Press  or  to edit the numeric value of each digit, and press .

---

## Exiting Mute Mode

This feature can be exited automatically once the Mute Mode Timer expires.

Do one of the following to exit Mute mode manually:

- Press the programmed **Mute Mode** button.
  - Press the **PTT** button on any entry.
- 

The following occurs when Mute mode is disabled:

- Negative Indicator Tone sounds.
- Display shows Mute Mode Off.
- The blinking red LED turns off.
- **Mute Mode** icon disappears from home screen.
- Your radio unmutes and speaker state is restored.

- If the timer has not expired, Mute mode timer is stopped.

**NOTICE:**

Mute Mode is also exited if the user transmits voice or switches to an unprogrammed channel.

## Emergency Operation

An Emergency Alarm is used to indicate a critical situation. You are able to initiate an Emergency at any time even when there is activity on the current channel.

Your dealer can set the duration of a button press for the programmed **Emergency** button, except for long press, which is similar with all other buttons:

**Short Press**

Duration between 0.05 seconds and 0.75 seconds.

**Long Press**

Duration between 1.00 second and 3.75 seconds.

The **Emergency** button is assigned with the Emergency On/Off feature. Check with your dealer for the assigned operation of the **Emergency** button.

**NOTICE:**

If a short press to the **Emergency** button initiates Emergency mode, then a long press to the same enables the radio to exit Emergency mode.

If a long press to the **Emergency** button initiates Emergency mode, then a short press to the same enables the radio to exit Emergency mode.

Your radio supports three Emergency Alarms:

- Emergency Alarm
- Emergency Alarm with Call
- Emergency Alarm with Voice to Follow 

**NOTICE:**

Only one of the Emergency Alarms above can be assigned to the programmed **Emergency** button or the Emergency footswitch.

In addition, each alarm has the following types:

**Regular**

Radio transmits an alarm signal and shows audio and/or visual indicators.

**Silent**

Radio transmits an alarm signal without any audio or visual indicators. Radio receives calls without any sound through the speaker, until the programmed *hot*

*mic* transmission period is over and/or you press the **PTT** button.

### Silent with Voice

Radio transmits an alarm signal without any audio or visual indicators, but allow incoming calls to sound through the speaker.

## Receiving Emergency Alarms

Follow the procedure to receive Emergency Alarms on your radio.

When you receive an Emergency Alarm:

- A tone sounds.
- The red LED blinks.
- The display shows the **Emergency** icon, and the Emergency caller alias or if there is more than one alarm, all emergency caller aliases are displayed in an Alarm List.

1 Do one of the following:

- If only one alarm, press  to view more details.

- If more than one alarm, press  or  to the required alias, and press  to view more details.

---

2 Press  to view the action options.

---

3 Press  and select Yes to exit the Alarm list.

---

4 Press  to access the menu.

---

5 Select `Alarm List` to revisit the Alarm list.

---

6 The tone sounds and the LED blinks red until you exit the Emergency mode. However, the tone can be silenced. Do one of the following:

- Press the **PTT** button to call the group of radios which received the Emergency Alarm.
- Press any programmable button.
- Exit Emergency mode. See [Exiting Emergency Mode After Receiving the Emergency Alarm on page 393](#).

---

## Responding to Emergency Alarms

Follow the procedure to respond to Emergency Alarms on your radio.

- 1 Make sure the display shows the Alarm List. Press

 or  to the required alias or ID.

- 2  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating the channel is free for you to respond. Press the **PTT** button to transmit non-emergency voice to the same group the Emergency Alarm targeted.

The green LED lights up. Your radio remains in the Emergency mode.

- 3 Do one of the following:
  - Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
  -  Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

- 4 Release the **PTT** button to listen.

When the emergency initiating radio responds:

- The green LED blinks.
- The display shows the **Group Call** icon and ID, transmitting radio ID, and the Alarm list.

Emergency voice can only be transmitted by the emergency initiating radio. All other radios, including the emergency receiving radio, transmit non-emergency voice.

## Exiting Emergency Mode After Receiving the Emergency Alarm

Do one of the following to exit Emergency mode after receiving Emergency alarm:

- Delete the alarm items.
- Power down the radio.

## Sending Emergency Alarms

This feature allows you to send an Emergency Alarm, a non-voice signal, which triggers an alert indication on a group of radios. Your radio does not display any audio or

visual indicators during Emergency mode when it is set to Silent.

Follow the procedure to send Emergency Alarms on your radio.

### 1 Press the programmed **Emergency On** button.

You see one of these results:

- The display shows Tx Alarms and the destination alias.
-  The display shows Tx Telegram and the destination alias.

The green LED lights up. The **Emergency** icon appears.

#### **NOTICE:**

If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode. The Emergency Search tone can be programmed through CPS.

### 2 Wait for acknowledgment.

If successful:

- The Emergency tone sounds.
- The red LED blinks.
- The display shows Alarm Sent.

If unsuccessful after all retries have been exhausted:

- A tone sounds.
- The display shows Alarm Failed.

The radio exits the Emergency Alarm mode and returns to the Home screen.

---

## Sending Emergency Alarms with Call

This feature allows you to send an Emergency Alarm with Call to a group of radios. Upon acknowledgement by a radio within the group, the group of radios can communicate over a programmed Emergency channel.

Follow the procedure to send Emergency Alarms with call on your radio.

- 1 Press the programmed **Emergency On** button or the **Emergency** footswitch. The display shows Sending Alarm, which alternates with your radio ID.

You see the following:

- The display shows Tx Telegram and the destination alias.

The green LED lights up. The **Emergency** icon appears.

**NOTICE:**

If programmed, the Emergency Search tone sounds. This tone is muted when the radio transmits or receives voice, and stops when the radio exits Emergency mode. The Emergency Search tone can be programmed by your dealer or system administrator.

- 
- 2 Wait for acknowledgment.

If successful:

- The Emergency tone sounds.
- The red LED blinks.

[Send Feedback](#)

- The display shows Alarm Sent.
- Your radio enters the Emergency call mode when the display shows Emergency and the destination group alias.

- 
- 3 Press the **PTT** button to make the call.

The green LED lights up. The display shows the **Group Call** icon.

- 
- 4 Do one of the following:

- Wait for the Talk Permit Tone to end and speak clearly into the microphone if enabled.
-  Wait for the **PTT** Sidetone to end and speak clearly into the microphone if enabled.

- 
- 5 Release the **PTT** button to listen.

The display shows the caller and group aliases.

- 
- 6  If the Channel Free Indication feature is enabled, you hear a short alert tone the moment the transmitting radio releases the **PTT** button, indicating

the channel is free for you to respond. Press the **PTT** button to respond to the call.

---

- 7 To exit the Emergency mode once the call ends, press the **Emergency Off** button.

The radio returns to the Home screen.

---

## Emergency Alarms with Voice to Follow

This feature allows you to send an Emergency Alarm with Voice to Follow to a group of radios. Your radio microphone is automatically activated, allowing you to communicate with the group of radios without pressing the **PTT** button. This activated microphone state is also known as *hot mic*.

### NOTICE:

Your radio cannot detect a non-IMPRES microphone that is attached to the rear accessory connector.

When no microphone is detected at the specified programmed connector, your radio checks the alternative connector. Here, your radio gives priority to the detected microphone.

If your radio has Emergency Cycle Mode enabled, repetitions of *hot mic* and receiving period are made for a programmed duration. During Emergency Cycle Mode, received calls sound through the speaker.

If you press the **PTT** button during the programmed receiving period, you hear a prohibit tone, indicating that you should release the **PTT** button. The radio ignores the **PTT** button press and remains in Emergency mode.

If you press the **PTT** button during *hot mic*, and continue to press it after the *hot mic* duration expires, the radio continues to transmit until you release the **PTT** button.

If the Emergency Alarm request fails, the radio does not retry to send the request, and enters the *hot mic* state directly.

### NOTICE:

Some accessories may not support *hot mic*. Check with your dealer or system administrator for more information.

## Sending Emergency Alarms with Voice to Follow

Follow the procedure to send Emergency Alarms with voice to follow on your radio.

- 1 Press the programmed **Emergency On** button or the **Emergency** footswitch.

You see one of these results:

- The display shows Tx Alarm and the destination alias.
- The display shows Tx Telegram and the destination alias.

The green LED lights up. The **Emergency** icon appears.

- 
- 2 Once the display shows Alarm Sent, speak clearly into the microphone.

The radio automatically stops transmitting when:

- The cycling duration between *hot mic* and receiving calls expires, if Emergency Cycle Mode is enabled.

- The *hot mic* duration expires, if Emergency Cycle Mode is disabled.

- 
- 3 Press the **Emergency Off** button to exit the Emergency mode.

The radio returns to the Home screen.

---

## Reinitiating Emergency Mode

This feature is only applicable to the radio sending the Emergency Alarm. Follow the procedure to reinitiate Emergency mode on your radio.

Do one of the following:

- Change the channel while the radio is in Emergency mode. The radio exits the Emergency mode, and reinitiates Emergency, if Emergency Alarm is enabled on the new channel.
  - Press the programmed **Emergency On** button during an Emergency initiation or transmission state. The radio exits this state, and reinitiates Emergency.
-

## Exiting Emergency Mode After Sending the Emergency Alarm

This feature is only applicable to the radio sending the Emergency Alarm.

Your radio exits Emergency mode when:

- An acknowledgment is received (for Emergency Alarm only).
- All retries to send the alarm have been exhausted.

### NOTICE:

If your radio is powered off, it exits the Emergency mode. The radio does not reinitiate the Emergency mode automatically when it is turned on again.

Follow the procedure to exit Emergency mode on your radio.

Do one of the following:

- Press the programmed **Emergency Off** button.
- Change the channel to a new channel that has no emergency system configured.  
The display shows `No Emergency`.

## Deleting an Alarm Item from the Alarm List

Follow the procedure to delete the alarm items from the Alarm List, to exit Emergency mode.

- 1 Press  to access the menu.

---

- 2 Press  or  to Alarm List. Press  to select.

---

- 3 Press  or  to the required alarm item.  
Press  to select.

---

- 4 Press  or  to Delete. Press  to select.

---

## Text Messaging

Your radio is able to receive data, for example a text message, from another radio or a text message application.

There are two types of text messages, Digital Mobile Radio (DMR) Short Text Message and text message. The maximum length of a DMR Short Text Message is 23 characters. The maximum length of a text message is 280 characters, including the subject line. The subject line only appears when you receive messages from e-mail applications.

#### NOTICE:

The maximum character length is only applicable for models with the latest software and hardware. For radio models with older software and hardware, the maximum length of a text message is 140 characters. Check with your dealer or system administrator for more information.

For the Arabic language, the text entry orientation is from right to left.

## Text Messages

The text messages are stored in an Inbox, and sorted according to the most recently received.

### Viewing Text Messages

Follow the procedure to view text messages on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Messages. Press  to select.

---

- 3 Press  or  to Inbox. Press  to select.  
If the Inbox is empty:
  - The display shows `List Empty`.
  - A tone sounds, if the Keypad Tone is turned on.

---

- 4 Press  or  to the required message. Press  to select.  
The display shows a subject line if the message is from an e-mail application.

---

### Viewing Telemetry Status Text Messages

Follow the procedure to view a telemetry status text message from the inbox.

- 1 Press  to access the menu.

---

- 2 Press  or  to Messages. Press  to select.

---

- 3 Press  or  to Inbox. Press  to select.

---

- 4 Press  or  to the required message. Press  to select.

You cannot reply to a Telemetry Status text message.

The display shows Telemetry: <Status Text Message>.

- 5 Long press  to return to the Home screen.

## Responding to Text Messages

Follow the procedure to respond to text messages on your radio.

When you receive a text message:

- The display shows the Notification list with the alias or ID of the sender.
- The display shows the **Message** icon.

### NOTICE:

The radio exits the Text Message alert screen and sets up a Private or Group Call to the sender of the message if the **PTT** button is pressed.

- 1 Do one of the following:
  - Press  or  to Read. Press  to select.  
The display shows the text message. The display shows a subject line if the message is from an e-mail application.
  - Press  or  to Read Later. Press  to select.  
The radio returns to the screen you were on prior to receiving the text message.
  - Press  or  to Delete. Press  to select.

2 Do one of the following:

- Press  to return to inbox.
- Press  a second time to reply, forward, or delete the text message.

## Responding to Text Messages with Quick Text

Follow the procedure to respond to text messages with Quick Text messages on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to Step [step 3](#).
- Press  to access the menu.

2 Press  or  to Messages. Press  to select.

3 Press  or  to Inbox. Press  to select.

4 Press  or  to the required message. Press  to select.

The display shows a subject line if the message is from an e-mail application.

5 Press  to access the sub-menu.

6 Press  or  to Reply. Press  to select.

7 Press  or  to Quick Reply. Press  to select.

8 Press  or  to the required message. Press  to select.

The display shows a transitional mini notice, confirming the message is being sent.

9 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
- The display shows a negative mini notice.
- The radio returns to the **Resend** option screen.

---

## Resending Text Messages

Follow the procedure to resend text messages on your radio.

When you are at the **Resend** option screen:

Press  to resend the same message to the same subscriber or group alias or ID.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.

- The display shows a negative mini notice.
- The radio returns to the **Resend** option screen.

---

## Forwarding Text Messages

Follow the procedure to forward text messages on your radio.

When you are at the **Resend** option screen:

- 1 Press  or  to **Forward**, and press  to send the same message to another subscriber or group alias or ID.

- 2 Press  or  to the required alias or ID.  
Press  to select.

The display shows a transitional mini notice, confirming your message is being sent.

- 3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.

- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

**NOTICE:**

You can also manually select a target radio address (see [Forwarding Text Messages by Using the Manual Dial on page 403](#)).

---

## Forwarding Text Messages by Using the Manual Dial

Follow the procedure to forward text messages by using the manual dial on your radio.

- 1 Press  or  to Forward. Press  to select.
  - 2 Press  to send the same message to another subscriber or group alias or ID.
- 

- 3 Press  or  to Manual Dial. Press  to select.

The display shows Radio Number:.

---

- 4 Enter the subscriber ID, and press  to proceed.
- The display shows a transitional mini notice, confirming your message is being sent.
- 

- 5 Wait for acknowledgment.

If successful:

- A tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A tone sounds.
  - The display shows a negative mini notice.
- 

## Editing Text Messages

Select Edit to edit the message.

**NOTICE:**

If a subject line is present (for messages received from an e-mail application), you cannot edit it.

- 1 Press or to Edit. Press to select. The display shows a blinking cursor.

- 2 Use the keypad to edit your message.

- Press to move one space to the left.
- Press or to move one space to the right.
- Press to delete any unwanted characters.
- Long press to change text entry method.

- 3 Press once message is composed.

- 4 Do one of the following:

- Press or to Send and press to send the message.

- Press or to Save and press to save the message to the Drafts folder.
- Press to edit the message.
- Press to choose between deleting the message or saving it to the Drafts folder.

## Writing Text Messages

Follow the procedure to write text message on your radio.

- 1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to [step 3](#).
- Press to access the menu.

- 2 Press or to Messages. Press to select.

- 3 Press  or  to Compose. Press  to select.

A blinking cursor appears.

- 4 Use the keypad to type your message.

Press  to move one space to the left.

Press  or  to move one space to the right.

Press  to delete any unwanted characters.

Long press  to change text entry method.

- 5 Press  once message is composed.

Do one of the following:

- Press  to send the message.
- Press . Press  or  to choose among editing, deleting, or saving the message.  
Press  to select.

## Sending Text Messages

Follow the procedure to send text message on your radio.

It is assumed that you have a newly written text message or a saved text message.

Select the message recipient. Do one of the following:

- Press  or  to the required alias or ID. Press  to select.
- Press  or  to Manual Dial. Press  to select. Key in the subscriber ID. The first line of the display shows Radio Number: . The second line of the display shows a blinking cursor. Key in the subscriber alias or ID. Press .

The display shows transitional mini notice, confirming your message is being sent.

If successful:

- A tone sounds.
- The display shows positive mini notice.

If unsuccessful:

- A low tone sounds.
- The display shows negative mini notice.
- The message is moved to the Sent Items folder.
- The message is marked with a Send Failed icon.

**NOTICE:**

For a newly written text message, the radio returns you to the **Resend** option screen.

## Deleting Text Messages from the Inbox

Follow the procedure to delete text messages from the Inbox on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button. Proceed to [step 3](#).
  - Press  to access the menu.

- 2 Press  or  to **Messages**. Press  to select.

- 3 Press  or  to **Inbox**. Press  to select.

If the Inbox is empty:

- The display shows **List Empty**.
- A tone sounds.

- 4 Press  or  to the required message. Press  to select.

The display shows a subject line if the message is from an e-mail application.

- 5 Press  to access the sub-menu.

- 6 Press  or  to **Delete**. Press  to select.

- 7 Press  or  to **Yes**. Press  to select.

The display shows a positive mini notice. The screen returns to the Inbox.

## Deleting All Text Messages from the Inbox

Follow the procedure to delete all text messages from the Inbox on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button. Proceed to [step 3](#).
  - Press to access the menu.

---

- 2 Press or to `Messages`. Press to select.

---

- 3 Press or to `Inbox`. Press to select.  
If the Inbox is empty:
  - The display shows `List Empty`.
  - A tone sounds.

---

- 4 Press or to `Delete All`. Press to select.

---

- 5 Press or to `Yes`. Press to select.

The display shows a positive mini notice.

---

## Sent Text Messages

Once a message is sent to another radio, it is saved in Sent Items folder. The most recent sent text message is always added to the top of the Sent Items folder. You can resend, forward, edit, or delete a Sent text message.

The Sent Items folder is capable of storing a maximum of 30 last sent messages. When the folder is full, the next sent text message automatically replaces the oldest text message in the folder.

If you exit the message sending screen while the message is being sent, the radio updates the status of the message in the Sent Items folder without providing any indication in the display or via sound.

If the radio changes mode or powers down before the status of the message in Sent Items folder is updated, the radio cannot complete any In-Progress messages and automatically marks it with a **Send Failed** icon.

The radio supports a maximum of five In-Progress messages at one time. During this period, the radio cannot

send any new message and automatically marks it with a **Send Failed** icon.

If you long press  at any time, the radio returns to the Home screen.

#### NOTICE:

If the channel type, for example a conventional digital or Capacity Plus channel, is not a match, you can only edit, forward, or delete a Sent message.

## Viewing Sent Text Messages

Follow the procedure to view sent text messages on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button. Proceed to [step 3](#).
  - Press  to access the menu.

- 2 Press  or  to **Messages**. Press  to select.

- 3 Press  or  to **Sent Items**. Press  to select.

If the Sent Items folder is empty:

- The display shows **List Empty**.
- A low tone sounds, if the Keypad Tone is turned on.

- 4 Press  or  to the required message. Press  to select.

The icon at the top right corner of the screen indicates the status of the message. See [Sent Item Icons](#).

## Sending Sent Text Messages

Follow the procedure to send a sent text message on your radio.

When you are viewing a Sent message:

- 1 Press  while viewing the message.

2 You can either resend or forward the sent text message. Do one of the following:

-  to Resend. Press  to select.
-  to Forward. Press  to select.

The display shows a transitional mini notice, confirming your message is being sent.

3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the Resend option screen. See [Resending Text Messages on page 144](#) for more information.

## Deleting Sent Text Messages from the Sent Items Folder

Follow the procedure to delete sent text messages from the Sent Items folder on your radio.

When you are viewing a Sent message:

1 Press  .

2 Press  or  to Delete. Press  to select.

## Deleting All Sent Text Messages from the Sent Items Folder

Follow the procedure to delete all sent text messages from the Sent Items folder on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button. Proceed to [step 3](#).
- Press  to access the menu.

2 Press  or  to `Messages`. Press  to select.

---

3 Press  or  to `Sent Items`. Press  to select.

If the `Sent Items` folder is empty:

- The display shows `List Empty`.
  - A tone sounds.
- 

4 Press  or  to `Delete All`. Press  to select.

---

5 Do one of the following:

- Press  or  to `Yes`. Press  to select.  
The display shows a positive mini notice.
  - Press  or  to `No`. Press  to select.  
The radio returns to the previous screen.
- 

## Saved Text Messages

You can save a text message to send it at a later time.

If a **PTT** button press or a mode change causes the radio to exit the text message writing/editing screen while you are in the process of writing or editing a text message, your current text message is automatically saved to the `Drafts` folder.

The most recent saved text message is always added to the top of the `Drafts` list.

The `Drafts` folder stores a maximum of 10 last saved messages. When the folder is full, the next saved text message automatically replaces the oldest text message in the folder.

## Viewing Saved Text Messages

Follow the procedure to view saved text message on your radio.

1 Do one of the following:

- Press the programmed **Text Message** button.  
Proceed to [step 3](#).
  - Press  to access the menu.
-

2 Press  or  to Messages. Press  to select.

---

3 Press  or  to Drafts. Press  to select.

---

4 Press  or  to the required message. Press  to select.

---

## Editing Saved Text Messages

Follow the procedure to edit saved text message on your radio.

1 Press  while viewing the message.

---

2 Press  or  to Edit. Press  to select.  
A blinking cursor appears.

---

3 Use the keypad to type your message.

Press  to move one space to the left.

Press  or  to move one space to the right.

Press  to delete any unwanted characters.

Long press  to change text entry method.

---

4 Press  once message is composed.

Do one of the following:

- Press  or  to Send. Press  to send the message.
  - Press . Press  or  to choose between saving or deleting the message. Press  to select.
- 

## Deleting Saved Text Messages from the Drafts Folder

Follow the procedure to delete saved text message from drafts on your radio.

- 1 Do one of the following:
  - Press the programmed **Text Message** button.  
Proceed to [step 3](#).
  - Press  to access the menu.

- 2 Press  or  to **Messages**. Press  to select.

- 3 Press  or  to **Drafts**. Press  to select.

- 4 Press  or  to the required message. Press  to select.

- 5 Press  or  to **Delete**. Press  to delete the text message.

## Quick Text Messages

Your radio supports a maximum of 50 Quick Text messages as programmed by your dealer.

While Quick Text messages are predefined, you can edit each message before sending it.

## Sending Quick Text Messages

Follow the procedure to send predefined Quick Text messages on your radio to a predefined alias.

- 1 Do one of the following:
  - Press the programmed **Text Message** button.  
Proceed to [step 6](#).
  - Press the programmed **One Touch Access** button.  
The display shows a transitional mini notice, confirming your message is being sent.  
Proceed to [step 6](#).
  - Press  to access the menu.

- 2 Press  or  to **Messages**. Press  to select.

- 3 Press  or  to **Quick Text**. Press  to select.

4 Press  or  to the required Quick Text message. Press  to select.

5 Do the following to select the recipient and send the message.

The display shows a transitional mini notice, confirming that your message is being sent.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.
- The radio proceeds to the **Resend** option screen. See [Resending Text Messages on page 144](#) for more information.

## Text Entry Configuration

Your radio allows you to configure different text.

You can configure the following settings for entering text on your radio:

- Word Predict
- Word Correct
- Sentence Cap
- My Words

Your radio supports the following text entry methods:

- Numbers
- Symbols
- Predictive or Multi-Tap
- Language (If programmed)

### NOTICE:

Press  at any time to return to the previous screen or long press  to return to the Home Screen. The radio exits the current screen once the inactivity timer expires.

## Enabling or Disabling Word Correct

Supplies alternative word choices when the word entered into the text editor is not recognized by the in-built dictionary.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Text Entry. Press  to select.

---

- 5 Press  or  to Word Correct. Press  to select.

---

- 6 Do one of the following:

- Press  or  to Word Correct. Press  to select.
- Press to enable Word Correct. If enabled, ✓ appears beside Enabled.
- Press to disable Word Correct. If disabled, ✓ disappears beside Enabled.

## Enabling or Disabling Word Predict

**Word Predict:** Your radio can learn common word sequences that you often enter. It then predicts the next word you may want to use after you enter the first word of a common word sequence into the text editor.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to Word Predict. Press  to select.

---

6 Do one of the following:

- Press  to enable the Word Predict. If enabled, ✓ appears beside Enabled.
  - Press  to disable Microphone Dynamic Distortion Control. If disabled, ✓ disappears beside Enabled.
- 

## Sentence Cap

This feature is used to automatically enable capitalization of the first letter in the first word for every new sentence.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to Sentence Cap. Press  to select.

---

6 Do one of the following:

- Press  to enable Sentence Cap. If enabled, ✓ appears beside Enabled.
  - Press  to disable Sentence Cap. If disabled, ✓ disappears beside Enabled.
-

## Viewing Custom Words

You can add your own custom words into the in-built dictionary of your radio. Your radio maintains a list to contain these words.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Text Entry. Press  to select.

---

- 5 Press  or  to My Words. Press  to select.

---

- 6 Press  or  to List of Words. Press  to select.

The display shows the list of custom words.

---

## Editing Custom Words

You can edit custom words saved in your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to List of Words. Press  to select.  
Display shows the list of custom words.

---

7 Press  or  to the required word. Press  to select.

---

8 Press  or  to Edit. Press  to select.

---

9 Use the keypad to edit your custom word.

- Press  to move one space to the left.
  - Press  key to move one space to the right.
  - Press the  key to delete any unwanted characters.
  - Long press  to change text entry method.
- 

10 Press  once your custom word is completed.

---

The display shows transitional mini notice, confirming your custom word is being saved.

- If the custom word is saved, a tone sounds and the display shows positive mini notice.
- If the custom word is not saved, a low tone sounds and the display show negative mini notice.

## Adding Custom Words

You can add custom words into the in-built radio dictionary.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to Add New Word. Press  to select.

Display shows the list of custom words.

---

7 Use the keypad to edit your custom word.

- Press  to move one space to the left.
  - Press  key to move one space to the right.
  - Press the  key to delete any unwanted characters.
  - Long press  to change text entry method.
- 

8 Press  once your custom word is completed.

---

The display shows transitional mini notice, confirming your custom word is being saved.

- If the custom word is saved, a tone sounds and the display show positive mini notice.
- If the custom word is not saved, a low tone sounds and the display show negative mini notice.

## Deleting a Custom Word

Follow the procedure to delete the custom words saved in your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to the required word. Press  to select.

---

7 Press  or  to Delete. Press  to select.

---

8 Choose one of the following.

- At Delete Entry?, press  to select Yes. The display shows Entry Deleted.
  - Press  or  to No. Press  to return to the previous screen.
- 

## Deleting All Custom Words

Follow the procedure to delete all custom words from the in-built dictionary of your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Text Entry. Press  to select.

---

5 Press  or  to My Words. Press  to select.

---

6 Press  or  to Delete All. Press  to select.

---

7 Do one of the following:

- At Delete Entry?, press  to select Yes. The display shows All Entries Deleted.
- Press  or  to No to return to the previous screen. Press  to select.

## Job Tickets

This feature allows your radio to receive messages from the dispatcher listing out tasks to perform.

### NOTICE:

This feature can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

There are two folders that contain different Job Tickets:

### My Tasks folder

Personalized Job Tickets assigned to your signed in user ID.

### Shared Tasks folder

Shared Job Tickets assigned to a group of individuals.

You can respond to Job Tickets in order to sort them into Job Ticket Folders. By default, the folders are **All**, **New**, **Started**, and **Completed**. Check with your dealer or system administrator for an additional 10 folders.

### NOTICE:

Job Tickets are retained even after the radio is powered down and powered up again.

All Job Tickets are located in the **All** folder. Depending on how your radio is programmed, Job Tickets are sort by their priority level followed by time received. New Job Tickets, Job Tickets with recent changes in state, and Job Tickets with the highest priority are listed first. Upon reaching the maximum number of Job Tickets, the next Job Ticket automatically replaces the last Job Ticket in your radio. Your radio supports a maximum of 100 or 500 Job Tickets, depending on your radio model. Check with your dealer or system administrator for more information. Your radio automatically detects and discards duplicated Job Tickets with the same Job Ticket ID.

Depending on the importance of the Job Tickets, the dispatcher adds a Priority Level to them. There are three priority levels: Priority 1, Priority 2, and Priority 3. Priority 1 has the highest priority and Priority 3 has the lowest priority. There are also Job Tickets with no priority.

Your radio updates accordingly when dispatcher makes the following changes:

- Modify content of Job Tickets.
- Add or edit Priority Level of Job Tickets.
- Move Job Tickets from folder to folder.
- Canceling of Job Tickets.

## Accessing the Job Ticket Folder

Follow the procedure to access the Job Ticket folder.

- 1 Do one of the following:
  - Press the programmed **Job Ticket** button. Proceed to [step 3](#).
  - Press  to access the menu.

---
- 2 Press  or  to Job Tickets. Press  to select.

---

- 3 Press  or  to the required folder. Press  to select.

---

[Send Feedback](#)

- 4 Press  or  to the required Job Ticket. Press  to select.
- 

## Logging In or Out of the Remote Server

This feature allows you to log in and log out of the remote server by using your user ID.

- 1 Press  to access the menu.

---

- 2 Press  or  to Log In. Press  to select.  
If you are already logged in, menu displays Log Out. The display shows a transitional mini notice, indicating the request is in progress.

---

- 3 Wait for acknowledgment.  
If successful:
  - A positive indicator tone sounds.
  - The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

## Creating Job Tickets

Your radio is able to create Job Tickets, which are based on a Job Ticket template and send out tasks that need to be performed.

CPS programming software is required to configure the Job Ticket template.

- 1 Press  to access the menu.
- 2 Press  or  to Job Tickets. Press  to select.
- 3 Press  or  to Create Ticket. Press  to select.

## Responding to Job Tickets

Follow the procedure to respond to job tickets on your radio.

- 1 Press  to access the menu.
- 2 Press  or  to Job Tickets. Press  to select.
- 3 Press  or  to the required folder. Press  to select.
- 4 Press  or  to the required job ticket. Press  to select.
- 5 Press  once more to access the sub-menu.  
You can also press the corresponding number key (1–9) to **Quick Reply**.

- 6 Press  or  to the required job ticket. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress.

---

- 7 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Sending Job Tickets Using One Job Ticket Template

If your radio is configured with one Job Ticket template, perform the following actions to send the Job Ticket.

- 1 Use the keypad to type the required room number. Press  to select.
- 

- 2 Press  or  to Room Status. Press  to select.
- 

- 3 Press  or  to the required option. Press  to select.
- 

- 4 Press  or  to Send. Press  to select. The display shows a transitional mini notice, indicating the request is in progress.
- 

- 5 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.

- The display shows a negative mini notice.
- 

## Sending Job Tickets Using More Than One Job Ticket Template

If your radio is configured with more than one Job Ticket template, perform the following actions to send the Job Tickets.

- 1 Press  or  to the required option. Press  to select.
- 

- 2 Press  or  to Send. Press  to select.  
The display shows a transitional mini notice, indicating the request is in progress.
- 

- 3 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Deleting Job Tickets

Follow the procedure to delete job tickets on your radio.

- 1 Do one of the following:

- Press the programmed **Job Ticket** button. Proceed to [step 4](#)
  - Press  to access the menu.
- 

- 2 Press  or  to Job Tickets. Press  to select.
- 

- 3 Press  or  to the required folder. Press  to select.
-

4 Press  or  to All folder. Press  to select.

---

5 Press  or  to the required Job Ticket.  
Press  to select.

---

6 Press  again while viewing the Job Ticket.

---

7 Press  or  to Delete. Press  to select.

The display shows a transitional mini notice, indicating the request is in progress.

---

8 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.

- The display shows a negative mini notice.
- 

## Deleting All Job Tickets

Follow the procedure to delete all job tickets on your radio.

1 Do one of the following:

- Press the programmed **Job Ticket** button.  
Proceed to [step 3](#).
  - Press  to access the menu.
- 

2 Press  or  to Job Tickets. Press  to select.

---

3 Press  or  to the required folder. Press  to select.

---

4 Press  or  to All folder. Press  to select.

---

5 Press  or  to Delete All. Press  to select.

6 Do one of the following:

- Press  or  to Yes. Press  to select.  
The display shows a positive mini notice.
- Press  or  to No. Press  to select.  
The radio returns to the previous screen.

## Privacy

This feature helps to prevent eavesdropping by unauthorized users on a channel by the use of a software-based scrambling solution. The signaling and user identification portions of a transmission are not scrambled.

Your radio must have privacy enabled on the channel to send a privacy-enabled transmission, although this is not a necessary requirement for receiving a transmission. While on a privacy-enabled channel, the radio is still able to receive clear or unscrambled transmissions.

Some radio models may not offer Privacy feature, or may have a different configuration. Check with your dealer or system administrator for more information.

Your radio supports two types of privacy, but only one can be assigned to your radio. They are:

- Basic Privacy
- Enhanced Privacy

To unscramble a privacy-enabled call or data transmission, your radio must be programmed to have the same Privacy Key for Basic Privacy, or the same Key Value and Key ID for Enhanced Privacy as the transmitting radio.

If your radio receives a scrambled call that is of a different Privacy Key, or different Key Value and Key ID, you either hear a garbled transmission for Basic Privacy or nothing at all for Enhanced Privacy.

On a privacy-enabled channel, your radio is able to receive clear or unscrambled calls, depending on how your radio is programmed. In addition, your radio may play a warning tone or not, depending on how it is programmed.

The green LED lights up when the radio is transmitting, and blinks rapidly when the radio is receiving an ongoing privacy-enabled transmission.

**NOTICE:**

This feature is not applicable in Citizens Band channels that are in the same frequency.

## Turning Privacy On or Off

Follow the procedure to turn privacy on or off on your radio.

- 1 Do one of the following:
  - Press the programmed **Privacy** button. Skip the steps below.
  - Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Privacy. Press  to select.

---

- 5 Do one of the following:

- Press  or  to On. Press  to select. The display shows  beside On.
- Press  or  to Off. Press  to select. The display shows  beside Off.

## Response Inhibit

This feature helps prevent your radio from responding to any incoming transmissions.

**NOTICE:**

This is a purchasable feature. Check with your dealer or system administrator to determine how your radio has been programmed.

If enabled, your radio does not generate any outgoing transmissions in respond to incoming transmissions, such as Radio Check, Call Alert, Radio Disable, Remote Monitor, Automatic Registration Service (ARS), Responding to Private Messages, and Sending GNSS location reports. Your radio cannot receive Confirmed Private Calls when this feature is enabled. However, your radio is able to manually send transmission.

## Turning Response Inhibit On or Off

Follow the procedure to enable or disable Response Inhibit on your radio.

Press the programmed **Response Inhibit** button.

---

If successful:

- A positive indicator tone sounds.
- The display shows a momentary positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a momentary negative mini notice.

## Multi-Site Controls

These features are applicable when your current radio channel is part of an IP Site Connect or Capacity Plus–Multi-Site configuration.

## Starting Manual Site Search

Follow the procedure to start manual site search when the received signal strength is poor in order to attempt to find a site with better signal.

If the radio finds a new site:

- A positive indicator tone sounds.

If the radio fails to find a new site:

- A negative indicator tone sounds.

## Site Lock On/Off

When toggled on, the radio searches the current site only. When toggled off, the radio searches other sites in addition to the current site.

Press the programmed **Site Lock** button.

If the **Site Lock** function is toggled on:

- You hear a positive indicator tone, indicating the radio has locked to the current site.
- The display shows `Site Locked`.

If the **Site Lock** function is toggled off:

- You hear a negative indicator tone, indicating the radio is unlocked.
  - The display shows `Site Unlocked`.
-

## Accessing Neighbor Sites List

This feature allows the user to check the adjacent sites list of the current home site. Follow the procedure to access the Neighbor Sites List:

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Info. Press  to select.

---

- 4 Press  or  to Neighbor Sites. Press  to select.

---

## Security

This feature allows you to enable or disable any radio in the system.

For example, you may want to disable a stolen radio to prevent unauthorized users from using it, and enable the radio when it is recovered.

There are two ways to enable or disable a radio, with authentication and without authentication.

Authenticated Radio Disable is a purchasable feature. In Authenticated Radio Disable, verification is required when you enable or disable a radio. When your radio initiates this feature on a target radio with User Authentication, a passphrase is required. The passphrase is preprogrammed in the target radio through CPS.

You will not receive an acknowledgment if you press  during Radio Enable or Radio Disable operation.

### NOTICE:

Check with your dealer or system administrator for more information.

## Disabling Radios

Follow the procedure to disable your radio.

- 1 Press the programmed **Radio Disable** button.
-

2 Press  or  to the required alias or ID.

---

3 Press  to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
  - If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.
- 

4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Disabling Radios by Using the Contacts List

Follow the procedure to disable your radio by using the Contacts list.

1 Press  to access the menu.

---

2 Press  or  to Contacts. Press  to select.

---

3 Press  or  to the required alias or ID. Press  to select.

---

4 Press  or  to Radio Disable.

---

5 Press  to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.

- The display shows a negative mini notice.

## Disabling Radios by Using the Manual Dial

Follow the procedure to disable your radio by using the manual dial.

1 Press  to access the menu.

2 Press  or  to Contacts. Press  to select.

3 Press  or  to Manual Dial. Press  to select.

4 Press  or  to Radio Number. Press  to select.

The first text line shows Radio Number:.

5 Enter the subscriber ID, and press  to proceed.

6 Press  or  to Radio Disable.

---

7 Press  to select. One of the following scenarios occurs:

- The display shows a transitional mini notice, indicating the request is in progress. The green LED blinks.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
  - If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.
- 

8 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Enabling Radios

Follow the procedure to enable your radio.

1 Press the programmed **Radio Enable** button.

---

2 Press  or  to the required alias or ID.

---

3 Press  to select. One of the following scenarios occurs:

- The display shows Radio Enable and the subscriber alias or ID. The green LED lights up.
- A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the

request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

---

#### 4 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Enabling Radios by Using the Contacts List

Follow the procedure to enable your radio by using the Contacts list.

- 1 Press  to access the menu.
- 

- 2 Press  or  to **Contacts**. Press  to select.
- 

- 3 Press  or  to the required alias or ID.  
Press  to select.
- 

- 4 Press  or  to **Radio Enable**.
- 

- 5 Press  to select. One of the following scenarios occurs:
  - The green LED blinks. The display shows **Radio Enable** and the subscriber alias or ID. The green LED lights up.
  - A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.

- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

## 6 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows a negative mini notice.

## Enabling Radios by Using the Manual Dial

Follow the procedure to enable your radio by using the manual dial.

- 1 Press  to access the menu.

- 2 Press  or  to Contacts. Press  to select.

- 3 Press  or  to Manual Dial. Press  to select.

- 4 Press  or  to Private Call. Press  to select.

The first text line shows Radio Number:.

- 5 Enter the subscriber ID, and press  to proceed.

- 6 Press  or  to Radio Enable.

- 7 Press  to select. One of the following scenarios occurs:
  - The green LED blinks. The display shows Radio Enable and the subscriber alias or ID. The green LED lights up.
  - A passphrase screen appears.

Enter the passphrase. Press  to proceed.

- If the passphrase is correct, the display shows a transitional mini notice, indicating the request is in progress. The green LED lights up.
- If the passphrase is incorrect, the display shows a negative mini notice, and returns to the previous screen.

---

## 8 Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows a positive mini notice.

If unsuccessful:

- A negative indicator tone sounds.
  - The display shows a negative mini notice.
- 

## Lone Worker

This feature prompts an emergency to be raised if there is no user activity, such as any radio button press or channel selection, for a predefined time.

Following no user activity for a programmed duration, the radio pre-warns you using an audio indicator once the inactivity timer expires.

If there is still no acknowledgment by you before the predefined reminder timer expires, the radio initiates an Emergency Alarm.

Only one of the following Emergency Alarms is assigned to this feature:

- Emergency Alarm
- Emergency Alarm with Call
- Emergency Alarm with Voice to Follow 

The radio remains in the emergency state, allowing voice messages to proceed until action is taken. See [Emergency Operation on page 391](#) for more information on ways to exit Emergency.

**NOTICE:**

This feature is limited to radios with this function enabled. Check with your dealer or system administrator for more information.

## Bluetooth

This feature allows you to use your radio with a Bluetooth-enabled device (accessory) through a Bluetooth connection. Your radio supports both Motorola Solutions and Commercially available Off-The-Shelf (COTS) Bluetooth-enabled devices.

Bluetooth operates within a range of 10 m (32 ft) line of sight. This is an unobstructed path between your radio and your Bluetooth-enabled device. For high degree of reliability, Motorola Solutions recommends to not separate the radio and the accessory.

At the fringe areas of reception, both voice and tone quality start to sound "garbled" or "broken". To correct this problem, position your radio and Bluetooth-enabled device closer to each other (within the 10 m defined range) to re-establish clear audio reception. The Bluetooth function of your radio has maximum power of 2.5 mW (4 dBm) at the 10 m range.

Your radio can support up to three simultaneous Bluetooth connections with Bluetooth-enabled devices of unique types. For example, a headset, a scanner, and a PTT-Only Device (POD). Multiple connections with Bluetooth-enabled devices of the same type are not supported.

Refer to the user manual of your respective Bluetooth-enabled device for more details on the full capabilities of your Bluetooth-enabled device.

**NOTICE:**

If disabled through CPS, all Bluetooth-related features are disabled and the Bluetooth device database is erased.

## Turning Bluetooth On and Off

Follow the procedure to turn Bluetooth on and off.

- 1 Press  to access the menu.

---

- 2 Press  or  to Bluetooth. Press  to select.

---

- 3 Press  or  to **My Status**. Press  to select.

The display shows **On** and **Off**. The current status is indicated by a .

- 4 Do one of the following:

- Press  or  to **On**. Press  to select. The display shows  beside **On**.
- Press  or  to **Off**. Press  to select. The display shows  beside **Off**.

## Connecting to Bluetooth Devices

Follow the procedure to connect to Bluetooth devices.

Turn on your Bluetooth-enabled device and place it in pairing mode.

- 1 Press  to access the menu.

- 2 Press  or  to **Bluetooth**. Press  to select.

- 3 Press  or  to **Devices**. Press  to select.

- 4 Do one of the following:

- Press  or  to the required device. Press  to select.
- Press  or  to **Find Devices** to locate available devices. Press  or  to the required device. Press  to select.

- 5 Press  or  to **Connect**. Press  to select.

Your Bluetooth-enabled device may require additional steps to complete the pairing. Refer to the user manual of your Bluetooth-enabled device.

The display shows `Connecting to <Device>`.

Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows `<Device> Connected` and the **Bluetooth Connected** icon.
- The display shows  beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Connecting Failed`.

**NOTICE:**

If pin code is required, see [Accessing Radios by Using Passwords on page 175](#).

## Connecting to Bluetooth Devices in Discoverable Mode

Follow the procedure to connect to Bluetooth devices in discoverable mode.

Turn on your Bluetooth-enabled device and place it in pairing mode.

- 1 Press  to access the menu.
- 2 Press  or  to Bluetooth. Press  to select.
- 3 Press  or  to Find Me. Press  to select. The radio can now be found by other Bluetooth-enabled devices for a programmed duration. This is called Discoverable Mode.

Wait for acknowledgment.

If successful:

- A positive indicator tone sounds.
- The display shows `<Device> Connected` and the **Bluetooth Connected** icon.

- The display shows ✓ beside the connected device.

If unsuccessful:

- A negative indicator tone sounds.
- The display shows `Connecting Failed`.

## Disconnecting from Bluetooth Devices

Follow the procedure to disconnect from Bluetooth devices.

- 1 Press  to access the menu.

---

- 2 Press  or  to `Bluetooth`. Press  to select.

---

- 3 Press  or  to `Devices`. Press  to select.

---

- 4 Press  or  to the required device. Press  to select.

---

- 5 Press  or  to `Disconnect`. Press  to select.

The display shows `Disconnecting from <Device>`.

### NOTICE:

Your Bluetooth-enabled device may require additional steps to disconnect. Refer to respective user manuals of any Bluetooth-enabled devices.

Wait for acknowledgment.

- A tone sounds.
- The display shows `<Device> Disconnected` and the **Bluetooth Connected** icon disappears.
- The ✓ disappears beside the connected device.

## Switching Audio Route between Internal Radio Speaker and Bluetooth Device

Follow the procedure to toggle audio routing between internal radio speaker and external Bluetooth device.

Press the programmed **Bluetooth Audio Switch** button.

---

The display shows one of the following results:

- A tone sounds. The display shows `Route Audio to Radio`.
- A tone sounds. The display shows `Route Audio to Bluetooth`.

## Viewing Device Details

Follow the procedure to view device details on your radio.

- 1 Press  to access the menu.

---

  - 2 Press  or  to Bluetooth. Press  to select.

---

  - 3 Press  or  to Devices. Press  to select.
- 

- 4 Press  or  to the required device. Press  to select.
- 

- 5 Press  or  to View Details. Press  to select.
- 

## Deleting Device Name

You can remove a disconnected device from the list of Bluetooth-enabled devices.

- 1 Press  to access the menu.

---

  - 2 Press  or  to Bluetooth. Press  to select.

---

  - 3 Press  or  to Devices. Press  to select.

---

  - 4 Press  or  to the required device. Press  to select.
-

- 5 Press  or  to Delete. Press  to select. The display shows Device Deleted.
- 

## Bluetooth Mic Gain

This feature allows the user to control the microphone gain value of the connected Bluetooth-enabled device.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Bluetooth. Press  to select.
- 
- 3 Press  or  to BT Mic Gain. Press  to select.
- 
- 4 Press  or  to the BT Mic Gain type and the current values. Press  to select. You can edit the values here.
- 

- 5 Press  or  to increase or to decrease values. Press  to select.
- 

## Indoor Location

### NOTICE:

Indoor Location feature is applicable for models with the latest software and hardware. Check with your dealer or system administrator for more information.

Indoor Location is be used to keep track of the location of radio users. When Indoor Location is activated, the radio is in a limited discoverable mode. Dedicated beacons are used to locate the radio and determine its position.

## Turning Indoor Location On or Off

You can turn on or turn off Indoor Location by performing one of the following actions.

- Access this feature through the menu.
  - a. Press  to access the menu.

b. Press  or  to Bluetooth and press  to select.

c. Press  or  to Indoor Location and press  to select.

d. Press  to turn on Indoor Location.

The display shows Indoor Location On. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows Turning On Failed. You hear a negative indicator tone.

e. Press  to turn off Indoor Location.

The display shows Indoor Location Off. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.

- If unsuccessful, the display shows Turning Off Failed. You hear a negative indicator tone.

• Access this feature by using the programmed button.

a. Long press the programmed **Indoor Location** button to turn on Indoor Location.

The display shows Indoor Location On. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon appears on the Home screen display.
- If unsuccessful, the display shows Turning On Failed. If unsuccessful, you hear a negative indicator tone.

b. Press the programmed **Indoor Location** button to turn off Indoor Location.

The display shows Indoor Location Off. You hear a positive indicator tone.

One of the following scenarios occurs.

- If successful, the Indoor Location Available icon disappears on the Home screen display.

- If unsuccessful, the display shows **Turning Off Failed**. If unsuccessful, you hear a negative indicator tone.

## Accessing Indoor Location Beacons Information

Follow the procedure to access Indoor Location beacons information.

- 1 Press  to access the menu.

---

- 2 Press  or  to **Bluetooth** and press  to select.

---

- 3 Press  or  to **Indoor Location** and press  to select.

---

- 4 Press  or  to **Beacons** and press  to select.

The display shows the beacons information.

[Send Feedback](#)

## Notification List

Your radio has a Notification list that collects all your unread events on the channel, such as unread text messages, telemetry messages, missed calls, and call alerts.

The display shows the **Notification** icon when the Notification list has one or more events.

The list supports a maximum of 40 unread events. When the list is full, the next event automatically replaces the oldest event. After the events are read, they are removed from the Notification list.

For text messages, missed calls, and call alert events, the maximum number of notifications are 30 text messages and 10 missed calls or call alerts. This maximum number depends on individual feature (job tickets or text messages or missed calls or call alerts) list capability.

## Accessing Notification List

Follow the procedure to access the Notification list on your radio.

- 1 Press  to access the menu.

2 Press  or  to Notification. Press  to select.

3 Press  or  to the required event. Press  to select.

Long press  to return to the Home screen.

The display shows **In Range** after the channel alias.

### ARTS-Out-of-Range Alert

A tone sounds. The red LED rapidly blinks.

The display shows **Out of Range** alternating with the Home screen.

#### NOTICE:

Check with your dealer or system administrator for more information.

## Auto-Range Transponder System

The Auto-Range Transponder System (ARTS) is an analog-only feature designed to inform you when your radio is out-of-range of other ARTS-equipped radios.

ARTS-equipped radios transmit or receive signals periodically to confirm that they are within range of each other.

Your radio provides indications of states as follows:

### First-Time Alert

A tone sounds.

The display shows **In Range** after the channel alias.

### ARTS-in-Range Alert

A tone sounds, if programmed.

## Over-the-Air Programming

Your dealer can remotely update your radio through Over-the-Air Programming (OTAP) without any physical connection. Additionally, some settings can also be configured by using OTAP.

When your radio undergoes OTAP, the green LED blinks.

When your radio receives high volume data:

- The display shows the **High Volume Data** icon.
- The channel becomes busy.
- A negative tone sounds if you press the **PTT** button.

When OTAP completes, depending on the configuration:

- A tone sounds. The display shows `Updating`  
`Restarting`. Your radio restarts by powering off and on again.
- You can select `Restart Now` or `Postpone`. When you select `Postpone`, your radio returns to the previous screen. The display shows the **OTAP Delay Timer** icon until the automatic restart occurs.

When your radio powers up after automatic restart:

- If successful, the display shows `Sw Update`  
`Completed`.
- If unsuccessful, the display shows `Sw Update`  
`Failed`.

See [Checking Software Update Information on page 205](#) for the updated software version.

## Transmit Inhibit

Transmit inhibit feature allow users to block all transmission from the radio.

### NOTICE:

Bluetooth and Wi-Fi features are available in Transmit Inhibit mode.

## Enabling Transmit Inhibit

Follow the procedure to enable Transmit Inhibit.

Perform one of the following actions:

- Press  or  to `Tx Inhibit` and press  to select.
- Press the **Transmit Inhibit** programmable button.

- A positive indicator tone sounds.
- The display shows `Tx Inhibit On`.

### NOTICE:

The status of the Transmit Inhibit does not change after the radio powers up.

## Disabling Transmit Inhibit

Follow the procedure to disable Transmit Inhibit.

Perform one of the following actions:

- Press  or  to `Tx Inhibit` and press  to select.

- Press the **Transmit Inhibit** programmable button.
- 
- A negative indicator tone sounds. Transmission is back to normal operation.
  - The display shows Tx Inhibit Off.

## Selecting Third-Party Peripherals Connection Modes

Follow the procedure to select one of the following third-party peripherals connection modes:

- Motorola Solutions
- PC and Audio
- Data Accessory
- Telemetry
- Generic

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 
- 4 Press  or  to Cable Type. Press  to select.
- 
- 5 Press  or  to the required connection mode. Press  to select.  
The display shows the selected connection mode.  
The screen returns to the previous menu.
- 

## Received Signal Strength Indicator

This feature allows you to view the Received Signal Strength Indicator (RSSI) values.

The display shows the **RSSI** icon at the top right corner. See [Display Icons](#) for more information on the **RSSI** icon.

## Viewing RSSI Values

Follow the procedure to view RSSI values on your radio.

When you are at the Home screen:

- 1 Press  three times and immediately press  three times, all in 5 seconds.

The display shows the current RSSI values.

- 
- 2 Long press  to return to the Home screen.
- 

## Password Lock Features

This feature allows you to restrict access to the radio by asking for a password when the device is turned on.

You can use a keypad microphone or **Scroll Up/Down** buttons to enter the password.

## Accessing Radios by Using Passwords

Follow the procedure to access your radio by using a password.

- 1 Enter the current four-digit password.

### NOTICE:

The use of **Emergency** footswitch cancels out password input to access the radio.

- Use a keypad microphone.
- Press  or  to edit the numeric value of each digit, and press  to enter and move to the next digit.

- 
- 2 Press  to enter the password.

If successful, the radio powers up.

If unsuccessful:

- After the first and second attempt, the display shows *Wrong Password*. Repeat [step 1](#).
- After the third attempt, the display shows *Wrong Password* and then, *Radio Locked*. A tone sounds. The yellow LED double blinks. Your radio enters into locked state for 15 minutes.

### NOTICE:

In locked state, your radio responds to inputs from the **On/Off/Volume Control Knob** and programmed **Backlight** button only.

## Unlocking Radios in Locked State

Your radio is unable to receive calls in locked state. Follow the procedure to unlock your radio in locked state.

Do one of the following:

- If the radio is powered on, wait for 15 minutes and then repeat the steps in [Accessing Radios by Using Passwords on page 175](#) to access the radio.
- If the radio is powered off, power up the radio. Your radio restarts the 15-minute timer for locked state. A tone sounds. The yellow LED double blinks. The display shows `Radio Locked`.

Wait for 15 minutes and then repeat the steps in [Accessing Radios by Using Passwords on page 175](#) to access the radio.

## Turning Password Lock On or Off

Follow the procedure to turn password lock on or off on your radio.

- 1 Press  to access the menu.
- 

- 2 Press  or  to `Utilities`. Press  to select.
- 

- 3 Press  or  to `Radio Settings`. Press  to select.
- 

- 4 Press  or  to `Passwd Lock`. Press  to select.
- 

- 5 Enter the current four-digit password.
    - Use a keypad microphone.
    - Press  or  to edit the numeric value of each digit, and press  to enter and move to the next digit. A positive indicator tone sounds for every digit pressed.
- 

- 6 Press  to enter the password.

If the password is incorrect, the display shows `Wrong Password` and automatically returns to the previous menu.

---

#### 7 Do one of the following:

- Press  or  to Turn On. Press  to select.  
The display shows  beside Turn On.
  - Press  or  to Turn Off. Press  to select.  
The display shows  beside Turn Off.
- 

## Changing Passwords

Follow the procedure to change passwords on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Passwd Lock. Press  to select.

---

5 Enter the current four-digit password, and press  to proceed.

If the password is incorrect, the display shows `Wrong Password` and automatically returns to the previous menu.

---

6 Press  or  to Change PWD. Press  to select.

---

7 Enter a new four-digit password, and press  to proceed.

---

8 Re-enter the new four-digit password, and press  to proceed.

If successful, the display shows `Password Changed`.

If unsuccessful, the display shows Passwords Do Not Match.

The screen automatically returns to the previous menu.

---

## Front Panel Configuration

You are able to customize certain feature parameters in Front Panel Configuration (FPC) to enhance the use of your radio.

### Entering Front Panel Configuration Mode

Follow the procedure to enter front panel programming mode on your radio.

Long press  at any time to return to the Home screen.

- 1 Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Program Radio. Press  to select.
- 

## Editing FPP Mode Parameters

Use the following buttons as required while navigating through the feature parameters.

-  ,  – Scroll through options, increase/decrease values, or navigate vertically.
-  – Select the option or enter a sub-menu.
-  – Short-press to return to previous menu or to exit the selection screen. Long-press to return to Home screen.

## Wi-Fi Operation

Wi-Fi® is a registered trademark of Wi-Fi Alliance®.

**NOTICE:**

This feature is applicable to DM4601e only.

This feature allows you to setup and connect to a Wi-Fi network. Wi-Fi supports updates for radio firmware, codeplug, and resources such as language packs and voice announcement.

## Turning Wi-Fi On or Off

The programmed **Wi-Fi On or Off** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

Voice Announcements for the programmed **Wi-Fi On or Off** button can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

You can turn on or turn off Wi-Fi by performing one of the following actions.

- Press the programmed **Wi-Fi On or Off** button. Voice Announcement sounds Turning On Wi-Fi or Turning Off Wi-Fi.
- Access this feature using the menu.

- Press  **OK** to access the menu.
- Press  or  to **WiFi** and press  **OK** to select.
- Press  or  to **WiFi On** and press  **OK** to select.

Press  **OK** to turn on Wi-Fi. The display shows  beside **Enabled**.

Press  **OK** to turn off Wi-Fi. The  disappears from beside **Enabled**.

## Connecting to a Network Access Point

When you turn on Wi-Fi, the radio scans and connects to a network access point.

You can also connect to a network access point using the menu.

- 1 Press  **OK** to access the menu.

- 2 Press  or  to `WiFi` and press  to select.

---

- 3 Press  or  to `Networks` and press  to select.

---

- 4 Press  or  to a network access point and press  to select.

---

- 5 Press  or  to `Connect` and press  to select.

---

- 6 Enter the password and press  .

When the connection is successful, the radio displays a notice and the network access point is saved into the profile list.

## Checking Wi-Fi Connection Status

Follow the procedure to check the Wi-Fi Connection status.

Press the programmed **Wi-Fi Status Query** button for the connection status by using Voice Announcement. Voice Announcement sounds `Wi-Fi is Off`, `Wi-Fi is On but No Connection`, or `Wi-Fi is On with Connection`.

- The display shows `WiFi Off` when the Wi-Fi is turned off.
- The display shows `WiFi On, Connected` when the radio is connected to a network.
- The display shows `WiFi On, Disconnected` when the Wi-Fi is turned on but the radio is not connected to any network.

Voice Announcements for the Wi-Fi status query results can be customized through CPS according to user requirements. Check with your dealer or system administrator for more information.

### NOTICE:

The programmed **Wi-Fi Status Query** button is assigned by your dealer or system administrator. Check with your dealer or system administrator to determine how your radio has been programmed.

## Refreshing the Network List

Follow the procedure to refresh the network list.

- Perform the following actions to refresh the network list through the menu.
  - a. Press  to access the menu.
  - b. Press  or  to WiFi and press  to select.
  - c. Press  or  to Networks and press  to select.

When you enter the Networks menu, the radio automatically refreshes the network list.

- If you are already in the Networks menu, perform the following action to refresh the network list.

Press  or  to Refresh and press  to select.

The radio refreshes and displays the latest network list.

## Adding a Network

If a preferred network is not in the available network list, perform the following actions to add a network.

- 1 Press  to access the menu.

---

- 2 Press  or  to WiFi and press  to select.

---

- 3 Press  or  to Networks and press  to select.

---

- 4 Press  or  to Add Network and press  to select.

---

- 5 Enter the Service Set Identifier (SSID) and press .

---

- 6 Press  or  to Open and press  to select.

---

- 7 Enter the password and press  .  
The radio displays a positive mini notice to indicate that the network is successfully saved.
- 

## Viewing Details of Network Access Points

Follow the procedure to view details of network access points.

- 1 Press  to access the menu.
  - 2 Press  or  to `WiFi` and press  to select.
  - 3 Press  or  to `Networks` and press  to select.
  - 4 Press  or  to a network access point and press  to select.
- 

- 5 Press  or  to `View Details` and press  to select.

For a connected network access point, the Service Set Identifier (SSID), Security Mode, Media Access Control (MAC) address, and Internet Protocol (IP) address are displayed.

For a non-connected network access point, the Service Set Identifier (SSID) and Security Mode are displayed.

---

## Removing Network Access Points

Perform the following actions to remove network access points from the profile list.

- 1 Press  to access the menu.
  - 2 Press  or  to `WiFi` and press  to select.
-

3 Press  or  to **Networks** and press  to select.

4 Press  or  to the selected network access point and press  to select.

5 Press  or  to **Remove** and press  to select.

6 Press  or  to **Yes** and press  to select.

The radio displays a positive mini notice to indicate that the selected network access point is successfully removed.

## Utilities

This chapter explains the operations of the utility functions available in your radio.

## Squelch Levels

You can adjust the squelch level to filter out unwanted calls with low signal strength or channels with noise higher than normal background.

### Normal

This is the default setting.

### Tight

This setting filters out unwanted calls and/or background noise. Calls from remote locations may also be filtered out.

### NOTICE:

This feature is not applicable in Citizens Band channels that are in the same frequency.

## Setting Squelch Levels

Follow the procedure to set the squelch levels on your radio.

- 1 Do one of the following:
  - Press the programmed **Squelch** button. Skip the following steps.

- Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Squelch. Press  to select.

5 Do one of the following:

- Press  or  to Normal. Press  to select.  
The display shows  beside Normal.

- Press  or  to Tight. Press  to select.  
The display shows  beside Tight.

The screen automatically returns to the previous menu.

## Power Levels

You can customize the power setting to high or low for each channel.

### High

This enables communication with radios located at a considerable distance from you.

### Low

This enables communication with radios in closer proximity.

#### NOTICE:

This feature is not applicable in Citizens Band channels that are in the same frequency.

## Setting Power Levels

Follow the procedure to set the power levels on your radio.

1 Do one of the following:

- Press the programmed **Power Level** button. Skip the steps below.
- Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Power. Press  to select.

---

5 Do one of the following:

- Press  or  to High. Press  to select.  
The display shows  beside High.
  - Press  or  to Low. Press  to select.  
The display shows  beside Low.
- 

6 Long press  to return to the Home screen.

---

## Turning Radio Tones/Alerts On or Off

You can enable and disable all radio tones and alerts, if needed, except for incoming Emergency alert tone . Follow the procedure to turn tones and alerts on or off on your radio.

1 Do one of the following:

- Press the programmed **Tones/Alerts** button. Skip the following steps.
  - Press  to access the menu.
- 

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Tones/Alerts. Press  to select.

---

5 Press  or  to All Tones. Press  to select.

---

6 Press  to enable or disable all tones and alerts. The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
- If disabled, ✓ disappears beside Enabled.

---

## Turning Keypad Tones On or Off

Follow the procedure to turn keypad tones on or off on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Tones/Alerts. Press  to select.

---

5 Press  or  to Keypad Tones. Press  to select.

---

6 Press  to enable or disable keypad tones. The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
- If disabled, ✓ disappears beside Enabled.

---

## Setting Tones/Alerts Volume Offset Levels

This feature adjusts the volume of the tones or alerts, allowing it to be higher or lower than the voice volume. Follow the procedure to set the tones and alerts volume offset levels on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Tones/Alerts. Press  to select.

5 Press  or  to Vol. Offset. Press  to select.

6 Press  or  to the required volume offset level.

A feedback tone sounds with each corresponding volume offset level.

7 Do one of the following:

- Press  to select. The required volume offset level is saved.

- Press  to exit. The changes are discarded.

## Turning Talk Permit Tone On or Off

Follow the procedure to turn Talk Permit Tone on or off on your radio.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Tones/Alerts. Press  to select.

5 Press  or  to Talk Permit. Press  to select.

- 6 Press  to enable or disable the Talk Permit Tone.

The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
- If disabled, ✓ disappears beside Enabled.

## Turning Power Up Tone On or Off

Follow the procedure to turn Power Up Tone on or off on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 
- 3 Press  or  to Radio Settings. Press  to select.

- 4 Press  or  to Tones/Alerts. Press  to select.

- 5 Press  or  to Power Up. Press  to select.

- 6 Press  to enable or disable the Power Up Tone. The display shows one of the following results:
- If enabled, ✓ appears beside Enabled.
  - If disabled, ✓ disappears beside Enabled.

## Setting Text Message Alert Tones

You can customize the text message alert tone to Momentary or Repetitive for each entry in the Contacts list. Follow the procedure to set the text message alert tones on your radio.

- 1 Press  to access the menu.

2 Press  or  to **Contacts**. Press  to select.

---

3 Press  or  to the required alias or ID.  
Press  to select.

---

4 Press  or  to **Message Alert**. Press  to select.

---

5 Do one of the following:

- Press  or  to **Momentary**. Press  to select.  
The display shows  beside **Momentary**.

- Press  or  to **Repetitive**. Press  to select.  
The display shows  beside **Repetitive**.

---

palette of the display. Follow the procedure to change the display mode of your radio.

1 Do one of the following:

- Press the programmed **Display Mode** button.  
Skip the following steps.
  - Press  to access the menu.
- 

2 Press  or  to **Utilities**. Press  to select.

---

3 Press  or  to **Radio Settings**. Press  to select.

---

4 Press  or  to **Display**. Press  to select.  
The display shows **Day Mode** and **Night Mode**.

---

## Changing Display Modes

You can change the display mode of the radio between Day or Night, as needed. This feature affects the color

- 5 Press  or  to the required setting. Press  to select.

The display shows ✓ beside the selected setting.

---

## Adjusting Display Brightness

Follow the procedure to adjust the display brightness on your radio. Display brightness cannot be adjusted when Auto Brightness is enabled.

- 1 Do one of the following:
- Press the programmed **Brightness** button. Skip the following steps.
  - Press  to access the menu.

- 2 Press  or  to Utilities. Press  to select.

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Brightness. Press  to select.

The display shows the progress bar.

---

- 5 Press  or  to decrease or increase the display brightness. Press  to select.

The setting value is varied from 1 to 8.

---

## Turning Horns/Lights On or Off

Your radio is able to notify you of an incoming call through the horns and lights feature. When activated, an incoming call sounds the horn and turns on the lights of your vehicle. This feature needs to be installed through your radio rear accessory connector by your dealer. Follow the procedure to turn all horns and lights on or off on your radio.

- 1 Do one of the following:
- Press the programmed **Horns/Lights** button. Skip the steps below.
  - Press  to access the menu.
-

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Horns/Lights. Press  to select.

---

5 Press  to enable or disable Horns/Lights. The display shows one of the following results:

- If enabled,  appears beside Enabled.
- If disabled,  disappears beside Enabled.

---

## Turning LED Indicators On or Off

Follow the procedure to turn the LED indicators on or off on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to LED Indicator. Press  to select.

---

5 Press  to enable or disable the LED indicator. The display shows one of the following results:

- If enabled,  appears beside Enabled.
- If disabled,  disappears beside Enabled.

---

## Turning Public Address System On or Off

Follow the procedure to enable or disable the internal public address (PA) system of your radio.

- 1 Do one of the following:
    - Press the programmed **Public Address** button. Skip the following steps.
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Public Address. Press  to select.
- 

- 5 Press  to enable or disable Public Address.
    - If enabled,  appears beside Enabled.
    - If disabled,  disappears beside Enabled.
- 

## Turning External Public Address System On or Off

Follow the procedure to enable or disable the external public address (PA) system of your radio.

- 1 Do one of the following:
    - Press the programmed **Ext Public Address** button. Skip the following steps.
    - Press  to access the menu.
- 

- 2 Press  or  to Utilities. Press  to select.
- 

- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to External Public Address. Press  to select.
-

- 5 Press  to enable or disable external public address.
- If enabled, ✓ appears beside Enabled.
  - If disabled, ✓ disappears beside Enabled.
- 

## Turning Introduction Screen On or Off

You can enable and disable the Introduction Screen by following the procedure.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
- 
- 3 Press  or  to Radio Settings. Press  to select.
- 

- 4 Press  or  to Display. Press  to select.
- 

- 5 Press  or  to Intro Screen. Press  to select.
- 

- 6 Press  to enable or disable the Introduction Screen.

The display shows one of the following results:

- If enabled, ✓ appears beside Enabled.
  - If disabled, ✓ disappears beside Enabled.
- 

## Setting Languages

Follow the procedure to set the languages on your radio.

- 1 Press  to access the menu.
- 
- 2 Press  or  to Utilities. Press  to select.
-

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Languages. Press  to select.

5 Press  or  to the required language. Press  to select.  
The display shows  beside the selected language.

## Identifying Cable Type

Do the following steps to select the type of cable your radio uses.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Settings. Press  to select.

4 Press  or  to Cable Type. Press  to select.

5 The current cable type is indicated by a .

## Voice Operating Transmission

The Voice Operating Transmission (VOX) allows you to initiate a hands-free voice-activated call on a programmed channel. The radio automatically transmits, for a programmed period, whenever the microphone on the VOX-capable accessory detects voice.

### NOTICE:

This feature is not applicable in Citizens Band channels that are in the same frequency.

You can enable or disable VOX by doing one of the following:

- Turn the radio off and then power it on again to enable VOX.

- Change the channel by using the **Scroll Up/Down** buttons to enable VOX.
- Change the channel by using the **Volume/Channel Knob** to enable VOX.
- Turn VOX on or off by using the programmed **VOX** button or menu to enable or disable VOX.
- Press the **PTT** button during radio operation to disable VOX.

**NOTICE:**

Turning this feature on or off is limited to radios with this function enabled. Check with your dealer or system administrator for more information.

## Turning Voice Operating Transmission On or Off

Follow the procedure to turn VOX on or off on your radio.

- 1 Do one of the following:
  - Press the programmed **VOX** button. Skip the steps below.
  - Press  to access the menu.

- 2 Press  or  to Utilities. Press  to select.

- 3 Press  or  to Radio Settings. Press  to select.

- 4 Press  or  to VOX. Press  to select.

- 5 Press  to enable or disable **VOX**.

**NOTICE:**

If the Talk Permit Tone is enabled, use a trigger word to initiate the call. Wait for the Talk Permit Tone to finish before speaking clearly into the microphone. See [Turning Talk Permit Tone On or Off on page 189](#) for more information.

## Turning Voice Announcement On or Off

This feature enables the radio to audibly indicate the current zone or channel the user has just assigned, or the programmable button the user has just pressed.

This is typically useful when the user has difficulty reading the content shown on the display.

This audio indicator can be customized according to customer requirements. Follow the procedure to turn Voice Announcement on or off on your radio.

## Turning Option Board On or Off

Option board capabilities within each channel can be assigned to programmable buttons. A channel can support up to 6 option board features. Follow the procedure to turn option board on or off on your radio.

---

Press the programmed **Option Board** button.

## Text-to-Speech

The Text-to-Speech feature can only be enabled by your dealer or system administrator. If Text-to-Speech is enabled, the Voice Announcement feature is automatically disabled. If Voice Announcement is enabled, then the Text-to-Speech feature is automatically disabled.

This feature enables the radio to audibly indicate the following features:

- Current Channel
- Current Zone
- Programmed button feature on or off
- Content of received text messages
- Content of received Job Tickets

This audio indicator can be customized per customer requirements. This feature is typically useful when the user is in a difficult condition to read the content shown on the display.

## Setting Text-to-Speech

Follow the procedure to set the Text-to-Speech feature.

- 1 Press  to access the menu.
- 2 Press  or  to Utilities. Press  to select.
- 3 Press  or  to Radio Settings. Press  to select.

- 4 Press  or  to Voice Announcement.  
Press  to select.
- 

- 5 Press  or  to any of the following features.  
Press  to select.

The available features are as follows:

- All
- Messages
- Job Tickets
- Channel
- Zone
- Program Button

✓ appears beside the selected setting.

---

## Turning Automatic Call Forwarding On or Off

You can enable your radio to automatically forward voice calls to another radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Call Forward. Press  to select.

---

- 5 Do one of the following:
  - Press  or  to enable Call Forwarding. If enabled, ✓ appears beside Enabled.

- Press  or  to disable Call Forwarding. If disabled, ✓ disappears beside Enabled.
- 

## Setting Menu Timer

You can set the time your radio stays in the menu before it automatically switches to the Home screen. Follow the procedure to set the menu timer.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Display. Press  to select.

---

- 5 Press  or  to Menu Timer. Press  to select.

---

- 6 Press  or  to the required setting. Press  to select.

---

## Turning Analog Microphone AGC On or Off

The Analog Microphone Automatic Gain Control (AGC) controls the microphone gain of the radio automatically while transmitting on an analog system.

This feature suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of audio. Follow the procedure to turn Analog Microphone AGC on or off on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Mic AGC-A. Press  to select.

---

5 Press  to enable or disable Analog Microphone AGC.

The display shows one of the following results:

- If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.
- 

## Turning Digital Microphone AGC On or Off

The Digital Microphone Automatic Gain Control (AGC) controls the microphone gain of the radio automatically while transmitting on a digital system.

This feature suppresses loud audio or boosts soft audio to a preset value in order to provide a consistent level of

audio. Follow the procedure to turn Digital Microphone AGC on or off on your radio.

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Mic AGC-D. Press  to select.

---

5 Press  to enable or disable Digital Microphone AGC.

The display shows one of the following results:

- If enabled,  appears beside Enabled.
  - If disabled,  disappears beside Enabled.
-

## Turning Intelligent Audio On or Off

Your radio automatically adjusts the audio volume to overcome current background noise in the environment, inclusive of both stationary and non-stationary noise sources. This is a receive-only feature and does not affect transmission audio. Follow the procedure to turn Intelligent Audio on or off on your radio.

### NOTICE:

This feature is not applicable during a Bluetooth session.

- 1 Do one of the following:
  - Press the programmed **Intelligent Audio** button. Skip the steps below.
  - Press  to access the menu.

- 2 Press  or  to Utilities. Press  to select.

- 3 Press  or  to Radio Settings. Press  to select.

- 4 Press  or  to Intelligent Audio. Press  to select.

- 5 Do one of the following:

- Press  or  to On. Press  to select. The display shows ✓ beside On.
- Press  or  to Off. Press  to select. The display shows ✓ beside Off.

## Turning the Acoustic Feedback Suppressor Feature On or Off

This feature allows you to minimize Acoustic Feedback Suppressor in received calls. Follow the procedure to turn the Acoustic Feedback Suppressor on or off on your radio.

- 1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to AF Suppressor. Press  to select.

---

5 Do one of the following:

- Press to enable Acoustic Feedback Suppressor. If enabled, ✓ appears beside Enabled.
  - Press to disable Acoustic Feedback Suppressor. If disabled, ✓ disappears beside Enabled.
- 

## Turning Trill Enhancement On or Off

You can enable this feature when you are speaking in a language that contains many words with alveolar trill (rolling "R") pronunciations. Follow the procedure to turn Trill Enhancement on or off on your radio.

1 Do one of the following:

- Press the programmed **Trill Enhancement** button. Skip the steps below.
  - Press  to access the menu.
- 

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Settings. Press  to select.

---

4 Press  or  to Trill Enhance. Press  to select.

---

5 Do one of the following:

- Press  or  to On. Press  to select. The display shows ✓ beside On.
  - Press  or  to Off. Press  to select. The display shows ✓ beside Off.
-

## Audio Ambience

You can customize the audio ambience for your radio according to your environment.

### Default

This is the default setting.

### Loud

This setting enables Noise Suppressor and increases speaker loudness for use in noisy surroundings.

### Work Group

This setting enables AF Suppressor and disables AGC for use when a group of radios are near to each other.

## Setting Audio Ambience

Follow the procedure to set the audio ambience on your radio according to your environment.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Audio Ambience. Press  to select.

---

- 5 Press  or  to the required setting. Press  to select.

The settings are as follows.

- Choose **Default** for the default factory settings.
- Choose **Loud** to increase speaker loudness when using in noisy surroundings.
- Choose **Work Group** to reduce acoustic feedback when using with a group of radios that are near to each other.

The display shows  beside the selected setting.

---

## Audio Profiles

You can customize the audio profiles for your radio according to your preference.

### Default

This is the default setting.

### Level 1, Level 2, and Level 3

These settings are intended to compensate for noise-induced hearing loss that is typical for adults in their 40's, 50's, and 60's or over.

### Treble Boost, Mid Boost, and Bass Boost

These settings are intended for a tinnier sound, a more nasal sound, and a deeper sound.

## Setting Audio Profiles

Follow the procedure to set audio profiles on your radio.

- 1 Press  to access the menu.

---

- 2 Press  or  to Utilities. Press  to select.

---

- 3 Press  or  to Radio Settings. Press  to select.

---

- 4 Press  or  to Audio Profiles. Press  to select.

---

- 5 Press  or  to the required setting. Press  to select.

The settings are as follows.

- Choose **Default** to disable the previously selected audio profile and return to the default factory settings.
- Choose **Level 1**, **Level 2**, or **Level 3** for audio profiles intended to compensate for noise-induced hearing loss that is typical for adults over 40 years of age.
- Choose **Treble Boost**, **Mid Boost**, or **Bass Boost** for audio profiles that align with your

preference for tinnier, more nasal, or deeper sounds.

The display shows ✓ beside the selected setting.

## Turning Global Navigation Satellite System On or Off

Global Navigation Satellite System (GNSS) is a satellite navigation system that determines the radio precise location. GNSS includes Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS).

### NOTICE:

Selected radio models may offer GPS and GLONASS. GNSS constellation is configured by using CPS. Check with your dealer or system administrator to determine how your radio has been programmed.

- 1 Do one of the following steps to toggle GNSS on or off on your radio.
  - Press the programmed **GNSS** button.

- Press  to access the menu. Proceed to the next step.

- 2 Press  or  to Utilities. Press  to select.

- 3 Press  or  to Radio Settings. Press  to select.

- 4 Press  or  to GNSS. Press  to select.

- 5 Press  to enable or disable GNSS.  
If enabled, ✓ appears beside Enabled.  
If disabled, ✓ disappears beside Enabled.

## Flexible Receive List

Flexible Receive List is a feature that allows you to create and assign members on the receive talkgroup list. Your radio can support a maximum of 16 members in the list. This feature is supported in Capacity Plus.

## Turning Flexible Receive List On or Off

Follow the procedure to turn Flexible Receive List on or off.

- 1 Do one of the following:
  - Press the programmed **Flexible Receive List** button. Skip the following steps.
  - Press  to access the menu.

---
- 2 Press  or  to Flexible Rx List. Press  to select.

---

- 3 Do one of the following:
  - Press  or  to Turn On. Press  to select.  
A positive indicator tone sounds.  
The display shows a positive mini notice.
  - Press  or  to Turn Off. Press  to select.  
A negative indicator tone sounds.  
The display shows a negative mini notice.

---

## General Radio Information

Your radio contains information on various general parameters.

The general information of your radio is as follows:

- Radio alias and ID.
- Firmware and Codeplug versions.
- Software update.
- GNSS information.
- Site information.

### NOTICE:

Press  to return to the previous screen. Long press  to return to the Home screen. The radio exits the current screen once the inactivity timer expires.

## Checking Radio Alias and ID

Follow the procedure to check the radio alias and ID on your radio.

- 1 Do one of the following:

- Press the programmed **Radio Alias and ID** button. Skip the following steps. A positive indicator tone sounds.

You can press the programmed **Radio Alias and ID** button to return to the previous screen.

- Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Info. Press  to select.

4 Press  or  to My ID. Press  to select.  
The first text line shows the radio alias. The second text line shows the radio ID.

## Checking Firmware and Codeplug Versions

Follow the procedure to check the firmware and codeplug versions on your radio.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

3 Press  or  to Radio Info. Press  to select.

4 Press  or  to Versions. Press  to select.

The display shows the current firmware and codeplug versions.

## Checking Software Update Information

This feature shows the date and time of the latest software update carried out through OTAP or Wi-Fi. Follow the procedure to check the software update information on your radio.

1 Press  to access the menu.

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Info. Press  to select.

---

4 Press  or  to SW Update. Press  to select.

The display shows the date and time of the latest software update.

---

Software Update menu is only available after at least one successful OTAP or Wi-Fi session. See [Over-the-Air Programming on page 444](#) for more information.

## Checking GNSS Information

Displays the GNSS information on your radio, such as values of:

- Latitude
- Longitude
- Altitude

- Direction
- Velocity
- Horizontal Dilution of Precision (HDOP)
- Satellites
- Version

1 Press  to access the menu.

---

2 Press  or  to Utilities. Press  to select.

---

3 Press  or  to Radio Info. Press  to select.

---

4 Press  or  to GNSS Info. Press  to select.

---

5 Press  or  to the required item. Press  to select. The display shows the requested GNSS information.

---

## Displaying Site Information

Follow the procedure to display the current site name your radio is on.

- 1 Press  to access the menu.

---
- 2 Press  or  to Utilities. Press  to select.

---
- 3 Press  or  to Radio Info. Press  to select.

---
- 4 Press  or  to Site Info. Press  to select.

---

The display shows the current site name.

# Limited Warranty

## MOTOROLA SOLUTIONS COMMUNICATION PRODUCTS

### I. WHAT THIS WARRANTY COVERS AND FOR HOW LONG:

Motorola Solutions, Inc. ("Motorola Solutions") warrants the Motorola Solutions manufactured Communication Products listed below ("Product") against defects in material and workmanship under normal use and service for a period of time from the date of purchase as scheduled below:

DM Series Digital Mobile Radios	24 Months
Product Accessories	12 Months

Motorola Solutions, at its option, will at no charge either repair the Product (with new or reconditioned parts), replace it (with a new or reconditioned Product), or refund the purchase price of the Product during the warranty period provided it is returned in accordance with the terms

of this warranty. Replaced parts or boards are warranted for the balance of the original applicable warranty period. All replaced parts of Product shall become the property of Motorola Solutions.

This express limited warranty is extended by Motorola Solutions to the original end user purchaser only and is not assignable or transferable to any other party. This is the complete warranty for the Product manufactured by Motorola Solutions. Motorola Solutions assumes no obligations or liability for additions or modifications to this warranty unless made in writing and signed by an officer of Motorola Solutions.

Unless made in a separate agreement between Motorola Solutions and the original end user purchaser, Motorola Solutions does not warrant the installation, maintenance or service of the Product.

Motorola Solutions cannot be responsible in any way for any ancillary equipment not furnished by Motorola Solutions which is attached to or used in connection with the Product, or for operation of the Product with any ancillary equipment, and all such equipment is expressly excluded from this warranty. Because each system which may use the Product is unique, Motorola Solutions disclaims liability for range, coverage, or operation of the system as a whole under this warranty.

## II. GENERAL PROVISIONS

This warranty sets forth the full extent of Motorola Solutions responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at Motorola Solutions option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL MOTOROLA SOLUTIONS BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR SAVINGS OR OTHER INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

## III. STATE LAW RIGHTS:

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LIMITATION ON HOW LONG AN IMPLIED

WARRANTY LASTS, SO THE ABOVE LIMITATION OR EXCLUSIONS MAY NOT APPLY.

This warranty gives specific legal rights, and there may be other rights which may vary from state to state.

## IV. HOW TO GET WARRANTY SERVICE

You must provide proof of purchase (bearing the date of purchase and Product item serial number) in order to receive warranty service and, also, deliver or send the Product item, transportation and insurance prepaid, to an authorized warranty service location. Warranty service will be provided by Motorola Solutions through one of its authorized warranty service locations. If you first contact the company which sold you the Product (for example, dealer or communication service provider), it can facilitate your obtaining warranty service. You can also call Motorola Solutions at 1-800-927-2744 US/Canada.

## V. WHAT THIS WARRANTY DOES NOT COVER

- 1 Defects or damage resulting from use of the Product in other than its normal and customary manner.

- 2 Defects or damage from misuse, accident, water, or neglect.
- 3 Defects or damage from improper testing, operation, maintenance, installation, alteration, modification, or adjustment.
- 4 Breakage or damage to antennas unless caused directly by defects in material workmanship.
- 5 A Product subjected to unauthorized Product modifications, disassembles or repairs (including, without limitation, the addition to the Product of non-Motorola Solutions supplied equipment) which adversely affect performance of the Product or interfere with Motorola Solutions normal warranty inspection and testing of the Product to verify any warranty claim.
- 6 Product which has had the serial number removed or made illegible.
- 7 Rechargeable batteries if:
  - any of the seals on the battery enclosure of cells are broken or show evidence of tampering.
  - the damage or defect is caused by charging or using the battery in equipment or service other than the Product for which it is specified.
- 8 Freight costs to the repair depot.
- 9 A Product which, due to illegal or unauthorized alteration of the software/firmware in the Product, does not function in accordance with Motorola Solutions published specifications or the FCC certification labeling in effect for the Product at the time the Product was initially distributed from Motorola Solutions.
- 10 Scratches or other cosmetic damage to Product surfaces that does not affect the operation of the Product.
- 11 Normal and customary wear and tear.

## VI. PATENT AND SOFTWARE PROVISIONS

Motorola Solutions will defend, at its own expense, any suit brought against the end user purchaser to the extent that it is based on a claim that the Product or parts infringe a United States patent, and Motorola Solutions will pay those costs and damages finally awarded against the end user purchaser in any such suit which are attributable to any such claim, but such defense and payments are conditioned on the following:

- 1 Motorola Solutions will be notified promptly in writing by such purchaser of any notice of such claim,

- 2 Motorola Solutions will have sole control of the defense of such suit and all negotiations for its settlement or compromise, and
- 3 Should the Product or parts become, or in Motorola Solutions opinion be likely to become, the subject of a claim of infringement of a United States patent, that such purchaser will permit Motorola Solutions, at its option and expense, either to procure for such purchaser the right to continue using the Product or parts or to replace or modify the same so that it becomes non-infringing or to grant such purchaser a credit for the Product or parts as depreciated and accept its return. The depreciation will be an equal amount per year over the lifetime of the Product or parts as established by Motorola Solutions.

Motorola Solutions will have no liability with respect to any claim of patent infringement which is based upon the combination of the Product or parts furnished hereunder with software, apparatus or devices not furnished by Motorola Solutions, nor will Motorola Solutions have any liability for the use of ancillary equipment or software not furnished by Motorola Solutions which is attached to or used in connection with the Product. The foregoing states the entire liability of Motorola Solutions with respect to infringement of patents by the Product or any parts thereof.

Laws in the United States and other countries preserve for Motorola Solutions certain exclusive rights for copyrighted Motorola Solutions software such as the exclusive rights to reproduce in copies and distribute copies of such Motorola Solutions software. Motorola Solutions software may be used in only the Product in which the software was originally embodied and such software in such Product may not be replaced, copied, distributed, modified in any way, or used to produce any derivative thereof. No other use including, without limitation, alteration, modification, reproduction, distribution, or reverse engineering of such Motorola Solutions software or exercise of rights in such Motorola Solutions software is permitted. No license is granted by implication, estoppel or otherwise under Motorola Solutions patent rights or copyrights.

## VII. GOVERNING LAW

This Warranty is governed by the laws of the State of Illinois, U.S.A.

## Handbuch zur HF-Energiestrahlung und Produktsicherheit für Mobilfunkgeräte

### ATTENTION!

**Dieses Funkgerät ist nur für eine berufliche Nutzung vorgesehen.** Lesen Sie vor Verwendung des Funkgeräts das Handbuch zur HF-Energiestrahlung und Produktsicherheit für Mobilfunkgeräte, das wichtige Bedienungsanweisungen für den sicheren Umgang und HF-Energiesicherheitsinformationen zur Einhaltung der geltenden Normen und Richtlinien enthält.

Eine Auflistung der von Motorola Solutions genehmigten Antennen und anderen Zubehörteilen finden Sie auf folgender Website:

<http://www.motorolasolutions.com>

Diese Seite wurde absichtlich leer gelassen.

# Softwareversion

Alle in den folgenden Abschnitten beschriebenen Funktionen werden von der Softwareversion **R02.08.05.0000** oder neueren Versionen unterstützt.

Unter [Überprüfen der Firmware- und Codeplug-Versionen auf Seite 242](#) können Sie die Softwareversion Ihres Funkgeräts bestimmen.

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Diese Seite wurde absichtlich leer gelassen.

# Copyright

Die in diesem Dokument beschriebenen Motorola Solutions-Produkte können durch Copyright geschützte Computerprogramme von Motorola Solutions enthalten. Nach den Gesetzen der USA und anderer Staaten sind bestimmte exklusive Rechte an der urheberrechtlich geschützten Software der Firma Motorola Solutions vorbehalten. Demzufolge dürfen urheberrechtlich geschützte Computerprogramme von Motorola Solutions, die zusammen mit den in diesem Dokument beschriebenen Motorola Solutions-Produkten ausgeliefert werden, ohne die vorherige schriftliche Genehmigung von Motorola Solutions weder kopiert noch in jeglicher Form reproduziert werden.

© 2017 Motorola Solutions, Inc. Alle Rechte vorbehalten.

Die Vervielfältigung, Übertragung, Speicherung in einem Abrufsystem oder Übersetzung in eine Sprache oder Computersprache ist für keinen Teil dieses Dokuments in keinerlei Form und durch keinerlei Methode ohne vorherige schriftliche Genehmigung von Motorola Solutions Inc. gestattet.

Darüber hinaus werden mit dem Kauf von Produkten von Motorola Solutions weder ausdrücklich noch stillschweigend, durch Rechtsverwirkung oder auf andere

Weise Lizenzen unter dem Copyright, dem Patent oder den Patentanwendungen von Software von Motorola Solutions ausgegeben, außer der Nutzung von normalen, nicht ausschließlich erteilten, gebührenfreien Lizenzen, die sich aus der Anwendung der Gesetze beim Verkauf eines Produkts ergeben.

## Haftungsausschluss

Beachten Sie, dass bestimmte Funktionen, Fähigkeiten und Möglichkeiten, die in diesem Dokument beschrieben werden, für ein bestimmtes System möglicherweise nicht gelten oder nicht lizenziert sind, oder von den Eigenschaften bestimmter mobiler Endgeräte (Funkgeräte) oder von der Konfiguration bestimmter Parameter abhängen können. Wenden Sie sich für weitere Informationen an Ihren Motorola Solutions-Ansprechpartner.

## Marken

MOTOROLA, MOTO, MOTOROLA SOLUTIONS und das stilisierte M-Logo sind Marken oder eingetragene Marken von Motorola Trademark Holdings, LLC und werden unter Lizenz verwendet. Alle anderen Marken sind Eigentum der jeweiligen Besitzer.

## WEEE-Richtlinie der EU

■ Gemäß WEEE-Richtlinie (Waste of Electrical and Electronic Equipment, deutsch Elektro- und Elektronikaltgeräte) der EU besteht für Elektro- und Elektronikgeräte, die in den Mitgliedsländern der Europäischen Union in Verkehr gebracht werden, Kennzeichnungspflicht.

Die Kennzeichnung erfolgt durch ein Etikett mit einer durchgestrichenen Mülltonne, das am Produkt selbst oder an der Verpackung angebracht wird.

Endverbraucher in den Mitgliedsländern der Europäischen Union sind angehalten, bei ihrem lokalen Händler oder beim Kundendienst des Herstellers Informationen zum Rücknahmesystem ihres Landes einzuholen.

## Copyright-Hinweis zur Computersoftware

Die in diesem Handbuch beschriebenen Motorola Solutions Produkte können durch Copyright geschützte Computerprogramme von Motorola Solutions enthalten, die in Halbleiterspeichern oder anderen Medien gespeichert sind. Nach den Gesetzen der USA und anderer Staaten sind bestimmte exklusive Rechte an der urheberrechtlich geschützten Software, insbesondere die Rechte der Vervielfältigung in jeglicher Form, der Firma Motorola Solutions vorbehalten. Entsprechend dürfen keine in den Produkten von Motorola Solutions enthaltenen, durch Copyright geschützten Computerprogramme, die in dieser Bedienungsanleitung beschrieben werden, in irgendeiner Form kopiert, reproduziert, geändert, zurückentwickelt oder verteilt werden, ohne dass hierfür eine ausdrückliche schriftliche Genehmigung von Motorola Solutions vorliegt. Darüber hinaus werden mit dem Kauf von Produkten von Motorola Solutions weder ausdrücklich noch stillschweigend, durch Rechtsverwirkung oder auf andere Weise Lizenzen unter dem Copyright, dem Patent oder den Patentanwendungen von Software von Motorola Solutions ausgegeben, abgesehen von der Nutzung von normalen, nicht ausschließlich erteilten Lizenzen, die sich aus der

Anwendung der Gesetze beim Verkauf eines Produkts ergeben.

Die in diesem Produkt eingebettete AMBE+2™- Sprachcodierungstechnologie ist durch geistiges Eigentum und Urheberrechte einschließlich Patentansprüche, Copyrights und Industriegeheimnisvorgaben von Digital Voice Systems, Inc. geschützt.

Die Nutzung dieser Sprachcodierungstechnologie wird ausschließlich in Verbindung mit der Nutzung dieser Kommunikationsausrüstung genehmigt. Benutzern dieser Technologie ist jeder Versuch, die Zielsprache/den Objektcode zu dekompileieren, analysieren (Reverse Engineering) oder auf jegliche andere Art in eine lesbare Form zu übertragen, ausdrücklich untersagt.

U.S. Pat. Nr. 5,870,405, 5,826,222, 5,754,974, 5,701,390, 5,715,365, 5,649,050, 5,630,011, 5,581,656, 5,517,511, 5,491,772, 5,247,579, 5,226,084 und 5,195,166.

Diese Seite wurde absichtlich leer gelassen.

## Sicherheitshinweise für die Handhabung

Das MOTOTRBO Digital-Handfunkgerät erfüllt die Bedingungen der Schutzart IP67, d. h. es ist widrigen Einsatzbedingungen wie z. B. Untertauchen in Wasser gewachsen. Dieser Abschnitt beschreibt einige grundlegende Vorsichtsmaßnahmen bei der Handhabung.

### VORSICHT:

Nehmen Sie Ihr Gerät nicht auseinander. Dies kann zur Beschädigung der Dichtungen des Funkgeräts und zu Kriechwegen innerhalb des Funkgeräts führen. Die Wartung des Funkgeräts darf ausschließlich im Wartungszentrum durchgeführt werden, das zum Testen und Ersetzen der Dichtungen am Funkgerät eingerichtet ist.

- Wurde Ihr Funkgerät in Wasser getaucht, schütteln Sie es, um es von eventuell im Lautsprechergitter und im Mikrofonanschluss befindlichem Wasser zu befreien. Dort eingedrungenes Wasser könnte die Audioleistung verringern.
- Wenn der Akkukontaktbereich Ihres Funkgeräts mit Wasser in Kontakt gekommen ist, sind die Akkukontakte am Funkgerät und am Akku zu reinigen und zu trocknen, bevor der Akku am Funkgerät angebracht wird. Restfeuchtigkeit an den Kontakten könnte das Funkgerät kurzschließen.
- Wenn Ihr Funkgerät in eine korrodierende Flüssigkeit (z. B. Salzwasser) getaucht wurde, spülen Sie das Funkgerät und den Akku mit sauberem Süßwasser ab und trocknen Sie sie.
- Verwenden Sie zum Reinigen der Außenflächen des Funkgeräts eine verdünnte Lösung aus einem milden Spülmittel und frischem Wasser (d. h. ein Teelöffel Spülmittel auf 4 Liter Wasser).
- Stecken Sie niemals etwas in die Entlüftungsöffnung des Funkgerätegehäuses unterhalb des Akku-Kontakts. Diese Entlüftungsöffnung ermöglicht den Druckausgleich im Funkgerät. Andernfalls kann ein Kriechweg innerhalb des Funkgeräts entstehen und die Wasserdichtheit möglicherweise verloren gehen.
- Die Entlüftungsöffnung darf auf keinen Fall blockiert oder verdeckt werden, auch nicht mit einem Etikett.
- Stellen Sie sicher, dass die Entlüftungsöffnung nicht mit öligen Stoffen in Kontakt kommt.
- Das Funkgerät mit ordnungsgemäß angebrachter Antenne ist für eine Wasserdichtheit bis maximal einen (1) Meter und maximal 30 Minuten ausgelegt. Bei

Überschreiten der Maximalwerte oder Gebrauch des Funkgeräts ohne Antenne kann es beschädigt werden.

- Reinigen Sie Ihr Funkgerät nicht mit einem Hochdruckstrahl, da dieser Druck für die vorgesehene Wasserdichtheit (d. h. Druck in 1 m Tiefe) zu hoch ist und eventuell Wasser in das Funkgerät eindringen lässt.

# Grundlegende Bedienung

In diesem Kapitel werden die ersten Schritte für die Benutzung des Funkgeräts beschrieben.

## Einschalten des Funkgeräts

Führen Sie die Vorgehensweise zum Einschalten des Funkgeräts durch.

Drücken Sie die **Ein-/Aus**-Taste.

---

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Die grüne LED leuchtet.
- Auf dem Display wird **MOTOTRBO (TM)** gefolgt von einer Begrüßungsnachricht oder einem Bild angezeigt.
- Der Startbildschirm wird eingeschaltet.

Wenn die Funktion „Töne/Hinweistöne“ deaktiviert ist, erklingt kein Ton beim Einschalten.

Überprüfen Sie den Akku, wenn sich Ihr Funkgerät nicht einschalten lässt. Stellen Sie sicher, dass er aufgeladen und richtig eingelegt ist. Wenden Sie sich an Ihren Händler,

wenn sich Ihr Funkgerät noch immer nicht einschalten lässt.

## Ausschalten des Funkgeräts

Gehen Sie wie folgt vor, um das Funkgeräts auszuschalten.

**Sendetaste (On/Off)** drücken und gedrückt halten.

Es kann bis zu sieben Sekunden dauern, bis das Funkgerät vollständig ausgeschaltet ist.

Auf dem Display wird **Gerät wird abgesch** angezeigt.

---

## Anpassen der Lautstärke

Führen Sie die Vorgehensweise zum Ändern der Lautstärke auf Ihrem Funkgerät aus.

Führen Sie einen der folgenden Schritte aus:

- Drehen Sie den **Ein/Aus/Lautstärkereger** im Uhrzeigersinn, um die Lautstärke zu erhöhen.

- Drehen Sie den **Ein/Aus/Lautstärkeregler** gegen den Uhrzeigersinn, um die Lautstärke zu verringern.

**HINWEIS:**

Ihr Funkgerät kann auf eine Mindestlautstärke programmiert werden. Die Lautstärke kann dann nicht niedriger als diese einprogrammierte Mindestlautstärke eingestellt werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

---

## Bedienelemente

In diesem Kapitel werden die Tasten und Funktionen zum Bedienen des Funkgeräts beschrieben.

- 1 Ein-/Aus-/Informationen-Taste
- 2 Lautstärke-/Kanalregler
- 3 Anzeige
- 4 Menü-/OK-Taste
- 5 Auf-/Ab-Tasten
- 6 Lautsprecher

- 7 Zurück-/Startbildschirm-Taste
- 8 Vordere programmierbare Tasten
- 9 Zubehöranschluss
- 10 LED-Anzeigen

## Lautstärke-/Kanalregler

Der **Lautstärkeregelner/Kanalschalter** kann als Zweifunktionsschalter für Lautstärke und Kanalwahl oder einzig als Lautstärkeregelner programmiert werden.

Zum Einstellen der Lautstärke siehe [Anpassen der Lautstärke auf Seite 41](#).

Drücken und halten Sie den **Lautstärkeregelner/Kanalschalter** gedrückt, bis der Kanalauswahlstatus angezeigt wird, um die Kanäle zu ändern. Drehen Sie den **Lautstärkeregelner/Kanalschalter**, um den Kanal auszuwählen. Führen Sie eine der folgenden Vorgehensweisen aus, um den Kanalauswahlstatus zu verlassen:

- Drücken Sie den **Lautstärkeregelner/Kanalschalter**.
- Drücken Sie .
- Drücken Sie .

- Warten Sie, bis der Menü-Timer abgelaufen ist.

### Einstellen des Zweifunktionsschalters auf die bevorzugte Funktion

Führen Sie die Vorgehensweise zum Einstellen des Zweifunktionsschalters auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

### Tasten des Tastenfeldmikrofons

Sie können das alphanumerische 3x4-Tastenfeld am Tastaturmikrofon mit Vier-Wege-Navigation (Motorola Solutions-Teile-Nr. RMN5127\_) zum Aufrufen von Funkgerätfunktionen benutzen. Für die meisten Zeichen/Buchstaben muss eine

4 Drücken Sie  oder  bis

Zweifunktionsschalter. Drücken Sie , um die Option auszuwählen.

Im Display wird NurLautst und Lautst& Kanal angezeigt.

---

5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie , um die Option auszuwählen.

✓ wird neben den gewählten Einstellungen angezeigt. Der Bildschirm wechselt zum vorherigen Menü.

---

Taste mehrmals gedrückt werden. Die Tabelle gibt an, wie oft eine Taste gedrückt werden muss, um das jeweils gewünschte Zeichen zu erhalten.

Taste	So oft wird die Taste gedrückt												
	1	2	3	4	5	6	7	8	9	10	11	12	13
1 <sub>1-?</sub>	1	.	,	?	!	@	&	'	%	—	:	*	#
2 <sub>ABC</sub>	A	B	C	2									
3 <sub>DEF</sub>	D	E	F	3									
4 <sub>GHI</sub>	G	H	I	4									
5 <sub>JKL</sub>	J	K	L	5									
6 <sub>MNO</sub>	M	N	O	6									

*Tabelle wird fortgesetzt...*

Taste	So oft wird die Taste gedrückt												
	1	2	3	4	5	6	7	8	9	10	11	12	13
 7 PARS	P	Q	R	S	7								
 8 TUV	T	U	V	8									
 WXYZ 9	W	X	Y	Z	9								
 0 ↵	0		<b>HINWEIS:</b> Zur Eingabe von „0“ drücken. Gedrückt halten, um Großschreibung (CAPS) zu aktivieren. Zum Ausschalten der Großschreibung erneut lang drücken.										
 * ←	* oder del		<b>HINWEIS:</b> Während der Texteingabe drücken, um den Buchstaben zu löschen. Während der Zifferneingabe drücken, um ein „*“ einzugeben.										
 ☐ #	# oder Leer zeichen		<b>HINWEIS:</b> Während der Texteingabe drücken, um ein Leerzeichen einzugeben. Während der Zifferneingabe drücken, um ein „#“ einzugeben.										

## WAVE

Wide Area Voice Environment (WAVE™) bietet eine neue Methode zum Tätigen von Rufen zwischen zwei Funkgeräten.

Diese Funktion unterstützt auch Rufe zwischen Funkgeräten und anderen WAVE-fähigen Geräten. Damit diese Funktion verwendet werden kann, muss jedoch ein WAVE-Kanal eingerichtet sein.

Wenn das Funkgerät sich in einem WAVE-Kanal befindet, kann es keine Rufe von anderen Systemen annehmen und empfängt nur WAVE-Rufe.

Wenn das Funkgerät sich in einem WAVE-Kanal befindet, aktiviert es automatisch die WLAN-Funktion und meldet sich beim WAVE-Server an. WAVE-Rufe werden getätigt, wenn das Funkgerät über WLAN mit einem IP-Netzwerk verbunden ist.

### HINWEIS:

Diese Funktion gilt nur für DM4601e.

### Tabelle 1: WAVE-Anzeigesymbole

Die folgenden Symbole werden jeweils kurz auf dem Display angezeigt, wenn WAVE aktiviert ist.

	<b>WAVE verbunden</b> WAVE ist verbunden
	<b>WAVE getrennt</b> WAVE ist getrennt.

## Einrichten des aktiven WAVE-Kanals

WAVE-Kanäle werden über CPS konfiguriert. Gehen Sie wie folgt vor, um den gewünschten WAVE-Kanal auszuwählen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WAVE-Kanäle.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten WAVE-Kanal. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis **Als aktiv** festl... Drücken Sie  , um die Option auszuwählen.

---

Auf dem Display wird  neben dem ausgewählten Kanal angezeigt.

## Anzeigen von WAVE-Kanalinformationen

Gehen Sie wie folgt vor, um WAVE-Kanalinformationen anzuzeigen.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte Taste **WAVE-Kanalliste**. Überspringen Sie die folgenden Schritte.
  - Drücken Sie  , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis **WAVE-Kanäle**. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zum gewünschten WAVE-Kanal. Drücken Sie  , um die Option auszuwählen.

- 
- 4 Drücken Sie  oder  bis **Details anzeigen**. Drücken Sie  , um die Option auszuwählen.

---

Das Display zeigt die Details zum WAVE-Kanal an.

## Anzeigen von WAVE-Endpunktinformationen

Gehen Sie wie folgt vor, um WAVE-Endpunktinformationen anzuzeigen.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte **Kontakt**-Taste. Wechseln Sie zu [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Endpunkte.  
Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten WAVE-Endpunkt. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie , um Details anzuzeigen auszuwählen.

---

Das Display zeigt die Details zum WAVE-Endpunkt an.

## Ändern der WAVE-Konfiguration

Gehen Sie wie folgt vor, um die IP-Adresse, die Benutzer-ID und das Passwort des WAVE-Servers einzurichten.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis WAVE. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie , um Serveradresse auszuwählen. Drücken Sie , um die Serveradresse zu ändern. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  bis Benutzer-ID. Drücken Sie  zum Ändern der Benutzer-ID. Drücken Sie , um die Option auszuwählen.

---

7 Drücken Sie  bis **Passwort**. Drücken Sie , um die Option auszuwählen.

Drücken Sie , um die Option auszuwählen.

---

8 Drücken Sie  bis **Übernehmen**. Drücken Sie , um alle Änderungen zu übernehmen.

---

Auf dem Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Funkgeräteinstellungen angezeigt wird.

## Tätigen von Gruppenrufen

Gehen Sie wie folgt vor, um Gruppenrufe auf einem WAVE-Kanal zu tätigen.

1 Wählen Sie den WAVE-Kanal mithilfe des erforderlichen Gruppen-Aliasnamens oder der ID aus.

---

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. In der ersten Textzeile werden das **Gruppenruf**-Symbol und der Alias angezeigt. In der zweiten Textzeile wird der WAVE-Gruppen-Alias angezeigt.

---

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
  - Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.
- 

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

---

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird,

der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

---

Diese Seite wurde absichtlich leer gelassen.

## Capacity Max-Betrieb

Capacity Max ist ein auf einem Steuerungskanal basierendes Bündelfunksystem. Die für Funkgerätebenutzer verfügbaren Funktionen in diesem System werden in diesem Kapitel beschrieben.

## Sendetaste (PTT)

Die **Sendetaste (PTT)** dient zwei grundlegenden Zwecken.

- Während eines Anrufs wird durch Betätigung der **Sendetaste (PTT)** mit anderen am Anruf beteiligten Funkgeräten kommuniziert. Wenn die **Sendetaste (PTT)** gedrückt wird, wird das Mikrofon aktiviert.
- Wird gerade kein Ruf getätigt, wird die **Sendetaste (PTT)** zur Durchführung eines neuen Rufs verwendet .

Halten Sie die **Sendetaste (PTT)** zum Sprechen gedrückt. Lassen Sie die **Sendetaste (PTT)** zum Hören los.

Ist die Freitonfunktion oder der PTT-Mithörton aktiviert, warten Sie auf das Ende des kurzen Hinweistons, bevor Sie sprechen.

Wenn die Funktion „Kanal frei-Anzeige“ auf Ihrem Funkgerät aktiviert ist (wird von Ihrem Händler konfiguriert), hören Sie, sobald die **Sendetaste (PTT)** am Zielfunkgerät

(das Ihren Ruf empfangende Funkgerät) freigegeben wird, einen kurzen Hinweiston, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.

Sie hören einen ununterbrochenen Sendesperrenton, wenn Ihr Ruf unterbrochen wird, z. B. wenn das Funkgerät einen Notruf empfängt. Sie sollten die **Sendetaste (PTT)** loslassen.

## programmierbare Tasten

Abhängig von der Dauer eines Tastendrucks kann Ihr Händler die programmierbaren Tasten als Verknüpfungen mit Funkgerätfunktionen programmieren.

### Kurz drücken

Drücken und schnell wieder loslassen.

### Lang drücken

Für die programmierte Zeit gedrückt halten.

### HINWEIS:

Unter [Notruf auf Seite 460](#) finden Sie weitere Informationen über die vorprogrammierte Tastendruckdauer der **Notruf**-Taste.

## Zuweisbare Funkgerätfunktionen

Den programmierbaren Tasten können von Ihrem Händler oder Systemadministrator folgende Funkgerätfunktionen zugewiesen werden.

### **Audioumgebung**

Mit dieser Option kann der Benutzer eine Umgebung wählen, in der das Funkgerät betrieben wird.

### **Audioprofile**

Ermöglicht dem Benutzer das Auswählen des gewünschten Audio-Profiles.

### **Bluetooth® Audio-Schalter**

Schaltet die Audioausgabe zwischen dem internen Funkgerätlautsprecher und einem externen Bluetooth-fähigen Zubehör um.

### **Bluetooth verbinden**

Sucht nach Bluetooth-Geräten und stellt die Verbindung her.

### **Bluetooth trennen**

Beendet alle vorhandenen Bluetooth-Verbindungen zwischen Funkgerät und Bluetooth-fähigen Geräten.

### **Bluetooth-Erkennung**

Ermöglicht es Ihrem Funkgerät, in den erkennbaren Bluetooth-Modus versetzt werden zu können.

### **Kontakte**

Bietet direkten Zugriff auf die Kontaktliste.

### **Rufhinweis**

Bietet direkten Zugriff auf die Kontaktliste. Sie können dann einen Kontakt auswählen, an den ein Rufhinweis gesendet werden kann.

### **Anrufprotokoll**

Wählt die Rufprotokollliste aus.

### **Emergency**

Je nach Programmierung wird ein Notruf eingeleitet oder abgebrochen.

### **Externer Durchsageverstärker/PA**

Schaltet die Audioausgabe zwischen dem angeschlossenen externen Durchsageverstärker und dem im Funkgerät eingebauten Durchsageverstärkersystem um.

### **Home-Kanal zurücksetzen**

Richtet einen neuen Home-Kanal ein.

### **Home-Kanalerinnerung stummschalten**

Schaltet die Home-Kanalerinnerung stumm.

**Innenbereich**

Schaltet die Innenbereichs-Funktion ein oder aus.

**Intelligentes Audio**

Schaltet Intelligentes Audio ein-/aus.

**Manuell wählen**

Es wird durch Eingabe einer Funkgeräte-ID ein Einzelruf eingeleitet.

**Manuelles Funkstation-Roaming**

Startet die manuelle Standortsuche.

**Mic AGC**

Schaltet die automatische Verstärkungsregelung (AGC) des eingebauten Mikrofons ein bzw. aus.

**Benachrichtigungen**

Für direkten Zugriff auf die Benachrichtigungsliste.

**Eintastenzugang**

Leitet eine vordefinierte Durchsage, einen vordefinierten Einzel-, Telefon- oder Gruppenruf, einen Rufhinweis oder eine Quick Textnachricht direkt ein.

**Optionskartenfunktion**

Schaltet Optionskartenfunktion(en) für Kanäle mit aktivierter Optionskarte ein oder aus.

**Telefon**

Für den direkten Zugriff auf die Telefonkontaktliste.

**Privacy**

Schaltet die Verschlüsselung ein oder aus.

**Durchsageverstärker (PA)**

Schaltet das interne Durchsageverstärkersystem des Funkgeräts ein oder aus.

**Aliasname und ID des Funkgeräts**

Bietet den Aliasnamen und die ID des Funkgeräts

**Fernüberwachung**

Schaltet das Mikrofon eines Zielfunkgeräts ein, ohne dies anzuzeigen.

**Standortinformationen**

Zeigt den aktuellen Standortnamen und die ID für Capacity Max an.

Kanal-Ansage von Standort-Sprachnachrichten für den aktuellen Standort, wenn diese Funktion aktiviert ist.

**Standortsperr**

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

**Telemetriesteuerung**

Steuert den Ausgabe-Pin eines lokalen oder entfernten Funkgeräts.

### Textnachricht

Wählt das Textnachrichtenmenü aus.

### Vibrant-Verbesserung

Schaltet die Funktion „Vibrant-Verb.“ ein oder aus.

### Sprachankündigung ein/aus

Schaltet die Sprachansage ein/aus.

### Sprachansage für Kanal

Sprachansage von Zonen- und Kanalnachrichten für den aktuellen Kanal. Diese Funktion ist nur bei aktivierter Kanal-Ansage verfügbar.

### WLAN

Schaltet WLAN ein oder aus.

### Zonenauswahl

Ermöglicht das Auswählen einer Zone aus einer Zonenliste.

## Zuweisbare Einstellungen oder Einstellungsfunktionen

Die folgenden Einstellungen des Funkgeräts oder Dienstprogrammfunktionen können den programmierbaren Tasten zugewiesen werden.

### Tones/Alerts

Schaltet alle Töne und Warnungen ein und aus.

### Hintergrundbeleuchtung

Schaltet die Hintergrundbeleuchtung des Displays ein bzw. aus.

### Kanal-nach-oben /-unten

Zum Wechseln auf den vorhergehenden bzw. nächsten Kanal, je nach Programmierung.

### Display-Modus

Schaltet den Tag/Nacht-Displaymodus ein bzw. aus.

### Leistung

Schaltet den Sendeleistungspegel zwischen hoch und niedrig um.

## Aufrufen von programmierten Funktionen

Führen Sie die Vorgehensweise zum Aufrufen von programmierten Funktionen auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte Taste. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis zur Menüfunktion, und drücken Sie  zur Auswahl einer Funktion oder zum Aufrufen eines Untermenüs.

- 3 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um zum vorangehenden Bildschirm zurückzukehren.
- Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

Das Funkgerät verlässt ein Menü nach einer bestimmten Zeit automatisch und kehrt zum Startbildschirm zurück.

Die Menü-Navigationstasten stehen auch an einem Tastenfeldmikrofon zur Verfügung. Siehe [Tasten des Tastenfeldmikrofons auf Seite 44](#).

## Statusanzeigen

Dieses Kapitel erläutert die im Funkgerät verwendeten Statusanzeigen und Tonsignale.

## Symbole

Die Flüssigkristallanzeige (LCD) des Funkgeräts zeigt den Funkgerätstatus, Text- und Menüeinträge an.

### Tabelle 2: Anzeigesymbole

Die folgenden Symbole werden in der Statusleiste am oberen Rand des Displays angezeigt. Die Symbole sind von links ausgehend in der Reihenfolge ihres Erscheinens oder ihrer Nutzung angeordnet und sie sind kanalspezifisch.

	<p><b>Bluetooth angeschlossen</b> Die Bluetooth-Funktion ist aktiviert. Das Symbol leuchtet konstant, wenn ein abgesetztes Bluetooth-Gerät angeschlossen ist.</p>
	<p><b>Bluetooth nicht angeschlossen</b> Die Bluetooth-Funktion ist aktiviert, es besteht aber keine Verbindung zu einem Remote-Bluetooth-Gerät.</p>
	<p><b>Notruf</b> Das Funkgerät befindet sich im Notruf-Modus.</p>

*Tabelle wird fortgesetzt...*

	<p><b>GNSS verfügbar</b> Die GNSS-Funktion ist aktiviert. Das Symbol leuchtet, wenn eine Positionsfestlegung verfügbar ist.</p>
	<p><b>GNSS nicht verfügbar</b> Die GNSS-Funktion ist aktiviert, aber es werden keine Satellitendaten empfangen.</p>
	<p><b>Große Datenmengen</b> Das Funkgerät empfängt große Datenmengen, und der Kanal ist belegt.</p>
	<p><b>Die Funktion „Innenbereich“ ist verfügbar<sup>1</sup></b> Der Status für die Funktion „Innenbereich“ ist eingeschaltet und verfügbar.</p>

*Tabelle wird fortgesetzt...*

	<p><b>Die Funktion „Innenbereich“ ist nicht verfügbar<sup>1</sup></b> Der Status für die Funktion „Innenbereich“ ist eingeschaltet aber aufgrund von ausgeschaltetem Bluetooth oder von einem Bakensignal-Scan, der durch Bluetooth ausgesetzt wurde, nicht verfügbar.</p>
	<p><b>Stummschaltmodus</b> Stummschalt-Modus ist aktiviert und Lautsprecher ist stumm geschaltet.</p>
	<p><b>Benachrichtigungen</b> Die Benachrichtigungsliste enthält ein oder mehrere verpasste Ereignisse.</p>
	<p><b>Optionskarte</b> Die Zusatzkarte ist aktiviert. (Nur für Modelle, für die die Nutzung einer Zusatzkarte aktiviert ist)</p>

*Tabelle wird fortgesetzt...*

<sup>1</sup> Nur verfügbar für Modelle mit neuester Software und Hardware.

	<b>Zusatzkarte aus</b> Die Zusatzkarte ist deaktiviert.
	<b>Verzögerungs-Timer bei der Over-The-Air-Programmierung (OTAP)</b> Gibt die verbleibende Zeit bis zum automatischen Neustart des Funkgeräts an.
	<b>Priorität 1</b> Gibt Gesprächsgruppe mit Priorität 1 an.
	<b>Priorität 2</b> Gibt Gesprächsgruppe mit Priorität 2 an.
	<b>Anzeige der Empfangssignalstärke (RSSI)</b> Die Anzahl der Balken zeigt die Signalstärke an. Vier Balken bedeuten, dass das Signal ausgezeichnet ist. Dieses Symbol wird nur während des Empfangs angezeigt.

Tabelle wird fortgesetzt...

	<b>Antwortsperr</b> Antwortsperr ist aktiviert.
	<b>Nur Rufton</b> Rufton-Modus ist aktiviert.
	<b>Sicher</b> Die Verschlüsselungsfunktion ist aktiviert.
	<b>Stiller Klingelton</b> Stiller Klingelton ist aktiviert.
	<b>Standort-Roaming</b> Die Roaming-Funktion ist aktiviert.
	<b>Status</b> Gibt eine neue Statusmeldung an.
	<b>Ton-Deaktivierung</b> Töne sind abgestellt.
	<b>Ungesichert</b> Die Verschlüsselungsfunktion ist deaktiviert.

Tabelle wird fortgesetzt...

	<b>WLAN ausgezeichnet<sup>2</sup></b> WLAN-Signal ist ausgezeichnet.
	<b>WLAN gut<sup>2</sup></b> WLAN-Signal ist gut.
	<b>WLAN durchschnittlich<sup>2</sup></b> WLAN-Signal ist durchschnittlich.
	<b>WLAN schlecht<sup>2</sup></b> WLAN-Signal ist schlecht.
	<b>WLAN nicht verfügbar<sup>2</sup></b> WLAN-Signal ist nicht verfügbar.

**Tabelle 3: Erweiterte Menüsymbole**

Die folgenden Symbole tauchen neben Menüpunkten mit zwei Optionen oder als Anzeige dafür auf, dass es ein Untermenü mit zwei Optionen gibt.

<sup>2</sup> Gilt nur für DM4601e.

	<b>Kontrollkästchen (markiert)</b> Zeigt an, dass die Option ausgewählt wurde.
	<b>Kontrollkästchen (leer)</b> Zeigt an, dass die Option nicht ausgewählt wurde.
	<b>Schwarzes Kästchen</b> Zeigt die für den Menüpunkt mit einem Untermenü gewählte Option an.

**Tabelle 4: Bluetooth-Symbole**

Die folgenden Symbole werden neben den Einträgen in der Liste der verfügbaren Bluetooth-fähigen Geräte angezeigt und geben den Gerätetyp an.

	<b>Bluetooth-Audiogerät</b> Bluetooth-fähiges Audiogerät wie z. B. ein Kopfhörer.
---	--

*Tabelle wird fortgesetzt...*

	<b>Bluetooth-Datengerät</b> Bluetooth-fähiges Datengerät wie z. B. ein Scanner.
	<b>Bluetooth-PTT-Gerät</b> Bluetooth-fähiges PTT-Gerät wie z. B. ein POD-Gerät (nur PTT/ Sendetaste).

**Tabelle 5: Rufsymbole**

Die folgenden Symbole werden während eines Anrufs im Display angezeigt. Diese Symbole erscheinen auch in der Kontaktliste zur Anzeige des Alias- oder ID-Typs.

	<b>Bluetooth-PC-Ruf</b> Ein Bluetooth-PC-Ruf wird gerade getätigt.  In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Bluetooth-PC- Rufs hin.
	<b>Zentralruf</b> Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen

*Tabelle wird fortgesetzt...*

Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.	 <b>Gruppenruf/Sammelruf</b> Ein Gruppenruf oder Sammelruf wird gerade getätigt.  In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	<b>Einzelruf</b> Ein Einzelruf wird gerade getätigt.  In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.
	<b>Telefonruf als Gruppen-/Sammelruf</b> Ein Telefonanruf als Gruppenruf oder Sammelruf wird gerade getätigt.  In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.

*Tabelle wird fortgesetzt...*

	<p><b>Telefonanruf als Einzelruf</b>                  Ein Anruf wird gerade als Einzelruf getätigt.                   In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Telefons hin.</p>
---	--

**Tabelle 6: Job-Ticket-Symbole**

Die folgenden Symbole werden jeweils kurz im Ordner „Jobtickets“ auf dem Display angezeigt.

	<p><b>Alle Jobs</b>                  Zeigt alle aufgelisteten Jobs an.</p>
	<p><b>Neue Jobs</b>                  Weist auf neue Jobs hin.</p>
	<p><b>Wird ausgeführt</b>                  Jobs werden gesendet. Dies wird vor der Anzeige von „Fehler beim Senden“ oder „Erfolgreich gesendet“ für Jobtickets angezeigt.</p>

*Tabelle wird fortgesetzt...*

	<p><b>Fehler beim Senden</b>                  Jobs können nicht gesendet werden.</p>
	<p><b>Erfolgreich gesendet</b>                  Jobs wurden erfolgreich gesendet.</p>
	<p><b>Priorität 1</b>                  Zeigt die Prioritätsstufe 1 für Jobs an.</p>
	<p><b>Priorität 2</b>                  Zeigt die Prioritätsstufe 2 für Jobs an.</p>
	<p><b>Priorität 3</b>                  Zeigt die Prioritätsstufe 3 für Jobs an.</p>

**Tabelle 7: Kurzhinweissymbole**

Die folgenden Symbole tauchen jeweils kurz im Display auf, nachdem eine Aktion zur Durchführung einer Aufgabe ausgeführt wurde.

	<p><b>Übertragung erfolglos (negativ)</b>                  Gescheiterte Durchführung der Aktion.</p>
---	--

*Tabelle wird fortgesetzt...*

	<b>Übertragung erfolgreich (positiv)</b> Erfolgreiche Durchführung der Aktion.
	<b>Übertragung läuft (Zwischenstand)</b> Beim Senden. Dies wird vor der Anzeige der erfolgreichen bzw. gescheiterten Übertragung angezeigt.

**Tabelle 8: Symbole für gesendete Objekte**

Die folgenden Symbole werden in der oberen rechten Ecke des Displays im Ordner „Ausgang“ angezeigt:

 oder 	<b>Wird ausgeführt</b> Die Textnachricht an den Funkgeräte-Alias oder die ID eines Funkgeräts wurde noch nicht übertragen, da noch auf eine Quittierung gewartet wird.  Die Textnachricht an einen Gruppen-Aliasname oder an eine Gruppen-ID wurde noch nicht übertragen.
--	--

*Tabelle wird fortgesetzt...*

 oder 	<b>Einzel- oder Gruppennachricht gelesen</b> Die Textnachricht wurde gelesen.
 oder 	<b>Einzel- oder Gruppennachricht ungelesen</b> Die Textnachricht wurde nicht gelesen.
 oder 	<b>Fehler beim Senden</b> Die Textnachricht kann nicht gesendet werden.
 oder 	<b>Erfolgreich gesendet</b> Die Nachricht wurde erfolgreich gesendet.

## LED-Anzeige

Die LED-Anzeige zeigt den Betriebsstatus Ihres Funkgeräts an.

### **Blinkt rot**

Selbsttest beim Einschalten des Funkgeräts ist fehlgeschlagen.

Das Funkgerät empfängt einen Notruf.

Das Funkgerät sendet bei niedrigem Akkustand.

Das Funkgerät befindet sich außerhalb der Reichweite, wenn das Auto-Range Transponder-System konfiguriert wurde.

Stummschalt-Modus ist aktiviert.

### **Grünes Dauerlicht**

Das Funkgerät wird gerade eingeschaltet.

Funkgerät sendet Daten.

Das Funkgerät sendet einen Rufhinweis oder einen Notruf.

### **Blinkt grün**

Das Funkgerät empfängt einen Ruf oder Daten.

Das Funkgerät erkennt Funkaktivität oder fragt Übertragungen mittels Over-The-Air Programmierung ab.

Das Funkgerät erkennt Funkaktivität.

### **HINWEIS:**

Diese Aktivität kann sich je nach Art des digitalen Protokolls auf den programmierten Kanal des Funkgeräts auswirken.

### **Doppeltes grünes Blinken**

Das Funkgerät empfängt einen Ruf oder Daten mit aktivierter Verschlüsselung.

### **Gelbes Dauerlicht**

Das Funkgerät befindet sich im erkennbaren Bluetooth-Modus.

### **Blinkt gelb**

Das Funkgerät muss noch auf einen Rufhinweis antworten.

### **Doppeltes gelbes Blinken**

Auf dem Funkgerät ist automatisches Roaming aktiviert.

Das Funkgerät sucht aktiv nach einem neuen Standort.

Das Funkgerät muss noch auf einen Gruppenruf-Hinweis antworten.

Das Funkgerät ist gesperrt.

## Tones

Die folgenden Symbole werden über den Lautsprecher des Funkgeräts ausgegeben.

Hoher Ton

Tiefer Ton

## Töne

Hinweistöne sind hörbare Anzeigen zum Funkgerätestatus oder der Reaktion des Funkgeräts auf empfangene Daten.

### Dauerton

Gleichmäßiger Ton. Wird ununterbrochen bis zum Beenden abgespielt.

### Periodischer Ton

Wird periodisch je nach der über das Funkgerät konfigurierten Tonlänge abgespielt. Der Ton beginnt, stoppt und wiederholt sich.

### Wiederholter Ton

Ein einzelner Ton, der sich wiederholt, bis der Benutzer ihn abschaltet.

### Kurzton

Ertönt einmal für eine für das Funkgerät festgelegte Dauer.

## Hinweistöne

Hinweistöne liefern einen akustischen Hinweis auf den Status, nachdem eine Aktion zum Durchführen einer Aufgabe ausgeführt wurde.

Positiver Hinweiston

Negativer Hinweiston

## Registrierung

Es gibt eine Reihe von Nachrichten zur Registrierung, die Sie möglicherweise empfangen.

### Registrierung

In der Regel wird die Registrierung beim Hochfahren, Wechseln der Gesprächsgruppe oder beim Standort-Roaming an das System gesendet. Wenn die Registrierung eines Funkgerätes an einem Standort fehlschlägt, versucht das Funkgerät automatisch, per Roaming an einen anderen Standort zu wechseln. Das Funkgerät entfernt vorübergehend den Standort, an der der Registrierungsversuch erfolgte, aus der Roaming-Liste.

Die Anzeige bedeutet, dass das Funkgerät damit beschäftigt ist, einen Standort für das Roaming zu suchen, oder das Funkgerät hat erfolgreich einen Standort gefunden, wartet jedoch noch auf eine Reaktion auf die Registrierungsnachrichten vom Funkgerät.

Wenn auf dem Funkgerät **Registrierung** angezeigt wird, erklingt ein Hinweiston und die gelbe LED-Anzeige leuchtet zweimal auf, um eine Standortsuche anzuzeigen.

Wenn sich die Anzeigen nicht ändern, muss der Benutzer den Standort wechseln oder per Roaming an einen anderen Standort wechseln.

### Außer Reichweite

Bei einem Funkgerät wird von „Außer Reichweite“ gesprochen, wenn das Funkgerät nicht in der Lage ist, ein

Signal von einem System oder einem aktuellen Standort zu erkennen. In der Regel bedeutet diese Anzeige, dass sich das Funkgerät außerhalb des geografischen Funkfrequenzbereichs befindet.

Wenn **Außer Reichweite** auf dem Funkgerät angezeigt wird, erklingt ein wiederholter Hinweiston und die rote LED-Anzeige leuchtet auf.

Wenden Sie sich an Ihren Händler oder Systemadministrator, wenn das Funkgerät weiterhin Meldungen empfängt, dass es sich außer Reichweite befindet, obwohl es sich in einem Gebiet mit guter Funkfrequenzabdeckung befindet.

### Gesprächsgruppenzugehörigkeit fehlgeschlagen

Ein Funkgerät versucht, eine Zugehörigkeit zu einer Gesprächsgruppe aufzubauen, die in den Kanälen oder in der UKP (Unified Knob Position) während der Registrierung festgelegt wurde.

Ein Funkgerät mit dem Status einer fehlgeschlagenen Zugehörigkeit ist nicht in der Lage, Rufe von der Gesprächsgruppe zu tätigen oder zu empfangen, mit der das Funkgerät versucht, eine Zugehörigkeit aufzubauen.

Wenn ein Funkgerät keine Zugehörigkeit zu einer Gesprächsgruppe aufbauen kann, wird UKP Alias auf dem Startbildschirm mit einem beleuchteten Hintergrund angezeigt.

Wenden Sie sich an Ihren Händler oder Systemadministrator, wenn auf dem Funkgerät Anzeigen zu fehlerhaften Zugehörigkeiten erfolgen.

## Registrierung verweigert

Anzeigen zu einer verweigten Registrierung werden empfangen, wenn die Registrierung mit dem System nicht akzeptiert wurde.

Das Funkgerät zeigt dem Funkgerätbenutzer den genauen Grund für die abgelehnte Registrierung nicht an. Normalerweise wird eine Registrierung verweigert, wenn der Systembetreiber den Zugriff des Funkgeräts auf das System deaktiviert hat.

Wenn die Registrierung eines Funkgeräts verweigert wird, wird Registrierung verweigert auf dem Funkgerät angezeigt, und die gelbe LED-Anzeige leuchtet doppelt auf, um eine Standortsuche anzuzeigen.

## Zonen- und Kanalwahl

In diesem Kapitel wird die Vorgehensweise zum Auswählen einer Zone oder eines Kanals auf Ihrem Funkgerät beschrieben.

Das Funkgerät kann mit max. 250 Capacity Max-Zonen mit max. 160 Kanälen pro Zone programmiert werden. Jede Capacity Max-Zone besteht aus max. 16 zuweisbaren Positionen.

## Auswählen von Zonen

Führen Sie die Vorgehensweise zum Auswählen der gewünschten Zone auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte Taste **Zonenauswahl**. Lesen Sie weiter unter [Schritt 3](#).
    - Drücken Sie  , um das Menü aufzurufen.
-

- 2 Drücken Sie  oder  bis Zone. Drücken Sie  , um die Option auszuwählen.

Auf dem Display werden ✓ und die aktuelle Zone angezeigt.

---

- 3 Drücken Sie  oder  bis zur gewünschten Zone. Drücken Sie  , um die Option auszuwählen.

Das Display zeigt kurz <Zone> gewählt an und wechselt dann zum Bildschirm der gewählten Zone.

---

## Auswählen von Zonen mithilfe der Aliassuche

Führen Sie die Vorgehensweise zum Auswählen der gewünschten Zone mithilfe der Aliassuche auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Zone. Drücken Sie  , um die Option auszuwählen.

Auf dem Display werden ✓ und die aktuelle Zone angezeigt.

---

- 3 Geben Sie den ersten Buchstaben des gewünschten Aliasnamens ein.  
Im Display wird ein blinkender Cursor angezeigt.
- 

- 4 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein.

Bei der Aliassuche muss die Groß- und Kleinschreibung nicht beachtet werden. Wenn zwei oder mehr Einträge den gleichen Namen haben, zeigt das Display den ersten Eintrag in der Liste an.

Die erste Textzeile zeigt die von Ihnen eingegebenen Zeichen an. Die nachfolgenden Textzeilen zeigen die kommenden Suchergebnisse an.

---

- 5 Drücken Sie  , um die Option auszuwählen.

Das Display zeigt kurz <Zone> gewählt an und wechselt dann zum Bildschirm der gewählten Zone.

## Auswählen eines Ruftyps

Verwenden Sie den Kanalwahlschalter, um einen Ruftyp auszuwählen. Hierbei kann es sich um einen Gruppenruf, Ansageanruf, Rundumruf oder Einzelruf handeln, je nachdem, wie Ihr Funkgerät konfiguriert wurde. Wenn Sie den Drehknopf für die Kanalwahl auf eine andere Position (mit einem zugewiesenen Ruftyp) stellen, wird das Funkgerät erneut beim Capacity Max-Standort registriert. Das Funkgerät wird mit der Gesprächsgruppen-ID registriert, die der neuen Position des Kanalwahlschalter-Ruftyps zugewiesen wurde.

Ihr Funkgerät funktioniert nicht, wenn ein nicht konfigurierter Kanal ausgewählt wurde. Verwenden Sie stattdessen den Kanalwahlschalter zur Auswahl eines konfigurierten Kanals.

Nachdem die gewünschte Zone angezeigt wird (bei mehreren Zonen in Ihrem Funkgerät), drehen Sie

den programmierten Kanalwahlschalter, um den Ruftyp auszuwählen.

## Auswahl eines Standorts

Ein Standort bietet Abdeckung für einen bestimmten Bereich. In einem Mehrfachstandort-Netzwerk sucht das Capacity Plus-Funkgerät automatisch nach einem neuen Standort, wenn der Signalpegel des aktuellen Standorts auf ein inakzeptables Niveau absinkt.

Das Capacity Max-System kann bis zu 250 Standorte unterstützen.

## Roaming-Anforderung

Eine Roaming-Anforderung weist das Funkgerät an, einen neuen Standort zu suchen, selbst wenn das Signal des aktuellen Standorts akzeptabel ist.

Wenn keine Standorte verfügbar sind:

- wird im Display *Suche* angezeigt und die Liste der Standorte weiter durchgegangen.
- kehrt das Gerät zum vorherigen Standort zurück, falls dieser noch zur Verfügung steht.

**HINWEIS:**

Diese Funktion wird von Ihrem Händler konfiguriert.

Drücken Sie die programmierte Taste **Manuelles Standort-Roaming**.

Sie hören einen Ton, der darauf hinweist, dass das Funkgerät zu einem neuen Standort wechselt. Im Display wird `Site-ID` angezeigt.

---

## Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperre**.

Wenn die **Standortsperr**e eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperr**e ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

---

## Standorteinschränkung

Ihr Systemadministrator für Funkgeräte kann im Capacity Max-System entscheiden, welche Netzwerkstandorte Ihr Funkgerät verwenden darf und welche nicht.

Das Funkgerät muss nicht neu programmiert werden, um die Liste der erlaubten und nicht erlaubten Standorte zu ändern. Wenn Ihr Funkgerät versucht, sich bei einem nicht erlaubten Standort anzumelden, erhält das Funkgerät eine Meldung darüber, dass der Standort verweigert wurde. Das Funkgerät sucht dann nach einem anderen Netzwerkstandort.

Wenn dem Funkgerät Standorte verweigert werden, zeigt Ihr Funkgerät `Registrierung verweigert an`, und die gelbe LED leuchtet zweimal auf, um eine Standortsuche anzuzeigen.

## Lokaler Bündelfunk

Ein Standort muss mit einem Bündelfunk-Controller kommunizieren können, um als Systembündelfunk berücksichtigt werden zu können.

Wenn der Standort nicht mit dem Bündelfunk-Controller im System kommunizieren kann, wird das Funkgerät in den Modus „Bündelfunk am Standort“ versetzt. Im Modus „Lokaler Bündelfunk“ gibt das Funkgerät eine periodische akustische und visuelle Anzeige an den Benutzer aus, um ihn auf die eingeschränkte Funktionsfähigkeit hinzuweisen.

Im Modus „Bündelfunk am Standort“ zeigt das Funkgerät Standort-Bündelf. und gibt wiederholende Töne aus.

Die Funkgeräte im Modus „Bündelfunk am Standort“ sind für Gruppen- und Einzelsprachrufe sowie für das Versenden von Textnachrichten an andere Funkgeräte innerhalb desselben Standorts verfügbar. Sprachkonsolen, Aufzeichnungsgeräte, Telefon-Gateways und Datenanwendungen können nicht mit den Funkgeräten am Standort kommunizieren.

Ein Funkgerät im Modus „Bündelfunk am Standort“, das an Rufen innerhalb mehrerer Standorte beteiligt ist, ist nur zur Kommunikation mit anderen Funkgeräten innerhalb desselben Standorts in der Lage. Die Kommunikation von und zu anderen Standorten geht verloren.

[Feedback senden](#)

### HINWEIS:

Wenn mehrere Standorte den aktuellen Standort des Funkgeräts abdecken und einer der Standorte in den Modus „Lokaler Bündelfunk“ wechselt, wechselt das Funkgerät per Roaming zu einem anderen Standort in Reichweite.

## Rufe

In diesem Kapitel wird erklärt, wie Rufe empfangen, beantwortet, getätigt oder abgebrochen werden.

Sie können einen Funkgerät-Alias oder eine Funkgerät-ID bzw. einen Gruppen-Alias oder eine Gruppen-ID wählen, nachdem Sie einen Kanal mithilfe einer der folgenden Funktionen ausgewählt haben:

### Alias-Suche

Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

### Kontaktliste

Diese Methode bietet direkten Zugriff auf die Kontaktliste.

### Manuell wählen (über „Kontakte“)

Diese Methode wird für Einzelrufe und Telefonrufe nur mit einem Tastenfeldmikrofon verwendet.

## Programmierte Zifferntasten

Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

### HINWEIS:

Einer Zifferntaste kann jeweils nur ein Aliasname bzw. eine ID zugewiesen werden, Sie können aber einem Aliasnamen bzw. einer ID mehr als eine Zifferntaste zuweisen. Es können alle Zifferntasten auf einem Tastenfeldmikrofon zugewiesen werden. Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Programmierte Schnellwahltaste

Diese Methode wird nur für Gruppen-, Einzel- und Telefonrufe verwendet.

Sie können einer **Eintastenzugang**-Taste durch kurzes oder langes Drücken einer programmierbaren Taste nur eine ID zuweisen. Am Funkgerät können mehrere **Schnellwahltasten** programmiert sein.

## Programmierbare Taste

Diese Methode wird nur für Telefonrufe verwendet.

## Lautstärke-/Kanalwahlschalter

Diese Methode wählt manuell einen Teilnehmer-Alias oder -ID oder einen Gruppen-Alias oder -ID aus.

Die LED leuchtet ununterbrochen grün, wenn das Funkgerät sendet, und blinkt grün, wenn das Funkgerät empfängt.

### HINWEIS:

Während einer Übertragung leuchtet die Funkgerät-LED grün. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie doppelt grün.

Zum Entschlüsseln eines verschlüsselten Rufs muss Ihr Funkgerät denselben Privacy-Key oder denselben Schlüsselwert und dieselbe Schlüssel-ID aufweisen (von Ihrem Händler programmiert) wie das sendende Funkgerät (von dem Sie den Ruf empfangen).

Weitere Informationen finden Sie unter [Privacy auf Seite 503](#).

## Gruppenanrufe

Ihr Funkgerät muss als Teil einer Gruppe konfiguriert sein, um einen Ruf von einer Gruppe zu empfangen oder an eine Gruppe von Benutzern zu senden.

## Tätigen von Gruppenrufen

Ein Anruf an eine Gruppe kann nur durchgeführt werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist. Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie einen Kanal mit dem aktiven Gruppen-Alias oder der aktiven Gruppen-ID. Siehe [Auswählen eines Ruftyps auf Seite 69](#).
- Drücken Sie die vorprogrammierte **Schnellwahltaste**.

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. In der ersten Textzeile wird das **Gruppenruf**-Symbol angezeigt.

3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

Der Rufinitiator kann die programmierte Taste  drücken, um einen Gruppenruf zu beenden.

## Tätigen von Gruppenrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.  
Die grüne LED leuchtet.  
Die zweite Zeile zeigt den Aliasnamen oder die ID des Funkgeräts an. Die zweite Zeile zeigt Gruppenruf und das **Gruppenrufsymbol** an.

---

- 5 Führen Sie einen der folgenden Schritte aus:
    - Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
    - Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.
- 

- 6 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn ein beliebiger Benutzer aus der Gruppe antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

---

- 7 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

Der Rufinitiator kann  drücken, um den Gruppenruf zu beenden.

Ein kurzer Hinweiston erklingt. Im Display wird Ruf beendet angezeigt.

## Tätigen von Gruppenrufen über die programmierbare Zifferntaste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen über die programmierbare Zifferntaste auf Ihrem Funkgerät durch.

- 1 Halten Sie die programmierbare Zifferntaste bis zum vordefinierten Aliasnamen oder zur vordefinierten ID gedrückt, wenn Sie sich auf dem Startbildschirm befinden.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweiston wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn ein beliebiger Benutzer aus der Gruppe antwortet.

- 4 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

Der Rufinitiator kann  drücken, um den Gruppenruf zu beenden.

Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Tätigen von Gruppenrufen mithilfe der Aliassuche

Zum Auffinden des Aliasnamens des gewünschten Funkgeräts kann auch eine Alias- oder alphanumerische Suche durchgeführt werden. Diese Funktion ist nur verfügbar, während sich das Funkgerät im Menü „Kontakte“ befindet. Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen mithilfe der Aliassuche durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie  , um die Option auszuwählen.  
Das Display zeigt die Einträge in alphabetischer Reihenfolge an.

---

3 Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID. In der ersten Zeile des Displays wird `Telefonnummer:` angezeigt: In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie eine Telefonnummer über die Tastatur ein.

---

4 Drücken Sie  , um die Option auszuwählen. Wenn der ausgewählte Eintrag leer ist, erklingt ein negativer Hinweis, und im Display wird `Telefonruf ungültige Nr.` angezeigt.

---

5 Drücken Sie  oder  bis „Tel. anrufen“ und anschließend Drücken Sie  , um die Option auszuwählen.. Wenn kein Zugangscode in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays `Zugangscode:` angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Zugangscode ein, und drücken Sie die Taste  , um fortzufahren. Wenn die Schritte zum Erfolg geführt haben, ertönt der DTMF-Ton. Der Wählton des Telefonbenutzers erklingt. In der ersten Zeile des Displays werden der

Funkgeräte-Alias oder die Funkgeräte-ID sowie das RSSI-Symbol angezeigt. In der zweiten Zeile des Displays wird `Telefonruf` und das Anruf-Symbol angezeigt. Bei nicht erfolgreicher Durchführung erklingt ein Signalton, und im Display wird `Telefonruf erfolglos` angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

---

6 Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los. Das **RSSI**-Symbol wird während der Übertragung ausgeblendet.

---

7 Um zusätzliche durch den Anruf erforderlich gemachte Ziffern einzugeben, gehen Sie wie folgt vor:

- Drücken Sie eine beliebige Taste der Tastatur, um die Eingabe der zusätzlichen Ziffern zu beginnen. In der ersten Zeile des Displays wird `Zusätz. Stellen:` angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die zusätzlichen Stellen

ein, und drücken Sie die Taste , um fortzufahren. Der DTMF-Ton erklingt, und das Funkgerät wechselt zum vorherigen Bildschirm.

- Drücken Sie die **Schnellwahltaste**. Der DTMF-Ton erklingt. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweis.

- 
- 8 Drücken Sie  zum Beenden des Gesprächs. Wenn kein Schlussruf in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays `Schlussruf:` angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Sperrcode ein, und drücken Sie , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird `Telefonruf wird beendet` angezeigt. Bei erfolgreicher Durchführung erklingt ein Signalton, und im Display wird `Telefonruf beendet` angezeigt. Kehrt das Funkgerät zum Telefonruf-Bildschirm zurück. Bei nicht erfolgreicher Durchführung kehrt das Funkgerät zum Anruf-Bildschirm zurück. Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken,

erklingt ein Hinweiston, und im Display wird zum Anrufen OK drücken angezeigt. Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird, und im Display wird Telefonruf beendet angezeigt. Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

- 9 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Im Display wird Ruf beendet angezeigt.

Der Rufinitiator kann  drücken, um den Gruppenruf zu beenden.

### HINWEIS:

Drücken Sie während des Zugriffs auf den Kanal

, um den Rufversuch abubrechen oder die Aliassuche zu beenden; es wird dann ein Hinweiston ausgegeben. Drücken Sie die Taste

 oder , um die Aliassuche zu verlassen.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden. Während des Zugriffs auf den Kanal und der Übertragung des Zugangscodes bzw. Sperrcodes oder der zusätzlichen Zeichen reagiert Ihr Funkgerät nur auf die An/Aus-Taste, den Lautstärkeregel und den Kanalwahlschalter. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

## Antworten auf Gruppenrufe

Führen Sie die Vorgehensweise zum Antworten auf Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Gruppenruf empfangen:

- Die grüne LED blinkt.

- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

#### 1 Führen Sie einen der folgenden Schritte aus:

- Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.
- Wenn die Sprachunterbrechungsfunktion aktiviert ist, drücken Sie die **Sendetaste (PTT)**, um den Ton des sendenden Funkgeräts zu unterbrechen

und den Kanal freizumachen, damit Sie antworten können.

Die grüne LED leuchtet.

---

#### 2 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

---

#### 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

---

## Ansageanruf

Ein Ansageanruf ist ein Einweg-Sprachanruf von einem Benutzer an die gesamte Gesprächsgruppe.

Diese Funktion ermöglicht es nur dem initialisierenden Benutzer, Übertragungen an die Gesprächsgruppe zu initiieren, während die Empfänger des Anrufs nicht antworten können.

Der Ansage-Initiator kann den Ansageanruf auch beenden. Anrufe von einer Benutzergruppe können nur empfangen werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist. Dies gilt auch für Anrufe an eine Benutzergruppe.

### Tätigen von Ansageanrufen

Führen Sie die Vorgehensweise zum Tätigen von Ansageanrufen auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Wählen Sie einen Kanal mit dem aktiven Gruppen-Alias oder der aktiven Gruppen-ID. Siehe [Auswählen eines Ruftyps auf Seite 69](#).
  - Drücken Sie die vorprogrammierte **Schnellwahltaste**.

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Das Display zeigt das **Gruppenruf**-Symbol und den Alias an.

- 3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Der Rufinitiator kann  drücken, um den Ansageanruf zu beenden.

### Tätigen von Ansageanrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Ansageanrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  **OK** , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  **OK** , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED blinkt.

Die zweite Zeile zeigt den Aliasnamen oder die ID des Funkgeräts an. Die zweite Zeile zeigt Gruppenruf und das **Gruppenrufsymbol** an.

---

- 5 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Der Rufinitiator kann  drücken, um den Anruf zu beenden.

---

## Tätigen von Anrufen mithilfe der programmierbaren Zifferntaste

Führen Sie die Vorgehensweise zum Tätigen von Anrufen über die programmierbare Zifferntaste auf Ihrem Funkgerät durch.

- 1 Halten Sie die programmierbare Zifferntaste bis zum vordefinierten Aliasnamen oder zur vordefinierten ID gedrückt, wenn Sie sich auf dem Startbildschirm befinden.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweis wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

---

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke

angezeigt. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.

### 3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Der Rufinitiator kann  drücken, um den Ansageanruf zu beenden.

- In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

#### HINWEIS:

Empfangsbenutzer sind nicht in der Lage, während eines Ansagerufs zu antworten. Das Display zeigt Antworten untersagt an. Der Sendesperrton ertönt vorübergehend, wenn die **Sendetaste (PTT)** während des Ansagerufs gedrückt wird.

## Empfangen von Ansageanrufen

Führen Sie die Vorgehensweise zum Empfangen eines Ansagerufs auf Ihrem Funkgerät durch.

Wenn Sie einen Ansageruf empfangen:

- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.

## Einzelruf

Ein Einzelruf ist ein Anruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät.

Es gibt zwei Möglichkeiten, einen Einzelruf einzurichten.

- Der erste Ruftyp nennt sich OACSU (Off Air Call Set-Up). OACSU richtet den Ruf nach der Durchführung einer Verfügbarkeitsprüfung ein und schließt den Ruf automatisch ab.
- Der zweite Ruftyp nennt sich FOACSU (Full Off Air Call Set-Up). FOACSU richtet den Ruf ebenso nach Durchführung einer Verfügbarkeitsprüfung ein.

FOACSU-Rufe erfordern jedoch eine Benutzerbestätigung, um den Ruf abzuschließen, und ermöglichen dem Benutzer, den Ruf entweder anzunehmen oder abzulehnen.

Der Ruftyp wird vom Systemadministrator konfiguriert.

#### HINWEIS:

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem

Sie  drücken.

## Tätigen von Einzelrufen

Ihr Funkgerät muss konfiguriert werden, um einen Einzelruf initiieren zu können. Wenn diese Funktion nicht aktiviert ist und Sie versuchen, einen Ruf einzuleiten, erklingt ein negativer Hinweis. Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch. Wenn das gewünschte Funkgerät nicht verfügbar ist, wird ein kurzer Hinweis ausgegeben, und im Display wird **Gerufener nicht verfügbar** angezeigt.

1 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie einen Kanal mithilfe des aktiven Funkgerät-Alias oder der aktiven Funkgerät-ID. Siehe [Auswählen eines Ruftyps auf Seite 69](#).
- Drücken Sie die vorprogrammierte **Schnellwahltaste**.

---

2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display wird das Symbol **Einzelruf**, der Funkgeräte-Aliasnamen und der Anrufstatus angezeigt.

---

3 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

---

4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet.

---

5 Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Sie hören einen kurzen Ton. Im Display wird **Ruf beendet** angezeigt.

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem

Sie  drücken.

---

## Tätigen von Einzelrufen über die programmierbare Zifferntaste

Führen Sie die Vorgehensweise für das Tätigen von Einzelrufen auf Ihrem Funkgerät über die programmierbare Zifferntaste durch.

- 1 Halten Sie die programmierbare Zifferntaste bis zum vordefinierten Aliasnamen oder zur vordefinierten ID gedrückt, wenn Sie sich auf dem Startbildschirm befinden.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweis wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

---

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display wird das **Einzelruf**-Symbol in der oberen rechten Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.

---

- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

---

- 4 Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Sie hören einen kurzen Ton. Im Display wird **Ruf beendet** angezeigt.

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem

Sie  drücken.

---

Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Tätigen von Einzelrufen mithilfe der Aliassuche

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis **Kontakte**.  
Drücken Sie  , um die Option auszuwählen.  
Das Display zeigt die Einträge in alphabetischer Reihenfolge an.

---

3 Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID. In der ersten Zeile des Displays wird **Telefonnummer:** angezeigt: In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie eine Telefonnummer über die Tastatur ein.

---

4 Drücken Sie  , um die Option auszuwählen. Wenn der ausgewählte Eintrag leer ist, erklingt ein negativer Hinweis, und im Display wird **Telefonruf ungültige Nr.** angezeigt.

---

5 Drücken Sie  oder  bis **Tel. anrufen** und anschließend Drücken Sie  , um die Option auszuwählen.. Wenn keine Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Zugangsnummer:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die Zugangsnummer ein, und drücken Sie die Schaltfläche  , um fortzufahren. Wenn die Schritte zum Erfolg geführt haben, ertönt der DTMF-Ton. Der Wählton des Telefonbenutzers erklingt. In der ersten Zeile des Displays werden der Funkgerät-Alias oder die Funkgeräte-ID sowie das **RSSI**-Symbol angezeigt. In der zweiten Zeile des Displays werden **Telefonruf** und das Symbol **Telefonruf** angezeigt. Bei nicht erfolgreicher Durchführung erklingt ein Signalton, und im Display wird **Telefonruf erfolglos** angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn

die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

---

6 Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los. Das **RSSI**-Symbol wird während der Übertragung ausgeblendet.

---

7 Um zusätzliche durch den Anruf erforderlich gemachte Ziffern einzugeben, gehen Sie wie folgt vor:

- Drücken Sie eine beliebige Taste der Tastatur, um die Eingabe der zusätzlichen Ziffern zu beginnen. In der ersten Zeile des Displays wird **Zusätz. Stellen:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die zusätzlichen Stellen

ein, und drücken Sie die Schaltfläche  , um fortzufahren. Der DTMF-Ton erklingt, und das Funkgerät wechselt zum vorherigen Bildschirm.

- Drücken Sie die **Schnellwahltaste**. Der DTMF-Ton erklingt. Wenn der Eintrag für die

**Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

---

8 Drücken Sie  zum Beenden des Gesprächs. Wenn kein Schlussruf in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Schlussruf:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Schlussruf ein, und drücken Sie  , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird **Telefonruf wird beendet** angezeigt. Bei erfolgreicher Durchführung: Ein Signalton erklingt, und das Display zeigt **Telefonruf beendet** an. Kehrt das Funkgerät zum Telefonruf-Bildschirm zurück. Bei nicht erfolgreicher Durchführung kehrt das Funkgerät zum Anruf-Bildschirm zurück. Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweiston, und im Display wird **Zum Anrufen OK drücken** angezeigt. Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird **Telefonruf beendet** angezeigt. Wenn der Anruf während der Eingabe der vom Anruf geforderten

zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

- 9 Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Sie hören einen kurzen Ton. Im Display wird **Ruf beendet** angezeigt.

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem

Sie  drücken.

#### HINWEIS:

Drücken Sie während des Zugriffs auf den Kanal

, um den Anrufversuch abzubrechen oder die Aliassuche zu beenden; es wird dann ein Hinweiston ausgegeben. Drücken Sie die Taste

 oder , um die Aliassuche zu verlassen.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

## Durchführen eines Einzelrufs mit einer Schnellwahltaste

Die Schnellwahlfunktion ermöglicht es Ihnen, einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen. Diese Funktion kann durch kurzes oder langes Drücken einer programmierbaren Taste zugewiesen werden.

Sie können einem Eintastenzugang nur einen Aliasnamen oder eine ID zuweisen. Am Funkgerät können mehrere Schnellwahltasten konfiguriert werden.

- 1 Drücken Sie die programmierte **Schnellwahltaste**, um einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen.
- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.  
Die LED leuchtet dauerhaft grün.  
Im Display wird der Einzelruf-Alias oder die Einzelruf-ID angezeigt.
- 3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

- 4** Lassen Sie die **Sendetaste (PTT)** zum Hören los.  
Wenn das Zielfunkgerät antwortet, blinkt die LED grün.  
Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.  
Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem Sie  drücken.
- 

## Tätigen von Einzelrufen durch manuelles Wählen

Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch manuelles Wählen durch.

- 1** Drücken Sie  , um das Menü aufzurufen.
- 
- 2** Drücken Sie  oder  bis **Kontakte**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3** Drücken Sie  oder  bis **Man. Wählen**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 4** Drücken Sie  oder  bis **Funkgerät-Nr.**  
Drücken Sie  , um die Option auszuwählen.
- 

- 5** Führen Sie einen der folgenden Schritte aus:
- Geben Sie die Funkgerät-ID ein, und drücken Sie  , um fortzufahren.
  - Bearbeiten Sie die zuvor gewählte Funkgerät-ID, und drücken Sie  , um fortzufahren.
- 

- 6** Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.  
Die grüne LED leuchtet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.
- 

- 7** Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
-

- 8 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname oder die ID des sendenden Benutzers angezeigt.

- 9 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Im Display wird Ruf beendet angezeigt.

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem

Sie  drücken.

## Einzelrufe empfangen

Wenn Sie Einzelrufe empfangen, die als Off Air Call Set-Up (OACSU) konfiguriert sind:

- Die grüne LED blinkt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

### HINWEIS:

Anhängig von der Konfiguration Ihres Funkgeräts (OACSU oder FOACSU) kann die Antwort auf Einzelrufe eine Benutzerbestätigung erfordern oder nicht.

Bei der OACSU-Konfiguration wird Ihr Funkgerät stummgeschaltet und der Ruf automatisch verbunden.

## Einzelrufe annehmen

Wenn Sie als FOACSU konfigurierte Einzelrufe (Full Off Air Call Set-Up) erhalten:

- Die grüne LED blinkt.
- 1 Führen Sie einen der folgenden Schritte aus, um einen als FOACSU konfigurierten Einzelruf anzunehmen:
    - Drücken Sie  oder  bis Annahmen und , um einen Einzelruf zu beantworten.
    - Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.

Die grüne LED leuchtet.

- 
- 2 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

- 
- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweis ertönt. Im Display wird Ruf beendet angezeigt.

### HINWEIS:

Sowohl Anrufinitiatoren als auch Anrufempfänger können einen laufenden Einzelruf beenden, indem Sie  drücken.

---

## Einzelrufe ablehnen

Wenn Sie als FOACSU konfigurierte Einzelrufe (Full Off Air Call Set-Up) erhalten:

- Die grüne LED blinkt.

Führen Sie einen der folgenden Schritte aus, um einen als FOACSU konfigurierten Einzelruf abzulehnen:

- Drücken Sie  oder  bis Ablehnen und , um einen Einzelruf abzulehnen.
- Drücken Sie  zum Ablehnen eines Einzelrufs.

## Rundumrufe

Ein Rundumruf ist ein Ruf von einem einzelnen Funkgerät an alle Funkgeräte an einem Standort oder alle Funkgeräte an einem Gruppenstandort, je nach Systemkonfiguration.

Ein Rundumruf wird für wichtige Durchsagen verwendet, die die volle Aufmerksamkeit des Benutzers erfordern. Die Benutzer auf dem System können auf einen Rundumruf nicht antworten.

Capacity Max unterstützt Standort-Rundumrufe und Multi-Standort-Rundumrufe. Der Systemadministrator kann eine dieser Optionen für Ihr Funkgerät konfigurieren.

### HINWEIS:

Funkgeräte können systemweite Rundumrufe unterstützen, die Infrastruktur von Motorola Solutions unterstützt jedoch keine systemweiten Rundumrufe.

## Tätigen von Rundumrufen

Ihr Funkgerät muss konfiguriert werden, um einen Rundumruf tätigen zu können. Führen Sie die Vorgehensweise zum Tätigen von Rundumrufen auf Ihrem Funkgerät durch.

- 1 Wählen Sie einen Kanal mithilfe des aktiven Rundumruf-Gruppen-Alias oder der aktiven relevanten ID. Siehe [Auswählen eines Rufstyps auf Seite 69](#).

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display wird je nach Konfigurationstyp das **Gruppenruf**-Symbol und entweder Rundumruf, Standort-Rundruf oder Durchsageruf angezeigt.

- 3 Führen Sie einen der folgenden Schritte aus:
  - Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
  - Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Benutzer auf dem Kanal können auf einen Sammelruf nicht antworten.

Der Rufinitiator kann  drücken, um den Rundumruf zu beenden.

## Tätigen von Rundumrufen über die programmierbare Zifferntaste

Führen Sie die Vorgehensweise zum Tätigen von Rundumrufen mithilfe der programmierbaren Zifferntaste auf Ihrem Funkgerät durch.

- 1 Halten Sie auf dem Startbildschirm die programmierbare Zifferntaste gedrückt, die dem vordefinierten Alias oder der vordefinierten ID zugewiesen wurde.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweis wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Im Display wird abhängig vom Konfigurationstyp das **Gruppenruf**-Symbol und

entweder Rundumruf, Standort-Rundruf oder Durchsageruf angezeigt.

- 3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Der Rufinitiator kann  drücken, um den Rundumruf zu beenden.

Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Tätigen von Sammelrufen mithilfe der Aliassuche

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Kontakte**.  
Drücken Sie  , um die Option auszuwählen.  
Das Display zeigt die Einträge in alphabetischer Reihenfolge an.
- 
- 3 Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID. In der ersten Zeile des Displays wird **Telefonnummer:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie eine Telefonnummer über die Tastatur ein.
- 
- 4 Drücken Sie  , um die Option auszuwählen. Wenn der ausgewählte Eintrag leer ist, erklingt ein negativer Hinweisston, und im Display wird **Telefonruf ungültige Nr.** angezeigt.
- 
- 5 Drücken Sie  oder  bis **Tel. anrufen**.  
Drücken Sie  , um die Option auszuwählen. Wenn keine Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Zugangsnummer:** angezeigt. In der zweiten

Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die Zugangsnummer ein, und drücken Sie die Schaltfläche  , um fortzufahren. Wenn die Schritte zum Erfolg geführt haben, ertönt der DTMF-Ton. Der Wählton des Telefonbenutzers erklingt. In der ersten Zeile des Displays werden der Funkgeräte-Alias oder die Funkgeräte-ID sowie das RSSI-Symbol angezeigt. In der zweiten Zeile des Displays wird **Telefonruf** und das Anruf-Symbol angezeigt. Bei nicht erfolgreicher Durchführung erklingt ein Signalton, und im Display wird **Telefonruf erfolglos** angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

- 6 Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los. Das RSSI-Symbol wird während der Übertragung ausgeblendet.
- 
- 7 Um zusätzliche durch den Anruf erforderlich gemachte Ziffern einzugeben, gehen Sie wie folgt vor:

- Drücken Sie eine beliebige Taste der Tastatur, um die Eingabe der zusätzlichen Ziffern zu beginnen. In der ersten Zeile des Displays wird **Zusätz. Stellen:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die zusätzlichen Stellen ein, und drücken Sie die Schaltfläche , um fortzufahren. Der DTMF-Ton erklingt, und das Funkgerät wechselt zum vorherigen Bildschirm.
- Drücken Sie die **Schnellwahltaste**. Der DTMF-Ton erklingt. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweisston.

8

Drücken Sie  zum Beenden des Gesprächs. Wenn kein Schlussruf in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Schlussruf:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Schlussruf ein, und drücken Sie , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird **Telefonruf beendet** angezeigt. Bei erfolgreicher Durchführung

erklingt ein Signalton, und im Display wird **Telefonruf beendet** angezeigt. Kehrt das Funkgerät zum **Telefonruf-Bildschirm** zurück. Bei nicht erfolgreicher Durchführung kehrt das Funkgerät zum **Anruf-Bildschirm** zurück. Wenn Sie die **Sendetaste** (PTT) auf dem **Telefonkontakte-Bildschirm** drücken, erklingt ein Hinweisston, und im Display wird **Zum Anrufen OK drücken** angezeigt. Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweisston, und im Display wird **Telefonruf beendet** angezeigt. Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

#### HINWEIS:

Der Rufinitiator kann  drücken, um den Rundumruf zu beenden.

## Empfangen von Rundumrufen

Wenn Sie einen Rundumruf empfangen, geschieht Folgendes:

- Ein Hinweisston ertönt.

- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird die ID des Anrufer-Alias angezeigt.
- Die zweite Textzeile zeigt abhängig vom Konfigurationstyp Rundumruf, StandortRundruf oder Durchsageruf an.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

Das Funkgerät kehrt zu dem Bildschirm zurück, der vor dem Empfangen des Sammelrufs angezeigt wurde, wenn der Ruf beendet wird.

Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun diesen Kanal verwenden können. Auf einen Sammelruf kann nicht geantwortet werden.

#### HINWEIS:

Das Funkgerät unterbricht den Empfang eines Sammelrufs, wenn Sie während des Anrufs auf einen anderen Kanal schalten. Während eines Sammelrufs können Menüs nicht durchlaufen oder bearbeitet werden, bis der Ruf endet.

## Telefonrufe

Ein Telefonruf ist ein Ruf von einem einzelnen Funkgerät an ein anderes Telefon.

In Capacity Max ist Ihr Funkgerät in der Lage, Anrufe zu empfangen und zu antworten, sogar dann, wenn die Telefonanruf-Funktion deaktiviert ist.

Die Telefonanruf-Funktion kann aktiviert werden, indem Telefonnummern auf dem System zugewiesen und eingerichtet werden. Klären Sie mit Ihrem Systemadministrator, wie das Funkgerät konfiguriert wurde.

## Tätigen von Telefonrufen

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät durch.

- 1 Drücken Sie die vorprogrammierte **Schnellwahltaste** bis zum vorgegebenen Aliasnamen oder zur vorgegebenen ID.

Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

Wenn keine Zugangsnummer in der Kontaktliste vorkonfiguriert ist, wird Zugangsnummer in der ersten Zeile des Displays angezeigt:

---

- 2 Geben Sie die Zugangsnummer ein, und drücken

Sie  , um fortzufahren.

Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

---

- 3 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).
- 

- 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.
- 

- 5 Geben Sie nach Aufforderung zusätzliche Ziffern mit der Tastatur ein, und drücken Sie  , um fortzufahren.

Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

Der DTMF-Ton erklingt. Das Funkgerät wechselt zum vorherigen Bildschirm.

---

- 6 Drücken Sie  zum Beenden des Gesprächs.
- 

- 7 Führen Sie einen der folgenden Schritte aus:

- Wenn der Schlussruf nicht vorkonfiguriert wurde, geben Sie die Schlussrufnummer ein, wenn auf dem Display **Schlussruf:** angezeigt wird, und drücken Sie  , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm.
- Drücken Sie die vorprogrammierte **Schnellwahltaste**. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

Der DTMF-Ton erklingt, und im Display wird **Telefonruf wird beendet** angezeigt. Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.

- Im Display wird Ruf beendet angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie die letzten zwei Schritte, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

## Tätigen von Telefonrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät mithilfe der Kontaktliste durch.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen. Das Display zeigt die Einträge in alphabetischer Reihenfolge an.

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

Wenn Sie die **PTT**-Taste im Telefonkontakte-Bildschirm drücken:

- In der ersten Zeile des Displays wird Telefonnummer: angezeigt.
- In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt.

Wenn der ausgewählte Eintrag leer ist:

- Ein negativer Hinweis ton erklingt.
- Im Display wird die Meldung Telefonruf ungültige Nr. angezeigt.

- 4 Drücken Sie  oder  bis Tel. anrufen. Drücken Sie , um die Option auszuwählen.

Im Display wird die Meldung Zugangsnummer: angezeigt, wenn die Zugangsnummer nicht vorkonfiguriert wurde.

### 5 Geben Sie den Zugangscode ein, und drücken Sie

 , um fortzufahren.

Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

Die erste Textzeile zeigt **Ruft**. In der Textzeile werden der Funkgerät-Alias oder die Funkgerät-ID sowie das **Telefonruf**-Symbol angezeigt.

Wenn der Ruf erfolgreich ist:

- Der DTMF-Ton erklingt.
- Der Wählton des Telefonbenutzers erklingt.
- In der ersten Textzeile werden der Aliasname des Funkgeräts oder die Funkgerät-ID sowie das **RSSI**-Symbol angezeigt.
- In der zweiten Textzeile werden **Telefonruf** und das **Telefonanruf**-Symbol angezeigt.

Wenn der Anruf nicht erfolgreich ist:

- Ein Hinweiston ertönt.
- Im Display wird die Meldung **Telefonruf erfolglos** und dann **Zugangsnummer:** angezeigt.

- Das Funkgerät wechselt zu dem Bildschirm, der vor dem Einleiten des Rufs angezeigt wurde, wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde.

---

### 6 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Das **RSSI**-Symbol wird nicht mehr angezeigt.

---

### 7 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

---

### 8 Geben Sie nach Aufforderung zusätzliche Ziffern mit der Tastatur ein, und drücken Sie , um fortzufahren.

Wenn der Ruf während der Eingabe der geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

Der DTMF-Ton erklingt. Das Funkgerät wechselt zum vorherigen Bildschirm.

9 Drücken Sie  zum Beenden des Gesprächs.

10 Wenn der Schlussruf nicht vorkonfiguriert wurde, geben Sie die Schlussrufnummer ein, wenn auf dem Display **Schlussruf:** angezeigt wird, und drücken

Sie , um fortzufahren.

Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird **Telefonruf wird beendet** angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird **Ruf beendet** angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm.

Wiederholen Sie [Schritt 9](#) und [Schritt 10](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet. Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweiston, und im Display wird **Zum Anrufen OK** drücken angezeigt.

Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird, und im Display wird **Telefonruf beendet** angezeigt.

Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

#### HINWEIS:

Drücken Sie während des Zugriffs auf den Kanal

, um den Anrufversuch abzubrechen; es wird dann ein Hinweiston ausgegeben.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

Während des Zugriffs auf den Kanal und der Übertragung des Zugangscodes bzw. Schlussrufs oder zusätzlicher Zeichen reagiert Ihr Funkgerät nur auf die **Ein/Aus**-Taste, den **Lautstärkeregl**er und den **Kanalschalter**. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

## Tätigen von Telefonrufen mithilfe der Aliassuche

Zum Auffinden des Aliasnamens des gewünschten Funkgeräts kann auch eine Alias- oder alphanumerische Suche durchgeführt werden. Diese Funktion ist nur verfügbar, während sich das Funkgerät im Menü „Kontakte“ befindet. Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen mithilfe der Aliassuche auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis **Kontakte**.  
Drücken Sie , um die Option auszuwählen.  
Das Display zeigt die Einträge in alphabetischer Reihenfolge an.

---

- 3 Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID. In der ersten Zeile des Displays wird **Telefonnummer:** angezeigt. In der zweiten Zeile des Displays wird ein

blinkender Cursor angezeigt. Geben Sie eine Telefonnummer über die Tastatur ein.

- 4 Drücken Sie , um die Option auszuwählen. Wenn der ausgewählte Eintrag leer ist, erklingt ein negativer Hinweis, und im Display wird **Telefonruf ungültige Nr.** angezeigt.

---

- 5 Drücken Sie  oder  bis „Tel. anrufen“, und Drücken Sie , um die Option auszuwählen.. Wenn kein Zugangscode in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Zugangscode:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Zugangscode ein, und drücken Sie die Taste , um fortzufahren. Wenn die Schritte zum Erfolg geführt haben, ertönt der DTMF-Ton. Der Wählton des Telefonbenutzers erklingt. In der ersten Zeile des Displays werden der Funkgerät-Alias oder die Funkgeräte-ID sowie das **RSSI**-Symbol angezeigt. In der zweiten Zeile des Displays werden **Telefonruf** und das Symbol **Telefonruf** angezeigt. Bei nicht erfolgreicher Durchführung erklingt ein Signalton, und im Display

wird Telefonruf erfolglos angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

---

6 Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los. Das **RSSI**-Symbol wird während der Übertragung ausgeblendet.

---

7 Um zusätzliche durch den Anruf erforderlich gemachte Ziffern einzugeben, gehen Sie wie folgt vor:

- Drücken Sie eine beliebige Taste der Tastatur, um die Eingabe der zusätzlichen Ziffern zu beginnen. In der ersten Zeile des Displays wird **Zusätz. Stellen:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die zusätzlichen Stellen ein, und drücken Sie die Taste , um fortzufahren. Der DTMF-Ton erklingt, und das Funkgerät wechselt zum vorherigen Bildschirm.

- Drücken Sie die **Schnellwahltaste**. Der DTMF-Ton erklingt. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

---

8 Drücken Sie  zum Beenden des Gesprächs. Wenn kein Schlussruf in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Schlussruf:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Sperrcode ein, und drücken Sie , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird **Telefonruf beendet** angezeigt. Bei erfolgreicher Durchführung erklingt ein Signalton, und im Display wird **Telefonruf beendet** angezeigt. Kehrt das Funkgerät zum Telefonruf-Bildschirm zurück. Bei nicht erfolgreicher Durchführung kehrt das Funkgerät zum Anruf-Bildschirm zurück. Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweiston, und im Display wird **Zum Anrufen OK drücken** angezeigt. Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird, und im Display wird

Telefonruf beendet angezeigt. Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

#### HINWEIS:

Drücken Sie während des Zugriffs auf den Kanal

, um den Rufversuch abzubrechen oder die Aliassuche zu beenden; es wird dann ein Hinweiston ausgegeben. Drücken Sie die Taste

 oder , um die Aliassuche zu verlassen.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden. Während des Zugriffs auf den Kanal und der Übertragung des Zugangscodes bzw. Sperrcodes oder der zusätzlichen Zeichen reagiert Ihr Funkgerät nur auf die An/Aus-Taste, den Lautstärkeregel und den Kanalwahlschalter. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

## Tätigen von Telefonrufen durch manuelles Wählen

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät durch manuelles Wählen durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Manuell wählen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Telefonnummer. Drücken Sie , um die Option auszuwählen. Auf dem Display werden Nummer: und ein blinkender Cursor angezeigt.

---

- 5 Geben Sie die Telefonnummer ein, und drücken Sie

 , um fortzufahren.

Auf dem Display werden **Zugangscode:** und ein blinkender Cursor angezeigt, wenn der Zugangscode nicht vorkonfiguriert wurde.

- 6 Geben Sie den Zugangscode ein, und drücken Sie

 , um fortzufahren. Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

Die grüne LED leuchtet. Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt. In der ersten Textzeile wird der Funkgeräte-Alias angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt. Wenn der Ruf erfolgreich ist:

- Der DTMF-Ton (Dual Tone Multi Frequency) erklingt.
- Der Wählton des Telefonbenutzers erklingt.
- In der ersten Textzeile wird der Funkgeräte-Alias angezeigt.

- Auf dem Display wird weiterhin das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.

Wenn der Anruf nicht erfolgreich ist:

- Ein Hinweiston ertönt.
- Im Display wird die Meldung **Telefonruf erfolglos** und dann **Zugangsnummer:** angezeigt.
- Das Funkgerät wechselt zu dem Bildschirm, der vor dem Einleiten des Rufs angezeigt wurde, wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde.

- 7 Drücken Sie  zum Beenden des Gesprächs.

- 8 Führen Sie einen der folgenden Schritte aus:

- Wenn der Schlussruf nicht vorkonfiguriert wurde, geben Sie die Schlussrufnummer ein, wenn auf dem Display **Schlussruf:** angezeigt wird, und drücken Sie  , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm.
- Drücken Sie die vorprogrammierte **Schnellwahltaste**. Wenn der Eintrag für die

**Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

Der DTMF-Ton erklingt, und im Display wird Telefonruf wird beendet angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird Ruf beendet angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm.

Wiederholen Sie [Schritt 7](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

## HINWEIS:

Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweiston. Zum Anrufen OK drücken angezeigt.

Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird Ruf beendet angezeigt.

Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

Drücken Sie während des Zugriffs auf den Kanal , um den Rufversuch abzurechnen; es wird dann ein Hinweiston ausgegeben.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

Während des Zugriffs auf den Kanal und der Übertragung des Zugangscode bzw.

Schlussrufs oder zusätzlicher Zeichen reagiert Ihr Funkgerät nur auf die **Ein/Aus**-Taste, den **Lautstärkeregler** und den **Kanalschalter**. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

---

## Dualton-Mehrfrequenzverfahren (DTMF)

Das Dualton-Mehrfrequenzverfahren (DTMF) erlaubt den Betrieb des Funkgeräts in einem Funksystem mit einer Schnittstelle zu Telefonsystemen.

Der DTMF-Ton kann durch Deaktivieren sämtlicher Funkgerät-Hinweistöne ausgeschaltet werden. Weitere Informationen finden Sie unter [Ein-/Ausschalten der Funkgerät-Hinweistöne auf Seite 220](#).

### Einleiten von DTMF-Anrufen

Gehen Sie wie folgt vor, um einen DTMF-Ruf auf Ihrem Funkgerät einzuleiten.

- 1 Halten Sie die **Sendetaste (PTT)** gedrückt.
- 

- 2 Führen Sie einen der folgenden Schritte aus:

- Geben Sie die gewünschte Nummer zum Einleiten eines DTMF-Anrufs ein.
  - Drücken Sie  zum Einleiten eines DTMF-Anrufs.
  - Drücken Sie  zum Einleiten eines DTMF-Anrufs.
- 

## Antworten auf Telefonrufe als Gruppenrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Gruppenruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Im Display wird die Meldung **Telefonanruf** angezeigt.
- Die grüne LED blinkt.

- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

---

2 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

---

3 Drücken Sie zum Beenden des Gesprächs  .  
Im Display wird die Meldung `Ruf beendet` angezeigt.

### HINWEIS:

Wenn die Telefonrukapazität nicht für Ihr Funkgerät aktiviert wurde, kann das Funkgerät einen Telefonruf nicht als einen Gruppenruf beenden. Der Telefonbenutzer muss den Ruf beenden. Der Empfänger kann während des Rufs nur sprechen.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie [Schritt 3](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

---

## Antworten auf Telefonrufe als Sammelrufe

Wenn Sie einen Telefonanruf als einen Rundumruf empfangen, ist das empfangende Funkgerät nicht in der Lage, zu sprechen oder zu antworten. Der Empfangsbenutzer ist nicht in der Lage, den Rundumruf zu beenden.

Wenn Sie einen Telefonruf als Rundumruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt abhängig vom Konfigurationstyp `Rundumruf`, `StandortRundruf` oder `Durchsageruf` und `Telefonruf an`.
- Die grüne LED blinkt.

- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

## Antworten auf Telefonrufe als Einzelrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Einzelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Einzelruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Im Display wird die Meldung `Telefonanruf` angezeigt.
- Die grüne LED blinkt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

- 1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

- 2 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

- 3 Drücken Sie  zum Beenden des Gesprächs. Im Display wird die Meldung `Ruf beendet` angezeigt.

### HINWEIS:

Wenn die Telefonrukapazität nicht für Ihr Funkgerät aktiviert wurde, kann das Funkgerät einen Telefonruf nicht als einen Einzelruf beenden. Der Telefonbenutzer muss den Ruf beenden. Der Empfänger kann während des Rufs nur sprechen.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie [Schritt 3](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

## Gesprächsbevorrechtigung

Mit der Gesprächsbevorrechtigung kann ein Funkgerät alle aktiven Sprachübertragungen unterbrechen und eine priorisierte Übertragung initiieren.

Mit der Funktion der Gesprächsbevorrechtigung unterbricht das System gerade laufende Gespräche in Instanzen, in denen gebündelte Kanäle nicht verfügbar sind.

Anrufe mit höherer Priorität wie Notrufe oder Rundumrufe werden bei der Übertragung des sendenden Funkgeräts vorgezogen. Wenn kein anderer Funkfrequenzkanal verfügbar ist, wird der Notruf einem Rundumruf vorgezogen.

## Stimmunterbrechung

Die Stimmunterbrechung ermöglicht das Herunterfahren einer aktiven Sprachübertragung.

Diese Funktion verwendet die Rückwärtskanalsignalisierung, um die aktive Sprachübertragung eines Funkgeräts zu unterbrechen, wenn das unterbrechende Funkgerät für die Stimmunterbrechung konfiguriert wurde und das sendende Funkgerät so konfiguriert wurde, dass Sprachrufe unterbrochen werden können. Das unterbrechende

Funkgerät ist dann in der Lage, eine Sprachübertragung an den Teilnehmer des unterbrochenen Rufs zu tätigen.

Die Funktion der Sprachunterbrechung verbessert merklich die Fähigkeit erfolgreicher Bereitstellungen von neuen Übertragungen an die gewünschten Parteien, während ein Ruf aktiv ist.

Die Stimmunterbrechung ist nur für den Benutzer zugänglich, wenn diese Funktion über das Funkgerät eingerichtet wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Aktivieren der Sprachunterbrechung

Führen Sie die Vorgehensweise zum Initialisieren der Sprachunterbrechung auf Ihrem Funkgerät durch.

Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

- 1 Zum Unterbrechen der Übertragung während eines laufenden Anrufs drücken Sie die Sendetaste (**PTT**). Bei einem Funkgerät wird bei einem abgebrochenen Anruf `Ruf unterbrochen` angezeigt. Das Funkgerät

gibt einen negativen Hinweiston ab, bis Sie die **PTT**-Taste loslassen.

## 2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.

## 3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

## Erweiterte Funktionen

In diesem Kapitel wird die Bedienung der Funktionen auf Ihrem Funkgerät beschrieben.

Ihr Händler oder Systemadministrator kann Ihr Funkgerät an Ihre speziellen Anforderungen und Bedürfnisse anpassen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

[Feedback senden](#)

## Anrufwarteschlange

Wenn keine Ressourcen verfügbar sind, um den Ruf zu verarbeiten, ermöglicht die Anrufwarteschlange die Platzierung der Rufanfrage in der Systemwarteschlange, wo sie auf die nächsten verfügbaren Ressourcen wartet.

Sie hören einen Anrufwarteschlangenton nach dem Drücken der **Sendetaste (PTT)**, der Sie darüber informiert, dass das Funkgerät in den Anrufwarteschlangenmodus versetzt wurde. Die **Sendetaste (PTT)** kann nach dem Erklingen des Anrufwarteschlangentons losgelassen werden.

Nach erfolgreicher Rufeinrichtung passiert Folgendes:

- Die grüne LED blinkt.
- Sofern aktiviert ertönt der Freiton.
- Das Display zeigt das Symbol für den Ruftyp, die ID oder den Alias.
- Der Funkgerätebenutzer muss innerhalb von 4 Sekunden die **Sendetaste (PPT)** drücken, um die Sprachübertragung zu starten.

Wenn die Rufeinrichtung nicht erfolgreich war, passiert Folgendes:

- Sofern aktiviert, wird der Hinweistext für die Ablehnung ausgegeben.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt.
- Der Ruf wird beendet, und das Funkgerät beendet die Rufeinrichtung.

## Gesprächsgruppen-Scan

Mit dieser Funktion kann das Funkgerät Anrufe von Gruppen überwachen bzw. verbinden, die von einer Empfängergruppenliste definiert werden.

Wenn Scan aktiviert ist, wird das Scan-Symbol in der Statusleiste angezeigt, und die LED-Anzeige blinkt gelb. Das Funkgerät hebt die Stummschaltung für alle Mitglieder in der Empfängergruppenliste auf.

Wenn Scan aktiviert ist, empfängt das Funkgerät keine Übertragungen von Mitgliedern der Empfängergruppenliste, mit Ausnahme von Rundumrufen und der ausgewählten Gesprächsgruppe.

### HINWEIS:

Die Funktion „Gesprächsgruppen-Scan“ kann über CPS konfiguriert werden. Klären Sie mit Ihrem Systemadministrator, wie das Funkgerät konfiguriert wurde.

## Ein-/Ausschalten der Gesprächsgruppen-Scan-Funktion

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Gesprächsgruppen-Scan-Funktion Ihres Funkgeräts durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan. Drücken Sie , um die Option auszuwählen.

---

- 3 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis Einschalten. Drücken Sie , um die Option auszuwählen.

- Drücken Sie  oder  bis Abschalten.

Drücken Sie , um die Option auszuwählen.

Wenn die Scan-Funktion aktiviert ist:

- Auf dem Display werden `Scan ein` und das **Scan**-Symbol angezeigt.
- Die gelbe LED blinkt.
- Ein positiver Hinweisston erklingt.

Wenn die Scan-Funktion deaktiviert ist:

- Auf dem Display wird `Scan aus` angezeigt.
- Das **Scan**-Symbol wird nicht mehr angezeigt.
- Die LED erlischt.
- Ein negativer Hinweisston erklingt.

## Empfängergruppenliste

Mit der Funktion „Empfängergruppenliste“ können Sie Mitglieder für die Gesprächsgruppen-Scanliste erstellen und zuweisen.

Diese Liste wird erstellt, wenn das Funkgerät programmiert wird und ermittelt, welche Gruppen gescannt werden

können. Ihr Funkgerät unterstützt höchstens 16 Mitglieder in diese Liste.

Wenn das Funkgerät so programmiert wurde, dass die Scan-Liste bearbeitet werden kann, können Sie:

- Gesprächsgruppen hinzufügen/entfernen.
- Priorität für Gesprächsgruppen hinzufügen, entfernen bzw. bearbeiten. Siehe [Bearbeitung der Priorität für eine Gesprächsgruppe auf Seite 112](#).
- Gesprächsgruppen für den Verbindungsaufbau hinzufügen, entfernen bzw. bearbeiten. Siehe [Hinzufügen einer Gesprächsgruppenzugehörigkeit auf Seite 114](#) und [Entfernen einer Gesprächsgruppenzugehörigkeit auf Seite 115](#).
- Die vorhandene Scanliste durch eine neue Scanliste ersetzen.

### WICHTIG:

Zum Hinzufügen eines Mitglieds zur Liste muss die Gesprächsgruppe zunächst im Funkgerät konfiguriert werden.

### HINWEIS:

Die Empfängergruppenliste wird vom Systemadministrator programmiert. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Prioritätsmonitor

Der Prioritätsmonitor ermöglicht es dem Funkgerät, automatisch Übertragungen von Gesprächsgruppen mit höherer Priorität zu empfangen, selbst wenn es gerade mit einem anderen Ruf beschäftigt ist.

Das Funkgerät verlässt den Gesprächsgruppenruf mit niedrigerer Priorität für den Gesprächsgruppenruf mit höherer Priorität.

### HINWEIS:

Der Zugriff auf diese Funktion ist nur möglich, wenn die Funktion „Gesprächsgruppen-Scan“ aktiviert ist.

Der Prioritätsmonitor gilt nur für Mitglieder der Empfängergruppenliste. Es gibt zwei Prioritäts-Gesprächsgruppen: Priorität 1 (P1) und Priorität 2 (P2). P1 hat eine höhere Priorität als P2. Im Capacity Max-System empfängt das Funkgerät Übertragungen gemäß der folgenden Prioritätsreihenfolge:

- 1 Notruf für P1-Gesprächsgruppe
- 2 Notruf für P2-Gesprächsgruppe
- 3 Notruf für Gesprächsgruppen ohne Priorität in der Empfängergruppenliste
- 4 Rundumruf

- 5 P1-Gesprächsgruppenruf
- 6 P2-Gesprächsgruppenruf
- 7 Gesprächsgruppen ohne Priorität in der Empfängergruppenliste

Siehe [Bearbeitung der Priorität für eine Gesprächsgruppe auf Seite 112](#) für weitere Informationen zum Hinzufügen, Entfernen bzw. Bearbeiten der Priorität von Gesprächsgruppen in der Scanliste.

### HINWEIS:

Diese Funktion wird vom Systemadministrator programmiert. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Bearbeitung der Priorität für eine Gesprächsgruppe

Im Gesprächsgruppen-Scan-Menü können Sie die Priorität einer Gesprächsgruppe anzeigen oder bearbeiten.

- 1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Scan. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Liste anz/bearb. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis zur gewünschten Gesprächsgruppe. Drücken Sie  , um die Option auszuwählen.

Die aktuelle Priorität wird durch das Symbol **Priorität 1** oder **Priorität 2** neben der Gesprächsgruppe angezeigt.

---

5 Drücken Sie  oder  bis Priorit.bearb. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zur gewünschten Prioritätsstufe. Drücken Sie  , um die Option auszuwählen.

[Feedback senden](#)

Wenn eine andere Gesprächsgruppe Priorität 1 oder Priorität 2 zugewiesen wurde, können Sie die aktuelle Priorität überschreiben. Wenn auf dem Display "Vorhandene überschreiben?" angezeigt

wird, drücken Sie  oder  bei den folgenden Optionen:

- Nein, um zum vorherigen Schritt zurückzukehren.
- Ja zum Überschreiben.

Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm angezeigt wird. Das Prioritätssymbol erscheint neben der Gesprächsgruppe.

---

## Gesprächsgruppenzugehörigkeit für mehrere Gesprächsgruppen

In einem Capacity Max-System kann Ihr Funkgerät für bis zu sieben Gesprächsgruppen an einem Standort konfiguriert werden.

Von den 16 Gesprächsgruppen in der Empfängergruppenliste können bis zu sieben Gesprächsgruppen als Gesprächsgruppen für den Verbindungsaufbau zugewiesen werden. Die ausgewählte

Gesprächsgruppe und die Prioritäts-Gesprächsgruppen werden automatisch verbunden.

## HINWEIS:

Diese Funktion wird vom Systemadministrator programmiert. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Hinzufügen einer Gesprächsgruppenzugehörigkeit

Führen Sie die Vorgehensweise zum Hinzufügen einer Gesprächsgruppenzugehörigkeit durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Scan. Drücken Sie  , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis Liste anzeigen bearb. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis zur gewünschten Gesprächsgruppen-ID oder -Alias. Drücken Sie  , um die Option auszuwählen.

Der Zugehörigkeitsstatus wird unter Liste anzeigen/bearbeiten angezeigt. Auf dem Display wird  neben der ausgewählten Gesprächsgruppen-ID oder dem Alias angezeigt.

- 5 Drücken Sie  oder  bis Verbindung bearb. Drücken Sie  , um die Option auszuwählen.

- 6 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis Ein. Drücken Sie  , um die Option auszuwählen.

- Drücken Sie  oder  bis **Aus.** Drücken Sie  , um die Option auszuwählen.

Wenn **Ein** ausgewählt ist, wird  neben der Gesprächsgruppen-ID oder dem Alias angezeigt.

Wenn der Verbindungsaufbau erfolgreich ist, wird auf dem Display  neben der ausgewählten Gesprächsgruppen-ID oder dem Alias angezeigt.

Wenn der Verbindungsaufbau nicht erfolgreich ist, wird auf dem Display weiterhin  neben der Gesprächsgruppen-ID oder dem Alias angezeigt.

#### HINWEIS:

Das Funkgerät zeigt **Liste voll** an, wenn maximal sieben Gesprächsgruppen für den Verbindungsaufbau in der Scanliste ausgewählt sind. Bevor Sie eine neue Gesprächsgruppe für den Verbindungsaufbau auswählen können, müssen Sie eine vorhandene verbundene Gesprächsgruppe entfernen. Weitere Informationen finden Sie unter [Entfernen einer Gesprächsgruppenzugehörigkeit auf Seite 115](#).

## Entfernen einer Gesprächsgruppenzugehörigkeit

Wenn die Verbindungsliste voll ist und Sie eine neue Gesprächsgruppe für den Verbindungsaufbau auswählen möchten, müssen Sie eine vorhandene verbundene Gesprächsgruppe entfernen, um Platz für die neue zu schaffen. Führen Sie die Vorgehensweise zum Entfernen einer Gesprächsgruppenzugehörigkeit durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis **Scan.** Drücken Sie  , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis **Liste anz/bearb.** Drücken Sie  , um die Option auszuwählen.
- 4 Drücken Sie  oder  bis zur gewünschten Gesprächsgruppen-ID oder -Alias. Drücken Sie  , um die Option auszuwählen.

Der Zugehörigkeitsstatus wird unter **Liste anzeigen/bearbeiten** angezeigt. Auf dem Display wird **■** neben der ausgewählten Gesprächsgruppen-ID oder dem Alias angezeigt.

---

- 5 Drücken Sie  oder  bis **Verbindung** bearb. Drücken Sie , um die Option auszuwählen.
- 

- 6 Drücken Sie  oder  bis **Aus.** Drücken Sie , um die Option auszuwählen.
- Wenn **Aus** ausgewählt ist, wird **■** nicht länger neben der Gesprächsgruppen-ID oder dem Alias angezeigt.
- 

## Rückruf

Anhand der Rückruf-Funktion können Sie während des Scannens auf eine Übertragung reagieren.

Wenn Ihr Funkgerät einen Ruf aus der wählbaren Gruppen-Scan-Liste scannt und die **Sendetaste** (PTT) während des gescannten Rufes gedrückt wird, hängt die Reaktion des Funkgeräts davon ab, ob die Rückruf-

Funktion bei Konfiguration des Funkgeräts aktiviert oder deaktiviert wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

### Rückruf deaktiviert

Das Funkgerät verlässt den gescannten Ruf und versucht, über den Kontakt für die aktuell ausgewählte Kanalposition zu senden. Wenn die Haltezeit für den aktuell ausgewählten Kontakt abläuft, wechselt das Funkgerät zu dem Standardkanal und startet den Timer für die Scan-Haltezeit. Das Funkgerät setzt den Gruppenscan fort, wenn der Timer für die Scan-Haltezeit abläuft.

### Rückruf aktiviert

Wenn die **Sendetaste** (PTT) während der Haltezeit der Gruppe für den gescannten Ruf gedrückt wird, versucht das Funkgerät, an die gescannte Gruppe zu senden.

### HINWEIS:

Wenn Sie einen Ruf einer Gruppe scannen, die keiner Kanalposition in der derzeit ausgewählten Zone zugewiesen ist, und der Ruf beendet wird, wechseln Sie zu der richtigen Zone, und wählen Sie dann die Kanalposition der Gruppe, um mit dieser Gruppe zu sprechen.

## Bluetooth

Mit der Bluetooth-Funktion können Sie Ihr Funkgerät über eine Bluetooth-Verbindung mit einem Bluetooth-fähigen Gerät (Zubehör) verwenden. Ihr Funkgerät unterstützt Bluetooth-Geräte von Motorola Solutions sowie im Handel erhältliche (COTS) Bluetooth-fähige Geräte.

Bluetooth funktioniert innerhalb eines Umkreises von 10 m Sichtverbindung. Die Sichtverbindung ist ein hindernisfreier Weg zwischen Ihrem Funkgerät und Ihrem Bluetooth-fähigen Gerät. Um eine hohe Zuverlässigkeit zu erreichen, empfiehlt Motorola Solutions, das Funkgerät und das Zubehör nicht zu trennen.

Im Randbereich der Reichweite nehmen die Sprach- und Tonqualität stark ab, und die Übertragung hört sich fehlerhaft oder gebrochen an. Um dieses Problem zu beseitigen, verringern Sie die Entfernung zwischen Funkgerät und Bluetooth-fähigem Gerät (innerhalb der maximalen Reichweite von 10 m), um wieder einen klaren Audioempfang zu erhalten. Die Bluetooth-Funktion Ihres Funkgeräts hat in 10 m Reichweite eine maximale Leistung von 2,5 mW (4 dBm).

Ihr Funkgerät unterstützt bis zu drei simultane Bluetooth-Verbindungen mit Bluetooth-fähigen Geräten verschiedener Typen. Zum Beispiel einen Kopfhörer, einen

Scanner und ein PTT-Only-Device (POD). Mehrere Verbindungen mit Bluetooth-fähigen Geräten derselben Art werden nicht unterstützt.

Weitere Angaben über die Funktionalität Ihres Bluetooth-fähigen Geräts können Sie der Bedienungsanleitung des jeweiligen Bluetooth-Geräts entnehmen.

### HINWEIS:

Wenn das Gerät über CPS deaktiviert wird, werden alle Bluetooth-bezogenen Funktionen deaktiviert, und die Bluetooth-Gerätedatenbank wird gelöscht.

## Aktivieren und Deaktivieren von Bluetooth

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Bluetooth durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Mein Status.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird Ein und Aus angezeigt. Der derzeitige Status wird durch ein  angezeigt.
- 

- 4 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie  oder  bis Ein. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben Ein angezeigt.
  - Drücken Sie  oder  bis Aus. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben Aus angezeigt.
- 

## Verbinden mit Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden mit Bluetooth-Geräten durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Geräte. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie  , um die Option auszuwählen.
  - Drücken Sie  oder  bis Geräte suchen, um die verfügbaren Geräte zu suchen.  
Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie  , um die Option auszuwählen.
-

5 Drücken Sie  oder  bis Verbinden.

Drücken Sie  , um die Option auszuwählen.

Es sind möglicherweise zusätzliche Schritte erforderlich, um die Kopplung für Ihr Bluetooth-fähiges Gerät einzurichten. Weitere Informationen finden Sie im Benutzerhandbuch des Bluetooth-fähigen Geräts.

Im Display wird Verb.aufbau <Gerät> angezeigt.

Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird <Gerät> verbunden und das Symbol Bluetooth verbunden angezeigt.
- Im Display wird  neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird Verb.aufbau fehlgeschl angezeigt.

#### HINWEIS:

Wenn ein Pincode erforderlich ist, siehe [Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 207](#).

## Verbinden mit Bluetooth-Geräten im erkennbaren Bluetooth-Modus

Führen Sie die Vorgehensweise zum Anschließen von Bluetooth-Geräten im Erkennungsmodus durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Gerätesuche.

Drücken Sie  , um die Option auszuwählen. Ihr Funkgerät kann jetzt von anderen Bluetooth-fähigen Geräten für eine programmierte Dauer gefunden

werden. Dies wird als „Erkennbarer Modus“ bezeichnet.

---

Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Im Display wird <Gerät> verbunden und das Symbol **Bluetooth verbunden** angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Im Display wird Verb.aufbau fehlgeschl angezeigt.

## Trennen von Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden von Bluetooth-Geräten durch.

- 1 Drücken Sie , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Geräte. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Trennen. Drücken Sie , um die Option auszuwählen.  
Im Display wird <Gerät> wird getrennt angezeigt.

**HINWEIS:**

Möglicherweise sind zusätzliche Schritte erforderlich, um die Verbindung Ihres Bluetooth-fähigen Geräts zu unterbrechen. Weitere Informationen finden Sie im Benutzerhandbuch aller Bluetooth-fähigen Geräte.

Warten Sie auf eine Quittierung.

- Ein Hinweiston ertönt.
- Das Display zeigt <Gerät> getrennt und das Symbol **Bluetooth verbunden** wird ausgeblendet.
- ✓ Wird neben dem verbundenen Gerät nicht mehr angezeigt.

## Umschalten des Audiosignals zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Bluetooth-Gerät

Führen Sie die Vorgehensweise zum Umschalten der Audioausgabe zwischen dem internen Lautsprecher des Funkgeräts und dem Bluetooth-Gerät durch.

Drücken Sie die programmierte **Bluetooth-Audio-Umschalttaste**.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Ein Hinweiston ertönt. Das Display zeigt Audio zu Funkg leiten an.
- Ein Hinweiston ertönt. Im Display wird Audio zu BT leiten angezeigt.

## Anzeigen von Gerätedetails

Führen Sie die Vorgehensweise zum Anzeigen der Gerätedetails auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Bluetooth. Drücken Sie , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis Geräte. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Details. Drücken Sie  , um die Option auszuwählen.

---

## Löschen eines Gerätenamens

Sie können ein nicht verbundenes Gerät aus der Liste der Bluetooth-fähigen Geräte entfernen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Geräte. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen. Im Display wird Gerät gelöscht angezeigt.

---

## Bluetooth-Mikrofonverstärker

Diese Funktion ermöglicht dem Benutzer die Steuerung der Mikrofonverstärkung des verbundenen Bluetooth-fähigen Geräts.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis BT MikVerstärk.  
Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis zum Typ des BT-Mikrofonverstärkers und den aktuellen Werten.  
Drücken Sie  , um die Option auszuwählen. Sie können die Werte hier bearbeiten.

5 Drücken Sie  oder  , um die Werte zu erhöhen oder zu senken. Drücken Sie  , um die Option auszuwählen.

## Innenbereich

### HINWEIS:

Die Innenbereichs-Funktion ist verfügbar für Modelle mit neuester Software und Hardware. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

„Innenbereich“ kann verwendet werden, um den Standort von Funkgerätbenutzern zu verfolgen. Wenn der Innenbereich aktiviert ist, ist das Funkgerät in einem

begrenzt erkennbaren Modus. Dedizierte Bakensignale werden verwendet, um das Funkgerät aufzufinden und seine Position zu bestimmen.

## Ein- und Ausschalten der Funktion Innenbereich

Sie können durch Ausführen einer der folgenden Aktionen die Funktion Innenbereich ein- oder ausschalten.

- Rufen Sie diese Funktion über das Menü auf.
  - a. Drücken Sie  , um das Menü aufzurufen.
  - b. Drücken Sie  oder  bis Bluetooth und drücken Sie  zum Auswählen.
  - c. Drücken Sie  oder  Innenbereich und drücken Sie  zum Auswählen.
  - d. Drücken Sie  , um die Funktion Innenbereich zu aktivieren.

Das Display zeigt Innenbereich ein an. Das Gerät gibt einen positiven Hinweiston ab.

Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- e. Drücken Sie  zum Ausschalten der Funktion „Innenbereich“.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- Rufen Sie diese Funktion über die vorprogrammierte Taste auf.

- a. Drücken Sie lang auf die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ einzuschalten.

Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

- b. Drücken Sie die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ auszuschalten.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display Ausschalten fehlgeschlagen angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweis.

3 Drücken Sie  oder  Innenbereich und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Sender und drücken Sie  zum Auswählen.

---

Im Display werden Bakensignal-Informationen angezeigt.

## Zugriff auf Informationen eines Standort-Bakensignals in Innenbereichen

Gehen Sie wie folgt vor, um auf Informationen zu Innenbereich-Bakensignalen zuzugreifen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Bluetooth und drücken Sie  zum Auswählen.

---

## Multi-Site-Bedienelemente

Diese Funktionen gelten, wenn Ihr aktueller Funkkanal für ein Capacity Max-System konfiguriert ist.

### Starten einer manuellen Stationsuche

Führen Sie die Vorgehensweise zum Starten der manuellen Standortsuche aus, sobald die empfangene Signalstärke schwach ist, um einen Standort mit besserer Signalstärke zu finden.

Sobald das Funkgerät einen neuen Standort gefunden hat, passiert Folgendes:

- Ein positiver Hinweis ertönt.

Wenn das Funkgerät keinen neuen Standort gefunden hat, passiert Folgendes:

- Ein negativer Hinweiston erklingt.

## Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperre**.

Wenn die **Standortsperr**e eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperr**e ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperert ist.
- Im Display wird `Station entsperert` angezeigt.

## Zugriff auf Nachbarstandortliste

Diese Funktion ermöglicht dem Benutzer die Überprüfung der benachbarten Standortliste des aktuellen Home-Standorts. Führen Sie die Vorgehensweise zum Zugriff auf die benachbarte Standortliste aus:

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis `Dienstprogramme`. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis `Geräteinfo`. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis `Nachb.-Stando..`. Drücken Sie  , um die Option auszuwählen.

---

## Home-Kanalerinnerung

Diese Funktion aktiviert eine Erinnerung, wenn der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist.

Wenn diese Funktion aktiviert ist, erfolgt in regelmäßigen Abständen Folgendes, falls das Funkgerät für einen bestimmten Zeitraum nicht als Home-Kanal festgelegt ist:

- Der Erinnerungston und die Ansage des Home-Kanals erklingen.
- In der ersten Zeile des Displays wird **Nicht-** angezeigt.
- In der zweiten Zeile wird **Home-Kanal** angezeigt.

## Stummschalten der Home-Kanalerinnerung

Wenn eine Home-Kanalerinnerung ertönt, können Sie die Erinnerung vorübergehend stummschalten.

Drücken Sie die programmierbare Taste **Home-Kanalerinnerung stummschalten**.

In der ersten Zeile des Displays wird **HCR** und in der zweiten Zeile **Stumm** angezeigt.

## Einrichten eines neuen Home-Kanals

Wenn eine Home-Kanalerinnerung eintritt, können Sie einen neuen Home-Kanal einrichten.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierbare Taste **Home-Kanal zurücksetzen**, um den aktuellen Kanal als neuen Home-Kanal festzulegen. Überspringen Sie die folgenden Schritte. In der ersten Zeile des Displays wird der Kanal-Aliasname und in der zweiten Zeile **Neuer Home-K.** angezeigt.
    - Drücken Sie , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.
-

- 4 Drücken Sie  oder  bis Home-Kanal.  
Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis zum gewünschten neuen Home-Kanal-Alias. Drücken Sie , um die Option auszuwählen.  
Das Display zeigt  neben dem ausgewählten Home-Kanal-Alias an.

## Fernüberwachung

Mit dieser Funktion kann das Mikrofon des Zielfunkgeräts mit einem Funkgeräte-Alias oder einer Funkgeräte-ID eingeschaltet werden. Diese Funktion kann zur Fernüberwachung jeglicher hörbarer Aktivität rund um das Zielfunkgerät eingesetzt werden.

Ihr Funkgerät und das Zielfunkgerät müssen beide für die Nutzung dieser Funktion konfiguriert sein.

Wenn initiiert, blinkt die grüne LED einmal am Ziel-Funkgerät. Diese Funktion wird nach Ablauf einer vorprogrammierten Zeitdauer bzw. dann, wenn das Zielfunkgerät in Betrieb ist, automatisch ausgeschaltet.

## Einleiten des Fernmonitors

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät durch.

- 1 Drücken Sie die programmierte Taste **Fern-Monitor**.
- 2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

- 3 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:
- Ein positiver Hinweiston erklingt.
  - Im Display wird ein positiver Kurzhinweis angezeigt.
  - Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern

angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Einleiten der Fernüberwachung mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät mithilfe der Kontaktliste durch.

**1** Drücken Sie  , um das Menü aufzurufen.

**2** Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

**3** Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

**4** Drücken Sie  oder  bis Fernmonitor. Drücken Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

**5** Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Einleiten der Fernüberwachung durch manuelles Wählen

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät über manuelles Wählen durch.

**1** Drücken Sie , um das Menü aufzurufen.

---

**2** Drücken Sie  oder  bis Kontakte.  
Drücken Sie , um die Option auszuwählen.

---

**3** Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie , um die Option auszuwählen.

---

**4** Drücken Sie  oder  bis Funkgerät-Nr.  
Drücken Sie , um die Option auszuwählen.

---

**5** Führen Sie einen der folgenden Schritte aus:

- Geben Sie den Funkgerät-Alias oder die ID ein, und drücken Sie , um fortzufahren.
- Bearbeiten Sie die zuvor gewählte ID, und drücken Sie , um fortzufahren.

---

**6** Drücken Sie  oder  bis Fernmonitor.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

---

**7** Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird `Fern` angezeigt. `Mon` angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

verfügbar. Ausführliche Informationen hierzu finden Sie in den Handbüchern der Datenanwendungen.

Außerdem können Sie über das Kontakte-Menü jedem Eintrag eine oder mehrere programmierbare Zifferntasten an einem Tastenfeld-Mikrofon zuweisen. Wenn ein Eintrag einer Zifferntaste zugeordnet ist, können Sie von dem Eintrag aus eine Schnellwahl durchführen.

#### **HINWEIS:**

Vor jeder Zifferntaste, die einem Eintrag zugewiesen ist, wird eine Markierung angezeigt. Wenn sich die Markierung vor `Leer` befindet, haben Sie diesem Eintrag noch keine Zifferntaste zugewiesen.

Jeder Eintrag setzt sich aus den folgenden Feldern zusammen:

- Rufart
- Ruf-Alias
- Ruf-ID

## Kontakteinstellungen

Über Kontakte wird Ihr Funkgerät mit einer Adressbuchfunktion ausgestattet. Jeder Eintrag entspricht einem Aliasnamen bzw. einer ID, die Sie zur Rufeinleitung verwenden. Die Einträge sind in alphabetischer Reihenfolge sortiert.

Jeder Eintrag wird je nach Kontext mit einem anderen Rufotyp assoziiert: Gruppenruf, Einzelruf, Ansageruf, Standort-Rundruf, Durchsageruf, PC-Ruf oder Zentralruf.

PC- und Zentralrufe sind mit Daten verbunden. Diese Rufotypen sind nur mit entsprechenden Anwendungen

**HINWEIS:**

Ist die Verschlüsselungsfunktion für einen Kanal aktiviert, können Sie auf diesem Kanal Gruppenrufe, Einzelrufe, Rundumrufe und Telefonrufe mit aktivierter Verschlüsselung durchführen.

Ausschließlich Funkgeräte mit demselben Privacy-Key oder demselben Schlüsselwert und derselben Schlüssel-ID wie Ihr Funkgerät können die Übertragung entschlüsseln.

## Zuweisen von Einträgen zu programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Progr.-Taste.  
Drücken Sie , um die Option auszuwählen.

---

5 Führen Sie einen der folgenden Schritte aus:

- Wenn die gewünschte Zifferntaste keinem Eintrag zugewiesen wurde, drücken Sie  oder  bis zur gewünschten Zifferntaste.  
Drücken Sie , um die Option auszuwählen.
- Wenn die gewünschte Zifferntaste einem Eintrag zugewiesen wurde, wird im Display Die Taste ist bereits zugewiesen und dann in der ersten Textzeile Überschreiben? angezeigt. Führen Sie einen der folgenden Schritte aus:  
Drücken Sie  oder  bis Ja. Drücken Sie , um die Option auszuwählen.

Das Funkgerät gibt einen positiven Hinweis aus, und im Display wird das positive Kurzhinweissymbol `Kontakt gesichert` sowie ein positiver Kurzhinweis angezeigt.

Drücken Sie  oder  bis Nein, um zum vorherigen Schritt zurückzukehren.

Jeder Eintrag kann verschiedenen Zifferntasten zugewiesen werden. Vor jeder Zifferntaste, die einem Eintrag zugewiesen ist, wird ein ✓ angezeigt. Wenn das ✓ vor Leer steht, wurde die Zifferntaste nicht zugewiesen.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

## Aufheben von Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Aufheben der Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Halten Sie die programmierte Zifferntaste für den gewünschten Aliasnamen oder die ID gedrückt. Lesen Sie weiter unter [Schritt 4](#).
  - Drücken Sie  , um das Menü aufzurufen.

---
- 2 Drücken Sie  oder  bis Kontakt e.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Progr.-Taste.  
Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Leer. Drücken Sie  , um die Option auszuwählen.  
Die erste Textzeile zeigt AlleT. löschen an.
- 

- 6 Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen.

**HINWEIS:**

Die Verbindung zwischen einem Eintrag und seiner bzw. seinen vorprogrammierten Zifferntaste(n) wird aufgehoben, wenn der Eintrag gelöscht wird.

Ein positiver Hinweisston erklingt. Im Display wird Kontakt gespeichert angezeigt.  
Der Bildschirm wechselt automatisch zum vorherigen Menü.

---

## Hinzufügen neuer Kontakte

Führen Sie die Vorgehensweise zum Hinzufügen neuer Kontakte auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Neuer Kontakt. Drücken Sie  , um die Option auszuwählen.
- 
- 4 Drücken Sie  oder  zum Auswählen des Kontaktyps Funkg.-Kontakt oder Telefonkontakt. Drücken Sie  , um die Option auszuwählen.
- 
- 5 Geben Sie die Nummer des Kontakts mit der Tastatur ein, und drücken Sie  , um fortzufahren.
-

6 Geben Sie den Namen des Kontakts mit der Tastatur ein, und drücken Sie , um fortzufahren.

---

7 Drücken Sie  oder  bis zum gewünschten Ruftontyp. Drücken Sie , um die Option auszuwählen.  
Ein positiver Hinweisston erklingt. Im Display wird ein positiver Kurzhinweis angezeigt.

---

## Rufanzeigeinstellungen

Mit dieser Funktion können Funkgerätebenutzer Ruftöne für Rufe oder Textnachrichten konfigurieren.

## Aktivieren und Deaktivieren von Ruftönen für Einzelrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Einzelrufe auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Einzelruf. Drücken Sie , um die Option auszuwählen.

---

- 7 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie , um die Option auszuwählen.
- Wenn diese Option aktiviert ist, wird  neben **Aktiviert** angezeigt. Wenn diese Option deaktiviert ist, wird  neben **Aktiviert** angezeigt.
- 

## Aktivieren und Deaktivieren von Ruftönen für Textnachrichten

Führen Sie die Vorgehensweise zum Aktivieren und Deaktivieren von Ruftönen für Textnachrichten auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.
- 

- 6 Drücken Sie  oder  bis Textnachricht. Drücken Sie , um die Option auszuwählen.
- Im Display wird  und der aktuelle Hinweiston angezeigt.
- 

- 7 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie , um die Option

auszuwählen. Im Display wird ✓ und der ausgewählte Hinweiston angezeigt.

---

## Aktivieren und Deaktivieren von Ruftönen für Rufhinweise

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Rufhinweise auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Hinweiston. Drücken Sie , um die Option auszuwählen.

---

7 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ und der ausgewählte Hinweiston angezeigt.

---

## Aktivieren und Deaktivieren von Ruftönen für Selektivrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Selektivrufe auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Töne/Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.

- 6 Drücken Sie  oder  bis Selektivruf. Drücken Sie , um die Option auszuwählen. Im Display wird  und der aktuelle Hinweiston angezeigt.

---

- 7 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie , um die Option auszuwählen. Im Display wird  und der ausgewählte Hinweiston angezeigt.

## Aktivieren und Deaktivieren von Ruftönen für Telemetriestatus mit Text

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für den Telemetriestatus mit Text auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Telemetrie. Drücken Sie , um die Option auszuwählen. Der derzeitige Ton wird durch ein  angezeigt.

---

## Zuweisen von Ruftypen

Sie können Ihr Funkgerät so konfigurieren, dass es einen von zehn vordefinierten Hinweistönen ausgibt, wenn es einen Rufhinweis oder eine Textnachricht von einem bestimmten Kontakt erhält. Wenn Sie die Liste der Ruftöne durchgehen, ertönt bei jedem Eintrag jeweils der eingestellte Ruftön. Führen Sie die Vorgehensweise zum Zuweisen von Ruftypen auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen. Die Einträge sind in alphabetischer Reihenfolge sortiert.

---

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis **Bearbeiten**.  
Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis **Ruf ton bearbeiten**. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie , um die Option auszuwählen.  
✓ A wird neben dem gewählten Hinweiston angezeigt.

---

## Zunehmende Alarmtonlautstärke

Das Funkgerät kann so programmiert werden, dass Sie kontinuierlich erinnert werden, wenn ein Funkruf noch unbeantwortet ist. Dieser Dauerhinweis erfolgt dadurch, dass der Alarmton automatisch zunehmend lauter wird. Diese Funktion wird als Escalert bezeichnet.

## Funktionen des Rufprotokolls

Das Funkgerät führt ein Protokoll aller kürzlich durchgeführten, beantworteten und entgangenen Einzelrufe. Das Rufprotokoll kann zur Ansicht und Verwaltung kürzlich durchgeführter Anrufe verwendet werden.

Die Rufhinweise zu entgangenen Anrufen werden in den Rufprotokollen aufgenommen; dies ist abhängig von der Systemkonfiguration Ihres Funkgeräts. In jeder Rufliste können die folgenden Funktionen durchgeführt werden:

- Aliasnamen oder IDs können in „Kontakte“ gespeichert werden
- Anruf löschen
- Alle Anrufe löschen
- Details

## Anzeigen der letzten Anrufe

Führen Sie die Vorgehensweise zum Anzeigen der letzten Rufe auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie  , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis zur gewünschten Liste. Zur Auswahl stehen die Listen *Verpasst*, *Beantwortet* und *Abgehend*.  
  
Drücken Sie  , um die Option auszuwählen.  
Auf dem Display wird der neueste Eintrag angezeigt.
- 
- 4 Drücken Sie  oder  , um die Liste anzuzeigen.  
  
Sie können einen Einzelruf mit dem Aliasnamen oder der ID auf dem Display starten, indem Sie die **PTT**-Taste drücken.
- 

## Speichern von Aliasnamen oder IDs aus der Rufliste

Führen Sie die Vorgehensweise zum Speichern von Aliasnamen oder IDs auf Ihrem Funkgerät aus der Rufliste durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie  , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie  , um die Option auszuwählen.
- 
- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.
- 
- 5 Drücken Sie  oder  bis *Speichern*.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird ein blinkender Cursor angezeigt.
-

- 6 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein. Drücken Sie  , um die Option auszuwählen.

Eine ID kann ohne einen Aliasnamen gespeichert werden.

Im Display wird ein positiver Kurzhinweis angezeigt.

---

## Löschen von Rufen aus der Rufliste

Führen Sie die Vorgehensweise zum Löschen von Rufen aus der Rufliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie  , um die Option auszuwählen.

Wenn die Liste leer ist:

- Ein Hinweiston ertönt.
  - Auf dem Display wird `Liste leer` angezeigt.
- 

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Eintrag löschen?. Drücken Sie  , um die Option auszuwählen.
- 

- 6 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie  , um Ja auszuwählen und den Eintrag zu löschen.  
Im Display wird `Eintrag gelöscht` angezeigt.

- Drücken Sie  oder  bis Nein. Drücken Sie , um die Option auszuwählen. Das Funkgerät wechselt zum vorherigen Bildschirm.
- 

## Löschen von Sammelrufen aus der Rufliste

Führen Sie die Vorgehensweise zum Löschen von Sammelrufen aus der Rufliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.
  - 2 Drücken Sie  oder  bis Rufprotokoll. Drücken Sie , um die Option auszuwählen.
  - 3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Alle löschen. Drücken Sie , um die Option auszuwählen.
- 

- 6 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie , um Ja auszuwählen und alle Einträge zu löschen. Im Display wird ein positiver Kurzhinweis angezeigt.
    - Drücken Sie  oder  bis Nein. Drücken Sie , um die Option auszuwählen. Das Funkgerät wechselt zum vorherigen Bildschirm.
- 

## Anzeigen von Details aus der Rufliste

Führen Sie die Vorgehensweise zum Anzeigen von Details aus der Rufliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Details. Drücken Sie  , um die Option auszuwählen.  
Auf dem Display werden die Details angezeigt.

---

## Rufhinweise

Paging mit Rufhinweis erlaubt Ihnen, einen bestimmten Funkgerätbenutzer dazu aufzufordern, Sie bei nächster Gelegenheit zurückzurufen.

Diese Funktion kann nur für Aliasnamen bzw. IDs von Funkgeräten eingesetzt werden und ist über das Menü via „Kontakte“, „Manuell wählen“ oder eine vorprogrammierte **Eintastenzugang**-Taste verfügbar.

In Capacity Max ermöglichen Rufhinweise dem Funkgerätenutzer oder dem Dispatcher, eine Warnmeldung an einen anderen Funkgerätenutzer zu senden, um den initialisierenden Funkgerätenutzer bei Verfügbarkeit zurückzurufen. Diese Funktion umfasst keine Sprachkommunikation.

Rufhinweise können durch den Händler oder Systemadministrator mithilfe von zwei verschiedenen Methoden konfiguriert werden:

- Das Funkgerät wird so konfiguriert, dass der Benutzer die Sendetaste (**PTT**) drücken kann, um dem Anrufinitiator direkt über einen Einzelruf zu antworten.
- Das Funkgerät wird so konfiguriert, dass der Benutzer die Sendetaste (**PTT**) drücken kann und mit einer anderen Gesprächsgruppenkommunikation fortfährt. Durch Drücken der Sendetaste (**PTT**) bei Eingang eines

Rufhinweises ist der Benutzer nicht in der Lage, dem Anrufinitiator zu antworten. Der Benutzer muss zu Protokoll der entgangenen Rufe im Menü „Ruf-Log“ navigieren und von dort aus auf den Rufhinweis antworten.

Ein OACSU-Einzelruf (Off Air Call Set-Up-Einzelruf) ermöglicht dem Benutzer, sofort zu antworten, während ein FOACSU-Einzelruf (Full Off Air Call Set-Up-Einzelruf) eine Benutzerbestätigung für den Ruf erfordert. OACSU-Rufe werden daher für die Rufhinweis-Funktion empfohlen. Siehe [Einzelruf auf Seite 82](#).

## Tätigen von Rufhinweisen

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen auf Ihrem Funkgerät aus.

- 1 Drücken Sie die vorprogrammierte **Schnellwahlta**ste.

Im Display wird **Hinweiston** und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

- 2 Warten Sie auf eine Quittierung.

Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.

Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

---

## Tätigen von Rufhinweisen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte.

Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Hinweiston.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird Hinweiston und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

---

5 Warten Sie auf eine Quittierung.

- Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.
- Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

---

## Antworten auf Rufhinweise

Führen Sie die Vorgehensweise zum Antworten auf Rufhinweise auf Ihrem Funkgerät durch.

Wenn Sie einen Rufhinweis erhalten:

- Ein wiederholter Hinweiston erklingt.
- Die gelbe LED blinkt.
- Auf dem Display wird die Liste der Benachrichtigungen mit einem Rufhinweiseintrag mit dem Alias oder der ID des anrufenden Funkgeräts angezeigt.

Anhängig von der Konfiguration durch den Händler oder Systemadministrator können Sie auf einen Rufhinweis folgendermaßen reagieren:

- Drücken Sie die **Sendetaste (PTT)**, und antworten Sie dem Anrufer direkt mit einem Einzelruf.
  - Drücken Sie die **Sendetaste (PTT)**, um die Gesprächsgruppenkommunikation fortzuführen. Der Rufhinweis wird in die Option „Entgangene Rufe“ im Menü „Ruf-Log“ verschoben. Sie können aus dem Verlauf der entgangenen Rufe heraus dem Anrufer antworten.
- 

Weitere Informationen finden Sie unter [Benachrichtigungsliste auf Seite 210](#) und [Funktionen des Rufprotokolls auf Seite 140](#).

## Stummschaltmodus

Der Stummschalt-Modus stellt dem Benutzer eine Möglichkeit zur Verfügung, sämtliche akustischen Signale des Funkgeräts stummzuschalten.

Sobald der Stummschalt-Modus initiiert wurde, werden alle akustischen Signale stummgeschaltet, mit Ausnahme der Funktionen mit höherer Priorität wie etwa Notfall-Funktionen.

Beim Beenden des Stummschalt-Modus nimmt das Funkgerät die Wiedergabe von laufenden Tönen oder Audio-Übertragungen wieder auf.

### HINWEIS:

Dies ist eine käufliche Funktion. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Einschalten des Stummschalt-Modus

Führen Sie die Vorgehensweise zum Einschalten des Stummschalt-Modus durch.

Rufen Sie diese Funktion über die programmierte Taste **Stummschalt-Modus** auf.

---

Folgendes geschieht, wenn der Stummschalt-Modus aktiviert ist:

- Positiver Hinweisston erklingt.
- Auf dem Display wird `Stummschalt-Modus Ein` angezeigt.
- Die rote LED beginnt zu blinken und blinkt weiter, bis der Stummschalt-Modus beendet wird.
- Auf dem Display wird das Symbol **Stummschalt-Modus** auf der Startseite angezeigt.
- Das Funkgerät wird stummgeschaltet.
- Der Stummschalt-Modus-Timer beginnt mit dem Countdown der konfigurierten Dauer.

## Einstellen des Stummschalt-Modus-Timers

Der Stummschalt-Modus kann durch Einstellen des Stummschalt-Modus-Timers für eine vorkonfigurierte Dauer aktiviert werden. Die Timer-Dauer wird über das Funkgerätemenü konfiguriert und kann zwischen 0,5 und 6

Stunden betragen. Nach Ablauf des Timers wird der Stummschalt-Modus beendet.

Wenn der Timer bei 0 belassen wird, bleibt das Funkgerät unbeschränkt im Stummschalt-Modus, bis die vorprogrammierte **Stummschalt-Modus**-Taste gedrückt wird.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Timer stummschalten. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  zum Bearbeiten des numerischen Werts jeder Ziffer, und drücken Sie .

---

## Beenden des Stummschalt-Modus

Die Funktion kann automatisch beendet werden, sobald der Stummschalt-Modus-Timer abgelaufen ist.

Führen Sie einen der folgenden Schritte aus, um den Stummschalt-Modus manuell zu beenden:

- Drücken Sie die programmierte **Stummschalt-Modus**-Taste.
  - Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.
- 

Folgendes geschieht, wenn der Stummschalt-Modus deaktiviert ist:

- Negativer Hinweiston erklingt.
- Das Display zeigt `Stummschalt-Modus aus an`.
- Die blinkende rote LED schaltet sich aus.

- Das **Stummschalt-Modus**-Symbol verschwindet von der Startseite.
- Die Stummschaltung des Funkgeräts wird aufgehoben, und der Lautsprecherstatus wird wiederhergestellt.
- Wenn der Timer nicht abgelaufen ist, wird der Stummschalt-Modus-Timer gestoppt.

#### HINWEIS:

Der Stummschalt-Modus wird ebenfalls beendet, wenn der Benutzer Sprache überträgt oder auf einen nicht programmierten Kanal wechselt.

## Notruf

Ein Notsignal dient dazu, auf eine kritische Situation aufmerksam zu machen. Sie können einen Notruf jederzeit absetzen, auch wenn es Aktivitäten auf dem aktuellen Kanal gibt.

Bei Capacity Max kann das empfangende Funkgerät gleichzeitig nur ein Notsignal unterstützen. Sofern initiiert, überschreibt ein zweites Notsignal das erste Signal.

Wenn ein Notsignal empfangen wird, kann der Empfänger wählen, ob das Signal gelöscht und die Notsignal-Liste beendet werden soll oder ob auf das Notsignal reagiert

werden soll, indem die **Sendetaste (PTT)** gedrückt und ein normaler Sprachruf (nicht Notruf) gesendet wird.

Ihr Händler oder Systemadministrator kann festlegen, wie lange die vorprogrammierte **Notruftaste** gedrückt werden muss, allerdings ist die Dauer für das lange Drücken die gleiche wie bei allen anderen Tasten:

#### Kurzer Tastendruck

Dauer zwischen 0,05 Sekunden und 0,75 Sekunden.

#### Langer Tastendruck

Dauer zwischen 1,00 und 3,75 Sekunden.

Die **Notruftaste** ist mit der Notruf-Ein/Aus-Funktion belegt. Für Informationen über die zugewiesene Funktionsweise der **Notruftaste** wenden Sie sich bitte an Ihren Händler.

#### HINWEIS:

Wenn die **Notruftaste** zum Einschalten des Notruf-Modus durch kurzes Drücken programmiert ist, dann wird der Notruf-Modus durch langes Drücken der **Notruftaste** beendet.

Wenn die **Notruftaste** zum Einschalten des Notruf-Modus durch langes Drücken programmiert ist, dann wird der Notruf-Modus durch kurzes Drücken der **Notruftaste** beendet.

Ihr Funkgerät unterstützt drei Arten von Notsignalen:

- Notrufalarm
- Notsignal mit Ruf
- Notsignal mit anschließender Sprache

Darüber hinaus gibt es vier unterschiedliche Notsignaltypen:

### Regulär

Das Funkgerät überträgt ein Alarmsignal und gibt akustische und/oder optische Hinweise aus.

### „Silent“

Das Funkgerät überträgt ein Alarmsignal und gibt keine akustischen und/oder optischen Hinweise aus. Das Funkgerät empfängt Rufe ohne Ton über den Lautsprecher, bis die programmierte Sendedauer für das *Notrufmikrofon* abgelaufen ist und/oder bis Sie die **Sendetaste (PTT)** drücken.

### Still mit Sprache

Das Funkgerät überträgt ein Alarmsignal ohne akustische und optische Hinweise, erlaubt aber die Ausgabe eingehender Anrufe über den Lautsprecher.

#### HINWEIS:

Nur einer der Notrufalarme oben kann der programmierten **Notruftaste** oder dem **Fußnotschalter** zugeordnet werden.

## Senden von Notrufsignalen

Mit dieser Funktion senden Sie ein Notsignal, d. h. ein Signal ohne Sprache, das einen Hinweis auf einer Gruppe von Funkgeräten auslöst. Führen Sie die Vorgehensweise zum Senden von Notrufsignalen auf Ihrem Funkgerät durch.

Ihr Funkgerät gibt keine akustischen oder visuellen Signale während des Notrufmodus aus, wenn es stummgeschaltet ist.

- 1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Sie sehen folgende Ergebnisse:

- Im Display wird **Tx Alarm** und der Aliasname des Zielgeräts angezeigt.
- Im Display wird **Tx Telegramm** und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

**HINWEIS:**

Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt. Der Notsuchton kann durch Ihren Händler oder Systemadministrator programmiert werden.

**2** Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Der Notrufton ertönt.
- Die grüne LED blinkt.
- Im Display wird Alarm gesendet angezeigt.

Bei nicht erfolgreicher Durchführung, wenn alle Versuche durchgeführt wurden:

- Ein Hinweiston ertönt.
- Das Display zeigt Alarm fehlg an.

Das Funkgerät verlässt den Notsignalmodus und kehrt zum Ausgangsbildschirm zurück.

**HINWEIS:**

Wenn nur das Notsignal konfiguriert ist, besteht der Notrufprozess nur aus der Bereitstellung des Notsignals. Der Notruf endet, wenn eine Bestätigung vom System empfangen wurde oder wenn die maximale Anzahl an Versuchen für den Zugriff auf den Kanal erreicht wurde.

Wenn nur das Notsignal konfiguriert wurde, ist mit dem Absenden eines Notrufs kein Sprachruf verbunden.

## Senden von Notrufsignalen mit Ruf

Mithilfe dieser Funktion können Sie ein Notsignal mit Ruf an eine Gruppe von Funkgeräten oder an einen Dispatcher senden. Nach erfolgter Quittierung durch die Infrastruktur in der Gruppe kann eine Gruppe von Funkgeräten auf einem vorprogrammierten Notrufkanal miteinander kommunizieren.

Das Funkgerät muss für Notsignale mit Ruf konfiguriert werden, damit ein Notruf nach der Durchführung eines Notrufs ausgeführt werden kann.

## 1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Im Display wird Tx Alarm und der Aliasname des Zielgeräts angezeigt. Das **Notruf**-Symbol wird angezeigt. Die grüne LED leuchtet.

### **HINWEIS:**

Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt.

Wenn eine Notsignal-Quittierung erfolgreich empfangen wurde

- Der Notrufton ertönt.
- Die grüne LED blinkt.
- Im Display wird Alarm gesendet angezeigt.
- Sobald auf dem Display Notruf und die Zielgruppen-Aliasnamen angezeigt werden, wird das Funkgerät auf Notrufmodus geschaltet.

Wenn eine Notsignal-Quittierung nicht erfolgreich empfangen werden konnte:

- alle erneuten Versuche erschöpft sind.

- Ertönt ein tiefer Hinweiston.
- Das Display zeigt Alarm fehlig an.
- Verlässt das Funkgerät den Notsignalmodus.

---

## 2 Drücken Sie die **Sendetaste** (PTT), um eine Sprachübertragung zu initiieren.

Die grüne LED leuchtet. Das Display zeigt das **Gruppenruf**-Symbol an.

---

## 3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
- Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

---

## 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Im Display werden der Anrufer und die Gruppen-Aliase angezeigt.

---

## 5 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste**

(PTT) am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

---

- 6 Drücken Sie zum Verlassen des Notrufmodus die **Notruf aus**-Taste.

Das Funkgerät kehrt zum Startbildschirm zurück.

**HINWEIS:**

Je nachdem, wie Ihr Funkgerät programmiert wurde, hören Sie einen Gesprächserlaubnisston oder nicht. Ihr Händler oder Systemadministrator kann Ihnen zusätzliche Informationen zur Programmierung Ihres Funkgeräts für Notfälle geben.

Der Notrufinitiator kann Abbrechen drücken,

, um einen laufenden Notruf zu beenden. Das Funkgerät kehrt in einen Verfügbar-Status zurück, der Notrufbildschirm bleibt jedoch geöffnet.

---

## Senden von Notrufsignalen mit nachfolgendem Sprachruf

Mit dieser Funktion senden Sie ein Notsignal mit nachfolgendem Sprachruf an eine Gruppe von Funkgeräten. Ihr Funkgerät wird automatisch aktiviert, sodass Sie ohne Drücken der Sendetaste (PTT) mit der Funkgerätgruppe kommunizieren können. Dieser Modus mit aktiviertem Mikrofon wird auch „Notrufmikrofon“ genannt.

**HINWEIS:**

Das Funkgerät kann kein Nicht-IMPRES-Mikrofon erkennen, das an den Zubehöranschluss an der Rückseite angeschlossen ist. Wenn am angegebenen programmierten Anschluss kein Mikrofon erkannt wird, überprüft das Funkgerät den alternativen Anschluss. Hier hat das erkannte Mikrofon Priorität.

Bei aktiviertem Notrufzyklusbetrieb werden für eine einprogrammierte Dauer der *Mikrofon-Bereitschaftsmodus* und die Empfangszeit abwechselnd wiederholt. Während des Notrufzyklusbetriebs werden empfangene Rufe über den Lautsprecher ausgegeben.

Wenn Sie während der vorprogrammierten Empfangszeit die Sendetaste (PTT) drücken, hören Sie einen Sperrton.

Dieser Ton weist Sie darauf hin, dass Sie die Sendetaste (**PTT**) freigeben müssen. Das Funkgerät reagiert nicht auf das Drücken der Sendetaste (**PTT**) und bleibt im Notruf-Modus.

Wenn Sie die **Sendetaste (PTT)** bei aktiviertem *Hot Mic*-Modus drücken und sie bis nach Ablauf der Dauer des *Hot Mic*-Modus gedrückt halten, sendet das Funkgerät weiterhin, bis Sie die **Sendetaste (PTT)** loslassen.

Wird eine Notsignalanforderung nicht beantwortet, versucht das Funkgerät nicht noch einmal, die Anforderung zu senden, sondern ruft den *Mikrofon-Bereitschaftsmodus* direkt auf.

### HINWEIS:

Von einigen Zubehöerteilen wird der *Mikrofon-Bereitschaftsmodus* möglicherweise nicht unterstützt. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Führen Sie die Vorgehensweise zum Senden von Notrufsignalen mit nachfolgendem Sprachruf auf Ihrem Funkgerät durch.

- 1 Drücken Sie die vorprogrammierte **Notrufeinschalttaste** oder den **Fuß-Notschalter**.

Sie sehen eines der folgenden Ergebnisse:

- Im Display wird *Tx Alarm* und der Aliasname des Zielgeräts angezeigt.
- Im Display wird *Tx Telegramm* und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

- 
- 2 Sobald das Display *Alarm gesendet* anzeigt, sprechen Sie deutlich in das Mikrofon.

Das Funkgerät stoppt den Sendevorgang automatisch:

- Bei aktiviertem Notrufzyklusbetrieb endet die Dauer des Zyklus zwischen *Hot Mic* und dem Empfang von Rufen.
- Bei deaktiviertem Notrufzyklusbetrieb endet die Dauer des *Hot Mic*-Modus.

- 
- 3 Drücken Sie zum Verlassen des Notrufmodus die **Notruf aus**-Taste.

Das Funkgerät kehrt zum Startbildschirm zurück.

---

## Empfangen von Notrufsignalen

Das empfangende Funkgerät kann nur ein Notsignal gleichzeitig unterstützen. Sofern initiiert, überschreibt ein zweites Notsignal das erste Signal. Führen Sie die Vorgehensweise zum Empfangen und Anzeigen von Notsignalen auf Ihrem Funkgerät durch.

Wenn Sie ein Notrufsignal empfangen:

- Ein Hinweiston ertönt.
- Die rote LED blinkt.
- Das Display zeigt die Notsignalliste, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des übertragenden Funkgeräts an.

**1** Drücken Sie , um das Notsignal anzuzeigen.

---

**2** Drücken Sie , um die Aktionsoptionen und -details für alle Einträge in der Notsignalliste anzuzeigen.

---

**3** Drücken Sie , und wählen Sie **Ja**, um die Alarmliste zu verlassen.

Das Funkgerät kehrt zum Startbildschirm zurück und zeigt oben ein **Notsignalsymbol** an, das darauf hinweist, dass es sich um ein noch nicht gelöstes Notsignal handelt. Das **Notsignalsymbol** wird nicht mehr angezeigt, wenn der Eintrag in der Notsignalliste gelöscht wurde.

---

**4** Drücken Sie , um das Menü aufzurufen.

---

**5** Wählen Sie **Alarmliste**, um die Alarmliste wieder anzuzeigen.

---

**6** Der Hinweiston ertönt, und die LED blinkt rot, bis Sie den Notruf-Modus beenden. Der Ton kann jedoch stummgeschaltet werden. Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die **Sendetaste (PTT)** zum Anrufen der Funkgerätegruppe, die das Notsignal empfangen hat.
  - Drücken Sie eine beliebige programmierbare Taste.
-

## Antworten auf Notrufsignale

Wenn ein Notsignal empfangen wird, kann der Empfänger wählen, ob das Signal gelöscht und die Notsignal-Liste beendet werden soll oder ob auf das Notsignal reagiert werden soll, indem die **Sendetaste (PTT)** gedrückt und ein normaler Sprachruf (nicht Notruf) gesendet wird. Führen Sie die Vorgehensweise zum Antworten auf Notrufsignale auf Ihrem Funkgerät durch.

- 1 Wenn die Notrufanzeige aktiviert ist, wird der Notruf angezeigt, sobald das Funkgerät einen Notruf erhält.

Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID.

- 2 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Um der gleichen Gruppe, an die auch das Notrufsignal gerichtet war, einen normalen Sprachruf (nicht Notruf) zu senden, drücken Sie die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

- 3 Führen Sie einen der folgenden Schritte aus:
  - Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
  - Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

- 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Funkgerät, das den Notruf gesendet hat, antwortet:

- Die rote LED blinkt.
- Das Display zeigt das **Notruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

### HINWEIS:

Wenn die Notrufanzeige nicht aktiviert ist, zeigt das Display das **Gruppenruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

## Antworten auf Notsignale mit Ruf

Führen Sie die Vorgehensweise zum Antworten auf Notsignale mit Ruf auf Ihrem Funkgerät durch.

Wenn Sie einen Notruf empfangen, geschieht Folgendes:

- Der Notruftton erklingt, wenn die Notrufanzeige und der Notruf-Decodierungshinweiston aktiviert sind. Der Notruftton erklingt nicht, wenn nur die Notrufanzeige aktiviert ist.
  - Im Display wird das **Notruf**-Symbol in der oberen rechten Ecke angezeigt.
  - Die Textzeile zeigt die Notruf-Gesprächsgruppen-ID oder den Aliasnamen des sendenden Funkgeräts.
  - Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.
- 1 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal

antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Die grüne LED leuchtet.

- 
- 2 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

- 
- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Funkgerät, das den Notruf gesendet hat, antwortet:

- Die rote LED blinkt.
- Das Display zeigt das **Notruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

### HINWEIS:

Wenn die Notrufanzeige nicht aktiviert ist, zeigt das Display das **Gruppenruf**-Symbol, die Notruf-Gesprächsgruppen-ID oder den Aliasnamen und die ID oder den Aliasnamen des sendenden Funkgeräts.

## Statusmeldung

Anhand dieser Funktion ist der Benutzer in der Lage, Statusmeldungen an andere Funkgeräte zu senden.

Die Quick-Status-Liste wird über CPS-RM konfiguriert und umfasst maximal 99 Status.

Die maximale Zeichenlänge für jede Statusmeldung ist 16.

### HINWEIS:

Jeder Status hat einen entsprechenden digitalen Wert zwischen 0 und 99. Zur besseren Übersichtlichkeit kann jedem Status ein Alias zugewiesen werden.

## Senden von Statusnachrichten

Führen Sie zum Senden einer Statusmeldung die folgende Vorgehensweise durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte **Schnellwahltaste**. Überspringen Sie die folgenden Schritte.
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Status**. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis **Quick-Status**. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie  , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis zum Alias oder zur ID des gewünschten Funkgeräts oder der Gruppe. Drücken Sie  , um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm **Quick-Status** angezeigt wird.

- Auf dem Display wird ✓ neben dem gesendeten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Quick-Status angezeigt wird.

## Senden von Statusmeldungen über die programmierbare Taste

Führen Sie die Vorgehensweise zum Senden einer Statusmeldung über die programmierbare Taste durch.

- 1 Drücken Sie die programmierte Taste **Statusmeldung**.

- 2 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie , um die Option auszuwählen. Die Kontaktliste wird angezeigt.

- 3 Drücken Sie  oder  bis zum Alias oder zur ID des gewünschten Funkgeräts oder der Gruppe.

Drücken Sie , um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Quick-Status angezeigt wird.
- Auf dem Display wird ✓ neben dem gesendeten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Quick-Status angezeigt wird.

## Senden einer Statusmeldung mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Senden einer Statusmeldung mithilfe der Kontaktliste durch.

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis zum Alias oder zur ID des gewünschten Funkgeräts oder der Gruppe.  
Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Status senden.  
Drücken Sie  , um die Option auszuwählen.

5 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie  , um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Quick-Status angezeigt wird.
- Auf dem Display wird  neben der gesendeten Statusmeldung angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Quick-Status angezeigt wird.

## Senden von Statusmeldungen über manuelles Wählen

Führen Sie die Vorgehensweise zum Senden einer Statusmeldung über manuelles Wählen durch.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Funkgerät-Nr.  
Drücken Sie , um die Option auszuwählen.

5 Geben Sie den Funkgerät-Alias oder die ID oder den Gruppen-Alias oder die ID ein, und drücken Sie , um fortzufahren.

6 Drücken Sie  oder  bis Status senden.  
Drücken Sie , um die Option auszuwählen.

7 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie , um die Option auszuwählen.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend ein positiver Kurzhinweis angezeigt, bevor wieder der Bildschirm Quick-Status angezeigt wird.
- Auf dem Display wird  neben dem gesendeten Status angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm Quick-Status angezeigt wird.

## Statusmeldungen anzeigen

Führen Sie die Vorgehensweise zum Anzeigen von Statusmeldungen durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Status. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Posteingang. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie , um die Option auszuwählen.  
Der Inhalt der Statusmeldung wird dem Benutzer des Funkgeräts angezeigt.

Empfangene Statusmeldungen können auch durch Zugriff auf die Benachrichtigungsliste angezeigt werden. Weitere

Informationen finden Sie unter [Benachrichtigungsliste auf Seite 210](#).

## Antworten auf Statusmeldungen

Führen Sie die Vorgehensweise zum Antworten auf Statusmeldungen durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Status. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Inbox. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie , um die Option auszuwählen.

5 Der Inhalt der Statusmeldung wird angezeigt.

Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis **Antw.**. Drücken

Sie  , um die Option auszuwählen.

---

7 Drücken Sie  oder  bis zu den

gewünschten Statusmeldungen. Drücken Sie  , um die Option auszuwählen.

---

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Die LED erlischt.
- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der Bildschirm **Posteingang** angezeigt wird.
- Auf dem Display wird  neben der gesendeten Statusmeldung angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.

- Die LED erlischt.
- Im Display wird vorübergehend der Fehlerhinweis angezeigt, bevor wieder der vorhergehende Bildschirm **Posteingang** angezeigt wird.

## Löschen einer Statusmeldung

Führen Sie die Vorgehensweise zum Löschen einer Statusmeldung auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis **Status**. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis **Inbox**. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis zu den gewünschten Statusmeldungen. Drücken Sie  , um die Option auszuwählen.

---

5 Der Inhalt der Statusmeldung wird angezeigt.  
Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen.

---

7 Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen.

---

- Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der Bildschirm Posteingang angezeigt wird.

## Löschen aller Statusmeldungen

Führen Sie die Vorgehensweise zum Löschen aller Statusmeldungen auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Status. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Inbox. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Alle löschen. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen.

---

- Auf dem Display wird Liste leer angezeigt.

## Textnachrichten (SMS)

Ihr Funkgerät kann von einem anderen Funkgerät oder einer Textnachricht-Anwendung Daten empfangen, beispielsweise Textnachrichten.

Es gibt zwei Arten von Textnachrichten, DMR-Kurztextnachrichten (Digital Mobile Radio) und

Textnachrichten. Die maximale Länge einer DMR-Kurztextnachricht beträgt 23 Zeichen. Die maximale Länge einer Textnachricht beträgt 280 Zeichen, einschließlich der Betreffzeile. Die Betreffzeile wird nur angezeigt, wenn Sie Nachrichten von E-Mail-Anwendungen empfangen.

#### HINWEIS:

Die maximale Länge gilt nur für Modelle mit der neuesten Software und Hardware. Bei Funkgerätemodellen mit älterer Software und Hardware beträgt die maximale Länge für eine Textnachricht 140 Zeichen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

In arabischer Sprache wird der Text von rechts nach links eingegeben.

## Textnachrichten

Die Textnachrichten werden im Posteingang gespeichert und nach Eingang geordnet, d. h. die zuletzt eingegangene Nachricht steht an erster Stelle.

Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist. Durch Gedrückthalten

von  kehren Sie zum Startbildschirm zurück.

## Anzeigen von Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von Textnachrichten auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis **Nachrichten**.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis **Inbox**. Drücken Sie  , um die Option auszuwählen.  
Wenn der Posteingang leer ist:
  - Auf dem Display wird **Liste leer** angezeigt.
  - Ein Ton erklingt, wenn der Tastaturton eingeschaltet ist.

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.
- Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.
- 

## Anzeigen von Telemetriestatus-Textnachrichten

Folgen Sie der Vorgehensweise zum Anzeigen einer Telemetriestatus-Textnachricht aus dem Posteingang.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie  , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Inbox. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.
- Telemetriestatus-Textnachrichten können Sie nicht beantworten.
- Das Display zeigt Telemetrie:  
<Telemetriestatus-Textnachricht>.
- 

- 5 Drücken Sie  lang, um zum Startbildschirm zurückzukehren.
- 

## Antworten auf Textnachrichten

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten auf Ihrem Funkgerät durch.

Wenn Sie eine Textnachricht erhalten:

- Auf dem Display wird die Benachrichtigungsliste mit dem Alias oder der ID des Absenders angezeigt.
- Auf dem Display wird das **Nachrichten**-Symbol angezeigt.

**HINWEIS:**

Wird die **Sendetaste (PTT)** gedrückt, verlässt das Funkgerät den Textnachrichten-Hinweisbildschirm und baut einen Einzel- oder Gruppenruf an den Sender der Nachricht auf.

**1** Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis **Lesen**. Drücken Sie , um die Option auszuwählen. Das Display zeigt die Textnachricht an. Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.
- Drücken Sie  oder  bis **Später lesen**. Drücken Sie , um die Option auszuwählen. Das Funkgerät kehrt zum vor Erhalt der Textnachricht angezeigten Bildschirm zurück.
- Drücken Sie  oder  bis **Löschen**. Drücken Sie , um die Option auszuwählen.

**2** Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um zum Posteingang zurückzukehren.
- Drücken Sie erneut , um die Textnachricht zu beantworten, weiterzuleiten oder zu löschen.

## Antworten auf Textnachrichten mit Quick Text

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten mit Quick Text-Nachrichten auf Ihrem Funkgerät durch.

**1** Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Fahren Sie mit Schritt 3 fort.
- Drücken Sie , um das Menü aufzurufen.

**2**

- Drücken Sie  oder  bis **Nachrichten**. Drücken Sie , um die Option auszuwählen.

**3** Drücken Sie  oder  bis Inbox. Drücken Sie  , um die Option auszuwählen.

---

**4** Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

---

**5** Drücken Sie  , um das Untermenü aufzurufen.

---

**6** Drücken Sie  oder  bis Antw.. Drücken Sie  , um die Option auszuwählen.

---

**7** Drücken Sie  oder  bis KurzAw. Drücken Sie  , um die Option auszuwählen.

---

**8** Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

---

**9** Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
  - Das Funkgerät kehrt zum Bildschirm Wiederholen zurück.
-

## Erneutes Senden von Textnachrichten

Führen Sie die Vorgehensweise zum erneuten Senden von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm **Wiederholen**:

Drücken Sie , um dieselbe Nachricht erneut an denselben Aliasnamen oder dieselbe ID des Funkgeräts bzw. der Gruppe zu senden.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
  - Das Funkgerät kehrt zum Bildschirm **Wiederholen** zurück.
- 

## Weiterleiten von Textnachrichten

Führen Sie die Vorgehensweise zum Weiterleiten von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm **Wiederholen**:

- 1 Drücken Sie  oder  bis **Weiterleiten**, und drücken Sie dann , um dieselbe Nachricht an ein anderes Funkgerät, einen anderen Gruppen-Alias oder eine andere Gruppen-ID zu senden.
- 

- 2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

---

- 3 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:
  - Ein Hinweiston ertönt.

- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

### HINWEIS:

Sie können die Adresse eines Zielfunkgeräts auch manuell auswählen (siehe [Weiterleiten von Textnachrichten durch manuelles Wählen auf Seite 474](#)).

## Weiterleiten von Textnachrichten über manuelles Wählen

Führen Sie die Vorgehensweise zum Weiterleiten von Textnachrichten über manuelles Wählen auf Ihrem Funkgerät aus.

- 1 Drücken Sie  oder  bis Weiterleiten.  
Drücken Sie  , um die Option auszuwählen.

- 2 Drücken Sie  , um dieselbe Nachricht an einen anderen Aliasnamen oder ID des Funkgeräts bzw. der Gruppe zu senden.

- 3 Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird Funkgerät-Nr. : angezeigt.

- 4 Geben Sie die Funkgerät-ID ein, und drücken Sie  , um fortzufahren.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

- 5 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:
  - Ein Hinweiston ertönt.
  - Im Display wird ein positiver Kurzhinweis angezeigt.Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Bearbeiten von Textnachrichten

Wählen Sie **Bearbeiten**, um die Nachricht zu bearbeiten.

### HINWEIS:

Wenn eine Betreffzeile vorhanden ist (bei Nachrichten aus E-Mail-Programmen), so kann diese nicht bearbeitet werden.

- 1 Drücken Sie  oder  bis **Bearbeiten**.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird ein blinkender Cursor angezeigt.
- 2 Verwenden Sie die Tastatur, um Ihre Nachricht zu bearbeiten.
  - Drücken Sie , um eine Stelle nach links zu rücken.

- Drücken Sie  oder , um sich eine Position nach rechts zu bewegen.
- Drücken Sie , um unerwünschte Zeichen zu löschen.
-  gedrückt halten, um die Texteingabemethode zu ändern.

- 3 Drücken Sie , nachdem Sie die Nachricht erstellt haben.
- 4 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis **Senden**, und drücken Sie , um die Nachricht zu senden.
  - Drücken Sie  oder  bis **Sichern**, und drücken Sie , um die Nachricht im Entwurfsordner zu speichern.
  - Drücken Sie , um die Nachricht zu bearbeiten.

- Drücken Sie  zweimal, um die Nachricht entweder zu löschen oder im Entwurfsordner zu sichern.
- 

## Schreiben von Textnachrichten

Führen Sie die Vorgehensweise zum Schreiben von Textnachrichten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
    - Drücken Sie , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Nachrichten.  
Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Verfassen.  
Drücken Sie , um die Option auszuwählen.  
Ein blinkender Cursor wird angezeigt.
- 

- 4 Geben Sie Ihre Nachricht über die Tastatur ein.

Drücken Sie  um sich eine Position nach links zu bewegen.

Drücken Sie  oder , um sich eine Position nach rechts zu bewegen.

Drücken Sie , um unerwünschte Zeichen zu löschen.

 gedrückt halten, um die Texteingabemethode zu ändern.

---

- 5 Drücken Sie , nachdem Sie die Nachricht erstellt haben.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um die Nachricht zu senden.
  - Drücken Sie . Drücken Sie  oder , um zwischen Bearbeiten, Löschen oder Speichern der Nachricht zu wählen. Drücken Sie , um die Option auszuwählen.
-

## Senden von Textnachrichten

Führen Sie die Vorgehensweise zum Senden von Textnachrichten auf Ihrem Funkgerät durch.

Es wird davon ausgegangen, dass Sie über eine neu geschriebene Textnachricht oder eine gespeicherte Textnachricht verfügen.

Wählen Sie den Empfänger der Nachricht aus.  
Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

- Drücken Sie  oder  bis Man. Wählen.

Drücken Sie , um die Option auszuwählen. Geben Sie die Funkgeräte-ID ein. In der ersten Zeile des Displays wird **Gerätenummer:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor

angezeigt. Geben Sie den Funkgeräte-Alias oder die ID ein. Drücken Sie .

Im Display wird die Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein tiefer Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Die Nachricht wird in den Ordner „Ausgang“ verschoben.
- Die Nachricht wird mit dem Symbol für „Fehler beim Senden“ gekennzeichnet.

### HINWEIS:

Bei einer neu geschriebenen Textnachricht, kehrt das Funkgerät zur Option **Wiederholen** zurück.

## Löschen von Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen von Textnachrichten aus der Inbox auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Inbox. Drücken Sie , um die Option auszuwählen. Wenn der Posteingang leer ist:
  - Auf dem Display wird **Liste leer** angezeigt.
  - Ein Hinweiston ertönt.

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie , um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

- 
- 5 Drücken Sie , um das Untermenü aufzurufen.

- 
- 6 Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.

- 
- 7 Drücken Sie  oder  bis Ja. Drücken Sie , um die Option auszuwählen.

Im Display wird ein positiver Kurzhinweis angezeigt. Anschließend wird wieder der Posteingang angezeigt.

## Löschen aller Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Nachrichten**.  
Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis **Inbox**. Drücken Sie  , um die Option auszuwählen.  
Wenn der Posteingang leer ist:
  - Auf dem Display wird **Liste leer** angezeigt.
  - Ein Hinweiston ertönt.

- 4 Drücken Sie  oder  bis **Alle löschen**.  
Drücken Sie  , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis **Ja**. Drücken Sie  , um die Option auszuwählen.  
Im Display wird ein positiver Kurzhinweis angezeigt.

## Gesendete Textnachrichten

Nachdem eine Nachricht an ein anderes Funkgerät gesendet wurde, wird sie im Ordner „Ausgang“ gespeichert. Die zuletzt gesendete Textnachricht wird jeweils an die erste Stelle des Ordners „Ausgang“ gestellt. Sie können eine gesendete Textnachricht erneut senden, bearbeiten, weiterleiten oder löschen.

Der Ordner „Ausgang“ kann bis zu 30 gesendete Nachrichten aufnehmen. Sobald der Ordner voll ist, wird die älteste Textnachricht im Ordner automatisch durch die als nächstes gesendete Textnachricht ersetzt.

Wenn Sie den Bildschirm zum Senden einer Nachricht verlassen, während die Nachricht gesendet wird, aktualisiert das Funkgerät den Status dieser Nachricht im

Ausgangsordner, ohne dies im Display oder durch Abgeben eines Hinweistons anzuzeigen.

Wechselt das Funkgerät in einen anderen Modus oder wird es ausgeschaltet, bevor der Status der Nachricht im Ordner „Ausgang“ aktualisiert wird, kann das Funkgerät die Übertragung anhängiger Nachrichten nicht abschließen und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Das Funkgerät unterstützt bis zu maximal fünf anhängige Nachrichten. Sind bereits fünf Nachrichten anhängig, d. h. noch zu senden, kann das Funkgerät keine weitere Nachricht senden und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Wenn Sie  zu einem beliebigen Zeitpunkt lange drücken, kehrt das Funkgerät zum Startbildschirm zurück.

### HINWEIS:

Wenn der Kanaltyp, z. B. konventioneller digitaler Kanal oder Capacity Plus-Kanal, nicht übereinstimmt, können nur gesendete Nachrichten bearbeitet, weitergeleitet oder gelöscht werden.

## Anzeigen gesendeter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gesendeten Nachrichten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

---
- 2 Drücken Sie  oder  bis **Nachrichten**. Drücken Sie  , um die Option auszuwählen.

---
- 3 Drücken Sie  oder  bis **Ausgang**. Drücken Sie  , um die Option auszuwählen.  
Der Ordner für gesendete Nachrichten ist leer:
  - Auf dem Display wird **Liste leer** angezeigt.
  - Ein tiefer Ton erklingt, wenn der Tastaturton eingeschaltet ist.

---

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie , um die Option auszuwählen.
- Das Symbol in der oberen rechten Ecke des Bildschirms zeigt den Status der Nachricht an. Siehe [Ausgang-Symbole \(Gesendete Nachrichten\)](#).
- 

## Senden von gesendeten Textnachrichten

Führen Sie die Vorgehensweise zum Senden von gesendeten Textnachrichten auf Ihrem Funkgerät durch.

Wenn Sie eine gesendete Nachricht anzeigen:

- 1 Drücken Sie .
- 
- 2 Sie können die gesendete Textnachricht entweder wiederholen oder weiterleiten. Führen Sie einen der folgenden Schritte aus:
-  zum Wiederholen. Drücken Sie , um die Option auszuwählen.

-  zum Weiterleiten. Drücken Sie , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

---

- 3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
  - Das Funkgerät fährt mit dem Bildschirm **Wiederholen** fort. Weitere Informationen finden Sie unter [Erneutes Senden von Textnachrichten auf Seite 169](#).
-

## Löschen von gesendeten Textnachrichten aus dem Ordner „Gesendete Elemente“

Führen Sie die Vorgehensweise zum Löschen von gesendeten Textnachrichten aus dem Ordner „Ausgang“ auf Ihrem Funkgerät durch.

Wenn Sie eine gesendete Nachricht anzeigen:

- 1 Drücken Sie  .

---

- 2 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen.

## Löschen aller gesendeten Textnachrichten aus dem Ordner „Gesendete Elemente“

Führen Sie die Vorgehensweise zum Löschen aller gesendeten Textnachrichten aus den Ordner „Ausgang“ auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).

- Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Ausgang. Drücken Sie  , um die Option auszuwählen.

Der Ordner für gesendete Nachrichten ist leer:

- Auf dem Display wird **Liste leer** angezeigt.
- Ein Hinweiston ertönt.

- 4 Drücken Sie  oder  bis Alle löschen. Drücken Sie  , um die Option auszuwählen.

- 5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen. Im Display wird ein positiver Kurzhinweis angezeigt.

- Drücken Sie  oder  bis Nein. Drücken Sie , um die Option auszuwählen. Das Funkgerät wechselt zum vorherigen Bildschirm.

## Gespeicherte Textnachrichten

Sie können eine Textnachricht speichern und später senden.

Wenn das Drücken der **Sendetaste (PTT)** oder ein Moduswechsel verursacht, dass das Funkgerät den Bildschirm Schreiben/Bearbeiten verlässt, während Sie eine Textnachricht schreiben bzw. bearbeiten, wird Ihre aktuelle Textnachricht automatisch im Entwürfe-Ordner gespeichert.

Die zuletzt abgespeicherte Textnachricht wird jeweils oben in der Entwürfe-Liste eingefügt.

Im Ordner „Entwürfe“ werden maximal die 10 zuletzt gespeicherten Nachrichten aufbewahrt. Wenn der Ordner voll ist, ersetzt die nächste gespeicherte Textnachricht automatisch die jeweils älteste Textnachricht im Ordner.

## Anzeigen gespeicherter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gespeicherten Textnachrichten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis Entwürfe. Drücken Sie , um die Option auszuwählen.
- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie , um die Option auszuwählen.

## Bearbeiten gespeicherter Textnachrichten

Führen Sie die Vorgehensweise zum Bearbeiten von gespeicherten Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie beim Betrachten der Nachricht .

---

2 Drücken Sie  oder  bis **Bearbeiten**.  
Drücken Sie , um die Option auszuwählen.  
Ein blinkender Cursor wird angezeigt.

---

3 Geben Sie Ihre Nachricht über die Tastatur ein.

Drücken Sie , um sich eine Position nach links zu bewegen.

Drücken Sie  oder , um sich eine Position nach rechts zu bewegen.

Drücken Sie , um unerwünschte Zeichen zu löschen.

 gedrückt halten, um die Texteingabemethode zu ändern.

---

4 Drücken Sie , nachdem Sie die Nachricht erstellt haben.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis **Senden**.

Drücken Sie , um die Nachricht zu senden.

- Drücken Sie . Drücken Sie  oder , um zwischen **Speichern** oder **Löschen** der Nachricht zu wählen. Drücken Sie , um die Option auszuwählen.
- 

## Löschen gespeicherter Textnachrichten aus dem Entwurfsordner

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).

- Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Nachrichten.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Entwürfe.  
Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Löschen. Drücken Sie  zum Löschen der Textnachricht.
- 

## Quick Text-Nachrichten

Ihr Funkgerät unterstützt je nach der Programmierung durch Ihren Händler 50 Quick Text-Nachrichten.

Quick Text-Nachrichten sind zwar vorgegeben, Sie können jedoch jede Nachricht bearbeiten, bevor Sie sie senden.

## Senden von Quick Text-Nachrichten

Führen Sie die Vorgehensweise zum Senden von vordefinierten Quick Text-Nachrichten auf Ihrem Funkgerät an einen vordefinierten Aliasnamen durch.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
    - Drücken Sie die vorprogrammierte **Schnellwahltaste**. Lesen Sie weiter unter [Schritt 6](#).  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.
  - Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Nachrichten.  
Drücken Sie  , um die Option auszuwählen.
-

**3** Drücken Sie  oder  bis Quick Text.  
Drücken Sie  , um die Option auszuwählen.

---

**4** Drücken Sie  oder  bis zur gewünschten Quick Text-Nachricht. Drücken Sie  , um die Option auszuwählen.

---

**5** Gehen Sie folgendermaßen vor, um den Empfänger auszuwählen und die Nachricht zu senden.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

---

**6** Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.

- Im Display wird ein negativer Kurzhinweis angezeigt.
  - Das Funkgerät fährt mit dem Bildschirm [Wiederholen](#) fort. Weitere Informationen finden Sie unter [Erneutes Senden von Textnachrichten auf Seite 169](#).
- 

## Konfiguration der Texteingabe

Ihr Funkgerät ermöglicht Ihnen die Konfiguration verschiedener Texte.

Sie können die folgenden Einstellungen für die Eingabe von Text auf Ihrem Funkgerät konfigurieren:

- Worterkennung
- Wortüberprüfung
- Großschreibung am Satzanfang
- Meine Wörter

Ihr Gerät unterstützt die folgenden Texteingabemethoden:

- Zahlen
- Symbole
- Texterkennung oder Multi-Tap

- Sprache (wenn programmiert)

### HINWEIS:

Sie können jederzeit  drücken, um zum vorhergehenden Bildschirm zu wechseln, oder  lang drücken, um zum Ausgangsbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

## Aktivieren oder Deaktivieren der Wortüberprüfung

Bietet eine Auswahl alternativer Wörter an, wenn das in den Texteditor eingegebene Wort vom integrierten Wörterbuch nicht erkannt wird.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Texteingabe.

Drücken Sie , um die Option auszuwählen.

5 Drücken Sie  oder  bis Korrektes Wort.

Drücken Sie , um die Option auszuwählen.

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Korrektes Wort. Drücken Sie , um die Option auszuwählen.
- Drücken Sie , um die Wortüberprüfung zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Drücken Sie , um die Wortüberprüfung zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Aktivieren oder Deaktivieren der Worterkennung

**Worterkennung:** Ihr Funkgerät kann Folgen gebräuchlicher Wörter, die Sie oft eingeben, lernen. Nachdem Sie das erste Wort einer gebräuchlichen Wortfolge in den Texteditor eingegeben haben, schlägt es dann das nächste Wort vor, das Sie möglicherweise verwenden möchten.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Texteingabe. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Worterkennung. Drücken Sie  , um die Option auszuwählen.

---

- 6 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  , um die Worterkennung zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Drücken Sie  , um die dynamische Mikrofonverzerrungssteuerung zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Großschreibung am Satzanfang

Diese Funktion aktiviert automatisch die Großschreibung für den ersten Buchstaben des ersten Worts in jedem neuen Satz.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Texteingabe. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Satzanf.groß. Drücken Sie , um die Option auszuwählen.

---

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um Großschreibung am Satzanfang zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.

- Drücken Sie , um Großschreibung am Satzanfang zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Anzeigen benutzerdefinierter Wörter

Hier können Sie Ihre eigenen benutzerdefinierten Wörter im integrierten Wörterbuch des Funkgeräts hinzufügen. Das Funkgerät verwaltet eine Liste, die diese Wörter enthält.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis **Texteingabe**.  
Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis **Meine Wörter**.  
Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis **Wortliste**.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird die Liste der benutzerdefinierten Wörter angezeigt.

---

## Bearbeiten der benutzerdefinierten Wörter

Sie können die in Ihrem Funkgerät gespeicherten benutzerdefinierten Wörter bearbeiten.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis **Dienstprogramme**. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis **Funkgeräteeinstellungen**. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis **Texteingabe**.  
Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis **Meine Wörter**.  
Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis **Wortliste**.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird die Liste der benutzerdefinierten Wörter angezeigt.

---

7 Drücken Sie  oder  bis zum gewünschten Wort. Drücken Sie  , um die Option auszuwählen.

8 Drücken Sie  oder  bis Bearbeiten. Drücken Sie  , um die Option auszuwählen.

9 Bearbeiten Sie über das Tastenfeld das benutzerdefinierte Wort.

- Drücken Sie  , um sich eine Position nach links zu bewegen.
- Drücken Sie die Taste  , um eine Stelle nach rechts zu rücken.
- Zum Löschen unerwünschter Zeichen drücken Sie  .
-  gedrückt halten, um die Texteingabemethode zu ändern.

10 Drücken Sie  , sobald Ihr benutzerdefiniertes Wort komplett ist.

Im Display wird der Kurzhinweis für den Übergangszustand angezeigt, der angibt, dass Ihr benutzerdefiniertes Wort gespeichert wird.

- Wenn das benutzerdefinierte Wort gespeichert wurde, erklingt ein Signalton, und im Display wird der positive Kurzhinweis angezeigt.
- Wenn das benutzerdefinierte Wort nicht gespeichert wurde, erklingt ein tiefer Hinweisston, und im Display wird der negative Kurzhinweis angezeigt.

## Hinzufügen benutzerdefinierter Wörter

Sie können benutzerdefinierte Wörter im integrierten Funkgerätewörterbuch hinterlegen.

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Texteingabe. Drücken Sie  , um die Option auszuwählen.

5 Drücken Sie  oder  bis Meine Wörter. Drücken Sie  , um die Option auszuwählen.

6 Drücken Sie  oder  bis Neues Wort. Drücken Sie  , um die Option auszuwählen. Im Display wird die Liste der benutzerdefinierten Wörter angezeigt.

7 Bearbeiten Sie über das Tastenfeld das benutzerdefinierte Wort.

- Drücken Sie  , um sich eine Position nach links zu bewegen.

- Drücken Sie die Taste  , um eine Stelle nach rechts zu rücken.
- Zum Löschen unerwünschter Zeichen drücken Sie  .
-  gedrückt halten, um die Texteingabemethode zu ändern.

8 Drücken Sie  , sobald Ihr benutzerdefiniertes Wort komplett ist.

Im Display wird der Kurzhinweis für den Übergangszustand angezeigt, der angibt, dass Ihr benutzerdefiniertes Wort gespeichert wird.

- Wenn das benutzerdefinierte Wort gespeichert wurde, erklingt ein Hinweisston, und im Display wird der positive Kurzhinweis angezeigt.
- Wenn das benutzerdefinierte Wort nicht gespeichert wurde, erklingt ein tiefer Hinweisston, und im Display wird der negative Kurzhinweis angezeigt.

## Löschen eines benutzerdefinierten Wortes

Sie können die in Ihrem Funkgerät gespeicherten benutzerdefinierten Wörter löschen, indem Sie Folgendes ausführen.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Texteingabe. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Meine Wörter. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zum gewünschten Wort. Drücken Sie , um die Option auszuwählen.

---

7 Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.

---

8 Wählen Sie eine der folgenden Optionen aus.

- Drücken Sie unter Eintrag löschen? , um Ja auszuwählen. Im Display wird Eintrag gelöscht angezeigt.
  - Drücken Sie  oder  bis Nein. Drücken Sie , um zum vorangehenden Bildschirm zurückzukehren.
-

## Löschen aller benutzerdefinierten Wörter

Führen Sie die Vorgehensweise zum Löschen aller benutzerdefinierten Wörter aus dem integrierten Wörterbuch Ihres Funkgeräts durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Texteingabe. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Meine Wörter. Drücken Sie , um die Option auszuwählen.

---

- 6 Drücken Sie  oder  bis Alle löschen. Drücken Sie , um die Option auszuwählen.

---

- 7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie unter Eintrag löschen? , um Ja auszuwählen. Im Display wird Alle Einträge gelöscht angezeigt.
  - Drücken Sie  oder  bis Nein, um zum vorherigen Bildschirm zurückzukehren. Drücken Sie , um die Option auszuwählen.
- 

## Job Tickets

Diese Funktion ermöglicht Ihrem Funkgerät den Empfang von Meldungen vom Dispatcher, in denen auszuführende Aufgaben aufgelistet sind.

**HINWEIS:**

Diese Funktion kann individuell über CPS gemäß den Anforderungen des Benutzers angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Es gibt zwei Ordner mit verschiedenen Jobtickets:

**Ordner Meine Aufgaben**

Personalisierter Jobtickets, die der angemeldeten Benutzer-ID zugewiesen wurden.

**Ordner Gemeinsame Aufgaben**

Freigegebene Jobtickets, die einer Gruppe zugewiesen wurden.

Sie können auf Job Tickets antworten und diese in den Job Ticket-Ordner einsortieren. Standardmäßig gibt es die Ordner **Alle**, **Neu**, **Gestartet** und **Abgeschlossen**. Es können 10 zusätzliche Ordner eingerichtet werden. Sprechen Sie zu diesem Zweck mit Ihrem Händler oder Systemadministrator.

**HINWEIS:**

Die Jobtickets bleiben auch nach Ausschalten des Funkgeräts erhalten.

Alle Jobtickets befinden sich im Ordner **Alle**. Je nachdem, wie Ihr Funkgerät programmiert ist, sind Jobtickets nach ihrer Priorität gefolgt vom Empfangszeitpunkt sortiert. Neue

Jobtickets, Jobtickets mit kürzlichen Statusänderungen und Jobtickets mit der höchsten Priorität werden zuerst aufgeführt. Nach Erreichen der maximalen Anzahl an Job Tickets ersetzt das nächste Job Ticket automatisch das letzte in Ihrem Gerät aufgeführte Job Ticket. Ihr Funkgerät unterstützt maximal 100 oder 500 Jobtickets, je nach Funkgerätmodell. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator. Ihr Funkgerät erkennt automatisch duplizierte Jobtickets mit der gleichen Jobticket-ID und löscht diese.

Der Verteiler weist Jobtickets je nach ihrer Wichtigkeit eine Prioritätsstufe zu. Es sind drei Prioritätsstufen verfügbar: Priorität 1, Priorität 2 und Priorität 3. Priorität 1 ist die höchste Prioritätsstufe, und Priorität 3 ist die niedrigste Prioritätsstufe. Es gibt auch Jobtickets ohne Priorität.

Ihr Funkgerät wird dementsprechend aktualisiert, wenn der Dispatcher folgende Änderungen vornimmt:

- Ändern des Inhalts von Jobtickets
- Hinzufügen oder Bearbeiten der Prioritätsstufe des Jobtickets
- Verschieben von Jobtickets in einen anderen Ordner
- Abbrechen des Jobtickets

## Zugriff auf den Job Ticket-Ordner

Befolgen Sie die Anweisungen für den Zugriff auf den Jobticket-Ordner.

- Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Job Ticket**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 
- Drücken Sie  oder  bis Job Tickets.  
Drücken Sie  , um die Option auszuwählen.

- 
- Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.

- 
- Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

## An- und Abmelden beim Remote-Server

Mit dieser Funktion können Sie sich mit Ihrer Benutzer-ID beim Remoteserver an- und abmelden.

- Drücken Sie  , um das Menü aufzurufen.

- 
- Drücken Sie  oder  bis Anmelden.  
Drücken Sie  , um die Option auszuwählen.

Wenn Sie bereits angemeldet sind, zeigt das Menü **Abmelden an**.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

- 
- Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweis erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Erstellen von Jobtickets

Ihr Funkgerät kann Jobtickets erstellen, die auf Arbeitsscheinvorlagen basieren und Ihnen ermöglichen, auszuführende Aufgaben zu versenden.

Für die Konfiguration der Arbeitsscheinvorlage wird die CPS-Programmiersoftware benötigt.

**1** Drücken Sie  , um das Menü aufzurufen.

**2** Drücken Sie  oder  bis Jobtickets.  
Drücken Sie  , um die Option auszuwählen.

**3** Drücken Sie  oder  bis Ticket erstellen. Drücken Sie  , um die Option auszuwählen.

## Reagieren auf Job Tickets

Gehen Sie wie folgt vor, um auf Jobtickets auf Ihrem Funkgerät zu antworten.

**1** Drücken Sie  , um das Menü aufzurufen.

**2** Drücken Sie  oder  bis Jobtickets.  
Drücken Sie  , um die Option auszuwählen.

**3** Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie erneut  , um das Untermenü aufzurufen.  
Sie können auch die entsprechende Zahlentaste (1-9) drücken, um eine **Kurzantwort** zu senden.

---

6 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

---

7 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Senden von Job Tickets mithilfe einer Job-Ticket-Vorlage

Wenn Ihr Funkgerät mit einer Jobticket-Vorlage konfiguriert ist, führen Sie folgende Maßnahmen aus, um das Jobticket zu senden.

1 Verwenden Sie die Tastatur, um die erforderliche Raumnummer einzugeben. Drücken Sie  , um die Option auszuwählen.

---

2 Drücken Sie  oder  bis Raumstatus.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zur gewünschten Option. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis **Senden**. Drücken Sie  , um die Option auszuwählen.
- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.
- 

- 5 Warten Sie auf eine Quittierung.
- Bei erfolgreicher Durchführung:
- Ein positiver Hinweiston erklingt.
  - Im Display wird ein positiver Kurzhinweis angezeigt.
- Bei nicht erfolgreicher Durchführung:
- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Senden von Job Tickets mithilfe mehrerer Job-Ticket-Vorlagen

Wenn Ihr Funkgerät mit mehr als einer Jobticket-Vorlage konfiguriert ist, führen Sie folgende Maßnahmen aus, um die Jobtickets zu senden.

- 1 Drücken Sie  oder  bis zur gewünschten Option. Drücken Sie  , um die Option auszuwählen.
- 

- 2 Drücken Sie  oder  bis **Senden**. Drücken Sie  , um die Option auszuwählen.
- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.
- 

- 3 Warten Sie auf eine Quittierung.
- Bei erfolgreicher Durchführung:
- Ein positiver Hinweiston erklingt.
  - Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweis erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Löschen von Job Tickets

Führen Sie die Vorgehensweise zum Löschen von Job Tickets auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Job Ticket**. Lesen Sie weiter unter [Schritt 4](#)
  - Drücken Sie  , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis Jobtickets.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.

- 
- 4 Drücken Sie  oder  bis zum Ordner **Alle**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

- 
- 6 Drücken Sie erneut  , während das Job Ticket angezeigt wird.

- 
- 7 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.
-

**8** Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Löschen aller Jobtickets

Gehen Sie wie folgt vor, um Jobtickets auf Ihrem Funkgerät zu löschen.

**1** Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Job Ticket**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.
- 

- 2** Drücken Sie  oder  bis Jobtickets.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3** Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.
- 

- 4** Drücken Sie  oder  bis zum Ordner **Alle**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 5** Drücken Sie  oder  bis **Alle löschen**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 6** Führen Sie einen der folgenden Schritte aus:
- Drücken Sie  oder  bis **Ja**. Drücken Sie  , um die Option auszuwählen. Im Display wird ein positiver Kurzhinweis angezeigt.

- Drücken Sie  oder  bis Nein. Drücken Sie , um die Option auszuwählen. Das Funkgerät wechselt zum vorherigen Bildschirm.

## Privacy

Durch den Einsatz softwaregestützter Verschlüsselung verhindert diese Funktion, wenn aktiviert, unbefugtes Zuhören auf einem Kanal. Die Signalisierungs- und Benutzeridentifikationsteile einer Übertragung werden nicht verschlüsselt.

Um verschlüsselt senden zu können, muss die Verschlüsselung für den Kanal aktiviert sein, während dies für empfangende Funkgeräte nicht erforderlich ist. Kanäle mit aktivierter Verschlüsselung können weiterhin normale (unverschlüsselte) Übertragungen empfangen.

Ihr Funkgerät unterstützt nur verbesserte Verschlüsselung. Zum Entschlüsseln eines Anrufs mit aktivierter Verschlüsselung muss Ihr Funkgerät den gleichen Schlüsselwert und dieselbe Schlüssel-ID für eine erweiterte Verschlüsselung wie das sendende Funkgerät verwenden.

Wenn ihr Funkgerät einen verschlüsselten Anruf mit anderem Schlüsselwert und anderer Schlüssel-ID

empfängt, hören Sie gar nichts für eine erweiterte Verschlüsselung.

Je nachdem, wie Ihr Funkgerät programmiert wurde, können Funkgeräte auf einem Kanal mit aktivierter Verschlüsselung weiterhin normale (unverschlüsselte) Übertragungen empfangen. Darüber hinaus kann das Funkgerät einen Warnton ausgeben oder nicht. Auch dies richtet sich danach, wie es programmiert wurde.

### HINWEIS:

Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

Die grüne LED leuchtet, während das Funkgerät sendet. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell.

### HINWEIS:

Die Verschlüsselungsfunktion wird nicht für alle Funkgerätmodelle angeboten oder sie haben eine andere Konfiguration. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Ein- und Ausschalten des Datenschutzes

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Verschlüsselung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Verschlüsselung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis **Verschl..**

Drücken Sie  , um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis **Ein**. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben **Ein** angezeigt.
- Drücken Sie  oder  bis **Aus**. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben **Aus** angezeigt.

## Antwortsperr

Anhand dieser Funktion können Sie verhindern, dass Ihr Funkgerät auf eingehende Übertragungen reagiert.

### HINWEIS:

Dies ist eine käufliche Funktion. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Wenn aktiviert, generiert das Funkgerät keine abgehenden Übertragungen in Antwort auf eingehende Übertragungen, wie etwa Funkgerätkontrolle, Rufhinweis, Funkgerät deaktivieren, Remote-Überwachung, Automatischer Registrierungsservice (ARS), Antwort auf Einzelrufe und Senden von GNSS-Standortberichten. Ihr Funkgerät kann keine Einzelrufbestätigungen empfangen, wenn diese Funktion aktiviert ist. Das Funkgerät kann jedoch manuell Übertragungen senden.

### Ein-/Ausschalten der Antwortsperr

Führen Sie die Vorgehensweise zum Ein- oder Ausschalten der Antwortsperr auf Ihrem Funkgerät durch.

Drücken Sie die programmierte **Antwortsperr**-Taste.

---

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein kurzzeitiger positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.

- Im Display wird ein kurzzeitiger negativer Kurzhinweis angezeigt.

### Blockieren/Wiederherstellen

Mit dieser Funktion können Sie jedes im System befindliche Funkgerät aktivieren oder deaktivieren. Der Händler oder Systemadministrator kann z. B. ein gestohlenen Funkgerät deaktivieren und damit für unberechtigte Benutzer unbrauchbar machen oder ein wiedergefundenes Funkgerät aktivieren.

Ein Funkgerät kann über die Konsole oder einen von einem anderen Funkgerät initiierten Befehl deaktiviert (blockiert) oder aktiviert (wiederhergestellt) werden.

Sobald ein Funkgerät deaktiviert wurde, wird ein negativer Hinweiston ausgegeben, und auf der Startseite erscheint **Kanal gesperrt**.

Wenn für das Funkgerät Stun aktiviert wird, kann das Funkgerät keine benutzerinitiierten Services auf dem System anfordern oder empfangen, das die Stun-Vorgehensweise ausgeführt hat. Das Funkgerät kann jedoch zu einem anderen System wechseln. Das Funkgerät sendet weiterhin GNSS-Positionsberichte und kann aus der Ferne im Stun-Modus überwacht werden.

**HINWEIS:**

Der Händler oder Systemadministrator kann ein Funkgerät permanent deaktivieren. Weitere Informationen finden Sie unter [Funkgerät deaktivieren auf Seite 206](#).

## Blockieren eines Funkgeräts

Führen Sie die Vorgehensweise zum Deaktivieren eines Funkgeräts durch.

- 1 Drücken Sie die vorprogrammierte **Funkgerät deaktivieren**-Taste.

- 2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.

- 3 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Blockieren von Funkgeräten mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Deaktivieren eines Funkgeräts mithilfe der Kontaktliste durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis FunkgDeak.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.

---

5 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Blockieren von Funkgeräten über manuelles Wählen

Führen Sie die Vorgehensweise zum Deaktivieren eines Funkgeräts über manuelles Wählen durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Funkgerät-Nr.  
Drücken Sie , um die Option auszuwählen.  
In der ersten Textzeile wird Funkgerät-Nr. : angezeigt.

---

5 Geben Sie die Funkgerät-ID ein, und drücken Sie

 , um fortzufahren.

---

6 Drücken Sie  oder  bis FunkgDeak.

Drücken Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.

---

7 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Wiederherstellen eines Funkgeräts

Führen Sie die Vorgehensweise zum Aktivieren eines Funkgeräts durch.

1 Drücken Sie die konfigurierte **Funkgerät aktivieren-**Taste.

---

2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

Im Display wird **Funkg.aktiv.** und der Funkgeräte-Alias oder die ID angezeigt. Die grüne LED leuchtet.

---

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.

- Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Wiederherstellen eines Funkgeräts mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Aktivieren eines Funkgeräts mithilfe der Kontaktliste durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

  - 2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen.

---

  - 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis FunkgAkt. Drücken Sie , um die Option auszuwählen. Die grüne LED blinkt. Im Display wird Funkg.aktiv. und der Funkgeräte-Alias oder die ID angezeigt. Die grüne LED leuchtet.
- 

- 5 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:
    - Ein Hinweiston ertönt.
    - Auf dem Display wird FunkgAkt erfolgr. angezeigt.Bei nicht erfolgreicher Durchführung:
    - Ein Hinweiston ertönt.
    - Auf dem Display wird FunkgAkt fehlg. angezeigt.
-

## Wiederherstellen eines Funkgeräts über manuelles Wählen

Führen Sie die Vorgehensweise zum Aktivieren eines Funkgeräts über manuelles Wählen durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Man. Wählen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Einzelruf. Drücken Sie , um die Option auszuwählen. In der ersten Textzeile wird Funkgerät-Nr. : angezeigt.

---

- 5 Geben Sie die Funkgerät-ID ein, und drücken Sie , um fortzufahren.
- 

- 6 Drücken Sie  oder  bis FunkgAkt t. Drücken Sie , um die Option auszuwählen. Die grüne LED blinkt. Im Display wird Funkg.aktiv. und der Funkgeräte-Alias oder die ID angezeigt. Die grüne LED leuchtet.
- 

- 7 Warten Sie auf eine Quittierung. Bei erfolgreicher Durchführung:
    - Ein Hinweiston ertönt.
    - Auf dem Display wird FunkgAkt t erfolgr. angezeigt.
 Bei nicht erfolgreicher Durchführung:
    - Ein Hinweiston ertönt.
    - Auf dem Display wird FunkgAkt t fehlg. angezeigt.
-

## Funkgerät deaktivieren

Diese Funktion bietet eine erweiterte Sicherheitsmaßnahme, um den nicht autorisierten Zugriff auf das Funkgerät zu beschränken.

Die Funktion „Funkgerät deaktivieren“ kann ein Funkgerät unbrauchbar machen. Der Händler oder Systemadministrator kann ein verlorenes oder verlegtes Funkgerät deaktivieren, um die nicht autorisierte Verwendung zu verhindern.

Beim Einschalten zeigt ein deaktiviertes Funkgerät vorübergehend die Meldung **Funkgerät deaktiviert** auf dem Bildschirm an, um den deaktivierten Status anzuzeigen.

### HINWEIS:

Ein deaktiviertes Funkgerät kann nur in einem Reparatur-Center von Motorola Solutions wiederhergestellt werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Alleinarbeiter

Der Alleinarbeiterschutz löst einen Notruf aus, wenn eine vordefinierte Zeit lang keine Benutzeraktivität erfasst wird,

d. h. beispielsweise keine Taste am Funkgerät gedrückt wird oder der Kanalwahlschalter nicht betätigt wird.

Wurde während der einprogrammierten Dauer keine Benutzeraktivität erfasst, warnt das Funkgerät den Benutzer durch ein akustisches Signal vor, sobald der Inaktivitäts-Timer abgelaufen ist.

Haben Sie auch nach Ablauf des vordefinierten Ansprechzeit-Timers noch nicht bestätigt, löst das Funkgerät ein Notsignal aus, so wie vom Händler oder Systemadministrator programmiert.

Weitere Informationen finden Sie unter [Notruf auf Seite 149](#).

### HINWEIS:

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Passwortgeschützter Zugriff auf das Funkgerät

Diese Funktion ermöglicht Ihnen die Beschränkung des Zugriffs auf das Funkgerät, indem ein Passwort abgefragt wird, wenn das Gerät eingeschaltet wird.

Sie können das Passwort über ein Tastenfeldmikrofon oder mithilfe der **Auf/Ab**-Tasten eingeben.

## Zugreifen auf Funkgeräte mithilfe von Kennwörtern

Führen Sie die Vorgehensweise für das Zugreifen auf Ihr Funkgerät mit einem Passwort durch.

- 1 Geben Sie das aktuelle vierstellige Passwort ein.

### HINWEIS:

Die Benutzung des **Fußnotschalters** hebt die Passwortheingabe für den Zugriff auf das Funkgerät auf.

- Über ein Tastenfeldmikrofon.
- Drücken Sie  oder , um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie , um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen.

- 2 Drücken Sie , um das Passwort einzugeben.

Bei erfolgreicher Durchführung wird das Funkgerät eingeschaltet.

Bei nicht erfolgreicher Durchführung:

- Nach dem ersten und zweiten Versuch wird auf dem Display `Falsches Passwort` angezeigt. Wiederholen Sie [Schritt 1](#).
- Nach dem dritten Versuch erscheint im Display `Falsches Passwort` und dann `Gerät gesperrt`. Ein Hinweiston ertönt. Die gelbe LED blinkt. Ihr Funkgerät wird 15 Minuten lang gesperrt.

### HINWEIS:

Im gesperrten Status reagiert das Funkgerät nur auf Eingaben des **Ein-/Aus-/Lautstärkereglers** und der vorprogrammierten Taste **Hintergrundbeleuchtung**.

---

## Entsperren von Funkgeräten

Im gesperrten Zustand kann Ihr Funkgerät keine Anrufe empfangen. Führen Sie die Vorgehensweise zum Entsperren Ihres Funkgeräts durch.

Führen Sie einen der folgenden Schritte aus:

- Wenn das Funkgerät eingeschaltet ist, warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter

[Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 207](#), um auf das Funkgerät zuzugreifen.

- Wenn das Funkgerät ausgeschaltet ist, schalten Sie das Gerät ein. Ihr Funkgerät startet den 15-Minuten-Timer für die Sperre.

Ein Hinweiston ertönt. Die gelbe LED blinkt. Im Display wird Gerät `gesperrt` angezeigt.

Warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter [Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 207](#), um auf das Funkgerät zuzugreifen.

## Ein-/Ausschalten der Passwortsperre

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Passwortsperre auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis `Passw-Sperre`.

Drücken Sie , um die Option auszuwählen.

---

5 Geben Sie das aktuelle vierstellige Passwort ein.

- Über ein Tastenfeldmikrofon.
  - Drücken Sie  oder , um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie , um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen. Bei der Passwordeingabe ertönt mit jedem Drücken einer Taste ein positiver Hinweiston.
- 

6 Drücken Sie , um das Passwort einzugeben.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

---

### 7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Einschalten.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird  neben Einschalten angezeigt.
- Drücken Sie  oder  bis Abschalten.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird  neben Abschalten angezeigt.

## Ändern von Kennwörtern

Führen Sie die Vorgehensweise zum Ändern von Kennwörtern auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Passw-Sperre. Drücken Sie , um die Option auszuwählen.

5 Geben Sie das aktuelle Passwort mit vier Ziffern ein, und drücken Sie , um fortzufahren.

Wenn das Passwort falsch ist, erscheint im Display Falsches Passwort, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

6 Drücken Sie  oder  bis Passw.änd. angezeigt wird. Drücken Sie , um die Option auszuwählen.

7 Geben Sie ein neues vierstelliges Passwort ein, und drücken Sie , um fortzufahren.

- 8 Geben Sie das neue vierstellige Passwort noch einmal ein, und drücken Sie  , um fortzufahren.

Bei erfolgreicher Durchführung wird auf dem Display `Passwort geändert` angezeigt.

Bei nicht erfolgreicher Durchführung wird auf dem Display `PW stimmen nicht Überein` angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

---

## Benachrichtigungsliste

Ihr Funkgerät hat eine Mitteilungsliste, die alle Ihre „ungelesenen“ Ereignisse auf dem Kanal, wie z. B. ungelesene Textnachrichten, Telemetrienachrichten, verpasste Rufe und Rufhinweise sammelt.

Auf dem Display wird das **Benachrichtigungssymbol** angezeigt, wenn die Benachrichtigungsliste mindestens ein Ereignis enthält.

Die Liste unterstützt maximal 40 ungelesene Ereignisse. Wenn die Liste voll ist, ersetzt das nächste Ereignis automatisch den jeweils ältesten Listeneintrag. Die Ereignisse werden nach dem Lesen aus der Benachrichtigungsliste entfernt.

Für Textnachrichten, verpasste Rufe und Rufhinweise beträgt die maximale Anzahl 30 Textnachrichten und 10 verpasste Rufe bzw. Rufhinweise. Diese maximale Anzahl hängt von der Kapazität der einzelnen Funktionslisten ab (Jobtickets oder Textnachrichten, verpasste Rufe oder Rufhinweise).

## Aufrufen der Mitteilungsliste

Führen Sie die Vorgehensweise zum Aufrufen der Mitteilungsliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Mitteilung.  
Drücken Sie  , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis zum gewünschten Ereignis. Drücken Sie  , um die Option auszuwählen.  
  
Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

## Over-the-Air Programmierung

Ihr Händler kann Ihr Funkgerät über Over-the-Air-Programmierung (OTAP) ohne physische Verbindung ferngesteuert aktualisieren. Darüber hinaus können auch einige Einstellungen über OTAP konfiguriert werden.

Wenn OTAP auf Ihrem Funkgerät aktiv ist, blinkt die grüne LED.

Wenn Ihr Funkgerät große Datenmengen empfängt:

- Das Display zeigt das Symbol **Große Datenmengen** an.
- Der Kanal ist belegt.
- Ein negativer Hinweiston erklingt, wenn Sie die **PTT**-Taste drücken.

Wenn OTAP abgeschlossen ist, je nach Konfiguration:

- Ein Hinweiston ertönt. Auf dem Display wird **Aktualisierung Neustart** angezeigt. Das Funkgerät wird durch Aus- und Einschalten neu gestartet.
- Sie können **Jetzt neu start.** oder **Später auswählen**. Wenn Sie **Später auswählen**, wechselt Ihr Funkgerät zum vorherigen Bildschirm. Auf dem Display wird das **OTAP-Verzögerungs-Timer**-Symbol angezeigt, bis der automatische Neustart erfolgt.

Wenn Ihr Funkgerät nach dem automatischen Neustart eingeschaltet wird:

- Bei erfolgreichem Abschluss wird auf dem Display **SW-Update abgeschlossen** angezeigt.
- Schlägt der Vorgang fehl, so zeigt das Display **SW-Update fehlg.** angezeigt.

Informationen zur aktualisierten Softwareversion finden Sie unter [Überprüfen der Software-Aktualisierungsinformationen auf Seite 243](#).

## Auswählen von Verbindungsmodi für Peripheriegeräte von Drittanbietern

Folgen Sie den Anweisungen, um eine der folgenden Verbindungsmodie für Peripheriegeräte anderer Hersteller auszuwählen:

- Motorola Solutions
- PC und Audio
- Datenzubehör
- Telemetrie

- Allgemein

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Kabeltyp. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis zum gewünschten Verbindungsmodus. Drücken Sie , um die Option auszuwählen.

Im Display wird der gewählte Verbindungsmodus angezeigt. Der Bildschirm wechselt zum vorherigen Menü.

---

## Anzeige der Empfangssignalstärke (RSSI)

Mit dieser Funktion können Sie die Werte für die Anzeige der Empfangssignalstärke (RSSI) ansehen.

Auf dem Display wird das **RSSI**-Symbol in der oberen rechten Ecke angezeigt. Unter [Anzeigesymbole](#) finden Sie weitere Informationen zum **RSSI**-Symbol.

## Anzeigen von RSSI-Werten

Führen Sie die Vorgehensweise zum Anzeigen von RSSI-Werten auf Ihrem Funkgerät durch.

Auf dem Startbildschirm:

- 1 Drücken Sie innerhalb von fünf Sekunden  dreimal und dann sofort  .  
Im Display werden die aktuellen RSSI-Werte angezeigt.

---

- 2 Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

## Front-Panel-Konfiguration

Sie können bestimmte Funktionsparameter in der Front-Panel-Konfiguration anpassen, um die Verwendung des Funkgeräts zu optimieren.

## Eingabe von Front-Panel-Konfiguration

Führen Sie die Vorgehensweise zum Aufrufen des Bedienfeld-Programmiermodus (FFP) auf Ihrem Funkgerät durch.

Durch Gedrückthalten von  kehren Sie zum Startbildschirm zurück.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgerät programmieren. Drücken Sie  , um die Option auszuwählen.

## Bearbeiten von Parametern im FFP-Modus

Verwenden Sie bei der Navigation durch die Funktionsparameter die folgenden Tasten.

-  ,  – Zum Durchblättern von Optionen, Erhöhen/Verringern von Werten und um senkrecht zu navigieren.

-  – Zum Wählen der Option bzw. zum Aufrufen eines Untermenüs.
-  – Kurz drücken, um zum vorhergehenden Menü zurückzukehren oder um den Auswahlbildschirm zu verlassen. Gedrückt halten, um zum Ausgangsbildschirm zurückzukehren.

## Wi-Fi-Betrieb

Wi-Fi® ist eine eingetragene Marke der Wi-Fi Alliance®.

### HINWEIS:

Diese Funktion gilt nur für DM4601e .

Diese Funktion ermöglicht Ihnen, ein WLAN-Netzwerk einzurichten und eine Verbindung damit herzustellen. Wi-Fi unterstützt Aktualisierungen an der Firmware des Funkgeräts, Codeplug und Ressourcen, wie z. B. Sprachpakete und Sprachansage.

## Ein-/Ausschalten von WLAN

Die programmierte Taste **Ein-/Ausschalten von WLAN** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sprachansagen für die vorprogrammierte Taste **WLAN ein oder aus** können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Sie können WLAN durch Ausführen einer der folgenden Aktionen ein- oder ausschalten.

- Drücken Sie die vorprogrammierte Taste **WLAN ein oder aus**. Die Sprachansage besagt: WLAN wird eingeschaltet oder WLAN wird ausgeschaltet.
- Rufen Sie diese Funktion über das Menü auf.
  - a. Drücken Sie , um das Menü aufzurufen.
  - b. Drücken Sie  oder  bis **WLAN**, und drücken Sie  zum Auswählen.
  - c. Drücken Sie  oder  bis **WLAN ein** und drücken Sie  zum Auswählen.

Drücken Sie , um WLAN zu aktivieren. Im Display wird  neben **Aktiviert** angezeigt.

Drücken Sie , um das WLAN zu deaktivieren. Neben Aktiviert wird kein  mehr angezeigt.

## Verbinden mit einem Access Point im Netzwerk

Wenn Sie WLAN einschalten, startet das Funkgerät einen Suchlauf und stellt eine Verbindung zu einem Access Point im Netzwerk her.

Sie können auch über das Menü eine Verbindung mit einem Access Point im Netzwerk herstellen.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis zu einem Netzwerk-Access-Point, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Verbinden, und drücken Sie  zum Auswählen.

---

- 6 Geben Sie das Kennwort ein, und drücken Sie .

---

Wenn die Verbindung erfolgreich hergestellt werden konnte, zeigt das Funkgerät einen Hinweis an, und der Access Point des Netzwerks wird in der Profilliste gespeichert.

## Prüfen des WLAN-Verbindungsstatus

Führen Sie die Vorgehensweise zum Prüfen des WLAN-Verbindungsstatus durch.

Drücken Sie die vorprogrammierte Taste **Wi-Fi-Status abfragen**, um den Verbindungsstatus über eine Sprachansage abzurufen. Die Sprachansage besagt: Wi-Fi

ist deaktiviert, Wi-Fi ist aktiviert, aber keine Verbindung,  
oder Wi-Fi ist aktiviert mit Verbindung.

- Das Display zeigt WLAN Aus, wenn WLAN ausgeschaltet ist.
- Das Display zeigt WLAN Ein, Verbunden, wenn das Funkgerät mit einem Netzwerk verbunden ist.
- Das Display zeigt WLAN Ein, Nicht verbunden, wenn das Funkgerät zwar eingeschaltet, aber nicht mit einem Netzwerk verbunden ist.

Sprachansagen für die WLAN-  
Statusabfrageergebnisse können über CPS gemäß  
den Benutzeranforderungen angepasst werden.  
Weitere Informationen erhalten Sie von Ihrem  
Fachhändler oder Systemadministrator.

### HINWEIS:

Die programmierte Taste **Wi-Fi-Status abfragen** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

## Aktualisieren der Netzwerkliste

Gehen Sie wie folgt vor, um die Netzwerkliste zu aktualisieren.

- Gehen Sie wie folgt vor, um die Netzwerkliste über das Menü zu aktualisieren.
  - a. Drücken Sie  , um das Menü aufzurufen.
  - b. Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.
  - c. Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

Wenn Sie das Netzwerkmenü öffnen, aktualisiert das Funkgerät automatisch die Netzwerkliste.
- Wenn Sie sich bereits im Netzwerk-Menü befinden, führen Sie die folgende Maßnahme durch, um die Netzwerkliste zu aktualisieren.

Drücken Sie  oder  zu Aktualisieren und drücken Sie  zum Auswählen.

Das Funkgerät aktualisiert sich und zeigt die neueste Netzwerkliste an.

## Hinzufügen eines Netzwerks

Wenn ein bevorzugtes Netzwerk nicht in der Liste der verfügbaren Netzwerke angezeigt wird, führen Sie die folgenden Maßnahmen durch, um ein Netzwerk hinzuzufügen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  zu Netzwerk hinzufügen und drücken Sie  zum Auswählen.

---

- 5 Geben Sie die SSID (Service Set Identifier) ein, und drücken Sie  .

---

- 6 Drücken Sie  oder  zu Öffnen und drücken Sie  zum Auswählen.

---

- 7 Geben Sie das Kennwort ein, und drücken Sie  .

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass das Netzwerk erfolgreich gespeichert wurde.

---

## Anzeigen von Details zu Netzwerk-Access-Points

Gehen Sie wie folgt vor, um die Details zu Netzwerk-Access-Points anzuzeigen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis zu einem Netzwerk-Access-Point, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  zu Details anzeigen und drücken Sie  zum Auswählen.

Für einen verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier), der Sicherheitsmodus, die MAC-Adresse (Media Access Control) und die IP-Adresse (Internet Protocol) angezeigt.

Für einen nicht verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier) und der Sicherheitsmodus angezeigt.

## Entfernen von Netzwerk-Access Points

Führen Sie die folgenden Aktionen aus, um Netzwerk-Access Points aus der Profilliste zu entfernen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

4 Drücken Sie  oder  zum ausgewählten Netzwerk-Access Point und drücken Sie  zum Auswählen.

5 Drücken Sie  oder  zu Entfernen und drücken Sie  zum Auswählen.

6 Drücken Sie  oder  zu JA und drücken Sie  zum Auswählen.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass der ausgewählte Netzwerk-Access-Point erfolgreich entfernt wurde.

## Energieversorgung

In diesem Kapitel wird die Verwendung der Einstellungsfunktionen auf Ihrem Funkgerät beschrieben.

[Feedback senden](#)

## Leistungspegel

Die Sendeleistung kann für jeden Kanal hoch oder niedrig eingestellt werden.

### Hoch

Erlaubt die Kommunikation mit relativ weit entfernten Funkgeräten.

### Niedrig

Erlaubt die Kommunikation mit näher befindlichen Funkgeräten.

### HINWEIS:

Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

## Einstellen der Sendeleistung

Führen Sie die Vorgehensweise zum Einstellen der Sendeleistung auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte Taste **Leistungspegel**. Überspringen Sie die nachfolgenden Schritte.

- Drücken Sie , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Leistung.

Drücken Sie , um die Option auszuwählen.

---

- 5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Hoch. Drücken Sie , um die Option auszuwählen. Im Display wird  neben Hoch angezeigt.
  - Drücken Sie  oder  bis Niedrig. Drücken Sie , um die Option auszuwählen.
- 

Im Display wird  neben Niedrig angezeigt.

---

- 6 Drücken Sie  lang, um zum Startbildschirm zurückzukehren.
- 

## Ein-/Ausschalten der Funkgerät-Hinweistöne

Sie können bei Bedarf alle Töne des Funkgeräts aktivieren bzw. deaktivieren außer den Ton für eingehende Notrufe. Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Tönen und Hinweisen auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte Taste **Töne/Hinweistöne**. Überspringen Sie die folgenden Schritte.
    - Drücken Sie , um das Menü aufzurufen.
  - 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
-

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Alle Töne. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  , um alle Töne und Hinweistöne zu aktivieren oder deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Ein-/Ausschalten von Tastaturtönen

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Tastentönen auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Tastaturtöne. Drücken Sie  , um die Option auszuwählen.

---

- 6 Drücken Sie , um die Tastaturtöne zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Einstellen der Abweichung der Hinweistonlautstärke

Diese Funktion stellt die Lautstärke der Hinweistöne ein, sodass sie höher oder niedriger als die Lautstärke für Sprache sein können. Führen Sie die Vorgehensweise zum Einstellen der Abweichung der Hinweistonlautstärke auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis Töne/Hinweise. Drücken Sie , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Lautst.Offset. Drücken Sie , um die Option auszuwählen.
- 

- 6 Drücken Sie  oder  bis zur gewünschten Lautstärkeabweichung. Für jede Lautstärkeabweichung wird jeweils ein Ton in der entsprechenden Lautstärke ausgegeben.
- 

- 7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um die Option auszuwählen. Die gewünschte Lautstärkeabweichung wurde gespeichert.
  - Drücken Sie  zum Beenden. Die Änderungen werden verworfen.
- 

## Ein-/Ausschalten des Freitons

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Freitons auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  oder  bis Freiton. Drücken Sie  , um die Option auszuwählen.
- 

- 6 Drücken Sie  , um den Freiton zu aktivieren/ deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
-

## Ein-/Ausschalten des Hinweistons beim Einschalten

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Hinweistons beim Einschalten auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/  
Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Einschalten.  
Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  , um den Hinweiston beim Einschalten zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Einstellen der Hinweistöne für Textnachrichten

Sie können den Hinweiston der Textnachricht für alle Einträge in der Kontaktliste auf „Momentan“ oder „Wiederholt anpassen. Führen Sie die Vorgehensweise zum Einstellen von Hinweistönen für Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis **Kontakte**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis **Nachr.Hinweis**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 5 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie  oder  bis **Momentan**.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird  neben **Momentan** angezeigt.
  - Drücken Sie  oder  bis **Wiederholt**.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird  neben **Wiederholt** angezeigt.
- 

## Ändern des Displaymodus

Das Funkgerätdisplay kann nach Bedarf auf Tages- oder Nacht-Modus eingestellt werden. Diese Einstellung ändert jeweils die Farbenpalette des Displays. Führen Sie die Vorgehensweise zum Ändern des Displaymodus auf Ihrem Funkgerät aus.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte **Displaymodus**-Taste. Überspringen Sie die folgenden Schritte.
    - Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis **Dienstprogramme**. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis **Funkgeräteeinstellungen**. Drücken Sie  , um die Option auszuwählen.
-

- 4 Drücken Sie  oder  bis Anzeige. Drücken Sie  , um die Option auszuwählen. Im Display wird Tag und Nacht angezeigt.
- 

- 5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  , um die Option auszuwählen. Auf dem Display wird  neben der ausgewählten Einstellung angezeigt.
- 

## Anpassen der Displayhelligkeit

Führen Sie die Vorgehensweise zum Einstellen der Displayhelligkeit auf Ihrem Funkgerät durch. Die Helligkeit des Displays kann nicht angepasst werden, wenn „Helligkeitsautomatik“ aktiviert ist.

- 1 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die programmierte Taste **Helligkeit**. Überspringen Sie die folgenden Schritte.

- Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis Helligkeit. Drücken Sie  , um die Option auszuwählen. Im Display wird die Helligkeitsleiste angezeigt.
- 

- 5 Drücken Sie  oder  , um die Displayhelligkeit zu erhöhen oder zu verringern. Drücken Sie  , um die Option auszuwählen. Der Einstellungswert variiert zwischen 1 und 8.
-

## Ein-/Ausschalten der Funktion „Hupe/Beleuchtung“

Ihr Funkgerät kann Sie über die Funktion „Hupe und Beleuchtung“ auf einen ankommenden Ruf hinweisen. Wenn diese Funktion aktiviert ist, ertönt bei einem ankommenden Ruf die Hupe und die Beleuchtung des Fahrzeugs wird eingeschaltet. Diese Funktion muss von Ihrem Händler über den rückseitigen Zubehöranschluss installiert werden. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Funktion „Hupe/Beleuchtung“ auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte Taste **Hupe/Bel.** Überspringen Sie die nachfolgenden Schritte.
  - Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Hupe/Bel.. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie , um Hupe/Beleuchtung zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:
  - Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Ein-/Ausschalten der LED-Anzeigen

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der LED-Anzeigen auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis LED-Anzeige. Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  , um die LED-Anzeige zu aktivieren/deaktivieren.
- Im Display wird eines der folgenden Ergebnisse angezeigt:
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Ein- und Ausschalten des Durchsageverstärkersystems

Befolgen Sie das Verfahren zur Aktivierung bzw. Deaktivierung des internen Durchsageverstärker (PA)-Systems des Funkgerätes.

- 1 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die programmierte Taste **Durchsageverstärker**. Überspringen Sie die folgenden Schritte.
  - Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.
-

4 Drücken Sie  oder  bis Durchsageverstärker. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  , um die Durchsageverstärker-Funktion zu aktivieren oder zu deaktivieren.

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Ein- und Ausschalten des externen Durchsageverstärkersystems

Befolgen Sie das Verfahren zur Aktivierung bzw. Deaktivierung des externen Durchsageverstärker (PA)-Systems des Funkgerätes.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Ext. Durchsageverstärker**. Überspringen Sie die folgenden Schritte.
  - Drücken Sie  , um das Menü aufzurufen.
- 

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Ext. Durchsageverstärker. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie , um die externe Durchsageverstärker-Funktion zu aktivieren oder zu deaktivieren.
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Ein-/Ausschalten des Startbildschirms

Sie können den Startbildschirm mithilfe der folgenden Vorgehensweise aktivieren oder deaktivieren.

- 1 Drücken Sie , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.
- 
- 4 Drücken Sie  oder  bis Anzeige. Drücken Sie , um die Option auszuwählen.
- 
- 5 Drücken Sie  oder  bis Introbildschirm. Drücken Sie , um die Option auszuwählen.
- 
- 6 Drücken Sie  zum Aktivieren/Deaktivieren des Startbildschirms.
- Im Display wird eines der folgenden Ergebnisse angezeigt:
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
-

## Einstellen der Sprachen

Führen Sie die Vorgehensweise zum Einstellen der Sprachen auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Sprachen. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis zur gewünschten Sprache. Drücken Sie , um die Option auszuwählen. Auf dem Display wird  neben der ausgewählten Sprache angezeigt.

---

## Bestimmen des Kabeltyps

Führen Sie die folgenden Schritte aus, um den Kabeltyp auszuwählen, den Ihr Funkgerät verwendet.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Kabeltyp.  
Drücken Sie , um die Option auszuwählen.
- 

- 5 Der aktuelle Kabeltyp ist mit einem  gekennzeichnet.
- 

## Ein-/Ausschalten der Kanalansage

Diese Funktion aktiviert die Sprachansage des Funkgeräts, sodass es die aktuelle Zone bzw. den aktuellen Kanal, die/der vom Benutzer gerade zugewiesen wurde, oder das Drücken einer programmierbaren Taste akustisch angibt. Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

Dieses Tonsignal kann kundenspezifisch eingestellt werden. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Kanal-Ansage auf Ihrem Funkgerät durch.

## Ein-/Ausschalten der Zusatzkarten

Jeder Kanal unterstützt Zusatzkartenfunktionen, die programmierbaren Tasten zugewiesen werden können. Ein

Kanal kann bis zu 6 Zusatzkartenfunktionen unterstützen. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Zusatzkarten auf Ihrem Funkgerät durch.

Drücken Sie die programmierte Taste **Zusatzkarte**.

---

## Text-in-Sprache

Die Funktion Text-in-Sprache kann nur vom Händler oder Systemadministrator aktiviert werden. Wenn die Funktion Text in Speech aktiviert ist, wird die Sprachansage-Funktion automatisch deaktiviert. Wenn die Sprachansage-Funktion aktiviert ist, wird die Text-in-Sprache-Funktion automatisch deaktiviert.

Diese Funktion aktiviert die Sprachansage des Funkgeräts mit den folgenden Funktionen:

- Aktueller Kanal
- Aktuelle Zone
- Programmierbare Taste ein- bzw. aus
- Inhalt der empfangenen Textnachrichten
- Inhalt von empfangenen Job Tickets

Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Funktion ist besonders nützlich, wenn der

Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

## Einstellen von Text-in-Sprache

Folgen Sie den Schritten zur Einrichtung der Funktion Text-in-Sprache.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Kanal-Ansage. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis zu einer der folgenden Funktionen. Drücken Sie  , um die Option auszuwählen.

Die verfügbaren Optionen lauten wie folgt:

- Alle
  - Nachrichten
  - Job Tickets
  - Channel
  - Zone
  - Programmtaste
- ✓ wird neben der ausgewählten Einstellung angezeigt.

## Einstellen des Menü-Timers

Mit dieser Funktion können Sie festlegen, wie lange Ihr Funkgerät das Menü anzeigt, bevor es automatisch wieder auf den Ausgangsbildschirm umschaltet. Folgen Sie den Anweisungen, um den Menü-Timer einzustellen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Anzeige. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Menü-Timer. Drücken Sie  , um die Option auszuwählen.

---

- 6 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  , um die Option auszuwählen.

---

## Ein-/Ausschalten der Digitalmikrofon-AGC

Die automatische Verstärkungsregelung (Automatic Gain Control, AGC) des Digitalmikrofons steuert die Mikrofonverstärkung des Funkgeräts beim Senden in einem digitalen System automatisch.

Diese Funktion unterdrückt laute Geräusche oder verstärkt leise Geräusche. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten. Befolgen Sie die Vorgehensweise zum Ein- oder Ausschalten der Digitalmikrofon-AGC auf Ihrem Funkgerät.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis **MikAGC-D**.  
Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  , um Digital Microphone AGC zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben **Aktiviert** angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben **Aktiviert** angezeigt.
- 

## Ein-/Ausschalten der Lautstärkeregelung

Die Audiolautstärke Ihres Funkgeräts wird automatisch so geregelt, dass sie an aktuelle Hintergrundgeräusche in der Umgebung des Funkgeräts, einschließlich stationärer und nicht stationärer Geräuschquellen, angepasst und entsprechend kompensiert wird. Diese Funktion betrifft nur den Empfang und hat keinen Einfluss auf das Senden-

Audio. Befolgen Sie die Vorgehensweise zum Ein- und Ausschalten der Lautstärkeregelung auf Ihrem Funkgerät.

### HINWEIS:

Während einer Bluetooth-Sitzung ist diese Funktion nicht verfügbar.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte Taste **Intelligentes Audio**. Überspringen Sie die nachfolgenden Schritte.
    - Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis **Dienstprogramme**. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis **Funkgeräteeinstellungen**. Drücken Sie  , um die Option auszuwählen.
-

4 Drücken Sie  oder  bis Intelligentes Audio. Drücken Sie  , um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ein. Drücken Sie  , um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
- Drücken Sie  oder  bis Aus. Drücken Sie  , um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

## Aktivieren/Deaktivieren der Funktion „Sperre akustischer Rückkopplungen“

Mit dieser Funktion können Sie die akustische Rückkopplung bei eingehenden Anrufen reduzieren.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.
- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.
- 4 Drücken Sie  oder  bis AF-Unterdrückung, und drücken Sie  zum Auswählen.  
Sie können durch Drücken der Tasten oder die ausgewählte Option ändern.

## 5 Führen Sie einen der folgenden Schritte aus.

- Drücken Sie , um die Sperre akustischer Rückkopplungen zu aktivieren. Im Display wird **Aktiviert**  angezeigt.
- Drücken Sie , um die Sperre akustischer Rückkopplungen zu deaktivieren. Neben **Aktiviert** wird kein  mehr angezeigt.

## Ein-/Ausschalten der Funktion „Vibrant-Verbesserung“

Sie können diese Funktion beim Sprechen in einer Sprache aktivieren, die viele alveolare Vibranten (rollendes „R“) enthält. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Funktion „Vibrant-Verbesserung“ auf Ihrem Funkgerät durch.

### 1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Vibrant-Verbesserung**. Überspringen Sie die nachfolgenden Schritte.

- Drücken Sie , um das Menü aufzurufen.

### 2 Drücken Sie oder bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

### 3 Drücken Sie oder bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

### 4 Drücken Sie oder bis Trill-Ton-

Erweiterung. Drücken Sie , um die Option auszuwählen.

### 5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ein. Drücken Sie , um die Option auszuwählen. Im Display wird  neben Ein angezeigt.

- Drücken Sie  oder  bis **Aus.** Drücken Sie , um die Option auszuwählen. Im Display wird  neben **Aus** angezeigt.

## Audiumgebung

Sie können die Audiumgebung für Ihr Funkgerät an Ihre Umgebung anpassen.

### Standard

Dies ist die Standardeinstellung.

### Laut

Diese Einstellung aktiviert die Rauschunterdrückung und erhöht die Lautstärke des Lautsprechers für den Einsatz in lauten Umgebungen.

### Arbeitsgruppe

Diese Einstellung aktiviert die AR-Sperre und deaktiviert die automatische Verstärkungsregelung (AGC), wenn eine Gruppe von Funkgeräten sich in unmittelbarer Nähe zueinander befindet.

## Einstellen der Audiumgebung

Befolgen Sie die Vorgehensweise zum Einstellen der Audiumgebung Ihres Funkgeräts in Abhängigkeit zu Ihrer Umgebung.

- 1 Drücken Sie , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.
- 
- 4 Drücken Sie  oder  bis Audiumgebung. Drücken Sie , um die Option auszuwählen.
-

- 5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  , um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie **Standard** für die werkseitigen Voreinstellungen aus.
- Wählen Sie **Laut** aus, um die Lautstärke zu erhöhen, wenn Sie sich in geräuschvollen Umgebungen befinden.
- Wählen Sie **Arbeitsgruppe**, um das akustische Feedback zu reduzieren, wenn Sie eine Reihe von Funkgeräten benutzen, die sich nahezu an derselben Position befinden.

Auf dem Display wird  neben der ausgewählten Einstellung angezeigt.

## Audio-Profile

Sie können die Audio-Profile für Ihr Funkgerät an Ihre Wünsche anpassen.

### Standard

Dies ist die Standardeinstellung.

### Ebene 1, Ebene 2 und Ebene 3

Diese Einstellungen sind Audio-Profile zur Beseitigung von lärmbedingten Hörverlusten, die typisch für Erwachsene ab dem 40. Lebensjahr sind.

### Höhensteigerung, Mittensteigerung und Bassteigerung

Diese Einstellungen sorgen für einen klareren, etwas nasaleren und einen tieferen Klang.

## Einstellen von Audio-Profilen

Führen Sie die Vorgehensweise zum Einstellen von Audio-Profilen auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  **OK** , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Audio-Profile. Drücken Sie  **OK** , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  **OK** , um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie **Standard** zum Deaktivieren des zuvor ausgewählten Audioprofils und zum Zurückkehren zu den werkseitigen Voreinstellungen.
- Wählen Sie **Ebene 1**, **Ebene 2** oder **Ebene 3** für Audio-Profile zur Vermeidung von lärmbedingten Hörverlusten, die typisch für Erwachsene ab dem 40. Lebensjahr sind.
- Wählen Sie **Höhensteig.**, **Mittensteigerung**, oder **Basssteigerung** für Audio-Profile mit

einem klareren, etwas nasaleren und einen tieferen Klang.

Auf dem Display wird  neben der ausgewählten Einstellung angezeigt.

## Einschalten/Ausschalten von GNSS

Das Global Navigation Satellite System (GNSS) ist ein Satellitennavigationssystem, das die genaue Position des Funkgeräts ortet. GNSS umfasst Global Positioning System (GPS) und Global Navigation Satellite System (GLONASS).

### HINWEIS:

Ausgewählte Funkgerätmodelle bieten möglicherweise GPS und GLONASS. Die GNSS-Konstellation wird über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

- 1 Führen Sie einen der folgenden Schritte aus, um GNSS des Funkgeräts ein- oder auszuschalten.
  - Drücken Sie die programmierte Taste **GNSS**.
  - Drücken Sie  **OK** , um das Menü aufzurufen. Fahren Sie mit dem nächsten Schritt fort.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis GNSS. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  , um GNSS zu aktivieren/deaktivieren.

Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.

Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Allgemeine Informationen zum Funkgerät

In Ihrem Funkgerät sind Daten zu verschiedenen Parametern gespeichert.

Zu den allgemeinen Informationen Ihres Funkgeräts gehören:

- Funkgerät-Alias und Funkgeräte-ID
- Firmware- und Codeplug-Version
- Software-Aktualisierung
- GNSS-Informationen
- Standort-Informationen

### HINWEIS:

Drücken Sie  , um zum vorangehenden

Bildschirm zurückzukehren. Drücken Sie  lang, um zum Startbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

## Prüfen des Funkgerät-Alias und der ID

Führen Sie die Vorgehensweise zum Überprüfen des Funkgerät-Alias und der ID auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Funkgerät-Alias und ID**. Überspringen Sie die folgenden Schritte.  
Ein positiver Hinweisston erklingt.  
Sie können die programmierte Taste **Funkgerät-Alias und ID** drücken, um zum vorhergehenden Bildschirm zurückzukehren.
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Meine ID.  
Drücken Sie  , um die Option auszuwählen.  
In der ersten Textzeile wird der Funkgerät-Aliasname angezeigt. In der zweiten Textzeile wird die Funkgerät-ID angezeigt.

## Überprüfen der Firmware- und Codeplug-Versionen

Führen Sie die Vorgehensweise zum Überprüfen der Firmware- und Codeplug-Version Ihres Funkgeräts durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Versionen.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird die aktuelle Firmware- und Codeplug-Version angezeigt.
- 

- 3 Drücken Sie  oder  bis Geräte-Info.  
Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis SW-Update.  
Drücken Sie  , um die Option auszuwählen.  
Im Display werden das Datum und die Uhrzeit der letzten Software-Aktualisierung angezeigt.
- 

## Überprüfen der Software-Aktualisierungsinformationen

Diese Funktion zeigt das Datum und die Zeit der letzten Softwareaktualisierung, die über Over-the-Air-Programmierung (OTAP) oder WLAN durchgeführt wurde. Führen Sie die Vorgehensweise zum Überprüfen der Softwareaktualisierungsfunktionen auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.
- 

Das Menü für die Software-Aktualisierung ist erst nach mindestens einer erfolgreichen OTAP- oder WLAN-Sitzung verfügbar. Weitere Informationen finden Sie unter [Over-the-Air Programmierung \(OTAP\) auf Seite 524](#).

## Überprüfen der GNSS-Informationen

Sie können GNSS-Informationen Ihres Funkgeräts anzeigen, d. h. Werte wie die folgenden:

- Breitengrad
- Längengrad
- Höhe
- Richtung

- Geschwindigkeit
- Horizontal Dilution of Precision (HDOP – Streubreite der Messwerte in Horizontalrichtung)
- Satelliten
- Version

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Geräteinfo. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis GNSS Info. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis zum gewünschten Element. Drücken Sie , um die Option

auszuwählen. Im Display werden die gewünschten GNSS-Informationen angezeigt.

---

## Anzeigen von Standort-Informationen

Befolgen Sie die Vorgehensweise, um den aktuellen Standortnamen anzuzeigen, an dem sich Ihr Funkgerät befindet.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Standortinformationen. Drücken Sie  , um die Option auszuwählen.
- 

Das Display zeigt den aktuellen Standortnamen an.

Diese Seite wurde absichtlich leer gelassen.

## Connect Plus-Betrieb

Connect Plus ist eine vollständige, auf DMR-Technologie basierte Bündelfunklösung. Connect Plus verwendet einen dedizierten Steuerungskanal für Kanalanforderungen und Zuordnungen. Die für Funkgerätebenutzer verfügbaren Funktionen in diesem System werden in diesem Kapitel beschrieben.

## Zusätzliche Bedienelemente im Connect Plus-Modus

In diesem Kapitel werden die zusätzlichen Bedienelemente erläutert, auf die Funkgerätbenutzer über vorprogrammierte Elemente, wie z. B. programmierbare Tasten und zuweisbare Funkgerätefunktionen, zugreifen können.

### Sendetaste (PTT)

Die **Sendetaste (PTT)** seitlich am Funkgerät erfüllt zwei grundlegende Zwecke:

- Während eines Anrufs wird durch Betätigung der **Sendetaste (PTT)** mit anderen am Anruf beteiligten Funkgeräten kommuniziert.

Halten Sie die **Sendetaste (PTT)** zum Sprechen gedrückt. Lassen Sie die **Sendetaste (PTT)** zum Hören los.

Wenn die **Sendetaste (PTT)** gedrückt wird, wird das Mikrofon aktiviert.

- Wird gerade kein Ruf getätigt, wird die **Sendetaste (PTT)** zur Durchführung eines neuen Rufs verwendet (siehe [Durchführen eines Funkrufs auf Seite 266](#)).

Wenn der Gesprächsgenehmigungston aktiviert ist, warten Sie, bis dieser kurze Signalton verstummt, bevor Sie mit dem Sprechen beginnen.

## programmierbare Tasten

Diese Tasten können von Ihrem Händler vorprogrammiert werden. Sie dienen dann, je nachdem, wie lange sie gedrückt werden, für den Direktzugriff auf verschiedene Funkgerätefunktionen:

### Kurzer Tastendruck

Drücken und schnell wieder loslassen.

### Drücken Sie lange auf

Für die programmierte Zeit gedrückt halten.

## HINWEIS:

Die vorprogrammierte Zeitdauer für einen Tastendruck gilt für alle zuweisbaren Funkgerät-/Einstellungsfunktionen und Einstellungen. Unter [Notruf auf Seite 304](#) finden Sie weitere Informationen über die vorprogrammierte Tastendruckdauer der *Notruf*-Taste.

## Zuweisbare Funkgerätfunktionen

### Bluetooth® Audio-Schalter

Schaltet die Audioausgabe zwischen dem internen Funkgerätlautsprecher und einem externen Bluetooth-fähigen Zubehör um.

### Bluetooth verbinden

Sucht nach Bluetooth-Geräten und stellt die Verbindung her.

### Bluetooth trennen

Beendet alle vorhandenen Bluetooth-Verbindungen zwischen Funkgerät und Bluetooth-fähigen Geräten.

### Bluetooth-Erkennung

Ermöglicht es Ihrem Funkgerät, in den erkennbaren Bluetooth-Modus versetzt werden zu können.

### Abbruch der Warteschleife

Beendet den Belegt-Modus, wenn in der Warteschlange ein Ruftyp initiiert wurde, der kein Notruf ist. Nachdem Notrufe in die Warteschlange gestellt wurden, können sie nicht mehr abgebrochen werden.

### Anrufprotokoll

Wählt die Rufprotokollliste aus.

### Kanalankündigung

Sprachansage von Zonen- und Kanalnachrichten für den aktuellen Kanal.

### Kontakte

Bietet direkten Zugriff auf die Kontaktliste.

### Notruf Ein/Aus

Je nach Programmierung wird ein Notruf eingeleitet oder abgebrochen.

### Hupe/Beleuchtung

Schaltet die Hupen- und Beleuchtungsfunktion ein oder aus.

### Innenbereich

Schaltet die Innenbereichs-Funktion ein oder aus.

### Intelligentes Audio

Schaltet Intelligentes Audio ein-/aus.

**Manuell wählen**

Je nach Programmierung wird durch Eingabe einer Teilnehmer-ID oder einer Telefonnummer ein Einzel- oder Telefonanruf eingeleitet.

**Eintastenzugang**

Leitet einen vordefinierten Einzelruf, Rufhinweis, eine Quick Text-Nachricht oder die Funktion „Zurück auf Startkanal“ direkt ein.

**Privacy**

Schaltet die Verschlüsselung ein oder aus.

**Funkgerät-Check**

Stellt fest, ob das Funkgerät in einem System aktiv ist.

**Funkgerät aktivieren**

Ermöglicht die Fernaktivierung eines Zielfunkgeräts.

**Funkgerät deaktivieren**

Ermöglicht die Ferndeaktivierung eines Zielfunkgeräts.

**Fernüberwachung**

Schaltet das Mikrofon eines Zielfunkgeräts ein, ohne dies anzuzeigen.

**Home-Kanal zurücksetzen**

Richtet einen neuen Home-Kanal ein.

**Art des Hinweistons bei Anruf**

Gibt direkten Zugriff auf die Einstellung des Rufhinweistyps.

**Roaming-Anforderung**

Fordert die Suche nach einem anderen Standort an.

**Scan**

Schaltet Scan ein oder aus.

**Home-Kanalerinnerung stummschalten**

Schaltet die Home-Kanalerinnerung stumm.

**Funkstation sperren/entsperren**

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

**Textnachricht**

Wählt das Textnachrichtenmenü aus.

**Sprachankündigung ein/aus**

Schaltet die Sprachansage ein/aus.

**WLAN**

Schaltet WLAN ein oder aus.

**Zone**

Ermöglicht das Auswählen einer Zone aus einer Zonenliste.

## Zuweisbare Einstellungen oder Einstellungsfunktionen

### AF-Unterdrückung

Schaltet die Funktion zur Unterdrückung akustischer Rückkopplungen ein oder aus.

### Alle Töne/Warnungen

Schaltet alle Töne und Warnungen ein und aus.

### Beleuchtungshelligkeit

Passt die Helligkeit an.

### Kanal-nach-oben /-unten

Zum Wechseln auf den vorhergehenden bzw. nächsten Kanal, je nach Programmierung.

### Display-Modus

Schaltet den Tag/Nacht-Displaymodus ein bzw. aus.

### Global Navigation Satellite System (GNSS)

Schaltet das Satellitennavigationssystem ein oder aus.

### Leistung

Schaltet den Sendeleistungspegel zwischen hoch und niedrig um.

### Nicht zugewiesen

Gibt an, dass die Taste noch nicht belegt ist.

## Identifizieren von Statusanzeigen im Connect Plus-Modus

### Anzeigesymbole

Die folgenden Symbole werden auf dem Display des Funkgeräts angezeigt.

	<p><b>Anzeige der Empfangssignalstärke (RSSI)</b></p> <p>Die Anzahl der Balken zeigt die Signalstärke an. Vier Balken bedeuten, dass das Signal ausgezeichnet ist. Dieses Symbol wird nur während des Empfangs angezeigt.</p>
	<p><b>Bluetooth nicht angeschlossen</b></p> <p>Die Bluetooth-Funktion ist aktiviert, es besteht aber keine Verbindung zu einem Remote-Bluetooth-Gerät.</p>
	<p><b>Bluetooth angeschlossen</b></p>

*Tabelle wird fortgesetzt...*

	Die Bluetooth-Funktion ist aktiviert. Das Symbol leuchtet konstant, wenn ein abgesetztes Bluetooth-Gerät angeschlossen ist.
	<b>Große Datenmengen</b> Das Funkgerät empfängt große Datenmengen, und der Kanal ist belegt.
	<b>Die Funktion „Innenbereich“ ist verfügbar<sup>3</sup></b> Der Status für die Funktion „Innenbereich“ ist eingeschaltet und verfügbar.
	<b>Die Funktion „Innenbereich“ ist nicht verfügbar<sup>3</sup></b> Der Status für die Funktion „Innenbereich“ ist eingeschaltet aber aufgrund von ausgeschaltetem Bluetooth oder von einem Bakensignal-Scan, der durch Bluetooth ausgesetzt wurde, nicht verfügbar.

*Tabelle wird fortgesetzt...*

	<b>Stummschaltmodus</b> Stummschalt-Modus ist aktiviert und Lautsprecher ist stumm geschaltet.
	<b>Benachrichtigungen</b> In der Benachrichtigungsliste befinden sich zu berücksichtigende Elemente.
	<b>Leistung</b> Das Funkgerät ist auf niedrige oder auf hohe Leistung eingestellt.
	<b>Ton-Deaktivierung</b> Töne sind abgestellt.
	<b>Optionskarte</b> Die Zusatzkarte ist aktiviert.
	<b>Zusatzkarte aus</b> Die Zusatzkarte ist deaktiviert.
	<b>GNSS verfügbar</b>

*Tabelle wird fortgesetzt...*

<sup>3</sup> Nur für Modelle mit neuester Software und Hardware verfügbar

	Die GPS/GNSS-Funktion ist aktiviert. Das Symbol leuchtet, wenn eine Positionsfestlegung verfügbar ist.
	<b>GNSS nicht verfügbar/außer Funkreichweite</b> Die GPS/GNSS-Funktion ist aktiviert, aber es werden keine Satellitendaten empfangen.
	<b>Scan</b> Die Scan-Funktion ist aktiviert.
	<b>Emergency</b> Das Funkgerät befindet sich im Notruf-Modus.
	<b>Sicher</b> Die Verschlüsselungsfunktion ist aktiviert.
	<b>Ungesichert</b> Die Verschlüsselungsfunktion ist deaktiviert.

*Tabelle wird fortgesetzt...*

	<b>Standort-Roaming</b> Die Roaming-Funktion ist aktiviert.
	<b>Kontakt</b> Funkgerätkontakt verfügbar.
	<b>Anrufprotokoll</b> Rufprotokoll des Funkgeräts.
	<b>Nachricht</b> Eingehende Nachricht.
	<b>Nur Rufton</b> Rufton-Modus ist aktiviert.
	<b>Stiller Klingelton</b> Stiller Klingelton ist aktiviert.
	<b>Vibrieren</b> Vibrationsmodus ist aktiviert.
	<b>Vibrieren und Klingelton</b> Vibrations- und Klingelton-Modus ist aktiviert.

*Tabelle wird fortgesetzt...*

	<b>WLAN ausgezeichnet</b> <sup>4</sup> WLAN-Signal ist ausgezeichnet.
	<b>WLAN gut</b> <sup>4</sup> WLAN-Signal ist gut.
	<b>WLAN durchschnittlich</b> <sup>4</sup> WLAN-Signal ist durchschnittlich.
	<b>WLAN schlecht</b> <sup>4</sup> WLAN-Signal ist schlecht.
	<b>WLAN nicht verfügbar</b> <sup>4</sup> WLAN-Signal ist nicht verfügbar.

## Rufsymbole

Die folgenden Symbole werden während eines Anrufs im Display Ihres Funkgeräts angezeigt. Diese Symbole werden auch in der Kontaktliste angezeigt, um den ID-Typ anzugeben.

	<b>Einzelruf</b> Ein Einzelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.
	<b>Gruppenruf/Standort-Alle-Ruf</b> Ein Gruppenruf oder Standort-Alle-Ruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.
	<b>Telefonanruf als Einzelruf</b> Ein Anruf wird gerade als Einzelruf getätigt.
	<b>Bluetooth-PC-Ruf</b> Ein Bluetooth-PC-Ruf wird gerade getätigt.

*Tabelle wird fortgesetzt...*

<sup>4</sup> Gilt nur für DM4601e

In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Bluetooth-PC-Rufs hin.

**Zentralruf**

Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.

Zeigt an, dass der Menüpunkt ausgewählt wurde.

**Schwarzes Kästchen**

Zeigt die für den Menüpunkt mit einem Untermenü gewählte Option an.

**Erweiterte Menüsymbole**

Die folgenden Symbole tauchen neben Menüpunkten mit zwei Optionen oder als Anzeige dafür auf, dass es ein Untermenü mit zwei Optionen gibt.

**Kontrollkästchen (leer)**

Zeigt an, dass der Menüpunkt nicht ausgewählt wurde.

**Kontrollkästchen (markiert)**

**Ausgang-Symbole (Gesendete Nachrichten)**

Die folgenden Symbole werden in der oberen rechten Ecke des Funkgerätdisplays im Ordner „Ausgang“ angezeigt:

**Erfolgreich gesendet**

Die Textnachricht wurde erfolgreich gesendet.

ODE  
R

## Bluetooth-Symbole

Die folgenden Symbole werden auch neben Einträgen in der Liste der verfügbaren Bluetooth-fähigen Geräte angezeigt und geben den Gerätetyp an.

**Bluetooth-Datengerät**

Bluetooth-fähiges Datengerät wie z. B. ein Scanner.

**Bluetooth-Audiogerät**

Bluetooth-fähiges Audiogerät wie z. B. ein Kopfhörer.

**Bluetooth-PTT-Gerät**

Bluetooth-fähiges PTT-Gerät wie z. B. ein POD-Gerät (nur PTT/Sendetaste).

## LED-Anzeige

Die LED-Anzeige zeigt den Betriebsstatus Ihres Funkgeräts an.

<b>Blinkt rot</b>	Das Funkgerät sendet mit geringer Akkuleistung, empfängt einen Notruf, oder die Selbstprüfung beim Einschalten ist fehlgeschlagen, oder das Funkgerät befindet sich außerhalb der Reichweite, wenn das Funkgerät mit dem Auto-Range Transponder-System konfiguriert wurde. Stummschalt-Modus ist aktiviert.
<b>Blinkt schnell rot</b>	Das Funkgerät empfängt eine OTA-Dateiübertragung (Optionskarten-Firmware-Datei, Netzwerkfrequenzdatei oder Optionskarten-Codeplug-Datei), oder es wird ein Upgrade auf eine neue Optionskarten-Firmware-Datei durchgeführt.
<b>Blinkt grün und gelb</b>	Das Funkgerät empfängt einen Rufhinweis, hat eine Textnachricht

*Tabelle wird fortgesetzt...*

	empfangen, oder der Scan ist aktiviert und empfängt Aktivitäten.
<b>Gelbes Dauerlicht</b>	Das Funkgerät befindet sich im erkennbaren Bluetooth-Modus.
<b>Doppeltes gelbes Blinken</b>	Das Funkgerät sucht aktiv nach einem neuen Standort.
<b>Blinkt gelb</b>	Das Funkgerät empfängt einen Rufhinweis, oder der Scan ist aktiviert und empfängt keine Aktivitäten (das Funkgerät empfängt keine Aktivitäten).
<b>Dauerhaft grün</b>	Das Funkgerät fährt hoch oder überträgt Daten.
<b>Blinkt grün</b>	Das Funkgerät wird eingeschaltet oder empfängt einen Ruf oder Daten.
<b>Doppeltes grünes Blinken</b>	Das Funkgerät empfängt einen Ruf mit aktivierter Verschlüsselung.

## Hinweistöne

Die folgenden Töne werden über den Lautsprecher des Funkgeräts ausgegeben.

Hoher Ton  Tiefer Ton

Hinweistöne liefern einen akustischen Hinweis auf den Status, nachdem eine Aktion zum Durchführen einer Aufgabe ausgeführt wurde.

	Positiver Hinweiston
	Negativer Hinweiston

## Hinweistöne

Hinweistöne sind hörbare Anzeigen zum Funkgerätestatus oder zur Reaktion des Funkgeräts auf empfangene Daten.

<b>Dauerton</b> 	Gleichmäßiger Ton. Wird ununterbrochen bis zum Beenden abgespielt.
--	--

*Tabelle wird fortgesetzt...*

### Periodischer Ton

Wird periodisch je nach der über das Funkgerät konfigurierten Tonlänge abgespielt. Der Ton beginnt, stoppt und wiederholt sich.

### Wiederholter Ton

Ein einzelner Ton, der sich wiederholt, bis der Benutzer ihn abschaltet.

### Kurzton

Erklingt nur einmal kurz (Tonlänge ist vorgegeben).

## Umschalten zwischen Connect Plus- und Non-Connect Plus-Modus

Um den Connect Plus-Modus zu verlassen, müssen Sie zu einer anderen Zone wechseln, sofern diese Möglichkeit von Ihrem Händler oder Systemadministrator konfiguriert wurde. Klären Sie mit Ihrem Händler oder Ihrem Systemadministrator, ob das Funkgerät für Zonen außerhalb von Connect Plus konfiguriert wurde und welche Funktionen verfügbar sind, wenn Sie außerhalb einer Connect Plus-Zone tätig sind.

## Durchführen und Empfangen von Anrufen im Connect Plus-Modus

In diesem Abschnitt werden die allgemeine Bedienung und die verfügbaren Ruffunktionen Ihres Funkgeräts erläutert.

### Auswahl eines Standorts

Ein Standort bietet Abdeckung für einen bestimmten Bereich. Ein Connect Plus-Standort hat einen Standort-Controller und maximal 15 Repeater. In einem Mehrfachstandort-Netzwerk sucht das Connect Plus-Funkgerät automatisch nach einem neuen Standort, wenn der Signalpegel des aktuellen Standorts auf ein inakzeptables Niveau absinkt.

### Roaming-Anforderung

Eine Roaming-Anforderung weist das Funkgerät an, einen neuen Standort zu suchen, selbst wenn das Signal des aktuellen Standorts akzeptabel ist.

Wenn keine Standorte verfügbar sind:

- Das Funkgerät zeigt Suche und den Alias des ausgewählten Kanals an und fährt mit dem Durchsuchen der Standortliste fort.
- kehrt das Gerät zum vorherigen Standort zurück, falls dieser noch zur Verfügung steht.

#### HINWEIS:

Diese Funktion wird von Ihrem Händler konfiguriert.

Drücken Sie die konfigurierte Taste **Roaming-Anforderung**.

Sie hören einen Ton, der darauf hinweist, dass das Funkgerät zu einem neuen Standort wechselt. Im Display wird Site-ID angezeigt.

---

## Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperre**.

Wenn die **Standortsperr**e eingeschaltet ist:

- Sie hören einen positiven Hinweisston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperrung** ausgeschaltet ist:

- Sie hören einen negativen Hinweisston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

## Standorteinschränkung

Ihr Systemadministrator für Connect Plus-Funkgeräte kann entscheiden, welche Netzwerkstandorte Ihr Funkgerät verwenden darf und welche nicht. Das Funkgerät muss nicht neu programmiert werden, um die Liste der erlaubten und nicht erlaubten Standorte zu ändern. Wenn Ihr Funkgerät versucht, sich bei einem nicht erlaubten Standort anzumelden, wird eine kurze Meldung angezeigt: `Site <angegebene Nummer> nicht erlaubt`. Das Funkgerät sucht dann nach einem anderen Netzwerkstandort.

## Auswählen einer Zone

Das Funkgerät kann mit maximal 16 Connect Plus-Zonen konfiguriert werden, wobei jede Connect Plus-Zone maximal 16 zuweisbare Positionen auf dem Drehknopf für die Kanalwahl bietet.

Alle zugewiesenen Drehknopfpositionen können zum Starten eines der folgenden Ruftypen verwendet werden:

- Gruppenruf
- Multi-Gruppenruf
- Funkstations-Rundruf
- Einzelruf

- 1 Greifen Sie folgendermaßen auf die Zone zu:

Bedienelemente	Schritte
<b>Programmierte Zonenauswahl-Taste</b>	Drücken Sie die programmierte Taste <b>Zonenauswahl</b> .
<b>Menü „Radio“</b>	<b>a</b> Drücken Sie  , um das Menü aufzurufen.

Bedienelemente	Schritte
	<b>b</b> Drücken Sie  oder  bis Zone, und drücken Sie  zum Auswählen.

Im Display wird die aktuelle Zone angezeigt; sie ist mit einem ✓ gekennzeichnet.

## 2 Wählen Sie die gewünschte Zone.

Bedienelement des Funkgeräts	Schritte
 <b>oder</b> 	Drücken Sie  oder  , und blättern Sie zur gewünschten Zone.

- Drücken Sie , um die Option auszuwählen.  
Das Display zeigt kurz <Zone> gewählt an und wechselt dann zum Bildschirm der gewählten Zone.

## Arbeiten mit mehreren Netzwerken

Wenn Ihr Funkgerät für die Verwendung von mehreren Connect Plus-Netzwerken konfiguriert wurde, können Sie ein anderes Netz wählen, indem Sie zu der Connect Plus-Zone wechseln, die dem gewünschten Netzwerk zugewiesen ist. Diese Netzwerk-zu-Zonen-Zuweisungen werden von Ihrem Händler für Ihr Funkgerät konfiguriert.

## Auswählen eines Ruftyps

Verwenden Sie den Kanalwahlschalter, um einen Ruftyp auszuwählen. Hierbei kann es sich um einen Gruppenruf, Multi-Gruppenruf, Standort-Rundumruf oder Einzelruf handeln, je nachdem, wie Ihr Funkgerät konfiguriert wurde. Wenn Sie den Drehknopf für die Kanalwahl auf eine andere Position (mit einem zugewiesenen Ruftyp) stellen, wird das Funkgerät erneut beim Connect Plus-Standort registriert. Das Funkgerät wird mit der Registrierungs-Gruppen-ID

registriert, die dem neuen Position des Kanalwahlschalter-Ruftyp zugewiesen wurde.

Wenn Sie eine Position wählen, der kein Ruftyp zugewiesen wurde, gibt das Funkgerät einen Dauerton aus, und im Display erscheint Nicht progr.. Ihr Funkgerät funktioniert nicht, wenn ein nicht konfigurierter Kanal ausgewählt wurde. Verwenden Sie stattdessen den Kanalwahlschalter zur Auswahl eines konfigurierten Kanals.

Nachdem die gewünschte Zone angezeigt wird (bei mehreren Zonen in Ihrem Funkgerät), drehen Sie den programmierten Kanalwahlschalter, um den Ruftyp auszuwählen.

## Empfangen und Beantworten eines Funkrufs

Sobald der Kanal, die Funkgeräte-ID oder der Ruftyp angezeigt wird, können Sie Rufe empfangen und beantworten.

Die LED leuchtet ununterbrochen grün, wenn das Funkgerät sendet, und blinkt grün, wenn das Funkgerät empfängt.

### HINWEIS:

Die LED leuchtet dauerhaft grün, wenn das Funkgerät sendet. Beim Empfang eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell grün. Zum Entschlüsseln eines verschlüsselten Rufs muss Ihr Funkgerät denselben Privacy-Key ODER denselben Schlüsselwert und dieselbe Schlüssel-ID aufweisen (von Ihrem Händler programmiert) wie das sendende Funkgerät (von dem Sie den Ruf empfangen).

Weitere Informationen finden Sie unter [Privacy auf Seite 325](#).

## Empfangen und Beantworten eines Gruppenrufs

Ein Gruppenruf kann nur empfangen werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist.

Wenn Sie einen Gruppenruf (auf dem Ausgangsbildschirm), empfangen, blinkt die LED grün. Das Gruppenrufsymbol erscheint in der oberen rechten Ecke. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher des Funkgeräts zu hören.

- 1 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

Die LED leuchtet dauerhaft grün.

- 2 Warten Sie, bis der Gesprächsgenehmigungston verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

### HINWEIS:

Eine genaue Beschreibung zur Durchführung eines Gruppenrufs finden Sie unter [Durchführen eines Gruppenrufs auf Seite 266](#).

## Empfangen und Beantworten eines Einzelrufs

Ein Einzelruf ist ein Anruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät.

Wenn Sie einen Einzelruf empfangen, blinkt die LED-Anzeige grün. In der ersten Zeile des Displays werden der Funkgeräte-Alias oder die Funkgeräte-ID sowie das RSSI-Symbol angezeigt. Die zweite Zeile zeigt Einzelruf und das Einzelrufsymbol an. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher des Funkgeräts zu hören.

- 1 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

- 2 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Die LED leuchtet dauerhaft grün.

- 3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

- 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Im Display wird Ruf beendet angezeigt.

Eine genaue Beschreibung zur Durchführung eines Einzelrufs finden Sie unter [Durchführen eines Einzelrufs auf Seite 267](#).

## Empfangen eines Standort-Rundumrufs

Ein Standort-Rundumruf ist ein Anruf von einem einzelnen Funkgerät an alle anderen Funkgeräte am Standort. Dieser Ruf typ wird für Ankündigungen verwendet, denen alle Benutzer volle Aufmerksamkeit schenken müssen.

Wenn Sie einen Standort-Rundumruf erhalten, erklingt ein Hinweisston und die LED-Anzeige blinkt grün.

Das Gruppenrufsymbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. In der zweiten Zeile wird Standort-Rundumruf angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher des Funkgeräts zu hören.

Nach Ende des Standort-Rundumrufs kehrt das Funkgerät zum vor dem Empfang des Anrufs angezeigten Bildschirm zurück. Rundumrufe werden ohne eine vorbestimmte Wartezeit beendet.

Sie können auf einen Standort-Alle-Anruf nicht antworten.

### HINWEIS:

Eine genaue Beschreibung zur Durchführung eines Standort-Rundumrufs finden Sie unter [Durchführen eines Standort-Rundumrufs auf Seite 268](#).

Das Funkgerät unterbricht den Empfang eines Standort-Rundumrufs, wenn Sie während des Anrufs auf einen anderen Kanal schalten. Während eines Standort-Alle-Anrufs können Sie die konfigurierten Tastenfunktionen nicht verwenden, bis der Anruf beendet wird.

## Empfangen eines eingehenden Einzel-Telefonrufs

Wenn Sie einen eingehenden Einzel-Telefonruf erhalten, wird in der oberen rechten Ecke das „Anruf als Einzelruf“-Symbol angezeigt. In der ersten Textzeile wird Telefonruf angezeigt.

- 1 Halten Sie die **Sendetaste** (PTT) zum Antworten und Sprechen gedrückt. Lassen Sie die **Sendetaste (PTT)** zum Hören los.

- 2 Halten Sie  gedrückt, um den Anruf zu beenden.

In der ersten Zeile des Displays wird Telefonruf ... angezeigt. In der zweiten Zeile des Displays wird wird beendet angezeigt. Das Display kehrt zum Anruf-Bildschirm zurück.

Im Display wird Telefonruf beendet angezeigt.

## Verzögertes Überwählen bei einem eingehenden Einzelruf

Während des Rufs wird das „Anruf als Einzelruf“-Symbol in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird Telefonruf angezeigt.

- 1 Geben Sie die Ziffern mithilfe der Zifferntastatur ein, und drücken Sie die  -Taste.

Drücken Sie  und dann innerhalb von 2

Sekunden , um eine Pause einzufügen. Das P ersetzt \* und # im Display.

Das „Anruf als Einzelruf“-Symbol wird in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays werden die eingegebenen Ziffern angezeigt.

- 2 Halten Sie zum Beenden des Gesprächs  gedrückt.

In der ersten Zeile des Displays wird Telefonruf ... angezeigt. In der zweiten Zeile des

Displays wird ~~wird beendet~~ angezeigt. Das Display kehrt zum Anruf-Bildschirm zurück.

Im Display wird ~~Telefonruf beendet~~ angezeigt.

## Live-Überwählen bei einem eingehenden Einzelruf

Während des Rufs wird das „Anruf als Einzelruf“-Symbol in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird ~~Telefonruf~~ angezeigt.

- 1 Drücken Sie die **Sendetaste (PTT)**, und verwenden Sie die Zifferntastatur zur Eingabe der Ziffern.

Das „Anruf als Einzelruf“-Symbol wird in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays werden die Live-Wählziffern angezeigt.

- 2 Halten Sie zum Beenden des Gesprächs  gedrückt.

In der ersten Zeile des Displays wird ~~Telefonruf ...~~ angezeigt. In der zweiten Zeile des Displays wird ~~wird beendet~~ angezeigt. Das Display kehrt zum Anruf-Bildschirm zurück.

[Feedback senden](#)

Im Display wird ~~Telefonruf beendet~~ angezeigt.

## Empfangen eines eingehenden Gesprächsgruppen-Telefonrufs

Wenn Sie einen eingehenden Gesprächsgruppen-Telefonruf erhalten, wird in der oberen rechten Ecke das Gruppentrufsymbol angezeigt. In der ersten Textzeile wird ~~Call11 (Ruf1)~~ angezeigt.

Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los.

## Eingehender Multi-Gruppen-Telefonruf

Wenn Sie einen eingehenden Multi-Gruppen-Telefonruf erhalten, wird in der oberen rechten Ecke das Gruppentrufsymbol angezeigt. In der ersten Textzeile wird ~~Multi-Gruppenruf~~ angezeigt. Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Multi-Gruppenruf ist über den Lautsprecher des Funkgeräts zu hören.

## Durchführen eines Funkrufs

Wenn Sie Ihren Kanal gewählt haben, können Sie den Funkgeräte-Alias oder die ID bzw. den Aliasnamen oder die ID einer Gruppe wie folgt auswählen:

- Mit dem Drehknopf für die Kanalwahl.
- Mit einem vorprogrammierten **Eintastenzugang** – Der Eintastenzugang erleichtert Einzelrufe zu vordefinierten IDs. Diese Funktion kann durch kurzes oder langes Drücken einer programmierbaren Taste zugewiesen werden. Pro **Schnellwahltaste** kann nur eine ID zugewiesen werden. Auf dem Funkgerät können mehrere **Eintastenzugänge** programmiert sein.
- Über die Kontaktliste (siehe [Kontakteinstellungen auf Seite 292](#)).

### HINWEIS:

Um mit Verschlüsselung senden zu können, muss die Verschlüsselungsfunktion auf diesem Kanal aktiviert sein. Nur empfangende Funkgeräte mit dem gleichen Schlüsselwert und der gleichen Schlüssel-ID wie Ihr Gerät können die Übertragung entschlüsseln.

Weitere Informationen finden Sie unter [Privacy auf Seite 325](#).

## Durchführen eines Anrufs mit dem Kanalwahlschalter

Mit dieser Funktion können Funkgerätebenutzer unterschiedliche Ruftypen nutzen: Gruppenruf, Einzelruf, Standort-Rundruf, Durchsageruf.

## Durchführen eines Gruppenrufs

Ein Anruf an eine Gruppe kann nur durchgeführt werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist.

- 1 Wählen Sie den Kanal mithilfe des aktiven Gruppen-Aliasnamen oder der aktiven Gruppen-ID. Siehe [Auswählen eines Ruftyps auf Seite 260](#).
- 
- 2 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.
- 
- 3 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die LED-Beleuchtung leuchtet grün. Das Gruppenrufsymbol wird in der oberen rechten Ecke

des Displays angezeigt. In der ersten Textzeile wird der Gruppenruf-Aliasnamen angezeigt.

---

4 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

---

5 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Zielfunkgerät antwortet, blinkt die LED-Anzeige grün, die Stummschaltung des Funkgeräts wird ausgeschaltet, und die Antwort ist über den Lautsprecher des Funkgeräts zu hören. Im Display wird das Gruppenrufsymbol, der Gruppen-Aliasname oder die Gruppen-ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor dem Einleiten des Anrufs waren.

---

## Durchführen eines Einzelrufs

Damit Sie einen Einzelruf empfangen und/oder beantworten können, der von einem autorisierten, individuellen Funkgerät ausgeht, muss Ihr Funkgerät so

konfiguriert werden, dass Sie einen Einzelruf initiieren können.

Sie hören einen negativen Hinweiston, wenn Sie versuchen, einen Einzelruf über **den Eintastenzugang** oder den Kanalwahlschalter zu tätigen, während diese Funktion nicht aktiviert ist.

1 Führen Sie einen der folgenden Schritte aus.

- Wählen Sie den Kanal mithilfe des Aliasnamens oder der ID des aktiven Funkgeräts. Siehe [Auswählen eines Ruftyps auf Seite 260](#).
  - Drücken Sie die vorprogrammierte **Schnellwahltaste**.
- 

2 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

---

3 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Das Einzelrufsymbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Funkgeräts angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt

---

4 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

---

5 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Zielfunkgerät antwortet, blinkt die LED-Anzeige grün.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf. Ein kurzer Hinweisston erklingt. Im Display wird `Ruf beendet` angezeigt.

---

Es kann sein, dass das Funkgerät so programmiert ist, dass es vor dem Aufbau eines Einzelrufs überprüft, ob das Zielfunkgerät verfügbar ist. Ist das Zielfunkgerät nicht verfügbar, hören Sie einen kurzen Ton, und im Display wird ein negativer Kurzhinweis angezeigt.

### Durchführen eines Standort-Rundumrufs

Mit dieser Funktion können Sie die Übertragung an alle Benutzer des Standorts starten, die nicht bereits ein Gespräch führen. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

Benutzer auf dem Kanal/der Station können auf einen Standort-Alle-Ruf nicht antworten.

1 Wählen Sie den Kanal mithilfe des aktiven Standort-Alle-Ruf-Gruppen-Aliasnamens (oder der aktiven relevanten ID). Siehe [Auswählen eines Rufstyps auf Seite 260](#).

---

2 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

---

3 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Das Gruppenrufsymbol wird in der oberen rechten Ecke des Displays angezeigt. In der ersten Textzeile wird `Standort-Alle-Ruf` angezeigt.

---

4 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

---

## Durchführen eines Multi-Gruppenrufs

Mit dieser Funktion können Sie eine Übertragung an alle Benutzer in mehreren Gruppen starten. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

### HINWEIS:

Benutzer einer Gruppe können auf einen Multi-Gruppenruf nicht antworten.

- 1 Wählen Sie mit dem Drehknopf für die Kanalwahl den Multi-Gruppen-Aliasnamen oder die entsprechende ID.

- 2 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Im Display wird der Multi-Gruppen-Aliasname oder die relevante ID angezeigt.

Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

## Durchführen eines Einzelrufs mit einer Schnellwahltaste

### HINWEIS:

Programmierbare Tasten müssen vom Startbildschirm aus betätigt werden.

Die Schnellwahlfunktion ermöglicht es Ihnen, einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen. Diese Funktion kann durch kurzes oder langes Drücken einer programmierbaren Taste zugewiesen werden.

Sie können NUR einen Aliasnamen oder eine ID einer Schnellwahltaste zuweisen. Am Funkgerät können mehrere Schnellwahltasten konfiguriert werden.

- 1 Drücken Sie die programmierte **Schnellwahltaste**, um einen Einzelruf an einen vordefinierten Alias oder eine ID eines Einzelrufs durchzuführen.

- 2 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

- 3 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün.

Im Display wird der Einzelruf-Alias oder die Einzelruf-ID angezeigt.

---

**4** Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

---

**5** Lassen Sie die **Sendetaste (PTT)** zum Hören los.

Wenn das Zielfunkgerät antwortet, blinkt die LED grün.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

---

## Durchführen eines Anrufs mit der programmierbaren Taste „Man.wählen“

Mit dieser Funktion können Funkgerätebenutzer Einzelrufe mithilfe der programmierbaren Taste „Manuell wählen“ tätigen.

## Durchführen eines Einzelrufs

**1** Drücken Sie die programmierte Taste **Man.wählen**, um auf den Bildschirm für manuelles Wählen zu gelangen.

Im Display wird `Nummer:` angezeigt.

---

**2** Geben Sie einen Funkgeräte-Aliasnamen bzw. eine Einzelruf-ID über das Tastenfeld ein.

---

**3** Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

---

**4** Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Das Einzelruf-Symbol wird in der rechten oberen Ecke angezeigt. In der ersten Textzeile wird der Funkgeräte-Alias angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.

---

**5** Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

---

## 6 Lassen Sie die **Sendetaste (PTT)** zum Hören los.

Wenn das Zielfunkgerät antwortet, blinkt die LED grün.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf. Ein kurzer Hinweiston erklingt. Im Display wird Ruf beendet angezeigt.

---

## Durchführen eines ausgehenden Einzel-Telefonrufs mit der programmierbaren Taste „Man.wählen“

### 1 Drücken Sie die programmierte Taste **Man.wählen**, um auf den Bildschirm für manuelles Wählen zu gelangen.

Im Display wird Nummer: angezeigt.

---

### 2 Geben Sie über die Tastatur eine Telefonnummer

ein, und drücken Sie , um einen Anruf an die eingegebene Nummer einzuleiten.

Drücken Sie , um unerwünschte Zeichen zu löschen. Drücken Sie  und dann innerhalb von 2 Sekunden , um eine Pause einzufügen. Das P ersetzt \* und # im Display.

Wenn erfolgreich, wird in der ersten Zeile des Displays Telefonruf angezeigt. In der zweiten Zeile des Displays wird die gewählte Telefonnummer angezeigt.

Wenn eine ungültige Telefonnummer ausgewählt wird, wird im Display ein negativer Kurzhinweis, Telefonruf erfolglos, Ressource nicht verfügbar oder Ungültige Berechtigungen angezeigt.

Wenn  gedrückt wird, ohne dass eine Telefonnummer eingegeben wurde, ertönt ein positiver Hinweiston und dann ein negativer Hinweiston. Die Anzeige bleibt unverändert.

---

- 3 Halten Sie zum Beenden des Gesprächs  gedrückt.  
In der ersten Zeile des Displays wird Telefonruf ... angezeigt. In der zweiten Zeile des Displays wird wird beendet angezeigt.  
Im Display wird Telefonruf beendet angezeigt.
- 

## Durchführen eines ausgehenden Einzel-Telefonrufs über das Telefonmenü

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Telefon, und drücken Sie  zum Auswählen.
- 

- 3 Drücken Sie  , um Man.Wählen auszuwählen.  
In der ersten Zeile des Displays wird Nummer und in der zweiten Zeile ein blinkender Cursor angezeigt.
- 

- 4 Geben Sie über die Tastatur eine Telefonnummer ein, und drücken Sie  , um einen Anruf an die eingegebene Nummer einzuleiten.

Drücken Sie  , um unerwünschte Zeichen zu löschen. Drücken Sie  und dann innerhalb von 2 Sekunden  , um eine Pause einzufügen. Das P ersetzt \* und # im Display.

Wenn erfolgreich, wird in der ersten Zeile des Displays Telefonruf angezeigt. In der zweiten Zeile des Displays wird die gewählte Telefonnummer angezeigt.

Wenn eine ungültige Telefonnummer ausgewählt wird, wird im Display ein negativer Kurzhinweis, Telefonruf erfolglos, Ressource nicht verfügbar oder Ungültige Berechtigungen angezeigt.

Wenn  gedrückt wird, ohne dass eine Telefonnummer eingegeben wurde, ertönt ein positiver Hinweiston und dann ein negativer Hinweiston. Die Anzeige bleibt unverändert.

- 5 Halten Sie zum Beenden des Gesprächs  gedrückt.

In der ersten Zeile des Displays wird Telefonruf ... angezeigt. In der zweiten Zeile des Displays wird wird beendet angezeigt.

Im Display wird Telefonruf beendet angezeigt.

## Durchführen eines ausgehenden Einzel-Telefonrufs über das Menü „Kontakte“

### HINWEIS:

Wenn die manuelle Wählfunktion des Funkgeräts in der MOTOTRBO Connect Plus-Optionskarten-CPS deaktiviert ist, wird die Telefonnummer **nicht** im Menü angezeigt.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.

- 3 Drücken Sie  oder  bis Manuell wählen, und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  bis Telefonnummer, und drücken Sie  zum Auswählen.

In der ersten Zeile des Displays wird Nummer und in der zweiten Zeile ein blinkender Cursor angezeigt.

- 5 Geben Sie über die Tastatur eine Telefonnummer ein, und drücken Sie  , um einen Anruf an die eingegebene Nummer einzuleiten.

Wenn die **Sendetaste** (PTT) gedrückt wird, zeigt das Display den negativen Kurzhinweis an, Zum Senden OK drück und kehrt zum vorherigen Bildschirm zurück.

Drücken Sie , um unerwünschte Zeichen zu löschen. Drücken Sie  und dann innerhalb von 2 Sekunden , um eine Pause einzufügen. Das P ersetzt \* und # im Display.

Wenn erfolgreich, wird in der ersten Zeile des Displays `Telefonruf` angezeigt. In der zweiten Zeile des Displays wird die gewählte Telefonnummer angezeigt.

Wenn  gedrückt wird, ohne dass eine Telefonnummer eingegeben wurde, ertönt ein positiver Hinweis und dann ein negativer Hinweis. Die Anzeige bleibt unverändert.

---

**6** Halten Sie zum Beenden des Gesprächs  gedrückt.

In der ersten Zeile des Displays wird `Telefonruf ...` angezeigt. In der zweiten Zeile des Displays wird `wird beendet` angezeigt.

Im Display wird `Telefonruf beendet` angezeigt.

---

## Warten auf die Kanalzuweisung bei einem ausgehenden Einzelruf

Wenn Sie einen Einzel-Telefonruf tätigen, wird in der ersten Zeile des Displays `Telefonruf` angezeigt. In der zweiten Zeile des Displays wird die gewählte Telefonnummer angezeigt.

Wenn der Ruf verbunden wird, wird das „Anruf als Einzelruf“-Symbol in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird die Telefonnummer angezeigt.

Wenn erfolglos, wird im Display ein negativer Kurzhinweis, `Telefonruf erfolglos, Ressource nicht verfügbar` oder `Ungültige Berechtigungen` angezeigt.

Halten Sie zum Beenden des Gesprächs  gedrückt.

Das Display wechselt zum vorherigen Bildschirm.

---

## Verzögertes Überwählen bei einem verbundenen ausgehenden Einzelruf

Während des Rufs wird das „Anruf als Einzelruf“-Symbol in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird die Telefonnummer angezeigt.

- 1 Geben Sie die Ziffern mithilfe der Zifferntastatur ein.

Drücken Sie , um unerwünschte Zeichen zu löschen. Drücken Sie  und dann innerhalb von 2 Sekunden , um eine Pause einzufügen. Das P ersetzt \* und # im Display.

In der ersten Textzeile des Displays wird **Zusätz.** Stellen angezeigt, die zweite Textzeile des Displays zeigt die eingegebenen zusätzliche Zeichen an.

- 2 Drücken Sie die  -Taste

Wenn die **Sendetaste** (PTT) gedrückt wird, zeigt das Display den negativen Kurzhinweis an, Zum Senden

OK drück und kehrt zum vorherigen Bildschirm zurück.

Das „Anruf als Einzelruf“-Symbol wird in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird die Telefonnummer mit den Ziffern zum Überwählen angezeigt.

- 3 Führen Sie einen der folgenden Schritte aus.

- Drücken Sie , um zum Anruf-Bildschirm zurückzukehren.
- Halten Sie zum Beenden des Gesprächs  gedrückt.

## Live-Überwählen bei einem verbundenen ausgehenden Einzelruf

Während des Rufs wird das „Anruf als Einzelruf“-Symbol in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird die Telefonnummer angezeigt.

- 1 Drücken Sie die **Sendetaste (PTT)**, und verwenden Sie die Zifferntastatur zur Eingabe der Ziffern.

Das „Anruf als Einzelruf“-Symbol wird in der oberen rechten Ecke angezeigt. In der ersten Zeile des Displays wird die Telefonnummer mit den Ziffern zum Überwählen angezeigt.

- 2 Halten Sie zum Beenden des Gesprächs  gedrückt.

In der ersten Zeile des Displays wird `Telefonruf ...` angezeigt. In der zweiten Zeile des Displays wird `wird beendet` angezeigt.

Im Display wird `Telefonruf beendet` angezeigt.

## Erweiterte Funktionen im Connect Plus-Modus

In diesem Kapitel wird die Bedienung der Funktionen auf Ihrem Funkgerät beschrieben.

### Home-Kanalerinnerung

Diese Funktion aktiviert eine Erinnerung, wenn der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist.

Wenn diese Funktion über CPS aktiviert ist und auf dem Funkgerät der Home-Kanal für eine bestimmte Zeit nicht eingestellt ist, ertönen die Home-Kanalerinnerung und die Ansage. In der ersten Zeile des Displays wird regelmäßig `Kein` und in der zweiten Zeile `Home-Kanal` angezeigt.

Sie können auf die Erinnerung durch eine der folgenden Aktionen reagieren:

- Kehren Sie zum Home-Kanal zurück.
- Schalten Sie die Erinnerung über die programmierbare Taste vorübergehend stumm.
- Legen Sie einen neuen Home-Kanal über die programmierbare Taste fest.

## Automatisches Fallback

Beim automatischen Fallback handelt es sich um eine Funktion, die es Ihnen bei bestimmten Arten von Connect Plus-Systemausfällen ermöglicht, für einen ausgewählten Gruppenkontakt normale Gruppenrufe (keine Notrufe) durchzuführen und zu empfangen.

Wenn einer der folgenden Fehler auftritt, versucht das Funkgerät, per Roaming eine Verbindung zu einem anderen Connect Plus-Standort herzustellen. Bei diesem Suchvorgang kann es passieren, dass Ihr Funkgerät einen betriebsbereiten Connect Plus-Standort findet, oder es kann passieren, dass Ihr Funkgerät einen „Fallback-Kanal“ findet (sofern der automatische Fallback-Modus auf Ihrem Funkgerät aktiviert wurde). Ein Fallback-Kanal ist ein Repeater, der normalerweise Teil eines betriebsbereiten Connect Plus-Standorts ist, der aber momentan keine Verbindung mit seinem Standort-Controller oder mit dem Connect Plus-Netzwerk herstellen kann. Im Fallback-Modus arbeitet der Repeater als eigenständiger digitaler Repeater. Der automatische Fallback-Modus unterstützt nur normale Gruppenrufe (keine Notrufe). Alle anderen Anrufarten werden im Fallback-Modus nicht unterstützt.

## Hinweise auf den automatischen Fallback-Modus

Wenn das Funkgerät einen Fallback-Kanal verwendet, hören Sie den sporadisch auftretenden „Fallback-Ton“ (etwa ein Mal alle 15 Sekunden, außer bei der Übertragung). Im Display wird in regelmäßigen Abständen die kurze Meldung „Fallback Kanal“ angezeigt. Ihr Funkgerät lässt PTT nur für den ausgewählten Gruppenkontakt zu (Gruppenruf, Multigroup-Ruf oder Site All Call). Sie können keine anderen Ruftypen durchführen.

## Durchführen/Empfangen von Anrufen im Fallback-Modus

### HINWEIS:

Anrufe werden nur von den Funkgeräten gehört, die den gleichen Fallback-Kanal verwenden und für die gleiche Gruppe ausgewählt sind. Anrufe werden nicht an andere Standorte oder andere Repeater übermittelt.

Notrufe oder Notfallwarnungen sind im Fallback-Modus nicht verfügbar. Wenn Sie im Fallback-Modus die Notruftaste drücken, gibt das Funkgerät den Ton für eine ungültige Taste aus. Funkgeräte mit Display zeigen außerdem die Meldung „Funktion nicht verfügbar“ an.

Einzelrufe von Funkgerät zu Funkgerät und Telefonrufe sind im Fallback-Modus nicht verfügbar. Wenn Sie versuchen, einen privaten Kontakt anzurufen, wird ein Verweigerungston ausgegeben. In solchen Fällen sollten Sie den gewünschten Gruppenkontakt auswählen. Zu den nicht unterstützten Rufotypen gehören Fernmonitor, Ruffhinweis, Funkgerät-Check, Aktivieren des Funkgeräts, Deaktivieren des Funkgeräts, Textnachrichten, Standortaktualisierungen und Paketdatenanrufe.

Die ETCA-Funktion (Enhanced Traffic Channel Access) wird im automatischen Fallback-Modus nicht unterstützt. Wenn zwei oder mehr Funkgerätbenutzer gleichzeitig (oder fast gleichzeitig) die **Sendetaste (PTT)** drücken, ist es möglich, dass beide Funkgeräte übertragen, bis die **Sendetaste (PTT)** wieder losgelassen wird. In diesem Fall ist es möglich, dass die Übertragung auf den empfangenden Funkgeräten nicht verstanden wird.

Das Durchführen von Anrufen im Fallback-Modus ähnelt der normalen Funktionsweise. Wählen Sie einfach den Gruppenkontakt, den Sie anrufen möchten (über die normale Kanalauswahlmethode des Funkgeräts), und drücken Sie anschließend die **Sendetaste (PTT)**, um den Ruf zu starten. Es ist möglich, dass der Kanal bereits von einer anderen Gruppe verwendet wird. Wenn der Kanal verwendet wird, hören Sie einen Besetztton, und im Display wird „Kanal belegt“ angezeigt. Über die normale Kanalauswahlmethode des Funkgeräts können Sie Kontakte für Gruppen-, Multi-Gruppen- oder Standort-Rundumrufe auswählen. Wenn das Funkgerät einen Fallback-Kanal verwendet, arbeitet die Multi-Gruppe genau wie die anderen Gruppen. Sie wird nur von Funkgeräten gehört, die derzeit für dieselbe Multi-Gruppe ausgewählt sind.

## Rückkehr in den normalen Betrieb

Wenn der Standort zum normalen Bündelfunkbetrieb zurückkehrt, während Sie sich im Empfangsbereich Ihres Fallback-Repeater befinden, verlässt das Funkgerät automatisch den automatischen Fallback-Modus. Ein Produktregistrierungs-„Signalton“ erklingt, wenn das Funkgerät erfolgreich registriert wird. Wenn Sie sich im Bereich eines betriebsbereiten Standorts befinden (der sich nicht im Fallback-Modus befindet), können Sie die Taste „Roaming-Anforderung“ drücken (falls für Ihr Funkgerät konfiguriert), um Ihr Funkgerät zu veranlassen, einen verfügbaren Standort zu suchen und sich dort zu registrieren. Wenn kein anderer Standort verfügbar ist, wechselt Ihr Funkgerät in den automatischen Fallback-Modus, sobald die Suche abgeschlossen ist. Wenn Sie die Netzabdeckung Ihres Fallback-Repeater verlassen, wechselt Ihr Funkgerät in den Suchmodus (im Display wird Suche angezeigt).

## Funkgerät-Check

Wenn aktiviert, kann mit dieser Funktion festgestellt werden, ob ein anderes Funkgerät im System aktiv ist, ohne den Benutzer dieses Funkgeräts zu stören. Am

Zielfunkgerät wird keine hörbare oder sichtbare Anzeige der Kontrolle angezeigt.

Diese Funktion ist nur für Funkgeräte-Aliasnamen oder -IDs verfügbar.

## Senden eines Funkgerät-Checks

- 1 Zugriff auf die Funkgerät-Check-Funktion.

Bedienelement des Funkgeräts	Schritte
<b>Programmierte Taste für den Funkgerät-Check</b>	<p><b>a</b> Drücken Sie die vorprogrammierte Taste <b>FunkgCheck</b>.</p> <p><b>b</b> Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie  zum Auswählen.</p>

Bedienelement des Funkgeräts	Schritte
<b>Menu</b>	<p><b>a</b> Drücken Sie , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.</p> <p><b>c</b> Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie  zum Auswählen.</p> <p><b>d</b> Drücken Sie  oder  bis FunkgCheck,</p>

Bedienelement des Funkgeräts	Schritte
	und drücken Sie  zum Auswählen.

Das Display zeigt den Ziel-Aliasnamen an, der angibt, dass die Anfrage ausgeführt wird. Die LED leuchtet dauerhaft grün.

## 2 Warten Sie auf eine Quittierung.

Wenn das gewünschte Funkgerät im System aktiv ist, wird ein Hinweiston ausgegeben, und im Display wird kurz Zielfunkgerät verfügbar angezeigt.

Wenn das gewünschte Funkgerät nicht im System aktiv ist, wird ein Hinweiston ausgegeben, und im Display wird kurz Zielfunkgerät nicht verfügbar angezeigt.

Das Funkgerät kehrt zum Bildschirm des Funkgeräte-Alias oder der relevanten ID zurück, wenn dies über das Menü veranlasst wird.

Das Funkgerät kehrt zum Ausgangsbildschirm zurück, wenn dies über die programmierbare Taste veranlasst wird.

## Fernüberwachung

Mit dieser Funktion kann das Mikrofon eines Zielfunkgeräts eingeschaltet werden (nur Funkgeräte-Alias oder -IDs). Die grüne LED des Zielfunkgeräts blinkt einmal. Diese Funktion kann zur Remote-Überwachung jeglicher hörbarer Aktivität rund um das Zielfunkgerät eingesetzt werden.

Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

## Einleiten des Fernmonitors

### HINWEIS:

Der Fern-Monitor stoppt automatisch nach einer programmierten Zeit oder wenn versucht wird, eine Übertragung einzuleiten, den Kanal zu wechseln, oder das Funkgerät auszuschalten.

- 1 Wählen Sie die Fernmonitor-Funktion.

Bedienelement des Funkgeräts	Schritte
Programmierte Fernmonitor-Taste	<p>a Drücken Sie die vorprogrammierte Taste <b>Remote-Überwachung</b>.</p> <p>b Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie  zum Auswählen.</p>
Menu	<p>a Drücken Sie , um das Menü aufzurufen.</p> <p>b Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.</p>

Bedienelement des Funkgeräts	Schritte
	<p><b>c</b> Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID, und drücken Sie  zum Auswählen.</p>
	<p><b>d</b> Drücken Sie  oder  bis Manuell wählen, und drücken Sie  zum Auswählen.</p>
	<p><b>e</b> Drücken Sie  oder  bis FernMon, und</p>

Bedienelement des Funkgeräts	Schritte
	<p>drücken Sie  zum Auswählen.</p>

Die erste Textzeile zeigt FernMon an. Die zweite Textzeile zeigt den Ziel-Aliasnamen, was darauf hinweist, dass die Anfrage ausgeführt wird. Die LED blinkt grün.

## 2 Warten Sie auf eine Quittierung.

Wenn erfolgreich, erklingt ein positiver Hinweisston, und im Display wird FernMon erfolgr. angezeigt. Das Funkgerät gibt nun während einer vorprogrammierten Zeitdauer Audio vom überwachten Funkgerät wieder. Im Display wird FernMon angezeigt, gefolgt vom Ziel-Aliasnamen. Nach Ablauf dieser Zeit ertönt ein Hinweisston, und die LED erlischt.

Wenn erfolglos, erklingt ein negativer Hinweisston und im Display wird FernMon fehlg. angezeigt.

## „Scan“

Mit dieser Funktion kann das Funkgerät Anrufe von Gruppen in einer vorprogrammierten Scan-Liste überwachen bzw. verbinden. Wenn Scan aktiviert ist, wird das Scan-Symbol in der Statusleiste angezeigt, und die LED-Anzeige blinkt (im Leerlauf) gelb.

### Starten und Stoppen des Scanvorgangs

#### HINWEIS:

Bei diesem Vorgang wird die Scan-Funktion für alle Connect Plus-Zonen mit derselben Netzwerk-ID wie Ihre derzeit ausgewählte Zone ein- bzw. ausgeschaltet. Dabei ist zu beachten, dass die Scan-Funktion unter Umständen für einige (oder alle) Gruppen in Ihrer Scan-Liste deaktiviert ist, obwohl sie mithilfe dieses Vorgangs aktiviert wurde. Weitere Informationen finden Sie unter [Bearbeiten der Scan-Liste auf Seite 286](#).

Sie können den Scanvorgang durch Drücken der programmierten **Scan**-Taste starten und anhalten **ODER** die folgenden Schritte ausführen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis **Scan**, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis **Einschalten** oder **Abschalten**, und drücken Sie  zum Auswählen.
  - Im Display wird **Scan Ein** angezeigt, wenn Scan deaktiviert ist.
  - Das Scan-Menü zeigt **Abschalten**, wenn Scan aktiviert ist.
  - Im Display wird **Scan Aus** angezeigt, wenn Scan deaktiviert ist.
  - Das Scan-Menü zeigt **Einschalten**, wenn Scan aktiviert ist.

## Reagieren auf eine Übertragung während eines Scanvorgangs

Das Funkgerät stoppt während eines Suchlaufs auf einem Kanal/bei einer Gruppe, sobald es Aktivität erfasst. Das Funkgerät sucht kontinuierlich nach weiteren Mitgliedern der Scan-Liste, wenn es sich im Steuerungskanal im Leerlauf befindet.

- 1 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

---

- 2 Drücken Sie während der Haltezeit die **Sendetaste** (PPT).  
Die LED leuchtet dauerhaft grün.

---

- 3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

---

- 4 Lassen Sie die **Sendetaste (PTT)** zum Hören los.  
Wenn Sie nicht vor Ablauf der Haltezeit antworten, nimmt das Funkgerät den Scanvorgang wieder auf und durchsucht weitere Gruppen.

---

## Vom Benutzer konfigurierbarer Scan

Wenn das Menü „Liste bearbeiten“ aktiviert ist, kann ein Teilnehmer über das Menü „Mitglied hinzufügen“ Scan-Listen-Mitglieder hinzufügen und entfernen. Ein Scan-Listen-Mitglied muss ein Stamm-Gruppenkontakt sein (z. B. nicht Multi-Gruppe oder Site All Call/netzwerkweiter Rundumruf), der gegenwärtig einer Kanalwahlposition in einer Connect Plus-Zone mit derselben Netzwerk-ID wie die aktuell ausgewählte Zone zugewiesen ist. Der Gesprächsgruppen-Alias darf keiner Gesprächsgruppe entsprechen, die in der Scan-Liste der aktuellen Zone enthalten ist.

Scan kann über das Menü aktiviert oder deaktiviert werden, oder indem Sie die programmierbare Taste **Scan ein/aus** drücken.

Diese Funktion funktioniert nur, wenn das Funkgerät derzeit an keinem Gespräch teilnimmt. Wenn Sie gerade ein Gespräch führen, kann das Funkgerät keine anderen Gruppenrufe scannen und somit auch nicht erkennen, ob solche Anrufe getätigt werden. Wenn Ihr Ruf beendet ist, kehrt das Funkgerät zum Steuerungskanal-Zeitfenster zurück und kann wieder nach Gruppen scannen, die sich in der Scan-Liste befinden.

## Ein-/Ausschalten der Scan-Funktion

### HINWEIS:

Bei diesem Vorgang wird die Scan-Funktion für alle Zonen mit derselben Netzwerk-ID wie Ihre derzeit ausgewählte Zone ein- bzw. ausgeschaltet. Dabei ist zu beachten, dass die Scan-Funktion unter Umständen für einige (oder alle) Gruppen in Ihrer Scan-Liste deaktiviert ist, obwohl sie mithilfe dieses Vorgangs aktiviert wurde. Im nächsten Abschnitt finden Sie weitere Informationen.

Wenn die Funktion eingeschaltet ist, wird das Symbol „Scan“ im Display angezeigt. Wenn die Funktion „Scan“ aktiviert ist und Sie aktuell kein Gespräch führen, blinkt die LED-Anzeige grün und gelb.

Die Vorgehensweise zum Ein- oder Ausschalten der Scan-Funktion hängt davon ab, wie Ihr Funkgerät konfiguriert wurde. Wenn es mit der Taste Scan Ein/Aus konfiguriert wurde, verwenden Sie diese Taste, um die Funktion ein- bzw. auszuschalten. Wenn Ihr Funkgerät so konfiguriert wurde, dass die Scan-Funktion über das Menü aktiviert oder deaktiviert werden kann, gehen Sie wie nachfolgend beschrieben vor.

- 1 Drücken Sie  OK , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Scan, und drücken Sie  OK zum Auswählen.

- 3 Drücken Sie  oder  bis Einschalten oder Abschalten, und drücken Sie  OK zum Auswählen.
  - Im Display wird kurz Scan Ein angezeigt, wenn Scan deaktiviert ist.
  - Im Display wird kurz Scan Aus angezeigt, wenn Scan aktiviert ist.

## Bearbeiten der Scan-Liste

### HINWEIS:

Wenn der Eintrag in der Scan-Liste zufällig die derzeit ausgewählte Gruppe ist, hört das Funkgerät Aktivitäten dieser Gruppe ab, unabhängig davon, ob neben dem Eintrag in der Liste ein Häkchen angezeigt wird oder nicht. Wenn ein Funkgerät sich nicht in einem Anruf befindet, wartet es auf Aktivitäten in seiner ausgewählten Gruppe, der Multi-Gruppe, dem Site-Rundumruf und der Standard-Notrufgruppe (falls diese konfiguriert wurden). Dieser Vorgang kann nicht deaktiviert werden. Wenn das Scannen aktiviert ist, achtet das Funkgerät auch auf Aktivitäten aktivierter Mitglieder der Scan-Liste.

Ihre Scan-Liste bestimmt, welche Gruppen gescannt werden können. Die Liste wird erstellt, wenn das Funkgerät programmiert wird. Wenn ihr Funkgerät so programmiert wurde, dass Sie die Scan-Liste bearbeiten können, können Sie:

- Scanning für einzelne Gruppen in der Liste aktivieren/deaktivieren.
- Scan-Mitglieder über das Menü zum Hinzufügen von Mitgliedern hinzufügen oder entfernen. Siehe

Hinzufügen oder Löschen einer Gruppe über das Menü „Teilnehmer hinzufügen“ auf Seite 287.

### HINWEIS:

Ein Scan-Listen-Mitglied muss ein Stamm-Gruppenkontakt sein (nicht Multi-Gruppe oder Site All Call/netzwerkweiter Rundumruf), der gegenwärtig einer Kanalwahlposition in einer Connect Plus-Zone mit derselben Netzwerk-ID wie die aktuell ausgewählte Zone zugewiesen ist. Der Gesprächsgruppen-Alias darf keiner Gesprächsgruppe entsprechen, die in der Scan-Liste der aktuellen Zone enthalten ist.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis `Liste anzeigen/ bearbeiten`, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Gruppennamen.  
Wenn sich ein Häkchen vor dem Gruppennamen befindet, ist Scannen derzeit aktiviert für diese Gruppe.

Wenn sich kein Häkchen vor dem Gruppennamen befindet, ist Scannen derzeit für diese Gruppe deaktiviert.

- 4  , um die gewünschte Gruppe auszuwählen.

Das Display zeigt **Aktivieren**, wenn die Funktion „Scannen“ derzeit für die Gruppe deaktiviert ist.

Das Display zeigt **Deaktivieren**, wenn die Funktion „Scannen“ derzeit für die Gruppe aktiviert ist.

- 5 Wählen Sie die angezeigte Option (Aktivieren oder Deaktivieren) und drücken Sie  zum Auswählen.

Abhängig von der gewählten Option, erscheint auf dem Funkgerät vorübergehend die Anzeige **Scannen aktiviert** oder **Scannen Deaktiviert** als Bestätigung.

Auf dem Funkgerät wird erneut die Zonen-Scan-Liste angezeigt. Wenn die Funktion „Scannen“ für die Gruppe aktiviert wurde, wird das Häkchen vor dem Gruppennamen angezeigt. Wenn die Funktion „Scannen“ für die Gruppe deaktiviert wurde, wird das Häkchen vor dem Gruppennamen entfernt.

## Hinzufügen oder Löschen einer Gruppe über das Menü „Teilnehmer hinzufügen“

Das Connect Plus-Funkgerät unterstützt keine doppelten Gruppennummern oder doppelten Gruppen-Aliasnamen in einer Zonen-Scan-Liste (oder deren Anzeige als „Scan-Kandidaten“). Daher kann sich die in [Schritt 6](#) und [Schritt 7](#) beschriebene Liste der „Scan-Kandidaten“ ändern, wenn eine Gruppe zur Zonen-Scan-Liste hinzugefügt oder aus dieser gelöscht wird.

Wenn Ihr Funkgerät darauf programmiert wurde, dass Sie die Scan-Liste bearbeiten können, so können Sie mithilfe des Menüs „Teilnehmer hinzufügen“ eine Gruppe zur Scan-Liste der aktuell ausgewählten Zone hinzufügen oder eine Gruppe aus dieser löschen.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis zur Option „Scan“, und drücken Sie  zum Auswählen.

- 3 Drücken Sie  oder  bis <Teilnehmer hinzufügen> und drücken Sie  zum Auswählen.

Im Display wird Teilnehmer aus Zone n hinzufügen angezeigt (n = die Zahl der ersten Connect Plus-Zone in Ihrem Funkgerät mit derselben Netzwerk-ID wie Ihre derzeit ausgewählte Zone).

- 4 Führen Sie einen der folgenden Schritte aus.
- Wenn die Gruppe, die Sie der Scan-Liste hinzufügen möchten, einer Kanalwahlschalter-Position in dieser Zone zugeordnet ist, fahren Sie mit [Schritt 6](#) fort.
  - Wenn die Gruppe, die Sie der Scan-Liste hinzufügen möchten, einer Kanalwahlschalter-Position in einer anderen Connect Plus-Zone zugeordnet ist, fahren Sie mit [Schritt 5](#) fort.

- 5 Drücken Sie  oder , um eine Liste von Connect Plus-Zonen mit derselben Netzwerk-ID wie die aktuell ausgewählte Zone zu durchsuchen.

- 6 Nach der Standortbestimmung der Connect Plus-Zone, bei der die gewünschte Gruppe einer Kanalwahlschalterposition zugeordnet ist, drücken Sie  zum Auswählen.

Ihr Funkgerät zeigt den ersten Eintrag in einer Liste von Gruppen an, die einer Kanal-Position in dieser Zone zugeordnet sind. Die Gruppen in der Liste werden als „Scan-Kandidaten“ bezeichnet, weil sie der Scan-Liste der derzeit ausgewählten Zone hinzugefügt werden können (bzw. der Zone-Scan-Liste bereits hinzugefügt sind).

Wenn die Zone keine Gruppen enthält, die der Scan-Liste hinzugefügt werden können, zeigt das Funkgerät Keine Kandidaten an.

- 7 Drücken Sie  oder  zum Durchsuchen der Liste der Gruppenkandidaten.

Wenn ein Pluszeichen (+) unmittelbar vor dem Gruppen-Aliasnamen angezeigt wird, so bedeutet dies, dass sich die Gruppe derzeit in der Scan-Liste für die ausgewählte Zone befindet.

Wenn das Pluszeichen (+) nicht unmittelbar vor dem Aliasnamen angezeigt wird, so befindet sich die

Gruppe derzeit nicht in der Scan-Liste, kann jedoch hinzugefügt werden.

- 8 Drücken Sie , wenn der gewünschte Gruppen-Aliasname angezeigt wird.

Wenn sich diese Gruppe nicht auf der Scan-Liste für die aktuell ausgewählte Zone befindet, wird die Meldung (Gruppen-Alias) Hinzufügen angezeigt.

Wenn sich diese Gruppe bereits auf der Scan-Liste für die aktuell ausgewählte Zone befindet, wird die Meldung (Gruppen-Alias) Löschen angezeigt.

- 9 Drücken Sie , um die angezeigte Meldung zu bestätigen (Hinzufügen oder Löschen).

War der Löschvorgang einer Gruppe aus der Liste erfolgreich, so wird das Pluszeichen (+) unmittelbar vor dem Alias nicht mehr angezeigt.

War das Hinzufügen einer Gruppe zur Liste erfolgreich, so wird das Pluszeichen (+) unmittelbar vor dem Alias angezeigt.

Wenn Sie versuchen, eine Gruppe hinzuzufügen, wenn die Liste bereits voll ist, zeigt das Funkgerät Liste voll an. In diesem Fall müssen Sie eine

Gruppe aus der Scan-Liste löschen, bevor Sie eine neue hinzufügen können.

- 10 Wenn Sie die Einstellungen abgeschlossen haben, drücken Sie  so oft wie notwendig, um zum gewünschten Menü zurückzukehren.

## Informationen zum Scan-Vorgang

### HINWEIS:

Wenn sich das Funkgerät mit einem Ruf für ein Mitglied der Scan-Liste von einer anderen Zone verbindet und der Standzeit-Timer abläuft, bevor Sie reagieren können, müssen Sie zu der Zone und dem Kanal des Mitglieds der Scan-Liste navigieren und einen neuen Ruf einleiten, um antworten zu können.

Unter manchen Umständen ist es möglich, Anrufe für Gruppen zu verpassen, die sich in Ihrer Scan-Liste befinden. Wenn Sie einen Anruf aus einem der folgenden Gründe verpassen, deutet dies nicht auf ein Problem mit Ihrem Funkgerät hin. Hierbei handelt es sich um einen normalen Scan-Vorgang für Connect Plus.

- Die Scan-Funktion ist nicht eingeschaltet (prüfen Sie, ob das Scan-Symbol im Display angezeigt wird).

- Ein Mitglied der Scan-Liste wurde über das Menü deaktiviert (siehe [Bearbeiten der Scan-Liste auf Seite 286](#)).
- Sie nehmen bereits an einem Gespräch teil.
- Kein Mitglied der gescannten Gruppe ist an Ihrem Standort registriert (gilt nur für Multisite-Systeme).

## Antworten während des Scannens

Wenn Ihr Funkgerät einen Ruf aus der wählbaren Gruppen-Scan-Liste scannt und die **Sendetaste** (PTT) während des gescannten Rufs gedrückt wird, hängt die Reaktion des Funkgeräts davon ab, ob die Funktion „Antworten während des Scannens“ bei Konfiguration des Funkgeräts aktiviert oder deaktiviert wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

### Antworten während des Scannens deaktiviert

Das Funkgerät verlässt den gescannten Ruf und versucht, über den Kontakt für die aktuell ausgewählte Kanalposition zu senden. Wenn die Haltezeit für den aktuell ausgewählten Kontakt abläuft, wechselt das Funkgerät zu dem Standardkanal und startet den Timer für die Scan-Haltezeit. Das Funkgerät setzt den

Gruppen-Scan fort, wenn der Timer für die Scan-Haltezeit abläuft.

### Antworten während des Scannens aktiviert

Wenn die **Sendetaste** (PTT) während der Haltezeit der Gruppe für den gescannten Ruf gedrückt wird, versucht das Funkgerät, an die gescannte Gruppe zu senden.

### HINWEIS:

Wenn Sie einen Ruf einer Gruppe scannen, die keiner Kanalposition in der derzeit ausgewählten Zone zugewiesen ist, und die Haltezeit des Rufs abläuft, wechseln Sie zu der richtigen Zone, und wählen Sie dann die Kanalposition der Gruppe, um mit dieser Gruppe zu sprechen.

## Bearbeitung der Priorität für eine Gesprächsgruppe

Der Prioritätsmonitor ermöglicht es dem Funkgerät, automatisch Übertragungen von einer Gesprächsgruppe mit höherer Priorität zu empfangen, wenn es gerade mit einem anderen Ruf beschäftigt ist. Beim Wechsel des Funkgeräts zum Ruf mit höherer Priorität erklingt ein Ton. Es gibt zwei Prioritätsstufen für die Gesprächsgruppen: P1 und P2. P1 hat eine höhere Priorität als P2.

**HINWEIS:**

Wenn die standardmäßige Notrufgruppen-ID in MOTOTRBO Connect Plus Option Board CPS konfiguriert ist, gibt es drei Prioritätsstufen für Gesprächsgruppen: P0, P1 und P2. P0 ist die permanente Notrufgruppen-ID und hat die höchste Priorität. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Liste anzeigen/ bearbeiten, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis zur gewünschten Gesprächsgruppe, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Priorit.bearb, und drücken Sie  zum Auswählen.

---

- 6 Drücken Sie  oder  bis zur gewünschten Prioritätsstufe, und drücken Sie  zum Auswählen.

Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm angezeigt wird. Das Prioritäts-Symbol wird links neben der Gesprächsgruppe angezeigt.

---

## Kontakteinstellungen

### HINWEIS:

Sie können den Contact Plus-Kontakten Funkgeräte-IDs hinzufügen oder diese bearbeiten. Funkgeräte-IDs können nur von Ihrem Händler gelöscht werden.

Ist die Verschlüsselungsfunktion für einen Kanal aktiviert, können Sie auf diesem Kanal Sprachanrufe mit aktivierter Verschlüsselung durchführen. Ausschließlich Funkgeräte mit demselben Privacy-Key oder demselben Schlüsselwert und derselben Schlüssel-ID wie Ihr Funkgerät können die Übertragung entschlüsseln.

Der Zugang zu Kontaktlisten hängt von der Zonenkonfiguration ab:

- Wenn nur eine Zone auf dem Funkgerät konfiguriert ist, zeigt die Kontaktliste direkt die Liste aus der aktuell ausgewählten Zone an.
- Wenn mehrere Zonen konfiguriert sind, zeigt der Ordner für Zonenkontakte alle Zonen mit identischen Netzwerk-IDs als aktuell ausgewählte Zone an. Der Benutzer kann auf die Kontakte in diesen Zonen zugreifen.

Über die Kontakte wird Ihr Funkgerät mit einer „Adressbuchfunktion“ ausgestattet. Jeder Eintrag entspricht

einem Aliasnamen bzw. einer ID, die Sie zur Rufeinleitung verwenden.

Jede Zone bietet eine Kontaktliste mit bis zu 100 Kontakten. Die folgenden Kontaktoptionen sind verfügbar:

- Einzelruf
- Gruppenruf
- Multi-Gruppenruf
- Standortsammelruf – Sprachruf
- Standortsammelruf – Text
- Zentralruf

Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.

## Durchführen eines Einzeldrucks über das Menü „Kontakte“

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.

Die Einträge sind in alphabetischer Reihenfolge sortiert.

- 3 Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

- 4 Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün.

- 5 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

- 6 Lassen Sie die **Sendetaste (PTT)** los, um den Gesprächspartner zu hören.

Sobald das gerufene Funkgerät antwortet, blinkt die LED grün, und im Display wird die ID des sendenden Funkgeräts angezeigt.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Ein kurzer Hinweiston erklingt. Im Display wird Ruf beendet angezeigt.

## Durchführen eines Rufs mittels Ruf-Aliassuche

Zum Auffinden des Aliasnamens des gewünschten Funkgeräts kann auch eine Alias- oder alphanumerische Suche durchgeführt werden.

Diese Funktion ist nur verfügbar, während sich das Funkgerät im Menü „Kontakte“ befindet.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.

Die Einträge sind in alphabetischer Reihenfolge sortiert.

- 3 Geben Sie den ersten Buchstaben des gewünschten Aliasnamens ein, und drücken Sie dann die

Taste  oder  , um den gewünschten Aliasnamen zu lokalisieren.

**4** Halten Sie das Mikrofon 2,5 bis 5,0 cm vom Mund entfernt.

**5** Drücken Sie zum Durchführen des Anrufs die **Sendetaste (PTT)**.

Die LED leuchtet dauerhaft grün. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

**6** Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.

**7** Lassen Sie die **Sendetaste (PTT)** los, um den Gesprächspartner zu hören.

Wenn das Zielfunkgerät antwortet, blinkt die LED grün.

Wird während einer vorprogrammierten Zeitdauer nicht gesprochen, endet der Ruf.

Im Display wird `Ruf beendet` angezeigt.

## Hinzufügen eines neuen Kontakts

**1** Drücken Sie  , um das Menü aufzurufen.

**2** Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.

**3** Drücken Sie  oder  bis Neuer Kontakt, und drücken Sie  zum Auswählen.

**4** Geben Sie die Kontaktnummer über die Tastatur ein, und drücken Sie  zur Bestätigung.

**5** Geben Sie den Kontaktnamen über die Tastatur ein, und drücken Sie  zur Bestätigung.

**6** Drücken Sie beim Hinzufügen eines Funkgerätkontakts  oder  bis zum

gewünschten Rufontyp, und drücken Sie  zum Auswählen.

Aus dem Funkgerät erklingt ein positiver Hinweistön, und auf dem Display wird Kontakt gesichert angezeigt.

## Rufanzeigeeinstellungen

Mit dieser Funktion können Funkgerätebenutzer Ruföne für Rufe oder Textnachrichten konfigurieren.

### Aktivieren und Deaktivieren von Rufönen für Rufhinweise

Die Ruföne für einen empfangenen Rufhinweis können ausgewählt bzw. ein- oder ausgeschaltet werden.

- 1 Drücken Sie , um das Menü aufzurufen.
- 2 Drücken Sie  oder  zu Einstellungen und drücken Sie  zum Auswählen.

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  zu Hinweistöne und drücken Sie  zum Auswählen.

- 5 Drücken Sie  oder  bis Ruföne und drücken Sie  zum Auswählen.

- 6 Drücken Sie  oder  bis Rufhinweis und drücken Sie  zum Auswählen.

Der derzeitige Ton wird durch ein  angezeigt.

- 7 Drücken Sie  oder  bis zum gewünschten Hinweistön und drücken Sie  zum Auswählen.

Neben dem gewählten Ton wird  angezeigt.

## Aktivieren und Deaktivieren von Ruftönen für Einzelrufe

Die Ruftöne für einen empfangenen Einzelruf können ein- oder ausgeschaltet werden.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Töne/  
Hinweistöne, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Ruftöne, und drücken Sie  zum Auswählen.

---

- 6 Drücken Sie  oder  bis Einzelruf, und drücken Sie  zum Auswählen.

---

- 7 Drücken Sie  , um die Ruftöne für Einzelrufe zu aktivieren/deaktivieren.  
Wenn Ruftöne für Einzelrufe aktiviert wurden, wird  neben Aktiviert auf dem Display angezeigt.  
 wird nicht angezeigt, wenn die Ruftöne für Einzelrufe deaktiviert sind.

---

## Aktivieren und Deaktivieren von Ruftönen für Textnachrichten

Die Ruftöne für eine empfangene Textnachricht können ein- oder ausgeschaltet werden.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Töne/ Hinweistöne, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Ruftöne, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  bis Textnachricht, und drücken Sie  zum Auswählen. Der derzeitige Ton wird durch ein  angezeigt.

---

7 Drücken Sie  oder  bis zum gewünschten Ton, und drücken Sie  zum Auswählen. Neben dem gewählten Ton wird  angezeigt.

---

## Auswählen eines Rufhinweistyps

### HINWEIS:

Die programmierte Taste **Klingelton** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sie können die Funkrufe auf einen vorprogrammierten Vibrations-Ton einstellen. Wenn „Alle Töne“ deaktiviert ist, zeigt das Funkgerät das Symbol „Alle Töne stumm“ an. Wenn „Alle Töne“ aktiviert ist, wird der zugehörige Klingelton angezeigt.

Bei einem kurzen Klingelton vibriert das Funkgerät einmal. Bei einem sich wiederholenden Klingelton vibriert das Funkgerät mehrmals. Bei der Einstellung „Klingeln und Vibrieren“ gibt das Funkgerät bei einer eingehenden Übertragung (z. B. Rufhinweis oder Nachricht) einen speziellen Klingelton aus. Dieser klingt wie ein Bestätigungston oder ein Ton bei einem verpassten Ruf.

## Zunehmende Alarmtonlautstärke

Das Funkgerät kann auf Dauerhinweis bei Nichtbeantworten eines Funkrufs programmiert werden. Dieser Dauerhinweis erfolgt dadurch, dass der Alarmton automatisch zunehmend lauter wird. Diese Funktion wird als Escalert bezeichnet.

## Funktionen des Rufprotokolls

Das Funkgerät führt ein Protokoll aller kürzlich durchgeführten, beantworteten und entgangenen Einzelrufe. Das Rufprotokoll kann zur Ansicht und Verwaltung kürzlich durchgeführter Anrufe verwendet werden.

In jeder Rufliste können die folgenden Funktionen durchgeführt werden:

- Delete
- Details

## Anzeigen der letzten Anrufe

Die Listen lauten Verpasst, Beantwortet und Abgehend.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Anrufprotokoll, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis zur gewünschten Liste, und drücken Sie  zum Auswählen.  
Das Display zeigt oben in der Liste den letzten Eintrag an.

---

- 4 Drücken Sie  oder , um die Liste anzuzeigen.  
Drücken Sie die **Sendetaste (PTT)**, um einen Einzelruf mit dem gerade ausgewählten Alias oder der ID zu starten.

---

## Löschen eines Rufs aus einer Rufliste

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Anrufprotokoll, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis zur gewünschten Liste, und drücken Sie  zum Auswählen.  
Wenn Sie eine Anrufliste wählen, die keine Einträge aufweist, zeigt das Display *Liste leer* an und gibt einen tiefen Ton aus, wenn die Tastaturtöne eingeschaltet sind.

---

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Löschen, und drücken Sie  zum Auswählen.

---

[Feedback senden](#)

- 6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um Ja auszuwählen und den Eintrag zu löschen. Im Display wird *Eintrag gelöscht* angezeigt.
  - Drücken Sie  oder  bis Nein, und drücken Sie die Taste , um zum vorherigen Bildschirm zurückzukehren.
- 

## Anzeigen von Details aus einer Rufliste

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Anrufprotokoll, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis zur gewünschten Liste, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Details anzeigen, und drücken Sie  zum Auswählen. Das Display zeigt die Details der Rufliste an.

---

## Rufhinweise

Paging mit Rufhinweis erlaubt Ihnen, einen bestimmten Funkgerätbenutzer dazu aufzufordern, Sie bei nächster Gelegenheit zurückzurufen.

Der Zugriff auf diese Funktion läuft über das Menü via „Kontakte“, „manuelles Wählen“ oder eine vorprogrammierte **Eintastenzugang**-Taste.

## Antworten auf Rufhinweise

Führen Sie die Vorgehensweise zum Antworten auf Rufhinweise auf Ihrem Funkgerät durch.

Wenn Sie einen Rufhinweis erhalten:

- Ein wiederholter Hinweiston erklingt.
- Die gelbe LED blinkt.
- Auf dem Display wird die Liste der Benachrichtigungen mit einem Rufhinweiseintrag mit dem Alias oder der ID des anrufenden Funkgeräts angezeigt.

Anhängig von der Konfiguration durch den Händler oder Systemadministrator können Sie auf einen Rufhinweis folgendermaßen reagieren:

- Drücken Sie die **Sendetaste (PTT)**, und antworten Sie dem Anrufer direkt mit einem Einzelruf.
- Drücken Sie die **Sendetaste (PTT)**, um die Gesprächsgruppenkommunikation fortzuführen. Der Rufhinweis wird in die Option „Entgangene Rufe“ im Menü „Ruf-Log“ verschoben. Sie können aus dem Verlauf der entgangenen Rufe heraus dem Anrufer antworten.

---

Weitere Informationen finden Sie unter [Benachrichtigungsliste auf Seite 210](#) und [Funktionen des Rufprotokolls auf Seite 140](#).

## Senden eines Rufhinweises aus der Kontaktliste

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen.

---

- 3 Verwenden Sie einen der im Folgenden beschriebenen Schritte, um den relevanten Alias oder die ID des Funkgeräts auszuwählen:
  - Wählen Sie den Aliasnamen des Funkgeräts direkt
  - Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias, und drücken Sie  zum Auswählen.
  - verwenden Sie das Menü Manuell wählen
    - Drücken Sie  oder  bis Manuell wählen, und drücken Sie  zum Auswählen.

[Feedback senden](#)

- Der Bildschirm für manuelles Wählen wird angezeigt. Geben Sie die Funkgeräte-ID ein und drücken Sie  .

- 4 Drücken Sie  oder  bis Rufhinweis, und drücken Sie  zum Auswählen.

Das Display zeigt Rufhinweis: <Funkgeräte-Alias oder ID>Rufhinweis und den Alias oder die ID des Teilnehmers an, was darauf hinweist, dass der Rufhinweis gesendet wurde.

Während das Funkgerät den Rufhinweis sendet, leuchtet die LED ununterbrochen grün.

Wird die Rufhinweis-Quittierung empfangen, wird im Display Hinweiston erfolgr angezeigt.

Wird keine Rufhinweis-Quittierung empfangen, wird im Display Hinweiston erfolglos angezeigt.

## Senden eines Rufhinweises mit der Schnellwahltaste

Drücken Sie die vorprogrammierte **Schnellwahltaste**, um einen Rufhinweis an den vordefinierten Aliasnamen zu senden.

Im Display wird Rufhinweis und der Aliasname bzw. die ID des Funkgeräts angezeigt, was bedeutet, dass der Rufhinweis gesendet wurde. Während das Funkgerät den Rufhinweis sendet, leuchtet die LED ununterbrochen grün.

Wird die Rufhinweis-Quittierung empfangen, wird im Display `Hinweiston erfolgr` angezeigt.

Wird keine Rufhinweis-Quittierung empfangen, wird im Display `Hinweiston erfolglos` angezeigt.

---

## Stummschaltmodus

Der Stummschalt-Modus stellt dem Benutzer eine Möglichkeit zur Verfügung, sämtliche akustischen Signale des Funkgeräts stummzuschalten.

Sobald der Stummschalt-Modus initiiert wurde, werden alle akustischen Signale stummgeschaltet, mit Ausnahme der

Funktionen mit höherer Priorität wie etwa Notfall-Funktionen.

Beim Beenden des Stummschalt-Modus nimmt das Funkgerät die Wiedergabe von laufenden Tönen oder Audio-Übertragungen wieder auf.

### HINWEIS:

Dies ist eine käufliche Funktion. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Einschalten des Stummschalt-Modus

Führen Sie die Vorgehensweise zum Einschalten des Stummschalt-Modus durch.

Rufen Sie diese Funktion über die programmierte Taste **Stummschalt-Modus** auf.

---

Folgendes geschieht, wenn der Stummschalt-Modus aktiviert ist:

- Positiver Hinweiston erklingt.
- Auf dem Display wird `Stummschalt-Modus Ein` angezeigt.

- Die rote LED beginnt zu blinken und blinkt weiter, bis der Stummschalt-Modus beendet wird.
- Auf dem Display wird das Symbol **Stummschalt-Modus** auf der Startseite angezeigt.
- Das Funkgerät wird stummgeschaltet.
- Der Stummschalt-Modus-Timer beginnt mit dem Countdown der konfigurierten Dauer.

## Einstellen des Stummschalt-Modus-Timers

Der Stummschalt-Modus kann durch Einstellen des Stummschalt-Modus-Timers für eine vorkonfigurierte Dauer aktiviert werden. Die Timer-Dauer wird über das Funkgerätemenü konfiguriert und kann zwischen 0,5 und 6 Stunden betragen. Nach Ablauf des Timers wird der Stummschalt-Modus beendet.

Wenn der Timer bei 0 belassen wird, bleibt das Funkgerät unbeschränkt im Stummschalt-Modus, bis die vorprogrammierte **Stummschalt-Modus**-Taste gedrückt wird.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Timer stummschalten. Drücken Sie  , um die Option auszuwählen.

- 5 Drücken Sie  oder  zum Bearbeiten des numerischen Werts jeder Ziffer, und drücken Sie  .

## Beenden des Stummschalt-Modus

Die Funktion kann automatisch beendet werden, sobald der Stummschalt-Modus-Timer abgelaufen ist.

Führen Sie einen der folgenden Schritte aus, um den Stummschalt-Modus manuell zu beenden:

- Drücken Sie die programmierte **Stummschalt-Modus**-Taste.
- Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.

---

Folgendes geschieht, wenn der Stummschalt-Modus deaktiviert ist:

- Negativer Hinweiston erklingt.
- Das Display zeigt `Stummschalt-Modus aus an`.
- Die blinkende rote LED schaltet sich aus.
- Das **Stummschalt-Modus**-Symbol verschwindet von der Startseite.
- Die Stummschaltung des Funkgeräts wird aufgehoben, und der Lautsprecherstatus wird wiederhergestellt.
- Wenn der Timer nicht abgelaufen ist, wird der Stummschalt-Modus-Timer gestoppt.

### HINWEIS:

Der Stummschalt-Modus wird ebenfalls beendet, wenn der Benutzer Sprache überträgt oder auf einen nicht programmierten Kanal wechselt.

## Notruf

### HINWEIS:

Wenn Ihr Funkgerät für die Notrufinitiierung des Typs „Lautlos“ oder „Lautlos mit Sprache“ konfiguriert ist, wird es in den meisten Fällen den lautlosen Betrieb automatisch beenden, nachdem der Notruf oder Notfallalarm abgeschlossen wurde. Eine Ausnahme zu dieser Regel besteht, wenn „Notfallalarm“ der konfigurierte Notruf-Modus und „Lautlos“ der konfigurierte Notfalltyp ist. Wenn Ihr Funkgerät auf diese Weise konfiguriert wurde, wird der lautlose Betrieb fortgesetzt, bis Sie ihn abbrechen, indem Sie die **Sendetaste (PTT)** oder die konfigurierte Notrufausschalttaste drücken.

Notfall-Sprachanrufe und Notrufsignale werden im Connect Plus Auto Fallback-Modus nicht unterstützt. Weitere Informationen finden Sie unter [Automatisches Fallback auf Seite 277](#).

Ein Notrufsignal dient dazu, auf eine kritische Situation aufmerksam zu machen. Sie können einen Notruf jederzeit auf jedem beliebigen Bildschirm absetzen, auch wenn es Aktivitäten auf dem aktuellen Kanal gibt. Wenn Sie die Taste **Notruf** drücken, wird der konfigurierte Notruf-Modus initiiert. Der konfigurierte Notruf-Modus kann auch durch Auslösen der optionalen Funktion „Totmann“ initiiert

werden. Die Notruffunktion ist unter Umständen auf Ihrem Funkgerät deaktiviert.

Ihr Händler kann festlegen, wie lange die vorprogrammierte **Notruftaste** gedrückt werden muss, allerdings ist die Dauer für das lange Drücken die gleiche wie bei allen anderen Tasten:

#### Kurzer Tastendruck

Zwischen 0,05 Sekunden und 0,75 Sekunden.

#### Drücken Sie lange auf

Zwischen 1,00 und 3,75 Sekunden.

Die **Notruftaste** ist mit der Notruf-Ein/Aus-Funktion belegt. Für Informationen über die zugewiesene Funktionsweise der **Notruftaste** wenden Sie sich bitte an Ihren Händler.

- Wenn die **Notruftaste** zum Einschalten des Notrufmodus durch kurzes Drücken programmiert ist, wird der Notrufmodus durch langes Drücken der **Notruftaste** beendet.
- Wenn die **Notruftaste** zum Einschalten des Notrufmodus durch langes Drücken programmiert ist, wird der Notrufmodus durch kurzes Drücken der **Notruftaste** beendet.

Wenn Ihr Funkgerät für eine Connect Plus-Zone eingestellt wird, unterstützt es drei Notfallmodi:

#### Notruf

Drücken Sie die **Sendetaste (PTT)**, um auf dem zugewiesenen Notruf-Zeitfenster zu sprechen.

#### Notruf mit anschließender Sprache

Für die erste Übertragung auf dem zugewiesenen Notruf-Zeitfenster wird die Stummschaltung des Mikrofons automatisch aufgehoben und Sie können sprechen, ohne die **Sendetaste (PTT)** zu drücken. Das Mikrofon bleibt während der für das Funkgerät konfigurierten Zeitdauer aktiv. Für nachfolgende Übertragungen im Rahmen des gleichen Notrufs müssen Sie die **Sendetaste (PTT)** drücken.

#### Notrufhinweis

Ein Notfallalarm ist kein Sprachanruf. Es ist eine Notrufbenachrichtigung, die an Funkgeräte weitergeleitet wird, die dafür konfiguriert sind, diese Warnsignale zu empfangen. Das Funkgerät sendet ein Notrufsignal über den Steuerungskanal des aktuell registrierten Standorts. Das Notrufsignal wird von Funkgeräten im Connect Plus-Netzwerk empfangen, die hierfür konfiguriert sind (unabhängig vom registrierten Netzwerkstandort).

Der Notruf-Taste kann pro Connect Plus-Zone nur EIN Notruf-Modus zugewiesen werden. Darüber hinaus verfügt jeder Notruf-Modus über die folgenden Typen:

## Regulär

Das Funkgerät initiiert ein Notrufsignal und gibt akustische und/oder optische Anzeigen aus.

## „Silent“

Das Funkgerät initiiert ein Notrufsignal und gibt keine akustischen und/oder optischen Anzeigen aus. Das Funkgerät unterdrückt alle Audiosignale oder optischen Anzeigen eines Notrufs, bis Sie die **Sendetaste (PTT)** drücken, um eine Sprachübertragung zu starten.

## Still mit Sprache

Wie beim lautlosen Betrieb, mit dem Unterschied, dass das Funkgerät die Stummschaltung für Sprachübertragungen aufhebt.

## Empfangen eines eingehenden Notrufs

Sie können das Funkgerät so konfigurieren, dass es einen Hinweiston ausgibt und alle Informationen zum eingehenden Notruf anzeigt. Wenn es so programmiert ist, wird nach dem Empfang des Notrufs der Bildschirm „Notrufdaten“ mit dem Notrufsymbol, dem Aliasnamen oder der ID des Funkgeräts, das den Notruf angefordert hat, dem für den Notfall verwendeten Gruppenkontakt und einer Zeile mit Zusatzinformationen angezeigt. Die Zusatzinformation ist der Name der Zone, die den Gruppenkontakt enthält.

Zum gegenwärtigen Zeitpunkt zeigt das Funkgerät nur den zuletzt entschlüsselten Notruf an. Wenn ein neuer Notruf empfangen wird, bevor der vorherige Notruf deaktiviert ist, ersetzen die Details des neuen Notrufs die Details des vorherigen Notrufs.

Je nachdem, wie Ihr Funkgerät programmiert wurde, wird der Bildschirm „Notrufdaten“ (oder „Alarmliste“) weiterhin auf dem Funkgerätdisplay angezeigt, auch wenn der Notruf endet. Sie können die Notrufdaten in der Alarmliste speichern oder die Notrufdetails löschen, wie in den folgenden Abschnitten beschrieben ist.

## Speichern der Notrufdaten in der Alarmliste

Durch das Speichern der Notrufdaten in die Alarmliste können Sie die Daten nochmals zu einem späteren Zeitpunkt anzeigen lassen, indem Sie im Hauptmenü „Alarmliste“ auswählen.

- 1 Während der Bildschirm „Notrufdaten“ (oder „Alarmliste“) angezeigt wird, drücken Sie . Der Bildschirm **Alarmliste verl** wird angezeigt.

2 Wählen Sie eine der folgenden Optionen aus:

- Wählen Sie **Ja**, und drücken Sie  zum Speichern der Notrufdaten in der Alarmliste und zum Beenden des Bildschirms mit den Notrufdaten (oder Alarmliste).
- Wählen Sie **Nein**, und drücken Sie , um zum Bildschirm „Notrufdaten“ (oder „Alarmliste“) zurückzukehren.

- Wählen Sie **Nein**, und drücken Sie , um zum Bildschirm „Notrufdaten“ zurückzukehren.

## Löschen der Notrufdaten

1 Während der Bildschirm „Notrufdaten“ angezeigt wird, drücken Sie . Der Bildschirm **Löschen** wird angezeigt.

2 Wählen Sie eine der folgenden Optionen aus:

- Wählen Sie **Ja**, und drücken Sie  zum Löschen der Notrufdaten.

## Beantworten eines Notrufs

### HINWEIS:

Wenn Sie nicht innerhalb der zugewiesenen Haltezeit für Notrufe auf den Notruf reagieren, wird der Notruf beendet. Wenn Sie sprechen möchten, nachdem die Haltezeit für Notrufe abgelaufen ist, müssen Sie zunächst die der Gruppe zugewiesene Kanalposition wählen (falls noch nicht ausgewählt). Drücken Sie dann die **Sendetaste (PTT)** zum Starten eines normalen Anrufs bei der Gruppe.

- 1 Drücken Sie beim Empfangen eines Notrufs eine beliebige Taste, um alle „Notsignal empfangen“-Anzeigen zu beenden.
- 2 Drücken Sie die **Sendetaste (PTT)**, um eine Sprachübertragung zur Notrufgruppe zu initiieren. Alle Funkgeräte, die diese Gruppe überwachen, hören Ihre Sprachübertragung.

- 3 Warten Sie, bis der Freiton verklungen ist (falls aktiviert), und sprechen Sie deutlich in das Mikrofon.  
Die LED leuchtet grün.
- 

- 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Funkgerät, das den Notruf gesendet hat, antwortet, blinkt die LED-Anzeige grün. Im Display wird das Gruppenrufsymbol, die Gruppen-ID und die ID des sendenden Funkgeräts angezeigt.

---

## Beantworten eines Notrufsignals

### HINWEIS:

Der Gruppenkontakt für die Notrufsignale sollte nicht für Sprachkommunikationen verwendet werden. Dies könnte verhindern, dass andere Funkgeräte Notrufsignale auf der gleichen Gruppe senden und empfangen.

Ein Notrufsignal von einem Funkgerät weist darauf hin, dass sich der Benutzer in einer Notsituation befindet. Sie können auf das Notrufsignal antworten, indem Sie einen Einzelruf an das Funkgerät initiieren, das den Notruf gesendet hat, oder Sie initiieren einen Gruppenruf an die

entsprechende Gesprächsgruppe, senden einen Rufhinweis, initiieren Remote-Monitor für dieses Funkgerät usw. Die passende Reaktion richtet sich nach den Anforderungen Ihres Unternehmens und nach der vorliegenden Situation.

## Ignorieren von Notrufen

Diese Funktionserweiterung bietet eine Option für das Funkgerät zum Ignorieren eines aktiven Notrufs.

Zum Ignorieren eines Notrufs muss das Funkgerät in der CPCPS-Software (Connect Plus Customer Programming Software) konfiguriert werden.

Wenn die Funktion aktiviert ist, kann das Funkgerät keinen Notruf anzeigen und keinen Ton zur standardmäßigen Notruf-Gruppen-ID empfangen.

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Initiieren eines Notrufs

### HINWEIS:

Ist Ihr Funkgerät auf den lautlosen Betrieb eingestellt, gibt es im Notrufmodus keine akustischen oder optischen Signale aus, bis Sie die **Sendetaste (PTT)** zum Initiieren einer Sprachübertragung drücken.

Ist Ihr Funkgerät auf den lautlosen Betrieb mit Sprache eingestellt, gibt es zunächst keine akustischen oder optischen Signale aus, die auf den Notruf-Modus hinweisen. Das Funkgerät hebt die Stummschaltung jedoch für die Übertragung von Funkgeräten auf, die auf Ihren Notruf reagieren. Die Notrufsignale werden nur einmal angezeigt, wenn Sie die **Sendetaste (PTT)** zum Initiieren einer Sprachübertragung von Ihrem Funkgerät aus drücken.

Sowohl bei „Lautlos“ als auch bei „Lautlos mit Sprache“ beendet das Funkgerät den lautlosen Betrieb automatisch, nachdem der Notruf abgeschlossen wurde.

- 1 Drücken Sie die vorprogrammierte **Notruftaste**.
- 

[Feedback senden](#)

- 2 Drücken Sie die **Sendetaste (PTT)**, um eine Sprachübertragung zur Notrufgruppe zu initiieren.

Wenn Sie die **Sendetaste (PTT)** loslassen, wird der Notruf fortgesetzt, bis die zugewiesene Standzeit für Notrufe abgelaufen ist.

Wenn Sie die **Sendetaste (PTT)** während dieser Zeit drücken, wird der Notruf fortgesetzt.

---

## Initiieren eines Notrufs mit anschließender Sprachkommunikation

Ihr Funkgerät muss für diese Betriebsart konfiguriert werden.

Bei dieser Betriebsart wird das Mikrofon ohne Drücken der **Sendetaste (PTT)** automatisch aktiviert, wenn Sie die konfigurierte **Notruftaste** drücken und Ihrem Funkgerät ein Zeitfenster zugewiesen wird. Dieser Modus mit aktiviertem Mikrofon wird auch „Notrufmikrofon“ genannt. Das „Notrufmikrofon“ wird für die erste Sprachübertragung von Ihrem Funkgerät aus während des Notrufs verwendet. Für nachfolgende Übertragungen im Rahmen des gleichen Notrufs müssen Sie die **Sendetaste (PTT)** drücken.

- 1 Drücken Sie die vorprogrammierte **Notruftaste**.
-

- 2 Das Mikrofon bleibt während der im Codeplug des Funkgeräts konfigurierten „Hot Mic“-Zeitdauer aktiv. Während dieser Zeit leuchtet die grüne LED.
- 3 Halten Sie die **Sendetaste (PTT)** gedrückt, um über die konfigurierte Dauer hinaus sprechen zu können.

## Initiieren eines Notrufsignals

### HINWEIS:

Ist Ihr Funkgerät für den „lautlosen Betrieb“ oder den „lautlosen Betrieb mit Sprache“ konfiguriert, gibt es keine akustischen oder optischen Signale aus, die darauf hinweisen, dass ein Notrufsignal gesendet wird. Bei der Konfiguration für den lautlosen Betrieb wird dieser Betrieb fortgesetzt, bis Sie die Sendetaste (PTT) oder die Taste für „Notruf aus“ drücken. Bei der Konfiguration für den „lautlosen Betrieb mit Sprache“ unterbricht das Funkgerät den lautlosen Betrieb automatisch, sobald der Standort-Controller ein Notrufsignal sendet.

Drücken Sie auf die orangefarbene **Notruf**-Taste.

Nach der Übertragung des Notrufsignals zum Standort-Controller wird im Display des Funkgeräts das Notruf-Symbol, der für das Notrufsignal verwendete Gruppenkontakt und Tx Alarm angezeigt.

Sobald das Notrufsignal erfolgreich gesendet wurde und an andere Funkgeräte übertragen wird, hören Sie einen entsprechenden positiven Hinweis, und im Display des Funkgeräts wird Alarm gesend angezeigt. Wenn das Notrufsignal nicht erfolgreich war, ist ein negativer Hinweis zu hören, und das Funkgerät zeigt die Meldung Alarm fehl an.

## Verlassen des Notruf-Modus

### HINWEIS:

Wenn der Notruf durch Ablauf der zugewiesenen Notruf-Haltezeit beendet wird, die Notfallsituation aber noch nicht behoben ist, drücken Sie die **Notruf**-Taste erneut, um den Vorgang neu zu starten.

Wenn Sie einen Notruf absetzen durch Drücken der programmierten **Notruf**-Taste, verlässt Ihr Funkgerät

automatisch den Notruf-Modus, nachdem eine Antwort vom Connect Plus-System eingegangen ist.

Wenn Sie einen Notruf einleiten, indem Sie die **Notruf-**Taste drücken, wird Ihrem Funkgerät automatisch ein Kanal zugewiesen, sobald einer verfügbar wird. Wenn Ihr Funkgerät eine Nachricht übertragen hat, die auf einen Notfall hinweist, können Sie den Notruf nicht abbrechen. Wenn Sie die Taste jedoch versehentlich gedrückt haben oder wenn kein Notfall mehr besteht, können Sie dies über den zugewiesenen Kanal mitteilen. Wenn Sie die **Sendetaste** (PTT) loslassen, wird der Notruf nach Ablauf der zugewiesenen Haltezeit für Notrufe beendet.

Wenn Ihr Funkgerät für Notruf mit nachfolgendem Sprachruf konfiguriert wurde, verwenden Sie das „Notrufmikrofon“, um Ihren Fehler zu erläutern, und drücken Sie dann die **Sendetaste** (PTT), und lassen Sie sie wieder los, um die Übertragung zu beenden. Der Notruf wird nach Ablauf der zugewiesenen Haltezeit für Notrufe beendet.

## Textnachrichten (SMS)

Ihr Funkgerät kann von einem anderen Funkgerät oder einer Textnachricht-Anwendung Daten empfangen, beispielsweise Textnachrichten.

Es gibt zwei Arten von Textnachrichten, DMR-Kurztextnachrichten (Digital Mobile Radio) und Textnachrichten. Die maximale Länge einer DMR-Kurztextnachricht beträgt 23 Zeichen. Die maximale Länge einer Textnachricht beträgt 280 Zeichen, einschließlich der Betreffzeile. Die Betreffzeile wird nur angezeigt, wenn Sie Nachrichten von E-Mail-Anwendungen empfangen.

### HINWEIS:

Die maximale Länge gilt nur für Modelle mit der neuesten Software und Hardware. Bei Funkgerätemodellen mit älterer Software und Hardware beträgt die maximale Länge für eine Textnachricht 140 Zeichen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

In arabischer Sprache wird der Text von rechts nach links eingegeben.

## Senden einer Quick Text-Nachricht

Ihr Funkgerät unterstützt je nach der Programmierung durch Ihren Händler maximal 10 Quick Text-Nachrichten.

Quick Text-Nachrichten sind zwar vorgegeben, Sie können jedoch jede Nachricht bearbeiten, bevor Sie sie senden.

Wenn Sie die Nachricht senden, führen Sie die folgenden Schritte aus, um einen Empfänger auszuwählen:

- Drücken Sie  oder  bis zum gewünschten Aliasnamen, und drücken Sie  zum Auswählen.
- Drücken Sie  oder  bis Manuell wählen, und drücken Sie  zum Auswählen. In der ersten Zeile des Displays wird Nummer: angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Aliasnamen oder die ID des Funkgeräts ein, und drücken Sie  .

Auf dem Display wird Nachricht wird gesendet angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird Nachricht gesendet angezeigt.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird Nachr. senden fehlgeschlagen angezeigt.

Kann die Textnachricht nicht gesendet werden, kehrt das Funkgerät zum Wiederholen-Bildschirm zurück (siehe [Verwaltung fehlgeschlagener Textnachrichtenübertragungen auf Seite 316](#)).

---

## Senden einer Quick Text-Nachricht mit der Schnellwahltaste

Sie können Quick Text-Nachrichten über die von Ihrem Händler programmierte programmierbare Taste versenden.

Drücken Sie die vorprogrammierte **Schnellwahltaste**, um eine vordefinierte Quick Text-Nachricht an ein vorgegebenes Alias zu senden.

Auf dem Display wird `Nachricht wird gesendet` angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

#### HINWEIS:

Sie können eine gespeicherte Textnachricht vor dem Senden bearbeiten. Diese Funktion steht nur mit einem Tastaturmikrofon zur Verfügung (siehe [Bearbeiten und Senden einer gespeicherten Textnachricht auf Seite 314](#)). Durch Gedrückthalten

von  kehren Sie zum Startbildschirm zurück.

Nachdem die Nachricht gesendet wurde, wird ein Ton ausgegeben, und im Display erscheint `Nachricht gesendet`.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Signalton ausgegeben, und im Display erscheint `Nachricht konnte nicht gesendet werden`.

Kann die Textnachricht nicht gesendet werden, kehrt das Funkgerät zum Wiederholen-Bildschirm zurück (siehe [Verwaltung fehlgeschlagener Textnachrichtenübertragungen auf Seite 316](#)).

## Öffnen des Entwürfe-Ordners

Im Ordner „Entwürfe“ werden maximal die zehn (10) zuletzt gespeicherten Nachrichten aufbewahrt. Wenn der Ordner voll ist, ersetzt die nächste gespeicherte Textnachricht automatisch die jeweils älteste Textnachricht im Ordner.

## Anzeigen einer gespeicherten Textnachricht

- 1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
<b>Programmierte Taste</b> <b>„Textnachricht“</b>	Drücken Sie die programmierte Taste <b>Textnachricht</b> .
<b>Menu</b>	<b>a</b> Drücken Sie  , um das Menü aufzurufen.

Bedienelemente	Schritte
	<p><b>b</b> Drücken Sie  oder  bis Nachrichten, und drücken Sie  zum Auswählen.</p>

2 Drücken Sie  oder  bis Entwürfe, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis zur gewünschten Nachricht und drücken Sie  zum Auswählen.

## Bearbeiten und Senden einer gespeicherten Textnachricht

1 Drücken Sie beim Betrachten der Nachricht  erneut.

2 Drücken Sie  oder  bis Bearbeiten, und drücken Sie  zum Auswählen. Ein blinkender Cursor wird angezeigt.

3 Geben Sie Ihre Nachricht über die Tastatur ein.

Drücken Sie , um sich eine Position nach links zu bewegen. Drücken Sie  oder die Taste , um sich eine Position nach rechts zu bewegen. Zum Löschen unerwünschter Zeichen drücken Sie .  gedrückt halten, um die Texteingabemethode zu ändern.

4 Drücken Sie , nachdem Sie die Nachricht erstellt haben.

5 So wählen Sie den Empfänger der Nachricht aus:

- Drücken Sie  oder  bis zum gewünschten Aliasnamen, und drücken Sie  zum Auswählen.

- Drücken Sie  oder  bis **Manuell** wählen, und drücken Sie  zum Auswählen. In der ersten Zeile des Displays wird **Nummer:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Aliasnamen oder die ID des Funkgeräts ein, und drücken Sie .

Auf dem Display wird **Nachricht** wird **gesendet** angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird **Nachricht** **gesendet** angezeigt.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird **Nachr. senden** **fehlgeschlagen** angezeigt.

Wenn die Nachricht nicht gesendet werden kann, wird sie in den Ordner „Gesendete Elemente“ verschoben und mit einem „Senden fehlgeschlagen“-Symbol markiert.

## Löschen einer gespeicherten Textnachricht aus dem Entwürfe-Ordner

- 1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
<b>Programmierte Taste „Textnachricht“</b>	Drücken Sie die programmierte Taste <b>Textnachricht</b> .
<b>Menu</b>	<p><b>a</b> Drücken Sie , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis <b>Nachrichten</b>, und drücken Sie  zum Auswählen.</p>

- 2 Drücken Sie  oder  bis **Entwürfe**, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis zur gewünschten Nachricht und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Löschen und , um die Textnachricht zu löschen.

---

## Verwaltung fehlgeschlagener Textnachrichtenübertragungen

Auf dem Bildschirm **Wiederholen** können Sie eine der folgenden Optionen auswählen:

- Wiederholen
- Forward
- Bearbeiten

## Erneutes Senden einer Textnachricht

Drücken Sie , um dieselbe Nachricht erneut an denselben Aliasnamen oder dieselbe ID des Funkgeräts bzw. der Gruppe zu senden.

Wenn die Nachricht erfolgreich gesendet wurde, ertönt ein Signalton und im Display wird der positive Kurzhinweis angezeigt.

Wenn die Nachricht nicht gesendet werden kann, wird im Display der negative Kurzhinweis angezeigt.

---

## Weiterleiten einer Textnachricht

Wählen Sie **Weiterleiten**, um die Nachricht an den Aliasnamen oder die ID eines anderen Funkgeräts bzw. einer anderen Gruppe zu senden.

1 Drücken Sie  oder  bis Weiterleiten, und drücken Sie  zum Auswählen.

---

- 2 Um den Empfänger der Nachricht auszuwählen, drücken Sie  oder  bis zum gewünschten Aliasnamen oder der gewünschten ID, und drücken Sie  zum Auswählen.

Auf dem Display wird `Nachricht wird gesendet` angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird `Nachricht gesendet` angezeigt.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird `Nachr. senden fehlgeschlagen` angezeigt.

## Verwalten von gesendeten Textnachrichten

Nachdem eine Nachricht an ein anderes Funkgerät gesendet wurde, wird sie unter „Ausgang“ gespeichert. Die zuletzt gesendete Textnachricht wird jeweils an die erste Stelle der Ausgangsliste gestellt.

Der Ordner „Ausgang“ kann bis zu 30 gesendete Nachrichten aufnehmen. Sobald der Ordner voll ist, wird die älteste Textnachricht im Ordner automatisch durch die als nächstes gesendete Textnachricht ersetzt.

### HINWEIS:

Durch Gedrückthalten von  kehren Sie zum Startbildschirm zurück.

## Anzeigen einer gesendeten Textnachricht

- Öffnen Sie die Funktion **Textnachricht**.

Bedienel emente	Schritte
<b>Programmierte Taste „Textnachricht“</b>	Drücken Sie die programmierte Taste <b>Textnachricht</b> .
<b>Menu</b>	<b>a</b> Drücken Sie  , um das Menü aufzurufen.

Bedienel emente	Schritte
	<p><b>b</b> Drücken Sie  oder  bis Nachrichten, und drücken Sie  zum Auswählen.</p>

2 Drücken Sie  oder  bis Ausgang, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis zur gewünschten Nachricht, und drücken Sie  zum Auswählen.  
Das Symbol in der oberen rechten Ecke des Bildschirms zeigt den Status der Nachricht an (siehe [Ausgang-Symbole \(Gesendete Nachrichten\) auf Seite 254](#)).

## Senden einer gesendeten Textnachricht

Bei Anzeigen einer gesendeten Textnachricht können Sie eine der folgenden Optionen wählen:

- Wiederholen
- Forward
- Bearbeiten
- Delete

1 Drücken Sie beim Betrachten der Nachricht  erneut.

2  oder  zu einer der folgenden Optionen und drücken Sie  zum Auswählen.

Option	Schritte
<b>Forward</b>	Wählen Sie <a href="#">Weiterleiten</a> , wenn Sie die ausgewählte Textnachricht an einen anderen Teilnehmer/ Gruppenalias oder eine andere ID senden möchten (siehe <a href="#">Weiterleiten einer Textnachricht auf Seite 316</a> ).
<b>Delete</b>	Wählen Sie zum Löschen der Textnachricht <a href="#">Löschen</a> .

Option	Schritte
Wiederholen	<p>Wählen Sie Wiederholen, um die ausgewählte Textnachricht erneut an den Aliasnamen oder die ID desselben Funkgeräts bzw. derselben Gruppe zu senden.</p> <p>Auf dem Display wird Nachricht wird gesendet angezeigt. Dies ist die Bestätigung, dass dieselbe Nachricht erneut an dasselbe Zielfunkgerät gesendet wird.</p> <p>Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird Nachricht gesendet angezeigt.</p> <p>Kann die Nachricht nicht gesendet werden, wird ein tiefer Hinweiston ausgegeben, und im Display wird Nachr. senden fehlgeschlagen angezeigt.</p> <p>Kann die Nachricht nicht gesendet werden, kehrt das Funkgerät zum</p>

Option	Schritte
	<p>Bildschirm Wiederholen zurück.</p> <p>Drücken Sie  , um die Nachricht erneut an denselben Funkgerät/Gruppen-Aliasnamen oder dieselbe ID zu senden.</p>

Wenn Sie den Bildschirm zum Senden einer Nachricht verlassen, während die Nachricht gesendet wird, aktualisiert das Funkgerät den Status dieser Nachricht im Ausgangsordner ohne Hinweiston oder visuelle Anzeige.

Wechselt das Funkgerät in einen anderen Modus oder wird es ausgeschaltet, bevor der Status der Nachricht im Ausgang aktualisiert wird, kann das Funkgerät die Übertragung anhängiger Nachrichten nicht abschließen und kennzeichnet diese automatisch mit dem Symbol **Senden fehlgeschlagen**.

Das Funkgerät unterstützt bis zu maximal fünf anhängige Nachrichten. Sind bereits fünf Nachrichten anhängig, d. h. noch zu senden, kann das Funkgerät keine weitere Nachricht senden und

kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

## Löschen aller gesendeten Textnachrichten aus dem Ausgang

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
<b>Programmierte Taste „Textnachricht“</b>	Drücken Sie die programmierte Taste <b>Textnachricht</b> .
<b>Menu</b>	<p><b>a</b> Drücken Sie  , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis <b>Nachrichten</b>, und drücken Sie  zum Auswählen.</p>

2 Drücken Sie  oder  bis **Ausgang**, und drücken Sie  zum Auswählen.

Wenn Sie **Gesendete** Elemente wählen und diese keine Einträge aufweisen, zeigt das Display **Liste leer** und gibt einen tiefen Ton aus, wenn die Tastenfeldtöne eingeschaltet sind (siehe ).

3 Drücken Sie  oder  bis **Alle löschen**, und drücken Sie  zum Auswählen.

4 Wählen Sie eine der folgenden Optionen aus.

- Drücken Sie  oder  bis **Ja**, und drücken Sie  zum Auswählen. Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie  oder  bis **Nein**, und drücken Sie  , um zum vorherigen Bildschirm zurückzukehren.

## Empfangen einer Textnachricht

Wenn Ihr Funkgerät eine Nachricht empfängt, werden im Display die Benachrichtigungsliste mit dem Aliasnamen oder der ID des Senders und das Nachrichtensymbol angezeigt.

Beim Empfang einer Textnachricht können Sie eine der folgenden Optionen wählen:

- Lesen
- Später lesen
- Delete

## Lesen einer Textnachricht

- 1 Drücken Sie  oder  bis Lesen?, und drücken Sie  zum Auswählen.

Die im Posteingang ausgewählte Nachricht wird geöffnet.

- 2 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um zum Posteingang zurückzukehren.
- Drücken Sie erneut  , um die Textnachricht zu beantworten, weiterzuleiten oder zu löschen.

## Verwalten von empfangenen Textnachrichten

In der Inbox können Sie Ihre Textnachrichten verwalten. Hier können bis zu 30 Nachrichten gespeichert werden.

Die Textnachrichten in der Inbox werden nach Eingang geordnet, d. h. die zuletzt eingegangene Nachricht steht an erster Stelle.

Das Funkgerät unterstützt die folgenden Optionen für Textnachrichten:

- Antworten (über Quick Text)
- Forward
- Delete
- Alle löschen

**HINWEIS:**

Wenn die Kanaltypen nicht übereinstimmen, können empfangene Nachrichten nur weitergeleitet oder gelöscht oder alle empfangenen Nachrichten gelöscht werden.

Durch Gedrückthalten von  kehren Sie zum Startbildschirm zurück.

## Anzeigen einer Textnachricht aus der Inbox

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Nachrichten, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Inbox, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder , um die Nachrichten anzuzeigen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um die aktuelle Nachricht auszuwählen, und erneut , um diese Nachricht zu beantworten, weiterzuleiten oder zu löschen.
- Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

## Beantworten einer Textnachricht aus der Inbox

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienel emente	Schritte
Program mierte Taste „Textnac hricht“	Drücken Sie die programmierte Taste <b>Textnachricht</b> .

Bedienel emente	Schritte
Menu	<p><b>a</b> Drücken Sie  , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis Nachrichten, und drücken Sie  zum Auswählen.</p>

- 2 Drücken Sie  oder  bis Inbox, und drücken Sie  zum Auswählen.
- 3 Drücken Sie  oder  bis zur gewünschten Nachricht und drücken Sie  zum Auswählen.
- 4 Drücken Sie erneut  , um das Untermenü aufzurufen.
- 5 Verwenden Sie die Tastatur, um Ihre Nachricht zu schreiben/bearbeiten.

- 6 Drücken Sie  , nachdem Sie die Nachricht erstellt haben.

Auf dem Display wird Nachricht wird gesendet angezeigt. Dies ist die Bestätigung, dass die Nachricht gesendet wird.

Nachdem die Nachricht erfolgreich gesendet wurde, wird ein Hinweiston ausgegeben, und im Display wird Nachricht gesendet angezeigt.

Kann die Nachricht nicht gesendet werden, wird ein tiefer Signalton ausgegeben, und im Display erscheint Nachr. senden fehlgeschlagen.

Kann die Nachricht nicht gesendet werden, kehrt das Funkgerät zum Wiederholen-Bildschirm zurück (siehe [Verwaltung fehlgeschlagener Textnachrichtenübertragungen auf Seite 316](#)).

## Löschen einer Textnachricht aus der Inbox

- 1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
<b>Programmierte Taste „Textnachricht“</b>	Drücken Sie die programmierte Taste <b>Textnachricht</b> .
<b>Menu</b>	<p><b>a</b> Drücken Sie  , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis Nachrichten, und drücken Sie  zum Auswählen.</p>

2 Drücken Sie  oder  bis Inbox, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis zur gewünschten Nachricht und drücken Sie  zum Auswählen.

4 Drücken Sie erneut  , um das Untermenü aufzurufen.

5 Drücken Sie  oder  bis Löschen, und drücken Sie  zum Auswählen.

6 Drücken Sie  oder  bis Ja und  , um die Option auszuwählen.

Im Display wird Nachr gelöscht angezeigt, und der Bildschirm zeigt wieder die Inbox an.

## Löschen aller Textnachrichten aus dem Posteingang

1 Öffnen Sie die Funktion **Textnachricht**.

Bedienelemente	Schritte
<b>Programmierte Taste „Textnachricht“</b>	Drücken Sie die programmierte Taste <b>Textnachricht</b> .

Bedienelemente	Schritte
<b>Menu</b>	<p><b>a</b> Drücken Sie , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis Nachrichten, und drücken Sie  zum Auswählen.</p>

- 2** Drücken Sie  oder  bis Inbox, und drücken Sie  zum Auswählen.

Wenn Sie `Inbox` wählen und diese keine Einträge aufweist, zeigt das Display `Liste leer` an und gibt einen tiefen Ton aus, wenn die Tastenfeldtöne eingeschaltet sind (siehe [Ein-/Ausschalten von Tastaturtönen auf Seite 221](#)).

- 3** Drücken Sie  oder  bis `Alle löschen`, und drücken Sie  zum Auswählen.

- 4** Drücken Sie  oder  bis `Ja`, und drücken Sie , um die Option auszuwählen. Das Display zeigt `Inbox geleert` an.

## Privacy

Durch Einsatz softwaregestützter Verschlüsselung verhindert diese Funktion, wenn aktiviert, unbefugtes Zuhören auf einem Kanal. Die Signalisierungs- und Benutzeridentifikationsteile einer Übertragung werden nicht verschlüsselt.

Um verschlüsselt senden zu können, muss die Verschlüsselung für die aktuelle Kanalwahlschalterposition aktiviert sein, während dies für empfangende Funkgeräte nicht erforderlich ist. Bei einer Kanalwahlschalterposition mit aktivierter Verschlüsselung können weiterhin normale (unverschlüsselte) Übertragungen empfangen werden.

Ihr Gerät unterstützt erweiterte Verschlüsselung.

Zum Entschlüsseln eines Anrufs mit aktivierter Verschlüsselung muss Ihr Funkgerät den gleichen Schlüsselwert und dieselbe Schlüssel-ID (für erweiterte Verschlüsselung) wie das sendende Funkgerät verwenden.

Wenn ihr Funkgerät einen verschlüsselten Anruf mit anderem Schlüsselwert und anderer Schlüssel-ID empfängt, hören Sie gar nichts (erweiterte Verschlüsselung).

Wurde dem Funkgerät ein Verschlüsselungstyp zugewiesen, wird das Gesichert- bzw. Ungesichert-Symbol am Ausgangsbildschirm angezeigt, außer wenn das Funkgerät einen Notruf oder Notsignal sendet oder empfängt.

Während einer Übertragung leuchtet die Funkgerät-LED grün. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell grün.

Sie können auf diese Funktion zugreifen, indem Sie eine der folgenden Aktionen ausführen:

- Drücken Sie die programmierte Taste **Verschlüsselung**, um den Datenschutz ein- oder auszuschalten.
- Das Menü „Funkgerät“ gemäß den im Folgenden beschriebenen Schritten verwenden.

### HINWEIS:

Die Verschlüsseln-Funktion wird nicht für alle Funkgerätmodelle angeboten. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen oder  oder  bis Connect Plus, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Verbesserter Scrambler.  
Wenn auf dem Display Einschalten angezeigt wird, drücken Sie  zum Aktivieren der

Verschlüsselung. Das Funkgerät zeigt eine Meldung zur Bestätigung Ihrer Auswahl an.

Wenn auf dem Display **Ausschalten** angezeigt wird,

drücken Sie  zum Deaktivieren der Verschlüsselung. Das Funkgerät zeigt eine Meldung zur Bestätigung Ihrer Auswahl an.

Wurde dem Funkgerät ein Verschlüsselungstyp zugewiesen, wird das Gesichert- bzw. Ungesichert-Symbol in der Statusleiste angezeigt, außer wenn das Funkgerät einen Notsignal sendet oder empfängt.

## Durchführen eines verschlüsselten Rufs

Aktivieren oder deaktivieren Sie die Datenschutzeinstellungen mit der konfigurierten Taste für die Verschlüsselung oder über das Menü. Die Datenschutzeinstellungen für Ihr Funkgerät müssen für die aktuell ausgewählte Kanalposition aktiviert sein, um eine verschlüsselte Übertragung senden zu können. Wenn die Verschlüsselung für die aktuell ausgewählte Kanalposition aktiviert ist, werden alle Sprachübertragungen Ihres

Funkgeräts verschlüsselt. Dies umfasst Gruppenrufe, Multi-Gruppenrufe, Antworten während gescannter Anrufe, Site All Call, Notrufe und Einzelrufe. Nur empfangende Funkgeräte mit dem gleichen Schlüsselwert und der gleichen Schlüssel-ID können die Übertragung entschlüsseln.

## Security

Sie können jedes im System befindliche Funkgerät aktivieren oder deaktivieren. So kann z. B. ein gestohlenen Funkgerät deaktiviert und damit unbrauchbar gemacht werden oder ein wiedergefundenes Funkgerät aktiviert werden.

### HINWEIS:

Die Funktionen „Deaktivieren des Funkgeräts“ und „Aktivieren des Funkgeräts“ sind nur bei Funkgeräten möglich, bei denen diese Funktionalität aktiviert ist. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Funkgerät deaktivieren

- 1 Greifen Sie auf diese Funktion zu, indem Sie eine der folgenden Aktionen ausführen:

Bedienel emente	Schritte
<p><b>Funkger ät deaktivie ren- Taste</b></p>	<p><b>a</b> Drücken Sie die vorprogrammierte <b>Funkgerät deaktivieren</b>-Taste.</p> <p><b>b</b> Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie  zum Auswählen.</p>
<p><b>Menü „Radio“</b></p>	<p><b>a</b> Drücken Sie , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen. Die Einträge sind in alphabetischer Reihenfolge sortiert.</p> <p><b>c</b> Verwenden Sie einen der im Folgenden beschriebenen</p>

Bedienel emente	Schritte
	<p>Schritte, um den relevanten Alias oder die ID des Funkgeräts auszuwählen:</p> <ul style="list-style-type: none"> <li>• Wählen Sie den Aliasnamen oder die ID des Funkgeräts direkt.</li> <li>• Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie  zum Auswählen.</li> <li>• Verwenden Sie das Menü <b>Manuelles Wählen</b>.</li> <li>• Drücken Sie  oder  bis <b>Manuell</b></li> </ul>

Bedienel emente	Schritte
	<p>wählen, und drücken Sie  zum Auswählen.</p> <ul style="list-style-type: none"> <li>• Drücken Sie  oder  bis Funkgerät-Nr., und drücken Sie  zum Auswählen.</li> <li>• In der ersten Zeile des Displays wird Gerätenummer: angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie mithilfe der Zifferntastatur den Funkgerät-Alias oder die Funkgerät-ID ein, und drücken Sie  .</li> </ul>

Bedienel emente	Schritte
	<p><b>d</b> Drücken Sie  oder  bis Funkgerät deaktivieren, und drücken Sie  zum Auswählen.</p>

Im Display wird Funkgerät deakt.: <Ziel-Alias oder ID> angezeigt, und die LED blinkt grün.

## 2 Warten Sie auf eine Bestätigung.

Bei erfolgreicher Deaktivierung wird ein positiver Hinweiston ausgegeben, und auf dem Display wird `FunkgDeak erfolgr.` angezeigt.

Bei nicht erfolgter Deaktivierung wird ein negativer Hinweiston ausgegeben, und auf dem Display wird `FunkgDeak fehlg.` angezeigt.

## Funkgerät aktivieren

- Greifen Sie auf diese Funktion zu, indem Sie eine der folgenden Aktionen ausführen:

Bedienelemente	Schritte
<b>Funkgerät aktivieren-Taste</b>	<p><b>a</b> Drücken Sie die konfigurierte <b>Funkgerät aktivieren-Taste</b>.</p> <p><b>b</b> Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie  zum Auswählen.</p>
<b>Menü „Radio“</b>	<p><b>a</b> Drücken Sie , um das Menü aufzurufen.</p>

Bedienelemente	Schritte
	<p><b>b</b> Drücken Sie  oder  bis Kontakte, und drücken Sie  zum Auswählen. Die Einträge sind in alphabetischer Reihenfolge sortiert.</p> <p><b>c</b> Verwenden Sie einen der im Folgenden beschriebenen Schritte, um den relevanten Alias oder die ID des Funkgeräts auszuwählen:</p> <ul style="list-style-type: none"> <li>Wählen Sie den Aliasnamen oder die ID des Funkgeräts direkt.</li> </ul>

Bedienelemente	Schritte
	<ul style="list-style-type: none"> <li>• Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID, und drücken Sie  zum Auswählen.</li> <li>• Verwenden Sie das Menü Manuelles Wählen.</li> <li>• Drücken Sie  oder  bis Manuell wählen, und drücken Sie  zum Auswählen.</li> </ul>

Bedienelemente	Schritte
	<ul style="list-style-type: none"> <li>• Drücken Sie  oder  bis Funkgerät-Nr., und drücken Sie  zum Auswählen.</li> <li>• In der ersten Zeile des Displays wird Gerätenummer: angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie mithilfe der Zifferntastatur den Funkgerät-Alias oder die Funkgerät-ID ein,</li> </ul>

Bedienelemente	Schritte
	<p>und drücken Sie  .</p> <p><b>d</b> Drücken Sie  oder  bis Funkgerät-Nr., und drücken Sie  zum Auswählen.</p>

Im Display wird Funkgerät aktiviert:  
 <Funkgeräte-Alias oder ID> angezeigt, und die LED leuchtet durchgehend grün.

## 2 Warten Sie auf eine Bestätigung.

Bei erfolgreicher Deaktivierung wird ein positiver Hinweiston ausgegeben, und auf dem Display wird FunkgAkt erfolgr. angezeigt.

Bei nicht erfolgter Deaktivierung wird ein negativer Hinweiston ausgegeben, und auf dem Display wird FunkgAkt fehlgr. angezeigt.

## Bluetooth-Betrieb

### HINWEIS:

Wenn das Gerät über das CPS deaktiviert wird, sind alle Bluetooth-bezogenen Funktionen deaktiviert, und die Bluetooth-Gerätedatenbank wird gelöscht.

Mit dieser Funktion können Sie Ihr Funkgerät über eine Bluetooth-Verbindung mit einem Bluetooth-fähigen Gerät (Zubehör) verwenden. Ihr Funkgerät unterstützt Bluetooth-Geräte von Motorola Solutions sowie im Handel erhältliche (COTS) Bluetooth-fähige Geräte.

Bluetooth funktioniert innerhalb eines Umkreises von 10 m Sichtverbindung. Die Sichtverbindung ist ein hindernisfreier Weg zwischen Ihrem Funkgerät und Ihrem Bluetooth-fähigen Gerät.

Sie sollten allerdings nicht erwarten, dass Ihr Bluetooth-fähiges Gerät auch dann noch mit hohem Zuverlässigkeitsgrad funktionieren wird, wenn es vom Funkgerät entfernt wurde.

Im Randbereich der Reichweite nehmen die Sprach- und Tonqualität stark ab, und die Übertragung hört sich fehlerhaft oder gebrochen an. Um dieses Problem zu beseitigen, verringern Sie einfach die Entfernung zwischen Funkgerät und Bluetooth-fähigem Gerät (innerhalb der maximalen Reichweite von 10 m), um wieder einen klaren

Audioempfang zu erhalten. Die Bluetooth-Funktion Ihres Funkgeräts hat bei 10 m Reichweite eine maximale Leistung von 2,5 mW (4 dBm).

Ihr Funkgerät unterstützt bis zu 4 simultane Bluetooth-Verbindungen mit Bluetooth-fähigen Geräten verschiedener Typen. Beispiel: Ein Headset und ein PTT-Only-Device (POD). Mehrere Verbindungen mit Bluetooth-fähigen Geräten derselben Art werden nicht unterstützt.

Weitere Angaben über die Funktionalität Ihres Bluetooth-fähigen Geräts können Sie der Bedienungsanleitung des jeweiligen Bluetooth-Geräts entnehmen.

## Aktivieren und Deaktivieren von Bluetooth

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis Mein Status, und drücken Sie  zum Auswählen.

Im Display wird Ein und Aus angezeigt. Der derzeitige Status wird durch ein  angezeigt.

4 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ein, und drücken Sie  zum Auswählen. Das Display zeigt Ein an, und links neben dem eingestellten Status wird ein  eingeblendet.
- Drücken Sie  oder  bis Aus, und drücken Sie  zum Auswählen. Das Display zeigt Aus an, und links neben dem eingestellten Status wird ein  eingeblendet.

## Suchen und Herstellen einer Verbindung zu einem Bluetooth-Gerät

Während der Gerätesuche und der Kopplung darf weder das Bluetooth-fähige Gerät ausgeschaltet noch gedrückt

 werden, da der laufende Vorgang dadurch abgebrochen wird.

1 Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus. Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

---

2 Drücken Sie auf Ihrem Funkgerät , um das Menü aufzurufen.

---

3 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Geräte, und drücken Sie  zum Auswählen.

---

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis zum gewünschten Gerät, und drücken Sie  zum Auswählen.

- Drücken Sie  oder  bis Geräte suchen, um die verfügbaren Geräte zu suchen.

Drücken Sie  oder  bis zum gewünschten Gerät, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  bis Verbinden, und drücken Sie  zum Auswählen.

Im Display wird Verb.aufbau <Gerät> angezeigt. Es sind möglicherweise zusätzliche Schritte erforderlich, um die Kopplung für Ihr Bluetooth-fähiges Gerät einzurichten. Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

---

Bei erfolgreicher Kopplung wird im Display des Funkgeräts <Gerät> verbunden angezeigt. Ein erklingt und neben dem angeschlossenen Gerät wird ein  angezeigt. In der Statusleiste wird das Bluetooth-Symbol angezeigt.

Bei erfolgloser Kopplung wird im Display des Funkgeräts Verb.aufbau fehlgeschl angezeigt.

## Suchen und Herstellen einer Verbindung von einem Bluetooth-Gerät (Erkennbarer Modus)

Schalten Sie Ihr Bluetooth-Gerät oder Funkgerät während des Auffindens und Verbindens nicht aus. Dies könnte den Vorgang abbrechen.

- 1 Schalten Sie die Bluetooth-Funktion ein.  
Siehe [Aktivieren und Deaktivieren von Bluetooth auf Seite 333](#).

- 2 Drücken Sie  , um das Menü aufzurufen.

- 3 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  bis Gerätesuche, und drücken Sie  zum Auswählen.

Ihr Funkgerät kann jetzt von anderen Bluetooth-fähigen Geräten für eine programmierte Dauer

gefunden werden. Dies wird als „Erkennbarer Modus“ bezeichnet.

- 5 Schalten Sie Ihr Bluetooth-fähiges Gerät ein, und koppeln Sie es an Ihr Funkgerät.

Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

## Trennen eines Bluetooth-Geräts

- 1 Drücken Sie auf Ihrem Funkgerät  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

- 3 Drücken Sie  oder  bis Geräte, und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  bis zum gewünschten Gerät, und drücken Sie  zum Auswählen.

- 5 Drücken Sie  oder  bis Trennen, und drücken Sie  zum Auswählen.

Im Display wird <Gerät> wird abgetr angezeigt. Möglicherweise sind zusätzliche Schritte erforderlich, um die Verbindung Ihres Bluetooth-fähigen Geräts zu unterbrechen. Siehe Bedienungsanleitung des betreffenden Bluetooth-fähigen Geräts.

Im Display des Funkgeräts wird <Gerät> abgetrennt angezeigt. Ein positiver Hinweiston erklingt, , und neben dem angeschlossenen Gerät wird kein ✓ mehr angezeigt. Das Bluetooth-Symbol verschwindet aus der Statusleiste.

## Umschalten des Audiosignals zwischen dem eingebauten

## Lautsprecher des Funkgeräts und dem Bluetooth-Gerät

Sie können die Audioausgabe zwischen dem internen Lautsprecher und einem externen Bluetooth-fähigen Zubehör umschalten.

Drücken Sie die programmierte **Bluetooth-Audio-Umschalttaste**.

- Ein Ton erklingt, und im Display wird Audio zu Funkg leit angezeigt.
- Ein Ton erklingt, und im Display wird Audio zu BT leiten angezeigt.

## Anzeigen von Gerätedetails

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis Geräte, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis zum gewünschten Gerät, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Details anzeigen, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Geräte, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis zum gewünschten Gerät, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Löschen, und drücken Sie  zum Auswählen.  
Im Display wird Gerät gelöscht angezeigt.

---

## Löschen eines Gerätenamens

Sie können ein nicht verbundenes Gerät aus der Liste der Bluetooth-fähigen Geräte entfernen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

---

## Bluetooth-Mikrofonverstärker

Ermöglicht die Steuerung des Mikrofonverstärkerwerts des angeschlossenen Bluetooth-fähigen Geräts.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Bluetooth, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis BT MikVerstärk, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis zum Typ der BT-Mikrofonverstärkung und den aktuellen Werten.

Zum Bearbeiten der Werte drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder , um Werte zu erhöhen/reduzieren, und drücken Sie  zum Auswählen.

---

## Innenbereich

### HINWEIS:

Die Innenbereichs-Funktion ist verfügbar für Modelle mit neuester Software und Hardware. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

„Innenbereich“ kann verwendet werden, um den Standort von Funkgerätbenutzern zu verfolgen. Wenn der

Innenbereich aktiviert ist, ist das Funkgerät in einem begrenzt erkennbaren Modus. Dedizierte Bakensignale werden verwendet, um das Funkgerät aufzufinden und seine Position zu bestimmen.

## Ein- und Ausschalten der Funktion Innenbereich

Sie können durch Ausführen einer der folgenden Aktionen die Funktion Innenbereich ein- oder ausschalten.

- Rufen Sie diese Funktion über das Menü auf.
  - a. Drücken Sie , um das Menü aufzurufen.
  - b. Drücken Sie  oder  bis Bluetooth und drücken Sie  zum Auswählen.
  - c. Drücken Sie  oder  Innenbereich und drücken Sie  zum Auswählen.

- d. Drücken Sie  , um die Funktion Innenbereich zu aktivieren.

Das Display zeigt Innenbereich ein an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display Einschalten fehlgeschlagen angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- e. Drücken Sie  zum Ausschalten der Funktion „Innenbereich“.

Das Display zeigt Innenbereich aus an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.

- Wenn nicht erfolgreich, wird im Display Ausschalten fehlgeschlagen angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- Rufen Sie diese Funktion über die vorprogrammierte Taste auf.

- a. Drücken Sie lang auf die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ einzuschalten.

Das Display zeigt Innenbereich ein an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display Einschalten fehlgeschlagen angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

- b. Drücken Sie die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ auszuschalten.

Das Display zeigt *Innenbereich* aus an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display *Ausschalten fehlgeschlagen* angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

## Zugriff auf Informationen eines Standort-Bakensignals in Innenbereichen

Gehen Sie wie folgt vor, um auf Informationen zu Innenbereich-Bakensignalen zuzugreifen.

- 1** Drücken Sie  , um das Menü aufzurufen.
- 

- 2** Drücken Sie  oder  bis Bluetooth und drücken Sie  zum Auswählen.
- 

- 3** Drücken Sie  oder  *Innenbereich* und drücken Sie  zum Auswählen.
- 

- 4** Drücken Sie  oder  bis *Sender* und drücken Sie  zum Auswählen.
- 

Im Display werden Bakensignal-Informationen angezeigt.

## Benachrichtigungsliste

Ihr Funkgerät hat eine Benachrichtigungsliste, in der alle „ungelesenen“ Ereignisse auf dem Kanal, wie z. B. ungelesene Textnachrichten, verpasste Rufe und Rufhinweise erfasst werden.

Das Benachrichtigungssymbol wird in der Statusleiste angezeigt, wenn die Benachrichtigungsliste ein oder mehrere Ereignisse enthält.

Die Liste unterstützt maximal 40 ungelesene Ereignisse. Wenn sie voll ist, ersetzt das nächste Ereignis automatisch den jeweils ältesten Listeneintrag.

#### HINWEIS:

Die Ereignisse werden nach dem Lesen aus der Benachrichtigungsliste entfernt.

## Aufrufen der Benachrichtigungsliste

Gehen Sie wie folgt vor, um die Benachrichtigungsliste zu öffnen.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Benachrichtigung, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Ereignis, und drücken Sie  zum Auswählen.

Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

## Wi-Fi-Betrieb

Wi-Fi® ist eine eingetragene Marke der Wi-Fi Alliance®.

#### HINWEIS:

Diese Funktion gilt nur für DM4601e .

Diese Funktion ermöglicht Ihnen, ein WLAN-Netzwerk einzurichten und eine Verbindung damit herzustellen. Wi-Fi unterstützt Aktualisierungen an der Firmware des Funkgeräts, Codeplug und Ressourcen, wie z. B. Sprachpakete und Sprachansage.

## Ein-/Ausschalten von WLAN

Die programmierte Taste **Ein-/Ausschalten von WLAN** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sprachansagen für die vorprogrammierte Taste **WLAN ein oder aus** können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere

Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Sie können WLAN durch Ausführen einer der folgenden Aktionen ein- oder ausschalten.

- Drücken Sie die vorprogrammierte Taste **WLAN ein oder aus**. Die Sprachansage besagt: WLAN wird eingeschaltet oder WLAN wird ausgeschaltet.
- Rufen Sie diese Funktion über das Menü auf.

a. Drücken Sie  , um das Menü aufzurufen.

b. Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

c. Drücken Sie  oder  bis WLAN ein und drücken Sie  zum Auswählen.

Drücken Sie  , um WLAN zu aktivieren. Im Display wird  neben **Aktiviert** angezeigt.

Drücken Sie  , um das WLAN zu deaktivieren. Neben **Aktiviert** wird kein  mehr angezeigt.

## Verbinden mit einem Access Point im Netzwerk

Wenn Sie WLAN einschalten, startet das Funkgerät einen Suchlauf und stellt eine Verbindung zu einem Access Point im Netzwerk her.

Sie können auch über das Menü eine Verbindung mit einem Access Point im Netzwerk herstellen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis zu einem Netzwerk-Access-Point, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Verbinden, und drücken Sie  zum Auswählen.

6 Geben Sie das Kennwort ein, und drücken Sie .

Wenn die Verbindung erfolgreich hergestellt werden konnte, zeigt das Funkgerät einen Hinweis an, und der Access Point des Netzwerks wird in der Profilliste gespeichert.

## Prüfen des WLAN-Verbindungsstatus

Führen Sie die Vorgehensweise zum Prüfen des WLAN-Verbindungsstatus durch.

Drücken Sie die vorprogrammierte Taste **Wi-Fi-Status abfragen**, um den Verbindungsstatus über eine Sprachansage abzurufen. Die Sprachansage besagt: Wi-Fi ist deaktiviert, Wi-Fi ist aktiviert, aber keine Verbindung, oder Wi-Fi ist aktiviert mit Verbindung.

- Das Display zeigt **WLAN Aus**, wenn WLAN ausgeschaltet ist.

- Das Display zeigt **WLAN Ein, Verbunden**, wenn das Funkgerät mit einem Netzwerk verbunden ist.
- Das Display zeigt **WLAN Ein, Nicht verbunden**, wenn das Funkgerät zwar eingeschaltet, aber nicht mit einem Netzwerk verbunden ist.

Sprachansagen für die WLAN-Statusabfrageergebnisse können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

### HINWEIS:

Die programmierte Taste **Wi-Fi-Status abfragen** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

## Aktualisieren der Netzwerkliste

Gehen Sie wie folgt vor, um die Netzwerkliste zu aktualisieren.

- Gehen Sie wie folgt vor, um die Netzwerkliste über das Menü zu aktualisieren.

- a. Drücken Sie  , um das Menü aufzurufen.
- b. Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.
- c. Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

Wenn Sie das Netzwerkmenü öffnen, aktualisiert das Funkgerät automatisch die Netzwerkliste.

- Wenn Sie sich bereits im Netzwerk-Menü befinden, führen Sie die folgende Maßnahme durch, um die Netzwerkliste zu aktualisieren.

Drücken Sie  oder  zu Aktualisieren und drücken Sie  zum Auswählen.

Das Funkgerät aktualisiert sich und zeigt die neueste Netzwerkliste an.

## Hinzufügen eines Netzwerks

Wenn ein bevorzugtes Netzwerk nicht in der Liste der verfügbaren Netzwerke angezeigt wird, führen Sie die

folgenden Maßnahmen durch, um ein Netzwerk hinzuzufügen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  zu Netzwerk hinzufügen und drücken Sie  zum Auswählen.

---

- 5 Geben Sie die SSID (Service Set Identifier) ein, und drücken Sie  .

---

- 6 Drücken Sie  oder  zu Öffnen und drücken Sie  zum Auswählen.

---

- 7 Geben Sie das Kennwort ein, und drücken Sie

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass das Netzwerk erfolgreich gespeichert wurde.

- 4 Drücken Sie oder bis zu einem

Netzwerk-Access-Point, und drücken Sie zum Auswählen.

- 5 Drücken Sie oder zu Details anzeigen und drücken Sie zum Auswählen.

Für einen verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier), der Sicherheitsmodus, die MAC-Adresse (Media Access Control) und die IP-Adresse (Internet Protocol) angezeigt.

Für einen nicht verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier) und der Sicherheitsmodus angezeigt.

## Anzeigen von Details zu Netzwerk-Access-Points

Gehen Sie wie folgt vor, um die Details zu Netzwerk-Access-Points anzuzeigen.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie oder bis WLAN, und drücken Sie zum Auswählen.

- 3 Drücken Sie oder bis Netzwerke, und drücken Sie zum Auswählen.

## Entfernen von Netzwerk-Access Points

Führen Sie die folgenden Aktionen aus, um Netzwerk-Access Points aus der Profilliste zu entfernen.

- 1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  zum ausgewählten Netzwerk-Access Point und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  zu Entfernen und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  zu JA und drücken Sie  zum Auswählen.

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass der ausgewählte Netzwerk-Access-Point erfolgreich entfernt wurde.

---

## Energieversorgung

In diesem Kapitel wird die Verwendung der Einstellungsfunktionen auf Ihrem Funkgerät beschrieben.

### Ein-/Ausschalten der Funkgerät-Hinweistöne

Alle Funkgerät-Hinweistöne (mit Ausnahme des ankommenden Emergency Alert-Tons) können nach Bedarf aktiviert und deaktiviert werden.

Drücken Sie die programmierte Taste **Alle Töne/Hinweistöne**, um alle Töne ein- bzw. auszuschalten, oder führen Sie die nachfolgenden Schritte aus, um auf diese Funktion über das Menü „Funkgerät“ zuzugreifen.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Töne/  
Hinweistöne, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Alle Töne, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  , um alle Töne und Hinweistöne zu aktivieren/deaktivieren.  
Im Display wird  neben Aktiviert angezeigt.  
Neben Aktiviert wird kein  mehr angezeigt.

---

## Einstellen der Abweichung der Hinweistonlautstärke

Die Abweichung der Hinweistonlautstärke kann bei Bedarf eingestellt werden. Diese Funktion stellt die Lautstärke der Hinweistöne ein, sodass sie höher oder niedriger als die Lautstärke für Sprache sein können.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Töne/  
Hinweistöne, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Lautst.Offset., und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  bis zum gewünschten Lautstärkewert.  
Das Funkgerät gibt für jeden Lautstärkewert jeweils einen Ton in der entsprechenden Lautstärke ab.

---

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um den gewünschten angezeigten Lautstärkewert zu behalten.
  - Drücken Sie  , um den Vorgang zu beenden, ohne die aktuellen Lautstärkeabweichungseinstellungen zu ändern.
- 

## Ein-/Ausschalten des Freitons

Sie können den Freiton nach Bedarf ein- oder ausschalten.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Töne/ Hinweistöne, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Sprecherlaubniston, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  , um den Freiton zu aktivieren/deaktivieren.  
Im Display wird  neben Aktiviert angezeigt.  
Neben Aktiviert wird kein  mehr angezeigt.

---

## Ein- und Ausschalten des Hinweistons beim Einschalten

Sie können den Hinweiston beim Einschalten nach Bedarf ein- oder ausschalten.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Töne/  
Hinweistöne, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Einschalten, und drücken Sie  zum Auswählen.

- 6 Drücken Sie  zum Aktivieren bzw. Deaktivieren des Einschalttons.

Im Display wird  neben Aktiviert angezeigt.

Neben Aktiviert wird kein  mehr angezeigt.

## Einstellen der Sendeleistung

Die Sendeleistung des Funkgeräts kann für jede Connect Plus-Zone hoch oder niedrig eingestellt werden.

Hoch ermöglicht die Kommunikation mit Funkstationen im Connect Plus-Modus, die sich in großer Entfernung befinden. Niedrig ermöglicht die Kommunikation mit Funkstationen im Connect Plus-Modus, die sich in geringer Entfernung befinden.

Drücken Sie die programmierte Taste **Leistung** zum Umschalten des Sendeleistungspegels zwischen Hoch und Niedrig.

Befolgen Sie das beschriebene Verfahren für den Zugriff auf diese Funktion über das Menü „Funkgerät“.

- 1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  zu Einstellungen und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu Funkgeräteeinstellungen und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  zu Leistung und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  zur der erforderlichen Einstellung und drücken Sie  zum Auswählen.  
 ✓ wird neben der ausgewählten Einstellung angezeigt. Durch Gedrückthalten von  können Sie jederzeit zum Startbildschirm zurückkehren.  
 Das Funkgerät kehrt zum vorherigen Menü zurück.

---

## Ändern des Displaymodus

Das Funkgerätdisplay kann nach Bedarf auf Tages- oder Nacht-Modus eingestellt werden. Diese Einstellung ändert jeweils die Farbenpalette des Displays.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Display, und drücken Sie  zum Auswählen.  
 Im Display wird Tag und Nacht angezeigt.

---

5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie dann  zum Aktivieren.

✓ wird neben der ausgewählten Einstellung angezeigt.

## Einstellen der Helligkeit des Displays

Sie können die Display-Helligkeit des Funkgeräts nach Bedarf anpassen.

### HINWEIS:

Die Helligkeit des Displays kann nicht angepasst werden, wenn „Helligkeitsautomatik“ aktiviert ist.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Display, und drücken Sie  zum Auswählen.

- 5 Drücken Sie  oder  bis Helligkeit, und drücken Sie  zum Auswählen.  
Im Display wird eine Helligkeitsleiste angezeigt.

- 6 Zum Verringern der Helligkeit drücken Sie  , zum Erhöhen der Helligkeit drücken Sie  . Wählen Sie eine Einstellung zwischen 1 und 8.  
Drücken Sie zur Bestätigung Ihrer Eingabe  .

## Ein-/Ausschalten des Startbildschirms

Sie können den Startbildschirm nach Bedarf aktivieren oder deaktivieren.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Display, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Introbildschirm, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  zum Aktivieren/Deaktivieren des Startbildschirms.

Im Display wird  neben Aktiviert angezeigt.  
Neben Aktiviert wird kein  mehr angezeigt.

---

## Sprache

Sie können das Display Ihres Funkgeräts auf die von Ihnen gewünschte Sprache einstellen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Sprachen, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis zur gewünschten Sprache. Drücken Sie dann  zum Aktivieren.  wird neben der gewählten Sprache angezeigt.

---

## Ein-/Ausschalten der Funkgerät-LED-Anzeige

Sie können die LED-Anzeige nach Bedarf aktivieren oder deaktivieren.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis LED-Anzeige, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  , um die LED-Anzeige zu aktivieren/deaktivieren.  
Im Display wird  neben Aktiviert angezeigt.

Neben Aktiviert wird kein  mehr angezeigt.

## Bestimmen des Kabeltyps

Sie können den Kabeltyp für Ihr Funkgerät auswählen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Kabeltyp, und drücken Sie  zum Auswählen.

---

- 5 Der aktuelle Kabeltyp ist mit einem  gekennzeichnet.

## Kanal-Ansage

Diese Funktion aktiviert die Sprachansage des Funkgeräts, sodass es die aktuelle Zone bzw. den aktuellen Kanal, die/der vom Benutzer gerade zugewiesen wurde, oder das Drücken einer programmierbaren Taste akustisch angibt. Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Sprachansage, und drücken Sie  zum Auswählen.

Sie können durch Drücken von oder die ausgewählte Option ändern.

- 5 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  , um die Sprachansage zu aktivieren. Im Display wird  neben Aktiviert angezeigt.
  - Drücken Sie  , um die Sprachansage zu deaktivieren.  wird nicht mehr neben Aktiviert angezeigt.

## Menü-Timer

Mit dieser Funktion können Sie festlegen, wie lange Ihr Funkgerät das Menü anzeigt, bevor es automatisch wieder auf den Ausgangsbildschirm umschaltet.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Display, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Menü-Timer, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  bis zur gewünschten Einstellung, und drücken Sie  zum Auswählen.

---

## Ein-/Ausschalten der Funktion „Hupe/ Beleuchtung“

Diese Funktion muss von Ihrem Händler über den rückseitigen Zubehöranschluss Ihres Funkgeräts installiert werden.

Ihr Funkgerät kann Sie über die Funktion „Hupe/ Beleuchtung“ auf einen ankommenden Ruf hinweisen.

Wenn diese Funktion aktiviert ist, ertönt bei einem ankommenden Ruf die Hupe des Fahrzeugs, und seine Beleuchtung wird eingeschaltet.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie zum Ein- bzw. Ausschalten der Funktion „Hupe und Beleuchtung“ die vorprogrammierte Taste **Hupe/Beleuchtung**. Überspringen Sie die folgenden Schritte.
  - Drücken Sie  , um das Menü aufzurufen.

---
- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Hupe/ Beleuchtung, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie , um Horns/Lights zu aktivieren/deaktivieren.

Im Display wird  neben Aktiviert angezeigt.

Neben Aktiviert wird kein  mehr angezeigt.

## Einstellen des Zweifunktionsschalters auf die bevorzugte Funktion

Ihr Funkgerät hat einen **Lautstärkeregler/Kanalwahlschalter**, der eine Doppelfunktion hat. Die Doppelfunktion kann deaktiviert werden, wenn der Schalter nur als Lautstärkeregler fungieren soll.

- 1 , um das Menü aufzurufen.

- 2  oder  zu Einstellungen und drücken Sie  zum Auswählen.

- 3  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

- 4  oder  zu 2-Funkt.knopf und drücken Sie  zum Auswählen.

- 5 Im Display wird NurLautst und Lautst&Kanal angezeigt.  oder  zur gewünschten Einstellung und drücken Sie  zum Auswählen.  
 wird neben der ausgewählten Einstellung angezeigt.  
 Das Funkgerät kehrt zum vorherigen Menü zurück.

## Digital-Mikrofonverstärkungsautomatik (Mic AGC-D)

Mit dieser Funktion steuern Sie automatisch die Mikrofonverstärkung des Funkgeräts, während eine Übertragung auf einem digitalen System stattfindet. Laute Geräusche werden unterdrückt, oder leise Geräusche werden verstärkt. Hierbei wird ein voreingestellter Wert

verwendet, um eine konsistente Lautstärke zu gewährleisten.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis MikAGC-D und drücken Sie  zum Auswählen.

---

- 5 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  , um **MikAGC-D** zu aktivieren. Im Display wird  neben Aktiviert angezeigt.
  - Drücken Sie  , um **MikAGC-D** zu deaktivieren.  verschwindet neben Aktiviert.

## Intelligentes Audio

Die Audiolautstärke Ihres Funkgeräts wird automatisch so geregelt, dass sie an aktuelle Hintergrundgeräusche in der Umgebung des Funkgeräts, einschließlich stationärer und sich bewegender Geräuschquellen, angepasst wird und sie überwindet. Diese Funktion betrifft nur den Empfang und hat keinen Einfluss auf das Sendeaudio.

- 1 Drücken Sie  , um das Menü aufzurufen.

Bedienelement des Funkgeräts	Schritte
Menu	<p><b>a</b> Drücken Sie  , um das Menü aufzurufen.</p> <p><b>b</b> Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.</p>

Bedienelement des Funkgeräts	Schritte
	<p><b>c</b> Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.</p> <p><b>d</b> Drücken Sie  oder  bis Intelligentes Audio, und drücken Sie  zum Auswählen.</p> <p> <b>HINWEIS:</b> Sie können durch Drücken von oder die ausgewählte Option ändern.</p> <p><b>e</b> Führen Sie einen der folgenden Schritte aus:</p>

Bedienelement des Funkgeräts	Schritte
	<ul style="list-style-type: none"> <li>• Drücken Sie , um die intelligente Audio-Funktion zu aktivieren. Im Display wird  neben Aktiviert angezeigt.</li> <li>• Drücken Sie , um die intelligente Audio-Funktion zu deaktivieren. Neben Aktiviert wird kein  mehr angezeigt.</li> </ul>

**2** Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

**3** Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

4 Drücken Sie  oder  bis Intelligentes Audio, und drücken Sie  zum Auswählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um die intelligente Audio-Funktion zu aktivieren. Im Display wird  neben Aktiviert angezeigt.
- Drücken Sie  , um die intelligente Audio-Funktion zu deaktivieren. Neben Aktiviert wird kein  mehr angezeigt.

## Aktivieren/Deaktivieren der Funktion „Sperre akustischer Rückkopplungen“

Mit dieser Funktion können Sie die akustische Rückkopplung bei eingehenden Anrufen reduzieren.

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  zu FunkgEinstellg und drücken Sie  zum Auswählen.

4 Drücken Sie  oder  bis AF-Unterdrückung, und drücken Sie  zum Auswählen.  
Sie können durch Drücken von oder die ausgewählte Option ändern.

5 Führen Sie einen der folgenden Schritte aus.

- Drücken Sie  , um die Sperre akustischer Rückkopplungen zu aktivieren. Im Display wird  neben Aktiviert angezeigt.
- Drücken Sie  , um die Sperre akustischer Rückkopplungen zu deaktivieren. Neben Aktiviert wird kein  mehr angezeigt.

## Ein-/Ausschalten von GNSS

Das Global Navigation Satellite System (GNSS) ist ein Satellitennavigationssystem, das die genaue Position des Funkgeräts ortet. GNSS umfasst Global Positioning System (GPS) und Global Navigation Satellite System (GLONASS).

### HINWEIS:

Ausgewählte Funkgerätmodelle bieten GPS- und GLONASS. Die GNSS-Konstellation wird über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte Taste **GNSS**, um die Funktion ein- bzw. auszuschalten. Überspringen Sie die folgenden Schritte.
  - Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis GNSS. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie , um GNSS zu aktivieren/deaktivieren.

Wenn diese Option aktiviert ist, wird  neben **Aktiviert** angezeigt.

Wenn diese Option deaktiviert ist, wird  neben **Aktiviert** angezeigt.

Unter [Überprüfen der GNSS-Informationen auf Seite 373](#) finden Sie weitere Informationen zum Abrufen von GNSS-Informationen.

## Aufrufen allgemeiner Funkgeräteinformationen

In Ihrem Funkgerät sind folgende Daten gespeichert:

- Akku
- Grad der Neigung (Beschleunigungsmesser)
- Modellnummerindex des Funkmodells
- Optionskarte Over-The-Air (OTA) Codeplug CRC
- Standortnummer
- Standortinformationen
- Aliasname und ID des Funkgeräts
- Firmware- und Codeplug-Version
- GNSS-Informationen

Sie können jederzeit  drücken, um zum

vorhergehenden Bildschirm zu wechseln, oder  lang drücken, um zum Ausgangsbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

## Überprüfen des Modellnummerindex des Funkgeräts

Diese Indexnummer dient zur Identifizierung der modellspezifischen Hardware Ihres Funkgeräts. Ihr Systemadministrator für Funkgeräte kann Sie nach dieser Nummer fragen, wenn ein neues Optionskarten-Codeplug für Ihr Funkgerät bereitgestellt werden soll.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Modellindex, und drücken Sie  zum Auswählen.  
Im Display wird der Modellnummerindex des Funkgeräts angezeigt.

---

## CRC-Überprüfung der Optionskarten-OTA-Codeplug-Datei

Befolgen Sie die nachfolgenden Anweisungen, wenn Sie von Ihrem Systemadministrator für Funkgeräte aufgefordert werden, die Optionskarten-OTA-Codeplug-Datei „CRC“ (Cyclic Redundancy Check) anzuzeigen. Diese Menüoption wird nur dann angezeigt, wenn die Optionskarte ihre letzte Codeplug-Aktualisierung per OTA empfangen hat.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis OB OTA CPorc, und drücken Sie  zum Auswählen.  
Im Display werden einige Buchstaben und Zahlen angezeigt. Teilen Sie diese Informationen wie im

Display dargestellt Ihrem Systemadministrator für Funkgeräte mit.

## Anzeigen der Site-ID (Standortnummer)

### HINWEIS:

Wenn Sie derzeit nicht an einem Standort registriert sind, wird im Display `Nicht registriert` angezeigt.

Das Funkgerät zeigt die Site-ID kurz bei der Registrierung beim Connect Plus-Standort an. Nach der Registrierung zeigt das Funkgerät die Standortnummer nicht mehr an. Um die eingetragene Standortnummer anzuzeigen, gehen Sie wie folgt vor:

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  bis Standortnummer, und drücken Sie  zum Auswählen.

Im Display werden die Netzwerk-ID und die Standortnummer angezeigt.

## Prüfen der Standort-Informationen

### HINWEIS:

Wenn Sie derzeit nicht an einem Standort registriert sind, wird im Display Nicht registriert angezeigt.

Die Standort-Infofunktion bietet Informationen, die für Servicetechniker hilfreich sein können. Sie besteht aus folgenden Informationen:

- Repeater-Nummer des aktuellen Steuerungskanal-Repeaters.
- RSSI: Letzte vom Steuerungskanal-Repeater gemessene Signalstärke.
- Nachbarliste (NL), gesendet vom Steuerungskanal-Repeater (fünf durch Kommas getrennte Zahlen).

Wenn Sie zur Nutzung dieser Funktion aufgefordert werden, geben Sie die angezeigten Informationen genau so an, wie sie auf dem Bildschirm angezeigt werden.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  Site-Info, und drücken Sie  zum Auswählen.

Im Display werden die Standort-Informationen angezeigt.

## Prüfen der Funkgerät-ID

Diese Funktion zeigt die ID des Funkgeräts an.

Befolgen Sie das beschriebene Verfahren für den Zugriff auf diese Funktion über den Bildschirm des Funkgeräts.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Meine ID, und drücken Sie  zum Auswählen.  
Im Display wird die Funkgerät-ID angezeigt.

## Überprüfen der Firmware- und Codeplug-Version

Zeigt die Versionsnummer der Firmware Ihres Funkgeräts an.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Versionen, und drücken Sie  zum Auswählen.  
Die Anzeige enthält eine Liste mit den folgenden Informationen:
  - (Funkgerät) Firmware-Version
  - (Funkgerät) Codeplug-Version

- Optionskarten-Firmware-Version
- Optionskarten-Frequenz-Version
- Optionskarten-Hardware-Version
- Optionskarten-Codeplug-Version

---

## Überprüfung auf Updates

Connect Plus bietet die Möglichkeit, bestimmte Dateien (Optionskarten-Codeplug, Netzwerkfrequenzdatei und Optionskarten-Firmware-Datei) per Funk (OTA = Over the Air) zu aktualisieren.

### HINWEIS:

Wenden Sie sich an Ihren Händler oder Netzwerkadministrator, um festzustellen, ob diese Funktion für Ihr Funkgerät aktiviert wurde.

Jedes Connect Plus-Funkgerät mit Display ist in der Lage, die aktuelle OTA-Codeplug-CRC, Frequenzdateiversion oder Firmware-Dateiversion der Zusatzkarte über eine Menüoption anzuzeigen. Darüber hinaus können Display-Funkgeräte mit aktivierter OTA-Dateiübertragung die Version einer ausstehenden Datei anzeigen. Eine ausstehende Datei ist eine Frequenzdatei oder Optionskarten-Firmware-Datei, über die das Connect Plus-

Funkgerät durch Systemmeldungen in Kenntnis gesetzt wurde, von denen aber noch nicht alle Dateipakete eingegangen sind. Sollte für das Connect Plus-Funkgerät mit Display eine ausstehende Datei vorliegen, bietet das Menü folgende Möglichkeiten:

- Abrufen der Versionsnummer der ausstehenden Datei.
- Anzeigen, welcher Prozentsatz an Datenpaketen bereits eingegangen ist.
- Anweisen des Connect Plus-Funkgeräts, die restlichen Dateipakete abzurufen.

Wenn das Funkgerät für die Connect Plus-OTA-Dateiübertragung aktiviert ist, kann es vorkommen, dass das Funkgerät automatisch eine Dateiübertragung durchführt, ohne zuvor den Funkgerätbenutzer darüber zu informieren. Während das Funkgerät die Dateipakete erhält, blinkt die LED schnell rot, und im Display des Funkgeräts wird das Symbol für große Datenmengen auf der Statusleiste des Startbildschirms angezeigt.

## HINWEIS:

Das Connect Plus-Funkgerät kann nicht gleichzeitig Datenpakete abrufen und Anrufe empfangen. Wenn Sie die Dateiübertragung abbrechen möchten, drücken Sie die **Sendetaste (PTT)** und lassen sie wieder los. Dies führt dazu, dass das Funkgerät einen Anruf für den ausgewählten Kontaktnamen anfordert. Die Dateiübertragung wird für dieses Funkgerät abgebrochen, bis sie zu einem späteren Zeitpunkt fortgesetzt wird.

Es gibt verschiedene Möglichkeiten, den Dateiübertragungsprozess neu zu starten. Das erste Beispiel gilt für alle OTA-Dateitypen. Die anderen Beispiele gelten nur für die Netzwerkfrequenzdatei und die Optionskarten-Firmware-Datei:

- Der Systemadministrator für Funkgeräte startet die OTA-Dateiübertragung neu.
- Der vordefinierte Timer der Optionskarte läuft ab, sodass das Abrufen von Paketen automatisch wiederaufgenommen wird.
- Der Timer ist noch nicht abgelaufen, aber der Benutzer veranlasst das Fortsetzen der Datenübertragung über eine Menüoption.

Nachdem das Connect Plus-Funkgerät alle Dateipakete heruntergeladen hat, muss ein Upgrade auf die neu erhaltene Datei durchgeführt werden. Für die Netzwerkfrequenzdatei ist dies ein automatischer Vorgang, der kein Zurücksetzen des Funkgeräts erfordert. Für die Optionskarten-Codeplug-Datei ist dies ein automatischer Vorgang, der eine kurze Unterbrechung des Dienstes verursacht, da die Optionskarte die neuen Codeplug-Informationen lädt und sich erneut bei einem Netzwerkstandort anmeldet. Wie schnell das Funkgerät ein Upgrade auf eine neue Optionskarten-Firmware-Datei durchführt, hängt davon ab, wie das Funkgerät vom Händler oder Systemadministrator konfiguriert wurde. Das Funkgerät führt entweder sofort eine Aktualisierung nach Einholung aller Dateipakete durch, oder es wartet, bis der Benutzer das Funkgerät das nächste Mal einschaltet.

## HINWEIS:

Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Die Aktualisierung auf eine neue Optionskarten-Firmware-Datei dauert einige Sekunden, und hierzu ist es erforderlich, dass die Connect Plus-Optionskarte das Funkgerät zurücksetzt. Nachdem das Upgrade gestartet wurde, kann der Funkgerätbenutzer keine Anrufe tätigen oder empfangen, bis der Vorgang abgeschlossen ist.

Während des Vorgangs erscheint auf dem Display der Hinweis, das Funkgerät nicht auszuschalten.

## Firmware-Datei

Der folgende Abschnitt enthält Informationen zur Firmware des Funkgeräts.

### Firmware auf dem neuesten Stand

#### HINWEIS:

Wenn die Firmwaredatei für die Zusatzkarte nicht auf dem neuesten Stand ist (und wenn das Funkgerät eine neuere Version einer Zusatzkarten-Firmwaredatei bereits teilweise heruntergeladen hat) zeigt das Display eine Liste mit zusätzlichen Optionen; Version, %Empfangen und Download.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Firmware, und drücken Sie  zum Auswählen.

---

Auf dem Display wird Firmware ist auf neuestem Stand angezeigt.

---

### Ausstehende Firmware – Version

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Firmware, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  bis Version, und drücken Sie  zum Auswählen.

Wenn es eine ausstehende Optionskarte Firmware-Datei gibt, wird im Display die Versionsnummer der ausstehenden Firmware angezeigt.

Wenn keine ausstehende Optionskarten-Firmwaredatei vorhanden ist, wird auf dem Display Firmware auf dem neuesten Stand angezeigt.

---

## Ausstehende Firmware – % empfangen

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Firmware, und drücken Sie  zum Auswählen.

---

- 6 Drücken Sie  oder  bis %Empfangen, und drücken Sie  zum Auswählen.

Der Bildschirm zeigt den Prozentsatz der bisher abgerufenen Firmware-Dateipakete an.

#### HINWEIS:

Bei 100 % muss das Funkgerät aus- und wieder eingeschaltet werden, um die Firmware-Aktualisierung zu starten.

## Ausstehende Firmware – Download

Wenn das Connect Plus-Funkgerät zuvor eine OTA-Optionskarten-Firmware-Dateiübertragung mit einer unvollständigen Datei abgebrochen hat, wird die Dateiübertragung automatisch wieder aufgenommen (wenn noch aktiv), sobald ein interner Timer abläuft. Wenn Sie das Gerät anweisen möchten, eine aktive Optionskarten-Firmware-Dateiübertragung noch vor Ablauf dieses internen Timers wiederaufzunehmen, verwenden Sie die Download-Option, wie oben beschrieben.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

- 4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

- 5 Drücken Sie  oder  bis Firmware, und drücken Sie  zum Auswählen.

- 6 Drücken Sie  oder  bis Herunterladen, und drücken Sie  zum Auswählen.  
Im Display wird Folgendes angezeigt:

Download verfügbar	Download starten
--------------------	------------------

*Tabelle wird fortgesetzt...*

Kein Download verfügbar	Download nicht verfügbar
----------------------------	-----------------------------

7 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie **Ja** und drücken Sie , um den Download zu starten.
- Wählen Sie **Nein** und drücken Sie , um zum vorherigen Menü zurückzukehren.

## Frequenzdatei

Der folgende Abschnitt enthält Informationen zur Frequenzdatei des Funkgeräts.

### Frequenzdatei auf dem neuesten Stand

#### HINWEIS:

Wenn die Frequenzdatei nicht auf dem neuesten Stand ist (und wenn das Funkgerät eine neuere Version einer Frequenzdatei bereits teilweise heruntergeladen hat), zeigt das Display eine Liste mit zusätzlichen Optionen an; **Version**, **%Empfangen** und **Download**.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

4 Drücken Sie  oder  bis Frequenz, und drücken Sie  zum Auswählen.

Auf dem Display wird **Frequ.-Datei** auf neuestem Stand angezeigt.

### Ausstehende Frequenzdatei – Version

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis Frequenz, und drücken Sie  zum Auswählen.

---

6 Drücken Sie  oder  bis Version, und drücken Sie  zum Auswählen.

Wenn es eine ausstehende Frequenzdatei gibt, wird im Display die Versionsnummer der ausstehenden Frequenzdatei angezeigt.

---

## Ausstehende Frequenzdatei – % empfangen

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

---

5 Drücken Sie  oder  bis %Empfangen, und drücken Sie  zum Auswählen.

Der Bildschirm zeigt den Prozentsatz der bisher abgerufenen Frequenzdateipakete an.

---

## Ausstehende Frequenzdatei – Download

Wenn das Connect Plus-Funkgerät zuvor eine OTA-Netzwerkfrequenzdateiübertragung mit einer unvollständigen Datei abgebrochen hat, wird die Dateiübertragung automatisch wieder aufgenommen (wenn noch aktiv), sobald ein interner Timer abläuft. Wenn Sie das Gerät anweisen möchten, eine aktive Netzwerkfrequenzdateiübertragung noch vor Ablauf dieses internen Timers wiederaufzunehmen, verwenden Sie die Download-Option, wie oben beschrieben.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis Aktualisierungen, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Frequenz, und drücken Sie  zum Auswählen.

---

- 6 Drücken Sie  oder  bis Herunterladen, und drücken Sie  zum Auswählen.

Download zurzeit nicht verfügbar	Download nicht verfügbar
Download zurzeit verfügbar	Download starten

- 7 Führen Sie einen der folgenden Schritte aus:
  - Wählen und drücken Sie Ja, um den Download zu starten.

- Wählen und drücken Sie **Nein**, um zum vorherigen Menü zurückzukehren.
- 

## Überprüfen der GNSS-Informationen

Sie können GNSS-Informationen Ihres Funkgeräts anzeigen, d. h. Werte wie die folgenden:

- Breitengrad
- Längengrad
- Höhe
- Richtung
- Geschwindigkeit
- Horizontal Dilution of Precision (HDOP – Streubreite der Messwerte in Horizontalrichtung)
- Satelliten
- Version

**1** Drücken Sie , um das Menü aufzurufen.

---

**2** Drücken Sie  oder  bis Dienstprogramme, und drücken Sie  zum Auswählen.

---

**3** Drücken Sie  oder  bis Geräteinfo, und drücken Sie  zum Auswählen.

---

**4** Drücken Sie  oder  bis GNSS Info, und drücken Sie  zum Auswählen.

---

**5** Drücken Sie  oder  bis zum gewünschten Element, und drücken Sie  zum Auswählen.  
Im Display werden die gewünschten GNSS-Informationen angezeigt.

---

Unter [Ein-/Ausschalten von GNSS auf Seite 360](#) finden Sie Einzelheiten über GNSS.

Diese Seite wurde absichtlich leer gelassen.

## Andere Systeme

Die für Funkgerätebenutzer verfügbaren Funktionen in diesem System werden in diesem Kapitel beschrieben.

## Sendetaste (PTT)

Die Sendetaste (**PTT**) dient zwei grundlegenden Zwecken:

- Während eines Anrufs wird durch Betätigung der **Sendetaste (PTT)** mit anderen am Anruf beteiligten Funkgeräten kommuniziert. Wenn die **Sendetaste (PTT)** gedrückt wird, wird das Mikrofon aktiviert.
- Wird gerade kein Ruf getätigt, wird die **Sendetaste (PTT)** zur Durchführung eines neuen Rufs verwendet .

Drücken Sie lange die **Sendetaste (PTT)**, um zu sprechen. Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Ist die Freitonfunktion oder der PTT-Mithörton  aktiviert, warten Sie auf das Ende des kurzen Hinweistons, bevor Sie sprechen.

 Wenn die Funktion „Kanal frei-Anzeige“ auf Ihrem Funkgerät aktiviert ist (wird von Ihrem Händler konfiguriert), hören Sie, sobald die **Sendetaste (PTT)** am Zielfunkgerät (das Ihren Ruf empfangende Funkgerät) freigegeben wird,

[Feedback senden](#)

einen kurzen Hinweiston, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können.

 Sie hören einen ununterbrochenen Ton bei Sprechunterbrechung, wenn Ihr Ruf unterbrochen wird. Wenn ein Ton bei Sprechunterbrechung wiedergegeben wird, sollten Sie die **Sendetaste (PTT)** loslassen.

## programmierbare Tasten

Abhängig von der Dauer eines Tastendrucks kann Ihr Händler die programmierbaren Tasten als Verknüpfungen mit Funkgerätfunktionen programmieren.

### Kurz drücken

Drücken und schnell wieder loslassen.

### Lang drücken

Für die programmierte Zeit gedrückt halten.

### HINWEIS:

Unter [Notruf auf Seite 460](#) finden Sie weitere Informationen über die vorprogrammierte Tastendruckdauer der **Notruf**-Taste.

## Zuweisbare Funkgerätfunktionen

Die folgenden Funktionen können den programmierbaren Tasten zugewiesen werden.

### **Audioumgebung**

Mit dieser Option kann der Benutzer eine Umgebung wählen, in der das Funkgerät betrieben wird.

### **Audioprofile**

Ermöglicht dem Benutzer das Auswählen des gewünschten Audio-Profiles.

### **Bluetooth® Audio-Schalter**

Schaltet die Audioausgabe zwischen dem internen Funkgerätlautsprecher und einem externen Bluetooth-fähigen Zubehör um.

### **Bluetooth verbinden**

Sucht nach Bluetooth-Geräten und stellt die Verbindung her.

### **Bluetooth trennen**

Beendet alle vorhandenen Bluetooth-Verbindungen zwischen Funkgerät und Bluetooth-fähigen Geräten.

### **Bluetooth-Erkennung**

Ermöglicht es Ihrem Funkgerät, in den erkennbaren Bluetooth-Modus versetzt werden zu können.

### **Rufhinweis**

Bietet direkten Zugriff auf die Kontaktliste. Sie können dann einen Kontakt auswählen, an den ein Rufhinweis gesendet werden kann.

### **Rufweiterleitung**

Schaltet die Rufweiterleitung ein oder aus.

### **Anrufprotokoll**

Wählt die Rufprotokollliste aus.

### **Kanalankündigung**

Sprachansage von Zonen- und Kanalnachrichten für den aktuellen Kanal.

### **Kontakte**

Bietet direkten Zugriff auf die Kontaktliste.

### **Emergency**

Je nach Programmierung wird ein Notruf eingeleitet oder abgebrochen.

### **Externer Durchsageverstärker/PA**

Schaltet die Audioausgabe zwischen dem angeschlossenen externen Durchsageverstärker und dem im Funkgerät eingebauten Durchsageverstärkersystem um.

### **Innenbereich**

Schaltet die Innenbereichs-Funktion ein oder aus.

### **Intelligentes Audio**

Schaltet Intelligentes Audio ein-/aus.

**Manuell wählen** 

Es wird durch Eingabe einer Funkgeräte-ID ein Einzelruf eingeleitet.

**Manuelles Funkstation-Roaming**<sup>5</sup> 

Startet die manuelle Standortsuche.

**Mic AGC**

Schaltet die automatische Verstärkungsregelung (AGC) des eingebauten Mikrofons ein bzw. aus.

**Monitor (Überwachung)**

Überwacht einen gewählten Kanal auf Aktivität.

**Benachrichtigungen**

Für direkten Zugriff auf die Benachrichtigungsliste.

**Störkanäle löschen**<sup>5</sup>

Entfernt einen unerwünschten Kanal (mit Ausnahme des gewählten Kanals) vorübergehend aus der Scan-Liste. Mit dem gewählten Kanal ist die gewählte Zonen- oder Kanal-Kombination des Benutzers gemeint, von der aus der Scanvorgang gestartet wird.

**Eintastenzugang** 

Leitet einen vordefinierten Einzel-, Telefon- oder Gruppenruf, einen Rufhinweis, eine Quick Text-Nachricht oder „Zurück auf Startkanal“ direkt ein.

**Optionskartenfunktion**

Schaltet Optionskartenfunktion(en) für Kanäle mit aktivierter Optionskarte ein oder aus.

**Dauerüberwachung**<sup>5</sup>

Überwacht einen gewählten Kanal auf sämtlichen Funkverkehr, bis die Funktion deaktiviert wird.

**Telefon** 

Für den direkten Zugriff auf die Telefonkontaktliste.

**Privacy** 

Schaltet die Verschlüsselung ein oder aus.

**Durchsageverstärker (PA)**

Schaltet das interne Durchsageverstärkersystem des Funkgeräts ein oder aus.

**Aliasname und ID des Funkgeräts**

Bietet den Aliasnamen und die ID des Funkgeräts

**Funkgerät-Check** 

Stellt fest, ob das Funkgerät in einem System aktiv ist.

**Funkgerät deaktivieren** 

Ermöglicht die Ferndeaktivierung eines Zielfunkgeräts.

**Funkgerät aktivieren** 

Ermöglicht die Fernaktivierung eines Zielfunkgeräts.

<sup>5</sup> In Capacity Plus nicht verfügbar.

### **Fernüberwachung**

Schaltet das Mikrofon eines Zielfunkgeräts ein, ohne dies anzuzeigen.

### **Repeater/Repeater umgehen<sup>5</sup>**

Zum Umschalten zwischen Einsatz eines Repeaters und direkter Übertragung an ein anderes Funkgerät.

### **Home-Kanal zurücksetzen**

Richtet einen neuen Home-Kanal ein.

### **Home-Kanalerinnerung stummschalten**

Schaltet die Home-Kanalerinnerung stumm.

### **Scan<sup>6</sup>**

Schaltet Scan ein oder aus.

### **Standortinformationen**

Zeigt den aktuellen Standortnamen und die ID des Capacity Plus-Mehrfachstandorts an.

Kanal-Ansage von Standort-Sprachnachrichten für den aktuellen Standort, wenn diese Funktion aktiviert ist.

### **Funkstationsperre<sup>5</sup>**

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert,

sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

### **Telemetriesteuerung**

Steuert den Ausgabe-Pin eines lokalen oder entfernten Funkgeräts.

### **Textnachricht**

Wählt das Textnachrichtenmenü aus.

### **Rufunterbrechungstaste**

Unterbricht einen laufenden unterbrechbaren Ruf, um den Kanal freizumachen.

### **Vibrant-Verbesserung**

Schaltet die Funktion „Vibrant-Verb.“ ein oder aus.

### **Sprachankündigung ein/aus**

Schaltet die Sprachansage ein/aus.

### **Sprachgesteuerte Übertragung (VOX)**

Schaltet VOX ein oder aus.

### **WLAN**

Schaltet WLAN ein oder aus.

### **Zonenauswahl**

Ermöglicht das Auswählen einer Zone aus einer Zonenliste.

---

<sup>6</sup> In Capacity Plus - Einzelstandort nicht verfügbar.

## Zuweisbare Einstellungen oder Einstellungsfunktionen

Die folgenden Einstellungen des Funkgeräts oder Dienstprogrammfunktionen können den programmierbaren Tasten zugewiesen werden.

### Tones/Alerts

Schaltet alle Töne und Warnungen ein und aus.

### Hintergrundbeleuchtung

Schaltet die Hintergrundbeleuchtung des Displays ein bzw. aus.

### Kanal-nach-oben /-unten

Zum Wechseln auf den vorhergehenden bzw. nächsten Kanal, je nach Programmierung.

### Display-Modus

Schaltet den Tag/Nacht-Displaymodus ein bzw. aus.

### Leistung

Schaltet den Sendeleistungspegel zwischen hoch und niedrig um.

## Aufrufen von programmierten Funktionen

Führen Sie die Vorgehensweise zum Aufrufen von programmierten Funktionen auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die vorprogrammierte Taste. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

---
- 2 Drücken Sie  oder  bis zur Menüfunktion, und drücken Sie  zur Auswahl einer Funktion oder zum Aufrufen eines Untermenüs.

---

- 3 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie , um zum vorangehenden Bildschirm zurückzukehren.
  - Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

Das Funkgerät verlässt ein Menü nach einer bestimmten Zeit automatisch und kehrt zum Startbildschirm zurück.

Die Menü-Navigationstasten stehen auch an einem Tastenfeldmikrofon zur Verfügung. Siehe [Tasten des Tastenfeldmikrofons auf Seite 44](#).

## Statusanzeigen

Dieses Kapitel erläutert die im Funkgerät verwendeten Statusanzeigen und Tonsignale.

## Symbole

Die Flüssigkristallanzeige (LCD) des Funkgeräts zeigt den Funkgerätstatus, Text- und Menüeinträge an.

### Tabelle 9: Anzeigesymbole

Die folgenden Symbole werden in der Statusleiste am oberen Rand des Displays angezeigt. Die Symbole sind von links ausgehend in der Reihenfolge ihres Erscheinens oder ihrer Nutzung angeordnet und sie sind kanalspezifisch.

	<p><b>Bluetooth angeschlossen</b> Die Bluetooth-Funktion ist aktiviert. Das Symbol leuchtet konstant, wenn ein abgesetztes Bluetooth-Gerät angeschlossen ist.</p>
	<p><b>Bluetooth nicht angeschlossen</b> Die Bluetooth-Funktion ist aktiviert, es besteht aber keine Verbindung zu einem Remote-Bluetooth-Gerät.</p>
	<p><b>Anrufprotokoll</b> Rufprotokoll des Funkgeräts.</p>
	<p><b>Kontakt</b> Funkgerätkontakt verfügbar.</p>
	<p><b>Emergency</b> Das Funkgerät befindet sich im Notruf-Modus.</p>
	<p><b>Flexible Empfangen-Liste</b> Flexible Empfangen-Liste ist aktiviert.</p>

*Tabelle wird fortgesetzt...*

	<b>GNSS verfügbar</b> <sup>7</sup> Die GNSS-Funktion ist aktiviert. Das Symbol leuchtet, wenn eine Positionsfestlegung verfügbar ist.
	<b>GNSS nicht verfügbar</b> <sup>7</sup> Die GNSS-Funktion ist aktiviert, aber es werden keine Satellitendaten empfangen.
	<b>Große Datenmengen</b> Das Funkgerät empfängt große Datenmengen, und der Kanal ist belegt.
	<b>Die Funktion „Innenbereich“ ist verfügbar</b> <sup>7</sup> Der Status für die Funktion „Innenbereich“ ist eingeschaltet und verfügbar.

*Tabelle wird fortgesetzt...*

	<b>Die Funktion „Innenbereich“ ist nicht verfügbar</b> <sup>7</sup> Der Status für die Funktion „Innenbereich“ ist eingeschaltet aber aufgrund von ausgeschaltetem Bluetooth oder von einem Bakensignal-Scan, der durch Bluetooth ausgesetzt wurde, nicht verfügbar.
	<b>Nachricht</b> Eingehende Nachricht.
	<b>Monitor (Überwachung)</b> Der gewählte Kanal wird überwacht.
	<b>Stummschaltmodus</b> Stummschalt-Modus ist aktiviert und Lautsprecher ist stumm geschaltet.
	<b>Benachrichtigungen</b> Die Benachrichtigungsliste enthält ein oder mehrere verpasste Ereignisse.

*Tabelle wird fortgesetzt...*

<sup>7</sup> Nur verfügbar für Modelle mit neuester Software und Hardware.

	<p><b>Optionskarte</b> Die Zusatzkarte ist aktiviert. (Nur für Modelle, für die die Nutzung einer Zusatzkarte aktiviert ist.)</p>
	<p><b>Zusatzkarte aus</b> Die Zusatzkarte ist deaktiviert.</p>
	<p><b>Verzögerungs-Timer bei der Over-The-Air-Programmierung (OTAP)</b> Gibt die verbleibende Zeit bis zum automatischen Neustart des Funkgeräts an.</p>
	<p><b>Anzeige der Empfangssignalstärke (RSSI)</b> Die Anzahl der Balken zeigt die Signalstärke an. Vier Balken bedeuten, dass das Signal ausgezeichnet ist. Dieses Symbol wird nur während des Empfangs angezeigt.</p>

*Tabelle wird fortgesetzt...*

	<p><b>Antwortsperr</b> Antwortsperr ist aktiviert.</p>
	<p><b>Nur Rufton</b> Rufton-Modus ist aktiviert.</p>
	<p><b>Scan<sup>8</sup></b> Die Scan-Funktion ist aktiviert.</p>
	<p><b>Scan – Priorität 1<sup>8</sup></b> Das Funkgerät erfasst Aktivität auf dem Kanal/bei der Gruppe, der/die auf Priorität 1 eingestellt ist.</p>
	<p><b>Scan – Priorität 2<sup>8</sup></b> Das Funkgerät erfasst Aktivität auf dem Kanal/bei der Gruppe, der/die auf Priorität 2 eingestellt ist.</p>
	<p><b>Sicher</b> Die Verschlüsselungsfunktion ist aktiviert.</p>

*Tabelle wird fortgesetzt...*

<sup>8</sup> In Capacity Plus nicht verfügbar.

	<b>Anmelden</b> Anmeldung des Funkgeräts beim Remote-Server.
	<b>Abmelden</b> Abmeldung des Funkgeräts beim Remote-Server.
	<b>Stiller Klingelton</b> Stiller Klingelton ist aktiviert.
	<b>Standort-Roaming<sup>9</sup></b> Die Roaming-Funktion ist aktiviert.
	<b><sup>8</sup>Repeater umgehen</b> Da kein Repeater vorhanden ist, ist das Funkgerät derzeit auf direkte Funkgerät-zu-Funkgerät-Kommunikation konfiguriert.
	<b>Ton-Deaktivierung</b> Töne sind abgestellt.

*Tabelle wird fortgesetzt...*

	<b>Ungesichert</b> Die Verschlüsselungsfunktion ist deaktiviert.
	<b>Auswahlverfahren nach Signalgüte (Vote-Scan)</b> Das Auswahlverfahren nach Signalgüte (Vote-Scan) ist aktiviert.
	<b>WLAN ausgezeichnet<sup>10</sup></b> WLAN-Signal ist ausgezeichnet.
	<b>WLAN gut<sup>10</sup></b> WLAN-Signal ist gut.
	<b>WLAN durchschnittlich<sup>10</sup></b> WLAN-Signal ist durchschnittlich.
	<b>WLAN schlecht<sup>10</sup></b> WLAN-Signal ist schlecht.

*Tabelle wird fortgesetzt...*

<sup>9</sup> In Capacity Plus - Einzelstandort nicht verfügbar.

<sup>10</sup> Gilt nur für DM4601e.

**WLAN nicht verfügbar<sup>10</sup>**

WLAN-Signal ist nicht verfügbar.

**Tabelle 10: Erweiterte Menüsymbole**

Die folgenden Symbole tauchen neben Menüpunkten mit zwei Optionen oder als Anzeige dafür auf, dass es ein Untermenü mit zwei Optionen gibt.

**Kontrollkästchen (markiert)**

Zeigt an, dass die Option ausgewählt wurde.

**Kontrollkästchen (leer)**

Zeigt an, dass die Option nicht ausgewählt wurde.

**Schwarzes Kästchen**

Zeigt die für den Menüpunkt mit einem Untermenü gewählte Option an.

**Tabelle 11: Bluetooth-Symbole**

Die folgenden Symbole werden neben den Einträgen in der Liste der verfügbaren Bluetooth-fähigen Geräte angezeigt und geben den Gerätetyp an.

**Bluetooth-Audiogerät**

Bluetooth-fähiges Audiogerät wie z. B. ein Kopfhörer.

**Bluetooth-Datengerät**

Bluetooth-fähiges Datengerät wie z. B. ein Scanner.

**Bluetooth-PTT-Gerät**

Bluetooth-fähiges PTT-Gerät wie z. B. ein POD-Gerät (nur PTT/Sendetaste).

## Tabelle 12: Rufsymbole

Die folgenden Symbole werden während eines Anrufs im Display angezeigt. Diese Symbole erscheinen auch in der Kontaktliste zur Anzeige des Alias- oder ID-Typs.

	<b>Bluetooth-PC-Ruf</b>
<p>Ein Bluetooth-PC-Ruf wird gerade getätigt.</p>	
<p>In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Bluetooth-PC-Rufs hin.</p>	
	<b>Zentralruf</b>
<p>Der Kontakttyp „Zentralruf“ dient zum Senden einer Textnachricht an einen Dispatcher-PC über den Textnachrichten-Server eines Drittanbieters.</p>	
	<b>Gruppenruf/Sammelruf</b>
<p>Ein Gruppenruf oder Sammelruf wird gerade getätigt.</p>	

*Tabelle wird fortgesetzt...*

<p>In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.</p>	
	<b>Einzelruf</b>
<p>Ein Einzelruf wird gerade getätigt. In der Kontaktliste weist das Symbol auf den Aliasnamen bzw. die ID (Nummer) eines Funkgeräts hin.</p>	
	<b>Telefonruf als Gruppen-/Sammelruf</b>
<p>Ein Telefonanruf als Gruppenruf oder Sammelruf wird gerade getätigt.</p>	
<p>In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) einer Gruppe hin.</p>	
	<b>Telefonanruf als Einzelruf</b>
<p>Ein Anruf wird gerade als Einzelruf getätigt.</p>	
<p>In der Kontaktliste weist das Symbol auf den Aliasnamen (Namen) bzw. die ID (Nummer) eines Telefons hin.</p>	

### Tabelle 13: Job-Ticket-Symbole

Die folgenden Symbole werden jeweils kurz im Ordner „Jobtickets“ auf dem Display angezeigt.

	<b>Alle Jobs</b> Zeigt alle aufgelisteten Jobs an.
	<b>Neue Jobs</b> Weist auf neue Jobs hin.
	<b>Wird ausgeführt</b> Jobs werden gesendet. Dies wird vor der Anzeige von „Fehler beim Senden“ oder „Erfolgreich gesendet“ für Jobtickets angezeigt.
	<b>Fehler beim Senden</b> Jobs können nicht gesendet werden.
	<b>Erfolgreich gesendet</b> Jobs wurden erfolgreich gesendet.
	<b>Priorität 1</b> Zeigt die Prioritätsstufe 1 für Jobs an.

*Tabelle wird fortgesetzt...*

	<b>Priorität 2</b> Zeigt die Prioritätsstufe 2 für Jobs an.
	<b>Priorität 3</b> Zeigt die Prioritätsstufe 3 für Jobs an.

### Tabelle 14: Kurzhinweissymbole

Die folgenden Symbole tauchen jeweils kurz im Display auf, nachdem eine Aktion zur Durchführung einer Aufgabe ausgeführt wurde.

	<b>Übertragung erfolglos (negativ)</b> Gescheiterte Durchführung der Aktion.
	<b>Übertragung erfolgreich (positiv)</b> Erfolgreiche Durchführung der Aktion.
	<b>Übertragung läuft (Zwischenstand)</b> Beim Senden. Dies wird vor der Anzeige der erfolgreichen bzw. gescheiterten Übertragung angezeigt.

**Tabelle 15: Symbole für gesendete Objekte**

Die folgenden Symbole werden in der oberen rechten Ecke des Displays im Ordner „Ausgang“ angezeigt:

 oder 	<p><b>Wird ausgeführt</b></p> <p>Die Textnachricht an den Funkgeräte-Alias oder die ID eines Funkgeräts wurde noch nicht übertragen, da noch auf eine Quittierung gewartet wird.</p> <p>Die Textnachricht an einen Gruppen-Aliasname oder an eine Gruppen-ID wurde noch nicht übertragen.</p>
 oder 	<p><b>Einzel- oder Gruppennachricht gelesen</b></p> <p>Die Textnachricht wurde gelesen.</p>
 oder 	<p><b>Einzel- oder Gruppennachricht ungelesen</b></p> <p>Die Textnachricht wurde nicht gelesen.</p>

*Tabelle wird fortgesetzt...*

 oder 	<p><b>Fehler beim Senden</b></p> <p>Die Textnachricht kann nicht gesendet werden.</p>
 oder 	<p><b>Erfolgreich gesendet</b></p> <p>Die Nachricht wurde erfolgreich gesendet.</p>

## LED-Anzeigen

Die LED-Anzeigen zeigen den Betriebszustand/Status Ihres Funkgeräts an.

### Blinkt rot

Selbsttest beim Einschalten des Funkgeräts ist fehlgeschlagen.

Das Funkgerät empfängt einen Notruf.

Das Funkgerät sendet bei niedrigem Akkustand.

Das Funkgerät befindet sich außerhalb der Reichweite, wenn das Auto-Range Transponder-System konfiguriert wurde.

Stummschalt-Modus ist aktiviert.

### **Grünes Dauerlicht**

Das Funkgerät wird gerade eingeschaltet.

Funkgerät sendet Daten.

Das Funkgerät sendet einen Rufhinweis oder einen Notruf.

### **Blinkt grün**

Das Funkgerät empfängt einen Ruf oder Daten.

Das Funkgerät fragt Übertragungen mittels Over-the-Air Programmierung ab.

Das Funkgerät erkennt Funkaktivität.

#### **HINWEIS:**

Diese Aktivität kann sich je nach Art des digitalen Protokolls auf den programmierten Kanal des Funkgeräts auswirken.

Es liegt keine LED-Anzeige vor, wenn das Funkgerät Funkaktivität in Capacity Plus erkennt.

### **Doppeltes grünes Blinken**

Das Funkgerät empfängt einen Ruf oder Daten mit aktivierter Verschlüsselung.

### **Gelbes Dauerlicht**

Das Funkgerät überwacht einen Betriebsfunkkanal.

Das Funkgerät befindet sich im erkennbaren Bluetooth-Modus.

### **Blinkt gelb**

Das Funkgerät sucht nach Aktivität.

Das Funkgerät muss noch auf einen Rufhinweis antworten.

Auf dem Funkgerät ist die Funktion „Flexible Empfangen-Liste“ aktiviert.

Alle Capacity Plus-Multi-Site-Kanäle sind belegt.

### **Doppeltes gelbes Blinken**

Auf dem Funkgerät ist automatisches Roaming aktiviert.

Das Funkgerät sucht aktiv nach einem neuen Standort.

Das Funkgerät muss noch auf einen Gruppenruf-Hinweis antworten.

Das Funkgerät ist gesperrt.

Das Funkgerät ist im Capacity Plus-Modus nicht mit dem Repeater verbunden.

Alle Capacity Plus-Kanäle sind belegt.

## Tones

Die folgenden Symbole werden über den Lautsprecher des Funkgeräts ausgegeben.

Hoher Ton

Tiefer Ton

## Hinweistöne

Hinweistöne liefern einen akustischen Hinweis auf den Status, nachdem eine Aktion zum Durchführen einer Aufgabe ausgeführt wurde.

Positiver Hinweiston

Negativer Hinweiston

## Töne

Hinweistöne sind hörbare Anzeigen zum Funkgerätestatus oder der Reaktion des Funkgeräts auf empfangene Daten.

### Dauerton

Gleichmäßiger Ton. Wird ununterbrochen bis zum Beenden abgespielt.

### Periodischer Ton

Wird periodisch je nach der über das Funkgerät konfigurierten Tonlänge abgespielt. Der Ton beginnt, stoppt und wiederholt sich.

### Wiederholter Ton

Ein einzelner Ton, der sich wiederholt, bis der Benutzer ihn abschaltet.

### Kurzton

Ertönt einmal für eine für das Funkgerät festgelegte Dauer.

## Analoger und digitaler Betriebsfunk

Jeder Kanal Ihres Funkgeräts kann für den analogen oder digitalen Betriebsfunkmodus konfiguriert werden.

Schalten Sie mit dem **Kanalschalter** zwischen analogem und digitalem Kanal um.

Bestimmte Funktionen stehen nicht zur Verfügung, wenn Sie vom digitalen in den analogen Modus wechseln. Die Symbole für nicht verfügbare digitale Funktionen sind „ausgegraut“. Die deaktivierten Funktionen sind im Menü ausgeblendet.

Ihr Funkgerät verfügt auch über Funktionen, die sowohl analog als auch digital verfügbar sind. Die kleineren Funktionsunterschiede der jeweiligen Merkmale haben **keinen** Einfluss auf die Leistung Ihres Funkgeräts.

### HINWEIS:

Im Dual-Scan-Modus schaltet das Funkgerät ebenfalls zwischen Digital- und Analogmodus um. Weitere Informationen finden Sie unter [Scan auf Seite 437](#).

## Symbolinformationen

In dieser Veröffentlichung werden die beschriebenen Symbole verwendet, um zwischen Funktionsmerkmalen ausschließlich im analogen bzw. digitalen Betriebsfunk oder Funktionsmerkmalen zu unterscheiden, die durch ein Tastenfeldmikrofon verfügbar gemacht wurden.

Bedeutet Funktionsmerkmal **ausschließlich für analogen Betriebsfunk**.

Bedeutet Funktionsmerkmal **ausschließlich für digitalen Betriebsfunk**.

Bei Funktionsmerkmalen, die im analogen **und** im digitalen Betriebsfunk verfügbar sind, werden **beide** Symbole nicht angezeigt.

## IP Site Connect™

Mithilfe dieser Funktion kann das Funkgerät über ein IP-Netz (Internetprotokoll) Verbindung mit verschiedenen verfügbaren Stationen aufnehmen und somit seinen Betriebsfunk-Kommunikationsbereich über die Reichweite einer einzelnen Station hinaus ausdehnen. Dies ist ein Multi-Site-Betriebsfunkmodus.

Verlässt das Funkgerät den Bereich einer Station und tritt in den Bereich einer anderen ein, nimmt es mit dem Repeater der neuen Station Verbindung auf, um Rufe oder Datenübertragungen zu senden bzw. zu empfangen. Dies

erfolgt entweder automatisch oder manuell, je nach Ihren Einstellungen.

Bei der automatischen Stationssuche durchsucht das Funkgerät alle verfügbaren Stationen, wenn das Signal der aktuell verwendeten Station schwach ist oder das Funkgerät kein Signal der aktuellen Station ausfindig machen kann. Das Funkgerät wechselt dann zum Repeater mit dem höchsten RSSI-Wert (Anzeige der Empfangssignalstärke).

Bei einer manuellen Stationssuche sucht das Funkgerät nach der nächsten in Reichweite befindlichen Station der Roaming-Liste (die aber vielleicht nicht das stärkste Signal bietet) und wechselt auf den Repeater über.

**HINWEIS:**

Auf jedem Kanal kann Scan oder Roam aktiviert werden, nicht jedoch beide Funktionen gleichzeitig.

Kanäle, für die diese Funktion aktiviert ist, können einer bestimmten Roaming-Liste hinzugefügt werden. Während des automatischen Roaming-Suchlaufs durchsucht das Funkgerät die Kanäle der Roaming-Liste, um die beste Station zu finden. Eine Roaming-Liste unterstützt bis zu 16 Kanäle, einschließlich des gewählten Kanals.

**HINWEIS:**

Manuelles Hinzufügen oder Löschen von Einträgen der Roaming-Liste ist nicht möglich. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Capacity Plus-Single-Site<sup>®</sup>

Capacity Plus-Single-Site ist eine Single-Site-Bündelfunkkonfiguration des MOTOTRBO Funksystems, die mithilfe mehrerer verfügbarer Kanäle hunderte von Benutzern und bis zu 254 Gruppen unterstützt. Dadurch kann Ihr Funkgerät im Repeater-Modus die verfügbare Zahl vorprogrammierter Kanäle effizient nutzen.

Wird durch Drücken einer programmierbaren Taste eine Funktion aufgerufen, die für Capacity Plus - Einzelstandort nicht verfügbar ist, ertönt ein negativer Hinweisston.

Ihr Funkgerät verfügt auch über die Funktionen, die im Digitalmodus, im IP Site Connect-Modus und in Capacity Plus verfügbar sind. Die kleineren Funktionsunterschiede der jeweiligen Merkmale haben keinen Einfluss auf die Leistung Ihres Funkgeräts.

Weitere Informationen zu dieser Konfiguration erhalten Sie von Ihrem Systemadministrator oder Händler.

## Capacity Plus-Multi-Site

Capacity Plus-Multi-Site ist eine Mehrkanal-Bündelfunkkonfiguration des MOTOTRBO-Funksystems, die die besten Eigenschaften von Capacity Plus und IP Site Connect in sich vereint.

Mithilfe von Capacity Plus – Mehrfachstandort kann das Funkgerät über ein IP-Netz Verbindung mit verschiedenen verfügbaren Standorten aufnehmen und somit seinen Bündelfunk-Kommunikationsbereich über die Reichweite eines einzelnen Standorts hinaus ausdehnen. Indem es die insgesamt verfügbare Zahl programmierter Kanäle, die von jeder der verfügbaren Stationen unterstützt werden, effizient nutzt, steigert Linked Capacity Plus auch die Kapazität.

Verlässt das Funkgerät den Bereich einer Station und tritt in den Bereich einer anderen ein, nimmt es mit dem Repeater der neuen Station Verbindung auf, um Rufe/ Datenübertragungen zu senden bzw. zu empfangen. Je nach Funkgeräteinstellungen erfolgt dies automatisch oder manuell.

Bei der automatischen Stationsuche durchsucht das Funkgerät alle verfügbaren Stationen, wenn das Signal der aktuell verwendeten Station schwach ist oder das Funkgerät kein Signal der aktuellen Station ausfindig

machen kann. Das Funkgerät wechselt dann zum Repeater mit dem höchsten RSSI-Wert.

Bei einer manuellen Stationsuche sucht das Funkgerät nach der nächsten in Reichweite befindlichen Station der Roaming-Liste (die aber vielleicht nicht das stärkste Signal bietet) und wechselt auf diese über.

Jeder Kanal, auf dem Capacity Plus-Multi-Site aktiviert ist, kann in eine Roaming-Liste aufgenommen werden. Während des automatischen Roaming-Suchlaufs durchsucht das Funkgerät diese Kanäle, um die beste Station zu finden.

### HINWEIS:

Manuelles Hinzufügen oder Löschen von Einträgen der Roaming-Liste ist nicht möglich. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Wie auch bei Capacity Plus-Single-Site stehen im Menü keine Symbole für die Funktionen zur Verfügung, die in Capacity Plus-Multi-Standort nicht anwendbar sind. Wird durch Drücken einer programmierbaren Taste eine Funktion aufgerufen, die für Capacity Plus – Mehrfachstandort nicht verfügbar ist, ertönt ein negativer Hinweis.

## Zonen- und Kanalwahl

In diesem Kapitel wird die Vorgehensweise zum Auswählen einer Zone oder eines Kanals auf Ihrem Funkgerät beschrieben. Eine Zone ist eine Gruppe von Kanälen.

Ihr Funkgerät unterstützt bis zu 99 Kanäle und 2 Zonen mit maximal 99 Kanälen pro Zone.

Jeder Kanal kann für verschiedene Funktionen und/oder zur Unterstützung unterschiedlicher Gruppen von Benutzern programmiert werden.

### Auswählen von Zonen

Führen Sie die Vorgehensweise zum Auswählen der gewünschten Zone auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Zonenauswahl**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Zone. Drücken Sie  , um die Option auszuwählen.

Auf dem Display werden ✓ und die aktuelle Zone angezeigt.

- 3 Drücken Sie  oder  bis zur gewünschten Zone. Drücken Sie  , um die Option auszuwählen.

Das Display zeigt kurz <Zone> gewählt an und wechselt dann zum Bildschirm der gewählten Zone.

### Auswählen von Zonen mithilfe der Aliassuche

Führen Sie die Vorgehensweise zum Auswählen der gewünschten Zone mithilfe der Aliassuche auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Zone. Drücken Sie  , um die Option auszuwählen.

Auf dem Display werden  und die aktuelle Zone angezeigt.

- 3 Geben Sie den ersten Buchstaben des gewünschten Aliasnamens ein.

Im Display wird ein blinkender Cursor angezeigt.

- 4 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein.

Bei der Aliassuche muss die Groß- und Kleinschreibung nicht beachtet werden. Wenn zwei oder mehr Einträge den gleichen Namen haben, zeigt das Display den ersten Eintrag in der Liste an.

Die erste Textzeile zeigt die von Ihnen eingegebenen Zeichen an. Die nachfolgenden Textzeilen zeigen die kommenden Suchergebnisse an.

- 5 Drücken Sie  , um die Option auszuwählen.

Das Display zeigt kurz <Zone> gewählt an und wechselt dann zum Bildschirm der gewählten Zone.

---

## Auswählen von Kanälen

Führen Sie die Vorgehensweise zum Auswählen des gewünschten Kanals auf Ihrem Funkgerät durch, nachdem Sie eine Zone ausgewählt haben.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die **Auf/Ab**-Taste.
- Verwenden Sie den **Lautstärkeregler/Kanalschalter**.
- Drücken Sie die vorprogrammierte Taste **Kanal auf/ab**.

---

## Rufe

In diesem Kapitel wird erklärt, wie Rufe empfangen, beantwortet, getätigt oder abgebrochen werden.

Sie können einen Funkgerät-Alias oder eine Funkgerät-ID bzw. einen Gruppen-Alias oder eine Gruppen-ID wählen, nachdem Sie einen Kanal mithilfe einer der folgenden Funktionen ausgewählt haben:

#### **Alias-Suche**

Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

#### **Kontaktliste**

Diese Methode bietet direkten Zugriff auf die Kontaktliste.

#### **Manuell wählen (über „Kontakte“)**

Diese Methode wird für Einzelrufe und Telefonrufe nur mit einem Tastenfeldmikrofon verwendet.

#### **Programmierte Zifferntasten**

Diese Methode wird für Gruppenrufe, Einzelrufe und Sammelrufe nur mit einem Tastenfeldmikrofon verwendet.

#### **HINWEIS:**

Einer Zifferntaste kann jeweils nur ein Aliasname bzw. eine ID zugewiesen werden, Sie können aber einem Aliasnamen bzw. einer ID mehr als eine Zifferntaste zuweisen. Es können alle Zifferntasten auf einem Tastenfeldmikrofon zugewiesen werden. Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

#### **Programmierte Schnellwahltaste**

Diese Methode wird nur für Gruppen-, Einzel- und Telefonrufe verwendet.

Sie können einer **Eintastenzugang**-Taste durch kurzes oder langes Drücken einer programmierbaren Taste nur eine ID zuweisen. Am Funkgerät können mehrere **Schnellwahltasten** programmiert sein.

#### **Programmierbare Taste**

Diese Methode wird nur für Telefonrufe verwendet.

#### **Lautstärke-/Kanalwahlschalter**

Diese Methode wählt manuell einen Teilnehmer-Alias oder -ID oder einen Gruppen-Alias oder -ID aus.

Die LED leuchtet ununterbrochen grün, wenn das Funkgerät sendet, und blinkt grün, wenn das Funkgerät empfängt.

**HINWEIS:**

Während einer Übertragung leuchtet die Funkgerät-LED grün. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie doppelt grün.

Zum Entschlüsseln eines verschlüsselten Rufs muss Ihr Funkgerät denselben Privacy-Key oder denselben Schlüsselwert und dieselbe Schlüssel-ID aufweisen (von Ihrem Händler programmiert) wie das sendende Funkgerät (von dem Sie den Ruf empfangen).

Weitere Informationen finden Sie unter [Privacy auf Seite 503](#).

## Gruppenanrufe

Ihr Funkgerät muss als Teil einer Gruppe konfiguriert sein, um einen Ruf von einer Gruppe zu empfangen oder an eine Gruppe von Benutzern zu senden.

## Tätigen von Gruppenrufen

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:

- Wählen Sie einen Kanal mit dem aktiven Gruppen-Alias oder der aktiven Gruppen-ID.
- Drücken Sie die vorprogrammierte **Schnellwahltaste**.

- 
- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display werden das **Gruppenrufsymbol** und der Gruppenruf-Aliasname angezeigt.

- 
- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display werden das **Gruppenruf-Symbol**, der Gruppenalias oder die -ID und der Alias oder die ID des sendenden Funkgeräts angezeigt.

- 
- 4  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

---

## Tätigen von Gruppenrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

---

- 5 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn ein beliebiger Benutzer aus der Gruppe antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

---

- 6  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

---

## Tätigen von Gruppenrufen über die programmierbare Zifferntaste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen über die programmierbare Zifferntaste auf Ihrem Funkgerät durch.

- 1 Halten Sie die programmierbare Zifferntaste bis zum vordefinierten Aliasnamen oder zur vordefinierten ID gedrückt, wenn Sie sich auf dem Startbildschirm befinden.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweiston wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn ein beliebiger Benutzer aus der Gruppe antwortet.

- 4  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Antworten auf Gruppenrufe

Ein Gruppenruf kann nur empfangen werden, wenn Ihr Funkgerät als Mitglied dieser Gruppe konfiguriert ist.

Führen Sie die Vorgehensweise zum Antworten auf Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Gruppenruf empfangen:

- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt.
- In der zweiten Textzeile wird der Gruppen-Aliasname angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

#### 1 Führen Sie einen der folgenden Schritte aus:

-  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

-  Wenn die Sprachunterbrechungsfunktion aktiviert ist, drücken Sie die **Sendetaste (PTT)**, um den Ton des sendenden Funkgeräts zu unterbrechen und den Kanal freizumachen, damit Sie antworten können.

Die grüne LED leuchtet.

---

#### 2 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
-  Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

---

#### 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

---

Wenn das Funkgerät einen Gruppenruf empfängt, während der Startbildschirm nicht angezeigt wird, wird der aktuelle Bildschirm weiterhin angezeigt, bevor der Anruf beantwortet wird.

Halten Sie die Taste  gedrückt, um zum Startbildschirm zurückzukehren und den Anrufer-Alias anzuzeigen, bevor Sie den Anruf beantworten.

### Einzelrufe

Ein Einzelruf ist ein Anruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät.

Es gibt zwei Möglichkeiten, einen Einzelruf einzurichten. Der erste Typ baut den Ruf nach dem Durchführen einer Verfügbarkeitsprüfung auf und der zweite Typ baut den Ruf sofort auf. Ihr Händler hat nur einen dieser Typen in Ihr Funkgerät einprogrammiert.

### Tätigen von Einzelrufen

Ihr Funkgerät muss konfiguriert werden, um einen Einzelruf initiieren zu können. Wenn diese Funktion nicht aktiviert ist und Sie versuchen, einen Ruf einzuleiten, erklingt ein negativer Hinweis. Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch.

Verwenden Sie die Textnachricht- oder Rufhinweisfunktionen, um mit einem einzelnen Funkgerät Kontakt aufzunehmen. Weitere Informationen finden Sie im

Abschnitt [Textnachrichten \(SMS\) auf Seite 164](#) oder [Rufhinweise auf Seite 455](#).

- 1 Führen Sie einen der folgenden Schritte aus:
  - Wählen Sie einen Kanal mithilfe des aktiven Funkgerät-Alias oder der aktiven Funkgerät-ID.
  - Drücken Sie die vorprogrammierte **Schnellwahltaste**.

- 
- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display werden das **Einzelruf**-Symbol, der Teilnehmer-Alias und der Anrufstatus angezeigt.

- 
- 3 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
  - 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet.

- 5  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Im Display wird Ruf beendet angezeigt.

## Tätigen von Einzelrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen mithilfe der Kontaktliste durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

- 5 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

- 6 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname oder die ID des sendenden Benutzers angezeigt.

- 7  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf

diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweis ertönt. Im Display wird Ruf beendet angezeigt.

## Tätigen von Einzelrufen durch manuelles Wählen

Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen auf Ihrem Funkgerät durch manuelles Wählen durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie  , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Funkgerät-Nr.  
Drücken Sie  , um die Option auszuwählen.

- 5 Führen Sie einen der folgenden Schritte aus:
  - Geben Sie die Funkgerät-ID ein, und drücken Sie  , um fortzufahren.
  - Bearbeiten Sie die zuvor gewählte Funkgerät-ID, und drücken Sie  , um fortzufahren.

- 6 Drücken Sie zum Durchführen des Rufs die **Sendetaste** (PTT).  
Die grüne LED leuchtet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

- 7 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

- 8 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname oder die ID des sendenden Benutzers angezeigt.

---

- 9  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Im Display wird `Ruf beendet` angezeigt.

---

## Tätigen von Einzelrufen über die programmierbare Zifferntaste

Führen Sie die Vorgehensweise für das Tätigen von Einzelrufen auf Ihrem Funkgerät über die programmierbare Zifferntaste durch.

- 1 Halten Sie die programmierbare Zifferntaste bis zum vordefinierten Aliasnamen oder zur vordefinierten ID gedrückt, wenn Sie sich auf dem Startbildschirm befinden.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweiston wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

---

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display wird das **Einzelruf**-Symbol in der oberen rechten Ecke angezeigt. In der ersten Textzeile wird der Aliasname des Anrufenden angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt.

---

- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

---

- 4  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

---

Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Antworten auf Einzelrufe

Führen Sie die Vorgehensweise zum Antworten auf Einzelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Einzelruf empfangen, geschieht Folgendes:

- Die grüne LED blinkt.
  - Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.
- 1 Führen Sie einen der folgenden Schritte aus:
-  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.
  -  Wenn die Rufunterbrechungstaste aktiviert ist, drücken Sie die **Sendetaste (PTT)**, um den laufenden unterbrechbaren Ruf zu unterbrechen

und den Kanal freizumachen, damit Sie antworten können.

Die grüne LED leuchtet.

---

**2** Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

---

**3** Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

---

- Ein Hinweiston ertönt.
- Die grüne LED blinkt.
- Auf dem Display wird das Symbol **Gruppenruf** in der oberen rechten Ecke angezeigt.
- In der ersten Textzeile wird die ID des Anrufer-Alias angezeigt.
- In der zweiten Zeile wird **Rundumruf** angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

Das Funkgerät kehrt zu dem Bildschirm zurück, der vor dem Empfangen des Sammelrufs angezeigt wurde, wenn der Ruf beendet wird.

Sammelrufe werden jeweils ohne eine vorbestimmte Wartezeit beendet.

 Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun diesen Kanal verwenden können.

Auf einen Sammelruf kann nicht geantwortet werden.

## Rundumrufe

Ein Sammelruf ist ein Ruf von einem individuellen Funkgerät an alle anderen Funkgeräte auf dem Kanal. Ein Rundumruf wird für wichtige Durchsagen verwendet, die die volle Aufmerksamkeit des Benutzers erfordern. Die Benutzer auf dem Kanal können auf einen Sammelruf nicht antworten.

## Empfangen von Rundumrufen

Wenn Sie einen Rundumruf empfangen, geschieht Folgendes:

[Feedback senden](#)

## HINWEIS:

Das Funkgerät unterbricht den Empfang eines Sammelrufs, wenn Sie während des Anrufs auf einen anderen Kanal schalten. Während eines Rundumrufs können Menüs nicht durchlaufen oder bearbeitet werden, bis der Ruf endet.

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
-  Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

Benutzer auf dem Kanal können auf einen Sammelruf nicht antworten.

---

## Tätigen von Rundumrufen

Ihr Funkgerät muss konfiguriert werden, um einen Rundumruf tätigen zu können. Führen Sie die Vorgehensweise zum Tätigen von Rundumrufen auf Ihrem Funkgerät durch.

- 1 Wählen Sie einen Kanal mithilfe des aktiven Rundumruf-Gruppen-Alias oder der aktiven relevanten ID.
- 

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display werden das **Gruppenruf**-Symbol und **Sammelruf** angezeigt.

---

- 3 Führen Sie einen der folgenden Schritte aus:

## Tätigen von Rundumrufen über die programmierbare Zifferntaste

Führen Sie die Vorgehensweise zum Tätigen von Rundumrufen mithilfe der programmierbaren Zifferntaste auf Ihrem Funkgerät durch.

- 1 Halten Sie auf dem Startbildschirm die programmierbare Zifferntaste gedrückt, die dem vordefinierten Alias oder der vordefinierten ID zugewiesen wurde.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Ein negativer Hinweiston wird ausgegeben, wenn die Zifferntaste keinem Eintrag zugeordnet ist.

---

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

---

- 3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet. Auf einen Rundumruf kann im Moment nicht geantwortet werden.

---

- 4  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Das Funkgerät wechselt zu dem Bildschirm, auf dem Sie vor der Rufeinleitung waren.

Bei einem Einzelruf ertönt ein kurzer Ton, wenn der Anruf endet.

---

Weitere Informationen finden Sie unter [Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Seite 443](#).

## Selektivrufe

Ein Selektivruf ist ein Ruf von einem einzelnen Funkgerät an ein anderes einzelnes Funkgerät. In einem Analogsystem ist dies ein Einzelruf.

## Tätigen von Selektivrufen

Ihr Funkgerät muss konfiguriert werden, um einen Selektivruf initiieren zu können. Befolgen Sie die Vorgehensweise zum Tätigen von Selektivrufen auf Ihrem Funkgerät.

- 1 Wählen Sie einen Kanal mithilfe des aktiven Funkgerät-Alias oder der aktiven Funkgerät-ID.
-

- 2 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Auf dem Display werden das **Einzelruf**-Symbol, der Teilnehmer-Alias und der Anrufstatus angezeigt.

- 3 Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
-  Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

- 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED leuchtet, wenn das Zielfunkgerät antwortet.

- 5  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

- 6 Im Display wird Ruf beendet angezeigt.

## Antworten auf Selektivrufe

Führen Sie die Vorgehensweise zum Antworten auf Selektivrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Selektivruf empfangen, geschieht Folgendes:

- Die grüne LED blinkt.
- In der ersten Textzeile werden das **Einzelruf**-Symbol und das Anrufer-Alias oder Selektivruf oder Hinweis&Ruf angezeigt.
- Die Stummschaltung Ihres Funkgeräts wird aufgehoben, und der ankommende Anruf ist über den Lautsprecher zu hören.

- 1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

2 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

3 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Im Display wird Ruf beendet angezeigt.

## Telefonrufe

Ein Telefonruf ist ein Ruf von einem einzelnen Funkgerät an ein anderes Telefon.

Wenn die Telefonanrufsfunktion in Ihrem Funkgerät nicht aktiviert ist:

- Auf dem Display wird Nicht verfügbar angezeigt.
- Das Funkgerät schaltet den Ruf stumm.
- Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

Während des Telefonrufs versucht Ihr Funkgerät, den Ruf zu beenden, wenn:

- Sie die **Schnellwahl**-Taste mit dem vorkonfigurierten Schlussruf drücken.

- Sie den Schlussruf als zusätzliche Zeichen eingeben.

Während des Zugriffs auf den Kanal und der Übertragung des Zugangscode bzw. Sperrcode oder zusätzlicher Zeichen reagiert Ihr Funkgerät nur auf die Taste **An/Aus**, Taste **Lautstärke** und die **Kanalwahltasten bzw. -regler**. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

Drücken Sie während des Kanalzugriffs , um den Anrufversuch abzulehnen. Ein Hinweiston ertönt.

### HINWEIS:

Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Tätigen von Telefonrufen

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät durch.

- 1 Drücken Sie die vorprogrammierte **Schnellwahl**taste bis zum vorgegebenen Aliasnamen oder zur vorgegebenen ID.

Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweis. Wenn keine Zugangsnummer in der Kontaktliste vorkonfiguriert ist, wird `Zugangsnummer` in der ersten Zeile des Displays angezeigt:

---

- 2 Geben Sie die Zugangsnummer ein, und drücken Sie  , um fortzufahren.

Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

---

- 3 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT). Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.
- 

- 4 Geben Sie nach Aufforderung zusätzliche Ziffern mit der Tastatur ein, und drücken Sie  , um fortzufahren.

Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird,

wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

Der DTMF-Ton (Dual Tone Multi Frequency) erklingt. Das Funkgerät wechselt zum vorherigen Bildschirm.

---

- 5 Drücken Sie  zum Beenden des Gesprächs.
- 

- 6 Führen Sie einen der folgenden Schritte aus:

- Wenn der Schlussruf nicht vorkonfiguriert wurde, geben Sie die Schlussrufnummer ein, wenn auf dem Display `Schlussruf:` angezeigt wird, und

drücken Sie  , um fortzufahren.

Das Funkgerät wechselt zum vorherigen Bildschirm.

- Drücken Sie die vorprogrammierte **Schnellwahltaste**. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweis.

Der DTMF-Ton erklingt, und im Display wird `Telefonruf wird beendet` angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweis ertönt.

- Im Display wird Ruf beendet angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie die letzten zwei Schritte, oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

## Tätigen von Telefonrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät mithilfe der Kontaktliste durch.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie , um die Option auszuwählen.

Das Display zeigt die Einträge in alphabetischer Reihenfolge an.

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

Wenn Sie die **PTT**-Taste im Telefonkontakte-Bildschirm drücken:

- In der ersten Zeile des Displays wird Telefonnummer: angezeigt.
- In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt.

Wenn der ausgewählte Eintrag leer ist:

- Ein negativer Hinweis ton erklingt.
- Im Display wird die Meldung Telefonruf ungültige Nr. angezeigt.

- 4 Drücken Sie  oder  bis Tel. anrufen. Drücken Sie , um die Option auszuwählen.

Im Display wird die Meldung Zugangsnummer: angezeigt, wenn die Zugangsnummer nicht vorkonfiguriert wurde.

### 5 Geben Sie die Zugangsnummer ein, und drücken

Sie  , um fortzufahren.

Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

Die erste Textzeile zeigt **Ruft**. In der Textzeile werden der Funkgerät-Alias oder die Funkgerät-ID sowie das **Telefonruf**-Symbol angezeigt.

Wenn der Ruf erfolgreich ist:

- Der DTMF-Ton erklingt.
- Der Wählton des Telefonbenutzers erklingt.
- In der ersten Textzeile werden der Aliasname des Funkgeräts oder die Funkgerät-ID sowie das **RSSI**-Symbol angezeigt.
- In der zweiten Textzeile werden **Telefonruf** und das **Telefonanruf**-Symbol angezeigt.

Wenn der Anruf nicht erfolgreich ist:

- Ein Hinweiston ertönt.
- Im Display wird die Meldung **Telefonruf erfolglos** und dann **Zugangsnummer:** angezeigt.

- Das Funkgerät wechselt zu dem Bildschirm, der vor dem Einleiten des Rufs angezeigt wurde, wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde.

---

### 6 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

Das **RSSI**-Symbol wird nicht mehr angezeigt.

---

### 7 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

---

### 8 Geben Sie nach Aufforderung zusätzliche Ziffern mit der Tastatur ein, und drücken Sie , um fortzufahren.

Wenn der Ruf während der Eingabe der geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

Der DTMF-Ton erklingt. Das Funkgerät wechselt zum vorherigen Bildschirm.

9 Drücken Sie  zum Beenden des Gesprächs.

10 Wenn der Schlussruf nicht vorkonfiguriert wurde, geben Sie die Schlussrufnummer ein, wenn auf dem Display **Schlussruf:** angezeigt wird, und drücken

Sie , um fortzufahren.

Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird **Telefonruf wird beendet** angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird **Ruf beendet** angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm.

Wiederholen Sie [Schritt 9](#) und [Schritt 10](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet. Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweiston, und im Display wird **Zum Anrufen OK drücken** angezeigt.

Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird, und im Display wird **Telefonruf beendet** angezeigt.

Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

#### HINWEIS:

Drücken Sie während des Zugriffs auf den Kanal

, um den Anrufversuch abzubrechen; es wird dann ein Hinweiston ausgegeben.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

Während des Zugriffs auf den Kanal und der Übertragung des Zugangscodes bzw. Schlussrufs oder der zusätzlichen Zeichen reagiert Ihr Funkgerät nur auf die **An/Aus**-Taste, den **Lautstärkeregl**er und den **Kanalwahlschalter**. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

## Tätigen von Telefonrufen durch manuelles Wählen

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen auf Ihrem Funkgerät durch manuelles Wählen durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Man. Wählen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Telefonnummer. Drücken Sie  , um die Option auszuwählen.  
Auf dem Display werden Nummer: und ein blinkender Cursor angezeigt.

---

- 5 Geben Sie die Telefonnummer ein, und drücken Sie  , um fortzufahren.

Auf dem Display werden Zugangscode: und ein blinkender Cursor angezeigt, wenn der Zugangscode nicht vorkonfiguriert wurde.

- 6 Geben Sie die Zugangsnummer ein, und drücken Sie  , um fortzufahren.  
Die Zugangsnummer und der Schlussruf dürfen nicht länger als 10 Zeichen sein.

---

- 7 Die grüne LED leuchtet. Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt. In der ersten Textzeile wird der Funkgeräte-Alias angezeigt. In der zweiten Textzeile wird der Rufstatus angezeigt. Wenn der Ruf erfolgreich ist:
  - Der DTMF-Ton erklingt.
  - Der Wählton des Telefonbenutzers erklingt.
  - In der ersten Textzeile wird der Funkgeräte-Alias angezeigt.

- Auf dem Display wird weiterhin das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.

Wenn der Anruf nicht erfolgreich ist:

- Ein Hinweiston ertönt.
- Im Display wird die Meldung `Telefonruf erfolglos und dann Zugangsnummer:` angezeigt.
- Das Funkgerät wechselt zu dem Bildschirm, der vor dem Einleiten des Rufs angezeigt wurde, wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde.

---

8 Drücken Sie  zum Beenden des Gesprächs.

---

9 Führen Sie einen der folgenden Schritte aus:

- Wenn der Schlussruf nicht vorkonfiguriert wurde, geben Sie die Schlussrufnummer ein, wenn auf dem Display `Schlussruf:` angezeigt wird, und drücken Sie , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm.

- Drücken Sie die vorprogrammierte **Schnellwahltaste**. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

Der DTMF-Ton erklingt, und im Display wird `Telefonruf wird beendet` angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm.

Wiederholen Sie [Schritt 8](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

**HINWEIS:**

Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken, erklingt ein Hinweis. Zum Anrufen OK drücken angezeigt.

Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweis, und im Display wird Ruf beendet angezeigt.

Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

Drücken Sie während des Zugriffs auf den

Kanal  , um den Anrufversuch abzubrechen; es wird dann ein Hinweis ausgegeben.

Wenn Sie während des Rufs bei vorkonfiguriertem Sperrcode den **Eintastenzugang** drücken oder den Sperrcode als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Ruf zu beenden.

Während des Zugriffs auf den Kanal und der Übertragung des Zugangscode bzw.

Schlussrufs oder zusätzlicher Zeichen reagiert Ihr Funkgerät nur auf die **Ein/Aus-Taste**, den **Lautstärkeregler** und den **Kanalschalter**. Ein Hinweis erklingt bei jeder ungültigen Eingabe.

---

## Durchführen eines Gruppen-, Einzel-, Sammel- oder Telefonrufs mittels Aliasnamensuche

Führen Sie die Vorgehensweise zum Tätigen von Telefonrufen mithilfe der Aliassuche durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie  , um die Option auszuwählen.  
Das Display zeigt die Einträge in alphabetischer Reihenfolge an.
-

3 Drücken Sie  oder  bis zum gewünschten Funkgeräte-Alias oder zur gewünschten ID. In der ersten Zeile des Displays wird `Telefonnummer:` angezeigt: In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie eine Telefonnummer über die Tastatur ein.

---

4 Drücken Sie , um die Option auszuwählen. Wenn der ausgewählte Eintrag leer ist, erklingt ein negativer Hinweis, und im Display wird `Telefonruf ungültige Nr.` angezeigt.

---

5 Drücken Sie  oder  bis Tel. anrufen und anschließend Drücken Sie , um die Option auszuwählen.. Wenn keine Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays `Zugangsnummer:` angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die Zugangsnummer ein, und drücken Sie die Schaltfläche , um fortzufahren. Wenn die Schritte zum Erfolg geführt haben, ertönt der DTMF-Ton. Der Wählen des Telefonbenutzers erklingt. In der ersten Zeile des

Displays werden der Funkgeräte-Alias oder die Funkgeräte-ID sowie das RSSI-Symbol angezeigt. In der zweiten Zeile des Displays wird `Telefonruf` und das Anruf-Symbol angezeigt. Bei nicht erfolgreicher Durchführung erklingt ein Signalton, und im Display wird `Telefonruf erfolglos` angezeigt. Ihr Funkgerät wechselt zum Eingabebildschirm für die Zugangsnummer. Wenn die Zugangsnummer in der Kontaktliste vorkonfiguriert wurde, wechselt das Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

---

6 Drücken Sie die **Sendetaste** (PTT) zum Sprechen, und lassen Sie sie zum Hören wieder los. Das RSSI-Symbol wird während der Übertragung ausgeblendet.

---

7 Um zusätzliche durch den Anruf erforderlich gemachte Ziffern einzugeben, gehen Sie wie folgt vor:

- Drücken Sie eine beliebige Taste der Tastatur, um die Eingabe der zusätzlichen Ziffern zu beginnen. In der ersten Zeile des Displays wird `Zusätz. Stellen:` angezeigt: In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie die zusätzlichen Stellen

ein, und drücken Sie die Schaltfläche , um fortzufahren. Der DTMF-Ton erklingt, und das Funkgerät wechselt zum vorherigen Bildschirm.

- Drücken Sie die **Schnellwahltaste**. Der DTMF-Ton erklingt. Wenn der Eintrag für die **Schnellwahltaste** leer ist, erklingt ein negativer Hinweiston.

8

Drücken Sie  zum Beenden des Gesprächs. Wenn kein Schlussruf in der Kontaktliste vorkonfiguriert wurde, wird in der ersten Zeile des Displays **Schlussruf:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor angezeigt. Geben Sie den Schlussruf ein, und

drücken Sie , um fortzufahren. Das Funkgerät wechselt zum vorherigen Bildschirm. Der DTMF-Ton erklingt, und im Display wird **Telefonruf wird beendet** angezeigt. Bei erfolgreicher Durchführung erklingt ein Signalton, und im Display wird **Telefonruf beendet** angezeigt. Kehrt das Funkgerät zum Telefonruf-Bildschirm zurück. Bei nicht erfolgreicher Durchführung kehrt das Funkgerät zum Anruf-Bildschirm zurück. Wenn Sie die **Sendetaste** (PTT) auf dem Telefonkontakte-Bildschirm drücken,

erklingt ein Hinweiston, und im Display wird **Zum Anrufen OK drücken** angezeigt. Wenn der Telefonbenutzer den Ruf beendet, erklingt ein Hinweiston, und im Display wird **Telefonruf beendet** angezeigt. Wenn der Anruf während der Eingabe der vom Anruf geforderten zusätzlichen Zeichen beendet wird, wechselt Ihr Funkgerät zu dem Bildschirm, auf dem Sie vor dem Einleiten des Rufs waren.

**HINWEIS:**

Drücken Sie während des Zugriffs auf den Kanal

, um den Anrufversuch abzubrechen oder die Aliassuche zu beenden; es wird dann ein

Hinweiston ausgegeben. Drücken Sie  oder

, um die Aliassuche zu verlassen. Wenn Sie während des Anrufs bei vorkonfiguriertem Schlussruf die **Schnellwahltaste** drücken oder den Schlussruf als zusätzliche Zeichen eingeben, versucht Ihr Funkgerät, den Anruf zu beenden. Während des Zugriffs auf den Kanal und der Übertragung der Zugangsnummer bzw. Schlussrufs oder der zusätzlichen Zeichen reagiert Ihr Funkgerät nur auf die Ein-/Aus-Taste, den Lautstärkeregler und den Kanalschalter. Ein Hinweiston erklingt bei jeder ungültigen Eingabe.

## Dualton-Mehrfrequenzverfahren (DTMF)

Das Dualton-Mehrfrequenzverfahren (DTMF) erlaubt den Betrieb des Funkgeräts in einem Funksystem mit einer Schnittstelle zu Telefonsystemen.

Der DTMF-Ton kann durch Deaktivieren sämtlicher Funkgerät-Hinweistöne ausgeschaltet werden. Weitere Informationen finden Sie unter [Ein-/Ausschalten der Funkgerät-Hinweistöne auf Seite 220](#).

### Einleiten von DTMF-Anrufen

Gehen Sie wie folgt vor, um einen DTMF-Ruf auf Ihrem Funkgerät einzuleiten.

- 1 Halten Sie die **Sendetaste (PTT)** gedrückt.
- 
- 2 Führen Sie einen der folgenden Schritte aus:
    - Geben Sie die gewünschte Nummer zum Einleiten eines DTMF-Anrufs ein.
    - Drücken Sie  zum Einleiten eines DTMF-Anrufs.
    - Drücken Sie  zum Einleiten eines DTMF-Anrufs.
-

## Antworten auf Telefonrufe als Gruppenrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Gruppenrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Gruppenruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt den Gruppen-Alias und **Telefonruf** an.

Wenn die Telefonruffunktion in Ihrem Funkgerät nicht aktiviert ist, wird in der ersten Zeile des Displays **Nicht verfügbar** angezeigt, und das Funkgerät schaltet den Anruf stumm. Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

- 1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT). Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

- 2 Drücken Sie  zum Beenden des Gesprächs.

Im Display wird die Meldung **Ruf beendet** angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird **Ruf beendet** angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm.

Wiederholen Sie diesen Schritt, um den Anruf zu beenden, oder warten Sie, bis der Telefonbenutzer den Anruf beendet.

---

## Antworten auf Telefonrufe als Sammelrufe

Wenn Sie einen Telefonruf als Sammelruf empfangen, können Sie den Telefonruf nur beantworten oder beenden, wenn dem Kanal der Sammelruf-Typ zugewiesen ist. Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Sammelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Rundumruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt Rundumruf und Telefonruf an.

Wenn die Telefonruffunktion in Ihrem Funkgerät nicht aktiviert ist, wird in der ersten Zeile des Displays **Nicht verfügb** angezeigt, und das Funkgerät schaltet den Anruf stumm.

Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

- 1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT).

- 2 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

- 3 Drücken Sie  zum Beenden des Gesprächs.

Im Display wird die Meldung **Ruf beendet** angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Auf dem Display wird **Sammelruf und Ruf beendet** angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm. Wiederholen Sie [Schritt 3](#), oder warten Sie, bis der Telefonbenutzer den Ruf beendet.

---

## Antworten auf Telefonrufe als Einzelrufe

Führen Sie die Vorgehensweise zum Antworten auf Telefonrufe als Einzelrufe auf Ihrem Funkgerät durch.

Wenn Sie einen Telefonruf als Einzelruf empfangen, geschieht Folgendes:

- Auf dem Display wird das **Telefonruf**-Symbol in der oberen rechten Ecke angezeigt.
- Das Display zeigt den Anrufer-Alias oder **Telefonruf** an.

Wenn die Telefonruffunktion in Ihrem Funkgerät nicht aktiviert ist, wird in der ersten Zeile des Displays **Nicht verfügb** angezeigt, und das Funkgerät schaltet den Anruf

stumm. Das Funkgerät wechselt zum vorherigen Bildschirm, wenn der Anruf beendet wird.

- 1 Drücken Sie zum Beantworten des Anrufs die **Sendetaste** (PTT). Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.
- 

- 2 Drücken Sie  zum Beenden des Gesprächs.

Im Display wird die Meldung `Ruf beendet` angezeigt.

Wenn der Ruf erfolgreich beendet wurde:

- Ein Hinweiston ertönt.
- Im Display wird `Ruf beendet` angezeigt.

Wenn der Ruf nicht beendet werden kann, wechselt das Funkgerät zum Telefonruf-Bildschirm.

Wiederholen Sie diesen Schritt, um den Anruf zu beenden, oder warten Sie, bis der Telefonbenutzer den Anruf beendet.

---

## Abbrechen von Funkrufen

Mit dieser Funktion können Sie einen laufenden Gruppen- oder Einzelruf abbrechen, um den Kanal für Übertragungen

freizugeben. Beispiel: Ein Funkgerät hat ein „blockiertes Mikrofon“, da die **Sprechtaste** versehentlich vom Benutzer betätigt wurde. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein. Befolgen Sie die Vorgehensweise zum Abbrechen von Rufen auf Ihrem Funkgerät.

- 1 Drücken Sie die programmierte Taste zur **Rufunterbrechung**.

Im Display wird `Fernschlussst.` angezeigt.

---

- 2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird `Fernschlussst. erfolg.` angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird `Fernschlussst. fehlg.` angezeigt.
-

**HINWEIS:**

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Repeater umgehen

Diese Funktion ermöglicht das Fortsetzen der Kommunikation, wenn Ihr Repeater nicht funktioniert oder wenn Ihr Funkgerät sich außerhalb der Reichweite des Repeaters, aber innerhalb der Reichweite weiterer Funkgeräte befindet.

Die Einstellung zum Umgehen des Repeaters bleibt auch nach dem Ausschalten des Geräts erhalten.

**HINWEIS:**

Diese Funktion ist nicht verfügbar in Capacity Plus-Single-Site-, Capacity Plus-Multi-Site- und CB-Kanälen, die sich auf derselben Frequenz befinden.

## Umschalten zwischen Repeater umgehen und Repeater-Modi

Führen Sie die Vorgehensweise zum Umschalten zwischen Repeater umgehen und Repeater-Modi auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Repeater/Talkaround**. Überspringen Sie die folgenden Schritte.

- Drücken Sie  , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 
- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

- 
- 4 Drücken Sie  oder  bis Repeater umg.. Drücken Sie  , um die Option auszuwählen.
 

Wenn diese Option aktiviert ist, wird  neben **Aktiviert** angezeigt.

Wenn diese Option deaktiviert ist, wird  neben **Aktiviert** angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Bildschirm.

---

## Erweiterte Funktionen

In diesem Kapitel wird die Bedienung der Funktionen auf Ihrem Funkgerät beschrieben.

Ihr Händler oder Systemadministrator kann Ihr Funkgerät an Ihre speziellen Anforderungen und Bedürfnisse anpassen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

### Home-Kanalerinnerung

Diese Funktion aktiviert eine Erinnerung, wenn der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist.

Wenn diese Funktion über CPS aktiviert ist und der Home-Kanal auf dem Funkgerät für eine gewisse Zeit nicht eingestellt ist, erfolgt in regelmäßigen Abständen Folgendes:

- Der Erinnerungston und die Ansage des Home-Kanals erklingen.
- In der ersten Zeile des Displays wird **Nicht-** angezeigt.

- In der zweiten Zeile wird **Home-Kanal** angezeigt. Sie können auf die Erinnerung durch eine der folgenden Aktionen reagieren:

- Kehren Sie zum Home-Kanal zurück.
- Schalten Sie die Erinnerung über die programmierbare Taste vorübergehend stumm.
- Legen Sie einen neuen Home-Kanal über die programmierbare Taste fest.

### Stummschalten der Home-Kanalerinnerung

Wenn eine Home-Kanalerinnerung ertönt, können Sie die Erinnerung vorübergehend stummschalten.

Drücken Sie die programmierbare Taste **Home-Kanalerinnerung stummschalten**.

In der ersten Zeile des Displays wird **HCR** und in der zweiten Zeile **Stumm** angezeigt.

---

## Einrichten eines neuen Home-Kanals

Wenn eine Home-Kanalerinnerung eintritt, können Sie einen neuen Home-Kanal einrichten.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierbare Taste **Home-Kanal zurücksetzen**, um den aktuellen Kanal als neuen Home-Kanal festzulegen. Überspringen Sie die folgenden Schritte.  
In der ersten Zeile des Displays wird der Kanal-Aliasname und in der zweiten Zeile **Neuer Home-K.** angezeigt.
  - Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Dienstprogramme**. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis **Funkgeräteeinstellungen**. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis **Home-Kanal**.  
Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis zum gewünschten neuen Home-Kanal-Alias. Drücken Sie , um die Option auszuwählen.  
Das Display zeigt  neben dem ausgewählten Home-Kanal-Alias an.

## Funkmodulprüfung

Mit dieser Funktion kann festgestellt werden, ob ein anderes Funkgerät im System aktiv ist, ohne den Benutzer des Funkgeräts zu stören. Am Zielfunkgerät wird keine hörbare oder sichtbare Anzeige der Kontrolle angezeigt. Diese Funktion ist nur für Funkgeräte-Aliasnamen oder -IDs verfügbar. Ihr Funkgerät muss für die Nutzung dieser Funktion konfiguriert sein.

## Senden von Funkgerät-Checks

Führen Sie die Vorgehensweise zum Senden von Funkgerät-Checks auf Ihrem Funkgerät durch.

- 1 Drücken Sie die programmierte Taste für **Funkgerät-Check**.

- 2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie

 , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

Warten Sie auf eine Quittierung.

Beim Drücken von  , wenn das Funkgerät auf eine Bestätigung wartet, erklingt ein Ton, das Funkgerät beendet alle Einträge und beendet den Funkgerät-Check.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

Das Funkgerät wechselt wieder zum Funkgerätaliasnamen- oder -ID-Bildschirm.

## Senden von Funkgerät-Checks über manuelles Wählen

Führen Sie die Vorgehensweise zum Senden von Funkgerät-Checks über manuelles Wählen auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Man. Wählen. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Funkgerät-Nr.  
Drücken Sie  , um die Option auszuwählen.

---

5 Führen Sie einen der folgenden Schritte aus:

- Geben Sie den Funkgerät-Alias oder die ID ein, und drücken Sie  , um fortzufahren.
- Bearbeiten Sie die zuvor gewählte ID, und drücken Sie  , um fortzufahren.

---

6 Drücken Sie  oder  bis FunkgChck.  
Drücken Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

---

7 Warten Sie auf eine Quittierung.

Wenn Sie die Taste  drücken, während das Funkgerät auf eine Bestätigung wartet, erklingt ein

Ton, das Funkgerät bricht alle erneuten Versuche ab und verlässt den Funkgerät-Check-Modus.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

Das Funkgerät wechselt wieder zum Funkgerätaliasnamen- oder -ID-Bildschirm.

---

## Fernüberwachung

Diese Funktion wird verwendet, um das Mikrofon eines Zielfunkgeräts mit einem Teilnehmer-Alias oder einer -ID einzuschalten. Diese Funktion kann zur Fernüberwachung jeglicher hörbarer Aktivität rund um das Zielfunkgerät eingesetzt werden.

Es gibt zwei Arten von Fernüberwachung:

- Remote-Überwachung ohne Authentifizierung
- Remote-Überwachung mit Authentifizierung

Authentifizierte Fernüberwachung ist eine käufliche Funktion. Bei der authentifizierten Fernüberwachung ist eine Verifizierung erforderlich, wenn Ihr Funkgerät das Mikrofon eines Ziel-Funkgeräts einschaltet.

Wenn Ihr Funkgerät diese Funktion auf einem Ziel-Funkgerät mit Benutzerauthentifizierung initiiert, ist die Eingabe einer Passphrase erforderlich. Die Passphrase wird auf dem Ziel-Funkgerät über CPS vorprogrammiert.

Ihr Funkgerät und das Zielfunkgerät müssen beide für die Nutzung dieser Funktion konfiguriert sein.

Diese Funktion wird nach Ablauf einer vorprogrammierten Zeitdauer bzw. dann, wenn das Zielfunkgerät in Betrieb ist, ausgeschaltet.

## Einleiten des Fernmonitors

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät durch.

- 1 Drücken Sie die programmierte Taste **Fern-Monitor**.
- 

- 2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID.
- 

- 3 Drücken Sie  , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

 , um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.
-

#### 4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird **Fern** angezeigt. **Mon** angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Einleiten der Fernüberwachung mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät mithilfe der Kontaktliste durch.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis **Kontakt**. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis **Fernmonitor**.

5 Drücken Sie , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

, um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

## 6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.

- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Einleiten der Fernüberwachung über manuelles Wählen

Führen Sie die Vorgehensweise zum Einleiten der Fernüberwachung auf Ihrem Funkgerät über manuelles Wählen durch.

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Kontak te.

Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Man. Wählen.

Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Funkgerät-Nr.

Drücken Sie  , um die Option auszuwählen.

---

### 5 Führen Sie einen der folgenden Schritte aus:

- Geben Sie den Funkgerät-Alias oder die ID ein, und drücken Sie , um fortzufahren.
- Bearbeiten Sie die zuvor gewählte ID, und drücken Sie , um fortzufahren.

### 6 Drücken Sie oder bis Fernmonitor.

### 7 Drücken Sie , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

, um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die

Anfrage ausgeführt wird. Die grüne LED leuchtet.

- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

### 8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.
- Die Audiosignale vom überwachten Funkgerät werden für die programmierte Dauer wiedergegeben, und auf dem Display wird Fern angezeigt. Mon angezeigt. Nach Ablauf dieser Zeit ertönt ein Hinweiston, und die LED erlischt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Scan-Listen

Scan-Listen werden erstellt und individuellen Kanälen oder Gruppen zugewiesen. Das Funkgerät sucht nach Sprachaktivität, indem es die in der Scan-Liste für den aktuellen Kanal oder die aktuelle Gruppe festgelegte Kanal- oder Gruppenfolge zyklisch durchläuft.

Ihr Funkgerät unterstützt bis zu 250 Scan-Listen mit jeweils höchstens 16 Mitgliedern pro Liste.

In jede Scan-Liste können sowohl analoge als auch digitale Einträge aufgenommen werden.

Kanäle können durch Bearbeiten einer Scan-Liste hinzugefügt, unterdrückt oder nach Priorität geordnet werden.

Sie können über die Bedienfeld-Programmierung eine neue Scanliste für Ihr Funkgerät erstellen. Unter [Front-Panel-Konfiguration auf Seite 213](#) finden Sie weitere Informationen.

Das **Priorität**-Symbol wird links vom Aliasnamen des Mitglieds angezeigt (wenn eingestellt) und gibt an, ob das Mitglied auf einer Kanalliste der Priorität 1 oder der Priorität 2 ist. Mehrere Priorität-1- oder Priorität-2-Kanäle in einer Scan-Liste sind nicht möglich. Ist Priorität auf **Kein** eingestellt, wird kein **Priorität**-Symbol angezeigt.

### HINWEIS:

Diese Funktion ist nicht in Capacity Plus verfügbar.

## Anzeigen von Einträgen in der Scan-Liste

Führen Sie Vorgehensweise zum Anzeigen von Einträgen in der Scan-Liste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Scan-Liste. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  , um jeden Eintrag der Liste anzuzeigen.

---

## Anzeigen von Einträgen in der Scan-Liste mithilfe der Aliassuche

Führen Sie die Vorgehensweise zum Anzeigen von Einträgen in der Scan-Liste mithilfe der Aliassuche auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Scan-Liste. Drücken Sie , um die Option auszuwählen.

---

- 4 Geben Sie den ersten Buchstaben des gewünschten Aliasnamens ein.  
Im Display wird ein blinkender Cursor angezeigt.

---

- 5 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein.

Bei der Aliassuche muss die Groß- und Kleinschreibung nicht beachtet werden. Wenn zwei oder mehr Einträge den gleichen Namen haben, zeigt das Display den ersten Eintrag in der Liste an.

Die erste Textzeile zeigt die von Ihnen eingegebenen Zeichen an. Die nachfolgenden Textzeilen zeigen die kommenden Suchergebnisse an.

## Hinzufügen neuer Einträge zur Scan-Liste

Führen Sie die Vorgehensweise zum Hinzufügen neuer Einträge in die Scan-Liste auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Scan-Liste.  
Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Mitgl. hinzu.  
Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zur gewünschten Prioritätsstufe. Drücken Sie  , um die Option auszuwählen.

Im Display wird ein positives Kurzhinweissymbol angezeigt und dann Andere hinzu?.

---

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ja, um einen weiteren Eintrag hinzuzufügen. Drücken Sie

 , um die Option auszuwählen. Wiederholen Sie [Schritt 5](#) und [Schritt 6](#).

- Drücken Sie  oder  bis Nein, um die aktuelle Liste zu speichern. Drücken Sie  , um die Option auszuwählen.
- 

## Hinzufügen neuer Einträge zur Scan-Liste mithilfe der Aliassuche

Führen Sie die Vorgehensweise zum Hinzufügen neuer Einträge zur Scan-Liste auf Ihrem Funkgerät mithilfe der Aliassuche durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Scan. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Scan-Liste.  
Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis **Mitgl.** hinzu.  
Drücken Sie , um die Option auszuwählen.

---

5 Geben Sie den ersten Buchstaben des gewünschten Aliasnamens ein.  
Im Display wird ein blinkender Cursor angezeigt.

---

6 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein.  
Bei der Aliassuche muss die Groß- und Kleinschreibung nicht beachtet werden. Wenn zwei oder mehr Einträge den gleichen Namen haben, zeigt das Display den ersten Eintrag in der Liste an.  
Die erste Textzeile zeigt die von Ihnen eingegebenen Zeichen an. Die nachfolgenden Textzeilen zeigen die kommenden Suchergebnisse an.

---

7 Drücken Sie , um die Option auszuwählen.

---

8 Drücken Sie  oder  bis zur gewünschten Prioritätsstufe. Drücken Sie , um die Option auszuwählen.

Im Display wird ein positives Kurzhinweissymbol angezeigt und dann **Andere** hinzu?.

---

9 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis **Ja**, um einen weiteren Eintrag hinzuzufügen. Drücken Sie , um die Option auszuwählen. Wiederholen Sie Schritt [Schritt 5](#) bis Schritt [Schritt 8](#).
  - Drücken Sie  oder  bis **Nein**, um die aktuelle Liste zu speichern. Drücken Sie , um die Option auszuwählen.
- 

## Löschen von Einträgen aus der Scanliste

Gehen Sie wie folgt vor, um Scanlisteneinträge zu löschen.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Scan-Liste.  
Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.  
Im Display wird Eintrag löschen? angezeigt.

---

- 6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ja, um den Eintrag zu löschen. Drücken Sie , um die Option auszuwählen.  
Im Display wird ein positiver Kurzhinweis angezeigt.
  - Drücken Sie  oder  bis Nein, um zum vorherigen Bildschirm zurückzukehren. Drücken Sie , um die Option auszuwählen.
- 
- 7 Wiederholen Sie [Schritt 4](#) bis [Schritt 6](#) zum Löschen weiterer Einträge.

---

  - 8 Drücken Sie  lang, um zum Startbildschirm zurückzukehren, nachdem alle gewünschten Aliasnamen oder IDs gelöscht wurden.

## Einstellen der Priorität für Einträge in der Scan-Liste

Führen Sie die Vorgehensweise zum Festlegen des Prioritätsstatus von Scan-Listeneinträgen auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Scan. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Scan-Liste.  
Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Priorit.bearb.  
Drücken Sie  , um die Option auszuwählen.

---

- 6 Drücken Sie  oder  bis zur gewünschten Prioritätsstufe. Drücken Sie  , um die Option auszuwählen.  
  
Im Display wird ein positiver Kurzhinweis angezeigt, bevor wieder der vorhergehende Bildschirm angezeigt wird. Das **Priorität**-Symbol wird links neben dem Mitglieds-Alias angezeigt.

## Scan

Das Funkgerät durchsucht die vorprogrammierte Scan-Liste des aktuellen Kanals auf Sprachaktivität, wenn Sie einen Scanvorgang starten.

### HINWEIS:

Diese Funktion ist nicht in Capacity Plus verfügbar.

Während eines Dual-Mode Scans schaltet das Funkgerät, wenn Sie sich z. B. auf einem Digitalkanal befinden, automatisch auf einen Analogkanal, wenn es dort Sprachaktivität erfasst, und bleibt für die Dauer des Rufs auf dem Kanal. Umgekehrt gilt dasselbe.

Ein Scan kann auf eine von zwei Arten gestartet werden:

### Kanalsuche (Manuell)

Das Funkgerät durchsucht alle Kanäle oder Gruppen Ihrer Scan-Liste. Bei Aufnahme des Scans startet das Funkgerät, je nach Einstellungen, automatisch auf dem/der zuletzt abgefragten „aktiven“ Kanal/Gruppe oder auf dem Kanal, von dem aus der Scan eingeleitet wurde.

### Auto-Scan (Automatisch)

Das Funkgerät beginnt den Scan automatisch, wenn Sie einen Kanal oder eine Gruppe mit aktivierter Auto-Scan-Funktion auswählen.

#### HINWEIS:

Wenn Sie **Empfängergruppenliste Nachricht im Scanmodus** konfigurieren, kann Ihr Funkgerät Gruppennachrichten von Nicht-Home-Kanälen empfangen. Ihr Funkgerät kann auf nur auf Gruppennachrichten im Home-Kanal antworten. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Ein-/Ausschalten der Scan-Funktion

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Scan-Funktion Ihres Funkgeräts durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis **Scan**. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis **Scan-Zust..**  
Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum erforderlichen **Scan-Zustand**, und drücken Sie  zum Auswählen

Wenn die Scan-Funktion aktiviert ist:

- Auf dem Display werden **Scan ein** und das **Scan**-Symbol angezeigt.
- Die gelbe LED blinkt.

Wenn die Scan-Funktion deaktiviert ist:

- Auf dem Display wird **Scan aus** angezeigt.
- Das **Scan**-Symbol wird nicht mehr angezeigt.
- Die LED erlischt.

## Antworten auf Übertragungen während eines Scanvorgangs

Das Funkgerät stoppt während eines Suchlaufs auf einem Kanal oder bei einer Gruppe, sobald es Aktivität erfasst. Es bleibt während einer vorprogrammierten Zeitdauer, die „Standzeit“ genannt wird, auf diesem Kanal. Gehen Sie wie folgt vor, um Rufe während eines Scanvorgangs zu beantworten.

- 1  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie während der Standzeit die **Sendetaste (PTT)**.

Die grüne LED leuchtet.

---

- 2 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Das Funkgerät kehrt zum Suchen nach anderen Kanälen oder Gruppen zurück, wenn Sie nicht vor Ablauf der Standzeit antworten.

---

## Unterdrücken von Störkanälen

Kommen auf einem Kanal andauernd Störgeräusche oder unerwünschte Rufe vor (sog. „Störkanal“), können Sie diesen Kanal vorübergehend wie folgt aus der Scanliste entfernen. Diese Funktion kann auf den als „ausgewählten Kanal“ designierten Kanal nicht angewandt werden. Führen Sie die Vorgehensweise zum Unterdrücken von Störkanälen auf Ihrem Funkgerät durch.

- 1 Wenn sich das Funkgerät auf einem unerwünschten oder störenden Kanal befindet, drücken Sie die vorprogrammierte Taste **Störkanal unterdrücken**, bis ein Ton erklingt.
- 

- 2 Lassen Sie die vorprogrammierte Taste **Störkanal unterdrücken** los.

Der Störkanal wird unterdrückt.

---

## Wiederaufnahme von Störkanälen

Führen Sie die Vorgehensweise zur Wiederaufnahme von Störkanälen auf Ihrem Funkgerät durch.

Führen Sie einen der folgenden Schritte aus:

- Schalten Sie das Funkgerät aus und dann wieder ein.
- Stoppen und starten Sie den Scan erneut über die vorprogrammierte **Scan**-Taste oder das Menü.
- Wechseln Sie den Kanal mithilfe der Taste **Kanal auf/ab**.

---

## Auswahlverfahren nach Signalgüte (Vote-Scan)

Das Auswahlverfahren nach Signalgüte bietet in Gegenden, in denen mehrere Basisstationen identische Informationen auf verschiedenen Analogkanälen senden, eine flächendeckende Funkversorgung.

Ihr Funkgerät führt einen Suchlauf der Analogkanäle mehrerer Basisstationen durch und wählt dann das stärkste empfangene Signal aus. Sobald es das stärkste Signal ermittelt hat, empfängt das Funkgerät Übertragungen von dieser Basisstation.

Wenn ein Auswahlverfahren nach Signalgüte durchgeführt wird, blinkt die gelbe LED, und auf dem Display wird das Symbol für **Auswahlverfahren nach Signalgüte** angezeigt.

Gehen Sie ebenso wie in [Antworten auf Übertragungen während eines Scanvorgangs auf Seite 439](#) beschrieben vor, um während eines Auswahlverfahrens nach Signalgüte auf eine Übertragung zu antworten.

## Kontakteinstellungen

Über Kontakte wird Ihr Funkgerät mit einer Adressbuchfunktion ausgestattet. Jeder Eintrag entspricht einem Aliasnamen bzw. einer ID, die Sie zur Rufeinleitung verwenden. Die Einträge sind in alphabetischer Reihenfolge sortiert.

Jeder Eintrag wird je nach Kontext mit einem anderen Ruftyp assoziiert: Gruppenruf, Einzelruf, Standort-Rundumruf, PC-Ruf oder Zentralruf.

PC- und Zentralrufe sind mit Daten verbunden. Diese Ruftypen sind nur mit entsprechenden Anwendungen verfügbar. Ausführliche Informationen hierzu finden Sie in den Handbüchern der Datenanwendungen.

 Außerdem können Sie über das Kontakte-Menü jedem Eintrag eine oder mehrere programmierbare Zifferntasten an einem Tastenfeld-Mikrofon zuweisen. Wenn ein Eintrag einer Zifferntaste zugeordnet ist, können Sie von dem Eintrag aus eine Schnellwahl durchführen.

**HINWEIS:**

Vor jeder Zifferntaste, die einem Eintrag zugewiesen ist, wird eine Markierung angezeigt. Wenn sich die Markierung vor **Leer** befindet, haben Sie diesem Eintrag noch keine Zifferntaste zugewiesen.

Jeder Eintrag setzt sich aus den folgenden Feldern zusammen:

- Rufart
- Ruf-Alias
- Ruf-ID

**HINWEIS:**

Ist die Verschlüsselungsfunktion für einen Kanal aktiviert, können Sie auf diesem Kanal Gruppenrufe, Einzelrufe und Rundumrufe mit aktivierter Verschlüsselung durchführen. Ausschließlich Funkgeräte mit demselben Privacy-Key oder demselben Schlüsselwert und derselben Schlüssel-ID wie Ihr Funkgerät können die Übertragung entschlüsseln.

## Tätigen von Gruppenrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Gruppenrufen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis **Kontakte**. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**. Die grüne LED leuchtet.

---

- 5 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn ein beliebiger Benutzer aus der Gruppe antwortet. Im Display werden das **Gruppenruf**-Symbol und ein Aliasname oder eine ID und der Aliasname oder die ID des sendenden Funkgeräts angezeigt.

- 6  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt.

## Tätigen von Einzelrufen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Einzelrufen mithilfe der Kontaktliste durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.  
Die grüne LED leuchtet. Im Display wird der Aliasname des Zielfunkgeräts angezeigt.

- 5 Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.

- 6 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Die grüne LED blinkt, wenn das Zielfunkgerät antwortet. Im Display wird der Aliasname oder die ID des sendenden Benutzers angezeigt.

- 7  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

Der Anruf wird beendet, wenn es keine Sprachaktivität für einen festgelegten Zeitraum gibt. Ein Hinweiston ertönt. Im Display wird **Ruf beendet** angezeigt.

## Zuweisen von Einträgen zu programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Zuweisen von Einträgen zu programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Kontakte**.  
Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis **Progr. -Taste**.  
Drücken Sie  , um die Option auszuwählen.

- 5 Führen Sie einen der folgenden Schritte aus:
- Wenn die gewünschte Zifferntaste keinem Eintrag zugewiesen wurde, drücken Sie  oder  bis zur gewünschten Zifferntaste.  
Drücken Sie  , um die Option auszuwählen.
  - Wenn die gewünschte Zifferntaste einem Eintrag zugewiesen wurde, wird im Display **Die Taste**

ist bereits zugewiesen und dann in der ersten Textzeile **Überschreiben?** angezeigt. Führen Sie einen der folgenden Schritte aus:

Drücken Sie  oder  bis **Ja**. Drücken

Sie  , um die Option auszuwählen.

Das Funkgerät gibt einen positiven Hinweis an, und im Display wird das positive Kurzhinweissymbol **Kontakt gesichert** sowie ein positiver Kurzhinweis angezeigt.

Drücken Sie  oder  bis **Nein**, um zum vorherigen Schritt zurückzukehren.

Jeder Eintrag kann verschiedenen Zifferntasten zugewiesen werden. Vor jeder Zifferntaste, die einem Eintrag zugewiesen ist, wird ein  angezeigt. Wenn das  vor **Leer** steht, wurde die Zifferntaste nicht zugewiesen.

Wenn Sie eine Zifferntaste einem Eintrag in einer bestimmten Betriebsart zugewiesen haben, unterstützt Ihr Funkgerät diese Funktion nicht, wenn

Sie die Zifferntaste in einer anderen Betriebsart lang drücken.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

---

## Aufheben von Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten

Führen Sie die Vorgehensweise zum Aufheben der Zuordnungen zwischen Einträgen und programmierbaren Zifferntasten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Halten Sie die programmierte Zifferntaste für den gewünschten Aliasnamen oder die ID gedrückt. Lesen Sie weiter unter [Schritt 4](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis **Kontakt te**.  
Drücken Sie  , um die Option auszuwählen.
-

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Progr.-Taste. Drücken Sie  , um die Option auszuwählen.

5 Drücken Sie  oder  bis Leer. Drücken Sie  , um die Option auszuwählen.  
Die erste Textzeile zeigt AlleT. löschen an.

6 Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen.

#### HINWEIS:

Die Verbindung zwischen einem Eintrag und seiner bzw. seinen vorprogrammierten Zifferntaste(n) wird aufgehoben, wenn der Eintrag gelöscht wird.

Ein positiver Hinweiston erklingt. Im Display wird Kontakt gespeichert angezeigt.

[Feedback senden](#)

Der Bildschirm wechselt automatisch zum vorherigen Menü.

## Hinzufügen neuer Kontakte

Führen Sie die Vorgehensweise zum Hinzufügen neuer Kontakte auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Neuer Kontakt. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  zum Auswählen des Kontakttyps Funkg.-Kontakt oder Telefonkontakt. Drücken Sie  , um die Option auszuwählen.

5 Geben Sie die Nummer des Kontakts mit der Tastatur ein, und drücken Sie  , um fortzufahren.

---

6 Geben Sie den Namen des Kontakts mit der Tastatur ein, und drücken Sie  , um fortzufahren.

---

7 Drücken Sie  oder  bis zum gewünschten Ruftontyp. Drücken Sie  , um die Option auszuwählen.  
Ein positiver Hinweisston erklingt. Im Display wird ein positiver Kurzhinweis angezeigt.

---

2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis AlsVorg.einst.  
Drücken Sie  , um die Option auszuwählen.  
Ein positiver Hinweisston erklingt. Im Display wird ein positiver Kurzhinweis angezeigt. Auf dem Display wird  neben dem ausgewählten Standardalias oder der ausgewählten Standard-ID angezeigt.

---

## Standardeinstellung für Kontakte

Führen Sie die Vorgehensweise für die Standardeinstellung für Kontakte auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

## Rufanzeigeeinstellungen

Mit dieser Funktion können Funkgerätebenutzer Ruftöne für Rufe oder Textnachrichten konfigurieren.

### Aktivieren und Deaktivieren von Ruftönen für Rufhinweise

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Rufhinweise auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.

---

- 6 Drücken Sie  oder  bis Hinweistön. Drücken Sie , um die Option auszuwählen.

---

- 7 Drücken Sie  oder  bis zum gewünschten Hinweistön. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ und der ausgewählte Hinweistön angezeigt.

---

### Aktivieren und Deaktivieren von Ruftönen für Einzelrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Einzelrufe auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Ruftöne. Drücken Sie  , um die Option auszuwählen.

- 6 Drücken Sie  oder  bis Einzelruf. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben Ein angezeigt, wenn Ruftöne für Einzelrufe aktiviert wurden. Im Display wird  neben Aus angezeigt, wenn Ruftöne für Einzelrufe aktiviert wurden.

---

- 7 Drücken Sie  oder  bis zum gewünschten Hinweistön. Drücken Sie  , um die Option auszuwählen. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Aktivieren und Deaktivieren von Ruftönen für Selektivrufe

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für Selektivrufe auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ruftöne. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Selektivruf. Drücken Sie , um die Option auszuwählen. Im Display wird  und der aktuelle Hinweiston angezeigt.

---

7 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie , um die Option auszuwählen.  Im Display wird und der ausgewählte Hinweiston angezeigt.

---

## Aktivieren und Deaktivieren von Ruftönen für Textnachrichten

Führen Sie die Vorgehensweise zum Aktivieren und Deaktivieren von Ruftönen für Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ruftöne. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Textnachricht. Drücken Sie  , um die Option auszuwählen. Im Display wird  und der aktuelle Hinweiston angezeigt.

---

7 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben dem neu ausgewählten Hinweiston angezeigt.

---

## Aktivieren und Deaktivieren von Ruftönen für Telemetriestatus mit Text

Führen Sie die Vorgehensweise zum Aktivieren oder Deaktivieren von Ruftönen für den Telemetriestatus mit Text auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ruftöne. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Telemetrie. Drücken Sie  , um die Option auszuwählen. Der derzeitige Ton wird durch ein  angezeigt.

---

## Zuweisen von Ruftontypen

Sie können Ihr Funkgerät so konfigurieren, dass es einen von zehn vordefinierten Hinweistönen ausgibt, wenn es einen Rufhinweis oder eine Textnachricht von einem bestimmten Kontakt erhält. Wenn Sie die Liste der Ruftöne

durchgehen, ertönt bei jedem Eintrag jeweils der eingestellte Rufton. Führen Sie die Vorgehensweise zum Zuweisen von Ruftontypen auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen. Die Einträge sind in alphabetischer Reihenfolge sortiert.

---

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Bearbeiten. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Ruf ton bearbeiten. Drücken Sie  , um die Option auszuwählen.
- 

- 6 Drücken Sie  oder  bis zum gewünschten Hinweiston. Drücken Sie  , um die Option auszuwählen.
- ✓ A wird neben dem gewählten Hinweiston angezeigt.
- 

## Zunehmende Alarmtonlautstärke

Das Funkgerät kann so programmiert werden, dass Sie kontinuierlich erinnert werden, wenn ein Funkruf noch unbeantwortet ist. Dieser Dauerhinweis erfolgt dadurch, dass der Alarmton automatisch zunehmend lauter wird. Diese Funktion wird als Escalert bezeichnet.

## Funktionen des Rufprotokolls

Das Funkgerät führt ein Protokoll aller kürzlich durchgeführten, beantworteten und entgangenen

Einzelrufe. Das Rufprotokoll kann zur Ansicht und Verwaltung kürzlich durchgeführter Anrufe verwendet werden.

Die Rufhinweise zu entgangenen Anrufen werden in den Rufprotokollen aufgenommen; dies ist abhängig von der Systemkonfiguration Ihres Funkgeräts. In jeder Rufliste können die folgenden Funktionen durchgeführt werden:

- Aliasnamen oder IDs können in „Kontakte“ gespeichert werden
- Anruf löschen
- Alle Anrufe löschen
- Details

## Anzeigen der letzten Anrufe

Führen Sie die Vorgehensweise zum Anzeigen der letzten Rufe auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Rufprotokoll. Drücken Sie  , um die Option auszuwählen.
-

3 Drücken Sie  oder  bis zur gewünschten Liste. Zur Auswahl stehen die Listen `Verpasst`, `Beantwortet` und `Abgehend`.

Drücken Sie  , um die Option auszuwählen.

Auf dem Display wird der neueste Eintrag angezeigt.

---

4 Drücken Sie  oder  , um die Liste anzuzeigen.

Sie können einen Einzelruf mit dem Aliasnamen oder der ID auf dem Display starten, indem Sie die **PTT**-Taste drücken.

---

## Löschen von Rufen aus der Rufliste

Gehen Sie wie folgt vor, um Rufe aus der Rufliste zu löschen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie  , um die Option auszuwählen.

Wenn die Liste leer ist:

- Ein Hinweiston ertönt.
  - Auf dem Display wird `Liste leer` angezeigt.
- 

4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Eintrag löschen?. Drücken Sie  , um die Option auszuwählen.

---

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um Ja auszuwählen und den Eintrag zu löschen.  
Im Display wird Eintrag gelöscht angezeigt.
- Drücken Sie  oder  bis Nein. Drücken Sie , um die Option auszuwählen.  
Das Funkgerät wechselt zum vorherigen Bildschirm.

## Anzeigen von Ruflistendetails

Gehen Sie wie folgt vor, um die Rufdetails auf Ihrem Funkgerät anzuzeigen.

- 1 Drücken Sie , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie , um die Option auszuwählen.
- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.
- 5 Drücken Sie  oder  bis Details anzeigen. Drücken Sie , um die Option auszuwählen.  
Auf dem Display werden die Rufdetails angezeigt.

## Speichern von Aliasnamen oder IDs aus der Rufliste

Führen Sie die Vorgehensweise zum Speichern von Aliasnamen oder IDs auf Ihrem Funkgerät aus der Rufliste durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Rufprotokoll.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zur gewünschten Liste. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Speichern.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird ein blinkender Cursor angezeigt.

---

- 6 Geben Sie die übrigen Zeichen des gewünschten Aliasnamens ein. Drücken Sie  , um die Option auszuwählen.  
Eine ID kann ohne einen Aliasnamen gespeichert werden.  
Im Display wird ein positiver Kurzhinweis angezeigt.
- 

## Rufhinweise

Das Paging mit Rufhinweis erlaubt Ihnen, einen bestimmten Funkgerätbenutzer dazu aufzufordern, Sie zurückzurufen.

Diese Funktion kann nur für Aliasnamen bzw. IDs von Funkgeräten eingesetzt werden und ist über das Menü via „Kontakte“, „Manuell wählen“ oder eine vorprogrammierte **Eintastenzugang**-Taste verfügbar.

## Tätigen von Rufhinweisen

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen auf Ihrem Funkgerät aus.

- 1 Drücken Sie die vorprogrammierte **Schnellwahltaste**.

Im Display wird **Hinweiston** und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

---

- 2 Warten Sie auf eine Quittierung.

Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.

Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

---

## Tätigen von Rufhinweisen mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen mithilfe der Kontaktliste auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis **Kontakt** te.

Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie

 , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis **Hinweiston**.

Drücken Sie  , um die Option auszuwählen.

Im Display wird **Hinweiston** und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

---

- 5 Warten Sie auf eine Quittierung.

- Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.
  - Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.
-

## Tätigen von Rufhinweisen über manuelles Wählen

Führen Sie die Vorgehensweise zum Tätigen von Rufhinweisen über manuelles Wählen auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird ein blinkender Cursor angezeigt.

---

- 4 Geben Sie die Funkgeräte-ID ein und drücken Sie , um fortzufahren.

---

- 5 Drücken Sie  oder  bis Rufhinweis.

Drücken Sie , um die Option auszuwählen.

Im Display wird Hinweiston und der Aliasname oder die ID des Funkgeräts angezeigt. Die grüne LED leuchtet.

- 6 Warten Sie auf eine Quittierung.
  - Wird die Rufhinweis-Quittierung empfangen, wird im Display der positive Kurzhinweis angezeigt.
  - Wird die Rufhinweis-Quittierung nicht empfangen, wird im Display der negative Kurzhinweis angezeigt.

## Antworten auf Rufhinweise

Führen Sie die Vorgehensweise zum Antworten auf Rufhinweise auf Ihrem Funkgerät durch.

Wenn Sie einen Rufhinweis erhalten:

- Ein wiederholter Hinweiston erklingt.
- Die gelbe LED blinkt.

- Auf dem Display wird die Liste der Benachrichtigungen mit einem Rufhinweiseintrag mit dem Alias oder der ID des anrufenden Funkgeräts angezeigt.

Anhängig von der Konfiguration durch den Händler oder Systemadministrator können Sie auf einen Rufhinweis folgendermaßen reagieren:

- Drücken Sie die **Sendetaste (PTT)**, und antworten Sie dem Anrufer direkt mit einem Einzelruf.
- Drücken Sie die **Sendetaste (PTT)**, um die Gesprächsgruppenkommunikation fortzuführen. Der Rufhinweis wird in die Option „Entgangene Rufe“ im Menü „Ruf-Log“ verschoben. Sie können aus dem Verlauf der entgangenen Rufe heraus dem Anrufer antworten.

---

Weitere Informationen finden Sie unter [Benachrichtigungsliste auf Seite 210](#) und [Funktionen des Rufprotokolls auf Seite 140](#).

## Stummschaltmodus

Der Stummschalt-Modus stellt dem Benutzer eine Möglichkeit zur Verfügung, sämtliche akustischen Signale des Funkgeräts stummzuschalten.

Sobald der Stummschalt-Modus initiiert wurde, werden alle akustischen Signale stummgeschaltet, mit Ausnahme der Funktionen mit höherer Priorität wie etwa Notfall-Funktionen.

Beim Beenden des Stummschalt-Modus nimmt das Funkgerät die Wiedergabe von laufenden Tönen oder Audio-Übertragungen wieder auf.

### HINWEIS:

Dies ist eine käufliche Funktion. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Einschalten des Stummschalt-Modus

Führen Sie die Vorgehensweise zum Einschalten des Stummschalt-Modus durch.

---

Rufen Sie diese Funktion über die programmierte Taste **Stummschalt-Modus** auf.

Folgendes geschieht, wenn der Stummschalt-Modus aktiviert ist:

- Positiver Hinweisston erklingt.
- Auf dem Display wird **Stummschalt-Modus Ein** angezeigt.

- Die rote LED beginnt zu blinken und blinkt weiter, bis der Stummschalt-Modus beendet wird.
- Auf dem Display wird das Symbol **Stummschalt-Modus** auf der Startseite angezeigt.
- Das Funkgerät wird stummgeschaltet.
- Der Stummschalt-Modus-Timer beginnt mit dem Countdown der konfigurierten Dauer.

## Einstellen des Stummschalt-Modus-Timers

Der Stummschalt-Modus kann durch Einstellen des Stummschalt-Modus-Timers für eine vorkonfigurierte Dauer aktiviert werden. Die Timer-Dauer wird über das Funkgerätemenü konfiguriert und kann zwischen 0,5 und 6 Stunden betragen. Nach Ablauf des Timers wird der Stummschalt-Modus beendet.

Wenn der Timer bei 0 belassen wird, bleibt das Funkgerät unbeschränkt im Stummschalt-Modus, bis die vorprogrammierte **Stummschalt-Modus**-Taste gedrückt wird.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Timer stummschalten. Drücken Sie  , um die Option auszuwählen.

- 5 Drücken Sie  oder  zum Bearbeiten des numerischen Werts jeder Ziffer, und drücken Sie  .

## Beenden des Stummschalt-Modus

Die Funktion kann automatisch beendet werden, sobald der Stummschalt-Modus-Timer abgelaufen ist.

Führen Sie einen der folgenden Schritte aus, um den Stummschalt-Modus manuell zu beenden:

- Drücken Sie die programmierte **Stummschalt-Modus**-Taste.
- Drücken Sie die **Sendetaste (PTT)** bei einem beliebigen Eintrag.

---

Folgendes geschieht, wenn der Stummschalt-Modus deaktiviert ist:

- Negativer Hinweiston erklingt.
- Das Display zeigt `Stummschalt-Modus aus an`.
- Die blinkende rote LED schaltet sich aus.
- Das **Stummschalt-Modus**-Symbol verschwindet von der Startseite.
- Die Stummschaltung des Funkgeräts wird aufgehoben, und der Lautsprecherstatus wird wiederhergestellt.
- Wenn der Timer nicht abgelaufen ist, wird der Stummschalt-Modus-Timer gestoppt.

### HINWEIS:

Der Stummschalt-Modus wird ebenfalls beendet, wenn der Benutzer Sprache überträgt oder auf einen nicht programmierten Kanal wechselt.

## Notruf

Ein Notsignal dient dazu, auf eine kritische Situation aufmerksam zu machen. Sie können einen Notruf jederzeit absetzen, auch wenn es Aktivitäten auf dem aktuellen Kanal gibt.

Ihr Händler kann festlegen, wie lange die vorprogrammierte **Notruftaste** gedrückt werden muss, allerdings ist die Dauer für das lange Drücken die gleiche wie bei allen anderen Tasten:

### Kurzer Tastendruck

Dauer zwischen 0,05 Sekunden und 0,75 Sekunden.

### Langer Tastendruck

Dauer zwischen 1,00 und 3,75 Sekunden.

Die **Notruftaste** ist mit der Notruf-Ein/Aus-Funktion belegt. Für Informationen über die zugewiesene Funktionsweise der **Notruftaste** wenden Sie sich bitte an Ihren Händler.

### HINWEIS:

Wenn ein kurzes Drücken der **Notruftaste** den Notrufmodus startet, beendet ein langes Drücken der gleichen Taste den Notrufmodus.

Wenn ein langes Drücken der **Notruftaste** den Notrufmodus startet, beendet ein kurzes Drücken der gleichen Taste den Notrufmodus.

Ihr Funkgerät unterstützt drei Arten von Notsignalen:

- Notrufalarm
- Notsignal mit Ruf
- Notsignal mit anschließender Sprache 

#### HINWEIS:

Der vorprogrammierten **Notruftaste** bzw. dem Notruf-Fußschalter kann jeweils nur einer der oben angeführten Notrufalarmlarmer zugewiesen werden.

Darüber hinaus gibt es vier unterschiedliche Notsignaltypen:

#### Regulär

Das Funkgerät überträgt ein Alarmsignal und gibt akustische und/oder optische Hinweise aus.

#### „Silent“

Das Funkgerät überträgt ein Alarmsignal und gibt keine akustischen und/oder optischen Hinweise aus. Das Funkgerät empfängt Rufe ohne Ton über den Lautsprecher, bis die programmierte Sendedauer für das *Notrufmikrofon* abgelaufen ist und/oder bis Sie die **Sendetaste (PTT)** drücken.

#### Still mit Sprache

Das Funkgerät überträgt ein Alarmsignal ohne akustische und optische Hinweise, erlaubt aber die Ausgabe eingehender Anrufe über den Lautsprecher.

## Empfangen von Notrufsignalen

Führen Sie die Vorgehensweise zum Empfangen von Notrufsignalen auf Ihrem Funkgerät durch.

Wenn Sie ein Notrufsignal empfangen:

- Ein Hinweiston ertönt.
- Die rote LED blinkt.
- Das Display zeigt das **Notfall**-Symbol und den Anrufer-Alias des Notrufenden. Im Fall von mehreren Notrufen werden alle Anrufer-Aliasnamen der Notrufenden in der Notsignal-Liste angezeigt.

1 Führen Sie einen der folgenden Schritte aus:

- Wenn es nur einen Alarm gibt, drücken Sie , um weitere Informationen anzuzeigen.
- Wenn es mehrere Alarme gibt, drücken Sie  oder  bis zum gewünschten Aliasnamen,

und drücken Sie , um weitere Informationen anzuzeigen.

2 Drücken Sie , um die Aktionsoptionen anzuzeigen.

3 Drücken Sie , und wählen Sie **Ja**, um die Alarmliste zu verlassen.

4 Drücken Sie , um das Menü aufzurufen.

5 Wählen Sie **Alarmliste**, um die Alarmliste wieder anzuzeigen.

- 6 Der Ton ertönt, und die LED blinkt rot, bis Sie den Notruf-Modus beenden. Der Ton kann jedoch stummgeschaltet werden. Führen Sie einen der folgenden Schritte aus:
- Drücken Sie die **Sendetaste (PTT)** zum Anrufen der Funkgerätegruppe, die das Notsignal empfangen hat.
  - Drücken Sie eine beliebige programmierbare Taste.

- Verlassen Sie den Notruf-Modus. Siehe [Verlassen des Notruf-Modus nach dem Empfangen des Notrufs auf Seite 463](#).

## Antworten auf Notrufsignale

Führen Sie die Vorgehensweise zum Antworten auf Notrufsignale auf Ihrem Funkgerät durch.

- 1 Vergewissern Sie sich, dass im Display die Alarmliste angezeigt wird. Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID.
- 2  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Um der gleichen Gruppe, an die auch das Notrufsignal gerichtet war, einen normalen Sprachruf (nicht Notruf) zu senden, drücken Sie die Sendetaste (**PTT**).  
Die grüne LED leuchtet. Das Funkgerät bleibt im Notrufmodus.

- 3 Führen Sie einen der folgenden Schritte aus:
- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
  -  Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

- 4 Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Wenn das Funkgerät, das den Notruf gesendet hat, antwortet:

- Die grüne LED blinkt.
- Im Display werden das **Gruppenruf**-Symbol und die ID, die ID des übertragenden Funkgeräts und die Alarmliste angezeigt.

Notrufsprache kann nur von dem Funkgerät gesendet werden, das den Notruf einleitet. Alle anderen Funkgeräte, einschließlich des Funkgeräts, das den Notruf empfängt, senden Sprache außerhalb des Notrufbetriebs.

## Verlassen des Notruf-Modus nach dem Empfangen des Notrufs

Gehen Sie wie folgt vor, um den Notrufmodus nach dem Empfang eines Notfallalarms zu verlassen.

- Löschen Sie die Alarmobjekte.
- Schalten Sie das Funkgerät aus.

## Senden von Notrufsignalen

Mit dieser Funktion senden Sie ein Notsignal, d. h. ein Signal ohne Sprache, das einen Hinweis auf einer Gruppe von Funkgeräten auslöst. Ihr Funkgerät gibt keine akustischen oder visuellen Signale während des Notrufmodus aus, wenn es stummgeschaltet ist.

Führen Sie die Vorgehensweise zum Senden von Notrufsignalen auf Ihrem Funkgerät durch.

- 1 Drücken Sie die programmierte **Notrufeinschalttaste**.

Sie sehen eines der folgenden Ergebnisse:

- Im Display wird Tx Alarm und der Aliasname des Zielgeräts angezeigt.

-  Im Display wird Tx Telegramm und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

### HINWEIS:

Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt. Der Notsuchton kann über CPS programmiert werden.

## 2 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Der Notruftton ertönt.
- Die rote LED blinkt.
- Im Display wird Alarm gesendet angezeigt.

Bei nicht erfolgreicher Durchführung, wenn alle Versuche durchgeführt wurden:

- Ein Hinweiston ertönt.
- Das Display zeigt Alarm fehlig an.

Das Funkgerät verlässt den Notsignalmodus und kehrt zum Ausgangsbildschirm zurück.

---

## Senden von Notrufsignalen mit Ruf

Mithilfe dieser Funktion können Sie ein Notsignal mit Ruf an eine Gruppe von Funkgeräten senden. Nach erfolgter Quittierung durch ein Funkgerät in der Gruppe können die Funkgeräte der Gruppe auf einem vorprogrammierten Notrufkanal miteinander kommunizieren. Führen Sie die Vorgehensweise zum Senden von Notrufsignalen mit Ruf auf Ihrem Funkgerät durch.

- 1 Drücken Sie die vorprogrammierte **Notrufeinschalttaste oder den Fuß-Notschalter**. Auf dem Display wird Tx Alarm im Wechsel mit Ihrer Funkgerät-ID angezeigt.

Sie sehen Folgendes:

- Im Display wird Tx Telegramm und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

**HINWEIS:**

Wenn programmiert, erklingt der Notsuchton. Der Ton wird stummgeschaltet, wenn das Funkgerät Sprache sendet oder empfängt, und er stoppt, wenn das Funkgerät den Notruf-Modus verlässt. Der Notsuchton kann durch Ihren Händler oder Systemadministrator programmiert werden.

---

**2** Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Der Notruftton ertönt.
- Die rote LED blinkt.
- Im Display wird Alarm gesendet angezeigt.
- Sobald auf dem Display Notruf und die Zielgruppen-Aliasnamen angezeigt werden, wird das Funkgerät auf Notrufmodus geschaltet.

---

**3** Drücken Sie zum Durchführen des Rufs die **Sendetaste (PTT)**.

Die grüne LED leuchtet. Das Display zeigt das **Gruppenruf**-Symbol an.

---

**4** Führen Sie einen der folgenden Schritte aus:

- Warten Sie, bis der Freiton verklungen ist, und sprechen Sie deutlich in das Mikrofon.
-  Warten Sie, bis der **PTT**-Mithörton verstummt, und sprechen Sie dann deutlich in das Mikrofon.

---

**5** Lassen Sie die **PTT**-Taste los, um den Gesprächspartner zu hören.

Im Display werden der Anrufer und die Gruppen-Aliase angezeigt.

---

**6**  Ist die Funktion „Kanal frei-Anzeige“ aktiviert, hören Sie einen kurzen Hinweiston, sobald die **Sendetaste (PTT)** am sendenden Funkgerät freigegeben wird, der Ihnen mitteilt, dass Sie nun auf diesem Kanal antworten können. Drücken Sie zum Beantworten des Anrufs die **Sendetaste (PTT)**.

---

**7** Um den Notrufmodus nach dem Ruf zu verlassen, drücken Sie die Taste **Notruf aus**.

Das Funkgerät kehrt zum Startbildschirm zurück.

---

## Notsignale mit anschließender Sprache

Mit dieser Funktion senden Sie ein Notsignal mit nachfolgendem Sprachruf an eine Gruppe von Funkgeräten. Ihr Funkgerät wird automatisch aktiviert, sodass Sie ohne Drücken der Sendetaste (**PTT**) mit der Funkgerätgruppe kommunizieren können. Dieser Modus mit aktiviertem Mikrofon wird auch *Notrufmikrofon* genannt.

### HINWEIS:

Das Funkgerät kann kein Nicht-IMPRES-Mikrofon erkennen, das an den Zubehöranschluss an der Rückseite angeschlossen ist.

Wenn am angegebenen programmierten Anschluss kein Mikrofon erkannt wird, überprüft das Funkgerät den alternativen Anschluss. Hier hat das erkannte Mikrofon Priorität.

Bei aktiviertem Notrufzyklusbetrieb werden für eine einprogrammierte Dauer der *Mikrofon-Bereitschaftsmodus* und die Empfangszeit abwechselnd wiederholt. Während des Notrufzyklusbetriebs werden empfangene Rufe über den Lautsprecher ausgegeben.

Wenn Sie während der vorprogrammierten Empfangszeit die Sendetaste (**PTT**) drücken, hören Sie einen Sperrton. Dieser Ton weist Sie darauf hin, dass Sie die Sendetaste (**PTT**) freigeben müssen. Das Funkgerät reagiert nicht auf

das Drücken der Sendetaste (**PTT**) und bleibt im Notruf-Modus.

Wenn Sie die **Sendetaste (PTT)** bei aktiviertem *Hot Mic-Modus* drücken und sie bis nach Ablauf der Dauer des *Hot Mic-Modus* gedrückt halten, sendet das Funkgerät weiterhin, bis Sie die **Sendetaste (PTT)** loslassen.

Wird eine Notsignalanforderung nicht beantwortet, versucht das Funkgerät nicht noch einmal, die Anforderung zu senden, sondern ruft den *Mikrofon-Bereitschaftsmodus* direkt auf.

### HINWEIS:

Von einigen Zubehörteilen wird der *Mikrofon-Bereitschaftsmodus* möglicherweise nicht unterstützt. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Senden von Notrufsignalen mit nachfolgendem Sprachruf

Führen Sie die Vorgehensweise zum Senden von Notrufsignalen mit nachfolgendem Sprachruf auf Ihrem Funkgerät durch.

- 1 Drücken Sie die vorprogrammierte **Notrufeinschalttaste oder den Fuß-Notschalter**.

Sie sehen eines der folgenden Ergebnisse:

- Im Display wird `Tx Alarm` und der Aliasname des Zielgeräts angezeigt.
- Im Display wird `Tx Telegramm` und der Aliasname des Zielgeräts angezeigt.

Die grüne LED leuchtet. Das **Notruf**-Symbol wird angezeigt.

- 2 Sobald das Display `Alarm gesendet` anzeigt, sprechen Sie deutlich in das Mikrofon.

Das Funkgerät stoppt den Sendevorgang automatisch:

- Bei aktiviertem Notrufzyklusbetrieb endet die Dauer des Zyklus zwischen *Hot Mic* und dem Empfang von Rufen.
- Bei deaktiviertem Notrufzyklusbetrieb endet die Dauer des *Hot Mic*-Modus.

- 3 Drücken Sie zum Verlassen des Notrufmodus die **Notruf aus**-Taste.

Das Funkgerät kehrt zum Startbildschirm zurück.

## Neuinitialisierung des Notruf-Modus

Dieses Merkmal trifft nur auf das Funkgerät zu, das das Notsignal sendet. Führen Sie die Vorgehensweise zur Neuinitialisierung des Notruf-Modus auf Ihrem Funkgerät durch.

Führen Sie einen der folgenden Schritte aus:

- Wechseln Sie den Kanal, während sich das Funkgerät im Notruf-Modus befindet. Das Funkgerät verlässt den Notruf-Modus und leitet den Notruf erneut ein, wenn das Notsignal auf dem neuen Kanal aktiviert ist.

- Drücken Sie während der Initiierung/Übertragung eines Notrufs die programmierte **Notrufeinschalttaste**. Das Funkgerät verlässt den Modus und initialisiert den Notruf-Modus neu.
- 

## Verlassen des Notruf-Modus nach dem Senden des Notrufs

Dieses Merkmal trifft nur auf das Funkgerät zu, das das Notsignal sendet.

Das Gerät beendet den Notruf-Modus in folgenden Fällen:

- Es wird eine Notrufalarmquittung empfangen (gilt nur für Notsignal).
- Alle Versuche, den Alarm zu senden, wurden bereits unternommen.

### HINWEIS:

Wird das Funkgerät ausgeschaltet, verlässt es den Notruf-Modus. Wenn es wieder eingeschaltet wird, leitet es den Notruf-Modus nicht automatisch wieder ein.

Führen Sie die Vorgehensweise zum Verlassen des Notruf-Modus auf Ihrem Funkgerät durch.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Notruf Aus**.
  - Wechseln Sie den Kanal zu einem Kanal, auf dem kein Notrufsystem konfiguriert ist. Auf dem Display wird **Kein Notruf** angezeigt.
- 

## Löschen Sie ein Alarmentelement aus der Alarmliste

Befolgen Sie die Vorgehensweise, um die Alarmentelemente aus der Alarmliste zu löschen und den Notruf-Modus zu verlassen.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Alarmliste.

Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Alarmentelement. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen.

---

#### HINWEIS:

Die maximale Länge gilt nur für Modelle mit der neuesten Software und Hardware. Bei Funkgerätemodellen mit älterer Software und Hardware beträgt die maximale Länge für eine Textnachricht 140 Zeichen. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

In arabischer Sprache wird der Text von rechts nach links eingegeben.

## Textnachrichten (SMS)

Ihr Funkgerät kann von einem anderen Funkgerät oder einer Textnachricht-Anwendung Daten empfangen, beispielsweise Textnachrichten.

Es gibt zwei Arten von Textnachrichten, DMR-Kurztextnachrichten (Digital Mobile Radio) und Textnachrichten. Die maximale Länge einer DMR-Kurztextnachricht beträgt 23 Zeichen. Die maximale Länge einer Textnachricht beträgt 280 Zeichen, einschließlich der Betreffzeile. Die Betreffzeile wird nur angezeigt, wenn Sie Nachrichten von E-Mail-Anwendungen empfangen.

## Textnachrichten

Die Textnachrichten werden im Posteingang gespeichert und nach Eingang geordnet, d. h. die zuletzt eingegangene Nachricht steht an erster Stelle.

## Anzeigen von Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von Textnachrichten auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Nachrichten.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Inbox. Drücken Sie  , um die Option auszuwählen.

Wenn der Posteingang leer ist:

- Auf dem Display wird `Liste leer` angezeigt.
  - Ein Ton erklingt, wenn der Tastaturton eingeschaltet ist.
- 

4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

---

## Anzeigen von Telemetriestatus-Textnachrichten

Folgen Sie der Vorgehensweise zum Anzeigen einer Telemetriestatus-Textnachricht aus dem Posteingang.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Nachrichten.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Inbox. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.

Telemetriestatus-Textnachrichten können Sie nicht beantworten.

Das Display zeigt Telemetrie:  
<Telemetriestatus-Textnachricht>.

- 5 Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

## Antworten auf Textnachrichten

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten auf Ihrem Funkgerät durch.

Wenn Sie eine Textnachricht erhalten:

- Auf dem Display wird die Benachrichtigungsliste mit dem Alias oder der ID des Absenders angezeigt.
- Auf dem Display wird das **Nachrichten**-Symbol angezeigt.

### HINWEIS:

Wird die **Sendetaste (PTT)** gedrückt, verlässt das Funkgerät den Textnachrichten-Hinweisbildschirm und baut einen Einzel- oder Gruppenruf an den Sender der Nachricht auf.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis Lesen. Drücken Sie , um die Option auszuwählen. Das Display zeigt die Textnachricht an. Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.
  - Drücken Sie  oder  bis Später lesen. Drücken Sie , um die Option auszuwählen. Das Funkgerät kehrt zum vor Erhalt der Textnachricht angezeigten Bildschirm zurück.
  - Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.

- 2 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um zum Posteingang zurückzukehren.
- Drücken Sie erneut , um die Textnachricht zu beantworten, weiterzuleiten oder zu löschen.

## Antworten auf Textnachrichten mit Quick Text

Führen Sie die Vorgehensweise zum Antworten auf Textnachrichten mit Quick Text-Nachrichten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Fahren Sie mit Schritt [Schritt 3](#) fort.
  - Drücken Sie , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Inbox. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie , um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

- 5 Drücken Sie , um das Untermenü aufzurufen.

- 6 Drücken Sie  oder  bis Antw.. Drücken Sie , um die Option auszuwählen.

- 7 Drücken Sie  oder  bis KurzAw. Drücken Sie , um die Option auszuwählen.

- 8 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

- 9 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät kehrt zum Bildschirm **Wiederholen** zurück.

## Erneutes Senden von Textnachrichten

Führen Sie die Vorgehensweise zum erneuten Senden von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm **Wiederholen**:

Drücken Sie , um dieselbe Nachricht erneut an denselben Aliasnamen oder dieselbe ID des Funkgeräts bzw. der Gruppe zu senden.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät kehrt zum Bildschirm **Wiederholen** zurück.

## Weiterleiten von Textnachrichten

Führen Sie die Vorgehensweise zum Weiterleiten von Textnachrichten auf Ihrem Funkgerät durch.

Auf dem Bildschirm **Wiederholen:**

1 Drücken Sie  oder  bis **Weiterleiten**, und drücken Sie dann , um dieselbe Nachricht an ein anderes Funkgerät, einen anderen Gruppen-Alias oder eine andere Gruppen-ID zu senden.

2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.

- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

### HINWEIS:

Sie können die Adresse eines Zielfunkgeräts auch manuell auswählen (siehe [Weiterleiten von Textnachrichten durch manuelles Wählen auf Seite 474](#)).

## Weiterleiten von Textnachrichten durch manuelles Wählen

Führen Sie die Vorgehensweise zum Weiterleiten von Textnachrichten über manuelles Wählen auf Ihrem Funkgerät aus.

1 Drücken Sie  oder  bis **Weiterleiten**. Drücken Sie , um die Option auszuwählen.

2 Drücken Sie  , um dieselbe Nachricht an einen anderen Aliasnamen oder ID des Funkgeräts bzw. der Gruppe zu senden.

3 Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird Funkgerät-Nr. : angezeigt.

4 Geben Sie die Funkgerät-ID ein, und drücken Sie  , um fortzufahren.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

5 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Bearbeiten von Textnachrichten

Wählen Sie **Bearbeiten**, um die Nachricht zu bearbeiten.

### HINWEIS:

Wenn eine Betreffzeile vorhanden ist (bei Nachrichten aus E-Mail-Programmen), so kann diese nicht bearbeitet werden.

1 Drücken Sie  oder  bis **Bearbeiten**.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird ein blinkender Cursor angezeigt.

2 Verwenden Sie die Tastatur, um Ihre Nachricht zu bearbeiten.

- Drücken Sie  , um eine Stelle nach links zu rücken.

- Drücken Sie  oder , um sich eine Position nach rechts zu bewegen.
- Drücken Sie , um unerwünschte Zeichen zu löschen.
-  gedrückt halten, um die Texteingabemethode zu ändern.

**3** Drücken Sie , nachdem Sie die Nachricht erstellt haben.

**4** Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Senden, und drücken Sie , um die Nachricht zu senden.
- Drücken Sie  oder  bis Sichern, und drücken Sie , um die Nachricht im Entwurfsordner zu speichern.
- Drücken Sie , um die Nachricht zu bearbeiten.

- Drücken Sie  zweimal, um die Nachricht entweder zu löschen oder im Entwurfsordner zu sichern.

## Schreiben von Textnachrichten

Führen Sie die Vorgehensweise zum Schreiben von Textnachrichten auf Ihrem Funkgerät durch.

**1** Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
- Drücken Sie , um das Menü aufzurufen.

**2** Drücken Sie  oder  bis Nachrichten. Drücken Sie , um die Option auszuwählen.

**3** Drücken Sie  oder  bis Verfassen. Drücken Sie , um die Option auszuwählen. Ein blinkender Cursor wird angezeigt.

#### 4 Geben Sie Ihre Nachricht über die Tastatur ein.

Drücken Sie  um sich eine Position nach links zu bewegen.

Drücken Sie  oder , um sich eine Position nach rechts zu bewegen.

Drücken Sie , um unerwünschte Zeichen zu löschen.

 gedrückt halten, um die Texteingabemethode zu ändern.

#### 5 Drücken Sie , nachdem Sie die Nachricht erstellt haben.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um die Nachricht zu senden.
- Drücken Sie . Drücken Sie  oder , um zwischen Bearbeiten, Löschen oder Speichern der Nachricht zu wählen. Drücken Sie , um die Option auszuwählen.

## Senden von Textnachrichten

Führen Sie die Vorgehensweise zum Senden von Textnachrichten auf Ihrem Funkgerät durch.

Es wird davon ausgegangen, dass Sie über eine neu geschriebene Textnachricht oder eine gespeicherte Textnachricht verfügen.

Wählen Sie den Empfänger der Nachricht aus.  
Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie , um die Option auszuwählen.
- Drücken Sie  oder  bis Man. Wählen.  
Drücken Sie , um die Option auszuwählen. Geben Sie die Funkgeräte-ID ein. In der ersten Zeile des Displays wird **Gerätenummer:** angezeigt. In der zweiten Zeile des Displays wird ein blinkender Cursor

angezeigt. Geben Sie den Funkgeräte-Alias oder die ID ein. Drücken Sie .

Im Display wird die Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

Bei erfolgreicher Durchführung:

- Ein Hinweiston ertönt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein tiefer Hinweiston ertönt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Die Nachricht wird in den Ordner „Ausgang“ verschoben.
- Die Nachricht wird mit dem Symbol für „Fehler beim Senden“ gekennzeichnet.

#### HINWEIS:

Bei einer neu geschriebenen Textnachricht, kehrt das Funkgerät zur Option **Wiederholen** zurück.

## Löschen von Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen von Textnachrichten aus der Inbox auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis **Nachrichten**.  
Drücken Sie , um die Option auszuwählen.

- 
- 3 Drücken Sie  oder  bis **Inbox**. Drücken Sie , um die Option auszuwählen.  
Wenn der Posteingang leer ist:
    - Auf dem Display wird **Liste leer** angezeigt.
    - Ein Hinweiston ertönt.
-

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie , um die Option auszuwählen.

Auf dem Display wird eine Betreffzeile angezeigt, wenn die Nachricht von einem E-Mail-Programm stammt.

---

- 5 Drücken Sie , um das Untermenü aufzurufen.
- 

- 6 Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.
- 

- 7 Drücken Sie  oder  bis Ja. Drücken Sie , um die Option auszuwählen.
- Im Display wird ein positiver Kurzhinweis angezeigt. Anschließend wird wieder der Posteingang angezeigt.
- 

## Löschen aller Textnachrichten aus dem Posteingang

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie , um das Menü aufzurufen.

---
- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Inbox. Drücken Sie , um die Option auszuwählen.

Wenn der Posteingang leer ist:

  - Auf dem Display wird `Liste leer` angezeigt.
  - Ein Hinweiston ertönt.

---

4 Drücken Sie  oder  bis Alle löschen.  
Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen.  
Im Display wird ein positiver Kurzhinweis angezeigt.

---

## Gesendete Textnachrichten

Nachdem eine Nachricht an ein anderes Funkgerät gesendet wurde, wird sie im Ordner „Ausgang“ gespeichert. Die zuletzt gesendete Textnachricht wird jeweils an die erste Stelle des Ordners „Ausgang“ gestellt. Sie können eine gesendete Textnachricht erneut senden, bearbeiten, weiterleiten oder löschen.

Der Ordner „Ausgang“ kann bis zu 30 gesendete Nachrichten aufnehmen. Sobald der Ordner voll ist, wird die älteste Textnachricht im Ordner automatisch durch die als nächstes gesendete Textnachricht ersetzt.

Wenn Sie den Bildschirm zum Senden einer Nachricht verlassen, während die Nachricht gesendet wird, aktualisiert das Funkgerät den Status dieser Nachricht im

Ausgangsordner, ohne dies im Display oder durch Abgeben eines Hinweistons anzuzeigen.

Wechselt das Funkgerät in einen anderen Modus oder wird es ausgeschaltet, bevor der Status der Nachricht im Ordner „Ausgang“ aktualisiert wird, kann das Funkgerät die Übertragung anhängiger Nachrichten nicht abschließen und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Das Funkgerät unterstützt bis zu maximal fünf anhängige Nachrichten. Sind bereits fünf Nachrichten anhängig, d. h. noch zu senden, kann das Funkgerät keine weitere Nachricht senden und kennzeichnet diese automatisch mit dem Symbol für **Fehler beim Senden**.

Wenn Sie  zu einem beliebigen Zeitpunkt lange drücken, kehrt das Funkgerät zum Startbildschirm zurück.

### HINWEIS:

Wenn der Kanaltyp, z. B. konventioneller digitaler Kanal oder Capacity Plus-Kanal, nicht übereinstimmt, können nur gesendete Nachrichten bearbeitet, weitergeleitet oder gelöscht werden.

## Anzeigen gesendeter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gesendeten Nachrichten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Nachrichten**.  
Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis **Ausgang**. Drücken Sie  , um die Option auszuwählen.  
Der Ordner für gesendete Nachrichten ist leer:
  - Auf dem Display wird **Liste leer** angezeigt.
  - Ein tiefer Ton erklingt, wenn der Tastaturton eingeschaltet ist.

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.

Das Symbol in der oberen rechten Ecke des Bildschirms zeigt den Status der Nachricht an. Siehe [Ausgang-Symbole \(Gesendete Nachrichten\)](#).

## Senden von gesendeten Textnachrichten

Gehen Sie wie folgt vor, um eine gesendete Textnachricht auf Ihr Funkgerät zu senden.

Wenn Sie eine gesendete Nachricht anzeigen:

- 1 Drücken Sie  , während Sie die Nachricht anzeigen.
- 2 Sie können die gesendete Textnachricht entweder wiederholen oder weiterleiten. Führen Sie einen der folgenden Schritte aus:

-  zum Erneuten Senden. Drücken Sie , um die Option auszuwählen.
-  zum Weiterleiten. Drücken Sie , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

### 3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät fährt mit dem Bildschirm **Wiederholen** fort. Weitere Informationen finden

Sie unter [Erneutes Senden von Textnachrichten auf Seite 169](#).

## Löschen von gesendeten Textnachrichten aus dem Ordner „Ausgang“

Führen Sie die Vorgehensweise zum Löschen von gesendeten Textnachrichten aus dem Ordner „Ausgang“ auf Ihrem Funkgerät durch.

Wenn Sie eine gesendete Nachricht anzeigen:

- 1 Drücken Sie  .
- 2 Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.

## Löschen aller gesendeten Textnachrichten aus dem Ordner „Gesendete Elemente“

Führen Sie die Vorgehensweise zum Löschen aller gesendeten Textnachrichten aus den Ordner „Ausgang“ auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
- Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis **Nachrichten**.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis **Ausgang**. Drücken Sie  , um die Option auszuwählen.

Der Ordner für gesendete Nachrichten ist leer:

- Auf dem Display wird **Liste leer** angezeigt.
- Ein Hinweiston ertönt.

---

4 Drücken Sie  oder  bis **Alle löschen**.  
Drücken Sie  , um die Option auszuwählen.

---

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis **Ja**. Drücken Sie  , um die Option auszuwählen. Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie  oder  bis **Nein**. Drücken Sie  , um die Option auszuwählen. Das Funkgerät wechselt zum vorherigen Bildschirm.

## Gespeicherte Textnachrichten

Sie können eine Textnachricht speichern und später senden.

Wenn das Drücken der **Sendetaste (PTT)** oder ein Moduswechsel verursacht, dass das Funkgerät den Bildschirm Schreiben/Bearbeiten verlässt, während Sie eine Textnachricht schreiben bzw. bearbeiten, wird Ihre aktuelle Textnachricht automatisch im Entwürfe-Ordner gespeichert.

Die zuletzt abgespeicherte Textnachricht wird jeweils oben in der Entwürfe-Liste eingefügt.

Im Ordner „Entwürfe“ werden maximal die 10 zuletzt gespeicherten Nachrichten aufbewahrt. Wenn der Ordner voll ist, ersetzt die nächste gespeicherte Textnachricht automatisch die jeweils älteste Textnachricht im Ordner.

## Anzeigen gespeicherter Textnachrichten

Führen Sie die Vorgehensweise zum Anzeigen von gespeicherten Textnachrichten auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Nachrichten.  
Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Entwürfe.  
Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis zur gewünschten Nachricht. Drücken Sie  , um die Option auszuwählen.

## Bearbeiten gespeicherter Textnachrichten

Führen Sie die Vorgehensweise zum Bearbeiten von gespeicherten Textnachrichten auf Ihrem Funkgerät durch.

- 1 Drücken Sie beim Betrachten der Nachricht  .

- 2 Drücken Sie  oder  bis Bearbeiten.  
Drücken Sie  , um die Option auszuwählen.  
Ein blinkender Cursor wird angezeigt.

- 3 Geben Sie Ihre Nachricht über die Tastatur ein.

Drücken Sie  , um sich eine Position nach links zu bewegen.

Drücken Sie  oder  , um sich eine Position nach rechts zu bewegen.

Drücken Sie , um unerwünschte Zeichen zu löschen.

 gedrückt halten, um die Texteingabemethode zu ändern.

4 Drücken Sie , nachdem Sie die Nachricht erstellt haben.

Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Senden.

Drücken Sie , um die Nachricht zu senden.

- Drücken Sie . Drücken Sie  oder , um zwischen Speichern oder Löschen der

Nachricht zu wählen. Drücken Sie , um die Option auszuwählen.

## Löschen gespeicherter Textnachrichten aus dem Entwurfsordner

Führen Sie die Vorgehensweise zum Löschen aller Textnachrichten aus dem Posteingang auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 3](#).

- Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Nachrichten.

Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Entwürfe.

Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis zur gewünschten

Nachricht. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis Löschen. Drücken Sie  zum Löschen der Textnachricht.
- 

## Quick Text-Nachrichten

Ihr Funkgerät unterstützt je nach Programmierung durch Ihren Händler maximal 50 Quick Text-Nachrichten.

Quick Text-Nachrichten sind zwar vorgegeben, Sie können jedoch jede Nachricht bearbeiten, bevor Sie sie senden.

## Senden von Quick Text-Nachrichten

Führen Sie die Vorgehensweise zum Senden von vordefinierten Quick Text-Nachrichten auf Ihrem Funkgerät an einen vordefinierten Aliasnamen durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Textnachricht**. Lesen Sie weiter unter [Schritt 6](#).
  - Drücken Sie die vorprogrammierte **Schnellwahltaste**.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

Lesen Sie weiter unter [Schritt 6](#).

- Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Nachrichten. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Quick Text. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis zur gewünschten Quick Text-Nachricht. Drücken Sie  , um die Option auszuwählen.
- 

- 5 Gehen Sie folgendermaßen vor, um den Empfänger auszuwählen und die Nachricht zu senden.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass Ihre Nachricht gesendet wird.

## 6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.
- Das Funkgerät fährt mit dem Bildschirm **Wiederholen fort**. Weitere Informationen finden Sie unter [Erneutes Senden von Textnachrichten auf Seite 169](#).

Sie können die folgenden Einstellungen für die Eingabe von Text auf Ihrem Funkgerät konfigurieren:

- Worterkennung
- Wortüberprüfung
- Großschreibung am Satzanfang
- Meine Wörter

Ihr Gerät unterstützt die folgenden Texteingabemethoden:

- Zahlen
- Symbole
- Texterkennung oder Multi-Tap
- Sprache (wenn programmiert)

### HINWEIS:

Sie können jederzeit  drücken, um zum vorhergehenden Bildschirm zu wechseln, oder  lang drücken, um zum Ausgangsbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

## Konfiguration der Texteingabe

Ihr Funkgerät ermöglicht Ihnen die Konfiguration verschiedener Texte.

## Aktivieren oder Deaktivieren der Wortüberprüfung

Bietet eine Auswahl alternativer Wörter an, wenn das in den Texteditor eingegebene Wort vom integrierten Wörterbuch nicht erkannt wird.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Texteingabe. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Korrektes Wort. Drücken Sie , um die Option auszuwählen.

---

- 6 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis Korrektes Wort. Drücken Sie , um die Option auszuwählen.
  - Drücken Sie , um die Wortüberprüfung zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Drücken Sie , um die Wortüberprüfung zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Aktivieren oder Deaktivieren der Worterkennung

**Worterkennung:** Ihr Funkgerät kann Folgen gebräuchlicher Wörter, die Sie oft eingeben, lernen. Nachdem Sie das erste Wort einer gebräuchlichen Wortfolge in den Texteditor eingegeben haben, schlägt es

dann das nächste Wort vor, das Sie möglicherweise verwenden möchten.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Texteingabe. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Worterkennung. Drücken Sie  , um die Option auszuwählen.

---

- 6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um die Worterkennung zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Drücken Sie  , um die dynamische Mikrofonverzerrungssteuerung zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Großschreibung am Satzanfang

Diese Funktion aktiviert automatisch die Großschreibung für den ersten Buchstaben des ersten Worts in jedem neuen Satz.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Texteingabe. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Satzanf.groß. Drücken Sie  , um die Option auszuwählen.

---

6 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  , um Großschreibung am Satzanfang zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Drücken Sie  , um Großschreibung am Satzanfang zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Anzeigen benutzerdefinierter Wörter

Hier können Sie Ihre eigenen benutzerdefinierten Wörter im integrierten Wörterbuch des Funkgeräts hinzufügen. Das Funkgerät verwaltet eine Liste, die diese Wörter enthält.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Texteingabe. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Meine Wörter.  
Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Wortliste.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird die Liste der benutzerdefinierten Wörter angezeigt.

---

## Bearbeiten der benutzerdefinierten Wörter

Sie können die in Ihrem Funkgerät gespeicherten benutzerdefinierten Wörter bearbeiten.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme.Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen.Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Texteingabe.  
Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Meine Wörter.  
Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis Wortliste.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird die Liste der benutzerdefinierten Wörter angezeigt.

---

7 Drücken Sie  oder  bis zum gewünschten Wort. Drücken Sie  , um die Option auszuwählen.

---

- 8 Drücken Sie  oder  bis **Bearbeiten**.  
Drücken Sie , um die Option auszuwählen.

- 9 Bearbeiten Sie über das Tastenfeld das benutzerdefinierte Wort.
- Drücken Sie , um sich eine Position nach links zu bewegen.
  - Drücken Sie die Taste , um eine Stelle nach rechts zu rücken.
  - Zum Löschen unerwünschter Zeichen drücken Sie .
  -  gedrückt halten, um die Texteingabemethode zu ändern.

- 10 Drücken Sie , sobald Ihr benutzerdefiniertes Wort komplett ist.

Im Display wird der Kurzhinweis für den Übergangszustand angezeigt, der angibt, dass Ihr benutzerdefiniertes Wort gespeichert wird.

- Wenn das benutzerdefinierte Wort gespeichert wurde, erklingt ein Signalton, und im Display wird der positive Kurzhinweis angezeigt.
- Wenn das benutzerdefinierte Wort nicht gespeichert wurde, erklingt ein tiefer Hinweisston, und im Display wird der negative Kurzhinweis angezeigt.

## Hinzufügen benutzerdefinierter Wörter

Sie können benutzerdefinierte Wörter im integrierten Funkgerätewörterbuch hinterlegen.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis **Dienstprogramme**. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis **Funkgeräteeinstellungen**. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis **Texteingabe**.  
Drücken Sie  , um die Option auszuwählen.

5 Drücken Sie  oder  bis **Meine Wörter**.  
Drücken Sie  , um die Option auszuwählen.

6 Drücken Sie  oder  bis **Neues Wort**.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird die Liste der benutzerdefinierten Wörter angezeigt.

7 Bearbeiten Sie über das Tastenfeld das benutzerdefinierte Wort.

- Drücken Sie  , um sich eine Position nach links zu bewegen.
- Drücken Sie die Taste  , um eine Stelle nach rechts zu rücken.
- Zum Löschen unerwünschter Zeichen drücken Sie  .

[Feedback senden](#)

-  gedrückt halten, um die Texteingabemethode zu ändern.

8 Drücken Sie  , sobald Ihr benutzerdefiniertes Wort komplett ist.

Im Display wird der Kurzhinweis für den Übergangszustand angezeigt, der angibt, dass Ihr benutzerdefiniertes Wort gespeichert wird.

- Wenn das benutzerdefinierte Wort gespeichert wurde, erklingt ein Hinweisston, und im Display wird der positive Kurzhinweis angezeigt.
- Wenn das benutzerdefinierte Wort nicht gespeichert wurde, erklingt ein tiefer Hinweisston, und im Display wird der negative Kurzhinweis angezeigt.

## Löschen eines benutzerdefinierten Wortes

Sie können die in Ihrem Funkgerät gespeicherten benutzerdefinierten Wörter löschen, indem Sie Folgendes ausführen.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Texteingabe. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Meine Wörter. Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zum gewünschten Wort. Drücken Sie , um die Option auszuwählen.

---

7 Drücken Sie  oder  bis Löschen. Drücken Sie , um die Option auszuwählen.

---

8 Wählen Sie eine der folgenden Optionen aus.

- Drücken Sie unter Eintrag löschen? , um Ja auszuwählen. Im Display wird Eintrag gelöscht angezeigt.
  - Drücken Sie  oder  bis Nein. Drücken Sie , um zum vorangehenden Bildschirm zurückzukehren.
- 

## Löschen aller benutzerdefinierter Wörter

Führen Sie die Vorgehensweise zum Löschen aller benutzerdefinierter Wörter aus dem integrierten Wörterbuch Ihres Funkgeräts durch.

1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.
- 
- 4 Drücken Sie  oder  bis Texteingabe. Drücken Sie , um die Option auszuwählen.
- 
- 5 Drücken Sie  oder  bis Meine Wörter. Drücken Sie , um die Option auszuwählen.
- 
- 6 Drücken Sie  oder  bis Alle löschen. Drücken Sie , um die Option auszuwählen.
- 
- 7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie unter Eintrag löschen? , um Ja auszuwählen. Im Display wird Alle Einträge gelöscht angezeigt.
- Drücken Sie  oder  bis Nein, um zum vorherigen Bildschirm zurückzukehren. Drücken Sie , um die Option auszuwählen.

## Job Tickets

Diese Funktion ermöglicht Ihrem Funkgerät den Empfang von Meldungen vom Dispatcher, in denen auszuführende Aufgaben aufgelistet sind.

### HINWEIS:

Diese Funktion kann individuell über CPS gemäß den Anforderungen des Benutzers angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Es gibt zwei Ordner mit verschiedenen Jobtickets:

### Ordner Meine Aufgaben

Personalisierter Jobtickets, die der angemeldeten Benutzer-ID zugewiesen wurden.

## Ordner Gemeinsame Aufgaben

Freigegebene Jobtickets, die einer Gruppe zugewiesen wurden.

Sie können auf Job Tickets antworten und diese in den Job Ticket-Ordner einsortieren. Standardmäßig gibt es die Ordner **Alle**, **Neu**, **Gestartet** und **Abgeschlossen**. Es können 10 zusätzliche Ordner eingerichtet werden. Sprechen Sie zu diesem Zweck mit Ihrem Händler oder Systemadministrator.

### HINWEIS:

Die Jobtickets bleiben auch nach Ausschalten des Funkgeräts erhalten.

Alle Jobtickets befinden sich im Ordner **Alle**. Je nachdem, wie Ihr Funkgerät programmiert ist, sind Jobtickets nach ihrer Priorität gefolgt vom Empfangszeitpunkt sortiert. Neue Jobtickets, Jobtickets mit kürzlichen Statusänderungen und Jobtickets mit der höchsten Priorität werden zuerst aufgeführt. Nach Erreichen der maximalen Anzahl an Job Tickets ersetzt das nächste Job Ticket automatisch das letzte in Ihrem Gerät aufgeführte Job Ticket. Ihr Funkgerät unterstützt maximal 100 oder 500 Jobtickets, je nach Funkgerätmodell. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator. Ihr Funkgerät erkennt automatisch duplizierte Jobtickets mit der gleichen Jobticket-ID und löscht diese.

Der Verteiler weist Jobtickets je nach ihrer Wichtigkeit eine Prioritätsstufe zu. Es sind drei Prioritätsstufen verfügbar: Priorität 1, Priorität 2 und Priorität 3. Priorität 1 ist die höchste Prioritätsstufe, und Priorität 3 ist die niedrigste Prioritätsstufe. Es gibt auch Jobtickets ohne Priorität.

Ihr Funkgerät wird dementsprechend aktualisiert, wenn der Dispatcher folgende Änderungen vornimmt:

- Ändern des Inhalts von Jobtickets
- Hinzufügen oder Bearbeiten der Prioritätsstufe des Jobtickets
- Verschieben von Jobtickets in einen anderen Ordner
- Abbrechen des Jobtickets

## Zugriff auf den Job Ticket-Ordner

Befolgen Sie die Anweisungen für den Zugriff auf den Jobticket-Ordner.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Job Ticket**. Lesen Sie weiter unter [Schritt 3](#).
  - Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Job Tickets.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

---

## An- und Abmelden beim Remote-Server

Mit dieser Funktion können Sie sich mit Ihrer Benutzer-ID beim Remoteserver an- und abmelden.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Anmelden.  
Drücken Sie  , um die Option auszuwählen.

Wenn Sie bereits angemeldet sind, zeigt das Menü Abmelden an.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

---

3 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
-

## Erstellen von Jobtickets

Ihr Funkgerät kann Jobtickets erstellen, die auf Arbeitsscheinvorlagen basieren und Ihnen ermöglichen, auszuführende Aufgaben zu versenden.

Für die Konfiguration der Arbeitsscheinvorlage wird die CPS-Programmiersoftware benötigt.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Jobtickets.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Ticket erstellen. Drücken Sie  , um die Option auszuwählen.

---

## Reagieren auf Job Tickets

Gehen Sie wie folgt vor, um auf Jobtickets auf Ihrem Funkgerät zu antworten.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Jobtickets.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie erneut  , um das Untermenü aufzurufen.  
Sie können auch die entsprechende Zahlentaste (1-9) drücken, um eine **Kurzantwort** zu senden.

---

6 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

---

7 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Senden von Job Tickets mithilfe einer Job-Ticket-Vorlage

Wenn Ihr Funkgerät mit einer Jobticket-Vorlage konfiguriert ist, führen Sie folgende Maßnahmen aus, um das Jobticket zu senden.

1 Verwenden Sie die Tastatur, um die erforderliche Raumnummer einzugeben. Drücken Sie  , um die Option auszuwählen.

---

2 Drücken Sie  oder  bis Raumstatus. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zur gewünschten Option. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis **Senden**. Drücken

Sie  , um die Option auszuwählen.

Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

---

5 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Senden von Job Tickets mithilfe mehrerer Job-Ticket-Vorlagen

Wenn Ihr Funkgerät mit mehr als einer Jobticket-Vorlage konfiguriert ist, führen Sie folgende Maßnahmen aus, um die Jobtickets zu senden.

1 Drücken Sie  oder  bis zur gewünschten Option. Drücken Sie  , um die Option auszuwählen.

---

2 Drücken Sie  oder  bis **Senden**. Drücken Sie  , um die Option auszuwählen.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

---

3 Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweis erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Löschen von Job Tickets

Führen Sie die Vorgehensweise zum Löschen von Job Tickets auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Job Ticket**. Lesen Sie weiter unter [Schritt 4](#)
  - Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Jobtickets. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis zum gewünschten Ordner. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis zum Ordner **Alle**. Drücken Sie  , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis zum gewünschten Jobticket. Drücken Sie  , um die Option auszuwählen.

- 6 Drücken Sie erneut  , während das Job Ticket angezeigt wird.

- 7 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen.  
Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird.

## 8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Löschen aller Jobtickets

Gehen Sie wie folgt vor, um Jobtickets auf Ihrem Funkgerät zu löschen.

### 1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Job Ticket**. Lesen Sie weiter unter [Schritt 3](#).
- Drücken Sie  , um das Menü aufzurufen.

- ### 2 Drücken Sie oder bis Jobtickets. Drücken Sie , um die Option auszuwählen.
- 

- ### 3 Drücken Sie oder bis zum gewünschten Ordner. Drücken Sie , um die Option auszuwählen.
- 

- ### 4 Drücken Sie oder bis zum Ordner Alle. Drücken Sie , um die Option auszuwählen.
- 

- ### 5 Drücken Sie oder bis Alle löschen. Drücken Sie , um die Option auszuwählen.
- 

- ### 6 Führen Sie einen der folgenden Schritte aus:
- Drücken Sie  oder  bis Ja. Drücken Sie  , um die Option auszuwählen. Im Display wird ein positiver Kurzhinweis angezeigt.

- Drücken Sie  oder  bis Nein. Drücken

Sie , um die Option auszuwählen.  
Das Funkgerät wechselt zum vorherigen Bildschirm.

- Einfache Verschlüsselung
- Verbesserter Scrambler

Zum Entschlüsseln eines verschlüsselten Rufs bzw. einer Datenübertragung muss Ihr Funkgerät mit demselben Verschlüsselungsschlüssel (für einfache Verschlüsselung) oder demselben Schlüsselwert und derselben Schlüssel-ID (für erweiterte Verschlüsselung) programmiert sein wie das sendende Funkgerät.

Wenn Sie einen verschlüsselten Ruf eines Funkgeräts mit einem anderen Verschlüsselungsschlüssel oder einem anderen Schlüsselwert und einer anderen Schlüssel-ID erhalten, hören Sie entweder eine entstellte Übertragung (einfache Verschlüsselung) oder gar nichts (erweiterte Verschlüsselung).

Je nachdem, wie Ihr Funkgerät programmiert wurde, können Funkgeräte auf einem Kanal mit aktivierter Verschlüsselung weiterhin normale (unverschlüsselte) Übertragungen empfangen. Darüber hinaus kann das Funkgerät einen Warnton ausgeben oder nicht. Auch dies richtet sich danach, wie es programmiert wurde.

Die grüne LED leuchtet, während das Funkgerät sendet. Während des Empfangs eines Rufs mit aktivierter Verschlüsselung blinkt sie schnell.

## Privacy

Durch den Einsatz softwaregestützter Verschlüsselung verhindert diese Funktion, wenn aktiviert, unbefugtes Zuhören auf einem Kanal. Die Signalisierungs- und Benutzeridentifikationsteile einer Übertragung werden nicht verschlüsselt.

Um verschlüsselt senden zu können, muss die Verschlüsselung für den Kanal aktiviert sein, während dies für empfangende Funkgeräte nicht erforderlich ist. Kanäle mit aktivierter Verschlüsselung können weiterhin normale (unverschlüsselte) Übertragungen empfangen.

Die Verschlüsselungsfunktion wird nicht für alle Funkgerätmodelle angeboten oder kann unterschiedlich konfiguriert werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Ihr Funkgerät unterstützt zwei Verschlüsselungsarten, jedoch kann dem Funkgerät nur eine zugewiesen werden. Nämlich:

**HINWEIS:**

Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

## Ein- und Ausschalten des Datenschutzes

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Verschlüsselung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Verschlüsselung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Verschl..

Drücken Sie , um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ein. Drücken Sie , um die Option auszuwählen. Im Display wird  neben Ein angezeigt.
- Drücken Sie  oder  bis Aus. Drücken Sie , um die Option auszuwählen. Im Display wird  neben Aus angezeigt.

## Antwortsperr

Anhand dieser Funktion können Sie verhindern, dass Ihr Funkgerät auf eingehende Übertragungen reagiert.

**HINWEIS:**

Dies ist eine käufliche Funktion. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Wenn aktiviert, generiert das Funkgerät keine abgehenden Übertragungen in Antwort auf eingehende Übertragungen, wie etwa Funkgerätkontrolle, Rufhinweis, Funkgerät deaktivieren, Remote-Überwachung, Automatischer Registrierungsservice (ARS), Antwort auf Einzelrufe und Senden von GNSS-Standortberichten. Ihr Funkgerät kann keine Einzelrufbestätigungen empfangen, wenn diese Funktion aktiviert ist. Das Funkgerät kann jedoch manuell Übertragungen senden.

## Ein-/Ausschalten der Antwortsperr

Führen Sie die Vorgehensweise zum Ein- oder Ausschalten der Antwortsperr auf Ihrem Funkgerät durch.

Drücken Sie die programmierte **Antwortsperr**-Taste.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.

- Im Display wird ein kurzzeitiger positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein kurzzeitiger negativer Kurzhinweis angezeigt.

## Multi-Site-Bedien

Diese Funktionen sind anwendbar, wenn Ihr aktueller Funkkanal Teil einer IP Site Connect- oder Capacity Plus – Mehrfachstandort-Konfiguration ist.

## Starten einer manuellen Stations

Führen Sie die Vorgehensweise zum Starten der manuellen Standortsuche aus, sobald die empfangene Signalstärke schwach ist, um einen Standort mit besserer Signalstärke zu finden.

Sobald das Funkgerät einen neuen Standort gefunden hat, passiert Folgendes:

- Ein positiver Hinweiston erklingt.

Wenn das Funkgerät keinen neuen Standort gefunden hat, passiert Folgendes:

- Ein negativer Hinweiston erklingt.

## Funkstation sperren/entsperren

Wenn diese Option aktiviert ist, sucht das Funkgerät nur den aktuellen Standort. Ist diese Option deaktiviert, sucht das Funkgerät neben dem aktuellen Standort auch nach anderen Standorten.

Drücken Sie die programmierte Taste **Funkstationsperre**.

Wenn die **Standortsperr**e eingeschaltet ist:

- Sie hören einen positiven Hinweiston, der darauf hinweist, dass das Funkgerät gesperrt ist und den aktuellen Standort nicht verlassen kann.
- Im Display wird `Station gesperrt` angezeigt.

Wenn die **Standortsperr**e ausgeschaltet ist:

- Sie hören einen negativen Hinweiston, der darauf hinweist, dass das Funkgerät entsperrt ist.
- Im Display wird `Station entsperrt` angezeigt.

## Zugriff auf Nachbarstandortliste

Diese Funktion ermöglicht dem Benutzer die Überprüfung der benachbarten Standortliste des aktuellen Home-Standorts. Führen Sie die Vorgehensweise zum Zugriff auf die benachbarte Standortliste aus:

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis `Dienstprogramme`. Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis `Geräteinfo`. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis `Nachb.-Stando..`. Drücken Sie  , um die Option auszuwählen.

---

## Sicherheit

Mit dieser Funktion können Sie jedes im System befindliche Funkgerät aktivieren oder deaktivieren.

So kann z. B. ein gestohlenen Funkgerät deaktiviert und damit unbrauchbar gemacht werden oder ein wiedergefundenes Funkgerät aktiviert werden.

Es gibt zwei Möglichkeiten, ein Funkgerät zu aktivieren oder zu deaktivieren, mit Authentifizierung und ohne Authentifizierung.

„Authentifiziertes Funkgerät deaktivieren“ ist eine käufliche Funktion. Beim authentifizierten Deaktivieren des Funkgeräts ist eine Verifizierung erforderlich, wenn Sie ein Funkgerät aktivieren oder deaktivieren. Wenn Ihr Funkgerät diese Funktion auf einem Ziel-Funkgerät mit Benutzerauthentifizierung initiiert, ist die Eingabe einer Passphrase erforderlich. Die Passphrase wird auf dem Ziel-Funkgerät über CPS vorprogrammiert.

Sie erhalten keine Bestätigung, wenn Sie während des Vorgangs „Funkgerät aktivieren“ oder „Funkgerät

deaktivieren“  drücken.

### HINWEIS:

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

[Feedback senden](#)

## Deaktivieren von Funkgeräten

Führen Sie die Vorgehensweise zum Deaktivieren Ihres Funkgeräts durch.

1 Drücken Sie die vorprogrammierte **Funkgerät deaktivieren**-Taste.

2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID.

3 Drücken Sie , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

, um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die

Anfrage ausgeführt wird. Die grüne LED leuchtet.

- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

---

#### 4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweisston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Deaktivieren von Funkgeräten mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Deaktivieren Ihres Funkgeräts mithilfe der Kontaktliste durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis FunkgDeak.

---

5 Drücken Sie  , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie  , um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

## 6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Deaktivieren von Funkgeräten über manuelles Wählen

Führen Sie die Vorgehensweise zum Deaktivieren Ihres Funkgeräts über manuelles Wählen durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis Man. Wählen. Drücken Sie  , um die Option auszuwählen.
- 4 Drücken Sie  oder  bis Funkgerät-Nr.. Drücken Sie  , um die Option auszuwählen. In der ersten Textzeile wird Funkgerät-Nr. : angezeigt.

5 Geben Sie die Funkgerät-ID ein, und drücken Sie

 , um fortzufahren.

---

6 Drücken Sie  oder  bis FunkgDeak.

---

7 Drücken Sie  , um die Option auszuwählen.  
Eines der folgenden Ereignisse tritt ein:

- Im Display wird eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED blinkt.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

 , um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt,

und Sie kehren zum vorherigen Bildschirm zurück.

---

8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Aktivieren von Funkgeräten

Führen Sie die Vorgehensweise zum Aktivieren Ihres Funkgeräts durch.

- 1 Drücken Sie die konfigurierte **Funkgerät aktivieren-**Taste.
-

2 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID.

---

3 Drücken Sie , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Im Display werden **Funkg. aktiv.** und der Funkgeräte-Alias oder die ID angezeigt. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

, um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.
- 

4 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
  - Im Display wird ein negativer Kurzhinweis angezeigt.
- 

## Aktivieren von Funkgeräten mithilfe der Kontaktliste

Führen Sie die Vorgehensweise zum Aktivieren Ihres Funkgeräts mithilfe der Kontaktliste durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis **Kontakte**. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Funkgerät.

5 Drücken Sie  , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Die grüne LED blinkt. Im Display werden **Funkgerät** und der Funkgeräte-Alias oder die ID angezeigt. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie

 , um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.

- Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.

6 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

## Aktivieren von Funkgeräten über manuelles Wählen

Führen Sie die Vorgehensweise zum Aktivieren Ihres Funkgeräts über manuelles Wählen durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Kontakte. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Man. Wählen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Einzelruf. Drücken Sie  , um die Option auszuwählen. In der ersten Textzeile wird Funkgerät-Nr. : angezeigt.

---

5 Geben Sie die Funkgerät-ID ein, und drücken Sie  , um fortzufahren.

---

6 Drücken Sie  oder  bis FunkgAkt.

---

7 Drücken Sie  , um die Option auszuwählen. Eines der folgenden Ereignisse tritt ein:

- Die grüne LED blinkt. Im Display werden Funkg. aktiv. und der Funkgeräte-Alias oder die ID angezeigt. Die grüne LED leuchtet.
- Ein Bildschirm mit einer Passphrase wird angezeigt.

Geben Sie die Passphrase ein. Drücken Sie  , um fortzufahren.

- Wenn die Passphrase korrekt ist, wird im Display eine Zwischenstand-Kurznotiz angezeigt und damit bestätigt, dass die Anfrage ausgeführt wird. Die grüne LED leuchtet.
  - Wenn die Passphrase nicht korrekt ist, wird im Display ein negativer Kurzhinweis angezeigt, und Sie kehren zum vorherigen Bildschirm zurück.
- 

8 Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweisston erklingt.

- Im Display wird ein positiver Kurzhinweis angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird ein negativer Kurzhinweis angezeigt.

---

## Alleinarbeiter

Der Alleinarbeiterschutz löst einen Notruf aus, wenn eine vordefinierte Zeit lang keine Benutzeraktivität erfasst wird, d. h. beispielsweise keine Taste am Funkgerät gedrückt wird oder der Kanalwahlschalter nicht betätigt wird.

Wurde während der einprogrammierten Dauer keine Benutzeraktivität erfasst, warnt das Funkgerät den Benutzer durch ein akustisches Signal vor, sobald der Inaktivitäts-Timer abgelaufen ist.

Hat der Benutzer auch nach Ablauf des vordefinierten Ansprechzeit-Timers noch nicht quittiert, löst das Funkgerät einen Notrufalarm aus.

Diese Funktion ist nur einem der folgenden Notrufalarme zugewiesen:

- Notrufalarm
- Notsignal mit Ruf
- Notsignal mit anschließender Sprache 

Das Funkgerät bleibt im Notrufzustand, sodass weiterhin Sprachnachrichten gesendet werden können, bis die erforderlichen Maßnahmen ergriffen werden. Weitere Informationen zum Verlassen der Notruffunktion finden Sie unter [Notruf auf Seite 460](#).

### HINWEIS:

Diese Funktion ist nur bei den Funkgeräten verfügbar, bei denen sie aktiviert wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Bluetooth

Mit der Bluetooth-Funktion können Sie Ihr Funkgerät über eine Bluetooth-Verbindung mit einem Bluetooth-fähigen Gerät (Zubehör) verwenden. Ihr Funkgerät unterstützt Bluetooth-Geräte von Motorola Solutions sowie im Handel erhältliche (COTS) Bluetooth-fähige Geräte.

Bluetooth funktioniert innerhalb eines Umkreises von 10 m Sichtverbindung. Die Sichtverbindung ist ein hindernisfreier Weg zwischen Ihrem Funkgerät und Ihrem Bluetooth-

fähigen Gerät. Um eine hohe Zuverlässigkeit zu erreichen, empfiehlt Motorola Solutions, das Funkgerät und das Zubehör nicht zu trennen.

Im Randbereich der Reichweite nehmen die Sprach- und Tonqualität stark ab, und die Übertragung hört sich fehlerhaft oder gebrochen an. Um dieses Problem zu beseitigen, verringern Sie die Entfernung zwischen Funkgerät und Bluetooth-fähigem Gerät (innerhalb der maximalen Reichweite von 10 m), um wieder einen klaren Audioempfang zu erhalten. Die Bluetooth-Funktion Ihres Funkgeräts hat in 10 m Reichweite eine maximale Leistung von 2,5 mW (4 dBm).

Ihr Funkgerät unterstützt bis zu drei simultane Bluetooth-Verbindungen mit Bluetooth-fähigen Geräten verschiedener Typen. Zum Beispiel einen Kopfhörer, einen Scanner und ein PTT-Only-Device (POD). Mehrere Verbindungen mit Bluetooth-fähigen Geräten derselben Art werden nicht unterstützt.

Weitere Angaben über die Funktionalität Ihres Bluetooth-fähigen Geräts können Sie der Bedienungsanleitung des jeweiligen Bluetooth-Geräts entnehmen.

#### HINWEIS:

Wenn das Gerät über CPS deaktiviert wird, werden alle Bluetooth-bezogenen Funktionen deaktiviert, und die Bluetooth-Gerätedatenbank wird gelöscht.

[Feedback senden](#)

## Aktivieren und Deaktivieren von Bluetooth

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Bluetooth durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Mein Status.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird Ein und Aus angezeigt. Der derzeitige Status wird durch ein ✓ angezeigt.

---

- 4 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis Ein. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.

- Drücken Sie  oder  bis **Aus**. Drücken Sie , um die Option auszuwählen. Im Display wird  neben **Aus** angezeigt.

## Verbinden mit Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden mit Bluetooth-Geräten durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

- 1 Drücken Sie , um das Menü aufzurufen.
- 2 Drücken Sie  oder  bis **Bluetooth**.  
Drücken Sie , um die Option auszuwählen.
- 3 Drücken Sie  oder  bis **Geräte**. Drücken Sie , um die Option auszuwählen.
- 4 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie , um die Option auszuwählen.
- Drücken Sie  oder  bis **Geräte suchen**, um die verfügbaren Geräte zu suchen.  
Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis **Verbinden**.  
Drücken Sie , um die Option auszuwählen.  
Es sind möglicherweise zusätzliche Schritte erforderlich, um die Kopplung für Ihr Bluetooth-fähiges Gerät einzurichten. Weitere Informationen finden Sie im Benutzerhandbuch des Bluetooth-fähigen Geräts.  
Im Display wird **Verb. aufbau <Gerät>** angezeigt.

Warten Sie auf eine Quittierung.  
Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird <Gerät> verbunden und das Symbol Bluetooth verbunden angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird Verb.aufbau fehlgeschl angezeigt.

#### HINWEIS:

Wenn ein Pincode erforderlich ist, siehe [Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 207](#).

## Verbinden mit Bluetooth-Geräten im erkennbaren Bluetooth-Modus

Führen Sie die Vorgehensweise zum Anschließen von Bluetooth-Geräten im Erkennungsmodus durch.

Schalten Sie das Bluetooth-fähige Gerät ein, und versetzen Sie es in den Kopplungsmodus.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Gerätesuche.  
Drücken Sie  , um die Option auszuwählen. Ihr Funkgerät kann jetzt von anderen Bluetooth-fähigen Geräten für eine programmierte Dauer gefunden werden. Dies wird als „Erkennbarer Modus“ bezeichnet.

Warten Sie auf eine Quittierung.

Bei erfolgreicher Durchführung:

- Ein positiver Hinweiston erklingt.
- Im Display wird <Gerät> verbunden und das Symbol **Bluetooth verbunden** angezeigt.
- Im Display wird ✓ neben dem verbundenen Gerät angezeigt.

Bei nicht erfolgreicher Durchführung:

- Ein negativer Hinweiston erklingt.
- Im Display wird Verb.aufbau fehlgeschl angezeigt.

## Trennen von Bluetooth-Geräten

Führen Sie die Vorgehensweise zum Verbinden von Bluetooth-Geräten durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Geräte. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis Trennen. Drücken Sie , um die Option auszuwählen.  
Im Display wird <Gerät> wird getrennt angezeigt.

### HINWEIS:

Möglicherweise sind zusätzliche Schritte erforderlich, um die Verbindung Ihres Bluetooth-fähigen Geräts zu unterbrechen. Weitere Informationen finden Sie im Benutzerhandbuch aller Bluetooth-fähigen Geräte.

Warten Sie auf eine Quittierung.

- Ein Hinweiston ertönt.
- Das Display zeigt <Gerät> getrennt und das Symbol **Bluetooth verbunden** wird ausgeblendet.
- ✓ Wird neben dem verbundenen Gerät nicht mehr angezeigt.

## Umschalten des Audiosignals zwischen dem eingebauten Lautsprecher des Funkgeräts und dem Bluetooth-Gerät

Führen Sie die Vorgehensweise zum Umschalten der Audioausgabe zwischen dem internen Lautsprecher des Funkgeräts und dem Bluetooth-Gerät durch.

### Drücken Sie die programmierte **Bluetooth-Audio-Umschalttaste**.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Ein Hinweiston ertönt. Das Display zeigt **Audio zu Funkg leiten an**.
- Ein Hinweiston ertönt. Im Display wird **Audio zu BT leiten** angezeigt.

## Anzeigen von Gerätedetails

Führen Sie die Vorgehensweise zum Anzeigen der Gerätedetails auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis **Bluetooth**.  
Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis **Geräte**. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie , um die Option auszuwählen.

5 Drücken Sie  oder  bis **Details**. Drücken Sie , um die Option auszuwählen.

## Löschen eines Gerätenamens

Sie können ein nicht verbundenes Gerät aus der Liste der Bluetooth-fähigen Geräte entfernen.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis **Bluetooth**.  
Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis **Geräte**. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis zum gewünschten Gerät. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Löschen. Drücken Sie  , um die Option auszuwählen. Im Display wird Gerät gelöscht angezeigt.

---

## Bluetooth-Mikrofonverstärker

Diese Funktion ermöglicht dem Benutzer die Steuerung der Mikrofonverstärkung des verbundenen Bluetooth-fähigen Geräts.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Bluetooth.  
Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis BT MikVerstärk.  
Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis zum Typ des BT-Mikrofonverstärkers und den aktuellen Werten.  
Drücken Sie  , um die Option auszuwählen. Sie können die Werte hier bearbeiten.

---

5 Drücken Sie  oder  , um die Werte zu erhöhen oder zu senken. Drücken Sie  , um die Option auszuwählen.

---

## Innenbereich

### HINWEIS:

Die Innenbereichs-Funktion ist verfügbar für Modelle mit neuester Software und Hardware. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

„Innenbereich“ kann verwendet werden, um den Standort von Funkgerätenutzern zu verfolgen. Wenn der Innenbereich aktiviert ist, ist das Funkgerät in einem

begrenzt erkennbaren Modus. Dedizierte Bakensignale werden verwendet, um das Funkgerät aufzufinden und seine Position zu bestimmen.

## Ein- und Ausschalten der Funktion Innenbereich

Sie können durch Ausführen einer der folgenden Aktionen die Funktion Innenbereich ein- oder ausschalten.

- Rufen Sie diese Funktion über das Menü auf.
  - a. Drücken Sie   , um das Menü aufzurufen.
  - b. Drücken Sie  oder  bis Bluetooth und drücken Sie   zum Auswählen.
  - c. Drücken Sie  oder  Innenbereich und drücken Sie   zum Auswählen.
  - d. Drücken Sie   , um die Funktion Innenbereich zu aktivieren.

Das Display zeigt `Innenbereich ein` an. Das Gerät gibt einen positiven Hinweiston ab.

Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display `Einschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- e. Drücken Sie   zum Ausschalten der Funktion „Innenbereich“.

Das Display zeigt `Innenbereich aus` an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display `Ausschalten fehlgeschlagen` angezeigt. Das Gerät gibt einen negativen Hinweiston aus.

- Rufen Sie diese Funktion über die vorprogrammierte Taste auf.

- a. Drücken Sie lang auf die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ einzuschalten.

Das Display zeigt *Innenbereich ein* an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm angezeigt.
- Wenn nicht erfolgreich, wird im Display *Einschalten fehlgeschlagen* angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

- b. Drücken Sie die vorprogrammierte Taste **Innenbereich**, um die Funktion „Innenbereich“ auszuschalten.

Das Display zeigt *Innenbereich aus* an. Das Gerät gibt einen positiven Hinweiston ab. Eines der folgenden Ereignisse tritt ein.

- Wenn erfolgreich, wird das Symbol für den verfügbaren Innenbereich auf dem Startbildschirm nicht mehr angezeigt.
- Wenn nicht erfolgreich, wird im Display *Ausschalten fehlgeschlagen* angezeigt. Wenn nicht erfolgreich, ertönt ein negativer Hinweiston.

## Zugriff auf Informationen eines Standort-Bakensignals in Innenbereichen

Gehen Sie wie folgt vor, um auf Informationen zu Innenbereich-Bakensignalen zuzugreifen.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Bluetooth und drücken Sie  zum Auswählen.

3 Drücken Sie  oder  Innenbereich und drücken Sie  zum Auswählen.

---

4 Drücken Sie  oder  bis Sender und drücken Sie  zum Auswählen.

---

Im Display werden Bakensignal-Informationen angezeigt.

## Benachrichtigungsliste

Ihr Funkgerät hat eine Mitteilungsliste, die alle Ihre „ungelesenen“ Ereignisse auf dem Kanal, wie z. B. ungelesene Textnachrichten, Telemetrienachrichten, verpasste Rufe und Rufhinweise sammelt.

Auf dem Display wird das **Benachrichtigungssymbol** angezeigt, wenn die Benachrichtigungsliste mindestens ein Ereignis enthält.

Die Liste unterstützt maximal 40 ungelesene Ereignisse. Wenn die Liste voll ist, ersetzt das nächste Ereignis automatisch den jeweils ältesten Listeneintrag. Die Ereignisse werden nach dem Lesen aus der Benachrichtigungsliste entfernt.

Für Textnachrichten, verpasste Rufe und Rufhinweise beträgt die maximale Anzahl 30 Textnachrichten und 10 verpasste Rufe bzw. Rufhinweise. Diese maximale Anzahl hängt von der Kapazität der einzelnen Funktionslisten ab (Jobtickets oder Textnachrichten, verpasste Rufe oder Rufhinweise).

## Aufrufen der Mitteilungsliste

Führen Sie die Vorgehensweise zum Aufrufen der Mitteilungsliste auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Mitteilung. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis zum gewünschten Ereignis. Drücken Sie  , um die Option auszuwählen.

Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

---

## Auto-Range Transponder-System®

Reichweite-Überwachungssystem (ARTS) ist eine rein analoge Funktion, die dazu dient, Sie zu informieren, wenn sich Ihr Funkgerät außerhalb der Reichweite anderer mit ARTS ausgestatteter Funkgeräte befindet.

Mit ARTS ausgestattete Funkgeräte senden oder empfangen in regelmäßigen Abständen Signale, um zu bestätigen, dass sich die Geräte innerhalb der Funkreichweite der anderen befinden.

Ihr Funkgerät bietet folgende Anzeigen zum Status:

### Erster Hinweis

Ein Hinweiston ertönt.

Auf dem Display wird **Im Bereich** nach dem Aliasnamen des Kanals angezeigt.

### ARTS-in-Reichweite-Hinweis

Ein Ton erklingt, wenn programmiert.

Auf dem Display wird **Im Bereich** nach dem Aliasnamen des Kanals angezeigt.

### ARTS-außer-Reichweite-Hinweis

Ein Hinweiston ertönt. Die rote LED blinkt schnell.

Auf dem Display wird **Auss. Reichw.** abwechselnd mit der Startseite angezeigt.

### HINWEIS:

Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Over-the-Air Programmierung (OTAP)™

Ihr Händler kann Ihr Funkgerät über Over-the-Air-Programmierung (OTAP) ohne physische Verbindung ferngesteuert aktualisieren. Darüber hinaus können auch einige Einstellungen über OTAP konfiguriert werden.

Wenn OTAP auf Ihrem Funkgerät aktiv ist, blinkt die grüne LED.

Wenn Ihr Funkgerät große Datenmengen empfängt:

- Das Display zeigt das Symbol **Große Datenmengen** an.
- Der Kanal ist belegt.
- Ein negativer Hinweiston erklingt, wenn Sie die **PTT**-Taste drücken.

Wenn OTAP abgeschlossen ist, je nach Konfiguration:

- Ein Hinweiston ertönt. Auf dem Display wird **Aktualisierung Neustart** angezeigt. Das Funkgerät wird durch Aus- und Einschalten neu gestartet.

- Sie können **Jetzt neu start.** oder **Später** auswählen. Wenn Sie **Später** auswählen, wechselt Ihr Funkgerät zum vorherigen Bildschirm. Auf dem Display wird das **OTAP-Verzögerungs-Timer**-Symbol angezeigt, bis der automatische Neustart erfolgt.

Wenn Ihr Funkgerät nach dem automatischen Neustart eingeschaltet wird:

- Bei erfolgreichem Abschluss wird auf dem Display **SW-Update abgeschlossen** angezeigt.
- Schlägt der Vorgang fehl, so zeigt das Display **SW-Update fehlg.** angezeigt.

Informationen zur aktualisierten Softwareversion finden Sie unter [Überprüfen der Software-Aktualisierungsinformationen auf Seite 243](#).

## Sendesperre

Anhand der Sendesperre können Benutzer alle Sendevorgänge auf dem Funkgerät blockieren.

### HINWEIS:

Bluetooth und WLAN-Funktionen sind während der Sendesperre verfügbar.

## Aktivieren der Sendesperre

Führen Sie die Vorgehensweise zum Aktivieren der Sendesperre durch.

Wählen Sie eine der folgenden Optionen aus:

- Drücken Sie  oder  bis **Tx-Sperre** und drücken Sie  zum Auswählen.
- Drücken Sie die programmierbare Taste **Sendesperre**.

- Ein positiver Hinweisston erklingt.
- Im Display wird **Tx-Sperre ein** angezeigt.

### HINWEIS:

Der Status der Sendesperre ändert sich nach dem Einschalten des Funkgeräts nicht.

## Deaktivieren der Sendesperre

Führen Sie die Vorgehensweise zum Deaktivieren der Sendesperre durch.

Wählen Sie eine der folgenden Optionen aus:

- Drücken Sie  oder  bis Tx-Sperre und drücken Sie  zum Auswählen.
  - Drücken Sie die programmierbare Taste **Sendesperre**.
- 
- Ein negativer Hinweisston erklingt. Übertragung erfolgt wieder im normalen Betrieb.
  - Im Display wird Tx-Sperre Aus angezeigt.

## Auswählen von Verbindungsmodi für Peripheriegeräte von Drittanbietern

Folgen Sie den Anweisungen, um eine der folgenden Verbindungsmodie für Peripheriegeräte anderer Hersteller auszuwählen:

- Motorola Solutions
- PC und Audio
- Datenzubehör
- Telemetrie

### Allgemein

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme.Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen.Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Kabeltyp.  
Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis zum gewünschten Verbindungsmodus. Drücken Sie  , um die Option auszuwählen.
- Im Display wird der gewählte Verbindungsmodus angezeigt. Der Bildschirm wechselt zum vorherigen Menü.

---

## Anzeige der Empfangssignalstärke (RSSI)

Mit dieser Funktion können Sie die Werte für die Anzeige der Empfangssignalstärke (RSSI) ansehen.

Auf dem Display wird das **RSSI**-Symbol in der oberen rechten Ecke angezeigt. Unter [Anzeigesymbole](#) finden Sie weitere Informationen zum **RSSI**-Symbol.

## Anzeigen von RSSI-Werten

Führen Sie die Vorgehensweise zum Anzeigen von RSSI-Werten auf Ihrem Funkgerät durch.

Auf dem Startbildschirm:

- 1 Drücken Sie innerhalb von fünf Sekunden  dreimal und dann sofort  .
- Im Display werden die aktuellen RSSI-Werte angezeigt.
- 2 Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

---

## Passwortgeschützter Zugriff auf das Funkgerät

Diese Funktion ermöglicht Ihnen die Beschränkung des Zugriffs auf das Funkgerät, indem ein Passwort abgefragt wird, wenn das Gerät eingeschaltet wird.

Sie können das Passwort über ein Tastenfeldmikrofon oder mithilfe der **Auf/Ab**-Tasten eingeben.

## Zugreifen auf Funkgeräte mithilfe von Kennwörtern

Führen Sie die Vorgehensweise für das Zugreifen auf Ihr Funkgerät mit einem Passwort durch.

- 1 Geben Sie das aktuelle vierstellige Passwort ein.

### HINWEIS:

Die Benutzung des **Fußnotschalters** hebt die Passwortheingabe für den Zugriff auf das Funkgerät auf.

- Über ein Tastenfeldmikrofon.
- Drücken Sie  oder , um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie , um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen.

- 2 Drücken Sie , um das Passwort einzugeben.

Bei erfolgreicher Durchführung wird das Funkgerät eingeschaltet.

Bei nicht erfolgreicher Durchführung:

- Nach dem ersten und zweiten Versuch wird auf dem Display **Falsches Passwort** angezeigt. Wiederholen Sie **Schritt 1**.
- Nach dem dritten Versuch erscheint im Display **Falsches Passwort** und dann **Gerät gesperrt**. Ein Hinweiston ertönt. Die gelbe LED blinkt. Ihr Funkgerät wird 15 Minuten lang gesperrt.

### HINWEIS:

Im gesperrten Status reagiert das Funkgerät nur auf Eingaben des **Ein-/Aus-/Lautstärkereglers** und der vorprogrammierten Taste **Hintergrundbeleuchtung**.

---

## Entsperren von Funkgeräten

Im gesperrten Zustand kann Ihr Funkgerät keine Anrufe empfangen. Führen Sie die Vorgehensweise zum Entsperren Ihres Funkgeräts durch.

Führen Sie einen der folgenden Schritte aus:

- Wenn das Funkgerät eingeschaltet ist, warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter

[Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 207](#), um auf das Funkgerät zuzugreifen.

- Wenn das Funkgerät ausgeschaltet ist, schalten Sie das Gerät ein. Ihr Funkgerät startet den 15-Minuten-Timer für die Sperre.

Ein Hinweiston ertönt. Die gelbe LED blinkt. Im Display wird Gerät `gesperrt` angezeigt.

Warten Sie 15 Minuten, und wiederholen Sie dann die Schritte unter [Zugreifen auf Funkgeräte mithilfe von Kennwörtern auf Seite 207](#), um auf das Funkgerät zuzugreifen.

## Ein-/Ausschalten der Passwortsperre

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Passwortsperre auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis `Passw-Sperre`.

Drücken Sie , um die Option auszuwählen.

---

5 Geben Sie das aktuelle vierstellige Passwort ein.

- Über ein Tastenfeldmikrofon.
  - Drücken Sie  oder , um den numerischen Wert jeder Ziffer zu bearbeiten, und drücken Sie , um die Eingabe zu bestätigen und zur nächsten Ziffer zu gehen. Bei der Passwordeingabe ertönt mit jedem Drücken einer Taste ein positiver Hinweiston.
- 

6 Drücken Sie , um das Passwort einzugeben.

Wenn das Passwort falsch ist, erscheint im Display `Falsches Passwort`, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

---

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Einschalten.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird  neben Einschalten angezeigt.
- Drücken Sie  oder  bis Abschalten.  
Drücken Sie , um die Option auszuwählen.  
Im Display wird  neben Abschalten angezeigt.

## Ändern von Kennwörtern

Führen Sie die Vorgehensweise zum Ändern von Kennwörtern auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Passw-Sperre. Drücken Sie , um die Option auszuwählen.

5 Geben Sie das aktuelle Passwort mit vier Ziffern ein, und drücken Sie , um fortzufahren.

Wenn das Passwort falsch ist, erscheint im Display Falsches Passwort, und das Funkgerät zeigt automatisch wieder das vorhergehende Menü an.

6 Drücken Sie  oder  bis Passw.änd. angezeigt wird. Drücken Sie , um die Option auszuwählen.

7 Geben Sie ein neues vierstelliges Passwort ein, und drücken Sie , um fortzufahren.

- 8 Geben Sie das neue vierstellige Passwort noch einmal ein, und drücken Sie  , um fortzufahren.  
Bei erfolgreicher Durchführung wird auf dem Display `Passwort geändert` angezeigt.  
Bei nicht erfolgreicher Durchführung wird auf dem Display `PW stimmen nicht Überein` angezeigt.  
Der Bildschirm wechselt automatisch zum vorherigen Menü.
- 

## Front-Panel-Konfiguration

Sie können bestimmte Funktionsparameter in der Front-Panel-Konfiguration anpassen, um die Verwendung des Funkgeräts zu optimieren.

### Eingabe von Front-Panel-Konfiguration

Führen Sie die Vorgehensweise zum Aufrufen des Bedienfeld-Programmiermodus (FFP) auf Ihrem Funkgerät durch.

Durch Gedrückthalten von  kehren Sie zum Startbildschirm zurück.

[Feedback senden](#)

- 1 Drücken Sie  , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis `Dienstprogramme`. Drücken Sie  , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis `Funkgerät programmieren`. Drücken Sie  , um die Option auszuwählen.
- 

## Bearbeiten von Parametern im FFP-Modus

Verwenden Sie bei der Navigation durch die Funktionsparameter die folgenden Tasten.

-  ,  – Zum Durchblättern von Optionen, Erhöhen/Verringern von Werten und um senkrecht zu navigieren.
-  – Zum Wählen der Option bzw. zum Aufrufen eines Untermenüs.

-  – Kurz drücken, um zum vorhergehenden Menü zurückzukehren oder um den Auswahlbildschirm zu verlassen. Gedrückt halten, um zum Ausgangsbildschirm zurückzukehren.

## Wi-Fi-Betrieb

Wi-Fi® ist eine eingetragene Marke der Wi-Fi Alliance®.

### HINWEIS:

Diese Funktion gilt nur für DM4601e .

Diese Funktion ermöglicht Ihnen, ein WLAN-Netzwerk einzurichten und eine Verbindung damit herzustellen. Wi-Fi unterstützt Aktualisierungen an der Firmware des Funkgeräts, Codeplug und Ressourcen, wie z. B. Sprachpakete und Sprachansage.

## Ein-/Ausschalten von WLAN

Die programmierte Taste **Ein-/Ausschalten von WLAN** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

Sprachansagen für die vorprogrammierte Taste **WLAN ein oder aus** können über CPS gemäß den

Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

Sie können WLAN durch Ausführen einer der folgenden Aktionen ein- oder ausschalten.

- Drücken Sie die vorprogrammierte Taste **WLAN ein oder aus**. Die Sprachansage besagt: WLAN wird eingeschaltet oder WLAN wird ausgeschaltet.
  - Rufen Sie diese Funktion über das Menü auf.
    - a. Drücken Sie  , um das Menü aufzurufen.
    - b. Drücken Sie  oder  bis **WLAN**, und drücken Sie  zum Auswählen.
    - c. Drücken Sie  oder  bis **WLAN ein** und drücken Sie  zum Auswählen.
- Drücken Sie  , um WLAN zu aktivieren. Im Display wird  neben **Aktiviert** angezeigt.

Drücken Sie , um das WLAN zu deaktivieren. Neben Aktiviert wird kein  mehr angezeigt.

## Verbinden mit einem Access Point im Netzwerk

Wenn Sie WLAN einschalten, startet das Funkgerät einen Suchlauf und stellt eine Verbindung zu einem Access Point im Netzwerk her.

Sie können auch über das Menü eine Verbindung mit einem Access Point im Netzwerk herstellen.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis zu einem Netzwerk-Access-Point, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  bis Verbinden, und drücken Sie  zum Auswählen.

---

- 6 Geben Sie das Kennwort ein, und drücken Sie .

---

Wenn die Verbindung erfolgreich hergestellt werden konnte, zeigt das Funkgerät einen Hinweis an, und der Access Point des Netzwerks wird in der Profilliste gespeichert.

## Prüfen des WLAN-Verbindungsstatus

Führen Sie die Vorgehensweise zum Prüfen des WLAN-Verbindungsstatus durch.

Drücken Sie die vorprogrammierte Taste **Wi-Fi-Status abfragen**, um den Verbindungsstatus über eine Sprachansage abzurufen. Die Sprachansage besagt: Wi-Fi

ist deaktiviert, Wi-Fi ist aktiviert, aber keine Verbindung,  
oder Wi-Fi ist aktiviert mit Verbindung.

- Das Display zeigt WLAN Aus, wenn WLAN ausgeschaltet ist.
- Das Display zeigt WLAN Ein, Verbunden, wenn das Funkgerät mit einem Netzwerk verbunden ist.
- Das Display zeigt WLAN Ein, Nicht verbunden, wenn das Funkgerät zwar eingeschaltet, aber nicht mit einem Netzwerk verbunden ist.

Sprachansagen für die WLAN-Statusabfrageergebnisse können über CPS gemäß den Benutzeranforderungen angepasst werden. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

#### HINWEIS:

Die programmierte Taste **Wi-Fi-Status abfragen** wird von Ihrem Händler oder Systemadministrator zugeordnet. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

## Aktualisieren der Netzwerkliste

Gehen Sie wie folgt vor, um die Netzwerkliste zu aktualisieren.

- Gehen Sie wie folgt vor, um die Netzwerkliste über das Menü zu aktualisieren.
  - a. Drücken Sie , um das Menü aufzurufen.
  - b. Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.
  - c. Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

Wenn Sie das Netzwerkmenü öffnen, aktualisiert das Funkgerät automatisch die Netzwerkliste.
- Wenn Sie sich bereits im Netzwerk-Menü befinden, führen Sie die folgende Maßnahme durch, um die Netzwerkliste zu aktualisieren.

Drücken Sie  oder  zu Aktualisieren und drücken Sie  zum Auswählen.

Das Funkgerät aktualisiert sich und zeigt die neueste Netzwerkliste an.

## Hinzufügen eines Netzwerks

Wenn ein bevorzugtes Netzwerk nicht in der Liste der verfügbaren Netzwerke angezeigt wird, führen Sie die folgenden Maßnahmen durch, um ein Netzwerk hinzuzufügen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  zu Netzwerk hinzufügen und drücken Sie  zum Auswählen.

---

- 5 Geben Sie die SSID (Service Set Identifier) ein, und drücken Sie  .

---

- 6 Drücken Sie  oder  zu Öffnen und drücken Sie  zum Auswählen.

---

- 7 Geben Sie das Kennwort ein, und drücken Sie  .

Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass das Netzwerk erfolgreich gespeichert wurde.

---

## Anzeigen von Details zu Netzwerk-Access-Points

Gehen Sie wie folgt vor, um die Details zu Netzwerk-Access-Points anzuzeigen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.

---

- 4 Drücken Sie  oder  bis zu einem Netzwerk-Access-Point, und drücken Sie  zum Auswählen.

---

- 5 Drücken Sie  oder  zu Details anzeigen und drücken Sie  zum Auswählen.

Für einen verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier), der Sicherheitsmodus, die MAC-Adresse (Media Access Control) und die IP-Adresse (Internet Protocol) angezeigt.

Für einen nicht verbundenen Netzwerk-Access Point werden die SSID (Service Set Identifier) und der Sicherheitsmodus angezeigt.

## Entfernen von Netzwerk-Access Points

Führen Sie die folgenden Aktionen aus, um Netzwerk-Access Points aus der Profilliste zu entfernen.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis WLAN, und drücken Sie  zum Auswählen.

---

- 3 Drücken Sie  oder  bis Netzwerke, und drücken Sie  zum Auswählen.
- 
- 4 Drücken Sie  oder  zum ausgewählten Netzwerk-Access Point und drücken Sie  zum Auswählen.
- 
- 5 Drücken Sie  oder  zu Entfernen und drücken Sie  zum Auswählen.
- 
- 6 Drücken Sie  oder  zu JA und drücken Sie  zum Auswählen.
- Das Funkgerät zeigt eine Bestätigung an, um darauf hinzuweisen, dass der ausgewählte Netzwerk-Access-Point erfolgreich entfernt wurde.

## Energieversorgung

In diesem Kapitel wird die Verwendung der Einstellungsfunktionen auf Ihrem Funkgerät beschrieben.

[Feedback senden](#)

## Rauschsperrpegel

Der Rauschsperrpegel kann so eingestellt werden, dass unerwünschte Rufe mit niedriger Signalstärke oder Kanäle mit ungewöhnlich intensiven Hintergrundgeräuschen unterdrückt werden.

### Normal

Dies ist die Standardeinstellung.

### Hoch

Diese Einstellung filtert unerwünschte Rufe und/oder störendes Hintergrundrauschen aus. Dabei kann es jedoch sein, dass auch Rufe von weiter entfernten Standorten ausgefiltert werden.

### HINWEIS:

Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

## Einstellen der Rauschsperrstufen

Führen Sie die Vorgehensweise zum Einstellen des Rauschsperrpegels auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte **Rauschsperr**-Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie  , um das Menü aufzurufen.

2

Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3

Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

4

Drücken Sie  oder  bis Rauschsp.

Drücken Sie  , um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Normal.

Drücken Sie  , um die Option auszuwählen. Im Display wird  neben Normal angezeigt.

- Drücken Sie  oder  bis Hoch. Drücken Sie  , um die Option auszuwählen. Im Display wird  neben Hoch angezeigt.

Der Bildschirm wechselt automatisch zum vorherigen Menü.

## Leistungspegel

Die Sendeleistung kann für jeden Kanal hoch oder niedrig eingestellt werden.

### Hoch

Erlaubt die Kommunikation mit relativ weit entfernten Funkgeräten.

### Niedrig

Erlaubt die Kommunikation mit näher befindlichen Funkgeräten.

### HINWEIS:

Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

## Einstellen der Sendeleistung

Führen Sie die Vorgehensweise zum Einstellen der Sendeleistung auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die vorprogrammierte Taste **Leistungspegel**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Leistung.

Drücken Sie , um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Hoch. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ neben Hoch angezeigt.
- Drücken Sie  oder  bis Niedrig. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ neben Niedrig angezeigt.

6 Drücken Sie  lang, um zum Startbildschirm zurückzukehren.

## Ein-/Ausschalten der Funkgerät-Hinweistöne

Sie können bei Bedarf alle Töne des Funkgeräts aktivieren bzw. deaktivieren außer den Ton für eingehende Notrufe. Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Tönen und Hinweisen auf Ihrem Funkgerät durch.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Töne/Hinweistöne**. Überspringen Sie die folgenden Schritte.
- Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Töne/

Hinweistöne. Drücken Sie , um die Option auszuwählen.

5 Drücken Sie  oder  bis Alle Töne.

Drücken Sie , um die Option auszuwählen.

6 Drücken Sie , um alle Töne und Hinweistöne zu aktivieren oder deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Ein-/Ausschalten von Tastaturtönen

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von Tastentönen auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/Hinweistöne. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Tastaturtöne. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  , um die Tastaturtöne zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Einstellen der Abweichung der Hinweistonlautstärke

Diese Funktion stellt die Lautstärke der Hinweistöne ein, sodass sie höher oder niedriger als die Lautstärke für Sprache sein können. Führen Sie die Vorgehensweise zum Einstellen der Abweichung der Hinweistonlautstärke auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/Hinweise. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Lautst. Offset.  
Drücken Sie , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zur gewünschten Lautstärkeabweichung.  
Für jede Lautstärkeabweichung wird jeweils ein Ton in der entsprechenden Lautstärke ausgegeben.

---

7 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie , um die Option auszuwählen. Die gewünschte Lautstärkeabweichung wurde gespeichert.
  - Drücken Sie  zum Beenden. Die Änderungen werden verworfen.
- 

## Ein-/Ausschalten des Freitons

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Freitons auf Ihrem Funkgerät durch.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Freiton. Drücken Sie , um die Option auszuwählen.

---

- 6 Drücken Sie  , um den Freiton zu aktivieren/deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben **Aktiviert** angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben **Aktiviert** angezeigt.

## Ein-/Ausschalten des Hinweistons beim Einschalten

Führen Sie die Vorgehensweise zum Ein- und Ausschalten des Hinweistons beim Einschaltton auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Töne/ Hinweistöne. Drücken Sie  , um die Option auszuwählen.

- 5 Drücken Sie  oder  bis Einschalten. Drücken Sie  , um die Option auszuwählen.

- 6 Drücken Sie  , um den Hinweiston beim Einschalten zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:
- Wenn diese Option aktiviert ist, wird  neben **Aktiviert** angezeigt.

- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Einstellen der Hinweistöne für Textnachrichten

Sie können den Hinweiston der Textnachricht für alle Einträge in der Kontaktliste auf „Momentan“ oder „Wiederholt anpassen. Führen Sie die Vorgehensweise zum Einstellen von Hinweistönen für Textnachrichten auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Kontakte.  
Drücken Sie  , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis zum gewünschten Aliasnamen oder zur gewünschten ID. Drücken Sie  , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Nachr.Hinweis.  
Drücken Sie  , um die Option auszuwählen.

- 5 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  oder  bis Momentan.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird  neben Momentan angezeigt.
  - Drücken Sie  oder  bis Wiederholt.  
Drücken Sie  , um die Option auszuwählen.  
Im Display wird  neben Wiederholt angezeigt.

## Ändern des Displaymodus

Das Funkgerätdisplay kann nach Bedarf auf Tages- oder Nacht-Modus eingestellt werden. Diese Einstellung ändert jeweils die Farbpalette des Displays. Führen Sie die Vorgehensweise zum Ändern des Displaymodus auf Ihrem Funkgerät aus.

- 1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte **Displaymodus-**Taste. Überspringen Sie die folgenden Schritte.
- Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis Anzeige. Drücken Sie  , um die Option auszuwählen.  
Im Display wird Tag und Nacht angezeigt.

5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  , um die Option auszuwählen.  
Auf dem Display wird  neben der ausgewählten Einstellung angezeigt.

## Anpassen der Displayhelligkeit

Führen Sie die Vorgehensweise zum Einstellen der Displayhelligkeit auf Ihrem Funkgerät durch. Die Helligkeit des Displays kann nicht angepasst werden, wenn „Helligkeitsautomatik“ aktiviert ist.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Helligkeit**. Überspringen Sie die folgenden Schritte.
- Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Helligkeit. Drücken Sie , um die Option auszuwählen. Im Display wird die Helligkeitsleiste angezeigt.

---

5 Drücken Sie  oder , um die Displayhelligkeit zu erhöhen oder zu verringern. Drücken Sie , um die Option auszuwählen. Der Einstellungswert variiert zwischen 1 und 8.

---

## Ein-/Ausschalten der Funktion „Hupe/Beleuchtung“

Ihr Funkgerät kann Sie über die Funktion „Hupe und Beleuchtung“ auf einen ankommenden Ruf hinweisen. Wenn diese Funktion aktiviert ist, ertönt bei einem ankommenden Ruf die Hupe und die Beleuchtung des

Fahrzeugs wird eingeschaltet. Diese Funktion muss von Ihrem Händler über den rückseitigen Zubehöranschluss installiert werden. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Funktion „Hupe/Beleuchtung“ auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die vorprogrammierte Taste **Hupe/ Bel.** Überspringen Sie die nachfolgenden Schritte.
    - Drücken Sie , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.
-

- 4 Drücken Sie  oder  bis Hupe/Bele..  
Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  , um Hupe/Beleuchtung zu aktivieren/deaktivieren. Im Display wird eines der folgenden Ergebnisse angezeigt:
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Ein-/Ausschalten der LED-Anzeigen

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der LED-Anzeigen auf Ihrem Funkgerät durch.

- 1 Drücken Sie  , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis LED-Anzeige. Drücken Sie  , um die Option auszuwählen.
- 

- 5 Drücken Sie  , um die LED-Anzeige zu aktivieren/deaktivieren.  
Im Display wird eines der folgenden Ergebnisse angezeigt:
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
-

## Ein- und Ausschalten des Durchsageverstärkersystems

Befolgen Sie das Verfahren zur Aktivierung bzw. Deaktivierung des internen Durchsageverstärker (PA)-Systems des Funkgerätes.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Durchsageverstärker**. Überspringen Sie die folgenden Schritte.
  - Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis Durchsageverstärker. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie , um die Durchsageverstärker-Funktion zu aktivieren oder zu deaktivieren.
  - Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Ein- und Ausschalten des externen Durchsageverstärkersystems

Befolgen Sie das Verfahren zur Aktivierung bzw. Deaktivierung des externen Durchsageverstärker (PA)-Systems des Funkgerätes.

- 1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Ext. Durchsageverstärker**. Überspringen Sie die folgenden Schritte.
- Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

4 Drücken Sie  oder  bis Ext. Durchsageverstärker. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie , um die externe Durchsageverstärker-Funktion zu aktivieren oder zu deaktivieren.
- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Ein-/Ausschalten des Startbildschirms

Sie können den Startbildschirm mithilfe der folgenden Vorgehensweise aktivieren oder deaktivieren.

1 Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Anzeige. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Introbildschirm. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  zum Aktivieren/Deaktivieren des Startbildschirms.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Einstellen der Sprachen

Führen Sie die Vorgehensweise zum Einstellen der Sprachen auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Sprachen. Drücken Sie  , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis zur gewünschten Sprache. Drücken Sie , um die Option auszuwählen.
- Auf dem Display wird  neben der ausgewählten Sprache angezeigt.
- 

- 4 Drücken Sie  oder  bis Kabeltyp.  
Drücken Sie , um die Option auszuwählen.
- 
- 5 Der aktuelle Kabeltyp ist mit einem  gekennzeichnet.
- 

## Bestimmen des Kabeltyps

Führen Sie die folgenden Schritte aus, um den Kabeltyp auszuwählen, den Ihr Funkgerät verwendet.

- 1 Drücken Sie , um das Menü aufzurufen.
- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 
- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.
- 

## Sprachgesteuerte Übertragung (VOX)

Mithilfe der sprachgesteuerten Übertragung (VOX) können Sie einen Ruf auf einem programmierten Kanal im Freisprechbetrieb einleiten. Während eines programmierten Zeitraums überträgt das Funkgerät automatisch, sobald das Mikrofon des VOX-fähigen Zubehörs eine gesprochene Benachrichtigung erfasst.

### HINWEIS:

Diese Funktion ist auf Citizens Band-Kanälen nicht verfügbar, die sich auf der gleichen Frequenz befinden.

Um VOX zu aktivieren oder deaktivieren, führen Sie einen der folgenden Schritte aus:

- Schalten Sie das Funkgerät aus und dann wieder ein, um VOX zu aktivieren.
- Wechseln Sie den Kanal mithilfe der **Auf/Ab**-Tasten, um VOX zu aktivieren.
- Wechseln Sie den Kanal mithilfe des **Lautstärkereglers/Kanalwahlschalters**, um VOX zu aktivieren.
- Schalten Sie VOX über die vorprogrammierte **VOX**-Taste oder das Menü ein oder aus, um VOX zu aktivieren oder deaktivieren.
- Drücken Sie die **Sendetaste (PTT)** während des Funkgerätbetriebs, um VOX zu deaktivieren.

### HINWEIS:

Diese Funktion kann nur an Funkgeräten ein- oder ausgeschaltet werden, bei denen die Funktion aktiviert wurde. Weitere Informationen erhalten Sie von Ihrem Fachhändler oder Systemadministrator.

## Ein-/Ausschalten der sprachgesteuerten Übertragung

Führen Sie die Vorgehensweise zum Ein- und Ausschalten von VOX auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte **VOX**-Taste. Überspringen Sie die nachfolgenden Schritte.
  - Drücken Sie  **OK** , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis **Dienstprogramme**. Drücken Sie  **OK** , um die Option auszuwählen.

- 
- 3 Drücken Sie  oder  bis **Funkgeräteeinstellungen**. Drücken Sie  **OK** , um die Option auszuwählen.

- 
- 4 Drücken Sie  oder  bis **VOX**. Drücken Sie  **OK** , um die Option auszuwählen.

- 
- 5 Drücken Sie  **OK** , um **VOX** zu aktivieren/ deaktivieren.

**HINWEIS:**

Wenn der Freiton aktiviert ist, verwenden Sie ein Trigger-Wort, um den Anruf einzuleiten. Warten Sie das Ende des Freitons ab, und sprechen Sie dann deutlich in das Mikrofon. Weitere Informationen finden Sie unter [Ein-/Ausschalten des Freitons auf Seite 223](#).

## Ein-/Ausschalten der Kanalansage

Diese Funktion aktiviert die Sprachansage des Funkgeräts, sodass es die aktuelle Zone bzw. den aktuellen Kanal, die/der vom Benutzer gerade zugewiesen wurde, oder das Drücken einer programmierbaren Taste akustisch angibt. Die Ansage ist besonders nützlich, wenn der Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

Dieses Tonsignal kann kundenspezifisch eingestellt werden. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Kanal-Ansage auf Ihrem Funkgerät durch.

## Ein-/Ausschalten der Zusatzkarten

Jeder Kanal unterstützt Zusatzkartenfunktionen, die programmierbaren Tasten zugewiesen werden können. Ein

Kanal kann bis zu 6 Zusatzkartenfunktionen unterstützen. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Zusatzkarten auf Ihrem Funkgerät durch.

Drücken Sie die programmierte Taste **Zusatzkarte**.

## Text-in-Sprache

Die Funktion Text-in-Sprache kann nur vom Händler oder Systemadministrator aktiviert werden. Wenn die Funktion Text in Speech aktiviert ist, wird die Sprachansage-Funktion automatisch deaktiviert. Wenn die Sprachansage-Funktion aktiviert ist, wird die Text-in-Sprache-Funktion automatisch deaktiviert.

Diese Funktion aktiviert die Sprachansage des Funkgeräts mit den folgenden Funktionen:

- Aktueller Kanal
- Aktuelle Zone
- Programmierbare Taste ein- bzw. aus
- Inhalt der empfangenen Textnachrichten
- Inhalt von empfangenen Job Tickets

Dieses Tonsignal kann bedarfsspezifisch eingestellt werden. Die Funktion ist besonders nützlich, wenn der

Benutzer Schwierigkeiten hat, die Anzeige im Display zu lesen.

## Einstellen von Text-in-Sprache

Folgen Sie den Schritten zur Einrichtung der Funktion Text-in-Sprache.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Kanal-Ansage. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis zu einer der folgenden Funktionen. Drücken Sie  , um die Option auszuwählen.

Die verfügbaren Optionen lauten wie folgt:

- Alle
- Nachrichten
- Job Tickets
- Channel
- Zone
- Programmtaste

✓ wird neben der ausgewählten Einstellung angezeigt.

---

## Ein- oder Ausschalten der automatischen Rufweiterleitung

Ihr Funkgerät kann bei entsprechender Einstellung Rufe automatisch an ein anderes Funkgerät weiterleiten.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis

Rufweiterleitung. Drücken Sie , um die Option auszuwählen.

---

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder , um die Rufweiterleitung zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.

- Drücken Sie  oder , um die Rufweiterleitung zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.
- 

## Einstellen des Menü-Timers

Mit dieser Funktion können Sie festlegen, wie lange Ihr Funkgerät das Menü anzeigt, bevor es automatisch wieder auf den Ausgangsbildschirm umschaltet. Folgen Sie den Anweisungen, um den Menü-Timer einzustellen.

1 Drücken Sie , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Anzeige. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis Menü-Timer. Drücken Sie  , um die Option auszuwählen.

---

6 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  , um die Option auszuwählen.

---

## Ein-/Ausschalten der Analogmikrofon-AGC

Die automatische Verstärkungsregelung (Automatic Gain Control, AGC) des Analogmikrofons steuert die Mikrofonverstärkung des Funkgeräts beim Senden in einem analogen System automatisch. Diese Funktion unterdrückt laute Geräusche oder verstärkt leise Geräusche. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten. Befolgen Sie die Vorgehensweise zum Ein-

oder Ausschalten der Analogmikrofon-AGC auf Ihrem Funkgerät.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis MikAGC-A. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  , um Analogmikrofon-AGC zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Ein-/Ausschalten der Digitalmikrofon-AGC

Die automatische Verstärkungsregelung (Automatic Gain Control, AGC) des Digitalmikrofons steuert die Mikrofonverstärkung des Funkgeräts beim Senden in einem digitalen System automatisch.

Diese Funktion unterdrückt laute Geräusche oder verstärkt leise Geräusche. Hierbei wird ein voreingestellter Wert verwendet, um eine konsistente Lautstärke zu gewährleisten. Befolgen Sie die Vorgehensweise zum Ein- oder Ausschalten der Digitalmikrofon-AGC auf Ihrem Funkgerät.

- 1 Drücken Sie , um das Menü aufzurufen.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis MikAGC-D. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie , um Digital Microphone AGC zu aktivieren oder zu deaktivieren.

Im Display wird eines der folgenden Ergebnisse angezeigt:

- Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
- Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

## Ein-/Ausschalten der Lautstärkeregelung

Die Audiolautstärke Ihres Funkgeräts wird automatisch so geregelt, dass sie an aktuelle Hintergrundgeräusche in der Umgebung des Funkgeräts, einschließlich stationärer und nicht stationärer Geräuschquellen, angepasst und entsprechend kompensiert wird. Diese Funktion betrifft nur den Empfang und hat keinen Einfluss auf das Sendeaudio. Befolgen Sie die Vorgehensweise zum Ein- und Ausschalten der Lautstärkeregelung auf Ihrem Funkgerät.

### HINWEIS:

Während einer Bluetooth-Sitzung ist diese Funktion nicht verfügbar.

- 1 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie die programmierte Taste **Intelligentes Audio**. Überspringen Sie die nachfolgenden Schritte.
    - Drücken Sie , um das Menü aufzurufen.
- 

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.
- 

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.
- 

- 4 Drücken Sie  oder  bis Intelligentes Audio. Drücken Sie , um die Option auszuwählen.
- 

- 5 Führen Sie einen der folgenden Schritte aus:
    - Drücken Sie  oder  bis Ein. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
    - Drücken Sie  oder  bis Aus. Drücken Sie , um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.
-

## Aktivieren/Deaktivieren der Funktion „Sperre akustischer Rückkopplungen“

Mit dieser Funktion können Sie die Rückkopplungsunterdrückung bei eingehenden Anrufen reduzieren. Befolgen Sie die Vorgehensweise zum Aktivieren bzw. Deaktivieren der Rückkopplungsunterdrückung (AFS) auf Ihrem Funkgerät.

- 1 Drücken Sie  , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen..

---

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis AR-Sperre. Drücken Sie  , um die Option auszuwählen.

---

- 5 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie  , um die Sperre akustischer Rückkopplungen zu aktivieren. Wenn diese Option aktiviert ist, wird  neben Aktiviert angezeigt.
  - Drücken Sie  , um die Sperre akustischer Rückkopplungen zu deaktivieren. Wenn diese Option deaktiviert ist, wird  neben Aktiviert angezeigt.

---

## Ein-/Ausschalten der Funktion „Vibrant-Verbesserung“

Sie können diese Funktion beim Sprechen in einer Sprache aktivieren, die viele alveolare Vibranten (rollendes „R“) enthält. Führen Sie die Vorgehensweise zum Ein- und Ausschalten der Funktion „Vibrant-Verbesserung“ auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Vibrant-Verbesserung**. Überspringen Sie die nachfolgenden Schritte.
- Drücken Sie  , um das Menü aufzurufen.

2

Drücken Sie  oder  bis

Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3

Drücken Sie  oder  bis

Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

4

Drücken Sie  oder  bis Trill-Ton-

Erweiterung. Drücken Sie  , um die Option auszuwählen.

5 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Ein. Drücken Sie  , um die Option auszuwählen. Im Display wird ✓ neben Ein angezeigt.
- Drücken Sie  oder  bis Aus. Drücken Sie  , um die Option auszuwählen. Im Display wird ✓ neben Aus angezeigt.

## Audioumgebung

Sie können die Audioumgebung für Ihr Funkgerät an Ihre Umgebung anpassen.

### Standard

Dies ist die Standardeinstellung.

### Laut

Diese Einstellung aktiviert die Rauschunterdrückung und erhöht die Lautstärke des Lautsprechers für den Einsatz in lauten Umgebungen.

### Arbeitsgruppe

Diese Einstellung aktiviert die AR-Sperre und deaktiviert die automatische Verstärkungsregelung (AGC), wenn eine Gruppe von Funkgeräten sich in unmittelbarer Nähe zueinander befindet.

## Einstellen der Audioumgebung

Befolgen Sie die Vorgehensweise zum Einstellen der Audioumgebung Ihres Funkgeräts in Abhängigkeit zu Ihrer Umgebung.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Audioumgebung. Drücken Sie , um die Option auszuwählen.

---

- 5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie , um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie **Standard** für die werkseitigen Voreinstellungen aus.
- Wählen Sie **Laut** aus, um die Lautstärke zu erhöhen, wenn Sie sich in geräuschvollen Umgebungen befinden.
- Wählen Sie **Arbeitsgruppe**, um das akustische Feedback zu reduzieren, wenn Sie eine Reihe von Funkgeräten benutzen, die sich nahezu an derselben Position befinden.

Auf dem Display wird  neben der ausgewählten Einstellung angezeigt.

## Audio-Profile

Sie können die Audio-Profile für Ihr Funkgerät an Ihre Wünsche anpassen.

## Standard

Dies ist die Standardeinstellung.

## Ebene 1, Ebene 2 und Ebene 3

Diese Einstellungen sind Audio-Profile zur Beseitigung von lärmbedingten Hörverlusten, die typisch für Erwachsene ab dem 40. Lebensjahr sind.

## Höhensteigerung, Mittensteigerung und Bassteigerung

Diese Einstellungen sorgen für einen klareren, etwas nasaleren und einen tieferen Klang.

## Einstellen von Audio-Profilen

Führen Sie die Vorgehensweise zum Einstellen von Audio-Profilen auf Ihrem Funkgerät durch.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Funkgeräteeinstellungen. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Audio-Profile. Drücken Sie  , um die Option auszuwählen.

---

5 Drücken Sie  oder  bis zur gewünschten Einstellung. Drücken Sie  , um die Option auszuwählen.

Die Einstellungen sind wie folgt:

- Wählen Sie **Standard** zum Deaktivieren des zuvor ausgewählten Audioprofils und zum Zurückkehren zu den werkseitigen Voreinstellungen.
- Wählen Sie **Ebene 1, Ebene 2 oder Ebene 3** für Audio-Profile zur Vermeidung von lärmbedingten Hörverlusten, die typisch für Erwachsene ab dem 40. Lebensjahr sind.
- Wählen Sie **Höhensteig.**, **Mittensteigerung**, oder **Bassteigerung** für Audio-Profile mit

einem klareren, etwas nasaleren und einen tieferen Klang.

Auf dem Display wird ✓ neben der ausgewählten Einstellung angezeigt.

## Einschalten/Ausschalten von GNSS

Das Global Navigation Satellite System (GNSS) ist ein Satellitennavigationssystem, das die genaue Position des Funkgeräts ortet. GNSS umfasst Global Positioning System (GPS) und Global Navigation Satellite System (GLONASS).

### HINWEIS:

Ausgewählte Funkgerätmodelle bieten möglicherweise GPS und GLONASS. Die GNSS-Konstellation wird über CPS konfiguriert. Klären Sie mit Ihrem Händler oder Systemadministrator, wie das Funkgerät konfiguriert wurde.

- 1 Führen Sie einen der folgenden Schritte aus, um GNSS des Funkgeräts ein- oder auszuschalten.
  - Drücken Sie die programmierte Taste **GNSS**.
  - Drücken Sie , um das Menü aufzurufen. Fahren Sie mit dem nächsten Schritt fort.

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

- 3 Drücken Sie  oder  bis Funkgeräteinstellungen. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis GNSS. Drücken Sie , um die Option auszuwählen.

- 5 Drücken Sie , um GNSS zu aktivieren/deaktivieren.  
 Wenn diese Option aktiviert ist, wird ✓ neben Aktiviert angezeigt.  
 Wenn diese Option deaktiviert ist, wird ✓ neben Aktiviert angezeigt.

## Flexible Empfangen-Liste

Mit der Funktion „Flexible Empfangen-Liste“ können Sie Mitglieder für die Empfänger-Gesprächsgruppenliste erstellen und zuweisen. Ihr Funkgerät unterstützt höchstens 16 Mitglieder in der Liste. Diese Funktion wird in Capacity Plus nicht unterstützt.

## Ein-/Ausschalten der flexiblen Empfangen-Liste

Führen Sie die Vorgehensweise zum Ein- und Ausschalten der flexiblen Empfangen-Liste aus.

1 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie die programmierte Taste **Flexible Empfangen-Liste**. Überspringen Sie die folgenden Schritte.
- Drücken Sie , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Flex. RX-Liste.  
Drücken Sie , um die Option auszuwählen.

3 Führen Sie einen der folgenden Schritte aus:

- Drücken Sie  oder  bis Einschalten.  
Drücken Sie , um die Option auszuwählen.  
Ein positiver Hinweiston erklingt.  
Im Display wird ein positiver Kurzhinweis angezeigt.
- Drücken Sie  oder  bis Abschalten.  
Drücken Sie , um die Option auszuwählen.  
Ein negativer Hinweiston erklingt.  
Im Display wird ein negativer Kurzhinweis angezeigt.

## Allgemeine Informationen zum Funkgerät

In Ihrem Funkgerät sind Daten zu verschiedenen Parametern gespeichert.

Zu den allgemeinen Informationen Ihres Funkgeräts gehören:

- Funkgerät-Alias und Funkgeräte-ID

- Firmware- und Codeplug-Version
- Software-Aktualisierung
- GNSS-Informationen
- Standort-Informationen

### HINWEIS:

Drücken Sie  , um zum vorangehenden Bildschirm zurückzukehren. Drücken Sie  lang, um zum Startbildschirm zurückzukehren. Das Funkgerät verlässt den aktuellen Bildschirm, sobald der Inaktivitäts-Timer abgelaufen ist.

## Prüfen des Funkgerät-Alias und der ID

Führen Sie die Vorgehensweise zum Überprüfen des Funkgerät-Alias und der ID auf Ihrem Funkgerät durch.

- 1 Führen Sie einen der folgenden Schritte aus:
  - Drücken Sie die programmierte Taste **Funkgerät-Alias und ID**. Überspringen Sie die folgenden Schritte.  
Ein positiver Hinweisston erklingt.

Sie können die programmierte Taste **Funkgerät-Alias und ID** drücken, um zum vorhergehenden Bildschirm zurückzukehren.

- Drücken Sie  , um das Menü aufzurufen.

- 
- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

- 
- 3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie  , um die Option auszuwählen.

- 
- 4 Drücken Sie  oder  bis Meine ID. Drücken Sie  , um die Option auszuwählen.

In der ersten Textzeile wird der Funkgerät-Aliasname angezeigt. In der zweiten Textzeile wird die Funkgerät-ID angezeigt.

## Überprüfen der Firmware- und Codeplug-Versionen

Führen Sie die Vorgehensweise zum Überprüfen der Firmware- und Codeplug-Version Ihres Funkgeräts durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie , um die Option auszuwählen.

---

- 4 Drücken Sie  oder  bis Versionen. Drücken Sie , um die Option auszuwählen.  
Im Display wird die aktuelle Firmware- und Codeplug-Version angezeigt.

## Überprüfen der Software-Aktualisierungsinformationen

Diese Funktion zeigt das Datum und die Zeit der letzten Softwareaktualisierung, die über Over-the-Air-Programming (OTAP) oder WLAN durchgeführt wurde. Führen Sie die Vorgehensweise zum Überprüfen der Softwareaktualisierungsfunktionen auf Ihrem Funkgerät durch.

- 1 Drücken Sie , um das Menü aufzurufen.

---

- 2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie , um die Option auszuwählen.

---

- 3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie , um die Option auszuwählen.

- 4 Drücken Sie  oder  bis SW-Update.  
Drücken Sie  , um die Option auszuwählen.  
Im Display werden das Datum und die Uhrzeit der letzten Software-Aktualisierung angezeigt.

Das Menü für die Software-Aktualisierung ist erst nach mindestens einer erfolgreichen OTAP- oder WLAN-Sitzung verfügbar. Weitere Informationen finden Sie unter [Over-the-Air Programmierung \(OTAP\) auf Seite 524](#).

## Überprüfen der GNSS-Informationen

Sie können GNSS-Informationen Ihres Funkgeräts anzeigen, d. h. Werte wie die folgenden:

- Breitengrad
- Längengrad
- Höhe
- Richtung
- Geschwindigkeit
- Horizontal Dilution of Precision (HDOP – Streubreite der Messwerte in Horizontalrichtung)

- Satelliten
- Version

1 Drücken Sie  , um das Menü aufzurufen.

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

3 Drücken Sie  oder  bis Geräteinfo.  
Drücken Sie  , um die Option auszuwählen.

4 Drücken Sie  oder  bis GNSS Info.  
Drücken Sie  , um die Option auszuwählen.

5 Drücken Sie  oder  bis zum gewünschten Element. Drücken Sie  , um die Option auszuwählen. Im Display werden die gewünschten GNSS-Informationen angezeigt.

## Anzeigen von Standort-Informationen

Befolgen Sie die Vorgehensweise, um den aktuellen Standortnamen anzuzeigen, an dem sich Ihr Funkgerät befindet.

1 Drücken Sie  , um das Menü aufzurufen.

---

2 Drücken Sie  oder  bis Dienstprogramme. Drücken Sie  , um die Option auszuwählen.

---

3 Drücken Sie  oder  bis Geräte-Info. Drücken Sie  , um die Option auszuwählen.

---

4 Drücken Sie  oder  bis Standortinformationen. Drücken Sie  , um die Option auszuwählen.

---

Das Display zeigt den aktuellen Standortnamen an.

# Beschränkte Garantie

## KOMMUNIKATIONSPRODUKTE VON MOTOROLA SOLUTIONS

### I. UMFANG UND DAUER DES GARANTIEANSPRUCHS

Motorola Solutions, Inc. („Motorola Solutions“) garantiert hiermit, dass die von Motorola Solutions hergestellten Kommunikationsprodukte („Produkte“) ab dem Kaufdatum für die nachstehend aufgeführte Dauer unter normalem Gebrauch und Betrieb frei von Materialfehlern und Verarbeitungsmängeln sind.

DM-Serie Digitale funkgeräte	24 Monate
Produktzubehör	12 Monate

Motorola Solutions führt nach eigenem Ermessen innerhalb der Garantiezeit kostenlos die Reparatur des Produkts (mit Neu- oder erneuerten Teilen) durch oder ersetzt es (durch ein Neu- oder erneuertes Produkt) oder erstattet den

Kaufpreis des Produkts, sofern das Produkt gemäß den Bedingungen dieser Garantie an Motorola Solutions retourniert wird. Ersatzteile oder -platinen stehen dann für den Rest der ursprünglichen Garantiezeit unter Garantie. Alle ersetzten Teile des Produkts werden Eigentum von Motorola Solutions.

Diese ausdrückliche eingeschränkte Garantie von Motorola Solutions gilt nur für den ursprünglichen Endabnehmer/ Käufer und ist nicht übertragbar. Dies ist die vollständige Garantie für das von Motorola Solutions hergestellte Produkt. Motorola Solutions übernimmt keine Verpflichtungen oder Haftung für Ergänzungen oder Änderungen an dieser Garantie, außer in schriftlicher Form und von einem Handlungsbevollmächtigten von Motorola Solutions unterschrieben.

Sofern dies nicht in einem separaten Vertrag zwischen Motorola Solutions und dem ursprünglichen Endabnehmer/ Käufer festgelegt wurde, gewährt Motorola Solutions keine Garantie für die Installation, Instandhaltung oder Wartung des Produkts.

Motorola Solutions übernimmt keinerlei Haftung für nicht von Motorola Solutions bereitgestellte Zusatzausrüstung, die an dem Produkt angebracht ist oder in Verbindung mit dem Produkt verwendet wird, oder für den Betrieb des Produkts mit Zusatzausrüstung. Sämtliche

Zusatzausrüstung ist ausdrücklich von dieser Garantie ausgeschlossen. Da jedes System, in dem das Produkt zur Anwendung kommen kann, individuell ist, übernimmt Motorola Solutions im Rahmen dieser Garantie keine Haftung für die Reichweite, die Abdeckung oder den Betrieb des Systems als Ganzes.

## II. ALLGEMEINE GARANTIEBEDINGUNGEN

Diese Garantie stellt den maximalen Umfang der Verantwortlichkeiten von Motorola Solutions hinsichtlich des Produkts dar. Reparatur, Ersatz oder Kaufpreiserstattung nach Ermessen von Motorola Solutions sind die ausschließlichen Rechtsmittel des Verbrauchers. DIESE GARANTIE WIRD ANSTELLE ALLER ANDEREN AUSDRÜCKLICHEN GARANTIEN GEWÄHRT. ALLE KONKLUDENTEN GEWÄHRLEISTUNGEN, EINSCHLIESSLICH, OHNE EINSCHRÄNKUNG, DER KONKLUDENTEN GARANTIE DER MARKTGÄNGIGKEIT ODER EIGNUNG FÜR EINEN BESTIMMTEN ZWECK, SIND AUF DIE DAUER DIESER BESCHRÄNKTEN GARANTIE BEGRENZT. IN KEINEM FALL HAFTET MOTOROLA SOLUTIONS FÜR SCHÄDEN, DIE ÜBER DEN KAUFPREIS DES JEWEILIGEN PRODUKTS HINAUSGEHEN, ODER FÜR NUTZUNGSSCHÄDEN,

ZEITVERLUST, UNANNEHMLICHKEITEN, ENTGANGENE GESCHÄFTSMÖGLICHKEITEN, ENTGANGENE GEWINNE ODER EINNAHMEN ODER ANDERE BEILÄUFIGE, SONDER- ODER FOLGESCHÄDEN, DIE IM ZUSAMMENHANG MIT DER NUTZUNG ODER NICHTVERWENDBARKEIT DES PRODUKTS ENTSTEHEN, UND ZWAR IM GRÖSSTMÖGLICHEN DURCH DAS ANWENDBARE RECHT GESTATTETEN UMFANG.

## III. STAATSGESETZE (NUR FÜR USA):

EINIGE STAATEN VERBIETEN DIE EINSCHRÄNKUNG ODER DEN AUSSCHLUSS VON BEGLEIT- ODER FOLGESCHÄDEN ODER DIE BESCHRÄNKUNG DER GELTUNGSDAUER EINER KONKLUDENTEN GARANTIE, SO DASS DIE OBIGEN EINSCHRÄNKUNGEN ODER AUSSCHLÜSSE EVENTUELL NICHT ANWENDBAR SIND.

Diese Garantie gesteht Ihnen spezifische Rechte zu. Sie haben unter Umständen auch andere Rechte, die je nach Staat variieren.

## IV. INANSPRUCHNAHME VON GARANTIELEISTUNGEN

Zur Inanspruchnahme von Garantieleistungen muss der Kaufnachweis (aus dem das Kaufdatum und die Seriennummer des Artikels hervorgehen) vorgelegt werden, und das Produkt muss unter Vorauszahlung der Versicherungs- und Frachtkosten einer autorisierten Garantieservicestelle zugestellt werden. Motorola Solutions erbringt die Garantieleistungen durch eine seiner autorisierten Garantieservicestellen. Wenden Sie sich zunächst an das Unternehmen, das Ihnen das Produkt verkauft hat (z. B. Händler oder Kommunikationsdienstleister). Dieses Unternehmen hilft Ihnen dann, die Garantieleistungen in Anspruch zu nehmen. In den USA und Kanada können Sie Motorola Solutions unter 1-800-927-2744 telefonisch kontaktieren.

## V. HAFTUNGSAUSSCHLUSS

- 1 Defekte oder Schäden, die aus einer Verwendung des Produkts resultieren, die nicht der normalen und üblichen Art entspricht.
- 2 Defekte oder Schäden, die aus unsachgemäßer Handhabung, Unfällen, Wasserschäden oder Fahrlässigkeit resultieren.

[Feedback senden](#)

- 3 Defekte oder Schäden, die aus unzulässigem Test oder Betrieb, unzulässiger Wartung oder Installation sowie unzulässigen Änderungen oder Adaptierungen resultieren.
- 4 Verlust oder Schäden an Antennen, soweit nicht direkt durch Material- und Verarbeitungsfehler verursacht.
- 5 Produkte, an denen unbefugte Produktänderungen, -zerlegungen oder -reparaturen (insbesondere Ergänzungen des Produkts durch nicht von Motorola Solutions gelieferte Geräte) vorgenommen werden, die sich negativ auf die Leistung des Produkts auswirken oder die normale Inspektion und Testläufe des Produkts im Rahmen der Garantie zur Beurteilung eines Garantieanspruchs stören.
- 6 Produkte, bei denen die Seriennummer entfernt oder unlesbar gemacht wurde.
- 7 Akkus, wenn:
  - Dichtungen der Akkuzellengehäuse aufgebrochen wurden oder Zeichen einer Manipulation zeigen.
  - Der Schaden oder Defekt durch Aufladen oder Verwenden des Akkus in Geräten oder unter Betriebsverhältnissen erfolgt ist, für die das Produkt nicht spezifiziert ist.
- 8 Frachtkosten zur Reparaturwerkstatt.

- 9 Ein Produkt, das aufgrund illegaler oder nicht autorisierter Änderung der Software/Firmware im Produkt nicht den von Motorola Solutions veröffentlichten Spezifikationen oder der angegebenen FCC-Zertifizierung entspricht, die für das Produkt zum Zeitpunkt der ersten Auslieferung durch Motorola Solutions gelten.
- 10 Kratzer oder kosmetische Schäden an Produktoberflächen, die den Betrieb des Produkts nicht beeinträchtigen.
- 11 Normaler und üblicher Verschleiß.

## VI. PATENTE UND SOFTWARE-BEDINGUNGEN

Motorola Solutions übernimmt auf eigene Kosten die Verteidigung des Endbenutzers/Käufers gegen sämtliche vorgebrachten Klagen auf Basis eines Anspruchs, das Produkt oder eines seiner Bestandteile verstieße(n) gegen ein US-amerikanisches Patent, und Motorola Solutions kommt für gegen den Endbenutzer/Käufer durch ein Gerichtsurteil verhängte Kosten und Schadensersatzansprüche auf, die aus einer derartigen Klage resultieren. Eine derartige Verteidigung und Zahlungen unterliegen jedoch folgenden Bedingungen:

- 1 Motorola Solutions wird von einem solchen Käufer unverzüglich schriftlich über jede Ankündigung eines solchen Anspruchs benachrichtigt,
- 2 Motorola Solutions hat die alleinige Kontrolle über die Verteidigung gegen solche Klagen und alle Verhandlungen zu deren Schlichtung oder Vergleich, und
- 3 sollte ein derartiger Käufer Motorola Solutions nach deren Ermessen und auf deren Kosten erlauben, für einen derartigen Käufer das Recht zu erwerben, das Produkt oder Teile desselben weiterhin zu verwenden, zu ersetzen oder zu modifizieren, sodass es gegen keine Patente verstößt, oder einem derartigen Käufer eine Gutschrift für das Produkt oder die Bestandteile bzw. deren Abschreibungsrestwert ausstellt und seine Rückgabe annimmt, wenn das Produkt oder Teile davon Gegenstand (oder im Ermessen von Motorola Solutions wahrscheinlich Gegenstand) eines Anspruchs einer derartigen Verletzung eines US-amerikanischen Patents werden sollte(n). Der Abschreibungsrestwert ist ein von Motorola Solutions ermittelter, gleichwertiger Betrag pro Jahr über die Lebensdauer des Produkts oder dessen Teile.

Motorola Solutions übernimmt keine Haftung hinsichtlich Ansprüchen für Patentverletzungen, die auf einer

Kombination von hierunter geliefertem Produkt und Bestandteilen mit nicht von Motorola Solutions bereitgestellter/n Software, Vorrichtungen oder Geräten basieren. Des Weiteren lehnt Motorola Solutions jegliche Verantwortung für nicht von Motorola Solutions bereitgestellte Zusatzausrüstung oder Software ab, die in Verbindung mit dem Produkt benutzt wird. Das Vorangehende stellt die gesamte Haftung von Motorola Solutions hinsichtlich der Verletzung von Patenten durch das Produkt und dessen Bestandteile dar.

Für urheberrechtlich geschützte Motorola Solutions-Software liegen in den Vereinigten Staaten und anderen Ländern per Gesetz bestimmte Exklusivrechte für Motorola Solutions vor, wie z. B. das Exklusivrecht für die Vervielfältigung oder den Vertrieb von Kopien solcher Motorola Solutions-Software. Motorola Solutions-Software darf ausschließlich mit dem Produkt verwendet werden, in das diese Software ursprünglich integriert war, und die Software in einem derartigen Produkt darf nicht ersetzt, kopiert, verteilt und in irgendeiner Weise modifiziert oder zum Herstellen abgeleiteter Erzeugnisse verwendet werden. Kein anderer Gebrauch derartiger Motorola Solutions-Software, einschließlich Änderung, Modifikation, Reproduktion, Distribution oder Reverse Engineering bzw. Nachkonstruktion, aber nicht darauf begrenzt, und keine Ausübung von Rechten an derartiger Motorola Solutions-

Software ist zulässig. Unter Patentschutz und Urheberrecht von Motorola Solutions wird keine Lizenz stillschweigend, durch Verwirkung eines Rechts oder auf sonstige Weise erteilt.

## VII. ANWENDBARES RECHT

Diese Garantieerklärung unterliegt den Gesetzen des Staates Illinois der USA.

# Información importante sobre seguridad

## Guía de exposición de energía a radiofrecuencia y seguridad del producto para radios bidireccionales portátiles

### ¡ATENCIÓN!

**Esta radio está exclusivamente restringida al uso laboral.** Antes de utilizar la radio, lea la guía de exposición a radiofrecuencia y seguridad del producto para radios bidireccionales móviles, que contiene importantes instrucciones de funcionamiento para un uso seguro, así como información importante sobre la energía de radiofrecuencia y su control, en cumplimiento de las normas y normativas aplicables.

Para obtener una lista de las antenas y otros accesorios aprobados por Motorola Solutions, visite el siguiente sitio web:

<http://www.motorolasolutions.com>

Esta página se ha dejado en blanco intencionadamente.

## Versión del software

Todas las funciones que se describen en las secciones siguientes son compatibles con la versión del software **R02.08.05.0000** o posterior.

Consulte [Verificación de las versiones de firmware y de Codeplug en la página 231](#) para determinar la versión del software de su radio.

Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Esta página se ha dejado en blanco intencionadamente.

## Copyright

Los productos de Motorola Solutions descritos en el presente documento pueden incluir programas informáticos de Motorola Solutions protegidos por derechos de copyright. Las leyes de los Estados Unidos y otros países garantizan determinados derechos exclusivos a Motorola Solutions sobre los programas informáticos protegidos por copyright. Por consiguiente, ningún programa informático de Motorola Solutions protegido por copyright incluido entre los productos de Motorola Solutions descritos en este documento podrá copiarse ni reproducirse de ninguna forma sin el consentimiento expreso por escrito de Motorola Solutions.

## Directiva de Residuos de Aparatos Eléctricos y Electrónicos (RAEE) de la Unión Europea

■ La directiva de Gestión de Residuos de Aparatos Eléctricos y Electrónicos de la Unión Europea requiere que los productos que se vendan en los países de la UE tengan tachado el símbolo de la papelera en la etiqueta del producto y, en algunos casos, en el embalaje.

De acuerdo con lo establecido en la directiva de Gestión de Residuos de Aparatos Eléctricos y Electrónicos, el símbolo de la papelera tachado significa que los clientes y los usuarios finales residentes en la UE no pueden desechar equipos eléctricos ni accesorios como residuos domésticos.

Los clientes o los usuarios finales de los países de la UE deben ponerse en contacto con el representante del proveedor o servicio local para obtener información sobre el sistema de recogida de desechos de su país.

## Derechos de autor del software informático

Los productos de Motorola Solutions descritos en el presente manual pueden incluir programas informáticos de Motorola Solutions protegidos por derechos de copyright almacenados en memorias de semiconductores o en otro tipo de medios. Las leyes de los Estados Unidos y de otros países preservan ciertos derechos exclusivos de Motorola Solutions con respecto a los programas informáticos protegidos por derechos de autor, que incluyen, entre otros, el derecho exclusivo de copia o reproducción en cualquier formato de un programa informático protegido por derechos de autor. Por consiguiente, se prohíbe la copia, la reproducción, la modificación, el uso de técnicas de ingeniería inversa y la distribución de forma alguna de todo programa informático de Motorola Solutions protegido por copyright e incluido en los productos de Motorola Solutions descritos en el presente manual sin el consentimiento expreso por escrito de Motorola Solutions. Asimismo, la adquisición de los productos de Motorola Solutions no garantiza, de forma implícita ni explícita, por impedimento legal ni de ningún otro modo, ningún tipo de licencia en lo que respecta a los derechos de copyright, las patentes o las solicitudes de patentes de Motorola Solutions, excepto en los casos de uso de licencias

normales y no excluyentes derivados de la ejecución de la ley en la venta de un producto.

## Precauciones de manipulación

La radio portátil digital de la serie MOTOTRBO cumple las especificaciones IP67, lo que le permite soportar condiciones adversas como estar sumergidos en agua. En esta sección se describen algunas precauciones de manipulación básicas.

### PRECAUCIÓN:

No desmonte la radio. Esto podría dañar las juntas de la radio y provocar filtraciones. El mantenimiento de la radio deberá realizarse únicamente en un servicio técnico equipado para probar y cambiar las juntas de la radio.

- Si la radio se ha sumergido en agua, agítela bien para eliminar el agua que pudiera haber quedado dentro de la rejilla del altavoz y del puerto del micrófono. Si quedara agua dentro podría afectar a la calidad del sonido.
- Si el área de contacto de la batería de la radio ha estado expuesta al agua, limpie y seque los contactos de la batería tanto en la radio, como en la batería, antes de volver a colocarla. El agua residual podría provocar un cortocircuito en la radio.

- Si la radio ha estado sumergida en una sustancia corrosiva (por ejemplo, agua salada), enjuague la radio y la batería con agua dulce y seque ambos componentes.
- Para limpiar las superficies exteriores de la radio, utilice una solución diluida de detergente suave de lavavajillas y agua dulce (por ejemplo, una cucharadita de detergente por cada 4 litros de agua).
- No bloquee nunca el conducto de ventilación (orificio) situado en el chasis de la radio, por debajo del contacto de la batería. Este conducto permite igualar la presión de la radio. Si lo hiciera, podrían producirse filtraciones dentro de la radio y el dispositivo perdería sus propiedades de ser sumergible.
- No obstruya ni cubra nunca el conducto de ventilación, ni siquiera con una etiqueta.
- Asegúrese de que ninguna sustancia aceitosa entre en contacto con el conducto de ventilación.
- La radio con antena conectada correctamente se ha diseñado para sumergirse a una profundidad máxima de 1 metro (3,28 pies), durante un máximo de 30 minutos. Rebasar cualquiera de estos límites o el uso de la radio sin antena, podría provocar daños en la radio.

- Al limpiar la radio, no utilice un pulverizador de chorro de alta presión, ya que excedería la presión de 1 metro de profundidad y podría provocar la filtración de agua en la radio.

## Funcionamiento básico

En este capítulo se explican las operaciones para comenzar a utilizar la radio.

### Encendido de la radio

Siga el procedimiento para encender la radio.

Pulse el botón de **encendido/apagado**.

---

Si es correcta:

- Suena un tono.
- El indicador LED verde se ilumina.
- La pantalla muestra **MOTOTRBO <TM>**, seguido de una imagen o un mensaje de bienvenida.
- La pantalla de inicio se ilumina.

Si la función Tonos/alertas está desactivada, no se oirá ningún tono al encenderse.

Compruebe la batería si la radio no se enciende. Asegúrese de que está cargada y conectada correctamente. Póngase en contacto con su distribuidor si la radio sigue sin encenderse.

[Enviar comentarios](#)

### Apagado de la radio

Siga el procedimiento para apagar la radio.

Mantenga pulsado el botón de **encendido/apagado**.

La radio puede tardar hasta siete segundos en apagarse completamente.

La pantalla mostrará el mensaje **Apagando**.

---

### Ajuste del volumen

Siga el procedimiento para cambiar el nivel de volumen de la radio.

Lleve a cabo una de las siguientes acciones:

- Gire el **botón de volumen/encendido/apagado** en el sentido de las agujas del reloj para subir el volumen.
- Gire el **botón de volumen/encendido/apagado** en el sentido contrario a las agujas del reloj para bajar el volumen.

**NOTA:**

La radio se puede programar para que presente una diferencia de volumen mínima cuando no se pueda bajar el nivel de volumen más allá del volumen mínimo programado. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

---

## Controles de la radio

En este capítulo se explican los botones y las funciones para controlar la radio.

- 1 Botón de encendido/apagado/información
- 2 Selector de volumen/canales
- 3 Pantalla
- 4 Botón de Menú/OK
- 5 Botones de desplazamiento hacia arriba/abajo
- 6 Altavoz

- 7 Botón para volver e ir al inicio
- 8 Botones frontales programables
- 9 Conector de accesorios
- 10 Indicadores LED

## Selector de volumen/canales

El **selector de volumen/canales** se puede programar como control de volumen y de canal, o como control de volumen exclusivamente.

Para ajustar el volumen, consulte [Ajuste del volumen en la página 43](#).

Para cambiar de canal, mantenga pulsado el **selector de volumen/canales** hasta que se muestre el estado de la selección de canal. Gire el **selector de volumen/canales** para seleccionar el canal. Realice una de las siguientes acciones para salir del estado de la selección de canal:

- Pulse el **selector de volumen/canales**.
- Pulse .
- Pulse .

- Espere hasta que el temporizador del menú llegue a su fin.

## Configuración de las preferencias de funcionamiento del botón doble

Siga el procedimiento para establecer las preferencias de funcionamiento del botón doble de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

## Botones del micrófono con teclado

Puede utilizar el teclado alfanumérico de 3 x 4 en el micrófono de navegación tetradireccional (número de pieza de Motorola Solutions RMN5127\_) para acceder las funciones de la radio. Muchos caracteres requieren que se pulse una

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para Botón doble. Pulse  para seleccionar.  
La pantalla muestra Volum. solo y Volum. y can.

---

- 5 Pulse  o  para ir al ajuste que desee.  
Pulse  para seleccionar.  
✓ aparece junto a la configuración seleccionada. La pantalla vuelve al menú anterior.

tecla varias veces. La tabla muestra el número de veces que se necesita pulsar una tecla para escribir el carácter que desee.

Tecla	Número de veces que debe pulsarse la tecla												
	1	2	3	4	5	6	7	8	9	10	11	12	13
1 .,?	1	.	,	?	!	@	&	'	%	—	:	*	#
2 ABC	A	B	C	2									
DEF 3	D	E	F	3									
4 GHI	G	H	I	4									
5 JKL	J	K	L	5									
MNO 6	M	N	O	6									

Tabla (continuación)...

Tecl a	Número de veces que debe pulsarse la tecla												
	1	2	3	4	5	6	7	8	9	10	11	12	13
	P	Q	R	S	7								
	T	U	V	8									
	W	X	Y	Z	9								
	0		<b>NOTA:</b> Presione para introducir “0” y pulse de manera prolongada para activar el bloqueo de Mayúsculas. Otra pulsación larga lo desactivará.										
	* o DEL (Sup rimir)		<b>NOTA:</b> Pulse durante la introducción de texto para borrar el carácter. Presione durante la introducción numérica para introducir un “*”.										
	# o espa cio		<b>NOTA:</b> Pulse durante la introducción de texto para insertar un espacio. Pulse durante la introducción numérica para introducir una “#”.										

## WAVE

El entorno de voz de área ancha (WAVE™) proporciona un nuevo método de realización de llamadas entre dos radios.

Esta característica también es compatible con las llamadas entre radios y otros dispositivos con capacidades WAVE. Sin embargo, un canal WAVE debe estar configurado para utilizar esta función.

Cuando se encuentra en un canal WAVE, la radio no puede recibir llamadas de otros sistemas y solo puede recibir llamadas WAVE.

Si la radio se encuentra en un canal WAVE, la radio activa la conexión Wi-Fi automáticamente e inicia sesión en el servidor WAVE. Las llamadas WAVE se realizan cuando la radio está conectada a una red IP a través de Wi-Fi.

### NOTA:

Esta función es aplicable únicamente a DM4601e.

### Tabla 1: Iconos de pantalla de WAVE

Los siguientes iconos aparecen momentáneamente en la pantalla cuando WAVE está activada.

	<b>WAVE conectada</b> WAVE está conectada.
	<b>WAVE desconectada</b> WAVE está desconectada.

## Configuración del Canal WAVE activo

Los canales WAVE se configuran mediante CPS. Siga el procedimiento para seleccionar el canal WAVE que desee.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a `Canales de WAVE`.  
Pulse  para seleccionar.
- 3 Pulse  o  para seleccionar el canal WAVE que desee. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Establecer como activo. Pulse  para seleccionar.

La pantalla muestra  junto al canal seleccionado.

## Consulte la información del canal WAVE

Siga el procedimiento para consultar la información del canal WAVE.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programado **Lista de canales WAVE**. Omite los pasos siguientes.
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Canales de WAVE. Pulse  para seleccionar.

- 3 Pulse  o  para seleccionar el canal WAVE que desee. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Ver detalles. Pulse  para seleccionar.

La pantalla muestra los detalles del canal WAVE.

## Consulte la información de los puntos terminales WAVE

Siga el procedimiento para consultar la información de los puntos terminales WAVE.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programado **Contacto**. Saltar a [paso 3](#).
  - Pulse  para acceder al menú.

2 Pulse  o  para ir a Puntos terminales. Pulse  para seleccionar.

---

3 Pulse  o  para seleccionar el punto terminal WAVE que desee. Pulse  para seleccionar.

---

4 Pulse  para seleccionar Ver Detalles.

---

La pantalla muestra los detalles del punto terminal WAVE.

## Cambiar configuración de WAVE

Siga el procedimiento para configurar la dirección IP del servidor WAVE, el ID de usuario y la contraseña.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a WAVE. Pulse  para seleccionar.

---

5 Pulse  para seleccionar Dirección del servidor. Pulse  para cambiar la dirección del servidor. Pulse  para seleccionar.

---

6 Pulse  para acceder al ID de usuario. Pulse  para cambiar el ID de usuario. Pulse  para seleccionar.

---

7 Pulse  para acceder a la contraseña. Pulse  para ver o cambiar la contraseña de WAVE. Pulse  para seleccionar.

---

- 8 Pulse  para acceder a Aplicar. Pulse  para aplicar los cambios realizados.
- 

La pantalla muestra un miniaviso positivo momentáneamente antes de volver a la pantalla Ajustes de radio.

## Realización de llamadas de grupo

Siga el procedimiento para realizar llamadas grupales en un canal WAVE.

- 1 Seleccione el canal WAVE con el ID o alias de grupo requerido.
- 

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La primera línea de texto muestra el icono de **llamada grupal**. La segunda línea de texto muestra el alias de grupo WAVE.

---

- 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
  - Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.
- 

- 4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

---

- 5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

---

## Operaciones de Capacity Max

Capacity Max es un canal de control basado en un sistema troncalizado de radio. Las funciones disponibles para los usuarios de radio en virtud de este sistema están disponibles en este capítulo.

### Botón PTT (pulsar para hablar)

El botón **PTT** tiene dos funciones básicas.

- En el transcurso de una llamada, el botón **PTT** permite que la radio transmita a las demás radios de la llamada. El micrófono se activa cuando se pulsa el botón **PTT**.
- Cuando no hay ninguna llamada en curso, el botón **PTT** se utiliza para realizar una nueva llamada.

Mantenga pulsado el botón **PTT** para hablar. Suelte el botón **PTT** para escuchar.

Si están activados el tono de permiso para hablar o el efecto local de **PTT**, espere a que finalice el breve tono de alerta antes de hablar.

Si la función Indicación de canal libre está activada en la radio (la cual ha programado el distribuidor), oirá un breve tono de alerta en el momento en que la radio de destino (la radio que recibe la llamada) libere el botón **PTT**, lo que indica que el canal está disponible para contestar.

Se oye un tono continuo de prohibición para hablar si se interrumpe la llamada, por ejemplo cuando la radio recibe una llamada de emergencia. Debe soltar el botón **PTT**.

### Botones programables

En función de la duración de la pulsación de un botón, el distribuidor puede programar los botones programables como accesos directos a las funciones de la radio.

#### Pulsación corta

Pulsar y soltar el botón rápidamente.

#### Pulsación larga

Mantener pulsado el botón durante la duración programada.

#### NOTA:

Consulte [Funcionamiento de emergencia en la página 439](#) para obtener más información sobre la duración programada del botón de **Emergencia**.

## Funciones asignables de la radio

El distribuidor o administrador del sistema puede asignar las siguientes funciones de radio a los botones programables.

### Entorno audio

Permite que el usuario seleccione el entorno de funcionamiento de la radio.

### Perfiles de audio

Permite al usuario seleccionar el perfil de audio preferido.

### Camb. audio Bluetooth®

Alterna el direccionamiento de audio entre el altavoz interno de la radio y el accesorio externo con tecnología Bluetooth.

### Conexión de Bluetooth

Inicia una operación de detección y conexión de Bluetooth.

### Desconexión de Bluetooth

Finaliza todas las conexiones Bluetooth en curso entre dispositivos habilitados para Bluetooth y la radio.

### Bluetooth visible

Permite que la radio entre en el modo de Bluetooth visible.

### Contactos

Proporciona acceso directo a la lista de contactos.

### Alerta de llamada

Permite acceder directamente a la lista de contactos para que pueda seleccionar un contacto al que enviarle una alerta de llamada.

### Registro de llamadas

Selecciona la lista del registro de llamadas.

### Emergencia

Dependiendo de la programación, inicia o cancela una llamada o una alarma de emergencia.

### Dirección pública (PA) externa

Alterna el direccionamiento de audio entre el amplificador del altavoz de PA conectado y el sistema de PA interno de la radio.

### Restablecer canal base

Configura un nuevo canal base.

### Silenciar recordatorio de canal base

Silencia el recordatorio de canal de inicio.

**Ubicación en interiores**

Activa o desactiva la ubicación en interiores.

**Audio inteligente**

Permite activar o desactivar el Audio inteligente.

**Marcación manual**

Inicia una llamada privada al teclear cualquier ID de suscriptor.

**Roam manual del sitio**

Inicia la búsqueda de sitio manual.

**Mic AGC**

Activa o desactiva el control automático de ganancia (AGC) del micrófono interno.

**Notificaciones**

Proporciona acceso directo a la lista de notificaciones.

**Acceso de marcación rápida**

Inicia directamente una difusión, llamada privada, telefónica o a grupo, una alerta de llamada o un mensaje de texto rápido predefinidos.

**Función de tarjeta opcional**

Activa o desactiva las funciones de la tarjeta opcional para los canales compatibles con dicha tarjeta.

**Teléfono**

Proporciona acceso directo a la lista de contactos del teléfono.

**Privacidad**

Activa o desactiva la privacidad.

**Dirección pública (PA)**

Activa o desactiva el sistema de PA interno de la radio.

**Alias e ID de radio**

Proporciona el ID y alias de radio.

**Monitorización remota**

Enciende el micrófono de una radio de destino sin que proporcione ningún indicador.

**Información del sitio**

Muestra el nombre y el ID actual del sitio Capacity Max.

Reproduce los mensajes de voz de indicador del sitio actual si el indicador de voz está activado.

**Bloqueo del sitio**

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

**Control de telemetría**

Controla el pin de salida en una radio local o remota.

### Mensaje de texto

Selecciona el menú de mensajes de texto.

### Mejora de la vibración del habla

Permite activar o desactivar esta función.

### Activar/Desactivar indicador de voz

Activa o desactiva el indicador de voz.

### Anuncio de voz para canal

Reproduce mensajes de voz de anuncio de canal y de zona para el canal actual. Esta función no está disponible cuando el indicador de voz está desactivado.

### Wi-Fi

Activa o desactiva el Wi-Fi.

### Selección de zona

Permite seleccionar en una lista de zonas.

## Funciones asignables de configuración o herramientas

Los siguientes ajustes o funciones de la radio se pueden asignar a los botones programables.

### Tonos/alertas

Activa y desactiva todos los tonos y alertas.

### Retroiluminación

Activa o desactiva la luz de fondo de la pantalla.

### Subir/bajar canal

En función de la programación, cambia el canal al canal anterior o al siguiente.

### Modo de pantalla

Activa o desactiva el modo de pantalla día/noche.

### Nivel de potencia

Alterna entre los niveles de potencia de transmisión alto y bajo.

## Acceso a las funciones programadas

Siga el procedimiento para acceder a las funciones programadas de la radio.

- 1 Lleve a cabo una de las siguientes acciones:
    - Pulse el botón programado. Continúe con el paso 3.
    - Pulse  para acceder al menú.
-

- 2 Pulse  o  para ir a la función de menú y, a continuación, pulse  para seleccionar una función o acceder a un submenú.

- 3 Lleve a cabo una de las siguientes acciones:

- Pulse  para volver a la pantalla anterior.
- Pulse de forma prolongada  para volver a la pantalla de inicio.

Tras un periodo de inactividad, la radio sale automáticamente del menú y vuelve a la pantalla de inicio.

Los botones de navegación por el menú también están disponibles en un micrófono con teclado. Consulte [Botones del micrófono con teclado en la página 46](#).

## Indicadores de estado

En este capítulo se explican los indicadores de audio y los tonos de audio que se utilizan en la radio.

## Iconos

La pantalla de cristal líquido (LCD) de la radio muestra el estado de la radio, las entradas de texto y las entradas del menú.

### Tabla 2: Iconos de pantalla

Los siguientes iconos aparecen en la barra de estado ubicada en la parte superior de la pantalla de la radio. Los iconos se organizan de izquierda a derecha según orden de aparición o uso, y son específicos del canal.

	<p><b>Bluetooth conectado</b></p> <p>La función Bluetooth está activada. El icono permanece iluminado cuando hay un dispositivo Bluetooth remoto conectado.</p>
	<p><b>Bluetooth no conectado</b></p> <p>La función Bluetooth está activada, pero no hay conectado ningún dispositivo Bluetooth remoto.</p>
	<p><b>Emergencia</b></p> <p>La radio está en modo Emergencia.</p>

Tabla (continuación)...

	<p><b>GNSS disponible</b></p> <p>La función GNSS está activada. El icono permanece encendido cuando existe una posición definida disponible.</p>
	<p><b>GNSS no disponible</b></p> <p>La función GNSS está activada pero no recibe datos del satélite.</p>
	<p><b>Datos de gran volumen</b></p> <p>La radio está recibiendo datos de gran volumen y el canal está ocupado.</p>
	<p><b>Función de ubicación en interiores <sup>1</sup></b></p> <p>El estado de ubicación en interiores está activado y disponible.</p>
	<p><b>Ubicación en interiores no disponible<sup>1</sup></b></p> <p>El estado de ubicación en interiores está activado pero no está disponible debido a que el Bluetooth está</p>

Tabla (continuación)...

	<p>desactivado o a que el Bluetooth ha suspendido el rastreo de las balizas.</p>
	<p><b>Modo Silenciar</b></p> <p>El modo Silenciar está activado y el altavoz está silenciado.</p>
	<p><b>Notificación</b></p> <p>Faltan uno o varios eventos en la lista de notificaciones.</p>
	<p><b>Placa de opciones</b></p> <p>La tarjeta opcional está habilitada. (Solo en modelos habilitados para la tarjeta opcional)</p>
	<p><b>La tarjeta opcional no funciona</b></p> <p>La tarjeta opcional está deshabilitada.</p>
	<p><b>Temporizador de retardo de programación a través del interfaz aire</b></p> <p>Indica el tiempo que queda hasta el reinicio automático de la radio.</p>

Tabla (continuación)...

<sup>1</sup> Solo se aplica a los modelos que cuentan con la última versión de software y hardware.

	<p><b>Prioridad 1</b> Indica el grupo de conversación de prioridad 1.</p>
	<p><b>Prioridad 2</b> Indica el grupo de conversación de prioridad 2.</p>
	<p><b>Indicador de intensidad de la señal recibida (RSSI)</b> El número de barras mostradas representa la intensidad de la señal de la radio. Cuatro barras indican la señal más intensa. Este icono solo se muestra durante la recepción.</p>
	<p><b>Inhibic. respuesta</b> La inhibición de respuesta está activada.</p>
	<p><b>Solo timbre</b> El modo de tono de llamada está habilitado.</p>

Tabla (continuación)...

	<p><b>Emparejamiento</b> La función Privacidad está habilitada.</p>
	<p><b>Tono de silencio</b> El modo de tono de silencio está habilitado.</p>
	<p><b>Roaming</b> La función de roaming entre sitios está habilitada.</p>
	<p><b>Estado</b> Indica un nuevo mensaje de estado.</p>
	<p><b>Desactivar tonos</b> Los tonos están desactivados.</p>
	<p><b>Inseguro</b> La función Privacidad está deshabilitada.</p>
	<p><b>Wi-Fi: excelente<sup>2</sup></b> La señal de la red Wi-Fi es excelente.</p>

Tabla (continuación)...

<sup>2</sup> Solo se aplica aDM4601e.

	<b>Wi-Fi: buena<sup>2</sup></b> La señal de la red Wi-Fi es buena.
	<b>Wi-Fi: regular<sup>2</sup></b> La señal de la red Wi-Fi es regular.
	<b>Wi-Fi: deficiente<sup>2</sup></b> La señal de la red Wi-Fi es deficiente.
	<b>Wi-Fi: no disponible<sup>2</sup></b> La señal de la red Wi-Fi no está disponible.

**Tabla 3: Iconos del menú avanzado**

Los siguientes iconos aparecen junto a los elementos de menú que ofrecen una elección entre dos opciones o como indicación de que hay un submenú que ofrece dos opciones.

	<b>Casilla de verificación (marcada)</b> Indica que la opción está seleccionada.
---	---

*Tabla (continuación)...*

	<b>Casilla de verificación (vacía)</b> Indica que la opción no está seleccionada.
	<b>Recuadro negro sólido</b> Indica la opción seleccionada para el elemento de menú con un submenú.

**Tabla 4: Iconos del dispositivo Bluetooth**

Los siguientes iconos aparecen junto a los elementos en la lista de dispositivos habilitados para Bluetooth disponibles para indicar el tipo de dispositivo.

	<b>Dispositivo de audio Bluetooth</b> Dispositivo de audio habilitado para Bluetooth, por ejemplo, unos auriculares.
	<b>Dispositivo de datos Bluetooth</b> Dispositivo de datos habilitado para Bluetooth, por ejemplo, un escáner.
	<b>Dispositivo PTT Bluetooth</b> Dispositivo PTT habilitado para Bluetooth, por ejemplo, un dispositivo de PTT solo (POD).

**Tabla 5: Iconos de llamada**

Los siguientes iconos aparecen en la pantalla en el transcurso de una llamada. Estos iconos también aparecen en la lista de contactos para indicar el tipo de ID o de alias.

 <p><b>Llamada de PC con Bluetooth</b> Indica que hay una llamada de PC con Bluetooth en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de llamada de PC con Bluetooth.</p>	 <p><b>Llamada privada</b> Indica que hay una llamada privada en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de suscriptor.</p>
 <p><b>Llamada de despacho</b> El tipo de contacto Llamada de despacho se utiliza para enviar un mensaje de texto a un PC despachador a través de un servidor de mensajes de texto externo.</p>	 <p><b>Llamada telefónica como una llamada de grupo/llamada a todos</b> Indica que hay una llamada telefónica como, por ejemplo, una llamada de grupo o una llamada a todos en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.</p>
 <p><b>Llamada de grupo/a todos</b> Indica que hay una llamada de grupo o una llamada a todos en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de grupo.</p>	 <p><b>Llamada telefónica como una llamada privada</b> Indica que hay una llamada telefónica como una llamada privada en curso.</p> <p>En la lista de contactos, indica un alias (nombre) o ID (número) de teléfono.</p>

*Tabla (continuación)...*

**Tabla 6: Iconos de fichas de trabajo**

Los siguientes iconos aparecen momentáneamente en la pantalla en la carpeta Fichas de trabajo.

	<b>Todas las tareas</b> Indica todos los trabajos enumerados en la lista.
	<b>Nuevos trabajos</b> Indica los nuevos trabajos.
	<b>en curso</b> Los trabajos están transmitiendo. Este icono se ve antes de la indicación "El envío de fichas de trabajo a fallado" o "Se han enviado correctamente".
	<b>Error de envío</b> Los trabajos no pueden enviarse.
	<b>Enviado correctamente</b> Los trabajos se han enviado correctamente.

Tabla (continuación)...

	<b>Prioridad 1</b> Indica el nivel de prioridad 1 para los trabajos.
	<b>Prioridad 2</b> Indica el nivel de prioridad 2 para los trabajos.
	<b>Prioridad 3</b> Indica el nivel de prioridad 3 para los trabajos.

**Tabla 7: Iconos pequeños de aviso**

Los siguientes iconos aparecen momentáneamente en la pantalla después de que se lleve a cabo una acción para realizar una tarea.

	<b>Transmisión fallida (negativo)</b> Error al realizar la acción.
	<b>Transmisión correcta (positivo)</b> La acción se ha realizado correctamente.

Tabla (continuación)...

### Transmisión en progreso (transición)

Transmitiendo. Este icono se ve antes de la indicación de Transmisión correcta o Transmisión fallida.

### Mensaje individual o de grupo no leído

El mensaje de texto no se ha leído.

### Error de envío

No se ha podido enviar el mensaje de texto.

### Enviado correctamente

El mensaje de texto se ha enviado correctamente.

## Tabla 8: Iconos de elementos enviados

Los iconos que se indican a continuación aparecen en la esquina superior derecha de la pantalla en la carpeta Enviados.

### en curso

El mensaje de texto para un alias o ID de suscriptor está pendiente de transmisión y, a continuación, se espera confirmación.

El mensaje de texto para un alias o ID de grupo está pendiente de transmisión.

### Mensaje individual o de grupo leído

El mensaje de texto se ha leído.

## Indicador LED

El indicador LED muestra el estado de funcionamiento de la radio.

### Rojo intermitente

La radio no ha superado la autocomprobación durante el encendido.

La radio está recibiendo una transmisión de emergencia.

Tabla (continuación)...

La radio está transmitiendo con estado de batería baja.

La radio está fuera del rango de alcance, si se ha configurado un sistema de repetición de rango automático.

El modo Silenciar está activado.

### **Verde fijo**

La radio se está encendiendo.

La radio está transmitiendo.

La radio está enviando una alerta de llamada o una transmisión de emergencia.

### **Verde intermitente**

La radio está recibiendo una llamada o datos.

La radio está recuperando transmisiones de programación a través del interfaz aire.

La radio está detectando actividad a través del interfaz aire.

#### **NOTA:**

Esta actividad puede afectar o no al canal programado de la radio debido a la naturaleza del protocolo digital.

### **Verde intermitente doble**

La radio está recibiendo una llamada o datos con la función de privacidad habilitada.

### **Amarillo fijo**

La radio está en modo de Bluetooth visible.

### **Amarillo intermitente**

La radio aún tiene que responder a una alerta de llamada.

### **Parpadeo doble en amarillo**

La radio tiene la navegación automática activada.

La radio está buscando de forma activa un nuevo sitio.

La radio aún tiene que responder a una alerta de llamada a grupo.

La radio está bloqueada.

## **Tonos**

A continuación se describen los tonos que suenan a través del altavoz de la radio.

Tono agudo

Tono grave

## Tonos de audio

Los tonos de audio le proporcionan indicaciones sonoras del estado de la radio o de la respuesta de la radio a los datos recibidos.

### Tono continuo

Un sonido monótono. Suena continuamente hasta que finaliza.

### Tono periódico

Suena periódicamente dependiendo de la duración que haya establecido la radio. El tono empieza, se para y se repite.

### Tono repetitivo

Suena un único tono que se repite hasta que lo apaga el usuario.

### Tono momentáneo

Suena una vez por un periodo corto establecido por la radio.

## Tonos de indicador

Los tonos de indicador proporcionan indicaciones audibles del estado después de realizar una acción para llevar a cabo una tarea.

Tono indicador positivo

Tono indicador negativo

## Registro

Hay una serie de mensajes relacionados con el registro que puede recibir.

### Registro

El registro se suele enviar al sistema durante el encendido, el cambio de grupo de conversación o el roaming entre sitios. Si una radio no puede efectuar el registro en un sitio,

La radio intenta navegar a otro sitio automáticamente. La radio elimina temporalmente el sitio donde se intentó el registro de la lista de roaming.

La indicación significa que la radio está ocupada buscando un sitio al que navegar o que ha encontrado correctamente un sitio pero está esperando una respuesta de la radio a los mensajes de registro.

Cuando se muestra **Registro** en la radio, suena un tono y el indicador LED amarillo parpadea dos veces para indicar una búsqueda de sitio.

Si las indicaciones continúan, el usuario debe cambiar de ubicación o, si tiene permiso, navegar manualmente a otro sitio.

### **Fuera de alcance**

Se considera que la radio se encuentra fuera de cobertura cuando esta no puede detectar una señal del sistema o del sitio actual. Esta indicación suele significar que la radio se encuentra fuera de cobertura geográfica de radiofrecuencia (RF) saliente.

Cuando se muestra **Fuera de cobert.** en la radio, se oye un tono repetitivo y el indicador LED rojo parpadea.

Póngase en contacto con su distribuidor o administrador del sistema si la radio sigue recibiendo indicaciones de fuera de cobertura en un área con buena cobertura de RF.

### **Error de afiliación de grupo de conversación**

La radio intenta afiliarse al grupo de conversación especificado en los canales o Mando de posiciones unificado (UKP, del inglés Unified Knob Position) durante el registro.

Una radio que presenta un error de afiliación no puede realizar o recibir llamadas desde el grupo de conversación al que la radio está intentando afiliarse.

Si una radio no puede afiliarse a un grupo de conversación, se muestra **Alias UKP** en la pantalla de inicio con un fondo resaltado.

Póngase en contacto con su distribuidor o administrador del sistema si la radio recibe indicaciones de error de afiliación.

### **Registro deneg.**

Se reciben indicadores de registro denegado cuando no se acepta el registro en el sistema.

La radio no indica al usuario el motivo específico por el que se ha denegado el registro. Normalmente, un registro se deniega cuando el operador del sistema ha desactivado el acceso de la radio al sistema.

Cuando se deniega el registro de una radio, se muestra Registro denegado en la radio y el indicador LED amarillo parpadea dos veces para indicar una búsqueda de sitio.

## Selecciones de canales y zonas

En este capítulo se explican las operaciones para seleccionar una zona o un canal en la radio.

La radio se puede programar con un máximo de 250 zonas de Capacity Max, con un máximo de 160 canales por zona. Cada zona de Capacity Max contiene un máximo de 16 posiciones asignables.

### Selección de zonas

Siga el procedimiento para seleccionar la zona que desee en la radio.

- 1 Lleve a cabo una de las siguientes acciones:

[Enviar comentarios](#)

- Pulse el botón **Selección de zona** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Zona. Pulse  para seleccionar.

En la pantalla aparece  y la zona actual.

- 3 Pulse  o  hasta llegar a la zona deseada. Pulse  para seleccionar.

La pantalla muestra <Zona> seleccionada momentáneamente y vuelve a la pantalla de la zona seleccionada.

### Selección zonas mediante la búsqueda de alias

Siga el procedimiento para seleccionar la zona que desee en la radio mediante la búsqueda de alias.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Zona. Pulse  para seleccionar.  
En la pantalla aparece  y la zona actual.

- 3 Introduzca el primer carácter del alias que desee.  
La pantalla muestra un cursor intermitente.

- 4 Introduzca el resto de caracteres del alias que desee.  
la búsqueda de alias no distingue entre mayúsculas y minúsculas. Si hay dos entradas o más con el mismo nombre, la radio mostrará la entrada que figure primero en la lista.  
La primera línea de texto muestra los caracteres introducidos por el usuario. Las siguientes líneas de texto muestran los resultados de la búsqueda preseleccionados.

- 5 Pulse  para seleccionar.

La pantalla muestra <Zona> seleccionada momentáneamente y vuelve a la pantalla de la zona seleccionada.

## Selección de un tipo de llamada

Utilice el mando selector de canales para seleccionar el tipo de llamada. Puede tratarse de una llamada de grupo, llamada de difusión, llamada a todos o llamada privada, en función de la programación de la radio. Si cambia el selector de canales a una posición diferente (que tenga un tipo de llamada asignada), la radio volverá a registrarse en el sistema Capacity Max. La radio se registrará con el ID de grupo de conversación que se haya programado para la nueva posición del selector de canales el nuevo tipo de llamada.

Dado que la radio no funciona cuando se selecciona un canal no programado, utilice el selector de canales para elegir en su lugar un canal programado.

Una vez se muestre la zona (si tiene varias zonas en la radio), gire el mando selector de canales programado para seleccionar el tipo de llamada.

## Selección de un emplazamiento

Un emplazamiento ofrece cobertura para un área específica. En una red multisitio, la radio de Capacity Max buscará automáticamente un nuevo emplazamiento cuando el nivel de señal del emplazamiento en que esté registrada se reduzca hasta ser inaceptable.

El sistema Capacity Max es compatible con hasta 250 emplazamientos.

## Solicitud de itinerancia

Una solicitud de itinerancia ordena a la radio buscar un emplazamiento diferente, aunque la señal que reciba del emplazamiento actual sea aceptable.

Si no se encuentran sitios disponibles:

- La pantalla de la radio indica *Buscando* y continúa buscando por la lista de sitios.
- La radio vuelve al sitio anterior si este sigue estando disponible.

### NOTA:

es algo que programa el distribuidor.

Pulse el botón **Roam manual del sitio** programado.

Escuchará un tono que indica que la radio ha cambiado a un nuevo emplazamiento. En la pantalla aparecerá `ID del sitio <Número de sitio>`.

## Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.

- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
  - En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).
- 

## Restricción de sitios

En el sistema Capacity Max, el administrador de la radio tiene la capacidad de decidir los sitios de red que puede utilizar o no la radio.

Para cambiar la lista de sitios permitidos o restringidos, no es necesario reprogramar la radio. Si la radio intenta registrarse en un sitio restringido, esta recibe indicación de que se ha denegado el sitio. A continuación, la radio buscará otro emplazamiento de red.

Cuando se presentan restricciones de sitio, la radio muestra `Registro denegado` y el indicador LED amarillo parpadea dos veces para indicar una búsqueda de sitio.

## Troncal de sitio

Un sitio debe poder comunicarse con el controlador de funcionamiento troncal para que se considere como troncal del sistema.

Si el sitio no puede comunicarse con el controlador de funcionamiento troncal del sistema, la radio entra en el modo de funcionamiento troncal en sitio. Mientras se encuentra en el modo de funcionamiento troncal en sitio, la radio emite una indicación sonora y visual periódica al usuario para informarle de sus funciones limitadas.

Cuando la radio se encuentra en el modo de funcionamiento troncal en sitio, muestra `Troncal de sitio` y se oye un tono repetitivo.

Las radios que se encuentran en el modo de funcionamiento troncal en sitio podrán seguir realizando llamadas de voz individuales y de grupo, así como enviar mensajes de texto al resto de radios ubicadas en el mismo sitio. Las consolas de voz, los grabadores de registro, las puertas de enlace telefónicas y las aplicaciones de datos no se pueden comunicar con las radios en el sitio.

Una vez que se encuentre en el modo de funcionamiento troncal en sitio, una radio que participe en llamadas a varios sitios solo se podrá comunicar con otras radios

ubicadas en el mismo sitio. La comunicación hacia y desde otros sitios se perdería.

**NOTA:**

Si existen varios sitios que cubren la ubicación actual de la radio y uno de ellos entra en el modo de funcionamiento troncal en sitio, las radios navegan a otro sitio si se encuentra en el área de cobertura.

## Llamadas

En este capítulo se explican las operaciones para recibir, responder, realizar y finalizar llamadas.

Puede seleccionar un ID o alias de suscriptor, o un ID o alias de grupo después de haber seleccionado un canal mediante una de estas funciones:

### Búsqueda de alias

Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

### Lista de contactos

Este método proporciona acceso directo a la lista de contactos.

### Marcación manual (a través de Contactos)

Este método se utiliza solo para llamadas telefónicas y llamadas privadas con un micrófono con teclado.

### Teclas numéricas programadas

Este método se utiliza solo para llamadas de grupo, llamadas privadas y llamadas a todos con un micrófono con teclado.

**NOTA:**

Solo puede tener un ID o alias asignado a una tecla numérica, pero puede tener más de una tecla numérica asociada a un ID o alias. Se pueden asignar todas las teclas numéricas de un micrófono con teclado. Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

### Botón de acceso de marcación rápida programado

Este método se utiliza solo para , llamadas de grupo, llamadas privadas y llamadas telefónicas.

Solo puede asignar un ID a un botón de **acceso de marcación rápida** mediante una pulsación larga o breve de un botón programable. La radio puede tener varios botones de **acceso de marcación rápida** programados.

## Botón programable

Este método solo se utiliza para llamadas telefónicas.

## Selector de volumen/canales

Este método permite seleccionar manualmente un alias o ID de suscriptor, o un alias o ID de grupo.

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea en verde cuando está recibiendo.

### NOTA:

El indicador LED se ilumina en verde fijo mientras la radio está transmitiendo y parpadea rápido en verde cuando está recibiendo una llamada que tiene la privacidad activada.

Para decodificar una llamada que tiene la privacidad activada, la radio debe tener la misma clave de privacidad o bien la misma clave e ID de clave (programadas por el distribuidor) que la radio transmisora (la radio desde la que recibe la llamada).

Consulte [Privacidad en la página 478](#) para obtener más información.

## Llamadas de grupo

La radio debe estar configurada como parte de un grupo para recibir una llamada del grupo de usuarios o realizar una llamada al mismo.

## Realización de llamadas de grupo

Para llamar a un grupo de usuarios, la radio deberá estar configurada como parte de ese grupo. Siga el procedimiento para realizar llamadas de grupo con la radio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Seleccione un canal con el ID o alias de grupo activo. Consulte [Selección de un tipo de llamada en la página 68](#).
  - Pulse el botón de **acceso de marcación rápida** programado.

- 
- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La primera línea de texto muestra el icono de **llamada grupal**.

- 
- 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

---

#### 4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

---

#### 5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La persona que ha iniciado la llamada puede pulsar

 para finalizar una llamada de grupo.

---

## Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de grupo con la radio mediante la lista de contactos.

#### 1 Pulse para acceder al menú.

---

#### 2 Pulse o para ir a Contactos. Pulse para seleccionar.

---

#### 3 Pulse o para ir al ID o alias que desee. Pulse para seleccionar.

---

#### 4 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La primera línea muestra el alias o ID de suscriptor. La segunda línea muestra **Llamd. grupo** y el icono **Llamd. grupo**.

---

#### 5 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

### 6 Suelte el botón **PTT** para escuchar.

El LED verde parpadea cuando cualquier usuario del grupo responde. La pantalla muestra el icono **Llamada grupal** y el alias o ID, y el alias o ID de la radio transmisora.

- 7 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

La persona que ha iniciado la llamada puede pulsar

 para finalizar la llamada de grupo.

Se oye un tono breve. La pantalla muestra **Llamada finalizada**.

## Realización de llamadas de grupo mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas de grupo con la radio mediante la tecla numérica programable.

- 1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada a un ID o alias predefinido.  
Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.  
Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina.

- 3 Suelte el botón **PTT** para escuchar.

El LED verde parpadea cuando cualquier usuario del grupo responde.

- 4 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. La radio regresa a la pantalla en la que se encontraba antes de iniciar la llamada.

La persona que ha iniciado la llamada puede pulsar

 para finalizar la llamada de grupo.

Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

## Realización de llamadas a grupo mediante la búsqueda de alias

También puede utilizar la búsqueda de alias o alfanumérica para recuperar el alias de suscriptor que desee. Esta función solo se puede aplicar si se encuentra en Contactos. Siga el procedimiento para realizar llamadas mediante la búsqueda de alias.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

La pantalla muestra las entradas en orden alfabético.

- 3 Pulse  o  para ir al ID o alias de suscriptor que desee. La primera línea de la pantalla muestra Número de teléfono:. La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para introducir un número de teléfono.

- 4 Pulse  para seleccionar. Si la entrada seleccionada está vacía, se oye un tono indicador negativo y la pantalla muestra Número de llamada de teléfono no válido.
- 
- 5 Pulse  o  para ir a Llamada telefónica y Pulse  para seleccionar. Si el código de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de acceso:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de acceso y pulse el botón  para continuar. Si es correcta: se oye el tono DTMF. Se oye el tono de llamada del usuario del teléfono. La primera línea de la pantalla muestra el ID o alias del suscriptor y el icono de RSSI. La segunda línea de la pantalla muestra Llamada telefónica y el icono de llamada telefónica. Si no es correcta, se oye un tono y la pantalla muestra Llamada telefónica fallida. La radio vuelve a la pantalla de introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.
- 
- 6 Pulse el botón **PTT** para hablar y suéltelo para escuchar. El icono de **RSSI** desaparece durante la transmisión.
- 
- 7 Si la llamada telefónica requiere introducir dígitos adicionales, lleve a cabo una de las siguientes acciones.
- Pulse cualquier tecla del teclado para iniciar la introducción de dígitos adicionales. La primera línea de la pantalla muestra Dígitos extra:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca los dígitos adicionales y pulse el botón  para continuar. se oye el tono DTMF y la radio vuelve a la pantalla anterior.
  - Pulse el botón de **acceso de marcación rápida**. se oye el tono DTMF. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.
-

- 8 Para finalizar la llamada, pulse  . Si el código de finalización de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de finalización de acceso:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de finalización de acceso y pulse  para continuar. La radio vuelve a la pantalla anterior. Se oye el tono DTMF y la pantalla muestra Finalizando llamada. Si es correcta, se oye un tono y la pantalla muestra Llam. final. La radio vuelve a la pantalla de llamada telefónica. Si no es correcta, la radio vuelve a la pantalla de llamada telefónica. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra Pulse OK para realizar llmda. Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra Llam. final. Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

- 9 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento

en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra Llamada finalizada.

La persona que ha iniciado la llamada puede pulsar

 para finalizar la llamada a grupo.

**NOTA:**

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

Pulse el botón  o  para salir de la búsqueda de alias. Durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código de finalización de acceso preconfigurado o introduce el código de finalización de acceso como dígitos adicionales, la radio intentará finalizar la llamada. Durante el acceso al canal, la introducción del código de acceso/salida o la transmisión de dígitos adicionales, la radio solo responde al botón de encendido/apagado, mando del volumen y selector de canales. Se oye un tono en cada entrada no válida.

## Respuesta a llamadas de grupo

Siga el procedimiento para responder a llamadas de grupo con la radio.

Al recibir una llamada de grupo:

- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.

- La primera línea de texto muestra el alias de la llamada entrante.
- La segunda línea de texto muestra el alias de la llamada de grupo.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

### 1 Lleve a cabo una de las siguientes acciones:

- Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.
- Si la función de Interrupción de voz está activada, pulse el botón **PTT** para interrumpir el audio de la radio transmisora y liberar el canal para responder.

El indicador LED verde se ilumina.

### 2 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

---

### 3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado.

---

## Llamada de difusión

Una llamada de difusión es una llamada de voz de cualquier usuario a todo un grupo de conversación.

La función de llamada de difusión permite transmitir información al grupo de conversación solo al usuario que inicia la llamada, mientras que los destinatarios de la llamada no pueden responder.

La persona que inicia la difusión también puede finalizar la llamada de difusión. Para recibir una llamada de un grupo de usuarios, o para llamar a un grupo de usuarios, la radio debe estar configurada como parte de un grupo.

## Realización de llamadas de difusión

Siga el procedimiento para realizar llamadas de difusión con la radio.

### 1 Lleve a cabo una de las siguientes acciones:

- Seleccione un canal con el ID o alias de grupo activo. Consulte [Selección de un tipo de llamada en la página 68](#).
  - Pulse el botón de **acceso de marcación rápida** programado.
- 

### 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono **Llamada grupal** y el alias.

---

### 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

La persona que ha iniciado la llamada puede pulsar

para finalizar la llamada de difusión.

---

## Realización de llamadas de grupo mediante la lista de contactos

Siga el procedimiento para realizar llamadas de difusión con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

- 4 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED verde parpadea.  
La primera línea muestra el alias o ID de suscriptor.  
La segunda línea muestra **Llamd. grupo** y el icono **Llamd. grupo**.

---

- 5 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

La persona que ha iniciado la llamada puede pulsar

 para finalizar la llamada de difusión.

## Realización de llamadas de difusión mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas de difusión con la radio mediante la tecla numérica programable.

- 1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada a un ID o alias predefinido.  
  
Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.  
  
Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

## 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante.

## 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

La persona que ha iniciado la llamada puede pulsar

para finalizar la llamada de difusión.

- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el alias de la llamada entrante.
- La segunda línea de texto muestra el alias de la llamada de grupo.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

### NOTA:

No se permite a los usuarios receptores contestar durante una llamada de difusión. La pantalla muestra *Contestación prohibida*. El tono de contestación prohibida sonará momentáneamente si se pulsa el botón **PTT** durante una llamada de difusión.

## Recepción de llamadas de difusión

Siga el procedimiento para recibir una llamada de difusión en la radio.

Al recibir una llamada de difusión:

- El indicador LED verde parpadea.

## Llamada privada

Una llamada privada es una llamada de una radio individual a otra radio individual.

Existen dos formas de realizar una llamada privada.

- El primer tipo de llamada se denomina establecimiento de llamadas fuera del aire (OACSU, del inglés Off Air Call Set-Up). OACSU establece la llamada después de

realizar una verificación de presencia de radio y finaliza la llamada automáticamente.

- El segundo tipo se denomina establecimiento de llamadas totalmente fuera del aire (FOACSU, del inglés Full Off Air Call Set-Up). FOACSU también establece la llamada después de realizar una verificación de presencia de radio. Sin embargo, las llamadas con FOACSU requieren la confirmación del usuario para finalizar la llamada y permiten al usuario aceptar o rechazar la llamada.

El administrador del sistema es quien configura el tipo de llamada.

### NOTA:

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en

curso pulsando .

## Realizar llamadas privadas

La radio debe programarse para poder iniciar una llamada privada. Si esta función no está activada, escuchará un tono indicador negativo cuando inicie la llamada. Siga el procedimiento para realizar llamadas privadas con la

radio. Si la radio de destino no está disponible, sonará un tono corto y la pantalla mostrará `Unidad no disponible`.

- 1 Lleve a cabo una de las siguientes acciones:
  - Seleccione un canal con el ID o alias de suscriptor activo. Consulte [Selección de un tipo de llamada en la página 68](#).
  - Pulse el botón de **acceso de marcación rápida** programado.

- 
- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada**, el alias de suscriptor y el estado de llamada.

- 
- 3 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- 
- 4 Suelte el botón **PTT** para escuchar.

El indicador LED verde se ilumina cuando la radio de destino responde.

- 5 La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Se oirá un tono breve. La pantalla muestra **Llamada finalizada**.

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en

curso pulsando .

## Realización de llamadas privadas mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas privadas con la radio mediante la tecla numérica programable.

- 1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada a un ID o alias predefinido.
- Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.
- Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

[Enviar comentarios](#)

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada privada** en la esquina superior derecha. La primera línea de texto muestra el alias de la llamada entrante. La segunda línea de texto muestra el estado de la llamada.

- 3 Suelte el botón **PTT** para escuchar.

El indicador LED verde parpadea cuando la radio de destino responde. La pantalla muestra el alias del destino.

- 4 La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Se oirá un tono breve. La pantalla muestra **Llamada finalizada**.

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en

curso pulsando .

Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

## Realización de llamadas privadas mediante la búsqueda de alias

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.  
La pantalla muestra las entradas en orden alfabético.

---

- 3 Pulse  o  para ir al ID o alias de suscriptor que desee. La primera línea de la pantalla muestra **Número de teléfono:**. La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para introducir un número de teléfono.

---

- 4 Pulse  para seleccionar. Si la entrada seleccionada está vacía, se oye un tono indicador negativo y la pantalla muestra **Número de llamada de teléfono no válido**.

---

- 5 Pulse  o  para ir a **Llamada telefónica** y Pulse  para seleccionar. Si el código de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra **Código de acceso:**. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de acceso y pulse el botón  para continuar. Si es correcta: se oye el tono DTMF. Se oye el tono de llamada del usuario del teléfono. La primera línea de la pantalla muestra el ID o alias del suscriptor y el icono de **RSSI**. La segunda línea de la pantalla muestra **Llamada telefónica** y el icono de **Llamada telefónica**. Si no es correcta, se oye un tono y la pantalla muestra **Llamada telefónica fallida**. La radio vuelve a la pantalla de introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

---

- 6 Pulse el botón **PTT** para hablar y suéltelo para escuchar. El icono de **RSSI** desaparece durante la transmisión.

---

- 7 Si la llamada telefónica requiere introducir dígitos adicionales, lleve a cabo una de las siguientes acciones.
- Pulse cualquier tecla del teclado para iniciar la introducción de dígitos adicionales. La primera línea de la pantalla muestra `Dígitos extra:`. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca los dígitos adicionales y pulse el botón  para continuar. se oye el tono DTMF y la radio vuelve a la pantalla anterior.
  - Pulse el botón de **acceso de marcación rápida**. se oye el tono DTMF. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.

- 8 Para finalizar la llamada, pulse . Si el código de finalización de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra `Código de finalización de acceso:`. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de finalización de acceso y pulse  para continuar. La radio vuelve a la pantalla anterior. Se oye el tono

DTMF y la pantalla muestra `Finalizando llamada`. Si es correcta, se oye un tono y la pantalla muestra `Llam. final`. La radio vuelve a la pantalla de llamada telefónica. Si no es correcta, la radio vuelve a la pantalla de llamada telefónica. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra `Pulse OK para realizar llmda`. Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra `Llam. final`. Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

- 9 La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Se oirá un tono breve. La pantalla muestra `Llamada finalizada`.
- Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

**NOTA:**

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

pulse el botón  o  para salir de la búsqueda de alias. durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código de finalización de acceso preconfigurado o introduce el código de finalización de acceso como dígitos adicionales, la radio intentará finalizar la llamada.

## Realización de llamadas privadas con el botón de Llamada por marcación rápida

La función Llamada por marcación rápida permite realizar fácilmente una llamada privada a un ID o alias de llamada privada predefinido. Esta función se puede asignar a la pulsación breve o prolongada de un botón programable.

Solo puede tener un alias o ID asignado a un botón de Llamada instantánea. La radio puede tener varios botones programados de Llamada por marcación rápida.

- 1 Pulse el botón programado de **Llamada instantánea** para efectuar una llamada privada al ID o alias de llamada privada predefinido.

---

- 2 Pulse el botón **PTT** para realizar la llamada.  
El indicador LED se ilumina en color verde fijo.  
La pantalla mostrará el ID o alias de llamada privada.

---

- 3 Espere hasta que acabe el tono Permitir hablar (si está activado) y hable con claridad al micrófono.

---

- 4 Suelte el botón **PTT** para escuchar.  
Cuando la radio a la que se llama responda, el indicador LED parpadeará en verde.  
Si no hay actividad de voz durante un periodo de tiempo predeterminado, la llamada finalizará.

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

## Realización de llamadas privadas mediante marcado manual

Siga el procedimiento para realizar llamadas privadas con la radio mediante marcado manual.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a **Marcación manual**. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a **Núm. radio**. Pulse  para seleccionar.

- 5 Lleve a cabo una de las siguientes acciones:
  - Introduzca el ID de suscriptor y pulse  para continuar.
  - Edite el ID de suscriptor marcado previamente y pulse  para continuar.

- 6 Pulse el botón **PTT** para realizar la llamada. El indicador LED verde se ilumina. La pantalla muestra el alias del destino.

- 7 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- 8 Suelte el botón **PTT** para escuchar. El indicador LED verde se ilumina cuando la radio de destino responde. La pantalla muestra el ID o alias del usuario transmisor.

- 9 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el

usuario responda. Pulse el botón **PTT** para responder la llamada.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra `Llamada finalizada`.

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una llamada privada en curso pulsando .

## Recepción de llamadas privadas

Cuando reciba llamadas privadas configuradas como llamadas de establecimiento de llamadas fuera del aire (OACSU, del inglés Off Air Call Set-Up):

- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

### NOTA:

En función de la configuración de la radio, establecimiento de llamadas fuera del aire (OACSU) o establecimiento de llamadas totalmente fuera del aire (FOACSU), la respuesta a las llamadas privadas puede o no requerir la confirmación del usuario.

En la configuración con OACSU, la radio desactiva el silencio y la llamada se conecta automáticamente.

## Aceptar llamadas privadas

Cuando reciba llamadas privadas configuradas como llamadas de establecimiento de llamadas totalmente fuera del aire (FOACSU, del inglés Full Off Air Call Set-Up):

- El indicador LED verde parpadea.
- 1 Para aceptar una llamada privada configurada como FOACSU, realice una de las siguientes acciones:
    - Pulse  o  para aceptar y pulse  para responder a una llamada privada.

- Pulse el botón **PTT** en cualquier entrada.

El indicador LED verde se ilumina.

- 
- 2 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- 

- 3 Suelte el botón **PTT** para escuchar.

La llamada finalizará cuando no haya ninguna actividad de voz durante un periodo determinado. Suena un tono. La pantalla muestra Llamada finalizada.

**NOTA:**

Tanto la persona que ha iniciado la llamada como el receptor pueden finalizar una

llamada privada en curso pulsando .

## Rechazar llamadas privadas

Cuando reciba llamadas privadas configuradas como llamadas de establecimiento de llamadas totalmente fuera del aire (FOACSU, del inglés Full Off Air Call Set-Up):

- El indicador LED verde parpadea.

Para rechazar una llamada privada configurada como FOACSU, realice una de las siguientes acciones:

- Pulse  o  para Rechazar y pulse  para rechazar una llamada privada.
  - Pulse  para rechazar una llamada privada.
- 

## Llamadas a todos

Una llamada a todos es una llamada de una radio individual a todas las radios del sitio o a todas las radios de un grupo de sitios, en función de la configuración del sistema.

Se utiliza para realizar anuncios importantes, que requieren una especial atención por parte del usuario. Los usuarios del sistema no pueden responder a una llamada a todos.

Capacity Max es compatible con la llamada a todos en sitio y la llamada a todos en varios sitios. El administrador del sistema puede configurar una o varias de estas opciones en la radio.

**NOTA:**

Los suscriptores pueden admitir llamadas a todos en todo el sistema, pero la infraestructura de Motorola Solutions no admite llamadas generales en todo el sistema.

## Realización de llamadas a todos

La radio debe estar programada para poder realizar una llamada a todos. Siga el procedimiento para realizar llamadas a todos con la radio.

- 1 Seleccione un canal con el ID o alias de grupo de llamada a todos activo. Consulte [Selección de un tipo de llamada en la página 68](#).

- 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono de **Llamada grupal** y Llamada general, Llamada a todos en el sitio o Llamada multisitio en función del tipo de configuración.

- 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

Los usuarios del canal no pueden responder a una llamada a todos.

La persona que ha iniciado la llamada puede pulsar el botón Cancelar programado  para finalizar la llamada a todos.

---

## Realización de llamadas a todos mediante la tecla numérica programable

Siga el procedimiento para realizar llamadas a todos con la radio mediante la tecla numérica programable.

- 1 En la pantalla de inicio, mantenga pulsada la tecla numérica programada que se ha asignado a un ID o alias predefinido.

Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará

soportada cuando mantenga pulsada la tecla numérica en otro modo.

Si la tecla numérica no está asociada a una entrada, sonará un tono indicador negativo.

---

### 2 Pulse el botón **PTT** para realizar la llamada.

El indicador LED verde se ilumina. La pantalla muestra el icono **Llamada grupal** y Llamada general, Llamada a todos en el sitio o Llamada multisitio en función del tipo de configuración.

---

### 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

La persona que ha iniciado la llamada puede pulsar el botón Cancelar programado  para finalizar la llamada a todos.

---

Consulte [Asignación de entradas a teclas numéricas programadas en la página 423](#) para obtener más información.

## Realización de llamadas a todos mediante la búsqueda de alias

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

La pantalla muestra las entradas en orden alfabético.

---

3 Pulse  o  para ir al ID o alias de suscriptor que desee. La primera línea de la pantalla muestra Número de teléfono: . La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para introducir un número de teléfono.

---

- 4 Pulse  para seleccionar. Si la entrada seleccionada está vacía, se oye un tono indicador negativo y la pantalla muestra Número de llamada de teléfono no válido.
- 
- 5 Pulse  o  para ir a Llamada telefónica.
- Pulse  para seleccionar. Si el código de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de acceso:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de acceso y pulse el botón  para continuar. Si es correcta: se oye el tono DTMF. Se oye el tono de llamada del usuario del teléfono. La primera línea de la pantalla muestra el ID o alias del suscriptor y el icono de RSSI. La segunda línea de la pantalla muestra Llamada telefónica y el icono de llamada telefónica. Si no es correcta, se oye un tono y la pantalla muestra Llamada telefónica fallida. La radio vuelve a la pantalla de introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.
- 
- 6 Pulse el botón **PTT** para hablar y suéltelo para escuchar. el icono de RSSI desaparece durante la transmisión.
- 
- 7 Si la llamada telefónica requiere introducir dígitos adicionales, lleve a cabo una de las siguientes acciones.
- Pulse cualquier tecla del teclado para iniciar la introducción de dígitos adicionales. La primera línea de la pantalla muestra Dígitos extra:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca los dígitos adicionales y pulse el botón  para continuar. se oye el tono DTMF y la radio vuelve a la pantalla anterior.
  - Pulse el botón de **acceso de marcación rápida**. se oye el tono DTMF. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.
-

- 8 Para finalizar la llamada, pulse . Si el código de finalización de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de finalización de acceso:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de finalización de acceso y pulse  para continuar. La radio vuelve a la pantalla anterior. Se oye el tono DTMF y la pantalla muestra Finalizando llamada. Si es correcta, se oye un tono y la pantalla muestra Llam. final. La radio vuelve a la pantalla de llamada telefónica. Si no es correcta, la radio vuelve a la pantalla de llamada telefónica. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra
- Pulse OK para realizar llmda. Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra Llam. final. Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

**NOTA:**

La persona que ha iniciado la llamada puede pulsar el botón Cancelar programado  para finalizar la llamada a todos.

## Recepción de llamadas a todos

Al recibir una llamada general, sucede lo siguiente:

- Suena un tono.
- El indicador LED verde parpadea.
- La pantalla muestra el icono de **llamada grupal** en la esquina superior derecha.
- La primera línea de texto muestra el ID o alias del autor de la llamada.
- La segunda línea de texto muestra Llamada general, Llamada a todos en el sitio o Llamada multisitio en función del tipo de configuración.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

La radio vuelve a la pantalla antes de recibir la llamada a todos cuando la llamada finaliza.

Si la función de indicación de canal libre está activada, oirá un breve tono de alerta cuando la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para su uso. No puede responder a una llamada a todos.

## NOTA:

La radio deja de recibir la llamada a todos si cambia a un canal distinto mientras está recibiendo la llamada. Durante una llamada a todos, no podrá realizar ningún movimiento de navegación ni edición en el menú hasta que la llamada finalice.

## Llamadas telefónicas

Una llamada telefónica es una llamada de una radio individual a un teléfono.

En el modo Capacity Max, la radio puede recibir llamadas y contestar aunque la función de llamada telefónica esté desactivada.

La función de llamada telefónica se puede activar mediante la asignación y configuración de números de teléfono en el sistema. Consulte con el administrador del sistema cómo se ha programado la radio.

## Realización de llamadas telefónicas

Siga el procedimiento para realizar llamadas telefónicas con la radio.

- 1 Pulse el botón de **acceso de marcación rápida** programado para el ID o alias predefinido.

Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.

Si el código de acceso no está preconfigurado en la lista de contactos, la pantalla muestra Código de acceso!.

- 
- 2 Introduzca el código de acceso y pulse  para continuar.

el código de acceso o no acceso no puede tener más de 10 caracteres.

- 
- 3 Pulse el botón **PTT** para responder la llamada.

---

  - 4 Suelte el botón **PTT** para escuchar.

---

5 Introduzca dígitos adicionales con el teclado si lo requiere la llamada y pulse  para continuar.

Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

Se oye el tono DTMF. La radio vuelve a la pantalla anterior.

6 Para finalizar la llamada, pulse .

7 Lleve a cabo una de las siguientes acciones:

- Si el código de salida no se ha configurado previamente, introduzca el código de salida cuando la pantalla muestre `Código de salida:` y, a continuación, pulse para  continuar. La radio vuelve a la pantalla anterior.
- Pulse el botón de **acceso de marcación rápida** programado. Si la entrada del botón de **acceso**

**de marcación rápida** está vacía, se oye un tono indicador negativo.

Se oye el tono DTMF y la pantalla muestra `Finalizando llamada.`

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada.`

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita los últimos dos pasos o espere a que el usuario del teléfono finalice la llamada.

## Realización de llamadas telefónicas mediante la lista de contactos

Siga el procedimiento para realizar llamadas telefónicas con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

La pantalla muestra las entradas en orden alfabético.

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

Si pulsa el botón **PTT** mientras se encuentra en la pantalla de contactos del teléfono:

- La primera línea de la pantalla muestra Núm. teléfono:.
- La segunda línea de la pantalla muestra un cursor intermitente.

Si la entrada seleccionada está vacía:

- Suena un tono indicador negativo.
- La pantalla muestra Número de llamada de teléfono no válido.

4 Pulse  o  para ir a Llamada telefónica. Pulse  para seleccionar.

La pantalla muestra Código de acceso: si el código de acceso no se ha configurado previamente.

5 Introduzca el código de acceso y pulse  para continuar.

el código de acceso o no acceso no puede tener más de 10 caracteres.

La primera línea de texto muestra el mensaje Llamando. La segunda línea de texto muestra el ID o alias de suscriptor y el icono de **llamada telefónica**.

Si la llamada se realiza correctamente:

- Se oye el tono DTMF.
- Se oye el tono de llamada del usuario del teléfono.
- La primera línea de texto muestra el ID o alias de suscriptor y el icono de **RSSI**.
- La segunda línea de texto muestra LImda. teléf. y el icono de **llamada telefónica**.

Si la llamada no se realiza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada telf. y, a continuación, Código de acceso:`.
- La radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada si el código de acceso se ha configurado previamente en la lista de contactos.

---

**6** Pulse el botón **PTT** para responder la llamada.  
Desaparece el icono de **RSSI**.

---

**7** Suelte el botón **PTT** para escuchar.

---

**8** Introduzca dígitos adicionales con el teclado si lo requiere la llamada y pulse  para continuar.  
Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la

llamada, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

Se oye el tono DTMF. La radio vuelve a la pantalla anterior.

---

**9** Para finalizar la llamada, pulse  .

---

**10** Si el código de salida no se ha configurado previamente, introduzca el código de salida cuando la pantalla muestre `Código de salida:` y, a continuación, pulse para  continuar.

La radio vuelve a la pantalla anterior. Se oye el tono DTMF y la pantalla muestra `Finalizando llamada`. Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita [paso 9](#) y [paso 10](#) o espere a que el usuario del teléfono finalice la llamada. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra `Pulse OK para realizar llmda`.

Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra **Llam. final.**

Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

#### NOTA:

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código no acceso preconfigurado o introduce el código no acceso como dígitos adicionales, la radio intentará finalizar la llamada.

Durante el acceso al canal, la introducción del código de acceso/no acceso o la transmisión de dígitos adicionales, la radio solo responde al botón de **encendido/apagado, mando del volumen y selector de canales**. Se oye un tono en cada entrada no válida.

## Realización de llamadas telefónicas mediante la búsqueda de alias

También puede utilizar la búsqueda de alias o alfanumérica para recuperar el alias de suscriptor que desee. Esta función solo se puede aplicar si se encuentra en Contactos. Siga el procedimiento para realizar llamadas telefónicas con la radio mediante la búsqueda de alias.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.  
La pantalla muestra las entradas en orden alfabético.

---

- 3 Pulse  o  para ir al ID o alias de suscriptor que desee. La primera línea de la pantalla muestra **Número de teléfono:**. La segunda línea de la pantalla muestra un cursor intermitente. Utilice el teclado para introducir un número de teléfono.

- 4 Pulse  para seleccionar. Si la entrada seleccionada está vacía, se oye un tono indicador negativo y la pantalla muestra Número de llamada de teléfono no válido.
- 
- 5 Pulse  o  para ir a Llamada telefónica y Pulse  para seleccionar. Si el código de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de acceso:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de acceso y pulse el botón  para continuar. Si es correcta: se oye el tono DTMF. Se oye el tono de llamada del usuario del teléfono. La primera línea de la pantalla muestra el ID o alias del suscriptor y el icono de **RSSI**. La segunda línea de la pantalla muestra Llamada telefónica y el icono de **llamada telefónica**. Si no es correcta, se oye un tono y la pantalla muestra Llamada telefónica fallida. La radio vuelve a la pantalla de introducción del código de acceso. Si el código de acceso se ha preconfigurado en la lista de contactos, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.
- 
- 6 Pulse el botón **PTT** para hablar y suéltelo para escuchar. El icono de **RSSI** desaparece durante la transmisión.
- 
- 7 Si la llamada telefónica requiere introducir dígitos adicionales, lleve a cabo una de las siguientes acciones.
- Pulse cualquier tecla del teclado para iniciar la introducción de dígitos adicionales. La primera línea de la pantalla muestra Dígitos extra:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca los dígitos adicionales y pulse el botón  para continuar. se oye el tono DTMF y la radio vuelve a la pantalla anterior.
  - Pulse el botón de **acceso de marcación rápida**. se oye el tono DTMF. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.
-

- 8 Para finalizar la llamada, pulse . Si el código de finalización de acceso no se ha preconfigurado en la lista de contactos, la primera línea de la pantalla muestra Código de finalización de acceso:. La segunda línea de la pantalla muestra un cursor intermitente. Introduzca el código de finalización de acceso y pulse  para continuar. La radio vuelve a la pantalla anterior. Se oye el tono DTMF y la pantalla muestra Finalizando llamada. Si es correcta, se oye un tono y la pantalla muestra Llam. final. La radio vuelve a la pantalla de llamada telefónica. Si no es correcta, la radio vuelve a la pantalla de llamada telefónica. Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra
- Pulse OK para realizar llmda. Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra Llam. final. Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

**NOTA:**

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

Pulse el botón  o  para salir de la búsqueda de alias. durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código de finalización de acceso preconfigurado o introduce el código de finalización de acceso como dígitos adicionales, la radio intentará finalizar la llamada. Durante el acceso al canal, la introducción del código de acceso/salida o la transmisión de dígitos adicionales, la radio solo responde al botón de encendido/apagado, mando del volumen y selector de canales. Se oye un tono en cada entrada no válida.

## Realización de llamadas telefónicas mediante marcación manual

Siga el procedimiento para realizar llamadas telefónicas con la radio mediante marcación manual.

1

Pulse  para acceder al menú.

2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

3 Pulse  o  para ir a **Marcación manual**. Pulse  para seleccionar.

---

4 Pulse  o  para ir a **Número telefónico**. Pulse  para seleccionar.

La pantalla muestra **Número:** y un cursor intermitente.

---

5 Introduzca el número telefónico y pulse  para continuar.

La pantalla muestra **Código de acceso:** y un cursor intermitente si el código de acceso no se ha configurado previamente.

---

6 Introduzca el código de acceso y pulse  para continuar. el código de acceso o no acceso no puede tener más de 10 caracteres.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha. La primera línea de texto muestra el alias de suscriptor. La segunda línea de texto muestra el estado de la llamada.

Si la llamada se realiza correctamente:

- Suena el doble tono de multifrecuencia (DTMF).
- Se oye el tono de llamada del usuario del teléfono.
- La primera línea de texto muestra el alias de suscriptor.
- La pantalla continúa mostrando el icono de **llamada telefónica** en la esquina superior derecha.

Si la llamada no se realiza correctamente:

- Suena un tono.
- La pantalla muestra **Llamada telf. y, a continuación, Código de acceso:**.

- La radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada si el código de acceso se ha configurado previamente en la lista de contactos.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita [paso 7](#) o espere a que el usuario del teléfono finalice la llamada.

---

7 Para finalizar la llamada, pulse  .

---

- 8 Lleve a cabo una de las siguientes acciones:
- Si el código de salida no se ha configurado previamente, introduzca el código de salida cuando la pantalla muestre `Código de salida:` y, a continuación, pulse para  continuar. La radio vuelve a la pantalla anterior.
  - Pulse el botón de **acceso de marcación rápida** programado. Si la entrada del botón de **acceso de marcación rápida** está vacía, se oye un tono indicador negativo.

Se oye el tono DTMF y la pantalla muestra `Finalizando llamada.`

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada.`

**NOTA:**

Al pulsar el botón **PTT** en la pantalla de contactos del teléfono, se oye un tono y la pantalla muestra Pulse OK para realizar llmda.

Cuando el usuario del teléfono finaliza la llamada, se oye un tono y la pantalla muestra Llam. final.

Si la llamada finaliza mientras se están introduciendo los dígitos adicionales que requiere la llamada telefónica, la radio vuelve a la pantalla en la que se encontraba antes de iniciar la llamada.

Durante el acceso al canal, pulse  para descartar el intento de llamada y se oirá un tono.

durante la llamada, si pulsa el botón de **acceso de marcación rápida** con el código no acceso preconfigurado o introduce el código no acceso como dígitos adicionales, la radio intentará finalizar la llamada.

Durante el acceso al canal, la introducción del código de acceso/no acceso o la transmisión de dígitos adicionales, la radio

solo responde al botón de **encendido/apagado, mando del volumen y selector de canales**. Se oye un tono en cada entrada no válida.

---

## Multifrecuencia de doble tono

La función Multifrecuencia de doble tono (DTMF) permite que la radio funcione en el marco del sistema de radiofrecuencia con un interfaz al sistema telefónico.

El tono DTMF puede desactivarse inhabilitando todos los tonos y todas las alertas del radioteléfono. Consulte [Encendido y apagado de tonos/alertas de la radio en la página 211](#) para obtener más información.

## Inicio de llamadas DTMF

Siga el procedimiento para iniciar llamadas DTMF en la radio.

- 1 Mantenga pulsado el botón **PTT**.
- 
- 2 Lleve a cabo una de las siguientes acciones:

- Introduzca el número deseado para iniciar una llamada DTMF.
- Pulse  desea iniciar una llamada DTMF.
- Pulse  desea iniciar una llamada DTMF.

## Respuesta a llamadas telefónicas como llamadas de grupo

Siga el procedimiento para responder a llamadas telefónicas como llamadas de grupo con la radio.

Al recibir una llamada telefónica como una llamada de grupo:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra `Llmda. teléf.`
- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

**1** Pulse el botón **PTT** para responder la llamada.

**2** Suelte el botón **PTT** para escuchar.

**3** Para finalizar la llamada, pulse  .

La pantalla muestra `Finalizando llamada`.

### NOTA:

Si la función de llamada telefónica no está activada en la radio, esta no puede finalizar una llamada telefónica como una llamada de grupo. El usuario del teléfono debe finalizar la llamada. Solo se permite al usuario receptor contestar durante la llamada.

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita [paso 3](#) o espere a que el usuario del teléfono finalice la llamada.

## Respuesta a llamadas telefónicas como llamadas a todos

Al recibir una llamada telefónica como una llamada a todos, la radio receptora no puede contestar ni responder. Tampoco se permite al usuario receptor finalizar la llamada a todos.

Al recibir una llamada telefónica como una llamada a todos:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra **Llamada general, Llamada a todos en sitio o Llamada multisitio, en función del tipo de configuración y llamada telefónica.**
- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

## Respuesta a llamadas telefónicas como llamadas privadas

Siga el procedimiento para responder a llamadas telefónicas como llamadas privada con la radio.

Al recibir una llamada telefónica como una llamada privada:

- La pantalla muestra el icono de **llamada telefónica** en la esquina superior derecha.
- La pantalla muestra **Llmda. teléf.**
- El indicador LED verde parpadea.
- La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.

**1** Pulse el botón **PTT** para responder la llamada.

---

**2** Suelte el botón **PTT** para escuchar.

---

**3** Para finalizar la llamada, pulse  .

La pantalla muestra **Finalizando llamada.**

### NOTA:

Si la función de llamada telefónica no está activada en la radio, esta no puede finalizar una llamada telefónica como una llamada privada. El usuario del teléfono debe finalizar la llamada. Solo se permite al usuario receptor contestar durante la llamada.

Si la llamada finaliza correctamente:

- Suena un tono.
- La pantalla muestra `Llamada finalizada`.

Si la finalización de la llamada no es correcta, la radio vuelve a la pantalla de llamada telefónica. Repita [paso 3](#) o espere a que el usuario del teléfono finalice la llamada.

---

## Preferencia de llamada

La función de preferencia de llamada permite a una radio detener cualquier transmisión de voz en curso e iniciar una transmisión con prioridad.

Con la función de preferencia de llamada, el sistema se interrumpe y otorga preferencia a las llamadas en curso en casos en los que los canales de enlace no estén disponibles.

Las llamadas de mayor prioridad, como las llamadas de emergencia o las llamadas a todos hacen que la radio transmisora otorgue prioridad a la llamada de mayor prioridad. Si no hay otros canales de radiofrecuencia (RF) disponibles, la llamada de emergencia tiene preferencia sobre la llamada a todos.

## Interrupción de voz

La interrupción de voz permite al usuario detener una transmisión de voz en curso.

Esta función utiliza la señalización por canal inverso para detener la transmisión de voz en curso de una radio si la radio que la interrumpe está configurada para la interrupción de voz y la radio transmisora está configurada para llamadas de voz interrumpibles. Además, la radio que interrumpe la transmisión puede enviar una transmisión de voz al participante durante la llamada detenida.

La función de Interrupción de voz mejora considerablemente la probabilidad de enviar correctamente una nueva transmisión a las partes interesadas cuando hay una llamada en curso.

El usuario puede acceder a la interrupción de voz solo si se ha configurado esta función en la radio. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación de la interrupción de voz

Siga el procedimiento para iniciar la interrupción de voz en la radio.

La radio debe estar programada para que pueda utilizarse esta función. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

- 1 Para interrumpir la transmisión durante una llamada, pulse el botón **PTT**.

Si se interrumpe la transmisión en una radio, la pantalla muestra `Llamd. interrump.` La radio emite un tono indicador negativo hasta que se suelta el botón PTT.

- 2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

Si no es correcta:

- Suena un tono indicador negativo.

- 3 Lleve a cabo una de las siguientes acciones:
  - Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

## Funciones avanzadas

En este capítulo se explican cómo se utilizan las funciones disponibles en la radio.

Es posible que el distribuidor o el administrador del sistema hayan personalizado la radio para satisfacer sus necesidades específicas. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Cola de llamadas

Cuando no hay recursos disponibles para procesar una llamada, la cola de llamadas permite colocar a la solicitud de llamada en la cola del sistema para los siguientes recursos disponibles.

Se oye un tono de cola de llamada después de pulsar el botón **PTT** que indica que la radio ha entrado en el estado de cola de llamadas. El botón **PTT** puede soltarse cuando se escuche el tono de cola de llamadas.

Si la configuración de la llamada se ha realizado correctamente, ocurre lo siguiente:

- El indicador LED verde parpadea.
- Si está activado, se oirá el tono de permiso para hablar.
- La pantalla muestra el icono del tipo de llamada, el ID o alias.
- El usuario de radio dispone de hasta 4 segundos para pulsar el botón **PTT** y comenzar la transmisión de voz.

Si la configuración de la llamada no se ha realizado correctamente, ocurre lo siguiente:

- Si está activado, se oirá el tono de rechazo.
- En la pantalla se muestra el aviso de fallo momentáneamente.
- La llamada finaliza y la radio sale de la configuración de llamadas.

## Exploración de grupo de conversación

Esta función permite que la radio busque y se una a llamadas de grupos definidos en una lista de grupos de recepción.

Cuando se activa el rastreo, el icono que lo indica aparece en la barra de estado y el indicador LED parpadea en

amarillo. La radio desactiva el silencio de cualquier miembro en su lista de grupos de recepción.

Cuando se desactiva el rastreo, la radio no recibe transmisiones de ningún miembro de la lista de grupos de recepción, con excepción de las llamadas a todos y del grupo de conversación seleccionado.

### NOTA:

El rastreo de grupo de conversación se puede configurar mediante CPS. Consulte con el administrador del sistema cómo se ha programado la radio.

## Activación o desactivación del rastreo de grupo de conversación

Siga el procedimiento para activar o desactivar el rastreo de grupo de conversación en la radio.

- 1 Pulse para acceder al menú.

---

- 2 Pulse o para ir a Rastreo. Pulse para seleccionar.

---

- 3 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Activar. Pulse  para seleccionar.
- Pulse  o  para ir a Desactivar. Pulse  para seleccionar.

Si la función de rastreo está activada:

- La pantalla muestra Exploración activada y el icono de **exploración**.
- El indicador LED parpadea en amarillo.
- Suena un tono indicador positivo.

Si la función de rastreo está desactivada:

- La pantalla muestra Exploración desactivada.
- El icono de **exploración** desaparece.
- El indicador LED se apaga.
- Suena un tono indicador negativo.

## Lista de grupos de recepción

La lista de grupos de recepción es una función que le permite crear y asignar miembros a la lista de rastreo de grupo de conversación.

La lista se crea cuando se programa la radio y determina qué grupos se pueden rastrear. La radio puede admitir un máximo de 16 miembros en esta lista.

Si la radio se programa para editar la lista de rastreo, podrá:

- Añadir/eliminar grupos de conversación.
- Añadir, eliminar y/o editar la prioridad de los grupos de conversación. Consulte la [Edición de la prioridad en un grupo de conversación en la página 111](#).
- Añadir, eliminar y/o editar la afiliación de los grupos de conversación. Consulte la [Adición de una afiliación de grupo de conversación en la página 112](#) y la [Eliminación de una afiliación de grupo de conversación en la página 113](#).
- Reemplazar la lista de rastreo actual por una nueva.

### IMPORTANTE:

Para añadir miembros a la lista, se debe configurar el grupo de conversación en la radio primero.

**NOTA:**

El administrador del sistema programa la lista de grupos de recepción. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Monitor de prioridad

La función de monitor de prioridad permite a la radio recibir las transmisiones de los grupos de conversación con mayor prioridad automáticamente incluso si se encuentra en una llamada de grupo de conversación.

La radio se sale de la llamada de grupo de conversación de menor prioridad para irse a la de mayor prioridad.

**NOTA:**

Solamente se puede acceder a esta función si la función rastreo de grupo de conversación está activada.

La función de monitor de prioridad se aplica únicamente a los miembros en la lista de grupos de recepción. Hay dos grupos de conversación prioritarios: Prioridad 1 (P1) y Prioridad 2 (P2). P1 tiene mayor prioridad que P2. En un sistema Capacity Max, la radio recibe transmisiones en función del orden de prioridad siguiente:

- 1 Llamada de emergencia para el grupo de conversación P1
- 2 Llamada de emergencia para el grupo de conversación P2
- 3 Llamada de emergencia para grupos de conversación no prioritarios en la lista de grupos de recepción
- 4 Llamada a todos
- 5 Llamada de grupo de conversación P1
- 6 Llamada de grupo de conversación P2
- 7 Grupos de conversación no prioritarios en la lista de grupos de recepción

Consulte [Edición de la prioridad en un grupo de conversación en la página 111](#) para obtener más información sobre cómo añadir, eliminar y/o editar la prioridad de los grupos de conversación en la lista de rastreo.

**NOTA:**

Esta función la programa el administrador del sistema. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Edición de la prioridad en un grupo de conversación

En el menú de rastreo de grupo de conversación puede ver o editar la prioridad de un grupo de conversación.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Ver/editar lista. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir al grupo de conversación deseado. Pulse  para seleccionar.  
La prioridad actual se indica mediante un icono de **Prioridad 1** o **Prioridad 2** junto al grupo de conversación.

---

- 5 Pulse  o  para ir a Edit. prioridad. Pulse  para seleccionar.

---

- 6 Pulse  o  para seleccionar el nivel de prioridad que desee. Pulse  para seleccionar.  
Si Prioridad 1 o Prioridad 2 se ha asignado a otro grupo de conversación, puede elegir sobrescribir la prioridad actual. Cuando la pantalla muestra ¿Reemplazar?, pulse  o  para elegir las opciones siguientes:
  - No para volver al paso anterior.
  - Sí para sobrescribir la prioridad.
 La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla anterior. El icono de prioridad aparece junto al grupo de conversación.

---

## Afiliación de varios grupos de conversación

En un sistema Capacity Max, la radio se puede configurar para disponer de hasta siete grupos de conversación en un emplazamiento.

De los 16 grupos de conversación de la lista de grupos de recepción, es posible asignar un máximo de siete de ellos como grupos de conversación de afiliación. El grupo de conversación seleccionado y los grupos de conversación prioritarios se afilian automáticamente.

### NOTA:

Esta función la programa el administrador del sistema. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Adición de una afiliación de grupo de conversación

Siga este procedimiento para añadir una afiliación de grupo de conversación.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Ver/editar lista. Pulse  para seleccionar.

- 4 Pulse  o  para ir al ID o alias de grupo de conversación deseado. Pulse  para seleccionar.

El estado de afiliación se muestra en Ver/editar lista. La pantalla muestra  junto al ID o alias de grupo de conversación seleccionado.

- 5 Pulse  o  para ir a Editar afiliación. Pulse  para seleccionar.

- 6 Lleve a cabo una de las siguientes acciones:
  - Pulse  o  para ir a Encendido. Pulse  para seleccionar.

- Pulse  o  para ir a Apagado. Pulse  para seleccionar.

Cuando se selecciona Encendido, aparece  junto al ID o alias de grupo de conversación.

Si la afiliación se ha realizado correctamente, la pantalla muestra  junto al ID o alias de grupo de conversación seleccionado.

Si la afiliación no se ha realizado correctamente,  se queda junto al ID o alias de grupo de conversación.

#### NOTA:

La radio muestra Lista llena cuando se selecciona un máximo de siete grupos de conversación para la afiliación en la lista de rastreo. Para seleccionar un nuevo grupo de conversación para la afiliación, elimine un grupo de conversación que esté afiliado actualmente para dejar espacio para una nueva adición. Consulte [Eliminación de una afiliación de grupo de conversación en la página 113](#) para obtener más información.

## Eliminación de una afiliación de grupo de conversación

Cuando la lista de afiliación está llena y desea seleccionar un nuevo grupo de conversación para la afiliación, elimine un grupo de conversación afiliado actualmente para dejar espacio para la nueva adición. Siga el procedimiento para eliminar una afiliación de grupo de conversación.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Rastreo. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Ver/editar lista. Pulse  para seleccionar.
- 4 Pulse  o  para ir al ID o alias de grupo de conversación deseado. Pulse  para seleccionar.

El estado de afiliación se muestra en **Ver/Editar lista**. La pantalla muestra **■** junto al ID o alias de grupo de conversación seleccionado.

---

- 5 Pulse  o  para ir a **Editar afiliación**.  
Pulse  para seleccionar.
- 

- 6 Pulse  o  para ir a **Apagado**. Pulse  para seleccionar.  
Cuando se selecciona **Apagado**, **■** desaparece de junto el ID o alias del grupo de conversación.
- 

## Contestación

La función de contestación permite le permite responder a una transmisión durante el escaneo.

Si la radio escanea una llamada de la lista de rastreo de grupo seleccionable y pulsa el botón **PTT** durante una llamada escaneada, el funcionamiento de la radio dependerá de si la contestación estaba habilitada o deshabilitada durante la programación de la radio. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

### Contestación deshabilitada

La radio abandona la llamada escaneada e intenta transmitir el contacto para la posición de canal seleccionada en ese momento. Cuando finalice el tiempo muerto de llamada al contacto seleccionado actualmente, la radio regresa al canal de inicio y se inicia el temporizador de tiempo muerto de rastreo. La radio reanudará el escaneo de grupo una vez finalice el temporizador de tiempo muerto de rastreo.

### Contestación habilitada

Si pulsa el botón **PTT** durante el tiempo muerto de grupo de la llamada escaneada, la radio intentará transmitir al grupo escaneado.

#### NOTA:

Si escanea una llamada para un grupo que no está asignado a una posición de canal en la zona que esté seleccionada en ese momento y la llamada se termina, tendrá que cambiar a la zona correspondiente y seleccionar a continuación la posición de canal del grupo para poder hablar con ese grupo.

## Bluetooth

Esta función permite utilizar la radio con un dispositivo activado para Bluetooth (accesorio) mediante una conexión

Bluetooth. La radio soporta dispositivos activados para Bluetooth de Motorola Solutions y disponibles en el mercado (COTS).

La conexión Bluetooth funciona dentro de un rango de 10 m (32 pies) de la línea de visión. Esta es una línea sin obstáculos entre la radio y el dispositivo habilitado para Bluetooth. Para que funcione con un alto grado de fiabilidad, Motorola Solutions recomienda no separar la radio y el accesorio.

En las zonas periféricas de recepción, la calidad tanto del tono como de la voz comenzará a sonar "distorsionada" o "entrecortada". Para corregir este problema, debe colocar la radio y el dispositivo habilitado para Bluetooth más cerca el uno del otro (dentro del rango de 10 metros [32 pies] definido) para volver a recibir el audio con claridad. La función Bluetooth de la radio tiene una potencia máxima de 2,5 mW (4 dBm) dentro del rango de 10 m (32 pies).

La radio puede soportar hasta tres conexiones Bluetooth simultáneas con dispositivos habilitados para Bluetooth de tipos únicos. Por ejemplo, un auricular, un escáner y un dispositivo de PTT solo (POD). Las múltiples conexiones con dispositivos habilitados para Bluetooth del mismo tipo no están soportadas.

Consulte el manual del usuario de su dispositivo Bluetooth para obtener más detalles sobre todas las capacidades del mismo.

**NOTA:**

Si se desactiva a través de CPS, se desactivarán todas las funciones relacionadas con Bluetooth y se eliminará la base de datos del dispositivo Bluetooth.

## Encendido y apagado de la función Bluetooth

Siga el procedimiento para encender y apagar el Bluetooth.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Mi estado. Pulse  para seleccionar.

La pantalla muestra Enc. y Apaga.. El estado actual se indica mediante .

- 4 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Encendido. Pulse  para seleccionar. La pantalla muestra  junto a Enc.
- Pulse  o  para ir a Apagado. Pulse  para seleccionar. La pantalla muestra  junto a Apagado.

## Conexión a dispositivos Bluetooth

Siga el procedimiento para conectarse a dispositivos Bluetooth.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Dispositivos. Pulse  para seleccionar.

- 4 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.
- Pulse  o  para ir a Buscar dispositivos y encontrar los dispositivos disponibles. Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

- 5 Pulse  o  para Conectar. Pulse  para seleccionar.

Su dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete el acoplamiento. Consulte el manual de usuario de su dispositivo habilitado para Bluetooth.

La pantalla muestra Conectando a <dispositivo>.

Espera a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra <Dispositivo> conectado y el icono de **Bluetooth conectado**.
- La pantalla muestra  junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra Error conexión.

**NOTA:**

Si se necesita un código PIN, consulte [Acceso a las radios mediante el uso de contraseñas en la página 199](#).

## Conexión a dispositivos Bluetooth en el modo de detección

Siga el procedimiento para conectarse a dispositivos Bluetooth en modo de detección.

Encienda el dispositivo habilitado para Bluetooth y colóquelo en modo de acoplamiento.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Encontrarme. Pulse  para seleccionar. Otros dispositivos habilitados para Bluetooth pueden detectar ahora la radio durante un tiempo programado. Esto se denomina modo visible.

Espera a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.

- La pantalla muestra <Dispositivo> conectado y el icono de **Bluetooth conectado**.
- La pantalla muestra ✓ junto al dispositivo conectado.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra Error conexión.

## Desconexión de dispositivos Bluetooth

Siga el procedimiento para desconectarse de dispositivos Bluetooth.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Dispositiv. Pulse  para seleccionar.

---

- 4 Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Desconectar. Pulse  para seleccionar.

La pantalla muestra Descon. de <dispositivo>.

### NOTA:

El dispositivo habilitado para Bluetooth puede requerir pasos adicionales para que se complete la desconexión. Consulte los respectivos manuales de usuario de los dispositivos habilitados para Bluetooth.

Espere a que se produzca la confirmación.

- Suena un tono.
- La pantalla muestra <Dispositivo> desconectado y desaparece el icono de **Bluetooth conectado**.
- ✓ desaparece junto al dispositivo conectado.

## Cambio de la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth

Siga el procedimiento para alternar la salida de audio entre el altavoz interno de la radio y el dispositivo Bluetooth externo.

Pulse el botón programado **Camb. audio BT**.

La pantalla muestra uno de los siguientes resultados:

- Suena un tono. La pantalla muestra Redirig. audio a radio.
- Suena un tono. La pantalla muestra Redirig. audio a Bluetooth.

## Visualización de detalles del dispositivo

Siga el procedimiento para ver los detalles del dispositivo en la radio.

- 1 Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Disposit. Pulse  para seleccionar.

- 4 Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

- 5 Pulse  o  para ir a Ver detalles. Pulse  para seleccionar.

## Eliminación del nombre del dispositivo

Puede eliminar un dispositivo desconectado de la lista de dispositivos habilitados para Bluetooth.

- 1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Disposit. Pulse  para seleccionar.

---

4 Pulse  o  para seleccionar el dispositivo deseado. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Eliminar. Pulse  para seleccionar. La pantalla muestra Disposit. eliminado.

---

## Ganancia de micrófono Bluetooth

Esta función permite al usuario controlar el valor de la ganancia del micrófono dispositivo habilitado para Bluetooth conectado.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Bluetooth. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Gan. micro BT. Pulse  para seleccionar.

---

4 Pulse  o  para ir al tipo Gan. micro BT y los valores actuales. Pulse  para seleccionar. Puede editar los valores aquí.

---

5 Pulse  o  para aumentar o reducir los valores. Pulse  para seleccionar.

---

## Ubicación en interiores

### NOTA:

La función de ubicación en interiores solo se aplica a los modelos que cuentan con la última versión de software y hardware. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

La ubicación en áreas interiores puede utilizarse para realizar un seguimiento de la ubicación de los usuarios de la radio. Cuando Ubicación en interiores está activada, la radio se encuentra en un modo de detección limitado. Las balizas limitadas se utilizan para ubicar la radio y determinar su posición.

## Activación o desactivación de la ubicación en interiores

Realice una de las siguientes acciones para activar o desactivar la ubicación en interiores.

- Acceda a esta función mediante el menú.
  - a. Pulse  para acceder al menú.
  - b. Pulse  o  para ir a Bluetooth y pulse  para seleccionar.
  - c. Pulse  o  para ir a Ubicación en interiores y pulse  para seleccionar.

- d. Pulse  para activar la ubicación en interiores.

La pantalla mostrará Ubicación en interiores activada. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra Activación errónea. Oirá un tono indicador negativo.

- e. Pulse  para apagar la ubicación en áreas interiores.

La pantalla mostrará Ubicación en interiores desactivada. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono Ubicación en interiores disponible en la pantalla de inicio.

- Si no se realiza correctamente, la pantalla muestra *Desactivación errónea*. Oirá un tono indicador negativo.
- Acceda a esta función con el botón programable.
  - a. Pulse de manera prolongada el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará *Ubicación en interiores activada*. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, aparecerá el icono *Ubicación en interiores* disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra *Activación errónea*. Si no se realiza correctamente, oirá un tono indicador negativo.

- b. Pulse el botón **Ubicación en áreas interiores** para activar la ubicación en áreas interiores.

La pantalla mostrará *Ubicación en interiores desactivada*. Oirá un tono indicador positivo.

Ocurrirá una de las siguientes situaciones:

- Si se realiza correctamente, desaparecerá el icono *Ubicación en interiores* disponible en la pantalla de inicio.
- Si no se realiza correctamente, la pantalla muestra *Desactivación errónea*. Si no se realiza correctamente, oirá un tono indicador negativo.

## Acceso a la información de balizas de ubicación en interiores

Siga el procedimiento para acceder la información de las señales periódicas de la ubicación en áreas interiores.

- 1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Bluetooth y pulse  para seleccionar.

---

3 Pulse  o  para ir a Ubicación en interiores y pulse  para seleccionar.

---

4 Pulse  o  para ir a Balizas y pulse  para seleccionar.

---

En la pantalla aparece la información de las balizas.

## Controles de varios sitios

Estas funciones están disponibles cuando el actual canal de radio está configurado para un sistema Capacity Max.

## Inicio de una búsqueda de sitio manual

Siga el procedimiento para iniciar una búsqueda de sitio manual cuando la intensidad de la señal recibida sea débil para intentar encontrar un sitio con mejor señal.

Si la radio encuentra un nuevo sitio:

- Suena un tono indicador positivo.

Si la radio no logra encontrar un nuevo sitio:

- Suena un tono indicador negativo.

## Activar/desactivar bloqueo de sitio

Al habilitarlo, la radio solo buscará el emplazamiento actual. Si se deshabilita, la radio busca otros emplazamientos además del actual.

Pulse el botón programado **Bloq. sitio**.

Si la función de **bloqueo de sitio** está activada:

- Se escuchará un tono indicador afirmativo, el cual señala que la radio se ha bloqueado en sitio actual.
- En la pantalla aparecerá `Site Locked` (Sitio bloq.).

Si la función de **bloqueo de sitio** está desactivada:

- Se oirá un tono indicador negativo, que señala que la radio está desbloqueada.
- En la pantalla aparecerá `Site Unlocked` (Sitio desbloq.).

## Acceso a lista de sitios cercanos

Esta función permite al usuario comprobar la lista de sitios adyacentes del sitio de inicio actual. Siga el procedimiento para acceder a la lista de sitios vecinos:

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Info. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Sitios vecinos. Pulse  para seleccionar.

---

## Recordatorio de canal de inicio

Esta función activa un recordatorio cuando la radio no está configurada en el canal de inicio durante un período de tiempo.

Si esta función está activada cuando la radio no está configurada en el canal de inicio durante un periodo de tiempo, ocurrirá lo siguiente:

- El tono de recordatorio de canal de inicio y el anuncio suenan.
- La primera línea de la pantalla muestra Sin.
- La segunda línea muestra Canal de inicio.

## Silenciar el recordatorio de canal de inicio

Cuando suena el recordatorio del canal de inicio, puede silenciarlo temporalmente.

Pulse el botón programable **Silenciar recordatorio del canal de inicio**.

La primera línea de la pantalla muestra HCR y la segunda línea muestra silenciado.

## Configuración de nuevos canales de inicio

Cuando se activa el recordatorio del canal de inicio, puede configurar un nuevo canal de inicio.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón programable **Restablecer canal de inicio** para establecer el canal actual como nuevo canal de inicio. Omita los pasos siguientes.  
La primera línea de la pantalla muestra el alias del canal y la segunda línea muestra **Nuevo canal principal**.
  - Pulse  para acceder al menú.

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

- 4 Pulse  o  para ir a Canal de inicio.  
Pulse  para seleccionar.

- 5 Pulse  o  para ir al nuevo alias de canal de inicio que desee. Pulse  para seleccionar.  
La pantalla muestra  junto al alias de canal de inicio seleccionado.

## Monitorización remota

Esta función se utiliza para encender el micrófono de una radio de destino con un alias o ID de suscriptor. Se puede utilizar esta función para supervisar de manera remota toda la actividad audible alrededor de la radio de destino.

La radio y la radio de destino deben estar programadas para que pueda utilizarse esta función.

Cuando se inicia, el LED verde parpadea una única vez en la radio de destino. Esta función se detiene automáticamente después de la duración programada o cuando se esté realizando cualquier operación en la radio de destino.

## Iniciación del monitor remoto

Siga el procedimiento para iniciar el monitor remoto en la radio.

1 Pulse el botón **Monitor remoto** programado.

---

2 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

---

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra **Monitor remot..** Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.
- 

## Inicio del monitor remoto mediante la lista de contactos

Siga el procedimiento para iniciar el monitor remoto en la radio mediante la lista de contactos.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a **Contactos**. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Monitor remoto.

Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra Monitor remot.. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.

## Inicio del monitor remoto mediante marcado manual

Siga el procedimiento para iniciar el monitor remoto en la radio mediante el marcado manual.

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

3 Pulse  o  para ir a Marcado. manual. Pulse  para seleccionar.

4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.

5 Lleve a cabo una de las siguientes acciones:

- Introduzca el ID o alias de suscriptor y pulse  para continuar.

- Edite el ID marcado previamente y pulse  para continuar.

6 Pulse  o  para ir a Monitor remoto.

Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso. El indicador LED verde se ilumina.

7 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.
- El audio de la radio que está siendo monitorizada comienza a reproducirse durante un periodo de tiempo programado, y la pantalla muestra Monitor remot.. Cuando el temporizador indica que se ha agotado el tiempo, suena un tono de alerta y el indicador LED se apaga.

Si no es correcta:

- Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.

## Configuración de contactos

La función Contactos proporciona a la radio una "agenda". Cada entrada corresponde a un alias o ID que utiliza para realizar una llamada. Las entradas están ordenadas alfabéticamente.

Cada entrada, según el contexto, se asocia con los diferentes tipos de llamadas: Llamada grupal, llamada privada, llamada de difusión, llamada a todos en el sitio, llamada a todos en varios sitios, llamada de PC o llamada de despacho.

La llamada de PC o la llamada de despacho están relacionadas con los datos. Solo están disponibles con las aplicaciones. Consulte la documentación de aplicaciones de datos para obtener más información.

Además, el menú Contactos le permite asignar a cada entrada una o más teclas numéricas programadas en el micrófono con teclado. Si una entrada está asignada a una tecla numérica, la radio puede realizar un marcado rápido de la entrada.

**NOTA:**

Verá una marca de verificación delante de cada tecla numérica que esté asignada a una entrada. Si la marca se encuentra delante de `Vacio`, no se ha asignado una tecla numérica a la entrada.

Cada entrada dentro de `Contactos` muestra la siguiente información:

- Tipo de llamada
- Alias de la llamada
- ID de llamada

**NOTA:**

Si está activada la función `Privacidad` en un canal, podrá realizar llamadas de grupo, llamadas privadas, llamadas a todos y llamadas telefónicas con la privacidad activada en dicho canal. Solo las radios de destino con la misma clave de privacidad o con el mismo valor de clave e ID de clave que su radio podrán descifrar la transmisión.

## Asignación de entradas a teclas numéricas programadas

Siga el procedimiento para asignar entradas a teclas numéricas programables en la radio.

[Enviar comentarios](#)

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a `Contactos`. Pulse  para seleccionar.

3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

4 Pulse  o  para ir a `Clave del programa`. Pulse  para seleccionar.

- 5 Lleve a cabo una de las siguientes acciones:
- Si la tecla numérica deseada no se ha asignado a una entrada, pulse  o  para seleccionar la tecla numérica que desee. Pulse  para seleccionar.
  - Si la tecla numérica ya se ha asignado a una entrada, la pantalla mostrará el mensaje `La tecla ya está asignada y`, a continuación, en la primera línea de texto de la pantalla aparecerá

el mensaje ¿Reemplazar? Lleve a cabo una de las siguientes acciones:

Pulse  o  para elegir Sí. Pulse  para seleccionar.

La radio emite un tono indicador positivo y la pantalla muestra `Contacto guardado` y un aviso pequeño positivo.

Pulse  o  para elegir No y volver al paso anterior.

Cada entrada puede asociarse a distintas teclas numéricas. Verá  delante de cada tecla numérica que esté asignada a una entrada. Si aparece  delante de `Vacío`, esa tecla numérica no está asignada.

Si se ha asignado una tecla numérica a una entrada en modo determinado, esta función no estará soportada cuando mantenga pulsada la tecla numérica en otro modo.

La pantalla vuelve automáticamente al menú anterior.

---

## Eliminación de asociaciones entre entradas y teclas numéricas programadas

Siga el procedimiento para eliminar las asociaciones entre las entradas y las teclas numéricas programables en la radio.

- 1 Lleve a cabo una de las siguientes acciones:
    - Mantenga pulsada la tecla numérica programada del ID o el alias que desee. Continúe con el paso [4](#).
    - Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a `Contactos`. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
-

- 4 Pulse  o  para ir a Clave del programa.  
Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Vacío. Pulse  para seleccionar.

La primera línea de texto muestra ¿Borrar todas las teclas?.

---

- 6 Pulse  o  para elegir Sí. Pulse  para seleccionar.

**NOTA:**

Cuando se elimina una entrada, la asociación entre esta y sus teclas numéricas programadas también se elimina.

Suena un tono indicador positivo. En la pantalla aparecerá Contacto guardado.

La pantalla vuelve automáticamente al menú anterior.

---

## Adición de nuevos contactos

Siga el procedimiento para añadir nuevos contactos a la radio.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.
- 

- 3 Pulse  o  para Contacto nuevo. Pulse  para seleccionar.
- 

- 4 Pulse  o  para seleccionar el tipo de contacto Contacto radio o Contacto tel. Pulse  para seleccionar.
- 

- 5 Introduzca el número de contacto con el teclado y pulse  para continuar.
-

6 Introduzca el nombre del contacto con el teclado y pulse  para continuar.

---

7 Pulse  o  para el tipo de timbre que desee. Pulse  para seleccionar.

Suena un tono indicador positivo. La pantalla muestra un pequeño aviso positivo.

---

## Configuración del indicador de llamada

Esta función permite que los usuario de la radio configuren los tono de timbre de llamada y de mensaje de texto.

## Activación o desactivación de los timbres de llamada para las llamadas privadas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas privadas en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

6 Pulse  o  para ir a Llamada privada. Pulse  para seleccionar.

---

- 7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar.
- Si está activado,  aparece junto a Activado. Si se desactiva,  junto a Activado desaparece.
- 

## Activación o desactivación de los timbres de llamada para los mensajes de texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los mensajes de texto en la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.
- 
- 5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.
- 
- 6 Pulse  o  para ir a Mensaje de texto. Pulse  para seleccionar.
- La pantalla mostrará  y el tono actual.
- 
- 7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar. La pantalla muestra  junto al tono seleccionado.
-

## Activación o desactivación de los timbres de llamada para las alertas de llamada

Siga el procedimiento para activar o desactivar los timbres de llamada para las alerta de llamada en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Tonos/alerta. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Alerta de llamada. Pulse  para seleccionar.

---

- 7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar. La pantalla muestra  junto al tono seleccionado.

---

## Activación o desactivación de los timbres de llamada para las llamadas selectivas

Siga el procedimiento para activar o desactivar los timbres de llamada para las llamadas selectivas en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alertas. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

6 Pulse  o  para ir a Llamada selectiva. Pulse  para seleccionar.  
La pantalla mostrará  y el tono actual.

---

7 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar. La pantalla muestra  junto al tono seleccionado.

---

## Activación o desactivación de los timbres de llamada para el estado de telemetría con texto

Siga el procedimiento para activar o desactivar los timbres de llamada para los estados de telemetría en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Tonos/alerta. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Timbres de llamada. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Telemetría. Pulse  para seleccionar.

El tono actual queda indicado por un .

---

## Asignación de tipos de timbre

La radio puede programarse para que utilice el sonido de uno de los diez tonos de llamada predefinidos cuando reciba una alerta de llamada o un mensaje de texto de un contacto determinado. La radio reproducirá todos los tipos de timbre al ir desplazándose por la lista. Siga el procedimiento para asignar estilos de tono de la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.
- Las entradas están ordenadas alfabéticamente.
- 

- 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Editar. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Edit. tono. Pulse  para seleccionar.
- 

- 6 Pulse  o  para seleccionar el tono que desee. Pulse  para seleccionar.
-  aparece junto al tono seleccionado.
- 

## Aumento del volumen del tono de alarma

La radio puede programarse para que le avise continuamente cada vez que una llamada de radio se quede sin responder. Esto se realiza mediante un aumento

automático y progresivo del volumen del tono de alarma. Esta función se conoce como Escalart.

## Funciones del registro de llamadas

La radio realiza el seguimiento de todas las llamadas privadas recientes: salientes, respondidas y perdidas. El registro de llamada se utiliza para visualizar y gestionar las llamadas recientes.

Puede que las alertas de llamadas perdidas se incluyan en los registros de llamadas, en función de la configuración del sistema de la radio. Puede realizar las siguientes tareas en cada una de las listas de llamadas:

- Guardar un alias o un ID en los contactos
- Eliminar llamada
- Eliminar todas las llamadas
- Ver detalles

## Visualización de llamadas recientes

Siga el procedimiento para ver las llamadas recientes en la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a la lista de preferidos. Las opciones son Perdidas, Respondidas y Salientes.  
  
Pulse  para seleccionar.  
  
La pantalla muestra la entrada más reciente.

---

- 4 Pulse  o  para ver la lista.  
  
Puede iniciar una llamada privada con el alias o ID que aparece en pantalla en ese momento. Para ello, pulse el botón **PTT**.

---

## Almacenamiento de ID o alias desde la lista de llamadas

Siga el procedimiento para almacenar ID o alias en la radio desde la lista de llamadas.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a la lista que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

- 5 Pulse  o  para ir a Store (Guardar). Pulse  para seleccionar.  
La pantalla muestra un cursor intermitente.

- 6 Introduzca el resto de caracteres del alias que desee. Pulse  para seleccionar.  
Puede almacenar un ID sin alias.  
La pantalla muestra un pequeño aviso positivo.

## Eliminación de llamadas desde la lista de llamadas

Siga el procedimiento para eliminar llamadas de la radio desde la lista de llamadas.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

3 Pulse  o  para ir a la lista que desee.

Pulse  para seleccionar.

Si la lista está vacía:

- Suena un tono.
- La pantalla muestra `Lista vacía`.

4 Pulse  o  para ir al ID o alias que desee.

Pulse  para seleccionar.

5 Pulse  o  para ir a `¿Borrar entrada?`

Pulse  para seleccionar.

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para seleccionar `Sí` y borrar la entrada.  
La pantalla muestra `Entrada eliminada`.
- Pulse  o  para seleccionar `No`. Pulse  para seleccionar.

[Enviar comentarios](#)

La radio vuelve a la pantalla anterior.

## Eliminación de todas las llamadas desde la lista de llamadas

Siga el procedimiento para eliminar todas las llamadas de la radio desde la lista de llamadas.

1 Pulse  para acceder al menú.

2 Pulse  o  para ir a `Registro de llamadas`. Pulse  para seleccionar.

3 Pulse  o  para ir a la lista que desee.  
Pulse  para seleccionar.

4 Pulse  o  para ir al ID o alias que desee.  
Pulse  para seleccionar.

5 Pulse  o  para ir a Eliminar todo. Pulse  para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para seleccionar Sí y borrar todas las entradas.  
La pantalla muestra un pequeño aviso positivo.
  - Pulse  o  para seleccionar No. Pulse  para seleccionar.  
La radio vuelve a la pantalla anterior.
- 

## Visualización de detalles desde la lista de llamadas

Siga el procedimiento para ver los detalles de la lista de llamadas en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Registro de llamadas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a la lista que desee. Pulse  para seleccionar.

---

4 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Ver detalles. Pulse  para seleccionar.  
La pantalla muestra los detalles.

---

## Funcionamiento de las alertas de llamada

Los avisos de alertas de llamada le permiten avisar a un usuario determinado de radio para que vuelva a llamarle cuando pueda.

Esta función solamente se aplica a los alias o ID de suscriptor y se puede acceder a ella a través del menú mediante Contactos, la marcación manual o un botón programado de **acceso de marcación rápida**.

En Capacity Max, la función de alerta de llamada permite a un usuario de radio o a un despachador enviar una alerta a otro usuario de radio solicitando que vuelva a llamar a la radio que inicia la comunicación cuando se encuentre disponible. La función no conlleva ninguna comunicación por voz.

El distribuidor o el administrador del sistema pueden configurar el funcionamiento de las alertas de llamada de dos formas:

- La radio se configura para que el usuario pueda pulsar el botón **PTT** para responder directamente a la persona que ha iniciado la llamada mediante la realización de una llamada privada.
- La radio se configura para que el usuario pueda pulsar el botón **PTT** y continuar con otra comunicación con el grupo de conversación. Al pulsar el botón **PTT** en la entrada de alerta de llamada el usuario no podrá responder a la persona que inició la llamada. El usuario debe navegar hasta la opción Registro de llamadas perdidas en el menú Registro de llamadas y responder a la alerta de llamada desde allí.

Una llamada privada de establecimiento de llamada fuera del aire (OACSU) permite al usuario responder de forma inmediata, mientras que una llamada privada de establecimiento de llamadas totalmente fuera del aire (FOACSU) requiere la confirmación del usuario para establecer la llamada. Por tanto, se recomienda utilizar las llamadas de tipo OACSU para la función de alerta de llamada. Consulte [Llamada privada en la página 81](#).

## Realización de alertas de llamada

Siga el procedimiento para realizar alertas de llamada con la radio.

- 1 Pulse el botón de **acceso de marcación rápida** programado.

La pantalla muestra *Alerta de llamada* y el ID o alias de suscriptor. El indicador LED verde se ilumina.

- 
- 2 Espere a que se produzca la confirmación.

Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.

Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.

---

## Realización de alertas de llamada mediante la lista de contactos

Siga el procedimiento para realizar alertas de llamada con la radio mediante la lista de contactos.

- 1 Pulse  para acceder al menú.

---

  - 2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

  - 3 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Alerta de llamada.

Pulse  para seleccionar.

La pantalla muestra Alerta de llamada y el ID o alias de suscriptor. El indicador LED verde se ilumina.

---

- 5 Espere a que se produzca la confirmación.
    - Si se recibe la confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño positivo.
    - Si no se recibe ninguna confirmación de la alerta de llamada, la pantalla mostrará un aviso pequeño negativo.
- 

## Respuesta a alertas de llamada

Siga el procedimiento para responder a alertas de llamada con la radio.

Cuando se recibe una alerta de llamada:

- Se oye un tono repetitivo.
- El indicador LED parpadea en amarillo.

- La pantalla muestra la lista de notificaciones y aparece una alerta de llamada con el alias o ID de la radio que realiza la llamada.

En función de la configuración de su distribuidor o administrador del sistema, puede responder a una alerta de llamada realizando una de las siguientes opciones:

- Pulse el botón **PTT** para responder con una llamada privada directamente a la persona que llama.
- Pulse el botón **PTT** para continuar la comunicación normal con el grupo de conversación.

La alerta de llamada se mueve a la opción de llamadas perdidas en el menú Registro de llamadas. Puede responder al autor de la llamada perdida desde el registro de llamadas perdidas.

---

Consulte [Lista de notificaciones en la página 202](#) y [Funciones del registro de llamadas en la página 137](#) para obtener más información.

[Enviar comentarios](#)

## Modo Silenciar

El modo Silenciar ofrece al usuario la opción de silenciar todos los indicadores de audio de la radio.

Cuando se inicia el modo Silenciar, se silencian todos los indicadores de audio de la radio, con excepción de las funciones con mayor prioridad como las operaciones de emergencia.

Cuando se sale del modo Silenciar, la radio vuelve a utilizar tonos y transmisiones de audio.

### NOTA:

Se trata de una función adquirible. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

## Activación del modo Silenciar

Siga el procedimiento para activar el modo Silenciar.

---

Acceda a esta función a través del botón programable **Modo Silenciar**.

Cuando se activa el modo Silenciar ocurre lo siguiente:

- Suena un tono indicador positivo.
- La pantalla muestra `Modo de silenciado activado`.

- La luz LED roja empieza a parpadear y sigue haciéndolo hasta que se sale del modo Silenciar.
- Se muestra el icono del **Modo Silenciar** en la pantalla de inicio.
- La radio está silenciada.
- El temporizador del modo Silenciar comienza la cuenta atrás que tiene configurada.

## Configuración del temporizador del modo Silenciar

Es posible activar la función modo Silenciar durante un periodo preconfigurado de tiempo mediante la configuración del temporizador del modo Silenciar. La duración del temporizador se configura en el menú de la radio y puede variar de 30 minutos a 6 horas. Cuando el temporizador expira, se sale del modo Silenciar.

Si el temporizador se queda en 0, la radio se queda en el modo Silenciar durante un periodo de tiempo indefinido hasta que se pulsa el botón programado **Modo Silenciar**.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Temp. silenc.. Pulse  para seleccionar.
- 

- 5 Pulse  o  para editar el valor numérico de cada dígito y pulse .
- 

## Salida del modo Silenciar

Se puede salir de esta función automáticamente cuando expira el temporizador del modo Silenciar.

Lleve a cabo una de las siguientes operaciones para salir del modo Silenciar manualmente:

- Pulse el botón programado **Modo Silenciar**.

- Pulse el botón **PTT** en cualquier entrada.

Cuando se desactiva el modo Silenciar ocurre lo siguiente:

- Suena el tono indicador negativo.
- La pantalla muestra el Modo de silenciado apagado.
- El LED que parpadea en rojo se apaga.
- El icono del **modo Silenciar** desaparece de la pantalla de inicio.
- La radio desactiva el silencio y se restaura el estado del altavoz.
- Si el temporizador del modo Silenciar no ha expirado, se detiene.

#### **NOTA:**

También se sale del modo Silenciar si el usuario transmite voz o cambia a un canal sin programar.

## **Funcionamiento de emergencia**

Una alarma de emergencia se utiliza para indicar una situación crítica. Es posible iniciar una alarma de emergencia en cualquier momento, incluso cuando haya actividad en el canal actual.

En Capacity Max, la radio receptora solo admite una sola alarma de emergencia a la vez. Si se ha iniciado, una segunda alarma de emergencia anulará la primera alarma.

Cuando se recibe una alarma de emergencia, el receptor puede optar por eliminar la alarma y salir de la lista de alarmas o responder a la alarma de emergencia pulsando el botón **PTT** y transmitiendo el mensaje de voz de no emergencia.

Su distribuidor o administrador del sistema puede establecer la duración de la pulsación del botón **Emergencia** programado, excepto para la pulsación larga, que es similar a la del resto de botones:

#### **Pulsación corta**

Duración entre 0,05 y 0,75 segundos.

#### **Pulsación larga**

Duración entre 1 y 3,75 segundos.

El botón **Emergencia** se asigna junto con la función Emergencia activada/desactivada. Póngase en contacto con su distribuidor para obtener información acerca del funcionamiento asignado al botón **Emergencia**.

## NOTA:

Si la pulsación corta del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación larga del botón **Emergencia** se asignará a la salida del modo de emergencia.

Si la pulsación larga del botón **Emergencia** está asignada a la activación del modo de emergencia, la pulsación corta del botón **Emergencia** se asignará a la salida del modo de emergencia.

La radio soporta tres alarmas de emergencia:

- Alarma de emergencia
- Alarma de emergencia con llamada
- Alarma de emergencia con transmisión de voz posterior

Además, todas las alarmas tienen los siguientes tipos:

### Normal

La radio transmite una señal de alarma y utiliza un indicador visual o sonoro.

### Silencio

La radio transmite una señal de alarma sin utilizar ningún indicador sonoro ni visual. La radio recibe llamadas sin ningún sonido a través del altavoz, hasta que el periodo programado de transmisión con el *micrófono activo* finaliza o se pulsa el botón **PTT**.

## Silencio con voz

La radio transmite una señal de alarma sin ningún indicador sonoro ni visual, pero permite que las llamadas entrantes suenen a través del altavoz.

## NOTA:

Solo se puede asignar **una** de las alarmas de emergencia anteriores al botón que ha programado previamente como **Emergencia** o al pedal de Emergencia.

## Envío de alarmas de emergencia

Esta función permite enviar una alarma de emergencia, una señal sin voz, que activa una indicación de alerta en un grupo de radios. Siga el procedimiento para enviar alarmas de emergencia con la radio.

La radio no muestra ningún indicador sonoro o visual durante el modo de emergencia cuando está configurada en Silencio.

### 1 Pulse el botón programado **Emergencia activada**.

Verá uno de los siguientes resultados:

- La pantalla muestra **ALARMA TX** y el alias de destino.

- La pantalla muestra `Telegrama Tx` y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

**NOTA:**

Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia. El distribuidor o administrador del sistema pueden programar el tono de búsqueda de emergencia.

## 2 Espere a que se produzca la confirmación.

Si es correcta:

- Suena el tono de emergencia.
- El indicador LED verde parpadea.
- La pantalla muestra `Alarma enviada`.

Si no se realiza correctamente tras agotar todos los reintentos:

- Suena un tono.
- La pantalla muestra `Alarma fallida`.

[Enviar comentarios](#)

La radio sale del modo de alarma de emergencia y vuelve a la pantalla de inicio.

**NOTA:**

Cuando se configura la función de solo alarma de emergencia, el proceso de emergencia consta únicamente del envío de la alarma de emergencia. La emergencia finaliza cuando se recibe una confirmación del sistema o cuando se han agotado los intentos de acceso al canal.

Ninguna llamada de voz se asocia al envío de una alarma de emergencia cuando funciona como solo alarma de emergencia.

## Envío de alarmas de emergencia con llamada

Esta función permite enviar una alarma de emergencia con llamada a un grupo de radios o a un despachador. Tras el reconocimiento de la infraestructura que esté dentro del grupo, un grupo de radios puede comunicarse a través de un canal de emergencia programado.

La radio debe tener configurada la alarma de emergencia y llamada para realizar una llamada de emergencia tras el proceso de alarma.

## 1 Pulse el botón **Emergen. enc.** programado.

La pantalla muestra **Alarma Tx** y el alias de destino. Aparece el icono de **emergencia**. El indicador LED verde se ilumina.

### **NOTA:**

Si se ha programado, suena el tono de búsqueda de emergencia. Este tono se silencia cuando la radio transmite o recibe voz y se detiene cuando la radio sale del modo de emergencia.

Si se recibe correctamente la confirmación de alarma de emergencia:

- Suena el tono de emergencia.
- El indicador LED verde parpadea.
- La pantalla muestra **Alarma enviada**.
- La radio entra en el modo de llamada de emergencia cuando la pantalla muestra **Emergencia** y el alias del grupo de destino.

Si no se recibe correctamente la confirmación de alarma de emergencia:

- Se han agotado todos los reintentos.
- Suena un tono grave.

- La pantalla muestra **Alarma fallida**.
- La radio sale del modo de alarma de emergencia.

---

## 2 Pulse el botón **PTT** para iniciar una transmisión de voz.

El indicador LED verde se ilumina. La pantalla muestra el icono de **llamada a grupo**.

---

## 3 Lleve a cabo una de las siguientes acciones:

- Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
- Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

---

## 4 Suelte el botón **PTT** para escuchar.

La pantalla muestra los alias de grupo y de autor de llamada.

---

## 5 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el

usuario responda. Pulse el botón **PTT** para responder la llamada.

- 6 Pulse el botón **Emergencia desactivada** programado para salir del modo de emergencia.

La radio volverá a la pantalla de inicio.

**NOTA:**

Dependerá de la programación de la radio que pueda escuchar o no el tono Permiso para hablar. El distribuidor de la radio o el administrador del sistema podrán proporcionarle más información sobre cómo se ha programado la radio para las emergencias.

La persona que ha iniciado la llamada de emergencia puede pulsar  para finalizar una llamada de emergencia en curso. La radio vuelve al estado de llamada inactiva, pero la pantalla de llamada de emergencia permanece abierta.

## Envío de alarmas de emergencia con transmisión de voz posterior

Esta función permite enviar una alarma de emergencia con transmisión de voz posterior a un grupo de radios. El micrófono de la radio se activa de manera automática y le permite comunicarse con el grupo de radios sin tener que pulsar el botón **PTT**. El estado de micrófono activado también se conoce como *micrófono de emergencia*.

**NOTA:**

la radio no detecta el micrófono no IMPRES conectado al conector para accesorios trasero. Si la radio no detecta ningún micrófono en el conector programado especificado, comprueba el conector alternativo y da prioridad al micrófono encontrado.

Si la radio tiene el modo de ciclo de emergencias activado, las repeticiones de *micrófono activo* y el periodo de recepción se realizan con una duración programada. Durante el modo de ciclo de emergencias, las llamadas recibidas suenan a través del altavoz.

Si pulsa el botón **PTT** durante el periodo de recepción programado, escuchará un tono de prohibición que indica que debe soltar el botón **PTT**. La radio ignora que se ha

pulsado el botón **PTT** y permanece en modo de emergencia.

Si pulsa el botón **PTT** mientras el *micrófono de emergencia* está conectado y lo mantiene pulsado después de que haya terminado esta conexión, la radio seguirá transmitiendo hasta que suelte el botón **PTT**.

si se produce un error en la solicitud de la alarma de emergencia, la radio no intenta enviar de nuevo la solicitud y entra directamente en el estado de *micrófono activo*.

### NOTA:

Puede que ciertos accesorios no admitan el *micrófono de emergencia*. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Siga el procedimiento para enviar alarmas de emergencia mediante voz con la radio.

- 1 Pulse el botón **Emergencia activada** programado o el pedal de **emergencia**.

Verá uno de estos resultados:

- La pantalla muestra **Alarma Tx** y el alias de destino.

- La pantalla muestra **Telegrama Tx** y el alias de destino.

El indicador LED verde se ilumina. Aparece el icono de **emergencia**.

- 
- 2 Cuando la pantalla muestre **Alarma enviada**, hable con claridad al micrófono.

La radio detiene automáticamente la transmisión:

- Cuando el tiempo de duración del ciclo entre el *micrófono de emergencia* y las llamadas recibidas se agota, si el modo de ciclo de emergencia está activado.
- La conexión del *micrófono activo* termina si el modo de ciclo de emergencia está desactivado.

- 
- 3 Pulse el botón **Emergencia desactivada** programado para salir del modo de emergencia.

La radio volverá a la pantalla de inicio.

## Recepción de alarmas de emergencia

La radio receptora solo admite una sola alarma de emergencia a la vez. Si se ha iniciado, una segunda alarma de emergencia anulará la primera alarma. Siga el procedimiento para recibir y ver alarmas de emergencia en la radio.

Cuando se recibe una alarma de emergencia:

- Suena un tono.
- El LED rojo parpadea.
- La pantalla muestra la lista de alarmas de emergencia, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

1 Pulse  para ver la alarma.

2 Pulse  para ver las opciones de acción y los detalles de la entrada en la lista de alarmas.

3 Pulse  y seleccione **Sí** para salir de la lista de alarmas.

La radio vuelve a la pantalla de inicio con un **icono de emergencia** que se muestra en la parte superior

[Enviar comentarios](#)

y que indica que no se ha resuelto la alarma de emergencia. El **icono de emergencia** desaparece cuando se elimina la entrada de la lista de alarmas.

4 Pulse  para acceder al menú.

5 Seleccione **Lista de alarmas** para volver a ver la lista de alarmas.

6 El tono suena y el indicador LED rojo parpadea hasta que salga del modo de emergencia. No obstante, se puede silenciar el tono. Lleve a cabo una de las siguientes acciones:

- Pulse el botón **PTT** para llamar al grupo de radios que recibió la alarma de emergencia.
- Pulse cualquier botón programable.

## Respuesta a alarmas de emergencia

Cuando se recibe una alarma de emergencia, el receptor puede optar por eliminar la alarma y salir de la lista de alarmas o responder a la alarma de emergencia pulsando el botón **PTT** y transmitiendo el mensaje de voz de no

emergencia. Siga el procedimiento para responder a alertas de emergencia con la radio.

- 1 Si la indicación de alarma de emergencia está activada, la lista de alarmas de emergencia aparecerá cuando la radio reciba una alarma de emergencia. Pulse  o  para ir al ID o alias que desee.

- 2 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para transmitir el mensaje de voz de no emergencia al mismo grupo al que se envió la alarma de emergencia.

El indicador LED verde se ilumina.

- 3 Lleve a cabo una de las siguientes acciones:
  - Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.
  - Espere a que finalice el efecto local de **PTT** (si está activado) y hable con claridad al micrófono.

- 4 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde:

- El LED rojo parpadea.
- La pantalla muestra el icono de **llamada de emergencia**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

### NOTA:

Si la indicación de llamada de emergencia no está activada, la pantalla muestra el icono de **llamada de grupo**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

---

## Respuesta a alarmas de emergencia con llamada

Siga el procedimiento para responder a alarmas de emergencia mediante llamada con la radio.

Cuando se recibe una llamada de emergencia:

- El tono de llamada de emergencia suena si la indicación de llamada de emergencia y el tono de descodificación

de llamada de emergencia están activados. El tono de llamada de emergencia no sonará si solo está activada la indicación de llamada emergencia.

- La pantalla muestra el icono de **llamada de emergencia** en la esquina superior derecha.
  - La línea de texto muestra el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.
  - La radio desactiva el silencio y las llamadas entrantes suenan a través del altavoz.
- 1 Si la función de indicación de canal libre está activada, oirá un breve tono de alerta en el momento en que la radio transmisora suelte el botón **PTT**, lo que señala que el canal está libre para que el usuario responda. Pulse el botón **PTT** para responder la llamada.

El indicador LED verde se ilumina.

- 2 Espere hasta que acabe el tono de Permitir hablar (si está activado) y comience a hablar con claridad al micrófono.

- 3 Suelte el botón **PTT** para escuchar.

Cuando la radio que inicia la emergencia responde:

- El LED rojo parpadea.
- La pantalla muestra el icono de **llamada de emergencia**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

#### NOTA:

Si la indicación de llamada de emergencia no está activada, la pantalla muestra el icono de **llamada de grupo**, el ID o alias del grupo de conversación de emergencia, y el ID o alias de la radio transmisora.

---

## Mensaje de estado

Esta función permite al usuario enviar mensajes de estado a otras radios.

La lista de estado rápido se configura mediante CPS-RM y contiene un máximo de 99 estados.

La longitud máxima de cada mensaje de estado es de 16 caracteres.

**NOTA:**

Cada estado cuenta con un valor digital correspondiente que va de 0 a 99. Se puede especificar un alias para cada estado de modo que se pueda acceder a él con facilidad.

## Envío de mensajes de estado

Siga el procedimiento siguiente para enviar un mensaje de estado.

- Lleve a cabo una de las siguientes acciones:
  - Pulse el botón de **acceso de marcación rápida** programado. Omite los pasos siguientes.
  - Pulse  para acceder al menú.

- Pulse  o  para ir a Estado. Pulse  para seleccionar.

- Pulse  o  para ir a Estado rápido. Pulse  para seleccionar.

- Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

- Pulse  o  para ir al ID o alias de suscriptor o de grupo deseado. Pulse  para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla Estado rápido.
- La pantalla muestra  junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla Estado rápido.

## Envío de un mensaje de estado mediante el botón programable

Siga el procedimiento para enviar un mensaje de estado mediante el botón programable.

1 Pulse el botón programado **Mensaje de estado**.

---

2 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar. Se muestra la lista de contactos.

---

3 Pulse  o  para ir al ID o alias de suscriptor o de grupo deseado. Pulse  para seleccionar.

---

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla Estado rápido.

- La pantalla muestra  junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla Estado rápido.

## Envío de un mensaje de estado mediante la lista de contactos

Siga el procedimiento para enviar un mensaje de estado mediante la lista de contactos.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir al ID o alias de suscriptor o de grupo deseado. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Enviar estado. Pulse  para seleccionar.

---

5 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

---

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla Estado rápido.
- La pantalla muestra  junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.

- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla Estado rápido.

## Envío de mensajes de estado mediante marcado manual

Siga el procedimiento para enviar un mensaje de estado mediante marcado manual.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Contactos. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Marcado. manual. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Núm. radio. Pulse  para seleccionar.

---

5 Introduzca el ID o alias de suscriptor o de grupo que desee y pulse  para continuar.

---

6 Pulse  o  para ir a Enviar estado. Pulse  para seleccionar.

---

7 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

---

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo momentáneamente antes de volver a la pantalla Estado rápido.
- La pantalla muestra  junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.

- La pantalla muestra un aviso pequeño de fallo momentáneamente antes de volver a la pantalla Estado rápido.

## Visualización de mensajes de estado del usuario

Siga el procedimiento para ver mensajes de estado.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Estado. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

---

4 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

El usuario de la radio puede ver el contenido del mensaje de estado.

---

También es posible ver los mensajes de estado recibidos si se accede a la lista de notificaciones. Consulte [Lista de notificaciones en la página 202](#) para obtener más información.

## Respuesta a mensajes de estado

Siga el procedimiento para responder a mensajes de estado.

- 1 Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Estado. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.
- 4 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

- 5 Se muestra el contenido del estado. Pulse  para seleccionar.
- 6 Pulse  o  para ir a Responder. Pulse  para seleccionar.
- 7 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

Si es correcta:

- Suena un tono indicador positivo.
- El indicador LED se apaga.
- La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla Buzón.
- La pantalla muestra  junto al mensaje de estado enviado.

Si no es correcta:

- Suena un tono indicador negativo.
- El indicador LED se apaga.

- La pantalla muestra un aviso de error momentáneamente antes de volver a la pantalla Buzón.

## Eliminación de un mensaje de estado

Siga el procedimiento para eliminar un mensaje de estado de la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Estado. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

---

- 4 Pulse  o  hasta llegar al mensaje de estado que desee. Pulse  para seleccionar.

---

- 5 Se muestra el contenido del estado. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

---

- 7 Pulse  o  para elegir Sí. Pulse  para seleccionar.

---

- La pantalla muestra un aviso pequeño positivo antes de volver a la pantalla Buzón.

## Eliminación de todos los mensajes de estado

Siga el procedimiento para eliminar todos los mensajes de estados desde la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Estado. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

---

4 Pulse  o  para ir a **Eliminar todo**. Pulse  para seleccionar.

---

5 Pulse  o  para elegir **Sí**. Pulse  para seleccionar.

---

- La pantalla muestra **Lista vacía**.

## Mensajes de texto

La radio puede recibir datos como, por ejemplo, un mensaje de texto, de otra radio o una aplicación de mensajes de texto.

Existen dos tipos de mensajes de texto: mensajes de texto y mensajes de texto breves DMR (Radio móvil digital). La longitud máxima de un mensaje de texto breve DMR es de 23 caracteres. La longitud máxima de un mensaje de texto es de 280 caracteres, incluida la línea de asunto. La línea de asunto solo aparece al recibir mensajes desde las aplicaciones de correo electrónico.

### NOTA:

La longitud máxima de caracteres se aplica solo a los modelos con la última versión de software y hardware. Para modelos de radio con software y hardware más antiguo, la longitud máxima de un mensaje de texto es de 140 caracteres. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Para el árabe, la orientación de la entrada de texto es de derecha a izquierda.

## Mensajes de texto

Los mensajes de texto se guardan en un buzón y se ordenan según el mensaje recibido más recientemente.

La radio sale de la pantalla actual cuando el temporizador de inactividad se agota. mantenga pulsado  , en cualquier momento, para volver a la pantalla de inicio.

## Visualización de los mensajes de texto

Siga el procedimiento para ver los mensajes de texto en la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

Si el buzón está vacío:

- La pantalla muestra `Lista vacía`.
  - Si el tono de teclado está activado, sonará un tono.
- 

4 Pulse  o  para ir al mensaje que desee.  
Pulse  para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

---

## Visualización de mensajes de texto de estado de telemetría

Siga el procedimiento para ver un mensaje de texto de estado de telemetría desde el buzón de entrada.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

---

4 Pulse  o  para ir al mensaje que desee.  
Pulse  para seleccionar.

No puede responder a un mensaje de texto de estado de telemetría.

La pantalla muestra `Telemetría: <Mensaje de texto de estado>`.

---

- 5 Mantenga pulsado  para volver a la pantalla de inicio.

## Respuesta a mensajes de texto

Siga el procedimiento para responder a mensajes de texto con la radio.

Al recibir un mensaje de texto:

- La pantalla muestra la lista de notificaciones con el alias o ID del remitente.
- La pantalla muestra el icono de **mensaje**.

### NOTA:

La radio sale de la pantalla de alerta de mensaje de texto y realiza una llamada privada o de grupo al remitente del mensaje si se pulsa el botón **PTT**.

- 1 Lleve a cabo una de las siguientes acciones:
- Pulse  o  para ir a Leer. Pulse  para seleccionar.  
La pantalla muestra el mensaje de texto. Si el mensaje procede de una aplicación de correo

electrónico, en la pantalla aparecerá una línea de asunto.

- Pulse  o  para ir a Leer luego. Pulse  para seleccionar.  
La radio vuelve a la pantalla en la que se encontraba antes de recibir el mensaje de texto.
- Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

2 Lleve a cabo una de las siguientes acciones:

- Pulse  para volver al buzón.
- Pulse  por segunda vez para responder, reenviar o eliminar el mensaje de texto.

## Respuesta a mensajes de texto con mensajes de texto rápido

Siga el procedimiento para responder a mensajes de texto mediante mensajes de texto rápidos con la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado.  
Continúe en el paso 3.
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

3 Pulse  o  para ir a Buzón. Pulse  para seleccionar.

4 Pulse  o  para ir al mensaje que desee.  
Pulse  para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

5 Pulse  para acceder al submenú.

6 Pulse  o  para ir a Responder. Pulse  para seleccionar.

7 Pulse  o  para ir a Resp. ráp. Pulse  para seleccionar.

8 Pulse  o  para ir al mensaje que desee.  
Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

9 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.

- La radio vuelve a la pantalla de la opción Reenviar.

---

### Reenvío de mensajes de texto

Siga el procedimiento para reenviar mensajes de texto con la radio.

En la pantalla de la opción **Volver a enviar**:

Pulse  para volver a enviar el mismo mensaje al mismo alias o ID de grupo o suscriptor.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.
- La pantalla muestra un aviso pequeño negativo.
- La radio vuelve a la pantalla de la opción **Volver a enviar**.

### Transferencia de mensajes de texto

Siga el procedimiento para transferir mensajes de texto con la radio.

En la pantalla de la opción **Reenviar**:

- 1 Pulse  o  para ir a **Transferir** y, a continuación, pulse  para enviar el mismo mensaje a otro suscriptor, o ID o alias de grupo.

- 2 Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

- 3 Espere a que se produzca la confirmación.  
Si es correcta:
  - Suena un tono.
  - La pantalla muestra un pequeño aviso positivo.Si no es correcta:
  - Suena un tono.

- La pantalla muestra un aviso pequeño negativo.

**NOTA:**

También puede seleccionar manualmente la dirección de una radio de destino (consulte [Transferencia de mensajes de texto mediante marcación manual en la página 453](#)).

## Transferencia de mensajes de texto mediante marcación manual

Siga el procedimiento para transferir mensajes de texto con la radio mediante marcación manual.

- 1 Pulse  o  para Reenviar. Pulse  para seleccionar.
- 2 Pulse  para enviar el mismo mensaje a otro suscriptor o ID de grupo o suscriptor.

- 3 Pulse  o  para ir a Marcado. manual.

Pulse  para seleccionar.

La pantalla muestra NÚm. radio:.

- 4 Introduzca el ID de suscriptor y pulse  para continuar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

- 5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.

## Edición de mensajes de texto

Seleccione **Editar** para editar el mensaje.

### NOTA:

si existe una línea de asunto (para los mensajes recibidos desde una aplicación de correo electrónico), no podrá editarla.

- 1 Pulse  o  para ir a **Editar**. Pulse  para seleccionar.

La pantalla muestra un cursor intermitente.

- 2 Utilice el teclado para editar el mensaje.
  - Pulse  para desplazarse un espacio hacia la izquierda.
  - Pulse  o  para desplazarse un espacio hacia la derecha.
  - Pulse  para borrar los caracteres no deseados.

- Mantenga pulsado  para cambiar el método de introducción de texto.

- 3 Pulse  cuando termine de redactar el mensaje.

- 4 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a **Enviar** y pulse  para enviar el mensaje.
- Pulse  o  para ir a **Guardar** y pulse  para guardar el mensaje en la carpeta **Borrador**.
- Pulse  para editar el mensaje.
- Pulse  para elegir entre borrar el mensaje o guardarlo en la carpeta **Borrador**.

## Redacción de mensajes de texto

Siga el procedimiento para escribir mensajes de texto con la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje de texto** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

3 Pulse  o  para ir a Redac. Pulse  para seleccionar.

Aparece un cursor intermitente.

4 Utilice el teclado para escribir el mensaje.

Pulse  para desplazarse un espacio hacia la izquierda.

Pulse  o  para desplazarse un espacio hacia la derecha.

Pulse  para borrar los caracteres no deseados.

Mantenga pulsado  para cambiar el método de introducción de texto.

5 Pulse  cuando termine de redactar el mensaje.

Lleve a cabo una de las siguientes acciones:

- Pulse  para enviar el mensaje.
- Pulse . Pulse  o  para elegir entre editar, eliminar o guardar el mensaje. Pulse  para seleccionar.

## Envío de mensajes de texto

Siga el procedimiento para enviar mensajes de texto con la radio.

Se asume que tiene un nuevo mensaje de texto escrito o un mensaje de texto guardado.

Seleccione el destinatario del mensaje. Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir al ID o alias que desee. Pulse  para seleccionar.
- Pulse  o  para ir a **Marcado manual**. Pulse  para seleccionar. Introduzca el ID de suscriptor. La primera línea de la pantalla muestra **Núm. radio:**. La segunda línea de la pantalla muestra un cursor intermitente.

Introduzca el ID o alias de suscriptor. Pulse .

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando su mensaje.

Si es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño positivo.

Si no es correcta:

- Se oye un tono grave.
- La pantalla muestra un aviso pequeño negativo.
- El mensaje se mueve a la carpeta **Enviados**.
- El mensaje se marca con un icono de error de envío.

#### NOTA:

Para un mensaje de texto nuevo, la radio regresa a la pantalla de la opción **Reenviar**.

## Eliminación de mensajes de texto desde el buzón

Siga el procedimiento para eliminar mensajes de texto desde el buzón de la radio.

**1** Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

**2**

Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.

**3**

Pulse  o  para ir a **Buzón**. Pulse  para seleccionar.

Si el buzón está vacío:

- La pantalla muestra `Lista vacía`.
- Suena un tono.

---

4 Pulse  o  para ir al mensaje que desee.

Pulse  para seleccionar.

Si el mensaje procede de una aplicación de correo electrónico, en la pantalla aparecerá una línea de asunto.

---

5 Pulse  para acceder al submenú.

---

6 Pulse  o  para ir a `Eliminar`. Pulse  para seleccionar.

---

7 Pulse  o  para elegir `Sí`. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso positivo. La pantalla vuelve al buzón.

---

## Eliminación de todos los mensajes de texto desde el buzón

Siga el procedimiento para eliminar todos los mensajes de texto desde el buzón de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).

- Pulse  para acceder al menú.

---

2 Pulse  o  para ir a `Mensajes`. Pulse  para seleccionar.

---

3 Pulse  o  para ir a `Buzón`. Pulse  para seleccionar.

Si el buzón está vacío:

- La pantalla muestra `Lista vacía`.
  - Suena un tono.
-

4 Pulse  o  para ir a **Eliminar todo**. Pulse  para seleccionar.

5 Pulse  o  para elegir **Sí**. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso positivo.

## Envío de mensajes de texto

Cuando se envía un mensaje a otra radio, este se guarda en la carpeta Enviados. El último mensaje de texto enviado siempre se añade al principio de la carpeta Enviados. Puede enviar, transmitir, editar o eliminar un mensaje de texto enviado.

La carpeta Enviados es capaz de almacenar los 30 últimos mensajes enviados como máximo. Cuando esté llena, el siguiente mensaje de texto que se envíe sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

Si sale de la pantalla de envío de mensajes mientras se envía el mensaje, la radio actualiza el estado del mensaje

en la carpeta Enviados sin realizar ninguna indicación en la pantalla ni mediante un sonido.

Si la radio cambia de modo o se apaga antes de que se actualice el estado del mensaje en la carpeta Enviados, la radio no puede terminar de enviar los mensajes en curso y los marca automáticamente con un icono de **error de envío**.

La radio admite un máximo de cinco mensajes en curso al mismo tiempo. En este tiempo, la radio no puede enviar mensajes nuevos y los marca automáticamente con un icono de **error de envío**.

Si mantiene pulsado  en cualquier momento, la radio volverá a la pantalla de inicio.

### NOTA:

Si el tipo de canal (por ejemplo, un canal digital convencional o Capacity Plus) no coincide, solo podrá editar, transferir o borrar un mensaje enviado.

## Visualización de mensajes de texto enviados

Siga el procedimiento para ver los mensajes de texto enviados en la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

3 Pulse  o  para ir a Enviados. Pulse  para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra *Lista vacía*.
- Si el tono de teclado está activado, sonará un tono bajo.

4 Pulse  o  para ir al mensaje que desee. Pulse  para seleccionar.

El icono situado en la esquina superior derecha de la pantalla indica el estado del mensaje. Consulte [Iconos de Enviados](#).

## Envío de mensajes de texto enviados

Siga el procedimiento para enviar mensajes de texto enviados con la radio.

Si está viendo un mensaje enviado:

1 Pulse  .

2 Puede reenviar o transferir el mensaje de texto enviado. Lleve a cabo una de las siguientes acciones:

-  para ir a Reenviar. Pulse  para seleccionar.
-  para ir a Transferir. Pulse  para seleccionar.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

3 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono.

- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono.
- La pantalla muestra un aviso pequeño negativo.
- La radio accede a la pantalla de la opción Reenviar. Consulte [Reenvío de mensajes de texto en la página 164](#) para obtener más información.

---

## Eliminación de los mensajes de texto enviados desde la carpeta Enviados

Siga el procedimiento para eliminar los mensajes de texto enviados de la radio desde la carpeta Enviados.

Si está viendo un mensaje enviado:

- 1 Pulse  .
- 2 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

## Eliminación de todos los mensajes de texto enviados desde la carpeta Enviados

Siga el procedimiento para eliminar todos los mensajes de texto enviados de la radio desde la carpeta Enviados.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.
- 2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.
- 3 Pulse  o  para ir a Enviados. Pulse  para seleccionar.

Si la carpeta Enviados está vacía:

- La pantalla muestra Lista vacía.
- Suena un tono.

- 4 Pulse  o  para ir a **Eliminar todo**. Pulse  para seleccionar.

- 5 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para elegir **Sí**. Pulse  para seleccionar.  
La pantalla muestra un pequeño aviso positivo.
- Pulse  o  para seleccionar **No**. Pulse  para seleccionar.  
La radio vuelve a la pantalla anterior.

## Mensajes de texto guardados

Puede guardar un mensaje de texto para enviarlo más adelante.

Si al pulsar el botón **PTT** o cambiar de modo, la radio sale de la pantalla de escritura/editación de mensajes de texto mientras está escribiendo o editando un mensaje de texto, el mensaje de texto actual se guardará automáticamente en la carpeta Borrador.

El último mensaje de texto guardado se añade siempre al principio de la lista Borrador.

La carpeta Borrador almacena los diez últimos mensajes guardados como máximo. Cuando la carpeta está llena, el siguiente mensaje de texto que se guarde sustituirá automáticamente al mensaje de texto más antiguo de la carpeta.

## Visualización de mensajes de texto guardados

Siga el procedimiento para ver los mensajes de texto guardados en la radio.

- 1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado.  
Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

- 2 Pulse  o  para ir a **Mensajes**. Pulse  para seleccionar.

3 Pulse  o  para ir a Borradores. Pulse  para seleccionar.

---

4 Pulse  o  para ir al mensaje que desee. Pulse  para seleccionar.

---

## Edición de mensajes de texto guardados

Siga el procedimiento para editar los mensajes de texto guardados en la radio.

1 Pulse  mientras visualiza el mensaje.

---

2 Pulse  o  para ir a Editar. Pulse  para seleccionar.

Aparece un cursor intermitente.

---

3 Utilice el teclado para escribir el mensaje.

Pulse  para desplazarse un espacio hacia la izquierda.

Pulse  o  para desplazarse un espacio hacia la derecha.

Pulse  para borrar los caracteres no deseados.

Mantenga pulsado  para cambiar el método de introducción de texto.

---

4 Pulse  cuando termine de redactar el mensaje. Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Enviar. Pulse  para enviar el mensaje.
  - Pulse . Pulse  o  para elegir entre guardar o borrar el mensaje. Pulse  para seleccionar.
- 

## Eliminación de mensajes de texto guardados desde la carpeta Borrador

Siga el procedimiento para eliminar los mensajes de texto guardados del borrador de la radio.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

3 Pulse  o  para ir a Borradores. Pulse  para seleccionar.

4 Pulse  o  para ir al mensaje que desee. Pulse  para seleccionar.

5 Pulse  o  para ir a Eliminar. Pulse  para eliminar el mensaje de texto.

## Mensajes de texto rápidos

La radio admite un máximo de 50 mensajes de texto rápidos, que es la configuración programada por el distribuidor.

Mientras se predefinen los mensajes de texto rápido, puede editar cada mensaje antes de enviarlo.

## Envío de mensajes de texto rápidos

Siga el procedimiento para enviar mensajes de texto rápidos predefinidos de la radio a alias predefinidos.

1 Lleve a cabo una de las siguientes acciones:

- Pulse el botón **Mensaje txt** programado. Continúe con el paso [paso 3](#).
- Pulse el botón de **acceso de marcación rápida** programado. Continúe con el paso [paso 6](#). La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.
- Pulse  para acceder al menú.

2 Pulse  o  para ir a Mensajes. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Texto rápido. Pulse  para seleccionar.

---

4 Pulse  o  para ir al mensaje de texto rápido que desee. Pulse  para seleccionar.

---

5 Realice el siguiente procedimiento para seleccionar el destinatario y enviar el mensaje.

La pantalla muestra un aviso pequeño de transición, que confirma que se está enviando el mensaje.

---

6 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.
  - La radio accede a la pantalla de la opción Reenviar. Consulte [Reenvío de mensajes de texto en la página 164](#) para obtener más información.
- 

## Configuración de la introducción de texto

La radio le permite configurar texto diferente.

Puede configurar los siguientes ajustes para introducir texto en la radio:

- Predicción de palabras
- Palabra correcta
- Frase en mayúscula
- Mis palabras

La radio es compatible con los siguientes métodos de introducción de texto:

- Números
- Simbología

- Predictivo o multipulsación
- Idioma (si está programado)

**NOTA:**

Pulse  en cualquier momento para volver a la pantalla anterior o mantenga pulsado  unos segundos para volver a la pantalla de inicio. La radio sale de la pantalla actual cuando el temporizador de inactividad se agota.

## Activación o desactivación de la corrección de palabras

Ofrece opciones de palabras alternativas cuando el diccionario integrado no reconoce la palabra introducida en el editor de texto.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Palabra Co. Pulse  para seleccionar.

---

- 6 Lleve a cabo una de las siguientes acciones:

- Pulse  o  para ir a Palabra Co. Pulse  para seleccionar.
  - Pulse para activar Palabra Co. Si está activado,  aparece junto a Activado.
  - Pulse para desactivar Palabra Co. Si se desactiva,  junto a Activado desaparece.
-

## Activación o desactivación de la predicción de palabras

**Predicción de palabras:** La radio puede aprender secuencias de palabras comunes que introduce con frecuencia. A continuación, predice la siguiente palabra que quizás desee utilizar después de introducir la primera letra de una secuencia de palabras comunes en el editor de texto.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

- 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

- 5 Pulse  o  para ir a Pred. palabras.  
Pulse  para seleccionar.
- 

- 6 Lleve a cabo una de las siguientes acciones:
    - Pulse  para activar la predicción de palabras. Si está activado, ✓ aparece junto a Activado.
    - Pulse  para deshabilitar el control de distorsión dinámica del micrófono. Si se desactiva, ✓ junto a Activado desaparece.
- 

## Frase en mayúscula

Esta función se utiliza para activar automáticamente el uso de mayúscula en la primera letra de la primera palabra de cada frase nueva.

- 1 Pulse  para acceder al menú.
-

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada de texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Frase mayús. Pulse  para seleccionar.

---

6 Lleve a cabo una de las siguientes acciones:

- Pulse  para activar la frase en mayúscula. Si está activado,  aparece junto a Activado.
  - Pulse  para desactivar la frase mayúscula. Si se desactiva,  junto a Activado desaparece.
- 

## Visualización de palabras personalizadas

Puede agregar sus propias palabras personalizadas al diccionario integrado de la radio. La radio mantiene una lista que contiene estas palabras.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada de texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.

---

- 6 Pulse  o  para ir a Lista de palabras. Pulse  para seleccionar. La pantalla muestra la lista de palabras personalizadas.
- 

## Edición de palabras personalizadas

Puede editar las palabras personalizadas guardadas en la radio.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
- 
- 3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.
- 

- 4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.
- 

- 5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.
- 

- 6 Pulse  o  para ir a Lista de palabras. Pulse  para seleccionar. La pantalla muestra la lista de palabras personalizadas.
- 

- 7 Pulse  o  para seleccionar la palabra deseada. Pulse  para seleccionar.
- 

- 8 Pulse  o  para ir a Editar. Pulse  para seleccionar.
- 

- 9 Utilice el teclado para editar la palabra personalizada.

- Pulse  para desplazarse un espacio hacia la izquierda.
- Pulse la tecla  para desplazarse un espacio hacia la derecha.
- Pulse la tecla  para borrar cualquier carácter no deseado.
- Mantenga pulsado  para cambiar el método de introducción de texto.

**10** Pulse  cuando haya terminado la palabra personalizada.

La pantalla muestra un pequeño aviso de transición, que confirma que se ha guardado la palabra personalizada.

- Si se guarda la palabra personalizada, suena un tono y la pantalla muestra un pequeño aviso positivo.
- Si no se guarda la palabra personalizada, suena un tono bajo y la pantalla muestra un aviso pequeño negativo.

## Adición de palabras personalizadas

Puede agregar palabras personalizadas al diccionario integrado de la radio.

**1** Pulse  para acceder al menú.

**2** Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

**3** Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

**4** Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

**5** Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.

- 6 Pulse  o  para ir a Nueva palabra. Pulse  para seleccionar.

La pantalla muestra la lista de palabras personalizadas.

---

- 7 Utilice el teclado para editar la palabra personalizada.
- Pulse  para desplazarse un espacio hacia la izquierda.
  - Pulse la tecla  para desplazarse un espacio hacia la derecha.
  - Pulse la tecla  para borrar cualquier carácter no deseado.
  - Mantenga pulsado  para cambiar el método de introducción de texto.
- 

- 8 Pulse  cuando haya terminado la palabra personalizada.
- 

La pantalla muestra un pequeño aviso de transición, que confirma que se ha guardado la palabra personalizada.

- Si se guarda la palabra personalizada, suena un tono y la pantalla muestra un aviso pequeño positivo.
- Si no se guarda la palabra personalizada, suena un tono bajo y la pantalla muestra un aviso pequeño negativo.

## Eliminación de una palabra personalizada

Siga el procedimiento para eliminar las palabras personalizadas guardadas en la radio.

- 1 Pulse  para acceder al menú.
- 

- 2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.
-

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a Mis palabras. Pulse  para seleccionar.

---

6 Pulse  o  para seleccionar la palabra deseada. Pulse  para seleccionar.

---

7 Pulse  o  para ir a Eliminar. Pulse  para seleccionar.

---

8 Seleccione una de las siguientes.

- En ¿Borrar entrada?, pulse  para seleccionar Sí. La pantalla muestra Entrada eliminada.

- Pulse  o  para seleccionar No. Pulse  para volver a la pantalla anterior.
- 

## Eliminación de todas las palabras personalizadas

Siga el procedimiento para eliminar todas las palabras personalizadas del diccionario integrado de la radio.

1 Pulse  para acceder al menú.

---

2 Pulse  o  para ir a Herramientas. Pulse  para seleccionar.

---

3 Pulse  o  para ir a Config. radio. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Entrada texto. Pulse  para seleccionar.

---

5 Pulse  o  para ir a **Mis palabras**. Pulse  para seleccionar.

---

6 Pulse  o  para ir a **Eliminar todo**. Pulse  para seleccionar.

---

7 Lleve a cabo una de las siguientes acciones:

- En **¿Borrar entrada?**, pulse  para seleccionar **Sí**. La pantalla muestra **Todas las entradas eliminadas**.
  - Pulse  o  para elegir **No** y volver a la pantalla anterior. Pulse  para seleccionar.
- 

## Asignaciones de tarea

Esta función permite que la radio reciba mensajes del despachador que enumeran las tareas que se deben realizar.

### NOTA:

Esta función se puede personalizar a través de CPS de acuerdo con los requisitos del usuario. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información.

Hay dos carpetas que contienen diferentes fichas de trabajo:

### Mis tareas

Contiene fichas de trabajo personalizadas asignadas al ID de usuario con el que ha iniciado sesión.

### Tareas compartida

Contiene fichas de trabajo compartidas asignadas a un grupo de personas.

Puede responder a las Fichas de trabajo con el fin de ordenarlas en las carpetas de Fichas de trabajo. De forma predeterminada, las carpetas son **Todas**, **Nueva**, **Empezada** y **Completada**. Consulte con su distribuidor o administrador del sistema para obtener 10 carpetas más.

### NOTA:

Las fichas de trabajo se conservan incluso después de apagar y volver a encender la radio.

Todas las fichas de trabajo se encuentra en la carpeta **Todas**. En función de cómo esté programada la radio, las fichas de trabajo se ordenan por su nivel de prioridad

seguido de la hora de recepción. En primer lugar aparecen las fichas de trabajo nuevas, las fichas de trabajo con un cambio reciente de estado y las fichas de trabajo con prioridad alta. Tras alcanzar el número máximo de Fichas de trabajo, la siguiente Ficha de trabajo sustituirá automáticamente a la última Ficha de trabajo de la radio. La radio admite un máximo de 100 o 500 fichas de trabajo, dependiendo del modelo. Póngase en contacto con el distribuidor o el administrador del sistema para obtener más información. La radio detecta y descarta automáticamente las fichas de trabajo duplicadas con el mismo ID.

Según la importancia de las fichas de trabajo, el despachador les añade un nivel de prioridad. Hay tres niveles de prioridad: Prioridad 1, Prioridad 2 y Prioridad 3. El nivel de prioridad más alto es 1 y el más bajo, 3. También hay fichas de trabajo que no tienen prioridad.

La radio se actualiza en consecuencia cuando el despachador realiza los siguientes cambios:

- Modificar el contenido de las fichas de trabajo.
- Agregar o editar el nivel de prioridad de las fichas de trabajo.
- Mover las fichas de trabajo de una carpeta a otra.
- Cancelar las fichas de trabajo.

[Enviar comentarios](#)

## Acceso a la carpeta de Fichas de trabajo

Siga el procedimiento para acceder a la carpeta Fichas trab.

- 1 Lleve a cabo una de las siguientes acciones:
  - Pulse el botón **Est. Trab.** programado. Continúe con el paso [paso 3](#).
  - Pulse  para acceder al menú.

---
- 2 Pulse  o  para ir a Fichas trab. Pulse  para seleccionar.
 

---
- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.
 

---
- 4 Pulse  o  para seleccionar la ficha de trabajo deseada. Pulse  para seleccionar.
 

---

## Inicio o cierre de sesión en el servidor remoto

Esta función le permite iniciar y cerrar sesión en el servidor remoto utilizando su ID de usuario.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para Iniciar sesión. Pulse  para seleccionar.

Si ya ha iniciado sesión, el menú muestra Cerrar sesión.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

- 
- 3 Espere a que se produzca la confirmación.  
Si es correcta:
    - Suena un tono indicador positivo.
    - La pantalla muestra un pequeño aviso positivo.
 Si no es correcta:
    - Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.

## Creación de fichas de trabajo

La radio puede crear fichas de trabajo, basadas en una plantilla de ficha de trabajo, y enviar las tareas que deben realizarse.

Es necesario un software de programación de CPS para configurar la plantilla de la ficha de trabajo.

- 1 Pulse  para acceder al menú.
- 
- 2 Pulse  o  para ir a Fichas de trabajo. Pulse  para seleccionar.
- 
- 3 Pulse  o  para Crear ficha. Pulse  para seleccionar.

## Respuesta a las asignaciones de tarea

Siga el procedimiento para responder a las asignaciones de tareas con la radio.

- 1 Pulse  para acceder al menú.

---

- 2 Pulse  o  para ir a Fichas de trabajo.  
Pulse  para seleccionar.

---

- 3 Pulse  o  hasta llegar a la carpeta que desee. Pulse  para seleccionar.

---

- 4 Pulse  o  para seleccionar la ficha de trabajo que desee. Pulse  para seleccionar.

---

- 5 Pulse  una vez más para acceder al submenú.  
También puede pulsar la tecla del número correspondiente (1-9) para dar una **respuesta rápida**.

- 6 Pulse  o  para seleccionar la ficha de trabajo que desee. Pulse  para seleccionar.  
La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

---

- 7 Espere a que se produzca la confirmación.  
Si es correcta:
  - Suena un tono indicador positivo.
  - La pantalla muestra un pequeño aviso positivo.Si no es correcta:
  - Suena un tono indicador negativo.
  - La pantalla muestra un aviso pequeño negativo.

## Envío de asignaciones de tarea utilizando una plantilla de asignaciones de tarea

Si la radio está configurada con una plantilla de fichas de trabajo, lleve a cabo las siguientes acciones para enviar la ficha de trabajo.

1 Utilice el teclado para escribir el número de habitación que desee. Pulse  para seleccionar.

---

2 Pulse  o  para ir a Estado habitación. Pulse  para seleccionar.

---

3 Pulse  o  hasta llegar a la opción deseada. Pulse  para seleccionar.

---

4 Pulse  o  para ir a Enviar. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

---

5 Espere a que se produzca la confirmación.

Si es correcta:

- Suena un tono indicador positivo.
- La pantalla muestra un pequeño aviso positivo.

Si no es correcta:

- Suena un tono indicador negativo.

- La pantalla muestra un aviso pequeño negativo.
- 

## Envío de asignaciones de tarea utilizando más de una plantilla de asignaciones de tarea

Si la radio está configurada con más de una plantilla de fichas de trabajo, lleve a cabo las siguientes acciones para enviar las fichas de trabajo.

1 Pulse  o  hasta llegar a la opción deseada. Pulse  para seleccionar.

---

2 Pulse  o  para ir a Enviar. Pulse  para seleccionar.

La pantalla muestra un pequeño aviso de transición que indica que la solicitud está en curso.

---
